Subscription Price

Payable in advance

Annual subscription price, postpaid, in the United States, Canada, Mexico, Cuba, Porto Rico, Hawaii, the Philippines, Guam, Tutuila, Shanghai, Panama, and the Canal Zone, $2.00; six months, $1.00; three months, 50 cents. For Canada add 45 cents and for all other countries 95 cents annually for postage. For subscriptions in quantities please refer to page four in THE CHRISTIAN SCIENCE JOURNAL.

Subscriptions to the SENTINEL are entered only from the first of the month and will begin with current month unless otherwise specified. Subscriptions terminate with the last of the month named on the wrapper at the left below the name and address. The Roman numeral XVI indicates the year 1916; XVII is used for the year 1917. This notation and the delivery of the periodical will indicate that a remittance has been credited and will be our acknowledgment of the subscription.

Bound Volumes: Current year or two years previous, cloth, $3.25; half calf or half morocco, $4.00. On earlier volumes write for prices.

Postage required for remailing this copy: 1 cent domestic and Canada; 2 cents other countries.

Entered at Boston, Mass., post-office as second-class matter.

Items of Interest

At a meeting of business men held in Rio de Janeiro, on June 20, a company was formed for the exploitation of a process for preserving meats without the use of refrigeration. Most of the meat consumption of Brazil is in the form of "xarque," jerked beef or "biltong," and the new process is said to produce results almost equal to those of the ordinary refrigerating methods, which are much more costly. The treatment consists of boning the meat and putting it through a certain slight process of salting, then immersing it in special tanks containing a pickle preparation formed of meat juices and melted salt, where it is left for ten days. It is claimed that meat so treated is preserved indefinitely, whether exposed later to air, heat, moisture, or extreme cold. It is said that meat thus prepared has a darkish appearance, similar to that of dried meat, but that once dipped in water it resumes its original appearance.

The Utah Power & Light Company, a subsidiary of the Utah Securities Corporation, has started construction of a fourth hydro-electric development on Bear River at Cove, Idaho. The new plant will have a capacity of 12,000 horse-power. With its completion the company will have utilized 865 feet of 1710 feet of fall in Bear River between Bear Lake and Great Salt Lake. The first hydro-electric plant of the company on Bear River at Grace, sixty miles from Bear Lake, delivers 44,000 horse-power. The second plant is the one at Cove; the third is the Oneida station, of 27,000 horse-power capacity, recently completed. The fourth is at Whelon, and has a capacity of 12,800 horse-power.

According to the Japanese press, the naval leaders of the Empire will insist in the next Diet upon an important building policy. There are five modern superdreadnoughts either built or building in Japan, and, according to forecasts, the navy will request authority to build three more within the next seven years. The program is also said to include two new battle cruisers within the same period. That would give Japan a first line fleet of eight superdreadnoughts and six powerful battle cruisers.

The conference committee of the Senate and House of Representatives are deadlocked on the general dam bill, and it appears that there will be no water-power legislation this session. The two points of difference upon which the conferees are deadlocked are: Federal charge for use of water-power and a separate act of Congress for every dam grant. Both of these are House bill provisions to which the Senate conferees will not agree; both are regarded as essential by the conservationists, especially the first.

The first meeting of the new farm loan board to begin the organization of the Federal land bank system convened at the treasury in Washington, Aug. 7. The first work of the board will be to divide the country into twelve Federal land bank districts, in each of which a bank will be located to furnish loans to farmers under the terms of the act recently passed and approved by President Wilson. Some forty cities have already applied or been recommended for location of banks.

The lumber cut of 1915 by principal kinds compiled by forest service shows that southern yellow pine, with a total cut of 14,700,000,000 board feet, forms 30 per cent of the total, and was more than three times the cut of Douglas fir, the second in size. Oak, white pine, and hemlock are the only other kinds with a showing of more than 2,000,000,000 feet. The total cut of all species is shown as 37,013,294,000 feet. It is believed that at the outside the grand total 1915 lumber cut did not exceed 38,000,000,000 feet.

Annual reports of the Siamese Treasury Savings Bank for the fiscal years 1914 and 1915 show that fair progress has been made in a line of economics quite new to the people of Siam as a whole. During 1914, the year of the bank's opening, the total number of depositors was 634. By March 31, 1915, the number had risen to 1380, with total deposits of 375,614 ticals ($138,977). During 1915 the interest paid to depositors amounted to 6682 ticals ($2472).

Under what is called "The American Plan," a nation-wide campaign has just been launched by the Public Comfort Station Bureau of New York, backed by the American Automobile Association, National Highways Association, National Old Trails Road Association, and other national organizations, to provide roadside stations in cities along all highways, like passenger stations along the right of way of a railway.

An ore dock, costing approximately two million five hundred thousand dollars, will be built by the Duluth, Missabe & Northern Railroad Company at Duluth, Minn. The new dock will be completed so as to be ready for handling ore at the opening of navigation in 1918. It will have 384 pockets, each with a capacity of 350 tons of ore. All machinery on the dock will be electrically operated.

Since the reopening of the Panama canal after having been closed for several months after August, 1915, traffic has gradually and steadily increased. During August, 1915, 170 ships passed through the canal, and the total revenue from tolls collected was somewhat in excess of $500,000. During July, 1916, 75 ships passed through the canal southward and 70 northward. Tolls collected during July for ships passing northward were $215,694.45; collections for ships passing southward were over $240,000.

In connection with Spain's 1917 budget a bill has been introduced for taxing extra profits of companies and individuals. The provisions of the law when enacted will apply equally to Spaniards and foreigners doing business in Spain. This law regards as "extra profits" the difference between the profit which was normally obtained and that obtained since Jan. 1, 1915, and places the "normal profit" at 7 per cent annually on the capital invested.

The International Bank of Costa Rica has thirty rural credit branches, which in the past year have loaned money to farmers with a success that has more than justified their existence. The bank is planning to increase its rural credits fund, if this is approved by Congress, and to establish more branches. A department of mortgages is also planned by the International Bank.

Many bicycles are in use in the Madras Presidency, British India. Custom-house returns show that in the fiscal year ended March 31, 1914 (before the war), 4703 bicycles, valued at $21,310, were imported into the various parts of the Presidency, and that 4090 bicycles, valued at $23,336, were imported in 1914-15.

The Venezuelan budget for the year beginning July 1, 1916, has been passed by the Congress. The total estimated expenditures of $8,520,710 are fully covered by the estimated revenues. The chief source of revenue is the tariff on imports, estimated at $2,026,500 for the coming year.

The discovery of a new diamond field in the Transvaal, about six miles distant from the famous Premier diamond mine and eighteen miles from Pretoria, has been reported. It is stated that the initial finds were exceptionally good.

The announcement has been made that the manufacture of paper pulp from cotton stalks is possible, and that a $10,000,000 corporation has been formed and a site purchased for its first factory at Greenwood, Miss.

The first reading of the bill providing for the sale of the Danish West Indies to the United States was taken up in the Danish Folkething, the lower house of the Rigsdag, Aug. 10.

On Jan. 1, 1916, there was an average of one automobile to every forty-four persons in this country. By Jan. 1, 1917, it is estimated, there will be one for each twenty-five inhabitants.

The total value of the foreign trade of France, exclusive of gold and silver, for the first six months of 1916 was $1,192,104,451, against $963,315,496 for the corresponding period of 1915.

With an export of $112,000,000 in the fiscal year ending June 30, 1916, the United States now ranks second only to the United Kingdom in the cotton markets of the world.

Increase in population in the United States by immigration amounted to only 169,061 during the fiscal year of 1916. The influx of aliens was lower than in eighteen years.

The production of pig-iron in the United States for the year 1915 reached a total of more than 29,900,000 tons.

Saskatchewan, Canada, expects to harvest a wheat crop of 125,000,000 bushels, and nearly as much of oats.

The value of the gold, silver, and lead produced in South Dakota in 1915 amounted to $7,507,782.

There Is No War in Love

WILLARD S. MATTOX

In these days of "wars and rumors of wars," who can doubt that too much of the thought of those "that dwell on the earth" is given over to a saddened contemplation of carnage and destruction; as Keats puts it,—

Hear ye not the hum
Of mighty workings?

There is, however, a metaphysical definition of war which corrects and cures all misconceptions. The fear of war is healed by these words of Mrs. Eddy (Miscellaneous Writings, p. 118): "Be of good cheer; the warfare with one's self is grand; it gives one plenty of employment, and the divine Principle worketh with you,—and obedience crowns persistent effort with everlasting victory. Every attempt of evil to harm good is futile, and ends in the fiery punishment of the evil-doer."

In this passage Mrs. Eddy clearly removes war from the zone of governments or nations to the territory comprised in the individual state of mind called a mortal. In its ultimate rendition, war is seen to be nothing less than the primitive struggle of mankind to be good, to overcome the pretense of evil with the power of Truth. The beloved disciple, on the island of Patmos, was vouchsafed a revelation of this contest between Truth and error. His enlightened thought visioned the seeming combat in heaven, and heaven may be defined scientifically as individual consciousness in which peace and harmony prevail. What John saw was the allegorical strife between the flesh and Spirit, and he also prophesied the final destruction of all error when he said, "Michael and his angels fought against the dragon; and the dragon fought and his angels, and prevailed not; neither was their place found any more in heaven." There is indescribable comfort and confident expectation of the ultimate triumph of good in this spiritual outlook.

Jesus said, "The kingdom of God is within you." This is understood in Christian Science to mean that heaven is an individual reflection of God, which is equivalent to a consciousness of perfection. The heaven of spiritual understanding does not include discord. Against this spiritual comprehension of harmony the belief of evil wages war only to be defeated. Paul says plainly, "For to be carnally minded is death; but to be spiritually minded is life and peace." So then it would appear that all war is, in its last analysis, only a supposititious conflict in the individual understanding called man, between life and a belief of war, or that which is fundamentally opposed to life.

There would be no war if every man obeyed Jesus' commandment, "Thou shalt love thy neighbor as thyself." This means more than the man on the street can comprehend. In the first place, he does not know just what love really is. When Love is known to be divine, perfect, and eternally ever present, the man who is seeking to know more of Truth and Love will love his neighbor as himself. Human love needs to be directed by divine Love, which is never selfish, egotistical, critical, and intemperate, as human love may be.

There is no war in Love, and those who are obedient to the beneficent and considerate law of Love will never be at war with their neighbor. Love promotes peace between men and nations, and the right time will surely come when men will love their neighbor as themselves and nations will be just and fair in their dealings with other nations. Isaiah foresaw the day when war would cease to be, when he said, "And he shall judge among the nations, and shall rebuke many people: and they shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up sword against nation, neither shall they learn war any more." This will be a happy and joyous day for men and nations.

Today Jesus' prophecy is being fulfilled. "For nation shall rise against nation," he declared, "and kingdom against kingdom: and there shall be famines, and pestilences, and earthquakes, in divers places." Mrs. Eddy's explanation of the events now taking place becomes doubly significant. "The hour is come," she says. "The great battle of Armageddon is upon us. The powers of evil are leagued together in secret conspiracy against the Lord and against His Christ, as expressed and operative in Christian Science" (Miscellaneous Writings, p. 177). To this it is apropos to add that "he that runs may read." Diplomats and statesmen, military and naval experts, rulers and lords and governors, may explain the *casus belli* and describe the secret political or sectarian combinations which are supposed to lie back of it, but the metaphysician alone understands. To the materialist who ascribes the present contest to surface causes Jesus would have said, "Ye can discern the face of the sky; but can ye not discern the signs of the times?"

The world of mortal mind should have learned, and would have learned if it had known enough, that war has never supplied the race with a solution of any problem, nor has it ever offered a remedy for any evil. Milton's lines in "Paradise Lost" illustrate this:—

Who overcomes
By force, hath overcome but half his foe.

It has been estimated that during a period of about thirty-three hundred years the world has been permitted to enjoy only three hundred years of peace, as opposed to three thousand years of war, which works out a general average of one year of peace to every ten of war. A writer in the *Revue des Deux Mondes* has called attention to the fact that from 1500 B.C. to 1860 A.D. "more than eight thousand treaties of peace, meant to remain in force forever, were concluded. The average time they remained in force is two years." When it is known that a conservative estimate of the cost of all the wars of history aggregates an almost unthinkable sum, eight hundred billion dollars, the man who thinks may conclude that progress or success by means of war is as futile as the task of Sisyphus.

The very nature of war is to disrupt unity, for it is unity's antithesis. Unity is peace, and war is the opposite of peace. The Christian Scientist knows how impossible it would be for God to be in a world that is at war with itself, for where He is there is peace. In the Mind which is God there are no contests. It follows, then, that a world where war prevails is

Copyright, 1916, by The Christian Science Publishing Society

not the universe which is governed by divine Love. The mortal nature which is at war with immortality is fiction, and is not to be found in the universe of which intelligence is the governor. War typifies the accuser, the adversary, whatever opposes or seeks to destroy the substance of life. War is the enemy of unity and all that unity means.

Carlyle glimpsed the truth when he said, "A mystic bond of brotherhood makes all men one." Mrs. Eddy's spiritual vision was so clear that she was able to write that wonderful passage on page 340 of "Science and Health with Key to the Scriptures" which proclaims a remedy for war, and which is so pregnant with potentiality that it will be memorable long after wars have been forgotten: "One infinite God, good, unifies men and nations; constitutes the brotherhood of man; ends wars; fulfils the Scripture, 'Love thy neighbor as thyself;' annihilates pagan and Christian idolatry,—whatever is wrong in social, civil, criminal, political, and religious codes; equalizes the sexes; annuls the curse on man, and leaves nothing that can sin, suffer, be punished or destroyed."

A Lesson from a Hammer

AMY C. FARISS

READERS of the Bible the world over must surely marvel at the unresponsiveness of the masses in the face of Jesus' wonderful demonstrations of God's presence with men. Instead of mankind's joyous acceptance of the spiritual inheritance which his teachings brought to light, it would seem as if many of them deliberately brought forth any and every argument to discredit the idea that the works bore any relation to our heavenly Father's power and willingness to bless and save.

Speaking of the same trait in mortal consciousness, as Jesus encountered it nineteen centuries ago, our Leader says (Science and Health, p. 330), "Until the author of this book learned the vastness of Christian Science, the fixedness of mortal illusions, and the human hatred of Truth, she cherished sanguine hopes that Christian Science would meet with immediate and universal acceptance." In our turn, following the upward path, we too cherish "sanguine hopes" that the works which are so beautifully clear to us as proof of God's presence in our midst, will be seen and gladly acknowledged by those about us. But, as in the Wayshower's time, the most inconsistent arguments are often advanced in an effort to disprove the divine origin of some given blessing or healing, the whole trend of resisting reason apparently being to see that under no circumstance is God to be credited with infinite power and goodness.

This might be most disheartening to earnest toilers, except for the fact that the human mind has always been slow to yield to any idea not familiar to it; also for the further fact that, however it may linger, its grip on the false is loosened and eventually gives way, and in time it seeks a truer basis of thought. Thus each manifestation of healing and regeneration must combine in a degree to impress itself upon the adamant casing of educated and inherited concepts, even if the outward appearance would lead one to believe that the demonstration had been passed unseen and unnoticed, in the way mortal mind has of affecting to ignore what it hesitates frankly to investigate.

The writer recalls that for many months her trips from city to city brought her into view of the water-front where wharf building was in progress. From the car window the giant hammers which were used to drive the huge piles into place seemed ever to operate to no purpose. A dull thud reached the passengers above the clank and whirr of the train, but from the distance the pile appeared not to give at all. Again and again the hammer was hoisted, and down went the great iron weight. The watchers at the car window could not see that any perceptible advance had been made. Day by day the work went on, until finally it was obvious that more impression had been made than had appeared to be the case. Patiently the hammer did its work, then slowly, ever so slowly, a foundation was laid for a fine big wharf.

The seeming unyieldingness of the piles has come to the writer at times when, caught up in the joy of some wonderful manifestation of the healing Truth, others have apparently failed to see what was so plain to understanding eyes. Possibly if one could see at a closer range, know the inside working of the consciousness which seemed untouched, he might find that there had been some yielding, some slight giving way of resistance. As demonstrations great and small daily and hourly continue to multiply, who can know how secure a foundation for spiritual building may be laid deep down in many unhappy hearts. In the prophecy of Jeremiah we read: "Is not my word like as a fire? saith the Lord; and like a hammer that breaketh the rock in pieces?"

An unknown humorist gained a wide reputation for wit through his knowledge that the human mind would always respond to anything which was brought to its attention often enough. In his first public appearance he told his audience a dry, original tale. No sound of mirth greeted him. Presently he repeated the story. Still no laughter. After rambling on, he went back to his tale. A ripple of merriment began to break out, which with another repetition or two ended in peals of laughter. He had judged aright. From that night he occupied a conspicuous place in the lime-light of public favor, and all because he had driven his remarks home so persistently that at length his listeners found something within themselves responding, in spite of universal stupidity and slow awakening, to a new viewpoint.

We may confidently expect that each separate manifestation of Love will, in spite of unperceiving observers, be stowed away in memory, at last to be understood and appreciated. Today the world is witnessing what would have been termed miracles in Jesus' time, and in many cases witnessing them in silence and with no show of understanding. Recently a Christian Scientist found herself unconsciously becoming involved in a disagreeable transaction. She went to interview one of the people connected with the matter, intending to sever her relation with it, when a volume of smoke came through the door. Entering with the owner of the house, an oil heater was discovered ablaze, the blackest of smoke pouring from it. The frantic attempt of the owner to do something, without knowing what that something was to be, might have been amusing at another time. It was as if she already saw her property destroyed and confusion all about. During those moments the Scientist calmly watched the blaze, making no effort to do anything with hands or voice, but holding fast to the truth that nothing but peace and good and joy can live or thrive in the all-presence of Love.

In that instant the owner of the house witnessed a perfect proof of the power of Mind understood. With one puff the blaze went out, and with the puff the smoke separated itself from the stove and curled harmlessly to the ceiling. So sudden and complete was the extinguishing of the fire, so unusual the disappearance of the smoke, that the Scientist, joyed and uplifted by the quickness and ease of the demonstration, eagerly looked to behold the gratitude and acknowledgment of the other, but instead was met with the incredulous exclamations: "How funny! It went out itself!" Silence fell, and the Scientist still hoped for some token of understanding; but there was none. Just what argument mortal

Digitized by Google

mind used to account for the unexpected ending of the fire it would be difficult to surmise. Certainly no unaided law of so-called natural action was ever known instantly to quench the blaze of a quart or two of burning oil.

As the hammer patiently did its work and in the end accomplished its task, so we may work on in the midst of the unyielding material of set beliefs, joyous that once again God's power is at hand to be used by us to help and bless and heal, as truly and wonderfully as it was when Jesus walked the shores of Galilee. Eventually the piles were all driven in place and a foundation was laid for better work. So one by one incidents such as the foregoing are wedged in memory, sooner or later to be understood. Thus a foundation is laid for future building, a foundation such as only Christian Science can make,—fine and grand and eternal.

THORWALD SIEGFRIED

FINITE, material sense is no less limited and finite in its attitude toward *The Christian Science Monitor* than it is toward any other product of the discovery of Christian Science. If students of Christian Science sometimes express circumscribed beliefs regarding the *Monitor*, it is only proof that the day referred to by Mrs. Eddy on page 584 of Science and Health, in which "the objects of time and sense disappear," has not yet been recognized by them.

Mrs. Eddy's declared purpose in establishing the *Monitor* was to have it "spread undivided the Science that operates unspent" (The First Church of Christ, Scientist, and Miscellany, p. 353). Its method of doing this includes the telling of the world's news so that its readers awake to the fact that only the good is fundamentally true and real, and that the world's story is no less complete and much truer because of the refusal to elevate evil out of its native oblivion. Editorially, the *Monitor* recognizes good wherever it appears, bringing encouragement to many a worthy endeavor to which this recognition is as water in a desert land.

It follows that any use of the *Monitor* based on the belief that it spreads Christian Science only through the article on some particular application of this teaching, as printed on the Home Forum page of each issue, is a very partial, limited, and incomplete use. This is no less true of its use by a student of Christian Science as a part of his own reading than of its use as literature for presentation to others. For example, an editorial commending the good will shown in some human endeavor for the uplift of all men, may be equally useful as a recognition of good in those who may believe themselves opposed to Christian Science on sectarian or other grounds, and also as a reminder to Scientists that individual failure to recognize the budding thought of man's universal brotherhood as of God, is not the sign of mental alertness. So also the presence of news about all right activities, and the absence of so-called news about wrong ones, makes the *Monitor* a daily mentor for the thought of any reader, whatever his religious affiliations may be.

To the seeing eye the leaven of Christian Science is no more absent from the advertising pages of the *Monitor* than from the Home Forum, editorial, news, or sports pages. Falsified and exaggerated advertisements, those offering for sale materials the use of which tends to lower human standards of thinking, those which would be valueless to advertiser, reader, or publisher, have been excluded, and in their place are to be found offerings of things useful, beautiful, and helpful. As its standard of excellence in advertising is always many strides ahead of the average newspaper standard, so its example tends to spread the influence of good to every similar publication.

Account must also be taken of the fact that the *Monitor* and Christian Science itself receive tolerant consideration from that human thought to which a newspaper without advertising would be an anomaly, because the names of reputable business houses appear in its columns; and the names themselves are standing invitations to all readers to fraternize with the advertisers and to prove to them that Christian Science in a man's life is just as useful, beautiful, and true as in the *Monitor*. When that is done, healing in the largest sense of that word will come to the advertiser.

The purpose and use of the advertising pages of the *Monitor* is not so limited and commercial as material sense may aver. It can hardly be assumed that Mrs. Eddy could have looked to advertising to supply a newspaper which was and is to elevate human standards. The seeming difficulty sometimes encountered in detaching the thought of revenue from advertising, ceases when it is recognized as a habit formed by contact with advertising which too often has had no justification but the advertiser's desire to get much and give little. One proof that the *Monitor's* advertising is not primarily designed to produce an income, is to be found in the refusal of that paper to print advertising that will not achieve the results named by the advertiser, however acceptable otherwise.

It may safely be assumed that the *Monitor* could be published without advertising, as the other Christian Science periodicals are; but in this event it would not be a newspaper in the sense that the world knows the term. Its healing agency would, then, not be available for the purifying of the advertising pages of the daily press; it would not have the respectful hearing that it now gets from all classes of readers. The fact that advertisers pay for space in the *Monitor* and find that it pays them in return, proves nothing to the contrary, just as the eating of food is not proof that the life of man has its source in matter. It becomes plain that the *Monitor's* advertising serves a wholly beneficent purpose when it is seen that without this it would fail of recognition as a newspaper, just as Jesus, as Mrs. Eddy says (Science and Health, p. 30), "had his origin and birth been wholly apart from mortal usage, . . . would not have been appreciable to mortal mind as 'the way.'"

Where We Walk

CAROLINE J. BUELL

ONE beautiful July morning I had planned several busy hours in a town three miles distant from the small country resort which I was visiting, so was rowed over the sparkling waters of a beautiful lake to the opposite shore. There I entered a grove where my path was bordered with ferns and mosses, the air redolent with woodland odors and vibrant with the warblings of many feathered songsters. Each minutest expression of the creator seemed to be voicing in unison the psalmist's inspired declaration, "The heavens declare the glory of God; and the firmament showeth his handiwork." The student of Christian Science gladly accepts our Leader's statement on page 240 of Science and Health, where she says, "Nature voices natural, spiritual law and divine Love," and to me this was a supreme moment of awakening appreciation of the privilege and honor of being,—a moment when God's glory, presence, and power were so overwhelmingly apparent that human trials faded before these evidences of His art.

Lifted into loftier desires and broader resolves by this experience, I passed from this inspiring environment out into

Digitized by Google

the open highway, and found myself at the foot of a long, steep hill, confronted by a dusty, stony, treeless road. The sun had by now grown intensely hot and progress was slow and laborious; but the anticipation that at the top of the hill I would find the town, cheered the effort. At last the obnoxious hill was surmounted, but to my dismay the same dusty, stony, glaring road stretched before me an apparently endless distance. The way seemed more unendurable at every step, but suddenly in the midst of the discomfort there came the realization of the lesson in the grove through which I had earlier passed. I looked up from the dusty, stony road which had seemed to demand my closest attention lest I stumble, and a scene of great beauty, of which I had been entirely oblivious, was everywhere in view. Hills, green vales, groves, and fields of grain met the eye in every direction, and I was enabled to "lift up mine eyes unto the hills, from whence cometh my help,"—to walk with them and no longer with the highway.

At an unexpected turning I found myself in the town, and not wearied but refreshed by the trip. I was met by anxious faces and tales of sunstrokes, but as I began at once the work of the day, these expressions of anxiety changed to wonder and astonishment that one could have taken that long walk and appear so fresh and cool. The truth was that I had learned, at least in a degree, that the attitude we take toward every task and experience decides the issue. On page 248 of Science and Health Mrs. Eddy says, "We must first turn our gaze in the right direction, and then walk that way."

Feeling the first divine touch of Christian Science, walking beside its still waters, launching out upon its limpid, beckoning waves of an enlightened sense of life and its present available blessings, passing along the cool and inviting paths of its projecting shade, the new-born Christian Scientist rejoices in its inspiring interpretation of being and stands awed before the revelation of its infinite proofs of God's allness. Sooner or later, however, he is forced through the argument called "circumstance" to step out into the dusty highway of human experience, often to find himself at the foot of a long, steep hill. He finds that he must face its hard, uncompromising ascent,—the dust of superstition, ecclesiasticism, physiology, and *materia medica* clogging each step, stifling breath, menacing his newly gained concept of health and happiness, freedom and usefulness, and the stones of false education cutting sharp and deep.

At such times the student of Christian Science learns that every avenue of his welfare is dependent upon the character and type of his thinking and mental outlook, and not upon the appearance before him or upon the views, acts, or thoughts of others. He therefore turns his gaze from the beaten highway of generally accepted thought and theory, changes his view and ultimately his environment. He refuses to be hampered by the traditional concepts of the past, and knows only the thinking of now and the now of thinking,—thinking right to establish right thinking.

The true Christian Scientist is unwilling to evade any situation for the sake of present, seeming peace. Restraining and overcoming long accepted habits of limiting and depreciating the manifestations of divine Love's all-inclusive presence, he indulges in no personal self-credit for good attained, but walks cheerfully, happily, confidently, the sense of burden lost in apprehension and appreciation of long unobserved blessings. He finds himself rejoicing in the fruit of conquered sin, conquered sense, and arrives at his destination improved, rested, strengthened from each experience, and as a natural consequence in such a condition that others may know the journey has been pleasant and profitable and be aroused to seek the same road.

Thus does thought become clear,—open and receptive to the understanding which reveals how to walk with God, divine Love, in whom "we live, and move, and have our being." Mrs. Eddy, following Jesus' example and directing, has by her unselfed living proven this road, and has led the thousands who are today passing safely and confidently over it. On page 214 of Science and Health she writes, "If Enoch's perception had been confined to the evidence before his material senses, he could never have 'walked with God,' nor been guided into the demonstration of life eternal."

The Divine Fiat

KENNETH B. ELLIMAN

In the Latin Vulgate, the version of the Bible translated by Jerome in the fourth century and regarded as the authorized version for many centuries, part of Genesis i. 3 is rendered "*Fiat lux*," "Let there be light." From this expression arose our English word fiat, meaning a command by virtue of which something is created or done without any further effort.

Christian Scientists find that by the affirmation of truth and the denial of error much can be accomplished in the control and modification of their mental conditions and even of outward circumstances. On account of this discovery, sooner or later there is liable to present itself to their thought the suggestion that power inheres in the mere declaration or verbal fiat. Mrs. Eddy settles this question when she says (Science and Health, p. 451), "Students of Christian Science, who start with its letter and think to succeed without the spirit, will either make shipwreck of their faith or be turned sadly awry."

Some Christian Scientists have been taunted by skeptics who declare that they say a thing is so in order to "make it so." This corresponds possibly to one phase of the temptation pictured in the account of Satan's suggestion to Jesus, "If thou be the Son of God, command that these stones be made bread." And it is undoubtedly the error that underlies those counterfeit systems of metaphysics which attempt to cure disease by the exercise of the human will. It is the claim that the forcible declaration of anything wanted can bring it to pass.

Physical health, financial abundance, and various other material conditions seem so obviously good to the unspiritualized human mind that the temptation to use this weapon is at times very specious, and it needs to be clearly discerned and carefully guarded against. While it is true that a mere discernment and mental recognition of the spiritual truth about an erroneous condition is sometimes insufficient to correct it, and a persistent denial of the error and declara- of the truth is needed to bring about the right manifestation, nevertheless the power that makes this demonstration lies not in the declaration, which is only the instrument, but in the truth that is declared and understood. No erroneous declaration, howsoever firmly believed or oft repeated, can have any real power for good. The declaration of truth does not establish it; it merely keeps it before the human thought and attention until mortal mind yields and accepts the truth which has always existed.

For example, the fundamental teaching of Christian Science is the truth that since God, Spirit, is perfect, His image and likeness, the spiritual and only real man, is also perfect. This always has been true and always will be true, but in human experience there often arise appearances that seem to contradict this eternal truth,—perhaps a person contracts a disease which makes his skin look ugly. In such a case merely to declare with any degree of determination that the

Digitized by Google

patient has a beautiful skin will not cure the disease, because the real man has no material body, and the human fiat has no power in itself. But to turn to divine Mind, recognize man's perfection as Mind's reflection, and to declare this truth understandingly, reenforcing this realization, if necessary, with the persistent declaration, mentally or audibly or both, that man is eternally and completely perfect and therefore cannot manifest any imperfection, is bound to destroy the discordant manifestation and restore harmony.

The latter method succeeds where the former fails, because it rests on understanding the power of eternally established Truth, whereas the former is merely an attempt to bring to pass a human wish, which may be entirely contrary to Truth. The latter is the declaration of a perfect, finished creation; the former is an attempt to substitute one erroneous belief for another. Since God is omnipotent, omnipresent good, the understanding of this truth as taught in Christian Science cannot fail to result in the manifestation of abundance, joy, and harmony in place of poverty, sorrow, and discord. It is the divine fiat which has power; the human will is powerless.

✧

Love Never Faileth

NETTYE NACHMAN

ANIMATED by sacred thoughts and inspired with holy feelings, our revered Leader demonstrated the truth of St. Paul's saying, "Love never faileth" (Rev. Ver.). Through her absolute reliance on God as Love, and through her understanding of so infinite a theme, we, her followers, are enjoying health, happiness, and success in proportion to our acceptance of the truth and our realization of the nothingness of evil. We know there are no failures in divine Truth, and this Truth is all.

Then if aught manifests itself as a belief of failure, it is a wrong thought originating in self, since the real man, the only man, expresses or images forth perfection, for he is like God. God is Love, and Love never faileth; thus it follows that the real man, moving in accord with the Father and having no underived power, cannot fail. If a sense of failure comes in business, in health, in the home, or in any of our human experiences, we must first look within and eliminate that which would keep us from our heavenly harmony, which is here and now for us to enjoy.

Self-examination is absolutely essential, and this may remind us of Mrs. Eddy's admonition to "stand porter at the door of thought" (Science and Health, p. 392). We must pray "with the spirit," and "with the understanding also," as St. Paul said to the Corinthians. Spiritual sense is the manifestation of Love, which is the fulfilling of the law, so that its opposite, hate, with its selfish, headlong ways, is the darkness which we get rid of as we let in the light of Truth when we pray with the spirit and the understanding also. In Science and Health (p. 505) we read that "understanding is the line of demarcation between the real and unreal," so it is ours today to pray with the spirit and with the understanding. We have access to divine Principle to solve every problem, and this being true, failure has no place in Mind, no reality, and belief in it can be promptly, absolutely, and permanently dispelled by the law of ever-present Love, the Love that never faileth.

✧ ✧ ✧

Why fearful be, with God so very nigh?
His care and loving-kindness never cease;
Each hour, safeguarded 'neath His watchful eye,
Thou canst but dwell in confidence and peace.

EDITH L. PERKINS.

Selected Articles

[Judge Clifford P. Smith in *Lowell* (Mass.) *Courier-Citizen*]

A precept written by Mrs. Eddy which has become a rule for Christian Scientists is this: "We entertain due respect and fellowship for what is good and doing good in all denominations of religion, and shun whatever would isolate us from a true sense of goodness in others" (Pulpit and Press, p. 21). The attitude of other religionists toward us is mainly their own concern. Now and then, however, the nature of a sectarian attack on Christian Science in public print may move us to file a protest in the forum of public opinion. Such an instance was furnished by the Baptist minister whose comment on Christian Science the *Courier-Citizen* has just published.

This gentleman's pronouncement that Christian Science is a contradictory and composite compromise, invites a comparison with some criterion of religious teaching and practice. Inasmuch as this assertion was made by a minister of the Christian gospel, it would seem that he as well as Christian Scientists might accept the teaching and practice of Christ Jesus as the standard of religious purity and integrity. Assuming this to be the case, Christian Scientists wish that all men, of every creed or no creed, would compare the teaching and practice of Christian Science with that of Christ Jesus as it is recorded in the New Testament. We would quickly admit that his example is different in degree from any one's effort to follow it, but we would say that his teaching and practice of religion were perfect, and that whichever body of his followers comes nearest to doing likewise is most Christian and nearest right. St. Peter described the ministry of Jesus by saying that he "went about doing good, and healing all that were oppressed of the devil." The Master himself said something to the same effect (see Luke iv. 16-21). Tested by this criterion, Christian Science will at least compare favorably with the Christianity of persons who feel impelled to oppose it.

The same gentleman's more specific comments on Christian Science were equally thoughtless. They can be illustrated and disposed of by taking his remark that Christian Science includes an element of Hindu philosophy. Hinduism is the national religion of India, with which Christian Science has nothing more in common than it has with any other religion sincerely accepted by large numbers of civilized people. As the religion of more than two hundred million persons, most of whom are entirely worthy of respect, Hinduism must be more than the name of a missile to be rudely thrown at something one dislikes. In the articles on this subject in standard works of reference, a Christian Scientist finds one point, but only one, for entire agreement; that is, Hinduism "lays stress on love as a means of salvation." If this should be called Hindu philosophy, a Christian Scientist might accept it nevertheless. But it is to be remembered that the Christian religion originally included this same element. For this reason Mrs. Eddy, with both consistency and fidelity, said to the members of her church (Message for 1901, p. 1): "As Christian Scientists you seek to define God to your own consciousness by feeling and applying the nature and practical possibilities of divine Love: to gain the absolute and supreme certainty that Christianity is now what Christ Jesus taught and demonstrated—health, holiness, immortality."

In this connection it is to be observed that religion can be expressed in universal terms, and in so doing, sympathies which are mainly parochial or sectarian may be given a larger outlook. Thus it can be said that religion as an individual experience always includes two factors: perception of human

Digitized by Google

needs, and belief in a superhuman power, or being, able to supply them. Beginning with these elements, it may be developed with any individual until belief is corrected and completed by spiritual understanding, and every human need is replaced by divine realization. Thus understood, religion is not a concern apart from secular affairs, but is a way of thinking and living that should pervade a man's entire activity and should enlarge his dominion over every circumstance adverse to his actual welfare. The system of religion which is at once most spiritual and most practical is the one which enables its adherents most clearly to perceive their actual needs and most fully supply them by recourse to the law and power of infinite good. Hence Mrs. Eddy's words in Science and Health (p. 494) are finding a response from the heart of universal humanity: "Divine Love always has met and always will meet every human need."

✧

[S. T. Downs in *Indianapolis* (Ind.) *Star*]

There is a somewhat common notion that Christian Science is a kind of competitor of *materia medica* and other methods of treating the sick, and that physical healing is its sole mission. This sentiment was expressed by a Jewish rabbi in another city while discussing a popular play in which gladness is the keynote, and his remarks were referred to in your paper. He said that if we had more gladness in our homes and lives "we would in time close half our reformatories, hospitals, and sanitariums, half our medical schools and Christian Science churches and drug stores, and we would put half our physicians and lawyers out of practice."

I do not care to discuss the play in question, but I do want to point out that Christian Science is the most extensive and consistent preacher of the gospel of gladness, joy, and sunshine of modern times, and it is a fact of frequent comment that Christian Scientists are the happiest people in the world. If any one questions this, he should attend a Sunday or a Wednesday evening service of a Christian Science church, and he will find that the happy faces of the crowds will quickly dispel his doubts.

The primary object of Christian Science is not to heal sickness, since such healing is but the sign following the destruction of sin. One hears Christian Scientists talk quite as much of freedom from the "burden of sin," the "spirit of heaviness," and the "shade of gloom" as of the healing of pain and physical suffering. It will be seen that instead of the gospel of joy and gladness diminishing the number of Christian Science churches, the larger the number of such churches the more these very desirable qualities will be preached and practised.

✧

[Ezra W. Palmer in *Rocky Mountain News*, Denver, Col.]

In a sermon as reported in your department of religion and social service, the clergyman in criticizing Christian Scientists said that "their denial of a personal God makes the term a mockery." Contrary to this clergyman's statement, Christian Science does not teach the denial of a personal God. Christian Scientists accept the Standard dictionary's definition of God as "the one Supreme Being, self-existent and eternal." But their God is not finite, nor is He fashioned as a physical personality. In Science and Health we read (p. 116), "If the term personality, as applied to God, means infinite personality, then God *is* infinite *Person*,—in the sense of infinite personality, but not in the lower sense."

Another writer objects because I used this expression in a previous article: "To the senses the son of the widow of Nain seemed to be dead, but Jesus knew otherwise." This critic carefully avoided my further reference to the raising of Lazarus from the dead when Jesus said, "Our friend Lazarus sleepeth; but I go, that I may awake him out of sleep." When Jesus raised the ruler's daughter from the dead he used a similar expression, "The maid is not dead, but sleepeth." Because Jesus said this, the narrator states, "they laughed him to scorn." Is it possible that this critic of Christian Science believes that the son of the widow of Nain was in a different state from Lazarus or the ruler's daughter? The Scriptures do not so state.

✧

[H. R. Colborne in *The Sun*, Sydney, New South Wales]

Christian Science does not teach that the thoughts of mortals heal the sick, but it does teach that the sick were healed in the first century, and for some two or three centuries, by Jesus and his followers, and that they were healed in accordance with an ever-operative, divine, spiritual law. In "Science and Health with Key to the Scriptures" (p. 459) Mrs. Eddy says: "Any attempt to heal mortals with erring mortal mind, instead of resting on the omnipotence of the divine Mind, must prove abortive;" and again (p. 78): "Spirit blesses man, but man cannot 'tell whence it cometh.' By it the sick are healed, the sorrowing are comforted, and the sinning are reformed. These are the effects of one universal God, the invisible good dwelling in eternal Science."

To say that the death of any one was caused by Christian Science is about as rational as to say that the bankruptcy and failure of a merchant who did not keep correct accounts was caused by the principle of mathematics. The Principle of Christian Science is absolute and correct, and no more fails when correctly understood and applied than the basic law of mathematics. If failures occur, these are due to a lack of understanding and application of Principle.

There are thousands of people today rejoicing in robust health and going about the world doing their work as sane men, who, according to the verdict of the ordinary medical theories, should have long since passed away.

✧

[Thomas E. Boland in *Meadville* (Pa.) *Tribune-Republican*]

Christ Jesus was the model Christian of all time. He was such because he possessed the knowledge of God which enabled him to see things in their true relationship to one another. His spiritual understanding was used to acquaint mortals with the goodness, wisdom, justice, mercy, love, and power of God. His teachings were impressed upon human comprehension by the most remarkable object-lessons the world ever saw. Jesus' works in proof of God's omnipotence and availability showed how null and void were the accepted beliefs of mankind relative to the power of sin, sickness, disease, deformity, and even the "last enemy" itself.

Today Christian Science is teaching God's immanence, power, and goodness. It is teaching that God's creation is entirely good, as is stated in the first chapter of Genesis. It is teaching that evil is not and can not be a part of God's creation or plan; that evil in none of its many phases actually has any source or inherent power or activity of its own, and therefore is not able, when so detected and understood, to govern or injure man. Christian Science is proving that when the false nature of evil is understood, it is as powerless now as in Jesus' time, for this faith is regenerating the sinner, healing the sick, and releasing the suffering through spiritual means. On page 97 of "Science and Health with Key to the Scriptures" Mrs. Eddy has well said, "Christianity is again demonstrating the Life that is Truth, and the Truth that is Life, by the apostolic work of casting out error and healing the sick."

Christian Science acknowledges the immaculate conception

Digitized by Google

of Jesus and the divinity of the Christ-nature that animated him, which Mrs. Eddy has perfectly expressed in Science and Health (p. 25): "The divinity of the Christ was made manifest in the humanity of Jesus." It also accepts the whole Bible, including the accounts of the ministry, crucifixion, atonement, resurrection, and ascension of Jesus the Christ, although in some respects it does not agree entirely with present-day theological views.

When, therefore, the critic declares that this religion antagonizes "every fundamental of the gospel of Christ," it is impossible to see where any basis for such an assertion is to be found. Christian Science closely follows the Bible, and especially the gospels. It does not accept today's theology in every detail; but theology changes, while, as Peter declared, "the word of God . . . abideth forever." It is certain that Christian Science differs from prevalent theology in the vital matter of spiritual healing, so continuously emphasized by the Saviour but discarded now as a practice by theologians. This, however, can hardly be urged as an objection to Christian Science without also criticizing the work of the great Nazarene himself. Only recently another minister in a near-by city frankly declared, "Many churches, indeed, have become dry as dust in their practical services to the lost world, and some of them more than dry in their spiritual beliefs and works." Such a condition all Christians, regardless of denomination, would surely wish to see remedied, and Christian Science is a genuine and remarkably successful attempt to restore the simple, practical, sufficient truth which Christ Jesus taught, and so to revitalize religion.

In the mean time it may be well to bear in mind that no church hastens the fulfilment of Jesus' petition, "Thy kingdom come," by endeavoring to pull down another church.

✧

[Hector Wallace Smith in *The Shetland Times*, Lerwick, Scotland]

The critic's assertions at a meeting of the P. S. A. Brotherhood, that Christian Science is opposed to all the teachings of Christ and his followers and is largely a delusion which only deceives the ignorant, are not only wholly incorrect, but display a lamentably deficient knowledge of the practical side of the Christian Science movement.

Mrs. Eddy has written the following words on page 136 of "Science and Health with Key to the Scriptures": "Jesus established his church and maintained his mission on a spiritual foundation of Christ-healing. He taught his followers that his religion had a divine Principle, which would cast out error and heal both the sick and the sinning." Christian Science is founded upon the teachings and also the works of Christ Jesus as recorded in the gospels, and the sole test of the truth of this Science of the Christ is the very one which Jesus himself laid down when he said, "By their fruits ye shall know them." These fruits are, of course, the results brought about by Christian Science healing, and they are known today in every quarter of the globe.

Every honest inquirer and sincere seeker after Truth is invited and given every facility thoroughly to investigate such cases for himself. Today the ranks of Christian Science are filling up rapidly with bright, happy, and intelligent people, gathered from all nations and tongues, and they are by no means existing under any delusions whatever about their health. Many of them, after trying many remedies, have at last been healed and restored mentally and physically and morally through the power of Christian Science alone; most of them will declare that it was only after all material means had completely failed, and their condition had been pronounced hopeless, that their freedom in Christian Science was gained by understanding the omnipotence of divine Love.

[DeWitt McMurray in *Dallas* (Texas) *News*]

God Is Love

GREATEST truth of all the ages—
God is Love;
Voiced by prophets or by sages—
God is Love.
To those who with fear are quaking,
To those hearts with sorrow breaking—
Truth to which the world is waking—
God is Love.

To the sick and heavy laden
God is Love;
Those to whom come tears unbidden,
God is Love.
To those who in grief are sighing,
In despair to God are crying,
And on beds of pain are lying,
God is Love.

Love it is that starts them singing—
God is Love;
Love it is the truth is bringing—
God is Love.
Love it is that heals and brightens,
Love our hold on Truth but tightens,
And the heavy burden lightens—
God is Love.

Those in doubt will find with gladness
God is Love,
And in joy forget their sadness—
God is Love.
Love is Life, and Truth, and power,
Love our rock and our high tower;
Love is with us every hour—
God is Love.

By still waters Love is leading—
God is Love;
And the hungry, Love is feeding—
God is Love.
'Long life's devious paths Love guideth,
When in God the heart confideth;
Yea, in Love God's child abideth—
God is Love.

Every heartache Love will banish—
God is Love.
Every ill and grief will vanish—
God is Love.
For those whom error hath affrighted
Valleys dark by Love are lighted—
'Tis by Love all wrongs are righted—
God is Love.

Let us then forget our sadness—
God is Love.
Let this truth turn grief to gladness—
God is Love.
Let our love for man grow dearer;
Heaven itself will then draw nearer,
And the dawn of Truth grow clearer—
God is Love.

Editorial

Truth the Best Preventive

In these days of much education along the lines of public health, and especially that phase of the subject which has been termed "preventive medicine," it is noticeable that not even the most sanguine of the advocates of drastic health laws permits himself to prophesy the utter extinction of disease by these methods. To find a whole nation in perfect health would be considered impossible, yet this was precisely the condition of the children of Israel when Moses led them out of Egypt and through the Red Sea toward the land which had been promised them under the divine covenant. The Israelites believed themselves the chosen people of God, and they turned to Him in all their hardships in the land of bondage. He it was, they had been taught, who would rescue them from the unbearable slavery which had been forced upon them, and He it was who would give them a dwelling-place in a land where they would be able to worship Him without hindrance. Through their leaders they had received a revelation from God, and because of their faith in God, and their willingness at that time to obey Him, they were able to take this momentous step.

Although in their journey to the promised land many wonderful things happened, no one incident seems more remarkable to our present-day thinking than the fact that, although they had endured much at the hands of cruel task-masters, when the yoke of bondage was lifted from their necks, every last man, woman, and child was physically able to go forth. No doubt many who have read the 105th psalm failed to appreciate the full significance of a statement contained in the thirty-seventh verse, that "there was not one feeble person among their tribes," and when we stop to inquire the number who took part in this movement, the immensity not only of the movement itself but also of the demonstration of perfect health which had been made, is apparent.

In the book of Numbers it is recorded that of this vast host over six hundred thousand of the men were "from twenty years old and upward," and that this included only those who were "able to go forth to war." Although the number who actually took part in the exodus is nowhere given in the Scriptures, we may through this numbering of the men of war make a reasonable estimate. When we remember that it was not a selected few, but the entire Israelitish population—men, women, and children—who were led out of Egypt, we realize that nothing but the hand of God could have so prepared them for their journey. Christian Scientists believe that this exhibition of perfect health in a whole nation was not a miracle in the sense that it was a setting aside of the universal law of God, but rather that it was in fulfilment of this law. We read that "God is no respecter of persons," and in this case the freedom of these people from feebleness came about through their intimate understanding of God, infinite Mind, and of His omnipotence.

On page 201 of Science and Health Mrs. Eddy writes, "The best sermon ever preached is Truth practised and demonstrated by the destruction of sin, sickness, and death;" and judged by this standard the exodus is worthy of the place it holds in sacred history. If God is the same God that He was in the beginning, then every one of the marvelous occurrences of the Bible is as possible today as it was in the past; and with the same faith and understanding that "the chosen of God" possessed, the needs of humanity will be met now and throughout eternity. It is well to remember, however, that the most wonderful instances of God's ability and willingness to supply their needs and to let His face shine upon them, were vouchsafed not when their aims and desires were circumscribed by material prosperity, pride, and arrogance, but rather when affliction and hardship had weakened and destroyed this personal sense and its consequent dependence upon things material instead of spiritual. In other words, when the futility of human will and human dependence upon material means is recognized, then is mankind more conscious of the omnipotence and omnipresence of God, and then is it realized that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

Christian Scientists never object to strictly sanitary measures which have for their object better health for the community through cleanliness, but beyond that they reserve the right to put their trust in obedience to the laws of Truth, which demand cleanliness of mind as well as body, as the best preventive against sin, disease, and death.

ARCHIBALD MCLELLAN.

Forestalling Error

It is the part of wisdom to destroy evil before it can pass from intent into action, from cause to effect. This forestalling is not an impossible task for the watchful Christian guided by Science, for spiritual truth uncovers evil as lying latent in mortal mind, apparently expecting to translate itself into an accomplished fact at the moment of its own choosing. But the decision should really rest with the righteous metaphysician, for under the guidance of divine Mind he can forestall evil and so prevent its results. The Christian Scientist is fully equipped by the teaching of his faith for prophylactic as well as therapeutic treatment of the world's ill, its sins and sicknesses, woes and wrongs. But an indispensable part of this mental equipment is a willingness to take the human footsteps in their proper order, a readiness to let truth uncover the various claims of evil before taking the final step of proclaiming that there is no evil at all.

The metaphysician, armed with the sword of Truth, can perform great execution in the ranks of evil by baffling its purpose at the start, if called upon to do so, and in this respect "the children of light" can learn from "the children of this world," the spiritual warriors from the soldiers fighting with carnal weapons. Military tactics, for instance, are only the material after-effects of so-called mental activity. All military tactics have lain latent in mortal mind before they have expressed themselves in action, and so they will never cease to have a supposititious existence until they have been forestalled and destroyed at their source by the divine Mind. The practical metaphysician is familiar with so-called counter attacks, with the carnal wish which is father to the thought of poisonous gases, of snipers to pick off the best workers, of shrapnel curtains to cut off those who are in advance, etc. These evil mental methods can be frustrated by the metaphysician who does not make a pretense of being apathetic or agnostic, but is frankly overcoming error with truth.

Right activity alone can unmask the batteries of evil intent before they can move into action. Mrs. Eddy worked out the problem of forestalling error, and urged her followers to do the same whenever wisdom dictated such a course. As an example may be cited her cautioning students against copying from her text-book for the use of Sunday services, except by special permission. Her warning, she writes on page 302 of "Miscellaneous Writings," "was intended to forestall the possible evil of putting the divine teachings contained in 'Science and Health with Key to the Scriptures' into human hands, to subvert or to liquidate." It is largely due to this

Digitized by Google

and similar wise forestalling on her part that the whole of humanity today possesses a carefully guarded and copyrighted book wherein is to be found the revelation of Truth to this age.

Moreover, this method of forestalling error is not a matter of mere self-defense. It has a nobler, wider outlook than the preservation of selfish ease or security, a grander function even than the altogether laudable and legitimate purpose of protection against error. Forestalling can be used not only to save ourselves and our friends, but also to assist those who to human apprehension seem to be our enemies.

Then does the forestalling of error rise to its nobler heights when it blesses those who seem ready to curse us and halts the hand which threatens to stab a friend in the back. This work belongs especially to that love which is a reflection of divine Love. Nothing short of the untainted glory of infinite good can inspire such forestalling as is depicted by Mrs. Eddy's statement on page 107 of "Miscellaneous Writings": "More love is the great need of mankind. A pure affection, concentric, forgetting self, forgiving wrongs and forestalling them, should swell the lyre of human love." Christian Scientists are enabled in this momentous hour to anticipate and prevent the spurious activities of error by the exercise of an irresistible love for God and man.

WILLIAM D. MCCRACKAN.

Light in Our Dwellings

THROUGHOUT the Bible there is no other word which so frequently and fittingly describes the divine presence among men as light. The first creative mandate, "Let there be light," was but the prelude to the wonders of divine revelation in all the ages. That the light of Truth and Love with its life-giving influence was ever obscured to the human sense, was always due to the density of material belief. When, therefore, Christ Jesus said to his followers, "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven," he made an insistent demand that reaches down through the centuries to the present hour.

To the Christian Scientist the "good works" here indicated point distinctly to those done by our Master during the whole period of his earthly ministry, and of which he said, "If I do not the works of my Father, believe me not." These works were possible to Christ Jesus because he always "let" the light of Spirit radiate from him with its healing power. In the Old Testament there are many remarkable experiences given in which the light of Spirit dispelled the darkness of material belief in times of great trial, as for instance during the plagues in Egypt, when "all the children of Israel had light in their dwellings." We are also told that this light did not forsake them, but was with them on all their journey to the promised land.

On page 295 of Science and Health Mrs. Eddy says: "The manifestation of God through mortals is as light passing through the window-pane. The light and the glass never mingle, but as matter, the glass is less opaque than the walls." It therefore rests with each of us to become what she here calls "a better transparency for Truth," in order that its healing power may reach ourselves and others. At the present time there is great need that the gracious promise found in the fourth chapter of Isaiah shall be realized, especially on behalf of the little children, who surely need the light here spoken of. The promise reads that in every dwelling-place in mount Zion the light of the divine presence will come, that even in the deep darkness of night it will be as "the shining of a flaming fire," and that upon all "the glory shall be a defense." Alas, that in a time of need, at any time, the prophet's stern rebuke to a land "full of idols" should in any wise apply to a so-called Christian people, but none can deny that Christendom has drifted far indeed from the teachings of the lowly Nazarene, who said, "Suffer the little children to come unto me."

Christian Science not only teaches but proves that "the law of the Spirit of life in Christ Jesus" makes free from "the law of sin and death" in the case of all who lay hold upon this spiritual law, whether children or adults. In the second book of Samuel we find that on one occasion the people did not wish King David to go out with them to battle, and the reason assigned was this: "That thou quench not the light of Israel." These words may well be pondered by us when popular opinion, resting on a material basis, would shut out the light of Truth and deny its healing power, preferring to rely upon what are admitted to be deadly poisons to preserve life and restore health, wholly forgetful of the rebuke of Christ Jesus, "Ye will not come to me, that ye might have life."

Since the advent of Christian Science the world has had a great increase of light in its dwellings, as apprehended by physical sense, but its greater need is the spiritual sense which discerns all things in the light of Spirit. Our beloved Leader tells us that the Science of being "brings immortality to light" (Science and Health, p. 336); and we can all prove this by having divine Science in our dwellings with its radiance, which is truly far above that of the sun. In the closing chapter of St. John's vision we read of the city lighted by the glory of God, a city in which there were no tears, no sorrow, no pain, and no death; and all who will may have the same light in their dwellings, if they seek it in accordance with the law of divine Love.

ANNIE M. KNOTT.

Among the Churches

Current Notes

BOSTON, MASS.—The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading-rooms: Berkeley Building (suite 306-307), 420 Boylston Street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), southwest corner Devonshire and Milk Streets, opposite post-office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

BARD, CAL.—The Christian Science Society today [June 3] filed articles of incorporation under the laws of California for the purpose of owning real estate and erecting a permanent church building. It has secured a building site which is centrally located and is a very desirable tract, adjoining the town site of Bard. The society was organized on Oct. 7, 1912, and has held services every Sunday since. The members expect to have their own church building completed within ninety days.—*Yuma Examiner.*

PORTLAND, ORE.—First Church of Christ, Scientist, Nineteenth and Everett Streets, was formally dedicated Sunday [June 18], its dedication signifying freedom from debt. The structure was begun in 1909 and completed in 1911.

Portland Journal.

Digitized by Google

ROCKVILLE, IND.—Services were held in the new Christian Science church edifice last Sunday [June 18], for the first time. The building is situated on the northwest corner of York and Market Streets, and originally was a part of the Governor Wright homestead, which stood on Ohio Street. Years ago, part of the house was moved to the present site of the church edifice and was remodeled into a residence. It had become a landmark when the Christian Scientists purchased it last March and started to make it over for a church home. The cost of repairs necessary for remodeling the building has amounted to approximately twenty-two hundred dollars. The terms of a bequest to the church have been complied with, and this bequest, together with the money already raised by the congregation, will entirely liquidate the debt.—*Rockville Tribune.*

CALDWELL, N. J.—Christian Science services were begun in the Essex County penitentiary at Caldwell on Sunday, July 2, with an attendance of one hundred and sixty-five persons. First Churches of Christ, Scientist, of Orange and of Montclair have each appointed readers, to serve alternate months. The services follow the order given in the Manual and are exclusively for the inmates of the penitentiary.

Correspondence.

NEWTON, MASS.—The local Christian Science church will take possession of the so-called Rollins property, located at the corner of Walnut and Otis Streets, Newtonville, comprising about thirty-one thousand square feet of land, when the final papers are passed about May 1. It is not the present intention of the society immediately to erect a church edifice. The property is assessed for fourteen thousand two hundred dollars.—*Newton Times.*

GLENDALE, CAL.—When First Church of Christ, Scientist, meets on Sunday [June 11], it will be in its new church home at the corner of Second and Maryland Streets. The main hall will seat five hundred and twenty-five persons, and when the class-rooms are opened up six hundred can be accommodated.—*Glendale News.*

CHARLESTON, W. VA.—On Sunday, Aug. 6, First Church of Christ, Scientist, will hold services in its new church edifice, which has a seating capacity of about four hundred and fifty. This will be the first structure erected by Scientists in West Virginia.—*Correspondence.*

JACKSON, MISS.—First Church of Christ, Scientist, and the Christian Science Society united on Communion Sunday, July 9, and will hereafter be known as First Church of Christ, Scientist.—*Correspondence.*

✧

Admission to Membership in The Mother Church

The next admission of candidates will be Nov. 3, 1916. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Wednesday, Oct. 11, 1916.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1916, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk,*
Suite 550, 236 Huntington Avenue, Boston, Mass.

The Lectures

Bloomington, Ill.

A large audience gathered in the edifice of First Church of Christ, Scientist, to listen to the lecture given by John W. Doorly. Judge Frederick C. Hill of Clinton introduced the speaker, and in the course of his remarks said:—

In the Declaration of Independence we find these statements: "That all men are created equal; that they are endowed by their creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness." Christian Science affirms the truth regarding these enumerated rights, and adds thereto health and holiness as the legitimate inheritance of every man, woman, and child. Jesus said of his followers, in the parable to the Pharisees, "I am come that they might have life, and that they might have it more abundantly;" and Paul declared, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death." Viewed in the light of these utterances, is it not logical to conclude that the enjoyment of man's "unalienable rights" is not dependent upon the phenomenon of material existence, but is experienced through the knowledge and understanding of the "law of the Spirit of life," which makes mankind free from the "law of sin and death"?

It was this exalted view of Truth that enabled Mrs. Eddy, the Discoverer and Founder of Christian Science, fearlessly to declare, "There is no life, truth, intelligence, nor substance in matter;" also, "Life has no partnership with death" (Science and Health, pp. 468, 243). The carnal mind, content with its conceptions of life, liberty, and happiness, has had little or no concern regarding the real and eternal. Some time, however, the awakening will come; some time humanity will be universally redeemed by Truth. Then the world will experience the full fruition of man's "unalienable rights," and will bow in grateful acknowledgment before Christian Science as the sign of Immanuel, "God with us."—*The Pantagraph.*

✧

Scranton, Pa.

The remarks of L. A. Watres, formerly lieutenant-governor, in introducing Charles I. Ohrenstein, who lectured on Christian Science, were in part as follows:—

Human existence is filled with problems, and Christian Science when understood offers a solution for all of them. But the truth as taught and demonstrated in Christian Science is not new; it is as old as Sinai. It was taught by Moses and the prophets, and perfectly revealed and taught and demonstrated by Jesus the Christ. For centuries the débris of man-made notions covered the truth as taught by the common Lord and Master of us all. But however much it may be hidden, truth itself can never die. It remained for a woman, Mary Baker Eddy, to pick up the jewel that the church years ago rejected; to discover the truth that Jesus taught, and to bring it again to the world, in order that through its understanding the sick might again be healed, sin again be destroyed, tears again be wiped away, and burdens again be lifted.—*Correspondence.*

Richmond, Ky.

Prof. Hermann S. Hering delivered a lecture on Christian Science at the Court House. He was introduced by the Hon. C. C. Wallace, who said in part:—

It is with some diffidence that I appear before this audi-

Digitized by Google

ence to introduce the lecturer of the evening. This is not due, however, to any unworthiness of the sect to which the gentleman belongs and which he represents, or of its teachings, but rather to the fact that I myself belong to another denomination with which I have been identified since childhood, and as yet have not been able fully to grasp the tenets of the Christian Science religion. Notwithstanding this inability, I have watched the course and growth of the Christian Science church, and have been brought into close association with its individual members both here and elsewhere, by reason of which I have been enabled to observe their daily walk before God and man, and it gives me pleasure to testify that I have no criticism whatever to make of the Christian Science religion.

The rapidity with which this denomination has gained membership, the devotion of its members to the work in which they are engaged, coupled with their high character and intelligence,—indeed the general uplift which they have brought about,—have all combined to attract such favorable notice from the world at large that many accessions to its membership in appreciation of its merits may be expected to result.—*The Kentucky Register.*

✧

Ashland, Ore.

The Hon. E. V. Carter in his introduction of Virgil O. Strickler, who lectured on Christian Science at the Elks Temple, said:—

Instinctively we are religious in our natures, and with all of us, whether we are conscious of it or not, there is a desire to live better lives. As we yield to the promptings of this better instinct we are seekers for information and for a better understanding of the various religious beliefs. Christian Science as designated and explained by Mrs. Eddy is not a new religion, but based as it is on the Bible of our forefathers and on that alone, it is a revival, a reaffirmation of the religious truths and practices of two thousand years ago. For fifty years the growth of Christian Science has been steady, of recent years even phenomenal, and its membership now extends to every portion of the civilized world. Surely a religion which promises freedom from sin and sickness; which inspires in one a desire to live a clean life, to think clean thoughts, and to be of service to one's fellow man; which breeds in one a charity for all mankind (not confined to the giving of material means to those less fortunate than we are, but that broader charity as exemplified by the kindly word, the courteous act, the friendly hand-clasp); which sustains and helps and comforts one every day and every hour,—surely a religion that holds out these promises to you and to me should prompt in us a desire to know more of it, to understand it better.—*Correspondence.*

✧

Ridgefield Park, N. J.

A lecture on Christian Science was delivered by George Shaw Cook in the "Strand." He was introduced by the first reader, Hugo Reich, who said:—

The history of humanity is dotted with the records of want and woe of every description. The advance of civilization has not diminished this record to an appreciable extent; on the contrary, we are witnessing the greatest tragedies of all times in the conflict which is raging among the nations of Europe and which is affecting the peoples of the whole world. You will agree with me that a science which will not only show us the origin of these conditions, but at the same time give us a demonstrable knowledge of how to overcome and finally eliminate them, must of necessity arouse the interest of all thoughtful men and women. This science is Christian Science, which has come in the fulness of time because this age was ready for it and because it was in need of it, and this need was supplied through the instrumentality of Mary Baker Eddy, who was sufficiently courageous to stand against overwhelming odds and give to the world this revelation in her various writings in such clear and concise language that we all may imbibe these truths and prove them in our own experience.—*Correspondence.*

Testimonies of Healing

That Christian Science rests upon a logical and practical basis was brought to my attention about three years ago, when for the first time I learned of the two conflicting accounts of the creation in the first and second chapters of Genesis,—one of the spiritual man in the image and likeness of God, and the other of his counterfeit, made of the dust of the ground. I had heard of Christian Science for a number of years before this, but while believing in its healing power I understood nothing of its doctrine.

After getting a slight understanding of the subject I decided to test its efficacy, as I had been a sufferer for ten years from a serious organic trouble for which several of the best physicians in Washington and elsewhere had treated me without permanent benefit, and also had been subject to frequent and severe colds, influenza, and other ailments. Treatment was begun, and immediate improvement, both mental and physical, was experienced. Several months passed before my complete recovery from the organic trouble was accomplished. While at times I felt discouraged, the slow progress had compensation in the helpful instruction received from the practitioner, for which I feel much gratitude. Recently a severe attack of influenza was almost instantaneously overcome, and today my health is perfect.

My mother, who is over seventy years of age, has lately been healed of Bright's disease, from which she had suffered for several years, and is in consequence of this experience an enthusiastic student of Science and Health. Not the least of the benefits received through Christian Science has been the destruction of discord and inharmony in my home and the substitution therefor of more love and peace. I am deeply grateful for what this teaching is doing for me and for the whole world.—Hester Drayton, Washington, D. C.

✧

Further to confirm the efficacy of Christian Science in healing all manner of disease, I gratefully offer my testimony in the hope of convincing some one seeking help and health through the ministration of this truth.

Early in June, 1914, while living in Los Angeles, I was suddenly stricken ill, and being in a delicate condition immediately called a Christian Science practitioner. Treatment was given at once, although the extent of the help received was not realized or appreciated until later. I was visiting a friend at this time, but in an hour or two was able to return home, although in a state of exhaustion. The following day I was still ill, and the next morning, as it was apparent that premature birth would take place, a physician was sent for. With his verdict that I would not live until noon, he was dismissed, and another physician was called. The second doctor gave the same diagnosis, outlining fully the conditions, and was also confident that my life span was limited. He, however, asked permission to call a specialist, one to whom he said he would trust his own wife.

This specialist came, and after a thorough examination confirmed the statements of the other two physicians, agreeing that a capital operation was the only possible means of saving my life. They informed me of my condition and of their decision, stating that if I was not on the operating table in two hours they would not handle the case. At this point I asked to be left alone with the Christian Science practitioner, who was at my side during all this trouble. I asked her to read the ninety-first psalm aloud, and followed as best I could. In a few moments a change in my condition was noticeable. Up to this time I had been having one convulsion after another, but these ceased. The practitioner remained with me during the remainder of the day and well into the night. That evening the second doctor (whose verification of this testimony is appended) called and was amazed to find me on the high road to recovery. The third day I was perfectly and painlessly delivered, and in less than two weeks was able to attend the Wednesday evening meeting. Not a single material remedy was applied in any form, and I have regained and exceeded my former health and weight.

This is not our only experience of healing in the five years we have been studying Christian Science, but one that is worthy of an expression of our deep gratitude for it and for all that has come to us through this truth. Our true appreciation can be expressed only by daily living so that our deeds may attest our worthiness, in thankfulness to God for His wonderful kindness to the children of men and in gratitude to our Leader for revealing this healing Principle to this generation.—Emily G. Williams, Fresno, Cal.

Los Angeles, Cal., Sept. 22, 1914.

To whom it may concern:—

This statement is given and made upon my observation and examination of Mrs. George Williams. My diagnosis was that of an extra-uterine pregnancy. The diagnosis was confirmed by two other physicians. She was in a profound state of collapse when I was called; she was practically exsanguinated and pulseless, and an operation was advised but refused by the patient, and she has made a remarkable recovery. Today she looks better than ever before.

A. C. Smiley, M.D.

✧

With deep gratitude I try to tell of some of the blessings we have received from Christian Science. Some time ago our little boy had a fall, and the right shoulder to sense appeared to be very painful. We read Science and Health, and as we gained consciousness of God's omnipotence the pain apparently left, so the child was put to bed. We tried to "be still" and know he was in Love's keeping, and he went peacefully to sleep. During the evening we asked a Christian Scientist for help, which was most lovingly given. On the second day the child played as usual, the arm being moved about without any sense of pain. He was in the best of health and carried some of his heavy toys around. About three weeks later, as there appeared to be a lump on the collar-bone, we considered it advisable to have this examined to allay our fear, so a doctor was called in. After careful examination he informed us that the collar-bone had been broken, but the bone was joined together, and that the lump was secondary to the healing of the fracture.

For this healing and many others, both mental and physical, we are truly thankful to God, and we are grateful to Mrs. Eddy for the gift of Christian Science.

James Fletcher, Bolton, England.

✧

Near the end of 1910, when I was practising for an entertainment, a severe cold developed with violent coughing, and finally, after falling in a faint, I concluded it was best to summon help. My mother and I were the only ones in the household who relied on Christian Science in times of illness, and there was no church nearer than thirty or forty miles, while the practitioners in this state were unknown to us; so we wired to Chicago, nearly six hundred miles distant, and clung steadfastly to the fact which Mrs. Eddy says "covers the whole ground, that God, Spirit, is all, and that there is none beside Him" (Science and Health, p. 421). My brother-in-law, a physician, pronounced the case "lobar pneumonia,"

Digitized by Google

but in spite of the frequent fits of coughing I read the Bible and Science and Health so as to receive their cheerful messages and lessons in faith and confidence in God as all-power.

Soon after receiving a telegram from the practitioner in Chicago, bidding me "fear not," the symptoms became more favorable, and before long I was able to sit up and forget the body in the endeavor to replace resentment with love and to abide in Spirit. A lingering soreness in the lungs kept the body bent, but it was relieved by the continual realization of the Biblical statement that "God hath made man upright," and "without him was not any thing made that was made." In about a month and a half I was out again, driving three miles in the cold, working about as usual and recovering lost weight.

This experience has brought greater assurance that our weapons, though not carnal, are "mighty through God to the pulling down of strong holds." Our great work is to spiritualize consciousness and awake to our heritage as children of God.—Isabelle Taber, Castile, N. Y.

✧

It is a privilege to express my gratitude for even the little understanding I have of Christian Science and for the many blessings received while studying this wonderful truth. When I tried to read "Science and Health with Key to the Scriptures" by Mrs. Eddy over ten years ago, it seemed a most difficult book to understand. I could get nothing out of it, so put it aside, saying there was nothing in it for me; but it is now clear to me why I could not understand this book, which has since become so helpful, and to which I turn for an answer to every seeming problem. Many of its statements, together with passages in the Bible which have been learned through the study of Science and Health, are in my thought always.

In my case Christian Science was not turned to for physical healing, but on account of mental unrest, and I soon found that this truth was really needed. I learned that God is Love, infinite, omnipresent, omniscient, and that a God of love did not afflict or punish His children, but all good was for me if I would but take it. I am so glad to have had the experience of overcoming hate with love; in fact, I know everything can be overcome with love, the truth which makes us free.

Before coming into Christian Science I had two attacks of what was called peritonitis, and afterward lived in dread of a repetition of this trouble. Soon after I accepted Christian Science another attack manifested itself, but I turned to divine Love for help and was instantly healed. That was very different from my former experiences, when in one case I was six months in convalescing.

I am thankful to have learned to acknowledge God in all my ways, for I know that He will direct my path; also thankful to learn man's relation to God, and that through this understanding I am beginning to love my neighbor as myself. I am thankful that God has given us this Christ-healing through our dear Leader, Mrs. Eddy, and for the literature, which is so helpful at all times.

Elizabeth M. Vetter, Chicago, Ill.

✧

With a grateful heart I make acknowledgment of some of the benefits received through Christian Science. Nearly four years ago I was healed through the power of Truth of throat trouble, after I had suffered from it nearly every winter since childhood days. At the time I was working in the mountains at a high altitude. The building had no heat and a constant draught blew on me, so that it was almost impossible to keep warm. My throat soon became seriously affected, insomuch that swallowing caused intense pain. Medicine was used almost constantly but without avail, and it seemed as if I would have to resign my position.

On going home one night I decided to give Christian Science a chance, as I had witnessed a beautiful demonstration some time previous, but hitherto had given it no particular thought. I called my friends on the telephone, and after stating the case, asked for Science help. They replied that treatment would be given me, and the result was that when I arose next morning the soreness and swelling had entirely disappeared. I would not believe the testimony of the senses and kept swallowing all day to see if my throat was not sore. By nightfall I had developed a slight soreness, so called my friends again, and further treatment was lovingly given me. The following morning my throat was well, and it has never troubled me since that time.

Through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have been healed of biliousness and severe headache, to which I had been subject from childhood. Members of the family also have been healed of various ailments since I was first led to the truth. Deep gratitude is felt for my changed mental condition, my escape from sinful, selfish lusts, and my increasing desire for spiritual understanding and a knowledge of this truth that can be demonstrated. I thank God, and am grateful to Mrs. Eddy for leading me into the truth which makes mankind free.—Edwin E. Bussey, Juneau, Alaska.

✧

I wish to express heartfelt gratitude for the blessings received through Christian Science. My experience as a student of this teaching extends over a period of more than ten years, and I rejoice today in a measure of liberty from the enslavement of fear, disease, and sin, and also in a measure of understanding which enables me to help others along the way. Christian Science is the one theme of my life. Every step of the way is interesting and fruitful in blessings; and perseverance, faithfulness, and honest endeavor bring a reward worthy of every effort in the cause of Truth, the liberation of humanity from fear, disease, and sin, and ultimately the overcoming of death.

It never occurs to me to turn to any other source than God, as Christian Science has taught me to know Him, for healing, no matter what the nature of the discord. I am grateful for Christian Science, and am learning more and more the truth of the Scriptural statement that "in him [God] we live, and move, and have our being."

Clara A. Beaumont, Anderson, Cal.

✧

[Translated from the German]

I wish to give thanks for the many blessings which I have received through Christian Science, with the hope that my words may be the means of helping others. Early in January, 1916, I woke up one morning with such paroxysms of pain in the chest and back that I experienced great difficulty in breathing. My first thought was to lie down again and have some one treat me in Christian Science, as a sense of great fear had come over me, owing to the fact that I had lost my father and three very near relatives, they having succumbed to lung and heart trouble. I however took the *Journal* and read a paragraph from an article in it, and was instantly freed of the severe sense of pain, the proof thereby being afforded that mortal mind law is absolutely devoid of power.

Our little son one day got hold of crushed black pepper. When I went to find out the cause of his loud cries, I found his face crimson and his eyes swollen. I washed his hands and face and at once declared the truth. After a few

Digitized by Google

minutes he was asleep, and when he awoke there was no trace of the trouble left except a small spot on one cheek. On another occasion upon my closing the ice-chest he began to cry dreadfully, and I found that one of his fingers had been jammed. It was entirely flattened. While I treated him he fell asleep, and later on, while playing, he pressed the finger, which except for a red mark appeared to be quite normal, and said, "Mama, it's all gone!" The red stripe disappeared after two days. For these healings, as well as for many other blessings which I have derived through the study of the wonderful subject of Christian Science, I am most deeply grateful to God, and thankful to our dear Leader, Mrs. Eddy.

HELENE BLOHM, Baltimore, Md.

✧

With thankfulness to God and gratitude to our beloved Leader, Mrs. Eddy, I write this testimony. When Christian Science was first brought to my attention, I had only a smile for it, since I did not believe in any organized church, although I did believe in a higher being called God. The first Sunday service I attended, however, so pleased me, in view of the marked absence of personal teaching, that I was filled with joy at having found such a church.

Through the study of the Bible in connection with Science and Health and the other Christian Science literature, I was healed of the liquor and tobacco habits. A double rupture of many years' standing, chronic stomach and bowel trouble, and rheumatism, have also been overcome. While crossing one of the busy streets of Chicago I was knocked down and run over by a horse attached to a delivery wagon, but somehow rolled out of the way before the wagon could pass over me. Although a crowd gathered and a policeman insisted on an examination, as it was thought that I must be seriously injured, I declared the truth to the best of my understanding and went smilingly on my way. Some days afterward great discolored spots were noticed on the kneecap and on the spine, where the horse had hit me, but there never was any swelling or great pain.

I am grateful for having the privilege of being an usher in our church, a work which has done much for my general uplift and change in character. Each day I am trying to unlearn the old and gain room to fill in the new teaching of life eternal, and for all the blessings received I am most grateful to Christian Science.

EMIL ZUGENBUHLER, Chicago, Ill.

✧

The love for all mankind that Christian Science has established in me compels this testimony. I began to read the literature some fifteen years ago, and at once admired the reasonableness of the teaching, or at least the small portion of it which was understood, and was often relieved of troubles, both mental and physical. Close study of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, was not, however, made until a few years ago. Although much help had already been received, the healings were not permanent, the old troubles returning with more or less frequency and violence until the winter of 1911-12, when what was called a complete physical and mental breakdown set in. While in this hopeless condition I was led into a deeper study of Science and Health, and thus the door to relief was opened, so that today I rejoice in perfect freedom.

I am happy in my knowledge of the supremacy of Spirit over all forms of error, and since the study of Christian Science was taken up in earnest no drug or material remedy has been used in our family of four. For these evidences of God's care and help I am deeply thankful. The physical healing, while glorious indeed, does not constitute my only benefit from Science; I am overwhelmed in the contemplation of the spiritual blessings enjoyed. If no physical healing had been experienced, yet for the sweet assurances that have been mine of the establishment here and now of God's kingdom, I would give thanks such as can come only from a heart overflowing with love reflected from the Love that is divine.

I thank God also that in the operation of His wise laws a noble woman, Mrs. Eddy, at a time when the religion of our Master as taught and demonstrated by him was little understood, so unselfishly gave herself up to the task of again demonstrating to the world that God alone supplies our every need, if only we come to Him in faith.

ANNIE SMITH, Dallas, Texas.

✧

In the late summer of 1912, shortly after the help of a loving Christian Science practitioner had been secured for me, I was able to leave the asylum in which I was confined with a mental disorder which the medical profession pronounced incurable. As my recovery has proved thorough and permanent, my deepest gratitude is due Mrs. Eddy, the Discoverer and Founder of Christian Science.

WALT M. BAILEY, Stoughton, Wis.

✧

Over fourteen years ago I was healed by Christian Science after three years of great suffering from nervous decline with all its accompanying fears and depressions. I was afraid of everything and in constant dread of what the next day might bring. *Materia medica* did not help me. At a time when my suffering seemed unbearable, a still deeper sorrow fell upon me in the sudden passing on of one very near and dear while absent from me. It seemed as if the end of all things had come, and I often wonder how I lived during the next six months.

Christian Science had been presented to me, but any interference with my way of thinking was resented, as I belonged to another church and thought myself satisfied. Kind friends, however, continued to bear with me until I finally yielded to Truth. I went for help every evening for three weeks, and was very much surprised when the practitioner told me I was healed, for in my eagerness to hear the truth self had been forgotten. Glasses had been worn for six years, and a specialist told me they could never be dispensed with; but thanks be to God and the faithful work of the practitioner, my eyes were healed during the first treatment in Christian Science.

In the years since then Christian Science has been my only physician, and it has never failed when applied correctly. I am grateful to God, and thankful to our beloved Leader, Mrs. Eddy, for this truth which is so free to all.

HARRIET HARRIS, Salmon, Idaho.

✧

[Translated from the German]

In the Scriptures we read that "all things work together for good to them that love God." Thus it was in my experience, and it is with a grateful heart that I wish to tell of the many benefits received, and more especially of the immediate healing which has come to me through Christian Science. Since childhood I suffered from a bowel difficulty declared chronic by my physician, and all the material means resorted to brought only temporary relief. I however put my trust in God, feeling that He alone could free me from this trying condition, and this came about when in 1912 Christian Science came into my life.

Digitized by Google

A dear lady who is a Christian Science practitioner gave me a few copies of the *Herold* to read. I immediately took an interest in its inspiring contents, and a few days later, when the truths of Christian Science were elucidated to me, I asked for treatment, which was lovingly taken up. I also kept in mind the 121st psalm. I was healed on the next day and since then have enjoyed good health. This beautiful demonstration made me feel very happy indeed. I was also freed through Christian Science treatment of severe headaches, and a short time ago of a facial swelling. The error of being flat-footed was also overcome, and I was able to discard all arch supports.

It would be impossible to tell in detail of the instances in which the power of divine Love was experienced, but there is one thing which I would like to add, namely, that every Christian Scientist should take particular care to seek the good himself and to assist to the best of his understanding in the work that may be done for him in Christian Science. The beginner will find that this will bring him a blessing, for good is productive of good only. Whereas there may be hours of discouragement, and even doubt may try to creep in, yet he will hear the "still small voice" saying, Let nothing but good dwell in thy thought, for error, the opposite of truth, has no power. Hence the beautiful promise, "Prove all things; hold fast that which is good."

I thank God from the depths of my heart for His ever-present love and goodness, and that I have been taught how to separate the tares from the wheat. With deep reverence and sincere love do I think of our Leader, Mrs. Eddy, and also of all those who have helped me to find freedom and peace.—Emma Juppenlatz, Heidelberg, Germany.

✧

Like many other people I once thought Christian Science a combination of hypnotism, personal magnetism, and will-power. Now I know from actual demonstration the difference between these things and the spiritual truth.

When I began the study of Christian Science, smoking seemed to me the greatest pleasure a man could find on earth, and as I saw no harm in it, indeed felt it was just as important to me as eating, my determination was never to give it up. One day a friend told me the habit would leave me because it was not a clean one. "You are right; Christian Scientists should not smoke, and this is my last cigar," I said, throwing away what I really thought was the last one. My friend advised me to make sure that this stand was not taken through will-power, and explained to me how to work on the thought so that the desire would leave me. I did not do this, but just stopped smoking, and consequently for the next three days suffered for the want of tobacco. Then I began to smoke again more than ever, but realized that it was a yielding to the demands of false material sense, and so was ashamed when people referred to me as a Christian Scientist.

Then I began to pray for the desire for tobacco to leave me, knowing that God's child did not want to smoke, and that God could be trusted with my desire. This was learned the first day I read "Science and Health with Key to the Scriptures" by Mrs. Eddy. The usual quota of cigars was still smoked every day, however, until finally the blessing came, the sudden realization that I was healed. It was hardly believable, even though I had experienced other healings. For some time there was always at hand a box of my favorite brand of cigars, but every time I looked at it my heart went out in thankfulness to God for giving us Christian Science in this age. There surely is a great difference between will-power and the power of God.

Louis J. Lewis, New York, N. Y.

From Our Exchanges

[*The Living Church*]

Not to be neglected is the preparedness that lies in the quality of citizenship and the character of public opinion, in deepened popular convictions of right and justice between man and man and between nations; a steadfast stand against the devastating march of ignorance and greed and against their consequent evils; renewed loyalty to and reliance upon the family as the unit of society; the ending of the present rate of infant mortality; the conserving of child-life and adequate training of youth; the welding of these incoming folk of all kindreds and tongues into a worthy citizenship; the attainment of finer relations between man and man; the reconciliation of clashing classes and the reintegration of society through the realization of a truer social organism, by the people and for the people, bound together by the bonds of a real brotherhood, as the kingdom of God comes upon the earth. Here lie manifold tasks for Christian men and women, tasks wherein the church of the Son of man is to be not without interest and share, as an instrumentality of that kingdom of God.

[*The Methodist Recorder*]

Let us lift up our hearts. No power can wrest from the Almighty's hands the scepter. He is not an absentee deity. He watches and controls evermore the course of events upon the earth, swaying the opposition of men, never abandoning His program, even through the wrath of the rebellious working out the counsels of His own loving will. We must take long views. The ultimate victory may tarry, but it will come. A thousand years are with the Lord as one day, and one day as a thousand years. Just now the earth is trembling with the tramp of armies, but tomorrow upon the mountains will be the feet of those who bring the good tidings of peace. Evil may come uppermost for a while, but evil contains within itself the principle of destruction. All men may not be won for holiness, but unto Christ every knee shall bow. That is fixed and settled. All the apostles believed and declared that he who endured the "contradiction of sinners," and was "despised and rejected of men," had "sat down on the right hand of God; from henceforth expecting till his enemies be made his footstool."

[*The Jewish Chronicle*]

Caleb, as we may interpret his name, was "all heart." He was an optimist. He would gladly have made all the others optimists too. He entertained no doubts about the conquest of the country. He does not even say, Let us go up and try to conquer it, but, "Let us go up at once, and possess it; for we are well able to overcome it." Opposed to him were nearly all the other spies, who took a gloomy view of things. They saw no bright light in the clouds. The atmosphere in which they lived was that of a foggy November day. They forgot that the sun was shining behind the clouds, and that by and by it would disperse them. They were men who talked things down, men of no expectation and no hope,—pessimists, in fact. Unhappily, the race of pessimists is not yet extinct. They are with us today,—men of melancholy who do not see anything bright and always predict failure.

[Rev. Joseph Fort Newton, D.Litt., in *The Christian Commonwealth*]

The passion of our day is a passion for life, for more life, fuller life, longer life. Too often men seek it in external things, in money, sport, and speed, in sensations, excitements, and costly luxuries. They seek it feverishly, almost fanatically, in everything that seems to them to promise what they

Digitized by Google

have set their hearts upon and which they have agreed to call life. If it were given you to look into the hearts of men today, you would find that much of their restlessness is due to the fact that they have tried to find life and have failed. Nor will they be happy until they find a real and true life, and find it more abundantly.

We do not have to define life in order to live it. On the contrary, if we are ever to know what life is, even in a little way, it must be by living it with grace, zeal, and vigor.

[*The Christian Register*]

So far as truth is continually being brought to light by investigation and by thought, the dogmatist must turn his strength from defense of old bulwarks to exploration and enterprise. The great remedy of dogmatism is to set it to work. The prime corrective of confidence hardened into prejudice is a glimpse of fields yet untrodden. The type of the hero of truth is not the warrior, it is the explorer; and no explorer can be a dogmatist long at a time.

[Rev. Marion D. Shutter, D.D., in *The Universalist Leader*]

In spite of all that tends to obscure and confuse, men are beginning to see moral issues more clearly; that all issues are moral. Every commercial and industrial question is moral. Huge gains no longer blind us to the methods by which they were made. The philanthropy of the giver no longer sanctifies the rapacity of the gainer. In all the whirl and confusion, the dust and the uncertainty of the hour, the eclipse is passing from the ten commandments and the golden rule. Good ethics is good business. We are getting down to the bare foundations of the universe, and find that the stones are hewn from the quarries of Sinai. Other foundations can no man lay for any earthly structure.

[*The Christian*]

It is still true that if we will "let him [Jesus] . . . alone," unencumbered by our doctrine and dogma, unfettered by ritual and ceremony, undistorted by the false witness of life which denies faith, "all men will believe on him." Nothing is clearer than the fact that the world's quarrel is not with Christ, but with attempted human organization of his influence. Yet the tragedy, not only of today but of former days also, is that the church has not been able to leave Christ alone. This is the secret of her too obvious weakness. This is why she has so little spiritual grip upon the world. She has lost the apostolic spirit of "no man, save Jesus only," in her own life, and consequently in her message and witness.

[*The Continent*]

Influence is not achieved or cultivated by pretensions to either wisdom or piety. It is attained instead by living a clean, simple, unassuming life of hearty brotherhood among comrades whom one loves and wants to be loved by—living patiently and quietly and helpfully until the circle one lives with has come to trust alike his sincerity, his unselfishness, his discretion, and his sympathy. Then influence comes without need of seeking for it.

[*The Church Family Newspaper*]

It is the church's privilege and opportunity, as well as responsibility, to lead men to that God whom the Son of man came to reveal as the Father; to preach the gospel of spiritual and social redemption in all its wonderful fulness; to seek to win all who will to the true Christian brotherhood, and thereby hasten the answer to the oft-repeated prayer: "Thy kingdom come. Thy will be done in earth, as it is in heaven."

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

A copy of the Index to Volume XVIII of the *Christian Science Sentinel* will be sent free of charge to any subscriber upon request, but will not be enclosed with No. 52 (the issue for Aug. 26) as in previous years.

"Christian Science: Man's Dominion Over Evil," a lecture by Edward A. Kimball, C.S.D., has been translated into Italian and is now published with the English version opposite the translation. The new pamphlet is on sale at price of the regular pamphlets as shown on the opposite page.

A new French pamphlet, "Foi et Générosité" (Faith and Generosity), has just been issued and is now on sale. This pamphlet contains the following articles: "The Lord Thy Confidence," "The Closed Hand," and "Continuity of Right Thought."

"Christian Science: A Religion of Love" (Christian Science: En Kjærlighetens Religion), a lecture by Virgil O. Strickler, has been translated into Norwegian and is now published in pamphlet form with English and Norwegian versions on opposite pages.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 54 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Address all orders for above works, and make remittance by New York or Boston draft or money order, to

Subscription Price

Payable in advance

Annual subscription price, postpaid, in the United States, Canada, Mexico, Cuba, Porto Rico, Hawaii, the Philippines, Guam, Tutuila, Shanghai, Panama, and the Canal Zone, $2.00; six months, $1.00; three months, 50 cents. For Canada add 45 cents and for all other countries 95 cents annually for postage. For subscriptions in quantities please refer to page four in THE CHRISTIAN SCIENCE JOURNAL.

Subscriptions to the SENTINEL are entered only from the first of the month and will begin with current month unless otherwise specified. Subscriptions terminate with the last of the month named on the wrapper at the left below the name and address. The Roman numeral XVI indicates the year 1916; XVII is used for the year 1917. This notation and the delivery of the periodical will indicate that a remittance has been credited and will be our acknowledgment of the subscription.

Bound Volumes: Current year or two years previous, cloth, $3.25; half calf or half morocco, $4.00. On earlier volumes write for prices.

Items of Interest

Secretary Houston of the United States department of agriculture has just announced the plan to be pursued in spending the $10,000,000 appropriated by the Federal aid road act for the construction and maintenance of roads and trails within or partly within national forests, and has tentatively allotted among the various national forest states the $1,000,000 which can be expended this fiscal year. The tentative allotments to the principal national forest states are as follows: Alaska, $46,280; Arizona, $59,795; Arkansas, $11,294; California, $140,763; Colorado, $62,335; Idaho, $108,010; Montana, $69,901; Nevada, $19,195; New Mexico, $42,622; Oregon, $127,794; South Dakota, $8115; Utah, $40,982; Washington, $91,739; Wyoming, $10,566. In addition, a total of $9552 has been tentatively assigned to Florida, Michigan, Minnesota, Nebraska, North Dakota, and Oklahoma, while the eastern states,—Maine, New Hampshire, Virginia, West Virginia, North Carolina, South Carolina, Tennessee, and Georgia,—in which the Government is purchasing lands for national forests, have been allotted $21,057.

One of the ranking industries of Spain is the cultivation of cork and the manufacture of cork goods. The raw material comes chiefly from Andalusia, Extremadura, and Catalonia, while the manufacture of cork goods is centered in Catalonia. The success of the manufacturer depends largely on his capacity to utilize all of the cork to the best advantage, and in Catalonia the machinery used is of high perfection. Besides bottle stoppers, cork discs, floaters for fish nets, and life-preservers, other articles are now being made of cork, such as hats for the gendarmerie of Spain, and three-cornered military hats. Cork waste is utilized in the manufacture of linoleum, an industry as yet not well developed in Spain, and accordingly much cork waste is exported. Cork in sheets and planks is made for building and floor coverings. Cork paper is an important branch of manufacture and is exported in large quantities. Fifty thousand metric tons is a conservative figure of the amount of cork produced in Spain annually. The industry affords employment to some thirty thousand operatives.

For exceptional natural power and storage advantages the Winnipeg River is probably unequaled in Canada and possibly on this continent. It drains an almost circular area of 53,500 square miles, dotted in all directions with innumerable lakes. The balance of the basin is fairly well forested, the precipitation is regular and well distributed, and the run-off is, in consequence, remarkably uniform from season to season, the maximum high water in a normal year seldom exceeding four times the minimum flow. The principal result of the power and storage investigations can be briefly summarized by stating that it has been determined that a minimum flow of 20,000 cubic feet per second is feasible at all seasons, with an efficient and systematic control of the river run-off. It is possible to concentrate practically the entire unused river fall in Manitoba into seven economic power concentrations with a minimum output of 175,000 horse-power for a continuous twenty-four hour power production under present conditions of flow, and of 313,000 horse-power with a river regulated to a 20,000 second-foot minimum.

Under the law authorizing the minister for lands to enter into contracts for the purchase of equipment for the extraction and treatment of kauri gum and the acquisition of supplies of the resin, the New Zealand Government expended $131,440 for plant and stocks during the fiscal year 1915-16. The New Zealand Government owns about thirty-five thousand five hundred acres of excellent kauri forest, said to contain at least fifteen million feet of kauri lumber, which may be made to realize at least forty-five thousand dollars a year by bleeding these trees as rubber trees are bled. It is thought this tapping can be done for centuries if the forests are carefully treated. The exports of kauri gum from New Zealand in 1915 amounted to 4575 tons, valued at $1,358,401.

Increasing use of the national forests for municipal camp sites and summer school locations is reported by the forest service. Permits have already been issued to several cities and educational institutions, and other applications are expected. Far more people use the forests for public playgrounds than for any other purpose, and this use promises to be one of the most important to which they can be put. Officials say that the national forests offer unlimited opportunities for summer school and municipal camps, as well as the best opportunities for recreation to be had anywhere in the country. Ample provision is made for campers and tourists. Hunting and fishing are allowed in season, and there are no restrictive regulations beyond those regarding forest fires.

The Panama canal for the year ended June 30, 1916, showed a deficit of $4,599,920. Operations and maintenance totaled $6,999,750, while receipts were $2,399,830. The previous year the expenses were $4,066,727, and receipts $4,313,383, leaving a profit of $276,656 without considering interest on investment or depreciation. The canal was closed five months, and dredging cost $8,560,016. Ocean-going vessels using the canal for the year were 787, while the preceding year 1088 ships passed through.

A new commercial treaty providing for practically free trade between Argentina and Paraguay was signed at Asuncion, Paraguay, on July 9, 1916, by the Argentine minister and the Paraguayan minister for foreign affairs. The treaty, which must receive legislative sanction in both countries before it goes into effect, provides for the reciprocal free admission of the products of each of the contracting countries, with the exception of matches, furniture, sugar, candles, leatherware, and footwear, which are to remain subject to the present rates of duty for a period of five years. At the expiration of that period the excepted products will become free of duty without any further action.

The Government of Peru has granted to the Hydroelectric Company of the Canon del Pato, a concession for water-power in the river Santa to be used for industrial purposes. The concession grants water rights of 45,000 liters per second in a section of the river 500 meters above the confluence of the Santa with the Colcas. To guarantee the fulfilment of its obligations in connection with this concession at least 50 per cent of the company's employees, technical men as well as laborers, must be native Peruvians. The concession cannot be transferred without Government permission, and the Government reserves the right to expropriate the property of the company in accordance with terms set forth in the concession.

Hereafter Canada's new five mile double track tunnel under Selkirk Mountains, Canadian Rockies, now on the eve of completion, will be known as Connaught tunnel, since permission has been granted Lord Shaughnessy, president of the Canadian Pacific, by the Governor-General of Canada, so to rename the bore. It will now be only a few weeks before the tunnel will be in operation, lowering the Canadian Pacific's mountain grade by 500 feet. The work was begun less than three years ago, and its prompt construction sets a new record. It is the longest double track tunnel in the western hemisphere, being a quarter of a mile longer than the Hoosac tunnel in Massachusetts, which has heretofore held the record.

Although granite has been used in Norway for many centuries, it is only within the last forty years that the industry has assumed important dimensions and a large export trade been established. The growth of the export trade has been steady and continuous, reaching in 1913 a total of 233,439 tons, valued at $867,516.

According to the report of the declared exports from Japan to the United States during the year ended Dec. 31, 1915, $1,412,976 worth of drawn work, renaissance, and so on, made of cotton, was exported from Yokohama to the United States.

According to statistics published by the insurance commission of Spain, the premiums collected by insurance companies in that country during 1914 amounted to $13,220,550.

The volume of exports of frozen meat from Brazil continues to show a large increase, the total quantity for the first six months of 1916 being 27,259,000 pounds.

The United States' Alaskan railroad is now carrying coal from the Matanuska fields to the harbor at Anchorage.

The production of glass sand in the United States in 1915 was 1,884,044 short tons, valued at $1,606,640.

In Jamaica 85,854 acres are covered by banana plantations. In 1891 there were only 9959 acres.

"What I say unto you, I say unto all, WATCH" Jesus

Vol. XIX | September 9, 1916 | No. 2

In Love with the Truth

SAMUEL GREENWOOD

IN the Apocalypse St. John likens the new Jerusalem to "a bride adorned for her husband," and in Science and Health (p. 592) Mrs. Eddy defines the heavenly city as "divine Science; the spiritual facts and harmony of the universe." The figure of a bride used by the beloved disciple is universal in its human appeal, for, as Emerson wrote, "all mankind loves a lover." In its spiritual signification Love is so essentially and wholly divine, so inseparably one with true being, that even the finite human sense of love prompts men to noble sacrifices and deeds of heroism.

As the student grasps the significance of St. John's description and Mrs. Eddy's interpretation, the question will naturally arise whether divine Science presents to him the attractiveness symbolized by the revelator. Does Truth appear as the thing to be desired above all else, the one "altogether lovely"? Are we prepared, through our love of Truth, to endure hardships, make sacrifices, and work long years for its perfect understanding? Are we so in love with the spiritual ideal unfolded in Christian Science that we are glad to enter the struggle to become genuine Christian Scientists? These are questions to be answered rightly before the pilgrim to the new Jerusalem is ready to leave behind the false affections which would bind him to earth, and which have ever disappointed and scourged the weary seeker after heavenly peace.

Divine Science, or Christian Science, as Mrs. Eddy has named it in its relation to humanity, is logically the knowledge and understanding of divine things. It is the truth about God, about spiritual power and intelligence, about man and woman, the truth about everything which enters into the human problem. What does the human consciousness hold that can compare with this scientific knowledge of the immortal reality of things? What should be more attractive and lovely to contemplate, than an understanding of the infinitude of Love, the endlessness of Life, and the perfection of all that God makes manifest? It is obvious that heaven will never be realized, here or anywhere, until the things of God are brought into daily experience, that is, until we live with them and love them.

False beliefs about God and man constitute all the sin and misery of the human race, and these conditions will continue until the truth about God and man is humanly apprehended and made practical. But this redeeming Truth, or Christ, cannot be sought and found from selfish or unworthy motives. Acknowledging as we do that God is Love, we ought to know that we can seek and find Him only through love; and loving thought pervades and controls consciousness only as one loves to have it there. The divine attributes do not spring into activity from a sense of duty. Until it becomes our greatest joy to know and to live the truth about man as the son of God, it will not unfold to us its treasures, for Jesus taught that one's treasures are found where the heart is.

It is self-evident that divine Truth is the only refuge from error, and that Truth succors those only who take refuge in it through the understanding and affections. Mortals strive hardest for what they love most, whether it be truth or error. Moses urged the Israelites to give God the first place in their affections, and to keep the truth he had been bidden to teach them in their hearts; then they would naturally obey his injunction, as given in the book of Deuteronomy, to teach this truth unto their children, and to make it the chief topic of their conversation, the one thing to think about and to live for. The more the nature of God is understood, the more certain it becomes that one cannot enter the new Jerusalem of Spirit through mental arguments or theological dogmas, nor through faith in another's goodness, but through such a love of divine things that one strives after godlikeness for its own sake.

Although mortals are more or less indifferent to the presence or activity of sin in their consciousness, they struggle desperately to escape from its consequences; and this desire for physical freedom constitutes in most cases their first appeal to Christian Science. While this may be well enough for a beginner, it is not a wholesome attitude for Christian Scientists to maintain perpetually. We cannot set our "whole affections on spiritual things," as Mrs. Eddy points out, "while loving the material" (Science and Health, p. 326). The Christian is entitled to health of body as well as of mind, but he can rightly claim this of God only as he is honestly working for moral and spiritual betterment. Seeking physical ease for its own sake is but a phase of sensualism and not a means of spiritual advancement.

It is one thing to be healed by Christian Science and another thing to love the truth that heals; but this love is needed to make one a Christian Scientist in the spirit as well as in the letter. Resting satisfied with the physical benefits which Christian Science confers, is a virtual submission to materiality, and implies a corresponding lack of awakening to Truth's spiritual demands. This apathy toward the attainment of spiritual good leads to self-seeking and to strife among brethren. It means the loving of self more than Truth, of person rather than Principle, and is the error that would despoil Christians of their spiritual heritage and hold Christendom in the grasp of the so-called carnal mind.

The physical healing which Christian Science brings to mankind is pleasant to contemplate, but there is danger of dwelling too much upon that phase of its work if we are thereby led to forget that mortals also need its redemptive efficacy from sin. In Christian Science true physical and moral reformation are inseparable. If we would rejoice that Truth makes free from disease, we should rejoice that it makes free from all other errors. To that end we should watch for moral improvement as eagerly as we watch for physical improvement. The truth which teaches that God's man is whole and healthy involves little cross-bearing in its acceptance, but the same truth teaches that this man is also honest and unselfish, and we cannot divide this truth in its practical application. We are not sincere in affirming that we love God with the whole heart and mind and strength, unless it is our delight to keep our whole consciousness full of good.

The truth about man as God's own image declares that man is ever pure and perfect, loving and lovable. Is this

Copyright, 1916, by The Christian Science Publishing Society

Digitized by Google

what we take most pleasure in thinking of as the truth about ourselves and our neighbors? Are we so in love with this spiritual ideal that the opposite claim of sinful, sickly, and selfish personalities is excluded from our contemplation? Is the truth about man as the son of God so attractive to us that evil suggestions find no listening ear or obedient impulse?

Mortals must sometime learn to love Truth for its own loveliness, and not merely for its healing effect. We must love the truth of the real man's essential divinity until it is our chief joy to let it be made manifest through us. The declaration that we are God's children should not be confined to the overcoming of bodily ills, but should serve to remind us that this relationship exists in all directions. If we use the facts of divine Science, the allness of divine Love, simply to protect ourselves from others' hatred, while hatred of others remains in our own consciousness, our sense of evil will increase. If we seek Christian Science mainly for its physical benefits, we will naturally shrink from the material sacrifices which it demands; but if we love Truth because it is making us better men and women, we shall be glad to give our earthly all for this "pearl of great price."

Who Are Ready?

NELLIE B. MACE

WHEN individual consciousness first becomes attentive to the message of Christian Science, it discerns more or less clearly that this is a call to witness to a wonderful union of purity and spiritual understanding, a wedding of realization to the ideal which promises to destroy all the physical, mental, and moral plagues which beset the various beliefs of material existence. Divine Love is recognized as the tender, imperative Principle of this newly entered upon sense of existence, and it is joyfully anticipated that henceforth consciousness shall reflect only and entirely Love, that practice shall conform to the absolute basic truth that God is All-in-all.

One's footing on this new and glorious highway being fairly established through his own healing and his rejuvenated happiness, he is likely at first to expect all with whom he comes in contact, especially his nearest friends, to listen with rapt interest to his story, which is so obviously true to him, and to hasten to join him in this new way. With a sense of unpleasant amazement he finds instead that, as in the Master's parable, some "made light of it, and went their ways, one to his farm, another to his merchandise," while he feels the spite of the "remnant." But he learns the lesson, valuable in all his future work, that they who are ready for the marriage of the king's son are those who reflect God in individual consciousness, and so learning, he sees that it is his own thought which he must guard at all times, lest he himself admit the reality of some mind or minds other than the one perfect Mind, and thus lose the light which at first so illuminated him.

While a Christian Scientist can never do more than work out his own salvation, and this work lies wholly within his own consciousness, yet in so far as he includes within his consciousness the cognition of all mankind, his salvation does involve others to the extent of destroying his wrong thought of them, as well as his own more personal sinful beliefs. Mrs. Eddy understood the need of the human heart to recognize and to fulfil its duty to all others when she bade us pray daily, "May Thy Word enrich the affections of all mankind, and govern them!" (Manual, Art. VIII, Sect. 4.)

He who thus thoughtfully endeavors to realize the supremacy of infinite, universal Love, will not blandly deny its reign by declaring of certain ones that they are not ready for the truth. God is always at hand to enrich and to bless the human affections. One's prayer does not change or hasten His will, but it does enlist the realization of the prayerful on the side of the absolute; and the evil of believing in many minds opposed to Truth, if destroyed in one's own thought, is of course taken away from the multitude, and by that much the seeming resistance to Truth is lessened and its acceptance accelerated for all.

Readiness for the revelations of Truth is at best a comparative condition, so far as human beings are concerned. One may be ready to receive the first sweet revealing which heals him of his suffering, and yet, when he is confronted by ridicule, hatred, persecution, or stolid indifference, may seem far from ready for the higher revelation of God's allness which enables him to hold to spiritual peace in the midst of seething unrealities of material antagonism and to realize the nothingness of evil. Only by knowing the truth that there is no presence or Mind but God, can one prove himself ready to witness to the union of Love with its own idea, and so to help the seeming antagonist by destroying his antagonism, to the extent at least of one's own belief in its reality.

Was not the world really ready for the demonstration of Jesus of Nazareth, though it crucified him? The rampant material ascendency of his day was but the rage of the carnal mind, pierced by the truth he uttered, advancing toward its final annihilation. Jesus did his work on the assumption that the age was ready for the revelation of the Christ which he presented. The truth he taught has been the one persistent fact of subsequent history, until at last Mrs. Eddy, picking up the threads of revelation, proceeded in the faith that the world was ready for the further revelation of the Science of Christ. But for her steadfastness in the face of the very opposite material appearance, her work could not have been accomplished. Is it not true that every family is being made ready for the revelation of spiritual fact when any member of that family first perceives the truth? The concrete belief in material man, represented by that family, can never again be so densely material after one of its members is awakened to the spiritual reality of man in God's image.

Christian Scientists do not work against their hope by declaring that the community is not ready for the truth when the message is to be presented through church service or lecture, nor do they declare that the world is not ready for the literature which is being so broadly disseminated. The marvelous speed with which this truth is encircling the earth shows how very ready and hungry is the human heart for the message of Christian Science. If "the heathen rage, and the people imagine a vain thing," it is nothing giving up its seeming,—and God is All.

Whether the individual's effort to bear this message to others shall be by audible or written word or by silent reflection of Love, each one must learn for himself. If one's understanding of wisdom were perfect, one would make no mistake in judging of "a time to keep silence, and a time to speak." But no one can say of another's effort that it was a mistake, or that the message would better have been left unuttered. Each one who is seeking the guidance of wisdom will learn to recognize Love's impulsion to expression, and at such times fear of adverse human opinion should not be allowed to quell the inward monitor. Doubtless one's reflection of Truth, silent or audible, will antagonize error. No word of Truth was ever uttered that did not have this effect in some way upon evil. But when a person becomes the seeming channel for opposition, it is most likely that some truth is being borne home to that consciousness which it

Digitized by Google

cannot, try as it may, forever evade. Whether it seems a long or a short time that one must wait for the harvest from his own sowing, does not especially matter. The mortal sense of time which one holds with regard to another's progress simply shows that the consciousness of that one is not yet ready to understand the revelation of eternity at hand in which all that is real is now at-one with its Principle.

Relative truth is at best but a makeshift to explain mortal mind's degrees of deflection. To say that one individual or one group of individuals is ready for truth and another is not, may be true to the human sense; but the Christian Scientist has undertaken to think on no plane lower than that of absolute Truth. To be absolutely true to the Science of Mind, forbids the least mental admission that there is any real mind opposed to Truth. Those in whom one is interested may seem ready for nothing better than to learn through suffering, but many Scientists will remember that they themselves came into Christian Science very suddenly at the last. The day before, it may be, they would have appeared to the superficial observer far from ready for the truth. They too had been learning long lessons by the way of suffering, which is simply the unreal mortal mind's way of surrendering its false claim to the immortal, and then the light seemed suddenly to dawn.

The identity of the individual is always ready for and is at-one with Truth. To the human mind this fact comes as a discovery. All are ready for the truth, and all are progressing toward that point of inevitable discovery. All are now ready at least to be loved; and upon the Christian Scientist, who is different from others simply in his awareness of Truth, rests the burden of continuous proof that he is himself ready at all times to reflect healing love. On page 476 of Science and Health Mrs. Eddy writes: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." The Christian Scientist must see God's idea in the same way.

Proofs of Divine Guidance

FREDERIC W. PLUMB

THE writer is a master mechanic, and his work keeps him shut up in a textile factory all the year except for a two weeks' vacation in summer. For a number of years it has been his custom to take a long trolley trip in a section of the country new to him during part of his vacation season. One of these trips was through the Berkshires, and an incident which happened on the way, while he was engaged in sowing the seed of Truth, has revealed to him so unmistakably God's care and guidance that it seems well worth relating to fellow workers in the field.

The trip was planned to start at Hoosick Falls, N. Y., and end at Canaan, Conn., with stops at the principal cities on the way. Then a train was to be taken back to the starting-point. On looking over the railroad time-table, it was noted that the last train for the day would leave Canaan at seven in the evening, which was very convenient, as it was necessary for me to be home that night. While on the homeward trip, after having left North Adams, a gentleman on the seat in front turned to me and asked if I was a Christian. Noticing that the speaker had on a clerical garb, I answered that I had been a student of Christian Science for fourteen years and had made some progress, having been able to prove its teachings for myself and others.

The clergyman then asked a number of questions about Mrs. Eddy and the doctrines of Christian Science. These I answered, and was thus able to correct many wrong impressions under which he was laboring. He stated that he was an evangelist, and that he had read Science and Health but was unable to accept many of its statements. I then asked him whether merely reading an arithmetic would give him much understanding of mathematics, and explained that in order to comprehend the teachings of Christian Science he would have to take up the study of its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, together with the Bible.

The conversation lasted for almost an hour, during which time all sense of the surroundings had lapsed. I presented the gentleman with two Christian Science pamphlets, which were gratefully accepted and no doubt fulfilled their mission. He said he was a firm believer in prayer for the sick, and stated that he had experienced a healing in that manner when apparently at death's door, and that his prayers had frequently helped others.

While this conversation was going on, the car had passed through Pittsfield and reached the junction where I was to take the car for Canaan, the last stage of the trolley trip. After shaking hands we parted,—I am sure mutually benefited by our talk. Boarding the car, we were well on the way when I suddenly remembered that my plan had been to stop over in Pittsfield to see something of the city, for according to the railroad time-table there were two hours at my disposal on arriving at Canaan. It was too late to make the change, however, so I kept on my way, though feeling a sense of disappointment.

On arriving at Canaan about half past four, I discovered that the last train leaving for New York that day was due in thirteen minutes, just time enough for me to walk to the station and buy a ticket. The train which I had planned to take was a special which ran on Sundays only during the summer, and this had not been noticed when planning the journey. Had the stop been made at Pittsfield, as the original schedule provided, it would not have been possible for me to have reached New York that night. Having been about the "Father's business," and having thus forgotten self and material pleasures, I had been, as I believe, divinely guided to my destination at the proper time. The lesson was brought home, and has been profited by.

✧

Joy in Obeying

S. BELLE GORHAM

UNTIL the human will is laid down and God's will obeyed, we can never realize the joy and peace which obedience to divine Principle unfailingly brings. One of the sweetest proofs of this came to a young student of Christian Science through an experience in the schoolroom.

This student was the teacher of a class of little boys and girls. Harmony usually reigned, but there came a period when everything seemed to go wrong. When obedience was demanded by the teacher, the little feet shuffled and the little heads turned away just when attention was most needed. Irritation and impatient rebukes followed, and each day the teacher went home heart-sick over it all, for she loved the children, but she had been cross. They must, however, obey her, for this was right; and so in a groping way she tried each evening, in the quiet of her own room, to realize that they were God's little ones, and that the children of divine Love are always obedient. How could they really be otherwise? It was discouraging, nevertheless, to see no apparent results follow these efforts, for day after day discordant conditions repeated themselves.

Digitized by Google

One evening, almost in despair, the teacher said within herself: Why is it that these efforts on my part bring no results? There must be a reason for it; something more is needed,—if I only knew what. The answer came, clear as a voice, that obedience is reflection. It was like a flood of light, dispelling the darkness. In the words of our revered Leader, it rebuked "the foul senses within" (Christian Science Hymnal, p. 212).

In this light the student recognized her own need of obedience to the law of Love. Irritation and impatience were but manifestations of self-will, demands that her personal wishes be followed. Now she saw clearly that just so far as she manifested obedience to the law of Love, expressed in kindness and patience, she would find a response in every little child in the class. Our Leader says (Science and Health, p. 514), "Tenderness accompanies all the might imparted by Spirit," and in Love no weakness could be manifested, no lack of true discipline. This all meant work, a victory over self to be won, but the student knew that the power of ever-present Love was with her to sustain every right effort.

The next day brought her testing time. Temptation pressed sorely at moments, but again and again Love lifted thought above impatience and irritability. Although complete victory was not won the first day, nor even the second, yet happy strides were made. The little faces grew brighter and happier each day, until they were fairly radiant with Love's reflection, watching and listening with eager desire to know their teacher's slightest wish. Quickly and quietly each requirement was obeyed with one accord.

The weeks flew by now. Impatience, self-will, disobedience, found no place in that happy schoolroom again during the entire term. To the teacher it meant more than a passing experience, happy as it was; it meant to her a lasting lesson. She had learned one of Love's open secrets. Many testing times have come since then, but she has found that in proportion as the human will has surrendered to the divine, victory has rested on the side of right in her experience.

Testimony Meetings

WILLIAM S. CAMPBELL

THE interest manifested in the Wednesday evening testimony meetings, which constitute so important a part of the Christian Science movement, abundantly attests the prophetic vision of our Leader in making provision for this method of publishing, to those who have ears to hear, the efficacy of the Christ-power to destroy sickness as well as sin. Some who attend these meetings are like those of whom the Master spoke; they have ears yet hear not,—they fail to discern the spiritual thought. This may be partly due to the prominence of the unimportant in the testimonies. Given as they are for the most part by those who are unaccustomed to speaking in public, the testimonies are not always models of concise and direct statement.

A helpful lesson may be learned from the man who gathers gold by the process known as placer mining. All day long he labors, washing out a mass of sand in order to separate from it the grains of gold that it contains. At nightfall, when ready to return to his home, he does not load himself down with the sand that he has unearthed and leave the gold behind; he carries with him the gold and leaves the sand behind. In the Wednesday evening meetings there are few testimonies that do not contain some grains of gold. In one of these meetings some time ago there was given a testimony which included an unnecessary recital of details. In the congregation was a person who later expressed the opinion that this particular testimony was valueless and might better not have been given. That person carried away a load of sand. Another person went home from this meeting with the realization that she had been healed while listening to that same testimony. Those who attend a testimony meeting may well remember the wisdom of the miner, and carry away only the grains of gold.

In this connection, however, it should be remembered that the work of the miner is made laborious by the quantity of sand that he is required to separate from the grains of gold. Those who are actuated by a desire to bless and to be blessed by telling in a testimony meeting of their experience in proving the efficacy of divine power to heal, may well heed the admonition of Paul to Timothy, "Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth." The thought of the speaker will have been molded into a form that will be at once interesting and helpful if careful attention is given to these words in the Manual of The Mother Church (Art. VIII, Sect. 24): "Testimony in regard to the healing of the sick is highly important. More than a mere rehearsal of blessings, it scales the pinnacle of praise and illustrates the demonstration of Christ, 'who healeth all thy diseases.'"

Like the Sunday service, the Wednesday evening meeting should bring healing to the visitor who has been drawn to its portals in the search for a remedy for sickness or sorrow. Sometimes those who come to the meeting thus burdened, experience healing and harmony at once. This will frequently be the case when Christian Scientists realize more fully the possibilities along this line which these meetings afford. Public attention is being drawn more and more to these gatherings. When the weary pilgrim along life's pathway comes into a Wednesday evening meeting, he should become conscious that he is in a mental atmosphere in which health and holiness are regnant.

It is the privilege of each member of the congregation to realize the power of the ever-present Christ, the divine idea, "who forgiveth all thine iniquities; who healeth all thy diseases; who redeemeth thy life from destruction; who crowneth thee with lovingkindness and tender mercies; who satisfieth thy mouth with good things; so that thy youth is renewed like the eagle's."

✧

Straight and Narrow

BLANCHE GALLOWAY

MRS. EDDY tells us that "the way is straight and narrow, which leads to the understanding that God is the only Life" (Science and Health, p. 324). When this statement is first seen it is not generally contemplated with pleasure. The straightness of the way does not disturb us so much, for in accord with past experience and the laws of mathematics a straight line is always the shortest distance between two given points. Ever since the appearing of Adam the whole world has been seeking to reach heaven by the shortest road, and mankind are usually willing to take the shortest way.

But to mortal sense the narrow way does not seem to be pleasant or desirable. We have all come into Science because either we ourselves or some one dear to us has been in bondage to a belief in sin, sickness, or death, and have felt as did the prophet Isaiah when he said, "For thy waste and thy desolate places, and the land of thy destruction, shall even now be too narrow by reason of the inhabitants." We have already awakened to the need of overcoming our limitations in mortal consciousness and have seen how narrow our mental dwellings are. So we have been forced or have come into

Digitized by Google

Christian Science to enlarge our dwellings, and have done as Joshua bade the children of Joseph, "If thou be a great people, then get thee up to the wood country, and cut down for thyself there in the land of the Perizzites and of the giants, if mount Ephraim be too narrow for thee."

Our first experiences after taking up the study of Christian Science are generally pleasant. Our morals and health are improved. Even if the healing comes to us slowly, we begin to have better beliefs and to catch a glimpse of a religion which is demonstrable and scientific. Fears are cast out and questions in regard to the Scriptures are answered. Thus we seem to have come to the "wood country," and left the narrow path behind. Sooner or later, however, there comes a time in the experience of every Christian Scientist when he is tested. He is called upon to choose between Christian Science on the one hand and *materia medica*, the human sense of friends and position, or some other belief, on the other hand. Then it is that the way appears narrow, and the student begins to wonder and reason with himself whether he cares to tread the narrow way, or whether it is worth while. Thus begins a struggle with mortal consciousness.

In Science and Health (p. 581) angels are defined as "God's thoughts passing to man," and we come to see that they have led us to this place. We find ourselves in the same position as Balaam, of whose experience we read: "The angel of the Lord went further, and stood in a narrow place, where was no way to turn either to the right hand or to the left." Sometimes we cannot turn to either side, much less backward. The only thing to do is to go straight forward, even though the way appears to be narrow; but if we go on in the path which leads to eternal Life, we find that we must gain a better understanding of Life, Truth, and Love,—a demonstrable knowledge which will help us over the rough places.

As our search continues, material manifestations and mortal beliefs gradually disappear one by one, and the rough way seems to grow smooth again. It was at such a time, when an apparently small mortal belief was overcome, that our Leader's words at the beginning of this article came to the writer. I realized that I had been looking at the narrow way from a mortal standpoint, instead of from the scientific viewpoint. I saw that of necessity the way has to be so narrow that there is not room for even the smallest mortal belief to creep through. The cause of our discords and troubles is the tendency to look at things through mortal belief instead of scientific knowledge. When we get to the place where the way is so narrow that mortal belief cannot enter, we shall no longer be conscious of any narrowness, but shall realize that wisdom's ways "are ways of pleasantness, and all her paths are peace."

[Written for the *Sentinel*]

In Peace Secure

M. ALEXANDER PITT

DIVINELY sweet the calm Thy presence brings!
From out the sacred silence softly sings,
To strains that seem to float on visioned wings,
The heav'nly voice of praise.

No wasted past nor restless, storm-tossed fear,
Nor strange, mysterious future enters here,
For all is tranquil, free, serene, and clear;
Unerring law doth reign.

To Thee, O Love divine, to Thee we've turned;
The heart at last is soothed, for Thee it burned,
And wells with thanks to Thee for life discerned,—
Eternal life in Thee.

Selected Articles

[Carl E. Herring in *The Genoa* (Neb.) *Times*]

In a recent issue of *The Genoa Times* it appears that our Baptist friends have insisted that Christian Science is "neither sane, sound, nor Scriptural." Assuming that the words sane and sound are thrown in only for their alliterative value, it is proper to direct our attention to the remaining question as to whether or not Christian Science is Scriptural, and in this we are greatly aided by the Scriptural references given in the published article, which quoted in full offer a fair epitome of what Christian Science is and furnish an all-sufficient basis for the claim that Christian Science is Scriptural. These quotations are: "Why should ye be stricken any more?" "For the flesh lusteth against the Spirit, and the Spirit against the flesh: and these are contrary the one to the other . . . But if ye be led of the Spirit, ye are not under the law." "Wherefore be ye not unwise, but understanding what the will of the Lord is." "And the prayer of faith shall save the sick, and the Lord shall raise him up; and if he have committed sins, they shall be forgiven him."

Christian Science is a sincere effort, attended with remarkable success, to reestablish the religion founded, taught, and practised by Jesus of Nazareth. Christian Scientists seek no quarter, but boldly ask to be measured by the Master's teachings and his works, and to be judged with the charity which human frailty must have, by the proof daily offered of healing from bodily ills, from sorrow, and from fear, while here and now preparing to meet our God.

✧

[Thorwald Siegfried in *Yakima* (Wash.) *Republic*]

In a full-page article on "The Meaning of Patriotism" the statement is made that certain people "would conduct our national affairs upon the assumption that the world is today what they want it to be. This Christian Science method of diplomacy will destroy any nation which attempts to follow it."

Christian Scientists will agree that those who act on the belief that "the world is today what they want it to be" will come to grief. This ready agreement springs from the fact that the mental process to which the writer objects is not Christian Science at all, but exactly and diametrically its opposite. It may accord with so-called mental science, hypnotism, and other processes intended to help people get what they want when they want it. For that reason their modus is as readily used for evil designs as for good ones, perhaps more readily. Opposed to all this as day is to night, Christian Science is the Science of being, bringing into knowledge those things which were created by God, infinite Spirit, and which therefore endure untroubled by the passing vanities of human conception. A Christian Scientist seeks to know the truth, not to make the truth conform to his wants.

Each Christian Scientist is free to work out for himself the application of this teaching to human problems of defense against evil. However much the conclusions of Scientists may be varied by personal bias, a general agreement may be found among them to the effect that evil in any form, be it disease, military invasion, or poverty, cannot be overcome by ignoring it. To the physical senses evil is a very potent reality that cannot be rendered less real or less potent by merely shutting the eyes to it. It cannot be overcome by merely looking away from it, but rather by looking through its seeming reality and power with the spiritual conception that recognizes God as omnipotent, the only power. It is then, and only then, that evil is dissipated like a cloud pierced by sunshine.

Christian Scientists are constantly overcoming evil by the

Digitized by Google

knowledge of spiritual truth; it is not too much therefore to look for the time to come when they, like David, will lay off the armor of worldly power and overcome the Goliath of militarism "in the name of the Lord of hosts." When they achieve this, there will be no secrecy about it to those who will see; until then they may be relied upon to support every human activity tending to preserve our nation from corruption within and from foreign attack. Christian Science first builds an immovable pillar of rock under the house of human affairs; then it removes the props which may have previously supported it, but which become both unnecessary and troublesome when a firm foundation has been established. In this immediate connection Mrs. Eddy wrote in 1908, "It is unquestionable, however, that at this hour the armament of navies is necessary, for the purpose of preventing war and preserving peace among nations." And in 1898 she wrote, "If our nation's rights or honor were seized, every citizen would be a soldier and woman would be armed with power girt for the hour" (The First Church of Christ, Scientist, and Miscellany, pp. 286, 277).

✧

[John L. Rendall in *The Gate City*, Keokuk, Iowa]

As reported in recent issues of your paper, an evangelist has taken occasion to say many unkind and unjust things concerning Mrs. Eddy and Christian Science. Thinking people, however, know that abuse, vilification, misrepresentation, and the like, even when combined with ridicule and cheap alleged witticism, do not constitute a valid argument. Challenges to "perform miracles," interspersed with "scathing denunciations," may be one form of "old-fashioned religion," but it is scarcely the kind which will appeal to right thinking men and women who appreciate the ordinary amenities of Christianity. Thousands of intelligent Christian people have embraced the teachings of Christian Science. Why? Certainly not because of the "impotency of the doctrine," but because of the fact that they have found it to be an intensely practical religious teaching. Because of its teaching of the omnipotence of God they have been healed of sickness and sin and their lives have been immeasurably bettered. In all of this there is the positive recognition of the infinite presence and power of Christ, "the same yesterday, and today, and forever."

Christian Scientists believe in and practise Christian healing because they have Scriptural authority for doing so, and because they consider it to be essential and fundamental to the practice of Christianity as Jesus taught it. He who would decry God's power to heal or ridicule those who believe in the manifestation of this power at this time or at any other time, does so in the face of some very plain teachings of Scripture. Christian Science strongly emphasizes God's allness, ever-presence, and all-power, which certainly includes power over sickness as well as over sin. If it is true that God healed the sick in Jesus' time (and no Christian can doubt it), then it must be true that God heals the sick today, for in Him "is no variableness, neither shadow of turning."

The Christian Science church has been established in each and every community on the basis of actual results in the overcoming of sin and sickness and in the betterment of all conditions among those who have embraced its teachings. That it differs from scholastic theology in many respects is true, and from the standpoint of Christian Scientists therein is its value. It does not, however, differ from any of the fundamentals of Christianity as taught by Christ Jesus and his disciples. Christian Science as a religious teaching is progressive and constructive. Its adherents attend strictly to their own business, and are endeavoring to build up the cause of Christ in their own way without interference with any one else, and certainly without attempting to tear down the religious beliefs of others. There is one proof of the utility of Christian Science which is incontestable, namely, the proof given by Jesus: "By their fruits ye shall know them."

✧

[W. D. Kilpatrick in *The Patriot*, Jackson, Mich.]

As to whether or not Christian Science is a contradiction of the Scriptures, or is in strict accord therewith at every point, no one today need remain long in doubt. Public libraries are amply supplied with Christian Science literature, and all may inform themselves of the truth about Christian Science at first hand, without resorting to literature or biased opinion intended to misinterpret and mislead.

A critic's remarks, pertaining to Mrs. Eddy, in a recent issue, are untrue, as may be ascertained by a study of her life. Wherever Mrs. Eddy was known the best, she was esteemed the highest, as evidenced in the remarks of Samuel D. Felker, a former governor of New Hampshire, who said: "As Daniel Webster was the first man of New Hampshire, so Mrs. Mary Baker Eddy, the Discoverer and Founder of Christian Science, was the first among the women of the Granite State. She has left the impress of her work not only on New England, but on the entire world, and we are proud of her." The late Clara Barton, founder of the American Red Cross, who was personally acquainted with Mrs. Eddy, said: "Mrs. Eddy should have the respect, admiration, and love of the whole nation, for she is its greatest woman; the one person, regardless of sex, living today who has done the greatest good for her fellow creatures."

The Hon. Edwin G. Eastman, former attorney-general of New Hampshire, speaking of Mrs. Eddy as late as last year, stated: "I consider her the most remarkable woman, perhaps, that this country or any other country has produced." In fact, at one time or another during the past quarter of a century the press throughout the world, and especially in the United States, has taken many occasions to call attention to the great work for humanity which has been accomplished by Mrs. Eddy. One does not have to believe as she did in religious matters to be broad enough and charitable enough to perceive and acknowledge with gratitude the good she has done for all mankind.

Every moment of Mrs. Eddy's life after her discovery, through years of constant and prayerful study of the Scriptures, of the great truths of being given by her to the world in Christian Science, was devoted to the upbuilding and establishing of the Christian Science movement. For many years Mrs. Eddy worked and struggled against what might seem to others insurmountable odds, and while her years of privation and penury were followed by years of plenty, yet all, aside from legitimate provision for her natural heirs and kindred claims, went for the good of the cause for which she lived and worked. The aspersion that the abundance of her after years was devoted to selfish ends is one that time has long ago and finally answered.

✧

[Thomas E. Boland in *Chambersburg* (Pa.) *Public Opinion*]

The reported statement of an evangelist that "Mrs. Eddy says there is no such thing as sin," does not place the matter fairly from the Christian Science standpoint. That sin exists as an experience of human living, that it is the forerunner and producer of untold misery and suffering, and that mortals are eagerly and in many ways looking for release from its thraldom, every Christian Scientist admits. To do otherwise would be to imitate the proverbial ostrich,

Digitized by Google

which by the simple expedient of burying its head in the sand thinks to shut away all danger. The Christian Science textbook, "Science and Health with Key to the Scriptures," puts the matter fairly thus: "The way to escape the misery of sin is to cease sinning. There is no other way. Sin is the image of the beast to be effaced by the sweat of agony" (p. 327). So much for sin as a human belief and experience.

Christian Science, however, stands firmly and immovably upon the declaration in Genesis, "God saw every thing that he had made, and, behold, it was very good." It declares that God is good,—perfectly, entirely, and completely good; that in Him there is and can be no evil sin, sickness, disease, distress, or calamity, and therefore that He does not send these errors upon mankind. And naturally if these errors do not come from the one and only creator, they can have at most only a theoretical, mythical, fabulous existence in mortal mistaken thought, and never have had and never can have an existence as metaphysical, eternal, unchanging fact.

These two propositions are consistent and in agreement. The world is trying to get free from the misery caused by sin. The Christian Science way is to loosen the grasp of evil by uprooting its very foundations, by gaining the metaphysical understanding which shows sin to have at most only an apparent existence, and so take away the fear which mortals have of it and its power over them. It is safe to say that the power of sin cannot be lessened through propagating the belief that it is God-sent. Such a belief operates to fasten sin more tightly upon humanity.

No earnest person can without prejudice read Science and Health and fail to be impressed by its lofty spiritual tone and its constant pointing to God as omnipotent, omnipresent, omniscient,—"a very present help in trouble," a Being to be taken daily and hourly into every relationship of life. Therefore to sneer at this book as "humorous," serves but to show an ignorance of its contents comparable to those instances where others, failing utterly to grasp the message of the Bible, point at it the finger of ridicule and say "inconsistent," "untrue," and "unfit to read." However, the Bible has never lost anything through a sneer, nor will Mrs. Eddy's book in any whit suffer from a similar thrust. Science and Health has through its illumination of the Bible turned multitudes who previously had little use for the Book of books, into daily students of that matchless volume. It has opened up the spiritual, consistent message of the Bible more clearly to human comprehension, has made its teachings more applicable to human affairs, and therefore has accomplished a work for which it would seem every Christian ought to be grateful.

✧

[Charles M. Shaw in *Weekly Telegraph*, Blackburn, England]

In his sermon entitled "A Painless World?" "Clericus" describes the prevalence of pain in human experience. He recounts its educational and disciplinary uses, and then, assuming that Christian Science denies the existence of pain, he declares, "Christian Science is of no use here."

I wish to say as plainly as possible that Christian Scientists do not deny the existence of pain in the realm of sense-experience, the common every-day world of which "Clericus" is writing. Otherwise how could they reconcile with common sense their claim to be able to heal disease and suffering? Moreover, they recognize that in this same realm pain is frequently a stimulus to progress. On page 265 of "Science and Health with Key to the Scriptures" by Mrs. Eddy, is the following: "The pains of sense are salutary, if they wrench away false pleasurable beliefs and transplant the affections from sense to Soul, where the creations of God are good, 'rejoicing the heart.'" And throughout the book there are many statements of similar import.

At the same time it should be clearly understood that Christian Science does not attribute to God the existence of pain or its supposed beneficent purpose. What a grave impeachment of the Divine Being is implied in such a belief, seeing that so much of human suffering is tragically meaningless, fruitless, and unreasonable! Christian Science unhesitatingly declares that all pain and suffering are due to the sin and ignorance of mortal sense and its accumulated beliefs. It declares that pain has no inherent power to bless—many instances could be given of an opposite effect. The bane or blessing of pain depends upon the attitude of the human mind toward it.

Christian Science affirms that the sense-experience, to which pain is very real, is itself a false, abnormal sense, which is incapable of apprehending reality; that it is the privilege of man to attain a spiritual understanding or discernment which shall transcend mortal sense and so deliver him from its sins and pains; that in some degree a man's world is transformed by the renewing of his mind. These affirmations are based upon the Scriptures entirely. The great saying of Jesus recorded in Mark xi. 24 (Rev. Ver.), "All things whatsoever ye pray and ask for, believe that ye have received them, and ye shall have them," is unintelligible unless it denotes that the condition of receiving is a mental change, a change from sense-belief to spiritual perception. And taking this passage in connection with the reply of Jesus to his disciples after they had failed to heal the epileptic boy, "This kind can come out by nothing, save by prayer" (Mark ix. 29, Rev. Ver.), it implies that if the disciples had reached a state of spiritual consciousness they would have been able to heal. In the epistles there are many passages which confirm this interpretation.

Christian Science interprets the Scriptures as revealing to man his power, through his divine sonship, to overcome all the ills of the flesh; and it calls upon men everywhere to awaken from the dream of materiality and lay hold upon these divine rights and blessings. Only as pain and suffering inspire such effort are they really beneficial.

Journeyings

MARGUERITE DYER PRIESMEYER

A CHILD, with father hand in hand,
I journeyed toward the dear home land;
In forests green and meadows sweet
Bloomed scented flowers at our feet.
No fear of danger held me back,
My father knew the homeward track;
I only knew the lively joy,
When gaily, just a care-free boy,
Across the land
I walked with father, hand in hand.

A man, my goal the promised land,
I yearn to touch the Father's hand;
To journey with Him all the way,
In simple trust His word obey;
To know my homeward path secure,
With joy my daily cross endure;
Self-love and pride of will to break,
Till in His likeness I awake
And understand—
My hand clasped in the Father's hand.

Editorial

Spurious Literature Enjoined

CHRISTIAN SCIENTISTS who have had mailed to them from London, England, spurious publications which by their titles purported to be official periodicals of The Mother Church, will be interested to know that on July 27, 1916, there came to trial in the English courts the case of The Christian Science Publishing Society, of Boston, Mass., against Annie C. Bill, *et al.* At the hearing before Mr. Justice Sargant in the Chancery Court it was stated on behalf of the plaintiffs, for whom Mr. A. J. Walter, K.C., and Mr. G. C. Kingsbury, instructed by Messrs. Ashurst, Morris, Crisp and Company, appeared, that three publications had recently been issued in London by the defendants, who not only adopted the plaintiffs' name of "The Christian Science Publishing Society" as their publishing name, but took the identical titles of the plaintiffs' said periodicals, namely, the "Christian Science Sentinel," "The Christian Science Journal," and "The Christian Science Quarterly" respectively for their three publications.

On the plaintiffs moving for an interim injunction, however, it was decided to treat the hearing of the motion as the trial of the action, the defendants through their counsel, Mr. Sebastian, instructed by Messrs. Trower, Still and Company, perpetually undertaking not to use again the plaintiffs' name in connection with any of their publications, and not to use the names of the plaintiffs' said periodicals, or any of them, or any names similar thereto, or any colorable imitation thereof, in any way. The defendants were ordered to pay the plaintiffs' taxed costs.

✧

The "pearl of great price"

APROPOS of the need for a religious revival, a writer in a recent issue of *The Christian Work* in discussing this point says:—

> If they mean by a revival of religion a revival of righteousness, the awakened moral sense of this modern age would be in heartiest accord. But if they mean a revival of anything else, the age will be suspicious or entirely indifferent. We have enough religion of the other kind and to spare. A revival of religion that awakens emotion merely, that arouses the fear motive, that appeals to a man's theological prejudice or sectarianism, will never succeed today. But if they mean by a revival of religion a revival of righteousness so deep, so sincere, and so vital that ministers and church officials and church-members everywhere shall recognize that their great business in the world is to preach the goodness of God, and that men ought to be good like God, and that there is nothing else in all the world that can save a man, here or hereafter, but the goodness that is wrought out in his own life and character through the life of God,—if they mean this, and that we are not only to preach goodness, but that we are to translate goodness into our daily lives, and then translate it into the life of the community,—for such a true revival of religion this age most earnestly waits.

This causes us to repeat what we said a few weeks ago, namely, that a religious revival of the truest sort has been in progress for the past half-century, and the name of this revival of primitive Christianity, or the undivided garment of the Christ-teaching, is Christian Science. It is a revival of that combination of faith and works which the Master himself practised and which was so earnestly commended to the early church by the apostle James,—of righteousness which means not simply righteous talking, but righteous doing. It is not an appeal to the emotions, to fear, or to theological prejudice or sectarianism; on the contrary, it is a revival which translates goodness into our daily lives and into the life of the community. It is a revival of the practical religion taught by the Master, which includes the healing of the sick as well as the saving of the sinful. It is a revival which not only preaches the goodness of God, but also establishes the goodness of man in His image and likeness.

Mrs. Eddy asks in Science and Health (p. 131), "Must Christian Science come through the Christian churches as some persons insist?" and answers this question with the statement, "This Science has come already, after the manner of God's appointing, but the churches seem not ready to receive it, according to the Scriptural saying, 'He came unto his own, and his own received him not.' . . . As aforetime, the spirit of the Christ, which taketh away the ceremonies and doctrines of men, is not accepted until the hearts of men are made ready for it."

Because the hearts of all men have not been made ready for it, Christian Science is still knocking at the door of human hopes; but fortunately the rank and file who are greatly in need of this Science are finding it, even if the masters in Israel are still unaware of its coming. As an instance of what this Science is doing for those whose consciousness is open to receive it, we quote from the statement of a person who was healed of rheumatism which had been pronounced incurable, as follows:—

"At that time a copy of 'Science and Health with Key to the Scriptures' by Mrs. Eddy was loaned me. I read it more from curiosity than with the thought of any physical benefit. . . . My healing is complete, and the liberation in thought is manifest in a life of active usefulness rather than the bondage of helpless invalidism and suffering. I owe to our beloved Leader, Mrs. Eddy, gratitude which words cannot express. Her revelation of the practical rather than the merely theoretical application of Jesus' words, 'Ye shall know the truth, and the truth shall make you free,' proved to be my redeemer" (Science and Health, p. 601).

Another, who had been healed of indigestion and gastritis after seventeen years of suffering, writes: "While I fully appreciate the release from my physical troubles, this pales into insignificance in comparison with the spiritual uplifting Christian Science has brought me. I had not been inside a church for more than ten years, to attend regular services, until I entered a Christian Science church. What I saw and realized there, seemed so genuine that I loved Christian Science from the very start" (Science and Health, p. 610).

The healing of the sick was a very important part of the religion of Christ Jesus, as will be seen from the large portion of the New Testament given to the record of this work, and no revival of his religion can be complete without this vital element. Christian Science is meeting the spiritual needs of those who are willing to accept it, and it would be well for those who are hoping for a religious revival to look into it and grasp the "pearl of great price" which is already at hand.

ARCHIBALD MCLELLAN.

✧

"Comfort ye"

No one who is acquainted with the fortieth chapter of Isaiah need wonder that its inspiring phrases have been woven into the oratorio of the "Messiah," especially the opening lines, "Comfort ye my people, saith your God." The whole of the chapter indeed brings the truest comfort, yet it sweeps away from the panorama of human experience what Mrs. Eddy calls "the fading forms of matter, the mortal body and material earth" (Science and Health, p. 263); but in so doing it only reveals the imperishable realities of the spiritual universe, and the man who neither sins, suffers, nor dies. This is surely "good tidings," even while we read in no uncertain terms that mere fleshliness, although it may vaunt itself as youthful strength, shall "faint and be weary." Why then should any cling to this mortal belief when those who

Digitized by Google

wait upon the Lord "shall mount up with wings as eagles," their strength renewed in understanding the one who never faints nor fails.

The whole of Christ Jesus' earthly ministry may very properly be characterized as a ministry of comfort, and that he himself regarded it as a direct fulfilment of Isaiah's prophecy is evident when we find him providing for its continuance in the work of "the Spirit of truth," named by him "the Comforter." All Christian denominations agree that this did not mean the coming to the world of a person, but a spiritual and divine influence, rebuking sin and establishing righteousness, as we read in the sixteenth chapter of John's gospel. This Comforter is also called the Holy Ghost, and on page 588 of Science and Health we find this manifestation of infinite Mind defined as "Divine Science." Paul speaks of "the God of all comfort," and he adds, "That we may be able to comfort them which are in any trouble, by the comfort wherewith we ourselves are comforted of God."

All through the gospels we find the Master bringing the surest comfort to sufferers by healing them, and to the bereaved by restoring to them the dear ones who to mortal sense were dead. He did not, moreover, forget the needs of the sinful, for we find him lifting up a fallen woman and bidding her "sin no more," also giving the same counsel to the paralytic man at the pool of Bethesda after he had healed him. The application of the truth which blessed these two is, however, greatly extended in the parable of the prodigal. Here is a picture of one who had exhausted all that material sense had to offer and proved its nothingness. Then he had to prove what Whittier calls "the eternal goodness." This poet also says,—

Alone, O Love ineffable!
Thy saving name is given;
To turn aside from Thee is hell,
To walk with Thee is heaven.

Christian Science firmly maintains that to stray from divine Love is hell, whether the straying is done in pleasure-seeking or in self-righteousness. It also teaches that heaven with all its joys is the permanent abode of the one who loves God, good. The prodigal came back thinking he could make a bargain by which service would atone for sin, but he had to learn that he must come as a son or not at all. Self-righteousness would have robbed him of this divine privilege, but it was not permitted to do so. Divine Love insists upon clothing its own ideas fittingly, grandly, and when the awakening human sense knows what it means to be "alive again," it meets Love with love, and accepts the robe, the ring, the shoes, and the feast.

The critical brother was offended chiefly, it would seem, with the mirth. Perhaps he knew the counterfeit better than the real, and so was deceived as to the nature of the joy expressed. In any case he too needed to learn the all-encompassing comfort of spiritual sonship, and in knowing this the bread and the service, all things indeed, are transformed, while we hold fast the truth that there is, as Paul says, "no condemnation" to them who walk "after the Spirit."

ANNIE M. KNOTT.

Rubbing Out the Chalk Line

A CHRISTIAN SCIENCE practitioner was once informed by a patient that there was opposition to the study of this Science on the part of a certain member of the family, "for," explained the patient, "he is not a Scientist." This remark provided food for thought, and when the question it raised was taken to Principle and carried into the realm of pure spiritual reasoning, an underlying fallacy was uncovered. It is true that humanity has drawn a line between Scientists and non-Scientists, but upon examination this line is found to be no better than a chalk line, and so it can be rubbed out. Right reasoning reveals that there is only one God and one universe, including man. God is divine Mind, and in reality all that man can think and know must proceed from the one Mind and must be true. This true thinking, this spiritual understanding, is Science and there is no other Science; therefore, in reality all men are Scientists.

This reasoning brought a most comforting assurance to the practitioner, and a wide prospect of the brotherhood of man under the fatherhood of God unfolded itself to him, so that he was able to advise the patient to rub out the chalk line of mankind's contriving and to abide by the result. Indeed, the sequel was most instructive, for that very night the supposedly hostile member of the family remarked upon the good which Christian Science was evidently accomplishing and asked for information about its teaching and practice.

Paul thus sums up the Christian teaching concerning the unity of God and man: "But to us there is but one God, the Father, of whom are all things, and we in him; and one Lord Jesus Christ, by whom are all things, and we by him." Steadfast in this blessed conviction that there can be no real line of separation between God's children, the Christian Scientist approaches every problem from the viewpoint of divine compassion and quick forgiveness. While it is true that all persons have not yet consciously accepted the only Science which has existence and reality, and while it is therefore permissible to state that such persons are not Christian Scientists, yet it is equally permissible, indeed absolutely necessary, to wipe out any supposed line which argues separation between individual ideas of God's creating,—and the result will make for human unity.

At one time Mrs. Eddy found it necessary to address to Christian Scientists the following words, which are to be found on page 7 of her work entitled "No and Yes": "I recommend that Scientists draw no lines whatever between one person and another, but think, speak, teach, and write the truth of Christian Science without reference to right or wrong personality in this field of labor." The habit of holding others mentally to the opposite side of a fictitious line has the tendency to make it difficult for them to cross over that line. Thus also the attitude of mind which considers it necessary to drag others over such a line in order to save them, virtually places an obstacle in the way of their salvation. It is the fatal flaw of proselyting that it first of all mentally creates the very separation which it tries to overcome in the second place by persuasive preaching. In practice the mental attempt to maintain a dividing line between God's children defeats its own purpose, because it is not in accordance with the truth of being, hence is not right mental practice and can even become unconscious mental malpractice. The proper practice is to rub out the unrighteous line of separation, and lo, God and man are recognized as one in quality, and all of God's ideas are in unity!

It sometimes happens that in a given locality much healing by Christian Science has been accomplished and the text-book is being widely read, yet those who have the desire to avow themselves Christian Scientists are few. Then is the time to question one's self about this wholly unnecessary and impertinent line of separation. Is it a real line, or is it a mere chalk line? If the latter, why not rub it out? What if the prevalent manner of speech does place that husband or wife, brother or sister, that trusted friend or highly prized neighbor among the non-Scientists! God knows no such distinction, neither need we, and in reality there is none.

WILLIAM D. MCCRACKAN.

Among the Churches

Current Notes

TORONTO, CANADA.—The new Christian Science church edifice at the corner of St. George Street and Lowther Avenue, just completed, was dedicated yesterday [July 9]. Ground was broken for the building in June, 1914, and the work went on during the early stages of the war to provide a means of livelihood for the many who were out of work. The Sunday school room was completed by New Year's, so that both church and Sunday school services were held there. On May 1, 1916, the amount of eighty-eight hundred dollars remained to be raised, but the managers resolved to open and dedicate the church on July 9 free of debt. During the dedicatory services announcement was made that sufficient funds had been contributed to meet every obligation, and that the edifice, which cost one hundred and fifty thousand dollars, was entirely free of debt.—*Toronto Telegram.*

NEW YORK STATE.—Just at this time, when so much is being said about distribution of our literature, I am prompted to tell how we disposed of ours. Many times the thought has presented itself, What can we, living out in the country, do with all these papers? We do not feel as if we could burn one of them. So we folded and tied each *Sentinel* and placed all of them in a large bag. Then my daughter and I started on an auto trip to a place three hundred miles away. As we went along we distributed our papers, leaving them in the rural boxes and giving them to those walking on the country road, and we were indeed sorry when the last one was gone. We are waiting for another opportunity to send some more on Love's message to those who are hungry for Christ.—*Correspondence.*

HOOD RIVER, ORE.—One of the most attractive buildings erected in Hood River for several years is that of First Church of Christ, Scientist, just completed, at the corner of Ninth and Eugene Streets, south of the Park Street School. The building is 50 by 58 feet in outside dimensions, and stands on a site that is 70 by 100 feet in size. The auditorium has a seating capacity of two hundred.—*The Hood River News.*

AURORA, ILL.—First Church of Christ, Scientist, has practically completed negotiations by which it becomes possessed of the lot at the corner of Main and Fourth Streets, just east of the Yeoman Building. The lot has a frontage of 80 feet, depth 146 feet, and the price at which it has been held is ten thousand dollars.—*Aurora Beacon-News.*

Admission to Membership in The Mother Church

The next admission of candidates will be Nov. 3, 1916. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Wednesday, Oct. 11, 1916.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1916, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Suite 550, 236 Huntington Avenue, Boston, Mass.

The Lectures

Plainfield, N. J.

The remarks of Prof. John C. Evans of the Plainfield High School, in introducing William R. Rathvon, who lectured on Christian Science, were as follows:—

It is a pleasant task that I have to perform this afternoon. I am asked to introduce a man who brings to you, not a new religion but a new application of the basic truths enunciated by Jesus of Nazareth nearly two thousand years ago. Although Christian Science was announced only fifty years ago, yet its beneficent influence is felt today, either directly or indirectly, in almost every home in our great country. But it has spread beyond the confines of America and is being widely received in many foreign countries. It comes to these homes, as to the individual, to cheer, to comfort, to heal, to bestow the choicest of heaven's blessings.

While I have not formally subscribed to the doctrines of Christian Science, yet with a large and increasing number of thinking people I must acknowledge its "good works" everywhere manifest. As I conceive it, Christian Science means a higher spirituality, a clearer mental vision, and a stronger, healthier body. Christian Science means the doing of the Word as well as hearing and believing it.—*Correspondence.*

Hamilton, Mont.

A large and attentive audience listened to a lecture on Christian Science delivered by Virgil O. Strickler in the Lucas Opera House. He was introduced by the Rev. J. W. Heyward, an Episcopal clergyman, who spoke in part as follows:—

When God made the world, He made it big; nothing smaller would have been enough. An undersized world would have needed but a middle-sized man to condemn it. The biggest grows out of the best. We ought to be large enough to see the best that is being wrought out by churches other than our own. Even the wisest among us should have the personal courage sometimes to leave his own particular moorings and take an excursion into other realms. A new inspiration from an unusual source is always welcome,—or should be. Especially is this true when the privilege comes of listening to an expert of his cause. Then it is that we learn, and acquire information at first hand, unsullied, unsoiled, apart from the prejudgments of differing minds.

I have lived long enough in this world frankly to confess that any religion, or phase of religion, which can take away the shadows from the face and leave a serene smile in its place, deserves well of the human race. What astonishes me today is that when I stand before the masses I see lines of sadness and disappointment, with but few exceptions,—and this despite two thousand years of the active operation of the Christian faith. The church, institution, society, or organization that can banish sickness, sorrow, and suffering from our midst, and bring joy unspeakable instead, merits the strongest endorsement you can offer. God's people ought to be happy, not occasionally but always; if they are not, then something is radically wrong.

The one great trouble is that people know the God of the creeds, the God of their church's ism or ology; they do not know St. John's God, though they have heard him say, "God is love." It has been the province of the Christian Science church to lay stress on that special side of God's nature and character; and they have brought it out beautifully and simply, despite all criticism. Other elements, too profound

Digitized by Google

perhaps for the bulk of us to appreciate, have been discovered of His character and being. Still, the more we dwell on them the clearer they become. The Christian Science church cannot emphasize too much the life of that God who for centuries has been relegated to the background as too mysterious and inscrutable.—*Correspondence.*

✧

Mankato, Minn.

The remarks of J. A. Henry, editor of the *Janesville Argus*, in introducing Clarence C. Eaton, who lectured on Christian Science, were in part as follows:—

For two thousand years humanity has been seeking ideals that would satisfy the wants of being, of the heart, of life, of consciousness. Failure is written in the individual and collective lives of the people everywhere. They have looked beyond, to some dim, vague future, instead of to the present, here and now. It remained after all these ages for an inspired woman to point the way to the true temple of knowledge, of truth as exemplified in the life and teachings of the Christ; to bring to human consciousness the realities of the dream that would satisfy the yearnings of the human heart; and to show that just in proportion as we obscure the material conception of ideals and ascend into the realm of the spiritual, just in that proportion will our ideals become realities, will our aspirations find lodgment in the true goal of human destiny, where we may enter the temple of truth, and where there will be no possibility of mistaking the path or wandering into a mountainous chain of unrealities. Listening to a conversation in a public place, a traveling man, in reply to caustic criticisms, said: "I know that Christian Science as taught by Mrs. Eddy has cured thousands of people from the ills with which humanity is afflicted, and that it has brought happiness, peace of mind, contentment, to thousands of homes. I would not take away one iota from any man, if it does him good and enhances his happiness in life, either with reference to Christian Science or any other belief or profession." This sensible remark may well be accepted by those who are prone to ridicule and criticize, and in so doing they will have taken the first steps in the pathway that leads to the temple of truth, a pathway whose goal is the spiritual habitation of man as created in the image and likeness of God.—*Correspondence.*

Lectures to be Delivered

CALIFORNIA—Long Beach: Dr. Walton Hubbard, Auditorium on the Pier, 8 p.m., Sept. 21.
Oakland (Fourth Church): Dr. Walton Hubbard, Auditorium Theater, 3 p.m., Sept. 17.
San Diego (First Church): Dr. Walton Hubbard, Church Edifice, Second and Laurel Streets, 8 p.m., Sept. 19.
Vallejo: George Shaw Cook, Golden State Hall, 8 p.m., Sept. 22.
CONNECTICUT—Mystic: Willis F. Gross, Masonic Temple, 3:15 p.m., Sept. 10.
ENGLAND—Brighton, Sussex: John Sidney Braithwaite, Hove Town Hall, 3 p.m., Sept. 30.
Halifax, Yorkshire: John Sidney Braithwaite, Mechanics Hall, Crossley Street, 3 p.m., Sept. 17.
Leeds, Yorkshire: John Sidney Braithwaite, Empire Theater, 3 p.m., Sept. 24.
ILLINOIS—Chicago (Fifth Church): Virgil O. Strickler, Church Edifice, 4840 Dorchester Avenue, 8 p.m., Sept. 21 and 22.
Chicago (Seventh Church): Edward A. Merritt, Church Edifice, 5318 Kenmore Avenue, 3:30 p.m., Sept. 17, and 8 p.m., Sept. 18.
Chicago (Thirteenth Church): Virgil O. Strickler, Blake Hall, Morgan Park, 2139 West 111th Street, 8 p.m., Sept. 15.
Chicago (Fifteenth Church): Virgil O. Strickler, Masonic Temple of Austin, 2:30 and 4:30 p.m., Sept. 17.
Chicago (Sixteenth Church): William R. Rathvon, Armstrong School Assembly Hall, Greenleaf Avenue, west of Ridge Avenue, 8 p.m., Sept. 22.
Fairbury: William R. Rathvon, Central Opera House, 8 p.m., Sept. 18.
Galesburg: Virgil O. Strickler, Universalist Church, Prairie and Tompkins Streets, 8 p.m., Sept. 12.
Oak Park: Virgil O. Strickler, Church Edifice, Oak Park Avenue and Ontario Street, 8 p.m., Sept. 18.
Peoria (First Church): William R. Rathvon, Mohammed Temple, 207 North Monroe Street, 8 p.m., Sept. 19.
Wilmette: Edward A. Merritt, Church Edifice, Central Avenue and Tenth Street, 8 p.m., Sept. 21.
INDIANA—Crown Point: Virgil O. Strickler, Central Music Hall, 8 p.m., Sept. 16.
IOWA—Webster City: Frank Bell, Armory Opera House, 8 p.m., Sept. 22.
KANSAS—Ottawa: William R. Rathvon, Congregational Church, Third and Hickory Streets, 3 p.m., Sept. 17.
MAINE—Bangor: John W. Doorly, City Hall, 8 p.m., Sept. 19.
MASSACHUSETTS—Concord: John W. Doorly, Church Edifice, Monument Square, 3:15 p.m., Sept. 17.
Lawrence: John W. Doorly, Church Edifice, Green Street, 8 p.m., Sept. 21.
Lynn: John W. Doorly, Odd Fellows Hall, Market and Summer Streets, 8 p.m., Sept. 18.
MICHIGAN—Muskegon: William R. Rathvon, Woman's Building, 8 p.m., Sept. 21.
MINNESOTA—Minneapolis and St. Paul, Charles I. Ohrenstein: Minneapolis, Fifth Church, Church Edifice, University and Twelfth Avenues, S.E., 8 p.m., Sept. 18; Third Church, Church Edifice, Lake Street and Holmes Avenue, 8 p.m., Sept. 21; Fourth Church, New Franklin Theater, 3 p.m., Sept. 23.
St. Paul, Church Edifice, Summit Avenue and Grotto Street, 8 p.m., Sept. 25 and 26.
Joint lectures (delivered at Minneapolis): Crystal Lake Commercial Club, 8 p.m., Sept. 19; Shubert Theater, 12:15 p.m., Sept. 20; Arcana Masonic Lodge, Central and Twenty-fifth Avenue, N.E., 8 p.m., Sept. 22.
MISSOURI—St. Louis (First Church): John Randall Dunn, Church Edifice, Kingshighway and Westminster Place, 3 p.m., Sept. 17, and 8 p.m., Sept. 18.
St. Louis (Third Church): John Randall Dunn, Church Edifice, 3524 Russell Avenue, 8 p.m., Sept. 21.
St. Louis (Fourth Church): John Randall Dunn, Church Edifice, 5569 Page Boulevard, 8 p.m., Sept. 19.
NEBRASKA—Fairbury: Ezra W. Palmer, Steele's Opera House, 8:15 p.m, Sept. 22.
NEW YORK—New York (First Church): William W. Porter, Church Edifice, Central Park West and Ninety-sixth Street, 8 p.m., Sept. 22.
Syracuse: William W. Porter, Empire Theater, 4 p.m., Sept. 17.
NORTH DAKOTA—Ellendale: Frank Bell, Opera House, 8:30 p.m., Sept. 14.
OHIO—Kent: Ezra W. Palmer, Kent Opera House, 3 p.m., Sept. 17.
Toledo (Second Church): Bliss Knapp, Coliseum Theater, Ashland Avenue and West Bancroft Street, 3:30 p.m., Sept. 17, and Keith's Theater, Saint Clair Street, near Madison Avenue, 12 o'clock noon, Sept. 18.
OREGON—Hood River: George Shaw Cook, Church Edifice, Ninth and Eugene Streets, 8 p.m., Sept. 18.
Portland (Third Church): George Shaw Cook, First Church Edifice, Nineteenth and Everett Streets, 8 p.m., Sept. 14 and 15.
SOUTH AFRICA—Pretoria, Transvaal: Clarence W. Chadwick, Town Hall, 8:15 p.m., Oct. 26.
SOUTH DAKOTA—Brookings: Frank Bell, Church Edifice, Sixth Street and Fifth Avenue, 8:15 p.m., Sept. 18.
Watertown: Frank Bell, Church Edifice, Maple Street and First Avenue, S.E., 3 p.m., Sept. 17.
WASHINGTON—Anacortes: Dr. Walton Hubbard, Rose Theater, 8 p.m., Sept. 11.
Tacoma: George Shaw Cook, Tacoma Theater, 3 p.m., Sept. 17.
WISCONSIN—Milwaukee (Second Church): Ezra W. Palmer, Church Edifice, Highland Boulevard and Twenty-seventh Street, 8:15 p.m., Sept. 18 and 19.

Testimonies of Healing

I consider it not only a pleasure but an honor to testify in the columns of the *Sentinel*. One who has studied the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, knows of the spiritual awakening which comes to human consciousness with this study, also of that perfect peace "which passeth all understanding." This truth indeed brings rest, happiness, and hope; it enables us to enjoy our earthly surroundings, and this before was to me inconceivable.

Like a great many others who come into Christian Science, I was healed after material means had failed. My case was peculiar; first the physicians called it locomotor ataxia, then infantile paralysis. In December, 1905, I was taken with a severe illness and was confined to bed for about five weeks. After I was able to be outdoors, instead of growing stronger I became very weak. Though medicine was taken, I did not recover, but instead, on the twenty-sixth of February, 1906, there was a complete loss of the use of my legs. About a week after that my arms refused to respond. I could eat every meal that was given me, but could not move. I was more helpless than a little baby, and even had to be fed.

For fourteen months I remained in an invalid chair, during four months of that time under osteopathic and electrical treatment. One day, after a consultation with another physician, my doctor said the case was peculiar and he could not tell when I would recover. As I was thinking this over afterward, the thought came to me to try Christian Science. I knew nothing of its teachings, but was glad to try anything that might make me well, as medicine had failed and my recovery seemed far distant. We accordingly called in a Christian Science practitioner, who was surely led to us by infinite Love. As she explained the Bible to me in the light of Christian Science, my consciousness responded to this teaching, and from that moment I loved to read Science and Health, because it is filled with healing thoughts for those who will seek them in the correct way. My healing was slow, but after treatment had been given me for about three weeks I knew it would be complete, and it was. For the last eight years I have been a picture of health, and am as active as are other men in daily life. The past seems like a dream.

Christian Science has been a help to me in many ways; it enables me to look always on the bright side of things. In "The First Church of Christ, Scientist, and Miscellany" (p. 210), Mrs. Eddy says, "Keep your minds so filled with Truth and Love, that sin, disease, and death cannot enter them." Jesus said, "What I say unto you I say unto all, Watch." To me this means, Watch your thoughts, and in so doing you will have all that is yours to have. Now let the reader of this testimony answer the question, If you were I, would you not be grateful indeed for the religion which had brought you back to health and given you peace, happiness, and hope?—Richard W. O'Connell, Dallas, Texas.

✧

Many blessings and spiritual awakenings have come to us through the study of Christian Science. Some time ago my four year old daughter fell on the front steps. When helped up she was crying bitterly and complained of pain in one of her arms. I brought her into the house, and after removing her coat noticed a bend in the arm above the wrist, which to mortal sense was broken. A Christian Science practitioner was immediately called, and she said she would commence treatment at once.

The little one had been placed in a chair and was resting her arm on cushions. I began to read to her from Science and Health, and she soon stopped crying and went to sleep. As both bones had been broken, my husband decided they should be set, so we called a physician, who arrived about two hours after the accident occurred. There was no pain when the bones were set, and the child experienced no further discomfort from the arm. The day after the accident she did not use the arm much, but after that she used it as freely as the other. No discomfort was experienced while she was being dressed, and the very first night she raised her arm over her head to put it through the sleeve of her dress. It was never carried in a sling and the bandage was never secure very long, being pushed up to allow freer use of her fingers. There was no swelling and never any pain, even when the physician in thoroughly examining it pressed and tested it in all ways. Out of respect to his kindness the bandage was not removed till the end of three weeks, though the healing was complete on the second day and the physician himself said it was a perfect joining.

We have had many other evidences of the healing power of divine Love, among them being kidney trouble, dropsy, convulsions, fevers, and colds. Our thankfulness to God is unbounded, also our gratitude to Mrs. Eddy for her wonderful work.—Mrs. William D. Clark, Webster Groves, Mo.

✧

I feel compelled to give thanks to God for my restoration to health and happiness. For twenty-five years I had been afflicted with hemorrhoids, and several physicians had treated me without success. My feet and legs commenced to swell and my general health to break down. The family physician said that nothing would do me any good except an operation, to which I would not consent. At this time a friend spoke to me of Christian Science. I knew nothing of it, but was willing to try anything. The practitioner of whom I asked treatment said I could be cured, as all things are possible to God, although my advanced age and lifelong belief in the tenets of another religion might hinder me. I was better after the first treatment, and in a week was entirely healed. Several minor troubles were overcome at the same time, among them stomach disorder and the habit of smoking a pipe. I am a well woman, thanks to my loving Father.

Christian Science is my daily comfort and strength, and the Bible has never seemed so beautiful. I am learning that God is Life, Love, and Truth, and am thankful to Him for the blessings each day brings me, as well as grateful to Mrs. Eddy, who gave us the light.

Miriam B. Martin, Hopkinsville, Ky.

✧

My attention was called to Christian Science in 1905, at which time I took up the study of the subject and was healed of lung trouble of about five years' standing through reading the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. The healing was effected in about seven months, and I have never been troubled with a cough since. Heart disease was healed nearly seven years later, after I had listened to a lecture on Christian Science in our church. The healing was instantaneous, and since then I have never known a moment's suffering from that difficulty, nor have I experienced any sense of pain.

Chronic bowel trouble, rheumatism, severe nausea, and many so-called minor ailments, also disappeared, and today I can truthfully say that I am physically whole. I find, however, that the greatest blessing is to be spiritually whole, and am learning to know more and more of that Mind which

Digitized by Google

"was also in Christ Jesus." Heaven no longer seems a locality, or God a manlike being. Christian Science is educating me into heaven, harmony, through understanding, as we read in Science and Health (p. 587), "government by divine Principle."

I am grateful for having the opportunity to be mentally awake to this inspiring message that has come to us through our revered Leader, Mrs. Eddy, and to know God as expressed in the Science of being as All-in-all.

O. John Keller, Pasadena, Cal.

✧

It is with a deep sense of gratitude that I tell of what divine Love has done for me and mine through Christian Science. Besides the many daily blessings received, there is one in particular of which I wish to speak. In the college which our son is attending, *materia medica* laid down the law that there was an epidemic of typhoid fever. After he had been kept in bed for three days, he was declared to have this ailment, and was sent home nearly starved.

We had no intimation of our son's condition until he arrived at home with an attendant. His first request was for Christian Science treatment, as he had had enough of medical treatment in the three days, so we telephoned for a practitioner. Upon her arrival she told my son he could have something to eat and need not stay in bed if he felt like getting up. Accordingly he was down-stairs nearly every day for an hour or two. Neither his father nor I had much fear until the seventh day, and then it was quickly overcome by the loving words of the practitioner, who assured us that God was taking care of him.

The next day we saw that the case was met, and from that time on the boy ate whatever he wished and seemed unable to get enough. In three weeks and four days from the time he came home he went back to college, looking and feeling as well as ever, and began playing basket ball with the college team. This was a few days before Thanksgiving, 1914, and at Christmas, when he came to spend the holidays with us, he was the only one of those who had been sent home ill who had as yet returned to college.

It is now over four years since we took up the study of Christian Science, and divine Love has taken care of us all during this time. We are very thankful to God, and grateful to Mrs. Eddy for giving us this wonderful truth.

Mrs. A. S. Taylor, Camden, N. J.

✧

I am very glad to have the opportunity of expressing my gratitude for all the brightness that has come into my life since first hearing of Christian Science about four years ago. At that time I was suffering from a severe internal trouble, for which all known remedies had been tried, besides strenuous treatment at Contrexéville, France, for two years, but without success. The attacks of pain would last from one to four days, and an opiate had to be administered at intervals.

I was afraid to go out alone, and was not allowed to go to any place which was not within reach of a doctor. Having been brought up very strictly, I was disappointed to find that my religion did not seem to help me at all. The specialist and doctor, whose kindness had always been unfailing, both said frankly that the only operation likely to help was a more risky one than they would advise me to undergo. This seemed to me the last straw, and I was ready to try anything that held out a ray of hope.

My sister, who had heard considerable of Christian Science, then urged me to go with her to see a practitioner, and I accordingly did so, but in a frame of mind which was a mixture of skepticism and fear. A few minutes' conversation, however, showed how little I had understood, and from that time it became clear that Christian Science would give a consistent explanation of all the difficulties that had ever troubled me. The practitioner gave me treatment, with the result that after three weeks I was able to walk about, run, and even play tennis, something I had not been able to do for years. After fifteen months' complete freedom I had one more attack, and with this the cause of the whole trouble passed away. My husband then became interested in Christian Science, and we have since had innumerable instances of its healing power. It is of incalculable value in the bringing up of our three little children, as well as in all the emergencies of every-day life.

I am more than grateful to have found a religion which is so practical that it can be applied to every detail of one's life. While conscious of being only a beginner in Science, yet I am grateful whenever I look back and realize the enormous difference between my outlook on life now and what it was before hearing of Christian Science.

May Botterell, London, England.

✧

When Christian Science was first brought to my notice about six years ago, I was in the depths of despair. I was blind both physically and mentally, and almost insane from pain coming from granulated eyelids, from which I had suffered for over ten years. I had undergone two operations and spent all my money in medical treatment. The physicians did all in their power to relieve me, but one of them told my cousin there was no cure for my case. Ulceration and inflammation had so ruined my sight that with one eye I could barely tell daylight from dark.

After one month's treatment in Christian Science I was able to read, write, and sew. Glasses which had been worn for ten years were taken off immediately at the practitioner's request, and I have never put them on since. I can read all kinds of print, thread small needles, and write page after page of letters to my children and friends. My healing was slow, for I was in such dense ignorance and darkness, and all was so different that it was difficult to grasp the meaning of the blessed word that makes free.

I had joined a church years before, but during the struggle for a living for myself and three small children, and the passing on of my husband and two little ones, to be told that a loving and merciful God was responsible for these things made me rebellious and bitter. I ceased attending church, closed the Bible, and tried to find peace and enjoyment in the way others were doing; but limitation, doubt, fear, and worry were my constant companions, and I often wondered what it was all for—what was the end of a life like that.

Another wonderful demonstration came to me in January, 1915. One morning I found myself suffering with an attack of acute lung trouble. Although I live in an isolated place and there is no other Christian Scientist nearer than thirty miles, at first I did not feel alarmed, but tried to realize the truth and kept on with my regular work. As the week wore on, however, and one symptom after another appeared, I began to fear and to think it impossible to do any more for myself. I wanted help from my daughter, who lives thirty miles from me, but found that the telephone in our little town was not working. As I was getting worse all the time, I began to read on page 162 of Science and Health the passage beginning: "Christian Science brings to the body the sunlight of Truth, which invigorates and purifies," and by the time I had finished reading I felt God's ever-presence and was healed. Many discordant conditions have been overcome

Digitized by Google

in my home life, many burdens lifted, and so much worry and fear eliminated that I have truly been born again.

I am thankful for our periodicals, and can scarcely wait each week for the *Sentinel* with its messages of love and peace. About twice a year I have the pleasure of attending church services. All I am I owe to Christian Science, and my desire is to be worthy of the name of a loyal Christian Scientist, and to help others to know and live the life and teachings of Jesus as made clear to us by our beloved Leader, Mrs. Eddy. I often think that we as Christian Scientists are not thankful enough to our beloved Leader and guide for her pure, consecrated life. Words can convey only a small part of our gratitude, but she asked us to let our lives testify to what our hearts felt.

Mrs. John McCamant, Humptulips, Wash.

Eight years ago, after having had hemorrhages of the lungs, I came to California. I was said to be suffering also from an internal abscess, impaired heart action, and my knee-caps had slipped out of place. I used opiates, and elastic caps were worn on both knees. An eminent physician in Boston had told me that my life hung by a thread. In addition to the physical and mental afflictions which had caused me much suffering for years, I was attacked with chills and fever within less than a year after coming to this state. My husband took me to the mountains, but for a year I was never able to walk a hundred yards at any one time. Various remedies were tried, but my condition remained most precarious until we began to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, nearly six years ago.

Most of what we read seemed beyond our comprehension, but the reading alone brought relief. The elastic knee-caps were discarded, the lungs became sound, the internal abscess was healed, the heart no longer troubled me, and I ceased to use any material remedies. Any one who has ever turned to Christian Science for physical relief will remember how reluctantly he parted with the medicine he had leaned on, even though it was to no purpose, for so many years.

My life is just as much improved spiritually as it has been physically, and the Bible and Science and Health are my daily source of strength. I am very grateful to the dear friend in the East who called my attention to Christian Science, and to Mrs. Eddy who discovered it and gave it to the world, but above all thankful to God, the giver of all good.

Josephine Clara Scott, Los Angeles, Cal.

Our Master has said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." I can no longer refrain from adding my testimony of the freedom I have found in Christian Science during the past twelve years. Many times it has been proved that if we rely implicitly on the truth, it overcomes every adverse condition.

Some time ago I had a convincing proof of this in a case of accident. I was called to pass the night with a patient, and as she was very comfortable we both retired, but during the night I was suddenly awakened, and without turning on the light went to her. On the way back to my room, instead of entering it, as I supposed, I fell down the stairs to the landing below. After a few moments, and with a little assistance, I was able to walk to my room, but for a while the sense of pain was intense. Knowing God to be a "very present help in trouble," however, and realizing the truth of being as best I could, I passed the rest of the night peacefully. In the morning I called for help in Science and was taken home. To material sense the bruises were many and severe, but on the fourth day I discarded all material support and the following week took up my regular work, which required much physical activity.

For this experience and many other proofs of the protecting and healing power of divine Love, I am truly thankful to God, also grateful to our revered Leader for making the way so plain to this age.

Fannie E. Calderwood, Berkeley, Cal.

[Translated from the German]

It was over seventeen years ago that Christian Science came into my life and brought about its complete transformation. In fact it often seems to me as if I had been living only since then, and at times I hardly feel as if I could have grown older, although I had gone through many severe experiences.

During childhood I was always more or less a sufferer, although everything was done that lay within the power of the kind physicians who attended me; but all their efforts were in vain. When I grew into young girlhood, conditions took a more serious turn, and I suffered almost constantly. I was advised to undergo an operation, but to this I would not consent, as I had lost faith in the efficacy of *materia medica*, if I had ever had any, for I remember having had arguments with physicians in former years regarding the inefficiency of their methods. The human mind, however, is not strong enough to maintain its convictions when it knows of nothing better, and so it was in my own case. Owing to constant persuasion, to the fact that my suffering was gradually growing more severe, and to increasing weakness, I finally yielded. I was in England at that time, and the operation was to be performed at the home of relatives, but I felt I would not live through it. Although I did not wish to displease my relatives, whose advice I had accepted and who had arranged for the operation, yet when on the day previous to it I found myself feeling a little better, without telling them of my purpose I went to see the physician and canceled the arrangements for the operation.

Although I blamed myself very much for my fear at the time and called myself a coward, I can now see that after all it was divine Love that saved me from the surgeon's knife and from other troubles; for very soon afterward Christian Science came into my life and met all my needs. While reading our wonderful text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I felt that I had been called out of darkness into a wonderful light, and my gratitude to Mrs. Eddy was greater than I could describe in words, for her teachings have revealed to me a God whom I can trust and to whom I can pray, and before whom I can lay all my difficulties, even as I would turn to a loving and powerful father for help and counsel.

I did not, however, look forward to being helped physically through the reading of the book. My ailments seemed too real; besides, after the bliss of having found the true and living God, divine intelligence, who at once became my All-in-all, my protector and counselor, I did not think that more could be added to my good fortune. To be sure, I had heard of healings wrought through Christian Science, but I discredited them. I would have been entirely satisfied with the religion itself. Thus days, weeks, and months went by, but when I became aware of being without pain, inflammation, or weakness, I asked myself, Why, where have my troubles gone? and the answer came in Jesus' words, "Ye shall know the truth, and the truth shall make you free." The truth

Digitized by Google

apprehended through reading the text-book had healed me of a severe kidney trouble, of internal abscesses, and other ailments.

These healings occurred seventeen years ago, and since then there has never been the slightest return of any of the former ills. From then on I devoted my life and my efforts to Christian Science, and I have tested the truth of its wonderful teachings so often for myself and for others that, no matter how grievous human conditions may seem to be, whether mental or physical, I know divine Love is the all-powerful Physician and sure Comforter, and that He can and will heal every inharmonious condition and make all things new.—MARTA KRAFTMEIER, Boston, Mass.

✧

This testimony is given to tell the world my experience as a Christian Science student, and what this teaching has done and is doing for me. I am eighteen years of age, and took up the study of Christian Science in earnest only this last year, although I have been attending church for the past six years. I have had many minor demonstrations, but wish to tell of a healing which seemed wonderful to me in that for the first time I realized God's ever-presence,—that because I lived, moved, and had my being in Him, all manifestations of error must disappear.

There were many knotty lumps on my tongue, and one of them had become so large and painful that it was difficult for me to eat or talk. No definite steps were taken to overcome this trouble till one day the dentist, while working on my teeth, asked if I realized that there was an abnormal growth on my tongue. He then proceeded to tell of his sister, who had the same affliction; how she had undergone an operation, and of the suffering she endured. I asked no questions, not caring to make such a mountain of the condition; but on the way home fear suddenly came over me, and shortly I was picturing to myself the terrible things that might happen if this trouble progressed.

Upon reaching home the decision was made not to tell the family, as my mother already had much fear, and the difficulty would be all the harder for me to overcome, but to work out my own salvation, having once heard a Christian Science practitioner say that all fear must be obliterated before the healing is made manifest. To be alone with my thoughts I retired early, knowing that as God's child I was His perfect reflection, His image and likeness, and that everything God made was good. Peacefully I fell asleep, and the following noon, having forgotten it till then, found that my tongue was perfect. Words cannot express my feelings, my happiness and thankfulness.

My mother has been healed of a chronic disorder of twelve years' standing, from which she suffered untold agony. We thought every day would be her last, but since taking up Christian Science she is a different woman and enjoys perfect health. This healing did not come until she gave up the physical healing and sought for the spiritual. I am deeply thankful to God, and grateful to our revered Leader, Mrs. Eddy, for Christian Science.

BERNICE JACOBS, Portland, Ore.

✧ ✧ ✧

While obedience is the law of the kingdom, it is of considerable importance that that which is obeyed should be in very truth the will of God. It is one thing, and a good thing, to do for God's sake that which is not His will; it is another thing, and altogether a better thing,—how much better, no words can tell,—to do for God's sake that which is His will.

GEORGE MACDONALD.

From Our Exchanges

[The Jewish Chronicle]

The question naturally arises, Why is it that in a world framed, as we believe, by a good and ever loving God, diseases occur? Their presence is one of the things which has troubled men and forced not a few to the dreary creed of despair. To many minds disease casts its dark shadow over the face of God and quenches in their hearts all reverence and love. This would perhaps be justified if disease could be shown to be the normal condition of man,—if it could be proved to be in the very texture of his nature,—a part of its original endowment. But there are good reasons for believing that disease found no element in humanity as it came from the hand of God. God made men upright, but "they have sought out many inventions." "And God saw every thing that he had made, and, behold, it was very good." This seems clear from the fact that many diseases can be traced back to their origin, so that we can see exactly how they arose. We know their genesis. Fully half the maladies to which men are liable are due to impurity, either physical or moral.

Now if we can clearly trace the origin of certain diseases to the carelessness or sin of men, are we not justified in believing that all disease has a like origin and is abnormal? Moreover we know that new conditions of life have given rise to new forms of disease. The rush of life in our day, the mad race for wealth, the swift modes of travel, have given rise to many forms of nervous disease unknown to earlier and quieter days. Many considerations lead to the conclusion that disease is not from heaven but from earth, not from the great Father, but from the folly or carelessness or sin of men. Have we not been assured, "If thou wilt diligently hearken to the voice of the Lord thy God, and wilt do that which is right in his eyes, and wilt give ear to his commandments, and keep all his statutes, I will put none of these diseases upon thee, which I have brought upon the Egyptians: for I am the Lord that healeth thee." Therefore let us put away the too common idea that God is the author of disease. He is the God of health, not of disease; of order, not of confusion.

[Rev. Andrew Gillies in *The Homiletic Review*]

This is the greatest of the Christian centuries. It is greatest in man's insight into truth. We know more about God and Christ and sin and immortality, about ourselves and the universe, than ever has been known before. This century is greatest, too, in the application of truth to the life of the race. After all, the real glory of our time is not that we are teaching more clearly than ever the fatherhood of God and the brotherhood of man; it is that we are incorporating them more fully into our social relations. And so this century is the greatest in spiritual power and promise. With all its faults, this period is better religiously than was any past period with all its virtues. I do not mean that all men are self-confessed subjects of Jesus Christ or that all who confess him as Master are all that they ought to be. I mean that the gospel of Jesus Christ has been interpreted more clearly, spread more widely, and embodied more completely in the life of the race than ever before since he who proclaimed it walked the ways of the earth.

[Rev. Henry Kingman, D.D., in *The Biblical World*]

If we have ever seriously tried to reach even a single life weakened in will and poisoned in spirit by vicious indulgence, embittered and defiant toward all that stands for law and moral restraint, we have had some insight into the almost insurmountable difficulty of bringing spiritual renewal to one

Digitized by Google

who refuses it, or re-creating the heart of one whose pleasures are rooted in evil affection. Men are always rediscovering the fact that nothing but love can do this work, and even then only at its own personal cost and sacrifice. Money cannot purchase it. Neither the most perfect organization nor the most highly paid officials can be depended on to secure it. It goes without saying that there are many forms of social amelioration that are efficient aids, and that we are bound for every reason to aid them to the best of our capacity. But in the last analysis the deepest needs of the individual soul, the needs which blind and bewilder and ultimately destroy, are only to be reached or relieved by love. And however we may carp at individualism, the last stage of social progress, like its first, will still be dealing with the problem of individual need and individual redemption.

[*The Continent*]

Can you and your church friends talk religion? Hardly anywhere in today's religious life is there a problem knottier and harder to deal with than this. The only unmistakable fact about it is that lay Christians of the current generation do not by any means talk so freely of their religious hopes as their fathers and mothers did. And the complications of the subject loom into view right away when one undertakes to say whether he thinks the present generation worse or better off on that account. To be sure, the thoroughly conservative type of mind does not hesitate over any such question; it roundly and continuously laments that the old fashioned custom of "testifying" in prayer meeting has gone out. But minds more analytic cannot help recognizing a good many faults in the talkativeness of church people years ago which a healthier instinct today has repudiated. Undoubtedly a great deal of disgust at pious talk has grown out of disgust at hypocritic Christians who talked piously Sundays and Wednesday nights but failed to live right between times.

[*Northwestern Christian Advocate*]

Owing to the fact that religious traditions are stronger than others, the institution of the church is naturally more reluctant to shift its front and submit to new alignments; consequently social and business conditions in our cities have become transformed with a sweep that the church has not matched. Our religious leaders are slow to adjust their methods to the latest demands, and in many places the church languishes. In the important matter of creeds there is naturally a strong and controlling tendency to rein in rather than spur on the church's thought into creedal expression. Far better were it to hold too long to an article of belief, conscious at the same time that a larger revelation which the future still holds in reserve may reveal new phases of truth that will compel a revamping of our creed, than to rush into the misty field of speculation and there, before the sun has fairly shone, plant the banner of belief upon untried ground. Better to advance slowly but surely than be called upon to retreat.

[*The Christian Intelligencer*]

Here is a wonderful ideal for the Christian, "Ye therefore shall be perfect, as your heavenly Father is perfect." Whether these words express a command or a prophecy, they express the aim of every true Christian. We are to be imitators of God and to grow from more to more in our likeness to Him. We may not plead the frailty of our natures in excuse for lazy indifference. We are summoned to the heights of perfect character in the Christian life and equipped for increasing attainment. In Christ we are brought into such a relation with God that we become partakers of the divine nature. No limits are set to a Christian's possibilities. His sufficiency is of God.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

A copy of the Index to Volume XVIII of the *Christian Science Sentinel* will be sent free of charge to any subscriber upon request, but will not be enclosed with No. 52 (the issue for Aug. 26) as in previous years.

"Christian Science: Man's Dominion Over Evil," a lecture by Edward A. Kimball, C.S.D., has been translated into Russian, Norwegian, modern Greek, and Italian. Pamphlets in these four languages have been published with the English version opposite the translation and are now on sale at prices of our regular pamphlets as shown on the opposite page.

A new French pamphlet, "Foi et Générosité" (Faith and Generosity), has just been issued and is now on sale. This pamphlet contains the following articles: "The Lord Thy Confidence," "The Closed Hand," and "Continuity of Right Thought."

"Christian Science: A Religion of Love" (Christian Science: En Kjærlighetens Religion), a lecture by Virgil O. Strickler, has been translated into Norwegian and is now published in pamphlet form with English and Norwegian versions on opposite pages.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy. Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 61 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under those titles in this price list.*

Entered at Boston, Mass., post office as second class matter.

Items of Interest

To make a successful fight against moving sand-dunes such as those of the Columbia River region and other places along the Pacific coast, the United States must follow the plan adopted by France many years ago and build one great dune in an effort to eliminate many smaller ones. This is the verdict of forest service experts who have made a world-wide study of dunes and of the methods employed to combat them. "In the lower Columbia River Valley, both in Washington and Oregon," according to a contributor to *The Popular Science Monthly*, "sand-dunes are destroying farms and orchards, and are changing a country of great fertility into waste land. A hundred years ago France was confronted with a problem equally serious. More than three hundred miles of coast line on the Bay of Biscay was being blown inland by the winds of the Atlantic Ocean.

"Eventually some one hit upon a plan of building a great lateral dune along the entire coast as a means of checking the movement of the sand. The entire coast line was fringed by a fence consisting of posts driven into the ground at close intervals, and the spaces between them were interwoven with willow branches and brush," he continues. "Soon the strong winds blowing in from the ocean banked a great wall against this fence and eventually it was entirely covered with sand. Then a second line of fence was erected on the small lateral dune thus created. In time this fence was covered by the sand which banked up against it. This operation was repeated many times, and then other means of increasing the size of the dune were used. Pine trees were planted along the top. These served to check the wind-blown sand as the fences had done in past years, and day by day the dune grew in height and widened out. As it increased in size more pine trees were planted. Today a great forest 2,500,000 acres in extent fringes the coast line as the result of this initial experiment. It represents France's greatest supply house of turpentine and lumber. The country lying inland from it is rich and fertile. The sand menace has disappeared.

The national forest reservation commission has approved the purchase by the Government of fifty-nine tracts of land with a total of 66,880 acres in the Appalachian and White Mountains. Thirty-six thousand acres are in the so-called Kilkenny purchase area in New Hampshire. About seventeen thousand acres of adjoining land on the White Mountain area was approved. With this land a total of 698,086 acres in the White Mountains has been acquired. Smaller tracts were purchased in the southern Appalachian Mountains. Congress recently reappropriated the $3,000,000 of the original fund which was not spent in the beginning of the work and which consequently reverted to the treasury. In making future purchases it is stated that the policy will be to select those tracts which block in with lands already purchased and which are offered at the most reasonable prices. The acquisition of lands was begun in 1911. To date 1,396,367 acres have been approved for purchase.

Enormous growth of the business of the United States patent office is shown in the report of the commissioner of patents for the year ending Dec. 31, 1915. The grand total of the patent fund exceeds ten million dollars, the net earnings for the year amounted to more than two hundred and thirty-seven thousand dollars. New York still leads in the number of patents issued. The total number of applications filed during the year was 70,069. The total number of patents issued was 44,934. The total number of patents which expired during the year was 20,404. The total number of applications allowed awaiting payment of final Government fees was 18,913.

An economy campaign of nation wide extent will be started by American farmers at the Fourth National Conference on Marketing and Farm Credits called to meet in Chicago, Dec. 4-9. The campaign will begin with practical plans for checking enormous wastage in marketing farm products. This annual wastage is of a billion dollar magnitude, according to a statement of the general committee. "The root of it lies in defective local organization of farmers," says the secretary of the organization, "and the delegations will work out machinery for getting the local communities more tightly organized."

The Dominican Republic has an area of about twenty thousand square miles and is larger than Belgium, The Netherlands, Denmark, Switzerland, or Turkey in Europe, or than the combined territories of Massachusetts, Connecticut, Delaware, and Rhode Island. The population is estimated at about seven hundred thousand, which is about thirty-five people per each square mile, while Haiti, its neighbor on the west, has about two hundred for each square mile, and Porto Rico has more than three hundred. Most of the fertile land of the country is still virgin.

One of the principal sources of wealth of the Greek people is the milk industry, which, however, is still conducted in a primitive manner. The principal milch animals of Greece are sheep and goats. Cows are found only in and near the larger cities, on account of the poor pasturage offered by the hilly and rocky country. According to official statistics in 1911, there were in old Greece 3,546,642 head of sheep and 3,238,045 head of goats, valued at $23,872,876. To these figures should be added 6,000,000 head of sheep and goats scattered through the rich plains of Macedonia and the hilly districts of Epirus, which became Greek territory after the Balkan wars of 1913.

In climate and physical features northern Manchuria is strikingly similar to the Dakotas. There are the same immense areas of fertile, rolling plains, well watered but almost treeless, and mountain ranges, east, north, and west, of no great height but fairly well timbered and rich in undeveloped coal deposits. The climate is exceedingly dry, sunny throughout the year, and healthful. The rainfall in spring and summer or early autumn is usually sufficient and the winter snowfall light, though the thermometer occasionally falls to 45 degrees F. below zero, or lower. In summer there are moderate winds and the temperature rarely exceeds 97 degrees F.

The value of articles exported to the United States from the Madras Presidency, British India, in the six months ended June 30, 1916, as declared in invoices certified at the Madras Consulate, was $4,995,597. Approximately half of the total exports consists of goat and sheep skins, either raw or in the partly manufactured state known as tanned or dressed. The next largest items of export were: coconut oil, 5,920,407 pounds; black and white pepper, 3,907,093 pounds; and coir yarn, 6,781,538 pounds.

Both Houses of Congress now have authorized the largest naval construction program ever adopted by any nation in the world, an appropriation of some three hundred and fifteen million dollars. The program contemplates beginning construction on 156 ships within the next three years, 16 of which are to be capital ships four battle cruisers and four battleships the first year. It proposes to increase the number of enlisted men from 65,000, provided in the House bill, to 74,700.

This year's sugar crop of St. Croix, Danish West Indies, promises to be the largest this island has yielded since 1903. Estimates place the probable output at 33,000,000 pounds. The growing of sugar-cane is the most important agricultural industry in St. Croix at present, there being 13,000 acres of land under cultivation for this purpose. Formerly there were approximately one hundred sugar estates in St. Croix, but in recent years many of these have been merged into large holdings.

Peanuts were grown formerly in a single province of southern Spain, but they are now raised in other provinces and the area devoted to them is extending. At present about nineteen thousand eight hundred acres are annually planted in peanuts with a yield of approximately fourteen thousand eight hundred long tons, so that Spain stands first among European countries in the production of this crop.

The total value of bleaching materials manufactured in the United States for sale in 1914 was $4,964,403. Hypochlorites constituted the most important class, the production aggregating 222,152,000 pounds.

Cuba's crop of cane sugar in 1915 was 2,649,488 tons in volume, the record crop in the island's history. The value of the crop was approximately one hundred and ninety-seven million dollars.

During the last five years the growing of alfalfa has steadily developed in Argentina, and it was estimated that in 1914 there were 18,219,997 acres of land employed in this way.

President Wilson on Sept. 4 at Hodgenville, Ky., in an interesting address, formally accepted for the nation the Lincoln farm and the cabin in which Abraham Lincoln was born.

The reports of the eleven clearing-houses for the first six months of 1916, says the *Japan Advertiser*, show that more than $4,182,415,000 were cleared during that period.

The Divine Antidote

REV. JAMES J. ROME

IN the study of chemistry the student learns that among the elements there are those of opposite qualities or characteristics, and that, as in the case of acids and alkalies, they can be used in the work of analysis for the purpose of neutralizing each other. This fact is taken advantage of in the practice of medicine, and drugs of certain qualities are administered by physicians to counteract or antidote the supposed presence in the human system of something of an opposite nature, so that one kind of matter may correct or destroy the other kind.

It is evident of course that matter could have no active quality in or of itself apart from mentality, for all action is the result of the operation of law of some kind; and to have law operative we must have mind, or thought, hence the action of material elements is primarily the operation of mental qualities. Now if the mental action or belief that endows matter with these different qualities could be discerned and analyzed, then the effect might be produced without the presence of the material element. Advancement enough has been made along the lines of physiological study to recognize that certain material effects have been produced without the presence of any matter as causative, and have therefore been entirely the result of mental action. It has been admitted by physicians, for instance, that an extreme state of anger or excitement has produced a deposit of some acid poison. Now it seems a peculiar procedure, when this acid poison was produced mentally by a condition of anger, to seek to counteract it by the administration of a material alkali; yet undoubtedly such would be the method adopted by any ordinary medical physician.

Even though the acid produced in the stomach is neutralized by some material means, if the mental condition which caused the acid deposit is not removed or changed, it is very evident that the ailment is not healed. The mental agitation needs to be treated. But now the question occurs, What kind of medicine shall we give one to change a bad disposition, acid or alkali? It is surely evident that a mental, not a material, antidote is needed to heal one who has a discordant mentality. It is because Christian Science furnishes the proper antidote that it has proved to be so superior to other methods in dealing with physical ills and discords of all kinds. It recognizes the disturbing cause as mental, not only in a few cases but in every case, and therefore appeals to a mental source for the cure. Our Master clearly intimated that a spiritual remedy for every human ill exists, and so he could say, "These signs shall follow them that believe; . . . They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

But here arises another question, What kind of mind was it that caused the trouble, and shall the appeal be made to the same mind to heal what it has caused? In other words, Shall we look to the cause of the discord as the source of the antidote? If we do, we shall find either the remedy already referred to, that is, healing mental effects with material cures, or we may have the still worse remedy of trying to pacify the evil propensity by indulgence, applying the homeopathic theory *similia similibus curantur*. For instance: If anger has been aroused in the thought, mortal mind would have it appeased by revenge. If one is covetous, let him become possessed of that which he desires, at his neighbor's cost; if he is ambitious and avaricious, let him have wealth and fame; let pride oppress and hatred kill. Yet experience has shown that such a course will only result in these disturbed conditions of thought being aggravated and increased instead of destroyed.

In none of these methods, however, nor in any other method of mortal mind, shall we find the remedy, for there cannot be found therein anything of a different nature with which to combat the disease. In other words, the mortal discord requires a spiritual antidote, which must be found outside of mortal consciousness. Jesus asked, "Do men gather grapes of thorns, or figs of thistles?" and he added, "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." The antidote must be of an opposite nature.

Great care needs to be exercised, however, when applying the corrective quality of thought. It must be done with understanding, and not be a mere change of belief. That so-called "mental science" which seeks to correct a wrong or discordant mental condition by the substitution of an opposite quality of human thought, displacing one mortal belief with another, is not Christian Science. Endeavoring to correct sadness by thinking joy, despondency by thinking hope, fear and discouragement by thinking courage, weakness by thinking strength, and so forth, is not meeting the demands of the divine Science of Mind. The human counterfeits of the divine qualities may seem very real, and may for a time even seem to bring some relief to the distressed thought, but they do not furnish the permanent understanding of divine Mind and idea which sustains man, and which comprehends the only real healing and redemptive power of Spirit. "It is the spirit that quickeneth; the flesh profiteth nothing," said Jesus; and in "Miscellaneous Writings" (p. 33) Mrs. Eddy says, "The antidote for sickness, as well as for sin, may and must be found in mortal mind's opposite,—the divine Mind."

But Christian Science also points out how practically to apply the antidote which it presents. Let it once be established that the true creation, the eternal reality of existence, is perfect,—and it must be to be eternal,—then we have only to contradict the false, imperfect picture that appears to mortal consciousness and hold to the truth. Let it be, for instance, some form of disease; then let the antidote be applied, namely, the realization that perfect, spiritual health is the only fact. If in business one fears the influence of deceit, dishonesty, or wrong of any kind, then let him know that these can have no power to harm him, since they are unreal, for "whatever is real is right and eternal; hence the immutable and just law of Science, that God is good only, and can

Copyright, 1916, by The Christian Science Publishing Society

Digitized by Google

transmit to man and the universe nothing evil, or unlike Himself" (Miscellaneous Writings, p. 71).

And so on in the myriad nooks and byways of this mundane experience, the great facts concerning the true relation of God and man can be established, until all the seeming wrongs dissolve in the presence of the eternal right, and God is acknowledged as infinite and supreme.

Steps on the Way

ELOISE INGALLS COOPER

My father's faithful watchfulness and constant, loving care of me as a little child, and all through the varied experiences of girlhood, would have left to memory a precious legacy but for one thing. As a minister he followed conscientiously the teachings of the Bible, guided by theological training; but the creed and dogma of his church made it a necessity for him never to fail in pointing out the constant danger of one's becoming an inhabitant of hell if his steps strayed in the least from the faith. Such teaching discolored all things, and brought such fear that for many years the Bible was rarely opened by me with any thought of comfort to be found within its pages.

Then there came to me a message of hope, brought to all mankind through one who expressed purity, love, meekness, and unselfishness, who with rarest bravery toiled year after year to give the world a "Key to the Scriptures" fashioned without a flaw, a key that can be grasped by the hand of the full grown man and by the tiny fingers of the lisping child as well. With it each can unlock the bounteous treasures of the Bible. Through Mrs. Eddy, the Discoverer and Founder of Christian Science, we have learned that each statement of the ancient Word is for us today in proportion as our spiritual perception is ready to receive it.

Well may we listen to the words of the beloved John when on the isle of Patmos the Spirit spoke through him, as we are told in the book of Revelation. He says, "I heard a loud voice saying in heaven." To his consecrated ear Truth could sound as "a loud voice" which to us could be heard only as a faintest whisper, if at all, for mortals know not the heaven or harmony which he had won by a love that never swerved. Part of the message reads, "Now is come salvation," which implies cleanliness in every thought, until purity of heart shall see Life, Truth, and Love as an eternal presence with us everywhere. Salvation wipes out all that is unlike God, and we are borne into a realization, even though faint at first, of Christ, "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583). Then we hear, as did John, these words: "For the accuser of our brethren is cast down, which accused them before our God day and night."

These words help none more fully or quickly than those who seem forced to carry the deadly incubus that *materia medica* and hygienic laws have put upon them by declaring them to be subject to so-called incurable disease. These would-be assistants of mortal mind, in their ever vain efforts to help, are only building prison walls higher and higher around their every victim; but divine Love never ceases to hear the faintest call for help, and answers that "the accuser . . . is cast down." One sufferer listened, and one by one the dread beliefs were cast down to earth, their native nothingness, until he with deepest gratitude raised his voice in a song of thanksgiving for Christian Science which brought him deliverance, which raised him to the understanding that he now can live in God, where sin and disease cannot enter.

When the persecuted of earth dwell with Christ, Truth, they rest in the consciousness that the accuser "is cast down." Perhaps the greatest necessity lies in knowing that we are not harboring an accuser in our own hearts, thus keeping the sorrow and suffering alive. Then we do well to turn to our Leader's poem "Satisfied" (Poems, p. 79) and read these lines:—

It matters not what be thy lot,
So Love doth guide.

Stopping here for close self-examination, we find that if we would know the kingdom of our God, and make our hearts a fit habitation for the Christ-idea to come in and sup with us, we must be sure that there are no dark corners which have not been cleansed of jealousy, envy, hatred, and of the more insidious evils, self-righteousness, self-pity, and self-love. If purity, meekness, and truth are enthroned within, we can grasp and therefore rest in these words of the same poem:—

Love looseth thee, and lifteth me,
Ayont hate's thrall:
There Life is light, and wisdom might,
And God is All.

Error's Tenacity Broken

CECIL E. BENJAMIN

In the course of conversation one day between two students of Christian Science, the younger student, who was being helped by the other, said, "I do wish this error would leave me and let me go." The older replied by pointing out the necessity for the total reversal of the belief thus expressed, before thought could be brought into line with Truth and healing experienced. It was pointed out that if inharmony of any kind was manifest, the fact of the matter was that the one manifesting it was holding on to error, not that error was holding a person. "I do not want the error; I have let it go, but still it hangs on to me," was the retort.

The older student then pointed out that it was absolutely impossible for error to be manifest if it had actually been let go, and that it was by no means an uncommon thing for people to deceive themselves into the belief that they had relinquished some phase of error, not realizing that in some subtle way they were still attaching power to it in their thought and so in some degree regarding it as real instead of dismissing it as a powerless illusion. It was also shown that it was often this almost unconscious tendency of mortal mind which stood in the way of complete healing. "Oh, that reminds me of how we used to catch monkeys with a pumpkin," said the younger student, and both being South Africans the appropriateness of the analogy was immediately seen and admitted.

Now it often happens that a monkey is allured by finding a luscious looking pumpkin unguarded in a field. Being very partial to pumpkin seeds, he decides to investigate and finds a hole in the pumpkin sufficiently large to admit his open hand. He inserts it and grasps the enticing pips, thinking what enjoyment they will give him. He tries to raise his hand to his mouth in order to realize the consummation of his expected pleasure, but finds he cannot do so, and oh, how terrifying! here comes his deadly enemy in the form of a man with a gun. The situation is decidedly unpleasant, and he considers that it is high time to make his escape. But what dreadful thing is this? The pumpkin with wonderfully subtle intelligence and strength has fastened itself to him, or so it seems to him, and struggle as he will he cannot free himself. Poor monkey, the truth is that nothing holds him. If he only opened his hand and let go the seeds, his hand could easily be withdrawn and he would then be free; but as the hole in the pumpkin is too small to allow the extraction of his

Digitized by Google

fist, particularly while it clasps the seeds, it is ignorance of this fact which is the total and only cause of his seeming imprisonment.

How like the monkey are mortals, who fail to realize that it is they themselves who are the cause of their own seeming captivity in the bonds of pain and sin by imagining that error has power to bind them in its thrall. But let them once awaken to the fact that their bodies are nothing but their thoughts objectified, and they can then intelligently set about practically applying the Principle of Christian Science by letting go the thoughts of sin or suffering which they have been unwittingly clasping, and refusing to think a single thought about themselves or others which does not agree with the set square of Truth.

When we remember that no material thought, whatever its nature or guise, has any more power to adhere to us or our patients without our consent than the pumpkin had power to hold the monkey, there is no suggestion of sickness, sin, or other inharmony which we cannot intelligently, definitely, and finally cast out of thought, and thus the only obstruction to quick and permanent healing is not difficult to destroy. Mrs. Eddy says on page 419 of Science and Health, "Your true course is to destroy the foe, and leave the field to God, Life, Truth, and Love, remembering that God and His ideas alone are real and harmonious."

To parley with error is about as intelligent a proceeding as it would be for the monkey to argue with the pumpkin, and is quite as conducive to results. It is absolutely essential that we should stand firm in our declaration of the truth, and although there may be times when it seems necessary to be positively vehement in our denial of error and in our insistence upon its falsity, it should never be lost sight of that such denial is only a human aid to the realization that the divine Mind alone governs, and does so harmoniously, peacefully, and with perfect exactitude, in heaven and in earth, always and in all ways. Christian Science lifts thought to the heights of understanding in the closing words of its spiritual interpretation of the Lord's Prayer (Science and Health, p. 17): "For God is infinite, all-power, all Life, Truth, Love, over all, and All."

Civilization and Brotherhood

THE HON. ELEANORA MONEY COUTTS

In these times when the temptation to share the world's belief in strife and its attendant terrors is seemingly insistent, Christian Scientists are clinging to the knowledge that peace is the only true state of the universe and man, and they are doing this in a way they perhaps never did before when the world was, outwardly at least, more peaceful. They do know and are availing themselves of the fact stated in the first chapter of Genesis: "God saw every thing that he had made, and, behold, it was very good." They thence deduce the inevitable conclusion that God never made any element which could hate, oppose, or destroy.

While these healing truths are daily comforting all who accept them, it is useful to remember that discord, arising from the animal beliefs of mortal mind, is by no means a new phase of the illusion of this so-called material intelligence, but must be regarded as an integral part of the whole false claim of a mind separate from God. It is only in the ratio that Christian Science uncovers and destroys the belief of animal magnetism as being cause, creator, or effect, that the world will awake from its dream of life where no life exists, and rise to the perception and acceptance of that mental state which can best be described as "the peace of God, which passeth all understanding."

This train of thought was accentuated by a little incident which I saw one day. I was walking through a short though not particularly attractive cut to my house, when I noticed a very small boy break away from the man he was walking with and rush up to an even smaller boy standing a few yards from him and hit the child hard across the face with a stick which he was carrying. The poor little fellow, very much taken aback for a moment by this violent assault, gave a cry, but pulling himself together he tried to hit back at his savage assailant with his fist. The man just glanced around and called roughly to the first child to come along, and the boy did; then the two went on, as it seemed they were merely passing this way at the time.

The incident was all over in less time than it takes to tell it, but I was so astonished at the sudden ferocity of the tiny mite—really neither child could have been more than three or four years old—that I stood still and gazed in amazement! What a revelation of the mad and meaningless hatred lurking in the very warp and woof of mortal mind and its unreal concept, mortal man! On page 582 of Science and Health children are first defined as "the spiritual thoughts and representatives of Life, Truth, and Love." Then the mortal sense is presented as "sensual and mortal beliefs; counterfeits of creation." How should one expect that these "counterfeits of creation" will grow up to do anything but fight and backbite and hate? Never made by Love, never reflecting Love, never knowing Love, what hope is there for that supposititious state of separation from God, who is Love?

It is surely wise to recognize and to look fairly in the face the fact that it is certainly not merely the manifestation of the hideous lie about God and man which needs to be met and destroyed; it is necessary to see that no suggestion can deceive us which would foster the belief that the lie itself is real or proceeds from a creator who knows and allows it. One meets those who, while blindly allowing jealousy, envy, resentment, and fear to usurp their minds, never stop declaring and discussing the horror and misery of war, and they may often be heard to remark that it is amazing and abnormal that such a state of things can occur in the highly civilized communities of Europe.

A great statesman once said: "Our manners, our civilization, and all the good things connected with manners and with civilization, have, in this European world of ours, depended for ages upon two principles,—the spirit of a gentleman, and the spirit of religion." This writer really hit very near the mark, because the only true spirit of a gentleman must be the spirit of brotherly love and civility (in the older meaning of this word) embracing the duties of citizenship, and the true spirit of religion must of course be the spirit of love toward God.

The fact is, there is no civilization but that which is founded upon the first commandment, "Thou shalt have no other gods before me." Mrs. Eddy tells us that this "bases the Science of being" and "fulfils the Scripture, 'Love thy neighbor as thyself'" (Science and Health, p. 340). The paragraph from which these words are taken, if obeyed and demonstrated, would bring in that perfect state of which mankind have dreamt and for which men have striven in all ways but the right one for thousands of years. The word civilization is based on the Latin word *civitas*, which implies citizenship, or man's relation to man, and the endeavor of the ages has been to provide laws and common ideals whereby the primitive animal instincts of mortal man should be coerced or shamed into quiescence, in order that communal existence might become a possibility.

This ceaseless striving after something better than carnage and hatred has survived the most frightful cataclysms,

Digitized by Google

showing that the world dimly perceives the possibility of something better; but until each man learns that the kingdom of God is within him, and strives to demonstrate this fact by the destruction of all thoughts which could engender evil in any direction, human hope crouches helpless and terrified in the face of its own evil beliefs, when they are dragged out from their hiding-places and shown in the light of Truth as devastating lies. Gladly do we turn from this dark picture to St. John's apocalyptic vision, where we read: "There shall be no more curse: but the throne of God and of the Lamb shall be in it; and his servants shall serve him: and they shall see his face; and his name shall be in their foreheads."

Who Is Sufficient?

CHARLES C. BUTTERWORTH, 2D.

When first the grandeur of God's kingdom breaks in upon the unaccustomed thought, through Christian Science, one held by the mortal sense of life, looking into its shallowness, is prone to exclaim, as did Paul, "Who is sufficient for these things?" Overwhelmed and abased by the glimpse one catches of God's glory, he thinks it beyond possibility that man can truly be the son of God. The human sense continually recalls the pathetic speech prepared by the prodigal, "Father, I have sinned against heaven, and before thee, and am no more worthy to be called thy son." Inexplicable then to the human mind is the reply, "Bring forth the best robe, and put it on him."

According to the teaching of Christian Science it is not the false sense of man, characterized by the word prodigal, which is blest; it is the human being who is receptive of truth that is blest. The wandering, erring sense which made the prodigal dwell in a far country of riot and famine, refused and ignored the divine sonship of man; otherwise the prodigal would have stayed content at home. Is it strange, therefore, that divine Love, conscious only of the perfect son, should entirely ignore the speech of the prodigal? The prodigal sense is forgotten, obliterated, destroyed; it is the receptive son who is blest!

Imperfect, unworthy, insufficient as mortal man may seem to be, the fact of the real man's divine sonship is unaltered and eternal. Paul's query is greatly to the point: "It is God that justifieth. Who is he that condemneth?" Starting from the unspiritual standpoint that man is full of imperfections, mortal belief is sooner or later confronted with the fact of man's God-given dominion over all, and cries in sudden mortification, Ah, miserable me; who can be worthy of all these things? This, however, is sometimes the basis of a most misleading meekness. Error is quick to take the wrong conclusion, deeming that mortal man is suddenly exalted and honored with dominion! Again we would say that it is not the prodigal sense which is blest, nor is it error's miscreation, mortal man with all his imperfections, who is declared to be the son of God.

Nor is it true humility, this attitude which assumes that God has seen fit to pour His blessings on a weak and sinful head. Mrs. Eddy states on page 471 of Science and Health, "Science knows no lapse from nor return to harmony," and for error to conclude that an imperfect mortal is graciously, although inscrutably, exalted to the rank of God's own image, is a mistake. It is mortal sense enthroning itself as the idea of God, and offering in excuse the inscrutability and infinity of divine Love. The Christ is not made into the Son of God, but is the Son of God and always has been. It will not do for mortal mind to say, I am not worthy to be called God's image; for Science does not claim that mortal mind should be called God's image! The charge of the Jews against Jesus was that he made himself equal with the Most High. Jesus recognized the spiritual fact that Christ was the perfect God-idea, and as Paul says, "being in the form of God, thought it not robbery to be equal with God,"—equal in attributes, that is, or equal by reflection.

This is the true humility,—to know that we are sufficient for anything and all things, because of man's likeness to God; in the words of Paul, "Not that we are sufficient of ourselves to think anything as of ourselves; but our sufficiency is of God." True humility does not bewail its poverty,—indeed, it has no poverty,—but wears "the best robe," always gratefully acknowledging that every good gift is from the Father. So long as we see ourselves as insufficient, it must be that we are looking at mortal selfhood, and that is just wherein our seeming meekness turns into presumption.

Does it seem too great an honor that man should be the image of perfection? Then it is because we have not achieved the proper sense of man. No honor is done to mortal mind when we declare that whatever God creates is perfect. The glory which divine Principle bestows upon the divine idea is no new or oppressing honor, but, in Jesus' words, "the glory which I had with thee before the world was." Man is already the son of God in spiritual fact, foreknown as such from all eternity, predestinated (that is, marked out at first) "to be conformed to the image of his Son." Error is always condemning, and when all else fails, it commences to condemn itself, hoping that by condemning its own weakness it can at least establish its claim to existence. We read in Science and Health (p. 287): "Evil calls itself something, when it is nothing. It saith, 'I am man, but I am not the image and likeness of God.'"

If God is Love, then we can become conscious of our true identity by loving our fellow man "in deed and in truth." Even if our own sense of error would condemn us as unworthy and insufficient, yet because we love one another (as St. John has pointed out), "we know that we are of the truth, and shall assure our hearts before him. For if our heart condemn us, God is greater than our heart, and knoweth all things. Beloved, if our heart condemn us not, then have we confidence toward God."

Application

KATE D. GRANT POHL

In Christian Science, as in every other subject, reading and study make the well-informed person, while application makes the practical student. To those who have read Christian Science literature is given the right to speak with some measure of correctness about its teaching. Those who have applied these teachings in every-day living can speak from experience.

One may watch an air-ship in flight, read how it is managed, but he must learn the rules by which it is operated and apply them before he can operate it himself. Even then the first few attempts may not be successful, because of ignorance concerning some detail in the mode of operation. Thus we may read and perhaps recite the first commandment every week for years, but this does not signify unless we obey it. There is need always to guard against anger, irritation, annoyance, faultfinding, for these are "the little foxes" that seem to make us forget or neglect to apply what we do know. Often the remedy lies at hand; the rule is known, but it must be applied.

A simple experience of applying what has been read has helped me in after experiences, and is recounted in the hope

Digitized by Google

that some one else may find it useful. One afternoon, in reading "Unity of Good" by Mrs. Eddy, my attention was held by these words on page 17: "Be allied to the deific power, and all that is good will aid your journey." They were learned by heart, and that night there was occasion to use them, for my little boy was troubled and fretful, and kept waking me during the night. Finally about half past four o'clock in the morning he seemed to settle into repose and with a feeling of relief I sought my own sleep. When in a few minutes he awoke again crying, my first impulse was one of annoyance and discouragement; then, remembering our Leader's advice to be allied with the deific power and all that was good would help us, I resolutely turned from the sense of material discord, and lifting thought to God, declared for His power and presence. At this point a little bird flew on to the trellis near the child's bed and began his morning song of gladness. The child's attention was caught, he stopped crying, and in a few minutes fell quietly asleep. He slept for three hours and awoke well; all fretfulness had vanished and a happy day followed.

In her Message to The Mother Church for 1901 (p. 7) Mrs. Eddy again speaks of God's protecting care in these words: "Does not this heavenly Parent know and supply the differing needs of the individual mind even as the Scriptures declare He will?" This experience illustrated to me the need of applying Christian Science as well as reading and studying its literature.

Protective Prayer

FRED. R. RHODES

RECENTLY there came to the writer a very practical illustration of how through prayer as taught in Christian Science the "whole armor of God" may not only be put on for ourselves, but the immediate objects of our thoughts may also be protected. Our Leader has clearly expressed this in our text-book, "Science and Health with Key to the Scriptures," where we read (p. 192), "Whatever holds human thought in line with unselfed love, receives directly the divine power."

The writer was away in an adjacent town, and as an only daughter was alone at home, her mother felt there was need for protection and asked that treatment in Christian Science might be given her. After this had been done there was a certain feeling that "all the fiery darts of the wicked" had been quenched. On arriving home in the evening we learned that a man had called, and under the pretense of asking help for a young cripple, had quite disarmed suspicion and obtained an entrance. Our daughter had no sense of doubt or fear, and when the usual hint was given that money was needed to get to another town, she expressed her regret at not being able to accede to the request. She was then asked to telephone to some other person, and she did so, leaving the man in the hall in the mean time. The man then left without causing the slightest trouble or touching anything.

Immediately upon hearing of this incident the writer recognized the man as a bad character who had been around some months before with the same intention of preying upon Christian Scientists and concerning whom a warning had been sent to other fields. It would be impossible to express the deep gratitude to God for Mrs. Eddy's teaching which was called forth by this incident, in the hearts of the parents, and also of the child when she was informed of the wonderful protection that had been vouchsafed both to her and to the home. Christian Scientists are often reminded of this promise in the ninety-first psalm: "There shall no evil befall thee, neither shall any plague come nigh thy dwelling."

Selected Articles

[Excerpts from an article by the Right Rev. Bishop Ussher in *Eastern and Western Review*, Boston, Mass.]

[Bishop Ussher is descended from a long line of churchmen. His great-grandfather was rector of the parish of Clontarf, near Dublin, which was held in the family from father to son for over one hundred and fifty years. He is directly descended from Archbishop Henry Ussher, one of the founders of Trinity College, Dublin, whose brother Arland was the father of James Ussher, the celebrated Primate of Ireland, and Trinity's first student, buried in Henry VII Chapel in Westminster Abbey. The Ussher family have had the honor of having three distinguished church dignitaries,—two Archbishops of Armagh, and the Bishop of Kildare. Bishop Ussher is now a resident of Boston.—EDITOR.]

As I see the condition, church partizanship has had its day, and it is time that a hungry world should be spiritually fed on something better than religious husks. Behind the old dogmatic utterances a huge interrogation mark is being placed by "the man on the street," as well as by his more thoughtful and highly educated brother. The desire for helpful religious truth is not being met in the churches, and as a result the pews in the places of worship are being deserted, and the depleted treasuries of the various organizations are creating anxieties that are making church officers look disturbed as the bills crowd up and the financial pabulum recedes. Something is wrong. What is it?

Religious indifference is everywhere apparent in church-members: the pastors complain of lack of interest; hither and thither the would-be Christians run after new isms until, wearied out by their unsatisfying search, they lapse into complete indifference. What satisfaction is there for the spiritually homeless? They cry (as did Peter), "Lord, to whom shall we go?" and where they have gone they do not get the words of eternal life. Sick of theory, sick of dogmas, hungry, they say with the psalmist, "Who will show us any good?"

Some would-be helpers fail to see good done that is not done their way, and it seems to me that the failure of today lies in the fact that there is a besotted blindness which fails to recognize goodness wherever it is manifested, for most assuredly where goodness is, God is. While I am not prepared to accept the doctrines of Christian Science, I am prepared to recognize the Christ-character of its real followers, no matter where it is manifested. It was my privilege to accept a call to a church which under the old "dry as dust" religious teaching had dwindled down to a small congregation from having been a large one. With the decrease in attendance had gone considerable revenue. From this unattractive condition of religious stagnation thirteen members had fled to Christian Science, and I was requested to point out from the pulpit the serious mistake they had made and to condemn the attractive error that had seduced them.

One gentleman, one of the thirteen, still a member of my church, but whose wife had joined the Christian Science church, revealed his reasons for accompanying her as follows: It had been her misfortune to be a spoiled child, who grew into an overindulged woman and became a lounge invalid. The poor husband lived in an atmosphere of gloom; tender hearted, he mourned the physical weakness of his partner. He could not have his friends come to his house socially, his children were compelled to manifest a tiptoe, unnatural stillness in the house, the curtains were lowered, and sighs were the requiem music over his dead happiness. Induced to go to the Christian Science church, new ambitions were awakened in the wife, new impulses created. She took a new interest in the Bible and studied all her spare time; the lounge was forsaken, spiritual activities grew into going about doing good, her miseries were forgotten, the window-shades

Digitized by Google

went up, the light poured in, friends came and were entertained, the children rejoiced, the functional troubles of the body became a thing of the past, and the only one who grieved was the doctor, whose bill of eight hundred dollars no longer materialized, and my delighted church-member asked me what he should do (although I think his mind was made up),—should he come back to the services in my church or stay by her side? This kind of work was what I was asked to condemn. It was evidently Christ's work, no matter what was the instrumentality that wrought the change, and, remembering the words of rebirth that Peter heard, "What God hath cleansed that call not thou common," so to the question that had been put to me, "Shall I stay or leave?" my answer was quickly given: "Stay."

To have people spiritually happy and useful, manifesting good in their lives, is surely God manifest in the flesh. These are they who are "led by the Spirit." And so long as the identification of God's own has been declared possible, we will accept the test, "By their fruits"—not their creed or confessions, not their sectarian name or ritualistic service, but by their God-inspired, divinely owned deeds—"ye shall know them."

Christian Science has evidently proven very attractive to many; it has drawn them, and they accept and believe its teachings. Be it ever so different from orthodox Christianity and accepted scientific theories, it does prove its efficacy in human life, no matter how far removed from old established notions. What care I what means succeed in turning a man or a woman from darkness into light? What cares the wife of the besotted drunkard for the words or deeds that changed her husband from a beast to a man, and roused the God-consciousness within so that he stands erect and looks his Maker in the face, a man redeemed?

Does the Bible truth we need reach our intelligence? Then why trouble as to who wrote it or when? Apply it to your life; take its consolations to your weary soul; breathe in the blessed truth that will make you free. As a child of the Spirit of God, rejoice in your parentage, and do not disgrace your spiritual Father nor grieve the Spirit of God by being a human failure. Remember, men and women, you are "sons and daughters of the Lord God Almighty;" be worthy, even if you fall far short of what you should be. If you realize so great a lineage, made in God's image, preserve the traces of your parentage, and aim at the fulfilment here or somewhere of the divine command, "Be ye therefore perfect, even as your Father which is in heaven is perfect."

I can understand what Christian Science does. I can see its influence in the community. There may be those with them who are not of them, but they will slough off; the tests of integrity and righteousness will press too hard for them to resist, and as untimely fruit they will drop to do better somewhere, some time. To my intellectual obtuseness the Christian Science doctrine of the non-existence of matter is beyond me. I cannot see my way to believe it. I do believe, I accept the truth of the fatherhood of God and, because of His love, the brotherhood of man through my Elder Brother, my Redeemer, Jesus of Nazareth, who redeemeth my life from destruction, and crowneth me with loving-kindness and tender mercy.

But these things are to me the mint, anise, and cumin. The weightier matters are condensed in what the Lord requires, viz., "to do justly, and to love mercy, and to walk humbly with thy God." As we read in Ecclesiastes, the summing up of the whole matter is, "Fear God, and keep his commandments; for this is the whole duty of man." This covers all that the orthodox church-member can do at his best, and the Christian Scientist can do no better at the final summing up, though I can conceive that in the doing of it he or she can have "the joy of living," and bless the memory of Mary Baker Eddy, giving a reason for the faith that is within.

One thing seems to be certain, and that is, that if sectarian error, wherever it exists (and is known to be such), is not gotten rid of honestly and squarely, and the simple teaching of Christ in the churches brought right up to his standard of the golden rule, the great army of the unchurched, those who in disgust have slipped their cables from their denomination, will be the largest outside all the churches, and be honestly entitled to recognition as the real church of God. We note the signs of sectarian uneasiness; heresy trials are no longer popular or safe; and the uneasy bigot is getting the cold shoulder from those who discern "the signs of the times."

Who knows what message God has for the world? Messenger, let the rain of criticism stop thee not. If God has given you a truth, proclaim it, and let your actions show that you believe and do; both go together.

✧

[Hector Wallace Smith in *The Dunfermline* (Scotland) *Press*]

There is a wide difference between what is called suggestion, which proceeds from the action of the human mind, and the practice of Christian Science, which emanates from the ceaseless activity of the divine Mind, the only cause, called God. The effects of suggestion on the individual only prolong one's bondage to all manner of troubles; but the effects of Christian Science healing are to save and deliver men from every form of ill, including pain. The teaching of Christian Science shows that the human or mortal mind is the producer of pain, and that inflammation of the body is invariably caused by fear; whereas the power of the divine Mind, whenever properly applied and understood in Christian Science, removes pain and enables people to prevent the development of pain in their bodies; moreover, when fear disappears the consequent inflammation is bound to subside. St. John says in his epistle: "There is no fear in love; but perfect love casteth out fear;" also, that "God is love."

In answer to the statement that one must not expect Christian Science to mend a broken leg, let us turn to page 402 of Science and Health, where Mrs. Eddy has written these words: "Christian Science is always the most skilful surgeon, but surgery is the branch of its healing which will be last acknowledged. However, it is but just to say that the author has already in her possession well-authenticated records of the cure, by herself and her students through mental surgery alone, of broken bones, dislocated joints, and spinal vertebræ."

✧

[Ezra W. Palmer in *The Rocky Mountain News*, Denver, Col.]

In a recent issue of the *News*, under the department of religion and social service, a clergyman in an address on the healing of sickness, at the Y. M. C. A., is quoted as making some references to Christian Science and healing by spiritual means which might be misleading. After stating that Jesus healed the sick, he is quoted as "telling of a number of cases where the body was affected through mental suggestion." If the gentleman wishes to convey the impression that the healing work of Jesus, or the healing done through the teachings of Christian Science, was the result of mental suggestion, he has a wrong view of the teachings of the Master as well as of Christian Science.

Mental suggestion is merely another name for mesmerism or hypnotism. It is the alleged control of one human mind over another. It was in vogue in Biblical times under various guises of sorcery, necromancy, witchcraft, Beelzebub.

Digitized by Google

It is the counterfeit of that spiritual healing which Jesus practised and taught to his followers. Jesus declared that his works were done through knowledge of the Father; to use his own words, he cast out devils "with the finger of God." His healing power was of God, and the mesmeric action of mortal mind had no part in it. A wicked man may employ mental suggestion or hypnotism, but this action debars the use of Christian Science, which heals only through exact scientific understanding of God.

The gentleman admits that Christian Science heals the sick, but he thought it "overemphasized the spiritual." Does he mean to infer that there is something besides the spiritual which should be emphasized? Jesus did not so teach. He declared the truth, which overthrew the false beliefs of mortals. A student of geometry knows that he must stick to the truth of the proposition he would demonstrate or he can never prove its truth. He might be told by one who did not understand mathematics that his proposition overemphasized geometrical truths. Such a statement would merely provoke a smile from the student who knows he could never separate truth from error unless he held firmly to the logical basis of his work.

"God is a Spirit," Jesus declared; and unless we reason from that basis and hold that the only reality of all things is Spirit and the spiritual universe, we can never overcome the false evidences of the corporeal senses, manifested in sin, disease, and death. Jesus also said, "Ye shall know the truth, and the truth shall make you free." It was the declaration of the truth and the knowledge of its power which enabled Jesus to heal the sick and to calm the storm. This same spiritual truth is enabling Christian Scientists today to follow in the footsteps of the Master in healing the sick and reforming the sinning.

Christian Science does not teach that sickness is an imaginary thing, as this critic infers. Sickness seems real to the corporeal senses, but the falsity of the evidences produced by these same senses is apparent to every observer. Christian Science follows the Master's example in destroying these false evidences. To the senses the son of the widow of Nain seemed to be dead, but Jesus knew otherwise, and the result was that the young man arose from the bier. Of Lazarus he said to his disciples: "Our friend Lazarus sleepeth; but I go, that I may awake him out of sleep." Knowing that God is Spirit, Love, and that man and the real universe are like Him, spiritual and perfect, the Master was able to reverse the false evidences of matter, sin, and death, and throughout his entire ministry healed the sick and the sinning and raised the dead.

Jesus never taught that death was inevitable. The fact that those he healed probably all passed away later, gives no warrant for assuming that death is unconquerable. By raising the dead and by his own example in overcoming the "last enemy," Jesus proved that death is an illusion of mortal sense, which spiritual understanding destroys. For ages the race has believed in and feared death, but no teaching of the Scriptures is more conclusive than that it can and will be overcome. Jesus said, "Whosoever liveth and believeth in me shall never die. Believest thou this?"

The speaker is quoted as saying that Jesus made a distinction between sickness and sin, and that he "could not consider a mental error as the cause of illness." No sayings or incidents in the life of our Master are quoted in support of this statement, and it is evidently merely a personal opinion. This gentleman has overlooked the fact that Jesus clearly taught that sin and sickness are interchangeable terms, and he healed them both by the same method. In the case of the man sick with the palsy Jesus showed that sickness and sin are both errors of the human mind and are overcome through knowledge of God.

Jesus said: "Whether is it easier to say to the sick of the palsy, Thy sins be forgiven thee; or to say, Arise, and take up thy bed, and walk? But that ye may know that the Son of man hath power on earth to forgive sins, (he saith to the sick of the palsy,) I say unto thee, Arise, and take up thy bed, and go thy way into thine house." Paul also showed the mental origin of both sickness and sin, for after pointing out some of the errors the Corinthians had fallen into, he said, "For this cause many are weak and sickly among you, and many sleep."

The speaker is also quoted as saying, "Beware of any religious cult that has its end in the help of the flesh." If the speaker means by this that Christian Science teaches that the *summum bonum* of man is to attain ease in the flesh, he is greatly mistaken. Christian Science heals the sick as did our Master. It recognizes that healing the sick is but a step toward the spiritual goal of every true Christian,—complete redemption from mortal ills and the attainment of complete unity with God, the Father. Mrs. Eddy clearly taught that physical healing was not the ultimate of Christian Science. In Science and Health (p. 150) she says: "The mission of Christian Science now, as in the time of its earlier demonstration, is not primarily one of physical healing. Now, as then, signs and wonders are wrought in the metaphysical healing of physical disease; but these signs are only to demonstrate its divine origin,—to attest the reality of the higher mission of the Christ-power to take away the sins of the world."

✧

[S. T. Downs in *Union City* (Ind.) *Times*]

In a sermon as reported in the *Times* such harsh terms were used as "delusion," "dishonor," "of the devil," and a number of others of like nature, to denounce those who disagree with this clergyman's opinion that "the miraculous presence and power of the Holy Spirit were peculiar to the apostolic age and to the church in the beginning." So far as his statements concern Christian Science, which was included in his denunciation, we fail to find anything in the Scriptures to warrant such a conclusion. On the contrary, authentic history of Christianity for the first three centuries and the history of Christian Science for the last half-century indicate that the presence and power of the Holy Spirit, as divine Love, may be demonstrated here and now through the understanding of spiritual law.

Christian Science is proving that Christ Jesus was referring to his followers for all time when he said, "He that believeth on me, the works that I do shall he do also." This proof is to be found in the healing of all manner of sickness, the reformation of the sinner and the slave of false appetite, in the destruction of lack and misery of every kind, and in purer living on the part of those who have come under the beneficent influence of this wonderful truth about God and man. In other words, Christian Science is proving that the kingdom of heaven is at hand, and that we can partake of it only as we understand the spiritual teachings of the Scriptures as set forth in the works of Mrs. Eddy, the Discoverer and Founder of Christian Science, and as we strive to follow the instruction of Christ Jesus, "If thou wilt enter into life, keep the commandments."

✧ ✧ ✧

No man ever sank under the burden of the day. It is when tomorrow's burden is added to the burden of today that the weight is more than a man can bear. Never load yourself so. If you find yourself so loaded, at least remember this: it is your doing, not God's.—GEORGE MACDONALD.

Editorial

"Be of good cheer"

Because the healing of the sick is more readily seen and acknowledged than the other reforms which Christian Science has brought about in human experience, the impression has prevailed with many persons that it is the sole objective of this religious system; but such is not the case. Mrs. Eddy, in answer to the question, "Is healing the sick the whole of Science?" says: "Healing physical sickness is the smallest part of Christian Science. It is only the bugle-call to thought and action, in the higher range of infinite goodness. The emphatic purpose of Christian Science is the healing of sin; and this task, sometimes, may be harder than the cure of disease" (Rudimental Divine Science, p. 2). In this view of Christian Science we see that it readily conforms to the requirements of Christ Jesus' teachings and practice, and thereby proves its status as the revival of primitive Christianity, for the reason that through its ministrations the sick are healed, the sorrowing find comfort, and those dead in trespasses and sins awake to a new sense of life.

That Jesus regarded sickness and sin as equally contrary to the law of God, is shown by his saying to the "man sick of the palsy": "Son, be of good cheer; thy sins be forgiven thee." To the scribes, who were shocked by this declaration of power to forgive sins, he said: "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk? But that ye may know that the Son of man hath power on earth to forgive sins, (then saith he to the sick of the palsy,) Arise, take up thy bed, and go unto thine house."

Plainly it was the healing work done by Christ Jesus that was most offensive to the scribes and Pharisees; and this because it wounded their self-love and was a reproach and a rebuke to their lack of genuine piety and consecration —to their lack of works which would prove that they understood the one true God of Israel. Moreover, it is not impossible that the violent opposition to Christian Science in some quarters today, and especially that which would utterly deny its healing work or attempt to explain it by saying that it is the result of suggestion, is due to the same reason. Nevertheless this healing work, which caused so much stir among the priests and elders of his day, was the invariable accompaniment of Jesus' teaching and exhortation, and as it is with Christian Science at this time, so it was then the most impressive and easiest understood part of his work.

Healing the sick was not, however, the whole of our Master's work, nor was it the most important, although it may have seemed so to many, because it was all they could understand. And it was not strange that this should be so, for even to his disciples the Master felt constrained to say, "I have yet many things to say unto you, but ye cannot bear them now." The healing of individuals and of the multitude was done in the sight of all, and so far as the accomplished fact was concerned, it was apparent to every one; but to his disciples he spoke in parables, which were largely beyond the understanding of the multitude and those who were unwilling to listen with an open mind.

Notwithstanding the large portion of the New Testament which is given over to the record of Jesus' works of healing, and of similar works done by the disciples and early Christians generally, there is no possibility of doubt that the primary object of our Master's mission was to establish the kingdom of God in the hearts of men; or, to use his own language, "That they might know thee the only true God, and Jesus Christ, whom thou hast sent." This also is the primary object of Christian Science, which brings to the sick and the sinning of today the centuries-old message of the Master: "Be of good cheer." As the lives of Christian Scientists continue to bear witness to the twofold efficacy of this healing truth, the belief that Christian Science is but a "cure-all" for pain will gradually cease and Mrs. Eddy's work will be fully and freely acknowledged as both Christian and scientific.

Archibald McLellan.

Correcting Self-condemnation

Self-condemnation presents itself for correction only to those who are striving for spirituality. They alone are aware of the great distance between the ideal man and the mortal counterfeit and are capable of suffering from the glaring contrast. Metaphysically considered, self-condemnation is one of the many phases taken by selfishness, that is, by the belief in a self apart from God, and it must therefore be destroyed, like all those other phases, by the spiritual understanding of man's true self. In this overcoming, however, there is danger of overlooking. In leaving behind the sense of guilt, watchfulness is needed not to fall into the temptation of moral slackness.

Mrs. Eddy has shown solicitude for the welfare of students of Christian Science by uncovering both of these false states of mind. On page 455 of Science and Health we read, "A mental state of self-condemnation and guilt or a faltering and doubting trust in Truth are unsuitable conditions for healing the sick." Again, on page 112 of "Miscellaneous Writings," referring to the condition called "moral idiocy" of a certain noted criminal whom she visited in his cell, Mrs. Eddy writes, "This mental disease at first shows itself in extreme sensitiveness; then, in a loss of self-knowledge and of self-condemnation,—a shocking inability to see one's own faults, but an exaggerating sense of other people's."

Between these two extremes lies the human right thinking which is directed by divine Science. Self-condemnation, as it generally afflicts the conscientious Scientist, tends to become the bane of his existence unless corrected by Truth. It frequently seeks entrance into his consciousness just after he has performed some particularly useful piece of spiritual work. At such times self-condemnation is merely the result of the general condemnation which error tries to impose upon those who are destroying error, and the acceptance of this condemnation would load the sin of the world upon those who are actually saving the world. Then it behooves the practical Christian Scientist to ask, Is it self-consciousness which is at fault, or self-indulgence, self-justification, self-pity, self-importance, etc.? In any case self-importance must play a part in every type of ill which reaches humanity, for if no importance whatever was attached to self, no suggestion could convert itself into sin, sickness, or death.

The little child who is made happy dances without self-consciousness, and if asked to do so repeats statements of truth without exhibiting self-importance, but if later in life the belief in a self apart from God is cultivated in that child-thought, constraint and timidity will dampen spontaneity. The working Christian Scientist is learning to remain childlike, and he realizes that the less self enters into his thought, the sooner will God's divine compassion reform the cripple, rearrange the distraught mentality, and regenerate the guilty and the fallen. Isaiah's uplifted consciousness perceived a glorious fact when he uttered the words, "Behold, the Lord God will help me; who is he that shall condemn me?" This same divine compassion, bursting the bounds of human limitation, uttered itself in Jesus' cherished words, "Come

Digitized by Google

unto me, all ye that labor and are heavy laden, and I will give you rest."

The great distance between the depravity of mortal belief and the holiness of reality startles human consciousness. It is essential to remember that humanity is empowered to choose good and to eschew evil, to put off the false self as the new and true self appears, and that the fulfilling of the law means love in operation. Finally, the ability to see our faults for what they are need not interfere with our joy in correcting them. In that wonderful third chapter of I John from which some verses are read at the close of every Christian Science service, we also find the following scientific assurance: "For if our heart condemn us, God is greater than our heart, and knoweth all things. Beloved, if our heart condemn us not, then have we confidence toward God." Whatever condemnation human judgment may declare, the divine verdict can annul.

WILLIAM D. MCCRACKAN.

"I will greatly rejoice"

IT is deeply interesting to read the many admonitions as to rejoicing found in the Bible, and Christian Science is daily bringing these precious gems to light so that we may make them our own. In the sixty-first chapter of Isaiah we read, "I will greatly rejoice in the Lord," and the reason for the rejoicing follows: "He hath clothed me with the garments of salvation." This is the essential point, although the whole passage tells in glowing terms of an outpouring of spiritual blessings typified by precious jewels and also the upspringing of flowers and fruitage. The student of Christian Science knows that all good things spring up in abundance from the soil of true spirituality, that the prophet's words will come true, when "God will cause righteousness and praise to spring forth before all the nations."

Our beloved Leader presents a profound reason for joy when she says (No and Yes, p. 8), "We can rejoice that every germ of goodness will at last struggle into freedom and greatness, and every sin will so punish itself that it will bow down to the commandments of Christ,—Truth and Love." In the prophecy of Habakkuk we find a passage closely related to the one in Isaiah already quoted, in which we are told that although neither vine nor fig tree yield their fruit, and although the flocks and herds perish from the stalls, yet the true cause for rejoicing remains. The passage reads, "I will joy in the God of my salvation;" and it further declares, "He will make my feet like hinds' feet," a promise which may well gladden those who have in vain sought healing from a material source.

The Christian Scientist is healed by divine Truth, which comes to him in full tide, sweeping before it the evidences of disease and the fear of it as well. This alone may indeed cause one to rejoice greatly, but there is something in store for him richer and rarer than physical healing, and in Scripture language it is called "knowledge of salvation." It was the father of John the Baptist who foretold the coming of this divinely scientific knowledge, which he said should "give light to them that sit in darkness and in the shadow of death." On page 593 of Science and Health salvation is thus defined: "Life, Truth, and Love understood and demonstrated as supreme over all; sin, sickness, and death destroyed." Would not every one who gained a knowledge of salvation such as this rejoice greatly!

Christian Scientists find that in their human experience they must be tested until the point of perfection is reached. The art of living is unquestionably the highest of all arts, and when we first begin to practise it, as taught by divine Science, we may not be able to advance beyond the severely straight lines which lead direct to Principle; but even so there is great cause for rejoicing, if the lines of thought are straight and go out into righteous words and deeds. If they are not straight they must be corrected; and again we may rejoice, because God holds His children too high to tolerate any imperfection in them or their work. What if the test does seem severe in its demand that all hate, even every shadow of selfishness, be cast out to make room for Love's full reflection, and that no Babylonish garment of impurity can remain hidden in our tent, since this would make it impossible for us to win and wear the "robe of righteousness" of Isaiah's vision!

The psalmist speaks of the strong man who rejoices "to run a race," and Paul doubtless learned many lessons from the stern discipline of the Roman gladiators, as he says, "I keep under my body, and bring it into subjection;" but we know that this discipline was spiritual, not physical, and its guerdon was an incorruptible crown. Paul also tells us that there is no uncertainty as to the results of this spiritual warfare, and like the great Teacher, he constantly urges upon us the duty of rejoicing. Christ Jesus has only one counsel for those who suffer persecution, namely, "Rejoice and be exceeding glad," and in preparing his disciples for the crucifixion,—his great test and theirs,—he said, "If ye loved me, ye would rejoice." The pure joy which was his, and may be ours all the time, was the joy which rests upon the knowledge of salvation, which knows that, whatever the outward seeming, God reigns; and that He "giveth us richly all things to enjoy."

ANNIE M. KNOTT.

Among the Churches

Current Notes

NORWAY, MAINE.—During the past twelve months the Christian Science Society has distributed through the mail 468 *Sentinels*, 67 *Journals*, and 905 *Monitors*. A number of these publications, as well as pamphlets, have also been distributed by hand. There have been sold since March, when the books were first put on sale in Norway, nine copies of "Science and Health with Key to the Scriptures," three of "Miscellaneous Writings," and one Manual. The sales of *Quarterlies* have more than doubled.—*Correspondence.*

OMAHA, NEB.—Second Church of Christ, Scientist, has bought a lot at Forty-sixth and Davenport Streets, preparatory to building a church. The lot is 70 by 125 feet, beautifully situated and convenient for the members of the congregation. The price paid was thirty-seven hundred and fifty dollars. Plans are also under way for the erection of a Christian Science church in the north part of the city.

Omaha Bee.

PALO ALTO, CAL.—Construction work has been begun on the new Christian Science church edifice at Bryant Street and Forest Avenue. The building will cost twenty thousand dollars, not including the furnishings. The main auditorium will have a seating capacity of five hundred and the Sunday school room two hundred. The lot is 100 by 112½ feet, and the building is almost as large as the lot.—*Palo Alto Times.*

PHILADELPHIA, PA.—Third Church of Christ, Scientist, has bought and taken title to the chapel of the Philadelphia Bible Christian Church, at 1834 to 1838 Park Avenue, for fifteen thousand five hundred dollars. The property includes a story and a half structure on a lot 50 by 95 feet.

The Press.

Digitized by Google

Shreveport, La.—The members of First Church of Christ, Scientist, will occupy their new home this morning [July 9]. This building, purchased recently from the Hebrew Zion, has been thoroughly refitted and renovated.

The first Christian Science service held in Shreveport was in a private home, sixteen years ago. It was attended by four persons. This number soon increased to sixteen and the service was held in a room over what was then the People's Library. Later a larger room was secured in a building on Texas Avenue, and from there a more desirable location was obtained in the Levy Building. The steady growth of this church compelled another change of quarters to the building occupied by the Caddo Club. Following this, the members purchased a cottage on Grand Avenue and had it remodeled. Again, because of an overcrowded condition, due to the increased membership, another change of location was determined upon, and the selection rested on the edifice which is now the property of this church.—*The Caucasian.*

Sioux Falls, S. Dak.—First Church of Christ, Scientist, has sold its church property on the corner of Dakota Avenue and Eighth Street and intends to build a new edifice on the corner of Minnesota Avenue and Fourteenth Street. In the mean time, until the new edifice is ready, regular services, beginning Sunday, July 2, will be held in the new Odd Fellows Temple, 214 South Dakota Avenue, between Tenth and Eleventh Streets.—*Sioux Falls Argus-Leader.*

San Francisco, Cal.—The corner-stone of the edifice of Second Church of Christ, Scientist, was laid Saturday morning, June 3. The building is being erected at the southeast corner of Dolores and Cumberland Streets, and the main auditorium will have a seating capacity of one thousand, while the Sunday school room will be of equal size. The total cost of building and equipment will be about one hundred thousand dollars.—*San Francisco Chronicle.*

Fresno, Cal.—Brick work on the walls of the new Christian Science church building at the corner of N and Calaveras Streets has now [June 3] reached the second floor level and floor joists have been laid. The church must be ready for occupancy by Oct. 1. The large Sunday school basement, arranged to seat five hundred children, is now completed. The main auditorium of the church will seat between eight hundred and fifty and nine hundred persons.

Fresno Republican.

Peoria, Ill.—At the semiannual business meeting of Second Church of Christ, Scientist, announcement was made that the new church building will be ready for occupancy by the middle of September.—*Peoria Journal.*

Admission to Membership in The Mother Church

The next admission of candidates will be Nov. 3, 1916. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Wednesday, Oct. 11, 1916.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1916, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

John V. Dittemore, *Clerk*,
Suite 550, 236 Huntington Avenue, Boston, Mass.

The Lectures

New York, N. Y.

The remarks of Albert F. Gilmore in introducing Prof. Hermann S. Hering at the lecture given in Æolian Hall for Fifth Church of Christ, Scientist, were as follows:—

One often hears wonder expressed that Christian Scientists are so faithful in their attendance upon the Sunday services, the Wednesday evening meetings, the lectures, and various other activities of this movement; and it may not be amiss if we consider for a moment what are some of the reasons for this devotion.

Incident upon the understanding of what God is, His goodness and His allness, of what man is, and of the eternal and indestructible relation of God to man, the destruction of evil in its manifold forms is so complete that Christian Scientists have come to exclaim with the prophet of old, "Is not this the fast that I have chosen? to loose the bands of wickedness, to undo the heavy burdens, and to let the oppressed go free, and that ye break every yoke?" For Christian Scientists have come to know that with a knowledge of Truth they are able literally to break every band of wickedness with which mortal man has embound himself by his belief in the reality of sin; to undo every burden, however heavy it may be, which he has imposed upon himself; to let the oppressed go free from every form of slavery and bondage; to break the yoke of every limitation which he has set for himself; in short, that an understanding of Truth enables one to heal every form of sickness, to comfort the sorrowing, to bind up the broken-hearted, and to reform the sinner.

On page 419 of Science and Health Mrs. Eddy tells us that "a grain of Christian Science does wonders for mortals, so omnipotent is Truth," and Christian Scientists have acquired the earnest conviction that an enlarged understanding will lead mankind into the full day of spiritual salvation. Again on page 342 we read that "the hour has struck when proof and demonstration, instead of opinion and dogma, are summoned to the support of Christianity, 'making wise the simple.'" Christian Scientists gladly turn from dogmatic discussion and human opinion to a religion based upon Principle, capable of proof and demonstration. Christian Science meets all human needs, furnishing a ready means of solution alike for the smaller affairs of the day and the deeper problems of life, even answering Pilate's centuries-old question, "What is truth?"—*Correspondence.*

Farmer City, Ill.

In introducing Virgil O. Strickler, who lectured on Christian Science, Judge Frederick C. Hill spoke as follows:—

We are living in an age of progress. Superstition, blind beliefs, creeds, and ceremonies are giving way to trust and confidence, and to a reaching out after the real and the eternal. Humanity is engaged in a quest for deliverance from the ills and besetments of the flesh, and the signs of the times bear unmistakable evidence of a universal return to the understanding and worship of that God "who forgiveth all thine iniquities; who healeth all thy diseases."

In the brief space of fifty years Christian Science has challenged the attention of the world. To the sick and sinning it has brought surcease from physical pain and sorrow, and has made practicable in daily experience the precepts and teachings of the Master. It has won recognition as the liberator of humanity from its self-imposed bondage of slavery; it has established proof of the law, order, and

Digitized by Google

perfection of being. It has opened the door of understanding in human consciousness whereby man rightfully exercises dominion over all evil. Its study and practice affords opportunity for demonstrating God's laws, and for proving their usefulness and availability at all times in the destruction of everything unlike Him.—*Correspondence.*

La Crosse, Wis.

D. S. Greig in introducing Clarence C. Eaton, who lectured on Christian Science in the La Crosse Theater, said:—

Christ Jesus was rejected by those to whom he came because the doctrine he taught seemed to the people of that time to be heresy. He taught spirituality instead of materiality, and proved by both words and works that man in his true relationship to God has dominion over all things. Through his understanding of divine Principle, Christ not only raised the dead, healed the sick, and forgave sins, but also turned the water into wine, walked on the waves, caused the draught of fishes, and calmed the storm. Christian Science is the discovery of the truth that Jesus taught, and it needs no argument. The thousands of healings, many of them seemingly impossible, and the many blessings that only the Christian Scientist experiences, present overwhelming evidence that here is a practical religion, to be used in any and every phase of human experience.—*Correspondence.*

Cleveland, Ohio

The introduction by Charles McCarty, first reader, in presenting John W. Doorly, who lectured on Christian Science in the edifice of First Church of Christ, Scientist, was in part as follows:—

Much that is good has been said and done in the name of science, but the Science capable of "lifting humanity above itself into purer desires, even into spiritual power and good will to man" (Science and Health, p. 407), must be Christian; in other words, it must be the Science of an absolute understanding of God. We know that Christian Science, being based on the Bible and following the teachings and works of Christ Jesus, is the Science of an absolute understanding of God, because it is demonstrable. Christian Science heals sickness and sin; it comforts the sorrowing, and makes love and good to abound wherever the letter and spirit of this divine Science are understood.—*Correspondence.*

Lectures to be Delivered

CALIFORNIA—Hayward: Dr. Walton Hubbard, Native Sons Hall, 8 p.m., Sept. 28.
Mill Valley: Dr. Walton Hubbard, Outdoor Art Club House, 8 p.m., Sept. 29.
Oakland (Second Church): Dr. Walton Hubbard, Church Edifice, Thirty-fourth and Elm Streets, 3 p.m., Sept. 24, and 8 p.m., Sept. 25.
Redondo Beach: George Shaw Cook, South Grammar School, Marguerita Avenue, 8 p.m., Sept. 26.
Sacramento (First Church): Ezra W. Palmer, Tuesday Club House, Twenty-eighth and L Streets, 8 p.m., Sept. 29.
CANADA—Edmonton, Alberta: Paul Stark Seeley, Pantages Theater, 3 p.m., Sept. 24.
London, Ontario: Virgil O. Strickler, Masonic Temple, 8:15 p.m., Sept. 19.
Saskatoon, Saskatchewan: Paul Stark Seeley, Empire Theater, 8:30 p.m., Sept. 25.
CONNECTICUT—Stamford: John W. Doorly, Church Edifice, Prospect Street, 8 p.m., Sept. 28.
ENGLAND—London (Seventh Church): John Sidney Braithwaite, Town Hall, Fulham, S.W., 8 p.m., Oct. 5.
London (Eighth Church): John Sidney Braithwaite, Clapham Public Hall, High Street, Clapham, 8 p.m., Oct. 2.
Richmond, Surrey: John Sidney Braithwaite, The Hippodrome, The Green, 3:30 p.m., Oct. 8.
York: John Sidney Braithwaite, Cooperative Hall, Railway Street, 8 p.m., Sept. 25.
ILLINOIS—Bloomington: Frank Bell, Church Edifice, Monroe and Prairie Streets, 8 p.m., Sept. 25.
Chicago (First Church): Clarence C. Eaton, Church Edifice, 4017 Drexel Boulevard, 8 p.m., Sept. 28 and 29.
Chicago (Fourth Church): William R. Rathvon, Church Edifice, Harvard Avenue and West Marquette Road, 8 p.m., Sept. 28 and 29.
East St. Louis: John R. Dunn, Church Edifice, Summit Avenue and Washington Place, 3 p.m., Sept. 24.
Evanston: Virgil O. Strickler, Church Edifice, Chicago Avenue and Grove Street, 8 p.m., Sept. 29.
Polo: Frank Bell, Public School Building, 3 p.m., Sept. 24.
Springfield: John Randall Dunn, Chatterton Opera House, 8:15 p.m., Sept. 28.
INDIANA—Indianapolis (First, Second, and Third Churches): Clarence C. Eaton, Murat Theater, 3:30 p.m., Sept. 24.
Neligh: Ezra W. Palmer, I. O. O. F. Auditorium, 8 p.m., Sept. 21.
IOWA—Sioux City (Second Church): Charles I. Ohrenstein, High School Auditorium, 3 p.m., Sept. 17.

Testimonies of Healing

In thanksgiving to God, and in gratitude to Mrs. Eddy for her unselfish labors in demonstrating and establishing the Science which she discovered, I gladly testify to the healing and saving power of Christian Science. My home was in Australia for ten years, and during that time I was a great sufferer from abdominal complaints, indeed was a semiinvalid. Various remedies and methods for regaining health and strength were given a steady and faithful trial, but without avail. After being under the care of a specialist for a year I was told that my only recourse was to an operation, which would probably bring release from the terrible headaches that prostrated me every week or two and left me in an extremely weak condition. My husband feared I was not strong enough to recover from the shock of an operation and would not consent to it.

At this stage of discouragement I lost all faith in medicine and began to experiment with various diet "cures." There was considerable improvement at first, but the benefit was not lasting, and when business called my husband to Sydney, New South Wales, my health began to fail rapidly, and for the first time I gave up hope and thought there was little use in trying any longer to live. No doctor had attended me for two years and I dreaded to have one, fearing he would advise an operation; but my condition was so serious it was decided that I must have medical attendance. The physician declared an operation to be imperative, and advised me to go to the United States or to England to have it performed. After these years of faithful following of the different schools of medicine and diets, to experience no relief and finally to be told I must cross the ocean to undergo an operation, was indeed discouraging. It was not possible for my husband to accompany me, and I began the sad preparations for breaking up my home.

Just then Christian Science was brought to my notice. Without faith, but eager to try anything which might bring relief, I arose from a three days' prostrating attack of pain to visit a Christian Science practitioner. Surely God is an ever-present help in trouble, for since that day I have been a different woman. The perfect healing was accomplished in four days, although I continued to take treatment for three weeks, not realizing that the healing was already complete. The dark clouds of sickness were dissipated, and for seven years I have not taken a drop of medicine or used any material remedies, neither have I thought of my food except to be thankful for it and enjoy it.

During those few visits to the practitioner's office there was good seed sown, and my concept of God was so changed that I gladly learned of the Christian Science church organization and have since been in happy attendance at the services in Sydney and other places where my travels have led me. Nine months after my complete restoration to health my husband and I enjoyed a trip around the world, and it stands out as a very happy experience, since always before that time travel was undertaken with fears of illness which were generally realized. While passing through the United States I had the great privilege of class instruction.

A few years ago we left Australia for Singapore, and I am very grateful that through some understanding of Christian Science I have been, with two exceptions, perfectly well, although many times surrounded by illnesses supposed to be more or less unavoidable in a tropical climate. On the first occasion the physical discord was probably what is known as "dengue" fever, which was prevalent at that time, and it was overcome in a few days. There was no sense of fever, but aching bones and great weakness prevailed. The other ailment, a bowel disorder, was overcome in two days. I was not confined to bed in either case and was enabled to make my usual appearance at the table during the struggle to realize the truth.

What Christian Science has done for me can be readily appreciated when my life now is contrasted with the existence of fifteen years ago. I was then much of the time under medical care and my life was shadowed by many fears; but now there is established good health and no fear, only trust in the omnipotence of good. Christian Science has been an inspiration and a practical help under every adverse circumstance or condition. It has given far more than the former sense of good health, which might be shaken at any change of weather or climate or environment. Health is beginning to be understood as a spiritual fact, not dependent on air, food, or exercise.

Above all, I am grateful for the spiritual uplift and better concept of God as Love which Christian Science has unfolded to me, and have come to realize that gratitude is more than words.— May A. Fisher, Singapore, Straits Settlements.

✧

In the spring of 1914 I had three hemorrhages from the lungs. The final one did not come until the middle of August, at which time work had to be given up. The first day of September found me in a hospital for an operation, and the operating surgeon informed my wife that I would never be able to return to my work. A month later, however, I returned to duty for three days, and as I was preparing to take more leave, the head of our bureau told me that if another breakdown occurred, or even a slight fever, I would have to leave Washington. There was a place to send me, which was Fort Staunton, N. Mex., but my wife and baby could not go too, and it caused me a lot of worry to think of leaving them when our home had been so happy.

A friend then told me of the Christian Science Wednesday evening meeting and I agreed to go with him out of curiosity. The service impressed me so much, however, that I asked him to take me to a Christian Science practitioner, and he did so within a day or two. I told her that I had laughed at Mrs. Eddy and what Christian Science could do, but knew nothing about this teaching. From that day, Dec. 8, 1914, I have been a different man. The severe pain has left me entirely, and my appetite is good all the time. The craving for cigars also left me within a few days, and I have no desire to smoke. Never before did I know anything of God and all that He has power to do. Mrs. Eddy's teachings have taught me to trust in God, knowing that He is Life, Truth, and Love, and that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

I give this testimony with the hope that some one who thinks he has an incurable disease will know that there is a cure for every ailment. If we believe that God is, then we must acknowledge that man is made in His likeness.

William E. McConnell, Washington, D. C.

✧

[Translated from the German]

After having kept silent so long, I feel impelled to testify to the many blessings which I have received through Christian Science. In 1912 I became afflicted with a serious bladder trouble, and upon the physician's advice submitted to an operation. I had great expectations of being completely restored, but my hopes were not realized, for after I took up my work again the ailment returned, and this made me feel very despondent. I went back to the physician to be treated, but when after four months I did not experience any

Digitized by Google

benefit, I stopped going to him, and having known of Christian Science for quite a while, took up its study in all earnestness. As a result I was healed of the illness in a short time.

I am very grateful for all the benefits which our heavenly Father has bestowed upon me, and my sincere desire is to be worthy to be called a Christian Scientist. I also think of Mrs. Eddy with love and gratitude for the great work which she has accomplished for humanity. I would like to add that through Christian Science my little son has been healed of an eye trouble within a short time.

FRAU HELENA K. ZIMMER, Sebewaing, Mich.

✧

Truly divine Love meets "every human need," as our Leader declares on page 494 of Science and Health. A friend who had been healed of lung trouble through Christian Science, encouraged me to take up the study of this teaching. I would read the literature, then let it alone for a while, but it was never entirely out of my thought. Soon after this I heard a minister preach against Christian Science, and right there made up my mind to buy Mrs. Eddy's book, "Science and Health with Key to the Scriptures," to see if what he said was true. I however found he was mistaken. After reading this book almost constantly for three days, I realized to my great joy that I was entirely healed, after years of suffering from hemorrhoids, stomach and bowel disorder, and nervousness.

It is about five years since then, and I have not taken any material remedy in that time. Not long ago I contracted a cold, and because of its severity feared acute lung trouble. I felt too sick to help myself, so a practitioner was asked to work for me. That night, and every night thereafter, I slept well, and the cold left without a fever or headache. Help has been received in many other ways. To those that are skeptical I would say, Study this book and find out for yourselves. It seems to me that Christian Science is what I have been searching for all my life.

For the physical healing I am indeed grateful, but more so for the spiritual awakening. I was led to love the Bible study through reading Science and Health, which is indeed a "Key to the Scriptures."

MRS. D. E. WASSON, San Dimas, Cal.

✧

This testimony is given in the hope that it may encourage some one who is looking for work. After completing a four year course in high school I started out to look for my first position on the basis of offering my service for the good of God's children. Having always wanted to work for an architect, I went first to the office of one who was a Christian Scientist, but he was out and his draughtsman told me there was no opening. That afternoon fifteen architects were interviewed, but all said there was no hope of my finding anything in the architectural line. I was not discouraged, however, but knew there would be work for me in God's vineyard. Then I applied to various banks and was promised a position in one of them; but before the final arrangements were made it was necessary for me to undergo a physical examination in order to be admitted to their pension system. I did not like the idea of being a bank messenger after saying that I was going to be an architectural draughtsman, but all false pride left as these words came to my thought: "To do good in God's vineyard is your greatest desire, so where you can do most good there you want to be."

On Monday morning I called at the doctor's office, and after undergoing a thorough examination was pronounced sound and strong. The doctor especially remarked on my good eyesight, and I thanked God that we learn in Christian Science that we see through spiritual sense, not material, as some years ago I had worn glasses. It had also been said that I had heart trouble. After this I called again at the office of the architect who was a Christian Scientist, for I had not yet seen him personally, this time taking some of my drawings with me, and was given a position. From there I went to the bank to say that it would not be possible for me to accept the kind offer that had been made me. This was indeed another victory of Spirit over matter.

I am deeply grateful for my understanding of God as taught by Mrs. Eddy in Science and Health. The Christian Science literature is a blessing for all seekers of Truth. I am thankful for the scientific thought governing our happy home. For the last three years Christian Science has been our only remedy, and in these days of seeming worry and unrest the spiritual uplift and the peace we experience by relying upon God are most gratifying.

OTTO V. UEBERROTH, Chicago, Ill.

✧

This testimony is sent with love and gratitude for what Christian Science has done for me. For twenty-eight years Science and Health has been in my home, and it has been a wonderful guide. I have depended on Christian Science entirely during these years, and no ailment that has once been overcome has ever returned. Some years ago there was manifest a malignant growth which did not yield to my treatment, so I wrote to a Christian Science practitioner and was healed at once. No words of mine can express my thankfulness to God and my gratitude to our dear Leader for the blessings I have received.

MRS. L. C. STALLCUP, Ardmore, Okla.

✧

When the Science of Christianity was brought to my attention seven years ago, I had undergone two surgical operations and was then suffering from a nervous trouble as well as from stomach, intestinal, and liver derangement of thirteen years' standing. I consulted many physicians and took medicine continually, until finally the doctors as a last resource sent me to French Lick Springs in Indiana. When the waters there failed to effect a cure, I was told nothing more could be done, so became reconciled to the condition as permanent.

Several years later a kind acquaintance spoke to me of Christian Science. The religious aspect of this teaching did not appeal to me, but as the lady was very earnest and everything else had been tried, I consented to have treatment. I told the practitioner, however, that my condition would be worse if medicine was not taken, and that I did not believe a cure possible. After two weeks of daily treatment there was not the slightest improvement, but at the end of the third week I was greatly surprised to find myself well. Six months later I had occasion to obtain insurance and passed an examination for a twenty year term in two companies.

Deep as is my gratitude for the physical restoration, it almost sinks into insignificance beside the relief from other harassing conditions in my life at that time. For three years I had been separated from my husband, owing to his irresponsibility through an ungovernable and so-called inherited appetite for liquor. He was also a physical wreck, given up by physicians, and having lost every dollar in business, had reached an extremity which proved to be "God's opportunity." He lost all desire for alcohol in three treatments, but the physical healing was very slow, covering practically two years under almost constant treatment. During that time his condition appeared to grow desperate, and we punished ourselves with many doubts and fears. Today, however, he is well, happy, and useful, through his knowledge of Chris-

Digitized by Google

tian Science, which, when honestly and persistently applied, meets all needs.

Instead of a feeling of aversion for the Bible, which formerly seemed visionary and impractical, this book, in the light of Christian Science, has become of absorbing interest, and this illumination is the key to all our present happiness. We are trying to express our thankfulness to God, and our gratitude to Mrs. Eddy,—that brave follower of Christ Jesus who interpreted his teachings to this age,—as well as to all who helped us, by trying to conform our lives to the truth of Christian Science and so bring the light to others, for this is only "reasonable service."

PHYLLIS ASHCOM LEWIS, New York, N. Y.

✧

With a heart overflowing with gratitude for the benefits received through Christian Science by gaining an understanding of our loving God and of man's relation to Him, I give this testimony. I had heard of Christian Science for fifteen years, but objected to its teaching, the word Science being to me, in my ignorance, the stumbling-block.

A few years ago I heard for the first time a lecture on Christian Science, and it impressed me so much that it set me thinking. About that time I became very sick with a bad cold, also chills and fever. To please my wife, who had become acquainted with some Christian Science people and had gained some understanding of its teaching, I consented to call a practitioner. The good man came in the middle of the night and gave me a treatment. After an hour I fell asleep and slept till daylight, when I got up feeling perfectly well and with no sign of fever. At the same time I was healed of chronic bowel trouble, after suffering from it for thirty years.

The healing for which I am most thankful, however, is that of intense pain in the lower part of the back. I had suffered from this for forty-eight years, having three or four attacks each year and being incapable of moving about from two to three weeks each time; but I have been completely cured in Christian Science. Many minor ailments have been overcome with the help of that wonderful book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. The *Sentinel* and *Journal* have been a great help to me in gaining an understanding of God as Life, Truth, and Love, and of man created in His image and likeness. The greatest blessing of all has been the overcoming of a seemingly uncontrollable temper, which often made life a burden to my family and self.

For all these blessings, and the great spiritual uplift experienced, I give thanks to God, our loving Father. I am also grateful to Mrs. Eddy for her loving, unselfish work in behalf of suffering humanity. Although I am now in my seventy-third year, my health is excellent. I strive daily to have that Mind in me "which was also in Christ Jesus."

WILLIAM E. MUELLER, East San Diego, Cal.

✧

It is with a deep sense of gratitude for what Christian Science has done and is doing for me that I send this testimony. From childhood I had been delicate, suffering from spinal weakness, severe headaches, and stomach trouble. Then in 1909 my attention was drawn to Christian Science and a copy of Science and Health was purchased. After studying this book for a short time I found myself gradually growing stronger, so that my work was done without the pain hitherto experienced, and now my strength is equal to that of the average woman.

For this physical healing I am indeed grateful, but much more so for the spiritual understanding of the Scriptures which has been revealed to me in the study of the Bible as taught in Christian Science. It is daily being proved to me that God is a very present help in time of need. For this practical religion, and for the peace and joy that have come into my life, words can never express my thankfulness to God and my gratitude to Mrs. Eddy, the Discoverer of this glorious teaching. My desire is so to live each day that I may show "my faith by my works."

ELLEN BALLARD, Whitefield, near Manchester, England.

✧

With all my heart I am grateful for having been brought to the light of understanding as revealed to us in Christian Science. The Bible is a new book to me, for I can read it apprehendingly by means of its spiritual interpretation as given to us in "Science and Health with Key to the Scriptures" by our revered Leader, Mrs. Eddy,—this world-wide blessing to mankind.

My first knowledge of Christian Science came through physical healing. Having sustained internal injuries by falling from a horse, I could neither eat nor sleep and my suffering was intense. While I was in this condition we chanced to meet a Christian Scientist, who assured me with utmost certainty that if I believed in the efficacy of prayer and relied on God implicitly, medicine would not be needed. I was most willing to do so, and with the simplicity of a child asked her to pray for me. She consented, and healing resulted in twenty-four hours. I was deeply impressed yet unable to comprehend, and told the Christian Scientist emphatically that I was sure the pain would return; but it never did.

Naturally I became interested in Christian Science, and on returning home took up the study of this teaching, which has since proven to be an ever-present help in trouble. For at least twenty years I had been afflicted with neuritis in my arms, but this ailment has been entirely overcome through the reading of Science and Health. For twelve years I have relied on Christian Science, and it has always met my need. How thankful we are that Mrs. Eddy has shown us the way to apprehend the Bible teachings so we can apply divine Love to all our needs.—ROSE ROKKER, Springfield, Ill.

✧

A great sense of burden has rolled away from both mind and body since my introduction to Christian Science. The healing of a friend led me to investigate this teaching, with the result that after I had attended the Sunday service for several months, acute attacks of stomach disorder of many years' standing disappeared entirely. It was, however, not until about a year later that the fundamental teachings of Christian Science were really understood. Then the healing of numerous other physical ailments followed, among them neuralgia, which was thought to be inherited, and a cough which lasted through the winters from my childhood; also heavy colds became less frequent. For many years one eye had been of no real use to me, but I suddenly discovered that I could use it for reading.

It was several years before a sense of grief, bitterness, resentment, and hatred was wiped out of my consciousness, but when my mental vision was finally cleared the depth of my joy, love, and gratitude no tongue can tell. When I learned to understand and demonstrate that evil is impersonal, no person, place, or thing, but a false belief, there was an added peace and better self-control manifested. Above all, Christian Science is a religion that "meets the heart's great need;" a practical religion of daily use in solving all our problems, yet leading to divine heights where man and the universe are revealed as spiritual and harmonious.

Digitized by Google

Words are inadequate to express my gratitude to God for the revelation of the truth, and my deep appreciation of His inspired messenger, Mrs. Eddy, through whose labor of love the whole world is benefiting.

MRS. R. P. IRVIN, Minneapolis, Minn.

✧

I wish especially to give thanks for the Christian Science literature. In an article on the Home Forum page of the *Monitor* one day the statement was made that health is an eternal characteristic of all that God creates, and is an established fact of eternity. In dwelling upon this statement and trying to realize its spiritual meaning, I was healed of what a doctor had pronounced a malignant growth. It is impossible for me to express in words my gratitude for the many other healings I have had physically, morally, and mentally. Chronic throat trouble disappeared after a few months' reading of Science and Health.

We can best show our thankfulness to God and our gratitude to our beloved Leader, Mrs. Eddy, by living in obedience to our highest understanding of God's law, and by giving "a cup of cold water in Christ's name" (Science and Health, p. 570) to those ready for the blessing.

MRS. M. D. ALPERS, San Francisco, Cal.

✧

[Translated from the German]

I feel a desire to express my gratitude for Christian Science in view of the fact that the members of my family as well as myself have experienced the salutary influence of its teachings in the most positive manner. Through treatment of short duration in Christian Science I have been healed of attacks of colic and of a very painful bowel trouble. My son, who suffered greatly, being afflicted with rheumatism of the joints, was healed perfectly through Christian Science. He is now undergoing all the strenuous duties of a soldier and is serving his country faithfully. His letters reflect happiness, and he tells of being in excellent health.

My daughter became very ill after being vaccinated a second time, and obtained no relief through medical aid. She was, however, completely restored to health after the second treatment from a Christian Science practitioner and is now entirely well. All this prompts me to give public expression to my deep appreciation of the work of our revered Leader, Mrs. Eddy, and to praise Him from whom cometh all good.

FRIEDRICH GRETHER, Blansingen (Baden), Germany.

[Written for the *Sentinel*]

Prayer

MAUD A. MITCHELL

"OUR Father which art in heaven"—
I paused and wondered where
I could find that beautiful place,
To rest in God's loving care,
For it seemed that our heavenly Father,
With all His protecting love,
Would surely not be far away
From His child where'er he rove.
Then these words quickly followed:
"In earth as it is in heaven,"
And I thought, Can it be that God is here,
Where with sin and sorrow we're driven?
For if God be here on earth today,
I shall my burden bring
And leave it with Him, and take refuge
'Neath Love's protecting wing.

From Our Exchanges

[The Universalist Leader]

There were those in the not very distant past, when the interest in what became known as the higher criticism was developing, who thought that religion was about to be destroyed, but it was not. Instead, great men, such as Dr. Washington Gladden, began to assemble what was left, and behold, there was more religion and better religion. There has been no age when this same fear has not taken possession of some in the face of something they did not understand or that was different. Recently there have been many who have seen in the world war which just now afflicts the earth, the elimination of the church and religion. At first it seemed that it was true that "Christianity had failed," and that the gospel of force was to take the place of the gospel of peace. Time passes on and religion endures, horrible catastrophes follow in quick succession, but religion endures; and it is reported on the authority of able men that more and more are the people of Europe turning to religion as they sense the incompetence of anything else to meet actual conditions. Do not worry about religion coming to an end, but take what you have, be it much or little, and set it at work. There is no solution of world problems, no settlement of world difficulties, save the universal brotherhood of man put into operation, and that is religion, the religion which can never be destroyed.

[The Christian World]

When we go directly to the New Testament, we perceive no solicitude lest the divine character of our Lord should suffer through the ascription to him of a truly human nature. We read in the gospel that he hungered, that he thirsted, that he grew tired; that there were matters on which it pleased God not to give him absolute information; and here in the gospel we read that he wept. And what we must contend for is, that this grief of Jesus had, so to speak, no patronage in it, but that there and then he shared the common pathos of our life and confessed that he too felt with us the weary weight of all this unintelligible world.

The record of the New Testament stands, which tells us that "Jesus wept." In those tears of his we are able to see how truly he is with us in the searching task of living unto God. Face to face with death, he also knew our elementary fears and needed to compose himself by faith, asserting God the Father to his spirit. He wrung out of the silence the holy solving word of God, not with ease, but with an agony. He overcame the insinuation of the dreadful alternative. And it is because Jesus achieved and maintained his own blessed confidence in the Father through a life of poignant contradictions that he has taken his seat on the right hand of God.

[Bishop Charles H. Brent in *Record of Christian Work*]

Human life has a unity, and the likenesses between the Chinese and the people of the western world exceed by far the differences between them. We are on the verge of a great discovery—that the peoples of Asia are somehow men and women. We of this part of the world have considered ourselves as having a superior human nature, so that when we cannot get near to the peoples of other countries, we attribute it to the fact that there is something wrong in the human nature of those we are trying to approach. It will not be until we recognize in a far more practical way than we have done hitherto that men are men and folk are folk, wherever they are, that we will be able to evangelize the peoples who "sit in darkness and in the shadow of death." The only way to reach a man is to treat him as a man, and you cannot treat

Digitized by Google

a man as a man until you believe he is a man. Why are all these exclusion laws erected between nation and nation? It is because we do not believe the men of other nations have a common humanity; and some day with a sword of fire God is going to cut all those artificial obstacles out of human life, so that men will be able to look into the faces of their fellow men and recognize them as brothers.

[*The Methodist Recorder*]

Christianity in England seems to many stationary or worse, and the most hopeful cannot be satisfied with its progress. Several explanations are current, but the true ones are perhaps rather subtle than obvious. May it not be that one of them depends upon the connection between the two clauses of Christ's prayer for unity? He thought that his people's unity would win the world; does not their schism delay its winning? We are so used to division that it ceases to astonish us, but how horrible it would have seemed to St. Paul! He calls the church the "body of Christ;" today it is a body almost in pieces. He calls it the temple of the Spirit; today it is a temple in ruins. Yet though use has blunted horror there are traces that the evil is still admitted. No church allows that it is responsible for division, as no nation that it necessitates war. And even "the world" knows that Christendom ought to be one.

[Prof. James Gilroy, D.D., in *The Homiletic Review*]

The first thing that strikes us in Christ's estimate and valuation of religion is this: Religion is action, not mere thought; conduct, not mere belief; kindly, generous treatment of our fellow men, not pious opinions and dreamy meditation. I do not wish to divorce religion from belief, action from thought, conduct from creed. To do so would deprive religion of stability and balance, progress and impulse. But when Christ disregards in the parable of the last judgment a man's beliefs, he looks upon facts and deeds as the only value that can be placed on the sincerity of mere thought. Prayer, meditation, worship, are the training of the religious spirit. They are valuable in what they lead to, valueless if they abide alone. There is no use in indulging in transcendent visions on the mountain top while the world is groaning at the foot.

[Rev. Joseph Fort Newton, D.Litt., in *The Christian Commonwealth*]

A solemn hush has fallen upon those glib dogmas about the destiny of human souls about which men were so talkative two years ago. The door of hope is not so quickly shut against those who gave themselves a willing sacrifice to the call of duty, laying down their lives in behalf of others and for the sake of high human ideals. At last the gates of the church may open as wide as the gates of heaven—as wide as the infinite Love intended they should be. The influence of the war on the problems of the future life will be profound and far reaching, and let us hope that it may bring the church to the Mind of Christ.

[Rev. Charles S. Mills in *The Advance*]

Men are asking today, Is the church worth while? Is it not losing its grip? The only answer we can give is to show that the church in its assemblies, its ideals, its preaching, its fellowship, fits man to grapple with all that attacks him in body or soul; that it helps to hold in restraint the sordid passions, to overthrow the citadels of iniquity in civic life, to translate faith into service in shop and store as well as in school and temple; that it keeps life sweet, wholesome, and inspiring. It must measure up to the test,—Is it a real spiritual dynamic?

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

✧

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

✧

From the Publishing Society

A copy of the Index to Volume XVIII of the *Christian Science Sentinel* will be sent free of charge to any subscriber upon request.

"Christian Science: Man's Dominion Over Evil," a lecture by Edward A. Kimball, C.S.D., has been translated into Russian, Norwegian, modern Greek, and Italian. Pamphlets in these four languages have been published with the English version opposite the translation and are now on sale at prices of our regular pamphlets as shown on the opposite page.

A new French pamphlet, "Foi et Générosité" (Faith and Generosity), has just been issued and is now on sale. This pamphlet contains the following articles: "The Lord Thy Confidence," "The Closed Hand," and "Continuity of Right Thought."

"Christian Science: A Religion of Love" (Christian Science: En Kjærlighetens Religion), a lecture by Virgil O. Strickler, has been translated into Norwegian and is now published in pamphlet form with English and Norwegian versions on opposite pages.

✧

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

✧

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

Digitized by Google

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

MAN'S UNITY WITH GOD. Printed in German only.

"PEACE ON EARTH." Printed in German only.

PRAYER AND CONFIDENCE. Printed in German only.

MARY BAKER EDDY. By ARTHUR BRISBANE. Printed in German only.

MARY BAKER EDDY: HER PURPOSE AND ACCOMPLISHMENT. By FREDERICK DIXON. Printed in German and French.

THE FOUNDER OF CHRISTIAN SCIENCE. By B. O. FLOWER. Printed in German only.

CHRISTIAN SCIENCE: THE COMFORTER OF PROMISE. By FRANK H. LEONARD. Printed in French only.

CHRISTIAN SCIENCE: DEMONSTRABLE RELIGION. By FRANK H. LEONARD. Printed in Norwegian only.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. By PROF. HERMANN S. HERING. Printed in Dutch only.

CHRISTIAN SCIENCE: A RELIGION OF PROGRESS. By WILLIAM D. MCCRACKAN, M.A. Printed in French and Swedish.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. By BICKNELL YOUNG. Printed in French and Swedish.

PRICE, POSTPAID: Single copy 5 cents; twelve copies to one address 55 cents; fifty copies $2; one hundred copies $3.50. Orders for above pamphlets may be assorted as desired.

For table of English, German, Swiss, and French money equivalents, see inside front cover page.

Miscellaneous

A Catalogue of Selected Bibles will be furnished upon application, and quantity rates on other items specified below will be found in the current catalogue in *The Christian Science Journal*.

BIBLES. 01483 x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $3.75.

01440 x. Brevier, light-faced type; self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $3.50.

Morocco slip case to hold pocket edition of Science and Health, *Quarterly*, and Bible, $1.25.

Two other sizes of slip case listed in the current issue of the *Journal*.

Covered morocco case with handle and purse on outside, $3.50; without purse, $3.25.

01683 x. Large type Bible, 10¾ x 8 inches, bound in Alaska seal. Specially adapted for use of second readers, $9.25.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 22 of selected Bibles will be mailed free upon application.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. 132 pages with index. Paper covered, 15 cents; cloth binding, 85 cents.

THE LIFE OF MARY BAKER EDDY. By Sibyl Wilbur. 424 pages. Cloth, $2. Edition de luxe, $5.

"PERSONAL CONTAGION" and "WHAT OUR LEADER SAYS." By Mary Baker Eddy. Paper cover, 10 cents.

THE MOTHER CHURCH. By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated, 107 pages. Cloth, $1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS. By Judge Clifford P. Smith. 128 pages, paper covered, 10 cents.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, $1.15; half morocco, $1.40; full morocco, $2.50; levant, $3.50; pocket edition, size 4⅝ x 6⅝, $3.

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows: "The Mother's Evening Prayer," 75 cents; "Christ, My Refuge," 75 cents; "Love," 40 cents; Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents; "Blest Christmas Morn," 27 cents; "O'er Waiting Harpstrings of the Mind," 27 cents; "Shepherd, Show Me How to Go," 27 cents; "Saw Ye My Saviour?" (Root), 27 cents. The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12 x 16), $1; 12-inch (mount 15 x 20), $2; 16-inch (mount 21 x 29), $3.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18 x 24 inches, $5; on India paper without remarque, $3. Smaller reproduction, size 11 x 14 inches, on Japanese vellum, $1. Photogravure postcards, reproduction of the picture of the Church Edifice and Publishing House, 5 cents.

QUARTERLY COVERS in black morocco, $1.15; with purse, $1.40.

ALUMINUM LESSON MARKERS. Set of thirty, with paper shields, 50 cents. Extra paper shields, one hundred, 15 cents.

PRICE LIST OF BIBLE CONCORDANCES and DICTIONARIES OF THE ENGLISH LANGUAGE supplied on request. Express charges collect on delivery.

REPRINTS (not printed in English). Two-page leaflets, 14 subjects in French and Swedish; 19 subjects in German. Ten copies to one address, 10 cents.

Remittances should always accompany orders, and be made by check, money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money or business letters to the Editor or Editorial Department.

Send all orders for the works of Mrs. Eddy, with remittance by New York or Boston draft or money order, direct to Allison V. Stewart

For literature listed above address orders and make remittances payable to

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 61 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Address all orders for above works, and make remittance by New York or Boston draft or money order, to

Entered at Boston, Mass., post-office as second-class matter.

Items of Interest

Among those attending the convention of the Chinese Students Alliance recently at Andover, Mass., were the Chinese educational commissioner to the United States and the director of the Chinese educational mission to America. Those students whose interests in the United States are watched by the former are educated at the expense of the Chinese central and provincial governments, while those in charge of the latter are here under the indemnity arrangement between the two countries. The Chinese Government at one time had 200 students in this country, but owing to difficulties at home, the number has been reduced to about one hundred and fifty-eight. It is expected that the number will be increased later when the republic is again completely restored. In the past great numbers of the students pursued academic subjects, but now the great majority study along practical lines, especially engineering and the applied sciences. Many of them now after graduation spend at least three or four years in the factories, in order to qualify themselves as practical engineers. The students are selected through competitive examinations.

"The Federal loan act now being put into operation," according to Attorney-General Gregory, "creates a banking system supplementing that of the national banks which will reach the rural districts, operate on terms suited to the farmers' needs, introduce business methods into farm finance, reduce the cost of handling farm loans, place upon the market farm mortgages which will be a safe investment for private funds, attract to agricultural operations a fair share of the capital of the nation, and lead to a reduction of interest.

"What is known as the good roads act provides for cooperation between federal and state governments in the construction of rural roads on which no tolls shall be charged, conduces to the establishment of more effective highway machinery in each state, strongly influences the development of good road building along right lines, stimulates larger production and better marketing, and promotes a more attractive rural life."

In a country like South Africa where the distances are vast and the population is scattered, an agricultural show has an importance much greater than such a fair has in the United States. The principal agricultural shows held there are the Rose Bank (Cape Town), Port Elizabeth, Bloemfontein, Witwatersrand (Johannesburg), Durban, Bulawayo, and Salisbury. All these have a national scope and attract exhibitors and visitors from all parts of the country. It is doubted whether any other agency in South Africa has been so instrumental as these shows in encouraging agriculturalists in establishing a high standard of production. Their contact with each other and with the people of the cities likewise serves to broaden their views and to break down the barriers that often arise through mutual misunderstanding.

A school not for the education of lawyers for the practice of the law, but for the study of jurisprudence, in which greater attention would be given to the solution of the many legal and political problems now increasingly arising, was advocated at Chicago, Ill., in an address by a speaker before the meeting of the American Bar Association. It was stated that the great changes in our economic and social life make such an institution necessary, and the suggestion was made that it might preferably be established in connection with one of the large universities.

There are large deposits of iron in New Zealand, much of it being found in iron sand at Taranaki, near New Plymouth, on the North Island, where several attempts have been made to produce pig-iron in commercial quantities, beginning as early as 1848. It is stated that the pig-iron produced at different times in this section of New Zealand from iron sand is of a very high quality, and it is probable that all the pig-iron and all the commercial iron needed in the country could be produced there.

There are in Mexico 15,800 miles of road, of which 8600 miles are under governmental control or ownership and 7192 miles under private control. During the unsettled conditions of the past five or six years there has been much damage to railroad property. Statistics given on June 1 of this year on the business transacted by the railroads under governmental control showed an average of $41,000,000 annually, as against $61,000,000 under normal conditions. Since that date the receipts have augmented steadily.

It has been decided by the Commonwealth Government of Australia to appoint a commission to visit the United States to investigate and report upon the methods of manufacture and production in that country and the conditions of employment therein. The commission will consist of six representatives of the manufacturers in Australia, one from each state, together with six representatives of the workers, one also from each state.

Rice was grown in 1915 in Spain on 99,301 acres, and the crop amounted to 235,161 tons. Rice cultivation in Spain is almost entirely confined to the provinces of Tarragona, Gerona, Valencia, Alicante, Castellon, Murcia, and the eastern part of the island of Majorca. The largest crops were gathered in the province of Valencia, amounting to over half of the total.

The value of acids produced for sale in the United States in 1914, not including recovered or reclaimed acids, was $30,001,364. The total production of sulphuric acid was 1,017,675 tons; nitric acid, 78,589 tons; acetic acid, 75,363,375 pounds; boric acid, 8,590,311 pounds; citric acid, 2,657,840 pounds; hydrofluoric acid, 7,200,248 pounds; muriatic or hydrochloric acid, 337,167,882 pounds.

A factory is to be erected at Greaker, Fredriksstad, for the utilization of refuse from sulphite. A Swedish engineer has invented a method for extracting a substance from sulphate lye which, in powdered form, will be made into bricks and used as fuel. It is claimed that the powder thus formed yields 6000 calories, while the best English coal gives 7000.

Including the earnings for the month of July, 1916, amounting to $160,123, the tolls collected on traffic passing through the Panama canal from the beginning of the towing of laden barges between the terminal ports in May, 1914, have amounted to $7,217,956. According to the *Canal Record*, the collections from vessels in the coastwise trade of the United States formed $1,923,122 of this total.

There are now three states having over two hundred thousand automobiles apiece, New York, Ohio, and Illinois,—whereas on Jan. 1 of this year New York was the only one that had as many as this. Eleven states have over one hundred thousand machines each, Minnesota, Massachusetts, Indiana, and Texas having passed into this class since Jan. 1.

Postal savings deposits for July showed a net gain of over three million seven hundred thousand dollars. On July 31, 7687 post-offices were accepting deposits in the United States, Alaska, Porto Rico, and Hawaii. The number of depositors approximated six hundred and twelve thousand with $89,700,000 standing to their credit.

The Russian-American Chamber of Commerce is discussing the question of sending Russian students to North America in order to make them acquainted on the spot with the commercial activity of the United States and its industries.

Experiments at the forest products laboratory at Madison, Wis., have resulted in the discovery of a method whereby the yields of alcohol and acetate of lime from the destructive distillation of hardwoods have been increased 15 per cent.

Beginning March 1, 1917, and continuing for fifteen days, the second Annual Lyon Sample Fair will occupy the attention of the commercial world at Lyon, France. The first fair was opened on March 1, 1916, and was an immediate success.

Approximately 90 per cent of the total world's supply of rattan is shipped from Singapore. The imports into Singapore come from the Dutch East Indies, Sumatra, Sarawak, British North Borneo, and the Malay Peninsula.

Work has been commenced on an automobile road to connect Bluefields with the rest of the Republic of Nicaragua, at an estimated cost of $120,000 gold.

The state ornithologist of Massachusetts estimates that more than a million birds are destroyed yearly in the state by domestic cats.

Petrus Chambois, French railroad magnate, is in the United States to spend $3,290,000 for railroad equipment.

The annual value of the farm wood-lot products of the United States is over one hundred and ninety-five million dollars.

The petroleum marketed in the United States in 1915 amounted to 281,104,104 barrels, valued at $179,462,890.

Vol. XIX September 23, 1916 No. 4

Scientific Selection

BLISS KNAPP

THERE is much to be gained in a study of the four gospels in the light of Christian Science, by thinking of Jesus as a student who was learning from his human experience; for it is written of him in the epistle to the Hebrews, "Though he were a Son, yet learned he obedience by the things which he suffered." When he recognized that "he did not many mighty works" in his home country, and that it was "because of their unbelief," he departed thence and ministered to others who were more worthy to receive. Doubtless he learned the merits of a discriminating examination to determine the fitness of an applicant for healing, all of which he tersely expressed as a warning to others when he said not to cast "pearls before swine." On page 234 of Science and Health Mrs. Eddy says that we should "avoid casting pearls before those who trample them under foot, thereby robbing both themselves and others."

An ancient custom prevailed with the Jews which made it unlawful to have dealings with one of another nation. Contrary to that custom, a certain Greek woman, a Syrophenician, besought Jesus to heal her daughter. He promptly voiced the traditional caution of his race by saying to her, "Let the children first be filled: for it is not meet to take the children's bread, and to cast it unto the dogs." It is recorded that he regarded the truth he taught as "the bread of life," and to cast that living bread to the unworthy or unprepared was impossible. His answer seems to imply that this woman was excluded from his benevolence because the law of tradition held her in a state of unpreparedness. She promptly challenged that position by those intuitive words, "Yes, Lord: yet the dogs under the table eat of the children's crumbs."

In this brief sentence the woman disclosed a wonderful concept of the imperishable nature of the bread of life, for would not the crumbs be consumed by God's lesser ideas? With that gleam of spiritual acumen portrayed so intelligently, Jesus was convinced of her worthiness, and he said to her, "For this saying go thy way; the devil is gone out of thy daughter." This simple examination had proved the worthiness of the supplicant by a standard that admits of no mistaken sympathy or tradition. Personal sense and personal direction were swept aside, and divine guidance alone decided the issue in the final selection of the patient.

Not infrequently Jesus became involved in disputations with antagonists which necessitated a considerable amount of effort and ingenuity in order to parry their thrusts. Such discussions, however instructive they might be, doubtless consumed much time and possibly interfered with the legitimate efforts of others more worthy, but such interference was swept aside by establishing the law, as recorded in the sixth chapter of John's gospel, "All that the Father giveth me shall come to me; and him that cometh to me I will in no wise cast out." It is to be noted in this affirmation of the power of divine attraction, that the declared impotency of evil is omitted. The presence of certain undesirables, drawn perhaps by the assembling of the selected few, brought a quick observance of the need and its equally prompt supply; for in the forty-fourth verse of that same chapter Jesus establishes the completeness of the law by including the affirmation of divine power and the denial of an evil influence, as follows: "No man can come to me, except the Father which hath sent me draw him."

The completeness of that law regulated absolutely the selection of those who should come to him, and also those who should remain away. Human wisdom and personal direction were completely superseded by the operation of divine law. A second declaration of that law in the sixty-fifth verse brought an immediate effect; for, we are told, "from that time many of his disciples went back, and walked no more with him." Willing then to surrender the final selection of his twelve disciples to the operation of that same law, meekly and humbly he turned to them and asked, "Will ye also go away?" Simon Peter's answer was, "Lord, to whom shall we go? thou hast the words of eternal life." The test was complete. They had no other place. God had selected them according to the operation of well-defined law.

When John and James ceased to follow the Baptist and joined themselves to Jesus, no thought of personal attachment interfered with their obedience to the operation of the greater attraction. The world has benefited from that unselfish obedience to law which lifts one above a sense of personal loyalty. It extends to one's activities with such completeness that the healing work of one apostle could in no wise interfere with the legitimate activities of the others. If a patient is led by the operation of divine law from one practitioner to another, no injustice has been done. There is no sense of loss or gain in the operation of law. There can be no more occasion or opportunity of interference between legitimate practitioners than between numbers and notes.

We may observe the operation of law in the guidance of those who worthily seek the Christ-healing of a practitioner, and we may observe it in the guidance of those who are drawn in congregated groups to hear the glad message as presented in the Sunday Lesson-Sermons, the Wednesday evening testimony meetings, and the lectures. It may be assumed that those five thousand who were drawn across a desert place, where no material food was to be had, were selected and drawn by the operation of the same law that fed them. The truth that attracted them was sufficient to heal them. Such a feast could not be complete without the disciples. The workers in the vineyard must all be there, for they were the necessary distributors of "the bread of life" at this feast of Soul. And so we observe the disciples all there, receiving and ministering according to the need of the hour.

As the workers in the Master's vineyard receive of that bread of life today, so must they give, ministering to others' needs. Like the disciples of old, they have their place at these assemblies, for all must be there, "confirming the word" as true witnesses, ready to gather up the fragments in multi-

Copyright, 1916, by The Christian Science Publishing Society

Digitized by Google

plied testimony. Without those "doers of the word" there would be something spiritually lacking at such gatherings. When, therefore, our audiences are selected and drawn by the operation of spiritual law, we can say with the Master: "Him that cometh to me I will in no wise cast out. For I came down from heaven, not to do mine own will, but the will of him that sent me."

Tithes and Taxes

BEATRICE VROOMAN

THE Christian Scientist who works constructively with the thought of church building, turns to page 583 of Science and Health, and there finds that its author, Mrs. Eddy, has defined "church" as "the structure of Truth and Love; whatever rests upon and proceeds from divine Principle." As the whole of this passage is studied one gains an enlarged concept of church. It is realized that church growth, or church building, is coincident with spiritual unfoldment, which must be manifested in greater mental, moral, and physical harmony, —each demonstration of divine Principle, of Truth, no matter how seemingly insignificant, being a stone purchased, polished, and delivered at the building site. One cannot build without substance, and in Science and Health (p. 468) it is recorded that "Spirit, the synonym of Mind, Soul, or God, is the only real substance." Hence the clearer our understanding and appreciation of the qualities of Mind, Soul, or God, the richer will be our sense of substance.

During the summer months of 1915 it was the privilege of the Christian Science churches in San Francisco to hear at their Wednesday evening meetings testimonies from churches in widely separated parts of the world. The greater the geographical distance from which the testimony came, the more forceful it was in conveying a sense of the extent and at the same time of the unity of the true church,—a sense of the inexhaustible richness of the quarry from which the building stones are being brought. As the greater is compounded of the lesser, the individual must realize that general church growth will be in keeping with individual growth, and that his own contribution toward this building will be in proportion to the estimate entertained of his own supply. While making such a survey recently, the writer's attention was called to what seemed confiscatory taxes on a certain piece of property in her holding.

Here it may be asked, What are taxes? That Jesus recognized their legitimacy may be deduced from his reply recorded in Mark's gospel, when he was questioned as to the payment of the tribute money. He said, "Render to Cæsar the things that are Cæsar's, and to God the things that are God's." As custom has established that taxes shall be paid on property or inheritance, may we not take, as correlative to the passage quoted above and as our standard definition of inheritance, "the Christian Science which Jesus preached and practised and left to us as his rich legacy" (Science and Health, p. 344). Then our real taxes or tithes are our acknowledgment of benefits derived from Christian Science, and we would be the losers if we failed to make the proper return for the benefits received by us from the truth.

Each act of obedience to the law of God is a payment,—for what is payment but a return symbol of value received? Can such taxes ever be confiscatory? No; and instead of rendering our legacy less valuable as a holding, the greater the tax we have to pay the more desirable should our possession become to us. Another unusual quality about this legacy to which Christ Jesus made us heirs, one which subverts all known legal precedents, is that the greater the number of claimants to this inheritance the larger the share each one receives, as instanced in the enlarged sense of the availability of God's goodness which comes after every Wednesday evening testimony meeting, when grateful heirs from all parts of the world bring in their tithes.

Under human law we know that unpaid taxes become delinquent, in time the owner's right to the property is declared null and void, and the state claims the right to sell the property and collect its just due. So if we would keep our title clear to the legacy left to us by Christ Jesus, if we would maintain our right as property holders in "the city that lieth foursquare," let us not fail to bring our tithes joyfully, gratefully, lest a greater ill befall and "from him that hath not shall be taken away even that which he hath." For the Christian Scientist the only confiscatory tax is the withheld appreciation of Christ's healing truth. Shall we not, then, bring "all the tithes into the storehouse" of infinite Mind, that the boundless blessings promised of old may be poured out to enrich all who love the truth.

"Paths of righteousness"

CHARLES A. HENRY

IT was not until the writer became interested in Christian Science that he learned the real meaning of the word righteousness, which is derived from the Anglo-Saxon word *rihtwis*, right-wise. We find, therefore, that righteousness is simply right-wiseness, or right wisdom. The recognition of this leads the thinker naturally to inquire, What then is the so-called wisdom which is not right and which must therefore be dethroned from consciousness?

There are many passages in the Bible which, in the light of Christian Science, answer this question. In Isaiah we read, "Woe unto them that are wise in their own eyes, and prudent in their own sight!" and in his first epistle to the Corinthians St. Paul puts it perhaps still more plainly when he says that "the wisdom of this world [knowledge gained from the evidence of the material senses] is foolishness with God." On page 275 of Science and Health Mrs. Eddy says: "All substance, intelligence, wisdom, being, immortality, cause, and effect belong to God. . . . No wisdom is wise but His wisdom." We thus find that righteousness is something far beyond any material sense of goodness, for to be truly right-wise we must reject entirely all so-called wisdom gained from the standpoint of belief in matter, and reflect only that wisdom which is revealed through spiritual understanding,—the wisdom which is of God, the one and only Mind.

Let us now briefly consider what is required of us if we would walk honestly and unswervingly in the "paths of righteousness." It means this: that we must cease forever to think or talk of man as though he were mortal and material, since the only real man, the only man we are entitled to be conscious of, is the image and likeness of God, a divine idea, in and through whom the divine nature is forever expressed.

To the genuine Christian Scientist the importance of faithfully practising right thinking at all times and under all circumstances becomes obvious, because he knows that any departure from this rule, any yielding to the temptation to partake of the knowledge of evil as well as of good, of matter as well as of Spirit, any gossiping about this false concept of creation as if it were man, must inevitably darken and becloud his own consciousness and prevent him from discerning the spiritual facts of being. If "the wisdom of this world is foolishness with God," it must also be foolishness to the man who would be godlike, and the student who wishes to advance rapidly in the understanding and demonstration of Christian

Digitized by Google

Science learns that right-wisdom at all times and under all circumstances is essential in order to do good work and quick healing.

The necessity of always practising correctly whatever it is desired to accomplish successfully may be illustrated by the example of a musician. Suppose a man wishes to play the violin but is careless in his practice, frequently plays the wrong notes and does not attempt to correct his mistakes: the result will be that he will make very little progress, and when the time comes for him to play for the benefit of others he will be unprepared to do so. On the other hand, if whenever he takes up his instrument he is careful to play every note accurately and leaves no mistakes uncorrected, when the opportunity arrives for him to play on some important occasion he will find it easy and natural to produce harmony, because he has been faithful in his practice.

Similarly, our ability to heal the sick and afford proof of our utility as Christian Scientists will be in proportion to the amount of right-wisdom we have been practising in our daily lives. If the light of spiritual understanding is kept shining in our consciousness, the illumination of these God-given thoughts will instantaneously dispel the darkness of fear and eliminate the discords of false belief; but if we allow our mentality to become soiled with the mud of materialism and the wisdom of this world, we shall find it difficult, if not impossible, to reach that spiritual altitude of thought in which God is revealed, and from which alone we can feed the hungry with the living bread and cause the sweet strains of heavenly harmony to reach those waiting "to hear the angels sing."

What a privilege and what a joy it is humbly and gratefully to practise right thinking as Jesus practised it, and to recognize by the good results which follow that this is indeed the way to health and harmony. On page 476 of "Science and Health with Key to the Scriptures" Mrs. Eddy has made it quite clear how Jesus helped humanity. She writes: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." When we follow faithfully in these mental paths of righteousness in which he walked, we shall find that they lead us into the promised land, the realm of consciousness where Love maketh us to lie down in green pastures, and leadeth us beside the still waters.

✧

Self-seen

KATE W. BUCK

In Science and Health Mrs. Eddy, commenting upon Jesus' healing of the insane man, writes, "The Scripture seems to import that Jesus caused the evil to be self-seen and so destroyed" (p. 411). This thought of evil as being actually self-seen is a large one, and being possible of realization under all conditions, would go far toward a reformation of any conception of selfhood that was found to be unworthy. Surely, as the poet Burns says,—

> It wad frae monie a blunder free us,
> And foolish notion,

since any form of evil, literally seen for what it is, must of necessity be destroyed.

No one can study Christian Science, even for a short time, without realizing the stress which is laid upon the word reflection, and this includes the act of being self-seen. How often when standing in front of a mirror one wishes the reflection presented a better appearance, and so he earnestly tries to perk up the original a bit, in order to have a more attractive reflection. A mother once caught up a child who in a fit of irritation was making ugly faces, and quickly held her in front of a mirror that she might see just what she looked like during the performance. The child's face instantly softened and the ugly lines began to disappear, so startled was she at the presentation of the irate image so truly given back to her.

This is but the outward sign, the symbol, that we are striving to improve; that which "the wind passeth over" and "it is gone; and the place thereof shall know it no more." If we would only seek as earnestly to make the inner self as attractive as we do the outer,—if that could likewise be self-seen,—surely speedy transformation must needs follow. If the thoughts and impulses which present themselves in human consciousness could be reflected back in their exact form and color, would we enjoy facing some of them? Would not we busy ourselves at once in trying to erase some of the hideous images which confront us? Many of these self-seen thoughts we would be loath to believe could have any part in us, and such a sense of humiliation would assail us that we would resolve to remedy the situation and hasten to do so. We could not endure the continued presence of things so base.

Christian Science teaches that thoughts can be self-seen, classified, and adjusted, when one becomes sufficiently awakened to realize that man is an idea of divine Mind; when he is also brave enough to analyze his thoughts and face them as courageously as if they indeed were reflected in a mirror as accurately as the physical presentment. As a result of this confrontment and consequent honest attempt at betterment, even the physical will manifest a more excellent appearance, because it depends as surely upon thought for its existence as the reflected image does upon the original.

It is comparatively easy to see our neighbor's need to be transformed, but we turn the search-light upon our own inner workings more reluctantly, and are sometimes so blind to our shortcomings that we cannot see our faults, even when valiantly and lovingly pointed out by some friend who cares enough for us to try to hold us to the standard where we belong. Surely all mankind must have a feeling of sympathy for the temporarily enlivened scarecrow, so graphically described by Hawthorne, when he caught sight of himself in a mirror which reflected truly whatever came in front of it. Recognizing himself for the thing of rags and straw that he was, he returned to his "Mother Dickon" and begged to be put back again into her cornfield. A mirror which would reflect thoughts would certainly be a useful thing, for, viewing that (for the most part) disappointing, saddening reflection, we would all resolve to do better than we have done. Hate would be eliminated and love put in its place. Patience would replace impatience and irritability; greed and selfishness give way to generosity and helpfulness; criticism would yield to encouragement; joy would master sorrow, and error go down before Truth.

The only thing which will in any sense serve this purpose is to look upon the "mind of Christ" and compare ourselves with what we see written there. Are there any who would not come short of this perfect ideal? Are there any who may not attain it? In this last thought lies the only balm and comfort for mankind. Jesus, our Elder Brother, pleaded for us all in these loving words: "Holy Father, keep through thine own name those whom thou hast given me, that they may be one, as we are." The appeal of it, its confident faith, should make every one who heeds look well to his mental equipment and resolve upon a process of purging. Thus may be built up, or unfolded, a selfhood which we shall not be ashamed to face; an ego which, when fairly self-seen, will give us courage to echo the glad cry, "Before Abraham was,

Digitized by Google

I am," and also lead us to know, with thanksgiving, that we are about our Father's business and worthy of being retained in His service.

"Know thyself, and God will supply the wisdom and the occasion for a victory over evil," we read in Science and Health (p. 571); and through this knowing of the real selfhood, the only one which God knows, we finally drop all thought of any other. Belief in a material selfhood and its importance is belief in a power apart from God, and discarding this, we are enabled to rise into a consciousness of strength and freedom and power which assuringly bids us to come up higher and be at peace. What a transforming sense of expansion and lightness must come to a butterfly as he unfolds his delicate, luminous wings and soars away, quite forgetting that he ever was a worm. The forgetting is an important part of the process as one rises to the true, immortal, free-born consciousness which, when self-seen in all its purity, can bring only a sense of home-coming and rejoicing. Here it may be said that the obliteration of all sense of evil, spoken of by Paul as "forgetting," is a marked characteristic of the true Christian Scientist.

Is this possible of achievement? Why, of course! Else why did the Master say, "I am the way," and "Be of good cheer; I have overcome the world"? Furthermore, it is the only thing worth striving for, the only thing which will bring lasting peace and joy. How hungrily we often listen to that wonderful benediction in Jude, where the promise reads, "Unto him that is able to . . . present you faultless." Do we not sometimes question wonderingly, Present me faultless? fearing it can never be that we shall be found blameless. Yet that very thing we already are in the Father's loving thought of us; and surely if we trust the promises, if we truly strive to overcome, then each shall enter in through the only way there is. This way is to be self-seen, even as God sees the man of His creating,—perfect because godlike. Then indeed shall we give to Him all the glory, and know with joy unspeakable that there is no selfhood apart from Him, and never can be.

Thorough Study

GUSTAVUS S. PAINE

On turning to Christian Science, whether or not one has known how to study before, one soon learns something of what it means to be a thorough student. Though it may frequently require no particular knowledge of Christian Science for a person to be instantly healed of some specific trouble, daily study is necessary afterward in order to keep well and to work out quickly any other problem which may present itself. Moreover, if one has not seemingly been able to turn to God so spontaneously and completely as to experience immediate healing, such a one certainly needs to study diligently in order to know how to turn wholly in the right direction. For all, indeed, who would know the truth careful and systematic study of the teachings of Christian Science is requisite to gain a real understanding of the practical operation of Principle in every activity of life.

For this systematic study the Leader of the Christian Science movement has provided everything necessary. The consecutive study of Science and Health in accordance with Mrs. Eddy's statement on page 559: "Read this book from beginning to end. Study it, ponder it," and the daily study of the Lesson-Sermons as given in the *Quarterly*, are of course equally important. Indispensable also is the careful consideration of all of Mrs. Eddy's other works, for surely the way to gain a practical understanding of Christian Science and its application in any given circumstance is to become familiar with all that its Discoverer and Founder has written for publication on the subject.

In our intensive and extensive study of all these works the concordances are of great value. A student of Christian Science, for example, who was acting as attendant in a Christian Science reading-room on Sunday afternoons, and frequently after a busy morning at church and Sunday school had found himself succumbing to a sense of drowsiness, decided one day to resist the temptation by looking up in Science and Health all the passages on "awake" and "watch." By the time these had been carefully read, studied, and compared with one another and with similar passages in the Bible, all sense of lethargy had vanished. From that day to this, moreover, about seven years, the overcoming has been complete. This relatively slight experience illustrates some of the limitless possibilities of study with the aid of the concordances, possibilities which are unfolding still more now that we have the concordance to Mrs. Eddy's writings, other than Science and Health.

Whenever some problem seems particularly puzzling or some wrong thought presents itself with special persistency, a careful study of all that the Bible and Mrs. Eddy's writings have to say on that subject always brings the spiritual illumination which heals. The answer for every question, whether about supply or health, church activities or daily work, right thinking, speaking, and practice, or the basic truth about God and the real man, is to be found in these our text-books. It rests with us, however, to search sincerely and to receive the word "with all readiness of mind," in order that we may prove how divine intelligence expresses itself on the human plane in perfect harmony.

Through orderly study we go forward courageously, discerning more and more of the unlimited manifestation of Principle, which takes the place of every seeming defect, limitation, or discord in mortal experience; for as Francis Bacon, Lord Verulam, says quaintly in one of his most quoted essays, "there is no stond or impediment in the wit [mind] but may be wrought out by fit studies," when we "reade not to contradict and confute; nor to beleeve and take for granted; nor to finde talke and discourse; but to weigh and consider."

Encouragement

FLORENCE LEWIS

When we stop to analyze the purpose of the Wednesday evening testimony meeting, we find that it is nothing short of an opportunity for encouragement, not only of the stranger within our gates, but of ourselves, those who have experienced the joy of healing in Christian Science. Encouragement is a mental stimulant, and if it be of the right sort, it is often all that is required to put some wayfarer on his feet again; and when thus steadied, he goes forward with energy and purpose.

Some years ago the writer was on a ship in northern waters when late one day a passenger fell overboard. It was but the second trip of the big ship and everything about her was new, even to the experience of having a man overboard. There seemed an endless delay in getting the life-boat lowered and started on her mission of rescue, and as the minutes flew past, despite the fact that the man in the water had proven himself an excellent swimmer, yet little hope of saving him was entertained on account of the intensely cold water. When, however, the life-boat had at last swung around the stern of the vessel and was out into the open, there came the clear, concise command from the bridge of the ship, "Encourage him, encourage him." Every one within sound of that voice

Digitized by Google

took heart. The life-saver on the bridge had lifted us all out of our fears, and we waited in reverent silence for the men in the life-boat to obey the command, to cheer this man, to give him a mental stimulant in his physical extremity.

With the rescue there was brought home the lesson of the opportunity for life-saving in obeying the command of our Leader issued years ago from the bridge of the stately ship of Science, in her wise institution of the Wednesday evening testimony meeting, to encourage those who come there for what we have to give. And, too, well may we wait in respectful silence, not only during the intermissions between the messages of encouragement, but reverently for each meeting to start. In this serene atmosphere each one would find an opportunity for the mental reflection of thanksgiving, for a quiet review in gratitude for the blessings received in Christian Science, and be ready to speak encouragingly.

Pertinent to this line of reasoning are our Master's words in the Bible record of the boy who was brought to him for the healing which the disciples had failed to accomplish. He said, "This kind can come forth by nothing, but by prayer and fasting." The best meetings are those in which each of us has fasted from the idle little pleasantries or chatterings, and when we have consecrated our thought in gratitude to God, which is truly a type of prayer. The Bible is full of words of encouragement. The Master's mission was one of practical encouragement, and he encouraged all who came to him. Our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, abounds in logical, encouraging reasoning, making the import of the great Nazarene's career of appreciable value and the study of the Bible a necessity for every man.

Paul says to the Galatians, "Bear ye one another's burdens, and so fulfil the law of Christ." Again we are gently reminded of this in a hymn which begins on page 134 of the Christian Science Hymnal,—

Help to bear thy brother's burden,
God will bear both it and thee.

✧

Bursting Our Bonds

JULIA VACHER

About a year ago, while sitting on our side porch, my attention was called to a pretty young mango tree which was just bearing its first fruit. We had been living in the Canal Zone about six years at the time. The building was in the old French quarters, and on the outside were the remains of several old concrete forms, into one of which a mango seed had fallen and sprouted. My family at the time remarked that it was "a queer place for a seed to take root in;" but the life was there, and as the rain and the sunshine came the tiny plant continued to grow until it filled up the form so that it burst. Gratitude for its new found freedom was expressed by its lovely blossoms, and in due time the fruit appeared, which rounded out and ripened.

One morning, after I had finished the reading of the Lesson-Sermon, on looking into the garden my eye chanced to fall on the mango tree, and it was a wonderful lesson of what divine Love will do for each one of us. Sometimes we are apparently so embedded in some form of materiality that it seems almost impossible to break the bonds asunder; but our Leader tells us that "warmed by the sunshine of Truth, watered by the heavenly dews of Love, the fruits of Christian Science spring upward, and away from the sordid soil of self and matter" (Miscellaneous Writings, p. 343). By patience and slow but steady growth the true idea, although seemingly hampered on every side, will at last realize its freedom, the encumbering error will fall away, and "the fruit of the Spirit" will in due time be made manifest.

Selected Articles

[Judge Clifford P. Smith in *The Boston* (Mass.) *Post*]

Why does *The Boston Post* repeat what Billy Sunday says against other people's religions? Take, for instance, the following paragraph brought from Kansas City and given space in the *Post:* "Sunday took occasion in the morning service to denounce Christian Science. He declared Scientists did not believe in prayer, and that they did not believe Jesus was the Son of God. He said they said there was no sickness, and the Bible said there was, and that the sick came to Christ, and he healed them." In this paragraph there is not a single statement that is calculated to convey a right impression of Christian Science. Two of the three statements it contains are not true at all, while the other is a half-truth put in shape to serve the purpose of an untruth.

Christian Scientists do believe in prayer; prayer is a vital and essential part of their religion. Every one knows this who has cared to make reasonable inquiries for authentic information. Prayer is taught and enjoined throughout Mrs. Eddy's writings. Prayer, both audible and silent, is part of every meeting or service in the Church of Christ, Scientist, and whoever joins this church must give his promise to pray daily. (See Church Manual, pp. 16, 40.)

Christian Scientists do believe that Jesus was the Son of God. Christian Science is based on the oneness of God, the sonship of Jesus, and the way he showed by which all men have power to become sons of God. Any one who wishes to read a sermon by Mrs. Eddy on this subject may find one on pages 180-185 of her "Miscellaneous Writings."

Christian Scientists say there is sickness in the same sense that Jesus spoke of it, and they also endeavor to heal the sick as he did. Some apprehension of this fact may be gained from the following paragraph in "Science and Health with Key to the Scriptures" by Mrs. Eddy (p. 495): "If sickness is true or the idea of Truth, you cannot destroy sickness, and it would be absurd to try. Then classify sickness and error as our Master did, when he spoke of the sick, 'whom Satan hath bound,' and find a sovereign antidote for error in the life-giving power of Truth acting on human belief, a power which opens the prison doors to such as are bound, and sets the captive free physically and morally."

Is it not evident, therefore, that no good purpose is subserved by giving additional currency to what Billy Sunday says against people who do not agree with him? Whatever beneficial results may ensue from his preaching do not spring from these attacks, but come to pass in spite of them. Moreover *The Boston Post*, unless I have mistaken its principles and policy, does not countenance in other situations such conduct as constraint sought to be exercised through denunciation, defamation, and wilful misrepresentation. Such being the case, I would respectfully appeal to the fairness and justness of its publishers, its editors, and its readers against antisocial and antireligious conduct of this sort.

✧

[Charles W. J. Tennant in *Ethical World*, London, England]

In an issue of the *Ethical World* a critic refers to the crudity, one-sidedness, and philosophic illiteracy of Christian Science. With regard to the first claim, it would never have been put forward by any one who had made a sufficient study of the subject to be in a position to prove it by demonstration. With regard to the claim of being one-sided, this could be put forward only on the ground that Mrs. Eddy, having held to her premise that God, good, is infinite, All-in-all, brings out in her conclusion the unreality of evil. On page 10 of "Unity of Good" she writes in this connection, "If there

Digitized by Google

be any *monopoly* in my teaching, it lies in this utter reliance upon the one God, to whom belong all things."

In the last claim, of "philosophical illiteracy," the critic is very unhappy in his choice of words. Had he been in the position of countless thousands who have gained sufficient metaphysical understanding, through the earnest study of Mrs. Eddy's works in conjunction with the Bible, to enable him to produce the works of which Christian Science is capable, he would have found himself on the verge of a philosophic discovery which it will take eternity to fathom. It is the Science of absolute truth, and can be gained only through inspiration. It is immortality brought to light. The human or carnal mind cannot grasp or understand it; hence it is only in the proportion that one has the Mind of Christ, the divine Mind, that it can be discerned and practised.

✧

[Samuel Greenwood in *The Colonist,* Victoria, British Columbia]

Under the caption "The True Light," a correspondent refers to Christian Science in a manner that calls for some attention.

Christian Scientists are not drawn to Christian Science by "a sound of goodness," but because they find it to be the substance of true religion, in that it gives them a firm foundation whereon to work out their salvation. They do not feel that their course was a weak mental wandering after a new thing, as our friend would have us believe, but rather that it was the divine response to their prayers for light and comfort concerning the problems of their existence. The astonishing thing is, that when one finds help and satisfaction in Christian Science it should call forth anything but congratulation on the part of his fellow Christians.

If Christian Science is but a "false belief," it has a most curious effect, judging from the Master's standpoint that one cannot gather grapes from thorns or figs from thistles. Christian Scientists have found that the practice of their religion makes them in every sense better men and women. It is making them happier, healthier, and holier. False beliefs do not produce such effects. False beliefs do not help mortals to overcome evil, heal drunkenness, or free men from sinful passions. Because Christian Science is doing these things, and therefore helping to establish God's kingdom among men, it should receive sympathy rather than censure from those who are ostensibly working to accomplish the same thing.

The "gospel story" is surely as sweet to Christian Scientists as to others, for they have learned the necessity not only of listening to and believing in it, but of taking it into their daily lives. They have learned that merely listening to the truth, or subscribing to human doctrines and opinions, does not make them Christians, but that actual obedience to the Master's teachings is the essential of true Christianity.

✧

[Thomas E. Boland in *The Coatesville* (Pa.) *Record*]

A prosecuting attorney with the privilege of formulating not only his questions but also the replies of witnesses, ought usually to be able to make out a poor record for the other side, however much he might violate justice in the process. Our courts would not think of tolerating such a travesty on fairness and justice. The evangelist quoted in a recent issue uses precisely this method, however, in an attack on Christian Science.

Every thinking person is aware of the great change in popular opinion relative to the doctrine of future punishment. If Christian Science is to be criticized for not teaching the plan of punishing sin by endless torture in eternal fire in a place in charge of a malignant personal devil,—the whole arrangement being according to the purpose of God,—then numerous members of orthodox churches who are unable to accept such a view of Deity must also be included in the criticism. The fact is, people are not able to reconcile this fearful program with the Biblical teaching of God as good, as merciful, just, loving, as "our Father which art in heaven." On page 230 of the Christian Science text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy has expressed a much higher concept of Deity: "It would be contrary to our highest ideas of God to suppose Him capable of first arranging law and causation so as to bring about certain evil results, and then punishing the helpless victims of His volition for doing what they could not avoid doing."

It must not be assumed, however, that Christian Science lends color to the mistaken supposition that sin can be indulged in and no penalty experienced. Nothing could be further from the fact. This has been made clear by Mrs. Eddy on page 327 of Science and Health: "The way to escape the misery of sin is to cease sinning. There is no other way." To sin is to bring inevitable suffering, and this punishment continues until the hideous nature of sin is detected and its victim turns from it with loathing. Christian Science teaches exactly the false nature of sin, its mistaken sense of pleasure, and its powerlessness over mankind when it is seen for what it really is. This opens the door of hope to the most despairing.

Examination of the words and works of Christ Jesus makes clear that the principal factor in God's plan is not condemnation, but salvation. Jesus said to the adulterous woman, "Neither do I condemn thee: go, and sin no more." Of his mission he declared: "For God sent not his Son into the world to condemn the world; but that the world through him might be saved." He exposed and denounced sin and hypocrisy, but never failed to indicate the way of salvation to those who ceased to do evil. This is precisely what Christian Science is doing, and the success which attends its efforts to heal men of sin, sickness, and disease, testifies to its apprehension of that truth which Jesus declared "shall make you free."

✧

[Robert S. Ross in *Buffalo* (N. Y.) *Express*]

Christianity is that system of religion which was taught and practised by Jesus of Nazareth. The Christianity of Jesus not only reformed those who were beset by sin, but healed those who were in bondage to sickness. These demonstrations were object-lessons, or demonstrations employed to illustrate the healing power bestowed upon the understanding by the divine Principle underlying Jesus' teachings. Referring to his works, Jesus said, "He that believeth on me, the works that I do shall he do also," and "These signs shall follow them that believe." In these words Jesus served notice on the world that by no other standard than that of healing in the way he healed could Christian discipleship be properly measured. Jesus demanded proof, not mere profession.

History records that Christian healing continued for not more than three centuries after the departure of Jesus. Then the spiritual understanding necessary to heal seems to have been lost in materialism; professed Christians began to separate into sects and societies, and that which for many centuries has been known as the Christian religion came into being. The Christianity of Jesus declared and demonstrated the allness of the one God, whom John refers to as "love;" but what is frequently known as the Christian religion recognizes an all-powerful God opposed by an all-powerful devil, or evil. It should therefore be immediately evident to most of your readers that there is a decided difference between

Digitized by Google

original Christianity and that which claims the name of the Christian religion. Whether one call himself an orthodox Protestant or an orthodox anything else, Christian Scientists have no quarrel with him. It is the privilege of the individual to believe what he will, and to practise that belief so long as he does not interfere with the rights of others. Our critic should bear in mind that in order for one to be an orthodox Christian, he must conform to the standard of Christian practice set up by him who founded Christianity. Nothing less will suffice.

"When will Jesus' professed followers learn to emulate him in *all* his ways and to imitate his mighty works?" Mrs. Eddy asks on page 37 of Science and Health. "May the Christians of today," she continues, "take up the more practical import of that career! It is possible,—yea, it is the duty and privilege of every child, man, and woman,—to follow in some degree the example of the Master by the demonstration of Truth and Life, of health and holiness." Christian Science may be scornfully referred to as a "sect," but this will in no wise impede its progress or prevent its ultimate triumph over all man-made theories; for the Christianity of Jesus and of Christian Science is one and the same.

✧

[Thomas F. Watson in *Grass Valley* (Cal.) *Morning Union*]

The *Union* contains an account of a sermon in which the rector deplores the lack of faith in the church. He says, "The power to heal the sick is in the church today, and has always been, but we priests and people deny it or fail to use it." After emphasizing the lesson on "faith as a grain of mustard seed," which Christ Jesus taught would move mountains, the gentleman inconsistently states that "Christianity teaches that God created medicine" and instructs us to resort to the physician, "for God hath created—appointed him." Christ Jesus did not so teach, nor have we any record of his using or recommending drugs. He healed the sick through the power of Spirit and taught his disciples to do likewise. The early Christians for nearly three hundred years were all healers, and they also healed through the law of Spirit.

This rector also tells us that "there are some cases where the physician being helpless the priest and the church could step in and heal, if only the priest and the congregation had the grain of faith necessary;" but he adds that this is not to be confounded with Christian Science. Now Christian Science has healed many thousands of so-called incurable cases, or, as our critic states, cases where the "physician is helpless," for Christian Science teaches and demonstrates the omnipotence and omnipresence of God, divine Love, and the consequent powerlessness of all evil, sickness and disease included. Any one who knows anything whatever concerning Christian Science knows that Christian Scientists turn to God for healing and find it, for they have proved the psalmist's words, "God is our refuge and strength, a very present help in trouble."

In one of the psalms of David we read that it is God who "forgiveth all thine iniquities; who healeth all thy diseases." In Chronicles it is recorded that Asa in his disease "sought not to the Lord, but to the physicians," and also that he "slept with his fathers." Mark tells us of "a certain woman" who "had suffered many things of many physicians, and had spent all that she had, and was nothing bettered, but rather grew worse," and who finally came to Christ Jesus and was healed. Not only did the Master command his immediate disciples to heal the sick, but he also said, "Teach all nations . . . to observe all things whatsoever I have commanded you."

Christian Science teaches that the law of God when understood is as available today as it was in Jesus' time. Mrs. Eddy, the Discoverer and Founder of Christian Science, states in the text-book, "Science and Health with Key to the Scriptures" (p. 495), "Truth casts out error now as surely as it did nineteen centuries ago." However, Christian Science is not a system of faith-healing, in the ordinary acceptation of that term, but rather is it the understanding of God's law, "the law of the Spirit of life in Christ Jesus," the law which Paul said would make us "free from the law of sin and death." In Science and Health (p. 297) we read, "Until belief becomes faith, and faith becomes spiritual understanding, human thought has little relation to the actual or divine."

An authorized Christian Science lecturer has said, "Christianity is more than a confession of faith; it rests upon a vital Principle which remains forever the same." Christian Science is not a religion of words only, but of works. The apostle James said, "Show me thy faith without thy works, and I will show thee my faith by my works."

✧

[Avery Coonley in *Paris* (Ill.) *Beacon*]

In his sermon as reported, an evangelist attacks Christian Science. It would have been a better example, both of the brotherly attitude, which seems to have been present in considerable measure, and of the spirit of the humble Nazarene, if attacks upon those who are honestly and earnestly undertaking to interpret Christianity and to make it a redeeming force in their lives had been conspicuous by their absence.

Christian Science places works above words, as did Jesus himself, for it is putting into practice Jesus' precepts and following his example, without excluding the healing of the sick. Most Christian denominations take the liberty of omitting the command to heal, but they should not on that account denounce those who accept it and put it into practice, for the exemplification of this precept constitutes the most striking part of the record of Jesus' ministry. Mrs. Eddy, whose spirituality and tireless study of the Scriptures enabled her to glean from the Bible an understanding which heals the sick, as did the Christian church before and for several centuries after the crucifixion, was not and could not have been anything but good, pure, and unselfish. As Jesus said, "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit."

[Written for the *Sentinel*]

"He careth for you"

ADELA V. SCRIMGEOUR

See how the lily grows, so pure and fair,
As if to do God's will, His love express;
With leaves spread out in mute, unconscious prayer,
Nor toils to weave so exquisite a dress.

All needs by God supplied,—it takes no thought
For air or sunshine or refreshing shower.
No care-filled day, no night with sorrow fraught,
Disturbs its calm, its trust from hour to hour.

O ye of little faith, with many woes,
Who haste along life's highway full of cares,
Pause and consider how the lily grows,
And stoop to note the garment that it wears.

Vast is the source of sunshine and of air,
Deep is the sea from whence the rain-clouds rise,
Yet is the love which all God's children share,
Vaster than deepest sea or boundless skies!

Editorial

No Other God

When Naaman, "captain of the host of the king of Syria," who had come with a letter from his royal master to the king of Israel to be healed of his leprosy, and was sent by him to the house of "Elisha the man of God," received the prophet's command, "Go and wash in Jordan seven times," evidently his dignity was offended, and his contempt for the prophet and his instructions was expressed in emphatic terms. This manifestation of anger, however, was only because he entirely misconceived the purpose of the prophet, and supposed that the purely physical operation of washing in this particular river was the extent of the treatment he was to receive. He did not know that when he came to the house of Elisha "with his horses and with his chariot," the prophet had speedily discovered the need for humility and faith to supplant pride and unbelief in the breast of this "great man," this "mighty man in valor," before he would be ready to receive the blessing for which he asked.

Naaman had expected some great thing to be done for him, something befitting one of his exalted rank and station, and when his pride and vanity were wounded by the simplicity of Elisha's directions to him, and by his failure to show him that deference which he had expected, he became enraged. He would readily have set himself to do some difficult task, but that a trouble so serious as his could be cured by dipping himself seven times in water certainly of no more healing efficacy than the rivers of his own country, was absurd beyond belief. He did not understand that obedience was the prime requisite. How similar to this is the mental attitude of some who come today to be healed through Christian Science! They either expect something to be done for them which is in line with their preconceived beliefs about disease and its cure, notwithstanding the past failures of everything of this kind to heal them; or else they expect, as a consequence of one in their position accepting treatment at the hands of an exponent of this strange religion, to be instantaneously healed by some mysterious process, some spectacular and ostentatious calling "on the name of the Lord."

As a matter of fact all who come to Christian Science have to learn as did Naaman that "God is no respecter of persons;" that what is done for any patient by the practitioner is simplicity itself, and yet it is the most profound operation in all the universe. Mrs. Eddy has called this operation by the name of demonstration, and of this demonstration she says (Rudimental Divine Science, p. 11) that it "by no means rests on the strength of human belief;" and also, "This demonstration is based on a true understanding of God and divine Science, which takes away every human belief, and, through the illumination of spiritual understanding, reveals the all-power and ever-presence of good, whence emanate health, harmony, and Life eternal."

Of those who practise this Science in the healing of persons other than themselves Mrs. Eddy says: "These people should not be expected, more than others, to give all their time to Christian Science work, receiving no wages in return, but left to be fed, clothed, and sheltered by charity. Neither can they serve two masters, giving only a portion of their time to God, and still be Christian Scientists. They must give Him all their services, and 'owe no man.' To do this, they must at present ask a suitable price for their services, and then *conscientiously earn their wages*, strictly practising Divine Science, and healing the sick" (Rudimental Divine Science, p. 13). The words printed in italics are an indication of the importance and seriousness attaching to this work; that it is not to be entered upon lightly, nor to be done perfunctorily, and that charges for it shall not be in excess of what a good conscience will approve.

These italics would also seem to indicate that success is expected to follow the work of the practitioner, and to the credit of these practitioners it can be said that this expectation is largely realized. The corresponding duty of those who are healed is that they shall recognize this healing work as the power of God made manifest, as did Naaman when he said, "Now I know that there is no God in all the earth, but in Israel." He knew and gladly acknowledged that none other than the God of Israel could have made his leprous body "like unto the flesh of a little child,"—could have made him "clean."

Archibald McLellan.

The Sabbath Understood

Christian people in general, as well as other religionists, are supposed to understand the reason for the institution of the Sabbath, even though they may hold widely differing views as to its observance. There can, however, be no question that the nations which have most strictly observed the Sabbath have produced the best type of manhood and womanhood as well as the most stable and progressive form of government. This is not of course due to the mere fact of physical rest on one day out of seven, but because those who have observed the Sabbath have seen that the Decalogue must be taken as a whole, and that one is not ready to grasp the deeper meaning of the stern prohibitions, "Thou shalt not kill," or, "Thou shalt not steal," unless he sees that obedience thereto is reached by obedience to the command: "Remember the sabbath day, to keep it holy."

Here it should be understood that the Decalogue is not so much prohibitive as protective. Strictly speaking, it is altogether protective. Even if one has no desire to violate the moral law he should gratefully remember that on the human plane he owes the security of his life and property to its enforcement by common consent. Furthermore, it cannot be denied that if all men were to keep holy the Sabbath day, were to devote it to the study of moral and spiritual law and to the unfoldment of man's spiritual and intellectual capacities, crime would be unknown. The Christian Scientist would go even farther and declare that sickness, sorrow, and poverty would be unknown, and this would also mean the overcoming of death itself. If the Sabbath is not intended to aid us in laying hold upon immortality, with all that this word includes, it means little for us; but if it means this, it is surely a vital thing for us to understand the Sabbath.

Too long have men believed that a vengeful God punished those who disobeyed His laws, but in Christian Science we learn that all suffering is the result of ignorance or sin. In the twenty-sixth chapter of Leviticus we are told that those who failed to keep the Sabbath would find themselves in exile among strangers, while their own land would "enjoy her sabbaths, as long as it lieth desolate;" in other words, the disobedient carnal mind would no longer be lording it over the earth which "is the Lord's, and the fulness thereof." We all need the rest of the Sabbath, and it is a rare attainment to know enough of truth to be able to dismiss the haunting cares of mortal experience, and to respond to this loving invitation given by the Master to his disciples, "Come ye yourselves apart into a desert place, and rest a while." This he said out of his deep compassion for human

Digitized by Google

need, and unless he had taught them many things which they did not know, they would have had no rest; nor can we, on any day, until we come to the ever-present Christ to find it.

It was Jesus who declared that "the sabbath was made for man," not for folly or sin; and Christian Scientists have the high privilege of showing other Christians how well they understand the Sabbath and love it, for in this way they will help others to love and study their Leader's teachings. On page 146 of Miscellany she says: "The Christian Scientist voices the harmonious and eternal, and nothing else. He lays his whole weight of thought, tongue, and pen in the divine scale of being—for health and holiness." This indeed furnishes a simple but far-reaching rule as to how we can best keep the Sabbath, and "keep" is an important word here when mortal mind would rob us of our Sabbath. It will not do to say that we have outgrown the old concept of it. If we really have, then we must have attained a higher, purer, and more spiritual concept, which would cover the whole week with its ennobling influence.

No great question is a merely personal one,—it includes grave responsibilities; and in respect to the Sabbath we must think of the children. Mrs. Eddy did not forget their needs when she provided that in all Christian Science Sunday schools the ten commandments should be taught them; therefore we must teach the children, both by precept and example, how to keep holy the Sabbath day.

ANNIE M. KNOTT.

Is Man's Work Ever Done?

WHENCE comes the suggestion to the faithful Christian Scientist that it is time to retire from active work? There may be several ways of defining the word work, but if it is once accepted as meaning activity, then man's work is never done. The old adage declares that "man's work is from sun to sun, but woman's work is never done;" if that be the case, the work of the Christian Scientist more nearly resembles woman's work. Particular tasks are, indeed, accomplished from time to time, but in reality man's activity can never stop, because true Life is eternal. In the infinitude of absolute living God's work is finished: He sees all that He has made and declares it to be very good,—yet this completeness does not imply inaction. The right ideas which constitute creation are ever active, because they reflect the ever-active divine Mind.

The suggestion that the faithful Christian Scientist has reached a halting place and must now look for stagnation or apathy, is derived from the prevalent practice of the world, which believes in an end to all things, as also in a beginning, and provides pensions and sinecures. The divine Mind is constantly unfolding to receptive human apprehension greater strength, further opportunities, more glorious beauties. Every dawn illumined by real Mind is fresher, every noon more vigorous, every night more peaceful. The suggestion that the joyous impulsion to work which is characteristic of Science can be paralyzed, must obviously come from the carnal mind, from impersonal evil, personified in Jesus' exhortations as devil or murderer.

On pages 2 and 3 of her Message of 1900 to The Mother Church, Mrs. Eddy, writing of "the right thinker and worker," states: "The song of Christian Science is, 'Work—work—work—watch and pray.'" Obviously the suggestion to stop work does not accord with this song. It stands to reason that if a "right thinker and worker" who has an honorable record in spiritual warfare listens to this suggestion, he will lower his shield and go to the rear. He has become immobilized.

Now, the so-called art of war consists not merely in destroying the enemy's forces, but also in neutralizing them by rendering them inactive. This particular process is known technically as immobilizing the enemy. In the arsenal of aggressive mental warfare used against the scientific Christian is also a poisonous gas bomb labeled "Your—work—is—done." Its intent should be foreseen and its use prevented, for it is not a right idea proceeding from God, but a wrong thought of so-called high potency evil.

Growth in Christian Science involves expansion of activities. Working for individual patients merges into working for all mankind, healing the specific sick develops into healing the multitude, learning to love our brother whom we have seen leads to loving those whom we have not seen, fidelity to duty in a particular branch church or society fits "the right thinker and worker" to engage in the universal activities of The Mother Church, victories over the more obvious forms of evil prepare the way for the destruction of secret sin. How can the "greater works" of Jesus' promise be fulfilled if the Christian Scientist, tried and tested, weighed and not found wanting, contents himself with the lesser works? How can the world problems be solved if the experienced worker remains parochial and permits himself to be laid upon the shelf as a thing outworn? On page 203 of Miscellany we read: "Goodness and philanthropy begin with work and never stop working. All that is worth reckoning is what we do, and the best of everything is not too good, but is economy and riches."

The willingness to listen to a suggestion labeled "Stop work" might possibly arise from the supposition on the part of a scientific Christian that his thought had become so spiritualized that no further association with other workers was necessary or desirable. Christian Science teaches us not only to work out our own salvation but also to work together with others, yes, even with God Himself, according to the Master's saying, "My Father worketh hitherto, and I work."

WILLIAM D. MCCRACKAN.

✧ ✧ ✧

Among the Churches

Current Notes

ANTIGO, WIS.—First Church of Christ, Scientist, has purchased a lot at the corner of Superior Street and Seventh Avenue, just opposite the Public Library. The deed covers the east 25 feet and 8 inches of lot 4 and all of lot 5 in block 64. The consideration was thirteen hundred dollars. Before it was organized as a church the Christian Science Society held regular services in rented halls for about eight years, first in what is now the M. Krom Hall, and for about five years past in the Odd Fellows Hall.—*The Journal.*

GLENWOOD SPRINGS, COL.—Work on the edifice of First Church of Christ, Scientist, which is being built on the corner of Tenth and Cooper Avenues, is nearing completion, and the building will probably be ready for occupancy the latter part of July. The lots were given to the church, and the building will cost in the neighborhood of two thousand dollars.—*Correspondence.*

GENEVA, ILL.—Last Saturday afternoon [May 20] the corner-stone of First Church of Christ, Scientist, and the first Christian Science church to be erected in Kane County, was put in place in the building now under construction on South Second Street.—*Geneva Republican.*

EUREKA, CAL.—The edifice of First Church of Christ, Scientist, at the corner of Eleventh and H Streets, is to be dedicated Sunday [June 18].—*The Humboldt Times.*

Digitized by Google

CAPE TOWN, SOUTH AFRICA.—Large numbers of people from different parts of the country attend the annual horticultural show at Rosebank. This year, for the first time in South Africa, a Christian Science reading-tent was provided by First Church of Christ, Scientist, of Cape Town, and it proved a center of interest. The exhibit lasted for four days and the tent was taken charge of by sixteen ladies of the literature distribution committee, who were in attendance, two at a time, mornings and afternoons. The number of inquirers and visitors at the tent was one hundred and sixteen, exclusive of Christian Scientists. There was also a table outside, from which free literature (including the pamphlets in the Dutch language) was distributed. The following were given away: 101 *Sentinels*, 13 *Journals*, 79 *Monitors*, 31 pamphlets: in all, 224 pieces. The *Cape Argus* wrote of the exhibit as follows: "An innovation was the erection on the ground of a large roomy tent by the Christian Scientists. This was free to all. It was decorated with plants, contained easy-chairs and writing tables, and a large collection of Christian Science literature."—*Correspondence.*

VALPARAISO, IND.—A handsome white stone church facing three streets, Institute, Calumet, and Franklin, will rise on the lot known as the P. L. Sisson site. At a meeting of the Christian Science church board and members a deal was closed for the purchase of this building lot, and it is now the property of First Church of Christ, Scientist. This lot, by reason of its central location, facing a beautiful little park and situated in an excellent part of the city, is conceded to be one of the best locations possible to obtain.

Admission to Membership in The Mother Church

The next admission of candidates will be Nov. 3, 1916. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Wednesday, Oct. 11, 1916.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1916, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Suite 550, 236 Huntington Avenue, Boston, Mass.

✧ ✧ ✧

The Lectures

Dallas, Texas

George Shaw Cook delivered a lecture on Christian Science at the Dallas Opera House. He was introduced by DeWitt McMurray, first reader, who said:—

All down the ages every thoughtful man has asked himself with greater or less frequency questions like these: Whence did I come? Why am I here? Whither shall I go? And like Job, he has propounded the age-old inquiry, "If a man die, shall he live again?" In his desire to know more of God and the truth of His being, man has endeavored to take the advice which Eliphaz gave to Job, "Acquaint now thyself with him, and be at peace;" and so he exclaims in his earnest longing, "Oh that I knew where I might find him! that I might come even to his seat!" But unless man seeks God aright, his efforts are fruitless, and so in his disappointment he asks with Zophar, "Canst thou by searching find out God?"

Unless God is sought for spiritually He cannot be found. If He is sought for in the material universe, the search is in vain. Jesus said, "God is a Spirit: and they that worship him must worship him in spirit and in truth;" and the apostle James exhorts, "Draw nigh to God, and he will draw nigh to you." Those who worship God in this way, and who seek Him thus, realize with Paul that it is "in him we live, and move, and have our being." It is they who are able to answer the all-important question asked of the Master by Pilate, the Roman governor of Judæa,—"What is truth?" It is they who have the understanding of the sweet assurance given by him who taught the truth to the poor and lowly on the hillsides of Judæa and along the Galilean shore; who spake as never man spake, whose voice was as soft as music, whose manner was as gentle as mercy, whose deeds were deeds of love, when he said to the Jews who believed, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free."

Christian Science answers all man's questions as to his existence here and hereafter in a logical and satisfactory manner, and it proves the verity of its teachings by comforting the sorrowing, regenerating the sinner, and healing the sick.—*The Dallas Times.*

✧

Middletown, Conn.

In introducing Prof. Hermann S. Hering, who lectured on Christian Science at the Middlesex Theater, Dr. William A. Wheatley, superintendent of schools, said:—

There never was a time in human history when we needed so much as now a realization of the spiritual essence of our lives and of their setting. Too long has the material conception of things held the race in bondage. The world is full of woe. Millions upon millions of men, women, and children are in distress,—yes, in despair,—and evil stalks everywhere, in all forms, from that of the most terrible of wars down to the minor ills we suffer.

Is there any remedy for all of earth's woes? Yes, and one only. It is the spiritualization of man's life, the consciousness of God's fatherhood to man and of man's brotherhood to his fellows. This remedy for evil is what Jesus came to bring and what he taught us to ask for in its fulness when we pray, "Our Father which art in heaven, Hallowed be thy name. Thy kingdom come. Thy will be done in earth, as it is in heaven." We know that our Father's kingdom is a spiritual kingdom, and that His will for earth as for heaven is a realization of our spiritual relationship to Him and to His universe, together with our service growing out of this realization. Such is the remedy for evil.

For nearly twenty years I have been meeting and associating with a considerable number of Christian Scientists, and have seen miraculous changes take place in all sorts of people because of their acceptance of this doctrine of Christianity and its application in their lives. Before perceiving the spiritual truths of life many of them were constantly ailing; they were self-centered, unhappy, pessimistic, and very poor company for themselves and their associates. But after accepting the spiritual teachings of Christianity their physical ailments vanished; they became happy, congenial, altruistic, and they radiated good cheer and helpfulness on every hand.

I can truthfully state that while I do not count myself a Christian Scientist, I know of no other religion or sect which has wrought such marked improvement, indeed such a spiritualization, in the lives of those who have embraced its teachings, as has Christian Science. Accordingly I am con-

Digitized by Google

vinced that all well-wishers of humanity, whatever their affiliations or their creed, should thank God with full hearts for Mrs. Eddy, and for the rapid spread everywhere of her spiritual teachings with their attendant blessings upon mankind.—*Correspondence.*

✧

Rockland, Mass.

The Rev. Melvin S. Nash in introducing Bicknell Young, who lectured on Christian Science, spoke in part as follows:—

My first acquaintance with the cause of Christian Science came when I was a member of the Senate of Massachusetts, at which time I met a great many representatives of The Mother Church. Because I defended a measure of the church I received many kind words of commendation from that body. If there is a thing for which your church has stood and which seems to me to be a great blessing, although there may be many others, it is that emphasis which you place upon the conscious presence of the living God.—*Correspondence.*

✧

Cornell University, Ithaca, N. Y.

A lecture on Christian Science was delivered by Bliss Knapp in Barnes Hall. There was a large and attentive audience. Dyer B. Lake of the department of chemistry, who introduced the lecturer, said in part:—

We are living in a day and age of high pressure, of much work. As a consequence, the complexity of living has increased enormously. Amid this confusion of thought, opinion, strife, the question arises, Is there a solution to it all? Christian Science answers in the affirmative. There are thousands of people today in America who can testify as to the efficacy of Christian Science in their lives. It makes its great appeal to them because it emphasizes the use of spiritual law in the working out of daily problems. If the individual is confronted with the thought of disease, fear, discouragement, hatred, he has at his disposal the knowledge of spiritual law to counteract the particular forms of evil.—*Correspondence.*

Lectures to be Delivered

CALIFORNIA—San Francisco (Sixth Church): Ezra W. Palmer, Dreamland Rink, 3 p.m., Oct. 1.
Santa Monica: Dr. Francis J. Fluno, Santa Monica Bay Woman's Club, 8 p.m., Oct. 6.
Stockton: Ezra W. Palmer, The Auditorium, 8 p.m., Oct. 2.

CANADA—Moose Jaw, Saskatchewan: Paul Stark Seeley, Allen Theater, 8:30 p.m., Oct. 1.

CONNECTICUT—Norwich: Virgil O. Strickler, Buckingham Memorial, 7:50 p.m., Oct. 6.
Winsted: Bicknell Young, Church Edifice, 75 High Street, Oct. 3.

ENGLAND—Hornsea, Yorkshire: John Sidney Braithwaite, Floral Hall, 8 p.m., Oct. 12.
Kingston-on-Thames, Surrey: John Sidney Braithwaite, The Assembly Rooms, Surbiton, 8:30 p.m., Oct. 17.
Wakefield: John Sidney Braithwaite, Institute of Literature and Science, Wood Street, 8 p.m., Oct. 13.

ILLINOIS—Centralia: John Randall Dunn, Pittenger Opera House, 2:30 p.m., Oct. 1.
Chicago (Fifteenth Church): Bliss Knapp, Garrick Theater, 64 West Randolph Street, noon, Oct. 4.
Rockford: George Shaw Cook, Palace Theater Building, 113 North Main Street, 3:15 p.m., Oct. 1.

INDIANA—Anderson: Clarence C. Eaton, Grand Opera House, 3 p.m., Oct. 1.
Danville: Charles I. Ohrenstein, Court House Auditorium, 8 p.m., Oct. 3.
Franklin: Charles I. Ohrenstein, High School Auditorium, 8 p.m., Oct. 5.
Kokomo: Charles I. Ohrenstein, High School Auditorium, 8 p.m., Oct. 2.
Michigan City: Clarence C. Eaton, Orpheum Theater, 8:15 p.m., Oct. 5.
New Albany: Charles I. Ohrenstein, Maennerchor Halle, 8 p.m., Oct. 6.
Terre Haute: George Shaw Cook, Church Edifice, Sixth and Cherry Streets, 8:15 p.m., Oct. 2.
Wabash: Charles I. Ohrenstein, Eagles Theater, Market and Miami Streets, 3 p.m., Oct. 1.

IOWA—Eldon: Bliss Knapp, Opera House, 8 p.m., Oct. 6.
Humboldt: Dr. Walton Hubbard, Church Edifice, 8 p.m., Oct. 3.
Ottumwa: Bliss Knapp, Grand Opera House, 8 p.m., Oct. 5.

MAINE—Norway: Prof. Hermann S. Hering, Grange Hall, 8 p.m., Oct. 2.
Sanford: Prof. Hermann S. Hering, Town Hall, 3 p.m., Oct. 1.

MASSACHUSETTS—Georgetown (auspices First Church, Haverhill): Bliss Knapp, Odd Fellows Hall, 7:45 p.m., Sept. 26.
Haverhill (Second Church): Virgil O. Strickler, High School Hall, 8 p.m., Oct. 2.
Middleboro: Bicknell Young, Town Hall, 3 p.m., Oct. 1.
New Bedford: Bicknell Young, Church Edifice, Mill and County Streets, 8 p.m., Oct. 2.
Pittsfield: William W. Porter, Colonial Theater, 3:30 p.m., Oct. 1.
Somerville: Virgil O. Strickler, High School Auditorium, Highland Avenue, 3 p.m., Oct. 1.
Springfield: William W. Porter, Municipal Auditorium, 8:15 p.m., Oct. 3.
Winchester: Virgil O. Strickler, Town Hall, 8 p.m., Oct. 1.

MICHIGAN—Alma: Clarence C. Eaton, Wright Opera House, 8 p.m., Oct. 3.
Niles: George Shaw Cook, Auditorium Public Library, 8 p.m., Oct. 3.
Plymouth: Willis F. Gross, Opera House, 8 p.m. (Central Standard Time), Oct. 6.

MISSOURI—Independence: John Randall Dunn, Armory Hall, Battery "C," South Osage Street, 8 p.m., Sept. 26.

NEW JERSEY—Maplewood: Virgil O. Strickler, Oct. 5.
Plainfield (Society): Bliss Knapp, Proctor's Theater, 3:15 p.m., Oct. 1.

NEW YORK—Canajoharie: John W. Doorly, Wagner Hall, 3:30 p.m., Oct. 1.
Glens Falls: John W. Doorly, City Hall, 8 p.m., Oct. 3.
Newark: Bicknell Young, Universalist Church, 8:15 p.m., Oct. 5.
New York (First Church): Edward A. Merritt, Church Edifice, Central Park West and Ninety-sixth Street, 8 p.m., Oct. 6.
New York (Fourth Church): Edward A. Merritt, Church Edifice, Fort Washington Avenue at 178th Street, 8 p.m., Oct. 2 and 3.
Richmond Hill, Long Island: Edward A. Merritt, Masonic Temple, Stoothoff Avenue, near Jamaica Avenue, 8:15 p.m., Oct. 5.
Utica: John W. Doorly, Church Edifice, Genesee Street and Avery Place, 8 p.m., Oct. 6.

OREGON—Medford: Paul Stark Seeley, Page Theater, 8 p.m., Oct. 6.

PENNSYLVANIA—Sharon: Bliss Knapp, Morgan Opera House, 8:15 p.m., Oct 2.
Wilkinsburg: Edward A. Merritt, Rowland Theater, Wood Street, 3 p.m., Oct. 1.

Testimonies of Healing

Seventeen years ago, when a very sick man and in a sorry plight in many ways, I became a student of Christian Science. Till then I knew nothing about this teaching, nothing of its healing influence, neither did I realize what a practitioner was. Although having a large acquaintance, I knew but one Christian Scientist and had never talked with any one on the subject; indeed, I would not allow any one to speak to me about it. It is apparent to me now that I was egotistic, bigoted, and strongly prejudiced.

At the time the study of Christian Science was taken up, I had practised medicine just twenty years and was very confident I understood the cause of disease and its cure. I was suffering from several diseases considered incurable from a medical point of view, and why should I presume they were curable by any other method of healing? It therefore did not occur to me that I needed healing or that I could be healed through Christian Science. Then one night about ten o'clock I began to study "Science and Health with Key to the Scriptures" by Mrs. Eddy. After reading the Preface I went to bed, slept soundly, and arose next morning healed of a disease of twenty years' standing. Following this I studied the text-book three or four hours each day, and the mental cleansing that took place in my being in the first week's study was a crisis in my life. It was a moral epoch dating the beginning of a transformed character.

Christian Science has been an education to me. It has taught me to think according to Principle, and has shown me that, as our Leader says, "one can never go up, until one has gone down in his own esteem" (Miscellaneous Writings, p. 356). I knew nothing of God until I learned of Him in Christian Science, and was uncertain whether I wished to know Him. The Bible meant nothing to me, and all religionists were dubbed fanatics, controlled by superstition. The world apparently needed reformation, but I was certain it could not be reformed. It was, however, quickly revealed to me through the study of Science and Health that the way to reform the world is to begin by reforming one's self.

Christian Science has been and is a boon in my life. The professional man who gives up his life-work at the pinnacle of success is looked upon with amazement, for the world cannot comprehend the manifold blessings that are bestowed upon him by the study and practice of this healing truth. It is possible in a testimony of this nature to tell only a few of the blessings that are manifest to Scientists through the study of this great truth. The psalmist said his blessings were more in number than the sands on the seashore.

It has been my privilege to see many cases healed in Christian Science, and much of this healing has been of diseases called incurable by physicians. Although the physical healing is beautiful, the spiritual awakening that comes through the earnest pursuit of Christian Science is sublime. Language is inadequate to express my gratitude and appreciation for this teaching and for all I have learned of its laws. I began the study of it to scoff; I am still studying it that I may apply its precepts in my daily life.

A. L. Hunt, Kansas City, Mo.

✧

I am a living monument of what divine Love through the study of Christian Science can do for suffering humanity, and feel that it is not only a duty but a great privilege to give this testimony, with a humble prayer that it may be a blessing and a spiritual uplift to others, as so many testimonies have been to me. From childhood I was considered delicate, and womanhood only seemed to add to my suffering. Many weary days were spent upon a bed of pain. After nearly every material remedy had been exhausted, osteopathic treatment was given a trial for a year, but without relief being experienced. Finally, although operations had always been feared, as a last resort I consented to have one performed, but consoled myself with the thought that should it result fatally, death would be preferable to the existence I was then dragging out.

At the time of the operation, which was considered by the attending physicians as very serious, little hope of my recovery was entertained. Everything was done for me that a kind physician and loved ones could do, but months passed by and still my suffering continued. The following year I was compelled to take some almost unbearable treatments, and my physician thought another operation would be necessary; but man's extremity again proved to be God's opportunity. My dear sister persuaded me to try Christian Science. As I was ignorant of what its teaching meant, having never investigated for myself, but merely accepted, as so many do, the criticism and opinion of others, I was somewhat skeptical, but consented to go to see a practitioner. That first call will never be forgotten, for I was assured that God loved me and had never sent this suffering on me. I went home light-hearted and happy, feeling as though I did not have a care or worry. Only a glimpse of this beautiful truth had been gained, and I realized only in a small way my relationship to God, yet even then it seemed to mean so much to me. The practitioner instructed me in regard to the reading of Christian Science literature and in a short time treatment was begun. It truly seemed that I had been released from the Egyptian bondage.

I wish to add that before being allowed to get out of bed after the operation, I was strapped in a support that was worn during the day and removed at night. I could not walk any distance, sweep, or lift, and never expected to be strong. After studying Science a while, I asked my practitioner if it would ever be possible to lay aside this support. She lovingly assured me that the time would come when it would be laid aside and I would know and realize that in God is my support and strength. Sure enough, one morning I left it off. During the day there seemed to be much fear to overcome, but by holding steadfastly to the truth I came out victorious, as is always the result. Today I am keeping house and do all my own work, also assist my mother with some of her household duties.

Words fail to express my gratitude to God for the benefits received through Christian Science. I am indeed thankful for our literature, which is such an uplift to me, and grateful to our Leader, Mrs. Eddy, who sacrificed so much, and patiently and lovingly endured so much criticism to give us this beautiful truth.—Mrs. A. J. Nealy, Shreveport, La.

✧

It is a duty as well as my greatest pleasure to tell of the blessings received from God through Christian Science. For nearly thirteen years I suffered from heart, stomach, and bowel troubles. Every medicine heard of was taken, and several different doctors treated me. An operation was finally performed, and after leaving the hospital I started West in the hope of regaining health; but it was the same old story,—at the least excitement I would faint away. Five doctors here told me the bowel trouble could not be overcome without an operation.

At last, in August, 1914, a severe case of bronchitis was added to the other difficulties. I became so weak that it was impossible to stand alone, and was so discouraged that I

Digitized by Google

prayed God to take me out of my misery. It was clear that something would have to be done right away. Then the thought of Christian Science came to me. I sent one of my little girls for a friend who is a Christian Scientist and she called a practitioner. The result was an instantaneous healing. When the practitioner left my home I got right up and started to sing my favorite hymns, watered the lawn, got a two weeks' washing ready, and the next day helped to do it. Two days later I went to town and did considerable shopping. Since then I have done all my own work and the sewing for four children. I am in the best of health, and the peace of mind is beautiful. We have prospered in every way since turning to Christian Science.

Our four children attend Sunday school regularly, and the little eleven year old girl has had several demonstrations. Even the three year old baby always says if he gets hurt, "God will heal it." I have had several demonstrations. My husband attends the meetings with me and is becoming interested in Christian Science. I find each day something for which to be grateful, and thank God for the enlightenment received from Christian Science. My understanding of the Scriptures is much clearer than before.

My heart is so full of love to God and gratitude to Christian Science that words fail to express my feelings. My earnest prayer is that all suffering humanity may be guided to God through Christian Science, as I was, and receive that peace "which passeth all understanding."

IDA B. MUNYON, Los Angeles, Cal.

✧

I wish to express my deep gratitude for all the happiness and contentment which has come into my life through the study of Christian Science,—gratitude to God for this truth, and to our beloved Leader, Mrs. Eddy, for her sacrifice in bringing it to this age. When it was first presented to me nine years ago, I was in good health and outwardly supplied with everything to make me happy; but in spite of this I was conscious of longing and waiting for something which would give real and lasting satisfaction, conscious of seeking for some explanation of the purpose and aim of life. Christian Science appealed to me at once, because it gave just these things for which I had been blindly groping in the dark. During these years no medicine of any kind has been taken, but all ailments that have appeared have been healed through the power of Truth.

Christian Science has brought me wonderful moral healing. All desire for tobacco disappeared about seven and a half years ago, although smoking had been one of my chief pleasures for many years. There has been no return of the desire and no sense of loss from giving up the habit.

It is, however, for the entirely changed outlook upon life and people, for the ever-growing sense of the omnipresent, inexhaustible Love which satisfies, for the unfoldment of the ever-present Christ, who alone and always heals the sick and saves the sinner, that I am most deeply grateful.

HAROLD PRIESTMAN, Manchester, England.

✧

I wish to express my gratitude, in part, for some of the blessings received through the study and application of Christian Science. We have had many demonstrations of physical healing in our home, and each day are coming more and more into our birthright of peace and contentment.

Before we became earnest students of the truth we often thought that if we had fewer burdens and more comforts and pleasures, our happiness would be complete; but experience soon taught us that it is spiritual food which is satisfying and sustaining, and though we are always hungry for more, what we gain is never lost. We strive each day to express our gratitude in right living, and earnestly endeavor to follow Jesus the Wayshower, loving God in the full sense of the word, and loving our neighbor as ourselves. The Master's counsel, "Seek ye first the kingdom of God," has been the key-note to health, happiness, and harmony.

MABEL HARVEY, Chicago, Ill.

✧

The healing of my boy ten years ago led me to investigate Christian Science. At that time he was four years old and had been under the physician's care for a long time, owing to a severe spinal trouble. We were all much alarmed to see him growing weaker every day, so that he had to be carried about, and in our extremity asked for help in Christian Science. After two or three weeks' treatment he was entirely healed. This seemed to me such a wonderful healing that I at once turned to God as my only physician, and from that minute have never had any other help. During these years a number of children's diseases have been overcome, some instantaneously. With the help of a practitioner an eruption of the skin in an aggravated form disappeared in a few days.

My heart goes out in gratitude to God for a healing which occurred about two years ago, that of a severe case of erysipelas. My head and face were terribly swollen, and a high fever was attended with excruciating pain. A practitioner was called, who patiently worked for me, I myself only holding on to the truth of being. There was little relief for the first few days, but suddenly a natural perspiration started, the pain stopped, the swelling went down, and in not more than a week I was up and around, rejoicing and praising God. Some relatives who had seen me in that condition and seemed very anxious about me, marveled that I was well and able to be about so soon.

Another beautiful healing was that of catarrh of the nose and throat. This condition was very slow in yielding. It seemed as if I was to do the work myself, but discouragement would sneak in very often, so that a practitioner again had to be consulted. Generally the ailment was worse at night, so that there was little sleep for me. At last, after several months, it vanished into its nothingness, never to return. It meant much for me to let go of self, and I am most grateful for the awakening of the truth, although it seemed a long journey to travel from sense to Soul.

I often wonder whether we are thankful enough for all the benefits received through Christian Science; whether we are grateful enough to Mrs. Eddy for giving us this living truth, as well as to those who work for this good cause, and thankful enough to our Father-Mother God as an ever-present help if we only put our whole trust in Him. Every day I strive and pray for more knowledge of this beautiful truth.

MRS. PHILIP KELLER, East Orange, N. J.

✧

For almost thirty years I suffered from a trouble which was variously diagnosed by medical men as lumbago, sciatica, kidney disease, and so on. Their treatment failed to give any relief, and as the years passed my condition grew worse, until I was quite lame, could not stand erect, and suffered almost continual pain. Finally an osteopathic physician diagnosed the trouble as a partial dislocation of the hip-joint. He gave me great relief both from the pain and from the lameness, but the healing was not permanent. During the next few years the trouble would frequently recur, and as frequently yield temporarily to this form of treatment.

About nine years ago the study of Christian Science was

Digitized by Google

taken up, and while I was soon healed of very troublesome forms of stomach and bowel disorder of long standing, and was enabled to give up the use of medicines entirely, the hip trouble continued to annoy me at intervals. In the fall of 1912 I disposed of my office business in town and moved to a farm. I soon learned, however, that it is impossible to run away from inharmony, for after a year on the farm it seemed that fear, anxiety, and worry over business affairs, as well as the unaccustomed strenuous labor, combined to bring on a complete physical breakdown, the seat of which was in the affected hip. The condition was much more serious than ever before, and the pain became well-nigh unbearable.

For several years we had been depending on Christian Science for physical healing, so my wife wired to a practitioner in Portland, Ore., for help. Absent treatment was given for a week or more without any apparent result. During this time I found myself often thinking of osteopathy, and finally decided to give it another trial. I went to Portland and dismissed the Christian Science practitioner, then placed myself under the care of one of the leading osteopaths of the city. He soon corrected the dislocation, but no relief from the pain was afforded. After several days' treatment he advised me to go home and remain four days, then if not better to return for further treatment. He said, however, that if I was not better by that time he would be forced to conclude that a condition existed much more serious and difficult to correct than the old trouble. I came home and waited the designated time, but steadily grew worse.

Finally there came the realization that I had had enough of material remedies and was ready for Christian Science. Faith in human skill and material means being dissipated, I placed myself again under treatment of the Christian Science practitioner, and in a day or two enjoyed such a measure of relief that I was able to sleep soundly, something I had not done for several weeks. After a week's treatment I returned home. The knee and leg had developed a condition which appeared to be a form of partial paralysis, and it was several weeks before the feeling was fully restored and that phase of the trouble was entirely eliminated; otherwise my healing was speedily accomplished, and it has been absolute and complete. My physical condition is better now than it was for many years before this experience.

My wife has been restored to perfect health after a number of leading physicians had declared such a thing impossible without a serious operation. In our home the diseases, accidents, and the like, incident to childhood, are effectually handled in Science, and while we have other problems to solve, other demonstrations of harmony to make, we are truly grateful for what Christian Science has already done for us. I have no doubt that problems now being considered in Science, as well as any which may arise in the future, will likewise be conquered through the wonderful power of Truth and Love as discovered and given to this age by Mrs. Eddy.

S. A. Pattison, Castle Rock, Wash.

[Translated from the German]

It is with a grateful heart that I wish to testify to the quick healing which I experienced through Christian Science two years ago. I was stricken with a malignant growth, which caused me to feel greatly disturbed. I consulted several physicians, and also went to the surgical clinic in Basel; but the condition instead of improving became aggravated. While in a state of great anxiety I heard of Christian Science through a friend, and what I heard inspired me immediately with confidence. Knowing that medical skill was inadequate in this instance, I asked a Christian Science practitioner in Basel for treatment, the result being that four weeks later I was healed through the power of divine Love.

For this wonderful benefit which God has bestowed upon me I am most deeply grateful, and I lovingly remember our faithful Leader, Mrs. Eddy, who again showed us the way which leadeth unto Truth.

Anna Maria Schaflin, Blansingen (Baden), Germany.

Christian Science came to me at a time when the future seemed barren and gloomy indeed; now this teaching means more to me than I can ever express in words. Only a life lived in accordance with the Sermon on the Mount can show forth in a small measure what I feel toward a God who is good; toward Christ Jesus, who showed us the way; and toward Mrs. Eddy, who was obedient enough, pure enough, and steadfast enough to bring to us here and now the truth of man's relationship to divine Love.

During the twelve years of my illness I had undergone three serious operations, and had suffered severe attacks of nervous breakdown with all the ills that seem to follow in the wake of such conditions. At times I was fairly well and able to work, but was never entirely free from pain. For two years before Christian Science found me I was an invalid, and my husband had brought me West in the hope that the pleasant climate of California might mean health for me. Although my condition improved to some extent and I gained in weight and was able to be up and around the house a good deal of the time, there was constant suffering, and it was impossible to sleep without an opiate. I could not go anywhere alone, being unable to get up and down the car steps, and after walking a couple of blocks would have to sit down and rest.

A kindly neighbor, a Christian Science practitioner, brought the truth to me, and to my husband as well, in October, 1913. Within three months I was going anywhere that I wished alone, doing all my own work, sleeping all night long without an opiate, and eating anything placed before me, though chronic catarrh of the stomach, necessitating a rigid diet, had been one of my most annoying complaints. Bowel disorder of five years' standing was overcome in one treatment, and rectal hemorrhages disappeared in a short time. Bronchitis of a severe nature has been entirely overcome, likewise extreme nervousness, which was the source of constant suffering. Through daily study of the Lesson-Sermon bladder trouble of long standing, which had been the cause of intense pain and had rendered it impossible for me to be on my feet, disappeared never to return.

I am very thankful for these healings, but more than all for the every-day practicability of Christian Science and for the spiritual uplift which comes more and more into my life with continued study and effort to live its teachings. Unceasing love and care from relatives, friends, physicians, and nurses had been mine through all the years of illness, and for all this my gratitude is constant; but every effort failed to give more than temporary relief until the great truth of Christian Science brought permanent health. I would like to add just a word of gratitude for our wonderful periodicals and for the Wednesday evening testimony meetings, which bring me so much peace and joy.

Mabel Cone Bushnell, Pasadena, Cal.

The proof of God's allness was clearly demonstrated to me through the following healing. One morning when I awoke, the entire right side of my face was completely paralyzed. I had been studying Christian Science only about six

Digitized by Google

months, but knew enough of it to place my trust in God rather than in any material aid. Finding that my declarations of the truth did not seem to clear up the difficulty by the second day, a Christian Science practitioner was called. The embarrassment occasioned by the condition was almost immediately overcome, so that I returned to work, and from that time on the paralysis greatly diminished. Each day the face assumed a more normal appearance and action, and in less than two weeks from the time the condition was first manifested it was entirely overcome. The most wonderful part of this healing, to me at least, was the destruction of all sense of fear through the knowledge that God is good, and that He "is infinite, all-power" (Science and Health, p. 17). The experience meant even more to me than it might to some others, as my father is a physician and surgeon, and under the medical thought a case of paralysis such as this would have given rise to great fear for the future.

Every day I thank God for the knowledge that has come to me through Christian Science, and for the faithfulness of Mrs. Eddy in her discovery and her determination to give this Science to the world through Science and Health and her other writings. Her steadfast adherence to Truth, and her desire to teach others what she had discovered about the Christ-healing on earth today, means everything to the student of Christian Science. Since my wife and I have been studying Science we have experienced many wonderful but, as we now realize, perfectly natural healings, and for these we are exceedingly thankful.—A. C. BUSHNELL.

✧ ✧ ✧

[Written for the *Sentinel*]

Green Pastures

ETHEL M. GOSS

O CLEAR blue lake and bluer sky,
Gray rocks along the shore,
Amid the roar of the city streets
You call me evermore!

Call me where tall gray elm trees
Frame soft your picture there;
Where bobolinks sway on the grasses
With never a thought of care.

A flash of gold in the apple tree,
A flutter of wings by the wall,
And I hear the oriole's song ring out
With its old triumphant call.

The roadway winds by the meadow,
Where mulleins like sentinels stand,
And waving rows of buttercups
A green and golden band.

I hear the wind in the marshes
Rippling the sedges brown;
The gleam of the iris haunts me
In the dingy walls of the town.

They call me, but here I am needed
To heal the sorrow and wrong;
So keep in my heart, dear Father,
The joy of the oriole's song.

Cleanse Thou my thoughts and keep me
Free from the hurry and care,
Serene with the peace of Thy pastures
And ready Thy message to bear.

From Our Exchanges

[*Zion's Herald*]

How often in the Old Testament occurs the phrase, "The word of the Lord came to," and here follows the name of the man addressed, and the messenger is instructed. In a superior sense the divine word came to "inspired" men of old,—kings, prophets, and psalmists,—but in a true sense it also comes today to any one with a mind to hear the voices of heaven and with a will to work the things that are right, honest, and "of good report." Some of the messages that came to Jonah, Micah, Daniel, or others like them, were temporary and local in significance, but in large measure they contained truths and teachings that live from generation to generation in the quickened consciences of men. It is the voice from heaven perpetually speaking to humanity that supplies strength for this life and hope for the life to come. Where there is no vision, where the word faileth, the people perish.

[*The Universalist Leader*]

If men misunderstand and misjudge religion, if their hopes and ambitions do not include all that is worthy of them, if they are cheating themselves with artificialities and superficialities, the answer and the light and the power must be a revival of real religion, a new emphasis on those great and fundamental facts of God, and human relationships and loyalty to the spirit of the Master, which have never yet been tried and found wanting.

The signs of the times all point to the coming in the very near future of just such a revival. There is a new spirit in the ministry today. The time-server and the coward, the man in search of a large salary and an easy place, the man who talks only in pious platitudes, the man of small aims and petty, weak ideals, may still be found here and there, but the note that is increasingly struck today in every gathering of ministers that I know anything about is a note of courage and of faith, a note of heroism and vision and passion for service.

[*The Christian Work*]

The great aim of life, according to Jesus, as far as personal religion is concerned, is to achieve oneness with the Father, and to attain as nearly as possible the Father's character. His exhortation is, "Be ye therefore perfect, even as your Father which is in heaven is perfect." His aspirations for his followers are that they may be one with the Father as he is one. We are to be merciful as God is merciful. We are to forgive because God forgives. The peacemakers are children of God. He, the incarnation of God, demands service of his followers because it makes them, like him, godlike. Jesus nowhere makes this achievement of oneness, this attainment of perfection, easy; but it is the chief end of life so far as the soul in its relation to God is concerned. And all help is offered,—prayer, himself, the Holy Spirit. This teaching of Jesus cannot be too much emphasized, for it is the one thing that differentiates his religion from all the others.

[*The Christian Commonwealth*]

The worst evil is not the external differences which divide the churches, but the lack of love and self-sacrifice which separates Christians, even when they are members of the same society and of the same congregation. It is no paradox to say that so soon as any denomination has learned the central Christian lesson of charity and mutual service, it will be fit and anxious for closer union with other churches. It is, no doubt, useful to discuss and to settle external grounds of difference. But we must frankly say that we rate one act of

Digitized by Google

sympathetic cooperation higher than a dozen good arguments; that a reunion of the churches by conference would probably be based on a compromise, would evoke little enthusiasm, and might merely magnify the more unsatisfactory features of denominational Christianity. This may well be the quickest, as it is the most evangelical, road to unity—to learn and practise first that love toward our brother Christians whom we see every day, without which we cannot love the one society of all Christians—the one society which we have not seen, and the sight of which would be the sight of God.

[*The Congregationalist and Christian World*]

Why does not the church heal the sick now as it did in its beginning? This question is persistently pressed. Jesus attracted attention chiefly because of his exercise of healing powers. He commissioned and directed his disciples to heal the sick in every city they entered. He did not restrict these healing powers to his disciples, nor to his own time. Healing the sick was one chief means for spreading Christianity in its early years.

What, then, is the therapeutic value of fellowship with Christ through sharing in the "Spirit of life" in him? The church has never repudiated its early claim to have this value; but it has often ignored it. This power to cure the sick is coming to be more highly esteemed by many medical men than it is by the church itself. Dr. Richard Cabot of Boston is quoted as saying that two fifths of the sicknesses of the present generation are caused by morbid mental and spiritual conditions which need treatment by a Christian minister.

[*The Christian*]

Christ was always going farther than men thought he would—or should; and always farther than any who had come before him. In his teaching, for instance, he went away beyond all standards hitherto erected even by divine sanction. He discovered murder in an angry thought, and lust in a wayward look! He not only enjoined upon those who would be his disciples the common ethic of forbearance, but bade them positively to love their enemies, to bless them that cursed them, and to pray for their persecutors! And he not only bade them love one another, but set up an altogether new test and measure of friendship—that life itself should be laid down in the sacred cause!

[Rev. H. E. Fox, M.A., in *The Record*]

There is much vague talk about modern thought, with its broader outlook, its larger visions, and its higher spiritual planes. But breadth and height and depth count for nothing in eternal things unless they are measured by the standards of him who is the power of God and the wisdom of God. All thoughts of God or the things of God that lie outside the revelation of Himself in Christ are as weak as they are foolish; they are utterly unable to give rest to the soul, instruction to the conscience, or strength and direction to the life. All our powers are wasted and all our wisdom is worthless which is not rigidly brought into line with the Christ to whom has been given the Lordship of the universe.

[William Pierson Merrill in *The Continent*]

What the world needs most is not more church-members, more professing Christians, but more who palpably live as Jesus lived, who openly reveal to the world a faith and a motive such as his, issuing in conduct and service such as his; men and women who quietly but very plainly show that they are ruled not by worldly standards and conventional ideas, but by the voice of God that speaks to their souls, coming to them through the gospel of the first-born Son.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

✧

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

✧

From the Publishing Society

A copy of the Index to Volume XVIII of the *Christian Science Sentinel* will be sent free of charge to any subscriber upon request.

"Christian Science: Man's Dominion Over Evil," a lecture by Edward A. Kimball, C.S.D., has been translated into Russian, Norwegian, modern Greek, and Italian. Pamphlets in these four languages have been published with the English version opposite the translation and are now on sale at prices of our regular pamphlets as shown on the opposite page.

A new French pamphlet, "Foi et Générosité" (Faith and Generosity), has just been issued and is now on sale. This pamphlet contains the following articles: "The Lord Thy Confidence," "The Closed Hand," and "Continuity of Right Thought."

"Christian Science: A Religion of Love" (Christian Science: En Kjærlighetens Religion), a lecture by Virgil O. Strickler, has been translated into Norwegian and is now published in pamphlet form with English and Norwegian versions on opposite pages.

✧

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

✧

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1863, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Items of Interest

The *Daily Trade Record* says: "Competitors of the Japanese in foreign markets, who had hoped that the new factory law, which will become effective in Japan on Sept. 1, would more nearly equalize working conditions, will be disappointed to discover that practically no reforms will be instituted and that the old fourteen hour day will continue in vogue with scarcely any restrictions. It was expected that the hours for women and children would be shortened, but this has not been done. The majority of the women and children are employed in factories for yarns, fabrics, and knitted fabrics. In fact, 60 per cent of the labor in these industries is made up of women and children.

"The Japanese Government has seen fit to establish a ten year period during which the hands may be worked thirteen to fourteen hours a day. There are more than three thousand children under twelve years working in Japanese factories. Between the ages of twelve and fourteen there are more than forty thousand children employees, 81,000 of whom are girls, and all of them work thirteen to fourteen hours a day and may be compelled to continue doing so under the new factory law. Between the ages of fourteen and sixteen there are considerably more than one hundred thousand boys and girls working in Japanese factories, and of these 91,000 are girls."

Discoveries concerning the nature of sun-spots, proof of the old nebular theory of spiral motion, and the determination of the distance from the earth of more than two hundred additional stars, were said to be the most important events of the last year by members of the American Astronomical Society at the closing session of the nineteenth annual convention at Philadelphia, Pa. The work of American astronomers has become a matter of considerable detail. Certain definite programs have been laid out, and each observatory in the country has been assigned to a specific phase of the work. While this coordination has virtually ended discoveries of a sensational nature, in the opinion of the sixty-five delegates it has in the last three years resulted in great strides forward for the science. And in addition it has laid the foundations for proving or disproving practically every theory of astronomy.

At a luncheon at Providence, R. I., attended by the full membership of the state board of public roads, it was unanimously agreed to take immediate action leading to the removal of all advertising signs from the public roads, posts, telegraph poles, and abutting buildings. This action was decided upon after a lengthy discussion of "Better Highways," in which every member of the state board participated, all concurring in the approval of a plan to eliminate the signs.

The secretary of the National Highways Protective Society told the board that there are many reasons to offset the two or three good arguments for the existence of these advertising signs, and the board agreed with their host. It was decided during a discussion of ways and means that the existing laws of Rhode Island were adequate and would be enforced with all the vigor the board could put behind them. To remove the signs already existing it was decided unanimously to take up the matter with other New England states and determine upon a "clean-up" day.

More than three thousand feet above the center of the island state of Tasmania, the waters of the Great Lake are now harnessed in one of the greatest water-power schemes yet planned in Australia. This government hydro-electric plant was opened recently and will eventually develop about one hundred thousand horse-power. Contracts completed or in negotiation for the use of this power already amount to more than one hundred thousand horse-power.

Lake St. Clair, about half the size of the Great Lake, having an elevation of 2000 feet and lying about thirty miles to the west, may be tapped for further power. The Tasmanian Government has paid about four hundred and sixty thousand pounds for the hydro-electric scheme as it now stands.

Under the new ouster law which recently went into effect in Virginia, public officials of trust may be removed for failure to enforce any statute. Police officials are therefore trying to enforce some almost forgotten statutes. One of these forbids work at any trade or calling on the Sabbath and makes it unlawful to perform any labor not absolutely necessary on that day. As a result hundreds of surprising arrests are being made. Among the most striking arraignments are those of a church organist, a florist who delivered flowers for the decoration of a fashionable church, a man who washed his automobile, another who supplied a motorist with gasoline, and the manager of a Turkish bath.

The completion of a set of standards for admission to the bar was a noteworthy accomplishment of the recent meeting of the American Bar Association held in Chicago, Ill. It marks the end of ten years' labors of the association's section of legal education. Adoption of the rules remains for next year's meeting. When the American Bar Association gives its approval to this set of standards, they will be put out publicly and the association will ask the various state authorities all over the country for their adoption. A marked advance in legal education and practice is expected to follow.

Ensign Fitzhugh Green, U. S. N., who accompanied Donald B. MacMillan on the expedition which left New York in 1913 in search of "Crocker Land," reached New York on his return Sept. 5. He confirmed previous reports that "Crocker Land," which Rear Admiral Peary reported to have seen, does not exist. MacMillan and Green determined from observations and careful soundings that what Peary had seen was a mirage. This belief was further confirmed, Ensign Green said, by the fact that they themselves saw mirages.

An important conference, representative of about two hundred and fifty firms belonging to the engineering and ship-building industries of Scotland, was recently held in the City Chambers, Glasgow, when it was decided to form a strong central organization of these industries with a view to coping with the problems of trade after the war.

Delegates from thirty-three states, Canada, and Alaska enrolled at the evening session of the tenth annual national conference on taxation at Indianapolis, Ind. The conference is held under the auspices of the National Tax Association. More territory than ever before represented sent delegates this year.

For the first six months of the present year the value of goods shipped from the port of Hongkong to the United States was $5,363,000. The items of merchandise which have caused this large increase in Hongkong's trade with the United States are rice, tin, cassia vera, antimony, and shelled peanuts.

Spain stands second only to Italy in the production of cocoons in Europe, producing on an average 750 metric tons, of which some five hundred metric tons are raised in the province of Murcia, where climatic conditions favor the growth of the mulberry tree.

The Canadian Pacific steamer "Empress of Russia" on the last trip brought a cargo of silk consisting of 4700 bales, valued at $750 each. The total cargo amounted to about three million five hundred thousand dollars.

Grain-handling facilities in Buffalo, N. Y., are to be increased by the construction of a new 2,500,000 bushel elevator, with three legs for vessel unloading and fast shipping legs for railroad cars and canal boats.

More than four million dollars worth of silk, the largest shipment from Japan this year, left Seattle, Wash., recently in sixteen special cars over the Chicago, Milwaukee & St. Paul Railway for New York City.

A big merger of the principal Pacific coast fruit and salmon canning interests is anticipated. According to common report the merger will involve in excess of twenty-five million dollars.

The Colombian Congress has authorized the Government to contract one or more loans for a total sum not to exceed $100,000, to be used in the extension of the Tolima Railway to Ibague.

Running the forty-eight states in the United States cost $495,000,000 in the fiscal year ended June 30, 1916. The total disbursements of the Federal Government for the same period were $1,065,000,000.

The Swedish foreign office states that a Russo-Swedish convention for connecting the railway systems of both countries by a bridge across the river Tornea has been ratified.

The Cuban Government has set aside $175,000 for the purchase of a lot and the erection and furnishing of a Cuban Legation at Washington, D. C.

The nitrate of soda manufactured in Chile during the month of June, 1916, amounted to 5,153,701 Spanish quintals of 101.4 pounds.

Exports of cocoa from the Portuguese Islands of Sao Thome and Principe amounted to 61,825,881 pounds in 1915.

Proper Use of Time

CLARENCE W. CHADWICK

IT is a very easy matter to say that we have all the time there is in which to accomplish certain tasks, but the question which naturally arises is whether we are spending it profitably or unprofitably. Whatever spiritual talents we may possess, it is the use we make of them which identifies us as either drones or workers in the Father's vineyard. The mere hoarding of material riches may often make us paupers instead of princes in the sight of God.

The individual who does not know that God is unceasingly demanding something of him, does not know how to spend his time. About as far as the average man goes, is to concede that God wants him to be as good as he possibly can be in this present world; but the admonition of the Master for him to be perfect even as the Father is perfect, does not make any practical appeal to him. Failing as he does to grasp the metaphysical meaning of this Scriptural command, he likewise fails to comprehend the importance of giving more time to spiritual things. In such a mental state he will constantly be waiting for the more "convenient season," which never comes. With an infinite being there can be no such thing as time. God therefore does not reason from any standpoint of finiteness or human limitation. Everything pertaining to the kingdom of heaven is embraced in the infinite consciousness of an ever-present now. Whatever is perfect, therefore, always has been and always will be perfect. The moment individual human consciousness admits this spiritually metaphysical fact, that moment it begins to understand man's relationship to God. Then and then only does one realize the imperative need of making proper use of one's time.

Time is a synonym for mortal thinking in all its moods. In the infinite activity of the one Mind there is no thought of time. When all mortal thinking ceases, and the earth is "filled with the knowledge of the glory of the Lord, as the waters cover the sea," time will be no more. It is needless to say that Christian Science has brought this understanding of the Science of being to the world, so that no one who has proved the truth that "all is Mind and Mind's idea" (Science and Health, p. 492), can any longer plead ignorance of the demands of God upon him as an individual. The earnest student of Christian Science knows, beyond all question of a doubt, that God demands of him every hour of every day in which to practise the Science of being. To him the command to be perfect is no theoretical abstraction, but a practical and demonstrable reality; it is the straight and narrow way leading heavenward. Were it impossible for him here and now to reduce to practice the divine Principle of spiritual perfection, he would be as one "having no hope, and without God in the world." He would cease to be a Christian Scientist the moment he failed to apply the Principle of perfection to his own daily thinking and living.

It is frequently said of the Christian Scientist that he works from the standpoint of Principle. To work from any other would be only a waste of time. "In all thy ways acknowledge him, and he shall direct thy paths," is the dictum of Scripture on this point. This the Scientist is striving to do by admitting the all-power, all-presence, and reality of divine Mind, Spirit, or God, and rejecting the sense-supposition of a man and a universe of imperfection. If he loves God supremely he will not be found wasting his time in paying allegiance to false gods. He will lay all stress upon the importance of mental work, of watchfulness and prayer. One has but to recall how completely the Master's time was occupied in loving service to his fellow men, to quicken his own thought to the need of greater mental activity and consecration.

Jesus was the perfect example for all men, one who improved every moment of his time by thinking only such thoughts as were pleasing to the Father. He knew what it meant to dwell "in the secret place of the most High," which means conscious communion with good, with reality or eternity. If we would follow in his footsteps, we too must learn to improve our moments, before they lengthen into hours, weeks, or months. When good is uppermost with us and we are shutting out that which is fleeting and false, time passes rapidly. When evil is magnified in thought, time drags heavily. And Christian Science shows us why this is so. Time is a temporal thought and is therefore no part of enduring reality. It is no more related to eternity than is mortality to immortality. All sense of time therefore can and will be eventually overcome.

This is the great problem confronting every human being, the overcoming of all sense-limitations, of all that constitutes the belief or consciousness of an existence which begins and ends. Sooner or later must humanity awaken to the fact that time is but a temporal dream and that eternity is the enduring and the real. The real man is already related to eternity. It but remains for humanity to awaken from the mesmeric dream of a temporal existence, to comprehend the spiritual and eternal fact of being, that man is the conscious image and likeness of God; in other words, the ever-present activity of right ideas. If there is a human being who could wish for man anything more exalted than to be the conscious, active reflection or manifestation of infinite intelligence, he is certainly hard to please. The student of Christian Science can say from the heart with the psalmist, "I shall be satisfied, when I awake, with thy likeness."

There is with humanity a mistaken belief that time will sooner or later solve every human problem. Time never accomplished anything, unless mortal thoughts, theories, beliefs, and opinions are capable of benefiting the human race. Waiting on time to work out any human problem leaves the trammels and limitations of sense-testimony undisturbed, while waiting on divine Love is a conscious recognition of the eternal facts of being which annuls material law and brings out the practical demonstration of Truth in the healing of sickness and sin. It is thinking above the mortal or human, above the belief in time and space, which reaches the altitude of answered prayer. Mortal thinking asks amiss, without any scientific grasp of the Science of being. Its request remains unanswered because it is based upon the suppositional reality of time rather than upon any basic under-

Copyright, 1916, by The Christian Science Publishing Society

Digitized by Google

standing of eternity. The belief that eternal life begins for a mortal only as a post-mortem legacy, will never usher any one into the kingdom of reality. Eternity always has been and always will be, and the workers in the Father's vineyard must see the necessity of analyzing the thought of time and proving its unreality as being only a material dream separate and apart from eternity. Drifting with the currents of human thought, vainly imagining that all will be well in a so-called future existence, is far removed from spiritual understanding or right mental activity. It leaves us in the clutches of time, bound with the shackles of mistaken beliefs from which a right understanding of eternity can alone make us free.

He only is making proper use of his time who is praying without ceasing, who is guarding and purifying his mentality, until human consciousness shall be purged of every unrighteous or unholy thought, of every intimation that time is any part of that which is real and eternal. Well may we ponder the words of our Leader on page 238 of Science and Health: "People with mental work before them have no time for gossip about false law or testimony."

Life Understood

GENEVIEVE THOMAS PIERSON

FROM the standpoint of general usage the word life implies action; it also implies a fleeting, temporal sense of existence. When considered metaphysically, we realize that because God is everlasting, "the same yesterday, and today, and forever," He is Life, a fact which is stated in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. When asked what life is, the Christian Scientist has at once the thought of the great presence, God, which includes all perfect existence. The freer his consciousness is of the ups and downs of mortal experience, and the less he thinks of himself as he appears to be, the more able is he to contemplate Life as God.

Mrs. Eddy says in Science and Health (p. 427), "There is no death, no inaction, diseased action, overaction, nor reaction." But to mortal sense there seems to be an intruding lying activity which the Bible calls the "adversary," "evil," "Satan," "devil," "lie," and "liar." This evil activity claims to counterfeit all true action, so that continuous normal being seems to be an almost unknown quantity. Innate consciousness longs for a steadfast manifestation of harmony, while error produces dissatisfaction and unrest in the mentality of nearly every person, creating a desire to change his occupation or environment, no matter what it is.

The belief of evil sometimes shadows human thought as overwork and injustice,—dreary, irksome thoughts and a hard sense of duty. It hides the charm and delight of alert service which comes through the knowledge that one is the image and likeness of "exhaustless being" (The First Church of Christ, Scientist, and Miscellany, p. 149). Because man is enfolded in true action it is the normal, legitimate thing for him to manifest it. The belief in evil produces lethargy and many excuses for sliding over the opportunities to give expression to the little niceties and kindnesses which so enrich human nature. Instead of rejoicing in the joys of others and giving expression thereto, error produces a phlegmatic disposition, robbing most of all the one who should be a channel for the "oil of gladness" but who does not guard against error's encroachments.

It is error that paralyzes with fear the transactions of the business world, producing the clogging and congestion which is the opposite of perfect harmony. Through the belief of inaction or sluggishness, evil would dampen the ardor of the church worker, of him who has been interested in establishing the fact of eternal life for the world. It may tell him that church work is not so interesting as it was when in the first few years of his experience he was becoming acquainted with the wonderful church organization which is described in the Manual of The Mother Church. It would make him dilatory in his committee work, in studying the Bible Lessons, and instead of finding fresh methods of acquiring understanding as furnished by the Bible, the Christian Science literature, and the dictionary, he might be tempted to think he does not need to study Science and Health or attend church services any longer; that because of the number of years he has devoted to this study his understanding is established without further effort.

How long would a master of music be able to play with his wonderful dexterity without daily practice, and what musician is there but desires musical association? It is good to work for a manifestation of harmony, but it is necessary also to "hold fast that which is good." If the wonderful healing of Jesus was accompanied by the injunction, "Sin no more, lest a worse thing come unto thee," should we not all the more strive to be continuously active in the strictest right thinking? The master Metaphysician never swerved from his course of service to mankind. He associated freely with his brother man. So far as we know he never planned to retire from active service; and if any were ever shut out from his presence, it was because of their unbelief, their own mental unfitness. His moments alone with God were but for the furthering of his loving ministry to mankind, and almost his last words to Peter were, "Feed my sheep."

He worked visibly with his disciples so long as they were spiritual enough to see him. He passed through all the beliefs of the flesh, and even death on the cross, in order to show his followers that real being, the life of man, cannot be touched. It would be deplorable if instead of being interested in trying to enrich the present condition of the world, advancing Christian Scientists should yield to the suggestion that they are tired of living and that their higher views gained from experience cannot be imparted to others.

Mrs. Eddy says in "The First Church of Christ, Scientist, and Miscellany" (p. 146), "A Christian Scientist never mentally or audibly takes the side of sin, disease, or death." Then it is the duty of every Christian Scientist to know that Life's perfect activity is everywhere, that interruptions of it can never be a legitimate part of the Life that is God.

Spiritual Discernment

FLORENCE DAVIS KELLER

WHEN Jesus healed the man born blind he made it clear that material eyes are not "the works of God." On page 505 of Science and Health we read that "spiritual sense is the discernment of spiritual good." Mortals believe that sight is dependent upon the eyes, although they admit without question that it is the mind which discerns, interprets, selects, or classifies the myriad impressions received from the world in which they live. Even in the realm of physical science, so called, it is held that the mind sees and hears, that all else is blind and deaf.

Christian Science, restating the pure Christ-teaching, not only accepts the works of Jesus as a basis for present possibilities, but tells how his works were accomplished. That Jesus should be superior to the whole belief of mind in matter has throughout the ages been accepted as logical, since he was believed to be endowed with special power from

Digitized by Google

on high to perform miracles; but as humanity learns through Christian Science that this power was the understanding of an absolute Science with a perfect Principle and perfect rules for demonstrating this Principle, then the works of Jesus are seen in a new light,—a light which illumines the whole consciousness and, furthermore, presents practical proof in healing the ills of the flesh.

In the degree that Christian Science instructs the thought, uplifting and purifying it, in just that degree is the testimony of the so-called senses corrected with spiritual discernment. Spiritual discernment is the discernment of spiritual reality. The joy, the peace, the love, the harmony, the abundance of all good which enters one's experience, rests not at all upon the illusions of the five physical senses, but with the discernment of spiritual being. Spiritual discernment is the ability to see the truth respecting whatever enters one's consciousness, and to think rightly is to demonstrate the rule of Christian Science according to its divine Principle. We may, then, say of sight that it is normal and perfect in the degree that it is governed by spiritual discernment. The same may be said of hearing, tasting, smelling, touching.

When Jesus said to his disciples, "Blessed are your eyes, for they see," he unquestionably referred to their spiritual vision, their ability to discern the spiritual ideas he conveyed by means of simile and parable. Using such symbols as "mustard seed," "fig tree," and "sower," Jesus not only made use of the picturesque figures of the East, but by just such means he illustrated glorious spiritual facts which he proved again and again in healing the sick, raising the dead, and walking on the water. In his mountain sermon he said, "If . . . thine eye be single, thy whole body shall be full of light." His use of the word single implies that the spiritual vision must be the only vision; that the seeing must be unmixed with materiality, alone with good, that the whole body may be filled with the illumination of spiritual ideas of Truth, Life, and Love. Such seeing is not the exercise of gray matter; it is reflection, even the conscious reflection of good.

Of the divine vision the Scripture says that God is "of purer eyes than to behold evil;" then man, God's reflection, must be as pure in his true discernment, which beholds absolutely no evil. This discernment must include the understanding that man is not and never was material; that man is not subject to birth or death, but has ever been one with his creator. He therefore sees clearly because he sees through the illusions of matter into the facts of Spirit and discerns his own spiritual selfhood.

Educated apart from Christianity to see the world about them as separate from their thinking, mortals have been taught to see people, conditions, and circumstances according to material systems of thought, until it is no wonder that seeing, they see but do not perceive. Not only so, but they have grown to think of spiritual vision as one of the blessings obtainable only after the change called death; and moreover, they think of matter as being intelligent, and intelligent matter as the medium of sight, then rely upon this limited vision for their knowledge of the truth. The Bible says that we are to "know the truth," and that the kingdom of heaven is within us, to be discerned and unfolded now. These declarations of truth, unlocked for us through "Science and Health with Key to the Scriptures" by Mrs. Eddy, are summoning us to look beyond the illusions of mortal vision; to look above the objects of materiality, and to see with our eyes, our true spiritual discernment, "a new heaven and a new earth," wherein dwelleth righteousness.

In the seventeenth chapter of John it is written of Jesus that ere he declared those glorious facts about man's unity with God, he first "lifted up his eyes to heaven." When our eyes are uplifted to discern God's spiritual and perfect creation, the harmony and perfection of God's image and likeness becomes apparent. From this exalted point of view, above and beyond the limitations and so-called laws of matter, comes the spiritual vision which heals.

As we learn that the material senses are mortal illusions, we find that man's spiritual senses "are without pain, and they are forever at peace" (Science and Health, p. 214). Spiritual thoughts correct the illusions of material sense, or the sense of evil, with good; therefore the results of this right thinking, or "the fruit of the Spirit," is in proportion to our true discernment. Mrs. Eddy says (Science and Health, p. 167), "Our proportionate admission of the claims of good or of evil determines the harmony of our existence,—our health, our longevity, and our Christianity." The good things which all mankind are seeking are within the reach of every one who is willing to climb the mount of spiritual discernment. There is nothing which can obstruct the vision of one who persists in looking Godward; so commencing with a present ability to discern good, the ability unfolds and increases until, in the amplitude of God's tender love, the longings for more spirituality acquaint themselves intelligently with God, good, and are at peace.

Our Reading-rooms

NELLE B. BEARDSLEE

TODAY, in every busy city, clubs and stores have recognized the need of places for rest and quiet, and have supplied that need according to their sense, making generous provision for the physical comfort of their fellow men. Mrs. Eddy long ago saw the need of humanity for places of spiritual refreshment, and guided by her truer understanding of that which gives rest and sustenance, instituted what are now known throughout the world as Christian Science reading-rooms.

He who rightly comes to these rooms comes to find God. He comes seeking good, and God is good. God is the only host in every true reading-room, the only real presence, the only Mind. He it is who meets the needs which there present themselves,—it may be through the unseen "angel of his presence" ever hovering near, in quiet communion, or through Truth's ideas found in the inspired books and in the periodicals, or it may be through the channel known as the librarian. No one comes asking for bread and is given a stone, if the divine presence be truly honored.

Spiritually, hence rightly known, a Christian Science reading-room is an idea in divine Mind, and reflects the perfect activity of this Mind. This activity is unlimited, infinite in its resources and in its channels for giving and receiving, harmonious, intelligent, and loving in every expression. Moreover, since it is in truth spiritual, and is in and of Spirit, it is wholly protected by Principle, spiritual law, and cannot be hampered or contaminated by material so-called laws or human will. For God's steward, the librarian, to know this truth about reading-rooms, is to free his thought from fear, lest the claims constantly being presented by a material sense of things should seem to have dominion. Thereby must the outward manifestation be blessed.

In the Christian Science reading-rooms throughout the world the Christ is truly being lifted up; and did not Jesus say, "I, if I be lifted up from the earth, will draw all men unto me"? It is ours to know the truth of this, and that "there is but one real attraction, that of Spirit" (Science and Health, p. 102). This would surely help to heal the world of the wandering desire for amusement and rest in material things and lead them rather to the quiet resting-places where

Digitized by Google

God, and therefore real good, "is seen with men to dwell" (Christian Science Hymnal, p. 22).

Can we not each one help to make the work of our reading-rooms more blessed by actively realizing that here is the Christ, Truth, lovingly saying, as of old, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." This voice will be heard, and in the midst of the storm of mortal thought will come the clearing rays of peace.

"Thou hearest me always"

HARVEY B. MYER

THE beginner in Christian Science, who is endeavoring to gain a knowledge of its teachings and thus be the recipient of the good which is in store for all of God's children, may be at a loss to understand the quiet yet positive assurance that accompanies the remarks of his Christian Science friends, that his problem, whatever it may be, is already solved, that the answer is already awaiting him, as God's work is done, and that in reality there is no problem. Such statements may seem nothing more than a mockery in the face of conditions which to mortal mind are overwhelming in their nature. Yet it is just at this point that Mrs. Eddy has rendered such great service to humanity, for the more we learn of Christian Science the more clearly we grasp the Science it reveals.

Moreover, the statement that our problem is already solved and that the answer is awaiting us, should not in itself be so very startling, even if sense-testimony does apparently give convincing evidence to the contrary, because this statement is also true with regard to one of the most common branches of knowledge, a science with which almost every individual has something to do every hour in the day, namely, the science of mathematics. In that science we can readily see how impossible it is to state a problem without at the same time bringing into recognition its answer.

We also see that this is true whether the problem is in the simple operations, or whether it has to do with any of the higher branches of mathematics. Also, if the problem is of such a nature as to make a severe test of our understanding, it may be some hours, or possibly days, or even weeks, before the problem is solved; but our final solution of the problem does not in itself create the answer, for by solving the problem we have only found that which has been in existence from the first instant that the problem was stated, and in fact has always been in existence; for as mathematics stands at the point of completeness, in so far as its specific application is concerned, it follows that in the science of mathematics the work is already done.

Through Mrs. Eddy's marvelous spiritual discernment, which enabled her correctly to interpret the Scriptures, she has lovingly shown us that there is a scientific knowledge of God, a Science of being, and that in this Science of being there is to be found all the exactness that is found in the science of mathematics. But instead of taking care of the problems that arise in only one phase of human thought or activity, as does the science of mathematics, the Science of being takes care of all problems arising out of all possible activities, relationships, or conditions which are manifested in human existence, and the answers to these problems await us in the Science of being with the same unerring readiness that answers await us in the science of mathematics.

Seeing all this, we begin to catch a glimpse of the wonderful metaphysical significance of the divine promise in Isaiah: "Before they call, I will answer; and while they are yet speaking, I will hear." Why? The answer to our problem is already awaiting us. This is beautifully illustrated in the work of Jesus when he was at the tomb of Lazarus. Jesus raised his eyes to heaven and said: "Father, I thank thee that thou hast heard me. And I knew that thou hearest me always." He then commanded Lazarus to arise, and Lazarus came forth; but the prayer of Jesus was answered before he had even uttered it. God's work is done; it is already finished, and it is our work to recognize this.

It was this scientific knowing on the part of Jesus which made his consciousness free from the inertia of material thought, and thus he recognized God's idea where the material man, devoid of life, appeared to those around him. This spiritual idea of God, or of the Principle of true being, had always existed, and the spiritual knowing of this by Jesus caused the truth to appear in the form of a living Lazarus, which was necessary, to those present, to show the solution of the problem, the demonstration of the Science which found expression in the words, "Thou hearest me always."

The knowledge possessed by Jesus of the nature of God was such that he was able to heal every form of disease and overcome every form of limitation. The same work is awaiting us as Christian Scientists today, not only in matters pertaining to ourselves, but in helping others; and whatever particular phase of adversity is presented, we know that we are working in a Science which meets our every need, and that there is no speculative uncertainty about the God who is Life, Truth, and Love. The exact knowledge of such a God and His creation constitutes the Science of being, which by its own inherent perfection irresistibly answers before we call and hears us always. On page 149 of "The First Church of Christ, Scientist, and Miscellany" Mrs. Eddy says, "Remember, thou canst be brought into no condition, be it ever so severe, where Love has not been before thee and where its tender lesson is not awaiting thee."

In the words just quoted we catch a hint as to why we seem to have problems to meet. Each problem carries with it a lesson, and as the lesson is learned we have advanced just that much in the knowledge of the Science of being. As this knowledge is put into practice we grow spiritually, and thus we see that the question of salvation is essentially one of individual work, of individual knowing, and this helps us to come into a realization of what Jesus meant when he said, "The kingdom of God is within you." Also in Science and Health (p. 560) we read, "The grand necessity of existence is to gain the true idea of what constitutes the kingdom of heaven in man." All this requires a readjustment of mental values, a right-about-face in our choice as to whom we shall serve, whether Christ, Truth, or error, whether things spiritual or things material, whether we go to the Father with scientific affirmation, as did Jesus, or whether we long for a return into Egypt. If the problems seem to come to us in full measure, this is reason for rejoicing, for we know that they are only the outward signs of the chemicalization that is taking place in our consciousness, and thus we see our experience blending with that of the people to whom Paul said, "Call to remembrance the former days, in which, after ye were illuminated, ye endured a great fight of afflictions."

It is not in the nature of Truth in itself, however, to cause discord or disturbance, for the natural and legitimate action of Truth is to dispel error and produce harmony. The upheaval that frequently finds place in mortal consciousness into which Truth has entered, is the resistance that materiality always makes to the power of Spirit, for in that power materiality sees its doom. This opposition was foretold by the prophets as that which would take place at the coming of the Messiah, and this prophecy had its fulfilment in the world's tragedy, the crucifixion. But the stigma of the crucifixion should not and does not rest upon one people or one age, for

Digitized by Google

as Christian Scientists we know that when for the solution of our problems we go to a source other than the Science which governs our relationship to the Father, or every time we reject a spiritual idea and yield to the allurements of material ease, passion, or ambition, in our consciousness there is again enacted the experience of the crucifixion.

Solomon prayed for an understanding heart, and his prayer was answered. As seekers after Truth we also pray for the discerning thought that will enable us to live close to the truth, and to know the Science which supports it, the Science of being. Christian Science makes the perfection of this Science available in overcoming the imperfection of humanity, and thus thousands of people are daily apprehending more and more the scientific import of the words of Mrs. Eddy on page 3 of Science and Health, where, in speaking of God, she says, "His work is done, and we have only to avail ourselves of God's rule in order to receive His blessing, which enables us to work out our own salvation." And as this absolute Science, the working of which was so marvelously summed up in the words of Jesus at the tomb of Lazarus, becomes more understandable to us, we also find ourselves living in the same boundless gratitude with which those words must have been uttered.

✧

The "still small voice"

JENNIE WILSON EGAN

DURING the month of March, 1913, while living in a small town in Colorado, we had occasion to visit our ranch, which was located twenty-five miles from where we were living. We drove to it one day and returned the next; but soon after starting on our homeward trip we encountered a severe storm, what would be called a western blizzard, and it continued to rage throughout the journey, while the cold was intense.

Soon after arriving at our journey's end, however, a call came for me to visit a child who was said to have been very sick for two days and had scarcely slept at all during that time. Self-pity now asserted itself, and I said to myself that because of such a long, cold ride and being so tired and stupid I simply could not go out again, and could not do any good if I were to go. Following close upon this thought came these words, as if spoken by a voice: "You do not do the healing; God does the healing, and He is never cold, tired, or stupid, but is always ready to hear the cry of the needy." Instantly the mortal thought was destroyed and I went on my mission of love, rejoicing that I was counted worthy to work in God's vineyard.

When I reached the home of the child the family were gathered about him, manifesting great fear; but I asked to be left alone with the little one. Then lifting my thoughts to God and realizing the all-presence of divine Love, the child was instantaneously healed and was back in school the next morning. This experience was a wonderful lesson to me. It caused me to be more humble, to strive more diligently to cast out self, and to realize more fully the meaning of the Master's words: "I can of mine own self do nothing;" "the Father that dwelleth in me, he doeth the works." I saw as never before that we are only channels through which the healing truth flows from God to man, and the freer we keep our channels of thought from being clogged with self, the better and quicker healing we will be able to do.

One of the hymns in "The Christian Science Hymnal" (p. 89) expresses this thought very beautifully,—

Make channels for the streams of love,
Where they may broadly run;
And love has overflowing streams,
To fill them every one.

Selected Articles

The *Courier* of Jacksonville, Ill., commenting upon a statement made to the effect that "Christian Science is a bogus healing system, a sham religion, and purely a money-making scheme," says:—

We do not believe any really intelligent and well-informed person takes stock in the three charges made. There may be those who possibly entertain belief in the truth of one or more of them. Many persons have no faith in the beliefs of the Scientists respecting the healing of disease. Informed people know that the religion of the Scientist is a beautiful one, that it deeply impresses those who believe in it, and that the professions of the rank and file of the membership of the church are to them as reasonable and as sacred as are those of the believers in any other religion.

But the real beauty of the Christian Science religion is the soul peace that it brings to the earnest believer. It would be difficult to find a member of any "regular" church so deeply impressed and so vastly moved by its teachings as are many members of the Christian Science organization. Without pretending to know its teachings or to have knowledge of the beliefs accepted by the members of the church, it is an easy matter in one's own community to mention many persons whose lives have been revolutionized because of their belief in the Science teachings respecting the beauties of life and the duties one owes to his God and his fellow creatures.

Some of the best folks in Jacksonville are members of this organization, and there are among them many persons who devote their very souls to the beauties of the cause as they present themselves. It is a good sort of religion that can regenerate a soul and induce it to see the beauties of life and the more beautiful possibilities of the future. No one is obliged to accept the beliefs of the Christian Scientist. No one is blamed for neglect to accept them. No one is condemned to eternal damnation because incapable of believing in the teachings of this church.

Christian Science is a religion of hope and action. It is a working religion, and each day the year round finds many thousands of persons studying, thinking, talking, reading, and investigating. Isn't it a good sort of religion that urges the mind on to bigger and better and brighter things? Isn't it a good religion that magnifies the beautiful and the pure?

✧

[W. D. Kilpatrick in *Decatur* (Mich.) *Republican*]

There are one or two things which our critic's pamphlet brings out that accord with the facts. One is that "the growth of Christian Science has astonished the world." Another statement to the effect that "its teachings appeal to a very intelligent, well-to-do class of people of considerable mental independence," may be the truth as far as it goes, but it should be noted that Christian Science is attracting to its fold all classes of people in all walks of life, and in following the admonitions of the Master found in the tenth chapter of Matthew (as well as in the sixteenth chapter of Mark, note you) to "heal the sick, cleanse the lepers, raise the dead, cast out devils," it is counting among its followers thousands upon thousands of all classes of people in all parts of the world who have been raised from their beds of pain, have been relieved from the bondage of sin and sinful habits, and have had relief from the inharmonies of want, woe, and misfortunes of every name and nature.

Christian Science is based exclusively on the teachings of the Bible, and at no point, under a reasonable and spiritual interpretation thereof, can it be said that Christian

Digitized by Google

Science diverges in the least therefrom. The burden of our critic's articles is to the effect that sin, sickness, and death are realities with which it is useless for us to attempt to cope at the present time, but which he says we will at some future time in some future state be able to overcome. Christian Science finds nothing in the Bible to uphold such a contention, and believes that the words and works of Jesus were meant for our present guidance and form the only basis for a proper solution of all the problems with which humanity is confronted. Jesus healed the sick, fed multitudes (and thus gave a rebuke to the sense of poverty and want), and raised the dead through the understanding that these conditions are not God made or God ordained, and stated that all who believe on him shall do the works that he did. Regardless of whether or not Christian Science is the truth, if this critic is not healing the sick and following the example of the Master in the way of his appointing, he has little excuse for criticizing others in their honest endeavors so to do.

Christian Science teaching is based on the understanding of a perfect, omnipotent, omniscient, and omnipresent God, and man as created in His image and likeness, and on that basis it is endeavoring to prove its faith by its works in casting out sin and healing the sick. There is but one standard by which any religion can be judged, and that is the standard of "works." Christian Science can be judged on no other basis than this, and on this basis it cheerfully invites comparison.

Christian Science does not teach, as this critic claims it does, that God is in everything; that theory is pantheistic. On page 204 of the Christian Science text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy says, "The belief that God lives in matter is pantheistic." Christian Science in this connection teaches that God is the only creator, and that man and the universe are His reflections, created in His exact image and likeness, as stated in Genesis. It consequently follows that this teaching does not embody the idea that God dwells in His creation, but rather that God is reflected by His creation. If God dwelt in His creation, then God would be limited, and we learn in the Bible that God is limitless, infinite.

This critic says in one of his articles, "Neither Jesus nor his apostles experienced healing,—nor did any of the early church, so far as the record shows." This statement, besides being incorrect, could hardly be considered an argument against healing, when the Bible is full of accounts of the healing works of the spiritually minded throughout history, and since the works of Jesus and the apostles consisted principally in healing the sick in exemplification of the divine Principle of being, the full understanding of which it was Jesus' mission to establish with men and which was exemplified in his works. Furthermore, history records the healing work of the early Christian church for three hundred years after the time of Jesus.

✧

[John L. Rendall in *The Prairie City* (Iowa) *News*]

In a recent issue appears an article under the caption, "Christian Science versus Christ," in which a clergyman takes occasion to present his viewpoint of Christian Science. He makes the statement that "Christian Science is neither scientific nor Christian." Perhaps if he were as well acquainted with Christian Science as are those people who adhere to its teachings, he would find that it is preeminently Christian and absolutely scientific in its teachings and in its practice. His mere abstract statement of opinion becomes of little importance when confronted by the firm conviction of hundreds of thousands of Christian people to the contrary; people who have found that Christian Science presents demonstrably certain teachings of Truth, who have experienced the Christian healing which its teachings exemplify, who have been raised from beds of pain and whose lives have been redeemed, and who have been immeasurably benefited by these scientific teachings.

Our critic objects to the statements which he cites from "Science and Health with Key to the Scriptures" by Mrs. Eddy, among them being, "All that we term sin, sickness, and death is a mortal belief" (p. 278). He must recognize the fact that without the mortal belief there could be no sin, sickness, or death: also that all that is called sin or disease is part of the sum total of sinning mortal thought and has no existence apart from it. Seemingly it finds its expression in what is called mortal body. Mrs. Eddy does not teach that sin and disease are not "real" to the human sense of things. As a matter of fact, she emphasizes the necessity for overcoming sin and disease on the basis of Jesus' teachings, namely, scientific right thinking. When Jesus said to the woman, "Go, and sin no more," and when he said to the sick of the palsy, "Thy sins be forgiven thee," he recognized clearly the indissoluble link between sin and sickness. It is to be noted, however, that he did not satisfy himself merely with making these statements, but in each instance he healed the sick and reformed the sinner.

Our critic cites from Matthew that "Jesus went about . . . healing all manner of sickness;" and I might call his attention to the statement in Mark which reads, "These signs shall follow them that believe." He also cites from Acts that Dorcas "was sick, and died," and from John that a certain nobleman's son was sick, and so on. He, however, stops at this point and entirely omits to state that in each instance those mentioned were healed through the demonstration of God's power as understood by Jesus and his disciples.

Christian Science is to be judged, not by what its opponents say about it, but by what it is actually accomplishing, and on this basis of accurate judgment Christian Science must stand or fall. The fact that during the past forty years it has had phenomenal growth in the face of intense opposition is in itself significant, and indicates the futility of all the efforts of clergymen or others to discredit its teachings.

✧

[S. T. Downs in *Fort Wayne* (Ind.) *News*]

There recently appeared in the *News* two letters signed "Common Fellow" which discussed Christian Science, and because they acknowledged that benefit was to be derived from its study and were favorable in their tone, they brought forth a criticism signed "Great Selfless One." This critic raises a question about Christian Scientists accepting fees for their services, and also touches upon some other matters.

We agree that Christ Jesus was the great Teacher and Wayshower, and Christian Science is based upon his teachings as found in the New Testament. In the history of his ministry we find that he sent forth his students without scrip or provision for their expenses; indeed, he specifically told them, as we read in the tenth chapter of Matthew's gospel, to depend upon the return made for their healing work, saying, "The workman is worthy of his meat." Some might argue that this referred only to their food, but the record shows plainly that their clothing, lodging, and general expenses were also to be provided in this way. The present-day disciples of the great Master find in these instructions ample precedent for accepting a reasonable fee. The great economic changes within a comparatively few years have caused personal services and all values to be reckoned on the basis of government currency, and funds are absolutely nec-

Digitized by Google

essary to pay rent and buy clothes and food. Since one cannot engage in Christian Science practice without giving his time, it would be no more possible for him to meet expenses without the ordinary medium of exchange than it would for any other person to do so.

Christian Science defines God as "Mind, Spirit, Soul, Principle, Life, Truth, Love" (Science and Health, p. 465). It does not try to prove anything about matter or the physical except that it must yield to the government of divine Mind. Investigation would reveal that Christian Science has been successful in quite a large percentage of the cases that have turned to it for freedom from physical suffering, and in most instances this has been after material means of treating disease had failed. These healings are the proof of a demonstrable understanding of spiritual law, which is the opposite of suggestion. This spiritual understanding of God destroys sin and sickness, while suggestion simply exchanges one error for another, and its malicious form, as Mrs. Eddy says in Science and Health (p. 103), "ultimates in moral idiocy."

✧

[Thorwald Siegfried in *Spokesman-Review*, Spokane, Wash.]

On what grounds the evangelist made the statement that Christian Science is atheism is not clear from the report of his speech. Atheism means, by definition, a denial of the existence of God. In the concordance to the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, the various references to the word "God" occupy about ten pages. In Strong's concordance to the Bible the references to the word "God" occupy about thirteen pages. Allowing for the greater size of the Bible and the different arrangement of the concordances, it would seem to be an entirely safe assertion that the references to God are relatively as numerous in Science and Health as in the Bible. This comparison is made only for the purpose of pointing out the absurdity of the charge of atheism, for it involves the accusation that Christian Scientists are assiduously engaged in the study of a Supreme Being whose existence they are said by the evangelist to deny.

It is to be assumed that the critic's activity in a religious cause is proof of his desire to overcome sin. In that commendable desire all men should join. The question of the best method by which sin may be overcome is one to be tested by experience. Christian Scientists are better satisfied with their methods than with those of the older churches, since the latter have failed either to draw or to hold them. This satisfaction does not lead them to speak hard words about their Christian brethren in other folds, and they protest against being spoken of harshly merely because they have found the "more excellent way."

As proof that Christian Scientists share the views of other followers of Jesus the Christ respecting the desirability of overcoming sin, Mrs. Eddy's statement that "the Christian Scientist has enlisted to lessen evil, disease, and death; and he will overcome them by understanding their nothingness and the allness of God, or good" (Science and Health, p. 450), should be sufficient. The same statement should bar any such criticism of Scientists as that voiced by our critic, based on his belief in the reality of sin and their knowledge that it is real to no one but the sinner himself. The criticism is one of method, as to which the only proper basis for judgment is not personal opinion, but successful experience, and on that Christian Scientists are willing to rest their case.

It is indeed curious that evangelists take time and effort in a vain endeavor to prove the ultimate reality of sin, and that medical men are firmly convinced of and actively propagate the belief in the reality of disease. This is all the more curious to Christian Scientists, because until their study of Science and Health they were as firmly convinced of the reality of evil as evangelists and doctors still seem to be. Evil to be "real" must be more than a mere appearance to our physical senses, such as Christian Scientists and non-Scientists alike experience; to be "real" it must be "a thing itself,"—in other words, its origin must be in God, the only creator; and its destruction would, on that hypothesis, amount to upsetting God's law. Hence the irrefutable logic and consummate power of Mrs. Eddy's statements: "To overcome all wrong, it must become unreal to us: and it is good to know that wrong has no divine authority; therefore man is its master" (Message for 1901, p. 14). "Disease should not appear real to the physician, since it is demonstrable that the way to cure the patient is to make disease unreal to him" (Science and Health, p. 417).

One of our critic's workers is reported by you to have accused Christian Scientists of "twisting the real meaning of the Bible to meet their own ends." Perhaps this accusation only means that the lady's opinion of the meaning of the Bible is not the same as that of Christian Scientists, which may be quite true; and if true it is still legitimate to prove, not by mere assertion, but by the healing works commanded by the Master himself, that the Christian Science interpretation of the Bible is the correct one. And, as before, on this experience the Christian Scientists are willing to rest their case.

How impossible it is (and would be if they attempted it) for Christian Scientists to "twist" the meaning of the Bible, can be seen by any one who will consider that probably more than one half of the words spoken in the Sunday services in Christian Science churches consist of readings from the Bible itself, using the ordinary King James Version. Moreover, the citations to these readings are printed in the *Quarterly* months before they are to be read. They are studied daily by Christian Scientists during the week before their delivery in church, in order that the full import of the Scriptural passages may dawn upon their thought, like Malachi's "Sun of righteousness . . . with healing in his wings."

The educational process outlined is making Christian Scientists intimately familiar with the Bible, and instead of permitting them to "twist" its meaning, it fits them to uncover and rectify the many "twists" which have been given to Christian teaching by religions that accept ecclesiastical opinion about the Bible instead of the Bible itself, as the guide in its interpretation.

[Written for the *Sentinel*]

A Table in the Wilderness

GEORGE AMBROSE DENNISON

A TRAVELER on a lone and barren way
Met one that hungered. "Give me bread, I pray!"
With pitying heart he asked to hear no more,
But freely gave from his own scanty store.

In humbleness he gave, and reverently
Remembered 'twas the Father's bounty free
That fed the famished brother; he but stood
As almoner, to serve eternal good.

And Love divine was quick the deed to bless,
For lo, a table in the wilderness!
Refreshed, the traveler went his joyful way,
Suffused in glory of a new-born day.

Editorial

One Mind

It is no infrequent occurrence to find in newspaper reports of meetings of medical societies and other representative bodies, that some one has delivered an address recommending the use of hypnotism, either as a labor-saving device or as a general cure-all. The latest of these addresses which has come to our attention is one recently delivered by Dr. Arthur Holmes of Pennsylvania State College in Pittsburgh, Pa., before a convention of school teachers, and reported in *The Sun* of that city as follows:—

"Every teacher must be a hypnotist," said Doctor Holmes. "It is perfectly possible to send out a thought that will influence other people. Teachers must be right. Sit down and make yourselves right by auto-suggestion. Absolutely you can change your body and make it different from what it is this morning by meditating and concentrating on that change. The problem of the teacher is to get the pupil to attend to an idea.

"I do not believe the teacher should stamp her foot and clap her hands to gain attention. The teacher should use her mind. She should say things in such a way as to gain the attention of the children. The teacher is not a manual labor worker. The teacher is a mental worker, and should use her mind in laying before her class the ideas that she wishes brought out."

As usual in such cases, there is not a word said about securing the consent of the pupils and their parents before such attempts to deprive the children of their individuality and volition are put into practice. Evidently they are not to be considered as free agents, and the first stage of the hypnotic operation is to be one intended to render them oblivious to their rights, and, if possible, take from them their reasoning faculties. It cannot be supposed for a moment that any rational person would voluntarily consent to the employment upon himself, or upon those whom he holds most dear, of a system which its advocates admit is capable of harmful and even criminal use. On this point we may cite, by way of authority, the article on hypnotism by William McDougall, M.A., Wilde Reader in Mental Philosophy in the University of Oxford, in the eleventh edition of The Encyclopedia Britannica,—an article which is extremely friendly to the subject.

In this article the following admission is made, namely: "There is little doubt that, if a subject is repeatedly hypnotized and made to entertain all kinds of absurd delusions and to carry out very frequently posthypnotic suggestions, he may be liable to some ill-defined harm; also, that an unprincipled hypnotizer might secure an undue influence over a naturally weak subject." It is also said in the same article that "a person lacking in moral sentiments might be induced to commit actions from which in the normal state he would abstain, if only from fear of punishment; and it is probable that a skilful and evil-intentioned operator could in some cases so deceive a well-disposed subject as to lead him into wrong-doing."

Stripped of all mystery and described in simple language, hypnotism is but the belief that one person may dispossess another person of his mind, or normal will-power, and thus render him powerless to resist the stronger will of this person. Surely if anything on this subject is to be taught in the schools, it should be as to how this influence may be resisted and overcome. Of course we have the utmost respect for school teachers, as a class and individually, but we must protest against putting into the hands of any persons, no matter how intelligent or devoted to their work they may be, authority so to trespass upon the rights of others and so to tamper with the mentality of children as Doctor Holmes advocates.

It will not do to try to usurp the function of infinite Mind, God. What needs to be taught is that divine Mind is infinite and that man reflects this Mind in intelligent action; also that there is no other Mind. The first commandment is, "Thou shalt have no other gods before me," and of this commandment Mrs. Eddy writes on page 340 of Science and Health, "It inculcates the triunity of God, Spirit, Mind; it signifies that man shall have no other spirit or mind but God, eternal good, and that all men shall have one Mind."

ARCHIBALD MCLELLAN.

✧

Classification

Let classification be done by divine Science, and not by human knowledge so called. The latter sins against Truth and tyrannizes over mankind. Custom classifies persons as good or bad, young or old, strong or weak, healthy or diseased, wise or foolish. It differentiates according to sex, color, race, nationality, religion, personal appearance, height or breadth. In some cases it even seems to delight in separating human beings into masters and slaves, in herding them into antagonistic professions and rival occupations, in creating menial servitude, in exalting one type and depressing another. Such classification may pretend to follow lines supposed to be mental as well as physical, but in reality it must deal wholly with material conditions because dictated by a supposititious material mind.

Thus for the sake of convenience, customary classification tends to create classes into which individuals can permit themselves to be thrust and from which they can be prevented from emerging except through spiritual understanding. Mortal mind describes persons much in the same manner as Adam named "every living creature" in the Scriptural allegory of the false creation, and with the Adam name goes the Adam nature and the Adam law of sin, sickness, and death. Therefore one of the principal objections to the customary classification is the swarm of Adam laws which accompanies such classification. The numerous physical sciences are special sinners against mankind in this respect. Mistaking man for material instead of spiritual, they classify him as subject to material law and thus entangle mortal man in a network from which he can be saved only by Spirit's proper classification, which reveals the real man to be the idea of divine Mind, subject only to the spiritual law of God.

Mrs. Eddy gives the cure for false classification in the following words: "Spirit diversifies, classifies, and individualizes all thoughts, which are as eternal as the Mind conceiving them; but the intelligence, existence, and continuity of all individuality remain in God, who is the divinely creative Principle thereof" (Science and Health, p. 513). Spiritual understanding of the nature and attributes of God provides the standard of true classification for man. Then if the sinning or sick person appeals for help, what should be the scientific mental attitude of the helper? The sin and the sickness are only mesmeric conditions of personal sense; therefore they can be separated from the person who needs to be saved or healed. The wrong classification can be corrected. Spiritual intuition reveals the real man of God's making as ever expressing divine qualities, thinking true thoughts, obeying spiritual law, and so dwelling in the gracious security of Mind undefiled.

Paul made some striking classifications when, in the epistle to the Galatians, he listed "the works of the flesh" over against "the fruit of the Spirit." On page 252 of "Miscellaneous Writings" Mrs. Eddy states, "Christian Science classifies thought thus: Right thoughts are reality and power; wrong thoughts are unreality and powerless, possessing the

Digitized by Google

nature of dreams." In the epistle referred to above, Paul writes, "There is neither Jew nor Greek, there is neither bond nor free, there is neither male nor female: for ye are all one in Christ Jesus." Here then is the true classification, which does not draw a line of separation between man and man or man and woman, but between the Son of God and Adam, between truth and error, reality and unreality, between the divine law and the beliefs of law based upon pretended human knowledge.

Mortal mind in attempting to classify, condemns. It is constantly trying to weave a web of restrictions and limitations, or to confine mankind to a fatal groove, to the routine of sin and death. The divine classification admits no extraneous considerations, but goes straight to the mark. It declares, "Behold, what manner of love the Father hath bestowed upon us, that we should be called the sons of God." What if "the world knoweth us not"? God does know us, for He has classified us as His image and likeness.

WILLIAM D. MCCRACKAN.

Responsibility

THE tendency of the human mind is to shirk responsibility,—to leave as much as possible to others,—and thus to miss the manifold blessings which come from being "workers together" with God, as Paul puts it. At the very dawn of human history, as recorded in the Bible, Cain evaded the inquiry as to Abel by asking, "Am I my brother's keeper?" But no mere evasion can satisfy the demands of Truth in any age, and we should begin to face our responsibilities by doing cheerfully the duty which is nearest us, for in this way alone will we be prepared for greater and grander tasks.

On page 176 of "Miscellaneous Writings," after commenting upon the achievements of the Pilgrims, Mrs. Eddy asks: "But what of ourselves, and our times and obligations? Are we duly aware of our own great opportunities and responsibilities?" Jesus once said, "Unto whomsoever much is given, of him shall be much required," and this assuredly applies to all Christian Scientists, whatever their condition, humanly speaking. Through the divine message given to this age in "Science and Health with Key to the Scriptures" by Mrs. Eddy, they have access to the priceless treasures of Truth, which would be none too dearly bought were a man to sell all he had in order to secure them—according to our Master. We cannot deny that the struggles and privations of the Pilgrim fathers brought out a stalwart type of men, very different from those reared in the lap of luxury; nor did their trials cramp their intellectual powers, but instead tended to develop them. Out of the very exigencies of those days there was laid the foundation of a splendid educational system, which later spread over the land as the public school, also the more advanced halls of learning, and we should never forget that the deep piety and rigid morality of these forefathers gave stability to the learning of their time.

When the question is pressed home to Christian Scientists as to how well they are meeting their responsibilities as citizens, neighbors, friends, parents, or children, the answer vitally concerns themselves first of all, then it deeply concerns those who come within the radius of their influence. They may be tempted to say that the demands of Christian Science are tremendous, which is quite true, for they never stop short of the perfection required by Christ Jesus, and this called for unceasing watchfulness and prayer. The result of joyful acquiescence thereto, however, is a heroic type of manhood and womanhood. This type cannot be reared in indolence or sensuous pleasure, but calls for something even better than Spartan hardihood.

Our Leader has done her part in providing for the moral and spiritual needs of the young, in the Sunday school training, also in our wholesome literature, not the least important being our daily paper, *The Christian Science Monitor*, which is of tremendous value along educational lines. It therefore rests with parents and other guardians of the young to recognize their deep responsibilities and see to it that the children of today will be ready in later years to pass Christian Science on to posterity unsullied and undimmed, shining with a light above that of the sun, the light of Truth and Love. We may not be called upon to do sentry duty in physical warfare, but we can never evade the call of Truth which demands of us absolute obedience to divine law. If we love God with all our hearts, we will not fail to teach His law "diligently" to our children, for if we or they "forget," the promised blessings will be missed.

In bygone days Pharaoh and Herod made their chief attacks upon the children, and mortal mind has not changed its methods, unless it be to make them more subtle; hence the greater need for watchfulness and prayer. If the protection of the children from sickness requires extreme cleanliness, let us have no superficial washing of the outside of cup and platter, but the absolute purity of heart which alone can enable either child or adult to "see God" and thus be immune to sin or sickness, although a thousand fall at his side. The child must be taught obedience to spiritual law, and then he can say of divine Love, "He is my refuge and my fortress."

ANNIE M. KNOTT.

Among the Churches

Current Notes

SHELBYVILLE, IND.—With appropriate exercises Sunday morning [July 9] First Church of Christ, Scientist, of this city, dedicated its new house of worship, located at Tompkins and Jackson Streets. The Christian Science movement in Shelbyville had its start March 20, 1905. On Wednesday evening, April 15, 1905, the initial meeting of the Shelbyville Christian Science Society was held. On July 1, 1906, new quarters were opened for services.

June 26, 1907, a business meeting of the members was held to organize formally as a church, and on communion Sunday, July 14, the first meeting of First Church of Christ, Scientist, was held. On Friday evening, Nov. 13, 1914, when the members met in the reading-room, the building committee reported that a member had proposed to donate to the church a lot on the northeast corner of Tompkins and Jackson Streets for a church home.

Work on the new edifice was started in the early spring of 1915, and on July 11 of that year the church was opened with services.—*The Shelbyville Democrat.*

EUREKA SPRINGS, ARK.—An appreciative and attentive audience filled the auditorium of the new Christian Science church yesterday morning [July 30] for the dedicatory services. The contract for the building was signed June 1, 1914. Ground was broken July 1, and the corner-stone laid Aug. 17 of the same year. The completed building was turned over to the board of directors on April 20, 1915, and the opening service was held April 25.—*The Times-Echo.*

FAIRFIELD, IOWA.—First Church of Christ, Scientist, of this city is planning to erect a church edifice in the near future, and has purchased the property at 51 East Washington Street, directly back of the library building, for this purpose. The consideration was two thousand four hundred and seventy-seven dollars. The structure at present on the lot is to be sold and removed by Aug. 15.—*Fairfield Journal.*

Digitized by Google

FOREST GROVE, ORE.—Plans have been completed and accepted, and the contract has been let by First Church of Christ, Scientist, for a new church edifice. The location on the southeast corner of Pacific Avenue and A Street is sightly and desirable. The auditorium will have a seating capacity of three hundred, and an additional hundred and fifty can be accommodated by opening the foyer and the reading-room. The total cost of grounds and building will be about eight thousand dollars. The structure will be ready for occupancy about Oct. 15.—*News-Times.*

CARTERVILLE, ILL.—The Christian Science Society, which purchased the old Herald Building on Illinois Avenue, has moved the structure back on the lot so that it is now fifty-two feet from the sidewalk, placed it on a new concrete foundation, built a new porch, and graded the lot. A new walk to the building is planned, and in all about five hundred dollars will be spent for repairing and remodeling. It is expected that the building will be ready for occupancy about July 15.—*The Carterville Herald.*

✧

Admission to Membership in The Mother Church

The next admission of candidates will be Nov. 3, 1916. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Wednesday, Oct. 11, 1916.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1916, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Suite 550, 236 Huntington Avenue, Boston, Mass.

✧ ✧ ✧

The Lectures

Los Angeles, Cal.

The remarks of Miss Eva Cole in introducing Clarence W. Chadwick, who lectured on Christian Science in the edifice of First Church of Christ, Scientist, were as follows:—

We live in an age which demands that everything be standardized, and religion is not excepted, for without an absolute basis from which to reason, no correct conclusions can be reached. The invariable standard of truth as taught in Christian Science is at once so simple and practicable as to appeal strongly to those who would be "doers of the word, and not hearers only;" but since the world has for so many centuries discharged its religious obligations by a formal acceptance of the Master's teachings, this demonstrable Science of the Christ has met with opposition and misrepresentation.—*Correspondence.*

✧

Marietta, Ohio

George Shaw Cook delivered a lecture on Christian Science at the Auditorium. Edward B. Follett of the court of common pleas presided, and in introducing the speaker said in part:—

I know little of the Christian Science faith, but I do know that its believers are the kind of people who make the best citizens of our country,—kind, considerate, contented, unselfish, healthy in body and mind, never complaining and never unkindly criticizing either their neighbors or their neighbors' actions or beliefs. Christian Science is a constructive and growing religion, and we shall all be glad to give our respectful attention to the lecturer.

Marietta Times.

✧

Hoboken, N. J.

The Rev. Waldo A. Amos, rector of St. Paul's Episcopal Church, in introducing William R. Rathvon, who spoke on Christian Science in the auditorium of the High School, said:—

When the members of your lecture committee asked me to be with you to introduce the speaker of the evening, they said the rules of your organization required that the man who made the introductory address should be friendly to Christian Science. In my case the condition is fulfilled. I am friendly to everything that tends to make the world better and brighter, but am hostile to everything that tends to make it unhappy or wretched. I am a friend to every religious teacher, to every man who forgets about his own selfish interests and gives himself to the service of humanity, but am a foe to every man who is satisfied to live in a world where there is wretchedness, poverty, disease, and feels upon himself no obligation to eliminate these things, to fight against them. So it goes without saying that I am friendly to Christian Science.

Again, I am friendly for what we commonly call a pragmatic reason. If a thing works, then it is worthy of our commendation, and of course I am familiar with many cases where Christian Science has worked. Among my acquaintances there are several whose lives have been transformed by this teaching. Other churches did not succeed in doing anything for them, but Christian Science did succeed, so all honor to it.

Before presenting to you the speaker of the evening I want to give an additional reason for my friendliness to Christian Science; and it seems to me that it goes to the root of the whole matter and accounts for the marvelous growth of the Christian Science church. As I understand it, you contend that God spoke to the world through a woman in the latter part of the nineteenth century. That is splendid; that is tremendous. Many religious teachers seem to think that God ceased speaking to the world two thousand years ago, that inspiration ceased with the death of St. Jude. A man comes along with some perfectly common sense proposition, and one of these religious teachers greets him by saying: It cannot be true, because the prophet Habakkuk said such and such a thing in the year 625 B.C. God apparently spoke in the olden time and in the remote land; He never speaks nowadays. But you have come along and preached a belief in the God of nowadays, the God of the living, and you have won out.—*Sunday Inquirer.*

✧

West Chester, Pa.

A large congregation listened to a lecture on Christian Science given in First Church of Christ, Scientist. Miss Sybil Forsythe in presenting the speaker, Charles I. Ohrenstein, said:—

Every person in the world today is seeking the same things,—health, happiness, and satisfaction. We may all have different concepts as to where we are going to find them, but in reality our goal is the same. Jesus said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." The thirty-seventh psalm tells us to commit our way unto the Lord and He will give us the desires of our heart. Probably

Digitized by Google

every one of us at some time in our lives has pondered over these and the many other promises in the Bible, and sincerely desired to commit our way unto the Lord, but have not known how to do so practically. Christian Science reveals what God is, and man's relation to Him, and how to make Him our ever-present help in time of trouble. In a degree every Christian Scientist has proved this truth many times.

Testimonies of Healing

From the depths of a grateful heart I want to testify to the wonderful healing power of Truth as demonstrated through Christian Science. In the spring of 1907, after a severe trial, a dear sister came to visit me and gave me some *Sentinels* to read. In the fall I went to visit her in order to find out more about this Science, but I did not understand what she said about it. The next day after my arrival I walked down town, and as there was a lot of soft snow on the ground my feet became very wet. The following morning the old ailments, headaches and stomach trouble, kept me in bed. My sister talked to me about Christian Science, and in the afternoon I was able to dress and go home. I have since been freed from the necessity of using glasses, though they had been worn for twelve years and the oculist said I would never be able to do without them. This healing came through the reading of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Varicose veins have also been healed.

In the fall of 1912 I found my husband unconscious, overcome by gas from an engine. I turned to God at once, knowing He alone could save him, and for two hours worked for him in Science. He then recovered consciousness and walked to the house almost without help. An hour later he ate a good meal and was well. We have had many good demonstrations in our family. Sometimes I have had to ask for help, which has always been quickly received, and now my health is perfect.

When I took up Science, my little boy four years old was off and on troubled with different diseases. With my small understanding he was healed of fever in one week, and earache in the worst form was overcome in one night. He is now twelve years old, big and strong, willing to do anything good. The older children have also been helped in many ways.

My heart is filled with thankfulness to God for our dear Leader, whose purity enabled her to receive the message of Christian Science and deliver it to the world.

Mrs. Jens Schmidt, Nashlyn, Saskatchewan, Canada.

✧

Every day I am finding Christian Science to be my best friend. It has healed me where medicine and material hygiene failed, and has uplifted me where orthodox theology was inadequate. Before Christian Science was allowed a hearing in my defense there was long and persistent employment of medicine, osteopathy, hydropathy, and physical culture. There were weary sojourns at the seashore and among the foothills; and more than these there was the human faithfulness, patience, and kindness of friends who were endeavoring to help me, as well as the honest efforts of physicians to heal me.

In spite of all this my condition became worse, until daily existence was a misery. I was haunted by its unprofitableness and literally perishing in the "miry clay" of cherished health theories, in that sad state where healthy people seemed to be citizens of another country, where I too had one time lived, but to which I could not return. Finally, when ready to turn away from material gods and listen to the glad tidings, I received treatment from a Christian Scientist. The literature was read constantly, especially Science and Health, my medicines were all thrown out, and some oppressive health laws shaken off. Within two months I gained in weight and was delighted to be able to work.

During the nine years which have intervened since this healing, Christian Science has been bringing to my material beliefs, as I have been able to bear it, "not peace, but a sword" (see Science and Health, p. 19). To my better or real self it truly is "The Prince of Peace." Every day I battle against error and strive to attain unto the goal of the Christian Scientist's hope. I am grateful for the Scriptures, for the priceless teaching which Mrs. Eddy has given us in her works, and for the invaluable friendship of several Christian Scientists.—Robert W. James, Detroit, Mich.

✧

With a grateful heart I send this testimony of what Christian Science has done for me, and my sincere hope is that it may bring a ray of light to some sufferer who is trying to break the bonds of material belief. It is now three years since the study of Christian Science was taken up. At that time I was to mortal sense very near death's door, from what was said to be tubercular disease. I had tried every material remedy known to my physicians, had traveled in New Mexico, Colorado, and on the Pacific coast, but had received only temporary benefit. Each time after my return home my condition seemed worse. At times my husband was obliged to carry me up and down the stairs. I was unable to do any housework or even superintend it, and life each day was full of pain and discouragement.

At last the attending physician said he could do no more, and that the end would probably come in a few months, but with strong tonics I might live a year. Then my family and friends urged me to try Christian Science. For two or three days I read Science and Health but seemed to get little understanding of it, so a practitioner was called. In five treatments my healing was complete, and there has been no return of the disease in any form. Severe headaches were also overcome. Instead of misery and sorrow, life is now full of health and happiness.

At the time I began to have treatment we placed our nine year old son under the practitioner's care, as the physician feared that lung trouble was fast developing. He coughed so violently at night that we were often obliged to prop him up with pillows before he could sleep. Besides this, he had worn glasses for a year and a half, and the oculist said he would most probably have to wear them all his life. In less than two weeks he had laid aside the glasses, as his eyes were perfectly normal. He was likewise entirely healed of the cough and all other discordant conditions. From being a delicate, sickly child he is now a strong, robust boy. Our younger son was healed in a few hours of a severe gathering in the head, and my husband of carbuncles, after suffering from them for more than six months.

I am very thankful for these and many other physical healings, but more for the understanding of the Bible which Christian Science has given me.

Mabel I. Davis, Muskogee, Okla.

✧

Christian Science was presented to me at a time when my affairs seemed to be going decidedly wrong. A dear friend, though not herself a student of Christian Science, had borrowed for me the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, from one who was a firm believer in its teachings. For some time I had been wearing glasses for a serious eye trouble which the oculist had said would increase with my age; but I began to read Science and Health without putting on my glasses, and they have never been worn since. Though reading and sewing a great deal, I have had no trouble whatever during the past four years.

Many other proofs of the beauty and power of Christian Science have been received. Two days before Christmas, 1914, my little girl was taken violently ill with all the symp-

Digitized by Google

toms of a fever. She had always been a strong and happy child, who did not give in to ailments readily, but she seemed completely prostrated at this time. We relied on Christian Science treatments, and though she stayed in bed until Christmas day, she got up then and enjoyed the festivities. Two days later she was in a theatrical performance in which she had quite a part, and the following week played every evening and five matinees. My fear during this time would seem sometimes to gain the mastery, while that of our friends and relatives also was very great. Just one week after Christmas she was again taken ill, while at the theater, and did not seem able to go on for the last act. I was obliged to go a few doors away to telephone to the practitioner for help, which was given at once. Upon my return the child was much better, and more than willing to go on and take her part. She had one more treatment the next morning, and played until the end of the engagement.

Only once since then have I been obliged to ask for help for the little girl, and that was for earache. We were dining at my sister's house when this ailment manifested itself. There were a number of people present, we being the only Scientists. I tried to help the child, but before long every one noticed the look of suffering on her face and the tears in her eyes. We started home, but as we were leaving, a member of the family insisted on my taking a hot-water bag. On reaching our apartment the child cried so loudly from the pain that I could not work for her, so fearful was I of the advice and help which would be forthcoming from our good neighbors should they hear her cries. Though the text-book was read to her during this time, my fear and sympathy seemed to prevail, and I proposed using the hot-water bag. Still suffering, she said decidedly: "No, mama, Science is best. Ring up the practitioner." This was done, and in one hour the child was fast asleep, and has had no trouble since.

To say that I am grateful for Christian Science is to say very little indeed, and my greatest wish is to be able to apply it always. It gives me pleasure to be able to say that I accepted Christian Science gladly and with little prejudice. Reading "The Life of Mary Baker Eddy" by Sibyl Wilbur has helped me greatly, and to my thinking it is a splendid thing to do early in the study of Christian Science.

MABEL A. AVILA, San Francisco, Cal.

✧

It is nearly nine years since I first heard of Christian Science and was told that the varicose veins, on account of which I had always been obliged to wear special stockings and bandages that made my legs very uncomfortable, could be healed. The day I went to the Christian Science practitioner for my first treatment, and while I was standing on the doorstep, these words came to me: "Commit thy way unto the Lord; . . . and he shall bring it to pass." God certainly has brought it to pass, for I am healed.

When my niece was a year and eight months old, she had what the doctors call external tuberculosis, which caused discharges from her hand and one of her big toes. She was sent to me for a change, as her mother had passed on six months before. Christian Science treatment was taken up for her, with the result that in five months she was healed and is now a strong girl.

I am very thankful to God not only for these healings but for others, and likewise grateful to Mrs. Eddy for showing me the way.—L. G. HUSTLER, Southsea, England.

✧

When I came to California, in 1906, suffering from chronic bronchitis and in the first stages of lung trouble, I was very antagonistic toward what I thought Christian Science to be, but two years later began to read the *Sentinel*, and enjoyed it so much I subscribed for it. About a year later I accepted an invitation to a Wednesday evening meeting, and after a few visits realized that I had been entirely healed while reading the *Sentinel*, though not knowing when the healing took place or how it happened. I then became an ardent student of Christian Science, bought Science and Health and the *Quarterly*, and began to study the Lesson-Sermons. Later two treatments for my eyes were given me by a practitioner. I had been born near-sighted and had worn glasses nearly all my life, but they were laid away and have not been worn since, and that was six years ago.

Many troubles, physical, financial, and moral, have been overcome through my own understanding of the truth, and I have had the great pleasure of helping others. Among the greatest blessings was the overcoming of deep sorrow, caused by the passing on of my mother very unexpectedly. My gratitude to God is beyond words for having given us one who could explain the Christ-healing in such simple language that all may understand, and receive the "water of life freely."—A. LOUISE FISHER, Garvanza, Cal.

✧

My interest in Christian Science was aroused through my wife's healing of appendicitis. We were making all arrangements for the operation, of which my wife was in great dread, when it was recommended that we give Christian Science a trial. We did so, and while the healing seemed somewhat delayed, we were thereby given an opportunity to learn what holds one in bondage. This healing occurred in 1911, and no operation has been necessary.

I should also like to tell of the blessings that an understanding of Christian Science brings to those who have a sincere desire for God, or good. A few years ago my wife and I expressed a desire to have a little child in our home. We thought it would be a great blessing if we could adopt some little one who might not be welcome in its present surroundings, as is the case with a great many. We both held to this desire, and apparently without effort on our part we received a call by telephone to the effect that a nine months' old baby girl was in this unwelcome position. We immediately realized this to be our opportunity, and with as little formality as necessary the child became our own.

It would be useless to try to express the joy and happiness we receive every day from the love this little one is reflecting. We are most grateful to God and thankful to Mrs. Eddy for this and other demonstrations of the guidance of divine Love.—HORACE C. HOWE, Boston, Mass.

✧

For many years I had longed for an understanding of God and of the Bible, and at last Christian Science brought the perfectly satisfying explanation, as well as a message of great joy and peace. Although I did not seek help for physical healing, severe headaches, for which relief had been sought in *materia medica* in vain, gradually disappeared. One treatment only, during a severe attack, was given. This, together with an earnest study of Science and Health, accomplished a permanent healing. Later, help was asked for an attack of rheumatism, from which I had suffered greatly, and in two treatments the healing was complete. An alarming experience with ptomaine poisoning was overcome in one treatment by the same loving and consecrated practitioner.

For ten years Christian Science has been our only reliance in time of trouble. While profoundly grateful for the physical healings, I am much more so for the great consolation this knowledge of the truth brought to us during a time of deep sorrow. On page 567 of Science and Health Mrs. Eddy

Digitized by Google

writes, "Truth and Love come nearer in the hour of woe, when strong faith or spiritual strength wrestles and prevails through the understanding of God." During the darkest hours we have found that Christian Science is indeed the Comforter promised by the Master. To prove the sincerity of my gratitude I humbly desire to think and to live according to the will of God. My gratitude to Mrs. Eddy is likewise unbounded, as I realize more and more what she has done, and through her works is constantly doing, for humanity.

ELOISE H. SCHMIDT, Chicago, Ill.

✧

In 1913 I was in a very poor state of health, owing to abdominal trouble. Although a doctor had been treating me for some time, I seemed to grow weaker continually. Then my sister came home on a visit and she had her books, the Bible, *Quarterly*, and Science and Health, with her. She had been healed through Christian Science of a severe case of gall-stone, for which the physician said an operation was the only remedy. She told us of her experience, and said that if I wished she would have treatment for me. She accordingly wrote to her practitioner, who gave me treatment at once, with the result that before we had time to get a reply I was up and doing my work.

In March, 1915, my little four year old boy had some trouble with the kidneys. I wrote to a Christian Science practitioner, asking for one treatment for him, and he was entirely healed. Christian Science has helped me to know that God is an ever-present help in all things. I have become quicker with my work, have learned to control a high temper, and have found things that were seemingly lost; in fact it helps me to solve all of life's problems.

Words cannot express my thankfulness to God for His loving care and guidance, also my gratitude to Mrs. Eddy for explaining to us the teachings of Jesus.

GRACE METCALF MILLER, Diswood, Ill.

✧

This testimony is written so that all may know of at least a part of the good which has come to me through Christian Science. While coasting one day my little son ran into a stone wall, cutting a hole entirely through his upper lip and disfiguring his nose and forehead dreadfully. A doctor was immediately called, also a Christian Science practitioner, and by the time the doctor arrived the practitioner was already at work. Although three stitches had to be taken in my son's lip, the following day he declared there had been no sense of pain when it was done. There was no discoloration following the accident, as the doctor had predicted, and the swelling gradually disappeared. A few minutes after the stitches were taken the boy went to sleep and slept most of the time for two days. The doctor marveled at his rapid recovery, for on the third morning he was up and dressed. Within two months all marks had left his forehead, his nose had straightened, and the scar on the lip was hardly noticeable.

My little daughter has been healed of a large tubercular gland on the neck, and her whole physical and mental condition has been greatly improved. Recently an abscess on my lip vanished, and about three years ago my eyes were instantly healed of a structural defect during a Wednesday evening meeting. Glasses had been worn for over two years and the oculist said they would always be needed. My eyes are used all day and even late into the night for the most trying work. Through the study of the Lesson-Sermon an internal trouble, for which my physician deemed an operation necessary, was overcome in less than a week.

These are only a few of the blessings which God has bestowed upon us. He has also been the source of my supply for three years, and has led me, by means of the patient and wise counsel of a practitioner, through the deepest valleys and darkest nights of mental depression out into the sunshine of Truth and Love. I am deeply grateful to God for His wonderful kindness, and to Mrs. Eddy for helping me to know Him as a kind and loving Father. My heart sings with gladness to be able to write this testimony of the omnipotence of good.

In the case of my son's accident and in practically all the other experiences as well, the healing work was accomplished through absent treatment, the practitioner not seeing us for perhaps a month after the work was done. This is mentioned because it is such a comfort to me, and I want it to be to others, to know that God is here now and always, giving us courage and strength, and we do not need any physical presence to help us, for it is God who does the work.

MABELLE M. PRATHER, Dobbs Ferry, N. Y.

✧

[Translated from the German]

Gratitude impels me to send in these lines as a testimony of the many blessings which I have received since becoming acquainted with Christian Science. From earliest childhood I was a delicate child, and even later I seemed to have but little physical strength. All work that I undertook meant great exertion, and at an examination of recruits the physician told me I had asthma. Having heard that in many such cases the physicians could afford no help, people thus afflicted even passing away as a result, I became very much afraid, especially as a rupture dating back to childhood became aggravated.

In 1914 an aunt told me of having been healed completely of a serious tubercular trouble through treatment in Christian Science. She sent me a copy of *Der Herold der Christian Science*, gave me encouragement, and directed me to the nearest practitioner. I asked him to call on me, and he did so soon afterward. He spoke to us all in the most comforting way, asked us to read the *Herold* as much as we could, and then took up treatment. After a short time—indeed on the following day—I laid aside my pipe and have had no desire to smoke since. Besides, the pain caused by the rupture grew less with every day, and I was able to work more efficiently. The asthma, which was my greatest source of worry, has completely disappeared, the color of my face has changed entirely within a very short time, and the sense of weakness has been replaced by actual strength. I can now see well with my right eye, and this has helped me in my work and makes me enjoy it.

I thank God from the depths of my heart for having been led to find this glorious truth, and think with feelings of sincere love of our Leader, Mrs. Eddy, who labored for humanity that it might be enabled to walk in the way which leadeth unto God.

GOTTFRIED FENZ, Stechelberg b. Lauterbrunnen, Kt. Bern, Switzerland.

✧

In grateful recognition of what Christian Science has done for us I offer this testimony. When our eldest son was about ten years old he was taken with epilepsy, and we did everything we could for him that *materia medica* could offer. He continually grew worse for seven years. He then had smallpox, which left him in a still worse condition. We employed a trained nurse during his illness with smallpox, and after he had recovered from that disease, she asked me to try Christian Science for the epilepsy. I did so, and he was entirely cured through absent treatment. Needless to say, my gratitude for what Christian Science has done for us is most profound.—ADDIE S. ELLIOTT, Edenton, N. C.

Digitized by Google

While living in Two Harbors, Minn., I was taken ill with what the doctor called uremic poisoning, and every one thought the end was near; indeed, I have since been told that the doctor declared I had not many more days to live. My wife then asked me if she should call a Christian Science practitioner, and though I had no particular desire to live, my answer was nevertheless in the affirmative. When the practitioner came, she said she would give me absent treatment provided I would not take medicine, and I agreed to her request.

The doctor's prescription, however, had already been filled, and just before the practitioner arrived I had taken a very small dose, about half the quantity called for; but none was taken after that. The doctor called every day and evidently was under the impression that I was taking medicine according to his direction, for after again making the usual examination in such cases and finding conditions normal, he remarked to a gentleman who happened to be in his laboratory at the time the examination was made that he had never seen medicine work so fast and so thoroughly in all his life. He must have considered my case very serious, because he brought two other doctors to see me at different calls, and after my healing they made the remark to my wife that it was like a dead man coming to life.

I think it was the fourth day after the practitioner called on me that she communicated with my wife over the telephone and said I was healed. Realizing the truth of her statement, I arose, but was so weak that I could not stand without support. My strength returned, however, and my health has been better than before. In the five years which have passed since that wonderful healing I have never had a touch of the ailment. The healing was complete and is permanent, and I am enjoying good health, though I have passed the age of three-score years and ten.

Words are inadequate to express my gratitude, not for this healing alone, but more especially for the knowledge which I have been able to acquire of Christian Science.

A. P. Overland, Duluth, Minn.

✧

Words but feebly express my gratitude for Christian Science and what it is accomplishing for our little family, not only in healing, thereby proving that the Bible is true, but in bringing to us peace and happiness.

Recently we had a beautiful demonstration of the healing power of Christian Science. Our two little girls, four and six years of age, were taken with measles. The rash appeared on a Friday and the younger child seemed to have an unusually severe case. By Sunday the older child was perfectly healed, all indications of the disease having disappeared. The following Tuesday, four days after the disease had manifested itself, the health officer pronounced both children well, at the same time removing the signs from the doors. I felt unusually grateful for this healing, especially of the younger child, for some of the symptoms, which in *materia medica* would have been considered most alarming, were overcome almost as soon as they appeared. I would also like to express my gratitude for the faithful work of our practitioners, who are ever ready to help at a moment's notice. Such healings as this can only come through channels which are kept so pure and free from the temptations of the world that Love can flow through unobstructed.

The privilege of class instruction has been one of the greatest blessings in helping me on in my journey from sense to Soul. My gratitude goes out each day to God, who has given us again this healing truth through His faithful follower, Mrs. Eddy.—Aurelia Crossette Cox, Chicago, Ill.

From Our Exchanges

[W. B. Selbie, M.A., D.D., in *The Constructive Quarterly*]

The more deep and sincere is our religious experience, and the keener our passion for the service of God and man, the more ready are we to work alongside of all those who have the same ends in view, and the more impatient do we become of all formal and traditional hindrances to such action. Given the fire of a genuine religious zeal, and there are no barriers of sect that can withstand it. Once the churches have learned to put first things first and to care for the spiritual needs of men and women and the preaching of the gospel more than for their own maintenance and status, they will be drawn together in spite of themselves.

[*The Outlook*]

God leads men on from point to point, separate achievements which seemed finalities at the start being mere stations for momentary rest. The greatness of life is not in things finished, but in strength developed and in the larger things made possible; the glory of life is not in any achievement, however great; and success lies, not in carrying out the plan nearest the heart or realizing the dearly cherished hope, but in that growth of inward strength which enables a man to substitute a greater will for his will and to conform to a greater law than that which he has defined for himself.

Heaven, we may be sure, is not a stationary condition of bliss, but a progression, without pause or weariness, in an internal growth.

[*The Christian*]

We need to bear constantly in mind that it is impossible to be a Christian merely up to a point. Those who intend to company with Christ must prepare themselves to go to all lengths with him. Otherwise, ere long they will come to a place where a break is inevitable. And should they be willing for this, it will thereby be revealed that he has never really captured their hearts.

The tragedy of many a life is just here. They go on so far with Christ, but when he would draw them farther than the limits of convention or convenience, they part company. And ceasing to go on with him, they cease themselves to grow. For growth of soul is at once the condition and consequence of fellowship with the living Lord. Enlargement of mind, of heart, of sympathy, are indubitable marks of the companionship of the way of life. For no single experience, however vivid, or however wonderful in its power of transformation, can ever sufficiently reveal him to the soul. It is only as we press on to those farther reaches of communion to which he woos us, where self is forgotten and where to be near him in a life of well-pleasing is the heart's unflickering passion, that we really come to know him.

[Rt. Rev. Charles Gore, D.D., in *The Church Times*]

The resurrection of Jesus is not his resuscitation into the old mode of his mortal life. It is the quickening of that dead form into a life of which the world had hitherto had no experience. There is much less difference than Christians are accustomed to conceive between the state of Jesus Christ in the glory of the ascension and the life in which he lived during those forty days of reassurance between Easter and ascension day. He was not living in Galilee or Jerusalem. He was living in a mode of existence which we cannot imagine or conceive, a mode of existence raised above all the limitations of our material experience, from which he manifested himself here or there, as he would or when he would, in one form or

Digitized by Google

another form, but always so as to convey to his disciples the absolute reassurance of the continuous life through death of him in whom they had believed—Jesus of Nazareth. And at last he passed out of their sight by that majestic act of ascension which symbolized in outward and visible form the truth on which henceforth their whole life was to be based; that Jesus Christ in whom they had believed, whom they had doubted, whose failure they seemed to have witnessed, was truly through death and through failure King of kings and Lord of lords, the only real source and center of power in the universe, upon the throne of all the world.

[Very Rev. T. B. Strong, D.D., in *The Church Family Newspaper*]

It will take time before we can reconcile ourselves to sacrificing time and toil in the search for real trustworthy truth, to refraining from talking under the influence of mere emotion. It is a hard lesson to learn, because it is a deep one, affecting our conscience and will at the point where action begins and character is formed. But it is in those deep regions of the soul that Christ is powerful. He stills the storm of anxiety and apprehension which disturbs the soul; in the calm which he produces the soul can see clearly and discern what is true from what is false. There will be no danger of idle words to the man who holds fast by Christ, and whose mind is informed and guided by him, for he will speak out of the abundance of a heart in which the Word who is also the truth is sovereign.

[Rev. T. Rhondda Williams in *The Christian Commonwealth*]

We shall be in God's school for ever and ever, I believe, and the probation will never end; but where and on what range of elevation it will be conducted, and what heights will ever rise beyond us, remains to be found in the experience of eternity. We shall never learn all that God has to teach; therefore the learning must go on through the endless ages of progressive being. This will be the interest of immortality, which would be intolerable without it. And we are conscious of being tried, are we not? Every larger truth which comes into view gives us the feeling of being in the presence of our Judge; we have a consciousness of moral probation in all that we learn; our very quality is tested by it.

[Dr. J. H. Jowett in *The Christian World*]

We cannot have wrong thinking and right living. We cannot give license to our thought and then keep our passions in bounds. Thoughts are the pioneers of our life, and deadly thought is the sure precursor of moral and spiritual death. "Their word will eat as doth a gangrene." Well, all this is bad enough, and it made the great apostle Paul weep. "Nevertheless"! Here, again, we come upon the apostle's habit. "Nevertheless the foundation of God standeth sure." Man's heresy cannot alter God's truth. Man's sinfulness cannot pervert God's holiness. The Lord does not change because man is unfaithful. "Nevertheless"! On that rock the great apostle takes his stand, and faces all the transient usurpations around him. He calmly and strongly confronts the invasion of error, nourishing his soul in faith and in the unclouded wisdom of God, and in the immovableness of His eternal word.

[*The Record*]

It is the renewal of spiritual life that is the great need of the present day, and when revival comes there will be a change in our sense of values and in our outlook.

[*The Christian Intelligencer*]

Money is not the only coin with which we can pay our offerings to the Lord. Work, service, is another.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each, 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

"Christian Science: Man's Dominion Over Evil," a lecture by Edward A. Kimball, C.S.D., has been translated into Russian, Norwegian, modern Greek, and Italian. Pamphlets in these four languages have been published with the English version opposite the translation and are now on sale at prices of our regular pamphlets as shown on the opposite page.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Address all orders for above works, and make remittance by New York or Boston draft or money order, to

Items of Interest

David Lubin, delegate from the United States to the International Institute of Agriculture in Rome, has presented to a group of local economists who met at Philadelphia, Pa., recently, a plan for reducing the cost of living by means of the parcel post. His proposition included the elimination of the middleman, so that profits may be shared by the farmer and consumer alike. It is similar in many respects to the system that is used so extensively in Germany. According to his plan the seller, who has a registry number, indicates on proper cards what he has to sell and the price. These cards are collected by the postman and distributed in racks at the post-office, where the buyer can see them and indicate on other suitable forms his demands and pay to the postmaster the price. These buyers' cards are delivered to the respective sellers, who fill the orders and receive credit slips from the postman. The postman collects the articles and delivers them to the buyers. The seller completes the transaction by presenting his credit slips at the post-office and getting his money.

Among the papers in the latest annual report of the Smithsonian Institution is an article on the excavations at Tel-el-Amarna, Egypt, written by the director of the German Institute of Egyptian Archæology, and illustrated with photographic reproductions of the localities excavated and some of the finds. Tel-el-Amarna is the name given to a number of ruins in upper Egypt on the east bank of the Nile, about one hundred and ninety miles above Cairo. It comprises the ruins of Ekhaton, a city built about 1360 B.C. by the young Pharaoh Amenophis IV as a new capital of his empire, in place of Thebes. He endeavored to establish a new monotheistic religion, which, however, existed only during his reign. After he passed away his court returned to Thebes and the city built by him was abandoned after an existence of only twenty to fifty years.

Is it illegal for the lumber manufacturers of the United States to enter into an agreement not to sell lumber below the cost of production? This is said to be the crucial point in the final brief of the National Lumber Manufacturers' Association, in the appeal for some method of operation which will prevent the destruction of the nation's forests to meet immediate business needs. The brief outlines the lumbermen's ideals for the settlement of the vexing problems of the industry. In a former brief the lumbermen declared that the forests of the nation were being sacrificed at prices below cost of production, and that there was enormous waste in the industry, because of an inability of the lumbermen to cooperate for the elimination of abuses. For instance, it was shown that 65 per cent of every tree cut is waste and never reaches the consumer.

That the unification of the spoken language of China, to many students of affairs in that country one of the most pressing needs of the day, is by no means an insurmountable task is the opinion of the secretary to the Chinese legation at Washington, expressed at the twelfth annual conference of the Chinese Students Alliance at Phillips Academy at Andover, Mass. He said that among the leaders in China the work of unifying the spoken language is recognized as a most important though not extremely difficult one, and that some steps have been taken with the view of establishing the Mandarin dialect as the single spoken language of the country. This end is being approached by means of instruction in the provincial schools.

As a result of several largely attended and very enthusiastic mass meetings, a permanent Public School League has been formed in Chicago for the purpose of breaking the invisible government's grip on the public educational institutions of the city and of the state. The Woman's City Club and the Illinois State Federation of Labor are taking the lead. The claim is made that under recent rulings of the Chicago Board of Education the last safeguard of the civil service has been broken down and the merit system in the selection of public school teachers set aside under political, racial, and religious pressure.

The special committee of the Pennsylvania Bar Association appointed to consider revision of the state penal laws has reported in favor of the abolition of county jails as places of confinement for convicted prisoners. It recommends in their stead the establishment of six industrial farms in appropriate sections of the state, where county misdemeanants can be provided with employment and compensation on the principle about to be put into force in the penitentiaries and reformatories under the prison labor commission created by the last legislature.

Many new fruits, flowers, vegetables, and trees believed adaptable to the United States have been gathered during a three-year expedition to China made by a plant explorer of the United States department of agriculture. This explorer went through central China 1500 miles on foot to the borders of Tibet. The most important discovery probably was the jujube tree, which bears a heavy crop of brownish fruit, delicious when fresh, and forming when dried a confection similar to the Persian date.

Further excavations in the palace of Mineptah by the expedition to Egypt of the University of Pennsylvania museum indicate that the palace is almost twice as large as was at first supposed. This makes it among the greatest palaces of ancient Egypt. The general outline of the ruins has been established, and there have been found in addition to the throne room many chambers, and a vestibule with rows of enormous pillars, carved and colored.

An agricultural credits act was passed by the British Columbia legislature in 1915 and a commission was appointed for the purpose of loaning money to the farmers of this province. This board made the first loans on Aug. 1, 1916. About six hundred and thirty applications for loans have been received from farmers in all sections of the province. The applications already total $1,250,000. The money will be advanced to the farmers at a rate of not more than 6½ per cent.

Large deposits of asphalt ready upon being heated for paving streets have been found on 3,000,000 acres of land situated on the Magdalen River, South America. The discovery was made while Americans and natives were clearing land preparatory to locating wells for the purpose of drilling for oil.

The Congress which has just closed appropriated for the year 1917 for expenditures of the Government more than one billion six hundred million dollars and made authorizations for future expenditures which will bring the grand aggregate of appropriations almost to the two billion dollar mark.

By constructing a 100-mile canal from Red Lake to the Minnesota River a member of the United States geological survey would reclaim 1,250,000 acres of state swamp lands, and as much more of government and private land in Minnesota. The project might cost $25,000,000.

The legislature of Santa Cruz has adopted and cabled to the Danish Government at Copenhagen a resolution favoring the sale of the Danish West Indies to the United States. The colonial council of St. Thomas and St. John already has taken similar action.

The exploitation of ebony and rosewood is one of the desultory occupations of the people of Siam when they are not engaged in rice growing. The wood is bought by Chinese, who are either middlemen or agents of Bangkok Chinese firms.

To facilitate the use of the northern forests of European and Asiatic Russia, and to create conditions favorable to the establishment of large wood-using factories, the Russian forest department recommends the construction of six trunk railway lines, totaling 3952 miles in length.

The chairman of the English House of Commons channel tunnel committee recently addressed a letter to the prime minister in which he detailed the advantages and desirability of a tunnel under the English Channel connecting England and France.

About one seventh of the total railroad mileage of the United States, which represents more than one ninth of the total capitalization, is now in the hands of receivers.

The area devoted to grape culture in 1915 in Spain was 3,080,218 acres, and the grapes produced amounted to 1,670,058 metric tons.

Motor car owners in the United States will pay more than twenty million dollars in registration and other taxes for the year 1916.

The wheat crop of the Canadian northwest is estimated at 170,000,000 bushels at least, and the oat crop at 250,000,000.

The orange season of Valencia, Spain, closed on July 15, 1916, with total shipments by sea amounting to 4,341,959 cases.

The total annual value of the United States fisheries at the present time is approximately seventy-six million dollars.

The Government geologist estimates the iron-ore deposits in Newfoundland at 3,635,500,000 tons.

The Bow of Promise

ROBERT NALL

THE suffering one was discouraged. He had only just entered upon the journey from sense to Soul, and the serpent of fear was dogging his mental footsteps. He had begun to lisp the new tongue of Christian Science in faltering tones, to distinguish faintly between material falsity and the spiritual idea, and had joyfully experienced at least one of the signs that follow a clearer understanding of Truth. Then there came what mortal thought described as a setback, and the way was dark. As with David and Jonah, all the waves and the billows of trouble seemed to sweep over him; doubt loomed large; hope was submerged in a morass of incredulity and skepticism. But remembering with gratitude some past blessings, and calling to mind the volume of praise for God's loving-kindness that, as he read it, often soothed his sense, he cried out of the depths, and the response, as it ever is, was Love's healing balm. Who can describe it? Only those who have experienced it. It is a spiritual unfoldment beyond the ken of mortal sense; the first glimpse of the holy of holies foreshadowed in the perfect redemption.

But let it not be thought that this was a sudden enlightenment. It was the culmination of assiduous searching. The sufferer had been reading about the covenant of the rainbow in Noah's experience, the bow of promise that is to be an everlasting covenant between God and His children. Meditating upon the symbolical language, he remembered that this bow was "in the cloud." This surely was an angel message to him, for had he not read also those lines of our revered Leader (Miscellaneous Writings, p. 388):—

> 'Twas Love whose finger traced aloud
> A bow of promise on the cloud.

And was it ever known that this promise had failed? Indeed, had any of the divine promises, those that stud the Bible from cover to cover like starry gems, ever disappointed the weary seeker for rest and peace? Were they not all confirmed, always "yea" and "amen," in Christ Jesus? And were not the promises that our great Wayshower made being fulfilled today, in every land and clime, in the healing of the sick and the forgiveness and reformation of the sinner? Well, he, the needy one, was just going to rely on those promises; to let his prayer be that spiritual understanding which leads to perfect wholeness. He would accept it as an eternal fact that in his warfare with the carnal mind, health—physical, moral, spiritual—is given unto him that believes and seeks to trust absolutely in the infinite Mind; that is, in God.

It was but a step, this; but what a great step it was! For it had this perfectly legitimate and comforting effect: the cloud of mortal hindrances to healing was dispelled. Henceforth the bow of light, the effulgence of Love's sustaining, illumining, and purifying presence, became to him a token of that covenant which makes impossible any separation between man and God as the source of all righteousness and truth.

And why should this not be so always? What is Christian Science but the fulfilment of the promises? It is calling upon men everywhere to test the power of the faith in God enjoined by Christ Jesus, which is neither more nor less than a scientific knowledge of divine Truth and Love. By its healing work it is proving that there is nothing from which men suffer, nothing whatever which comes under the generic term of evil, that is not now being destroyed whenever and wherever the human delusions about God and His creation are abandoned and spiritual causation is recognized as the only interpretation of the enigma of life.

Mrs. Eddy points out that "to mortal sense Science seems at first obscure, abstract, and dark; but a bright promise crowns its brow" (Science and Health, p. 558). That promise is the practical embodiment of all that constitutes the divine nature in its relation to all that reflects it. It gives no place or credence to mortal sense, but shows that it is a deceiver and is deceived. It establishes as an indisputable fact that the richest legacy which our Father has bestowed upon His children is that spiritual understanding which equips one with the desire and the capacity to know Him and to make obedience to Him and to His law the supreme object of life. It speaks in buoyant, joyous tones of a mental condition which, because it has touched the hem of Christ's garment, is the harbinger of health and peace and a foretaste of the continued victory over the flesh which is the goal of all spiritual activity.

Moreover, this promise embraces all the promises. You can open any page of the Bible and find something which can be so spiritually interpreted in the light of Christian Science that it may become a healing treatment. You can take promise after promise and make such a glorious garland that its very fragrance will effectually disperse all doubt and fear and lift thought to the apprehension of the truth which heals and saves. It is the genius of our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, that it takes these promises, just as it takes the so-called miracles of the New Testament, and shows how they can be scientifically applied to meet every problem, every discordant condition,—all strife, envy, jealousy, all sin, sickness, and death. It unfolds the divine order and plan in a few simple postulates which a child can understand and demonstrate. It takes of the things of Christ, the ideal Truth, and presents them in such an alluring way that suffering and sorrowing ones are awakened from the sense-dream to know that "the letter killeth, but the spirit giveth life." No word of God is merely academic or theoretical: it pulsates with the life of Spirit, and is mighty in the spiritual purgation and transformation which is coincident with rising from false consciousness.

It is here where the wanderer in the byways of materiality is ofttimes puzzled. In his reasoning he either starts from a wrong standpoint,—that is, his whole thought is permeated with the illusions of matter,—or perhaps he is not quite willing to do his part in the redemptive work by surrendering some cherished idol. Now the divine promises are akin to the divine commands; they recognize man's needs and the human capacity for obedience and fidelity, and with all the graciousness of that love which seeks to lift the troubled sense from

Copyright, 1916, by The Christian Science Publishing Society

Digitized by Google

the depths of woe, they present a wealth of blessing beyond mortal language to describe or mortal thought to picture. No one has outlined this in more comforting words than our Leader when, in "The People's Idea of God," she says (p. 3): "Let us rejoice that the bow of omnipotence already spans the moral heavens with light, and that the more spiritual idea of good and Truth meets the old material thought like a promise upon the cloud."

What must in all times be the response if we would partake of the divine inheritance? It can only be that of David: "When thou saidst, Seek ye my face; my heart said unto thee, Thy face, Lord, will I seek." We want to be healed, every one of us. We want to be better men and women. We want to do our part in making this a better world. What are the imperative qualifications for this? We must take the promises and know that they are the concentrated essence of the will of God. In them there is the truth taught and practised by Jesus, and as it is being scientifically demonstrated today by every loyal Christian Scientist. This is the only Science of Mind-healing.

Heaven Realized

JUNE WINONA SNYDER

When Christian Science is first brought to the notice of an individual, its religious teachings strongly appeal to the idealistic side of his nature. His innate yearning for that beautiful experience called heaven is kindled and to a great extent temporarily satisfied when the thought catches the strain of those beautiful words, God is Love. Perhaps some troublesome disease which has been sapping his vitality for months, even years, yields to that activity known as Christian Science treatment; or perchance he has even been lifted out of the "valley of the shadow" itself, and the heart wells forth in true gratitude for these kindly ministrations. He begins to feel that life has a new meaning for him,—the sunshine seems so much brighter, friends so much dearer,— and he believes that he is actually tasting of that bliss which a few weeks ago seemed so far away.

To the earnest seeker after Truth this experience is but the gateway to the outer courtyard of heaven. The word heaven implies harmony, perfection, spiritual purity. True harmony does not include fear, doubt, anxiety, sorrow. Perfection does not include anger, hatred, malice, and their concomitants. Spiritual purity is not acquainted with lust, passion, dishonesty. Ah, how far away, after all, from mortal sense is that outward gate from heaven itself! But the consciousness once awakened to the realization that God is pure Mind and that man is the image and likeness of this Mind, will if honest set to work to purify sense and self, as by no other method could it make the least claim to be like God. The struggles and trials through which one is carried while undergoing this process of purification are indeed many, and the degree of their severity depends upon the amount of error in the human consciousness, or where material sense is most in evidence.

With very little study one soon learns that physical disease is but the externalized manifestation of erroneous or unspiritual thinking, and that as one becomes more genuinely honest in thought, more truly loving and generous, in short, as one's thought changes from a material to a spiritual basis, his body, which is but the subjective condition of his thought, becomes more and more harmonious. The scientific understanding of health being mentally established, finds visible expression in what we call a healthy body. The beginner also learns that mental anguish is but lacerated thought, due to clinging so tenaciously to material hopes, plans, desires, and tendencies, and that this also will subside as he learns something of that humility which says, "Thy will be done," and forfeits his own cherished will, knowing that God's will is divine law, and that this law must be obeyed and enforced or else no permanent harmony can ensue.

These experiences, which are so apparent to the human sense, are but the Gethsemane through which we all must pass, as the Master did. Because of the law of progress being infinite and ever operative, these seeming trials are but opportunities for the accomplishment of the destruction of all unspiritual thinking in order that clarified thought may expand, unfettered and untrammeled. Jesus was "led by the Spirit into the wilderness." He was not led into error by God, but the need seemed to be for further elimination of material sense before thought could rise into the full and complete apprehension of the wonderful truth that substance is wholly spiritual. Because he chose to be governed by the spiritual law of progress, and that he might prove in its fullest meaning each statement of the truth which he had said would make mankind free, his experiences in the wilderness were necessary, and the victory there achieved over the material senses later culminated in his ascension.

It is only when we rebel at these opportunities to go higher, and murmur over the loss perhaps of some human personality or over the demand for the entire relinquishment of all material thinking, which to material sense seems to confer ease and comfort, that we are tempted to believe our first glimpse of heaven was illusive and the Elysian fields which so quickly sprang into view were but myths. The methods induced by the infinite law of progress, though seemingly drastic to the human sense, are but the gentle manifestations of God's tender care, of that same Love which we knew in the beginning, and obedience to their demands confers the peace that is "the fruit of conquered sin" (Christian Science Hymnal, p. 274).

We find our real joy in knowing and reflecting God, in dwelling in that sweet consciousness of Love's ever-presence. Thus we find Love's gentle hand ever leading us upward and onward, not into a locality called heaven, but into a spiritual state where man will be, as Mrs. Eddy says (Science and Health, p. 598), "in the full consciousness of his immortality and eternal harmony, where sin, sickness, and death are unknown."

Infinite Supply

JOHN M. DEAN

Dread of the future is one of the besetting sins of mankind. Ghostly shadows haunt the path of the average mortal; conjectural disaster dogs his very footsteps, and grim want is always lurking just around the corner. Taught that he begins to die the moment he is born, mortal man soon comes to believe that the whole universe is working in one gigantic conspiracy against him. He even comes to believe that God sanctions every trap set for his tired and stumbling feet, and thinking thus he becomes a doubter, an agnostic, a cynic. A wrong conception of God naturally begets a correspondingly wrong conception of man and is the source of every phase of false thinking.

On page 60 of Science and Health Mrs. Eddy says, "Soul has infinite resources with which to bless mankind." Divine Love has a supply for every need, and all that the Father hath belongs to His children. Infinite Love supplies our needs in every direction, but God's children can claim their birthright only in proportion to their acquaintance with the Father. Then as we deserve it, even on the material plane, we have an unfailing abundance upon which to draw. It does not follow, however, that there will be an overflowing of

Digitized by Google

material things. In the story of the meal and oil, as related in the first book of Kings, we are not told that the barrel and the cruse overflowed, yet there was always enough.

There should be no gloomy forebodings regarding the future of either individuals, institutions, or nations. Jesus said, "Heaven and earth shall pass away, but my words shall not pass away." Our false concepts of all things will be destroyed, but the substance of Spirit, than which there is none other, will stand forever. No matter what trials may come to human experience, all that is good will remain, and this is all we should ask or desire. What does it matter if some pet theory or false god does meet shipwreck in this inevitable cleaning up! Better that the gold should be purified than remain mixed with baser things; and while we may dread and attempt to shun the "refiner's fire," it comes to try us all.

There is no royal road to heaven, but there is a road, and sooner or later each of us must walk therein. We can take only one step at a time, but that step rightly taken strengthens us for the next. We cannot fathom the so-called mysteries of Spirit except in the degree of our understanding, and we must not attempt the hundredth step until we have taken the other ninety-nine. A homely philosopher has said that "our worst troubles are those that never happen," and we have only to recall our own experiences to know that this is so. When we have learned to grasp the possibilities of today there need be no fear for tomorrow.

Unreasoning fear of the future has disturbed every realm of human thinking, so that even the ultimate fate of our planet has become a theme for speculative discussion. Geologists have been disturbed regarding the length of time which will elapse before the earth becomes cold and barren. Others have attempted to measure the world's possible coal supply and have predicted dire disaster. Still others have speculated on the possibility that the earth will become overcrowded with people. All such hypotheses are futile and profitless. Like all human reasoning, they only lead humanity into a labyrinth of doubt and gloom from which there is no escaping until thought is turned Spiritward. God never deserts His people, and if one phase of material supply should become exhausted, there will be another and perhaps a better to take its place. By improving our beliefs about material things we begin to apprehend spiritual facts, and the loss of what we deem a material necessity may force us to discover a better way.

Men must learn that there is never a real demand without a corresponding supply. The history of the world shows that in every crisis there has arisen the man or the method to meet the need. True, such men and methods have not always relied on pure spirituality, but they have come on the field of action in a form which the world could comprehend, and were prepared to do good on a plane just as spiritual as human understanding would permit. And so the early disciples had their John the Baptist, the Reformation had its Luther, England had her Magna Charta, America had her Washington and her Lincoln. So too in the realm of invention, when the need became imperative there came forth the steam-engine, the telegraph, the telephone, the electric light, the automobile, the aeroplane; and so it will ever be with wonders which human thought has not yet apprehended.

Nearly fifty years ago the world was under the blight of a gross materialism which threatened the very foundations of civilization. Social conditions were chaotic, governments were trembling in the balance, skepticism was rampant, and a feeling of uncertainty was over everything. Never in the history of the modern world had the times seemed more unpropitious for the advancement of religious thought; but it is often the case that adverse conditions immediately precede and help to develop that which is their very antithesis.

In the midst of this world-wide unrest and unbelief there came forth a gentle woman, armed only with "the sword of the Spirit," a modern type of David going out to meet Goliath. At first no one noticed her, but gradually the "poor in spirit," who were hungering and thirsting after righteousness, came to listen to her teaching. For these the dawn began to break, and the Science of Christianity slowly but resistlessly permeated human consciousness, until today not only its acknowledged beneficiaries, but unnumbered others, who are totally unconscious of the fact, have been helped by its gentle ministry.

And what of today? At this present time, when the world seems to be seething with all that is unspiritual, shall we be disheartened by outward appearances and give way to despair? Christian Science is a religion for every emergency, and history will repeat itself. To the Christian Scientist war and tumult and disaster but afford a fresh opportunity to do his part in restoring the equilibrium. At such a time as this it will be well if every Christian Scientist gives frequent and careful study to the prophetic words of Mrs. Eddy as found on pages 96 and 97 of Science and Health,—words which can be fittingly applied to every outbreak of error until error is no more.

If these inspired sentences are pondered and heeded, one may rest assured that out of the wreck and ruin of war there will arise a newer and nobler concept of the spiritual brotherhood of man. In the final summing up of every conflict "Love is the liberator" (Science and Health, p. 225). If those who know the truth will rise to the occasion, as is their duty and privilege, all strife and bitterness will soon be forgotten, and the world will hear again that song of the angelic host, "On earth peace, good will toward men."

From the Unreal to the Real

REGINA B. M. NASH

Ever since the writer came into Christian Science the chapter entitled Footsteps of Truth in "Science and Health with Key to the Scriptures" has been much treasured and loved. When she first began to read the text-book, this chapter seemed a special and personal message. At a recent Wednesday evening meeting selections read from it were much enjoyed and new and higher meanings were realized. Then the sense of freedom which Christian Scientists experience on their journey from the unreal to the real was made clear.

In that wonderful eighth chapter of Romans Paul tells us that "the carnal mind is enmity against God." Christian Scientists know well how true this is. The carnal mind is a network of wrong thinking about God and man, and only as we begin to rid ourselves of it do we take our first step toward the real, the realm of infinite Love. One might ask how we are to overcome the carnal mind. Mrs. Eddy has answered this in Science and Health, where she says (p. 201): "We cannot fill vessels already full. They must first be emptied. . . . The way to extract error from mortal mind is to pour in truth through flood-tides of Love." On page 1 she says, "Desire is prayer." We are liberated from error, or the carnal mind, and experience and enjoy harmony and freedom, just in proportion to our desire for righteousness, for where righteousness is there is peace.

No one need think he can advance in Christian Science while clinging to old garments, to pride of worldly possessions and of mere intellectuality. All these must go before the powerful search-light of Truth. If our desires are sincere

Digitized by Google

we shall indeed experience freedom in our journey toward the light. Fears and doubts will vanish into nothingness, and perfect assurance will be ours. As we progress we are encouraged and refreshed, for all the while the "old man" is being "put off" and the "new man" is being manifested.

How wonderful it is to know that we shall ultimately realize we are even now in heaven, harmony; that we are no longer poor or need fear poverty, but that as "heirs of God, and joint-heirs with Christ," we receive plentifully of our Father's bounty. When we are guided solely by Truth we shall always enjoy plenty and live in the realization that there is no scarcity, but abundance and affluence. We shall then know that we can neither hate nor be hated, for we shall dwell continually in Love, and so enjoy perfect protection. We shall know that because good permeates the whole universe we are no longer sick and never shall be, for we have grasped the eternally present and available Principle of life. What a blessed foretaste of heaven this is!

We are reminded of Paul's statement, "To be carnally minded is death; but to be spiritually minded is life and peace." When the carnal mind, or wrong way of thinking, is entirely overcome, and spiritual-mindedness, or right thinking, is established and acknowledged, then we shall have reached the real, where there is no sin, sickness, or death, but Life, Truth, and Love, absolute and supreme. Let us as Christian Scientists do all we can to speed the day. When our thoughts become pure and strong enough to receive and give out only the true and eternal, and we are willing and desirous to cast away all selfish, world-tainted thoughts, our task will be light, and we shall tread with peace and joy the path that leads us triumphantly into the radiant light of perfect day.

Bondage Ended

ROLAND L. STRAUSS

On page 227 of Science and Health Mrs. Eddy writes, "The law of the divine Mind must end human bondage," and again a little farther on she says, "Slavery is not the legitimate state of man." Considering bondage or slavery in a broad sense, it is clear that sin, sickness, and death, as well as imprisonment and the personal domination of individuals or nations over one another, are some of the apparent conditions which enslave men. A further analysis of the cause of these conditions shows primarily the existence of an erroneous belief that man can think, plan, or do something independent or irrespective of God, good. The extent of bondage, therefore, is proportionate to one's belief that there is a power which can work in opposition to the perfect law of divine Mind, which is just, pure, complete, and most harmonious.

The writer had the glorious privilege of learning through Christian Science of the real man's birthright of freedom. He also became convinced that the condition of bondage or imprisonment results from the same lie which has seemingly deceived mankind for centuries, when he had the opportunity of assisting in introducing Christian Science services in one of our state prisons. It was found that each prisoner had a special reason or excuse for the condition in which he found himself. While the experiences of these men appeared to be different, yet it was quite evident that the cause in each particular case was the same, namely, they thought that they could think, plan, do, or accomplish something which was not good or Christlike, which was not of God, or that God was not capable of sustaining them in their endeavor to do good.

When this faulty condition of thinking is removed from any negative human experience, it will be found that life in God presents unlimited freedom, overflowing joy, permanent peace, and a realization of ever-present Love. The truth is that the man of God's creating can not and does not exist without God, and if God is all-power and fills all space, how can man, made in the image and likeness of God, good, really express himself in any other way than as he sees the Father do? We read that Jesus said, "The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise."

It is the same omnipresent God who delivered the children of Israel out of "the house of bondage," and who is still here and fully potent again to lead all sincere seekers after and faithful followers of Truth to "a land flowing with milk and honey," to a correct understanding of God,—freedom, health, prosperity, peace. Christian Science is indeed the liberating power, which, like Moses, teaches us to have faith in God, as the Master required, and in this way it gently and safely ushers us into the presence of the Most High.

Grateful Tribute

MARY E. WHEATON

"WHAT is this key, and where can I find it? If there is a key to the Scriptures I want it." Thus inquired one who had evidently attended a Christian Science service for the first time, and there heard the announcement made that "correlative passages" would be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy. The thought of a key to the Scriptures had attracted this truth-seeker more than anything else at the service, and her inquiry reminded one who had heard it of the ever-increasing debt of gratitude which we as Christian Scientists owe our beloved Leader for unlocking the spiritual treasures of the Bible to this age.

It was not until the text-book of Christian Science was placed in the writer's hands by a loving friend that the spiritual meaning of the Bible began to unfold to her, and the understanding thus gained was seen to be of practical value in every-day life. This "Key to the Scriptures" reveals as basic truth the true concept of God and man. God is revealed as Mind, and this Mind is shown to be divine Principle. It therefore follows that man as God's idea is "not material; he is spiritual" (Science and Health, p. 468), since man is the image and likeness of his Maker. This same God is shown to be good, and thus evil is seen to be without anything to sustain it; merely a negation, nothingness.

Science and Health also teaches the allness of God, for on the page from which we have just quoted we read, "All is infinite Mind and its infinite manifestation, for God is All-in-all." Other synonyms for God as found in this text-book are: Spirit, Soul, Life, Truth, and Love. We are furthermore taught to think of things as thoughts, and to know that only good thoughts are real or true, and therefore that all evil in mortal consciousness is but a false belief which can be put out or destroyed.

From the first chapter of Genesis, where we read, "And God saw every thing that he had made, and, behold, it was very good," to the Alpha and Omega of Revelation, we find this same spiritual truth,—the conquest of Truth over error. The history of the children of Israel becomes a wonderfully translucent account of the victory of good over evil, each step leading to a higher concept of God and God's creation. At first Truth was perceived but dimly by these people in dire bondage to evil and bowing down to false gods; but as their eyes were opened to see a way of deliverance, and as each trying experience brought a way of escape, they found that they could trust in God, and confidently say in the words of Samuel, "Hitherto hath the Lord helped us."

Digitized by Google

Christian Science shows us that our problems of today must be met and mastered in the same way as were those of olden times. Are we in bondage to beliefs of sickness, sin, sorrow, or poverty? Let us read the account of the healing of the lame man when Peter said, "In the name of Jesus Christ of Nazareth rise up and walk;" then hearken to the gentle voice of Jesus saying to the woman who had sinned, "Neither do I condemn thee: go, and sin no more." As we turn to that pæan of joy found in the thirty-fifth chapter of Isaiah, which closes with these words: "They shall obtain joy and gladness, and sorrow and sighing shall flee away," we rejoice that through Christian Science we have already begun to realize its full import. Then the fixed rule whereby we may realize the affluence of supply as found in divine Love, is given in these words of our Master: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." Truth is from everlasting to everlasting, and is ours today, available here and now.

We find the so-called miracles of Christ Jesus to be divinely natural results of an understanding of the spiritual, immutable law of God, and in humble, trusting confidence we accept Jesus' statement: "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

Our work is to begin just where we are to apply this Principle of healing, according to our highest present understanding of Truth. Thus we go forth like David of old, undismayed by Goliath,—a type of evil,—with these words ringing in our ears: "The Lord that delivered me out of the paw of the lion, and out of the paw of the bear, he will deliver me out of the hand of this Philistine." From the promise given to Moses, "My presence shall go with thee, and I will give thee rest," to where we read in Revelation, "The Lord God omnipotent reigneth," we find this same loving thought of divine guidance.

This age is indebted to our revered Leader for the truth as revealed in Science and Health which brings this spiritual perception and illumination. Gratitude beyond words springs to the honest heart, that one in this age was found pure enough to receive this truth and with sufficient moral courage to give it to the world.

Illumination

L. E. HEDBERG

Open, ye gates of dawn,
The sun of Love comes through!
All mists of doubt are gone,
And daylight shines anew.

There is no night so dark
But morning will dispel,
For when the hour is blackest, Hark!
A cry comes, All is well!

The midnight shadows fade
Into a sea of light;
All that is good God made,—
Good is the only might.

Then open, gates of light!
Children of God, pass through;
All earthly fears now take their flight,—
Praise God for life made new.

Selected Articles

[Judge Clifford P. Smith in *Springfield* (Mass.) *Daily News*]

The report in the *Daily News* some time ago that a New York coroner had held a Christian Science practitioner liable for the death of a child whom he failed to cure, is another illustration of what an office-holder may do when actuated by professional class interest. The action of this coroner was put upon the theory that a medical doctor would have saved the child's life, and that any one but a member of this profession who tries to aid a sufferer from diphtheria is a criminal. By way of comment on this conclusion it can be said that the vital statistics published by the New York department of health show that no less than 1754 persons died from this same disease in that state in 1915. They also show that the discovery and use of the much heralded remedy for diphtheria called antitoxin has not materially reduced either the prevalence of this disease or the percentage of deaths from it. Indeed, such reduction as has occurred in recent years is just as reasonably credited to other causes and conditions as to the use of antitoxin.

Now nearly all of the 1754 persons to whom reference has just been made were children, and nearly all of them were attended by medical doctors. An unbiased person might therefore inquire whether any of these doctors were charged by a coroner with criminal responsibility in any of these cases. It could be said truthfully that Christian Science is a more reliable remedy than anything of a material nature, and that Christian Science might have saved the lives of many of these children. Of course no Christian Scientist would contend that either parents or doctors should be regarded as criminals for doing what they sincerely believed to be best for the children, but a just rule is capable of general application.

A recent case in England may serve by way of illustration. In that case a young recruit in the British army was inoculated, and died as the direct result of this supposed remedy. His relatives or friends demanded a coroner's inquest, and one was held, but the coroner disposed of the proceedings by saying, "The inoculation was perfectly right and it was performed in the usual way." It would be difficult to state the law as construed by these two coroners. Perhaps, however, it might read as follows: In the practice of medicine it is lawful for the patient to die, but in the practice of Christian Science it is only lawful for the patient to recover. Fortunately there would be a hint of fact in such a statute, for as Mrs. Eddy, the Founder of Christian Science, has said (Science and Health, p. 311), "When humanity does understand this Science, it will become the law of Life to man,—even the higher law of Soul, which prevails over material sense through harmony and immortality."

✧

[Robert S. Ross in *Yates County Chronicle*, Penn Yan, N. Y.]

If available records of Jesus' ministry left any doubt about what the requirements of Christian discipleship are, there might be some excuse for the critic's declaration that Christian Science "antagonizes every essential of Christian truth." But these records do not leave any doubt; they state in direct terms exactly what is required of Christians if they would be worthy of the name. At one time, for instance, Jesus said, "He that believeth on me, the works that I do shall he do also." At another time he said, "These signs shall follow them that believe," and then he enumerated what these "signs" would be, including healing the sick. At still another time he said, "Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give." Many

Digitized by Google

other passages could be cited from the New Testament to prove beyond cavil that the healing of the sick by spiritual means and the understanding of Jesus' teachings go hand in hand and are inseparable.

What would be thought of a person who claimed to be a mathematician but who could not solve the problems given him to test his ability? Would not the inevitable conclusion be that he was professing that which he did not practise? Christianity is a demonstrable religion; it is based on unchanging Principle. Jesus declared that his true followers would be known by their ability to repeat his works. Can one reasonably claim to understand scientific Christianity unless he can do these works? "The hour has struck," Mrs. Eddy writes in the Christian Science text-book, "Science and Health with Key to the Scriptures" (p. 342), "when proof and demonstration, instead of opinion and dogma, are summoned to the support of Christianity."

Those well-meaning preachers who, like the critic above referred to, attack Christian Science, do so in the face of the words and works of the Founder of Christianity, for Christian Science and Christianity are one. If the critic doubts this statement, he can prove its soundness by conscientiously studying Science and Health and putting into practice what he learns. Christian Science is a spiritual system; it cannot be understood through matter. Spiritual perception alone can compass its heights. Did not Paul say that spiritual things must be "spiritually discerned"?

If God is good and the only creator, all that is must of necessity be good. Furthermore, it must be spiritual, for God is Spirit. Sin, sickness, and death are neither spiritual nor good; hence they were not made by God; and if God did not make them, they were not made and do not exist as a reality. If this triad of errors has any seeming reality, it must be because mortals believe the unreal to be real; but a lie can never be true, no matter how many people believe it or how many centuries it has been believed. Jesus tore the mask from matter and evil by showing up their unreality. It was this process of reducing error to its native nothingness to which he referred when he said to the Jews, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free."

It is quite true that Christian Science declares that God, Spirit, Mind, is All-in-all. Christian Science does not, however, teach that God is in His opposite, matter, or that spiritual man is in a material body, for that would be pantheism. Christian Science declares that matter is but the objectification of a false, material sense of things, a sense which is referred to by Paul as the carnal mind and by Mrs. Eddy as mortal mind. It also declares that this erroneous sense of things will be overcome, and spiritual existence will be recognized as the only reality, in the proportion that we have in us the Mind of Christ.

One whole chapter in the Christian Science text-book is devoted to prayer. Many people who are not Christian Scientists have pronounced it to be the most beautiful treatise on the subject that has ever been written. Christian Scientists are taught to pray aright, and to "pray without ceasing." Every person who becomes a member of The Mother Church, The First Church of Christ, Scientist, pledges himself to pray each day as follows: " 'Thy kingdom come;' let the reign of divine Truth, Life, and Love be established in me, and rule out of me all sin; and may Thy Word enrich the affections of all mankind, and govern them!" (Manual, Art. VIII, Sect. 4.) The aim of all consistent Christian Scientists is to make their lives one continuous prayer of gratitude to God for His goodness.

One of the chapters in Science and Health is entitled Atonement and Eucharist. If the critic will read this chapter he will doubtless be less ready to charge that Christian Science denies the atonement. Furthermore, the fourth of the religious tenets of Christian Science, on page 497 of Science and Health, reads as follows: "We acknowledge Jesus' atonement as the evidence of divine, efficacious Love, unfolding man's unity with God through Christ Jesus the Way-shower; and we acknowledge that man is saved through Christ, through Truth, Life, and Love as demonstrated by the Galilean Prophet in healing the sick and overcoming sin and death."

✧

[Henry Van Arsdale in *Ontario* (Cal.) *Report*]

Is Christian Science Christian? This question is raised by a clergyman in a recent sermon. The conclusion he reached was that "Christian Science is not Christian." Of course every reader realizes that in saying this the clergyman voices merely his own opinion, which proves nothing. At the outset it may be granted that, just as the church which this clergyman represents differs in its doctrine from other so-called orthodox churches, so the teaching of Christian Science differs in many particulars from those of his church, —in its view of the Bible, its concept of God, and its assured knowledge that Christ Jesus came bringing a practical religion which redeems the sinner, heals the sick, does away with poverty, and brings to a man that which enables him to meet every adverse human circumstance.

The conclusion that Christian Science is not Christian cannot be drawn from a study of the Bible. Christian Science is correctly named; that is, it is exact knowledge gained by correct thinking, verified by proof, and formulated in a rational system derived from the religion of the Christ, or what is known as the Christian religion. Jesus laid down the rule when he said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." Now of course the truth Jesus referred to was the absolute truth about God; such truth is exact, demonstrable, and scientific. The knowing of this truth, Jesus later said, is "life eternal." Christian Scientists are endeavoring to gain this knowledge, and they are enjoying the freedom their efforts bring. Jesus also laid down the standard by which one may claim to be a Christian: "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father. . . . If ye shall ask anything in my name, I will do it." In these particulars Christian Science offers, in place of mere opinion that it is not Christian, proof that it is Christian.

The conclusion arrived at by our critic cannot be derived from a study of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. The first tenet of the Christian Science church, to be found on page 497 of this book, reads as follows: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life." Jesus said, "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." As stated above, Christian Science in its appeal to the public relies upon its ability to make the promises of the Bible a present possibility, and if it is to do this successfully, it realizes that it must offer works rather than words.

Again quoting from the Christian Science text-book (p. 358): "Christian Science, understood, coincides with the Scriptures, and sustains logically and demonstratively every point it presents. Otherwise it would not be Science, and could not present its proofs. Christian Science is neither made up of contradictory aphorisms nor of the inventions

Digitized by Google

of those who scoff at God. It presents the calm and clear verdict of Truth against error, uttered and illustrated by the prophets, by Jesus, by his apostles, as is recorded throughout the Scriptures. Why are the words of Jesus more frequently cited for our instruction than are his remarkable works?"

The conclusion drawn by our clerical critic cannot be derived from an observation of the lives of Christian Scientists, or from the works of healing which Christian Science is doing. He admits this, for he gives testimony as to the character and Christianity of Christian Scientists. He also admits the healing work, though grudgingly. In these admissions, however, he is not entitled to any particular credit, for such observations are made by every investigator into the subject.

It is sometimes charged against Christian Scientists that they do no missionary or charitable work. In fairness those making such charges should say that Christian Scientists do not do missionary and charitable work in the way they think it should be done. As a matter of fact, the Christian Science movement fulfils the demands of missions and charities in a way and to an extent not attempted or exceeded by any other organization of the day. This can be easily verified upon inquiry of any Christian Scientist. It is true that our good deeds do not often appear in print, but there are hundreds of thousands of individuals who are personally glad to testify of them.

✧

[Thomas E. Boland in *Chambersburg* (Pa.) *Public Opinion*]

When one undertakes to show the "folly" of Christian Science, he assails a religion based entirely upon the Bible. The first tenet of this faith (Science and Health, p. 497) reads, "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life." In every service and meeting of the Christian Science church the reading of the Scriptures occupies an important part in the order of service. Jesus the Christ is accepted by this religion as the Wayshower, and all his teachings are regarded as practical now as they were by his followers when he was on earth. His declaration, "He that believeth on me, the works that I do shall he do also," is not separated from his other admonitions, and constant endeavor is made to demonstrate that primitive Christian healing which occupied so large a part of Jesus' time after he began his public ministry. Therefore with this full acceptance of the teachings of the model Christian, and with this consistent effort to follow all his commands, Christian Science is certainly worthy to be classed as "Christian."

It is granted by Christians at least, that Christ Jesus healed sickness, disease, deformity, and overcame death itself, through his knowledge of God and of man in God's image. His knowledge never failed to solve the problem at hand, whether it was feeding the multitudes or stilling the winds and waves. This knowledge must have been exact, even as it was practical and instantly available; therefore it was scientific, since the definition of science is "exact knowledge." That Christian Science holds this view of Jesus is shown by the following extract from Science and Health (p. 476): "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." The truth set forth in Mrs. Eddy's writings has healed multitudes of sufferers from all kinds of ills; hence it must be knowledge, "exact knowledge" of God and man, therefore "science."

No support for indictments against Christian Science can be found in the pages of Science and Health when enough of the context is used to make the author's meaning clear. Sometimes critics have separated phrases or clauses from necessary contexts, and so forced apparent contradictions. Christian Science does not teach that Deity is personal in a finite sense. On page 269 of Science and Health Mrs. Eddy says: "Human philosophy has made God manlike. Christian Science makes man Godlike." Personality is defined in the Standard dictionary as "conscious separate existence as an intelligent and voluntary being;" therefore if the distinguishing characteristic of personality be the quality of self-existence, then Christian Science ascribes exactly this to God, as well as all else that is perfect, immortal, and divine. This faith does not, however, teach God as person in the manner in which this word is ordinarily used when applied to human beings; in fact the words person and personality when applied to Deity frequently lead to much confusion.

Christian Scientists are such because in this religion they are convinced they have found a way of more practically applying the truth about God to all human affairs,—where it is vitally needed. People do not usually leave one thing to go to something worse, when their own most important affairs are directly concerned, and it may be safely said this is not the case with Christian Scientists. To say the adherents of this faith are generally inconsistent as between practice and profession, is a generalization as loose as it is utterly void of foundation; moreover, to take this ground is to go counter to the fault usually found, which is based on their consistency in life and profession. Did Christian Scientists simply profess a creed and stop there, little or no criticism would ever be heard of them; but because the reverse is the case, the accepted schools of thought are roused from complacency and occasionally stirred to criticism.

The Purer Sense

LEONARD H. GIBSON, JR.

Mine eyes behold the teeming earth,—
The brooks, the flowers, the trees,
The aspiring hills, the valleys deep,
Meadow and field and forest steep,
Sunshine and shadow, calm and storm,
Bird and beast: the human form
Ruling o'er all of these.

Mine ears drink in earth's melody,—
The pagan pipes of Pan,
The singing of the joyous bird,
The breeze's murmur softly heard,
The beating waves, the waterfall,
The thunder's crash; sweeter than all,
The varied voice of man.

But thought perceives yet other things:
Not music of the grove,
Not sight, nor touch, nor fragrance rare
With Mind's ideas can compare,
For heavenly sight in Mind appears,
And peerless music of the spheres:
The radiant sense of Love.

Let my remembrance ever be
That purer sense which leads to Thee.

Editorial

The Christian Science Benevolent Association

It is our pleasure and privilege to announce to the field that preliminary steps have just been taken toward the formation of a new and important department of the organized work of Christian Science, to be known as The Christian Science Benevolent Association. We present herewith a statement of the aims and purposes of this new activity, together with a brief history of its development from the time of its inception by Mrs. Eddy to the present.

Those who were in personal touch with our Leader know that she recognized and often spoke of the need, at this period of the demonstration of Christian Science, for properly conducted institutions where those seeking relief through Christian Science might find such care and attention as would assist in their recovery. In about the year 1905 Mrs. Eddy consulted with Mrs. Mary Beecher Longyear of Brookline, Massachusetts, in regard to the founding by Mrs. Longyear of an institution which Mrs. Eddy proposed should be called a "sanatorium," and which should include provisions for such instruction in practical methods of caring for those under treatment as is consistent with the teachings of Christian Science.

In a letter to Mrs. Longyear under date of Jan. 15, 1905, Mrs. Eddy wrote:—

"God is moving on the face of the waters of your thoughts and His creations will appear.

"I propose that the institution you found be called Sanatorium . . . that it be a resort for invalids without homes or relatives available in time of need; where they can go and recruit.

"Our cause demands a wider circle of means for the ends of philanthropy and charity, and better qualifications for practical purposes. This latter lack in students of Christian Science is a great hindrance to our cause and it must be met and mastered. The students need to be qualified so that under the fire of mortal mind they can stand, and 'having done all, to stand' (St. Paul)."

During the ensuing year Mrs. Longyear kept in communication with our Leader in regard to her desires, and plans for the founding of an institution gradually took definite form. However, on Jan. 21, 1906, Mrs. Eddy wrote to Mrs. Longyear as follows:—

"Since reading your letters, pondering the subject of an institute or sanatorium, and studying our Manual, I see it is not best for you to take the initiative in the matter. It properly belongs to The Christian Science Board of Directors to do that, for thereby we shall avoid much confusion in the future. So please drop the matter."

During the next three and a half years Mrs. Eddy frequently spoke of the needs of our cause in this direction, and on July 27, 1909, she sent the following letter to this Board:—

"Box G, Brookline, Mass., July 27, 1909.

"The Christian Science Board of Directors,

"Beloved Brethren:—

"Please vote on the adoption of the following by-law, and if adopted publish it in our periodicals and in the Church Manual. Mary Baker Eddy.

"By-law

"The Mother Church shall establish and maintain a Christian Science resort for the so-called sick."

The proposed by-law was at once adopted and plans for the establishment of the "resort" were considered. After further correspondence with Mrs. Eddy, however, she advised this Board through her secretary, on Aug. 11, 1909, that "if The Mother Church is not ready to establish and maintain a Christian Science resort for the sick, she [Mrs. Eddy] is willing to let this matter rest for the present and suggests that you vote on the repeal of the by-law providing for the same."

The by-law was at once repealed. Although temporarily delayed, this Board has not lost sight of its obligation to found this work for which the demand has so definitely and rapidly increased, but has only awaited the time which seemed right for carrying out the project.

A short time ago Mrs. Longyear offered to make a gift of a valuable tract of over twenty acres of land, beautifully situated in the suburb of Brookline, as a site for the first Christian Science home or sanatorium to be established and conducted by The Mother Church. Our appreciation of this generous offer was immediately expressed, and Mrs. Longyear was notified that the gift would be accepted. The project will be developed as rapidly as possible. Plans for buildings will be started at once, and it is hoped that the actual work of construction will commence not later than the early spring. Such announcements as are necessary will be made from time to time through our periodicals.

The Christian Science Board of Directors.

✧

No Superstition in Science

On page 83 of Science and Health Mrs. Eddy says, "Between Christian Science and all forms of superstition a great gulf is fixed, as impassable as that between Dives and Lazarus." It goes without saying that the spiritual illumination which comes with physical healing in Christian Science removes from human consciousness many of the dark shadows which have seemingly been responsible for a multitude of ills; but as the demand of Truth is perfection, we need to press on until no false belief obscures for us the sunlight of divine Life.

When Paul preached on Mars Hill he was wisely conciliatory to the people whom he addressed, some of whom were deeply religious according to the beliefs of their own nation and time, while others were philosophical rather than religious; but all of them believed in matter and its asserted laws, and so from Paul's spiritual viewpoint they were still in bondage to superstition respecting both God and man. We must not forget that while "his spirit was stirred in him, when he saw the city wholly given to idolatry," his only desire was to make known to them the true God whom they were ignorantly seeking to worship, and so we find him presenting a lofty concept of Deity as one who is never far from any of us, because "in him we live, and move, and have our being." There are perhaps very few who realize that the belief of life in matter is responsible for all superstition; yet a clear analysis of this statement will prove that all forms of superstition are attached to materiality, and that when we rise to perceive the essential dignity of divine Mind and its manifestations, superstition is ruled out.

Students of physical science would of course disclaim all belief in superstition, and the appeal to reason certainly seems to be a step in the right direction; but, as Mrs. Eddy reminds us (Science and Health, p. 167), "an error in the premise must appear in the conclusion," and so the belief of life in matter, which means a sense of life apart from God, must result in error and discord until material belief gives place to spiritual understanding. Strange as it may seem,

Digitized by Google

many who are accounted intelligent people have been found willing to admit that certain physical ailments could be cured by merely carrying about in the pocket some article, as, for instance, a potato or a chestnut, and this, too, after what were considered powerful drugs had been taken in vain. Physicians would smile at the recital of such experiences, but they could not deny them and they would undoubtedly regard the belief in the potato or the chestnut as superstitious, while they would hesitate to admit this of their own orthodox remedies. The important question, however, at this point would be how it happened that the one apparently cured while the other failed to do so.

To the Christian Scientist this query would present no difficulty, for he has learned that as belief changes, physical manifestations also change, and because of repeated failures to find help through drugs the suffering sense reaches out for something new. The potato has of course no life-giving power, but neither has the drug. The Scientist has learned that until the understanding of divine intelligence, Principle, is reached there is nothing permanent on the human plane, and that health and disease may change places with each other as do sunshine and clouds to physical sense. All this makes it the more important to press on until the student gains entire freedom from every phase of superstition, whatever its basis, and realizes what it means to live, and move, and have his being in the one perfect Mind, the divine intelligence that governs the universe and man.

Superstition has undoubtedly made a strong appeal to mortals through the belief in death, but Christian Science dispels this dark cloud by revealing the fact that man as God's image has eternal life, hence is deathless; and even in the presence of the mortal phenomenon called death the Christ-word, "Fear not," comes with its spiritual might to dispel even the darkest clouds and to reveal the universe and man in the light of divine Science.

ANNIE M. KNOTT.

✧

Compassion

COMPASSION is the constant companion of the true healer. Without it, statements of truth may seem harsh and repellent to the unprepared human thought and assume the character of the letter that killeth; but taken in conjunction with compassion, the absolute becomes clothed in the garment of beauty and is anointed with the oil of gladness. Be it said at once, however, that compassion is not to be confounded with mere pity, which may operate as sympathetic mesmerism. Compassion is instinct with Science, for it is intelligent and understands truth; but uninstructed human sympathy assumes evil to be real, and thus aggravates it.

In referring to her great discovery Mrs. Eddy writes on page 25 of "Retrospection and Introspection," "I named it *Christian*, because it is compassionate, helpful, and spiritual." Obviously the practising Christian Scientist must manifest these Christian qualities in order to earn the right to use the name of his choice. The Scriptures contain many indications of the indispensable nature of compassion. David sang of God as "full of compassion;" Peter exhorted the brethren to have "compassion one of another." As Jesus went about "healing every sickness and every disease among the people," we read that he "was moved with compassion on them, because they fainted, and were scattered abroad, as sheep having no shepherd." He was "moved with compassion" when the leper appealed to him for help, and we read that the leper was cleansed. Even Jesus' rebuke, though masterful to human apprehension, was compassionate because based on Science.

Now the working Christian Scientist stands as much in need of compassion as his patient. If he is advancing, he will find that the very illumination which enters his consciousness by reason of his growing receptivity also uncovers unsuspected depths of depravity in mortal mind. Youth grows into maturity, and unless protected in the process may be shocked at the disclosures involved. The working Christian Scientist is liable to so-called "growing pains." The shock to those who are spiritually minded and yet are sensitive to evil is difficult to describe. That which would be barely noticed by the materially minded at first looms large in flaming conspicuousness before the startled searcher for good. Surely no individual human being so greatly needs healing compassion as the advancing Christian Scientist who for the first time gazes into the high potency nothingness of animal magnetism, mesmerism, self-styled esoteric magic, or into any one of the etceteras of intentional evil.

Ah, but the Saviour is near! the irresistible Christ, Truth, which is "compassionate, helpful, and spiritual," is at hand! What is its saving pronouncement? Turning to the inspired pages of the Apocalypse, we read the glorious message brought by the angel "which had the seven vials full of the seven last plagues" and at the same time was able to reveal "the bride, the Lamb's wife," and "the holy Jerusalem, descending out of heaven from God." The following is Mrs. Eddy's comment upon this Scriptural passage, as found on page 574 of Science and Health: "The beauty of this text is, that the sum total of human misery, represented by the seven angelic vials full of seven plagues, has full compensation in the law of Love. . . . The very circumstance, which your suffering sense deems wrathful and afflictive, Love can make an angel entertained unawares."

In the hour of the inevitable uncovering of error the Christian Scientist may ask himself the pertinent question, What is it which is accomplishing this uncovering? The answer must be that God, Truth, alone is sufficient to do this, for mortal ingenuity cannot uncover its own mortal delinquencies. Divine justice decrees that since Truth uncovers error, Truth will also save the faithful Scientist from error's pretended activities. The moment of uncovering is also the moment of compassionate protection. Therefore the word of comfort declares, "Be not afraid," for Truth's unfolding will in due course bring the revelation of "the Lamb's wife" and of "the holy Jerusalem, descending out of heaven from God."

WILLIAM D. MCCRACKAN.

Among the Churches

Current Notes

BOSTON, MASS.—The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading-rooms: Berkeley Building (suite 306-307), 420 Boylston Street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post-office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

HEMPSTEAD, N. Y.—First Church of Christ, Scientist, will hold services in its new home on Franklin Street the first Sunday in August. Many improvements have been made to the old Hewlett homestead on the corner. The

Digitized by Google

house, which is more than one hundred and twenty-five years old, has been so completely improved and altered as to be hardly recognized in the interior, while the outside remains the same beautiful, old-fashioned homestead.

Hempstead Journal.

WASHINGTON.—The growth of a friendly interest in Christian Science among the publishers and editors of newspapers in this state is evidenced by the printing of full texts of Christian Science lectures in Washington newspapers twenty-two times during the last year, of which fifteen were in daily and seven in weekly newspapers. Numbers of partial reports also were printed, and fifty-six corrections of misstatements regarding Christian Science, written by this committee, were published. During the year the Trustees of Mrs. Eddy's estate have supplied sixty-two libraries in Washington with 333 volumes of authorized Christian Science literature, and the periodicals, on the recommendation of this committee. This was in addition to supplies from local churches, societies, committees, and former donations from the Trustees. For the year ended June 30, 1916, there were distributed 6453 *Sentinels*, 46 *Journals*, 31 *Heralds*, 22,707 *Monitors*.—*Correspondence.*

IONIA, MICH.—Under the auspices of First Church of Christ, Scientist, of Grand Rapids, an interesting lecture on Christian Science was given Friday night [June 2] at the reformatory, during prayer-meeting hour, by John W. Doorly. About half of the prison population was present. The prison orchestra furnished instrumental music of a commendable quality, and the singing by the several hundred inmates, augmenting the regular inmate choir, was an inspiration.—*The Ionia Weekly Sentinel.*

MONTREAL, CANADA.—The steadily increasing growth of First Church of Christ, Scientist, situated on Closse Street, has necessitated securing larger accommodations. Particularly is this growth found in the Sunday school. To provide more room, the trustees have bought for nine thousand two hundred and fifty dollars the adjoining property to the south of the church. On this land stands a house which will be used temporarily for Sunday school classes. This property has been acquired not only to meet present needs, but to allow sufficient space for the ultimate erection of a larger building, such as is contemplated. Meantime, enlargements will be made in the present church.—*The Montreal Star.*

THOMASVILLE, GA.—The Christian Science Society is erecting a beautiful church on the lot of the Young's College property at the corner of Washington and Dawson Streets. The building is to be 30 by 57 feet. It is expected to cost about six thousand dollars.—*Times-Enterprise.*

Admission to Membership in The Mother Church

The next admission of candidates will be Nov. 3, 1916. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Wednesday, Oct. 11, 1916.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1916, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Suite 550, 236 Huntington Avenue, Boston, Mass.

The Lectures

Valcartier Camp, Canada

A very interesting lecture on Christian Science was delivered to the soldiers in the theater at Valcartier Camp by Virgil O. Strickler. In introducing the speaker Lieut. A. P. Allingham, of the 145th Overseas Battalion, C.E.F., said:—

Christian Scientists have no quarrel with persons who think differently from them, but only ask a fair consideration of their tenets. In speaking with a senior officer not very long ago, the officer said he had considered the subject very carefully and asked a number of people what they thought about Christian Science. They were all of the opinion that it was a good thing in certain nervous troubles only. The officer was asked if it would be a fair proposition for the brigadier-general to ask the firm or persons with whom the officer in civil life did business about the officer's fitness as a military leader, rather than his senior or brother officers who were in a position to know. Thus today one has come to the camp who is capable of giving an exposition of the truth about Christian Science.

The publication committee has maintained for several seasons, whenever possible, representatives in the military camps throughout the country for the free distribution of literature, and he knew that *The Christian Science Monitor* has met a want in the camp and stands as an exponent of clean journalism— a paper with magazine interest and world vision.— *Quebec Chronicle.*

There are about fifteen thousand soldiers at Valcartier Camp, one of the most up-to-date camps in Canada, with electric lights and water throughout the entire grounds. The camp is about eighteen miles from the city of Quebec. The troops in training there come from the provinces of New Brunswick, Nova Scotia, Ontario, and Quebec, while a large number of the engineers training corps come from the West, even Vancouver.

Over five hundred were present at the lecture. Of those in khaki, only one present was known to have been interested in Christian Science before coming to camp, and he was the officer who introduced the lecturer.

The Christian Scientists (publication committee for the province of Quebec) have a tent in camp where those desiring to do so can enter and there read the Bible, together with our Leader's works and the publications of The Christian Science Publishing Society. There are also copies to be had by the soldiers on loan, a privilege that has been made use of. The *Sentinels*, *Journals*, *Monitors*, and pamphlets have been distributed to the soldiers desiring same. Three hundred and fifty *Monitors* a day are given out; at one time about four hundred and seventy a day.

The above lecture was held under the auspices of First Churches of Christ, Scientist, of Montreal and Westmount, Province of Quebec.—*Correspondence.*

Bellingham, Wash.

Before an audience that filled the Grand Theater, Frank Bell lectured on Christian Science. The speaker was introduced by Miss Frances S. Hays, who said:—

Spiritual unrest, empty pews in the churches, apparent indifference to religion, will continue to perplex religious leaders until suffering, burdened humanity finds a religion, an interpretation of the teachings of the Bible, which satisfies the intellect as well as the heart and shows a way whereby the

Digitized by Google

perplexing problems of our daily life may be met and solved. People have grown intolerant of a God who would afflict His children with sorrow and suffering. We cannot harmonize the idea of an all-wise, all-good, all-loving Father who at the same time creates and permits greed, lust, hate, sin, sickness, and death.

Christian Science is a religion not of fear but of love and power; a religion that brings release from the bondage of material limitations and helps mankind to realize what it means to be made in the image of God. It declares the teachings of the Bible are as true today as they were two or three thousand years ago. It stands unalterably on the spiritual interpretation of the teachings of the Bible. It holds such statements as these to be demonstrably true: "The Lord he is God; there is none else beside him." "God is my salvation; I will trust, and not be afraid." "The prayer of faith shall save the sick." "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free."

American Reveille.

Testimonies of Healing

Several years ago I was instantaneously healed of the liquor habit by Christian Science treatment. I had heard something of Christian Science, as my wife had been reading the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, having purchased the book about a year previous, when my brother was healed of blindness in one eye after noted specialists had given up the case as hopeless. What I had heard, though, seemed to make me antagonistic, so at the time of my healing I had no faith in Christian Science whatever.

One afternoon, however, becoming thoroughly disgusted with myself after having drunk more than usual because of saloon sociability, I went to my office and attended to the most important mail, then looked up a Christian Science practitioner. I did not think of taking treatment, but having no confidence in drug cures and honestly admitting to myself that I did not know what Christian Science was, I wanted to find out something about it. After explaining my mission and stating that my only trouble was the habit of drinking too much, the practitioner asked if I would like to be free from the habit. This was a hard question to answer, as for years it had seemed that all my pleasure was associated with drink, and the reply was that I did not believe I wanted to quit entirely but would like to be more moderate in my desires.

An explanation of Christian Science was then given me, and from a business point of view it seemed logical and sound in argument, but the beautiful words which were so natural to the expounder seemed unnatural to a worldly, material consciousness. However, it promised healing, freedom, joy, and gave convincing testimony of a loving God, Principle, Spirit, Mind, "who healeth all thy diseases" and is "no respecter of persons." Treatment was asked for and given, and I was requested to call again the next morning. That afternoon and evening I drank as usual, but the next morning refrained from doing so, as I had promised, and promptly at nine o'clock called to keep the engagement. I had been listening only a short time to the continued explanation of Christian Science when I expressed the desire to be entirely freed from this bondage. Another treatment was given, and for the first time in years I went to work free from any desire for liquor.

For a long time a party of four had spent the noon hour in a private saloon-room playing cards for drinks and lunch, so at noon this habit took me there. As we were steady customers, decanters were brought and we mixed our own drinks, the one sitting nearest doing the serving. This fell to me, and I fixed drinks for the others but none for myself, as liquor now seemed repulsive. This was my last appearance at that place. In the afternoon I was a little nervous, but this condition was overcome in a few days, and then with quietness began the work of filling in the time which before had been wasted in drinking.

As is usual in Christian Science healing, there comes a desire to "know the truth," for, as Jesus said, "the truth will make you free." The practitioner had recommended that I buy a copy of Science and Health, and I did so, but it was read through without understanding. In the mean time my brother had given me "Unity of Good" by Mrs. Eddy, and I had read and reread it without understanding. Just about the time I finished Science and Health one of the paragraphs in "Unity of Good" unfolded, and I wondered why it had not been clear to me before. Then Science and Health began to unfold, and with increased understanding came more healings. I had used profane language habitually, and whereas before it was unnoticed, it now became disgustingly noticeable; but the habit disappeared entirely in a very short time.

With the first dawn of Truth the craving for fiction completely vanished, and I have never since desired or had any time to give to this class of reading. Card and pool playing also ceased to have any attractions for me, as well as hunting and fishing. Then the smoking habit of nearly thirty years' duration disappeared, but not until I took a firm stand against it mentally. One morning, while waiting for a car, I unconsciously snatched the cigar out of my mouth and threw it as far as I could, when a moment before it had seemed like an unusually good one. Immediately came the realization that this desire had left me, and on arriving at the office I threw away all my smoking paraphernalia.

Since being healed I have had no desire to use liquor or tobacco in any form. Every honest student who is daily putting into practice what is revealed through the systematic study of the Bible and the Christian Science text-book, "rejoices in the proof of healing," as stated on page 569 of Science and Health,—"in a sweet and certain sense that God is Love."—G. Roy Eastman, Tacoma, Wash.

✧

[Translated from the German]

Many are the benefits which have come to me and to my family as a result of our knowledge of Christian Science. My eldest son was healed twice of blood-poisoning. Last autumn he sustained severe burns on his face and one arm in helping to extinguish a fire. As a result of his practical application of his knowledge of Christian Science he experienced but little pain and slept all night, and within a short time his wounds were healed. My youngest son fell from his horse and was rendered unconscious with a serious injury of the head and a badly discolored eye. In this instance also the help obtained through Christian Science was wonderful. Consciousness returned within a few hours, and in two weeks the healing was complete. My youngest daughter was cured of a serious throat trouble and of appendicitis.

As for myself, I was healed four years ago of typhoid fever and inflammation of the lungs, my condition being such that my dear ones thought I would pass away. But "man's extremity is God's opportunity." In two weeks I had sufficiently recovered to be able to leave my bed, although the sense of weakness was slow to yield. I have also been healed of catarrh and of a great fear of cold weather and of draughts. I used to have noises in my head which kept me from sleeping at night. When this fear was overcome I was healed.

I am also very grateful to God for the fact that my eldest daughter has a clear enough understanding of Christian Science to be able to help others, and that she is a diligent worker in the Lord's vineyard. I think of Mrs. Eddy with love, and daily pray for a better understanding of Christian Science.—Frau Bertha Reinken, Elko, Nev.

✧

I first learned of Christian Science through the instantaneous healing of my wife after many years of suffering. The healing seemed so remarkable to me that I could not understand or believe it until convinced by her sleeping peacefully throughout the night. It did not seem possible that she could sleep, for she had been suffering from what was said to be a tubercular boil. Every hour or so I woke up and listened to her breathing, until toward morning I was fully convinced that she was not suffering but was sleeping calmly and soundly.

At that time I was suffering from sleeplessness, and the following night, when I could not sleep, instead of resorting

Digitized by Google

to material remedies I read Science and Health for a while. I then went to bed again and slept until morning, and have not since been troubled in that way. The next day, while smoking a cigar as was my custom, I realized that my desire to smoke had gone. My taste for tobacco had been entirely destroyed, as was later proved, for I have never smoked again or felt the least desire to do so.

After reading Science and Health for another week I felt like discarding my glasses, although they had been used for many years and the oculist had informed me that stronger lenses would be needed every few years, as my eyes were subjected to a constant strain. I feared, however, that if they were laid aside I could not do my work satisfactorily. After another two weeks I told a practitioner of my experience with smoking and also as regards glasses, with the result that the next morning I went to work without taking them with me. Within a month or six weeks my eyes were perfectly normal. Although the Bible and Science and Health were read each morning before going to work and all the evening, I felt no strain, but on the contrary was relieved of the terrible headaches which had caused me so much suffering.

These experiences have been sufficient to cause me to feel the deepest gratitude to Christian Science, but I am still more grateful that through the study of this teaching I have found God, and by daily prayer and application of what I read in our text-book I am able to know Him better each day.—HERMAN ACKERMANN, Chicago, Ill.

My heart is so filled with gratitude to God for the many blessings which have come to me through Christian Science that I wish to tell of it, so that all the world may rejoice with me. For many years I had been an invalid, suffering from what the doctors called tubercular growths. I was in bed a great deal, although the best of medical help was given me. An eminent lung specialist recommended the inhalation of oxygen, together with the use of an electric vibrator. This treatment was taken for seven months, but my condition was worse at the end of that time. Then Christian Science was presented to me, and having tried all material remedies without avail, I gladly turned to it and was perfectly healed in one treatment.

I feel very grateful to God for this wonderful healing, but my heart overflows with gratitude for the spiritual understanding gained through the study of our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, an understanding which has enabled me to be of some use in this world by helping others to see their true birthright,—health, happiness, and peace.—ELSIE M. ACKERMANN.

✧

For years I have enjoyed the privilege of reading the testimonies in our periodicals, and they have been of great help to me. Christian Science is to me the fountain of life; it has made me free from the bondage of sickness and sorrow, self-love and resentment, and brought me into peace, health, and happiness.

This glorious truth was brought to me in 1910. For several years my health had been poor, one disease following another, such as lung and heart trouble, also inflammatory rheumatism, which was said to have resulted in tubercular disease of the ankle. When every material help seemed to fail I turned to God for help, as taught in Christian Science, and my search was not in vain. I became a sincere student of this Christ-teaching, and through it have indeed been regenerated. With the assistance of a practitioner and loving friends who kindly helped me in my journey from sense to Soul, every ailment has been overcome and I now enjoy the blessing of health and happiness. Inflammation of the gall bladder and bowels has troubled me at times, but I feel no more difficulty from this ailment. I have never used medicine since taking up the study of Christian Science; God, Truth, has been my only physician. I am deeply grateful for our Lesson-Sermons, for through them we gain a better understanding of God, who is the only Life, Truth, and Love.

Words fail to express my gratitude to God for having given us our beloved Leader, Mrs. Eddy, who has again made clear to us the works and teaching of our dear Master and Wayshower, Christ Jesus. My daily effort is to gain a higher understanding of the Christ, Truth, which makes us free and helps us to rise from the material sense to the spiritual.—GESINA D. LAMKE, Los Angeles, Cal.

✧

My healing in Christian Science may lead some sufferer to the truth that surely heals. In 1912 I was led to try Christian Science for a complication of diseases, the most severe being pronounced ulcers of the stomach. Many remedies had been tried, but at last I became so weak that it was an effort to walk even a few blocks. My physician, after consulting with another doctor, decided not to give me any more medicine, as he said my only chance of recovery was an operation. This was arranged for at once, but the day before I was to go to the hospital a friend called to see me and asked why I did not try Christian Science. I knew nothing of this teaching, but thought it would avail nothing in cases of my kind, and told her so. The thought that the operation might be avoided, stayed with me, however, so that evening the doctors were asked to delay it for a week. The following day a Christian Science practitioner was consulted, and I left her office with the conviction that I would be healed. I therefore decided to cast away every material remedy and leave all to God. My recovery was so rapid that it was the wonder of all my friends.

Other ailments also have disappeared, among them chronic bowel trouble, and although I was a constant user of tobacco for many years, smoking is now a thing of the past. For the many blessings received I am truly thankful to God, and grateful to Mrs. Eddy, who made this truth so plain that it is available to all who seek it.

R. E. BEARD, South Bend, Ind.

✧

It is with deep gratitude and joy that I try to tell a little of what Christian Science has done for me during the last five years. Before coming into Christian Science I never knew what it was to feel really well, as headaches and rheumatism were a source of constant suffering; but these disappeared without treatment. For fifteen years spectacles were used for short-sightedness, and the oculist told me they would always have to be worn. With the help of a Christian Science practitioner, however, after about three and a half months they were laid aside. I can now see better without glasses than ever was possible with them, and the work which I took up three years ago, that of miniature painting, does not try my eyes in the least.

I am grateful for the physical healing, but words fail to express my gratitude for the mental healing and spiritual uplift. Formerly I was in bondage to the awful thoughts that would come to me, and the battle to keep them away would leave me physically exhausted. While the Bible, to which I turned for help, comforted me, I did not understand it sufficiently to overcome these discordant thoughts. Since the study of Christian Science was taken up all is changed; there is peace and joy in the place of darkness and despair.

Digitized by Google

I give thanks to God for all my blessings, and am grateful to Mrs. Eddy for her loving work, and to all who have lovingly and patiently helped me to understand the truth.

ALICE M. LONG, Stroud Green, London N., England.

It is a pleasure to add my testimony to the one given by my daughter, for I have been healed of an internal injury which was pronounced incurable. A severe attack of sciatica was also quickly overcome, and recently a vein ulcer of some years' duration has disappeared. For these blessings I am truly thankful, but above all I am grateful to Christian Science for the knowledge it has given me of a God of love, who is ever present. I wish to express my thankfulness to God, also my gratitude to Mrs. Eddy and to the kind friends who have so patiently helped me.—MRS. S. J. LONG.

✧

For ten years I was a sufferer from periodical headaches. All kinds of physicians treated me, and massage, electric baths, dieting, and various material remedies were tried, but with only slight temporary relief.

While at work one afternoon I felt a headache coming on, and as usual looked forward to a night of suffering, with little if any sleep. For six years I had occasionally read "Science and Health with Key to the Scriptures" by Mrs. Eddy, but merely for optimistic reading. That afternoon, however, I resolved to try Christian Science, though with little faith that relief would be experienced. At the end of my day's work I went to a Christian Science reading-room to inquire for the nearest practitioner. The addresses of several were given me, so I went to one of them, and after stating my case, received treatment. The practitioner told me to take no thought for the body and to eat anything that I desired for supper. I did so, and after chatting with my family for a while, went to bed and had a fine night's sleep, awakening the next morning perfectly free, fresh, and strong.

The healing has been permanent. To say that I am grateful does not begin to express my thankfulness to all who have made this Christ-healing possible.

EDWARD L. KRIEG, Cleveland, Ohio.

✧

I became interested in Christian Science through attending a church service one Wednesday evening in New York City. While at this meeting all fear of a disease that had been a source of worry vanished, and it is needless to say that with the fear the disease went too. Of course I knew nothing of the Principle which had brought about this healing, but being anxious to learn what it was, on my return to Chicago I went to a practitioner to get the information. Christian Science proved to be the only religion that had ever seemed practical and reasonable to me, and soon after this I took class instruction.

Later a goiter manifested itself. The fear at first was almost overpowering, but I fought it out by myself until at last the fear was overcome. Although the swelling remained I did not let it worry me, knowing it would disappear. It has done so, and words cannot express my thankfulness for this healing. Not having been so alert as I should be, my old trouble, coughs and colds, returned. A year ago last winter I had a very serious attack of cold together with sore throat; but this last winter I realized at the first manifestation of this difficulty that it must be overcome or it would get the best of me, and the next morning I was entirely free. A sense of pain in the eyes when reading has also been overcome through my own understanding of the omnipotence of Truth and Love.

All fear has not been destroyed, nor have I the perfect peace and confidence that should be mine; but, as Mrs. Eddy says, "it is easier to cure the most malignant disease than it is to cure sin" (Science and Health, p. 373), and when I manifest more love, patience, and unselfishness, the other will surely come.—MARGARET COOK MCCORMICK, Chicago, Ill.

✧

Until a few years ago I was looked upon as a young rowdy, for I used to gamble almost every night in the week with people who were twice my age. On account of my ability to play cards they predicted that I would be a big gambler some day. This thought was so constantly before me that I had my mind set on being one because I could make so much money from it. I now know that these people were wrong, for with the help of a Christian Science practitioner and through the reading of Science and Health I have learned the better way of life, and am glad to say that I do not gamble at all and all desire to do so has left me. I have also been healed of the smoking habit, which had been indulged for eight years.

While attending high school I used to play truant quite frequently. One day my father was summoned to school on account of my misbehavior and I was told to be prepared the next morning to have my head examined by a doctor, to see if there was anything the matter with me, because I was so disobedient to my teachers and parents. I felt very rebellious at the thought, and on account of a lot of other trouble I was having at home I ran away and was gone nine days. I am confident that but for Christian Science I would have had to undergo many hardships during that period. As it was, my mother asked a practitioner for help, and I found work the first night I was away.

I have been healed of an impediment in my speech which had hindered me since childhood. It sometimes took me a minute to begin to talk or read aloud, but I can now do so without hesitation. The hardest thing for me to overcome was the tendency to lie. This seemed to be second nature to me, and I had indulged the error so much that it seemed easier to lie than to tell the truth. Since coming into Christian Science I have learned that "Truth creates neither a lie, a capacity to lie, nor a liar" (Science and Health, p. 357), and the apprehension of this healed me. The truth underlying the saying that "honesty is the best policy" is now very clear to me.

It is needless to say that I am grateful I still have more than a year in which to attend Sunday school, from which so many benefits have already been received. Each day I am trying to know more of the truth that makes free, and to be more worthy to be called a Christian Scientist.

SAMUEL COHEN, New York, N. Y.

✧

Though tardy, this loving tribute of joy and appreciation for what Christian Science has done and is doing for me comes from a grateful heart. More than twenty years ago I was a physical wreck, with a life of invalidism ahead of me. The pain was constant and sleep impossible without drugs; indeed, I was much like that woman of old who "had suffered many things of many physicians."

Often I would wonder why the so-called skilled physicians so widely differed in their diagnosis of my case, and was between hoping and fearing, wondering and doubting, if a prospective operation for an injured spine would bring relief from pain and suffering, when Christian Science, the promised Comforter, found me. "Have faith in God" was our Master's injunction, and oh, how I longed for that faith! But faith must become understanding, and to my suffering, drug-

Digitized by Google

benumbed senses this word loomed like a great wall. As the truth streamed in upon my darkened thought, I could only shed tears at my sorrowing and helpless condition, which seemed so real. Thus for several years the battle went on, and one by one the diseases vanished without my knowing when or how, so gently and unobtrusively is the healing work performed by the word of God.

For several years I have been physically whole, and in earning my daily bread have proved that God is my health, my strength, my life. From a diffident, sensitive, self-conscious, selfish woman, I am learning to be independent, free, and happy. Best of all, that glorious thing, understanding, as found in Christian Science, is no longer a wall of words, but an intelligent, living way to the great reality, God, and to the only existence, that is, man and the universe in the image and likeness of the one Spirit, who blesses all from an infinitude of love. My desire is to press on and grow daily in that truth and grace which our God-inspired and faithful Leader taught and demonstrated.

BERTHA L. HEISS, Seattle, Wash.

✧

Some time ago my foot was caught under a heavy truck and I was thrown some few feet away. My first thought was that a bone had been broken, but I treated myself to the best of my understanding of Science and continued with my work until it was time to go home. At night the ankle was found to be much swollen and discolored, and there was a great deal of pain, but I did not call for help until the next morning. Then a practitioner was called up and a treatment given me. In about fifteen minutes the swelling began to lessen and the pain stopped.

A few more treatments were given and the ankle began to heal immediately. About three weeks later the insurance company sent a doctor out, and insisted on having an X-ray taken of the foot and ankle. This showed that the ankle-bone had been broken but had knitted together perfectly. Through the study of Science and Health and attendance at the Wednesday evening meetings I was healed of the tobacco habit of many years' standing.

I am very grateful to know of the healing power of divine Love.—AUGUST STRASBURG, Los Angeles, Cal.

✧

I am filled with joy and gratitude for the privilege of testifying to the blessings which have been showered upon me since taking up the study of Christian Science, and for the healing of neuritis, which had troubled me for years. I had been under medical treatment constantly and had tried various means of relief, but no help was received. At last Christian Science was recommended to me by a cousin, and later by a kind neighbor, with whom I attended the Wednesday evening meetings for about a month. I finally decided that if Christian Science helped other people it would help me. It was Thanksgiving week of 1913 that treatment was begun. I am thankful for the understanding of the Bible and of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, which came to me while I was slowly, but certainly, being healed.

With even the little of Christian Science I have gained, discordant conditions of long standing have been overcome, among them being severe headaches, toothache, neuralgia, catarrh, and colds. Christian Science has helped me to secure a splendid business position, and it helps me in all the problems which come up in my every-day business life. For all these blessings I am indeed grateful.

ELIZABETH BARTH, Syracuse, N. Y.

From Our Exchanges

[Rev. Henry Kingman, D.D., in *The Biblical World*]

Our generation hungers for immortality not only because life is more wonderful than it has been, but because, as human life becomes increasingly intense and complicated, we need the reaction of a faith in immortality upon every day of living. In dull and sluggish times, when every man at evening sat in quiet at his own tent door, it may well have been easier than now to trust placidly in the righteousness of Jehovah as the God of all the earth. But in the feverish intellectual restlessness and social discontent of our day, always harassed by the insoluble problems of wrong and pain and inequality, always beset with the temptation to cynicism or frivolity or despair, we need, as almost never before, the steadying assurance of an infinite value and reach to human life, in which the resources of eternal love and righteousness shall have a chance to work out to completion what this brief chaotic strife of right with wrong can never bring to pass. Eternity was the scale on which Jesus worked out his earthly plan; and nothing but a like confidence in eternity gives one room to think after him his thoughts.

[Rev. W. A. Cunningham Craig, M.A., in *The Church Family Newspaper*]

The school of life is a hard school for most of us, but the lessons that we learn in it are of more value than those which we learn in any other way. The instinctive faith that finds God for itself under the stress of life, is a finer thing than that which rests upon authority or tradition. It is often very defective in its outward form of expression. It is open to criticism from many sides. It is easy enough to compare the faith of the camp, the workshop, the office, the farm, unfavorably with the faith of the church. Yet it may have something of a quality which is more precious in the sight of God. It is unconventional, but it has the stamp of reality. It is imperfect, but it is drawn straight from life. It is irregular, but it meets the needs of men. We sometimes lament the widespread failure of conventional religion. It may be that the surest signs of hope, if we would only see them, are to be found not in efforts to revive what has to so great an extent lost its hold, but in the crude attempts that men are making everywhere to beat out a faith for themselves from the facts of life.

Live up to whatever faith you have. Make the most of whatever truth you see. Hold fast whatever lesson life has taught you. Bring it all to Christ and he will not despise it. Yea, though you feel when you are in his presence that you are not worthy that he should come under your roof, yet like the centurion your prayer will be heard, and as you have believed, so shall it be done unto you.

[*The Standard*]

It is worth while to note that Paul exhorts the people to whom he wrote to have in mind the influence of their lives upon the lives of people who are not Christians. He does not exhort his readers to live these worthy lives in order that they themselves may get to heaven. He urges upon them this course of righteous conduct because of its moral worth, because of its purchasing power, because of its influence on those who are without.

This is something worth every Christian's considering. It is not enough for him to know that he can justify to his own conscience a particular course of conduct. He must also ask himself what effect this manner of living will have upon people who are not Christians. Will they think more or less of his religion on account of the way he lives it? Will his conduct

Digitized by Google

tend to mark up or down the market quotations of the Christian faith? Does he discount his Lord in the eyes of men? Or will men bid more for Christianity in the world's market because of what it sees in him?

This is a figure of speech which the apostle Paul used in writing to a commercial people in a commercial age. He exhorted them to buy up life's opportunities. He charged them not to fail to make the most of their time. The advice he gave had in it nothing niggardly, nothing small; it was the advice of a far-sighted, prudent man, addressed to practical men and women who wished to make life as productive as possible.

[Rev. Joseph Fort Newton, D.Litt., in *The Christian Commonwealth*]

To follow Jesus is to have the spirit of Jesus, to think about God and man and life as he thought, to do the duty appointed us in our lot as he would do it had he been sent to our task; to be ruled by his faith and spirit in all the experiences of life, its joys and sorrows, its disciplines and disasters, its dreams and disappointments. Following him day by day, content to trust his truth and serve his will, not by labored imitation, but as a natural fruit of his influence, we learn to know him as one who walks with us today, as of old he walked with men in the days of his flesh. Time and distance vanish, and we are with him in the wonder and awe of his eternal life, because the God who lived in him lives in us.

[*The Christian*]

It is characteristic of the risen Lord that he is ever taking us farther than we at first thought likely, opening our minds to fuller knowledge of God, and beckoning us on into ways of peace by his interpretation of life's sorrowful mysteries. In the very nature of the case there can be no finality to his ministry of grace in those who walk with him. He is always leading us to deeper repentance by opening and giving us access to the treasures of God's goodness. He is forever going before us into fields of fuller and more fruitful service. Nor can we hesitate to follow, if the breath of his risen life has fanned the flame of love which was kindled in our hearts at the sight of his cross. As it was in the village street at Emmaus, so it is today; he must go on and on, and we too must go with him far beyond our too near horizons, even unto all that is laid up for them that fear God.

[*The Continent*]

The really forcible talk of and for religion which most impresses irreligious people, is the unstudied and often commonplace conversation that easily takes Christ and his teachings into account as settled realities in the universe,—assumes the whole Christian background of things as simply as sun and stars and day and night. When that fashion of talking religion is coupled with a consistent life, neighbors who watch and listen cannot fail to know that in that one man at least faith is actual. Conduct proves that religion has pervaded the core of a man; agreeing speech shows that it has worked its way out to the surface; and the combined result of both facts is an evangelistic force of high potency. For when men see a Christian who is Christian all through, they usually want to be like that themselves.

[*The Christian Advocate*]

What is the subtle thing which inheres in the teaching of Jesus that gives it such remarkable vitality and such transforming power, even centuries after it was first given to the world? May the answer not be in the statement of Jesus himself: "The words that I have spoken unto you are spirit, and are life"?

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each, 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

"Christian Science: Man's Dominion Over Evil," a lecture by Edward A. Kimball, C.S.D., has been translated into Russian, Norwegian, modern Greek, and Italian. Pamphlets in these four languages have been published with the English version opposite the translation and are now on sale at prices of our regular pamphlets as shown on the opposite page.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size $10\frac{3}{4}$ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1888 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 61 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under those titles in this price list.*

Subscription Price

Payable in advance

Annual subscription price, postpaid, in the United States, Canada, Mexico, Cuba, Porto Rico, Hawaii, the Philippines, Guam, Tutuila, Shanghai, Panama, and the Canal Zone, $2.00; six months, $1.00; three months, 50 cents. For Canada add 15 cents and for all other countries 26 cents annually for postage. For subscription blanks in Scandinavian, German, French, Spanish, Italian, and Portuguese see page four in the CHRISTIAN SCIENCE JOURNAL.

Subscriptions to the SENTINEL are entered only from the first of the month and will begin with current issue unless otherwise specified. Subscriptions terminate with the last of the month named on the wrapper or the line below the name and address. The Roman numeral XVI indicates the year 1916; XVII is used for the year 1917. This notation and the delivery of the weekly will indicate that a remittance has been credited and will be our acknowledgment of the subscription.

Bound Volumes: Current year or two years previous, cloth $3.25; half calf or half morocco, $4.00. On earlier volumes write for prices.

Items of Interest

The United States Government in filing in the Supreme Court its brief asking for the complete separation of the Reading Company, the Philadelphia & Reading Railways Company, the Philadelphia & Reading Coal and Iron Company, and others, declares that the "Reading Commission" is the backbone of an alleged anthracite monopoly, that it controls about two thirds of the anthracite deposits, and that its supply will outlast by many years that of any other producer. Violation of the anti-trust law is charged. The combination was established, the Government contends, through acquisition of the Schuylkill Canal, wholesale purchase of anthracite coal lands, purchases of the output of independent producers, excessive freight rates, preferences and rebates granted to the Reading Coal Company, and other ways. It is further contended that the Reading combination acquired control of the Central Railroad of New Jersey, a competing coal carrier, and of the Lehigh & Wilkes-Barre Coal Company, a competing anthracite producer, "thereby further restraining and monopolizing production, transportation, and sale of anthracite coal."

In the July number of the *Russian Official Gazette* the policy of the Imperial Government in regard to railroad construction is dealt with in some detail. The total railroad mileage in the empire Jan. 1, 1915, is stated to have been 36,700 miles in European Russia and 7300 miles in Asiatic Russia, of which 29,660 miles are owned by the state and 14,400 miles by private companies. In the present year a commission was appointed by the ministry of ways and communications. It has drawn up a program for the next five years, and says that taking into consideration that the goods traffic of the various railroad systems should increase annually by nearly 70 per cent, it will be necessary to construct 3300 miles of railway yearly in order to keep pace with this development. The commission therefore decided to recommend the construction, partly by the Government and partly by private enterprise, of 4000 miles annually in order to provide an adequate margin.

On Aug. 10, 1916, was completed the junction of the two great water tunnels, the Catalanes and the Roque-Negro, which the municipality of Santa Cruz de Tenerife, Canary Islands, has had under construction since 1898. These tunnels have been cut 5578 feet through solid basalt rock at a cost of approximately two hundred thousand dollars. The joining of these two tunnels has completed the irrigation scheme of the city by which the municipality will have available 10,000 cubic meters of water every twenty-four hours. In addition to the two tunnels joined, an open cut of 38,840 feet has been constructed, and $60,000 has been expended in the creation of irrigation canals, which will distribute the newly acquired water, and in the erection of a large dam. The city engineers calculate that this will add nearly five thousand acres of banana-bearing lands to this section of the island. The land has hitherto been sterile through lack of water, while irrigated soil near by has sold as high as $5000 the acre.

The New Zealand land law amendment act of 1913 provides that privately owned land may be taken (not within the borough or town district) in cases where, in the opinion of the board of the land purchase commissioners, such land has been acquired by way of aggregation, and where such aggregation is contrary to the public interests. A fair compensation will be paid for all such land taken as provided by law, the owner having the option of either subdividing the land and getting it in shape for settlement and putting it up at auction by himself, or allowing it to be taken by the Government at a rate fixed by appraisement according to the laws provided therefor. This law has been made use of in many cases to break up large holdings.

There has been organized in Natal, South Africa, says an industrial publication, a company under the title of South African Natalite Motor Spirit Company. It is expected to build a complete plant, including all the necessary buildings required to make in the aggregate 2,000,000 gallons of natalite, a distillate of molasses. Experiments were made in Natal with a 22 horse-power car weighing some thirty-six hundred pounds. The car was tested over several routes, the total distance covered being slightly more than five hundred miles. In this case the amount of this new motor fluid or spirit used was 30.59 gallons, or an average of 16.4 miles per gallon, or 26.2 ton-miles per gallon.

The waters of the Nile have reached a very high level, necessitating enforcement of the decree of 1887, which empowers the Government to call on any able-bodied man to assist in the work for the protection of the threatened regions under penalty of imprisonment or fine. The Anglo-Egyptian authorities are likely to begin again the execution of extensive irrigation work on the Nile near Khartum, a project which was suspended on the outbreak of the present war.

Steps are now being taken for the prompt return of the Mexican Railway to its owners, an English corporation. The road extends from Vera Cruz to Mexico City and is the oldest line in the republic. It was seized by Huerta during his usurpation, and from military necessity has been operated by the Government since that time. A careful survey is being made of the damage suffered by the company, and it will be reimbursed by the authorities, including loss of revenue, destruction of rolling stock, and so forth.

It is announced by the United States department of justice that arrangements are being made to break up the combination between the eastern roads and the anthracite producers. The Government will file a brief in the Supreme Court of the United States against the Lehigh Valley Railroad Company and many subsidiary concerns, including coal mines. By means of interlocking directorates the railroad and coal companies, it is alleged, have been able to maintain a tight combination in restraint of trade, in defiance of the Sherman law.

The Congress of Peru is considering a law to provide for agricultural loans on security other than land. Under the provisions of the proposed law, farmers could borrow money on their machinery, implements, live stock, lumber, timber, or growing crops. Under the present rural credits law, farmers may obtain loans on their land only, and the proposed law is intended to extend credit to the large number of farmers who do not own the land they cultivate.

The Rhode Island state board of public roads has appointed Saturday, Oct. 14, as "clean-up day," and is organizing a campaign to remove from the public highways all advertising signs tacked or placed upon any tree, fence, or pole on the public right of way. A statute enacted by the General Assembly at its session last spring gives any one the right to tear down and destroy all signs of an advertising nature hung upon the public right of way.

In order to give a trial to the plan of shipping foodstuffs by parcel post as recently outlined by David Lubin, American delegate to the International Institute of Agriculture at Rome, Italy, $5000 is to be expended by the post-office department in a system of experiments that will begin in the near future.

The Canadian Pacific Railway Company has called for tenders for dredging in front of its wharves at Vancouver, B. C. The completion of this work will give a maximum depth of 30 feet at low tide. This company is now making arrangements for the construction of an 850-foot pier, at an estimated cost of $1,250,000.

Interesting details of Ohio's canal system, and advice on how to reclaim it as a revenue producer for the state, are contained in a report made by the state auditor. The canals represent a total outlay of $16,458,000. Since 1886 alone outlays have totaled $7,495,000 and the receipts during that period have been only $3,187,000.

Colossal profits have been made by the jute industry of India during the past year. The total area under jute in India this year is officially estimated at 2,612,066 acres, an increase of nearly two hundred and fifty thousand acres over the figures of last year.

Plans which call for the expenditure of $4,500,000 for its next year's work were completed at the recent annual meeting of the international committee of the Y. M. C. A.

Glacier National Park this season has broken all previous records as a tourist attraction. More than ten thousand travelers visited the park, from June 1 to Aug. 29.

California shipped 44,537 cars of citrus fruit during the year ended Aug. 31, 1916,—37,279 cars of oranges and 7258 cars of lemons.

The 1915 grape crop in Sicily amounted to 423,300 tons, and the lemon crop to 600,000.

The estimated commercial value of the Newfoundland fisheries for 1915 is $10,500,000.

The annual oyster crop of the United States is about thirty-five million bushels.

Evidence and Argument

HON. CLARENCE A. BUSKIRK

To those unacquainted with the teachings of Christian Science, Mrs. Eddy's words on page 23 of "Miscellaneous Writings" may seem startling, but they assuredly are worthy of the deepest consideration. She says: "Reason and revelation declare that God is both noumenon and phenomena,—the first and only cause. The universe, including man, is not a result of atomic action, material force or energy; it is not organized dust."

The terms "noumenon" and "phenomenon" were employed by Aristotle and other Greek metaphysicians,—the first term to represent the entity, substance, reality, or truth of being, and the second to represent the seeming instead of the presence of the entity, substance, reality, or truth of being. Many contended, Aristotle among them, that what is termed matter is no more than a suppositional creation from the evidence furnished by the five physical senses; that all such alleged evidence has shown itself to be more or less untrustworthy, superficial, and deceiving, and hence no proper foundation upon which to declare what is true; and therefore that matter is to be classified as phenomenon, or seeming, instead of the truth of being. Those who took the opposite opinion, now usually termed materialists, admitted that matter is phenomenon, or seeming,—for they were driven to admit the unreliability of the evidence furnished by physical sense,—but they also affirmed that matter is noumenon, or the truth of being.

These two classes of thinkers, joined by the physicists on both sides during several past decades, have waged a wordy and apparently interminable argumentation. The very nature of their field of discussion prevents a final victory for either side, for reasons now to be stated. Both sides look to matter for their "facts" or "evidence;" but if matter is only phenomenon, or seeming, it can furnish no evidence worthy of the name of evidence, it can furnish no more than what is sometimes called "presumptive evidence" or "inferential evidence." But these terms stand for what is only negative evidence, at most; hence for arguments rather than for affirmative evidence.

On the other hand, if the materialists were right in their contention, long since they would have been able to array evidential facts of a conclusive nature to their support. When they are reminded of this, they stubbornly answer that the world is young yet and there may be much evidence to be produced in the future, that both sides equally lack affirmative evidential facts, and that thus far both sides are merely arguing the same old question inconclusively. It is apparent that those who affirm that matter is phenomenon, or seeming, are affirming a negation, so long as they keep within the limits of the old field of discussion, and are facing the difficulty of proving a negative by means of direct affirmative evidence.

Christian Science has removed the limitations which heretofore have bounded the field of discussion. No longer can it justly be the reproach of metaphysics that it is a fruitless war of words, a "marching of an army up a hill just to march it down again," or a labyrinth whose only exit is into "nowhere;" for Christian Science has pushed the contention between noumenon and phenomenon out of its old field of argumentation, which was without affirmative evidential facts, into another field, where it employs affirmative evidential facts as the sure basis for its doctrine and practice, and for the unanswerable deduction that matter cannot be more than a temporal seeming. Christian Science teaches that "all is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). Again on page 270 we read: "Matter and Mind are opposites. One is contrary to the other in its very nature and essence; hence both cannot be real. If one is real, the other must be unreal." This statement is of the utmost importance in a practical way to the worker in Christian Science.

Following along the line pursued and demonstrated by Jesus, Christian Science has already accumulated a vast array of the highest evidence that infinite Mind with its omnipresent and omnipotent energies and activities is the reality; from which the logical deduction is inevitable, as Mrs. Eddy wisely affirms, that what is termed matter cannot also exist as a co-reality. The victory is won, and always can be won, on this field of discussion; therefore it is here that the evidence and argumentation ought to be waged. The old field of discussion allures the Christian Scientist reasoner, as the writer knows from his own experience; but after much reflection on the subject he is strongly inclined to the present opinion, which is here submitted for the consideration of the reader, namely, that we do not need to engage in the old lines of discussion between noumenon and phenomenon, and that such lines of discussion, consisting as they ever have of argumentation largely based upon negative rather than affirmative evidence, lead to nothing supremely decisive and tend to divert attention from the unmistakable victory in the newer field of discussion, which Christian Science has made both possible and attractive to thinkers.

When a wise and experienced advocate in the court-room finds that the evidence, the law, and sound reasoning all point to a sure victory for his client along a plain pathway in his case, he realizes that it would be unwisdom and more or less hazardous on his part to permit himself to be tempted into any other path of discussion in which he may opine that he has on his side decidedly the better evidence, law, and reasoning to support his client's contention, but which nevertheless is open to plausible opposing argumentation. For he realizes that the attention of the jury and court may be diverted to the unsure field of discussion, and its uncertainties more or less be confused with the points which would be capable of sure triumph if left to themselves. Besides, when an opinion is changed there is quite apt to be a rebound, and the pendulum will swing to the left according to the distance it has swung to the right.

Reference is sometimes made by Christian Scientists to the teaching of modern physics that we experience color sensations not because things are actually colored, but because the optic nerve is excited in a particular way by vibrations in an

Copyright, 1916, by The Christian Science Publishing Society

Digitized by Google

invisible medium termed the ether; but is it not, after all, so far as the premise of the argument is concerned, merely the substitution of one material belief for another? Are not the conjectural facts of vibrations in the ether and the optic nerve as much beliefs about matter as the older belief that color resides in a material object?

Color and the other so-called material objects which are testified to by the so-called five physical senses, are each and all mental concepts; but is it not better to appeal to our unanswered and unanswerable arguments by deduction, which has rightly been called a system of pure reason, taking the basic truth of the allness of infinite Mind and the infinite manifestation thereof for the premise and deducing therefrom the inevitable correlative truth of the nonentity and unreality of matter? This gets us away from any confusing inconclusiveness which continues to adhere to the older metaphysics about noumenon and phenomenon as applied to matter, notwithstanding that modern physicists may substitute newer theories of matter in place of the older theories. We get away from the hopeless circles of metaphysical argumentation about the nature of matter which prevailed before the advent of Christian Science.

The Christian Science doctrines, and practice perforce, must stand or fall in the opinions of mankind upon their own intrinsic merits as eternal verities. Even if physics may, at some future time, establish by affirmative evidence the negation or denial of the entity of matter, how would that, after all, establish the major and fundamental verity in Christian Science of the eternal allness of infinite Mind and the infinite manifestation thereof? It is true that profound and learned thinker, Mary Baker Eddy, tentatively referred to some of the later teachings in physics concerning color and the like, and we should probably have wondered at it if she had failed to do so in her wide and extensive lines of thinking; but she bases her doctrine and argument about matter upon the fundamental truth in the "scientific statement of being" already quoted in part, "All is infinite Mind and its infinite manifestation, for God is All-in-all," stating also the correlative negations concerning matter, inclusive of the so-called man; adding, however, to the negation of physical man, the correlative statement about the real man, namely, that "he is spiritual."

It would be germane to this article to consider the already accumulated mass of evidence, unsurpassed and, more than that, unequaled both in quality and quantity in the entire history of evidence, which demonstrates the absolute trustworthiness of Mrs. Eddy's foregoing statement. As a matter of knowledge of current advance in thought, it cannot harm any reader to keep abreast of the changing views of the physicists about color, the substitution of conjectured electrical ions, in place of the former conjectured atoms, as the hypothetical "units" of matter, etc. In the final sense, however, all this mass of changing guesswork and theoretical conjecture concerning matter, however interesting to the Christian Scientist observer, ought never to be used as the basis of argument so long as it serves, after all, as a suggestion of the reality of matter by merely substituting newer and possibly more plausible and persuasive materialistic theories concerning matter.

In other words, let the physicists and metaphysicians of the old field of discussion about matter get together and fight out their never-ending battle by themselves, and let not the great truths of the Christian Science contention become muddled in any student's thought by using the inconclusive argumentation of those who array themselves under the banner of "phenomenon" *versus* "noumenon," however tempting it may appear at first view because of its apparent parallelism to Christian Science views. The healing work of Christian Science rightly holds us to the straight and narrow path of reasoning outlined by Christ Jesus and revealed anew to the present age in "Science and Health with Key to the Scriptures" and Mrs. Eddy's other writings.

The Key to Great Treasure

CAROLINE A. BALY

In the stirring days of "good Queen Bess" her turbulent knights found relaxation, during the intervals between wars, in sailing west in search of treasure. Dangers by land or sea were to these lusty Britons but an incentive; hazard was the game of life, the salt of existence. That so many had sallied forth never to return, or to bring home little more than a barren experience, in no way deterred these brave gallants. And how near to their quarry these same treasure hunters ofttimes knew they were, if the cold, stubborn rock would but yield.

In the latter part of the nineteenth century the open sesame to a boundless treasure was discovered, not by a mighty warrior, not by a brilliant explorer, but by an inspired woman who had sought in secret for many years the treasures of Truth,—wading fearlessly through the quagmires of mortal sense, scaling eagerly the mountain heights of hope and revelation. When her tireless quest was rewarded, Mrs. Eddy gave to the world her inspired "Key to the Scriptures," and thus opened up anew to posterity the narrow pathway to eternal good. And what a treasure-store stands revealed! Through this priceless discovery the sea of human consciousness gives up its false beliefs, the stubborn rock pours forth its living stream, the silent centuries disburse their long concealed truth.

To those who have gained the smallest insight into the simple yet profound teaching of Christian Science, their dimly visioned treasure calls them as the grosser wealth of far-off lands called to the bold explorers, but with this difference: that to the earnest seekers after God the treasures of Truth must inevitably become a solid reality, for the veil of obscuration has been rent asunder and the "Word" revealed,—the incontestable truth about God, a spiritual feast for foodless multitudes, a treasure-trove beyond human ken.

The Bible history of the Israelites, as read apart from its spiritual signification, has driven weary wayfarers back to their dungeons of fear and despair. The Bible has been held in superstitious awe and veneration by millions who were ignorant of its intrinsic and boundless worth. Some few in every age have glimpsed faintly the wonderful possibilities concealed beneath the letter of its pages, yet have sighed hopelessly over their failure to give a reason for the faith that was in them, a workable solution of their belief in the living God, a key which could unlock for them the treasure-house of Truth. Like the material art treasures of all nations, the "Word" has been carefully screened from the unillumined mentality; thus Mrs. Eddy's "Key to the Scriptures," which opens the door to the earnest seeker after Truth, remains a closed book to the material wayfarer.

Christian Science silences the awful thunders of Sinai with the "still small voice" of revealed Truth. "Thou shalt not" gives place to the tender "Come unto me;" the awesome man-made "Lord God" becomes the loving Father-Mother of our text-book, to whom we turn so confidingly in every trouble, whether it be small or great. "The people that walked in darkness" begin to glimpse the sunlight of Truth, the drunkard, the blasphemer, the sick, and the sorrowing are turning to the ever-present Christ, who is the Wayshower to Life, Truth, Love. Erudite scholars who believed they

Digitized by Google

understood "all mysteries, and all knowledge," begin humbly to reason together as little children. War, wealth, fame, the lusts of the flesh, go out slowly one by one, naked and ashamed, for this key of great price is unlocking for those who will the only imperishable wealth of all nations, the truth which makes free, the law of Spirit which rends the manacles of sin and death.

Already, after but a few decades, we hear faintly streaming down the years a mighty chorus of gladness, swelling as it gathers to its bosom the awakening dreamers along life's highways. Esau regains his birthright, the lame walk, the blind receive their sight, and in the distant horizon the gates of pearl, so long closed to mortal mind, swing inward. That brave, intrepid explorer, Mrs. Eddy, tells us on page 30 of "Retrospection and Introspection," that she was "led into the mazes of divine metaphysics through the gospel of suffering, the providence of God, and the cross of Christ," and undauntedly she blazed the track for countless pilgrims. She it was who, undismayed through joy or sorrow, so patiently and obediently searched for and discovered this priceless "Key" to the kingdom of harmony, where the redeemed ascribe "glory to God in the highest," and strive to bring into demonstration "on earth peace, good will toward men."

Lessons from a Rose Bush

ETHEL ORNDORFF

RECENTLY, while working out a problem which seemed slow in yielding, the history of a rose bush, which is now a source of much pleasure to its owner, came to the writer with comforting thoughts. This rose bush was at first simply a stick. There was nothing attractive in its appearance, but one who knew the parent bush, planted and carefully tended it. Sometimes it appeared to be lifeless, and the temptation came to abandon it; but still it was watched and cared for, until by and by it began to manifest life. It sent out little roots, then one day a tiny green leaf made its appearance. How carefully the little slip was watched! When the wind blew, it was sheltered and supported; when a frost seemed imminent, it was protected. Then, as it continued to grow and shoots sprang up which seemed to sap its vitality, they were cut away, until at last it was indeed a thing of beauty, bearing roses almost through the entire year.

The thought came to the writer how much the experience of many of us resembles that of the rose bush. Seemingly unanswered prayers and disappointment with the results of many problems over which we labor earnestly and faithfully, leave us, so far as we can see, of no real value to any one. One day, however, the subject of Christian Science is lovingly brought to our attention. Perhaps we meet it with indifference, or even a self-righteous refusal to consider it. For some time we are not conscious of any change in our thought, nor is there perhaps any change apparent to those around us; but later as we look back we know that here was our starting-point. Unconsciously at first, we begin to seek Truth, and while the growth is seemingly slow, we are nevertheless receiving the spiritual food which is life giving.

After a time, the destruction of some discordant physical condition, the overcoming of anger, or the elimination of fear, makes manifest to those about us that some progress is being made. Occasionally the winds of discouragement blow, and it would seem that we must give up, but at such times David's declaration, "God is our refuge and strength," or Paul's assurance that we shall not be tempted above that we are able to bear, encourages us to press on. Then, again, if the frost of criticism and pride is admitted to thought, it threatens to destroy our growth, but by dwelling in the thought of love as found in the thirteenth chapter of I Corinthians, we are warmed and protected. And so, as we continue to grow, when shoots of error or any of the forms in which a sense of mortal selfhood is manifested present themselves, Love gently but firmly destroys them.

Gratefully the writer went to work with new faith and energy, as this lesson came, knowing that man is a perfect expression of his Father, and that nothing can prevent a perfect result. Mrs. Eddy says on page 207 of Science and Health: "There is but one primal cause. Therefore there can be no effect from any other cause." So we need have no fear nor be discouraged if we do not always see the desired manifestations of growth immediately. It is not ours merely to fight, it is not ours merely to strive; it is ours to know, and our heavenly Father, who is Love and Life, will crown our efforts with flowers and fruit.

Whose Servants Are We?

STOKES ANTHONY BENNETT

WHEN the apostle Paul says, "Know ye not, that to whom ye yield yourselves servants to obey, his servants ye are to whom ye obey; whether of sin unto death, or of obedience unto righteousness?" he directs attention to a most important fact. Mrs. Eddy, the Discoverer and Founder of Christian Science, lays stress upon the same fact when on page 325 of Science and Health she writes, "He, who is begotten of the beliefs of the flesh and serves them, can never reach in this world the divine heights of our Lord." On page 496 she says, "In Christian Science the first duty is to obey God, to have one Mind, and to love another as yourself."

Therefore when the world in general shall have come to realize the truth of the above statements and is governed accordingly, there will be greater happiness, peace, and security. When the world understands that one is servant to whatever he either directly or indirectly obeys, much more care will be exercised in the choice of masters. Mortals always have been and are today inclined to yield obedience in certain lines without first analyzing this obedience and considering the results involved. Looking upon the mere surface of their affairs, mortals would seem often to forget that there is something lying underneath, and that this something is designed to exert a strong influence upon both their thoughts and their deeds. It was probably to check this wrong tendency, and to substitute for it a right one, that Paul made his emphatic declaration and that Mrs. Eddy repeated the substance of this declaration.

It is plain that the basis of all action is thought, and that without thought there could be no action whatsoever. It is also plain that the author of the book of Proverbs spoke to the point when he said concerning a man, "As he thinketh in his heart, so is he." Therefore it is with thought that we must deal in order to analyze and regulate action. And just here Christian Science stands ready to play its helpful part. This Science teaches and demonstrates that God is divine Mind, and that the real or true man is at-one with or tributary to God,—is His image and likeness, as the first chapter of Genesis portrays. It teaches and demonstrates too that the real or spiritual man thinks no thoughts that are unlike God's thoughts.

At this point the question may be asked, And what does God think? In answer let it be said that the Bible declares that God is good,—"of purer eyes than to behold evil," too holy to look on iniquity; also that He is Love. Thus it fol-

Digitized by Google

lows that God thinks only what is divinely good and pure, loving and perfect; that the laws of God are wholly good because they are the outgrowth of His thoughts, and that man, God's reflection, is under the direct control of these laws.

Christ Jesus, our great Teacher and Wayshower, taught plainly what the real or spiritual man thinks, and what is the effect of his thinking. Revealing God as the one and only Mind, and man as the idea or expression of this Mind, the Master pictured man's eternal unity with the Father, and his consequent heritage of harmony and bliss. On every hand Jesus brought to light the omnipotent, omnipresent goodness and love of God. The many mighty works which he performed, instead of being so-called miraculous or supernatural exhibitions of deific power, were simply the divinely natural results of his spiritual thinking,—that is, of his understanding of the truth about God and the universe, including individual man. Jesus knew full well that because God is Mind and All, it is Mind, not asserted matter, which is tangible and real. He knew too that with this Mind all things are possible. On this unshakable foundation he stood, and rendered null and void both evil and matter in every form, thus proving conclusively their deceptiveness, their nothingness. On this foundation he served God with his whole heart and strength.

Christian Science—the Science of Christianity—is the same Science which Jesus, his apostles, and the early Christians understood and demonstrated. Because God, divine Mind, is in reality the only intelligence and power, and because Christian Science is the provable knowledge of God, or Mind, it goes without saying that this Science is the rule of right or godlike thinking and doing. It goes without saying too that it was this divine, omnipotent Mind to which Paul referred when he enjoined, "Let this mind be in you, which was also in Christ Jesus," and to which Peter alluded when he commanded, "Arm yourselves likewise with the same mind."

In relative or human experience, however, we are summoned to deal with what the apostle denominates the carnal or fleshly mind, and what Mrs. Eddy terms the material or mortal mind. It is this mind, this counterfeit of real or spiritual intelligence, which the eighth chapter of Romans declares is "enmity against God: for it is not subject to the law of God, neither indeed can be." It is this mind which continually believes in and serves a power supposedly unlike and opposed to God. Through this unrighteous belief, this unchristian service, men and women break the first commandment of the decalogue and have "other gods,"—the gods of material pleasure, of lust, evil, sin, sickness, sorrow, and death. Thus are they alienated from "the only wise God our Saviour."

Christian Science enables its wide-awake, alert students to rise above the temptations and the slavery of mortal mind existence through seeing man as God sees him,—spiritual, immortal, perfect, and therefore as already possessed of the Mind of Christ. Showing what thought really is, how good thoughts may be obtained and retained, and how wrong thoughts may be detected, destroyed, and forgotten, Christian Science comes as both a revelation and a benediction to the human family. Affirming the allness of spiritually good thoughts, this Science at once makes clear that what are called wrong thoughts are powerless, because there can be in reality no mind arrayed against the divine Mind, God; and that what would seem to be evil thinking, when considered in the light of absolute truth, is but a nothingness, an illusion,—no thinking at all,—for being not of God, who is good and infinite, it is wholly without legitimate foundation in fact. This does not mean, however, that in mortal experience evil thoughts or suggestions are to be in the least fostered, condoned, or ignored (not for one moment!), but rather that they are to be honestly and intelligently grappled with and overcome by recognizing their subtlety, their utter deception and falsity; that is, by knowing the truth which Jesus said would make free.

So we see that Christian Science affords an exact or correct understanding of the divine Mind, by which its prayerful students may dethrone the fleshly or carnal mind and its erroneous thinking, thereby wiping out mortal inharmonies and woes. With this sure understanding Christian Scientists, in direct proportion to their individual comprehension of Christian Science, demonstrate the power of the spiritual over the material, the power of good over evil. Thus do they step by step throw off the yoke of bondage as servants of the beliefs of the flesh, and reach forward to the divine heights attained by our Lord. They become intelligent, faithful servants of God and obey Him, having but one Mind, and loving another as themselves.

Spiritual Preparedness

CARRIE LEE POOLE

MUCH is being said at this time on the subject of preparedness. It is discussed by individuals and the press with reference to national defense against a hostile invasion. If the world is ever going to be at peace it will be only through obedience to the divine command, "Thou shalt have no other gods before me." If this commandment were obeyed in individual consciousness, it would bring peace within and also throughout the whole world. Our warfare and preparedness would then become spiritual, not carnal, and the light of spiritual illumination would shed its radiance over all nations and peoples. Sooner or later the whole human race must learn of man's unity with God, and retreat into spiritual selfhood and build on everlasting foundations. Man made in the image of God and fashioned after the divine likeness possesses no other consciousness than that which is allied to the divine.

Mrs. Eddy has written in "Unity of Good" (p. 21), "If we observe our mental processes, we shall find that we are perpetually arguing with ourselves; yet each mortal is not two personalities, but one." This warfare between good and evil goes on, until the same Mind "which was also in Christ Jesus" is recognized to be the true consciousness and man's individuality as "hid with Christ in God," where no belief in "that which Life is not" (Science and Health, p. 495) can enter to defile or make a lie.

Spiritual preparedness will promote understanding of Truth and enlighten the individual thought to choose Christ for his guide to eternal Life. It behooves mankind to watch sedulously and guard the door of thought against the arguments of evil which would secretly rob them of man's divine birthright. Our protection and defense from sin, sickness, and death lies in constant watchfulness against the subtle rulers of the world's darkness. If we would follow in our Master's footsteps we must give up the material weapons of defense and seek God's way. To do this we must first understand the Christ-principle, which like a guiding star shines through the night of materialism into the dawn of a new day, fragrant with divine benedictions for all mankind.

The spiritual law of Love demands that we love our fellow man as ourselves; that we strive to hold him in the perfection of man's being as the immortal idea of God. Whatever manifests itself in mankind today as brute force, inflamed with hate, greed, murder, is the stigma handed down through the ages of the carnal mind since Cain rose up against his brother Abel and slew him. The false belief that man, God's image and likeness, originated from the

Digitized by Google

dust of the ground, is the curse that is being lifted today through Christian Science.

Out from a night of materialism the star of hope has again shined in our hearts. Mrs. Eddy, God's inspired messenger to this benighted age, has unfurled the banner of our risen Lord, and through the revelation of "Science and Health with Key to the Scriptures" we have been given the chart of life eternal. On page 467 of the text-book we read: "It should be thoroughly understood that all men have one Mind, one God and Father, one Life, Truth, and Love. Mankind will become perfect in proportion as this fact becomes apparent; war will cease and the true brotherhood of man will be established." The earnest student in Christian Science who daily directs his walk with God, in the unceasing activity of good, is helping to lessen the world's evils and demonstrating Christian Science to be the panacea for all human suffering. St. Paul says, "Thanks be to God, which giveth us the victory through our Lord Jesus Christ."

Far-reaching Testimony

JEANETTE L. NADEL

THE high value which our Leader attached to the giving of testimony at the Wednesday evening meetings is shown by the statement in Section 24, Article VIII, of the Manual of The Mother Church: "Testimony in regard to the healing of the sick is highly important. More than a mere rehearsal of blessings, it scales the pinnacle of praise and illustrates the demonstration of Christ, 'who healeth all thy diseases.'" Since the giving of testimony is so important, it behooves us to speak clearly and distinctly in rehearsing our blessings, so that none may be deprived of the good which flows from these meetings. It might be well for those who give testimony to Truth's power to ponder Isaiah's words: "O Jerusalem, that bringest good tidings, lift up thy voice with strength; lift it up, be not afraid."

In most of the larger churches the reader, after announcing that the meeting is open for the giving of testimonies, lovingly asks those who take part to raise their voices and speak distinctly, so that all may hear. In spite of this admonition many of the testimonies, which probably would be very helpful, are heard only by those in the immediate vicinity of the speaker, and very often only part of a testimony is heard by all of the congregation.

Surely if we are genuinely grateful for the help received from the study and practical application of Christian Science and have taken a decided stand for Truth, this very sense of gratitude will enable us to speak distinctly to those who attend our services, for we want all the world to share our joy. The fact that we are not telling of our own achievements, but are simply bearing witness to the power of Truth in our experiences, should give us courage and strength to overcome the error which would render our words inaudible.

The revelator heard the voice of Truth as the voice of many waters, and again as the voice of a great thunder. On page 568 of Science and Health we read: "A louder song, sweeter than has ever before reached high heaven, now rises clearer and nearer to the great heart of Christ; for the accuser is not there, and Love sends forth her primal and everlasting strain."

To those who listen for the gentle tone,
The Master's voice calls ever tenderly,
O thou oppressed and weary, come to me,
And, coming, make my peace and rest thine own.

EDITH L. PERKINS.

Selected Articles

[Judge Clifford P. Smith in *Berkshire County Eagle*, Pittsfield, Mass.]

The assertion of a New York clergyman, which the *Eagle* has reported, that Mrs. Eddy did not know what was in the Bible, had no other basis than the fact that she used the Bible, but not the books called the Apocrypha. He said, "Whatever Key to the Scriptures she wrote really is not to the complete Scriptures, but to the American Bible Society Scriptures." In other words, he denounced the Bible as it is commonly known, because it does not include the books of the Apocrypha, of which Webster's New International Dictionary says: "As they are not part of the Hebrew Bible, Protestants reject them as inspired sources of doctrine or as reliable history." In short, this gentleman found in the Apocrypha certain passages favorable to physicians, and used them as an argument against Christian Science.

With reference to this sermon the *New York Telegram* made the editorial comment that this clergyman "would do better, if he wishes to carry on an argument, to confine himself to the Scripture. His whole argument against Christian Science is based on what anonymous writers had to say in that collection known as the Apocrypha. Christian Science, as set forth by Mrs. Eddy, is based on the Bible."

The sermon or lecture in question was brought to a close with this question: "What has the Christian Science church done to relieve the wounded and the sick and the suffering in this war?" Probably this matter was intended as a rhetorical shell loaded with asphyxiating gas; but it can be answered, nevertheless. The Mother Church, The First Church of Christ, Scientist, in Boston, has received from its members and expended for the relief of sufferers from the European war more than $187,000. This church has a considerable sum still on hand for this purpose, and further contributions to this fund continue to come in. Besides this, the Christian Scientists of France, Germany, and Great Britain have been fully as active and useful as other citizens in their endeavors to alleviate suffering and mitigate the consequences of war. In these countries, also, more than a few men in their armies and navies have given grateful testimony to the direct benefits of Christian Science in times of need.

[Editorial in *The Reformatory Pillar*, St. Cloud, Minn.]

If we look below the surface of human life, we find that many of its mistakes and tragedies are due to the fact that a sense of injustice is being harbored in thought. This sense tends to produce resentment and a belief of grievance, or even a desire for revenge. Such conditions of thought ultimate in sin and despair, and unless corrected betimes, they are productive of crime and disaster. It therefore behooves humanity to examine carefully its concept of justice, and to maintain a mental attitude wherein the sense of injustice may be destroyed. The question at issue is not so much whether the person aggrieved has a just reason for resentment, whether an insult, injury, or wrong has been received or not; the question to be considered is whether the person in the case can afford to continue to harbor the belief of having been wronged.

Those who are familiar with the results of wrong thinking upon human lives, will recognize immediately the injurious effect of persisting in the belief of a wrong being committed. There is a Scriptural statement about man, that "as he thinketh in his heart, so is he." The habit of maintaining in the mind either an injury or a wrong tends to

Digitized by Google

make the person who does this a wrong-doer himself. Unless the wrong or injury is forgiven, it will continue to harass and wound. For their own protection, therefore, all those who are laboring under the sense of injustice, whether or not this belief has a sufficient basis in human thought, must learn to forgive the offense, that is, to make it unreal.

✧

[Ezra W. Palmer in *Littleton* (Col.) *Independent*]

The objections of the Denver clergyman who recently attacked Christian Science in your city, seem to be on the basis that Christian Science does not teach according to his theological beliefs. Failure to teach according to his standards does not necessarily prove Christian Science to be wrong. For instance, this clergyman assumes that Christian Science does not teach "the deity of Christ." Christian Science does not teach that Christ Jesus was God. The Scriptures do not so teach. Jesus frequently said he was the Son of God, and on one occasion specifically denied that he was God, but declared that he was the Son of God, a teaching which Christian Science follows. (See John x. 33-36.) The dogma that Jesus was God was evidently injected into the teachings of the church about the third century. It has no support from the teachings of the Master or of his disciples.

Christian Science does not deny the doctrine of atonement. Doubtless the interpretation of the atonement given by Christian Science differs from the concept of this clergyman. That, however, need occasion no surprise, since the doctrine of atonement has been a mooted question among theologians throughout the ages, and many different views are held concerning it. The atonement, as Christian Science teaches it, is at-one-ment with God. In Science and Health (p. 23) Mrs. Eddy says, "The atonement is a hard problem in theology, but its scientific explanation is, that suffering is an error of sinful sense which Truth destroys, and that eventually both sin and suffering will fall at the feet of everlasting Love."

The Scriptures do not teach that no further message will be given from God to men except that contained in the Bible. The prophet Joel prophesied that "afterward . . . I will pour out my spirit upon all flesh; and your sons and your daughters shall prophesy, your old men shall dream dreams, your young men shall see visions." This critic could hardly contend that this prophecy has been completely fulfilled. Jesus also said that there were many things to be taught which his disciples were not yet prepared to receive. He promised his followers that when they were spiritually prepared they would receive the Comforter, "even the Spirit of truth," which would abide with them forever. Therefore the contention of this critic that God would give to men no further message than that contained in the Bible is groundless.

The attempt is made by this critic to apply the prophecy in II Peter ii. 1-3 to Christian Science. The implication does not fit. Christian Scientists do not deny God or His Son Christ Jesus, nor does Christian Science lead men into heresies. On the contrary, the teachings of Christian Science lead men to love God and their fellow men, and cause them to love, study, and understand the divine truths of the Bible and to apply these truths in regenerating their own lives and in healing the sick and uplifting the sinner.

In closing his newspaper article the gentleman erroneously attributes this quotation to Mrs. Eddy: "Diet, bathing, and exercise are unscientific." This passage is not found in any of Mrs. Eddy's works. Mrs. Eddy deprecated that attitude of mind which busies itself with attention to diet, bathing, and exercise, as if by these men could gain and retain health and happiness. She said (Science and Health, p. 174), "Is civilization only a higher form of idolatry, that man should bow down to a flesh-brush, to flannels, to baths, diet, exercise, and air?" Mrs. Eddy believed thoroughly in sanitation and cleanliness, but she did not believe that these things should be an end in themselves and so engross one's time that no attention would be paid to keeping pure the thought. Jesus warned his followers against keeping clean merely the outside of the platter and said, "Blessed are the pure in heart: for they shall see God."

✧

[Marie Hartman in *Nieuw Keikelijk Weekblad*, The Hague, Holland. Translation]

It is a riddle how our clerical critic can write that Christian Science is liable to weaken morality and that it abandons the distinction between good and evil. In no other teaching than Christian Science do we find the line between good and evil so sharply drawn or so rigidly adhered to. For the notion that a small sin does not matter, there is no place in Christian Science, because it considers every sin as disobedience to God, and for that reason as guilt. The purpose of Christian Science is the same as the apostle Paul outlines for himself in the tenth chapter of II Corinthians, namely, to cast down "imaginations, and every high thing that exalteth itself against the knowledge of God," and to bring "into captivity every thought to the obedience of Christ."

According to the Scriptures, Christian Science considers God as the only creator, as the cause and Principle of all that is. His emanation is therefore all that is true, and includes all that is real. What proceeds from God must express His nature, which is eternal good, Love, Life, and as John says, the Light; all His expressions are good,—are rays of the divine Light. Obedience to the good, the true, the eternal,—to God's law as Jesus revealed it in the destruction of sin, sickness, and death,—transforms man by the renewing of the mind, makes him "put off the old man with his deeds," teaches him to serve God only and to partake of Jesus' saving grace.

Christian Science does not consider that as an expression of God which tries to prevent a man from obeying, serving, and honoring God. That which would make him believe that God and all which proceeds from Him are not supreme here and now, and induce him to take another than the narrow way "which leadeth unto life," is of the devil, of which Jesus said, "He is a liar, and the father of it." Since evil does not proceed from God, it cannot be numbered among the things true, eternal, and unchanging, and for that reason Christian Science does not call it real. By this Christian Science does not say that to the limited, unenlightened human consciousness evil does not exist, but that, on the basis of its unreality, it can be overcome by learning to know the truth which shall make mankind free. To conceive of evil as unreal can never lead to considering it as good, or not so bad, or even excusable; on the contrary, it teaches a man to be on his guard for the claims and temptations of evil, and to realize the power which his understanding of the truth gives him over it.

Neither in Mrs. Eddy's writings nor in the entire Christian Science literature can a single sentence be found which would in the least justify the contention that this teaching results in weakening morality or in abandoning the line between good and evil. In the Christian Science text-book, "Science and Health with Key to the Scriptures" (p. 339), Mrs. Eddy says: "A sinner can receive no encouragement from the fact that Science demonstrates the unreality of evil, for the sinner would make a reality of sin,—would make that real which is unreal, and thus heap up 'wrath against the day of

Digitized by Google

wrath.' He is joining in a conspiracy against himself,—against his own awakening to the awful unreality by which he has been deceived. Only those, who repent of sin and forsake the unreal, can fully understand the unreality of evil."

Jesus said, "Every tree is known by his own fruit," and I am convinced that I am voicing the experience of all who honestly study Christian Science and apply this teaching, when I say that the Christian Science teaching of the unreality of evil is a mighty help in the struggle against sin. It reveals that evil, in whatever form, lacks divine sanction, and that therefore, when fighting evil, man has the invincible truth at his side.

✧

[John L. Rendall in *Sioux City* (Iowa) *Tribune*]

In an issue of the *Tribune* mention is made of a lecture in which the lecturer is quoted as stating that Christian Scientists "declare religion to be merely a system of bodily healing." In this statement the reverend gentleman is greatly mistaken. The healing work of Christian Science is only part of its regenerative and reformative mission. It does not receive any greater emphasis than was placed upon it by Christ Jesus and his disciples. When John the Baptist sent two of his disciples to Jesus asking, "Art thou he that should come? or look we for another?" Jesus answered, "Go your way, and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached."

Christian Science healing means both physical and moral regeneration. It means the healing of the sick and the reformation of the sinner. It gives to mankind a better understanding of God and man, and of man's indestructible relationship with God. It teaches Christian charity, kindliness, and brotherly love, and strongly emphasizes the necessity for compliance with the spirit of the golden rule: "All things whatsoever ye would that men should do to you, do ye even so to them." It will thus be seen that Christian Science is very much more than "a system of bodily healing."

✧

[S. T. Downs in *Washington* (Ind.) *Herald*]

Christian Science is proving the truth of the Master's statement, "He that believeth on me, the works that I do shall he do also," by healing the sick and reforming the sinner; and in the cry of "devil," "humbug," "fraud," "imposition," and the like, we are reminded of the Scriptural account of the Pharisees' accusation that the great Master cast out devils "by Beelzebub the prince of the devils." That Christian Science healings are the work of God is proved beyond cavil in the almost numberless testimonies that have been printed in the Christian Science periodicals and given by the spoken word in public testimony meetings.

There are also large numbers of these same people, and many others, who are giving testimony through purer and nobler living that Christian Science heals sin and destroys the love of it. The fallacy of attempting to detract from these healings by saying that they are accomplished through mental suggestion, will become apparent to any investigator who will read impartially the chapter entitled Animal Magnetism Unmasked, in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy; and also the discussion of the subject in a number of places in her other writings. Mrs. Eddy makes it very clear that one can practise Christian Science only as he has ceased to practise mental suggestion.

The claim that Christian Science is not Christian contrasts widely with the fact that it is based on the teachings and works of Christ Jesus as set forth in the Scriptures. We must insist that preaching the omnipresence and omnipotence of God, divine Love, and healing the sick as one of the "signs following," is the highest type of Christianity. We must insist, too, that such works are scientific,—Christianly scientific because they are accomplished through the operation of spiritual laws as revealed by Christ Jesus. These laws are found in the spiritual import of the Word and are clearly explained in the Christian Science text-book.

There is a somewhat common notion with opponents of Christian Science that it teaches such absurdities as, "Believe yourself well and you will be well," as was stated by our critic. One who would approach Christian Science with such a notion and then read superficially, or for the purpose of getting material for an attack, might feel that he could take a few disconnected sentences from Science and Health and twist them into such a meaning; but the true seeker, the one who approaches Christian Science to learn what it actually teaches, will learn that our brother has failed to see the great difference between blind belief and spiritual understanding. It is true that Christian Science teaches sickness is an erroneous belief, but it teaches at the same time that spiritual law, operating in human consciousness through an understanding of God and of man's relation to Him, destroys such a belief. This is what the great Master meant when he said, "Ye shall know the truth, and the truth shall make you free."

In discussing the Christian Science teaching about God, our brother stated among other things that Christian Science says "God is not a person." This statement is liable to lead to considerable speculation, depending upon one's understanding of the word "person." Mrs. Eddy discusses the use of the words "person" and "personal" in this connection on page 116 of Science and Health: "If the term personality, as applied to God, means infinite personality, then God *is* infinite *Person*,—in the sense of infinite personality, but not in the lower sense. An infinite Mind in a finite form is an absolute impossibility." Christian Science does not attempt to define the precise form of God, but declares in many ways that He is not physical or corporeal. The Christian Science attitude is exactly that of the beloved disciple as expressed in his first epistle: "Now are we the sons of God, and it doth not yet appear what we shall be: but we know that, when he shall appear, we shall be like him; for we shall see him as he is."

We do not believe the Scriptures will warrant the critic's statement, "If Jesus Christ was not God, he is nothing;" and in the light which Christian Science throws on this subject it will be seen that Jesus specifically declared that he was not God. The church has for centuries made no distinction between the man Jesus and the Christ he revealed, while Christian Science does make this distinction and employs the term Jesus chiefly to distinguish the physical from the eternal Christ, or divine Principle that he revealed. He said, "Why callest thou me good? there is none good but one, that is, God." At another time he said, "The Father that dwelleth in me, he doeth the works."

These statements show that Jesus had no intention of giving the impression that he was God. He certainly was not referring to his bodily form when he said, "Lo, I am with you alway, even unto the end of the world." In the references to the atonement and the claim that Jesus was God, our critic's statements show the inconsistency of such a theory, because it is inconceivable that God should have suffered to appease His angry self. Christian Science shows that while Jesus' suffering on the cross was inevitable, it was that man might become reconciled to and know of God, infinite Love, and not that God might be reconciled to man.

Digitized by Google

Editorial

"Seek ye the kingdom"

HUMAN existence is so largely made up of conscious and unconscious beliefs in the reality of matter and of evil, that he who would measurably demonstrate the allness of God, good, must keep himself well schooled and alert not only in the constant practice of his best sense of right doing, but also in an attempt to analyze every thought, motive, and expression in its right relationship to the first commandment, "Thou shalt have no other gods before me." Through this mental analysis he will find that one of the most insidious beliefs which comes to him to be disposed of is that which in various ways insists that there necessarily must be times of lack of substance as well as times of plenty, times of depletion as well as times of accretion, dull seasons and busy seasons.

An analysis of this belief or suggestion would of course show at once that it is antagonistic to this primary commandment, inasmuch as it posits a further belief that God is unmindful of the needs of man or is incompetent continuously to supply them. Still further analysis will prove that this belief is not of itself even fundamental or basic, but rather the outcome of a far more serious belief, namely, that evil is as real and as powerful as good, which is simply another way of saying that God is the creator of both good and evil, or that there is some other creator equally powerful or equally immanent. Of course this is a mistaken concept of God and His creation, and most persons when they see that in effect it constitutes a breach of the first great commandment will gladly disown and repudiate it, for if God were the creator of evil He would be worse and more guilty than any criminal that ever faced trial.

When Jesus fed the multitude with the few loaves and fishes, he proved that the apparent lack in this case was an illusion, without foundation, and not according to God's law. If he had believed that matter was real, and the alleged lack of it could be supplied only by the material processes which we so glibly refer to as the laws of nature, he, and those who followed him to the "desert place" where he "healed their sick," would have been helpless and afraid in the face of such a problem as there presented itself. Fortunately for them, and fortunately for all succeeding generations who have "believed on him," he knew that "man shall not live by bread alone, but by every word that proceedeth out of the mouth of God." He also, on another occasion, pointed out the way to annul the belief of depletion when he said, "Seek not ye what ye shall eat, or what ye shall drink, neither be ye of doubtful mind . . . but rather seek ye the kingdom of God; and all these things shall be added unto you."

Jesus also knew the great truth which Mrs. Eddy has stated on page 280 of Science and Health: "Finite belief can never do justice to Truth in any direction. Finite belief limits all things, and would compress Mind, which is infinite, beneath a skull bone. Such belief can neither apprehend nor worship the infinite; and to accommodate its finite sense of the divisibility of Soul and substance, it seeks to divide the one Spirit into persons and souls." She says further: "The only excuse for entertaining human opinions and rejecting the Science of being is our mortal ignorance of Spirit,—ignorance which yields only to the understanding of divine Science, the understanding by which we enter into the kingdom of Truth on earth and learn that Spirit is infinite and supreme. Spirit and matter no more commingle than light and darkness. When one appears, the other disappears."

The application of these teachings would seem to be, that what humanity needs to do is to get rid of its false beliefs about God, man, and substance, by acquiring a correct understanding of God, and to realize that to know Him aright is life eternal; also, that this life cannot be rendered barren nor be terminated by the material phenomena which we have believed to be "laws of nature" and to which we have mistakenly yielded obedience, instead of putting our trust "in the living God, who giveth us richly all things to enjoy."

ARCHIBALD MCLELLAN.

Giving and Receiving

THE suggestion that an individual cannot afford to give virtually declares that he is not ready to receive. The seeming mortal law works both ways, and tends to prove itself by inversion: if we cannot receive, we cannot give; and if we cannot give, we cannot receive. Mankind may be said to have the choice between these two statements, and yet there is no real choice, because both lead to the same conclusion, namely, to lack, want, and poverty. The surest way of becoming poor is to stop giving, and metaphysically considered the reason is obvious. Refusing to give, mankind mentally insists that it has nothing to give, or at least not enough to give, thereby limiting itself and declaring for a separation between God, the infinite source of all, and man, His expressed image.

The habit of reiterating that we cannot afford to give springs from fear, and acts like a series of checks upon our activity, our intelligence, and our ability, ultimating in inaction, apathy, and loss alike of power and of substance. Looking forward to a time when we will not be asked to give as much as at present, is preparing for ourselves a time when we shall have nothing to give. The fact is, that the future holds in store constantly more giving, and not less, on the part of advancing Christian Scientists, for less giving would mean retrogression and so eventual destruction of the power to receive.

Jesus' commendation of the widow's mite was not due to the fact that the mite was so small, but that it was the widow's all. There is no special virtue in putting small change into the church collection instead of a larger amount. Jesus' advice to the twelve disciples, as he sent them forth to preach and to heal, included the exhortation, "Freely ye have received, freely give." At another time he said to them, "Give, and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall men give into your bosom."

The prayer which saves and heals declares that man has already received. An individual wholly uninstructed in Christian Science might object to this by asking how any one can believe he has received before there is any evidence to the physical senses that this is the case. The answer lies in that spiritual understanding which knows that all good is in reality already created and already belongs to man as God's manifestation. This is the realization which destroys a belief of lack and places us in position to dispense freely and to bestow liberally.

On page 79 of Science and Health Mrs. Eddy has put the case succinctly by writing, "Giving does not impoverish us in the service of our Maker, neither does withholding enrich us." It has been repeatedly observed in the course of the history of the Christian Science movement that when Christian Scientists have responded fearlessly to the call for funds from the Leader and from The Mother Church they have been enriched thereby. At the time of the extension of The

Digitized by Google

Mother Church, for instance, many branch churches and societies responded to the call by sending the whole of their building funds, thus seemingly surrendering immediate plans for church buildings of their own. The general verdict was that by so doing the branch churches and societies were later able to raise funds of their own in unexpected and often more expeditious ways. They thus proved that by breaking the seeming mortal law which attempted to declare that they could not afford to give, they promptly also broke the same law which was trying to prevent them from receiving.

These simple scientific facts, demonstrable in Christian metaphysics, when understood and practised by humanity at large are destined to transform all economic doctrines and to settle all questions of political economy and taxation. Christian Science alone can explain the law of supply and demand. Far reaching beyond the ken of the present-day theorist is the metaphysical fact that scientific giving enriches and so is the eventual cure for poverty both in the individual and in the community.

WILLIAM D. MCCRACKAN.

✧

"Vain repetitions"

STUDENTS of Christian Science may well ponder deeply the counsel of the Master with respect to prayer, and also that given by Mrs. Eddy in the first chapter of Science and Health, where she makes a clear distinction between true prayer and an empty form of words which can never be other than barren of results. There can be no question that those who come into Christian Science learn the power of prayer in ways which they never deemed possible in their former religious experience, and yet, as they would willingly admit, each day should bring to them a fuller, clearer understanding of God, and also of that which relates human consciousness to the divine, namely, the communion with the infinite Mind which alone constitutes true prayer.

It is well worth our while to study earnestly the instructions of Christ Jesus respecting prayer given in the sixth chapter of Matthew, and we shall there find that he has a great deal to say about false concepts of it. Among other things he warns his followers against audible and public prayers, but even when he tells them that they should enter into the closet and shut the door, there to commune with the "Father which is in secret," he immediately follows this admonition with the command: "But when ye pray, use not vain repetitions, as the heathen do: for they think that they shall be heard for their much speaking. Be not ye therefore like unto them." Students of Christian Science might say at once that they have gotten away from the forms of prayer here called "vain repetitions," but perhaps they do not always see as clearly as they should that all persistence in the use of formulas is a most subtle form of disobedience to this command of our Master, and is also at variance with the instruction given in our text-book in the chapter on Prayer.

Christian Scientists accept gladly the statement of our Leader, as found on page 16 of Science and Health, where she says that the Lord's Prayer "covers all human needs." They prove this true in the healing of sickness as well as in the overcoming of sin, that is, where the letter of truth is clearly understood and the spirit accompanies the declaration of the letter. The opening statements of the Lord's Prayer express the absoluteness of God in such a way that no shadow of material belief can hinder the realization of all the good sought after by those who with love and reverence thus approach divine Love. In other words, this prayer spiritually understood rules out the belief that there can be either want or woe, sin, sickness, or death in the kingdom of God.

Those who study this prayer with its spiritual interpretation as there given, must surely see the subtlety of mortal belief which would have them seek out other prayers or formulas which purport to be something better and more powerful than the Lord's Prayer with its spiritual interpretation, which has such an important place in the First Lessons given in all Christian Science Sunday schools. Let those who may be tempted to use or to pass around formulas ask themselves whether it would be right to offer these to the pupils in the Sunday school with the same argument which accompanies their proffered use among adults, namely, that they are higher or more practical statements of truth than can be found in our Leader's writings. Of course no one would venture to put it in just this way, but this is the subtle argument underlying the attempt to substitute these for the clear statements of divine Science found in our text-book and our Leader's other writings, and a word to the wise is surely sufficient.

We must have a clear sense of the letter of Science and a constantly unfolding sense of the profound depths of truth in the words and works of Christ Jesus, and as this is legitimately gained we shall not depend upon any mere repetitions of words even if they be "with enticing words of man's wisdom," but instead we shall know the power of Truth and Love and declare it with the "demonstration of the Spirit" which St. Paul said accompanied his statements of the truth that heals and saves.

ANNIE M. KNOTT.

Among the Churches

Current Notes

VALDEZ, ALASKA.—Prof. Hermann S. Hering lectured in Eagle Hall under the auspices of the Christian Science Society on Thursday evening, July 13. There were two hundred and four persons present, and this we feel, out of a population of seven hundred and fifty, is a good percentage. The audience was attentive during the entire lecture and seemed interested and appreciative. At the close of the lecture we distributed 109 *Sentinels*, 21 *Journals*, and 16 *Monitors*. We feel that much good seed has been sown and know that interest in our cause will grow.—*Correspondence.*

TRINIDAD, COL.—The latest building improvement to be made in the city of Trinidad started with the breaking of ground for the new church edifice of First Church of Christ, Scientist, this morning [July 29]. It is the plan of the local church to erect a building which with furnishings and heating plant will cost about ten thousand dollars, and it is expected that the church will be ready for occupancy by Nov. 15.

The Picketwire.

BANGOR, MAINE.—During the year we have given 84 one-month subscriptions to the *Monitor*, have given out 1130 copies containing special articles, and have placed 11 yearly subscriptions. There have been also 5 yearly subscriptions to the *Sentinel* and 3 to the *Journal*. We have distributed 4308 *Sentinels*, 355 *Journals*, 29 *Herolds*, 13,876 *Monitors*, 22 pamphlets, 2098 lectures and other literature, a total of 20,688 pieces.—*Literature Distribution Committee.*

TOMAH, WIS.—Work is progressing daily on the foundations of the new house of worship of the Christian Science church, corner of Milwaukee and Oak Streets. The building is to be 65 by 48 feet over all. The contract calls for the completion of the building on Nov. 1.—*Tomah Journal.*

Digitized by Google

Fort Dodge, Iowa.—Action was taken on Monday night [July 31] by members of First Church of Christ, Scientist, whereby they accepted an agreement previously reached regarding an exchange of the church property at the southwest corner of Twelfth Street and First Avenue North for two lots at the vacant southeast corner of Twelfth Street and Sixth Avenue North.

The site of the present church is 75 feet on First Avenue North by 116 feet on Twelfth Street. The two new lots that have been exchanged for it are each 70 by 140 feet.

Fort Dodge Messenger.

Concord, Mass.—The edifice of First Church of Christ, Scientist, Concord, Mass., was dedicated Sunday morning, May 14. In the early spring of 1899 a few persons gathered in a home on Main Street to read together the Christian Science Lessons. The little band continued these gatherings until the number outgrew the home, and quarters were then secured in Masonic Hall, where in 1904 they organized as a society. A year later the Middlesex Mutual Fire Insurance Company offered the society a room. Here the organization increased in membership and strength, and in 1908 a charter was procured and First Church of Christ, Scientist, Concord, Mass., was duly incorporated according to state laws.

The Concord Minute Man.

Charleston, S. C.—Yesterday [Aug. 13] First Church of Christ, Scientist, held services in its own building. This is the first time in the history of the state that a Christian Science congregation has ever held services in its own edifice. There are several congregations in the state, but all of them use rented halls. The little church has just been erected at the southwest corner of Lee and Bradford Streets. The auditorium is 45 by 50 feet and comfortably seats four hundred people. Ground was broken for the foundation of the new structure on May 2, and the work was rushed for completion at the earliest moment possible.

The Charleston Gazette.

Seattle, Wash.—Marking the beginning of actual construction work on the hundred thousand dollar edifice of Fourth Church of Christ, Scientist, at Eighth Avenue and Seneca Street, contracts for construction and plumbing were awarded this week [Aug. 7] and the excavation for the first unit of the structure already has begun. It is the desire of the construction committee to hold services in the new unit by Jan. 1, 1917. The first portion to be erected will be used as the Sunday school room in the complete structure. Plans for the new church are so arranged that services may be held in the initial unit while construction work on the other parts of the building is in progress.—*Seattle Times.*

The Lectures

Oxnard, Cal.

The Rev. R. E. McKnight, in introducing Virgil O. Strickler, who lectured on Christian Science in the Oxnard Opera House, said:—

All fair-minded people who have investigated the subject will concede at least three things concerning Christian Science:

First, that no other religious belief has ever had such a rapid growth. Within the last half-century Christian Science has encircled the globe, numbering among its adherents people from all walks and conditions of life and notably many of the most intelligent and spiritually minded men and women of this age. Second, that Christian Science, because of the purity and spirituality of its teachings, tends to elevate, ennoble, and refine, producing characters whose practical Christianity is manifested in their daily lives. Third, that Christian Scientists are the happiest people on earth, radiating sunshine wherever they go.

These facts, noted during business travels throughout the state, led me to study the subject. I made a three years investigation of Christian Science, and becoming thoroughly convinced that it is the truth which Jesus taught and practised, I decided, after thirty-five years' work in the ministry of one of the leading denominations, to become identified with this splendid body of people.—*Correspondence.*

✧

Walla Walla, Wash.

Frank Bell delivered a lecture on Christian Science to the entire inmate body of the Washington State Penitentiary. The speaker was introduced by Warden Drum, who, while acknowledging his lack of information as to the tenets of the Science, declared his open-mindedness on the subject, and expressed his belief that persons whom he knew had been cured and rehabilitated through a study of Christian Science. He assumed the broadly philosophic stand that he never refused to accept tentatively that which he believed had benefited others.

Mr. Bell spoke for over an hour, and a pin could have been heard if dropped during any portion of his discourse. Seldom has a speaker succeeded in holding our sustained attention for so long a time, and this was not due to any unusual oratorical ability on the part of the lecturer. It was rather because this was the first *ex cathedra* exposition of Christian Science that many of us had heard, and we were intensely interested therein. As the speaker told, with the characteristic stamp of sincerity, how he had been rehabilitated physically, morally, and socially through its ministrations, it exerted an appeal as strong as must have characterized the first relation of the miracles of Christ to the hopeless and despairing. It aroused within us the possibility that it might bring into our lives that hope for material and spiritual betterment without which life itself becomes valueless.

Our View Point.

✧

Niagara Falls, N. Y.

The introductory remarks of Robert J. Berkinshaw in presenting Bliss Knapp, who lectured on Christian Science, were as follows:—

The urgent need of our time is not, as some seem to think, a great religious sentiment or excitement, or more philanthropy; of these things it is doubtful if the world ever before had such an abundance. What thoughtful men and women everywhere are wanting is something that will fill an unsatisfied longing for peace, comfort, and health right here and now,—a statement of a religious truth from pulpit and people which carries conviction with it, or in other words an exemplification of the truth that Jesus said made for freedom, freedom from sinful tendencies, from physical and mental difficulties. The conditions under which we are living today call for a practical and definite religious thought. They call for a presentation of a religious truth which will appeal to our enlightened sense of adjustment and explain to us the reason for the many apparently inexplicable things in our every-day life. To attribute everything to God and then try to get rid of some of the things we think He sends us because we do not desire them, does not strengthen our faith in Him but weakens it. We want a far different understanding of God than this, if we are to retain our better and nobler natures so that we can love and serve Him intelligently,

Digitized by Google

knowing that the spiritual life is the most practical and satisfactory, in fact the only real life.

The Christian Science churches in all parts of the world are filled, usually to overflowing, with people who at one time were afloat and tossed about upon the seas of ill health, uncertainty, and doubt, not knowing where to find a haven of peace and rest, but who now have a chart and compass which enables them to find the port for which they formerly searched in vain, and what is better still they can and do direct others without any doubt or fear.—*Correspondence.*

✧

New York, N. Y.

The introductory remarks by Campbell MacCulloch, first reader, on the occasion of Prof. Hermann S. Hering's lecture on Christian Science, given in First Church of Christ, Scientist, were as follows:—

Religion is generally accepted to mean faith in a supernatural power which, for reasons of its own, occasionally sets aside what are termed material laws and manifests either good or evil in the process. Christian Science, on the contrary, is teaching mankind that true religion is accurate knowledge of divine power, which operates according to fixed law and cannot in any manner manifest evil. It further teaches that it is possible truly to know God in a scientific, accurate way, so that His spiritual law can be brought to bear upon the problems of humanity to the end that so-called incurable disease is healed and poverty banished, and the human capacities are increased to the point of real efficiency.

Many people have quarreled with Mrs. Eddy's use of the word Science as applied to matters of religion, but she has amply proved that unless religion is scientific, and therefore accurate and precise in its statements and application, it can never be of permanent value in a practical way. What the average man wants is help now, not the promise of it hereafter; he wants solution, not resolution, and the world is gradually coming to understand that such solution is to be found in Christian Science.—*Correspondence.*

Lectures to be Delivered

CALIFORNIA—Hanford: Ezra W. Palmer, Ashby Theater, 8 p.m., Oct. 24.
Marysville: Virgil O. Strickler, Atkins' Theater, 8 p.m., Oct. 26.
Pasadena: Ezra W. Palmer, Church Edifice, Oakland Avenue, near Colorado Street, 8 p.m., Oct. 26.
Visalia: Ezra W. Palmer, Theater Visalia, 8:15 p.m., Oct. 23.

CANADA—Brandon, Manitoba: Bliss Knapp, City Hall, 8 p.m., Oct. 16.

CONNECTICUT—Hartford (Second Church): Edward A. Merritt, Palace Theater, 3:30 p.m., Oct. 22.

DISTRICT OF COLUMBIA—Washington (First and Second Churches): George Shaw Cook, Poli's Theater, 3 p.m., Oct. 22.

ENGLAND—Blackpool, Lancashire: John Sidney Braithwaite, Grand Theater, 3 p.m., Nov. 5.
Hull, Yorkshire: John Sidney Braithwaite, Royal Institution, Albion Street, 8 p.m., Nov. 6.
London (First Church): John Sidney Braithwaite, Queen's Hall, Langham Place, West, 8 p.m., Nov. 2.
Manchester (First Church): John Sidney Braithwaite, Town Hall, Levenshulme (note change), 7:30 p.m., Oct. 31.

ILLINOIS—Riverside: John W. Doorly, Town Hall, 8 p.m., Oct. 24.
Rock Island: Charles I. Ohrenstein, Church Edifice, Seventh Avenue and Twenty-second Street, 8:15 p.m., Oct. 23 and 24.

INDIANA—Kendallville: Charles I. Ohrenstein, Boyer Opera House, 2:45 p.m., Oct. 22.
Mt. Vernon: John Randall Dunn, County Court House, 8 p.m., Oct. 27.
Vincennes: Prof. Hermann S. Hering, Church Edifice, Hart and Third Streets, 8 p.m., Oct. 26.

IOWA—Des Moines: Charles I. Ohrenstein, Coliseum, 8:15 p.m., Oct. 27.
Villisca: Willis F. Gross, Armory, 7:30 p.m., Oct. 24.

MASSACHUSETTS—Fitchburg: Dr. Walton Hubbard, City Hall, 3 p.m., Oct. 22.

MICHIGAN—Ann Arbor: John W. Doorly, Whitney Theater, 3 p.m., Oct. 22.
Grand Rapids: John W. Doorly, The Coliseum, 78-84 Commerce Avenue, S.W., also entrance on Division Avenue, South, 8 p.m., Oct. 23.
Port Huron: Frank Bell, Masonic Temple, 8 p.m., Oct. 23.
Saginaw: Frank Bell, Academy of Music, 3:30 p.m., Oct. 22.

MONTANA—Anaconda (First Church): Bliss Knapp, Margaret Theater, 8 p.m., Oct. 26.
Hamilton: Bliss Knapp, Lucas Opera House, 8:30 p.m., Oct. 27.
Helena: Bliss Knapp, Unitarian Church, 8 p.m., Oct. 24.
Lewistown: Bliss Knapp, Myrtle Theater, 8:15 p.m., Oct. 23.

NEBRASKA—Omaha (First Church): Bicknell Young, Church Edifice, St. Marys Avenue and Twenty-fourth Street, 8 p.m., Oct. 24.
Omaha (Third Church): Bicknell Young, Druid Hall, 2414 Ames Avenue, 8 p.m., Oct. 26 and 27.
Omaha (joint lecture): Bicknell Young, Boyd Theater, Seventeenth and Harney Streets, 12:15 to 12:45 noon, Oct. 25.
Weeping Water: Bicknell Young, Church Edifice, 8 p.m., Oct. 23.

NEW JERSEY—Cranford: Edward A. Merritt, Church Edifice, Springfield Avenue and Miln Street, 8:15 p.m., Oct. 23.
Morristown: Clarence C. Eaton, Washington Hall, Speedwell Avenue and Park Place, 8:15 p.m., Oct. 24.
Ridgewood: William W. Porter, Play House, 4:15 p.m., Oct. 22.
Trenton: Prof. Hermann S. Hering, Crescent Temple, 65 North Clinton Avenue, 8:15 p.m., Oct. 24.

NEW YORK—Hornell (Second Church): John Randall Dunn, Woodbury Universalist Church, 8 p.m., Oct. 20.
Hudson Falls: Dr. Walton Hubbard, Court House, 8 p.m., Oct. 16.
New Rochelle: John Randall Dunn, Loew's Theater, Main Street, 3:30 p.m., Oct. 22.
New York (Third Church): Edward A. Merritt, Church Edifice, 125th Street, near Madison Avenue, 8 p.m., Oct. 24.
Olean: Edward A. Merritt, Church Edifice, East State and Barry Streets, 8 p.m., Oct. 26.
Schenectady: Prof. Hermann S. Hering, Van Curler Opera House, 3:30 p.m., Oct. 22.
Woodstock: William W. Porter, Firemen's Hall, 8 p.m., Oct. 20.

NORTH CAROLINA—Asheville: George Shaw Cook, Majestic Theater, 8:30 p.m., Oct. 19.

OHIO—Tiffin: George Shaw Cook, Masonic Temple Auditorium, 8:15 p.m., Oct. 26.
Warren: George Shaw Cook, The Armory, 8:15 p.m. (eastern time), Oct. 27.

OKLAHOMA—Ardmore: William R. Rathvon, High School Building, 8 p.m., Oct. 24.
Enid: William R. Rathvon, Tabernacle, 3 p.m., Oct. 22.
McAlester: William R. Rathvon, Church Edifice, First and Washington Streets, 8 p.m., Oct. 26.
Stillwater: William R. Rathvon, Grand Opera House, 8 p.m., Oct. 23.

OREGON—Eugene: Virgil O. Strickler, Oregon Theater, 8 p.m., Oct. 24.
Pendleton: Virgil O. Strickler, Temple Theater, 3 p.m., Oct. 22.

PENNSYLVANIA—New Castle: George Shaw Cook, Opera House, 8:30 p.m., Oct. 24.
Scranton: Clarence C. Eaton, Church Auditorium, 3 p.m., Oct. 22, and 8 p.m., Oct. 23.
Warren: John Randall Dunn, Library Theater, 8 p.m., Oct. 23.

SOUTH DAKOTA—Sioux Falls: Bicknell Young, Colonial Theater, 4 p.m., Oct. 22.

WASHINGTON—Vancouver: Virgil O. Strickler, Rex Theater, Tenth and Main Streets, 8 p.m., Oct. 23.

WISCONSIN—Madison: John W. Doorly, Woman's Building, 240 West Gilman Street, 8:15 p.m., Oct. 26.
Watertown: Charles I. Ohrenstein, Turner Opera Hall, 8:15 p.m., Oct. 21.

WYOMING—Sheridan: Bliss Knapp, Orpheum Theater, 3 p.m., Oct. 22.

Testimonies of Healing

I rejoice with many others in being able to testify to the power of Truth. Since coming into Christian Science I have been blessed physically and spiritually. So lovingly and beautifully was the truth presented to me that I was healed of eye trouble and of headaches in one treatment, and immediately discarded my glasses. Many minor ailments also disappeared almost instantaneously, and I found myself free physically before the message of Christian Science was fully grasped. I am so thankful for the loving thought which smoothed my path and directed me along higher channels. For the past few years the illusions of sense have been overcome by my own understanding of Christian Science, gained through the study of Science and Health in conjunction with the Bible. Although the way has often seemed beset by insurmountable difficulties and mortal mind was prone to discouragement, the radiance of ever-present Love always dispelled the clouds when the desire was sincere and free from earthly taint and selfishness.

My husband has been healed of stomach trouble and attacks of biliousness, as well as many minor ills. We now rely on Truth in all times of need; even in business God is our guide, and we know that infinite Love is indeed the source of all supply. Above all else I am grateful for the higher understanding of love, whereby we may destroy the illusion that God's children reflect anything but divine Love. Every loving thought for our fellow man brings us nearer to the fulfilment of the command which Jesus gave us,—"That he who loveth God love his brother also."

I try to show my gratitude and appreciation of Mrs. Eddy's wonderful gift to us by guarding the portals of thought and eliminating all thoughts of self in my sincere effort to reflect Love. My heart overflows with love to God and gratitude to our beloved Leader for the peace and joy this knowledge is bringing to all mankind.

Mildred Scott Catterlin, Los Angeles, Cal.

✧

Like unnumbered thousands I am profoundly grateful for the manifold blessings received through the ministration of Christian Science. Recently I suffered from a headache so severe that I was unable to read the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and could hardly lay my head on a pillow. A practitioner was asked for treatment, and within an hour I was much relieved and shortly thereafter completely healed. Not only is Christian Science curative but it is preventive as well. In the ten years that I have been interested in this teaching not a day has been lost from my work on account of illness. While error has frequently tried to manifest itself, every ill has been reduced to its native nothingness through the application of metaphysics as taught in Christian Science.

For all the healings experienced I am deeply thankful to God, also grateful to Mrs. Eddy, who through the fulfilment of her pure and exalted life-purpose uncovered for us the Christ-way of living and healing. I would also like to add a word of appreciation for the Christian Science literature, which affords me so much help.

Joseph S. Glickauf, Chicago, Ill.

✧

I do not know of any one who has more reason than myself to be grateful for Christian Science healing, both physical and spiritual. From childhood I had suffered severely from headaches, and through the winter season from continuous throat trouble. Then followed an injured ankle, and an attack of scarlet fever which left deafness in its train; and still later a low, nervous fever added stomach disorder to the list, until the belief in sickness became chronic. The household was in the throes of a controversy over the old relentless theology, so between physical suffering and mental unrest the way was opened for Christian Science.

My first introduction to Christian Science was through reading an adverse criticism in a magazine article. One of its statements was to the effect that Mrs. Eddy had written a book which healed the sick simply by reading it. I wanted that book, but could not procure a copy in any of the local bookstores, so eventually sent to Boston for one. I had not at this date met any one who had even heard of Christian Science.

In my first reading of "Science and Health with Key to the Scriptures," a case of healing was brought out which prevented an operation. For about a year after this I was physically well, but one evening a sudden, severe attack of the old throat trouble presented itself. In fear and trembling I took up Science and Health, intending to read for only a little while; but when I looked at the clock, thinking it was bedtime, it was two in the morning. All the suffering was gone except a slight hoarseness, and the dreaded night was half over. Later a headache came on. After a few hours of suffering I suddenly remembered that a friend was due on the six o'clock afternoon train, and would come straight to the house. What would I do? The family, including the household help, were up in the mountains, and I had stayed behind for the quiet of a couple of days' study of Christian Science.

When I again thought of the headache, I was entertaining the friend quite late in the evening. I had risen, attended to the household duties without any effort, and there was no trace of the headache. Right here there was a conflict over superstition. Hitherto I had believed that "the angels of His presence . . . our guardians in the gloom" (Science and Health, p. 174), could only come when we were perusing the Bible and Science and Health. I then saw that true thought is active all the time, and neutralizes the sick belief or evil suggestion. I could add to the list of my own physical relief many cases of healing for my children.

For the physical relief I am profoundly grateful, but words fail to express my gratitude for the spiritual uplift,—to know that right thinking is preventive of physical suffering, and to know what right thoughts really are; to know how to pray and also to know that prayer is answered as one prays; to discern, however faintly, the unchanging, infinite, eternal character of the divine Mind. We thank God daily for the blessing of Christian Science and for the example of the pure, unselfish, spiritual life of Mrs. Eddy, who has proven that the moral precepts of Jesus are not a theory, but an every-day demonstrable possibility, obedience to which brings not a future but a present reward.

Margaret Mackay Creighton, Westmount, Province of Quebec, Canada.

✧

When in October, 1913, divine Love directed my steps to the door of a Christian Science practitioner, I was overcome with discouragement on account of business conditions, broken in health, and weakened in faith in God. An eminent specialist had told me that an operation was the only alternative from constant dependence upon drugs, enforced rest, and limited diet. Lovingly the first revelation of Truth came to me, and I walked from the practitioner's office a well man, with all fear destroyed and conscious of strength sufficient for the day. It was the beginning of my restoration, and though since that time minor discords have appeared from time to

Digitized by Google

time, they have been quickly overcome, usually without the aid of a practitioner. Best of all has been the assurance of God's protecting care, with love for my neighbor and the privilege of telling what God has done and is doing for me. The day seems wasted that brings no friend to inquire the cause of the regained health and happiness which are so apparent.

I am grateful for the opportunity to read our Leader's writings, together with the *Sentinel*, *Journal*, and *Monitor*, regularly, also for the lectures printed in pamphlet form, and for membership both in a local church and in The Mother Church.—THOMAS B. FITZGERALD, Camden, N. J.

✧

I am glad to give this testimony, as it shows so clearly the futility of material means when compared with spiritual might. About six years ago our little daughter, then two years old, in jumping from the doorstep on to the porch in her bare feet ran a needle into her foot, just under the small toe joint. It broke off, leaving about two thirds of the needle in her foot. I quickly telephoned to a Christian Science practitioner, but instead of leaving it to God and trusting in His love and care, I seemed to be constantly thinking of tales I had heard of bad results from similar accidents, so a surgeon was called. Two incisions were made, but all attempts to remove the needle failed. It was deeply embedded in the foot, and a few days later an X-ray examination showed it with the point sticking into the bone. The surgeon then had powerful magnets inserted into the opening, as he hoped in that way to draw the needle out, but this also failed. The child was therefore taken home, the foot bandaged, and Christian Science treatments were given regularly for about ten days. At the end of that time, when the X-ray was again used, the needle had disappeared. In spite of the cutting and probing on two different occasions, there was never a sign of inflammation or soreness. The child seemed perfectly comfortable during the period of healing, and even the scar has since disappeared.

I am deeply grateful to God for giving us in this day one pure enough to hear the "still small voice" of Truth, wise enough to obey it, and unselfish enough to give it to the world.—FREDERIKA U. BARNHART, Winnetka, Ill.

✧

In September, 1911, I was healed of the liquor habit and attendant evils through Christian Science treatment, and in a manner that left no doubt of the activity of some power at that time unknown to me. In order to discover by what means the healing had been effected, I began to read Science and Health, and read it through at the rate of once a month for nearly a year, at first without any comprehension of its contents except an occasional glimmer of the truth here and there. As the reading continued, however, some understanding of the book began to unfold to me.

During this period a number of treatments for various mental and physical inharmonies were given me, and one by one these conditions disappeared. Among the ailments healed were chronic irritability, despondency, and extreme selfishness, while rheumatism, neuralgia, malaria, and liver trouble likewise yielded to the power of Truth. I have learned that it is not the extent of one's knowledge of Christian Science that counts, but how much one puts into practice. At first it was not clear to me why I should be "grateful for the good already received" (Science and Health, p. 3), if all good was mine by inheritance, until I learned that real gratitude is a spiritual state of mind, or having "the mind of Christ."

My wife and children, my father and one sister, have all been healed through the application of Christian Science as a result of the healing that came to me, and my home has been transformed from a state of misery to one of peace and happiness. The *Sentinel*, *Journal*, and *Monitor* have been constant helps, and my prayer is that as this testimony goes out, in and through the channel which love and wisdom has provided, the evidence of my sufficient reason for being grateful may help and encourage others, even as I have been helped and encouraged.

My cause for gratitude is so great that when even a little of all that I have to be grateful for is recalled, I am impelled to seek more earnestly the understanding of those statements of truth that Mrs. Eddy, through devotion and obedience to the one God, has given to the world in "Science and Health with Key to the Scriptures," the study and understanding of which brings healing today.

CHESTER L. CHAMBERLAIN, Los Angeles, Cal.

✧

[Translated from the French]

I became acquainted with the benefits which Christian Science bestows upon mankind following a serious illness of my husband. He applied for treatment to a Christian Science practitioner in our city, who proved to be as kind as she was competent, and very naturally I expressed the desire to be of assistance to my husband in his reading of that incomparable book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. He experienced healing and was happy to be able to give his testimony in June, 1913.

At that time I was afflicted with nervous troubles which led to many complications. I had consulted several physicians, who made me take drug after drug, though without any result whatsoever. Electric treatment to which I finally resorted brought temporary relief but no cure. While helping my husband, I recognized that the possibility of better acquainting myself with the truth lay entirely with me, and having partially awakened I did not hesitate to put myself under the care of a Christian Science practitioner. Our united efforts and perseverance were crowned with success, and my understanding, which until then had been dormant, was completely awakened. Truth overcame the inharmony within a few weeks. I was healed, free from the grievous troubles which had beset me. Today I am a new woman, ready to combat every error and striving to attain the ultimate of spiritual and scientific understanding. Words fail to express my appreciation for the benefits made available through the Christian Science text-book, which every one should know and study.

I am profoundly grateful to God for the moral and physical healing which has come to me through an enlightened faith—a faith which I daily ask Him to strengthen and enlarge, for through it alone can we become better men and women; through it we shall be able to heal our ills and rid ourselves of error of all kinds without any material support, and attain unto perfection. The help derived through Christian Science is so precious, not only for ourselves as individuals but for one's whole family and environment, that I cannot refrain from telling the following experience. The arrival of a baby was expected with much joy in the home of our nearest relative. Circumstances were most propitious, and the coming of the little one took place under the best possible conditions. Nothing led us to expect a bad turn, hence considerable anxiety was felt when word came over the telephone that the mother's condition had suddenly become most serious. After a moment's reflection and prayer I communicated with the practitioner, and with her help we were enabled to hold to right and pure concepts and to realize that through God, Principle, we can banish all fear and win the victory. Mother and child are today in perfect health,

Digitized by Google

and the consciousness of God's goodness and omnipotence is to us a source of deep joy.

I cannot close this testimony without expressing the conviction that through God, divine Principle, and the understanding of Him, it is possible for every one to solve the problems confronting him and to overcome the difficulties which material life, so called, seems to evolve in such great numbers.—Mme. L. Beauverd, Geneva, Switzerland.

✧

I want to tell of my cure through Christian Science of the drug habit. It is a long, sad story covering twenty years, but I will not give all the details. From early youth I was afflicted with severe headache, and every one knows what many doctors do to give relief, and it does not take long for the unfortunate to prescribe for himself.

I was in constant fear except when under the influence of the opiate. I grieved over my condition, though the belief that I could diminish the amount of the drug gave me hope; but alas, that hope vanished and despondency took its place. At last it seemed as if I would be a complete wreck. Three limbs were broken in a fall from the roof of a high building, and while I was lying on my back with the limbs encased in a plaster cast the drug was doubled. Then a doctor said it was a good time to quit using the drug, and after my recovery I tried to do so.

I went to a doctor who is also a druggist and asked him if it was possible to diminish the drug every day till the craving was gone. He said, "Yes, but see here [he was then reading a *Sentinel*]; try Christian Science." He told me to see a lady who is a Christian Scientist, but I did not do so, for I was ashamed to have her know of my affliction. Finally, however, something had to be done, so I went to see her, then to the practitioner to whom she directed me. The day afterward I was healed, for when the usual hour came to take the drug I forgot it and felt no nervousness; and so it was the next day and the next. Not one moment of pain, inconvenience, fear, or loss of sleep was experienced, and the healing has been permanent.

Since reading Science and Health, which was kindly loaned me by these ladies, I can see how reasonable Christian Science is. Till then I did not have the true idea of God, for I had begun to believe there was no God for me, and that He was a frowning God instead of a loving one. To say I am thankful to God and grateful to Mrs. Eddy is a mild expression of gratitude.—O. C. Spencer, McKinney, Texas.

✧

Several years ago I was what is called a semiinvalid. For fifteen years, like the woman of Luke's gospel, I had spent all my living on physicians, but to no avail. An operation was said to be my only chance for recovery, but fond parents and a loving husband strongly objected to this course. Various sanitariums, hospitals, and faith cures were tried, but they brought no relief. The world seemed a blank, and many days I left the house hoping never to return.

I had prayed and prayed to a God whom I loved, and wondered why He did not hear my prayer, when lo, one day the subject of Christian Science was broached, and my husband, who that day had conversed with a friend concerning it, remarked to me that it must be a wonderful religion. He then told me of the healings that had taken place in this friend's family through its teaching, and I listened in awe; but not once did the thought occur to me that I might be healed or benefited physically. I requested some literature, and found each article referred to "Science and Health with Key to the Scriptures" by Mrs. Eddy. This book, as I learned, contained the fundamental teaching of Christian Science, so a copy of it was procured.

The first chapter revealed to me a God who is Love, infinite good, a God who never created disease and knew nothing of evil or discord. Then came the great truth that if He did not know discord, it was not anything at all, for only that which He created was good and would stand forever. It developed that hitherto I had not prayed to God at all, for the God that Science and Health revealed was not known to me, so I prayed for understanding. Day by day the rejection of everything unlike God proved a fruitful occupation for a few weeks later I found God.

Not once during that mental purgation did the physical condition enter my thought, but it responded to the operation of Principle, and the result was "a body rendered pure by Mind" (Science and Health, p. 383), proving that the cause of the trouble was mental, not physical. The purification of thought, which resulted in physical benefit, proved Paul's words that we are "willing rather to be absent from the body, and to be present with the Lord," also our beloved Master's counsel, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." To this may be added our dear Leader's correlative statement, "To those leaning on the sustaining infinite, today is big with blessings" (Science and Health, Pref., p. vii).

A wealth of gratitude fills my heart, and my desire is to let my life attest my sincerity, that all who come within the radiance of the light which is shining from within may seek that God who never faileth.

Wilhelmina Leffler, Brooklyn, N. Y.

✧

Words can never express my gratitude for what Christian Science has done for me. I was without God and without religion; in fact I did not believe there was a God, because nothing had ever proved this to me. In various ways I had looked for this proof, but never got any satisfaction until my father was wonderfully healed through Christian Science treatment after a well-known physician in this city had pronounced him incurable. This healing proved to me that God is just what the Bible declares Him to be. Christian Science has revealed to me a God who is indeed our best friend, and it has given me a practical religion, one which affords absolute proof every day that it is the truth which our Master said would make us free.

Through Christian Science I have been healed both physically and mentally. In January, 1914, a severe attack of blood-poisoning was manifested in abscesses on various parts of the body. This disease was completely healed by Christian Science treatment, and no material remedies of any kind were used. My health has been perfect ever since. This healing meant a great deal to me, because it enabled me to realize what it means to have absolute reliance on God. For all these blessings I feel very grateful, but I am more thankful for the understanding of God that Christian Science has given me. This understanding, when put into practice, has brought a peace and happiness into my life that nothing can take away.—Frank Henshaw, Manchester, England.

✧

I am thankful for the opportunity to express my gratitude for the many benefits received through the truth that our revered Leader, Mrs. Eddy, has made available to mankind, the wonderful uplift of thought which unfolded to me our Father's goodness and loving care. Christian Science has healed me of physical ills, including very severe headaches, bowel trouble, and hemorrhoids. A few years ago it was a great effort for me to walk any distance, for it seemed as if

Digitized by Google

some growth or obstruction was holding me down. Several months passed before this condition yielded, but I can now walk miles without being tired.

My eyes were opened to this beautiful truth through the assistance of a kind practitioner, who showed me that our dear Father, who governs the entire universe, made everything, and it was good. My prayer is constantly for more understanding and to keep my thought loving to others.

BERTHA GOLDSTEIN, Chicago, Ill.

✧

The testimonies in the *Sentinel* have always been such a help and inspiration to me that it is a privilege to give expression to my own gratitude for Christian Science healing. Every year my school career was interrupted two or three times by my being kept at home for three weeks with a bad attack of quinsy. The doctor said I would always be subject to this ailment, as he could only relieve me. After I began the study of Christian Science, a practitioner's help was sought for this trouble, with the result that in three days all the symptoms disappeared and I was permanently healed. During those few days the relative from whom this throat trouble was supposed to have been inherited, was visiting us, but there was no indication of any difficulty in either my eating or speaking (if there had been it would have been immediately recognized as a symptom of our common complaint), and this was in spite of very strong sense-testimony which declared the presence of great swelling and hardness.

Deep as is my thankfulness for this healing, to me the greatest blessing is the revelation of a divine, infinite Principle to be understood and obeyed. I had always caused much unhappiness to myself and others by refusing to recognize any authority or governing power, but now I am able to rejoice in being subject to "the powers that be."

DORA HEPBURN, Barnes, S.W., England.

✧

In gratitude to God I am glad to tell of my healing, with the hope that some other sufferer may be led to accept Christian Science. For more than a year I took medical treatment, first getting better, then worse again, till at last I was told that nothing could be done for me. An operation did no good, and the wound would not heal. I could not sleep, could hardly walk a block, and lost in weight. At last I went to a Christian Science practitioner, and from the first felt better.

Science and Health was then obtained and read together with the Bible, and I found myself gradually gaining; indeed, the more I read the better my condition became, until my usual good health was regained. My case had been pronounced a serious one, beginning with poisoning of the hand, and continuing until abscesses developed in my side. Thanks be to God, I am free from this trouble. I am a better man and understand the Bible better through the reading of Science and Health. I thank God and am grateful to Mrs. Eddy for showing us how to know God aright.

J. G. HIATT, Seattle, Wash.

✧ ✧ ✧

O friend, from out my little store
I give thee truth, and more and more
Would I impart, wert thou to listen.
The health, the strength, the blessing free
Have all been mine; and now to thee
Love beckoneth with gracious yearning.
O turn thy face toward the light!
Rise from the darkness and the night
And gain the heavenly vision!

EUGENIA M. FOSBERY.

From Our Exchanges

[Rev. J. H. Molesworth in *The Guardian*]

It is all to the good that no man today disputes about the existence of the city of God. After long estrangement science and theology are once more shaking hands. We see the great stream of pilgrims bending their steps up to that city in countless and increasing numbers, though along different paths. What they dispute about is the demarcation of the ancient walls. Where do these walls run around the heavenly city? Is it a smaller or a larger city that they embrace within their compass? And the pity of it is that all our excavations in the *débris* of the past have only served to increase the confusion and add to the bitterness. We cannot agree on the lines of delimitation. The call of today is to concentrate elsewhere than on the half-hidden ramparts, on nothing less than the fact of the city itself. Let us all go up to Jerusalem and keep the feast there in the presence of divine Love Himself, and leave the walking about Zion, marking her bulwarks and telling the towers thereof, to the larger and more generous times that we hope will follow upon the war.

[Rev. H. E. Fox, M.A., in *The Record*]

In proportion as moral and spiritual forces infinitely surpass material, so in his death and resurrection Christ has given the highest possible proof of the divine power which the Scriptures constantly attribute to him. Again and again the apostolic writers refer to their personal experience of that power, and the expectation of a still more marvelous manifestation of it at "the coming of the Lord."

Why is it that with the added witness of many generations the churches know so little of this experience or of this expectation? Is it that with our larger knowledge of this world and the things that belong to it, our vanity has clouded our spiritual understanding, and Christ is not, as he was to the first Christians, the wisdom of God as well as the power of God? We have lost the one because we have neglected the other. How different in this respect is the conception of many of our most popular teachers today from that of the apostolic age. Then he was known as one who, while he upheld all things by the word of his power, was also the possessor of "all the treasures of wisdom and knowledge," who had claimed to have been with the Father before the world was, who could read the hearts of men when he was on earth, and of whom they could say that "all things are naked and opened unto the eyes of him with whom we have to do." And so it is that at the close of his great treatise, which began with the power and effects of divine righteousness consequent on "the love of God, which is in Christ Jesus," St. Paul breaks into the sublime doxology, "O the depth of the riches both of the wisdom and knowledge of God! how unsearchable are his judgments, and his ways past finding out."

[*Zion's Herald*]

Religion is now passing through a period of transition, and we are on the verge not so much of a great religious revival as on that of a great spiritual struggle. When the tornado of war has abated, then Christianity will face new conditions, and these will be threefold: first, the plea for unity; second, the necessity of vitality; and third, the opportunity for service.

[*The Christian*]

There is as much power in each church and home as there was on the day of Pentecost, but the majority of Christ's disciples are content to live on the dead level of the world

Digitized by Google

around them. They appear to suppose that some day people like themselves will have grown into a new heaven and earth, whereas we are now the children of the resurrection, and the resources of God are now within the reach of faith,—as much so as they will be at any other epoch in the world's history, or even in heaven itself.

[*Pacific Christian Advocate*]

The church of our day is in more danger from formalism than from fanaticism; it is suffering from an oversupply of mechanics and an undersupply of dynamics. Just as the letter of the law without the spirit put Jesus of Nazareth to death in Judæa in the first century, so the mechanics of Christianity without its dynamics kills the Christ in the heart and life of a twentieth century Christian.

Despite the emphasis in some quarters on the mechanics of religion, the outlook for the life of the spirit was never more hopeful. The life of Jesus is being studied with an intelligence and intensity never before surpassed. There is a growing passion in the youth of the church to follow Jesus in the paths of lowly service. Paul's plea to the somewhat coarse Galatians to cultivate the spiritual life for the purpose of overcoming the fleshly lusts is being heeded by this generation. A more rugged simplicity in statement of doctrine and a desire for the simpler forms of worship is paving the way for a deeper dynamic in the church of Christ.

[*Western Christian Advocate*]

What is the meaning of this increasing volume of literature at the present time on our Lord's return? Are the movements of humanity converging into hopeless night? Is man driven to cry out in despair? Is his only hope of the future in the return of his Lord, with power to save him from the wreckage now threatening to engulf him? Who shall seek to answer? There is universal agreement that the times are "out of joint;" that only Christ can set them right. The prayer of all the faithful ought to be that the proper spiritual interpretation be given the present world situation. Spiritual blindness is our peril.

[*The Christian Advocate*]

Jesus came not merely as a teacher of ethics, although his ethical system is not surpassed by that of any of the world's other great teachers. He came primarily as the Son of man "to seek and to save that which was lost," and these words are a life-line that he casts out to those who are being engulfed in the overwhelming seas of sinfulness.

[Rev. Neville Figgis, Litt.D., in *The Church Times*]

The Christian religion is, above all things, an affair of great principles. Personal it must be in the extreme, for it consists of love, but love is not sentiment; it is union with the will of God. Love to God and our neighbor sums up true religion.

[*The Christian Intelligencer*]

The world needs, as much as ever it did, summery souls with radiant warmth and full-tided life, ready to bring a confident strength to all the spiritual tasks of the day, and to let blessings drop out of their full cups into thirsty hearts and souls.

[*The Advance*]

There are certain ways by which we can utilize the memories of blessings that are gone, but it is better and safer to get the most of good and gratitude out of them while they still are with us.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

"Christian Science: Its Discovery and Development," a lecture by William D. McCrackan, M.A., C.S.B., has been translated into Norwegian (Kristelig Videnskap: Dens Opdagelse og Utvikling), and is published with the English version opposite the translation.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each, 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

A Catalogue of Selected Bibles will be furnished upon application, and quantity rates on other items specified below will be found in the current catalogue in *The Christian Science Journal*.

BIBLES. 01483 x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $3.75.

01440 x. Brevier, light-faced type; self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $3.50.

Morocco slip case to hold pocket edition of Science and Health, *Quarterly*, and Bible, $1.25.

Two other sizes of slip case listed in the current issue of the *Journal*.

Covered morocco case with handle and purse on outside, $3.50; without purse, $3.25.

01683 x. Large type Bible, 10½ x 8 inches, bound in Alaska seal. Specially adapted for use of second readers, $9.25.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 22 of selected Bibles will be mailed free upon application.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. 132 pages with index. Paper covered, 15 cents; cloth binding, 85 cents.

THE LIFE OF MARY BAKER EDDY. By Sibyl Wilbur. 424 pages. Cloth, $2. Edition de luxe, $5.

"PERSONAL CONTAGION" and "WHAT OUR LEADER SAYS." By Mary Baker Eddy. Paper cover, 10 cents.

THE MOTHER CHURCH. By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated, 107 pages. Cloth, $1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS. By Judge Clifford P. Smith. 128 pages, paper covered, 10 cents.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, $1.15; half morocco, $1.40; full morocco, $2.50; levant, $3.50; pocket edition, size 4⅝ x 6⅝, $3

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows: "The Mother's Evening Prayer," 75 cents; "Christ, My Refuge," 75 cents; "Love," 40 cents; Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents; "Blest Christmas Morn," 27 cents; "O'er Waiting Harpstrings of the Mind," 27 cents; "Shepherd, Show Me How to Go," 27 cents; "Saw Ye My Saviour?" (Root), 27 cents. The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12 x 16), $1; 12-inch (mount 15 x 20), $2; 16-inch (mount 21 x 29), $3.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18 x 24 inches, $5; on India paper without remarque, $3. Smaller reproduction, size 11 x 14 inches, on Japanese vellum, $1. Photogravure postcards, reproduction of the picture of the Church Edifice and Publishing House, 5 cents.

QUARTERLY COVERS in black morocco, $1.15; with purse, $1.40.

ALUMINUM LESSON MARKERS. Set of thirty, with paper shields, 50 cents. Extra paper shields, one hundred, 15 cents.

PRICE LIST OF BIBLE CONCORDANCES and DICTIONARIES OF THE ENGLISH LANGUAGE supplied on request. Express charges collect on delivery.

REPRINTS (not printed in English). Two-page leaflets, 14 subjects in French and Swedish; 19 subjects in German. Ten copies to one address, 10 cents.

Remittances should always accompany orders, and be made by check, money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money or business letters to the Editor or Editorial Department.

Send all orders for the works of Mrs. Eddy, with remittance by New York or Boston draft or money order, direct to Allison V. Stewart

For literature listed above address orders and make remittances payable to

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 361 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Items of Interest

Interest in hydro-electric development in the district around Grenoble, France, on the Isère, a branch of the Rhone, has been revived by the movement recently initiated by the Grenoble Chamber of Commerce to attract new industries. While other advantages and resources will be included, the hydro-electric possibilities are to be given chief prominence. The development of water-power along modern lines commenced here about 1860, and reached important proportions in 1900.

There are now in the department of Isere eleven important companies utilizing water-power in the manufacture of electrochemical and electrometallurgical products of various kinds. These companies own thirteen generating plants, which with enlargements in course of construction will give a normal output of 81,500 horse-power. This does not include numerous companies which have generating plants of less than 800 horse-power each. There are also ten industrial companies formed to utilize Alpine water-power and deliver it to consumers. This group owns eighteen generating plants representing a normal total of 88,830 horse-power, which is consumed within a radius of 125 miles. Seven generating plants which are now under construction will have an aggregate output of about 47,400 horse-power. Seven other projects with an estimated output of 98,000 horse-power are said to be on the eve of being constructed.

In the province of New Brunswick, Canada, the question of the conservation of natural resources is now receiving the earnest, practical attention of the Government. In years past timber cutting was carried on with little regard to the serious ultimate consequence of indiscriminate destruction of the trees, and the revenues of the province probably suffered much through lack of efficient supervision. The provincial forestry service is actively at work and is making a thorough study of all problems associated with the proper and profitable employment of crown lands. The value of New Brunswick's forest products is estimated officially at $12,000,000, and the yield in revenue to the province is more than five hundred thousand dollars annually. Lumbering ranks next to agriculture in importance as an industry, giving directly or indirectly employment to a large portion of the population, and paying more than six million dollars every year in wages alone to the men directly employed in logging and the manufacture of wood products.

Writing in the *London Daily Chronicle* on the subject of the tunnel under the English Channel, Sir Francis Fox, a distinguished engineer, says: "It is probable that no great enterprise has received more careful consideration and investigation, extending over a period of more than a century. Within the last forty years not only have some seven thousand soundings and borings been made in the bed of the channel, but in 1882 an actual gallery or heading was driven at the Dover end for a distance of some two thousand yards under the sea. There was practically no infiltration of water, although there was no lining to the walls, the bare gray chalk being throughout exposed. A similar gallery was driven from the French coast. The tunnel now proposed will consist of two tubes, each capable of carrying standard British rolling stock. These tubes will be constructed in the bed of gray chalk, which has an average thickness of about two hundred feet. The maximum depth of water over the tunnel will be 160 feet, and the thickness of the roof or 'cover' above the tubes will be about one hundred and fifty feet of solid chalk. The time required for the construction of the tunnel will be from six to seven years, but methods are under consideration by which it is hoped this period will be considerably reduced."

Gold-mining in the Willow Creek district, Alaska, is the subject of a report issued by the United States geological survey. The region has recently been the scene of active prospecting, and plans are under way for mining on several properties, as the result of the beginning of the construction of the new Government railroad, which will pass along the border of this district. For several years gold has been produced from lode mines in this region, and in 1915 the value of this product amounted to nearly two hundred and fifty thousand dollars.

Through its chairman, the schoolhouse standardization committee of the National Education Association has issued its first bulletin calling attention to the waste and lack of system in schoolhouse construction. It is hoped to draft standards for school planning to be reported to the association at its next meeting. The committee proposes to express the results of its investigations in terms free from technicalities, so that boards of citizens without specialists in their number may proceed intelligently in schoolhouse construction.

Under the auspices of the National Society of Agriculture, a cotton congress was held in Rio de Janeiro, Brazil, from June 1 to 15. A delegation of experts from the Sao Paulo agricultural department represented that state. The state of Sao Paulo received thirty-six first prizes and thirty-nine lesser awards. The Government has given much attention to cotton growing since 1911, seeds having been distributed and methods of cultivation demonstrated through the department of agriculture.

The Cuban Congress has recently made provision for road construction on an extensive scale, and official authorization has been given for expenditures totaling $810,000. A credit of $60,000 is granted for the construction of a bridge over the river San Miguel; $7000 for a bridge over the river Jiguani, in the town of Jiguani; $150,000 for the completion of the aqueduct of Santa Clara, and $171,000 for paving and sewer system in the city of Manzanillo.

The castor-oil plant is cultivated throughout India. There are said to be sixteen varieties, and these have been roughly grouped under two great types, one of which is a tall bush or small tree of perennial growth, usually planted as a hedge or in lines through the fields, where it affords desirable shade to other and more valuable crops. This gives a large seed with an abundance of inferior oil. The other type is an annual plant sometimes grown as a pure crop, though more frequently in mixed cultivation. It gives a small seed, but a superior oil.

The manufacture of dyes from the waste of Osage orange wood has become a commercial issue, due to the investigations of the forest products laboratory at Madison, Wis. Carloads of wood are now being shipped to eastern extract plants from Oklahoma, and the dye is produced at the rate of about seven hundred and fifty thousand dollars' worth a year.

The total exports of the island of Malta, excluding bullion and coin, for the year 1914-15 amounted to £4,486,421. The total imports, exclusive of bullion and coin, for the same period amounted to £10,072,564. The principal articles of export are potatoes, onions, and cumin seed. The Maltese also manufacture quantities of lace and silver filigree work.

According to the American Association of Public Accountants some twelve thousand college men throughout the United States have, during the past year, taken up the study of accountancy. Twenty-four colleges and universities are now giving accountancy training, and ten of these study accountancy by "laboratory" method.

Announcement has been made of the consolidation of the Mexican Institute of Mining and Metallurgy with the American Institute of Mining Engineers. The former will be known as the Mexican section of the American society. The combined institute now has a membership approaching six thousand.

The stand of timber on the two great national forests in Alaska is estimated by the forest service as over seventy billion board feet, while the annual growth will, it is said, produce of pulp wood alone enough for the manufacture of 3000 tons of wood-pulp a day.

A production of 29,915,213 tons of pig-iron of all grades for the year 1915, is announced in the annual statistical report of the American Iron and Steel Institute. Steel ingots and castings reached 32,151,036 tons.

It is estimated that 2,000,000 pounds of jute twine will be used by the United States post-office department during the coming year, or 681,818 miles of string, enough to circle the earth twenty-seven times.

According to estimates Russia possesses more than thirteen million unharnessed horse-power in the rapids and waterfalls of its important industrial and metallurgical districts.

In December the great Canadian Pacific railroad tunnel under the Selkirks in the Rockies will be open for service. The project, when finished, will have cost $12,000,000.

During the recent fur sale at St. Louis, Mo., 1,500,000 pelts were auctioned for a total of more than two million dollars.

The farm wood-lots of the United States contain about 10 per cent of the total standing timber in the country.

New York Court of Appeals Sustains Legality of Christian Science Practice

PROGRESS of the "Cole case" so called through the New York courts has covered a period of over five years, but a decision has finally been reached in the Court of Appeals. Samuel J. Elder and Henry D. Estabrook were entered as counsel for Mr. Cole, the state being represented by Edward Swann, district attorney (Robert C. Taylor of counsel). The opinion of the court, which was written by Judge Emory A. Chase, was (aside from a formal recital of a part of the evidence) as follows:—

CHASE, J: On February 18, 1911, and on an application therefor by the New York County Medical Society, a warrant was obtained against the defendant charging him with practicing medicine as defined by section 160 of the Public Health Law of the State of New York, without being duly licensed therefor. (People v. Cole 25 N. Y. Crim. Rep. 350.)

On March 21, 1911, he was indicted by a grand jury of the county of New York. The indictment charges him with the crime of practicing medicine without lawful authorization and registration and alleges that such unlawful practicing of medicine occurred on the 19th day of January, 1911, and continually thereafter to and including the 28th day of January, 1911. The defendant was tried on such indictment in the New York Supreme Court Criminal Term, but the jury failed to agree and was discharged. Another trial was had in the same court and resulted in a verdict of guilty and a judgment was accordingly entered against the defendant on the 30th day of March, 1912. He appealed from such judgment to the Appellate Division where it was affirmed by a divided court. (People v. Cole 163 A. D. 292.) An appeal was then taken from such judgment of affirmance to this court.

Practicing medicine when unaccompanied by acts that are in themselves evil, vicious, and criminal, is not a crime at common law. Practicing medicine is not *malum in se*. It is important in the interest of public health and public welfare that a person holding himself out as a physician or healer of diseases, should have the education, training, skill, and knowledge adequate for such purposes. Statutes designed to protect public health and general welfare by regulating the practice of medicine, have been enacted from time to time in some part or all of the territory constituting this state since 1760.

When a person is charged with practicing medicine without a license it is necessary to examine the acts of the legislature to ascertain whether the acts complained of are in violation of the statute law.

The Public Health Law of this state provides, and did provide at all the times mentioned in the indictment, that "No person shall practice medicine, unless registered and legally authorized prior to September first, Eighteen hundred and ninety-one, or unless licensed by the regents and registered under Article 8 of Chapter 661 of the laws of Eighteen hundred and ninety-three and acts amendatory thereto, or unless licensed by the regents and registered as required by this article. . . ." (Public Health Law No. 161.) The practice of medicine is defined as follows: "A person practices medicine within the meaning of this article except as hereinafter stated, who holds himself out as being able to diagnose, treat, operate, or prescribe for any human disease, pain, injury, deformity, or physical condition, and who shall either offer or undertake by any means or method, to diagnose, treat, operate, or prescribe for any human disease, pain, injury, deformity, or physical condition." (Public Health Law No. 160 sub. 7.)

The statute also provides, "This article shall not be construed to affect . . . the practice of the religious tenets of any church . . ." (Public Health Law No. 173.)

Our Constitution provides "the free exercise, and enjoyment of religious provision and worship, without discrimination or preference, shall forever be allowed in this state to all mankind; . . . but the liberty of conscience hereby secured shall not be so construed as to excuse acts of licentiousness, or justify practices inconsistent with the peace or safety of this state." (Constitution of the State of New York, Article 1, Section 3.)

The defendant was never registered or licensed as a practitioner of medicine. He is a member of the Christian Science church and a recognized practitioner within the rules of such church. For about seven years he maintained an office in the city of New York. At the times mentioned in the indictment, his office was on the ninth floor of a building at Fifth Avenue and Madison Square. It consisted of two rooms; one, a reception room containing chairs, tables, a clock, and literature; and an inner office containing a desk, two chairs, and a telephone. On the door of his office were the words "Willis Vernon Cole, Christian Scientist."

The evidence taken on the trial consisted of the testimony of a woman who for seven years had been employed by and under the direction of the New York County Medical Society as an investigator, and the testimony of the defendant.

. . . . . .

It was conceded on the trial that Christian Science is a religion based upon the Scriptures and founded by Mary Baker Eddy in 1866, and that the church has about a million members. The alleged healing of moral, mental, and physical diseases by prayer was practiced by Christian Scientists in New York for more than twenty years before the times mentioned in the indictment. It was also conceded that in order to obtain entry upon the list of practitioners of the Christian Science church, proof must be furnished satisfactory to the church of the character and qualifications of the applicant, but that the education and experience of the applicant is not an element in his qualifications. The church relies wholly upon the sincerity of the applicant, and his reliance and faith in the power and efficacy of prayer to heal diseases.

It appears from the statute that we have quoted that a person practices medicine when he "holds himself out as being able to diagnose, treat, operate, or prescribe for any human disease, pain, injury, deformity, or physical condition, or who either offers, or *undertakes by any means or method*

Copyright, 1916, by The Christian Science Publishing Society.

Digitized by Google

to diagnose, treat, operate, or prescribe for any human disease, pain, injury, deformity, or physical condition."

The language of the statute is very general. It bears evidence in itself that the words were chosen for the express purpose of prohibiting, except upon registration and authorization of the practitioner, as by the statute provided, every means and method that could thereafter be used or claimed to be used to relieve or cure disease and infirmity by any person individually, or as a representative of a school, religious body, or other organization.

It does not appear that the defendant attempted to diagnose the diseases which the investigator stated to him that she had; he not only in substance denied that she had any disease, but asserted that they rested in her imagination or were mere evidences of a lack of true relation to her God. There was no inquiry on his part into the symptoms which the investigator claimed that she had as indicating the diseases. There was no laying on of hands, manipulation, massage, or outward ceremonial. His direction to her to remove glasses and take off a porous plaster which she asserted she had upon her back were, as also asserted by him, simply to bring about complete reliance by her upon the power and willingness of God to heal her diseases. Such directions were not, he asserts, intended as a prescription or as advice. It was a test of her faith. He, however, testified that prayer was a synonym for treatment. He habitually termed his interposition by prayer a treatment, and such it would seem to have been in the ordinary meaning of the word. He had a place where interposition by prayer to God could be sought through him at a price, either as a compensation or as an honorarium. He asserts that he made interposition with God by prayer to take away disease or what he alleges to be wrong relationships between persons having diseases and their God. His interposition with God as explained by him required divine action that the inharmony between the Divine Being and the person who sought to be relieved of diseases and infirmities might be adjusted. The duties of the defendant as a practitioner would seem to have been to handle the claim of those that came to him with their ills with a view to obtaining a divine cure. Such interposition under such circumstances was, in the language of the defendant himself, a "treatment."

We are of the opinion that the defendant did "treat" the investigator by "any (some) means or method," as the word is used in the general prohibition contained in the statute.

The general and comprehensive definition of a person who practices medicine, has an express exception. The descriptive words are preceded by the phrase "except as hereinafter stated." The exception concededly refers to the words in Section 173 of the Public Health Laws as follows: "This article shall not be construed to affect . . . the practice of the religious tenets of any church." The exception includes every person in the practice of the religious tenets of any church and it is not in any way in conflict with the federal or state constitution. The language quoted from said section 173 is not in any sense an affirmative license. It is, we repeat, an exception to the general prohibition. Whether the practice of the religious tenets of any church should have been excepted from the general prohibition against the practice of medicine unless the practitioner is registered and authorized so to do, or whether the exception should be continued therein, is a question for the legislature and not for the courts. The purpose of the general statute is to protect citizens and others of the state from being treated in their physical ailments and diseases by persons who have not adequate or proper training, education or qualifications, to treat them.

The tenets of a church are the beliefs, doctrines, and creeds of the church. The exception relates to the tenets of the church as an organized body as distinguished from an individual. It does not relate to or except persons practicing in accordance with individual belief.

It appears from the record that it is a tenet of the Christian Science church that prayer to God will result in complete cure of particular diseases in a prescribed, individual case. Healing would seem to be not only the prominent work of the church and its members, but the one distinctive belief around which the church organization is founded and sustained.

It is claimed that the church extends its influence and spreads knowledge of its power by practical demonstration on the part of its sincere practitioners in securing the overthrow of moral, mental, and physical disease. It disclaims any reliance upon skill, education, or science. In view of the tenets of the Christian Science church the exception to the prohibition in the statute is stronger than the provision of the Constitution of this state which we have quoted and which permits the free exercise and enjoyment of religious profession and worship without discrimination or preference.

The exception in the statute is not confined to worship or belief but includes the practice of religious tenets. If it was the intention of the legislature to relieve members of the Christian Science and other churches from the provisions of sections 160 and 161 of the Public Health Law to the extent of permitting them within the rules, regulations, and tenets of a church to maintain an office and there offer prayer for the healing of the diseases of those that might come to such church members for treatment, and the defendant has in good faith acted in accordance therewith, he is not guilty of the crime alleged in the indictment.

The Christian Science church is in terms expressly excepted from the prohibition contained in the medical practice acts of many of the states. It is so expressly excepted in the statutes of Maine, New Hampshire, Massachusetts, Connecticut, North Carolina, North and South Dakota, Kentucky, Tennessee, and Wisconsin.

We think the exception in the statute in this state is broad enough to permit offering prayer for the healing of disease in accordance with the recognized tenets of the Christian Science church. It may be said that if the exception is so construed, it will lead to numberless persons assuming to cure diseases in the name of a church for the purpose of thereby maintaining a business and securing a livelihood. The religious tenets of a church must be practiced in good faith to come within the exception. When such practice is a fraud or pretence it is not excepted from the general prohibition. When wrong is practiced in the name of religion, it is not protected by Constitution or statute. (Reynolds v. U. S. 98 U. S. 244; Davis v. Beason 133 U. S. 333; Mormon Church v. U. S. 136 U. S. 1.) Many of the decisions referred to by counsel may be explained by the fact that the persons therein severally considered were frauds and shams. (See People v. Spinella 150 A. D. 293; aff. 206 N. Y. 709.)

A person should not be allowed to assume to practice the tenets of the Christian Science or any church as a shield to cover a business undertaking. When a person claims to be practicing the religious tenets of any church, particularly where compensation is taken therefor and the practice is apart from a church edifice or the sanctity of the home of the applicant, the question whether such person is within the exception should be left to a jury as a question of fact.

In this case the court charged the jury, "If you find from the evidence in this case that this defendant did engage in the practice of medicine as alleged in the indictment, within

Digitized by Google

the definition which I have given to you, it is no defense that he did what he did from any sense of duty, or that he did these acts in the practice of the religious tenets of the Christian Science church." We are of the opinion that the court was in error in so charging the jury. The exception was intended by the legislature to exclude from the prohibition the practice of the religious tenets of the Christian Science and other churches. It was necessary, as we have seen, that the practice be of the tenets of a recognized church, and the court, instead of charging the jury as stated, should have left to the jury the question whether the defendant was in good faith practicing the tenets of such a church within the meaning of the statutory exception.

The judgment should be reversed and a new trial granted.

Reason and Prayer

JOHN C. BUSH

A LADY said to a Christian Science practitioner one day: "I have been interested in Christian Science many years, and yet I have not been healed. Why is this, when so many others are healed, and often instantaneously?" This question, which often comes to the practitioner, is a legitimate one, and the correct answer should and does satisfy.

The reply was substantially this: Christian Science is an absolute science and will permit of no half-way measures in its demonstration. As Mrs. Eddy tells us, "Whoever would demonstrate the healing of Christian Science must abide strictly by its rules, heed every statement, and advance from the rudiments laid down" (Science and Health, p. 462). Applied in its purity it is most reasonable that Christian Science should heal the sick and heal them quickly. That one has not been healed is certainly no fault of Christian Science, and without question the fault lies in the application of it. In this case the practitioner said to the patient, "Let us see if we cannot discover just where the trouble lies;" then turning to page 14 of the text-book, the practitioner read as follows: "Become conscious for a single moment that Life and intelligence are purely spiritual,—neither in nor of matter,—and the body will then utter no complaints. If suffering from a belief in sickness, you will find yourself suddenly well." He was interrupted several times while reading this to be told that the patient had read this passage a thousand times, that she knew it by heart. "But," she was asked, "how often have you done this?" To this she replied, "How often have I done what?"

The practitioner then went on to say, "Now let us suppose that everything you possess in this world was in jeopardy and required your presence in Chicago as quickly as you could possibly reach there, and you should send for a railway guide, and seating yourself in an easy chair, should begin to read it. Just how long would you be obliged to read to find yourself in Chicago, and would it help matters in the least if you should commit the whole book to memory? Do you not see that something is required of you more than the mere reading of the words. It says plainly, 'Become conscious . . . that Life and intelligence are purely spiritual.' Now, this is when and where healing takes place, for in becoming conscious that Life is spiritual, you must become unconscious of the material environment and of the material body; and if unconscious of the material body, you certainly will not be conscious of any pain in that body. One becomes a Christian Scientist only as he becomes conscious that Life is spiritual, and not material. He is not a Christian Scientist at any other time, and will never become one in any other way. Now, if you have failed in this, do you not see that you have not been in Christian Science at all as yet, and do you not see how some are healed more quickly than others?"

Jesus, recognizing the one great and only need of mankind, said plainly, "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free;" and again, "Howbeit when he, the Spirit of truth, is come, he will guide you into all truth." Mrs. Eddy, interpreting his teachings in the language of our times, tells us exactly how we must proceed to know the truth and experience its healing power, when she says on page 15 of Science and Health: "In order to pray aright, we must enter into the closet and shut the door. We must close the lips and silence the material senses." To silence the material senses means exactly what it says, and if the material senses were really silenced, should we be thinking of man as enclosed between the cradle and the grave? This is truly the demand. Yet one says: "You demand too much; it is unreasonable. Am I not in full possession of my senses, and do not these senses tell me all that I know? If I should give up the evidence of my senses, what should I know?" "Yet," one may ask, "according to the testimony of the material senses, what do you really know?"

We may believe many things, but we cannot know anything except it be true. To be true it must exist as a fact. To be a fact it must exist forever and be eternally the same. If the lapse of time could change it the least iota, that change would prove it no fact, therefore not true. All thinkers will agree that the existence of consciousness is the greatest fact which can reach the human reason; that this is the original fact, and anything else to be true must be subordinate to it and in perfect harmony therewith.

For right reasoning then, we must first admit that we are conscious, that we exist at the standpoint of consciousness. This consciousness, however, from the human point of view, varies in its conception of things just to the extent that it accepts the belief of many minds. Let us picture two young ladies: one through the natural course of human events has recently become a widow, and the other a young bride. Allow them now to walk hand in hand into a beautiful park, and what do they see? Is it possible from these different mental attitudes, the one heart filled with grief and sadness, the other with joy and happiness, that they can receive anything like the same mental impressions from their surroundings? To enlarge upon this point, allow ten or more persons to enter this park, and do we not have as many different mental impressions as there are persons? Yet there is a park, and something is true about it, and nothing but the pure truth about it really exists. And now, may we ask, just who has the correct impression of it?

Enlarging again upon our illustration, let it now include the whole universe and all mankind, and must we not admit that every object presented to the human consciousness, whether person, place, or thing, is formed, colored, and controlled absolutely by the memory of past events, conditions, experiences, and so on, and these of themselves as illusory as the thing present? From this basis is it not evident that the so-called material man, as he appears to exist, is himself nothing more or less than the expression of illusory memory, a crystallized form of ages of false thinking?

However stubbornly the physical senses argue for the existence of matter and a material universe, illustrations without number may be used to prove that these senses do not always tell us the truth. So too the more reason is allowed to bear upon any or all material phenomena, the more their illusory nature is exposed, until we may learn that no truth at all remains in their testimony; and this being demonstrably true to every one, is it not self-evident that the material body

Digitized by Google

and the material creation exist only at the standpoint of a compound lie? Yet we must all agree that a lie, if told, must be told about that which is true. Is it not evident then that all sense-testimony exists only as a mistaken sense about that which is true; and is it any stretch of good reasoning to understand that anything which is really true must be eternally true, eternally good, and must eternally harmonize with all else that is true?

If then good reasoning has led us to recognize the falsity of all sense-testimony and to understand that all truth must be learned apart from the material, if we still decide to follow reason, should we not find ourselves taking the first necessary step in obedience to the instructions of the one who knew best of all how to approach Truth, when he said: "When thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly." And should we not find reason and true prayer reconciled?

Do we as Christian Scientists realize the great importance that Mrs. Eddy placed upon the chapter in the Christian Science text-book, "Science and Health with Key to the Scriptures," which is entitled Prayer, that it should be the first chapter in the most scientific book ever written? Do we realize that every statement given us throughout the entire book was learned apart from the material sense of things, and that to be understood and demonstrated it must be interpreted from the spiritual standpoint? When we find ourselves struggling with some problem, can we not turn to this chapter, and there quickly find wherein we have failed to "abide strictly by its rules" (p. 462); that it is vain to strive to advance from rudiments not laid down in the teachings of Christian Science, therefore the struggle?

Jesus said, "Behold, I give unto you power . . . over all the power of the enemy: and nothing shall by any means hurt you." This power over all discordant conditions becomes our power exactly in proportion to our ability to silence the material senses with truth. This ability becomes our ability exactly in the proportion that it is exercised, for rightly exercised it unfolds that understanding which establishes health and harmony as a sure and permanent possession.

Love's Radiancy

ALLIE MORGAN

Sometimes the great lessons of Truth are unfolded to the human thought through the small trifles in our every-day life. The following incident, though simple in itself, nevertheless brought out so much that was helpful to the writer that she feels impelled to pass the experience on to others.

One evening just at dusk she was walking in the suburbs of the city along a road which at that point was quite light, but a short distance ahead a railroad bridge cast such a dark shadow that the road seemed to lie in absolute blackness. It had rained very heavily the day before, and it was necessary to pick one's way very carefully. Immediately there flashed through her thought the question how she would ever be able to keep from plunging into the mud; but in order to reach her destination there was nothing to do but to go ahead, and so she hesitatingly took the first step into the darkness. To her surprise she found that what, viewed from a short distance, had seemed to be absolute blackness, on nearer approach was sufficiently illuminated so that the road at her feet was plainly discernible; and so it was all the way along.

As she stepped out of the shadow into the light again, there came to her a sense of joy in having made the passage safely; then there flashed through her mind the thought of how typical this little experience was of our progress in Christian Science. At first the way is brightly aglow with the light which the joy and gratitude of our first healing brings to us; then as we walk along this brightly illumined road which Science points out, we are sometimes confronted with problems which seem to cast dark shadows across our way, and in looking ahead at them they appear so black that we think it will be impossible for us to go on. But we have already learned enough to know that in order to reach our goal we must go forward, since turning backward will never bring us to our destination; for, as Peter said when this thought was presented to him, "Lord, to whom shall we go? thou hast the words of eternal life."

As we, perhaps timidly, take the first step which divine Love points out, we are rejoiced to find that our understanding is not only sufficient for this step, but is also sufficient to enable us to see clearly the next one, and so on, until we find that the entire way through the seeming darkness is so illumined by divine Love that we are enabled to take each step safely. As we emerge from such an experience, a higher sense of joy than we have yet known comes to us, and in confidence and trust we realize the never-failing power of infinite good to sustain us at all times, under all circumstances. We gain a fuller meaning of the Master's words, "Lo, I am with you alway," and are able to comprehend in some measure the words of our revered Leader, Mrs. Eddy, on page 454 of Science and Health, "Love inspires, illumines, designates, and leads the way."

And so we have learned the lesson that if we will but take the step which divine Love designates as the right one, we shall find we have all the light of understanding needful then, and that when we have taken each step the next will be plainly discernible. Although on looking ahead we may see naught but dense darkness, yet we have learned that even there the light of divine Love has penetrated the seeming blackness, and has gone ahead of us to illumine our way. The psalmist says, "The darkness and the light are both alike to thee." We are here reminded of and encouraged by our revered Leader's words on page 149 of "The First Church of Christ, Scientist, and Miscellany": "Remember, thou canst be brought into no condition, be it ever so severe, where Love has not been before thee and where its tender lesson is not awaiting thee."

Hiding Our Brother's Failings

LUCY E. DOE

At one of our Wednesday evening meetings the hymn was sung in which occur these words (Hymnal, p. 60):—

Each can his brother's failings hide,
And show a brother's love!

A great song of gladness went up from the writer's heart for having been shown the right way to do this. Before knowing of Christian Science she thought that to hide our brother's failings was to keep his errors from others; to shut our own eyes to them; to conceal them through either love or pride, especially if the wrong-doer was some one near and dear to us. The more love we had for any one, the more excuses we would make for him, and try to keep his failings from the eyes and ears of others, although our own heart was being torn through the belief that the error was real.

But now how different it all is! How gladly we take up the task! We have learned through the teachings of Chris-

Digitized by Google

tian Science that man is God's child, perfect; that evil is unreal, therefore no part of our brother's real being. Then we remember the Scripture, "As far as the east is from the west, so far hath he removed our transgressions from us;" also this: "I have blotted out, as a thick cloud, thy transgressions, and, as a cloud, thy sins." Since we understand that God's child does not sin, it is our work to see our brother as God's child; to blot out of our own consciousness the belief in his failings, and refuse to accept the material sense-testimony which would make us believe that he is a sinner. When we have done our part faithfully, the failures are blotted out through Love. Furthermore, we always have some proof that a change has been brought about in our brother's thought.

The writer is very grateful for the help Christian Science has been to her in this way, and many experiences and demonstrations along this line are recalled. She has been careful to do her own work according to the teachings of Christian Science as revealed in our beloved Leader's writings, and has found that the faithful doing of this work has blotted out for her all sense of transgression in the way that only Christian Science can do.

[Written for the *Sentinel*]

"No more sea"

MARY LLOYD MC CONNEL

AMONG the mighty sayings of the Book,
It seems to me
Than this none gives more comfort: "And there
Was no more sea."

No dread of shipwreck on a stormy shore,
In dire distress;
No more misunderstanding those we love
And fain would bless.

No more upheaval and unquietness,
Nor wild unrest;
No longer troubled questionings and stress,
Upon Life's quest.

No sense of separation wide and sad,
In void without;
Nor wandering in lonely wilderness
Of fear and doubt.

O gentle Saviour, who in olden time
Didst walk the sea,—
Come thou to me and help me comprehend
Truth's power in thee!

Cause me the revelation clear to grasp,—
Eternal peace,
Where human storms are calmed by Love supreme,
And conflicts cease.

Then fear of wind and wave will swift depart,
And I shall know
That thou in surest safety bearest me,
Where'er I go.

Thus shall the vision pure of Patmos Isle,
Dawn upon me,—
And prove in consciousness the truth that there
Is "no more sea."

Selected Articles

[Editorial in *The Christian Science Monitor*]

"The world," says Sir Henry Taylor in his famous play, Philip van Artevelde, "knows nothing of its greatest men." It certainly knows uncommonly little about Homer or Shakespeare, which is not exactly what Sir Henry meant, but it also has very much indeed to learn about Mary Baker Eddy, which is very much more what he was aiming at. Mrs. Eddy's life has been written, but very far from adequately. A great biography is, admittedly, a *rara avis* in this world, and a more difficult person than the Christian Science Leader of whom to write a life it would be hard to find. The Founder of the Christian Science movement lived in a realm so far removed from the aims and passions of this world that it would be difficult to reveal her to the man in the street in a way in which, bound by the prejudices of the street, he could comprehend her. "*Acta exteriora indicant interiora secreta*" (Outward actions are a clue to hidden secrets), however, say the old Roman law books, and in the public actions of Mrs. Eddy the world which knew her not may first find the key to the door of the depths of her love and compassion for humanity.

Mrs. Eddy did not fathom the secret of Christian Science in a moment. She did, perhaps, grasp in a moment the significance of the word Principle. But she had to plumb the depths of what Burns calls "man's inhumanity to man," and of something far deeper than this, the remote, exciting cause of this inhumanity, before she could begin to forge in Christian Science the weapon for his protection, that scientific understanding of Principle which meets his every need. This understanding of Principle she gave to the world in the Christian Science text-book in the year 1875, and gradually after that, all in their due season, she took the destined steps for the establishment of the movement.

The human mind is intensely material, and accepts reluctantly and rebelliously the mental effort to grasp spiritual things. It is not surprising, therefore, that the Christian Science movement started slowly, or that its early years witnessed a prolonged struggle with ignorance and prejudice. It was not only entrenched orthodoxy of every description which opposed it, but creeds and schools which only yesterday, as it were, had been themselves in the van of the battle for liberty. Still the progress of the movement was irresistible. First came the establishment of churches, an undertaking which, beginning with one tiny organization in Boston, has in far less than half a century, wrapped the churches of the movement like a cloak about the globe. Next came the publishing house, with its books, pamphlets, and periodicals, all flowing out with an ever-increasing volume and impetus to the uttermost parts of the earth. And then, after many years of patient waiting, the daily paper, which was to be the first to claim the suffrage not of a city or a country, but of the world.

All these and many other efforts Mrs. Eddy initiated, watched over, and guided to maturity and success. But even while she was doing this, other plans for the help and protection of mankind were conceived by her. One of these, which she had for some time wished to see an accomplished fact, is now being undertaken, and on another page of this paper something of its origin and evolution is for the first time made public. From this it is learned that almost twelve years ago Mrs. Eddy was planning for the foundation of an institution which should include within the scope of its activities the provision of such practical instruction in the methods of caring for those under treatment as was consistent with the

Digitized by Google

teaching of Christian Science. Before her discovery of Christian Science Mrs. Eddy had experienced many of the sufferings of the sick-bed. She was filled with compassion for those who were turning in their sorrow and affliction to Christian Science for help; she saw, as no one else was capable of seeing, how the few inquirers of today would grow into the mighty army of tomorrow, and she wished to do everything in her power to extend the help of the movement to them in their necessities. She saw too, in her own words, that "our cause demands a wider circle of means for the ends of philanthropy and charity, and better qualifications for practical purposes," and so to those at this time and later in personal touch with her she poured forth her vision of the future and of all its possibilities.

The fact is that the world stands today in the dawn of a new era. The world which surrounded Mrs. Eddy when in the year 1866 the truth of Christian Science first dawned upon her consciousness, is slipping away, and it is, perhaps, too early to estimate her influence in bringing about the great changes which have taken place. When, however, it is realized that in that year there stood in the streets of Lynn one unknown woman, conscious of a wondrous revelation, and wondering how she should give it to the world, and that in the few years which have intervened the followers of that woman have built their churches and opened their reading-rooms, not in the state of Massachusetts alone but throughout the United States, not only in the United States but throughout two hemispheres, it becomes possible to measure the power of an idea. That power is not to be measured in cubic feet, but in terms of Mind. The influence of a paper, for instance, cannot be calculated in the number of its circulation, but in its power to express Principle. A faint indication of this may be found in the history of *The Times*, which with Delane for an editor and with a circulation of thirty thousand proved strong enough to move political mountains and to throw down the walls of social Jerichos.

It is in this way that the influence on human thought of Mrs. Eddy's teaching will have to be calculated. She lived so far in advance of anything the movement she founded has yet accomplished, as well as so far in advance of what the world is thinking, that years, perhaps, may pass before that world recognizes in its steady drift toward Principle the result of her influence. That is why the words of Sir Henry Taylor are so true of her,—"The world knows nothing of its greatest men."

✧

[Carl E. Herring in *Kearney* (Neb.) *Times*]

In a recent communication the continued suggestion is made that the "Bible, true science, and reason affirm the fact that man created out of dust reflects the likeness of God." Later in the same article it is stated that "the likeness does not consist in similarity of the material of which their persons are constructed, but in the intellectual and moral qualities, reason, judgment, and conscience." These two assertions are brought close together because the purpose of the communication was to deny the Christian Science teaching that God is Spirit and man as the reflection of God must be spiritual and not material; and yet these two statements show how impossible it is for a well-balanced mind even to write a short article of denial without ultimately basing the relationship between God and man on qualitative value.

While there is no particular objection to the words "intellectual," "moral," "reason," "judgment," "conscience," used by your correspondent in his efforts to describe God, yet they too much partake of the human thought about man and are suggestive of the age-long tendency to bring God down to the level of man instead of lifting man to God. In other words, the mixture of a dust man with human reason and passions has constituted our basic conception of God, which we have enlarged and amplified to suit our own ideas or for a God of special prowess to meet an emergency.

Christian Science undertakes to define God on an absolute basis and meet the demands of Scripture,—"with whom is no variableness, neither shadow of turning." Thus in answer to the question "What is God?" Mrs. Eddy gives the following brief definition: "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love" (Science and Health, p. 465). With this conception of God in mind we are prepared to take up the study of man, and our first lesson may properly be found in the first chapter of Genesis: "And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth."

When you have fully mastered the spiritual conception of God and of man made in His image and likeness, you will begin to have a firmer grasp of the meaning of the word "dominion" and will at least perceive, if you cannot demonstrate, that dominion in man does not permit man to be dominated by disease, sin, or discouragement.

✧

[Robert S. Ross in *Buffalo* (N. Y.) *Express*]

A critic said of Christian Scientists that "unless their faith is gradually to descend into a blind, besotted fanaticism, they will see its limitations; and when they need a physician or surgeon, will send for one." If one accepts the proposition that God, good, is both omnipresent and omnipotent, one must also admit that there is never an instant when God is not available and capable of meeting every human need. Asa turned from God to medicine and died; and does not Paul assure us that "the word of God is quick, and powerful, and sharper than any twoedged sword"? Surely it is not "blind, besotted fanaticism" to have more and more faith in Spirit, God, and less and less in matter!

The critic says that one reason why he is not a Christian Scientist is that he cannot assent to the teaching of the unreality of matter. For the same reason he could say he is not a Christian. The teachings of Christian Science and Christianity are identical on this as on every other point. In referring to the materiality of the age, and its unreal origin, Jesus spoke of it as "a liar, and the father of it." What is the father of a liar but a lie? Reasoning in another direction, Christian Science says that God, Spirit, Mind, is the one and only creator. He made all, and it must be spiritual, not material. In each case the conclusion is the same. Matter is not, because Mind is.

If matter is proved by Christian metaphysical analysis to be unreal, any system based on this unreality must likewise be unreal. The only real science is that which interprets God, Truth. In Science and Health (p. 468) Mrs. Eddy writes: "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all. Spirit is immortal Truth; matter is mortal error. Spirit is the real and eternal; matter is the unreal and temporal. Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual." Contrary to the opinion of the critic, the reasoning of Christian Science is logical and irrefutable. Furthermore, Christian Science is demonstrable. These are the elements that satisfy and make the teachings of Christian Science acceptable to thinkers in all departments of human activity. Again, on page 93 of Science and Health, Mrs.

Digitized by Google

Eddy says: "Divine logic and revelation coincide. If we believe otherwise, we may be sure that either our logic is at fault or that we have misinterpreted revelation."

No more baseless statement could be made than that Christian Scientists lack sympathy for their fellow beings. It is quite true that Christian Scientists have no sympathy for error, whether it be called sin or sorrow or sickness. What sufferers need is the help which will enable them to see the powerlessness and unreality of the troubles that beset them. In more than one place the Bible records that error cried out at the approach of Jesus, knowing that instead of agreeing with or coddling it, he would cast it out. To error Truth may seem a cruel tyrant, because Truth alone is capable of destroying the errors of belief.

✧

[Thorwald Siegfried in *Spokane* (Wash.) *Chronicle*]

Christian Scientists are glad to have you give a three column space, in reporting a recent evangelist's sermon, to the statement that "cures must come from God." They will also echo the evangelist's protest against any one treating human beings for disease "without the love of God in his heart." They are familiar with the statement that "physicians, whom the sick employ in their helplessness, should be models of virtue," as found on page 235 of the Christian Science text-book, "Science and Health with Key to the Scriptures," and Mrs. Eddy's further statement on page 366 of the same work: "In order to cure his patient, the metaphysician must first cast moral evils out of himself and thus attain the spiritual freedom which will enable him to cast physical evils out of his patient."

It is strange, indeed, in a sermon in which Christian Scientists find much with which to agree, that one should find an exhortation not to permit Christian Science "to rob Christianity of the great truth of Christ's power to heal the body as well as the soul."

Perhaps the evangelist believes that Christian Science metaphysics deals with the phenomena of the mirage-like mind which St. Paul defined as "enmity against God," and which believes it cannot even think without a material brain. If so, he is simply mistaken. True to the definition of the word metaphysics (above physics), Christian Science deals with that Mind, God, of which the human so-called mind is merely the counterfeit. Human beings consciously avail themselves of the divine Mind as they recognize its omnipresence and understand spiritual truth. Obviously the fluctuating and erroneous beliefs of the human mind, which may have seemed to be in possession, disappear utterly when that is accomplished, whether they spelled sin, disease, or any other form involving ignorance of the true man formed in God's image.

Christian Science will never rob Christianity of spiritual healing. The well-known fact is, that it has done more in fifty years to establish Christian healing on an enduring basis in human affairs, than has any other activity in all the centuries during which primitive Christianity was robbed of its spiritual animus and left conventionalized and barren.

✧

[Mrs. Elizabeth T. Bell in *Charleston* (S. C.) *Post*]

When vituperation and personal abuse in the pulpit supersede the methods of the gentle Nazarene, "the time is out of joint." What the thinking world demands today is less talk and more proof; and the declaration of the man in the temple, "One thing I know, that, whereas I was blind, now I see," was more convincing than all the wordy arguments of the Pharisees, who sought to brand as unorthodox whatever was above their spiritual grasp. What was unorthodox to them is orthodox today, and Christian Science is the complete recognition of Jesus' orthodoxy. Ignorance of the operation of spiritual law may call it "religious intoxication," as on the day of Pentecost; but this does not change the unalterable fact. Religionists cannot escape the demand, "Be ye therefore perfect, even as your Father which is in heaven is perfect," and Christian Scientists do not try to do so. They stand squarely on the basis of God's perfection, and man as expressing that perfection,—not sinful, sickly, mortal man, but spiritual man, created in God's image. Christian Science shows how to evangelize the mortal step by step, until it shall be changed for the immortal. Today evidences of this evangelization are on every side. More honesty, patience, purity, and love mark the lives of Christian Scientists, with the natural outcome of better health, less desire to evangelize the neighbor, and more to make their own lives approach the standard of perfection. Is not this Christianity?

Is Christian Science scientific? Yes, because demonstrable; its every statement being susceptible of proof. It does not cease with the demand, Be ye perfect; but shows how to obey this demand intelligently. Does Christian Science heal? The world is belted with churches built on the foundation of healing; not simply physical healing, but regenerated lives. Every few days a new church is organized. All this has been accomplished in a half-century.

As to the insinuation of "enlarged treasuries," I quote from an editorial in *The Ogden* (Utah) *Examiner*:—

"The writer is not a Christian Scientist, but he has always been an admirer of the methods employed by the members of this church. Its members seem to have enough faith in their cause to give it substantial support. They do not beg alms or ask for clergymen's rates. They conduct the business end of their religion on a business basis and ask no special favors. They seem willing to pay for what they get and are inclined to give charity rather than ask it. And by these methods they have done a great deal to prove their faith in their works and win the respect of people who believe that the financial side of religion should not be side-stepped if its supporters are sincere. In the matter of conducting church affairs on the right plane, other churches might study Christian Science methods to their eternal credit."

[Written for the *Sentinel*]

Spiritual Understanding

CHARLES C. SANDELIN

I KNOW, e'en when I do not see,
Just as I know the mountain peak
Though swathed in fog there still must be:
I know—with joy then I may speak!

I know, and not with faltering faith,
For faith is vain unless we know:
'Tis not like earth's deceiving wraith—
The child of sense, a fading show.

I know that Life eternal is,
Death cannot hide it e'en a while;
I know in Truth and Love is bliss:
I there may live and love and smile.

Ah, precious joy! This too I know:
The healing balm of Love's embrace;
And quickly dreams of error go—
In Mind I see, I know His face!

Editorial

Significance of the "Cole case"

As long ago as 1899, in Number 22 of Volume I of the *Christian Science Sentinel*, in answer to the question, "Is a righteous prayer, voluntarily sought by the sick, and used as a means for healing, capable of becoming a crime?" Mrs. Eddy said: "Under the Constitution of the United States, we answer, No! If the Scriptures are valid and their requirements just, importunate prayer, to preserve human life, has the sanction of Christianity, and in no case is criminal. The higher courts of our land will never construe prayer a crime. This I said over thirty years ago; and every case of persecution and prosecution of Christian Scientists for this pathological practice, has, by appealing from the lower to the higher court, proved this saying true. Our superior courts have always sustained these cases as belonging to the individual rights guaranteed to every citizen by the constitutions of the nation and states."

In deciding the so-called "Cole case" in the New York Court of Appeals, the highest court of that state, the opinion of the court, which was drafted by Judge Emory A. Chase, was entirely favorable to Christian Science; but more significant even than the opinion itself were the words of Chief Judge Bartlett, appended to it. He said: "I concur with Judge Chase in the construction of the statute, but I go further. I deny the power of the legislature to make it a crime to treat disease by prayer." That the chief judge should have used words almost identical with those of Mrs. Eddy, and that he reiterated what she first expressed some forty-seven years ago, was not a mere coincidence. It was proof that Truth "is imperious throughout all ages" (Science and Health, p. 98).

Commenting editorially on this decision, the *Brooklyn* (N. Y.) *Eagle* said: "It has taken a man four years in our courts to learn that he may pray to God to heal his sick body while healing his sick soul. The headquarters detectives and the local magistrate were not disposed to allow that. Our Court of Appeals is unanimous in its opinion in the Cole case that man cannot limit God."

Not the least important fact in connection with the decision just handed down (which we quote on pages 143-145 of this issue), is that this decision unequivocally recognizes the right of a legislature to declare that an act for the regulation of the practice of medicine does not forbid the practice of the religious tenets of a church in the healing of the sick. The words of the chief judge mean that not only did the legislature possess the right to make this declaration, but also that to have declared otherwise would have been to violate an inalienable right which even the law-making power of the state could not ignore or subvert. The entire supreme court of Kansas expressed substantially the same view in the case of State v. Wilcox, 64 Kansas Reports 789.

Another important question at issue in the "Cole case" was as to whether the treating and healing of the sick by prayer is a tenet of the Church of Christ, Scientist, and in deciding this question the court said: "The tenets of a church are the beliefs, doctrines, and creeds of the church. . . . It appears from the record that it is a tenet of the Christian Science church that prayer to God will result in complete cure of particular diseases in a prescribed individual case. Healing would seem to be not only the prominent work of the church and its members, but the one distinctive belief around which the church organization is founded and sustained. It is claimed that the church extends its influence and spreads knowledge of its power by practical demonstration on the part of its sincere practitioners in securing the overthrow of moral, mental, and physical disease."

Incidental to the consideration of this latter question, the court was of course first compelled to pass upon the status of Christian Science as a religion, and of the Church of Christ, Scientist, as a church under the meaning of the statute. That it took an affirmative view in regard to both these incidental but important questions, is proved by the decision in favor of the defendant, and we may therefore assume that, so far as the laws of New York are concerned, these points have been judicially determined. It would therefore seem reasonable to hope that those critics who have been loath to admit either the Christianity of Christian Science or its right to be called a religion and its organization to be called a church, will also consider these questions settled. That this decision of a court of last resort will largely put an end to the contention of interested parties, that the healing of the sick, irrespective of the means employed, is *per se* the practice of medicine, is another hope which Christian Scientists may confidently indulge.

ARCHIBALD MCLELLAN.

✧

"Through a glass, darkly"

IN his first epistle to the Corinthians St. Paul tells us that at present we see "through a glass, darkly;" but he at the same time assures us that we shall see "face to face" and know as we are known. To the Christian Scientist this thought of seeing "through a glass, darkly," implies the dimness of vision which prevails in mortal sense because of the belief of life, substance, and intelligence in matter. This mental condition has even obscured the outward order of things to mortal sense, so that nothing is clearly understood until the evidence of the physical senses is corrected by some understanding of the Principle which governs the universe and man.

Students of Christian Science are sometimes puzzled in striving to reconcile material evidence with spiritual facts, when in reality it is never possible to do so, although it is very helpful to gather lessons along the way from sun, moon, and star, flower and tree, and even from the grass beneath our feet. The seeming difficulty arises when one attempts to make the so-called material object spiritual, and many are needlessly troubled at what seem to be the varying statements of their friends, who like themselves are on the way from sense to Soul. At this point we can all be helped by recalling ofttimes our Leader's statement on page 123 of Science and Health, to the effect that "divine Science . . . resolves *things* into *thoughts*, and replaces the objects of material sense with spiritual ideas." The first step here indicated is to deal with thoughts instead of things, and the more advanced step called for in Christian Science is to grasp as soon as possible the spiritual idea which alone relates us to reality.

The question is sometimes raised as to whether one is nearer the spiritual fact when he no longer believes that the earth is a vast plane and that the sun moves across it from east to west. To this it may be answered that if one were to stop here, the more correct view of the astronomical fact would do nothing to advance one toward the realization of health, harmony, and sinlessness. It of course goes without saying that the knowledge that the earth is a sphere is of great practical value to navigators and others, and shows that humanity is breaking some of the old-time fetters of ignorance and superstition, but this only indicates the necessity for pressing on and understanding all creation in the light of Mind as understood in Christian Science.

Digitized by Google

It may be said at this point that many of the illustrations used in explaining Christian Science are intended to show that exactness is required, and so we fall back upon mathematical statements to do this; but it should not be forgotten that if we were to repeat the multiplication table to a sick person, or to one in bondage to the belief in sinful habits, he would not be advanced one step toward the understanding of man in God's image and likeness, who is pure and perfect because of this likeness. It is therefore apparent that no statement of so-called physical science, however accurate, can do the needed work for suffering humanity, though this does not mean that students of Christian Science reject the more nearly correct statements which are brought out from time to time by astronomers and others. On page 121 of Science and Health Mrs. Eddy says, "Astronomical order imitates the action of divine Principle; and the universe, the reflection of God, is thus brought nearer the spiritual fact."

No earnest student of our Leader's writings would question for a moment that the faithful study of these writings would prepare human thought for all discoveries which are of importance in the so-called physical realm, in so far as they are in harmony with spiritual law and order, even though they are at best but prophecies of the good things to come. We nevertheless cheerfully accord them their temporary value, even while we accept Paul's statement that human knowledge "shall vanish away." We, however, look with him for the coming of "that which is perfect," that which will satisfy the longing sense of humanity and heal both mind and body through the truth.

ANNIE M. KNOTT.

✧

Taking Off the Tag

THE word tag, though perhaps somewhat less elegant than the word label, is nevertheless a perfectly legitimate dictionary designation. A tag is a slip of some kind which is attached to things, and occasionally to people, in order to serve as a description or to claim ownership. We are all familiar with the game of tag played by children. One child is called "it," and straightway attempts to catch another child in order to pass on this undesirable designation.

In some cities of the United States the habit has recently arisen of collecting funds for certain causes, many of them doubtless most worthy ones, by instituting what are known as "tag days." Upon going out on the street the inhabitant or the visitor is offered one of these slips; if he accepts it, the tag is pinned to his coat and he pays for it. There is likewise a custom in many cities which consists in putting up placards on houses, announcing in very big letters the names of certain diseases. In such instances the placards have been forced upon the inmates, and they are paying the price very unwillingly.

It would seem as though the adversary, commonly known as the devil, and scientifically explained as the carnal mind, took particular pleasure in playing the game of tag with defenseless mortals and attaching to them the opprobrious epithet of "it," and in placarding the abodes of men with claims for damages to be paid in the counterfeit currency of disease. The question presents itself to the thoughtful observer, Is it absolutely necessary to submit to an evil designation of sin or sickness? Is there no legitimate and scientific way of taking off mentally what material sense has fastened on physically? Obviously the tendency to accept tamely whatever evil may have to offer must result in formidable accumulations of undesirable possessions. Fortunately, however, humanity through the teachings of Christian Science is now being shown how to refuse such iniquitous offers and to resist false claims through the spiritual understanding that whatever is evil cannot be either necessary or valid. Moreover, Christian Scientists are learning that in facing the temptations of error, politeness is out of place and a curt refusal uttered with spiritual conviction is absolutely in divine order.

James declares: "Submit yourselves therefore to God. Resist the devil, and he will flee from you." Peter advises: "Be sober, be vigilant; because your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour: whom resist steadfast in the faith." It is faith, clarified and instructed by Truth until it becomes spiritual understanding, which alone can protect mankind from being labeled and libeled at will by the pitiless but happily powerless slanderer. Christian Science teaches that God and His idea constitute the whole of reality, and that no designation derived from an unreal source can have intelligence or power. The nature of God being absolutely good, His idea or creation must partake of that same nature; hence perfection alone can properly characterize the whole of being. No accusation founded upon the supposition that God's so-called opposite can speak the truth, can exercise discrimination, or can issue an ultimatum, need be accepted by the vigilant Scientist.

On page 113 of "Miscellaneous Writings," by Mrs. Eddy, we read this encouraging statement: "He who refuses to be influenced by any but the divine Mind, commits his way to God, and rises superior to suggestions from an evil source. Christian Science shows that there is a way of escape from the latter-day ultimatum of evil, through scientific truth; so that all are without excuse." No longer, therefore, need humanity be perplexed by the constant offers of evil. The libelous labels of ignorance or malice are not of God's procurement. They are wholly false and superfluous. They can be refused, and even though once affixed they can be later removed legally, according to divine process of law, even by that prayer of faith which is the realization of truth and which substitutes for erroneous arraignments the glorious facts of imperishable being.

WILLIAM D. MCCRACKAN.

Lecture in The Mother Church

The First Church of Christ, Scientist, Boston, Massachusetts, announces a free public lecture on Christian Science by Frank Bell, a member of the Christian Science board of lectureship, in the church edifice, Falmouth, Norway, and St. Paul Streets, Back Bay, Friday evening, Oct. 27, 1916, at eight o'clock. The public is cordially invited.

✧ ✧ ✧

Among the Churches

Current Notes

WOODBURN, ORE.—Ground was broken this week [Aug. 7] for the erection of a Christian Science church edifice at the northeast corner of Second and Garfield Streets, opposite the Public Library. The building will be 46 by 60 feet, modern style, with a seating capacity of one hundred and fifty, and will be completed in two or three months. The cost of the structure will be nearly three thousand dollars.

As early as 1907 a small group of ladies who were earnestly studying Christian Science, met each week to read the Bible together with "Science and Health with Key to the Scriptures" by Mrs. Eddy. As others became interested it proved necessary to obtain a larger meeting place, so the G. A. R. room at the Armory was secured. There the first public service was held in May, 1912. Later the parlors of the

Digitized by Google

Masonic Temple were rented, where Sunday morning and Wednesday evening meetings are still held. In October, 1912, the Christian Science Society was organized and a building fund started, and in March, 1915, the lot on which this church building will be erected was purchased.

The Woodburn Independent.

LANCASTER, N. H.—Alterations and repairs upon the former Unitarian Church having been completed, it was occupied for the first time as a Christian Science church edifice Sunday morning, Aug. 6. The auditorium seats nearly two hundred. The church as it stands completed represents an outlay of about thirty-eight hundred dollars, besides the original structure, which was a gift from the Unitarian society. The building was erected during 1855-56.

The Jefferson Times.

NEW BEDFORD, MASS.—Services were held yesterday [Aug. 27] at First Church of Christ, Scientist, corner of County and Mill Streets, to dedicate the structure. The edifice has been in use since May, and last week the building committee reported its work completed and all bills paid. In accordance with the custom of the denomination, exercises of dedication are not held until all debts are paid.

The Morning Mercury.

MESA, ARIZ.—The Christian Scientists have let the contract for a building suitable to the needs of this growing society on a lot 100 by 125 feet on the corner of McDonald and West First Streets. The structure will be 40 by 70 feet, and the auditorium will seat two hundred persons. The property when completed will represent an investment of about seven thousand dollars.—*Phœnix Republican.*

MOUNT PLEASANT, IOWA.—At the recent Henry County fair, the Christian Science Society placed *Sentinels*, *Journals*, and *Monitors* in the reading-room that was provided by the fair board at the grounds. All of this literature was taken away by non-Scientists.—*Correspondence.*

MARTINEZ, CAL.—Work on the Christian Science church building on Mellus Street, near Las Juntas, is progressing rapidly. The main auditorium is 30 by 40 feet, and the seating capacity will be two hundred. It is expected that the first services will be held in the church on Sunday, July 30.

Martinez Standard.

DAWSON, YUKON TERRITORY, CANADA.—Professor Hering lectured on Christian Science in Arctic Brotherhood Hall, July 23. Between three and four hundred people were present, and the lecture was a success in every way.

Correspondence.

✧ ✧ ✧

The Lectures

Sault Ste. Marie, Mich.

Virgil O. Strickler delivered a lecture on Christian Science at the Soo Opera House. The building was well filled when Attorney L. C. Holden introduced the speaker with the following remarks:—

We often hear it said that religion is changing all the time. I do not quite agree with such statements. I am inclined to take a broader view of it, and regard religion as fundamental and unchanging. But it is certainly true that our conceptions of religion—our theories concerning it, our theologies if you please—have very greatly changed, even in the last half-century. Personally, I am much rejoiced with the change.

In the last few years there has come among us a sect, society, or church people known as Christian Scientists. They are leading the van of progress in religious conceptions concerning God and man. The charted way of their religious ship of state seems illumined by a ray of light from heaven itself. Their growth is rapid, yet healthy. Their gentility of character and conduct, their lack of criticism of others, coupled with higher ideals and conceptions of what life really is in this world and in the next, are winning many good people to them. We see them in their every-day lives, made healthy in mind and body by methods of thinking and living as taught by their religion.—*Sault Ste. Marie Mail.*

✧

Lexington, Ky.

Dr. R. D. Coffman, in introducing William R. Rathvon, who lectured on Christian Science at the Woodland Park Auditorium, said:—

All thoughtful persons must agree that Mrs. Eddy was the most remarkable woman of the nineteenth century. She, the Founder of the Christian Science movement, will live through the centuries as a benefactor of the race. Her task was a hard one. While this is an age of spiritual uplift, yet those who are great by reason of their own efforts must suffer ridicule and persecution, as they did in the darker ages. In spite of the record of this wonderful woman there are those in Kentucky and elsewhere who ask the question, What has woman done to entitle her to leadership? This spiritual movement, begun in the nineteenth century, has grown with such rapid strides that today, after the first decade of the twentieth century, its rays of hope shed their healing light into every community in America.

Correspondence.

✧

San Rafael, Cal.

The introductory remarks by H. S. Scott, mayor of Ross, at the lecture on Christian Science by Frank Bell, were in part as follows:—

Before introducing the lecturer I wish to say to you that I am not a Christian Scientist, although I am much interested in the thought. I know of a number of instances where friends and acquaintances have been greatly helped both mentally and physically by its practice. It seems to me to be the only real religion and the most acceptable to those who think for themselves. This correct understanding has been made possible only through the wisdom and its application of the thought expressed in "Science and Health with Key to the Scriptures" by Mary Baker Eddy. Many others have expressed in individual articles similar thought at various angles, but it was left to Mrs. Eddy to put this truth in concrete form and in such a way that all who care to do so can acquire this knowledge and help.—*Correspondence.*

✧

Trenton, N. J.

A lecture on Christian Science was delivered in Taylor Opera House by Charles I. Ohrenstein. Thomas B. Holmes, editor of the *State Gazette*, introduced the speaker, and his remarks follow:—

I am not a member of the Christian Science church. I am, however, much interested in that religion, have given it much serious thought, and am convinced that it is not a theory but a fact. I know men in this community who have been raised from the lowest depths of iniquity and set upon the solid ground of righteousness by the love of God as demonstrated

Digitized by Google

in Christian Science. I have investigated claims of physical healing in this community, with the result that I have found instances of cure that to the average mind would seem to be miraculous. But as I understand it no miracles are wrought in Christian Science. The Christian Scientist has a reason for and proof of all that he accomplishes in the direction of healing, whether it be of sin or of sickness, and that reason and proof rests upon the infinite power and boundless love of God.

I know no people who more earnestly strive to rise to the standard of righteous living set by our divine Teacher, Jesus the Christ, than the Christian Scientists. I know no people who more earnestly strive to reflect the love of God in their daily life or exactly measure their attitude toward their fellow man by the golden rule than the Christian Scientists. I know no people who bear the cross with greater patience and more humility than the Christian Scientists. For these reasons I consider it a privilege and an honor to have this opportunity to introduce to you the bearer of a message of hope and healing.—*State Gazette.*

Lectures to be Delivered

[By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.]

ARIZONA—Bisbee: William R. Rathvon, Orpheum Theater, 3 p.m., Oct. 29.
Globe: William R. Rathvon, Globe High School, 8 p.m., Nov. 2.
Phoenix: William R. Rathvon, Elks Theater, 8:15 p.m., Oct. 31.
Tucson: William R. Rathvon, The Tucson Woman's Club, West Alameda Street, 8 p.m., Oct. 30.

CALIFORNIA—Chico: Virgil O. Strickler, Armory Hall, Fifth and Main Streets, 8 p.m., Oct. 28.
Covina: Virgil O. Strickler, Covina Union High School, 8 p.m., Nov. 2.
Long Beach: Virgil O. Strickler, Auditorium on the Pier, 8 p.m., Oct. 30.
Oroville: Virgil O. Strickler, Congregational Church, 8 p.m., Oct. 27.
Redwood City: Virgil O. Strickler, Sequoia Theater, 3 p.m., Oct. 29.
San Fernando: Virgil O. Strickler, First National Bank Building, First and Maclay Avenue, 8 p.m., Nov. 3.
Venice: Virgil O. Strickler, Church Edifice, Second and Brooks Avenues, 8 p.m., Oct. 31.

CANADA—Kingston, Ontario: Willis F. Gross, Church Edifice, 95 Johnston Street, 8:15 p.m., Oct. 31.
Regina, Saskatchewan: John W. Doorly, City Hall, 8 p.m., Oct. 31.
Toronto, Ontario (Third Church): Frank Bell, Royal Alexandra Theater, 3 p.m., Oct. 29.
Winnipeg, Manitoba: John W. Doorly, Church Edifice, Nassau Street and River Avenue, 3:15 p.m., Oct. 29.

COLORADO—Denver (Second Church): Ezra W. Palmer, Church Edifice, South Grant Street and East Bayaud Avenue, 8 p.m., Oct. 30 and 31.
Greeley: Ezra W. Palmer, Sterling Theater, 3 p.m., Oct. 29.

CONNECTICUT—Norwalk: Clarence C. Eaton, Regent Theater, 8 p.m., Oct. 27.

ENGLAND—Bristol: John Sidney Braithwaite, Large Colston Hall, 8 p.m., Nov. 9.
Manchester (Second Church): John Sidney Braithwaite, Church Edifice, Clothorn Road, Wilmslow Road, Didsbury, 8 p.m., Nov. 14.
Manchester (Third Church): John Sidney Braithwaite, The Lesser Free Trade Hall, 1:20 mid-day, Nov. 15.

GEORGIA—Atlanta: Bicknell Young, Church Edifice, Peachtree and Fifteenth Streets, 8 p.m., Nov. 3.

ILLINOIS—Aurora: Prof. Hermann S. Hering, East Aurora High School Auditorium, 8 p.m., Nov. 3.
Chicago (Second Church): Edward A. Merritt, Church Edifice, Wrightwood and Pine Grove Avenues, 8 p.m., Oct. 30 and 31.
Lake Forest (auspices Highland Park): Prof. Hermann S. Hering, Durand Institute, 8 p.m., Oct. 31.
Lockport: George Shaw Cook, High School Auditorium, 8 p.m., Oct. 31.

INDIANA—Frankfort: John Randall Dunn, Blinn Theater, 3 p.m., Oct. 29.
Indianapolis (First Church): Dr. Walton Hubbard, Church Edifice, 2011 North Meridian Street, 8 p.m., Nov. 2 and 3.

IOWA—Clinton: Bicknell Young, Clinton Theater, 8 p.m., Oct. 30.
Keokuk: Prof. Hermann S. Hering, Elks Hall, Elks Club Building, 8 p.m., Oct. 30.
Oskaloosa: George Shaw Cook, Church Edifice, 406 East High Avenue, 8 p.m., Nov. 3.
Sioux City (First Church): Bicknell Young, Auditorium, 3 p.m., Oct. 29.

KANSAS—Fort Scott: Charles I. Ohrenstein, Pictureland Theater, 3 p.m., Oct. 29.
Kansas City: Charles I. Ohrenstein, Masonic Temple, Seventh Street and Ann Avenue, 8 p.m., Oct. 28.
Parsons: Charles I. Ohrenstein, Elks Theater, 8 p.m., Oct. 30.
Winfield: Ezra W. Palmer, A. O. U. W. Hall, 8 p.m., Nov. 3.

KENTUCKY—Paducah: Bicknell Young, Auditorium, Three Links Building, Fifth Street and Kentucky Avenue, 3 p.m., Nov. 1.

MASSACHUSETTS—Boston (The Mother Church): Frank Bell, Church Edifice, Falmouth, Norway, and St. Paul Streets, 8 p.m., Oct. 27.
Westboro: William W. Porter, Town Hall, 8 p.m., Oct. 27.

MICHIGAN—Bangor: Willis F. Gross, Miller's Opera House, 3 p.m., Oct. 29.
Otsego: John Randall Dunn, Edsell's Opera House, 8:15 p.m., Nov. 3.

MINNESOTA—Minneapolis (Second Church): Edward A. Merritt, Church Edifice, Second Avenue South and Eleventh Street, 8 p.m., Nov. 2 and 3.

MISSOURI—St. Louis (joint lecture): Prof. Hermann S. Hering, Odeon, 3 p.m., Oct. 29.
St. Louis (First Church): Bicknell Young, Church Edifice, Kingshighway and Westminster Place, 8 p.m., Oct. 31.

MONTANA—Great Falls: John W. Doorly, Palace Theater, 8:30 p.m., Nov. 3.

NEW YORK—Flushing, Long Island: William W. Porter, Church Edifice, 93 Murray Street, 8:30 p.m., Nov. 3.
Gloversville: Paul Stark Seeley, Glove Theater, 3:30 p.m., Oct. 29.
Malone: Frank Bell, Malone Opera House, 8 p.m., Oct. 30.
Mt. Vernon: William W. Porter, Westchester Theater, 3:30 p.m., Oct. 29.
Nyack: William W. Porter, Church Edifice, 1018 Broadway, 8:15 p.m., Nov. 2.
Westfield: John Randall Dunn, Assembly Hall, Welch Block, 8 p.m., Oct. 24.
White Plains: Frank Bell, Assembly Hall, White Plains Club, 8:15 p.m., Nov. 2.

OHIO—Toledo (Second Church): Edward A. Merritt, Coliseum Theater, Ashland Avenue and West Bancroft Street, 3:30 p.m., Oct. 29.
Zanesville: George Shaw Cook, Memorial Hall, 2:30 p.m., Oct. 29.

OKLAHOMA—Bartlesville: Charles I. Ohrenstein, Grand Theater, 8 p.m., Oct. 31.
Oklahoma City: Charles I. Ohrenstein, 8 p.m., Nov. 3.
Shawnee: Charles I. Ohrenstein, Savoy Theater, 8 p.m., Nov. 2.

OREGON—Portland (Fourth Church): Bliss Knapp, First Church Edifice, Eighteenth and Everett Streets, 8 p.m., Nov. 2, and Jefferson High School Auditorium, Kerby and Emerson Streets, 8 p.m., Nov. 3.

PENNSYLVANIA—McKeesport: Clarence C. Eaton, Lyric Theater, 3 p.m., Oct. 29.

Testimonies of Healing

Because of the help received from testimonies in the Christian Science periodicals I wish to add my meed of praise and thanksgiving for what this teaching has done for me, hoping that some one passing through a similar experience may also find the truth that makes free.

In the fall of 1911, the darkest hour of my life, occasioned by the sudden passing on of an idolized child, a friend who saw my need of a better understanding of God urged me to read Science and Health, but feeling strongly prejudiced, at first I refused. At that time I was and had been for several years an active worker in an orthodox church and Sunday school, and I earnestly sought the peace and comfort God had promised those that mourn. I always refused to believe God sent this sorrow upon me, and told my friends, when they would say He took my baby for some wise purpose, that I did not believe He had anything to do with it.

After some weeks of melancholy and severe headaches, which had made me even pray for the end, I decided to put aside my antagonistic thoughts and read the book offered me. I shall never forget how hungrily it was read. For days I was so absorbed in it that I seemed oblivious to my surroundings and did not realize it was helping me, until one day there came a feeling of freedom and joy such as I had never expected to know. At once the sense of loss and separation vanished. I knew that if the simple reading of that wonderful book could heal broken hearts, then the author was the messenger of God, and from that time I became an earnest seeker for more of the truth.

We have had many beautiful demonstrations which have proved the truth of Christian Science healing, but I am more grateful for a satisfying religion and for the spiritual uplift one gains by putting into practice what one understands of the truth. A severe case of inflammation of the bowels, an attack of acute lung trouble, which was overcome in six days, a stomach disorder of two years' standing, also minor ailments, and accidents to my two boys,—all were healed through Christian Science treatment alone, no material means being used.

I am very grateful for the life of our revered Leader. Time alone will reveal the great value of what she has given to the world in Christian Science.

Anna G. Herring, Monroe, La.

✧

In 1907 I was induced to try Christian Science for ear trouble. During the winter there were nineteen abscesses in my right ear and five different doctors urged the mastoid operation, but I could not bring myself to the point of taking an anesthetic. Finally a doctor said there was no use in delaying any longer and that he would operate at five o'clock that day. I consented, but went home, made my will, and set my house in order, for I was convinced I would never waken from the drug-induced sleep. Then I asked a friend if she would be with me during the operation. She refused, but being a Scientist recommended Christian Science treatment, as my fear of an anesthetic was so great, and gave me the name of a practitioner. I saw the practitioner three times and was healed without the operation. In the years that have since passed no return of the ear trouble has appeared.

A few years ago I awakened one morning with a very painful tooth. The dentist said there was a bad abscess under the gum, and wished to give me gas, being positive he could do nothing for me without it. I made an appointment for the following day, then called on a Christian Science practitioner, who promised to treat me at that hour. When I went to the dentist's office he again declared he would not work without the gas. I said, "Very well, just do whatever other work is needed and let this tooth go." He began to examine it and finally drilled a canal into the root above the gum, cut out the diseased bone, and drained the pus from the cavity without any anesthetic. When he saw my son later in the day he said: "What is your mother made of? She wouldn't take gas, but that tooth had to be opened. I gave her dental treatment which would have made a nervous wreck of most women, yet she never even flinched." Really I was not hurt at all; aside from being tired of sitting still so long, I felt no discomfort. This was a wonderful demonstration, for on former occasions a trip to the dentist would completely upset me for days before and after. For this and many other helps in time of need I am most grateful, and I try to bring Christian Science to bear on all my problems and trials.— Ethel Van Vliet Berthillet, Denver, Col.

✧

About six years ago I began the study of Christian Science, not because of poor health or business conditions, but rather because I was inquisitive to know something of its teachings. For a number of years I had been confronted with the continued invalidism of my father and had seen him waste away under medical treatment. At this time matter was the beginning and the end of things to me, but thanks be to God for the hope with which the reading of the chapter entitled Prayer, in "Science and Health with Key to the Scriptures" by Mrs. Eddy, inspired me. I accepted this great truth readily and continued to read on with avidity. As a result, a catarrhal condition in a most virulent form, from which I had suffered for years, disappeared. I had never dreamed that this could be healed, as specialists had said it was incurable in this climate and that they could only allay my suffering.

By this time I had a pretty good talking knowledge of Christian Science, and it became necessary for me to prove my words. Business conditions began to reverse themselves until I seemed confronted by insurmountable difficulties; but by absolute reliance on God and knowing that the only plan or will was the divine, my connections were so altered that my income was more than doubled. During the seeming depression of the past two years I have looked wholly to Spirit and away from matter, with the result that good has always manifested itself.

Recently a severe attack of chills and fever and bodily soreness was entirely overcome in thirty-six hours. Previous to my knowledge of Christian Science this same trouble would keep me in bed from one to two weeks and leave me almost a wreck. Doctors always diagnosed the case as malaria. Christian Science has taught me that substance, health, and peace are spiritual, and that if the one talent of spiritual understanding which we possess is not multiplied by applying it to the problems before us, even that one shall be taken from us. With meekness and humbleness I express my gratitude for this enduring light.—P. A. Wendland, Chicago, Ill.

✧

Christian Science is indeed to me a great deliverer. Since the birth of my last child light has been coming to me in almost overwhelming floods. The baby was born with very little pain, but when the child was a week old my strength seemed to leave me entirely and I was seemingly almost overcome with a terrible sense of fatigue. Looking to matter for support, I saw that all its laws were against me, as I was doing my own housework with some help from my husband

Digitized by Google

and his mother. All day I labored to lift these material laws; by night I had not done so, but after reading a part of our weekly Lesson-Sermon the thought came to me strongly that God is my strength, and I decided that on the morrow I would arise and perform my duties regardless of material sense and trust in Him for strength. The next morning, even though I had slept very little through the night, I arose and began my duties, strength coming in all its fulness after the start was made.

As a family we have been wonderfully blessed with this truth since we began the study of Christian Science six years ago. I should have to write a book to tell it all; even then there would be no word great enough to express the allness of Truth. Weak eyes, stomach disorder, back trouble, nervousness, whooping-cough, financial inharmony, and other problems have been overcome by the power of Truth. Twice I have experienced instantaneous healing when the end seemed close at hand. My three children have all been born with the aid of the great Physician only. The blessing that fills my heart with gratitude is the understanding which has come of the spiritual Life, to the extent that it makes me willing to dedicate my whole existence to God.

Mrs. Merritt J. Glass, Tulsa, Okla.

✧

During the greater part of my life I have been subject to stomach trouble, nervousness, and sleeplessness, sometimes being in bed two or three days at a time, and never knowing what it was to feel like a healthy person. One day a friend brought me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, but I scarcely looked at it for months. There were two or three of these attacks in the mean time, and the doctor came each time. He succeeded in giving relief but did not effect a cure. Then discouragement set in and a great fear that I might lose my reason. With it all I had a very bad temper and a jealous disposition, and was in fact about as unhappy as a person could be. Finally I began to read the book and found that "man's extremity is God's opportunity." I held fast to the truth and read and prayed for nearly ten hours. That evening I ate a good supper and have never had an attack since. A skin trouble and other disorders have also been overcome.

For six years God has been my only reliance, and I am grateful to Him for all these blessings. I am also thankful to Mrs. Eddy for making this new-old truth available to mankind.—Susan G. Slifer, Hamilton, Ohio.

✧

After practically all material means had failed, I was instantaneously healed through Christian Science of Bright's disease, catarrh of the stomach, an ailment of the liver, and extreme nervous exhaustion. For several years I had been a semiinvalid, under the care of doctors of various schools, had lived in the open, in rest-houses, and in sanitariums, and had resorted to practically every known means to effect a cure. Despite the efforts of the physicians my condition grew worse, until I was wasted away to a mere skeleton and barely able to walk.

My physician then discovered that Bright's disease had reached an acute stage, and told my friends that I could live but a very short time. In accordance with his advice I went to the home of a friend in a town near Philadelphia, with the intention of spending my remaining days there. This friend had been successfully treated in Christian Science for locomotor ataxia, and he was very desirous that I turn to it in my extremity. More out of courtesy to my host than because of any faith in Christian Science, of which I knew but vaguely, I visited his practitioner and received treatment. After a long sleep, the first for weeks, I awoke perfectly healed; the pain had disappeared and I felt entirely rejuvenated—literally a new man. From the hour of that healing, more than five years ago, I have not been incapacitated from duty for a moment, and today enjoy better health than at any previous time. Subsequently I have been healed of defective sight, and have laid aside glasses which had been worn for many years. The tobacco habit has been overcome, and there have been innumerable other proofs of the power of Truth.

In expressing my gratitude for these manifestations of the power of divine Love, let me express my appreciation of Mrs. Eddy's mighty work in giving to the world a demonstrable religion. I am also grateful for the authorized literature, the reading-rooms, and the churches. As a student of Christian Science I am especially grateful for *The Christian Science Monitor* and the splendid work it is achieving in the elevation and purification of journalism.

J. Barton Cheyney, New York, N. Y.

✧

It is about fourteen years since I first heard of Christian Science. I was at that time a miserable and depressed woman, partly owing to ill health and partly to the discords in my home life. I was frequently troubled with influenza, and after each attack grew more depressed. Then I heard of Christian Science. I was not at all attracted by what I heard, but on asking for the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, just to glance at it, I quickly determined to buy a copy of my own. I did so, and from that day have never ceased to be thankful for Christian Science. There was no Christian Science service or reading-room in Birmingham in those days, and I did not know any Christian Scientist of whom to ask questions, but I read the text-book and found it calmed and comforted me, so that life did not look so dreary. Slowly but surely the healing commenced. Influenza was no longer a nightmare and I gradually forgot to be afraid of it; consequently it ceased to attack me.

About eighteen months after my first reading of Science and Health my little boy was born. Great surprise was expressed by the doctor and nurse at the natural time I had; also that the boy was so strong and healthy. During the three weeks which followed I read the text-book daily. I had suffered since childhood from pain in the right foot, and walking was always accomplished with difficulty. My father suffered from rheumatic gout and corns, and I was supposed to be like him, but soon after my little boy was born, I found myself able to walk without thinking of my foot; it was also in better shape, and whereas before it was often swollen, I could wear ordinary leather shoes and boots instead of kid ones. After I had been reading Science and Health about five years, my husband decided to study it, and that was a great joy to us both.

When my son was about four years of age, he met with an accident. I was writing a letter when I heard screams from the kitchen. I found the child in a sad state, for he had tumbled over a bucket of boiling water and was wet up to his waist. I undressed him and tried to comfort him, but he did not stop screaming, and all seemed confusion. Then I carried him in my arms and sang one of our Christian Science hymns, but he still cried, so I left him with his nurse and went upstairs, feeling that I must get away alone and pray to God. I got the text-book and read. In less than ten minutes he stopped screaming and did not cry again. I heard him calling to me, and when I went to the head of the stairs, he told me the pain was gone. I returned to my room and continued reading Science and Health for quite half an hour. When I came down-stairs I found the boy still on the sofa,

Digitized by Google

but playing with his toys. He had his dinner and was just as well as usual except for the fact that he would not walk. All the actions of the body were quite normal. His refusal to walk showed me there was still some fear in my consciousness, and so I wrote to a practitioner to come and help me. She assured me, however, that the work was done and the boy was all right. The next day he walked and the following Sunday attended as usual the Christian Science service and stood on a chair to sing the hymns. No material means of any kind were used, as it never even occurred to me to send for a doctor or use anything, except to wrap his legs in soft linen. In three weeks the linen came off like parchment. The child did not suffer in any way after he stopped crying, and no one knew what had taken place except the practitioner, the nurse, and myself.

I am very grateful for this healing in Christian Science, which has been and is a great help to me in my daily life. I have still a great deal to overcome, but know that as I am willing for God's will to be done instead of my own, I shall progress in my understanding of the truth. My great desire is to help and comfort others as I have been helped and comforted. I am sincerely grateful to our dear Leader, Mrs. Eddy, and every day I thank God for Christian Science.

EDITH BEDDOE, Birmingham, England.

I can confirm all that my wife has stated. I was drawn to study Christian Science because I noticed the wonderful difference it had made in her life. I have since received countless blessings,—happiness, good health, success, and harmony in my daily work. Christian Science is indeed a practical religion.—F. D. BEDDOE.

✧

Before Christian Science came into our family, and during my young girlhood, I had a severe attack of appendicitis. The physician who attended me advised an operation, to which my parents would not give their consent. I recovered enough to attend school, but was not strong or well. Some time afterward I had a return of the same disease. My mother, who was then interested in Christian Science, called a practitioner, and treatment was given. In a short time I was healed, and there has been no return of the trouble during the nineteen years that have since passed. I am grateful to God for this healing.

My desire is to let my daily living express my thankfulness to Mrs. Eddy for being willing "to leave all for Christ" (Science and Health, p. 141), that she might bring to light again this healing truth, which is so clearly explained in her text-book, "Science and Health with Key to the Scriptures."

MABEL SMITH COLLEY, Malden, Mass.

✧

The true Christian Science practitioner is a friend of the Master, for he is doing as the Master commanded, that is, preaching the gospel, healing the sick, casting out devils. The realization that I was in personal contact with and had suddenly acquired the friendship of a friend of the Master, came to me with startling certainty and was the most wonderful experience of my life.

For weeks I had suffered from terrible pain at the base of the brain and could get no relief from the doctors. In my despair I was induced by a good friend to try Christian Science. Christmas day, 1913, was full of suffering, so the next day I visited a Christian Science practitioner. He asked for particulars as to my habits and I frankly told him everything, among other things that I had been addicted to the use of liquor for more than twenty-five years and felt the need of it every day, though I did not drink to excess; also that the tobacco habit was firmly fixed as a result of some thirty-five years of smoking. He quietly asked if I desired to give up these habits and on receiving an affirmative answer gave me a treatment.

I went from the practitioner's presence suffering as before, and the day following drank and smoked and endured the pain about as usual, but seemed a trifle better. The second morning I awakened from a quiet, restful sleep, healed,—healed both of the pain and of the desire for liquor. The desire for tobacco clung to me for some time, but finally left me instantly and positively. The joy of it all, and the peace, are glimpses of the promised "kingdom of God" that is "within."—FRANK N. RUST, Los Angeles, Cal.

✧

With a desire to render praise unto whom praise is due I write this testimony. Several years ago I was suffering from bowel trouble, which did not seem to yield to medical treatment. When in June, 1911, the doctors advised me to have an operation, I decided to try Christian Science, and help was received immediately. This caused me to begin the study of the Bible, together with "Science and Health with Key to the Scriptures" by Mrs. Eddy. Glasses had been worn for nine years, but I had not been reading long when I noticed that they were not needed, as my sight was just as good without them. Then all the old complaints, of which there were so many, left. One of them, a throat affection, was stubborn and hard to get rid of. More than twelve years before this time I had a severe attack of bronchitis, and it had left me with this trouble, which nothing seemed to relieve; but I am thankful to say that it has since yielded to the power of Truth.

I am grateful to Mrs. Eddy for showing us how to gain the victory over all error. My health is perfect and has been restored to me entirely through the study of Science and Health. The happiness which I have gained through the spiritual understanding of the Bible is the greatest blessing of them all. I feel deeply grateful for the Christian Science literature, which I read all my spare time, and my greatest desire is to live so that I may be a help to others.

AMELIE W. BRECHTEL, Bay City, Mich.

✧

I wish to express my gratitude for Christian Science, and for the wonderful healing it has given to me. From early childhood I had suffered from stomach, blood, and nervous disorders, which made it necessary for me to be almost constantly under a physician's care. I believed it injurious to eat various foods, and often craved those things which were denied me. In addition to these physical ailments I was much dissatisfied with the religious sects I had known. I had attended many different churches and was at the time a church-member. Added to these circumstances, the presence in my consciousness of envy, jealousy, and hate made me indeed a miserable person and in need of help.

A few years ago a Christian Scientist came to live in our home and I asked for treatment, as I had been confined to my bed for a month and was getting discouraged. In four days I was able to arise, dress, and attend an entertainment without feeling any discomfort. The following day, Sunday, I went to the Christian Science church. This healing aroused my interest in Christian Science, and I continued to study it and to take treatment for the chronic ailments which still seemed real to me. It was a number of months before entire freedom from these difficulties was experienced, but I never once faltered, nor was tempted to turn back.

Great indeed is my rejoicing that I was thus led, for in addition to the physical healing I was awakened from a false

Digitized by Google

sense of life and happiness to a desire for spiritual growth. Companions of a worldly thought, and the ceaseless desire for gaiety and amusement, gradually left me as some understanding of true happiness and companionship was gained. In proportion to my receptivity to divine Love, the belief in envy, jealousy, and hatred has been cast out. I am daily learning to demonstrate more of the presence and power of God in all my activities. All foods are now eaten without fear of suffering, though like the one mentioned in Science and Health (p. 221), I no longer crave "the fleshpots of Egypt."

I am deeply grateful to Mrs. Eddy, the one who was pure enough to give this truth to our age, and to those who have helped me to gain an understanding of it; also for the Christian Science periodicals, which have ever proved great aids in taking the daily steps.

MARION BALCOM SMITH, Buffalo, N. Y.

✧

[Translated from the German]

I am most deeply grateful for the benefits received through Christian Science. A short time ago I had a beautiful proof of God's omnipotence. I awoke one morning with severe headache. I paid no attention to the trouble but quietly attended to my occupations, trying to entertain good thoughts, right thoughts only. However, the pain increased, and fever set in with attendant inability to swallow anything. My mother and I tried to overcome the error ourselves at first, but as I grew more and more miserable, we finally asked a Christian Science practitioner for help. For twelve days I seemed unable to take nourishment and could hardly talk, and there were symptoms of an abscess in the throat.

Treatment was taken up lovingly, while for my part I tried to realize the nothingness of the inharmonious condition and to affirm the truth to the best of my ability. I was filled with joy when soon afterward the trouble left me. It was completely destroyed, and I did not suffer from the slightest after effects such as weakness, but on the third day attended to my duties. Besides this healing I have had many other proofs of the power of divine Love. For these as well as for the loving guidance received at the Sunday school I am sincerely grateful, and my desire is to show my deep appreciation by applying in a practical way the things which thus far I have learned in Christian Science.

GERTRUD REINHARD, Berlin-Friedenau, Germany.

✧

Words cannot express my gratitude for the many blessings I have received in Christian Science. I came out to this warm and beautiful country (California) thinking that change of climate would relieve me of inflammatory rheumatism of some five or six years' standing. After living in the West for some time, I was much surprised to discover that change of climate did not benefit me in the least. Christian Science was then taken up with a willing heart. A practitioner was consulted and a week's treatment was given, but the trouble was overcome in less than that time. I have also been healed of hemorrhage, catarrh, and many other ailments. Christian Science has given me a knowledge of how to meet daily problems at home and in the business world.

My wonderful healing has been the means of bringing other members of my family into this light of Truth, with many good results. I am truly grateful.

SELMA CAROLYN BLOOM, Los Angeles, Cal.

✧ ✧ ✧

The heart which abandons itself to the Supreme Mind finds itself related to all its works, and will travel a royal road to particular knowledges and powers.—EMERSON.

From Our Exchanges

[Rev. F. Lewis Donaldson in *The Guardian*]

Man finds his true life in fellowship, and that this great principle of salvation must find its outward expression in earth, though its perfect fulfilment may not, perhaps can not, be achieved until the coming of the new heaven and the new earth in the world which is eternal.

Now it is that great principle of fellowship (by which alone the city of God can be realized) which our civilization has grievously ignored and has cruelly outraged. We have largely lost the idea of the brotherhood of man, and have been near to wrecking our ecclesiastical and our national life upon the rocks of aggressive selfishness. In the sphere of religion we have developed a crude individualism which concentrated upon the idea of individual salvation apart from Christ's body, the church, and we have imagined a salvation (which could never, in fact, exist) through a private and peculiar appropriation of the merits of our Saviour. It is doubtful whether it will ever be possible to estimate the harm which has resulted from our apostasy in religion from the teaching of Jesus Christ and his apostles, upon the unity and fellowship of mankind. In the church we have broken up that unity by our parties and sects, and the results are now before us in the impotence of the church throughout Europe before the madness of the nations.

[*The Congregationalist and Christian World*]

The "Spirit of life" in Jesus discovers the evil consequences on the health of abnormal mental conditions. These conditions betray themselves in jealousies, envyings, strife, anger, and the whole brood of ill tempers that poison the blood. Worry in particular is most frequently mentioned in the New Testament as to be avoided. The things which cause it are given in detail, one by one. Hardly an experience of mental unrest escapes mention in the Scriptures; and it is shown that all these experiences have ill effects on the physical condition.

What specific remedies does the church propose? It is admitted that they need to be skilfully applied in specific cases. "Are all prophets?" "Do all have gifts of healing?" The foremost remedies are the fruits of the Spirit—the self-imposed experiences of the life that seeks likeness to Christ. They are love, joy, peace, long-suffering, kindness, goodness, faithfulness, modesty, self-control. The voluntary exercise of these experiences tends to become habitual and involuntary, said the apostle.

[*The Universalist Leader*]

No one can doubt that the frightfulness of a world war tends to make people serious, and forces them to try to apply their religion to actual conditions. And when tried, a great deal of religion has been found wanting; it has not measured up to the need. We have been pleased to say that the war is primarily due, not to the failure of Christianity, but to the fact that so-called civilization tried to get along without Christianity and failed.

Civilization had all the letter and forms of Christianity, but lacked the real spirit; it missed the real thing. Fine church buildings, elaborate services, exquisite music, and masterly preaching, and even belief in a most perfect system of theology, were of no use apart from their connection with the actual, practical life of men. The dominant religious faiths and customs did not prevent the war, and when the war was on with its awful carnage, and soldiers were dead, and soldiers were wounded, and homes were destroyed or

Digitized by Google

blighted, the dominant religious faiths fell short. And yet men turned to religion, as they always have done and always will do, being sure that somewhere in some kind of religion there is that which will satisfy.

[Rev. W. H. Carnegie, M.A., in *The Church Times*]

It is only by loyal, God-fearing conduct that man can gain entrance into the kingdom and maintain his place in its ordered system. No endowment or activity, intellectual or spiritual, which does not minister to conduct and express itself in conduct and in character, the outcome and register of conduct, is of any avail in this respect. It is not by what we think or feel that we shall stand or fall, but by what we do. Right feeling and right thinking are means and valuable means to a higher end; but only a means. If we treat them as ends in themselves, we miss the true meaning of life and can never hope to attain its full fruition.

[*The Christian Intelligencer*]

The victorious spirit and triumphant power are only for the man who meets and overcomes hardship. Sinews toughen and muscles harden only by resistance. And principles of moral life become firm and fast only to the man who has grit enough to overcome the natural inertia of his life, to go out and grapple with temptation, and to grip the tools of work that duty puts into his hand with the determination to hold them and guide them until the day ends. And religion will never be the great, joyous, strong, triumphant life it ought to be to a man, until he makes it cost him something in effort, and in time, and in money.

[Robert Freeman in *The Continent*]

Whatever we may spend on so-called schemes of preparedness, we are under obligation to see to it that we, a Christian people, make preparation for a time beyond that for which guns and forts prepare; to see to it that whatever else be going on in our land, the fostering of the spirit of Christ shall not be neglected. That spirit is fostered by intercourse with those who have it, and by diligent prayer on the part of those who realize its need.

[*The Christian Work*]

The real salt of the earth are the men and women of God, who care more for labor than for honor, more for doing good to others than for high place or name, more for the inner peace which unstinted service and self-sacrifice brings, than for the outward decorations which are the rewards of self-assertion. Such there have been in every generation of the Christian centuries; such there are today.

[The Bishop of Winchester in *The Record*]

The world is challenged by this awful catastrophe [the war] to decide and declare by what principles it will live; to discover what forces it can rally against all too visible bulks and masses of material force and corporate selfishness. It has been fatally but gloriously plain that principles matter; that civilization cannot move merely by its own impetus or stand by its own stability.

[*The Christian Register*]

Our pure enjoyment of the gift which a friend has bestowed on us is, in a silent, subtle way, an expression of our gratitude to him. Similarly, the enjoyment of life's blessings may be, in those who are pure in heart, an unspoken prayer of gratitude to God, the giver of every good and perfect gift.

[Rev. H. D. A. Major, B.D., in *The Christian Commonwealth*]

Truth is many sided, and how to live rightly is a very intricate matter which can only be accomplished satisfactorily by those who, by trying to live rightly, call in a living experience to correct the speculations of the theorist.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00, six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston Mass.

✧

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

✧

From the Publishing Society

"Christian Science: Its Discovery and Development," a lecture by William D. McCrackan, M.A., C.S.B., has been translated into Norwegian (Kristelig Videnskap: Dens Opdagelse og Utvikling), and is published with the English version opposite the translation.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each, 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

✧

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken at less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

✧

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under those titles in this price list.*

Items of Interest

A method for using waste hemlock tan-bark partially to replace expensive rag stock in the manufacture of felt roofing has been developed at the Forest Products Laboratory at Madison, Wis., and is now being used commercially by cooperating mills. In these mills waste bark is replacing from 20 to 30 per cent of the rags, and the quality of the finished product is equal to that manufactured solely from rags. According to the census of 1909, over 698,000 tons of hemlock bark were produced each year in the United States. After the tannin is extracted this bark is used for fuel purposes, for which it is said to have a value of 60 cents a ton. The roofing mills of the United States have a total estimated annual production of 237,000 tons of finished roofing of all kinds. In addition to the use of the bark for roofing, papers made at the laboratory on the basis of 80 per cent of waste tan-bark have been successfully printed on a commercial twelve color wall paper printing machine, and give promise of being entirely satisfactory. Other paper of the same make-up has been made into fiber conduits by a commercial manufacturer. Other possible uses of waste bark which suggest themselves, say the forest service paper experts, are to use the bark mixed with ground wood for the production of wall board, or with sulphite screenings in the manufacture of car liners; and indications are that it may be used for sheathing paper, carpet liners, bottle wrappers, deadening felt, and the like.

The Federal Farm Loan Board has made a tour through twenty-nine of the northern and central states seeking information for its guidance in dividing the country into twelve farm loan districts and designating the sites of the twelve farm loan banks authorized under the new rural credits law. A similar trip will be taken soon through other states in the South and Southwest. It is expected that the plan of putting the banks into operation before Feb. 1, 1917, will be carried out. "In several states," according to a statement of the board, "it was called to their attention that joint land stock banks were being organized by questionable means by stock sales or promoters. Farmers are advised that there is no necessity for subscribing to the stock of any private corporation for the purpose of securing such a loan. No joint stock land banks can be organized under the Federal act except with the approval of the Federal Farm Loan Board."

The Kansas Council of Women has completed its legislative program and is now at work drafting the bills it hopes to have enacted into law by the legislature to be chosen Nov. 7. The Council of Women is made up of delegates representing the Federation, Good Citizenship League, and the district organizations of clubs. The program proposes a detention home for women of mature age sentenced to the state penitentiary; an extension of the powers of the industrial welfare commission to regulate the hours of labor and the wages of women workers; amendments to the mothers' pension law to make it compulsory for every county and extending its scope; a contest against the repeal of the motion picture censorship.

Elaborate plans to prevent the diversion into improper channels of any part of the $75,000,000 which the Federal Government is to spend in cooperation with states on good roads within the next five years have been made by the director of the office of public roads and rural engineering which will supervise the work. The Government will spend its money only in places where the traffic demand is the heaviest and not where politicians or others desire them. When the plans of a state for road building, accompanied by a request for Federal aid are received, they will be fully investigated by Government agents, and must be approved in detail before Government aid will be extended.

Multiple pouring of steel ingots has been successfully accomplished for the first time in the history of the industry in the United States, so far as is known, at the plant of the Brier Hill Steel Company at Youngstown, Ohio. By the new method more time is devoted to the pouring of each ingot than is possible by following the old process without increasing the time required to pour a given quantity of steel, and a much superior quality of material is said to be produced. Shrinkage cracks are largely eliminated. Four ingots are poured at a time, thereby allowing each a cooling period four times as long as under the one at a time pouring method.

The total provision for irrigation purposes in Siam during the current year amounts to $1,291,814. This is an initial appropriation for the "Prasak" irrigation scheme, for the estimated cost of which $4,403,000 has been sanctioned, while a more extensive system of irrigation, involving an outlay within six years of about nine million dollars, still remains under consideration.

The postal authorities of New Zealand in reply to an inquiry stated that 1823 pieces of mail carrying short postage were received from the United States, mostly from manufacturers and exporters, within a period of four weeks, and that this is an ordinary occurrence. More short-paid postage mail arrived from the United States than from all the balance of the world. Other foreign countries make similar reports.

The Congress of Bolivia authorized in 1915 the construction of the La Paz-Yungas electric railway, which will run through the fertile district of Yungas in the department of La Paz, and it is generally believed this will be the best paying line in Bolivia when finished. An expenditure of $2,400,000 was authorized.

On Aug. 22 the national legislature of Peru passed a law authorizing the wardens of the national penitentiaries of Peru to employ long term prisoners at labor outside the prison enclosures. The law specifies that the work to be done by the prisoners must be on public works of the state or on work connected with institutions of a public character.

The cultivation of lemons has been one of the important industries of Sicily from time immemorial. In 1898 it was estimated that there were 6,000,000 lemon trees in the island. There are probably twice that number now. Statistics for June, 1916, show that there were 88,797 acres planted in lemons and oranges.

The greatest Diesel engine ever built in the United States, weighing 380,000 pounds and generating 1000 horse-power, has just been completed in a shop at Auburn, N. Y., for a Portland cement company of Iola, Kan. This engine of internal combustion type is 42 feet long, 19 feet high, and 14 feet wide. The fly wheel alone weighs 25 tons and is 14 feet in diameter.

Zinc is the leading metal produced in French Indo-China. During the past five years the exportation of zinc ore from Haiphong has averaged nearly twenty-seven thousand tons a year. The customs value of this ore during this period has averaged nearly six hundred and forty thousand dollars a year.

The vessels of the Lloyd-Brazileiro Steamship Line during 1915 carried to the United States 10,928,001 pounds of rubber, 1,447,049 sacks of coffee, 12,231 sacks of cocoa, 492,730 pounds of hides and skins, 411,859 pounds of Brazil nuts, and 1,105,491 pounds of meat.

The briefs filed in the United States Supreme Court by the Reading Railroad and the Central Railroad of New Jersey in the Government's antitrust suit, denied that they monopolize the production or transportation of anthracite in the Pennsylvania fields.

Philadelphia, Pa., is spending $114,000,000 in city improvements. The plans embrace completion of the Parkway, reclamation and development of a great portion of South Philadelphia, and extension of rapid transit facilities.

The Supreme Court of the United States, which convened Oct. 9, had 701 cases on its docket. A large number of cases were put to the front on account of their urgency.

Improvements that will cost from $5,000,000 to $10,000,000 will be made by the Baltimore & Ohio Railroad at its passenger and freight terminals in Cleveland, Ohio.

Declared exports of crude oil and petroleum products from the Tampico district of Mexico to the United States in August amounted to 2,115,082 barrels.

The total quantity of grapes exported from the port of Almeria, Spain, in 1915, was 1,311,204 barrels of from forty-five to fifty pounds net.

Vassar College has been successful in raising its million dollar fund, on which its alumnae and students have been working for a year.

The final estimate by the Government of India of the jute crop, places the yield for the current season at 8,300,000 bales.

It is estimated that the yearly production of honey and wax in Germany has a value of $5,000,000 to $7,000,000.

One ton of coniferous wood waste will produce from fifteen to twenty-five gallons of 90-proof alcohol.

Principle as Understood in Christian Science

ALFRED FARLOW

THE Master of Christianity declared, "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." The permanent, substantial, and harmonious state of existence for which all mankind is striving is vouchsafed by a correct understanding of divine cause and effect. Jesus declared that God is Spirit, and again, "It is the spirit that quickeneth; the flesh profiteth nothing." To know God as Spirit and to know that Spirit quickeneth, giveth life, that Spirit alone is responsible for the existence of all reality, and that the flesh, or matter, does not contribute in the smallest degree to the existence of anything, is the implied teaching of the above text. Hence Mrs. Eddy's use of the word Principle in her definition of God.

Whatever objections theologians may have made regarding the application of this term to Deity is doubtless due to a preconceived belief regarding the individuality of God as a corporeal being and not to any Scriptural definition of the creator. The word principle is from the Latin *principium*, which signifies beginning, foundation, source or origin, fundamental substance. Mrs. Eddy has not attempted to give the fulness of her understanding of God in the use of any one term, but has employed a group of synonymous terms each of which seems to describe some particular characteristic of Deity which is not generally recognized in the use of the other terms, and thus she has given not only a definite but a broad and comprehensive definition.

The term Principle as used in Christian Science names God as the beginning, the foundation, the origin, the one and only cause. This accords with the Bible, which teaches that God is "Alpha and Omega," the beginning and the end of all real existence. Nothing has a beginning except that which God creates and nothing is added to that which God creates. God has not originated something to be afterward finished by some other power. He is the only author and His creation is finished in its beginning. The understanding of God as the only cause, coupled with a correct knowledge as to the nature and essence of this cause, points to an inevitable conclusion in regard to the nature of creation which is wholly apart from sense-testimony.

The acceptance of the Scriptural definition that God is Spirit, Mind, Truth, Life, Love, constitutes an acceptance of the Christian Science proposition that the only creation is that of Spirit, Mind, Truth. When called upon to give a definition of creation we cannot judge from "appearance," that is, from material observation or physical sense-testimony. "Righteous judgment" answers the question by defining the nature of the creator, while consistently maintaining that the creation is His manifestation or reflection. Because God, Mind, is the Principle of creation, our knowledge of what He creates must begin with Him. Our answer to every question concerning the Science of being must begin with an understanding of God, since He is responsible for all creation.

If one should speak of a given man as a carpenter, immediately there would loom up in our thought visions of houses in course of construction, workmen, and so on, since we know that a carpenter builds houses. So an understanding of the nature of God should definitely and unmistakably announce to one's consciousness the nature of creation. Since God is the Principle or cause of the universe, a true understanding of Him is the foundation of the definition of creation. We are taught that God is Mind, infinite, absolutely pure, true, good, and in order to distinguish the term Mind as ascribed to Deity we capitalize the word. What does Mind do? What does Mind create? The vocation of Mind is to think, and the product of Mind is thought. Mind evolves its thought as idea. If it be accepted that the one and only cause is Mind, it will also be accepted that the thought or idea of Mind is the only creation.

God is the Principle of every scientific declaration, the Principle of all real logic. No correct answer can be made which does not involve in its premise a correct understanding of the one great cause. For example, the question, What constitutes the sustenance of man, by what means does he exist? is answered on the basis that divine Principle is the only Life, as taught in the Scriptural text, "In him we live, and move, and have our being." The question, Can we find peace and safety in the midst of adversity? is answered by considering the fact that divine Principle is the only power, as indicated in the text, "Thou preparest a table before me in the presence of mine enemies," and also, "Thou wilt keep him in perfect peace, whose mind is stayed on thee." The question, Is it possible for mortals to find immunity from contagious disease? is answered in the Scriptural text, "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty," and no evil shall befall him, "neither shall any plague come nigh" his dwelling.

The question, Are sin, sickness, and death real? is answered in the Scriptural teaching that by means of the divine "Word" was all made "that was made." God, infinite good, "saw" all "that he had made, and, behold, it was very good." Sin, sickness, and death are not a part of the very good things which God created; and since there is no other creator beside Him, they never were made; and since they never commenced to exist, they do not yet exist. In other words, they are not real, but only seem real to that quality of consciousness which is based upon fleshly testimony, of which the Master said it "profiteth nothing." If our reasoning is consistent with a correct understanding of God, the Principle of all that exists, it inevitably leads us to the conclusion that all which is opposed to good, all which is unlike God, is uncreated, unfounded; hence non-existent.

Since God is the Principle of all creation, He is also the Principle of its harmonious perpetuation and thus the Principle of health. This leads us to the question, How do we apply the understanding of this Principle in healing the sick? In Science and Health (p. 476) Mrs. Eddy declares: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view

Copyright, 1916, by The Christian Science Publishing Society.

Digitized by Google

of man healed the sick." Here we note that God is the Principle of Christian Science healing. Its method, a process of scientific reasoning, involves first, an understanding of God as Spirit, Mind, Truth, Love, as its major premise; second, the understanding that man is the image and likeness of Mind, in keeping with the uncontroverted truism that like begets like, as its minor premise; third, the conclusion that a sinning, sick mortal is an illusion. The foregoing statement involves the whole man, and would, when clearly realized and declared, make the patient "every whit whole."

All Bible students, and perhaps we might say all religionists,—all who believe in a Supreme Being, a supreme cause,—will probably agree with us that the creator or cause is Spirit, Mind. Having reached this point of agreement regarding the one and only cause, an agreement regarding all phenomena is guaranteed. Thus we note that, consistent with the proposition that God is the Principle of all which exists, a correct understanding of Him constitutes the foundation of all true knowledge, or Science. Since there is but one cause and that cause is God, good, there is but one effect or creation; there is nothing to know except God and His manifestation, and there is no consistent conclusion concerning aught else except that which relegates it to the realm of the unreal.

Spiritual Baptism

BERTHA V. ZEREGA

When Jesus said to Nicodemus, "Except a man be born of water and of the Spirit, he cannot enter into the kingdom of God," he was referring to the necessary stages of conversion or regeneration which typify the salvation of mankind from worldliness, from the illusions of life and sensation in matter, to godliness, the spiritual attainment of conscious harmony, immortality, health, and love, the reign of heaven within us. In his epistle to Titus, Paul makes an interesting statement in regard to our being saved: "Not by works of righteousness which we have done, but . . . by the washing of regeneration [literally rendered, "through baptism being born again"], and renewing of the Holy Ghost." In other words, we are not saved by the egotistical method of counting our works, or taking to ourselves undue credit for results, since, as the apostle tells us elsewhere, we may bestow all our "goods to feed the poor," and give our bodies to be burned, and yet if love be lacking we shall have accomplished nothing for ourselves, our neighbor, or for God.

Purification which results from the cleansing process of repentance and wholesome self-knowledge, symbolized in the water baptism of John, precedes in individual experience the baptism of Spirit, the understanding of man's relation to God, revealed in the teachings of Jesus and explained anew in the inspired interpretation of the Scriptures which Mrs. Eddy has given to the world in Christian Science. The baptism of the Holy Ghost, or "the Spirit of truth," understood in Christian Science, becomes indeed the Comforter, because it is the scientific way out of all evil; individual consciousness is purged of corruption, the belief in fleshly origin and mortal selfhood, and puts on incorruption, the comprehension of man's preexistence as God's spiritual, incorporeal idea, created, sustained, and immortalized by Him. Baptized in the consuming fire of self-immolation, affliction, and consecration to Principle, carnal, selfish impulses are burned away, desires and affections are refined, and from "the ashes of dissolving self" (Miscellaneous Writings, p. 1) is resurrected "a new creature," born of Spirit, having "his Father's name" written in his forehead, and endowed with spiritual power to accomplish in some degree the works which Jesus did, and which testify to the ever-presence of divine Love among men.

Perhaps no incident in the life of the Master was more truly expressive of "the beauty of holiness"—humility, wisdom, and love—than was the simple act of his coming to John for baptism,—he who was being prepared to baptize "with the Holy Ghost, and with fire," and to whom John said, "I have need to be baptized of thee, and comest thou to me?" Jesus' conformity with this rite not only exemplified his cooperation with a system which the time and material condition of thought demanded, but it also signified his recognition of the great moral import which prompted the ceremony, showing his willingness to partake of whatever stood for spiritual progress in human experience; for though John's baptism was "with water," it nevertheless was symbolic of an inward purification born of genuine repentance, self-abnegation, and a changed, higher life-purpose.

To the shallow, hypocritical Sadducees and Pharisees who came to be saved by the mere act of immersion, rather than from a sincere desire to be cleansed from sin, John said: "O generation of vipers, who hath warned you to flee from the wrath to come? Bring forth therefore fruits meet for repentance." John specifically demanded a change in consciousness, that the "axe" of self-examination might be "laid unto the root of the trees" of false knowledge. This analytical moral requirement was the forerunner of that spiritual demand for individual mental introspection and purgation which Jesus in his ministry among men was to carry to a far more searching extent, that those who heard him might learn how to possess everlasting life, and so become one with the Father, even as he and the Father were one.

Jesus' submission to John's ceremony implied his knowledge that this water baptism represented the initial step toward individual liberation from material and creedal religious bondage, and indicated his appreciation of the inseparable bond existing thus in the inherent correlation ordained for their respective work. "Then went out to him [John] Jerusalem, and all Judæa, and all the region round about Jordan;" and with these multitudes who craved a more inspiring and consoling religion than the stereotyped dogma in which they had been reared, came Jesus the Christ, humbly, wisely, and lovingly to participate in the ceremony which symbolized the spiritual freedom of the race, and which prepared the way for their further regeneration when, baptized "with the Holy Ghost, and with fire," men should be "born again,"—awakened to the realization of their divine sonship, —and should find their lives "hid with Christ in God."

While Jesus manifested a complete willingness to cooperate with this material form of baptism, since it prefigured a higher and more spiritual type of religious worship, he evinced a thorough lack of sympathy with and disapproval of the doctrinal systems of the day, when such methods interfered with individual rights, hampered spiritual growth, and increased faith in human restrictions or laws. He denounced the narrow religious customs in regard to the Sabbath, establishing the higher statute that "it is lawful to do well on the sabbath days." When the scribes and Pharisees censured his disciples for neglecting to wash their hands before eating, an act which caused them to transgress an ancient Jewish rite, Jesus rebuked the hypocrisy of such rigid insistence on mere tradition, saying that by so doing they made "of none effect" the commandment of God. He assured these materialists that men were defiled by "the things which come out" of them, but by nothing so external and superficial as the eating of bread with "unwashen hands." To his questioning disciples he explained that "from within, out of the heart of men, proceed evil thoughts," which defile because of the unclean purposes and poisonous intents of mortal mind.

After the illuminating experience of his spiritual rebirth,

Digitized by Google

Paul fearlessly denounced the spurious boast of the carnal mind that ecclesiastical ceremonies could be agencies toward purity and salvation, or that these material rites were endowed with power to hold men in bondage when the beliefs which had originated these forms had been renounced. He said, "He is not a Jew, which is one outwardly; neither is that circumcision, which is outward in the flesh: but he is a Jew, which is one inwardly; and circumcision is that of the heart, in the spirit, and not in the letter." He discerned that being purely mental experiences, the only baptism was "the washing of regeneration," the only circumcision was "in putting off the body of the sins of the flesh by the circumcision of Christ." Spiritually perceiving that through the transforming power of the truth all men are united in one universal brotherhood,—the bonds of Christ,—he triumphantly declared, "By one Spirit are we all baptized into one body, whether we be Jews or Gentiles, whether we be bond or free; and have been all made to drink into one Spirit."

Rejoice

RALPH W. SMITH

IN the thirty-seventh chapter of the first book of the Bible is the beginning of a narrative which continues to the end of Genesis. Underneath this narrative there lies a lesson which shows clearly with what loving and tender watchfulness our heavenly Father protects us and directs our footsteps, lest any child should dash his foot "against a stone."

The central figure in this story is a youth whose name was Joseph, and the story relates how he was sold into captivity to the Egyptians by brothers of his own family, because of their jealousy. The brothers first conspired to kill him, but instead sold him for twenty pieces of silver. The youth's environment in the new land and subsequent happenings are told, and if we imagine ourselves personally subjected to similar experiences, we can realize to what a great degree this boy's faith and trust in the wisdom and justice of the Supreme Ruler were tried. Only in rare cases are we tested to such an extent, yet a great many people today question the justice of our Father for far less reason than Joseph might have had.

In Mrs. Eddy's definition of the name "Joseph" in the Glossary of "Science and Health with Key to the Scriptures" (p. 589), we find the words "pure affection blessing its enemies." When Joseph's brethren came to ask help of him during famine time, did he fall into the common error of many of us today? Did he allow personality to influence his judgment? No! Doubtless he recognized man as God's likeness, and as a result his actions and reply were born of Truth and he passed correct judgment on the events of his life from a spiritual standpoint. What was his reply to the fears of his guilty brethren? He said: "Now therefore be not grieved, nor angry with yourselves, that ye sold me hither: for God did send me before you to preserve life . . . and to save your lives by a great deliverance."

Could any other consciousness than that which realizes the kingdom of God on earth have framed such a reply? Truth gave Joseph eyes to see events in their true relation, and to see that "all things work together for good to them that love God." There was no thought of revenge, not a word of rebuke for the deed. Joseph was even concerned about their mental state and said to them, "Be not grieved, nor angry with yourselves." This was natural to him because he knew that God rules both heaven and earth. So after many years Joseph found that infinite Mind, infinite goodness, infinite wisdom, had directed his footsteps, and that all the seeming tribulations were not evils, but only seemed so to mortal mind. Mortal mind is never able to judge of things in the true light, and the sooner we learn to look only to divine Mind the better for us.

This manifestation of God's omnipresence occurred seventeen centuries before Christ Jesus came to show all mankind how to avail themselves of God's power. This ideal man, Jesus, showed mankind how to make the final victory over all evil, the victory over death. His life, teachings, and works clearly proved the power of Truth over error. His students understood to a greater or less extent the true relation of man to God and were able to do the works which he did and commanded them to do likewise.

One of Jesus' greatest followers in that era was a man who had never seen Jesus, but was converted because he found that good is all powerful, and that God is no respecter of persons in His bestowal of spiritual power. Twenty-seven years after the ascension of the great Teacher, Paul expressed in a few simple words an idea which would greatly benefit mankind, if they only knew how true it was. It undoubtedly expressed the conclusion which Joseph reached when he so clearly saw the manifestation of God's power and His love for His children. Paul said in his epistle to the Romans: "We glory in tribulations also: knowing that tribulation worketh patience; and patience, experience; and experience, hope: and hope maketh not ashamed; because the love of God is shed abroad in our hearts by the Holy Ghost which is given unto us."

Think what it means to realize this all the time; to know it before tribulations assail us, so that if they do come, they have no power to make us unhappy. Tribulations will then cause us to rejoice, because we know that the outcome will be a clearer sense of Truth's power. To know this truth means that we shall be at peace always and feel the omnipresence of our all-loving Father-Mother God.

On page 276 of Science and Health Mrs. Eddy says: "The realization that all inharmony is unreal brings objects and thoughts into human view in their true light, and presents them as beautiful and immortal. Harmony in man is as real and immortal as in music." With the consciousness of this great truth, we should be able to meet the next so-called tribulation with a heart full of love and rejoicing, and in that manner we can never for an instant lose sight of our divine inheritance.

Stirring

LENA PROBST

ONE day, while studying our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, my eyes fell on the following passage (p. 540): "The muddy riverbed must be stirred in order to purify the stream." I was then led to ponder somewhat the word "stirred." In order to comprehend in a practical manner its meaning, I began to apply it to the home, and soon discovered many instances where the thrifty housewife finds it necessary to produce a stir before obtaining the harmonious results which she beholds in her mental horizon. Every housewife knows that the purified home has first undergone a stir, and she also realizes that during the process her surroundings may not present the most inviting aspect; but with her gaze resting beyond the evidence of the senses, she continues undisturbed her work of eliminating all that would tend to mar the orderliness, beauty, and harmony of the home. She also realizes that in order successfully to carry on this cleansing work the first requisite is light.

Comparing the above with the operation of Christian Sci-

Digitized by Google

ence, or the Christ, Truth, we find a striking similarity, for here too the first requisite is light. While walking in the darkness of materiality no special stir is thought necessary, but when the light of Truth dawns upon the benighted sense it shines upon a consciousness where years of wrong thinking have produced a heavy settling, and since "Christian Science goes to the bottom of mental action" (Science and Health, p. 104), it will be seen that a stir is inevitable before the settlings can be removed. While this cleansing upheaval is taking place, the neophyte in this new world of thought, who naturally is unfamiliar with its ways and methods, may feel that he has cause for discouragement; but the apostle Paul, through his clear apprehension of how the "outward man" must perish in order to have the "inward man," the man made after God's image and likeness, appear, tells us that "our light affliction, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory."

To illustrate in a measure this divine operation of the truth, I wish to relate a little incident of my childhood which has often proven helpful to me. Close by our home there was a small pool of water which was supplied by a brooklet, and as there was frequent use for the water, the pool was maintained; but in order to do so it was found necessary occasionally to remove the settlings. I remember how interesting it was to watch the resultant disturbed and muddy condition become clearer and clearer through the operation of the little stream from above. As this clear, pure water continued to flow into the pool, it simply crowded out all that was unlike itself, and this without being petitioned to do something, or outlining its task and how to perform it; in other words, it was left free to perform its task simply by following its natural course. However, some little time would usually be consumed in completing this work, as the tiny particles composing the disturbing elements in the pool seemed to offer resistance in that they would be whirled over and over before they would finally be cast out and thus destroyed.

If in our journey from sense to Soul our mental home betimes takes on the appearance of the disturbed pool, might it not be well to ponder the lesson of the little brooklet; to remember how the little stream purified the entire pool; to see that we are truly willing to open the doors of our mental home, let this ever-flowing stream from above enter and take possession, remove the sediment, and establish in place thereof the pure consciousness of Truth. In proportion as this is done the transformation that took place in the little pool will surely take place in each individual consciousness, until there remains nothing that is unlike God, good.

✧

Who Is Ready?

WILLIAM C. KAUFMAN

In Christian Science, God, divine Life, Truth, and Love, is understood as the basis of being, and generic man, including the universe, is recognized as the full reflection, expression, or manifestation of God. Individual man may be likened to the spiritual consciousness which realizes Truth. This glorious explanation of Truth is divine Science, the Comforter promised by the Master. The sincere seeker for truth finds Truth, but before mortals can accept the Science of being they must be ready for the new birth. Jesus revealed this to Nicodemus by saying, "Ye must be born again;" and holding to this idea we may say that divine Life must become our only existence, divine Truth our only utterance, divine Love our only love, divine Spirit our only incentive or spirit, and divine Mind our only consciousness. Nicodemus said, "How can these things be?" Mortal belief repeats this question today, and adds that we must suffer it to be so now, until the world is prepared for Christian Science.

The material world is the material, fleshly consciousness expressed. Then the question arises, Who is ready to accept divine Science? Every mortal is in a measure ready for Christian Science when he stops medicining one mortal belief for another; when material means fail to cure the sick body; when religious systems fail to comfort such as mourn, and when human love fails to satisfy. Then Christ, Truth, comes to human consciousness through divine Science, and we are taken to the mount of transfiguration, where we behold man as God's idea, incorporeal and spiritual. Here we see God face to face, and live.

Through the daily study, not the mere reading, of the Bible and of Mrs. Eddy's writings, we are enabled to dwell mentally in heaven and walk on earth, until through spiritual understanding this material thought-world fades from our consciousness like a dream.

✧

Mountain Lessons

HELEN L. YOUNG

As the traveler's eyes are lifted up to the great continental divide, he sees towering in all its grandeur that ridge of the Rocky Mountains on whose western slope the rain that falls runs to the quiet Pacific, while that which waters the eastern slope flows into the storm-tossed Atlantic. This dividing line is a constant reminder of the definition of understanding as given on page 505 in our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. It reads, "Understanding is the line of demarcation between the real and unreal." As we gain the true understanding of God and man, we realize that our thoughts either help to swell the great ocean of mortal belief with its elements of passion, fear, pain, sin, sickness, and death, or they find their resting-place in infinite Love, with its joy, courage, wisdom, and calm strength. What a blessing it is to know that there is a divine Principle which teaches us to think righteously!

One peak of this lofty mountain divide is said to be the richest in the whole world, because of the stupendous mineral wealth taken from its depths. The ore was always there, but until recent times men had not learned how to find and utilize this wealth. So the Bible, with its treasures of wisdom and love, was always here, but until Mrs. Eddy gave us the "Key to the Scriptures" which opened them up for practical use, we did not know how to make our own the precious nuggets of comfort and healing. There is no royal road to learning, and as the miner digs and delves for the ore in the mountain, so we must perseveringly strive to gain the affluence of Spirit if we would be "rich toward God," to quote the Master's words.

Our revered Leader says, "Spiritually interpreted, rocks and mountains stand for solid and grand ideas" (Science and Health, p. 511). Not only do mountains stand for repositories of treasure, but they also furnish marvelous lessons of uplifted thought. Moses rejoices in his song because God made man to "ride on the high places of the earth, that he might eat the increase of the fields." High spiritual altitudes bring clear discernment, and this always gives an increase of all good. The ascending thought, the exalted state, begins with humility and obedience. David lifted up his thought to the hills for help. The Christ-idea is the rock that casts its shadow on the traveler in a weary land, and understanding and strength take the place of sorrow and suffering. As we climb the path our Master trod, we learn how to rejoice at every step of the way. We rise through the understanding

Digitized by Google

of divine Truth which gave the Christ-idea the name of "Wonderful," and we cease to believe in matter, sin, disease, or death.

Jesus said, "I am the way," and it is a highway of holiness, or wholeness of mind and body, that comes to mankind through the understanding of the supremacy of Mind. It was the straight and narrow way which led our Wayshower right up into the kingdom of his Father. The Saviour of mankind often withdrew to the mountains to refresh his thought, and we who are slowly climbing the hill of divine Science have meekly to follow in his footsteps. The one whose thought is spiritualized walks forth, his feet "beautiful upon the mountains," because he brings "good tidings of great joy." The commandments and the Sermon on the Mount, with the Lord's Prayer, the beatitudes, and the golden rule, were given to men from mountain heights of spiritual vision.

As the real man and the true church are one in quality, and all go to make up the temple, it stands to reason that when one becomes a "lively" stone in this "spiritual house," his thought is elevated above mortal belief, and he rises to heights where the divine overcomes and replaces the human concept. In Isaiah's prophecy we read: "It shall come to pass in the last days, that the mountain of the Lord's house shall be established in the top of the mountains, and shall be exalted above the hills; and all nations shall flow unto it." This description of the true church of Christ shows us that it must express the comprehensive understanding of the Master, whose works were proofs of his limitless faith, and that eventually all its members must reach this God-consciousness. Paul says, in speaking of the Christ-idea, "When he ascended up on high, he led captivity captive, and gave gifts unto men."

[Written for the *Sentinel*]

Stilling of the Tempest

WARREN CHARLES KLEIN

BRIGHT blue sky and clear-blown day,
All our fear has gone away;
Sing on in thy cheering voice,
Bid thou all the world rejoice!

Do you hear the north winds shriek;
Do you heed the stanchions' creak;
Do you see the lightning's flash;
Do you note the thunder's crash?

These are but the mortal dream;
They are naught, though much they seem
To the unenlightened sense,
Knowing not omnipotence.

God is All, and All is good,
And His guardian angels brood
Close to you and close to me
When in seeming jeopardy.

Lift up now the downcast eye,
Realize Love's presence nigh;
Hear the voice so small and still,
Guiding us through every ill.

Bright blue sky and clear-blown day,
See, the tempest dies away!
Now the song divine is sung
In the universal tongue.

Selected Articles

[Editorial in *The Christian Science Monitor*]

The evolution of the intolerance of the human mind may be traced very easily in the history of religious and civil disability throughout the world. The pagan emperors of Rome decreed their own deification, and, when they were threatened by the advancing tide of Christianity, crystallized their dogmas in a famous phrase, "*Aut Christus, aut Diana.*" Those were the dog-days of the persecution of the primitive church. It was Diana or the amphitheater for every man who questioned the authority of Diana. When at last the Bishop of Rome took the place of the Pontifex Maximus and paganism found refuge in the northern forests, an orthodox hierarchy made it just as unpleasant for the heretic as ever the pagan priests had for the early Christians. It did not seem as if there were any place on the civilized globe where a man might think as he liked about religion. The great Protestant Reformation largely swept away the terrors of the torture chambers of the Inquisition, which had substituted for the candles of Nero the stake in the market-place. Their own past experiences, however, proved in no way a deterrent to the Protestants when they came into their own. The dissenter from their views received as scant consideration as they ever had received from the Roman Catholic hierarchy. It is true that the dissenter was not burned, but he was for a time tortured, and even when public opinion became too strong for the employment of the boot or the thumb-screw, he still found himself the victim of conventicle acts, and five mile acts, and test and corporation acts.

It was from out such conditions as these that the Puritan Pilgrims took ship for America. The Puritans themselves were men of just as dour convictions as the Scottish Covenanters, and the early history of the American colonies leaves little to be desired in the way of a strictness of religious discipline. One advantage, however, America emphatically possessed. It at any rate had no church "by law established." Consequently the American sects grew up beside each other in an equality unknown in other lands, and out of this equality there emerged the public school system on a basis undreamed of in other lands.

Between the public school system of the United States and the public school system of the United Kingdom there is today a great gulf fixed. The great public schools of the United Kingdom are private schools of the closest description. To have been educated in a "public" school in England is to have become a member of a corporation which has played a tremendous part in the life of the country. To find anything corresponding to the public school system of the United States you must turn in the United Kingdom to the county council schools, which have taken the place in later days of the old national schools. But between the public school in England and the county council school there flows a stream which has never yet been bridged. There the public schools exist under the shadow of the Church of England. Many of them are the descendants of the old monastic schools, which attained a new lease of existence when the monasteries were suppressed by Henry VIII. The county council schools are a growth of modern times, evolved from the old national schools, which also were largely church schools, but which have become free from sectarianism.

Now it must be clear to everybody that the freedom of human thought lies mainly in the freedom of education. If education is to be subjected to sectarian influence, the schools will turn out men and women who are sectaries first and citizens afterward. If on the other hand public education is

Digitized by Google

kept free from sectarianism, the schools will maintain their place in the vanguard of progress. Anything, therefore, which tends to bring the schools within the orbit of religious influence is an indirect blow at education, and therefore at civil freedom. The history of sectarianism is the greatest proof of this imaginable. In England the Church of Rome jealously guarded the school system in the early days and attached it to its religious houses. When the King, instead of the Pope, became head of the Anglican church, the schools were placed with the greatest care under the influence of the Anglican church. It has taken centuries to detach the school system, even to the extent already achieved, from any sectarian denomination, and even where this separation has been successfully brought about, certain religious influences have asserted all their energy to organize a sectarian school system under their individual ægis. The famous education bill in England, which followed the Liberal triumph of 1906, was not in the least, as many people seemed to imagine, a bill concerning education, but a bill devoted to the effort of separating county council schools from religious domination.

On the American side of the Atlantic this struggle has taken a somewhat different form. Whereas in England the effort has been to free the school from this domination, the effort in the United States has been to thrust the free school under sectarian domination. It is the existence of this effort which makes it necessary for those who value the freedom of the schools in the United States, to watch with the utmost jealousy every movement, no matter how apparently innocent, which may tend to frustrate the intention, if not the letter, of the Constitution by subjecting education to religious influences.

One, and perhaps superficially the most harmless, of these efforts is the use of the buildings of the schools for the lectures and services of religious bodies. It matters not in the least degree what the body concerned may be, the danger of precedent is precisely the same. And it follows with inexorable logic that if the school authorities consent to the use of the schools by one religious movement, they must agree to their use by all religious movements. On the face of it this may look like a desirable and equable consummation, but practice has a way of contradicting theory, and experience has shown that such an arrangement inevitably ends in sectarian disagreements and arouses passions which had better have been left dormant. Directly one religious body obtains the use of the schools, another religious body seems to feel a compulsion to manifest its energy by a similar use. Out of this there grows a certain rivalry, and as the authorities who permit the use of the schools in different localities are apt to regard the question from different points of view, there are bound to grow up discrepancies in the granting of the permission, which are in turn equally bound to lead to differences of opinion on a religious basis.

In such circumstances it would seem wiser that the religious question should not be permitted to intrude itself at all into the school question, and therefore that the use of the schools should not be permitted for any religious purposes. It has never yet been found possible by the various strata of the human mind to draw the line at exactly the same place, nor has it ever been demonstrated that the human mind ever does draw the line at exactly the right place. The use of the schools, therefore, for religious purposes which seem perfectly harmless, is almost sure to lead to the use of the schools for undesirable purposes. If a school, for instance, were let for a regular weekly religious service, all other religious bodies would find themselves barred from the use of the school upon that day, which would most probably be Sunday, and the school would not only tend to become connected in the popular mind with one particular denomination, but the fact of this tendency would be sure to spread dissatisfaction and religious animus in other directions.

Therefore the unwritten law which in the past barred the use of the schools for religious services or meetings of any sort, would seem as wise today, or even wiser, owing to the multiplication of sectarian dogmas.

[Judge Clifford P. Smith in *Musical Courier*, New York, N. Y.]

The fact that Christian Science is becoming known and accepted by intelligent persons, while it is still the object of disrespectful allusions by others who are not so well informed, was illustrated in a recent number of the *Musical Courier*. On two of its pages were portraits of well-known singers who are Christian Scientists, while on another page a contributor referred to "Christian Science or other cults and isms now running riot in our land."

A cult or an ism, when spoken of in this manner, is merely something which the speaker does not approve. To him the devotion of other people has become an offense, and he seizes an opportunity to publish his disapproval of it. Thus, the Christianity of the first century and the Reformation of the sixteenth were the cults and isms of those times; that is, to persons who vaguely disliked them.

In a survey of religious history, Christian Science may be called the Restoration,—the restoration of original Christianity with its spiritual power over evil, including disease; and it is now possible to say, as a matter of accomplished fact, that this teaching and practice has already exerted a more profound influence upon the world's religious thought than was ever produced before in the space of fifty years. This effect is due, however, not to Christian Science considered as distinct from original Christianity,—for no such separation can be made,—but to its identity with the Christianity of the gospels, as distinguished from the Christianity of the creeds. Such being the case,—and this can be ascertained by any man for himself,—Christian Science is not to be disposed of by disdainful comments, but is to be known by what it teaches and by what it contributes to the welfare of its adherents. On these points there are more than a few readers of the *Musical Courier* who can speak from experience.

[Ezra W. Palmer in *Lamar* (Col.) *News*]

Christian Scientists have no objections to intelligent discussion of Christian Science. They rightly object, however, when its teachings are misrepresented and made the subject of ridicule or malice. The teachings of Christian Science are now well known. The writings of Mrs. Eddy and the periodicals of the church are in practically every public library, so that the plea of ignorance for misrepresentation cannot be made.

If this evangelist thinks he can advance the sects he represents by misrepresenting the teachings of other denominations, he sadly mistakes the nature of Christianity. Such methods bear within themselves the seeds of their own destruction and finally react upon the persons guilty of them. "All they that take the sword shall perish with the sword," said Jesus. Invective and innuendo overreach themselves and fail to stop the onward march of truth. These weapons have not only failed to destroy the progress of Christian Science, but have on the contrary led many to investigate its teachings, and, as a result, to receive the benefits of health, happiness, and spiritual peace which accrue from its study.

Christian Science does not deny that sin exists in mortals. It recognizes that mortals sin, but it denies that God created sin or permitted it to exist. Sin is a false human belief—

Digitized by Google

nothing more—which a right knowledge of divine law annuls and forever destroys. God no more created sickness than He did sin. Sickness is the result of fear, worry, false mental pictures, and the belief that a man is a mortal, material, physical being, with beginning and end. Christian Science repudiates this false concept of man and demonstrates that man is spiritual, made in the image and likeness of God, and therefore is not subject to fear and sickness. Jesus healed the sick through the power of Mind and he commanded his followers to do likewise. Christian Scientists are proving that through the divine law of Love it is possible not only to prevent sickness but to destroy it when it has manifested itself on the body.

[Editorial in *The Centralia* (Wash.) *Chronicle*]

It is not a pleasant thing to make an apology, but we believe it is due to our readers to make one for our negligence in permitting the publication, in a recent issue, of certain portions of Doctor ——'s sermon, wherein he continued his attack on Christian Science. The fact that we were out of the city that day and did not have personal charge of the proofs and they were printed unobserved, is no excuse for us, nor do we relish the thought that this evangelist's publicity committee did not take our announcement in good faith that we had closed our columns to this acrimonious discussion out of which could come no possible good—and in all probability much evil—for the general advancement of the Christian cause. We seriously doubt the expediency of such religious discussions—they are not usually prompted by a broad Christian spirit which is the foundation of the fatherhood of God and the brotherhood of man.

Life is too short for us to quibble with destiny. If the tendency of the times is to commercialize religion it is contemptible, and to minimize other Christian efforts is nothing short of a return to the dark ages of fanaticism. Egotism and bigotry should find no place in any organized effort for religious advancement, and if we would but cultivate the methods of the gentle Nazarene, how much more good could be done. We came into this world on an equal footing, and the battle of life is more or less a serious affair with us all. What matters it how we worship God,—whether in an expensive church edifice of any one of the hundreds of religious denominations, or in the humble privacy of our own home,—it is all a means to an end.

It will take the accumulated energy of all religious efforts working in peace and love and harmony to combat the evils of this world, and when we see the different denominations jealous of each other's work, we must naturally conclude that the devil is working overtime in a fertile field for his own advancement. Christianity will make no material advancement in this world unless Christian workers change their methods of work. Let us be consistent Christians.

✧

[Charles M. Shaw in *Blackburn* (England) *Times*]

The writer in the column entitled "What the Doctor Says" associated Christian Science with faith-healing and mental healing, and described all these as variations of what he calls "the same fundamental principle . . . the influence of the mind, in physical matters, on the bodily functions." Will you kindly permit me to say, with all respect, that this is a mistake; but as it is a mistake which is easily fallen into by those who are not thoroughly acquainted with Christian Science, and as the subject is one of growing interest and importance, I shall be grateful for the opportunity of explaining the difference.

Speaking generally, mankind as a whole has yet to learn the baneful effects of the operations of what is described as the carnal or mortal mind. Now Christian Scientists well understand these operations, and persistently deny and reject them; and as they are more successful in their healing activities than the varying schools of mental healers, let it be conceded that they understand best the Principle and method of their work. And what are these?

Christian Science, both in its theory and in its practice, is based absolutely upon the Bible revelation that God is infinite Mind or Spirit, omnipotent, omnipresent, and omniscient. It establishes its conclusions, not upon the literal interpretation of the Scriptures, but upon the spiritual, proceeding along the line of deductive reasoning, sustained by demonstration. And it finds in the spiritual interpretation of the Bible, illustration, positive and negative, of its theory. The practice of Christian Science is the application of the fundamental truth just stated to every individual human problem, and in this way: if God is infinite Mind and man is His image and likeness, then man is an individual reflection of divine Mind or consciousness, and the realization of this, with all it involves, results in an individualization of infinite power, bringing peace, healing, and dominion into human experience. In orthodox phraseology this state is described as being filled "with the spirit of God." And the means by which this realization is achieved are those indicated by the following Scriptural terms: self-denial, self-crucifixion, new birth, putting off the old man.

When man rises to that spiritual elevation where he surrenders the personal sense of life, substituting for self-will the will of God, for self-interest divine Principle, for carnal sense spiritual perception, then he becomes an individual expression of divine Mind, and this Mind—not the human mind—heals all his diseases. To reach this spiritual altitude is the aim and object of every true Christian Scientist, but every sincere approach to it brings healing of some kind. The full elucidation of Christian Science is contained in the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and there are many who by their patient and humble study of this book have gained an understanding of God which has effected their healing from all manner of diseases.

✧

[Robert S. Ross in *Troy* (N. Y.) *Times*]

In a recent address an evangelist made the following statement, referring to Christian Science: "It was known in the days of John the apostle as Gnosticism." Now Gnosticism was a heretical teaching of the second century. One of its doctrines was that the world was created by a god named Demiurge, who brought into existence two spirits called the Æons, who in turn became the parents of a large family, chief among whom was Christ Jesus.

Christian Science teaches that God, divine Mind, is creator of the universe, and that Jesus was the offspring of Mary's "self-conscious communion with God," as Mrs. Eddy tells us on page 29 of the Christian Science text-book, "Science and Health with Key to the Scriptures." There is therefore as much analogy between Christian Science and Gnosticism on this and other points as there is between Christ's Christianity and Gnosticism, and that is none at all, for Christian Science and original Christianity are one both in statement and in practice.

In his final instructions to his disciples, Jesus said that certain "signs" would follow them that understand his teachings. Among these he named the healing of the sick. In other words, Jesus said that spiritual understanding would have to be proved by demonstration. Christian Science lays emphasis on healing because Jesus laid emphasis on it.

Editorial

"Be of good courage"

In the second epistle to Timothy it is written, "For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind;" and in Psalms we read, "Wait on the Lord: be of good courage, and he shall strengthen thine heart." Elsewhere in the Scriptures there is much exhortation to have courage, — to meet without dismay the futile efforts of error to establish its claim to be something.

In Mrs. Eddy's published writings there are also to be found many calls upon Christian Scientists to possess courage, and in no less than two hundred instances she uses the word fear and its derivatives to caution her readers against this enemy to mankind's peace and happiness, and to awaken them to the necessity for casting out this evil, which she so frequently couples with its twin companions, ignorance and sin. On page 10 of "Rudimental Divine Science" she writes: "Disease is a thing of thought manifested on the body; and fear is the procurator of the thought which causes sickness and suffering. Remove this fear by the true sense that God is Love,—and that Love punishes nothing but sin,—and the patient can then look up to the loving God, and know that He afflicteth not willingly the children of men, who are punished because of disobedience to His spiritual law." Also on page 373 of Science and Health our Leader says, "The fear occasioned by ignorance can be cured; but to remove the effects of fear produced by sin, you must rise above both fear and sin."

That all consistent Christian Scientists are endeavoring to cast out this demon of fear goes without saying, and if these endeavors are not always crowned with success, this is not a reason for discouragement, but rather a reason for more persistent and consecrated work to the end that fear and its attendant evils shall be absolutely abolished from human experience. That at this time Christian Scientists are not wholly free from the temptation of fear is not a matter for surprise, for many who have been healed by the power of Truth have not yet grasped the full import of Mrs. Eddy's teachings, especially those teachings which have to do with future immunity from evil. On the contrary, it would be surprising if out of the great number who have allied themselves with this movement for the salvation of mankind there were not some to whom the message of Christian Science has as yet come but partially, some who but "see through a glass, darkly," and seem unable to throw off the bondage of fear. One class of these is made up of persons who are sincere in their desires and studious in their habits, and as they have studied thoroughly the letter and imbibed the spirit of Christian Science (see Science and Health, p. 495), they ultimately will master the fears which now so easily beset them.

There is, however, another class whose mental attitude constitutes a more serious problem, both to themselves and to the Christian Science churches of which they are members. These are they who act as though they believe that having "come into Christian Science" they need do nothing further than "talk Science" with their friends, superficially read Christian Science literature, attend church services, and contribute to some extent to the financial support of the church. This they seem to believe is the entire life of a Christian Scientist, and that without further action on their part they are entitled to be free from all the worries and distresses coincident to mortal existence. Such superficial exponents of Christian Science are but ignoring the beliefs of mortal mind instead of destroying them. Like the untrained soldier, they are more of a menace than they are a help to those with whom they are allied, for when trouble comes they do not know how to protect themselves and fear is rampant.

Mrs. Eddy has admonished those who would be Christian Scientists that "the song of Christian Science is 'Work—work—work—watch and pray'" (Message for 1900, p. 2), and all who would follow in the footsteps of the master Metaphysician, Christ Jesus, must realize that this is indeed the watchword of progress in overcoming evil in all its forms —fear included. While the path may appear rough at times, and the ascent too steep for comfort, yet the goal is worth the labor, and the welcome, "Well done, good and faithful servant," is a reward beyond price. Christ Jesus said, "Be of good cheer; I have overcome the world," and our cheer and our courage will be in proportion to our overcoming,— in proportion to our understanding of the omnipotence of good.

Archibald McLellan.

The Tempter Exposed

In naming this periodical *Christian Science Sentinel*, Mrs. Eddy assures us on page 353 of "The First Church of Christ, Scientist, and Miscellany" that she intended it "to hold guard over Truth, Life, and Love." In order to further this important purpose it becomes necessary to use these pages from time to time in order to warn and to forewarn. What in a word is the summing up of all the attempts of the tempter, the adversary, the slanderer or deceiver, in regard to Christian Science? Is it not to substitute for it the term hypnotism? Is it not to induce humanity to believe a lie about the truth which makes free? The purpose of the tempter is to force upon defenseless seekers after righteousness a counterfeit will for the divine, a false self for the real man, a vagrant mesmerism for the power of pure Mind.

Jesus refuted the pretense of human will-power to be God's will when he made the superhuman declaration, "Not my will, but thine, be done." He definitely decided the controversy between the belief of mortal man power and the understanding of the Christ-power in asserting, "I can of mine own self do nothing." But Jesus had his forty days in the wilderness, when the tempter whom he unceremoniously designated as a liar argued to him in vain. This stupendous temptation of Jesus is not to be dogmatically explained, and only growth in grace can reveal its exact import; but cannot the loyal Christian Scientist already declare that what Jesus met and mastered in the wilderness was what Mrs. Eddy has unmasked in her writings as animal magnetism, at one time more generally called mesmerism and now known as hypnotism?

Every progressive Christian Scientist in learning to practise what he preaches is faced not once but constantly by the subtle reasoning which if admitted would subvert him into a hypnotist and so rob him inevitably of Christian Science. Christ and Belial cannot dwell together. Out of the darkness of evil intent there seems to be constantly fashioning itself the false suggestion of which Jesus had to complain to his contemporaries, which ascribes the works of God to "Beelzebub the prince of the devils," and which today whispers that the saving of the sinner and the healing of the sick in Christian Science is wrought by hypnotism. This deliberate deception is unmasked by the question which the Founder of Christianity proposed to his persecutors and which they were never able to answer: "How can Satan cast out Satan?"

Could there be a greater travesty on Truth than is exhibited by this attempt to place the mark of the beast upon that which God has hallowed? But this is not all, since the

Digitized by Google

tempter's wish extends not only to a perversion of divine Science into a show of hypnotism and of the loyal Scientist into a hypnotist, but even to an attempted annulling of the saving and healing works of Christian Science through the suggestion of reversal and return. It is barely credible, yet proven by the experience of every doer of the word, that Jesus' treatment at the hands of the Pharisees is reproduced in the lives of all advancing Christians today. When the tempter comes to the practising Christian Scientist, seeking to raise Beelzebub to the judgment-seat of God and to dispossess Christ with anti-Christ, is there any point of least resistance which will admit the entrance of a subversive argument? Is it a pretended neutrality between good and evil, hence apathy and agnosticism? Is it procrastination, or the desire to stop work?

Which one of the multifarious forms of self is ready to betray the Scientist into the hands of the relentless foe? When the error is found, then let repentance close the gap and Truth will save the day. For, behold, there is in reality but one Mind whose will is law, whose nature is exhaustless good. This is the Mind of the real man, the Mind of Christ; and there is no other. In God's realm of reality there is no will but His, and nothing which "worketh abomination, or maketh a lie." There is not enough ingenuity in the most self-assertive occultism to create a real counterfeit or to deceive humanity into believing evil of that which God has made and Christ has authorized.

WILLIAM D. MCCRACKAN.

Authorship

FIRST and last the world has a good deal to say about authorship. That the use of the word author is not confined to one who has written a book, is made clear if we study some of the dictionary definitions of the term; for instance, "The beginner or first mover of anything; hence the efficient cause of a thing; an originator." This is of course very comprehensive, and rightly so, and in Christian Science thought is at once lifted to the divine Author of man's being, the first and only cause of all that is real. Apart from Christian Science, however, we sometimes hear a mortal spoken of as the author of another's existence, but students of Christian Science learn to be very discriminating in dealing with such vital questions, and so they fully accept the statements of their text-book to the effect that God is the only cause and creator, or to use the apostle's words, "the beginning and the end, the first and the last."

There are of course a great many who are ready to admit that God is the author of all created things, but to them this means that He is directly or indirectly responsible for sin, disease, and death, hence their author, although the Bible tells us that all which God created is like Himself, good. On one occasion two young students of Christian Science were talking in the presence of an elderly lady respecting a case of healing which was being brought out under this treatment. This lady, who knew about the case, asked some questions, and as the ailment had been diagnosed by physicians as an incurable disease, she ventured to say that she thought it was wrong for any one to attempt to heal such an awful illness, as she was sure no one could do this except the one who had caused it.

One of the Scientists smilingly responded at this point, "You mean the devil, do you not?" which brought forth from the other lady the sharp rejoinder, "No, indeed; I mean God." This was of course a sobering thought to the Christian Scientists, because they had learned that such a belief not only dishonors God, but is in direct opposition to the teachings of Christ Jesus. They therefore ventured to remind their friend that, according to John, Jesus came to "destroy the works of the devil," and that he healed all manner of disease. It goes without saying that this lady, although a Bible student and a sincere Christian, had never thought of this; but the logic of Christian Science is inexorable, and the beauty of its arguments is that they always honor God and Christ Jesus and exalt the true idea of man as His image and likeness.

In referring again to this question of authorship, there is a beautiful passage in the twelfth chapter of Hebrews, where we are encouraged to "lay aside every weight, and the sin which doth so easily beset us," all the while "looking unto Jesus the author and finisher of our faith." Now before we came to Christian Science we were taught to think lovingly and reverently of Jesus, sometimes to believe that he was one of the persons of the Godhead; but if we had thought about the authorship of disease and death, we should probably have said that Jesus as the Son of the Father must likewise be responsible for them. Paul's inspiring statement, however, gives us quite a different view of the situation, and Christian Scientists joyfully acknowledge that Christ Jesus is indeed the author, the "originator," of the faith in God and the all-power of good of which they have gained such clear views through Mrs. Eddy's teachings.

We come to see that while there are many authors of disease theories, there can be no author of disease, for disease is not a reality on which any veritable hypothesis can be based. It is at most a negative condition based upon a false supposition, and its tendency from first to last is self-destructive. When we turn away from this to the teaching of Christ Jesus as understood in Christian Science, we at once lay hold upon divine Principle, and thus we have a sure anchor for our faith, one which holds in any storm of mortal experience, and this means that we have accepted his unequivocal assurance of life eternal.

ANNIE M. KNOTT.

Among the Churches

Current Notes

CLEVELAND, OHIO.—Plans have been filed in the building department for the two hundred thousand dollar edifice of Second Church of Christ, Scientist, to be constructed on Euclid Avenue and East Seventy-seventh Street. The auditorium, which will be 110 feet square, will seat about sixteen hundred persons, and a gallery in the rear will have a seating capacity of about three hundred.—*Cleveland Plain-Dealer.*

BURLINGAME, CAL.—To keep pace with the growth and progress of Christian Science in this city, it has become necessary for First Church of Christ, Scientist, to provide a more central place of worship. With this purpose in view a lot with 100 feet frontage has been purchased on Oak Grove Avenue, facing Acacia Drive, and plans are being prepared for an appropriate edifice.—*The Burlingame Advance.*

CHICAGO, ILL.—The corner-stone for the edifice of Eleventh Church of Christ, Scientist, of Chicago, which is being erected on the northwest corner of Logan Boulevard and Mozart Street, was laid at six o'clock Thursday morning, July 6.—*North-West News.*

NEILLSVILLE, WIS.—Work began last week [July 3] on the church which is to be erected by the Christian Science Society on the lot recently purchased. The building will be 55 by 47 feet.—*Republican and Press.*

Digitized by Google

SYRACUSE, N. Y.—Preparatory to building on its new lot on Forman Park, First Church of Christ, Scientist, is looking about for a place where it can hold its services, the congregation having entirely outgrown the capacity of the present church at 704 East Fayette Street. This structure was completed in 1904 with a seating capacity of four hundred, which was far in excess of the needs of the congregation at that time. A few months ago a lot was purchased on Forman Park and East Genesee Street with a frontage of 130 feet, and building will be started in a short time.

Syracuse Herald.

UNIVERSITY OF CALIFORNIA, BERKELEY, CAL.—The distribution committee of the Christian Science Society has been actively at work for the past two college years. From August, 1915, to May, 1916, we distributed to the college students and faculty members 250 *Sentinels* and 1520 *Monitors.* We have had many expressions of thanks and appreciation from those receiving the periodicals.

Correspondence.

WAUKEGAN, ILL.—Plans have been completed and accepted, and the contract let, by First Church of Christ, Scientist, for the remodeling and enlarging of their church building at 329 West Street. The present structure was purchased some years ago and remodeled. The new building will have a seating capacity of about two hundred.—*The Sun.*

DAYTON, OHIO.—The two Christian Science churches of Dayton maintained a booth at the Montgomery County fair the first week in September. The following literature was distributed: 2068 *Sentinels*, 57 *Journals*, 3 *Heralds*, 2032 *Monitors*, 639 pamphlets.—*Correspondence.*

ALLIANCE, OHIO.—The Christian Science church, South Union Avenue, near Market Street, was formally opened yesterday [July 16]. The building, which was formerly a residence, has been remodeled and repainted, and is very attractive.—*Alliance Review.*

DAYTONA, FLA.—The corner-stone of First Church of Christ, Scientist, was laid Monday [July 10], the new edifice being in process of construction at the corner of Live Oak and Palmetto Avenues.—*Daytona Gazette-News.*

PARIS, ILL.—Simple but very beautiful and impressive ceremonies were held Monday afternoon [July 10], when the corner-stone of the Christian Science church on East Court Street was laid.—*Paris Beacon.*

✧ ✧ ✧

The Lectures

New York, N. Y.

The remarks of Mrs. Sarah W. Taylor in introducing John W. Doorly at a lecture on Christian Science given in the edifice of Second Church of Christ, Scientist, were as follows:—

The gospel of St. Luke in recording the last interview between Jesus and his disciples, an intimate, sacred interview just before their final parting, concludes with this statement: "Then opened he their understanding, that they might understand the scriptures." The same statement might be made in relation to Christian Science and the service it is today performing for its disciples. Christian Science is opening their understanding that they may understand the spiritual import of the Scriptures. It is enabling them to lay hold on the Bible promises and make them effective in the healing of sorrow and sickness and sin. It is teaching them how to reflect the unerring intelligence of divine Mind in solving whatever problems may confront them, whether the problems are of world magnitude or relate to the minutiæ of the daily round and common task.

Christian Science is teaching its followers to understand the promise of Isaiah, "The work of righteousness shall be peace; and the effect of righteousness quietness and assurance forever." In the midst of world conflict and confusion Christian Scientists are grateful to rest in this promise. Christian Science is also making its adherents more alert to the command of the Master, who bade his followers go into all the world to preach the gospel and heal the sick.

✧

Lynchburg, Va.

Prof. Hermann S. Hering delivered a lecture on Christian Science at the City Auditorium. The introduction by Attorney Don P. Halsey of the Lynchburg bar was as follows:—

I am not a Christian Scientist, but no one can fail to recognize the fact that Christian Science is here as a vivid and vital element in our country's affairs, a force which has gathered to its standards many of the ablest and most intelligent minds of this generation and which, whatever may be our predilections or confirmed convictions, is entitled to our respectful attention.—*Correspondence.*

✧

Akron, Ohio

The address of Prof. O. E. Olin of the University of Akron, in introducing Bliss Knapp, who lectured on Christian Science, was in part as follows:—

I am glad to stand before you tonight, if only for the purpose of presenting to you the lecturer of the evening, but I hope I may be pardoned if before that I give you a word of my own thought in regard to your work.

This beautiful building and this great audience are but one more witness to the truth that men are coming more and more to a proper valuation of the things of life. Sir William Hamilton said years ago: "There is nothing great in the world but man, and nothing great in man but mind." The struggle to prove that statement has been going on through a great many centuries and is still going on. Over against the mind and soul of man we value our material achievements. We put our stupendous wealth and our great lines of commerce, our wonderful industrial activities, upon this side, and we can hardly see but that we should claim these as the greatest things of our civilization. It is hard for us to see through them, and beyond them, to the mind and soul and spiritual life that is beyond. It is difficult for us to see that we cling to the old, but I suppose one reason for that is that we feel at home with the old. That sense of familiarity with the things we have been used to is a reasonable thing.

As a teacher of philosophy I do not believe that men can ever be satisfied until they have fought their way through all these things and thought out some order or system that shall be as a foundation to their lives. This theory may not be the right one, yet it may satisfy us in the days of sunshine; but as I said, when these stern realities face us nothing short of the infinite itself will do to rest the soul, and you and I and all those who pass through that experience can say with David, "My heart and my flesh crieth out for the living God,"—nothing short of that.

Digitized by Google

You have based your work on that proposition; you have based your work upon God. God is All, as you say and I say, and we take the Good Book from the first "In the beginning, God" to the last chapter of Revelation,—God in the morning; God in the splendor of noon; God in the sunset; and God in the midnight stars. You have dedicated your powers to the proposition that God is All; that He means all of His children to be happy, healthy, and prosperous. You have done that in the face of a world of sickness and suffering, sorrow and sin; you have resolved that proposition into a demonstration. As was said by Jesus, "We speak that we do know," so do you speak straight to the heart hunger of men and women of all the races of the world.

Correspondence.

✧

Berkeley, Cal.

Ezra W. Palmer lectured on Christian Science for Third Church of Christ, Scientist, at Twentieth Century Club House. He was introduced by John R. Brownell, who said in part:—

Never in the world's history has there been greater need for clear thinking and for right thinking than there is at the present time. The Scriptures say of man that "as he thinketh in his heart, so is he," and Christian Science, as expounded by Mrs. Eddy, gives definite rules whereby the right thinking man is enabled to obtain in some measure the fruits of the Spirit through understanding and demonstrating the perfect law of Love. The day of open and frequently expressed skepticism of the efficacy and healing power of Christian Science seems past, for too many proofs are being offered by the thousands who are benefited, and in many cases freed from the bondage of great suffering, both mental and physical, to leave any room for argument among fair-minded people.—*Correspondence.*

Lectures to be Delivered

ALABAMA—Birmingham (First Church): Bicknell Young, Lyric Theater, 1800 Third Avenue, 3:30 p.m., Nov. 5.
Montgomery: Bicknell Young, Church Edifice, 16 High Street, 8 p.m., Nov. 6.
CALIFORNIA—Coalinga: Virgil O. Strickler, Liberty Theater, 3 p.m., Nov. 5.
Covina: Virgil O. Strickler, Women's Club House (note change), 8 p.m., Nov. 2.
El Segundo: Virgil O. Strickler, El Segundo Theater Building, 7:45 p.m., Nov. 6.
Glendale: William R. Rathvon, Church Edifice, Second and Maryland Streets, 8 p.m., Nov. 9.
Los Angeles (Fifth Church): William R. Rathvon, Hollywood Woman's Club House, 3 p.m., Nov. 5, and 8 p.m., Nov. 6.
Los Angeles, Gardena (Eighth Church): William R. Rathvon, Woman's Club House, Orchard Avenue, 8 p.m., Nov. 10.
Ontario: Charles I. Ohrenstein, Chaffee Union Auditorium, 8 p.m., Nov. 9.
San Diego (Second Church): Virgil O. Strickler, First Church Edifice, Second and Laurel Streets, 8 p.m., Nov. 7.
Santa Maria: William R. Rathvon, Princess Theater, 8:15 p.m., Nov. 7.
CANADA—Winnipeg, Manitoba: John W. Doorly, Walker Theater (note change), 3:15 p.m., Oct. 29.
COLORADO—Loveland: Clarence C. Eaton, Majestic Theater, 2:30 p.m., Nov. 5.
Victor: Prof. Hermann S. Hering, Church Edifice, 117 South Fourth Street, 8 p.m., Nov. 6.
CONNECTICUT—Bridgeport: Frank Bell, Lyric Theater, 3 p.m., Nov. 5.
ENGLAND—Bolton, Lancashire: John Sidney Braithwaite, Grand Theater, Churchgate, 3 p.m., Nov. 12.
Bradford, Yorkshire: John Sidney Braithwaite, Mechanics' Institute, 7 p.m., Nov. 16.
ILLINOIS—Chicago (Sixth Church): Edward A. Merritt, Church Edifice, 11321 Prairie Avenue, 8 p.m., Nov. 6.
Chicago (Fifteenth Church): Edward A. Merritt, Masonic Temple of Austin, 2:30 and 4:30 p.m., Nov. 5.
DeKalb: John Randall Dunn, Church Edifice, Third and Oak Streets, 3 p.m., Nov. 5.
INDIANA—Seymour: Dr. Walton Hubbard, Majestic Theater, 3 p.m., Nov. 5.
IOWA—Burlington: Prof. Hermann S. Hering, Grand Opera House, 8 p.m., Nov. 9.
IRELAND—Belfast: John Sidney Braithwaite, Ulster Hall, 8 p.m., Nov. 21.
Dublin: John Sidney Braithwaite, The Abbey Theater, 8 p.m., Nov. 20.
KANSAS—Burlington: Ezra W. Palmer, Newk's Theater, 8 p.m., Nov. 6.
Chanute: George Shaw Cook, Hetrick Theater, 8:15 p.m., Nov. 6.
Emporia: Ezra W. Palmer, Church Edifice, Ninth Avenue and Commercial Street, 3 p.m., Nov. 5.
Larned: George Shaw Cook, Opera House, 8:30 p.m., Nov. 9.
Lawrence: George Shaw Cook, Varsity Theater, 8 p.m., Nov. 5.
Neodesha: John Randall Dunn, Church Edifice, Fifth and Indiana Avenue, 8 p.m., Nov. 9.
Wichita: Charles I. Ohrenstein, Church Edifice, 828 North Lawrence Avenue, 8 p.m., Nov. 6.
KENTUCKY—Lexington (Second Church): Bicknell Young, Auditorium, 8 p.m., Nov. 2.
LOUISIANA—New Orleans: Bicknell Young, Athenaeum, Clio and St. Charles Avenue, 8 p.m., Nov. 9; Church Edifice, Nashville Avenue and Garfield Street, 8 p.m., Nov. 10.
MISSISSIPPI—Meridian: Bicknell Young, New City Hall, 8 p.m., Nov. 7.
MISSOURI—St. Joseph (Second Church): Ezra W. Palmer, Lyceum Theater, 8 p.m., Nov. 9.
Webb City: Clarence C. Eaton, High School Auditorium, Joplin and Washington Streets, Friday evening, Nov. 3.
MONTANA—Butte: John W. Doorly, High School Auditorium, Idaho and Park Streets, 8 p.m., Nov. 4.
NEBRASKA—Lincoln (Society of University of Nebraska): Prof. Hermann S. Hering, Temple Theater, 3 p.m., Nov. 5.
NEW YORK—New York (First Church): Paul Stark Seeley, Church Edifice, Central Park West and Ninety-sixth Street, 8 p.m., Nov. 10.
OHIO—Cincinnati (First Church): Edward A. Merritt, Music Hall, 8:15 p.m., Nov. 10.
Cleveland (Fifth Church): William W. Porter, Church Edifice, Franklin Avenue and West Fifty-eighth Street, 8 p.m., Nov. 7 and 9.
Lakewood: William W. Porter, Church Edifice, Detroit Avenue at Arthur Avenue, 8 p.m., Nov. 6.
OKLAHOMA—Oklahoma City: Charles I. Ohrenstein, Auditorium, 8 p.m., Nov. 3.
OREGON—Monmouth: Bliss Knapp, Odd Fellows Hall, 2 p.m., Nov. 5.
Portland (Second Church): John W. Doorly, Church Edifice, East Sixth Street and Holladay Avenue, 8 p.m., Nov. 9 and 10.
Portland (Fourth Church): Bliss Knapp, First Church Edifice, Eighteenth and Everett Streets, 8 p.m., Nov. 2, and Second Church Edifice, East Sixth Street and Holladay Avenue (note change), 8 p.m., Nov. 3.
PENNSYLVANIA—Philadelphia (Second Church): William W. Porter, Orpheum Theater, Chelten Avenue, west of Germantown Avenue, Germantown, 3:30 p.m., Nov. 5.
Reading: Willis F. Gross, Orpheum Theater, 3:30 p.m., Nov. 5.
TEXAS—Amarillo: Charles I. Ohrenstein, Mission Theater, 3:30 p.m., Nov. 5.
WASHINGTON—Everett: Bliss Knapp, Everett Theater, 8:15 p.m., Oct. 30.
Seattle (First Church): John W. Doorly, Moore Theater, 8 p.m., Nov. 6.
Walla Walla: John W. Doorly, Whitman College Chapel, 8:15 p.m., Nov. 7.
WISCONSIN—Beloit: John Randall Dunn, Wilson Theater, 8:15 p.m., Oct. 31.
Sheboygan: Dr. Walton Hubbard, Opera House, 8 p.m., Nov. 9.

Testimonies of Healing

Words are inadequate to express my gratitude to God for the many blessings I have received through the reading of Science and Health. I came into Christian Science nearly eight years ago. While away on a visit I had a severe attack of throat trouble. A few days before I had been reading some testimonies in a copy of the *Sentinel* found in the home where I was visiting, though the people were not Scientists. These all seemed very beautiful to me, although I knew nothing of Christian Science; in fact it was the first time I had heard of it. When this attack came on, my aunt, whom I was visiting, wished me to consult a doctor, but I said I would rather try a Christian Science practitioner if there was one in town. She did not altogether like this, but finally gave her consent. At that time my throat was almost closed from the swelling, and I was so weak from loss of sleep and food that I could hardly walk to the practitioner's office, a distance of about four blocks. I had been using material remedies for several days, but to no avail.

After the first treatment the practitioner said she would give me absent treatment, and all I needed to do was to call her when I was healed. I was much stronger after the first treatment, which was given in the morning, and when I awoke the next morning I was completely healed. It all seemed so impossible to me that I ran to the looking-glass to see if the blisters in my throat were gone, and to my surprise my throat was in perfect condition. Words can never tell how happy I was for this beautiful demonstration. I could hardly wait to see the practitioner again to learn more of this beautiful truth that makes us free. I secured a copy of Science and Health and went home to read.

At that time I had worn glasses for eight years, and the oculist said they would always have to be worn or my eyesight would be lost entirely. I had read testimonies by people who had been healed through reading Science and Health, and I intended to give it a fair test, so took my glasses off and began to read by lamplight, something I had not done for several years, and I have continued to read without glasses ever since.

I am truly thankful for this blessed truth and am trying to prove my thankfulness to Mrs. Eddy, our dear Leader, by putting into practice all I learn each day.

GRACE D. WOOD, Delia, Kan.

✧

Seventeen years ago, while living in my native state, Maine, I became ill with anemia and extreme nervousness, which medicine did not seem to relieve even in the slightest degree. After several months of this condition a friend called my attention to the healing power of Christian Science, and under the influence of his great faith I went with him to the home of a practitioner. The change that came to me was nothing short of marvelous. In less than twenty-four hours all desire for tobacco left me, although it had been used for many years, and my general health improved so rapidly that it caused frequent comment and wonderment in my family. In a few weeks my weight increased and I was physically well.

At the same time there was experienced a great uplift morally and spiritually, although I did not at all understand what was the influence that had wrought such radical changes. I procured the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and tried to understand its teaching; but it was practically a sealed book to me, and after a short time I made no more effort, thinking I had no need for Christian Science anyway, as I was perfectly well, and no doubt by following the generally accepted laws of health would remain so. Alas for the day that I listened to the voice of the tempter! My health continued good for several years, but gradually I drifted back to the old ways, even learning to smoke again, and ill health returned.

Ten years later, while I was living in Brooklyn, serious illness came, and again the doctors were not able to cure me, although many were tried, including several specialists. In the autumn of 1907, upon medical advice, I went back to Maine with the assurance that I could not live in the city. Then my case was taken up by our former family physician, a personal friend, who gave me the closest and kindliest attention, calling in consultation one of the best known physicians of the state; but after months of strict diet and constant use of a variety of medicines my condition became so serious that those about me despaired of my recovery.

One day in the following April, being firmly convinced that medicine could not help me, I suddenly resolved to go back to Christian Science. The following day I called upon the practitioner who had done so much for me ten years before, and immediately began to gain,—slowly to be sure, but perceptibly,—and the study of Christian Science was taken up in earnest. In a few months the healing was complete and I returned to my work in the city. Since that time I have enjoyed a good degree of health, and every discordant condition has been overcome without the use of medicine in any form. I am as grateful to God, the giver of all good gifts, as one can be who has seemingly stood "in the shadow" and is restored again to health and activity; but I am even more grateful for the fact that the whole trend and outlook of my life has been changed. In place of ambition, wilfulness, and strenuous self-seeking, there has come a deep sense of calm, of peace and tranquillity, of happiness and wholeness, that was entirely lacking under the old conditions.

My heart is filled with thanksgiving to Mrs. Eddy, whose pure and exalted thought enabled her to bring again into human experience the understanding of the healing power of divine Love. My most earnest desire is daily to manifest my gratitude by deeper consecration to the cause of Christian Science.—ALBERT F. GILMORE, Brooklyn, N. Y.

✧

My healing in Christian Science occurred nine years ago. For fourteen years I had been ill with serious internal trouble and nervous breakdown, spending most of my time lying down or in bed, and in much pain. Two severe operations had been performed, and I had spent over two and a half years in clinics, besides trying water cures, electricity, and massage. During this time about forty doctors were consulted. Through the loving and patient care of a practitioner Christian Science was then made clear to me, and in three months I was cured of chronic enteritis. Gradually all the serious internal troubles, as well as other physical ailments, completely disappeared, and depression, which had made life a misery, was soon replaced by an ever-increasing joy.

When starting treatment I left off glasses after having worn them for eight years. An operation also had been performed in the hope of improving the sight and easing the pain, but it was unsuccessful. Now, however, I can read small print without glasses and my sight compares favorably with that of the average person. Formerly I was obliged to live abroad in a mild climate, and even then many weeks every winter were spent in bed with throat trouble and severe colds, in addition to all the other troubles. The last nine years I have lived in London, and have been in good health, leading the happy life of a busy Christian Science practitioner, active branch church member, and Sunday school teacher.

I am very thankful for the great privilege of active service

Digitized by Google

in our glorious cause, and grateful for membership with The Mother Church, also to Mrs. Eddy for bringing to suffering and sinning humanity Christian Science, that practical understanding of the healing Christ which leads us straight to God, divine Principle, Love.

NELLIE HOWARD-KEELING, London, England.

✧

Words are inadequate fully to express the joy that one feels for the hope and promise which Christian Science gives, and which never fails. Through the correct understanding of the Principle of Christian Science I have been healed physically, mentally, and morally, and have also been blessed in many other ways. It seems to me, however, that the greatest blessing is the spiritual uplift, which has resulted in an increased understanding of what life really is. This has awakened in me a higher regard for my fellow men; has taught me to be more thoughtful and considerate toward my neighbor; and, last but not least, has revealed the possibility of loving my enemies, a thing which I had thought was positively ridiculous, and that one who professed to do so was manifesting the worst form of weakness.

When attacked by sprains, poisonings, headaches, colds, burns, and the like, I have found that Christian Science treatments have never failed to heal. Other discordant conditions, which neither medicine nor any other supposed healing agency has ever been able to touch, are gradually disappearing. Some of these are impatience, anger, fear, anxiety, discontent, and the habit of criticizing, in which discouragement played no small part. In the place of these is coming a clearer sense of confidence, freedom, patience, kindness, fearlessness, and gratitude, together with a steadily increasing desire for the things of Spirit.

I wish to call particular attention to the healing of self-consciousness. Only those who have had this millstone on their necks can fully appreciate my thankfulness to be rid of such a disease. It destroyed all pleasure in company, tormented me when among strangers, interfered with my progress in the business world, and figuratively speaking tied me hand and foot. But when Christian Science loosed the chains which bound me, my heart cried out with joy, for I was free. Following this renewing of the mind, came a feeling of protection, of security in God's allness, a protection that guards one in every walk of life in proportion to his willingness to look to God and declare, "Not my will, but thine, be done."

These are some of the fruits from the tree of life with which I have been blessed, and they will bless any one who earnestly endeavors to gain some understanding of God and of man's relation to Him, as taught in this Science of Christianity. My whole desire is to know more of this healing and saving power, that I may better serve my brother, and do other works to the glory of God.

ARTHUR R. MUTTON, Waterloo, Iowa.

✧

Six years ago I was in a wretched physical condition, having had almost every law of *materia medica* laid upon me, and was told that the only hope of prolonging my life was a surgical operation, to which I submitted, only to find myself worse than before. For two years thereafter I grew steadily worse, until the physicians declared my condition incurable. At this time a nurse who was in attendance, and who had seen the power of Truth proved in her own family, recommended Christian Science. At first I declined to listen to her, considering my condition too serious to be reached by anything outside of medicine or surgery, but when my extremity was reached, I concluded to try Christian Science, though with no faith in its power to help me. My healing was slow, but I am grateful that I have thus learned to know what held me in bondage, and have been able gradually to give up the old way of thinking and to understand God as never before.

I am more thankful to God than words can express for having given to our dear Leader, Mrs. Eddy, the insight into this glorious truth. I am grateful for Mrs. Eddy's unselfishness, for her perseverance in what she knew to be the truth, and for her precious gift to this age. I am grateful also for the privilege of attending Christian Science services, for the literature, and to the dear friends who have so lovingly helped me by thought, word, and deed. My desire is so to live that I may be worthy of the name of Christian Scientist.

JEANNETTE E. BOEHM, Atlantic City, N. J.

✧

On Feb. 14, 1915, I slipped on some ice in the garden and fell. When I got up my right arm was powerless, the bone between the elbow and shoulder pressing against my side in such a way as to prevent my hand from falling to its proper position by about five inches. The bone was broken and the shoulder dislocated. Intense pain prevented me from helping myself, so I applied for Christian Science treatment, which was given at once. The arm was not bandaged or supported in any way. Ten days later my hand was in its proper position, the bone had knitted, and there was no soreness to the touch. A short time after that the shoulder-bones slipped into place. On the first of March I returned to my work, which was running a drill-press in a machine shop, and daily realized an increase of strength and freedom in the use of my arm. This healing has been a cause of wonder among my acquaintances, some holding the thought of advanced age against me, as I was in my seventy-fifth year at the time.

I write this testimony with a feeling of deepest gratitude to God for His loving-kindness toward me, and to Mrs. Eddy, who so nobly worked to bring this teaching to the world for the benefit of humanity. This healing is only one of the many blessings received through Christian Science for which I am thankful.—S. A. BRAIN, Brainerd, Minn.

✧

In grateful appreciation of the truth that has been the only physician for myself and my family of six children for over twelve years, I desire to offer the following testimony. A few years ago my twelve year old son, while away with some friends, met with a serious accident, striking with such force against a tree trunk, when in an improvised swing ten feet above the ground, that he was stunned and fell, the chin and mouth sustaining the injury. He had no recollection of the fall until after being taken to the hospital tent. When he learned that a doctor was expected momentarily, he begged his sister to have him taken home, so a neighbor and boy friend brought him home. The hospital nurse had cleansed the wound, applied a strip of adhesive plaster extending from one cheek to the other, and supplied a roll of cotton to support the under lip, but she insisted that we must have a physician take several stitches to close the wound, as the under lip was cut across and laid open the entire width of the front teeth. The teeth had also made two incisions entirely through, and the roof of the mouth was badly bruised. She expressed her opinion that without doubt the boy would be disfigured for life. The fear of this pronouncement was so great that the lad said to me, "O mother, I had better have been killed."

The certainty of the all-power and ever-presence of divine Love in time of need so filled my consciousness that there was

Digitized by Google

no fear and no hesitation or doubt. The lad partook of a glass of milk and rested well all night. The next morning being Sunday I asked if I should teach my class in Sunday school or stay with him, and as he said he would be all right, I went. On my return there was a slight manifestation of fever and pain, but it was overcome instantly, and this was the only instance of suffering. There was no inflammation, no discoloration or swelling, and there is no disfigurement, as the lips joined perfectly. He did not lose a meal. There was no question or doubt on the part of the boy, but an unquestioning trust, obedience, and cooperation. Tuesday evening he went to a meeting.

The tooth that was broken off came out this spring and had to be replaced by a crown tooth having a pin set in the root. Our dentist, a Christian Scientist, thought we had a wonderful demonstration in repairing the tooth. He felt it was not possible to do the work as I insisted it should be done, so used medicine to kill the nerve, but it caused trouble at once—a swelling that reached almost to the eye. This difficulty was overcome immediately and the work was then completed as desired. The tooth had been broken off and was splintered below the gum, but it had stayed in place some three years, that is, ever since the accident. The dentist expressed the thought that we had had a marvelous demonstration, as the lacerated lip had joined without leaving any blemish or imperfection, and there is only a slight ridge in the roof of the mouth, showing that the gum had been considerably damaged.

This was a wonderful experience for the lad and for myself. I am more grateful than words can express for this great truth and for the countless blessings that have attended my progress in Christian Science. I am most thankful for the simplicity of the Word, that the children may come unto Him understanding and rejoicing. I was a church-member for fifteen years before taking up Christian Science, and was in bondage to medical beliefs to such an extent that there was nothing but long drawn out sickness, with no rest therefrom day or night. During the twelve years that Truth has been our only dependence wonderful indeed has been the contrast.

I feel great joy in the truth, and likewise have an ever-present sense of gratitude for the Bible and for Science and Health and the Christian Science literature, as well as for the privilege we have of carrying this great message of freedom to others that they may attain liberty and peace.

HAIDEE WOODS, Lincoln, Neb.

✧

[Translated from the German]

When I took leave of my friends in Germany a few years ago, shortly before coming to America, they said to me, "Mind you do not join the faith-curists," meaning the Christian Scientists, and I laughingly replied: "Why no, why should I? I never go to church anyway and am never sick." Had I known at that time how happy and contented I should be precisely through becoming acquainted with Christian Science, my answer would have been less positive. I cannot tell how grateful and happy I am for this "pearl of great price" which I found soon afterward.

Whereas I was a restless, nervous, dissatisfied, bitter, and unhappy woman, Christian Science made me just the reverse, and for this words fail to express my gratitude. I have experienced physical healing through my own understanding of Christian Science in cases of headache, pain in the throat and back, toothache, colds, inflammations, swellings, nervousness, stomach trouble, and rheumatism. I have been healed of a weak foot and have found help in many other instances. I am ever so grateful for the wonderful protection experienced by maintaining the right mental attitude as taught in Christian Science.

The best part is of course the spiritual uplift and illumination, with consequent regeneration of one's mentality. Constant study, faithful application, and earnest work are, however, required in order to progress along these lines. I am most deeply appreciative of the comfort which I received when the war broke out. Through my knowledge of the truth I have remained calm and joyous. I cannot help feeling that if all who call themselves Christian Scientists would maintain the right attitude of thought with regard to the events now taking place, war would not be possible again, but instead there would be one great brotherhood united in love.

I am grateful for many experiences which without Christian Science might have proved disastrous, for instance the turning over of a carriage in which I was seated with two children. In two cases of fire I have had the opportunity of testing divine Love's ever-present help. With the assistance of a Christian Science practitioner my seeming need of work and of an income has been met twice. When I came to her the second time, she said, "If we want to turn round the corner yonder, we must first take the steps necessary to reach it." I then saw that my lack of selflessness and humility was what kept me from taking such steps, and when I realized that divine Love is boundless, infinite, that its sources of supply are inexhaustible, it became clear to me that our sensible needs must and will be met, if we but seek His kingdom first. I also began to understand that God is our life, and as He is unchangeable, eternal, His image and likeness must needs reflect these qualities. I am very grateful for the bountiful sense which has come to me through Christian Science, and I would not exchange places with any one.

It has been and is my privilege to be of assistance to others, and I have witnessed wonderful results, such as the healing of many ills, including paralysis, the drug habit, an apoplectic stroke, and so on. That I am thankful for our church services, literature, lectures, the class instruction, as well as for all the good which I am receiving and expect to receive, hardly needs special mention. I know that if we patiently wait on God, trust not to time nor rely on persons for a change of conditions, divine Love will open the way at the right time and in the manner that will best promote us.

MARGARETE KOTZENBERG, Chicago, Ill.

✧

Through the reading of a testimony in a copy of the *Sentinel* which was mailed to me by a friend about five years ago, I was induced to try Christian Science as a cure for a painful and, according to the doctors, dangerous stomach and bowel disorder. I was healed in one month's treatment, and a severe nervous trouble was overcome at the same time. The study of Christian Science has been kept up ever since, with most happy results. For about two years after beginning this study I had to use glasses to read ordinary newspaper print; then one day I picked up a paper and started to read without my glasses and was much surprised to find that I could read better without them than with them. For two years I have not put them on, and can now read small Bible print with ease; in fact, I believe my sight is just as good as it was in boyhood, though I am to material sense quite old.

Since I have been studying Science a number of small accidents, such as cuts and bruises, have been overcome with no other help than the power of divine Love. A bar of steel hit me on the left foot, breaking one of the small bones of the instep. The pain for a moment was severe, but as soon as I was able to collect my thoughts enough to declare the truth

Digitized by Google

the pain ceased, and I was able to continue my duties the rest of the day. That evening the pain returned with even greater severity, but it was again overcome, so that I could go to sleep, and the next morning the foot was so far recovered that I put on my shoe and walked to work without even limping. It has never given me any further trouble. Considering the severity of the blow and the resulting injury, the healing seems to me nothing less than marvelous.

In an accident on an elevator my right leg was broken between the ankle and the knee, and the surgeon who set the leg said he would open it up and fasten the bones together with small plates of steel; but he finally decided to give it a chance to heal without doing that. It healed, but very slowly, and five months passed before I could go back to work. The slow healing was doubtless due to the fact that all this time I was influenced by those about me, who feared that the injury would never heal and that I would finally lose the leg.

To go back a little: the shock of the fall and injury did not make me unconscious, and as soon as I realized that the leg was badly injured I began to repeat the "scientific statement of being" (Science and Health, p. 468), but could only get as far as, "for God is All-in-all." Again and again I tried, but could get no farther, and finally gave up the attempt and just held to the thought of God's allness, with the result that in a few minutes there came to me a feeling of peace and happiness, and all sense of fear vanished. The hours immediately following the accident were the happiest of my life. No anesthetic was taken during the operation of setting the limb and very little pain was felt. An hour and a half after the accident occurred I sat up in my cot and ate a hearty meal.

I am grateful to say that my healing has been permanent and entirely satisfactory. Many other problems have been overcome through the understanding of the power of divine Love to heal troubles of whatever nature. As time goes on my faith in and love for the truth as taught in Christian Science only grows stronger and deeper, for which I am sincerely grateful. I am thankful to God for these proofs of His care, and grateful to our revered Leader, Mrs. Eddy, who next to Christ Jesus has been our guide in the narrow way that leads to eternal life.

GEORGE TUGWELL, Evansville, Ind.

✧

I desire to express my gratitude in some slight degree for what Christian Science has done for me. About two years ago my little girl was taken ill with acute lung trouble. She had a high fever and every breath caused her great pain. A relative asked me to try Christian Science, so I called up a practitioner, and within an hour the baby was asleep. Several hours later the pain awakened her, but another treatment was given and she slept well all night. The next day she was playing as usual.

Christian Science has overcome many minor ailments in our home, not the least of which was croup, and I know absolutely that Truth is an ever-present help in trouble. My father was cured of serious organic trouble, and my mother and brothers have been helped in many instances. When my husband fell and seriously injured his elbow, with the aid of Christian Science the pain was overcome, and within a week the arm was well and sound again.

I could tell of other healings, but these are enough to show that I have great cause for gratitude. I am earnestly trying each day to be more grateful, and to have that Mind "which was also in Christ Jesus."

MRS. GEORGE OLMSTED, Los Angeles, Cal.

From Our Exchanges

[Rev. Edward Payson Drew, D.D., in *The Advance*]

Do you doubt the progress of civilization during the past nineteen hundred years? The position of honor given to the world's toilers; the reverential regard for honorable womanhood; the compassionate love for little children so prevalent today throughout the world; the growing condemnation of the wars of conquest; the magnificent modern crusades against the threefold curse of intemperance, immorality, and poverty; the growing passion of all the civilized world to lift up humanity to new standards of enlightenment, morality, democracy, purity in politics, international brotherhood, and universal peace—what can possibly be our interpretation of these signs of our times save this: under the leadership and inspiration of Christ the world's civilization is surely progressing; falteringly, stumblingly, suffering severe and appalling relapse, nevertheless progressing toward the standards and ideals of that Christ. Far, far away still those standards gleam. No nation has advanced far toward the goal; but the civilization of the world is striving forward. The Master himself said it must come slowly even as the seed grows: "first the blade, then the ear, after that the full corn in the ear." We see not yet much more than the blade, but thank God for the blade!

[*The Christian Register*]

The lesson of the budding and blossoming rod of Aaron is this: that our prosaic, unlovely lives may blossom, if we will, into beauty and poetry. No matter what our occupation, we may carry into it, and into our hours of leisure, the soul of a poet; as long as our heart beats, it may beat in unison with that underlying rhythm of mountain, and sea, and human life, which men call beauty, and which throbs from the will and heart of God.

This is true of us all, as we look upon the pomp and pathos of the world; and of none is it truer than of the preacher of the gospel, the pastor, the shepherd of souls; for he seeks to look upon his people on their diviner side, and to see them as they stand related to eternity; and to hold them, in his affections and in his prayers, not as trivial, captious, contentious, prosaic creatures of earth, but as spirits in prison, longing for freedom, groping for the open door of their deliverance. This is the saving poetry of the preacher's profession; this power of perception is his anointing for his sacred office.

[*The Christian Intelligencer*]

It is one of the vanities of human nature to speculate on what we would do if in other circumstances,—if we were rich, or learned, or in some way peculiarly gifted and royally endowed,—while the good we might do, that we have the opportunity and ability to do, is left undone. Much of our usefulness depends on a proper selection of work and a wise use of the talents possessed.

[*Northwestern Christian Advocate*]

We are changed from glory to glory. No sooner is one glory reached than it loses its color in the overwhelming glow of the new glory just beyond reach. No one has the right to be contented with present-day experiences; indeed, it is a spiritual impossibility to stop and admire and still possess the object of our admiration. "And I, if I be lifted up . . . will draw all men unto me," says Christ. This attracting force is constantly felt in all healthy souls; and though we possess one object of our longing, we cannot long gratify our affection in it, for something better beckons us on. This creates what is called a "divine restlessness," which in no

Digitized by Google

measure antagonizes the spirit of Christ when he said, "Peace I leave with you." It is only by this discontent, this restlessness completely possessing us, that we are able to climb higher and higher through this life into the next.

[Herbert Ford in *The Standard*]

The Christian church in every age has had its besetting heresy. Sometimes the tendency to err has been of a philosophical nature, and at other times it has been of a more practical turn. First it was Gnosticism, later it was asceticism, and just before the Reformation it was avarice. In the present age there are ample indications of another grave deflection from the truth which, if not arrested soon, will render the Christian church impotent in this age of efficiency. This does not refer to theological questionings, to departure from old moorings. Disconcerting as the present tendencies in theology may be, it is the profound conviction of the writer that they have their roots deep down in the love of truth, and that sincere, though often misguided, truth-seeking has been the guiding star of the movement. Surely nothing but good can in the end come of a movement having such a noble origin, regardless of how much zigzagging may attend the process.

But the present-day heresy of the church has its roots in a less worthy attribute of mind than the love of truth, namely, human selfishness. In many cases there are mitigating circumstances that incline us to use a softer term. The selfishness often takes the form of a desire to shield self and family from "the slings and arrows of outrageous fortune;" and of course in such cases judgment should be tempered with a large share of mercy. In other instances, the offense is less excusable. The heresy referred to in this article is deference to the dollar.

[*Western Christian Advocate*]

Christ gives rest by furnishing the spirit and power to bear burdens. He does not promise a rest of inaction, neither that the thorns shall be converted into flowers, nor that the trials shall be removed midst signs of blessed relief. Our blessed Lord and Redeemer gives rest of mind and soul. It is manifest by inward peace, inward contentment, inward satisfaction. He declared his rest comes to believers by learning of him, not of their fellow men. With them rest depended upon meekness and lowliness of heart. Men are restless, discontented, and rebellious because they are suspicious of God, full of inward discord, are dissatisfied with their earthly lot, and envy the lot of those who take their ease. For all these meekness is the cure.

[Rev. Charles F. Aked in *The Congregationalist and Christian World*]

I have learned that the peacemaker must be a peaceable person; that if in his own heart there is not the peace of God which passeth understanding by the maker of war, he cannot silence the roar of guns and the shriek of shrapnel. I have learned that a good movement must be steeped in prayer and saturated with devotion, that the peace propaganda must be baptized into Christ. You cannot buy peace. A multimillionaire cannot buy peace. He cannot with all his wealth buy the "fruit of the Spirit." With us the Spirit was not present, and peace, its fruit, was not to be looked for. The gospel of peace is an integral and indestructible part of the gospel of Christ.

[*The Continent*]

Jesus was very careful to say that the men who companied with him and learned through him to know the Father, were already living an eternal life in this world. He literally offered his disciples both worlds at a time.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00; six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

"Christian Science: Its Discovery and Development," by William D. McCrackan, M.A., C.S.B., has been translated into Norwegian (Kristelig Videnskap: Dens Opdagelse og Utvikling), and is published with the English version opposite the translation.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18 point) on Oxford India Bible paper, bound in leather. Size 10¼ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 361 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental rise and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 47 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under those titles in this price list.*

Items of Interest

California on election day will have an opportunity of adopting the single tax. An amendment to the state constitution has been proposed which provides as follows:—

Public revenues, state, county, municipal, and district, shall be raised by the taxation of land values exclusive of improvements, and no tax or charge for revenue shall be imposed on any labor product, occupation, business, or person; but this shall not prevent the assessment of incomes and inheritances to provide funds for old-age pensions, mothers' endowments, and workingmen's disemployment and disability insurance.

Land holdings shall be equally assessed, according to their value for use or occupancy, without regard to any work of man thereon; this value shall be determined in municipalities and wherever else practicable, by the "Somers system", or other means of exact computation from central locations. The intent of this provision is to take for public use the rental and site values of land, and to reduce landholding to those only who live on or make productive use of it.

Rapid increase in total expenditures for roads and bridges, growth of building and maintenance activities under state supervision, and a sharp decrease in the proportion of contributions in the form of statute labor, mark the development of highway work in the United States during the past twelve years. These facts are brought out by statistics for the calendar year 1915, recently compiled by the office of public roads and rural engineering of the United States Department of Agriculture.

The total length of public roads in the United States outside the limits of incorporated towns and cities was about 2,452,000 miles on Jan. 1, 1916. Of this 11.3 per cent was improved with some form of surfacing. The mileage of surfaced roads has been increasing at the rate of about 16,000 miles a year. The increase in expenditures for road and bridge work in the United States has been from approximately $80,030,030 per year in 1904, to about $282,000,000 in 1915.

The Union Government's intention to undertake the Hartebeestpoort irrigation scheme in the Transvaal is one of the most ambitious of the irrigation projects yet proposed by that Government. The site of the proposed dam is in the Magaliesberg Range, about twenty miles west of Pretoria, the object being to construct a high dam for the conservation of the waters of the Crocodile and Magalies Rivers for the irrigation of land below and for other purposes. According to the original plans, the dam is designed to store 5,099,380,000 cubic feet, of which nearly 92 per cent will be the gross available contents above the level of the outlet-sill. The whole scheme is estimated to cost in the neighborhood of $3,528,000, of which about six hundred thousand dollars is for the purchase of land. It is thought the dam will take about four years to build.

Only a few miles from Buenos Aires one comes upon the pampa. This sweep of level plain covers roughly 2,000,000 square miles, making a range of territory nine times the size of England and double the extent of Mexico. There are unbroken ranges of 2000 miles of absolutely flat land, across which the traveler may pass for hundreds of miles and hardly see a town worthy of the name. The owners of the big farms live in Buenos Aires or Europe, and the vast unoccupied pampa still awaits needed immigration from other lands to become productive. As a rule the old families of wealth live together in their large palatial homes, keeping much to themselves. They carry along the traditions of their clan, but are not especially interested in the reform of Argentine life or in the extensive opening up of new fields of service and opportunity.

The construction and ownership by the Government of grain elevators in Russia is now a settled policy of the country. The whole question has been placed in the hands of the State Bank, which sublets and finances the construction and directs the subsequent operation of the elevators. According to the building program submitted by the State Bank, which was officially approved in July, 1915, it is proposed to construct seventy-seven grain elevators, with a total capacity of 40,000,000 bushels. Meanwhile the State Bank is putting up elevators only of the larger type, with a capacity of 600,000 bushels, in the important grain growing centers, at points where the need of them is pressing.

The New Zealand authorities, both local and national, are carefully studying the subject of good roads, realizing that this is the best way to open up the interior of the dominion. The roads of the country, in the main, are not in very good condition. There are some good stone roads about the large centers, but few of them extend out more than twenty-five or thirty miles. Their up-keep has been found expensive, especially in the northern part of the country, since the rainfall is heavy, and washouts are numerous because the stone used is soft and grinds up and decays rapidly.

After being discussed during three quarters of a century, the proposition to drain the Zuider Zee has finally reached the form of a bill introduced into the Second Chamber of the Netherlands Parliament on Sept. 9. The bill provides for a dam across the upper part of the Zuider Zee for a total length of about nineteen miles. A lake of 882,000 acres in area would be formed, of which, it is understood, about five hundred thousand acres would be drained, leaving the remainder as a lake in the midst of the redeemed arable land. It is estimated that the full execution of the project will require fifteen years and will cost $44,220,000, of which two thirds would be for the dam and auxiliary works and one third for the draining.

As the result of satisfactory studies which have been made at the United States Forest Products Laboratory on methods of handling wood chips suitable for paper pulp, it is announced that Wisconsin paper companies are now negotiating with the railroads for shipment to their factories of experimental trainloads of chips of western woods adapted to paper making. In Wisconsin alone, it is stated, there is an annual market for over three hundred thousand cords of pulp wood.

Actual construction work on Mississippi's centennial exposition, which is to be opened at Gulfport next year, has begun. The state intends to celebrate the one hundredth anniversary of Mississippi's statehood, and about one million dollars will be expended on the exposition. The buildings will be of a permanent character, and at the close of the exposition the grounds and equipment will be maintained for the accommodation of midwinter fairs and other attractions.

A project for the irrigation of the Adana Plain (the Cilicia of antiquity) at a cost of £4,000,000 and requiring eight to ten years for completion, has been undertaken by the Ottoman Government. This project contemplates the regulation of the three rivers which water the plain, and will open up to agriculture 494,200 acres of land, much of which is at present arid, and also increase manifold the Turkish production of cotton, sugar-cane, lemons, oranges, and olives.

Surveys made by the extension department of the State Agricultural College show an alarming increase in tenant farming in Kansas, since the bumper crops of recent years. The tenants now farm 40 per cent of the farms in the state. The cause for the rapid increase is placed on the big crops of recent years. The landowners have made enough from their farms to retire, but do not wish to sell their land because of the steadily mounting value of farm land. The owners divide up their holdings and lease the tracts to tenants.

More than twenty oil companies have obtained from the Bureau of Mines licenses for the use of the Rittman process of gasoline manufacture, and four or five of them are making active tests of the process in its commercial application. Most optimistic reports come from some of these plants, and there is every assurance, officials say, that the process is entirely a commercial success.

Railroad extensions in China are proposed involving an expenditure of an amount estimated at $60,000,000. The projects are entirely commercial and private. Fifteen hundred miles are to be constructed through the richest sections of China, and possibly an equal amount later.

This year the shipment of potatoes from Aroostook County, Maine, will probably amount to 18,000,000 bushels, and for this great quantity the farmers will receive not less than $12,000,000.

The number of ships passing through the Panama Canal in sea going or commercial service in August was 142, while the tolls earned amounted to $417,080.

Two new companies for the manufacture of steel plates for ships and other ship-building requirements have recently been formed in Norway.

Spain possesses over two thousand miles of seacoast with one hundred ports.

"What I say unto you, I say unto all, WATCH" Jesus

Vol. XIX November 4, 1916 No. 10

Kindness

REV. JAMES J. ROME

In the tenth chapter of Luke we are told that when the lawyer who was willing to justify himself asked of Jesus, "Who is my neighbor?" he received a reply in the form of a story or parable in which was related the experience of the man who fell among thieves and was left wounded by the wayside. The priest and the Levite, we read, came along that way but passed by on the other side. No doubt they would have many ways of justifying their action. They might contend that they did not know who the man was or how he had got into his strange distressing situation, and that no doubt he was responsible for it in some way. Then they had their own feelings, position, and reputation to consider; there might be danger of causing themselves some trouble or unpleasant experience by meddling in something which was none of their business. They acted on the safe side of self-protection. When the Samaritan came along, however, he forgot to take into consideration his own interests. He saw a fellow being in distress needing the help which he was able to give, and the chief thing that seemed to occupy his attention was how he could give the most help in the best way. The unselfish feeling here displayed is one of the best examples of true kindness that could be found.

The word kindness we find is from the same derivation as that of kin or kindred,—being of the same race, kind, or family,—so that kindness in its truest and largest sense is the recognition of the brotherhood of man. The true brotherhood can be comprehended, however, only as we understand through Christian Science the unity of man with God, and the consequent close relationship of individuals to one another. The only thing that can interfere with this unity is a wrong or mistaken sense, which must necessarily take the form of unkindness in some way or other. In "Miscellaneous Writings" (p. 18) Mrs. Eddy writes, "Only by admitting evil as a reality, and entering into a state of evil thoughts, can we in belief separate one man's interests from those of the whole human family, or thus attempt to separate Life from God." Unkind thoughts are always selfish thoughts, which poison the mentality entertaining them and create discord among brethren, unless antidoted by thoughts of Truth and Love.

It is important that we consider the unity of interests among mankind. We are all very closely linked together. The welfare of one cannot be injured without affecting the interests of another, nor can one be benefited without all sharing the blessing. "None of us liveth to himself, and no man dieth to himself," says the apostle. The first to repudiate any responsibility for his brother's welfare was Cain, the first murderer on record in the Bible. But after all it was not because Cain had failed to be his brother's keeper, but because he had failed to be his own keeper that the mischief had occurred. Had he kept his own thoughts under control of kindness, he never could have committed such a breach of brotherhood.

If we could but realize that one man's history and experience is very similar to that of every other man, we might have more consideration for one another. One man's history indeed gives in miniature the history of the world. The joys and sorrows, defeats and triumphs, of different individuals are much the same, and what help and comfort we hope for from others we should be ready to give. St. Paul says, "Be ye kind one to another, tenderhearted, forgiving one another, even as God for Christ's sake hath forgiven you." On the basis of kindness rests all harmony and good will.

True kindness, however, requires the exercise of much wisdom. There may be too great an effort made in trying to be kind, and, as is sometimes the case, the only result is an interference with the freedom of another's action. First of all the motive should be examined. What seems to be kindness may not always be based on unselfishness. One's interest in another's personal welfare; his desire to have another's life molded according to his pattern, readiness to advise and direct him in his affairs, and fear that he may make a mistake,—these may be but ways of harassing and hindering instead of helping, and may even be without a spark of kindness. In fact, kindness is not manifested in the conscious effort to be kind; it is rather the simple, natural reflection of a condition of consciousness, the spontaneous expression of a heart obedient to the divine impulse.

Just here indeed is the question which decides the genuineness of the desire to help. If it is prompted by the human sense, then there is danger of officiousness and interference. This sense of personal direction is critical, severe, merciless, and under the cloak of kindness seeks to dominate and control the consciousness and interests of others, and would class all that disagrees with it under the denomination of error. It is human will-power usurping the place that belongs to divine wisdom. True kindness is the expression of divine Love. It is manifested when self-will is dethroned and meekness and humility are permitted to rule. It is displayed in gentleness, charity, consideration, tenderness, forbearance, compassion.

Mrs. Eddy says of our great Master, "Out of the amplitude of his pure affection, he defined Love" (Science and Health, p. 54). From his life we may all learn to express unselfish love in thought, word, and deed. We all have innumerable opportunities to reach out a helping hand to our brother. A smile here, a word there, a glance of approbation, an expression of appreciation or encouragement,—all go to make the loads lighter and the way brighter both for others and ourselves. The apostle James writes, "The wisdom that is from above is first pure, then peaceable, gentle, and easy to be intreated, full of mercy and good fruits, without partiality, and without hypocrisy."

On the other hand, kindness often requires the performance of duties which seem difficult and unpleasant. Helping another may necessitate the exposing of a fault; nevertheless we cannot afford to condone bad tendencies, distasteful habits, or evil indulgences in any way through a false sense of kindness. The Galilean Teacher did not hesitate to designate evil traits by their proper names. Hypocrisy and deceit he rebuked in the most scathing terms, but he wounded to heal. A true friend will speak of a failing or weakness to the one who has it, not to another, and then only for the purpose

Digitized by Google

of helping him to overcome it. If such a one is not ready to listen, then the good purpose can wait. If the attempt is made in the true spirit of kindness, however, it is never wasted or lacking in results. But, as Mrs. Eddy writes in Science and Health (p. 571), "it requires the spirit of our blessed Master to tell a man his faults, and so risk human displeasure for the sake of doing right and benefiting our race."

Kindness is also impartial, like the Principle of good which it reflects, of which Jesus said, "He maketh his sun to rise on the evil and on the good, and sendeth rain on the just and on the unjust." The desire to do a special favor for a particular friend may be prompted by the somewhat selfish pleasure of seeing the enjoyment it may give. Kindness gives out good without regard to how it is received or whether the recipient is worthy or unworthy. There is no condition or circumstance which will justify unkindness in any one. Sternness, even severity, may be required to meet wrong, but never unkindness. The presence of unkind thoughts or feelings indicates the need of self-correction, for they are always prompted by personal considerations. They are based on selfishness and can never reflect or express good. True kindness has no foes and no favorites. It is ever ready to give to all the helping hand, the cheery smile, the word of warning in danger or temptation, and the expression of appreciation and praise for work well done.

The True Metaphysical Student

MARTHA SUTTON-THOMPSON

To grasp the real import of Christian Science, to gain some sense of its infinite scope, to realize its infallibility and render unquestioning obedience thereto, one must perceive it to be a revelation from God, hence unalterable eternal truth. To believe in the inspiration of the Bible and of "Science and Health with Key to the Scriptures" by Mrs. Eddy, is a step in the right direction, but to discern intelligently these writings as revelations from divine Mind to the human mind calls for scientific understanding.

This understanding marks the true metaphysical student. To his apprehension all fundamentals of divine logic—such as the fact, substance, self-existence, supreme government and perfection of infinite Mind, and of man as Mind's idea—become self-evident. Self-evident truth alone is the rock of scientific reasoning against which "the gates of hell shall not prevail." With this basic insight and the sincere desire and purpose to find his real identity in being, no student can lose his way, no matter if he at times may seem to fail or fall. Whatever is not yet understood is given pause, with the assurance that obedience to what is already comprehended will unfold the further interpretation.

That the demands of divine Science are not fully met by Christian Scientists at their present stage of disentanglement neither discourages nor distresses the student, for he has learned that humanity cannot leap but must walk and analyze every step taken, that there must be a growing out of simultaneously with a growing into; therefore he does not shirk the demands of mental anatomy, of that dissection of thought so indispensable in distinguishing between the real and the unreal. In this scientific examination the uncovering and destruction of evil is as the unrolling of nothingness, and the appearing of good the establishing of somethingness,—even of eternal ideas, of spiritual activity, law and its operation and the resultant harmony. The turning of the lens of Truth upon himself makes the student more charitable and compassionate toward others, since it exposes mortal man's nothingness, though it reveals the real man as immortal, the son of God.

Such a student understands that the rules laid down in Science and Health for demonstrating the truth came with the recognition of Principle and are inspired and unalterable. Thus he never falls under the illusion that he has discovered any different rules or methods for exposing and destroying the false claims of sin, disease, and death. Furthermore, he recognizes the Discoverer and Founder of Christian Science as the true and only possible Leader of Christian Scientists. This impels him loyally and gladly to support and participate in all the ways and means established by that Leader for the promulgation of the inestimable truths she has given to the world. To oppose or disregard such institutions as the church, teaching, healing, lecturing, and the like would to his apprehension resolve itself into final opposition to divine Principle.

By virtue of the dissecting activity of scientific understanding the conscientious student inevitably comes face to face with every evil belief within his own mortal sense. He has battles with the stubbornness of self-will, self-justification, self-love, and hosts of other phases of self. In these struggles he may at times seem to suffer defeat, but persistence in right endeavor finally wins and increased courage and power lift him to wider possibilities. The seemingly great miracle, impartial and universal Love, he ponders deeply. His text-book teaches him that in proportion as he reflects Love does he become a genuine healer and fitted to work out for himself the problems of life.

Such a one realizes that love is not in word or in mere emotion, but must be of such an enduring fiber that evil can neither break nor bend it to its will. True love is a consciousness which rejoices in good only; it is an outflowing flood of sunlight gently opening buds into blossoms, melting frozen channels into living streams, inspiring innate goodness to activity, and wounding the obdurate, hardened heart to repentance and humility; it knows no selfishness, rivalry, envy, jealousy, hatred, malice, or revenge, but returns good for evil and blesses friends and enemies alike. Under the search-light of self-examination the student may fail to discover in his own heart enough of this regenerative quality; but he is not in despair, for he knows that in Christian Science there is a way whereby he can attain to the desired haven. His progress in this line of light may be slow or fast, but "progress is the law of God," as we read on page 233 of Science and Health, and this law is certain in its operation. After much striving and many defeats he learns the uselessness of mere petition or resolve, or of any attempt to make himself full of affection. In fact, such efforts bring no answer to his longing desire; but desire and endeavor are effectual prayers, and he is at length rewarded by the appearing of the divine highway wherein the wayfaring man cannot err. He learns that to love and to be loved one must reflect divine Love to others.

This simple yet profound rule is so evidently correct that the student wonders he did not perceive it at the beginning of his quest. Obeying the rule opens to his adoring vision another apparent mystery, that of loving his enemy. Now he finds that not only to know the nothingness of enmity but to do the so-called enemy any real good afforded by opportunity, vanquishes his own aversion and resentment and instils that compassionate affection which Jesus felt for those who maligned and stoned him. Such love does not cover iniquity, but uncovers to destroy; does not excuse guilt, but awakens the guilty to repentance and reformation. Its only purpose is to enlighten, protect, and save. He therefore schools himself not to speak of the faults of others except to further such purpose. Neither does he betray the confidences

Digitized by Google

of those who may come to him for help, but shields them from the personal condemnation and abuse of others who may be thoughtless or malicious.

And so the true Christian Scientist journeys on, rejoicing that he is not going down hill. Obedience to correct practice and to the by-laws of The Mother Church increases his light, love, humility, and potency. He is a real friend to Scientists and to non-Scientists alike, and the world becomes the object of his solicitude. He is no boaster, but his works testify that they "are wrought in God."

Our Daily Newspaper

BURTON H. WADE

ISAIAH'S prophetic words, "Go through, go through the gates; prepare ye the way of the people; cast up, cast up the highway; gather out the stones; lift up a standard for the people," are of profound significance at the present time, as is the reason which supports the call to action, namely, "that they may see, and know, and consider, and understand together, that the hand of the Lord hath done this, and the Holy One of Israel hath created it."

That *The Christian Science Monitor* represents a spiritual idea is not perhaps always recognized, even by professed Christian Scientists; and yet this is the viewpoint we must get if we are to help it to "preach the gospel to every creature." Among all the activities of the Christian Science movement there is perhaps no channel for the dissemination of the truth through which greater good to mankind at large can be accomplished than this clean daily newspaper. That it is a manifestation of Truth's activity means little or nothing to the world, for the world measures all things by material standards, and the success of a newspaper, according to such standards, is the material outcome of dollars and cents as computed in circulation or contracts for advertising space. The Christian Scientist, however, measuring all things by the standard of perfection, is looking for a higher ideal than the material, and therefore sees in the *Monitor* an ideal in Mind seeking expression.

If it were possible to describe this daily newspaper in a word-picture which would be adequate in fixing its beauty and perfection in the thought of those who read it, whether in the workshop, the office, or the home, then we might hope to convey something of Mrs. Eddy's conception of its importance to the world. Her prophetic vision must have seen the perfect *Monitor* going out over the world like Malachi's figure of the "Sun of righteousness . . . with healing in his wings."

Mrs. Eddy was an idealist of the highest type, and she believed in putting her idealism into practical use. Thus the *Monitor* became the natural result and manifestation of true idealism. On page 14 of Science and Health she writes, "Entirely separate from the belief and dream of material living, is the Life divine, revealing spiritual understanding and the consciousness of man's dominion over the whole earth." As this truth is revealed to us, even in a small degree, and the material fetters which bind human sense are loosened, we discern the spiritual significance of Jesus' teachings and exchange our human concepts for spiritual ideas. Thus we can exchange our material concept of the *Monitor* as an ordinary daily newspaper for the right idea, the spiritual *Monitor*.

From the ordinary viewpoint *The Christian Science Monitor* is a material means of gathering the world's news and presenting it in concrete, readable form. Its advertising columns are filled with news of the shop, the factory, and the mine, showing the activities of almost every human endeavor and advertising articles for sale covering every individual need. Spiritually regarded, this newspaper sends forth a demand for perfection, and nothing less will satisfy those who are striving to obey the command, "Be ye therefore perfect, even as your Father which is in heaven is perfect." The *Monitor* will therefore grow in perception of the needs of mankind, and become more and more a channel for the healing message to the world, in proportion as Christian Scientists exchange their material concepts of a daily newspaper for the spiritual understanding of it as a divine idea.

As our Leader has said, "The object of the *Monitor* is to injure no man, but to bless all mankind" (Miscellany, p. 353); therefore its universal nature may be readily seen and understood. The entire fabric of its organization and endeavor is based on Principle; hence it stands for the right at all times and in all places, never temporizing with error in any form. It supports the good and brings out the best in individuals and places. It cannot be used for personal ends or personal gain. Like the Christ-idea, it blesses all who come under its influence, but it must be read and its character studied in order that its real intent may be taken into consciousness and its worth realized.

A limited conception of the *Monitor* as a daily newspaper might argue for a mere local journal with a name typical of home or country, but we have already a sufficient supply of these. To localize the paper and call it after the name of some person or place would at once nullify its mission and overshadow its power as the champion of a great world movement. It stands for true Christianity in human affairs, for all that is good and pure and true. Its power and scope is truly universal and inexhaustible. It is fast breaking down the barriers of prejudice, and is scaling the walls of intolerance and opposition erected by material theology and medicine. Wherever it lessens evil, whether at home or abroad, it makes the healing work of Christian Scientists just so much easier.

The question, Do Christian Scientists appreciate what they have in the *Monitor*? ought always to be answered in the affirmative. All should be alive to their great opportunity and privilege, and thus the circulation and influence of this newspaper would be measurably increased. It is even possible that if Christian Scientists everywhere had obeyed Mrs. Eddy's behest to "subscribe for and read our daily newspaper" (Miscellany, p. 353), the slumbering consciousness of the world would have been awakened to such an extent that it might have been healed of its evils without the present chemicalization denominated as war.

Much has, however, been accomplished through the influence of the *Monitor* in awakening the public conscience to the need of better laws, better government, and a higher standard of citizenship, but there is very much more yet to be done if we are to "proclaim liberty to the captives, and the opening of the prison to them that are bound." The crying need of suffering humanity was never more pronounced than at the present moment. Those grateful ones who themselves have been liberated through the ministry of Christian Science, and who have consecrated themselves to the service of humanity, must rise to a higher appreciation and understanding of that powerful advocate of truth and justice, *The Christian Science Monitor*.

It is of little consequence if we subscribe for this paper and do not read it, but unity of action, the reflected operation of the one Mind, will certainly accelerate the Christian Science movement. When Christian Scientists read this daily newspaper from Mrs. Eddy's point of view and recognize the universal healing that is carried forth from its pages, there will come a greater awakening, also an acknowledgment of the healing efficacy of Christian Science, and we shall be

Digitized by Google

nearer the accomplishment of all our right desires, the destruction of all that is unlike God, good. We can then echo the sublime strain of the prophet: "How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace; that bringeth good tidings of good, that publisheth salvation; that saith unto Zion, Thy God reigneth!"

Overcoming Laziness

ISABEL HILLIER

One of the most valuable lessons that Christian Science teaches us is the distinction between the guiding voice of divine Principle and the whispers of personal sense. The first time this was brought sharply home to the writer was in the early days of our branch church, when the thought of having a Sunday school was first presented. The idea seemed excellent and I was quite in full accord with it until the friend who had been speaking of it went on to say that the board thought of asking me to be a teacher. This seemed to make the whole undertaking quite different and I said at once that it was out of the question. She however advised me to think it over, as the board meeting would be held a few days later.

For the next few days I was in a mental turmoil. Personal sense argued that it was not honest to undertake work which one was incapable of performing, that it was unfair to the children, and so on. I seemed to see myself sitting there while the children waited expectantly and I sat dumb before them; or worse still, I saw myself beginning and then not being able to go on. The night before the meeting I was firmly determined to refuse the position, but the next morning I found myself still arguing and feeling dissatisfied. I retired to my room and prayed earnestly that I might be guided to a right decision and not be influenced by personal inclination. The psalmist's petition, "O Lord, . . . lead me in a plain path," was my prayer, and immediately the answer came, "Freely ye have received, freely give." After this there could be no hesitation, and I was filled with a sense of thankfulness that there was any work I could do to show my sincere gratitude for all I had received in Christian Science. There was just one moment of fear when I took my place the first Sunday, but the help of divine Mind was at hand: "It shall be given you in that same hour what ye shall speak." Since then there has never been any difficulty, for the treasures of Truth are inexhaustible and the Sunday school work is not, in the final sense, in the hands of persons, but is governed by the divine Mind.

After careful self-analysis one finds that mortal mind is essentially lazy. Even an apparently active person is often fast asleep on certain points; and in addition to fear of taking office there is the holding back from giving testimonies. Error is never so subtle as when it masquerades as goodness and honesty, and to do this it gives pretty names and artistic drapery to some of the most deadening conditions of thought. For instance, an individual will say, "I shall give a testimony when the right time comes; but one must not force things and it should be a spontaneous outpouring of gratitude which impels one to stand up." The one thus influenced settles down comfortably, while others are voicing truth. Some excuse themselves with our Leader's admonition, given on page 485 of Science and Health, "Emerge gently from matter into Spirit." Quite so; by all means let us "emerge gently," for the kingdom of heaven cannot be taken by violence, but we should be quite sure that we are emerging. Over against the sense of reluctance, let us set the command found in the epistle of James, "Resist the devil, and he will flee from you;" and again, Mrs. Eddy's words, "Rise in the strength of Spirit to resist all that is unlike good" (Science and Health, p. 393), proving that there are times when we must wake up, throw off all sense of lethargy, and take the initiative.

Let us carefully analyze our motives for not giving testimony. The most frequent excuse is timidity or "nervousness," but one should remember that when he refrains from giving a testimony for this reason, he is admitting that his sense of error is greater than his gratitude. When we are really grateful this will sweep away all our fear. Another reason given for keeping silent is that one cannot speak well; but there may be people present whom the simplest testimony would help,—and they are not going to take any notice of imperfect construction or of possible grammatical mistakes. They only want to know that the speaker was healed, and it matters not how he tells it. We must remember that it is the Christ-idea which voices truth and the truth-seeker who is listening. After all, if there is any criticism it is only mortal mind criticizing itself.

Another reason given for silence is that one has nothing definite to say; but if one has nothing else to be thankful for, there is the fact that Science and Health has illumined the teachings of Jesus. It is almost impossible to conceive of any one having studied Christian Science for ever so short a time without having something for which to be thankful, and it matters not how small or insignificant may seem the problem one has had to solve, we know that back of the smallest detail in our daily lives there is the great truth that we stand forever in the presence of divine Love and Life. In the proportion that we grasp this knowledge and utilize it we are freed from all fear and rise above all mental laziness and inertia to true activity.

Seeking the Light

NELLIE GARDNER MASON

Upon one occasion, while exploring a partially darkened cellar, I observed a quantity of potatoes which had sprouted, and my attention became focused on a long sprout which had entered a fissure in the cellar wall. On investigation I perceived that it had pushed its way through the narrow aperture to the light outside, and on the tip were little leaflets unfolded. I could not help but be impressed by this evidence of the tremendous vitality of all that expresses life, and its tendency to dislike darkness and pursue light. Thus human sense is drawn by divine Mind to seek for and to find a loophole of escape. In the case of the potato vine, as soon as the encompassing walls were left behind and air and sunshine reached, the pale leaflets started,—an indication that no manifestation of life can be suppressed by so-called false environment.

Since I became interested in Christian Science, this incident has been vividly recalled, and the lesson conveyed has become a valuable and significant one. The seemingly inert tuber, reflecting life, could not be satisfied with an unnatural position and surroundings, or remain inactive. Movement must be manifested, and the new growth crept day by day along a difficult path to the fissure in the cellar wall. Without fear or hesitation it entered the tunnel in the hard stone and crept on through a winding passage, seeking the light of day.

Material beliefs can sometimes be used to point a valuable lesson. Therefore it may be said that mortal man leaves the prison of erroneous belief by a process similar to the one described above. His environment is not satisfactory, and he finds no real rest while at home in the senses. The dawn comes when a new life, a purified desire, is born, and mortal

Digitized by Google

man starts to grow away from his limited and darkened sense of things. He seeks, consciously or unconsciously, the light of life in God. His journey from sense to Soul may seem to be hindered by obstructions which he must pass over or through in demonstrating their unreality, and the apparently solid wall which confronts him is the belief of life and intelligence in matter. But divine Love always furnishes an opening through which he may pass; it is the way of Truth, pointed out to this age by Mrs. Eddy in the text-book of Christian Science, "Science and Health with Key to the Scriptures."

Human sense enters this way in quest of healing from sin or sickness. As progress continues, relief will be realized with subsequent seasons of rejoicing; there may also seem to be seasons of doubt and fear, because of the apparent closeness and solidity of the walls of material belief and the narrowness of the path, until spiritual understanding is gained. But when the seeker of the light learns to wait patiently on God, he cannot go back; he must press on, and so he continues his journey. Discerning the light of Truth more clearly, he forges ahead with confidence, and when he emerges into the beauty and infinitude of the spiritual universe, he immediately blossoms into praise, gratitude, love, and joy, for he has reached the Father's house,—the spiritual realm of all good.

Good Literature

JESSE L. SANDERS

For eight years the writer was employed in one of the United States post-offices as carrier and clerk. His duties as carrier consisted in delivering letters and papers to the homes of patrons, and as clerk it was part of his duties to sort the mail on a table and place it in boxes for the different carriers. About twelve thousand people received their mail through that office and it was possible to notice more or less accurately what the community as a whole was receiving for its reading. There were newspapers of all kinds, containing as usual descriptions of disease and crime; there were also almanacs and advertisements of medicines, sometimes from six to twelve sacks of them at a time, the last named naturally containing detailed descriptions of various diseases. All this was going into the homes of suffering humanity to be read, and sometimes even read aloud in the hearing of little children. Sometimes a look at this great mass of literature would make the heart grow faint.

Fortunately, however, it was also sometimes my privilege to be working when the sack containing the *Sentinels* would come in, and I would always open it with eagerness to see if any new names were added to the list of subscribers. Small as the little bundle would be (usually from twenty to twenty-five copies), it seemed that it was all there was in the way of reading matter to offset the great mass of other literature. Sometimes a number of pieces of literature would come through from our state publication committee and some copies would be mailed to addresses where it was felt they would be welcomed. On these occasions there was always silent rejoicing on my part.

Since leaving the Government service I have been engaged in a work which takes me into three or four hundred homes each week, and chiefly of the very people who were recipients of the mass of literature first described. Almost every hour I have been forced to see some traces of its evil effects. All the periodicals issued by The Christian Science Publishing Society are silent messengers of health, joy, and peace sent into many homes, and their beneficent influence should be extended into many more, for truly humanity hungers for good literature.

Selected Articles

[Judge Clifford P. Smith in *Springfield* (Mass.) *Republican*]

The address in which Christian Science was said to be a failure, reported by a correspondent, refuted itself. If Christian Science were a failure it would not arouse opposition; sectarian opposition is significant proof of its success. Moreover, the persons who have studied Christian Science and put it into daily practice are the persons who know whether it is a success or a failure. And these persons, with few or no exceptions, are satisfied with it. For one who has approached this teaching only as an opponent, to get up in a public place and call it a failure is fatuous.

In this instance the speaker added that Christian Science is based on Hinduism and that it makes God a mere abstraction. Every one who has read the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, in an unbiased manner, knows that it is based on the Hebrew and Christian Scripture and that it is related, by history and content, only to Judaism and original Christianity. To Christian Scientists this religion does not teach that God is an abstraction. If it gives this impression to opponents, they would better study its teachings more intelligently. To Christian Scientists the terms which their religion uses to define God are concrete, vital, deific. Moreover, they are provable in daily experience.

Furthermore, Christian Science does not rely alone on words to define the nature of Deity. Thus in Mrs. Eddy's Message to The Mother Church for 1901, she said (p. 1): "As Christian Scientists you seek to define God to your own consciousness by feeling and applying the nature and practical possibilities of divine Love: to gain the absolute and supreme certainty that Christianity is now what Christ Jesus taught and demonstrated—health, holiness, immortality."

✧

[Charles W. J. Tennant in *Norfolk* (England) *Chronicle and Post*]

A correspondent says, "Christian Science is false to both the word Christian and the word science, because of its private meaning put upon words in common use." Let us examine this statement.

I find the definition of a Christian, in Webster's New International dictionary, to be, "one who believes, or professes or is assumed to believe, in Jesus Christ, and the truth as taught by him." Now there is no "private meaning" in this, and it is exactly what Christian Scientists believe. The Bible lays down, in language which cannot be mistaken, the way by which a Christian shall be known for all time: "By their fruits ye shall know them." "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do." It is a mere matter of history that for two hundred and twenty-five years after the ascension the early Christians raised the dead as well as healed the sick through their spiritual understanding of truth; that Elijah and Elisha, some eight hundred and ninety-five years before Jesus' time, raised the dead and healed the sick, multiplied oil and meal, and made iron to swim.

Does our critic not see from this that there is a divine Principle sustaining, maintaining, and containing the universe, and that those who are spiritually minded, or who have the Mind "which was also in Christ Jesus," can understand it and prove it by demonstration? The law of God which was

Digitized by Google

brought into operation by the spiritual understanding of Elijah, was precisely the same law which enabled Jesus, the disciples, and the early Christians to perform similar works. It is the same spiritual law which Mrs. Eddy discovered, and has explained so clearly in her book, "Science and Health with Key to the Scriptures."

Again, I find the definition of science as follows: "Knowledge classified and made available in work, life, or the search for truth." This again is no "private meaning" of the word, and it is the meaning accepted by Christian Scientists. In short, Christian Science means Christian knowledge. There is nothing mysterious about it. Christian Science teaches, in conformity with the Bible, that "God is no respecter of persons." He is "the same yesterday, and today, and forever," and will do for every one in the twentieth century what He has done for those in the past, provided they gain the Mind of Christ.

✧

[Henry Van Arsdale in *Riverside* (Cal.) *Press*]

In an account of a lecture before the teachers' institute held at Riverside the doctor stated to his audience that Christian Science is a good psychology, and that he made this statement because of his observation that the practice of Christian Science eliminates fear. There are many definitions of psychology, but if the doctor uses the word in its higher sense,—that is, in the sense of ontology or the science of true being,—then Christian Scientists would agree with him. Christian Science does not eliminate fear through any process of a dominating human mind, but through an apprehension of the fact that because God is Love and God is ever present, therefore Love is ever present. The apostle John elaborates this point in his first epistle, concluding with the positive statement, "There is no fear in love; but perfect love casteth out fear." It is an understanding of this which enables a Christian Scientist to eliminate fear.

✧

[William E. Krupp in *Post-Chronicle*, Morgantown, W. Va.]

The report of an address by the dean of the school of medicine of our state university misstates the facts regarding Christian Science and its Founder, Mary Baker Eddy. In the first place let it be understood that neither Christian Science nor Christian Scientists have any quarrel with the medical profession; most of us in our earlier years have had occasion to be grateful for the gentleness and kindness of the family physician and to appreciate his devotion to duty.

Indeed, as Christian Scientists we honor and respect all good and true men and women who have unselfishly labored in the cause of humanity, who have sought to relieve the distresses of the world in whatever form manifested and by whatever means or methods. This does not mean that we agree with them in their views and methods, but it does mean that we recognize and appreciate their earnest endeavors and sincerity of purpose,—certainly traits which Christian Scientists seek to cultivate, and which are not to be condemned. We therefore take no issue with the doctor as to the honor which should be accorded those of his profession whom he mentions, nor the amount of praise to which they may be entitled.

We may be pardoned, however, in submitting that the doctor might well have confined his comparisons to those of his profession. Particularly may we question the propriety of his effort to bring into comparison and contrast the Leader of a religious movement that within her lifetime encircled the globe, and that numbers among its adherents thousands upon thousands of earnest, sincere, and intelligent men and women. Mrs. Eddy's one great offense to theology and medicine has been that she inaugurated a religious awakening which has restored to religion the "lost element of healing" (Manual, p. 17) taught and practised by the Master, and has been the means of lifting sick and sinning humanity from a state of misery and suffering from which the present-day schools of theology and medicine offered no hope of relief except through death. Well might she ask with the Master, "For which of those works do ye stone me?"

Yes, Mrs. Eddy did pray for wisdom, and—what seems incomprehensible to the schools of theology and medicine—her prayers were answered, with the result that she was instantly restored to health, although the attending physicians had declared that nothing could save her from the fatal effects of an injury with which she had met but three days before. To the consternation and amazement of all she arose from her bed—healed. Here was the proof she had sought, the consummation of her years of research and experiments in medicine, and her study of the words and works of the Master. Thereupon she devoted herself exclusively to the study of the Scriptures, gained the spiritual understanding of the teachings of the Master, and proved her understanding of the truth of his teachings by healing all manner of sickness and of sin. The results of her labors she gave to the world in the form of a book, "Science and Health with Key to the Scriptures," which has proven to be the gift of the age to sinning, suffering humanity. Through a study and comprehension of its teachings men and women are everywhere proving its truth, with the "signs" of regeneration and healing which the great Teacher declared would follow the understanding of him, when he said, "He that believeth on me, the works that I do shall he do also."

Mrs. Eddy sought not to monopolize her discovery, nor did she exact and extort exorbitant fees for the healing of those who were without a hope in the world. No priestly class or profession can claim the exclusive possession of her discovery, but she gave it to all humanity, and in such form that all may obtain and possess it. And what if she did have the book copyrighted? This is the common practice of authors, and should she not be entitled to the fruits of her labors? What if she did leave an estate of two million dollars? The fact remains, which the doctor did not state, that after providing generously for relatives and close personal friends, and recognizing and applying the basic law of the brotherhood of man, she left her estate in trust and devoted it to the cause of humanity.

✧

[John L. Rendall in *The Gate City*, Keokuk, Iowa]

Our critic's original claim is, as I understand it, that Christian Science in its teachings and practice, and because of its healing work, is contrary to fundamental Christianity, and in support of his contention he has presented various selections from Science and Health, and other selections from the Bible, which in his opinion are contrary one to the other.

He is of course entitled to his opinion. This, however, does not disturb the convictions held by hundreds of Christian people who are the beneficiaries of Christian Science, that its teachings are in exact accord with the Bible. If our critic could see Christian Science without the bias of his preconceived theological ideas, he might be better able to glean from its teachings some measure of the good which has come into the experience of individual Christian Scientists, and he would thus be freed from judging unrighteous judgment.

The assumption that the dictum of scholastic theology as to what constitutes "fundamental Christianity" must be accepted without question, was better suited to the dark ages than to the present time. Today people are demanding and

Digitized by Google

expecting practical proofs rather than professions, and this is one of the reasons that Christian Science is finding such ready acceptance.

Now as to "fundamentals," either Jesus taught and practised Christian healing, or he did not. Either his disciples followed his example, or they did not. Either the early Christians in like manner practised Christian healing as fundamental to Christianity, or they did not. If Jesus and his disciples and the early Christians did this (and it is abundantly proved that they did), then Christian healing must be an essential part of the Christian religion as it was understood by them, and no amount of sophistry can change this fact.

To state that the time has passed when this proof of God's loving care is necessary, is simply to beg the question and to mislead thought. The time is not passed, and there is the same necessity and the same opportunity today as in Jesus' time to prove that God's loving care is just as much for the benefit of the sick man as it is for the sinner. Moreover, Christian healing is now being practised, and with success, by Christian Scientists all over the globe. They are proving the verity of the statement: "Jesus Christ the same yesterday, and today, and forever," and are also proving the fact that God is without variableness or "shadow of turning."

If it be true that God is without variableness or "shadow of turning," then what He has established and created stands forever, and His methods at one time must be His methods throughout eternity. We have abundant authority in the Scripture for believing that God is the healer of the sick. Perhaps the first instance mentioned is to be found in Genesis, wherein we read: "And God healed Abimelech, and his wife, and his maidservants." In Exodus we read: "And ye shall serve the Lord your God, and he shall bless thy bread, and thy water; and I will take sickness away from the midst of thee." In II Kings we have the instance where Elisha healed the child of the Shunammite, and in the fifth chapter the instance of the healing of Naaman the Syrian.

Let us remember as we proceed that God is without variableness or "shadow of turning." Again, we have the counsel in Psalms, "Bless the Lord, . . . who forgiveth all thine iniquities; who healeth all thy diseases; who redeemeth thy life from destruction; who crowneth thee with lovingkindness and tender mercies," and the declaration, "He sent his word, and healed them, and delivered them from their destructions." In Matt. x. 1, 8, we have the instance where Jesus sent out his apostles to heal; also in Mark iii. 13-15, vi. 7, 13, Luke ix. 1, 2, 6, and x. 9, 17. In Mark xvi. 18, we read where Jesus gave this word to all believers: "They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." Let us at this time remember that these are Jesus' words. They are Jesus' promises to all them that believe throughout all time.

✧

[Robert S. Ross in *Rochester* (N. Y.) *Union and Advertiser*]

Neither the clergyman whose remarks were referred to in a recent issue, nor any other person, can truthfully say that Christian Science is a "gigantic delusion that has deceived many," unless it is an error to acknowledge that God, good, is the one and only power. That which God creates is forever; it cannot be destroyed. If God were the creator of evil (and popular opinion believes that He is), then evil would be eternal, and all efforts to destroy or overcome it would be useless.

Christian Science declares that God, divine Love, never made evil. All that God made is spiritual and good, and He made all. Therefore matter and evil have no reality; they are the projections of false belief referred to by Paul as "carnal mind," and by Mrs. Eddy in Science and Health as "mortal mind" (p. 591). The understanding of this lets in the light of Truth, deprives evil of its seeming power, and opens the way whereby mortals may confidently and successfully resist both sin and sickness. If our critic and those who heard his sermon would study Science and Health, they would find nothing in it that conflicts in the least with the teachings of Christ Jesus, for Christian Science and Christ's Christianity are one.

✧

[Thomas F. Watson in *Petaluma* (Cal.) *Argus*]

A clergyman in an address on "Spiritual Healing" took for his subject, "Does Christian Science Meet All Demands?" His remark that it was evident "God had given medicines to the world for the good of mankind" is not corroborated by Scripture, nor have we any record that Jesus or his disciples used medicines in healing the sick or recommended them to others. When the disciples brought to Jesus the case they had failed to heal, he did not suggest a material remedy or medicine, but rather rebuked their lack of faith, implying that more faith or spiritual understanding was necessary in order to heal the case. The Master said, "I am the way, the truth, and the life," and again he said, "Follow me." Peter healed the man who was lame from his birth, and this without medicine, but rather "in the name of Jesus Christ of Nazareth," which means "in the faith of his promise, in obedience to his command" (The Popular and Critical Bible Encyclopædia).

In Acts we read of Paul's healing from the viper's sting, also the healing of the father of Publius, and of many others through prayer. In his epistle to the Philippians Paul said: "Those things, which ye have both learned, and received, and heard, and seen in me, do." According to history the early Christians for nearly three centuries healed the sick and raised the dead through prayer, in fulfilment of the command of Christ Jesus.

To say that Christian Science "refutes and denies fundamental statements of the Bible," is a great mistake, for Christian Science, as its name indicates, is the Science of Christianity, and is based on the teaching of the Bible. Jesus' great commission to the twelve, as given in the tenth chapter of Matthew, is rightly considered as fundamental Christian doctrine. In this chapter Jesus bade his disciples preach the gospel and heal the sick, and this is what Christian Science is doing.

Christian Science is the voice of God to this age, leading mankind to return to primitive Christianity. Through its ministrations the sick are healed, the sinner is reformed, the sorrowing are comforted; and the Master said, "By their fruits ye shall know them." On page 347 of "Science and Health with Key to the Scriptures" Mrs. Eddy says: "Is it error which is restoring an essential element of Christianity, —namely, apostolic, divine healing? No; it is the Science of Christianity which is restoring it, and is the light shining in darkness, which the darkness comprehends not." Christian Science undoubtedly meets all demands, for the demand of this age is for a demonstrable religion, one of works rather than words, of practice rather than mere profession, for, as Mrs. Eddy has said in Science and Health (p. 241), "The error of the ages is preaching without practice."

✧ ✧ ✧

We act as if we were alone in the world, fighting a solitary battle against an invisible foe; as a matter of fact there is no unseen foe and our only battle is with ourselves.

Editorial

Speaking Plainly

Some who come to Christian Science seem to think that in accepting its teachings they will thereby be placed upon a sort of Aladdin's carpet which will carry them into the kingdom of heaven without effort on their part. Such a conclusion is not in accord with the teachings of Christ Jesus, nor is it borne out by the experience of Mrs. Eddy. Those who know the story of her years of trial and endeavor recognize it was out of her own experience that our Leader wrote of Jesus of Nazareth, "He did life's work aright not only in justice to himself, but in mercy to mortals,—to show them how to do theirs, but not to do it for them nor to relieve them of a single responsibility;" and again, "The God-inspired walk calmly on though it be with bleeding footprints, and in the hereafter they will reap what they now sow" (Science and Health, pp. 18, 41).

To those who have carefully studied our Master's sayings, it is quite apparent that he did not hold out a promise of a royal road to those who should merely accept his teachings. On the contrary he coupled his promises with conditions which must be fulfilled by his followers before they could claim the promise; in other words, they must earn the coveted "Well done." An instance of this is given in the eighth chapter of John's gospel, where it is written that he said to those Jews which believed on him, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." According to this saying his disciples were to continue in the word of the Master—to follow his precepts and example; thus only could they know the truth which would make them free.

Jesus understood that in reality man in the image and likeness of God, divine Mind, knows the truth and is free; but it was to the human sense that he was appealing, and he spoke relatively because it was necessary for him to speak within the limits of human comprehension in order to be understood, and because it was necessary for each one of his hearers to work out his own salvation. So too in Mrs. Eddy's sayings the condition and the promise are coupled just as Jesus coupled them. For instance, on page 144 of Science and Health she writes, "When the Science of being is universally understood, every man will be his own physician, and Truth will be the universal panacea." This is not a bare promise; the condition is present and it is to be fulfilled before the promise becomes operative. Our Leader knew when she wrote these words that in reality "the Science of being is universally understood," and that Truth is indeed "the universal panacea," but she also knew that this is as yet only partially apparent to the human consciousness. Therefore, since she was endeavoring to lead this consciousness out of itself into the realization of absolute Truth, it was as necessary for her to speak in the language of this consciousness as it was for Jesus to "suffer it to be so now" in order that all righteousness might be fulfilled.

Not only is it necessary for Christian Scientists to know that there is need for them to work out their own salvation, but they must adapt their explanations of Christian Science to the comprehension of their hearers if they would be successful in their ministrations to a world that is hungering for a better understanding of God and of man's relation to Him than it has generally grasped—an understanding which will win for them fulfilment of our Master's promises. Christ Jesus purposely spoke in parables which were not understood by those who were antagonistic to him, yet to those willing to receive his teachings his language left no possibility of misunderstanding. In this as in the fundamentals of Christianity Mrs. Eddy was his willing disciple. Both spoke to human consciousness, and both spoke in terms which were understandable by those who were ready to hear.

Would it not be well for all Christian Scientists to take a lesson from this manner of speech, and to see that they too in presenting the claims of Christian Science are wise enough not to talk over the heads of those who have come to hear and hope to understand. It is not necessary to be cryptic in order to be scientific, nor platitudinous in order to be profound. We say this because it sometimes happens at the Wednesday evening meetings, and in conversation, that Christian Scientists in their efforts to appear absolutely scientific become so indefinite and mysterious in their statements that their hearers become bewildered, and the good which their testimony was intended to do is very largely lost. To this false sense Mrs. Eddy gives the needed rebuke in the article "Inconsistency" on page 235 of Miscellany.

Archibald McLellan.

✧

"What seest thou?"

In studying the Old Testament Scriptures we find that on many occasions the truth was presented in a symbolic way to the prophets. Thus came the word to Jeremiah, also to Amos, and again to Zechariah, and on each occasion the prophet was asked, "What seest thou?" This question is of special significance to Christian Scientists because it calls for a clear discrimination between the evidence of material sense and the manifestations of reality discerned by spiritual sense. Zechariah saw Truth's idea symbolized by a golden candlestick, and again as a "flying roll" entering the homes of men to destroy error. On page 360 of Science and Health Mrs. Eddy says: "Dear reader, which mind-picture or externalized thought shall be real to you,—the material or the spiritual? Both you cannot have."

In thinking upon this we cannot do better than study earnestly the demonstrations of Christ Jesus when he was confronted by the evidence of sin and sickness, of storm and tempest, and even of death itself. When he was approaching the city of Nain with some of his disciples, they met a funeral procession carrying a widow's only son to the place of burial, and if any one of those in the cortège had been asked by the Master, "What seest thou?" he would undoubtedly have answered, "A dead man on his way to the grave." As we read the record, however, in the light of Christian Science, we can see that the Master never for a moment accepted any such evidence, for he stepped up to the bier and addressed the young man as we might address any one whom we knew and who was expressing perfect health. He simply said, "Young man, I say unto thee, Arise;" and when the young man obeyed this command, Jesus restored him to the erstwhile sorrowing mother.

Again, we are told of a storm on the sea of Galilee, when even those who had been accustomed to the perils of the deep from their earliest days cried out in terror, "Save us: we perish." Here again the great Teacher challenged their acceptance of material evidence, and asked, "Why are ye fearful, O ye of little faith?" If this question were asked of many professed Christians today in like circumstances, they would most likely be filled with indignation at its apparent disregard of their human danger; but in this case, too, the question comes down through the ages, "What seest thou?" When Jesus answered it for the troubled disciples, and when they accepted his spiritual interpretation of the condition before them, as he demonstrated man's God-

Digitized by Google

given dominion, we are told that there was a great calm. The same would prevail today in every storm of human sense if we always knew enough to listen to the question of divine Truth and steadfastly refuse to accept any other answer than that given to Zechariah, namely, "This is the word of the Lord . . . Not by might, nor by power, but by my spirit, saith the Lord of hosts."

We read that on the morning of Jesus' resurrection his sorrowful followers came to the tomb for the purpose of bestowing the last honors upon the body of their beloved Teacher. They came expecting to see a dead body, but instead they beheld a vision of angels, who said to them, "He is not here: for he is risen, as he said." We are also told that as Mary looked into the tomb, almost blinded by her tears, she saw two angels sitting in the place "where the body of Jesus had lain," and they said to her, "Woman, why weepest thou?" Then, as she turned away from the tomb, she saw Jesus himself; but because she was not looking for the living Lord, she did not know him. He however asked her the same question to which she had just listened, "Woman, why weepest thou?" and then there was given to her that revelation of man's relation to God which, had it been understood in the intervening centuries, should have opened the tomb for every one of his professed followers, for he proved to Mary that death has no dominion over man, and he also assured her that his Father was our Father and his God our God. Mary then went forth as she was bidden to tell those who would listen that she had "seen the Lord."

ANNIE M. KNOTT.

Joyful Unfolding

THE student of Christian Science soon reaches the comforting assurance that he is not expected to create right conditions, but rather to see them unfold. This assurance is apt to bring great relief. Perhaps there may have been a temptation to ferret out evil, or to admit a sense of responsibility concerning the wilfully wayward. Then Christian Science, piercing the gloom, showed the way of joyful unfolding through the realization of Truth. Daylight dawns and shadows flee away.

Under the definition of "Day" in the Glossary of Science and Health, Mrs. Eddy writes: "The objects of time and sense disappear in the illumination of spiritual understanding, and Mind measures time according to the good that is unfolded. This unfolding is God's day, and 'there shall be no night there'" (p. 584). In John's revelation of the kingdom of heaven there was no material light, and there was no need of material sun or moon, since God's presence supplied the only necessary light and excluded darkness and night. In human experience, however, there seem to be nights as well as days, twilights as well as dawns, which means that there are times of greater or less spiritual enlightenment and even moments of deep darkness for mankind. Every practical Christian Scientist, willing to be evangelized by the demands of God, recognizes these gloomy experiences as transitory and as capable of being turned to spiritual profit. The question invariably presents itself in these hours of temptation and test, when the grain is being separated from the chaff upon the hard floor of tribulation, whether the occasion is to be made one of mere plodding effort or of joyful unfolding. Shall the trial by fire in which the wood, hay, and stubble are burned and the gold is refined, be regarded as a calamity or recognized as a means of purification and of growth?

The delicate ferns and the spreading bracken unfold their fronds in springtime within the shadow of the forest. They do not fear to grow by unfoldment. The spiritually-minded must permit their God-given abilities to unfold and develop under the tender protection of Science, rejoicing the while that they are witnessing the real creation, the revelation to human apprehension of that which has always been. In that wonderful chapter entitled Genesis, in the Christian Science text-book, the meaning of which dawns upon the comprehension of the astonished student as nothing short of a divine revelation, we read: "There is but one creator and one creation. This creation consists of the unfolding of spiritual ideas and their identities, which are embraced in the infinite Mind and forever reflected" (p. 502).

What a prospect then for the Scientist mindful of this interpretation and of the promises it infolds which are ready for instant unfoldment! Through good and evil report, mid storms and aggressive attacks, surrounded by friends or foes, watching at night or welcoming the rising sun,—at all times and in all ways the Christian Scientist may hold himself ready to see reality spread its priceless treasures before him. At every moment of his career he may realize that creation is not the act of making something out of nothing, but rather of unfolding that which already is. The belief in matter, space, time, physical sense, in the desires of the flesh, in personality, error, fear, hate, and death, having been steadily brushed aside by the hand of revealing Truth, there will eventually remain only the transcending beauties and eternal qualities of real being.

In proportion as human understanding is receptive of this revelation, does the spiritual activity of true creation go on apace. Human character unfolds like the forest fern at the touch of Love's benediction; positive truth sweeps away negative error, and the moments of seeming darkness grow less frequent and of shorter duration as the gleams of revelation become more regular and their rays draw closer together in order to create the final effulgence of perfect understanding. Then shall not this growing time be purged of foolish repining, useless speculation, and self-pity, and become to us more and more a season of joyful unfolding?

WILLIAM D. MCCRACKAN.

Letters from the Soldiers

WE are glad to publish the following excerpts selected from a large number of letters of appreciation received by the literature distribution committee of First Church of Christ, Scientist, Berlin, Germany, from soldiers at the front who have been supplied with Christian Science literature furnished to this committee by the Trustees under Mrs. Eddy's Will.

"For quite a while I have felt the desire to inform the esteemed committee of the following with regard to their splendid plan of distribution.

"Our soldiers, myself included, were stationed until July 18 in one place, which made it possible for me to distribute the literature sent and to exchange the various books after they had been read. These publications found ready acceptance and after a while were being exchanged among the men in the spirit of comradeship, and every one of the soldiers spoke in high terms of praise with regard to their contents. They all asked whether they might keep them, and I told them that they were a token of love for all those who found them worthy of their interest."

"Having received the pamphlets and the *Herold* which you so kindly sent me, I wish to convey to you the expression of my sincere appreciation. I enjoy ever so much reading this literature and find it excellent. When the Christian religion is understood in the light of Christian Science, one's eyes are

Digitized by Google

opened to its blessed nature. I would be very glad indeed to receive other pamphlets."

"Please accept our very best thanks for the copies of the *Herold* and for the pamphlets. Several of my brother soldiers have borrowed these publications from me, and the hardships through God's help have seemed much lighter and have been stood far better than in the case of the other comrades. I hope that you will continue to assist and help us in becoming started in the only true way, as pointed out by Mrs. Eddy."

"I have just received the parcel containing the *Herold* and other valuable literature which you so kindly sent me, and I am very happy that my wish has been realized.

"These publications, in connection with your text-book, 'Science and Health with Key to the Scriptures,' are of inestimable value. I thank you with all my heart for the kindness you have shown me. May God bestow His grace upon me that I may progress in the way of truth regardless of all opposition which I may encounter. My endeavor shall be to overcome evil with good. I may add that during my military service thus far I have experienced God's love anew every day. I feel His fatherly love, and know that He is mercifully nigh and stretching out His hand for my guidance.

"I am in good health and doing well, and my superiors' attitude is one of kindness toward me. For this I thank God and give Him alone the glory."

"The literature sent on the 20th inst. has been received. Please accept sincere thanks. I shall distribute the copies after having read them. From your kind letter I infer that you have sent them in order that I may familiarize myself with the teachings to which you subscribe. May I tell you to my own as well as to the joy of others that I understand the Principle and apply it in the overcoming of inharmonious conditions. I apprehend the magnitude of divine Love, and have had the privilege of experiencing wonderful leadings which my comrades with their material vision and hearing are not aware of."

"I have read your pamphlet 'Peace on Earth' with much interest, and my comrades also have commented on it very favorably. I therefore would herewith request more such literature, if possible, and would be very grateful should you be able to comply with this wish."

"The copies of the pamphlet 'Peace on Earth' which were sent to my company have been distributed and will pass from hand to hand. The men have been glad to receive the reading-matter and feel grateful for it."

"The squadron wishes to express its thanks to the literature distribution committee for the pamphlets received. The men enjoy reading them. The squadron would greatly appreciate further literature, if such may be expected."

"The reading of your pamphlet 'Man's Unity with God' has brought me so much joy that I have recommended it to all my comrades behind the trenches."

"The precious pamphlet 'Man's Unity with God' has reached me through the company and has greatly interested me. I also gave it to other comrades to read, for such literature is bound to benefit any one in these times of storm and stress."

"Thanks very much for your kindness in sending the pamphlets. I have distributed the duplicate copies among my comrades, and they have found willing acceptance. These booklets are my constant companions and my dearest reading."

Accompanying these expressions of gratitude was a letter from the committee as follows:—

"In connection with the above expressions of thanks we would like to add a personal experience told by a fellow Scientist at a Wednesday evening meeting. Her story ran as follows. While she was at the railroad station one day occupied with supplying the soldiers passing through with food and drink, a lady began distributing religious literature. One of the soldiers glancing at it said: 'Of what use will these be to us. This is what you ought to distribute!' And so saying he drew a booklet from his pocket,—it was a copy of 'Peace on Earth,'—and then proceeded to tell those around him how it had come into his hands. After a battle he lay on the ground forsaken and wounded, and almost in despair, when his eyes fell on some white paper near by. With some effort he reached for it, and held 'Peace on Earth' in his hands. He began reading and had forgotten all about his surroundings, when he heard voices. It was an ambulance corps which, as they said, had again been looking 'entirely by chance' over this isolated part of the battle-field. Thus he was saved, and since then had been carrying this pamphlet with him. 'It contains what we soldiers all need,' was his remark, and he finished by saying, 'This is what you ought to distribute.'"

Among the Churches

Current Notes

Boston, Mass.—The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading-rooms: Berkeley Building (suite 306-307), 420 Boylston Street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post-office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

San Bernardino, Cal.—Contracts for the erection of the handsome new edifice of First Church of Christ, Scientist, on the west side of E Street, between Seventh and Eighth Streets, will be signed the first of this week [Aug. 28], and before the end of the week it is expected that actual work will be under way on the site of the structure. The total cost of the edifice, including the furnishings, will be about twenty-five thousand dollars. The main auditorium will provide opera chairs for three hundred and fifty people. A balcony above the foyer will seat one hundred more, while the Sunday school room will seat two hundred and fifty-five. The latter can be thrown into the main auditorium if needed, giving a total normal seating capacity of over seven hundred people. The general dimensions of the building will give a frontage of about 75 feet with a depth of 70 feet.

Something more than a year ago steps were taken looking to the erection of a church home. Previous to that time the lot frontage on E Street had been doubled in order that a suitable site might be available when it should finally be determined to build.—*San Bernardino Sun.*

Brooklyn, N. Y.—The trustees of Third Church of Christ, Scientist, of Flatbush, closed negotiations today [Sept. 1] for the purchase of a plot of ground 162 by 200

Digitized by Google

feet, on the east side of Kenmore Place, one hundred and twenty-five feet north of Albemarle Road, as a site for a church and Sunday school hall. The cost of the land and the new building will involve an expenditure of over one hundred and thirty thousand dollars. For the past year the present quarters have been overtaxed by the growing congregation, which now numbers three hundred. The plan of the trustees is to begin work early in the fall on a Sunday school hall to be erected at the rear of the plot. This will be part of the permanent church structure, and will have a seating capacity of seven hundred. It will be used for the services until the church is completed.—*Brooklyn Eagle.*

✧ ✧ ✧

The Lectures

Santa Rosa, Cal.

George Shaw Cook's lecture at the Columbia Theater demonstrated the power of Christian Science to draw and hold an audience. The streets on all sides of the theater were filled with automobiles in which the audience had gone to attend the lecture. Inside the theater was one vast sea of faces uplifted to catch the words of the earnest speaker. Every seat was filled. Since the beginning of the series of lectures in Santa Rosa on Christian Science the local members have been compelled each time to seek a hall with increased seating capacity. Each hall in turn has proven inadequate to hold the crowds which desire to hear the lecturer. Columbia Theater, the largest auditorium in this city, was filled to capacity last evening.

In a manner which was convincing the speaker explained some of the teachings of Christian Science, and he impressed his audience deeply. Many who were present had come from idle curiosity, but they had secured a better conception of the views of Christian Scientists when the speaker had concluded. There is something which commands the attention and likewise the respect of the people in this new science, and more and more are the people of this city and nation taking up its study. Particularly are the audiences which attend these lectures of the thinking classes, and to hold their attention the speaker must have something to offer which will interest and convince. No one can doubt the interest of the people when they consider the vast outpouring whenever these lectures are announced.

Christian Scientists do not oppose any other religious belief, nor do they ridicule any of the other beliefs. One of the striking things about the audience was the large number of men who attended. There is much food for thought in the attendance at this lecture, and it demonstrates that Christian Science is growing, and growing rapidly.

Editorial in Santa Rosa Republican.

✧

Denver, Col.

John Randall Dunn lectured twice on "Christian Science: The Supreme Discovery of the Age," in the edifice of First Church of Christ, Scientist, in this city. William R. Rathvon in introducing Mr. Dunn the first evening said:—

During the past year more than a million and a half of thinking people have gathered as we have tonight to hear something about Christian Science from the lecture platform. The good these lectures have done is to be seen in the many instances of physical healing that have followed, in the regeneration of character and the better understanding of God they have imparted. They truly have been healing the multitudes.

By far the greatest of all discourses on the Science of Christianity was given nearly twenty centuries ago by the great Physician of his time and the master Metaphysician of all time, Jesus the Christ. It is best known as the Sermon on the Mount, given in the open air on a hillside in the uplands of Galilee. There Jesus, himself a craftsman, talked familiarly to a little gathering of fishermen, peasants, workers, and wayfarers, who were grouped around him. His simple sentences, heard only by those rugged men but spoken to all humanity, have in the long centuries between stood unrivalled in the purity of their spiritual ideals and practical morality; but their value to the individual, as Jesus then pointed out, lies in their being applied, not merely approved or admired.

In this regard Christian Science endeavors to adhere closely to the Master's teaching. It demands of its followers that they be doers, not hearers only. But before we can do, we must know, and before we can know, we must hear; and to this end we have assembled tonight. We have come to hear something of Christian Science, that we may do something with it.

At the second lecture Mr. Dunn was introduced by Mrs. Frances Mack Mann, who said:—

Christian Science appeals to thinkers. It touches the heart and proves the fact that there is a God, and that "he is a rewarder of them that diligently seek him." Its purpose is immense,—even the healing of all sickness and the destruction of all sin. No higher type of divine Love can be presented to humanity than that of apostolic Christianity, the foundation of which was right thinking and right acting. Christian Science is the reestablishment of this foundation of the early church. Once again Jesus' declaration, "By their fruits ye shall know them," is the test for genuine Christianity.—*The Rocky Mountain News.*

Lectures to be Delivered

[By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.]

ARIZONA—Glendale: Virgil O. Strickler, Glendale High School Auditorium, 8:15 p.m., Nov. 11.
Mesa: Virgil O. Strickler, Majestic Theater, 3 p.m., Nov. 12.
ARKANSAS—Eureka Springs: Prof. Hermann S. Hering, Church Edifice, Mountain Street, 8 p.m., Nov. 14.
CALIFORNIA—Alameda: Charles I. Ohrenstein, Unitarian Church, Grand Street, near Santa Clara Avenue, 8 p.m., Nov. 13.
Bakersfield: Charles I. Ohrenstein, Scribner's Opera House, Chester Avenue, near Nineteenth Street, 8 p.m., Nov. 16.
Berkeley (First Church): John W. Doorly, High School Auditorium, 8 p.m., Nov. 14.
Brawley: Virgil O. Strickler, High School Auditorium, 8 p.m., Nov. 9.
Huntington Park: William R. Rathvon, The Woman's Improvement Club, 222 South Pacific Boulevard, 8 p.m., Nov. 17.
Los Angeles (Third Church): William R. Rathvon, New Lyceum Theater, 2033 East First Street, 8 p.m., Nov. 11, and Church Edifice, 734 South Hope Street, 8 p.m., Nov. 14.
Los Angeles (Fourth Church): William R. Rathvon, Highland Park Ebell Club House, 131 East Avenue 57, 8 p.m., Nov. 12 and 13.
Petaluma: Charles I. Ohrenstein, Hill Opera House, 8:15 p.m., Nov. 14.
San Diego (First Church): William R. Rathvon, Church Edifice, Second and Laurel Streets, 8 p.m., Nov. 16.
San Francisco (Second Church): Charles I. Ohrenstein, Dreamland Rink, 3 p.m., Nov. 12.
San Jose: John W. Doorly, Victory Theater, 8 p.m., Nov. 13.
San Mateo: John W. Doorly, Masonic Temple, Ellsworth and Tilton Streets, 8 p.m., Nov. 17.
CANADA—Medicine Hat, Alberta: Clarence C. Eaton, I. O. O. F. Hall, 8:30 p.m., Nov. 12.

San Antonio: Virgil O. Strickler, Beethoven Hall, 8 p.m., Nov. 16.
Temple: George Shaw Cook, Temple Opera House, 3 p.m., Nov. 12.
WASHINGTON—Colfax: Clarence C. Eaton, Church Edifice, Main Street, 8 p.m., Nov. 14.

Testimonies of Healing

I must give my testimony on the side of Truth, as my healing has been wonderful to myself and to all those who know me. For two years I had suffered from Bright's disease, with dropsy, and was said to be in the very last stage of the disease. I had been given up to die, my time being limited to one hour at the longest. Every material remedy, from all kinds of medicine to electric and vapor baths, also chiropractic treatments, had been tried. Five different doctors had endeavored in vain to restore my health. Finally, in despair I took up Christian Science as my last and only hope. While my condition improved under Science treatment, yet the healing was slow, and about eleven months passed before it came. It is now a year and a half since I was so wonderfully liberated, and my health is perfect. Never in my life have I enjoyed such health as I now have.

To mortal sense the way was long, and at times it seemed as if everything was lost; yet holding fast to the good that I did know, and simply standing when I could do no more, helped to bring the dawn of light. The slow healing has proved to be a great blessing to me, for all the time I was growing and building on the Rock. I now know that divine Love protects and cares for me. I love this wonderful Christianity; it brings us what nothing else can,—such joy and happiness and peace of mind. It takes away worry and hatred, and enables us to love those who misuse us, to overcome all evil with good.—MRS. WILLIS GOLLMAR, Baraboo, Wis.

✧

It has been made plain to me that divine Love ever waits to bless. One day, when I was opening a drawer that stuck tight, my thumb was injured. In an hour's time I could not use it to do anything and thought it would be necessary to call a Christian Science practitioner and possibly a surgeon, as it seemed as though the bone might be out of place. Then I recalled a testimony given at the Wednesday evening meeting about fractured ribs being healed by Christian Science treatment alone. Knowing that I could do whatever it was my duty to do without harm to myself, I went about my work; but as it seemed impossible to use the hand, I began to read Science and Health with the intention of continuing till help was received—all night if necessary.

Not more than a page had been read when I came to this sentence: "If you sprain the muscles or wound the flesh, your remedy is at hand" (Science and Health, p. 385). I closed the book and went to my room, applying the remedy as well as I could. I knew at once that something had been done and told the rest of the family so, asking what it meant that such unthought of things could take place. My husband said it meant that God's word is "quick, and powerful, and sharper than any twoedged sword." The first thing in the morning I read from Science and Health, then went about my duties as a housekeeper, to my great surprise doing everything but put up the windows. By noon of the next day I was perfectly free.

I have been interested in Christian Science for seven years. From time to time I have had the help of experienced practitioners, have read a good deal from the *Sentinel* and the *Journal*, and have attended the Sunday services. These are some of the helps that have brought me face to face with God's healing Word. As spiritual power is revealed to me through the study of Christian Science, my respect and love for Mrs. Eddy deepens. My greatest desire is that others may know the wonderful healing power of Christian Science.

LIZZIE WALLIS WARREN, West Auburn, Mass.

On New Year's night, in 1913, my wife and I were talking about a man we knew well, who had been for years a confirmed drunkard, losing home, friends, and a fortune, but who in desperation, having been told to quit drinking or resign his position, turned to Christian Science for help in his hour of need and was healed. When we realized that Christian Science had really effected a cure, we could not help but rejoice, not only for the man's sake, but for our own, as it gave to us a man who was capable and willing to work, and work hard, for the success of my business.

Rejoicing over the happy outcome of his case, my wife asked me why I did not try Christian Science for the tobacco habit. My reply was: "It would be as easy to eliminate the darkness and have perpetual daylight as to stop me from using tobacco. I would not ask Christian Science to do the impossible." To this my wife replied that if Christian Science could heal our manager of the drink habit, it could heal me of the tobacco habit.

After pondering over the matter for a few moments I decided to do as my wife wished. As it happened to be Wednesday evening I left my cigar in my store while I went to the Christian Science church and asked for the healing. As I belonged to another church I had not much faith in the efficacy of Science, and after asking for treatment I went back to the store and began to smoke. I forgot all about having asked for help to quit using the weed, until noon of the next day, when I said to my wife that I believed I could go back to the store without a cigar. She looked up at me and asked why I did not try it. As a realization of what was happening to me passed through my mind, I said I would, at the same time filling my pocket with cigars to be used if the craving again manifested itself. But, thank God, from then until now, three years later, no desire for tobacco has tempted me. Some may say I could have quit just as easily without Christian Science treatment; but this is not so, for every known means had been faithfully and earnestly tried and every effort possible made before I turned to Christian Science.

A short time after this my wife said that our daughter must have one of two things,—a pair of new spectacles or a course of treatment in Christian Science. This daughter had worn glasses for several years, and if we could help her to do without them it would be better for all, so I said we would try Christian Science. We did so, and in a very short time our daughter told us she could see much better without the glasses than she ever could before, either with or without them. This healing took place soon after my own, and today she does not use the glasses, nor has she since that time. Many cases of as remarkable a nature have come to my notice since my healing, but I am leaving them for the beneficiaries themselves to tell. Suffice it to say that while the above-mentioned are among the best we have received in our family, we have had many more, for all of which we are deeply grateful.

A few months after the tobacco habit was overcome, I was seized with severe illness and believed myself in a very bad way. My wife asked if I wanted a doctor, but I said no. As I kept getting worse, however, we asked for help from a Christian Science practitioner, who sent word that I should read Science and Health. Upon receipt of this message I declared myself too sick to read. The next day my wife again asked for treatment, and again came back the message that I should read Science and Health, and again my answer was the same. All this time my condition was getting worse, and finally in desperation I arose to walk the floor. A copy of Science and Health was lying on a dresser, and in passing I reached out and took it up. I opened the book, and in less than fifteen minutes after beginning to read I dressed myself and went down to my store. Within twenty-four hours I was as well as ever.

Observing the relief I experienced through the study of Science and Health, my wife and daughter took to reading it, and both of them have had splendid results; indeed, we are all very thankful for the wonderful benefits we have derived through it and from it. I hope this testimony may benefit some other as I have been helped.—J. H. Harford, Port Huron, Mich.

✧

The study of "Science and Health with Key to the Scriptures" by Mrs. Eddy has proved a great blessing to me. On looking back I realize how I have been lifted from the bondage of mortal sense to the freedom of Truth and Love. In August, 1912, Christian Science first came to my attention, but having been brought up in another faith, I could not then see that it was right. It was not until March, 1914, that I began to study the text-book.

One day I read in the chapter entitled Fruitage a testimony which told of severe eye trouble being overcome, and which concluded by saying that if Christian Science had done this for one, it would surely do it for all. Glasses which had been worn for nine years were immediately laid aside and have not been needed since. My eyes had been treated by specialists, who said I would never be able to leave off wearing glasses, also that they should have been worn from infancy, as a defect in my eyes and granulated lids were hereditary. An annual throat trouble, known to medical practice as abscess, was overcome with the help of a practitioner in five days. For two days I could not speak a word and had to write down what I wanted to say, but the condition disappeared suddenly, leaving me quite well and very happy. Under a physician's care the throat would have been lanced, and without doubt I would have been confined indoors for three weeks.

Words cannot express my gratitude for what Christian Science has done and is doing for me daily. I consider it a great privilege to send this testimony and trust it will be the means of relieving others from similar bondage. I also wish to express my gratitude for our literature and to those who prepare the Lesson-Sermons, likewise to the Christian Scientists who have so kindly helped me. My great desire is to learn more of this truth and let the light shine so as to help others.

Millie Rutherford, Geelong North, Victoria, Australia.

✧

On account of a structural defect of the eyes, for which glasses had been worn about twenty years, a friend advised me to attend Christian Science services. The following Sunday, Oct. 12, 1913, I went to a Christian Science service for the first time, and noticed that very few of those present wore glasses. Upon my return home I removed the glasses and read for a short time in Mrs. Eddy's book, "Science and Health with Key to the Scriptures," and have not used them since that day. About the first of January, 1915, the left eye became inflamed, and a growth appeared on the eyeball, obscuring the vision so that I was nearly blind for a few days, and the pain at times was intense. On Jan. 20 a Christian Science practitioner was asked to treat me, and in about three days improvement was manifest. After two weeks the trouble was so nearly gone that treatment was discontinued. Complete healing followed, and the vision is now perfect. I have also been healed of a form of appendicitis which had afflicted me for many years.

Words feebly express my gratitude for these wonderful demonstrations of divine healing. My earnest desire is for

Digitized by Google

a better understanding of God and of Christian Science. I am thankful to the kind friends who so generously helped me while reaching out for the truth; may God bless them abundantly.—Albert Tinkcom, Franklinville, N. Y.

✧

With a heart full of gratitude I give this testimony. For weeks that made of themselves months I was conscious of the nerves in feet, arms, and chiefly in the hands. I awakened at night to find one or the other of my hands so numb that had I not possessed an understanding of Christian Science I should have dreaded the hours of darkness. After one unusually strenuous night there was a little patch of gray in my hair which was not there the day before. It seemed to me that if the entire condition was not overcome it would end in entire helplessness. Finally I sought aid of a loyal Scientist, and after four treatments was again able to take up the work alone. Now I can say, Thanks be to God, who giveth us the victory through Christian Science. I am now entirely free from this condition and in a normally healthy state.

Minnie C. Alexander, St. Louis, Mo.

✧

Recently I have had cause to rejoice anew for all the good that has come to me through Christian Science. I have known of this teaching for a good many years, for when I was seventeen I was healed by absent treatment in less than two weeks of lung trouble of a quickly developing nature. At that time I took up the study of Science in an indifferent sort of way, and this continued for a number of years.

During this period I was healed of a throat affection, a seriously injured spine, rheumatism, and other ills, but it was not until a deep sorrow came to me several years ago, that I became an earnest student of this healing truth. At that time I learned that Love is ever present and there is no separation, and with this knowledge also came a deep desire to know more of spiritual things. Since then, through the work of a faithful practitioner I have been healed of asthma, from which I had suffered periodically since childhood, and a member of my family has been healed of the drink habit in one treatment.

For all these healings I am grateful, but it is for the healing of faults in disposition, such as envy, criticism, resentment, and for the great spiritual regeneration, that I am most grateful. My heart goes out in thankfulness to God, the giver of all good, and in gratitude to Mrs. Eddy, His faithful messenger to this age.

Antoinette W. Girard, Los Angeles, Cal.

✧

From a frail and sickly child I grew to womanhood a slave to medicine. Stomach trouble with its host of accompanying ills made life almost unbearable. Doctor after doctor was consulted and the treatment prescribed given faithful trial. In each instance if improvement was experienced it was not permanent. In the course of time, as conditions grew alarming, I found myself an inmate of a sanatorium, where I spent some wretched days. The doctors had diagnosed my case as distended stomach, abnormal condition of the kidney, and intestinal indigestion; in fact, the doctors at the sanatorium said they were glad to find two good organs in my body, the lungs.

Each time the head physician came to my bedside he would narrate some instance of Christian Science healing. This, however, made no impression upon me, until one day something I read greatly interested me. I immediately began to throw away my medicine. When my husband came the following Sunday I begged him to take me away, as I wanted Christian Science treatment. He agreed most reluctantly, however, and called the head doctor, to whom he made known his intentions of removing me from the sanatorium as a result of my entreaty. I then asked this physician to tell me frankly what he thought of my case, and he said in reply that if they could keep me there a year they might make some impression upon me; but when he said it I felt that he was aware that I would not have lived that long under medical treatment. When he bade me good-by he said that he believed they could do anything that any earthly power could do, but what they could not do they left to Christian Science.

My healing in Christian Science was almost instantaneous. Although I took fifteen treatments the practitioner afterward told my mother he felt convinced that I was healed with the first one. I regret to state that my footsteps have diverged widely from the straight and narrow path of Truth since my healing. Through experience, however, I have learned that "every supposed pleasure in sin will furnish more than its equivalent of pain, until belief in material life and sin is destroyed" (Science and Health, p. 6), and now I am endeavoring to follow in the pathway that leads to the realization of Immanuel, "God with us." I am indeed thankful to God, and deeply grateful to the one who so distinctly blazed anew the trail leading from bondage to the glorious liberty of the sons of God.

Mrs. F. W. Plummer, Addison, Maine.

✧

[Translated from the German]

I herewith offer this testimony for the encouragement of other seekers after truth. About four years ago the way to Christian Science was pointed out to me through a copy of the *Herold* which was given to my dear wife by an acquaintance. After attending the Wednesday evening meetings and Sunday services regularly, and reading the aforementioned periodical and later the text-book, "Science and Health with Key to the Scriptures," in German, the desire was awakened to get a better understanding of this teaching. Such an understanding came to me very soon, and as a result I stopped smoking and became a different man, being no longer quarrelsome, argumentative, and cantankerous. The understanding of the Principle of Christian Science dawned upon me. I saw what it means to love God and one's fellow beings, and began to act accordingly.

Before I knew of Christian Science I was depressed mentally, had lost interest in everything, and my work seemed to have become distasteful to me. While in this condition I applied to a Christian Science practitioner and asked for treatment. This lady explained to me that there was no reason for discouragement and that I should rely solely on God. She took up treatment for me in Christian Science and led me to where I again found enjoyment in the performance of my duties. Whereas heretofore I had believed that I was the one who should bring about a turn in order that I might attain to a better position, it became clear to me that I had been thinking and acting in the wrong way. I gradually saw that God was my source of supply and that there was a right place for me. From then on my work became enjoyable. I would go to the office bearing good thoughts in mind,—thoughts of Truth,—and I soon found that everything went better than formerly. For years I had been afflicted with an eruption on the face, a condition which yielded only after a change with regard to my thoughts and actions; then I was freed from it. Now I know that God is my sole helper, no matter what the trouble.

A short time ago an abscess formed on my right arm. It seemed to affect the whole forearm as well as the hand, both

Digitized by Google

of which appeared to be swollen, but this trouble disappeared with a few treatments in Christian Science. Despite the swollen condition I was able to be on duty and to attend to my work, which included much writing, as the understanding prevailed that God gave me strength for these duties.

I can truthfully say that since coming to Christian Science I have become a different man, a man who attends to his work with a sense of freedom and joy. I am most deeply grateful to God for these proofs of His love and goodness, and thankful to our revered Leader, Mrs. Eddy. My endeavor shall be to assimilate more and more of the nature of divine Truth.—FRANZ WINKLER, Berlin, Germany.

I gratefully testify to the power of Truth. Waking up one morning I felt a severe pain on the left side of the neck, and during the day it became apparent that I had been bitten by a poisonous insect. We tried our best to meet the trouble through our knowledge of Christian Science, but as we did not seem to succeed, there being too much fear in my consciousness, I decided to ask a Christian Science practitioner for help. It was given, and I am happy to be able to state that with three treatments the trouble which had caused so much pain was healed. For this as well as for many other proofs of the power of divine Love I am very grateful. I am thankful also to that noble woman who was pure enough to bring anew the truth to us.—FRAU M. WINKLER.

✧

I became interested in Christian Science through learning something of its teachings in my work as a musician in one of the Christian Science churches of this city. I had been a semiinvalid for several years, from the time I was a young girl. The cause was supposed to be sleeplessness. I obtained Christian Science help, but although the practitioner worked earnestly for me, the healing was slow. Later, however, there came a change in my desire; from having the thought of health uppermost in my thought there came a stronger desire to know more about God as taught in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Then came peace and a sense of our Father's loving-kindness, and subsequently complete restoration to health.

I am indeed grateful for having proved God's healing power, also for the spiritual understanding which I am gaining, and with which I am enabled to help my fellow man.

SIDONIE K. MARX, Chicago, Ill.

✧

About ten years ago Christian Science was brought to my notice by a friend who had been healed of an abnormal growth in a very short time and by absent treatment. This seemed to me wonderful; but although at that time in great need of help, I was not quite ready to try Christian Science for myself. A few weeks later, however, suffering from nervous depression, great sorrow, and discouragement, as well as many physical ills, I turned to it for the healing alone, and was healed of many ailments from which I had suffered and for which I had been treated by doctors for many years. With my healing came the lifting of a great sense of fear, doubt, and confusion.

I am most thankful to God, who is Love, and grateful to our revered Leader, Mrs. Eddy, who has revealed to us in her text-book, "Science and Health with Key to the Scriptures," an omnipresent and omnipotent God, good. My desire is to reflect something of this good that has come to me, and in that way to help others. A better understanding is being gained through the study of our Lesson-Sermon each day, also a greater love for the Bible.

MINNIE PALMER, New York, N. Y.

From Our Exchanges

[Western Christian Advocate]

No one seems to doubt it except those who deny that perfect moral standards are practicable in ordinary human relationships, *e.g.*, in business, in politics, in civic affairs, and in the settlement of international disputes. Men are often heard to say, "The ethics of Jesus are not suited to a world like this; they are too ideal; the Sermon on the Mount cannot be taken literally; its demands are so exalted as to be utterly impracticable."

In no realm except that of morals do men argue thus regarding ideals. The artist takes as his model and incentive the highest possible standard of perfection. He is well aware that any concession to a lower ideal would mean accepted inferiority, not to say artistic suicide. The musician, in like manner, is content with nothing less than the absolute. He is eager to put himself under the inspiration of the noblest master and the highest masterpieces. The astronomer deals with infinitesimals. He cannot vary by a fraction of a second the orbit of a planet or the computation of an eclipse.

Even in the lower realm of mechanics the maker of a machine seeks absolute perfection in the adjustment and play of its parts. Let the moralist who is skeptical of the workability of an ideal visit a machine-shop or factory and study the turning of an ordinary lathe, the construction of an engine, or the delicate adjustments of a diminutive watch. Possessed of any worthy degree of intelligence or mortal sensitiveness he would be made ashamed of his attempts at ethical concession or accommodation. He would be compelled to acknowledge that the common mechanic in the low realm of machinery is infinitely truer to an ideal than he in the immeasurably higher realm of soul and spirit. Nothing short of an ideal is ever practical. Any temporary expedient is only a postponement of ultimate failure.

[The Advance]

We think of Jesus as meek and lowly; but he was also stern and emphatic and mightily self-assertive. We love to think of the love of God; but that love has two poles, and its negative pole is an eternal disapproval of wrong doing. In the olden time there had been those who said, "The Lord will not do good, neither will he do evil." There are still many who believe that God is passive in the moral conflicts of the world. But a prophet of old promised that when the Lord came suddenly to His temple, He should be like a refiner's fire, and that the wicked could not abide the day of His coming.

Condemnation of evil is inseparably joined to approval of the good. A God who abides amid the shadows, permitting the earth to go its way of good or evil unrestrained, does not satisfy the ethical demands of the soul. "Let God arise, let his enemies be scattered," cried the psalmist in a time of moral confusion. And a prophet promised those who loved the Lord, but who were sadly confessing to themselves that it seemed vain to serve the Lord, that the Lord would come, and enable them to look back and see that God discerned between the righteous and the ungodly.

Jesus came not to condemn the world, but to save the world. Yet in the process of that salvation it became necessary to exhibit that stern disapprobation of sin which is only the other name for the abiding love of God.

[The Christian Intelligencer]

"The sin which doth so easily beset us" is unbelief. The prizes of this world are tangible. They are held before us and dangle before our eyes with charming sounds. The

Digitized by Google

rewards of faith are spiritual and invisible. Their full measure awaits the final end of the race. We are beguiled often by the near and the material. We forget how transient and perishable the gaudy treasures of this world are. We are tempted to give up our faith, to adopt the creed of the crass materialist: "Eat, drink, for tomorrow we die." But we must remember the "cloud of witnesses." We must ever keep "looking unto Jesus." We must keep the bright reward in view. So doing, we shall "run with patience the race that is set before us." We shall be true to Christ at all costs and serve his cause, and finally receive the crown.

[*The Watchman-Examiner*]

In a discriminating estimate of the value of the forces which seem to be engaged for the advancement of the kingdom of Christ, it is constantly necessary to distinguish sharply between love for a church, enthusiasm for a method, and championship of a cause, and loyalty to Christ. The one infallible touchstone is love for those who differ. The man who is harsh and hateful to those who are not working on his lines, betrays the fact that he is in love with his own ideas and methods rather than loyal to Christ. Real loyalty to Christ admits of differences of opinion, but does not admit of absence of love. There are too many people who are strong denominationalists and ardent theologians, who do not make the impression that they are good Christians.

[*The Universalist Leader*]

We do not mean to hide Christ, of course, but that is what many of us are doing. We have so many notions about Christ that we miss knowing him. It has often seemed that if we of the church would let the Master appear in the world as he was, and is, all men would easily believe on him. There is never one to find fault with Jesus, but nearly all find fault with some one's conception of him! And when some one tries to organize his notions into an institution, there is apt to be revolt of those who have formed a different personal concept. A great deal of the doctrine and ritual of the church but serve to mask the person of the one they would reveal.

[*The Congregationalist and Christian World*]

The confidence and assurance that the church has a message for individuals, as well as for the classes and the masses, makes the atmosphere in which men look and turn to God. For men today, as always, have hungry souls for Him. The lethargy of the churches lends itself to the self-excusing of the God-forgetful man. How can we expect men to value the experience of a return to God and a self-denying service of Christ, when the church is careless of its testimony and indifferent to the need and hunger of men about it?

[Rev. Henry W. Frost in *The Sunday School Times*]

There can be little doubt of the fact that if the church at large were more fully in communion with Christ, he would choose more frequently to reveal himself in miraculous power. We are forced to conclude, therefore, that there is needed in the church confession of sin because of unaccepted and unutilized privileges, and a new seeking after the will and ways of the Holy Ghost.

[*The Dallas* (Texas) *News*]

Character is thought manifested in conduct. Mastery of thought gives mastery of action. Man's greatest friends or enemies are those of his own mental household. It is up to him to decide whether they shall be angels or devils. "As he thinketh in his heart, so is he."

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00; six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

As the advertising pages of the *Journal* and *Herold* go to press the 20th of the month, to insure publication in a desired number requests for changes in a church or practitioner's card should reach the Publishing Society at least six weeks previous to the actual date of issue.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 61 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Subscription Price

Payable in advance

Annual subscription price, postpaid, in the United States, Canada, Mexico, Cuba, Porto Rico, Hawaii, the Philippines, Guam, Tutuila, Shanghai, Panama, and the Canal Zone, $2.00; six months, $1.00; three months, 50 cents. For Canada add 45 cents and for all other countries 95 cents annually for postage. For subscriptions in quantities please refer to page four in THE CHRISTIAN SCIENCE JOURNAL.

Subscriptions to the SENTINEL will begin with the current issue unless otherwise specified. Subscriptions terminate with the last of the month named on the wrapper at the left below the name and address. The Roman numeral XVI indicates the year 1916; XVII is used for the year 1917. This notation and the delivery of the periodical will indicate that a remittance has been credited and will be our acknowledgment of the subscription.

Bound Volumes: Current year or two years previous, cloth, $3.25; half calf or half morocco, $4.00. On earlier volumes write for prices.

Items of Interest

The largest dam in Europe has just been completed near Barcelona, Spain. It is built across the chasm through which the Noguera Pallaresa River flowed. Abutting on almost perpendicular cliffs, the dam is constructed of concrete, and measures 330 feet in height and 700 feet in length. The thickness is 230 feet at the base, gradually decreasing to 14 feet at the top. The valley above the dam was bought from the various landholders at a cost of nearly one million dollars, and now filled with water forms an artificial lake fifteen and one half miles long and three and three fourths miles wide. The water that now passes through the power house yields an electric current of 20,000 horse-power. Later it will be increased to 40,000 horse-power. The water is carried by a system of canals into an arid district, where it irrigates a surface of nearly one hundred square miles.

The new administration of Panama is thinking seriously of giving one side of the single tax plan a trial. There are immense holdings of land throughout the republic that are neither producing incomes nor paying taxes to amount to anything. Nearly every revolution in former days produced a crop of generals to be rewarded with land grants, since there was nothing else to give them. Then outsiders began to acquire large estates when the canal promoted speculative purchases. Holdings of from twenty to one hundred thousand acres are fairly common. There is a tract near Panama City of some fifty thousand acres owned by absentee landlords that does not, it is claimed, earn $500 a year, and practically pays no taxes. The total amount of land owned in Panama of this sort mounts up to several million acres.

Queensland, Australia, a very large state in area, has three distinct ports of entry—Townesville, Rockhampton, and Brisbane. Sydney serves for New South Wales, Melbourne for Victoria, Adelaide for South Australia, and Perth for West Australia. South Australia, although not nearly so large as the states of West Australia and Queensland, is some 50 per cent larger than Texas. Its population, corrected to the year 1914, is 441,690, or about one tenth the population of Texas. Only 2 per cent of the land is under cultivation. The Broken Hill mines of New South Wales are large producers of lead, silver, and zinc concentrates. Adelaide, which controls the distributing trade of the big back country and of the rich mining districts, is a prosperous city, with a population of two hundred thousand within a radius of ten miles of the Town Hall.

The Pennsylvania state department of forestry and the state highway department have completed arrangements for cooperation in planting shade trees and fruit trees along the state highways. The trees will be grown from seed by the forestry department in its nurseries, transplanted in areas set aside for the purpose, then turned over to the highway department when they have attained suitable size. Good roads organizations will also assist in the planting at that time. The species already transplanted are Scotch, white, and pitch pines, Norway spruce, Douglas fir, sugar maple, white ash, white elm, black cherry, honey locust, and European larch.

The Canadian Pacific Railway will save $256,000 annually by the construction of its $12,000,000 tunnel under Roger's Pass in the Rocky Mountains in British Columbia, in that part of the mountain system known as the Horseshoe. The new tunnel will be put into use on Dec. 1 next. Heretofore the trains over the mountains above this new tunnel were forced to run through four and one half miles of snowsheds in winter. The 17,400 trains passing over this dangerous mountain railway each year were always in danger of mountain rock, dirt, and snowslides, but with the new tunnel all this will be averted.

Russia, after fourteen months of prohibition, reports: Crime (all kinds) has decreased 62 per cent; absenteeism in factories has fallen 60 per cent; suicide rate has dropped enormously; hospitals formerly overcrowded are not filled; efficiency in factories increased 10 to 15 per cent; practically every inhabitant is at work; savings deposits have increased 8 per cent; fire damage has fallen off 38 per cent; wages in some districts raised 500 per cent; people are eating better and costlier food; better clothing is worn by the poorer classes; agricultural implement sales are 60 per cent. larger; imprisonment decreased 72 per cent.

One of the largest rubber companies in the United States has bought 9200 acres of land near Hackett, Ariz., and will at once begin preparations there for manufacturing rubber from the guayule plant, with which it has been experimenting for a number of years. The plans of the company provide for the expenditure of $1,000,000 on the factory and homes for employees. The guayule is a desert plant requiring a minimum of water. By offering a good market for it the company is encouraging farmers of the state to cultivate it on lands unsuited to crops requiring irrigation.

On July 28, 1916, by a decree of the National Government of Argentina, a joint stock company was authorized, formed by United States capitalists for the working of limestone quarries and the manufacture of cement, and it has taken over property in Sierras Bayas, Province of Buenos Aires, for this purpose. It is expected that the installation will be finished by the end of next year, and that in 1918 the factory will be producing Argentine cement at the rate of 1,000,000 barrels a year.

Military engineers are erecting a wireless station on Cape Juby, on the African coast. In cases of need at sea, the service will be available for ships in distress. As the big installation on Teneriffe Island is less than one hundred miles from the Cape Juby plant, communication with the Canary Islands will be possible, and through them with the Spanish mainland. Cape Juby is a sandy and practically barren projection into the Atlantic Ocean, some sixty-seven miles from the island of Fuerteventura of the Canary group and in the same latitude.

The manufacture of alcohol from sawdust and other wood waste has been proven by the Forest Products Laboratory at Madison, Wis., to be not only chemically possible, but commercially profitable. After nearly five years of experimentation a method has been evolved whereby, under reasonably favorable conditions, ethyl alcohol may be produced for twenty cents a gallon. The cost of making grain alcohol from corn is about forty cents a gallon.

The American public school system in the Philippine Islands has so encouraged the use of English, which is the only language taught in the educational institutions established by the Americans, that a long step has been taken toward obliteration of the many languages and dialects among the various tribes, and English is fast becoming the common language for the islands as a whole.

A delegation of six men from the Danish West Indies, who were chosen by the colonial councils of the islands at the request of the parliamentary sales committee in Copenhagen, has left for Denmark to report to the committee regarding the sale of the islands to the United States. The delegation has been instructed to recommend the sale.

The Clayton trust act, which went into effect on Oct. 15, prohibits directors, officers, and employees from serving more than one bank in an official capacity at the same time. The national banks and trust companies, with liabilities aggregating $5,000,000 or located in the same city with a population of 200,000, come directly under the act.

The new "Harahan" bridge, spanning the Mississippi River at Memphis, Tenn., said to be the largest structure on the river, is now open for traffic. Including the approaches it is three miles long, the bridge proper being 2600 feet. Its cost was approximately five million dollars. Construction was begun in 1913.

In the last year and a half there has been a considerable revival of interest throughout all the West Indies in the production of sugar, molasses, and alcohol. Areas that have not grown cane in many years are being brought into cultivation again, and much new ground is being put under cane.

The United States Bureau of Standards has completed a very careful determination of the freezing-point of mercury, using platinum resistance thermometers to measure the temperature. The result of this work gives —37.97 degrees Fahrenheit for this temperature.

Experiments at the University of Washington, at Seattle, have resulted in the discovery of a process of distilling mill waste, by means of which tar, a light oil, acetate of lime, and charcoal are obtained.

According to a statement just given out by the minister of public works, a total of $11,411,670 was expended during 1915 on public works in New Zealand.

In 1915 the total production of olives in Spain was 1,772,887 metric tons, while the amount of oil produced was 826,108 tons.

"What I say unto you, I say unto all, WATCH" Jesus

Vol. XIX November 11, 1916 No. 11

Rendering unto God

JOHN B. WILLIS

THE psalmist's query, "What shall I render unto the Lord for all his benefits toward me?" speaks for an alert sense both of possession and of obligation; and his answer, "I will take the cup of salvation . . . I will pay my vows unto the Lord now in the presence of all his people," is no less interesting for its breadth of practical meaning than for its charm of poetic expression. To be touched and inspired by the divine beneficence, and to fulfil toward all men the instinctive pledges of good doing thus awakened, is to register a great spiritual achievement and prove one's self a Christian.

In his endeavor to this end one is called to think of a good many specific things not named in the psalmist's words though legitimately embraced in his statement. And first we can but recognize the fact that there are no things which can be considered as suitable offerings to God. We can be something for Him, but our salvation is too entirely a matter of grace to warrant any thought of an exchange of values with Him—that we can make any return for His goodness save in our loving obedience and grateful praise. He already possesses all good, while apart from Him we have simply nothing at all.

Christ Jesus distinctly taught, however, that the virtue and merit of an unlimited giving to God may be gained by ministering to the needy as did the good Samaritan, and by being altogether just and unselfish in our daily dealings with others. Those wondrous words, "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me," are instantly recalled. In an important sense they posit a commoner, our neighbor, as a representative of God, so that by being honest and true with those about us, we are actually rendering "unto the Lord." This tremendously interesting fact is featured in the dramatic picture drawn for us in the twenty-fifth chapter of Matthew, and when the truth there taught is apprehended, human relations, the affairs of trade, of the counter, and of the bench, of employer and employee, can never again be thought of as trivial or as unrelated to the chiefest end of life. They are not to be dominated by custom or world precedent, but by our thought of opportunity to do for God.

The honoring of God thus becomes a challenge to our attention in every least transaction and concern. "The trivial round, the common task," has become an applied test of Christian worth, a veritable judgment bar, in keeping with Micah's searching words, "What doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?" Christ Jesus repeated this prophetic mandate when he said that next to the loving of God with all the heart, it is ours to love our neighbors as we love ourselves; and we never do this until we put ourselves in their place and deal with them just as we would have them deal with us under the same circumstances. Genuine affection never takes advantage of a situation to exploit its object, and it is in this true, good-dispensing love for all men that we may make an acceptable return to God.

The psalmist's words thus give prominence to a matter of the deepest and widest every-day significance, namely, the vital fact that we immediately contribute to the adjustment of our account with God by rightly balancing our accounts with men. Upon this demand on us for the administration of justice in all the human relations in which we are individually concerned, Christian Science lays supreme emphasis. In her Scripture exposition Mrs. Eddy identifies this requirement both as a supreme privilege and a divine law, a *sine qua non* of the Christian life. Speaking of the truths of being which must be acknowledged and demonstrated, she says: "A higher and more practical Christianity, demonstrating justice . . . stands at the door of this age, knocking for admission" (Science and Health, p. 224). "Man must love his neighbor as himself" (Miscellaneous Writings, p. 183). "Justice, honesty, cannot be abjured; their vitality involves Life" (The First Church of Christ, Scientist, and Miscellany, p. 139).

Standing as it does for a nobler sense of God and of man, it were inevitable that Christian Science should be the more exacting in the ethics of common life and conduct, and surely the call for this advance is great and world wide. It would seem that he who through Christian Science is beginning to apprehend the Principle of all right action, and who sincerely longs to do the right, would not fail to discern the just course in every circumstance and relation of human life. Here, however, an educated bias of which one may be quite unthoughtful, or that ignorance which speaks for neglect to inquire into all the facts, not infrequently leads even the best intentioned to consent to the continuance of the grossest injustice. When the psalmist wrote, "Blessed is he that considereth the poor," he surely had very much more in view than mere almsgiving. The greater and more important duty toward our fellow man in need, is to give thoughtful consideration to his circumstances and environment, the lot that has seemingly made or unmade him, his human inheritance and sequent point of view.

It has been said that "regeneration creates the will to do right, but it does not define for a man what is right," and this seems to have been abundantly illustrated in the lives of many who have sought to better human conditions. Willingness to put ourselves in the brother's place, and to know all the facts of his case, must be patiently exercised if we would gain the ability to render unto God that acceptable service of just doing which Micah so eloquently champions as the consummate virtue. He who apprehends the divine law, who honestly seeks to conform to its requirements, and who keeps an open mind to all the facts of the situation,—he and he alone will not fail in his faithfulness to his brother man and his loyalty to God.

The ethics of Christian Science certainly impels one to honor his highest ideal of right, of the law of Love, and in so doing he is sure to bring to many both an astonishing and impressive recognition of Christian duty and privilege. How mightily such a course would tell for the settlement of our labor troubles, for the solution of all social problems, and for the glory of God "in the presence of all the people."

Copyright, 1916, by The Christian Science Publishing Society.

Digitized by Google

One's heart begins to thump at the thought of how much professed Christians, standing together for simple economic justice, might accomplish for the peace of the world, for the effective rebuke of wrong and thus for human redemption.

In all this matter genuine Christian Scientists find it easier to do the fraternally ideal thing, because they have learned anew that it is a perfectly safe thing to do. They are not afraid to be generously considerate for the other man. They know, as they have not before, how richly it pays to be wholly good, and that the words of the Master are true: "With the same measure that ye mete withal it shall be measured to you again." Christianity has been variously defined, but the one meaning which the world insists shall be given it is this: the practice of good, the putting away of all injustice, all disposition to take advantage of another's necessity for the increase of one's own profit. Thought easily compasses this as a proposition, and when one begins to realize what would result therefrom, he perceives in some degree how easily the kingdom of God, good, may be inaugurated. Every one who has the disposition to do so can deal justly. This is to have the Mind that was in Christ Jesus, and it is our privilege and our business to have it. Then indeed through us will the Christ-idea "set judgment in the earth: and the isles shall wait for his law." Well has the poet said:—

The crest and crowning of all good,
Life's final star, is brotherhood;
For it will bring again to earth
Her long-lost poesy and mirth;
Will send new light on every face,
A kingly power upon the race.

Supply Unlimited

OLIVE J. MILLIKEN

A GREAT deal has been said along the line of supply, as this is a question which intimately concerns each individual and seems to be involving the time and energies of mankind in general. Christian Science reintroduces and reenforces the basic laws of being in the working out of this problem. Its pure rays of Truth must go on piercing the mists of mortal thinking, chasing away the shadows of the supposed law of limitation which casts its blighting sense over mankind, and revealing to us the real source of supply, the true nature and elements of substance. Christian Science is the Comforter promised by the master Metaphysician, that will lead us into all truth concerning this and every other question, and it points us again to Jesus' exposition of the power, willingness, and unfailingness of divine Love to supply all human needs. Human sense has as yet only glimpsed through Christian Science the shining shores of that perfect stream of infinite supply which is flowing from God to man, clearly, tranquilly, irresistibly filling all space.

The false beliefs of fear and discord are no part of the real man made in God's image and likeness. God is infinite good, infinite intelligence, all-power, the infinite substance and source of supply, the infinitely loving Father-Mother, and man, His highest idea, "represents infinite Mind, the sum of all substance," as we read on page 259 of Science and Health. God gave man dominion over all the earth, and man lives in our Father's house of many mansions, in which his environment, condition, and circumstances are perfect and harmonious. He is forever sustained and maintained in this perfect state, and it is only the hallucination of mortal sense, a delusion of the belief in a power or existence apart from God, which would argue any other condition for man.

In reality all men share and share alike in the showers of blessings which proceed from infinite good, and all share abundantly, being completely endowed with means to settle every honest obligation, to supply every need, and to be "thoroughly furnished unto all good works." Mrs. Eddy tells us (Science and Health, p. 427) that "immortal Mind, governing all, must be acknowledged as supreme in the physical realm, so-called, as well as in the spiritual," and so we find that this Mind governs even our human affairs. In the wonder of this great truth we lose all thought of waiting for future deliverance from the weight of human responsibility in getting a living, and we find our heritage as God's children here and now.

Recognizing himself thus as the loved child of an infinitely loving Father-Mother God, one learns that he can approach this parent as directly and fearlessly as the most loved and cherished child ever approached a human parent, and with far more assurance of having his requests granted, for our heavenly Father is unlimited in power. Mere selfish ambition receives no answer from the divine Mind, yet it is true that man's birthright is dominion over every sense of poverty, lack, limitation, or debt, for his normal right is peace, prosperity, and plenty. His is the abundance of supply in every right direction, and "love has overflowing streams," as a well known hymn runs (Hymnal, p. 86), to fill every channel which the human mind makes for its entrance.

When thought becomes imbued with the consciousness of God as the abundant, unfailing, ever-present supply for every need, we cease to count our pennies, trembling for fear they will not be sufficient to meet the necessities of every-day life. In loving adoration of the source we lift our eyes above the limitations of mortal sense and declare, "Thy will be done in earth, as it is in heaven." Then we feel again the presence of him who on the shore of the sea of Galilee multiplied the loaves and fishes without material means, and who said, "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you."

The Scriptures abound in accounts of the care of God for His children. These accounts seem miraculous to us only because mortal mind has the habit of trying to limit the power and presence of good, and to measure life and its phenomena from a material standpoint. Even though it may take a seeming miracle to overthrow the conditions of lack or limitation which sometimes seem to envelop one, yet that miracle will be in complete accord with God's plan of omnipresent abundance for us. That which to the limited sense once seemed the supernatural, becomes the natural, and man finds himself actually expressing his God-given dominion over every untoward circumstance and proving by demonstration the presence of Love's infinite supply.

Regeneration

MANA WILLIS FISHER

SAUL of Tarsus was a firm believer in the Jewish faith, and therefore in the law as taught by Moses. He was bitterly opposed to Jesus and his teaching, yet he found eventually that Jesus' teaching was identical with the spiritual utterances of Moses and the prophets, and that the Sermon on the Mount was but a clearer presentation of the ten commandments. Read through continuously in the light of Christian Science, the commandments and beatitudes are the story of humanity coming into man's divine heritage.

While on his way to Damascus to do away with the followers of Jesus, Saul was perchance turning over in his thought the snatches of this new teaching which he had been able to gather, and was pondering upon them. Suddenly he seems to have reached the point where he realized that even

Digitized by Google

though he had studied the Jewish law from his youth up, yet he was "poor" spiritually, and, regardless of the fact that he was in command of a body of soldiers and carried papers from the high priest, that the object of his journey was not really to wipe out the Christian faith, but to learn more of it. With this understanding there must have come a peace and happiness which carried him at once into harmony, and he was indeed "blessed." He doubtless saw that the Christ-teaching was not intended to destroy the law, but to help men to have "no other gods before me"—the one true God. So clearly did Saul see this that he began at once to aid instead of trying to hinder this cause. Our Leader tells us (Science and Health, p. 326) that "in humility he took the new name of Paul."

Paul's life at this point shows that he at once experienced repentance; and as he mourned he began to discard all evil,—to cast out all idolatrous thoughts of material knowledge, position, money, body, or human inheritance of any nature, and no longer to bow down to them or serve them. He saw what his heritage really was,—that it consisted of all godlike qualities, and that he inherited only from God. As God is jealous (vigilant in guarding His own ideas), so God's child inherits this vigilance of thought and is able to keep God's law. Meekness took the place of arrogance in Paul's thought, and this humble, teachable attitude of mind strove not to give out false teaching about God; did not pray for what it did not desire; did not antagonize the prayers of others; did not declare that God was the creator of evil. Not taking God's name in vain, Paul was ready to "inherit the earth."

Paul's continual hungering and thirsting after righteousness was manifested in his desire to gain and then to share his treasures of Truth with others. This desire made a Sabbath, or holy day, of each day, and blessed not only himself but all with whom he came in contact, even the stranger who should read his message many centuries later. As he grew more merciful, he was more and more honoring his Father-Mother God, and he thus obtained mercy for himself. Paul had to learn not to grieve over the past, because there was still sufficient time in which to honor God, since the commandment reads, "That thy days may be long upon the land which the Lord thy God giveth thee."

These steps Spiritward made Paul more "pure in heart," and he began to see God as He really is,—as Life, Truth, and Love. Because he saw God as Life, he ceased to think of killing any one or holding thoughts the reverse of Life. Truth swept away all thoughts of stealing, and no adulterating thoughts could remain, but were wiped out by the knowledge of God as Love. The beloved disciple has said, "We know that, when he shall appear, we shall be like him; for we shall see him as he is. And every man that hath this hope in him purifieth himself, even as he is pure." All these blessed experiences made Paul a peacemaker, and he corrected many warring tendencies in humanity. He was called a child of God because he represented Life, Truth, and Love.

Paul had learned not to bear "false witness" against his neighbors, so had ceased to persecute them "for righteousness' sake." Rather had he learned to say to them that "theirs is the kingdom of heaven." He was helping to fulfil all the law, for had not the Master whose teaching he had learned to love said, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. . . . Thou shalt love thy neighbor as thyself. On these two commandments hang all the law and the prophets." His awakening to the fact that he need not covet, since man has all good, destroyed his desire to revile, to persecute, and to say all manner of evil. He learned to rejoice, and he found the reward great—even harmony. He found that Christ did not come to destroy the law or the prophets, but that through the constant revelation of Truth to the receptive thought, he was daily, hourly, fulfilling it—filling it full.

Jesus' promise to the Christian of yesterday is the promise of comfort to the Christian of today: "For verily I say unto you, Till heaven and earth pass, one jot or one tittle shall in no wise pass from the law until all be fulfilled." O comforting assurance! God's law will remain the same yesterday, today, and forever, until every man has experienced this complete regeneration and has no other gods before the infinite One.

Overcoming a Bad Habit

SAMUEL J. MACDONALD

It is hoped that the following statement of an intimate individual experience may bring help to those who need it. A beginner in Christian Science who was a user of tobacco, was present when another student asked a practitioner to give him one good reason for discontinuing the use of the weed. Naturally he listened very attentively to the answer, but when it was given and he had pondered it, it did not seem to his critical sense—in which at that time he still took a puerile pride—to be sufficient to change his opinion in the matter. Consequently, as he believed he found a great deal of harmless pleasure in indulging the habit, he continued to do so until he found a sufficient reason for abstinence. What appeared to him to be more important and more pressing problems, seemed to crowd upon him and to call urgently for solution, and so he went on for many months, still continuing apparently to find pleasure in this material indulgence.

Meantime the student sought and was permitted to obtain membership in a small congregation of Christian Scientists who had been striving for some years to build a suitable and commodious church edifice. Very properly he subscribed to the building fund of his church with earnest and assured faith that divine Love would enable him to meet this subscription to a worthy cause. But there ensued a long period of business depression and of seeming lack, and he was unable to meet his subscription or to pay any part of it. This state of apparent inaction continued for almost a year, and not even a single dollar had been spared toward the defraying of his just obligation. Many times during this period of stringency the student tried to face the situation manfully, so he believed, but was unable to solve the problem. The saving grace of patience, and an abiding faith that the solution of the problem would be revealed to him by divine Love, were his only guiding stars, while he was "like a wave of the sea driven with the wind and tossed."

Finally, in the Lesson-Sermon for the week there appeared this passage from Matthew's gospel: "The Son of man shall send forth his angels, and they shall gather out of his kingdom all things that offend, and them which do iniquity." During that week the beautiful scientific truth of this statement was demonstrated. One night the student awakened from sleep in the middle of the darkest hours, and one of the angels of the Son of man (see Science and Health, p. 299) appeared to him. His attention was lovingly directed by Truth to the real reason why his subscription had not been fully paid, and he was no longer permitted to evade the facing of the truth.

"During all this time," said the spiritual monitor, "that you have been pleading lack and limitation and consequent inability to pay your just debts, have you not unnecessarily been spending, daily and weekly, considerable sums of money upon mere sensual enjoyment? And is it not true that these sums of money, if they had not been wasted in this vain

Digitized by Google

fashion, would now have been amply sufficient to pay your subscription? Have you, my friend, anything whatever to show for all that expenditure, except inability to meet your just obligations and a clamorous sense of lack? Is it not time," was urged gently but searchingly, "that you should awaken from this dream of pleasure in matter to the worship of God, Spirit, 'in spirit and in truth'? As you confess to having received great benefits from the truth and you have lovingly testified in public to these benefits, can you not then make some small return? Can you not give up even the dearest of your material pleasures? Can you not be faithful, obedient, even 'over a few things'?"

It is scarcely necessary to add that this habit of self-indulgence, thus lovingly and gently rebuked, was promptly done away with; nor is it necessary to inform any Christian Scientist that the natural fruit of obedience was harvested in due time and the subscription fully paid. It was no longer necessary for the student to ask for or to seek a reason for obedience, or for the giving up of any material indulgence. With obedience always comes enlightenment. Enlightenment never comes first or alone, as Jesus points out scientifically: "If any man will do his will, he shall know of the doctrine."

It was one of the unexpected joys which immediately followed obedience, that the giving up of this hoary habit, apparently irresistible through many long years of domination, brought no sense of privation or loss, but on the contrary an ever increasing realization of freedom, joy, and peace. Our revered Leader says (Science and Health, p. 232): "In the sacred sanctuary of Truth are voices of solemn import, but we heed them not. It is only when the so-called pleasures and pains of sense pass away in our lives, that we find unquestionable signs of the burial of error and the resurrection to spiritual life."

Sunrise

ALICE M. KIBBLE

A CALL had come to me to carry the message of Truth to one in need. It was necessary to rise early in order to catch the train, but a half hour's walk in the dawning light and the brisk morning air helped to prepare my thought for the message I was to receive and give. I bought my ticket, and as the train started Mrs. Eddy's words came to me: "Mind produces all action" (Science and Health, p. 419); then the thought followed that all the activity of right thinking is from God.

At this moment I looked out of the window. We had just left the town behind us and were coming into the open country. I watched the sun rise, and low down on the horizon a thick bank of dark clouds seemed to me to illustrate the darkness of material beliefs bearing one down to earth. From north to south, as far as the eye could see, they lay, trying to tell a tale of darkness and doubt, gloom and fear, typical of mortal thought without the light of Truth, till one was led to ask, Is there no brightness anywhere? Yes, for on raising my eyes I saw a message of hope, a golden glow in the center of the cloud which seemed to foretell the brightness of the coming dawn. As I looked at this the words in the fourth gospel about the "man sent from God," came forcibly to me: "He was not that Light, but was sent to bear witness of that Light." Gradually the light, which to me symbolized the message of Truth, spread, and as it was carried, more and more brightness illumined the clouds. So too may we each one carry the good tidings of light to those in doubt and fear. Presently there appeared a wondrous silver light, away up in the sky, and it recalled the angel message, "Glory to God in the highest, and on earth peace, good will toward men." Long the light stayed, and the sense of peace filled my consciousness.

But what was this? Behind the golden cloud the circle of the sun was faintly visible. Slowly indeed it seemed to rise, and as I watched, another message came to thought, "Unto you that fear my name shall the Sun of righteousness arise with healing in his wings." Slowly, grandly, majestically, the orb of day rose above the clouds, and as its light spread here and there the very clouds became shining, white, and beautiful. No sign of darkness now; the light had come!

How all this typified to me the passage from material darkness to spiritual dawn! A little more watching, a little more waiting, and lo, the clear blue sky of the open firmament of heaven is revealed. Nothing now to dim the brightness of the day. More constant watching, more patient waiting on God and on His Christ, will bring to consciousness fuller spiritual understanding, and for us there shall be no more night when we realize the fulness of meaning in the words, "Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee."

The Fourth Commandment

EDITH MAUDE ELLIS

WHILE the writer was preparing a lesson on the fourth commandment for her Sunday school class, she paused at the phrase, "In it thou shalt not do any work," and wondered why the words "in it" were used instead of "on it." Not having made a very deep study of the commandments till I was asked to teach in the Sunday school of the little society of which I am a member, it seemed to me that the words "on it" would have been simpler and clearer, and the command would then have been straightforward enough for the smallest child to understand. But there were the words "in it" facing me from the open Bible and awaiting explanation for the little ones. I turned to the second chapter of Genesis and read, "On the seventh day God ended his work which he had made; and he rested on the seventh day from all his work which he had made." The word "on" being used twice in Genesis, why "in" in Exodus?

Just at this point a text flashed into thought from one of the sections in that week's Lesson-Sermon which had come to me repeatedly during the week: "If therefore thine eye be single, thy whole body shall be full of light," and I turned to Science and Health, knowing that the explanation could be found there. Mrs. Eddy says: "The successive appearing of God's ideas is represented as taking place on so many *evenings* and *mornings*,—words which indicate, in the absence of solar time, spiritually clearer views of Him." "The numerals of infinity, called *seven days*, can never be reckoned according to the calendar of time." "Mind measures time according to the good that is unfolded" (pp. 504, 520, 584).

It then became apparent that the six evenings and mornings previous to the seventh day are for us, to whom the commandment is addressed, stages of consciousness or periods of progress which are necessary for each one of us to go through before we gain the "spiritually clearer views" of God; and just in proportion as we are faithful over the "few things" as they are revealed to us, will our understanding be enlightened in regard to the "many things," until we approach the seventh day, in which we shall have arrived at the full realization of God, man, and the spiritual universe.

Again the Master's words, "If therefore thine eye be single, thy whole body shall be full of light" (understanding), flashed into thought, and it was seen that the real Sabbath, or seventh day, will be when we shall see that everything

Digitized by Google

which divine Mind has made is "very good," and no remembrance is left of there ever having been even a belief of a second power called evil, or, in other words, that our eye has ever been evil and our whole body full of darkness. "In it thou shalt not do any work" is the divine command. In this understanding of the perfect creation, when our eye is single, when our spiritual perception sees only good, we too shall have ended our work, and we shall rest, not because of any exhaustion, but because all wrong thoughts are corrected and there is no more work or striving to be done. In that happy time there will be only the glad task of remembering "the sabbath day, to keep it holy;" and in this holy work we shall find our rest.

The following Sunday I went to my class feeling deeply grateful for the privilege of laboring in that part of the Father's vineyard which is so important to future generations; and deeply grateful too that a sense of duty to the little ones makes it necessary for their teachers to search prayerfully the Scriptures for that understanding so essential to spiritual growth. If during the entire week we have remembered "the sabbath day, to keep it holy," if we have seen to it that nothing and nobody, from ourselves to the stranger within our gates (the strange thoughts which might creep into our consciousness), shall prevent our giving full and complete obedience to the command, each Sabbath will mark real and lasting progress for us and for the children under our care.

✧

Plus and Minus

HARRY E. CARTWRIGHT

An incident which recently came to the writer's attention recalls Mrs. Eddy's statement that "spiritual teaching must always be by symbols" (Science and Health, p. 575). A small boy, after entering one of the lower school grades, came home one day bringing his report card, all his marks being good except in arithmetic. For some time afterward he continued to grade low in this study, and neither the teacher nor his mother had been able to find the reason.

The mother was at first concerned about this difficulty, but having learned the blessedness of turning to God in Christian Science, and seeking in all things divine guidance, she knew it was right that her son should master the useful science of numbers; so she once more questioned him, taking up some of the problems which he had failed to solve. On asking him, "How much is four plus two?" she was surprised at his reply, "I don't know, mama." "Why, don't you remember how much four and two make?" she then questioned, and he quickly answered, "They make six, of course." The error was uncovered. He had forgotten the meaning of the symbols "plus" and "minus." Since his return to school with these simple things once more at command, his progress has been steady and natural.

Multitudes of "children of a larger growth" have lapsed from early faithfulness to later apathy because of the seeming contradictoriness and impracticability of religious teachings. Many have been puzzled by simple things hidden behind thick veils of mortal technicality. These have failed to get the right answer to their problems because of the baffling opposition of creed, dogma, and ritualism. When once they have experienced in Christian Science how effectively the understanding of divine Principle, of Truth and Love, may be applied to their problems, and how certainly they may depend upon God's law for obtaining the right answer, they joyfully strive to reach the goal of dominion over all things. Then, when they have recovered their grasp on the "plus" of infinite Mind and learned to reject the "minus" of matter, their progress is seen by all men.

Selected Articles

[Judge Clifford P. Smith in *Watertown* (Mass.) *Tribune-Enterprise*]

The letter from a Congregational minister which was headed by the words "The Claims of Christian Science" in quotation marks, presented his own claims, or those of persons who think as he does, rather than the claims of Christian Science. It was written, however, in much better temper than most letters of its kind. Of this I would speak thankfully. His refusal to give any credit to Mrs. Eddy for the beneficial changes in the beliefs of Christendom which have occurred since the teaching of Christian Science began, though intrinsically strange, is not unprecedented in the history of religions. The Roman Catholic church has not yet honored Martin Luther, and many Jewish rabbis have said that Hillel was a greater teacher than Jesus.

If the Emmanuel church movement has disappeared, as this gentleman asserts, probably it has come to an end because it depended on suggestion, not upon spiritual understanding of the truth of being. Whether this particular movement has disappeared or not, it can be said that the interest in Christian healing, that is, interest in truly spiritual power over all evil, including disease, has not come to an end, but is greater today than yesterday. Recent developments in this general direction are furnished by the following items.

Last July the Anglican Synod of New Zealand adopted the following motion: "This Synod desires to draw the attention of the clergy and laity of the diocese to the importance of the study of the subject of spiritual healing." And in New York City a Universalist minister has been delivering on Sunday afternoons weekly sermons on the application of religion to health. A few weeks ago one of the periodicals of his denomination reported that he was speaking to "eager congregations."

Lest our friend at Watertown should refuse to give Mrs. Eddy credit for these episodes, I would say that the success of Christian Science was expressly stated in the New Zealand Synod as the reason of the motion for the study of spiritual healing. Such developments, however, are of secondary importance. The most important changes in the religious thought of modern times to which Christian Science has contributed as a prominent factor, are a more absolute concept of God and a truer appreciation of Jesus. Christian healing, like life eternal, depends on knowing God and on comprehending what was said and done by Jesus.

As to the claim that the method of Christian Science is shown to be different from that of Jesus because "it heals through treatments repeated for longer or shorter periods," I would say that a difference in the attainments of particular persons does not prove a difference of procedure or process. If it did, the Master would have been obliged to disown all of his disciples. It is recorded, however, that he himself repeated a treatment. The earliest and simplest of the gospels (Mark viii. 22-26) relates that a blind man after one treatment saw imperfectly, but after another "he was restored, and saw every man clearly." Christian Scientists regard instantaneous healing in all cases as a goal to be attained. Meanwhile, we are encouraged by the number of instantaneous healings which now occur, and by such words as these from Mrs. Eddy: "Remember that Science is demonstrated by degrees, and our demonstration rises only as we rise in the scale of being" (Miscellaneous Writings, p. 359).

When our friend criticized Christian Scientists for applying the Master's words, "Ye shall know the truth, and the truth shall make you free," to freedom from disease, and

Digitized by Google

contended that we do this by attempting to read that meaning into them by a tortuous process of reasoning, he was not consistent with himself. He also said, "I do not deny that these words may have, in themselves, a broader application than that which Jesus made, namely, to sin." Evidently, therefore, it is not Christian Scientists who fail to accept the Master's words in their plainest import. Interpretation is required, not to extend the meaning of words which are plainly unlimited, but to narrow their meaning. The words in question by their natural force and effect are unlimited, and any attempt to reduce them so as to justify the exclusion of Christian healing from Christian salvation is refuted by the whole conversation of which they were a part, as well as by the entire teaching and practice of the person who uttered them.

The question, "Why did Jesus have to pass through death?" and the comment, "Surely he was true to his own Truth," were the most important parts of the letter in question. Jesus was indeed true to his own Truth, and he was able to prove all that he taught. Therefore every mortal belief regarding death and life should be tested by what he said on these subjects and by what he accomplished. His overcoming of death on Calvary was the utmost proof of life. As an answer to the above question, I would quote the following sentences written by Mrs. Eddy on page 40 of Science and Health: "Was it just for Jesus to suffer? No; but it was inevitable, for not otherwise could he show us the way and the power of Truth."

[Avery Coonley in *Paris* (Ill.) *News*]

I have read the account of the attack made by a critic upon a religion whose adherents are quietly going about their business of doing good, and against the noble woman who founded it. He has been doing this sort of thing for years, and the falsehoods he permits himself to spread have long been current. They were concocted by those who maliciously desired to tear down Christian Science, and have been perpetuated not by this critic alone, but from time to time by various persons who were so unhappily disposed as to wish to injure this religion if they could. They have not even succeeded in checking its growth.

Mary Baker Eddy is recognized as one of the greatest benefactors of mankind. A prophet was said by Jesus not to be without honor "save in his own country," but Mrs. Eddy was conspicuously honored by the city of Concord, N. H., where she lived for nineteen years, and was well known and highly esteemed for her public spirit, good deeds, and noble character. The various falsifications regarding her early life had all been made and published broadcast before she left Concord. Had they been true, their publication would have discredited her with her neighbors. The fact is, however, that when she moved her residence from Concord to Boston, the Concord city council did her the extraordinary honor of meeting and passing resolutions of appreciation of their friendly relations and regret at her departure. When she passed from this sphere of usefulness her life and remarkable service to mankind were eulogized by the press of the entire country.

The religion founded by Mrs. Eddy has been declaring its character by its works for nearly half a century. In that time it has spread not only from Massachusetts to California and from Canada to the Gulf, but practically around the world. The fact that it is healing the sick as well as the sinning, in accordance with the promises and commands of Jesus, has made its teachings the subject of considerable controversy; but it is not only generally admitted but commonly remarked that it is making its adherents better and happier as well as healthier,—in short, that it is a vital force for good in the world. That which is purifying, uplifting, and ennobling did not spring from baseness, dishonesty, and selfishness. Jesus declared: "Ye shall know them by their fruits. Do men gather grapes of thorns, or figs of thistles?"

Every assailant of Christian Science attempts to deny that it cures any but imaginary diseases, but such denial is futile in the face of the well-known fact, of which new evidence is constantly being furnished, that it has to its credit the cure of the whole list of "incurable" diseases, such as cancer, tumor, tuberculosis, paralysis, and all the rest. There are not only hundreds but thousands of such cases. That the people are cured is attested by the fact that they are well and happy years after they were condemned to die. The nature of the diseases of which they were healed by Christian Science was generally established previously by medical diagnosis, the method usually accepted for determining disease. No sane person would contend that of all the hundreds of thousands of diagnoses made by physicians only those of cases which were afterward treated by Christian Science were mistakes, the balance having been accurate.

Christian Science is founded upon the Bible, and its adherents are willing to have its Christianity tested by its effects upon the lives and the health of those who depend upon it. It is going forward as a result of its "works," unhindered by those who would destroy it, of whom it might be asked in the words of the Master, "For which of those works do ye stone me?"

[B. W. Oppenheim in *Twin Falls* (Idaho) *Times*]

The fact that the Christian Science movement is a world wide one, drawing to itself intelligent Christian men and women and ennobling their lives, is sufficient to refute the critic's comparison of it to a stain and blight. The moral code of Christian Science is based upon the ten commandments and the teaching of Jesus the Christ. So far from encouraging the indulgence of sin, its whole practice is the overcoming of sin, not by the mere declaration that there is no sin, but by the daily practice of purity and holiness—a practice made possible by the knowledge that sin is not an irresistible force with which man copes in vain, but that all power and the only power is God, whom man reflects. It is the knowledge of the ever-presence and omnipotence of God which gives man hope in what has before seemed a hopeless struggle with sin and disease, and which enables him to overcome both sickness and sin and thereby prove them unreal.

The tendency toward purity and holiness inculcated by Christian Science was first demonstrated by its Founder, whose life of unselfishness, righteousness, and purity caused her to be respected and honored in every community where she resided. She is now generally recognized as one of the leading women not only of this age but of all ages. Her life of achievement has placed her beyond the reach of petty scandal or attempted ridicule. Her wonderful work in circumventing the "reign of lust and crime" referred to by the critic is daily becoming more evident. Only one who misreads her life could regard her in any other light than as a spiritually minded woman, whose influence was exerted only in the direction of righteousness.

The message of Christian Science is one of peace and healing. It offers to tired humanity the same message of redemption from present ills which brought about the universal recognition of primitive Christianity. Christian Scientists are not so much concerned about a far-off judgment day or

Digitized by Google

an abstract millennium as they are about gaining a knowledge of God, who promises to all mankind salvation and freedom here and now from both sickness and sin.

✧

[Henry A. Teasdel in *The Ogden* (Utah) *Examiner*]

In the *Examiner* there appeared extracts from an address, delivered at the Union Tabernacle, headed "Evangelist Raps Christian Science." The principal objection raised by our friend to Christian Science is the statement that there is no pain, no illness. In Genesis we read, "So God created man in his own image, in the image of God created he him." Surely such a man is incapable of experiencing pain and suffering,—a man spiritually created. In the next verse we read that He gave this spiritual man dominion over every living thing that moveth upon the earth; and this it is that enables man to overcome and destroy the seeming reality of pain and suffering.

Christian Science does not deny that sin, disease, and suffering seem very real from the human or mortal standpoint. Sickness is a condition of discord or disease which the right harmonious mental condition relieves. Mrs. Eddy, in her book "Science and Health with Key to the Scriptures," says (Pref., p. xi), "The physical healing of Christian Science results now, as in Jesus' time, from the operation of divine Principle, before which sin and disease lose their reality in human consciousness and disappear as naturally and as necessarily as darkness gives place to light and sin to reformation."

Our friend says, "Either stick to the Bible or leave it alone." I agree with him there, even to following Jesus' repeated instructions to his followers, viz.: to heal the sick as well as preach the gospel. Jesus did not recognize reality in sickness and pain or he would not so easily have been able to overcome and destroy them; neither would so many of his followers and students today be able to accomplish the same results if there was reality in pain and sickness.

This critic further says, "God is not calling to affliction, however. Some people are just getting their health because they came to Christ. They now have better ideas and better minds. Christianity brings a real blessing." I agree with him in this also, for it is exactly what Christian Scientists are striving to do—to bring people to Christ, and they are endeavoring to follow Jesus' example and instructions in their efforts to do this. There is no religion that follows the teachings of the master Christian more closely than does Christian Science.

✧

[F. Elmo Robinson in *Portland* (Ore.) *Telegram*]

Christian Science teaches, in agreement with the statement of the Master, that God is Spirit, and, in agreement with the statement of John, that God is Love; that He is infinite, omnipotent, omniscient, and omnipresent. Therefore to Christian Scientists a finite God, or a God who is but a magnified mortal, is inconceivable. Christian Science does not teach that God is "a being," but rather that God is infinite Being; not "a principle," but infinite Principle. The word "Principle" used in Christian Science as a synonym for God presents to Christian Scientists the idea of the changeless nature of God; presents the thought of God as the source, the basis and cause of all real being.

This being the teaching of Christian Science concerning God, and man being the image and likeness of God, compels Christian Scientists to think differently of man than they were accustomed to think prior to their study of Christian Science. Man then in the highest and truest sense, according to the teachings of Christian Science, is not mortal or material, is not a complex material organism with a soul inside of his material body, but is rather the image and likeness of God, Spirit, and therefore must be spiritual, perfect, harmonious, and indestructible. This man never is "drunk," never is "unconscious" or "insane." Drunkenness and insanity, and all other phases of evil and discord, are elements of the belief that man is mortal and material, subject to laws of sin, disease, and death. These discordant conditions disappear from human consciousness as the Christ, Truth, appears,—as we come to an understanding of God and of man as His image and likeness. This has been and is being proved in the case of multitudes of hopeless sufferers who have turned as a last resort to Christian Science and been healed and reformed.

The critic refers to the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, as "rehashed Buddhism." Now, he may or may not understand the teachings of Buddhism, but it is very certain that he does not understand the teachings of Christian Science or he would not have confounded the two. His statement, "Christian Science says that all things that have life are a part of Mind (God) and at what is commonly called death the life returns to Life," used to prove that Christian Science is "rehashed Buddhism," is emphatically what Christian Science does not teach. Mrs. Eddy says (Science and Health, p. 259), "Man is not absorbed in Deity, and man cannot lose his individuality, for he reflects eternal Life." To explain the relationship between God and man Mrs. Eddy makes frequent use of the term "reflection." A "reflection" is not, and never can be, a part of that which it reflects. A thoughtful consideration of this important distinction settles the question of there being any kinship between Christian Science and Buddhism.

The statement "There is no pain" is an absolute statement, and is simply the metaphysical form of stating the fact that God, having caused and created all, and having made all good, never caused pain, and that therefore pain cannot exist as a reality; it is an experience of the carnal, or mortal, mind which can and must be ultimately destroyed through gaining that Mind which was in Christ Jesus.

[Written for the *Sentinel*]

"Be of good cheer"

ANNE VIRGINIA CULBERTSON

Because he knew the sick man's need to cope
With dark despair when all the way seems drear,
The great Physician spoke these words of hope:
"Be of good cheer."

Because he knew the need of courage high,
Because he knew the baneфulness of fear,
He bade the sick to let sick thoughts go by,
Be of good cheer.

He knew the gladness of the flowers and trees,
The birds, the rosy dawns, the changing year;
He knew that men forgetting self, like these
Shall find good cheer.

Because he knew the merry heart does good
To all who come within its sunny sphere,
Not for ourselves alone he meant we should
Be of good cheer.

Because he knew the helpful power that girds
The man by grace of God made free from fear,
The wise and great Physician spoke the words,
"Be of good cheer."

Editorial

"Knowledge is power"

SPEAKING of religionists in general the *Universalist Leader* writes as follows:—

We must know something with all our mind and heart, and we must believe it is worth while, and that it will do good, then go out and tell the people of it as if we believed it,—even more, as if we knew it. We must know it, we must speak with authority, else we are not preachers. We may fill our souls with the fancy that we are to be forever seekers after truth, but we shall never be evangelists until we find some truth, recognize it, and make it our own, and then tell it to others with confidence, because we know it is true.

There is much truth in the above statement by which Christian Scientists may well profit, for in their ranks as in the ranks of all other classes of persons there are those who are earnest and well founded in their understanding, and those who are more or less hazy in their concept of what Christian Science is, as well as those who are perfunctory in their adherence to the teachings and the practice of their faith. It should be a serious question with every one in which of these classes he is enrolled,—whether he is of the ship's company, or a passenger. Our Master in his exhortation to his disciples assured them that the knowing of the truth would make them free, and certainly he did not mean this promise simply for the few men who then surrounded him, but rather for the men and women in all the centuries to come who should diligently seek the truth about God and man and apply it to the uplift of humanity.

In answer to the question, "How can I progress most rapidly in the understanding of Christian Science?" Mrs. Eddy has said in part: "Study thoroughly the letter and imbibe the spirit. Adhere to the divine Principle of Christian Science and follow the behests of God, abiding steadfastly in wisdom, Truth, and Love" (Science and Health, p. 495). Throughout her writings she urges upon her followers the necessity for putting their understanding of Truth's omnipotence into practice. We must not only know Christian Science with all our mind and heart, but we must believe that it is worth while, and that it will do good; furthermore, we must practise it, and thus prove that it is true.

This does not mean that we shall simply talk about Christian Science because of nothing more than an enthusiastic belief in it. We must know what Christian Science is, and be able to back up our words by our deeds, for it is an axiom that we know no more of Christian Science than we can demonstrate; just as we know no more of mathematics than we are able to put into practice in the working out of problems. On page 494 of Science and Health Mrs. Eddy writes, "Jesus said: 'Destroy this temple [body], and in three days I [Mind] will raise it up;' and he did this for tired humanity's reassurance." Jesus did not simply rest his case upon the mere verbal claim that Mind, God, could do this; he demonstrated the correctness of his teaching by actually doing what he said could be done; and so it must be with Christian Scientists. When we have proved the truth of Christian Science for ourselves,—substantiated claims by actual performance,—we are then in a position to speak of it to others with confidence, because we know it is true.

There is an old saying, "Knowledge is power," correlative with Solomon's pronouncement in the book of Proverbs that "a wise man is strong; yea, a man of knowledge increaseth strength." In the light of Christian Science teaching we have come to see that it is when this knowledge is proved to be based upon demonstrable understanding, instead of upon mere belief, that it is of value to mankind. On page 446 of Science and Health Mrs. Eddy writes, "Not human platitudes, but divine beatitudes, reflect the spiritual light and might which heal the sick." When the enthusiasm of imperfect knowledge and the pouring forth of mere words give place to understanding and demonstration, then will the divine beatitudes be so manifest that even those with whom we talk will be kindled with our earnestness and in turn will become evangelists of the truth that both heals and saves.

ARCHIBALD MCLELLAN.

Reproving Sham Poverty

JESUS was once obliged to say to his disciples, "For ye have the poor always with you; but me ye have not always." This was after they had expressed their indignation because a woman had anointed him with "very precious ointment" out of "an alabaster box." "To what purpose is this waste?" they protested, "For this ointment might have been sold for much, and given to the poor." Humanity has a way of harping upon the subject of sham poverty while inexhaustible riches are ever present and ever available. It indulges in poor thoughts in the very presence of the Christ, Truth. Moreover, it is significant that according to Matthew's gospel Judas, who seems to have been the chief protester against this alleged waste, immediately after Jesus' rebuke sought out the chief priests in order to bargain with them for his Master's betrayal. Thus the woman with her empty alabaster box was proven to be splendidly rich and the false disciple with the thirty pieces of silver in hand abjectly poor.

Christian Science, which substitutes metaphysics for physics, shows that the terms "rich" and "poor" are to be interpreted mentally and not materially. On pages 33 and 34 of Science and Health Mrs. Eddy describes the poor as "the meek in heart" and "the receptive thought." This settles the question as to a legitimate poverty, meaning thereby a mental condition which is conscious of the need of spiritual food. Conversely, the desire for material things produces a sham poverty, a mental state which clamors for what has no real existence and rejects Truth. This type of poverty must be laid bare and corrected in order that true riches may appear.

Man is really rich in proportion to his consciousness that he has rightful dominion "over every living thing that moveth upon the earth." Into such a consciousness God pours priceless riches. Jesus was rich beyond compare because he was ever receptive of the infinite resources of good. He who could turn the water into wine, who could find money in the fish's mouth, secure at his need a "large upper room furnished and prepared," and feed the five thousand with a seemingly small provision, surely understood true riches. The wilful sense of sham poverty which Jesus rebuked is not infrequently tinged with pride or self-righteousness, and argues somewhat after this fashion, "I do not want to be rich, I only want my simple wants supplied;" but behind this assertion may lurk the thought addressed to an unknown god, "I thank thee, that I am not as other men are, extortioners, unjust." The poor thinker prefers an assured income, if it be ever so little, rather than be obliged to live from day to day by demonstration, by "every word that proceedeth out of the mouth of God."

A false sense about riches has undoubtedly been nurtured by the frequent misquotations of Paul's statement to Timothy, "The love of money is the root of all evil," as though he had insisted that money itself, and not the love of it, was "the root of all evil." There is no virtue in limitation. There is no refuge, no real retreat, from evil in mere lack. Having been "faithful over a few things," the scientific

Digitized by Google

Christian necessarily becomes "ruler over many things." Progress involves becoming acquainted with and mastering more ideas, not less, as they unfold in God's plan. This requires, not the reduction of man's dominion but its enlargement, not contraction but expansion, not paucity of ideas but their multiplication, not burying talents but putting them out to interest. The primitive man dwelling in a cave and master of a very few ideas cannot be the model for humanity, but rather the superbly spiritual Christ-man who has authority and dominion over all things and is able to claim coexistence with God.

With tender compassion Mrs. Eddy has brought to our attention the right conduct for both the spiritually rich and poor when she writes on page 518 of Science and Health, "The rich in spirit help the poor in one grand brotherhood, all having the same Principle, or Father; and blessed is that man who seeth his brother's need and supplieth it, seeking his own in another's good."

WILLIAM D. MCCRACKAN.

Physical Healing

STUDENTS of Christian Science are supposed to be familiar with Mrs. Eddy's teachings as found in the text-book, "Science and Health with Key to the Scriptures," especially those which relate to healing; and there is one passage on page xi of the Preface with which we cannot be too familiar, namely, "The physical healing of Christian Science results now, as in Jesus' time, from the operation of divine Principle, before which sin and disease lose their reality in human consciousness and disappear as naturally and as necessarily as darkness gives place to light and sin to reformation." In view of this and many similar statements which may be found in our text-book and in Mrs. Eddy's other writings, it is surely obvious that the healing of disease should always be accorded the importance which it deserves as one of the signs that our Master said should "follow them that believe." Occasionally we hear some one speak of "mere physical healing," as if there could be such a thing in Christian Science, when the healing influence of divine Truth, as revealed through Science and Health, permeates human consciousness and dispels all darkness, thus bringing "life and immortality to light," to use the apostle's words.

It is quite true that the greater number of those who come to Christian Science for help are at first looking only for physical healing; and for a time they are satisfied with the relief felt from the absence of pain and fear, consequently they are apt to think and talk a great deal about the physical changes of which they are conscious, and which they are disposed to bring to the notice of others to such an extent as to call forth a criticism upon the healing, which apparently has gone no deeper than the flesh. It is not, however, fair to decide upon this question from the immature thought and utterances of the one who is only taking the first steps in Science; because when "the operation of divine Principle" begins to be felt in human consciousness, a great change is going on, much greater indeed than either the one healed or his friends can perceive. We should never forget that due appreciation of this healing, both on the part of the one who experiences it and also on the part of those who know of it, tends to open wide the windows which let in the healing radiance of "the Sun of righteousness;" and so we may well rejoice in the signs vouchsafed us, and every day and hour look for more.

The one who speaks of "mere physical healing" fails possibly to see that to the sick person this is his greatest human need, and that it is nearly impossible to lift thought to Spirit and spiritual things while it is held down by the belief in a suffering mortal body. The faithful student of Christian Science, however, learns how to encourage the struggling thought to rise above material evidence—to be, as St. Paul says, "absent from the body, and to be present with the Lord." This is of course a very different thing from a sense of relief gained through the use of material remedies, and Paul's words aptly express the healing of Christian Science. Moreover, when one begins to experience the full force of these words, "present with the Lord," he knows that there are advance steps to be taken—that the physical and mental transformation must go on to its spiritual ultimate, until the outcome is realized in the way of which the psalmist speaks when he says, "I shall be satisfied, when I awake, with thy likeness."

When this spiritual transformation goes on in the normal way it should, there is nothing painful or difficult about it; for the Master himself asked of some cavilers, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?" The inference here is that the yoke of Christ is always "easy" and Truth's burden is always "light." If we see another apparently rejoicing more in physical improvement than in spiritual growth, we should even so "rejoice with them that do rejoice," knowing all the while that the operation of Truth will go on until God's perfect likeness is revealed in the light of divine Science.

The Christian Science Benevolent Association

Many inquiries having been made as to whether individuals and organizations are at liberty to make contributions of money to The Christian Science Benevolent Association, the Board of Directors takes this means of assuring the field that such contributions will be gladly received. They may be sent to Adam H. Dickey, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

Letters from the Soldiers

The following excerpts are from letters received by the distribution committee in England from soldiers acknowledging receipt of *The Christian Science Monitor.*

"For some time past we have received a steady supply of *The Christian Science Monitor*, which it appears passes through you. We are unaware of the original donors, and I request that you will be good enough to express our thanks to those persons, whoever they may be, for their generosity in supplying the papers, but more so for the kind thought that dictated the action."

"On behalf of the N. C. O.'s and men of this battalion, I beg to express to you our gratitude and keen appreciation of your kindness and consideration in sending out to us copies of *The Christian Science Monitor.* Any kind of healthy reading matter is gratefully received by all ranks in the field."

"Will you please accept my sincere thanks for the *Monitors* you have sent to me. I was a subscriber before joining the army, but could not afford this after. A Christian Science friend said he would obtain some for me, but I hardly expected a response so promptly as yours. I am a marker on the big rifle range here, so you will understand how very much I appreciate the *Monitors* and my pocket Science and Health to read in odd moments, as there is nothing else to attract there but the targets and the big sand bank behind."

Digitized by Google

"I have received several bundles of your paper [*The Christian Science Monitor*]. I have distributed them among the men of my battalion, and I must say they are very much appreciated, and I have been asked several times if I had any more in stock."

"I beg to acknowledge with many thanks the receipt of three packets containing copies of *The Christian Science Monitor*. These copies I have distributed among the men of our battalion, who very much appreciate your kindness and thoughtfulness in sending them such interesting reading matter."

"All ranks of the . . . much appreciate your paper. Will you please accept this as a token of kind appreciation for the last two bundles of papers which I received correctly. They were distributed among the N. C. O.'s and men of the regiment, and on their behalf I wish to thank you."

"I issue them [the papers] to each company on arrival, and I think the men appreciate them very much. Of course we have got a lot of people from overseas with us. You must thank the Trustees under the Will of Mrs. Eddy, as I am sure the battalion is grateful for them."

"I respectfully beg to acknowledge the receipt of the parcel of papers weekly forwarded by you. They are shared out equally to the companies of this regiment. Officers and men alike appreciate this great effort of the various societies and of many private persons to supply these papers to pass away in a pleasant manner what might have been a very anxious hour."

"Thanks for the papers received safely. I have read them and given them to the boys of this battalion and can assure you they are much appreciated."

"Just a few lines when I have found time, thanking you very much for your valuable gift. I can honestly assure you that *The Christian Science Monitor* is highly appreciated by all N. C. O.'s and men of the . . . Thanking you once again, and hoping that *The Christian Science Monitor* will have great success."

"I have not had much chance of asking how the men liked the papers, nor have the men had much time to read them, unfortunately, since you sent the first bundle, as we have been in action practically all the time since; but I think the men will appreciate the papers very much, as there is a lot of news that must affect several of them, also the paper lets us know what our American cousins think of the war."

"I have given them [the papers] out, and I am sure the men have been glad to have them. It is very kind of you to think of us in this way, and we greatly appreciate the kindly thought that prompted the donor to give instructions for them to be sent. We are always grateful for reading matter, either light or heavy."

"Just a few lines on behalf of the boys of the battalion to thank you so much for kind gift of papers, which are greatly appreciated by all ranks, more especially when we are in the trenches."

"I have very much pleasure in acknowledging with very grateful thanks the receipt of your letter and copies of *The Christian Science Monitor*. The papers were duly distributed among the men of this battalion, and were very highly appreciated by them."

"I have to thank you on behalf of the men of . . . Trench Mortar Battery, to whom you so kindly forwarded copies of *The Christian Science Monitor*. I cannot describe the appreciation with which these were received, even more so by the fact that we were miles from a town where newspapers are procurable."

"The papers arrived while the battalion was in the front line trenches and were immediately distributed to the men. They are of general interest and are greatly appreciated by every one."

"Such gifts as yours are very acceptable, because they help in such a great degree to relieve the monotony of trench life."

Among the Churches

Current Notes

BELLINGHAM, WASH.—First Church of Christ, Scientist, will soon be in its new home on the corner of Forest and Maple Streets. The completion of the first unit of what will be a twenty-five thousand dollar church is being rushed, and it is the hope of the building committee that the structure will be ready so that services may be held in it Sunday, Oct. 8.

The construction of the first unit was begun June 1, and will be finished at a cost of seventy-five hundred dollars. It is about one third of the entire church.

The Sunday American-Reveille.

SOUTH BEND, IND.—The corner-stone of the new edifice of First Church of Christ, Scientist, was laid at nine o'clock this morning [Sept. 9]. The building recently removed from the site of the present structure was erected in 1906 and had a seating capacity of three hundred and fifty. The new church will seat nine hundred persons.—*South Bend Tribune.*

OAKLAND, CAL.—The opening of the new edifice of Second Church of Christ, Scientist, at Thirty-fourth Street, near Telegraph Avenue, will be on Sunday, Sept. 10. This structure cost a little over eighty thousand dollars. The furnishings, together with the site, represent an investment of one hundred and twenty-five thousand dollars.

Oakland Tribune.

SALT LAKE CITY, UTAH.—Progress on the edifice now being erected by Second Church of Christ, Scientist, has so far advanced that morning services were held for the first time on Sunday, Sept. 10, in the Sunday school room in the basement. It is expected that the building will be completed about the middle of October.—*Correspondence.*

KENDALLVILLE, IND.—A reading-tent was maintained at the Eastern Indiana Fair Sept. 18 to 22. There were distributed 225 *Sentinels*, 10 *Journals*, 200 *Monitors*, 85 pamphlets.—*Correspondence.*

FAIRMONT, MINN.—Christian Scientists maintained a reading-tent at the State Fair, Sept. 4-9, inclusive.

Fairmont Sentinel.

The Lectures

Boston, Mass.

Frank Bell of Harrisburg, Pa., a member of the Christian Science board of lectureship, delivered a lecture on Christian Science Friday evening [Oct. 27] under the auspices of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., in the church edifice, Falmouth, Norway, and St. Paul Streets. He was introduced by John C. Lathrop, temporary first reader of The Mother Church, who said:—

Christian Science is no longer generally considered a new

Digitized by Google

and untried religious belief. The year 1916 marks a complete half century since Mrs. Eddy discovered the divine Principle of Christian Science and the spiritual rules which demonstrate this Principle in the destruction of all error. These fifty years have witnessed marvelous changes in human thought, particularly regarding science, theology, and medicine. That Christian Science is the impersonal spiritual leaven of Truth which Jesus said would come to guide "into all truth," and therefore that it will turn, overturn, and destroy all material beliefs, thereby producing permanent harmony, health, and happiness in human affairs, is the conscientious and grateful conviction of many people. The lecture we will hear this evening is intended to elucidate this subject and to correct any false impressions which may have been formed thereupon.—*The Christian Science Monitor.*

✧

Blackpool, England

Townspeople and visitors were given another opportunity of learning something definite about Christian Science from John W. Doorly. Charles M. Shaw in introducing the lecturer said in substance:—

A few weeks ago a well known Lancashire ecclesiastic stated that no religious question has been raised in a more acute form by the war than the one as to the nature and value of prayer. I take it he means that the havoc of war has stimulated, in an unusual degree, a yearning in the hearts of many men, all the world over, for a help and deliverance that is beyond the power of man to give, and in the hearts of others the despairing cry, What is the good of praying? I agree with the statement. Whatever other effects the war produces, it has revealed unmistakably that the resources of civilization, as men have understood and applied them, have failed us. Are there any other resources? And if so, how can they be drawn upon?

Now I wish to affirm that on this subject Christian Science has a contribution to make which appeals more directly to the experience of men than any other form of faith; for Christian Science not merely declares the availability of divine power for human need, but claims that the reality, presence, and help of God belong to the realm of human knowledge and experience and not to the vague sphere of belief and to other-world states. Divine Truth is to be known just as any other kind of truth may be known; and the effects of one are as immediate and real as the other. In itself this assertion is quite natural, but in relation to the prevailing views on the question of religion it seems a tremendous claim. But Christian Science substantiates it by a body of evidence which has been accumulating for about fifty years all the world over, consisting of the healing of every kind of disease, of the support of courage, patience, and high resolve under the most trying conditions, and of wonderful moral transformations.

Blackpool Gazette-News.

✧

Bennington, Vt.

Albert W. Varney, superintendent of schools, in introducing Virgil O. Strickler, who lectured on Christian Science in the High School auditorium, said:—

I stood this morning listening to the liquid notes of a Baltimore oriole working among the tops of my apple trees, picking hosts of insect pests from bark and leaf, and I thought of its marvelous hammock nest swinging suspended by its horsehair threads from the topmost branch of a near-by graceful elm, and then I thought in what a wonderful language God talks to man. All men see and hear this language, but few understand. Through all the ages past man has listened to the language of nature, and listening has used his divine gift of reason and reasoned out to God.

All people, whether barbarous or civilized, have found God. From the savage trembling in abject terror before his God, man has advanced, up, up, up through the centuries of superstition, thinking, studying, learning of the human brotherhood of men until he came to a final realization of the great mystery of divine Love revealed by Christ Jesus. Since his time there have been many interpretations and interpreters of his life and teachings that have come and gone, and there are many that still remain. During the past century thought has made its most notable advance. There have been many creeds, many cults, but none has offered greater evidence of stability and permanence, none has presented a wider vision or higher ideals than the Christian Science movement. I am sure we are all pleased to learn more of this faith.—*Correspondence.*

Lectures to be Delivered

[By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.]

CALIFORNIA—Anaheim: John W. Doorly, High School Auditorium, 3 p.m., Nov. 19.
Berkeley (First Church): John W. Doorly, Church Edifice, Bowditch Street and Dwight Way (note change), 8 p.m., Nov. 14.
Corning: Charles I. Ohrenstein, Maywood Opera House, 3 p.m., Nov. 19.
Fullerton: William R. Rathvon, High School Auditorium, 8 p.m., Nov. 21.
Hermosa Beach: William R. Rathvon, Bank Building, Pier and Hermosa Avenue, 8 p.m., Nov. 20.
Long Beach: John W. Doorly, Auditorium on the Pier, 8 p.m., Nov. 21.
Los Angeles (Second Church): William R. Rathvon, Church Edifice, 948 West Adams Street, 8 p.m., Nov. 18, and Shrine Auditorium, 3 p.m., Nov. 19.
Los Angeles (Third Church): John W. Doorly, Church Edifice, 734 South Hope Street, 8 p.m., Nov. 23 and 24.
Oxnard: John W. Doorly, Victory Theater, 8 p.m., Nov. 20.
Pomona: William R. Rathvon, Belvedere Theater, 8 p.m., Nov. 23.
Sacramento (First Church): Charles I. Ohrenstein, Tuesday Club House, Twenty-eighth and L Streets, 8 p.m., Nov. 20.
Santa Rosa: John W. Doorly, Columbia Theater, B Street, 8 p.m., Nov. 16.
South Santa Anita: William R. Rathvon, Church Edifice, Duarte Road, 8 p.m., Nov. 24.
CANADA—Kitchener, Ontario: Edward A. Merritt, Church Edifice, Water and Francis Streets, 8:15 p.m., Nov. 23.
COLORADO—Grand Junction: Charles I. Ohrenstein, Margery Hall, 8 p.m., Nov. 24.
ENGLAND—London (auspices Bromley): John Sidney Braithwaite, King's Hall, High Street, Lewisham, S.E., 3 p.m., Dec. 3.
London (Second Church): John Sidney Braithwaite, Church Edifice, Palace Gardens Terrace, Kensington, W., 3 p.m., Nov. 30.
Plymouth, Devonshire: John Sidney Braithwaite, Guildhall, 8 p.m., Nov. 28.
ILLINOIS—Carbondale: Virgil O. Strickler, Amuse U Theater, 8 p.m., Nov. 20.
Chicago (Thirteenth Church): Ezra W. Palmer, Blake Hall, Morgan Park, 8 p.m., Nov. 20.
Chicago Heights: Bicknell Young, Masonic Temple, 8 p.m., Nov. 18.
Downers Grove: Ezra W. Palmer, Dicke Theater Building, 8 p.m., Nov. 24.
Evanston: Dr. Walton Hubbard, Church Edifice, Chicago Avenue and Grove Street, 8 p.m., Nov. 23.
Geneva: Ezra W. Palmer, City Hall, 8:15 p.m., Nov. 23.

Milwaukee (First Church): Virgil O. Strickler, Majestic Theater, Wisconsin Street, 12:15 noon, Nov. 24, and Church Edifice, Prospect Avenue and Keene Street, 8:15 p.m., Nov. 24 and 25.
Oshkosh: Bicknell Young, First Methodist Episcopal Church, 8:15 p.m., Nov. 20.
Wausau: Bicknell Young, Mt. Sinai Temple, 3 p.m., Nov. 19.

Testimonies of Healing

With a deep sense of gratitude I write this acknowledgment of the healing power of Christian Science. For over fourteen years I was sick with stomach trouble. Rheumatism also set in, and at times I could not put my hands to my head or move my legs. The pain was sometimes so severe that I could hardly sit, lie down, or even breathe. The physician could give me no hope and no help.

I was then told of Christian Science by a neighbor to whom I will ever be grateful, as she was the channel to lead me into this great truth. At first I could not understand how I could get along without medicine, after taking it daily for years, but she told me that if I would like to read the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, she would let me keep it all day. I promised to return it that evening, but became so interested in the reading I was loath to part with it. The next day I went to a practitioner for treatment, and asked her to get me a copy of Science and Health, which was received a few days later. She told me to begin by reading the chapter entitled Prayer, and to go home and eat what was set before me without fear. This I did, eating food I had not tasted for years, but with no bad effects. My healing was slow, and sometimes discouragement set in, but I gained a better understanding and searched more diligently for the truth which comforts, helps, and heals.

A year and a half previous to studying Christian Science I lost a very dear one in my family and it seemed as if I could never bear it, but Christian Science gave me that understanding and comfort which God hath promised to all who believe. I went regularly to the Sunday services and Wednesday evening meetings and soon learned that God is Love, that He is a very present help in trouble, and I was completely healed of that sorrow. Several members of the family have passed on since then, including my mother, but I was strengthened by Christ, Truth. The effects of sunstroke, of twenty-eight years' standing, have been entirely overcome, so that I can go out in the hot sun without any inconvenience.

We have had many healings in our family through Christian Science, such as colds, influenza, and whooping-cough. One of my sons had his knee cut with an axe, but was completely healed in three treatments. This seemed wonderful to us, and we are grateful to our heavenly Father, who healeth all our diseases. My daily prayer is that I may gain in wisdom and knowledge, so as to help others as I have been helped. It is now twelve years since my healing. Words are inadequate to express my gratitude for Christian Science. It is with a heart full of love and thankfulness to God, and of gratitude to dear Mrs. Eddy, that this testimony is given.

THERESA D. LANGE, Houston, Texas.

✧

In March, 1914, I became interested in Christian Science. I was depressed, weary, tired, and discord seemed so great in my home that I felt there was nothing to do but ask God for help. I prayed He would send the Holy Ghost, the Comforter, to us all. Next day a lady asked me to attend a Christian Science lecture, and while listening to it I felt I should never take medicine any more—all desire for it left me. Although I did not know it at the time, I had an instantaneous healing of chronic stomach trouble. I had been on a diet for two months, but that night ate a hearty supper, then went to bed and slept as I had not done for years. Then I knew Christian Science was what I needed.

The following day I opened the *Journal* given me at the lecture and looked up the address of the nearest practitioner. At that first visit to the practitioner I found peace such as

Digitized by Google

the world cannot give or take away, peace for myself and for those in my home. The uplift was beautiful, and I was straightway cured of a skin disease of ten years' standing. Since then I have been healed of bronchial catarrh, and have never had to stay in bed an hour or keep indoors on account of illness. I can go out in all kinds of weather in peace and safety.

I have had many proofs of God's protecting power and am very grateful for the character building one gains in Christian Science. Words cannot express all I feel,—the love and gratitude I owe for some understanding of Christian Science. I am deeply grateful to our dear Leader, Mrs. Eddy, for giving us this glorious truth of "on earth peace, good will toward men," and to all those who help us in preparing the Lesson-Sermons and the periodicals, from which I am learning more every day that God is Love. I am thankful for the knowledge that God is our Father, and that He sent His Son Christ Jesus to show us the way.

Mrs. H. Baker, London, England.

✧

Nothing I can say or write could express my deep appreciation of Christian Science and the truths I have learned through the study of that wonderful book, "Science and Health with Key to the Scriptures." Like many thousands of others I have cause to love, honor, and revere the name of that noble soldier of the cross, Mrs. Eddy, whose life was so pure, whose love for God and humanity so deep, and whose thought so exalted, that God chose her as the channel for the most helpful revelation of Truth ever revealed to humanity since the time that Christ Jesus walked on this planet and taught and practised this same truth.

For years I was bitterly opposed to Christian Science, or rather to my own false conception of it. I thought myself well informed as to its fundamentals, having read the newspaper comments and criticisms on the subject. I had talked with ministers about it, and a short time before had attended a church service in which an evangelist who purported to explain in part what Christian Science is and what its teachings are, most bitterly denounced Mrs. Eddy and her text-book.

For about seventeen years I was prominently connected with a religious organization in this city, my time being entirely given up to this work. I was fully consecrated to God's service; my only desire was to do good and to help others. I was sincere in my efforts to be what I considered a true Christian should be, and in trying to live as nearly like Jesus as I knew how. Notwithstanding my earnest efforts and my loyalty to the so-called orthodox doctrine, I had sometimes wondered why so little good was accomplished among those I was trying to help. I lived a consistent life, loved the Bible, and prayed as earnestly as I knew how; still there was something lacking—what it was I knew not. I wanted to know the truth and to be a channel of blessing to others, and so turned to the Bible, reading and rereading the teachings of Jesus. I prayed with all the earnestness of one seeking spiritual light, hungering and thirsting after righteousness, for a true understanding of God.

This desire or prayer was answered in a most remarkable manner. I was conscious of becoming more humble and compassionate, more patient and forgiving. I was being prepared for the truth I was seeking, for the truth that makes free. A strange desire came to me one Sunday morning in January, 1912, to attend a Christian Science service. I had gotten over the bitterness of past years. Upon inquiry I learned that Seventh Church of Christ, Scientist, was the nearest to my home. I went to the service and was surprised to find fully sixteen hundred people there. I felt strange and out of place, but while it was all new to me, I was intensely interested throughout the service. Being anxious to know more about this teaching, I attended the Wednesday evening meeting. This was a revelation to me, for I heard of some remarkable healings through the understanding of Christian Science, and they made a deep impression on me. I was beginning to realize that there was something quite unusual about Christian Science. Desiring to know more, I visited the reading-room, where I purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, also a copy of "Unity of Good" and of "Miscellaneous Writings."

Then I began to read the text-book, and as I read that marvelous chapter entitled Prayer the truth began to dawn upon me. The more I read the firmer became my conviction that Mrs. Eddy knew what true prayer is. It became clear to me why my prayers had not been answered before, and why I accomplished so little among those I was trying to help. For several years now I have been studying this wonderful book. It has been to me indeed a key to the Bible, for it has illumined its pages and given me a spiritual understanding of the writings of the prophets and the teachings of Christ Jesus and the apostles. It has explained many of the sayings of Jesus that I could not understand before. It has given me a true understanding of God as divine Mind, Life, Truth, and Love, omnipotent and omnipresent, and a true conception of man as God's image and likeness. I am beginning to understand what Christ Jesus meant when he said he would send the Comforter, "the Spirit of truth," and am certain that in the teachings of Christian Science we have a true interpretation of the teachings and work of the Master. I am fully satisfied now and very happy, and my greatest desire is to have that Mind "which was also in Christ Jesus."

I had been troubled for many years with chronic catarrh, for which material remedies had been tried, but without success. After reading Science and Health for some time, I awoke to the realization that I was healed, and have had no return of the trouble. My youngest boy had a nervous affliction with his eyes that caused him to squint. This was also entirely overcome through Christian Science. My eldest boy was subject to rheumatism, and invariably after he had been in bathing would come home limping and sometimes crying with pain. He has been healed of this ailment through a knowledge of the truth.

For these healings and for all the many blessings of Christian Science I am grateful beyond expression.

Percy G. Welch, Chicago, Ill.

✧

It was nine years from the time I first took treatment in Christian Science before I received physical freedom from periodic and severe attacks of suffering (supposedly neuralgic) which had baffled the various physicians to whom I went. What is called mucous colitis was another thing that caused me great distress. I kept to Christian Science for seven years, taking treatment at intervals, some of the time continuously, and was helped somewhat but not healed. I read and studied with the utmost faithfulness, and, needless to say, went through periods of the blackest discouragement, the question "Why?" being often upon my lips. I felt like an outcast, beyond the pale of healing and emancipation; and while at first buoyant with hope, am sure I reached the point against which Science and Health warns us (p. 260): "Distrust of one's ability to gain the goodness desired and to bring out better and higher results, often hampers the trial of one's wings."

At the end of these seven years the attacks had become

Digitized by Google

more severe and of longer duration, and, under a despairing sense, chancing also to be in a distinctly medical atmosphere, I again (after an unusually severe attack) turned to a specialist, hoping for some respite from the pain that seemed unbearable. The turning aside was, however, of brief duration; I knew that the attempts to bring relief were purely experimental, surgery and opiates being the alternatives suggested.

Utterly weary of it all, I again turned to Science and Health, the reading of which had never been wholly dropped, for I knew that I had found my religion, whether it ever healed me or not. I remember turning at random to page 162 and reading the positive words, "Christian Science brings to the body the sunlight of Truth, which invigorates and purifies." I once more took heart of grace and prayed for wisdom to understand spiritually and be at peace. For some time after this I worked along unaided, and then one day, after a disheartening experience, went to an old friend who had become a practitioner and again took treatment. After some weeks of faithful work there came a time of freedom,—six months without a twinge of pain, a respite which had been unknown for ten years. That summer was certainly a wonder to me, an awakening to newness of life indeed, with a sense of joy and gratitude that permeated all things. To my surprise and grief, however, there came a recurrence of the trouble, though not so severe; then the attacks came at longer intervals until they entirely disappeared. It is over four years now since there has been any indication of pain.

The recurrence was brought about, I now believe, through reference to past suffering both on my part and that of friends who questioned me and wondered if the healing could be permanent. We must not only know that we are free now, but that we always were, and forget that there ever was anything else. It is the truth about us that heals, the truth which stands untouched in spite of all our beliefs and fears; and when we are roused to see man as the perfect reflection of a perfect God, there is no dis-ease to think about and experience. I am deeply thankful, too, that through what seemed waiting I was gradually learning to seek first and above all things else the kingdom of God, for I wanted only physical healing at the start.

One verse in the Bible which always strengthened and held me is this: "I reckon that the sufferings of this present time are not worthy to be compared with the glory which shall be revealed in us." Holding this coming glory in mind, and confidently expecting it, we shall bring it into our experience; and when it comes, the roughness of the way is quite forgotten.

Kate W. Buck, Newton Center, Mass.

✧

To say I am grateful for Christian Science and what it has done for me does not half express my thankfulness to God and my gratitude to our revered Leader, Mrs. Eddy. It was only through divine power that I was led to this wonderful truth. About two years previous to coming to Christian Science I was stopping with a family in St. Louis who had lately taken up the study of Christian Science. They presented this truth to me; but not being ready at that time, I immediately said I would never be a Scientist.

Shortly afterward I came home in miserable health, only to go under the care of a physician here. I was obliged to work, but it was a struggle to do so. Being offered a better position in Kansas City, Mo., I went to that city, thinking the change might benefit me. I knew in a few weeks after arriving there that something had to be done for me. During my lunch hour, while on the street alone with only God to guide and guard me, the thought came to me that I had tried doctors, medicine, and change of climate with no permanent results: why not give up all for Christ? I straightway sought the Christian Science reading-room and was directed to a practitioner. When she informed me that I could be healed, I could hardly believe it. The physician who attended my mother at my birth had told her that I would never be a well or normal child, and with this law always claiming dominion, fear had so overpowered me that I felt at times I had nothing to live for.

From the hour I left the practitioner's home it seemed as if I could walk miles without becoming fatigued. The complete healing, however, was slow, but I had faith enough to know it would surely come; and it has. For over seven years I have used no material remedies of any kind. With the first treatment faith in medicine was destroyed, and to me this was wonderful, as I do not remember ever doing without medicine for a single day.

One day I ran a piece of glass into my thumb. The flow of blood was so great I could not locate the glass for a while, but without fear and with no material aid it was brought to the surface. My earnest desire is to walk with God.

Nannie Cornelia Sterling, St. Joseph, Mo.

✧

I am grateful to Christian Science for bringing to me a slight understanding of what Jesus taught and practised, and for showing me the way of Truth. An illness which seemed to affect both my lungs was healed in a very short time, and boils on the back of my neck were cured without the pain which according to medical belief usually accompanies their breaking. Glasses have been laid aside, although an oculist had told me they would always have to be worn, and the social drink habit has been overcome. These healings all took place prior to December, 1913.

While very grateful for the physical healings and the emancipation from many youthful vices, I am most grateful for the moral regeneration and the spiritual uplift in the journey from sense to Soul. The Bible, the Book of all books, as I have learned to study it in the light of its spiritual interpretation, has become to me the Book of Life, as it really is. Words are inadequate fully to express my thoughts.

I am thankful to God for my release from bondage, and grateful for this great truth which was given to the world by that noble woman, Mrs. Eddy.

Max A. Vogel, Ardmore, Pa.

✧

Previous to my coming to Christian Science I had been in bad health the greater part of my life as the result of a fall in childhood. Relief had been sought from many doctors, but it had been only temporary. Finally I was taken to a specialist, and after several months of treatment, which included a surgical operation, my health seemed perfect. During the period of that severe treatment there was a bright spiritual awakening and God was in all my thoughts. I became much interested in the Bible, and through trust and faith had many beautiful proofs of God's omnipotent love. Then I came to a place in the Bible which I could not understand, and silently declared that a book which spiritually interpreted the Bible was needed, and somewhere in the world such a book existed. I was grievously disappointed and in utter despair when again I "went all to pieces," as people say, and because of so many aches and pains closed the Bible and gave up all interest in it; but now I know that all this experience was a preparation for Christian Science.

This was my condition when I wandered into the Christian Science reading-room eight years ago to investigate, not for any physical healing, much as I needed it, but that I might

Digitized by Google

find God again. I was soul hungry for a religion which would help me to live a better life and to do something for humanity, something which would tell. When the attendant placed a copy of the Christian Science text-book in my hands I received it with a joy unspeakable, for I recognized it as the book which I had felt was needed. The healing of a structural defect of the eyes convinced me beyond a doubt that there is complete healing in Christian Science, and the recipes are in the Bible and "Science and Health with Key to the Scriptures." The insatiable longing to do something for humanity has been satisfied, for I have found useful and healthful work as an attendant of this same reading-room and in the Sunday school. Surely there is no higher joy and privilege than working with the children.

As grateful as I am for the physical healings, I am more grateful for the beautiful and inspiring lessons that Christian Science teaches. What a relief to know that our true home is in Spirit, not in matter! It is a holy place where, in closest companionship with Christ, our universal Saviour, we meet Love face to face. "The joy of the whole earth" is this home; its foundation built on divine Principle. Human language fails to express my thankfulness to God who hath called me "out of darkness into his marvelous light," and my gratitude to Mrs. Eddy for what she has done for humanity's uplift in the discovery of this Mind-healing. The best way to express our gratitude is to be constant and loyal to the cause, never absent from our post of duty; in fact, to make our lives one grand Christian demonstration.

LOTTIE L. HART, La Fayette, Ind.

✧

[Translated from the German]

Deep gratitude for the many blessings which my children and myself have experienced through Christian Science induces me to send this testimony for publication. Although I did not turn to Christian Science for physical healing, yet through the assiduous reading and the study of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have been completely freed of several physical troubles, including periodic attacks of headache of years' standing. But the highest and most precious thing which I gained through Christian Science is the understanding of God, and the faith evolved therefrom in the truth as taught by Christ Jesus as well as in his works, which formerly it seemed impossible for me to believe.

This understanding and faith is something which no one can take from me, and it lifts me above all the vanity and perishable nature of material life. For this I am profoundly grateful to God, and thankful to our beloved Leader, Mrs. Eddy, who was found worthy to be God's instrument in the bringing anew of truth to a waiting world.

FRAU CLARA STICKEL, Cannstatt-Stuttgart, Germany.

✧

I desire to testify to what the knowledge of God has done for me. Many years ago I was healed of eye trouble through Christian Science treatment. I had worn glasses for twelve years, but since that time have been able to read, write, and sew without them, although seventy-three years old. I am indeed grateful for this blessing, and for many proofs that when we turn to God, we find Him a present help. I am a student of Christian Science, and cannot express the comfort it gives me to understand in a measure the spiritual import of the Scriptures. There are some physical discords not yet overcome, but I have proved enough to know that the whole is true. Nothing is impossible with God, the cause of all good, and only good will result from trusting the Principle of good. I would not know how to live without Christian Science.—MRS. M. BYRNS, Delta, Col.

From Our Exchanges

[Rev. A. Eugene Bartlett in *The Universalist Leader*]

Tolerably good churchmen are found in every church who have brought the church universal face to face with a crisis. Their intermittent interest and their indifference have driven more ministers into business than small salaries. The youth ready to make his life decision, on the point of choosing a career, is deterred from entering the ministry by the sight of so many tolerably good churchmen.

Into the midst of tolerably good folk comes the Nazarene, teacher of all teachers, lifting his divine standard and showing the way by which little men may be made ready and equal to great tasks. Remember he who was "the way, the truth, and the life" yesterday, is the same today. There is nothing that he did for the men and women of Palestine long ago that he will not do for you, if you have faith in him.

Christ tells us the secret of the power of his disciples and of their ability to perform great tasks. He says, He that believeth on me shall be able to accomplish great works. He lays down the absolute and unalterable condition. You will remember that he was constantly testing men and women, asking whether or not they had faith in him and his Father. The miracles did not cease when the canons of the New Testament were closed, but men of faith have been working miracles ever since.

[*The Sunday School Times*]

Those of us who take great care not to seem too pious may be going to unnecessary trouble. Perhaps if the piety we have were allowed to show itself at its full value it would not impress others very much after all. The fact is that most of us are more hindered in our relations with others by self-conscious pride than by a secret or an open piety. We need not be afraid that others will think we are too good, or are trying to seem so, if we talk naturally and gratefully about Jesus our Lord. To refer in a large and comfortably vague way to "a higher power" and to avoid attributing our gifts, our guidance, and our ground of hope to the Lord Jesus in so many plain words, is not the covering up of a too obtrusive piety, but is the exposing of reluctance in our loyalty.

[*The Christian Work*]

The inner voice is the voice of God, the voice of Christ, and it cannot be silenced—never. Let human passions rage as they may, as surely as the tides sweep shoreward from the bosom of the ocean, so surely will the good reaffirm itself in the heart of man after every period of self-indulgence or blind wallowing in the instincts of the flesh. That which has been revealed in Christ is the strongest thing in the world. "After those days, saith the Lord,"—those days of passion and tumult and agony,—"I will put my law in their inward parts, and write it in their hearts; . . . I will forgive their iniquity, and I will remember their sin no more."

[*The Continent*]

The man to whom the world is so kind that he is contented bodily, is apt to be also fatally contented morally—contented with anything which seems easiest at the moment to his inclinations. Filled with material good, he wants no other good. And wanting nothing that is good spiritually, he is of course open to all evil that comes by. It is the endless multiplication of such men in a prosperous and self-sufficient society which makes a decline of moral intensity and the spread of vicious habits almost inevitable. Far from boasting over their happy circumstances, then, a people launched out on a full tide of

Digitized by Google

prosperity ought to be solemnly repeating to themselves the Bible injunction: "Be not highminded, but fear." Most soberly should these observations be faced by the church.

[*New-Church Messenger*]

Wait not for death as the time of entering into the life of the spiritual world. Enter that life now. We can make the spirit of our present occupations to be the spirit of our eternal employment. The devotion, faithfulness, efficiency, and blessedness of uses in the spiritual world can be made the devotion, the faithfulness, the efficiency, and the blessedness of present uses. We in spirit can be close to the Lord and live the spiritual life now. Yea, indeed, that is what every one is doing, and no man can escape this omnipresent law. How vital, then, that the true spiritual life be lived by all daily and now, and that the two worlds become one in spirit!

[*The Christian Advocate*]

In the nineteenth century God spoke to the churches in many ways. "Some accents of the Holy Ghost this heedless world has never lost." One thing that He is repeating in the inmost soul of every Christian communion is unmistakably the call to Christian unity. The missionaries overseas long ago heard the call and closed the gaps in their ranks. So far as we at home will allow, they now fight shoulder to shoulder instead of face to face. Some of the churches at home have listened and obeyed when the real burden of Christ's prayer "that they may be one" fell upon them.

[Ame Vennema, D.D., in *The Christian Intelligencer*]

It is well to remind ourselves that God does not rule men by force or compulsion, but by an appeal to motive and reason and a representation of consequences, and then calls them to account. And not until the last great day will the finality of things be reached. We have not yet seen the end. Not all wrongs are righted here, not all good is rewarded nor all injustice punished in this world. His decisions may be reserved for a season and His sentences stayed, but we may be absolutely certain that the "Judge of all the earth" will do right.

[*Western Christian Advocate*]

Jesus is looked upon by many as an impractical idealist. This characterization is a contradiction in terms. An ideal is never impracticable. The Man of Galilee is the only one who ever evolved a working program for human affairs. The world would run without friction if all men would adopt his ideals and conform to his spirit. As soul is higher than body, and morals than material substance, so a divine ideal is higher and infinitely more practical than any man made program, or than any foolish and fatal adjustment to the ethical standards of such a world as this.

[Rev. Edward D. Gaylord in *The Advance*]

"Ought not Christians to know one another?" Surely, and every one else ought to be able to recognize them, too,—not by any badge or button or name or outward sign, but by that inward sustaining and ennobling faith which is evidenced in purity and integrity of life, which shows itself in the purpose in the face, in the love in the heart, in the light in the eyes; so that, like the apostle, we literally bear in our bodies the marks of our Lord Jesus Christ. It can be done; it has been done; it is done.

[*The Outlook*]

It is one thing to declare that there is some truth which is trying to express itself in all creeds, however imperfectly that expression may be effected, and quite another thing to declare that there is no truth in any creed, or that it makes no difference whether there is any truth or not.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00; six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

As the advertising pages of the *Journal* and *Herold* go to press the 20th of the month, to insure publication in a desired number requests for changes in a church or practitioner's card should reach the Publishing Society at least six weeks previous to the actual date of issue.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

Digitized by Google

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

CHRISTIAN SCIENCE: ITS LEGAL STATUS. By Judge Clifford P. Smith. 128 pages, paper covered, 10 cents.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, $1.15; half morocco, $1.40; full morocco, $2.50; levant, $3.50; pocket edition, size 4⅝ x 6⅝, $3

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows: "The Mother's Evening Prayer," 75 cents; "Christ, My Refuge," 75 cents; "Love," 40 cents; Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents; "Blest Christmas Morn," 27 cents; "O'er Waiting Harpstrings of the Mind," 27 cents; "Shepherd, Show Me How to Go," 27 cents; "Saw Ye My Saviour?" (Root), 27 cents. The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12 x 16), $1; 12-inch (mount 15 x 20), $2; 16-inch (mount 21 x 29), $3.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18 x 24 inches, $5; on India paper without remarque, $8. Smaller reproduction, size 11 x 14 inches, on Japanese vellum, $1. Photogravure postcards, reproduction of the picture of the Church Edifice and Publishing House, 5 cents.

QUARTERLY COVERS in black morocco, $1.15; with purse, $1.40.

ALUMINUM LESSON MARKERS. Set of thirty, with paper shields, 50 cents. Extra paper shields, one hundred, 15 cents.

PRICE LIST OF BIBLE CONCORDANCES and DICTIONARIES OF THE ENGLISH LANGUAGE supplied on request. Express charges collect on delivery.

REPRINTS (not printed in English). Two-page leaflets, 14 subjects in French and Swedish; 19 subjects in German. Ten copies to one address, 10 cents.

Remittances should always accompany orders, and be made by check, money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money or business letters to the Editor or Editorial Department.

Send all orders for the works of Mrs. Eddy, with remittance by New York or Boston draft or money order, direct to Allison V. Stewart
For literature listed above address orders and make remittances payable to

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Entered at Boston, Mass., post-office as second-class matter.

Items of Interest

There are 530 miles of steam lines in operation in Venezuela. The average passenger rate is 6.57 cents a mile for first class and 4.6 cents for second class. All lines are narrow gage, the various widths being 3 feet 6 inches, 1 meter (39.37 inches), 3 feet, and 2 feet. With two exceptions all the roads are short lines from a port to a city or a populated district on the highlands not far from tidewater. Practically all the existing railways were built between 1881 and 1893 under Government subsidies with guaranties of interest upon the capital invested. This policy was greatly modified in 1892 and 1897, and as a result not a single mile of railroad was constructed. In 1912 the present law was passed, and in 1914 some extensions of existing lines were begun.

On several of the main roads traffic is lighter now than twenty-five years ago, and notwithstanding the fact that rail transportation is as costly as that by pack mule, scarcely any of the railway enterprises have earned a fair return upon the capital invested. The reasons for the conditions shown lie in the sparseness of the population and its distribution in a long, narrow strip of territory skirting the seaboard, which leads to the building of unconnected lines with short hauls, in the moderate producing and consuming power of the people, and in the general refusal of the lines to grant low rates for commodities of small value.

Increasing numbers of persons bound from Argentina, notably Buenos Aires, for the United States are making the voyage by way of the Panama Canal. They go to Valparaiso over the Transandean Railway and embark there for the Canal Zone on one of the two lines plying between Chile and the Atlantic terminus of the canal. The voyage to Balboa takes about fifteen days, and close connections are usually made on the Isthmus with ships for the United States, which are at sea from five to eight days. The distance from Valparaiso to New York by way of the canal is 4633 nautical miles. From Buenos Aires to New York direct is 5871 miles; by way of Montevideo, Rio de Janeiro, Bahia, and Pernambuco it is 6004 miles. The railway journey from Buenos Aires to Valparaiso requires about a day and a half.

Congestion of tenement districts in Massachusetts is declared to be "utterly needless" by the state homestead commission in its third annual report since, it states, "not far from every such district are to be found stretches of unoccupied land, much of it cumbered with rubbish," an offense to the sense of beauty and orderliness. Within our cities themselves, the report continues, not half of the opportunities for the better kind of habitations are improved. An amendment to the constitution, permitting the General Court to authorize the commonwealth to take land and to hold, improve, subdivide, build upon, and sell the same for the purpose of relieving congestion of population and providing homes for citizens, was approved and ratified at the state election of 1915 by a vote of 284,568 to 95,148.

"One of the most shameful wastes of this country's natural resources has been that of natural gas in the oil fields," is declared in a bulletin issued by the United States Bureau of Mines. "This waste has been occasioned very largely by not having efficient and cheap methods of controlling the gas, nor adequate laws and regulations to enforce the control. Soon after the establishment of the Bureau of Mines investigations were started with the view of finding means of lessening this waste. In 1913 engineers were sent to Oklahoma to make investigations. They recommended the mud laden fluid system, which had been previously used in Texas and California, and demonstrated that the method was equally applicable to the conservation of gas in the mid-continent and eastern fields."

The work of the Forestry Department for the past year in British North Borneo has been chiefly exploration. Tracts aggregating 176,000 acres, and carrying a total stand of over two billion eight hundred million board feet have been examined. In 1915 the total exports of timber amounted to but 1,549,924 cubic feet, and almost all of it went to Hongkong. Believing that the country's timber resources warranted a much more extensive development, the Government in 1914 organized a Forestry Department, and the local work was placed in the hands of experienced foresters from the Philippine Bureau of Forestry.

According to the recently published returns of the 1914 census, Argentina had on June 1, 1914, a total of 7,885,237 inhabitants, against 3,954,911 inhabitants in 1895, when the preceding census was taken. The increase in the city of Buenos Aires was 137.52 per cent. The density of population for the entire republic in 1914 was 2.7 per square kilometer (0.3861 square mile). Tucuman still leads in this respect, with 14.4 inhabitants per square kilometer.

Careful estimates place the quantity of unmined iron ore in Spain at 700,000,000 tons, capable of yielding about 50 per cent of metal. This vast mineral wealth is distributed throughout the various provinces. About nine million tons of Spanish iron ore have been mined annually during the past decade. At present nearly half the iron mined is from the province of Vizcaya.

After fourteen years of effort on the part of "good roads" enthusiasts, the Government has finally appropriated $10,000 for the erection of sign-posts to water holes in the Mojave Desert. The matter of posting the desert was taken up by the Los Angeles Chamber of Commerce when automobiles first began making transcontinental trips, at which time the dry waste-land formed a barrier to all except the most venturesome drivers.

It is reported that the two Marconi outfits purchased by the Colombian Government some time ago will soon be delivered. It is intended to establish these two stations at Arauca and Orocue. The former is situated on the Arauca River, where it forms the boundary between Colombia and Venezuela, and the latter is on the Meta River, some two hundred miles east of Bogota.

The Argentine Government is making every effort to reorganize its consular service abroad in such a way that a closer cooperation of relations and coordination of work will result between the foreign office and the consular representatives abroad. Up to now these officers have never worked in accordance with a preconceived governmental program, their work being largely left to their own initiative.

According to Norwegian commercial interests, Norway is going to be an important factor in the world's mercantile marine activities after the war. Ship-building and shipping have never known such activity. Old shipyards are being extended and new ones established. Old vessels have been purchased in all parts of the world and new ones contracted for in the United States, England, Denmark, the Netherlands, and other countries.

Underlying Sydney is a coal seam which extends one hundred miles north and the same distance in a westerly and southerly direction. The seam varies from four to thirty-three feet, and the depth runs from the surface outcrop to two thousand feet deep. The estimated quantity available is one billion tons. Practically all the trade of New South Wales, both import and export, is centered in Sydney.

The Elephant Butte dam, New Mexico, completed recently at a cost of $10,000,000 and intended to impound the largest artificially retained body of water in the world, was dedicated Thursday, Oct. 19. Three hundred and fifty delegates to the international irrigation congress and international farm congress were the dedication committee.

By ordinance the municipal authorities of Lima have undertaken to enforce a law which for more than a generation has been on the statute books of Peru, making the metric system of weights and measures the only official one in the country. The ordinance went into effect Sept. 1, 1916.

The premiums collected during 1915 by domestic and foreign insurance companies operating in Spain amounted to $13,783,067. Of the total amount of premiums collected, over $8,000,000 went to Spanish companies, and the remaining $5,000,000 to foreign companies.

Cooperation between the Federal farm loan system and local county bankers will enable many farm tenants who have saved a little money to become farm owners, according to information volunteered by the United States Federal Loan Board.

Pennsylvania is sanctioning unpardonable waste every year by throwing away coal derivatives worth over fifty million dollars. This waste lies in the failure to utilize fully the by-products of coke-making.

The new $5,000,000 tin mills at Gary, Ind., have begun to turn out their first product. Construction began last December. The mills employ two thousand men at average wages of five dollars a day.

"What I say unto you, I say unto all, WATCH" Jesus

Vol. XIX November 18, 1916 No. 12

Man's Life Secure

SAMUEL GREENWOOD

THE transient nature of human existence shows that the real life of man to be immortal must be different from anything within the cognizance of physical sense, and that man himself must be different from what is physically apparent. It would follow also from this that to find the truth about man we must look away from matter entirely. This conclusion is obvious from the Scriptural statement that man was made in the image of God, for the divine image cannot rightly be thought of as identical with a sinning and dying mortal. Accepting the inspired Scripture, Mrs. Eddy writes in "The First Church of Christ, Scientist, and Miscellany" (p. 164), "Man lives, moves, and has his being in God, Love. Then man must live, he cannot die." Jesus gave absolute proof that this deduction is literally true; hence human salvation can be worked out on no other basis.

All human theories agree in teaching that so-called human life is exposed to perpetual danger, and at best has but temporary means of protection. We are taught that death dogs every person's footsteps from the hour of his birth, waiting for the fateful moment which shall yield up its prey. The specter of mortality has thus come to be exalted in human consciousness, overshadowing in belief all earthly activities and despoiling human intercourse of its chiefest joy. And all this without protest in a Christian land, as if there were actually no God in all the universe to preserve and to protect His own creatures!

When Jesus said, "Ye will not come to me, that ye might have life," he was not talking to dead men, but to those who believed they were materially alive. He clearly intended to imply that material sense does not express man's real being, therefore that what is seen as material man does not in the truest sense live at all. When Jesus brought his friend Lazarus unharmed from the grave, and when later he overcame the belief of death for himself, he disproved the existence of any life or law apart from God. He demonstrated the absolute lifelessness, alias the nothingness, of all that does not proceed from or express God; hence that nothing can be interposed between man and his divine source or Principle.

Christianity does not teach that man has a separate life from God, which begins in birth and ends in death. The supposition that man is composed of material elements, the offspring of flesh instead of Spirit, is all that supports the claims of material law said to be operative against him and to involve his ultimate dissolution; but the Scriptures do not authorize such an assumption. On the contrary, Jesus taught that mortals must be born again—that is, apprehend life spiritually—before they can enter the kingdom of God. Until the belief in material birth and human parentage is outgrown, mortality will not be overcome; hence the importance of the Master's injunction, "Call no man your father upon the earth," which means that here and now we should acknowledge no other source of life but God, Spirit.

Man's individual existence is not self-derived, nor is it a human product; therefore it is not at the disposal of material sense. God's man is an emanation from Himself, and could not be alienated from his essential godlikeness or taken out of God's sheltering protection. Life is indivisible, and could not be impaired in part without affecting the whole. A portion of Life could no more be lost than a portion of Truth. If it could be truthfully said of a man that he is dead, it would mean that Life itself had begun to perish, for a man's life would have to be destroyed at its source. It is inconceivable that divine Life should yield up its manifestation, and because it is inconceivable we know it is impossible.

It is self-evident that the truth of being must be stated in terms of self-existence, since nothing could precede Life and its manifestations. Neither can Life cease to be itself or to make itself manifest. To human material belief such statements may seem mere abstractions, although God is generally admitted to be the cause of all existence. It may be said that honesty is a mere abstraction to the immoral thought, yet we know that honesty is eminently practical. Notwithstanding the material theories of mortals, if eternal life is a reality it must be the most practical thing possible for a man to live and to keep on living. That mankind fail to do this is not because life is finite or destructible, but because they have not yet reached the spiritual apprehension of God as Life.

If there were an actual menace to man's safety, capable of destroying his life, it would necessarily have existence and power of itself and in defiance of Deity, a condition which would dethrone the divine sovereignty and limit God's own being. But Christianity assures us, through the demonstrations of Jesus, that there is no power but God; and God could not produce death or aught that can die without Himself being mortal. Hence that which appears to live and die declares itself to have no relation to Life, God, and neither lives nor dies outside the field of material illusion. We are taught in Christian Science that "man exists because God exists," and that "man's immortality depends upon that of God, good, and follows as a necessary consequence of the immortality of good" (Science and Health, pp. 544, 81).

Jesus said, "God is not the God of the dead, but of the living." God is not the God of the destructible and mortal, but of the indestructible and immortal. He is not the God of that which dies, but of that which forever lives. Eternal life has no enemy outside of human mythology, and was never for a moment in danger. The divine Spirit is not threatened by disease, misfortune, or death. These things being true, what should we fear as having power to touch the life of man, since we acknowledge in our daily prayers that man has no source of existence apart from God?

It calls for no argument to support the conclusion that the image of God—that is, original man—could never experience aught but good. For example, what could one's reflection in a mirror respond to but one's self? What else could affect or maintain it but its original? How then could

Copyright, 1916, by The Christian Science Publishing Society.

Digitized by Google

man, who was made in the divine image, be in any danger? Because the individualized consciousness of being which we name man exists as reflection and not as an entity of himself, we know that man as God's idea remains immune from attack or destruction.

All this, one may say, is purely ideal, and it surely is; but it is the idealism which Jesus found so practical that its demonstration inaugurated a new era and a new reckoning of time for the world. It is the idealism which has been named Christianity, or the embodiment of Truth in teaching and practice. We have been wrongly taught to identify ourselves with death as the natural and inevitable outcome of our existence; but the Master did not thus teach. He said, "If a man keep my saying, he shall never see death;" and again, "Behold, I give unto you power . . . over all the power of the enemy: and nothing shall by any means hurt you."

Until mortals learn that God is the only Life, and that there is none beside Him, they have no appeal from the ills of mortality; hence the necessity for the coming of Christian Science, for outside of this Science no hope is held out to humanity that it will ever realize in this world the fulfilment of the Master's promise. Christian Science identifies man with good, not with evil; with Life, not with death; and the faithful application of its teaching in daily experience brings the positive assurance that man does live, move, and have his being in God, now and forever.

Giving

EDNA MILLER RUGH

Mrs. Eddy says, on page 79 of Science and Health, "Giving does not impoverish us in the service of our Maker, neither does withholding enrich us." How many of us are giving something each day in the service of our Maker? Is it not a duty as well as a privilege to be able to give even in the smallest degree from our storehouse of truth? Some may think they have not sufficient understanding to give, or the opportunity has not presented itself; but can this be true when we are taught in Science that the real man is never separated from God, the divine Mind, who is sending forth each day more than we can receive.

Christ Jesus admonished us, "Freely ye have received, freely give." If we are truly grateful for what we have received, the desire to give will be awakened, and with this desire will come manifold opportunities to give. Let us remember what our Leader says on page 238 of Science and Health, "Unimproved opportunities will rebuke us when we attempt to claim the benefits of an experience we have not made our own, try to reap the harvest we have not sown, and wish to enter unlawfully into the labors of others."

Are not our Wednesday evening meetings a most wonderful avenue through which to give? Then how is it possible for people to come to these meetings year in and year out and never give outward expression to the benefits they have received? We all have something to give, and although we may not know the need which is being supplied, we should let ourselves be willing channels through which divine Mind may find expression. Perhaps the stranger within our gates is waiting for the very thing we have to give; and shall we let a sense of timidity or a fear of not saying the right thing keep us in our seats at these meetings? It may be that we are unconsciously entertaining a spirit of criticism toward some who do speak, thus building up a barrier against our own efforts. The Bible tells us that even Jesus said he could do nothing of himself, but if we have a real desire to give that which will help others our tongues will be loosed.

Again, as we go about our daily work, no matter how humble the task may be, if we are faithfully watching we find ourselves surrounded with opportunities to give. Perchance we may be on a crowded car, in the busy street, or perhaps in the office, but we are never deprived of the privilege of giving. It may be only a smile, a pleasant word, or a kindly act, but in so doing are we not letting our light so shine that others may see our good works and glorify God?

The writer had a most happy experience with this matter of giving and it may prove helpful to others. She had seemingly quite a struggle with a demonstration which she knew must be made, and when the answer came, it brought to her consciousness an enlarged sense of gratitude. In endeavoring to return thanks to God for Christian Science, His unspeakable gift, an earnest desire was awakened to give out more of this truth which meets all human needs. It seemed there was no channel open that had not already been used, when the thought came, Have you sent in for publication a testimony covering your first healing? You have been helped in many ways by reading others' testimonies, and in a few cases instantly healed of some form of error simply through hearing one given: why do you not give from your own storehouse? Feeling a deep desire to rise above all selfishness, she immediately wrote out her testimony and sent it in, and her prayer was answered, for through that one act of obedience the way was opened up whereby she was able in several instances to be used as a channel to give out much more than was anticipated. She realized as never before the meaning of our Master's words, "It is more blessed to give than to receive."

A true Christian Scientist should be found daily watching at Truth's gates, and patiently waiting at the posts of Love's doors, that he may ever be in readiness to carry the healing message of Christian Science to others.

✧

Our Daily Study

MARGARETTE J. ROOT

The importance of the Lesson-Sermon in the Christian Scientist's study can hardly be overestimated, for regardless of the particular phase of the Christian Science movement in which it may be one's privilege to work, whether as Sunday school teacher, as officer, or as obedient member, each one resorts daily to the Lesson-Sermon for his mental refreshment. It becomes, therefore, a vital question for each earnest Scientist, whether he is progressing in this respect.

After having spent years in this daily study, one may be tempted to lapse into a mechanical method of taking it as a matter of course, as a burdensome duty which must be performed before beginning the daily routine, or as a study quite apart from one's own experience, much as a Latin student might translate a given lesson and then set it aside as something unrelated to his moral progress. If such a temptation comes, it is high time to awake to the truth of the sentence on page 233 of Science and Health, which reads, "Every day makes its demands upon us for higher proofs rather than professions of Christian power."

Having reread a particular Lesson-Sermon for several days, the student may become satisfied with his familiarity with the letter of the word and fail to delve beneath for the spiritual sense which should be his essential food for that specific day. Then may it not be said that he is in a certain sense taking the name of divine Truth in vain? Perhaps as the last of the week comes he may be unconsciously passing

Digitized by Google

glibly over the then familiar passages, attempting in vain to use again yesterday's substance. Called aside by this or that demand, pressed by this or that "important problem," how often does he hurriedly set aside the Lesson-Sermon, unaware of the truth voiced in one of our hymns, "Beneath thy feet, Life's pearl is cast" (Hymnal, p. 12). Beneath the very words which he is reading lies the spiritual substance which, if imbibed, would furnish the exact vision needed to dispel his mental darkness, the very corrective necessary to solve his pressing problem.

Another type of student labors overzealously it may be in an intellectual way, and rests satisfied with having acquired a dictionary definition of the words. Such literary analysis is doubtless a valuable aid, but of itself it represents only "husks" and not the pure grain of spiritual substance. In Science and Health (p. 454) Mrs. Eddy says: "Remember that the letter and mental argument are only human auxiliaries to aid in bringing thought into accord with the spirit of Truth and Love, which heals the sick and the sinner."

There is yet another by-path which may lure the student aside: he may be carried away by an emotional appreciation of the dramatic and literary qualities found in the Lesson, substituting self-exaltation for spiritual revelation and indulging in self-glorification rather than striving for self-abnegation. What then should be our attitude in approaching our daily study? If it is not intellectual analysis, or emotional appreciation, or the burdened feeling of performing an irksome duty which is to assist one in entering the kingdom, there yet remains a priceless quality of thought. The humble preparedness needed is expressed in these words of the psalmist: "Search me, O God, and know my heart: try me, and know my thoughts: and see if there be any wicked way in me, and lead me in the way everlasting." Such thirsting after righteousness is not in vain, for, as our dear Leader says (Miscellaneous Writings, p. 127), "when a hungry heart petitions the divine Father-Mother God for bread, it is not given a stone,—but more grace, obedience, and love."

Such a preparation ushers one into a veritable communion with God and brings to the student his daily food. Seeing thus the necessity of each individual to seek the Father, how useless it becomes for an older student to try to "explain" passages from the Lesson-Sermon to a younger one, thereby attempting to overload him with what is to be his future substance; or if, by chance, the student is ready for advancement, why does not the overzealous helper allow him the God-given privilege of receiving spiritual illumination from its source. What truly devout student would want an intermediary between him and God?

True communion does not come through the avenue of the human intellect, nor through an emotional appeal; it is the conscious realization of the inseparability of man and his Maker. Mrs. Eddy no doubt has exercised more wisdom than we are now able to comprehend in her institution of the complete system of Lesson-Sermons. The prosperity of Christian Scientists must depend in large measure on the spiritual substance which they glean from their daily study of this Sermon. If we are discouraged, or are complaining that a certain problem is not solved, or that some ailment is slow in yielding, we may with profit examine ourselves to see whether or not we are each day taking and using the substance waiting for us. Is there truly any excuse for lack of progress, for limitation or stagnation? St. Paul has said, "Let us therefore, as many as be perfect, be thus minded: and if in anything ye be otherwise minded, God shall reveal even this unto you."

Happy indeed is the one who, sitting alone in the early morning hours, can open the Bible and Science and Health and prayerfully say in the words of the psalmist, "As the hart panteth after the water brooks, so panteth my soul after thee, O God." Having striven heavenward each of the six days in his study of the Lesson, he is privileged on the seventh to bring to the Sunday service his wealth of love, joy, and peace, the "fruit of the Spirit," and therefore can truly enter into the Sabbath rest, the result of work well done.

No Limitation in Mind

JOSEPH G. ALDEN

THE wayfarer in Christian Science, setting out upon that quest which Mrs. Eddy on page 566 of Science and Health has called the "passage from sense to Soul," comes soon to the place where error, stepping out from the shadows of the roadside, seeks to intercept his progress. With a great show of kindly interest it suggests to him that his abilities are so small and his influence is so circumscribed that he cannot hope to render any large or acceptable service in that great realm to which he journeys. It therefore takes deep understanding, diversified talents, and proven ability to fit one for a useful place there, and out of the many who seem to be called to render service only a few are chosen.

At an earlier stage of the journey this same persistent adviser under a different disguise may have come forward with the intimation that the journey is long and wearisome and lonely; that it leads through paths hedged with briers which catch and tear, over bleak mountains whose narrow defiles must be threaded alone, across wide plains where the burning thirst may not be quenched, and out into a great unexplored country where scenes are unfamiliar and faces new. All these warnings were given under the pretense of friendly solicitude, but had the eye of the wayfarer been sharp and his ears keen, they would have pierced the thin disguise of the self-appointed guide, discovered the deceitful nature of error, and detected the subtle poison in the honeyed words.

The sense of limitation is one of the readiest of mortal mind's brood to raise its protest against spiritual progress. It never sees the cleft in the rock ahead or the beam of light in the far distance marking the place of egress from the hidden way. It only sees the stony road, the overhanging cliffs, and the declining sun. It raises its dismal voice at every stage of our journey, but never with more vehemence than at the place where the path, rounding the shoulder of the hill, turns abruptly into the open highway.

It was this human sense of limitation which came to Andrew upon that memorable day on the mountain side by the Galilean sea, when to his Master's question, "Whence shall we buy bread, that all may eat?" he replied: "There is a lad here, which hath five barley loaves, and two small fishes: but what are they among so many?" To the disciple's circumscribed material view there was no possible relief for a hungry multitude but to send the people away. His human sense had not yet yielded to that spiritual understanding of substance which had been revealed day by day before unseeing eyes and unhearing ears in the deeds and words of the Master. He only saw five thousand hungry people, weary and far from home, and food sufficient for a bare half dozen. What indeed to material sense could so small a supply be among so many!

But what a revelation must have come to that disciple when later in silent wonder he beheld those scanty elements which he had so lightly regarded turned into an abundant repast for a multitude! When after all had eaten and it was found that more remained than there had been at the beginning, Andrew's wonder must have broken into a flame of understanding, so that never again in the presence of his Lord could he question the availability of any means, no matter how

Digitized by Google

small or simple, which might be used to bring a blessing or confer a gracious benefit.

The wonderful story of the feeding of the five thousand loses one of its finest lessons if the reader fails to come upon the beautiful truth that no small service which one may render in the name of Christ is ever unworthy; and that no simple talent which one may honestly desire to devote to the uses of good ever meets with rejection. No matter what mortal sense would have one believe as to the meanness of his gift, divine Love receives every bestowal made in the name of Christ, and, sweeping aside the barriers of time and place, enlarges it into a blessing that ministers to every human heart hungering for spiritual meat and drink. Every drop added to human consciousness from the ocean of love swells its volume, so that the healing waters reach a wider shore line and refresh a larger land.

The sense of limitation in one form or another is the continual barrier to human progress. At each turn of the upward road one meets this persistent cotraveler, and with the wayfarer's rising hope, as he meets and surmounts each new obstacle, the suggestions of error become more subtle and enticing, constituting a constant menace to future progress unless he is alert and relying unreservedly upon Principle for strength to meet each new difficulty and guidance to keep the way. Times seemingly without number come the places of decision, where to choose aright is to proceed safely and confidently upon the way; or where to accept and follow the suggestions of the false guide means either a period of inaction or a final retracing back to Bethel, the place of understanding which Abraham knew and frequented of old.

The road which leads from sense to Soul rises abruptly from the plain of materialism, and as Mrs. Eddy writes in "Science and Health with Key to the Scriptures" (p. 353), "When we learn that error is not real, we shall be ready for progress, 'forgetting those things which are behind.'" If we turn a deaf ear to the suggestions of error and, following our Leader's advice as given on page 261 of the Christian Science text-book, fix our "gaze on the realities supernal," we shall find that the horizon of our view widens as we attain new heights, until we come at length to the table-land of understanding, where the limiting beliefs of human sense melt away in the full realization of limitless Mind.

✧

Loneliness

MARGARET ALLISON KENDRICK

Many times in the last few years it has been the writer's experience to be among strangers, without the privilege of attending a Christian Science church or the pleasure of associating with Christian Scientists, and being much of the time alone. After having admitted all my life that people were absolutely necessary to my happiness, such a lonely life would have seemed unbearable except for the help gained through the study of Christian Science, and even then there came a day when I realized that I must either rise above the thought of depending upon persons or else be unhappy most of the time.

In one of Mrs. Eddy's hymns (Poems, p. 13) are these words: "Father, where Thine own children are, I love to be." I interpreted them to suit my case, taking them to mean where Christian Scientists are. I loved the words, dwelt upon them, sang them longingly, almost mournfully at times, always justifying my sense of loneliness with the meaning I got out of them. One day, however, after a careful study of the Lesson-Sermon as given in *The Christian Science Quarterly*, and of what the words "the sons of God" really imply, the thought came to me that I had mistaken Mrs. Eddy's meaning; that the words I had so dwelt upon could not possibly be taken in a material sense. As I opened my thought for a higher understanding I saw very clearly that "where Thine own children are" must surely mean the consciousness of good, of Life, Truth, and Love, and not any material location or being in the midst of a certain class of people; not in a large place any more than in a small one; not where there are many people any more than where there is but one alone with God. I saw that God's creation is everywhere and that there is not anything else. Since that day the words of this hymn have held a very different meaning for me. They are an inspiration to make a greater effort to be in that much desired place where God's ideas are, and to win my way there by right thinking, which is the only possible way this can ever be attained.

The paramount cause of my loneliness I had held to be the fact that I had no church home or church work. This problem too I have been wonderfully helped to solve through the study of the definition of "church" as given on page 583 of Science and Health. If the real church is, as Mrs. Eddy here states, "the structure of Truth and Love," it cannot be a material building reared upon a material foundation, but rather must be an idea in Mind and must be built in consciousness. So after all each one must build his own church with the help of God,—and what difference does it make where we are while we build it? The one important thing is that we build it.

A longing for a city instead of a small village might be gratified; one might have the privilege of attending services in a church building exactly to his liking, with music which suited him perfectly and everything as harmonious as material sense could possibly make it, and yet not have any church at all,—not any true concept of the real church,—unless he is constructing the idea of Love in his consciousness and thereby gaining his rightful place, where God's "own children are."

✧

Memory

WALTER C. LANYON

In Christian Science we are taught that all conditions, both good and bad, are purely mental states, that the only real is the spiritual, and that we suffer from thoughts, not from things. But sometimes the evidence of material sense seems so real that it is difficult to change things into thoughts and eliminate that which is bad. Perhaps if we stopped to consider the supposed force of memory we could reduce many of our troubles to a state of memory, which we know is without doubt a mental state, and thereby could handle them as thoughts and eliminate them.

Take, for example, what the carnal mind calls a family feud. It may be carried on for several generations, and the apparent cause of it may be removed and absolutely obliterated by time, yet it continues as bitter as ever, purely from a standpoint of memory. Sometimes the opposing parties are unable to tell the nature of the offense, but they remember that there is a feud between them, and being controlled by memory their hatred knows no bounds. It is very often the memory of having sat in a draught that produces a cold the next morning, or of some undue exposure that is followed by sickness. Is it not often the memory of an accident which keeps the cripple in his wheel-chair? If he had obliterated the memory of the accident, would he have the effects? It is largely the memory of some unkind word or action, and not the word or action itself, which hurts afterward.

Then comes the process of the elimination of evil from memory. If God, Mind, is everywhere present and is good, then

Digitized by Google

evil is nowhere present, and no matter how it presents its claims, they are invalid. Man as created in the image of his Maker is indestructible and unable to be hurt by any one, by either word or deed; then it follows conclusively that the memory of these words or deeds cannot hurt us, and this reasoning makes the memory of evil void of any power whatsoever.

The past is dead,—"let the dead bury their dead,"—the happenings of yesterday are gone forever; only their memory remains. If this memory is harmful and bad, should we not scientifically eliminate it? Memory of that which is false and untrue (and we know that all inharmony, be it sickness or sin, is false) can be crowded out of its supposed place by filling the mind so full of Life, Truth, and Love that the darkness of mortal mind can find no abiding place there.

Taking God at His Word

OLIVIA E. G. STRATHERN

ONE day I was walking on a woodland path with a young Scientist who had but a short time before been healed by the word of Truth after years of sickness and pain. We had been gathering wild flowers, and as my friend, who had found a rare flower, was speaking of its beauty and fragrance, she suddenly held up her hand, saying, "But what is this?" and there I saw the well known signs of poison.

I recognized a so-called poison plant near where she had found the flower; but remembering these words in one of our hymns (Hymnal, p. 236),—

If our love were but more simple,
We should take Him at His word,

I calmly said, "Now we have an opportunity to prove God's power and presence. Let us know that divine Love is here, and that there is no poison in Truth." In what seemed a very few minutes she held up her hand with not a trace of swelling or discoloration. The asserted law of mortal mind was proven to be an outlaw, for with childlike faith she had taken God at His word, and the truth spoken so long ago by the psalmist was again verified: "He sent his word, and healed them."

Our hearts were filled with gratitude to God, and as we continued our walk we talked of our heavenly Father's boundless love and kindness, made available to us through the understanding of spiritual law gained from "Science and Health with Key to the Scriptures" and Mrs. Eddy's other writings. Presently we were attracted by a few lovely white roses growing high on a bank, all but out of our reach. We, however, thought of a dear one who would be so glad to have them if we could get them for her, and by clinging to some bushes I climbed the bank and secured the beautiful flowers. All at once I began to feel very uncomfortable in my hands, face, and eyes, and my thoughts were filled with fear. When I looked at the bank, I found that I had been holding on to poison-ivy; but my companion's healing had come so quickly that she looked on my predicament as a joke, so I saw that I must work out this problem alone.

The proof of Love's all-power which had just been given us encouraged me, and I tried to realize that I too could take God at His word. We returned to our room at once and soon retired for the night. I endeavored to realize Love's allness and His law, till I fell asleep. In the morning there was no trace of the erroneous belief, and my heart was filled with gratitude as the beautiful words from the hymn already quoted came to me with a richer meaning than ever before:—

For the love of God is broader
Than is seen by human mind,
And the heart of the Eternal
Is most wonderfully kind.

Selected Articles

[Editorial in *Coshocton* (Ohio) *Tribune*

If the leaders of the religious faith known as Christian Scientists were responsible for no other institution than their publication *The Christian Science Monitor*, they could find it ample justification for their denominational existence. As a newspaper the *Tribune* holds no brief for any religious sect; but if a professional newspaper opinion of comparative newspaper value is worth anything, we do not hesitate to say that from the strictly professional viewpoint *The Christian Science Monitor* is the finest type of journalism, judged purely by secular standards, that the printing craft has yet evolved.

To the professional printer looking for samples of beautiful types and artistic make-ups, both in news and advertising columns, we would recommend the *Monitor* before all other papers we have ever seen. To the retail merchant looking for advertising copy whose language at once conveys to the reader the impression of simplicity and truth of statement, we would make the same recommendation; and here too the beauty of type and the art of make-up has been evolved to the highest pitch.

To the general newspaper reader this really remarkable paper carries a direct appeal. It prints all the news that is fit to print, yet there is a clearness of expression and a dignity of style that is rarely attained even in magazines. There is no legitimate field that is not covered, either in America or in the world at large. From every capital in the world and from every great industrial center of commerce and art and industry, come daily items of legitimate news value. Its departments devoted to sports, music, literature, its women's and children's pages, and its editorial department are splendid examples of what high minded journalists can produce every work-day of the year. No issue of *The Christian Science Monitor* we have ever seen has stooped to sensationalism. No item in its columns has ever been colored to suit this interest or that, nor has ever diverged in the slightest degree from the truth. And yet its news items are never dull, nor uninteresting, nor vapid. Its editorial columns are aggressive and rationally radical. Its editorial policy is elevating and optimistic.

A world of adjectives might be employed to express the different views of temperamentally different people as to the merits of this newspaper, but perhaps they could all be summed up in the one word sane, or wholesome. To the small town newspaper man who knows a complete paper when he sees it and longs for a perfection in his own output that he knows he can never attain, it is a genuine pleasure to scan the columns of a paper whose standards elevated in the beginning have never yet descended from their high estate.

✧

[Judge Clifford P. Smith in *The Standard*, New Bedford, Mass.]

It is not often that an editor declares himself to be against medical freedom. Most people not only desire this right for themselves but are willing to concede it to their neighbors. Even the *Journal of the American Medical Association* seldom goes so far as to speak directly against medical freedom. Its editors usually argue against this right indirectly or in a manner that would annul it by circumvention. Therefore the recent editorial article in *The Standard* on this subject was extraordinary, if not unprecedented.

It is probable, however, that *The Standard's* opposition to medical freedom might be modified, or even ended, by a clear definition of this term. As understood by Christian Scientists, it denotes the right of every citizen to choose between

Digitized by Google

the different curative methods known to men and the right to employ a practitioner who is qualified to practise the system which the citizen prefers. As so defined, medical freedom pertains directly to the preservation of life; it belongs vitally to the pursuit of happiness; and when the citizen chooses to rely on the practice of a religion to prevent or cure disease, this right is inseparable from both civil and religious liberty. When the American people assumed the power of self-government they declared such rights to be God-given and inalienable.

Christian Scientists are not the only people who rely on the practice of religion for the preservation of health. Last February the *Biblical World* contained a carefully written article entitled, "The New American Religion," which included the statement, made as a conservative estimate, that there are five million people in the United States who possess the absolute faith of the first century, which they are striving to put into practice in the twentieth. Nor are these religionists the only people who do not choose to employ medical doctors. In December, 1914, a well-known representative of the medical profession, Dr. William S. Sadler, said in the course of an address to the Chicago Medical Society: "No less than ten million persons in this country do not depend upon the regular medical profession in times of sickness."

Whether these estimates are too large or too small, the various groups of people thus classified together are entitled to consideration. They have the rights of citizens; and so far as Christian Scientists are concerned, no one has yet contended that they are less sincere or less intelligent than their neighbors. On the contrary, it is universally admitted that they are notable for their sincerity and their intelligence. Moreover, the Supreme Court of the United States has said, with reference to the differences of opinion regarding the curative properties of medicine, that for the Government to establish criteria where opinions are so far apart would be "to distort the uses of its constitutional power" (United States v. Johnson, 221 U. S. Reports, 488, 498).

Permit me to add that Christian Scientists are not opposed to a legitimate public health service. There is much that could be done by such a service, whether state or national, that would be as agreeable to them as it would be to other citizens. Christian Science is itself the greatest health movement in modern times, even though it takes account of health only as part of a larger interest. But Christian Scientists are not alone in the belief that the United States public health service is too closely allied to organized medicine.

✧

[J. Lawrence Hill in *Medford* (Ore.) *Mail Tribune*]

Church councils and not God have formulated the creeds of the ages, and men still regard such statements of belief with sacred awe. With such a history, such divergence of opinion as to the interpretation of the Scriptures, and disagreement even on the essential things of life, why should there not be more tolerance, more charity one toward the other. What right has any church or minister, confronted as we all are with mental limitations, to denounce, to criticize, to ostracize a church or its people because they do not worship on the same mount that we do? God is not confined to temples made with hands. He is everywhere. The true worshipers are those who worship Him in sincerity and in truth.

In all things doubtful there should be tolerance, in essential things unity, and in all things charity. This was the Master's spirit, teaching, and life. This is why his teachings have such a grip on the hearts and minds of earnest men today. He rebuked his disciples for having forbidden one who, although he was casting out devils in Jesus' name, followed not with them, and said, "Forbid him not: for he that is not against us is for us." What a rebuke to those of his day, and since, who thought that all truth and goodness belonged to their little creed and faith, when he said: "And other sheep I have, which are not of this fold: them also I must bring, and they shall hear my voice; and there shall be one fold, and one shepherd." These words should be written over every pulpit and church, and the spirit underlying them should be emphasized and practised.

There is enough evil, enough selfishness and unkindness and greed and hatred and jealousy to be cast out to keep all of us busy, and to do this work is much better than quibbling about articles of faith and forms of worship. I fail to see why this church should be made the target for so much bitterness, denunciation, and ostracism on the part of any church, sect, or party. That it has met the needs of thousands and made them better men and women is evident to all unbiased minds. The tree is to be judged by its fruit. It represents the culture and wealth of every community where it has established itself. Its crowded temples, among the most beautiful in the land, and its mid-week meetings are a standing rebuke to its critics. Its teachings are recognized by thousands in all churches. It is doing what the church did for three centuries after Christ's resurrection, and which he commissioned his people and church to do in all ages.

I am not writing this in defense of this church, but merely to rebuke the unkind, unfair, unreasonable, and bitter criticism of it by many who know little about its teachings and care less. Let us rather seek the good in all creeds and appropriate them to our own use.

✧

[S. T. Downs in *Laporte* (Ind.) *Herald*]

If one goes among those who attend Christian Science services regularly, he will find that for a very large percentage of them Christian Science has furnished a "Key to the Scriptures," and has made the Bible a daily companion and constant source of inspiration where it had formerly been a closed book. He will find too that Christian Science has made more Bible students than any religious movement of modern times, and this is known and acknowledged by many religious leaders.

The Master taught plainly that God is one God, and not that God is three persons. In reiterating the Old Testament teaching, "Hear, O Israel: The Lord our God is one Lord," he approved the answer given him by the scribe who wanted to know the greatest commandment of all, and who said, "There is one God; and there is none other but he." In thus restating the Jewish teaching of one God, and in a great many other ways, Jesus taught specifically that he was not the Deity, and a careful study of the Scriptures in the light that Christian Science throws on this subject shows that it would have been utterly impossible for Jesus to have been God, and that he never intended to teach that he was God. He made many statements that are in complete harmony with his answer to the question from the Jews, "Who art thou?" in which he differentiated very clearly between the Father and the Son in these significant words: "I do nothing of myself; but as my Father hath taught me, I speak these things. And he that sent me is with me: the Father hath not left me alone; for I do always those things that please him."

In Christian Science the term Jesus is used chiefly to designate the humanity of the Master, but it should be understood that this teaching does not reduce him to the level of ordinary mortals. He revealed the Christ, defined in the Glossary of Science and Health as "the divine manifes-

Digitized by Google

tation of God, which comes to the flesh to destroy incarnate error" (p. 583). This does not mean that he was not the promised Messiah, for on page 131 of Science and Health Mrs. Eddy states, "Jesus' works established his claim to the Messiahship."

Christian Science denies that sin is real, for the reason that God did not create it, and there can be no reality in that which He did not create. Sin seems real to the human consciousness until the consciousness is instructed out of and lifted above the belief in and the love of sin, and this is accomplished through the understanding and demonstration of spiritual law. There have been almost countless testimonies given as to how Christian Science destroys the love of sin and brings a desire to be more godlike, but to say there is no sin, and at the same time to indulge in sin, is a sin in itself.

Christian Science is the Science of divine Mind, and it states accurately how God governs man and the universe through spiritual laws. There are no apologies to be made, because it has been found that God's law is at variance with much that mankind has regarded as law, and from first to last Christian Science honors God, no matter how much it may dishonor humanity's misconception of law. This Science cannot be learned as a mere intellectual accomplishment, but it can be understood and demonstrated only by adding "precept upon precept; line upon line," in our daily living, and in the healing of sin and sickness. This great teaching cannot merely be believed, but it must be proved, and through proving we know there can be no other real science than the Science of divine Mind. This shows clearly what Paul meant when he said, "But the natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned."

✧

[Carl E. Herring in *Fairbury* (Neb.) *Journal*]

There is no disposition to evade the responsibility which rests upon Christian Science to prove by its fruits its fitness to live, but it is fair to note that since the early Christian church it is the only religion that has submitted itself to such a test. The teachings of Jesus and his works of healing went hand in hand, and while modern religions obey his commands to preach, they seem utterly to ignore the fact that the command to heal the sick is always found in conjunction with the command to preach the gospel. This does not admit of any dispute. It is simply a fact, and therefore but three courses are open: first, to ignore the command to heal; second, to admit our inability to obey; third, to do the healing work commanded. Curiously the second alternative, aside from some sporadic efforts of healing abandoned as failures, has not been adopted by religious organizations, but they have remained content with the first, and have either denied that Christian Science healed, or, admitting that it healed, have in a vague way regarded affliction as sent by God, with which to interfere, by any effective method other than material means, was to thwart the will of God and thereby to lessen the chances of heaven.

Christian Science, of course, will stand or fall on the third alternative as stated above. That it has gone a long way during the fifty years of its existence in establishing in the world's thought the correctness of its teachings, the most casual observer will admit. True, however, certain conditions tend to retard a fair exposition of the truth of Christian Science. The demonstrations of its utility are looked for here and now, while the results of other religions are projected beyond the veil called death, thereby permitting speculation to ripen the gospel seed and bear its perfect fruit without a failure, for there is no way to dispute it. But no matter how perfect the philosophy of Christian Science may be, it still has to cope with human frailty in its execution. Unlike the speculative method, its failures are recorded where they can be noted, and it would sometimes seem as though there are watchers waiting to record failures.

Moreover, Christian Science in common with all other religions has to face a condition of which the Master spoke when he said, "Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven." He also said: "Every tree that bringeth not forth good fruit is hewn down, and cast into the fire. Wherefore by their fruits ye shall know them." It does not follow from this that a failure here and there should condemn Christian Science, any more than the failure of the schoolboy to work his problem in arithmetic destroys the basic law of mathematics. The real question is, Are the demonstrations in Christian Science such as to warrant the conclusion that a correct Principle has been found worthy of our best efforts to work out and develop for the amelioration of the sins and diseases of humanity?

In a more comprehensive form Mrs. Eddy states it on page 150 of Science and Health: "Now, as then, signs and wonders are wrought in the metaphysical healing of physical disease; but these signs are only to demonstrate its divine origin,—to attest the reality of the higher mission of the Christ-power to take away the sins of the world."

✧

[H. L. Eddison in *Alton* (England) *Mail*]

In an article entitled "Just Nerves" a writer, speaking of sufferers from neurasthenia who seek a permanent cure, says, "Their minds are fixed on a magic drug which will instantly, for always, secure heaven's best treasures, peace and health," and adds, "There is no cure that way."

This conclusion, being identical with the teachings of Christian Science, is in strict accord with the words and works of Christ Jesus, who never used drugs as a vehicle of "heaven's best treasures, peace and health," but healed the sick and the sinning by the power of God. Why should not those who today seek or employ "magic drugs," rest cures, change of scene, climate, or occupation, as a means to health, pause in their weary quest to ponder the gospel statement, "The kingdom of God is within you"? An invaluable explanation of the truth that heals is ours from the great Physician, and is found in the gospel of St. John: "The Father that dwelleth in me, he doeth the works."

The writer of "Just Nerves" declares that "such cases are eminently the class out of which faith-healers and Christian Scientists and purveyors of quack nostrums recruit their cases." May I, on behalf of Christian Science, give emphatic denial to that statement? In the eighteenth chapter of "Science and Health with Key to the Scriptures" by Mrs. Eddy a long list of letters is published, bearing witness to the healing of a great variety of diseases other than "just nerves." The originals of these letters are in the possession of the editor, who can authenticate the testimonies given. Christian Science healing is not confined to any class of persons or to any form of disease, but brings relief to all who suffer in mind, body, or estate. Why not? God, the only healer, "is no respecter of persons," and today, as yesterday, His mercy is "over all his works."

✧ ✧ ✧

A man is often called upon to renounce that upon which he has set his heart, and renunciation is then his highest duty; but there is also something beyond it; it opens the way to some kind of positive achievement.

HAMILTON WRIGHT MABIE.

Editorial

Putting on the Armor

THERE is a story of a certain legendary warrior who, because no arrow the enemy might launch could wound him, came to be looked upon as under the special protection of the gods and therefore invulnerable. Then one day a subtle enemy discovered the one weak place in the warrior's defense, and forthwith hurled the weapon that compassed his defeat. History, even though it be mythological, has a way of repeating itself, and it behooves the religious warrior of today to look well to his armor, that from helmet to heel-piece he is equipped to meet unafraid the assaults of evil.

Even as the three Hebrew children faced the fiery furnace with undaunted courage, and Daniel the den of lions, David the Philistine giant, with many other heroic standard-bearers, so the Christian Scientist, conscious that he has behind him that same invisible host which spread their sheltering wings over these children of the one God, may declare as did the psalmist, "Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me," than which there is no higher defense. Clothed with the consciousness of the omnipotence of good, he can bid defiance to that which, though ever boasting itself to be some great thing, our Leader has shown us is "nothing, no thing, mind, nor power" (Science and Health, p. 330).

Mrs. Eddy goes on to enumerate some of the various forms which error assumes in its pretense of reality,—"lust, dishonesty, selfishness, envy, hypocrisy, slander, hate,"—that Christian Scientists may be on guard against these pretenders, recognize their nothingness, and displace them, as St. Paul counsels, with those things which are honest, just, pure, lovely, and of good report, to the end that "the peace of God, which passeth all understanding," may keep their hearts and minds through Christ Jesus. These would-be destroyers of our peace and prosperity of mind and body, though ofttimes pleasant to the eye and promising much in the way of sense gratification, must be relentlessly unmasked and known for "the works of darkness" which they are, and then the Christian Scientist in his "armor of light" will come off victorious in the encounter.

The Master did not promise exemption from tribulation to his followers, and no more does Mrs. Eddy. Her stirring call to arms, "The warfare with one's self is grand . . . and obedience crowns persistent effort with everlasting victory" (Miscellaneous Writings, p. 118), is correlative with the great Teacher's triumphant declaration, "Be of good cheer; I have overcome the world." He who knew the temptations with which humanity must strive, knew also that exemption from sin was possible through obedience to the Father's will. Foes within and without may assail, but we need not strive alone, any more than he did, if we can say with him, "The Father hath not left me alone; for I do always those things that please him."

Just as we have learned that "to obey is better than sacrifice," that the whole duty of man, as the wise man summed it up, is to "fear God, and keep his commandments," so too we must learn that what Paul calls "the whole armor of God" and "the sword of the Spirit" are more potent than "all the power of the enemy." We must be diligent and watchful, however, that no part of our spiritual equipment is omitted or allowed to become rusty through disuse. Let us put to good use that "shield of faith" in the omnipotence of Truth, against which the "fiery darts of the wicked" shall fall harmless. Thus guarded, we shall present to the one evil a consciousness so "void of offense toward God, and toward men," that it will find no crevice through which it may penetrate and nothing on which to fasten itself.

It is a warfare to the finish in which we are engaged, but our Leader shows us the way to victory when she says, "Clad in the panoply of Love, human hatred cannot reach you" (Science and Health, p. 571). Truly we need "fear no evil" under Love's protection, and whether asleep or awake we may claim exemption through obedience to divine law.

ARCHIBALD MCLELLAN.

"Likeness"

APART from the teachings of Christian Science, man's likeness to God is very generally believed to be corporeal; and the attempt is made to argue from effect, as seen through the lens of material belief, back to God, the spiritual cause of all reality. From this viewpoint it is argued that because man has a material body, God must have a corresponding organism of some sort; and thoughtful people, looking at poor physical specimens of humanity, are sometimes puzzled as to where the divine likeness is to be found.

Man's likeness to God, as presented in the first chapter of Genesis, is explained by Mrs. Eddy on page 516 of Science and Health, where she says, "The substance, Life, intelligence, Truth, and Love, which constitute Deity, are reflected by His creation; and when we subordinate the false testimony of the corporeal senses to the facts of Science, we shall see this true likeness and reflection everywhere." The student of Christian Science is taught to think of man's likeness to God as the manifestation of all that expresses the divine nature; and in his daily demonstrations it is both a duty and a privilege to hold ever in view the idea of infinite Mind, that the divine qualities may be humanly brought out in the ratio of one's understanding.

It goes without saying that we all desire to express life, and this would mean existence unshadowed by the fear or expectation of death. It would also mean unceasing and unwearied activity, and it would at the same time mean the expression of divine intelligence. Nor is this all, for the student learns that he cannot truly reflect the divine Life unless he expresses truth and love in all his activities and in his relations with his fellow men, for the failure to do this would measurably lessen his realization of Life, with all that this word implies in Christian Science. If at any time we seem to fail in our efforts to realize the health, harmony, and prosperity which should always characterize the children of God, it is deeply interesting to search the Scriptures and find therein many statements as to the divine nature, that we may thereby trace our own likeness to our heavenly Father. We are told that goodness is one of His chief characteristics; and again we read, "Justice and judgment are the habitation of thy throne." We of course readily admit this to be true of God, but how often do we seek to find justice and judgment enthroned in our own consciousness?

The mortal belief in self-preservation tends to blind one to the broad demands of justice, as seen from the spiritual viewpoint; and those who fail to recognize these demands need not wonder if they are unable to realize justice in their own affairs. To realize the blessings of justice one must himself be just; and as this is seen, true judgment will begin to characterize his thoughts, words, and deeds. It is beautiful to trace here the close relation between justice and judgment, because without the one the other is not apt to be demonstrated on the human plane. For example, one may have a strong sense of the demands of justice,—of right be-

Digitized by Google

tween man and man,—but unless the justice is perceived as a divine quality and linked to judgment, its human expression is apt to be one sided, hence incomplete.

In Christian Science the greatest world questions are found to have a vital relation to our individual problems, for the divine Principle is as truly expressed in the small as in the great things of life. The lowliest are neither exempt from the demands of justice nor excluded from the blessings which follow obedience to these demands, and health and harmony are the unfailing result of a true understanding of the divine nature and of what man's likeness to God means. From the standpoint of Christian Science it means nothing less than the dominion expressed in the first chapter of Genesis as man's birthright, and which nothing can ever take away from man as God's idea. Speaking of this Mrs. Eddy says (Science and Health, p. 518), "His birthright is dominion, not subjection;" and at each step of the way we find new inspiration in tracing the infinite possibilities of man's likeness to God.

ANNIE M. KNOTT.

Courage of Our Convictions

IN order to reject the clamorous demands of the carnal mind the Christian Scientist needs moral courage of a high order. Watching beside the sick, or facing "the last enemy that shall be destroyed;" uncovering sin and resisting its revenge; shocked by total depravity, yet refusing to fear it; divinely authorized to attempt the humanly impossible, he is constantly being tested as to the courage of his spiritual convictions. The Christian Scientist at every moment of his career needs the calm, sublime consciousness of power which characterized the patriarchs and the prophets and was a sign of the Messiahship of Christ Jesus.

Among Moses' parting instructions to the children of Israel, with reference to their encompassing enemies, was also this: "Be strong and of a good courage, fear not, nor be afraid of them: for the Lord thy God, he it is that doth go with thee; he will not fail thee, nor forsake thee." The psalmist sang his good cheer in the words; "Be of good courage, and he shall strengthen your heart, all ye that hope in the Lord;" and the Master uttered his sublime "Be not afraid" and his comforting "Fear not, little flock." Every great teacher in history has preached and practised moral courage, and no career has exemplified this quality more strikingly than that of the Discoverer and Founder of Christian Science, who knew whereof she spoke when she stated on page 327 of her great work, Science and Health, "Moral courage is requisite to meet the wrong and to proclaim the right."

Now, no one is so well fitted to give courage to a struggling Christian Scientist as a fellow Scientist. No one can so clearly appreciate the need for protecting thought as the spiritual warrior who is himself fighting at the front and is familiar with the danger. Human history has passed through many heroic periods, but it is a question whether greater moral courage has ever been displayed by any body of people than is now being displayed by those consecrated women and men who are serving mankind through Christian Science. It is they who today are facing undauntedly perils unknown to the world at large but uncovered to them by Truth.

Following the inspiring example of a Leader who never wavered, Christian Scientists are called upon to let the sinister, though fortunately only pretended, powers of occultism disclose themselves, while they remain serenely conscious the while of omnipotent good. After mounting in an ascending scale to a grandiose climax, evil invariably falls flat and the bubble of its arrogant ultimatum bursts; but during this process there are apt to be moments in individual experience when the heart seems to fail. Then is the very moment when a fellow Scientist, belonging to the same spiritual tribe of Juda and having emblazoned on his shield the sign of the lion of moral courage, gives the saving countersign and protects his comrade in arms. Is there a greater service than this?

Humanity at large, standing behind the lines, does of a truth need protection, but the soldier on the line itself, or beyond it on outpost duty, requires even a greater manifestation of scientific sympathy. Does he not have to pierce the mists of carnal belief with his clear sight of spiritual understanding, and clarify the mystifications artificially produced and purposely spread by the enemy? Then let every Christian Scientist who goes forward hear above the din of battle the cheering word of a fellow Scientist bidding him take courage, for the victory belongs to God and to His Christ. The Leader was doubtless aware of this need when she wrote, on page 30 of "Miscellaneous Writings," "Take courage, dear reader, for any seeming mysticism surrounding realism is explained in the Scripture, 'There went up a mist from the earth [matter];' and the mist of materialism will vanish as we approach spirituality, the realm of reality; cleanse our lives in Christ's righteousness; bathe in the baptism of Spirit, and awake in His likeness."

WILLIAM D. MCCRACKAN.

Among the Churches

Current Notes

SAN BERNARDINO, CAL.—The largest building permit of the year was issued today [Oct. 9]. It was for the construction of First Church of Christ, Scientist, on the church property at Seventh and E Streets. The permit calls for the expenditure of eighteen thousand three hundred dollars. It is announced that the total cost, with furnishings, will be about twenty-five thousand dollars. The main auditorium will provide seats for three hundred and fifty people. A balcony above the foyer will seat one hundred more, while the Sunday school room will seat two hundred and fifty-five. The latter can be thrown into the main auditorium if needed, giving a total normal seating capacity of over seven hundred people.—*San Bernardino News.*

MIDDLETOWN, CONN.—The old Randolph Pease property at the southeast corner of College and Broad Streets has been sold to First Church of Christ, Scientist, the papers in the transaction having been passed last evening [Sept. 28]. The Scientists will have the interior remodeled to suit their purposes, but will leave the exterior largely as it is at present.—*Middletown Press.*

TRINIDAD, COL.—The corner-stone of the new Christian Science church at 817 Pine Street was laid this morning [Sept. 26]. According to the present plans the building, which will cost about ten thousand dollars when completed, will be ready for occupancy by Thanksgiving time.

Trinidad Picketwire.

CHARLES CITY, IOWA.—This morning [Sept. 25] a service was held at the corner of Milwaukee and Hulin Streets for the purpose of laying the corner-stone of the new Christian Science church.—*Charles City Press.*

Digitized by Google

BUTTE, MONT.—Plans are being prepared for the new house of worship for First Church of Christ, Scientist, to be built on the corner of Montana and Quartz Streets. The church will cost thirty thousand dollars.

Anaconda Standard.

YOUNGSTOWN, OHIO.—Continuing a custom inaugurated successfully some years ago, the Christian Science church people had a reading-tent at the Canfield fair this year.

Youngstown Vindicator.

The Lectures

London, England

The introductory remarks of J. S. Braithwaite at the lecture on Christian Science for First Church of Christ, Scientist, by John W. Doorly at the Queen's Hall were as follows:—

Looking out upon the world today one cannot fail to observe that the events of the past two years have more than ever intensified the need that each one of us should have a clear reason for the hope and the faith that is in him. And not only that he should have such a reason but that he should be able to impart it to others as well, for the world is in great need today of more hope and more faith. We seem to be confronted with a condition of things similar to that foreshadowed by the prophet shepherd of Israel when he said that there should come "a famine in the land, not a famine of bread, nor a thirst for water, but of hearing the words of the Lord,"—words of truth.

Now we see Christian Science offering to the world a very real hope and a practical faith. We see that by its spiritual interpretation of the Scriptures it is bringing health to the sick, comfort to the sorrowing, and regeneration to the sinner; and yet as we regard the immense need of the world today we are sometimes tempted to wonder whether such humble beginnings can ever accomplish all that is required. It is as if some one had said again to us as we look out upon this hungry people, "There is a lad here, which hath five barley loaves, and two small fishes: but what are they among so many?" We must, however, recall the sequel to that remark; how from that small nucleus was manifested—by the spiritual power which the Master demonstrated and taught others how to demonstrate—abundantly more than was needed to feed that hungry crowd on the hillside of Galilee.

I have no doubt that there are those present with us tonight who believe, and I share their belief, that the teachings of Christian Science as correctly set forth in the writings of its Discoverer, Mrs. Eddy, will, through the same power, do more to meet the world's spiritual famine than anything else yet known to man can ever do.

✧

Seattle, Wash.

The introductory words of Charles F. Hutson, former Assistant United States District Attorney, in presenting George Shaw Cook, who lectured on Christian Science for Fourth Church of Christ, Scientist, in the Arena before an audience of over five thousand people, were as follows:—

Happiness, however interpreted, is the goal sought by all. For hundreds of years theory upon theory for the amelioration of the sufferings of the human race have been advanced, and in practical operation they have failed to accomplish the result sought. The nineteenth century found a world filled with people having materialistic views and suffering their attendant misery. Then Christian Science was discovered,—an agency found so potent for good that in the short space of fifty years it has extended to all the world, and its followers are numbered in the millions. When its teachings are accepted, understood, and demonstrated, inharmony and discord disappear and happiness is attained.

✧

Petoskey, Mich.

First Church of Christ, Scientist, on Waukazoo Avenue was filled by those who came to hear the lecture on Christian Science by John Randall Dunn. The speaker was introduced by W. Z. Searle, who said:—

In these days when the attention of the public is directed so strongly to the subject of patriotism and preparedness, it is well to pause and reflect on that higher patriotism which we owe to God, the author of all good, and which also includes that spiritual or true preparedness which not only fits us for our every-day duties but for the life that is before us. John, the beloved disciple, says in his first epistle, "God is love; and he that dwelleth in love dwelleth in God, and God in him."

About fifty years ago Mrs. Eddy, inspired by divine wisdom and spiritual understanding, discovered and brought to light that which had so long been lost to humanity, namely, the Principle of divine healing as taught and demonstrated by Jesus the Christ. Christian Science not only pierces the veil of materiality raised by mortal mind, but reaches back to the time of Christ, yea to the very beginning of which we read in the first chapter of Genesis. It also looks forward to the time when all problems will be solved by this Principle.

The Petoskey News and Resorter.

✧

Libby, Mont.

A lecture on Christian Science was delivered by Dr. Walton Hubbard at the Libby Opera House. The speaker was introduced by E. W. Evenson, who said:—

Throughout the ages God has been speaking to His people. He has always spoken to them, and He is speaking to them now in many different ways. He spoke once through Christ Jesus, and he spoke through the apostles. Again He spoke through Mrs. Eddy, and through her instrumentality was organized The First Church of Christ, Scientist, in Boston, Mass. It is through this organization that the lecturer comes to us tonight. He comes bringing an evangel of a new day.—*Kootenai Times.*

✧

Victoria, British Columbia

Mrs. Katherine English, first reader, in introducing Clarence W. Chadwick, who lectured on Christian Science, said:—

In these days people in all countries are being driven to seek for a more spiritual way of thinking and living than has hitherto satisfied them. They are beginning to discover that materiality affords no secure basis for health, happiness, or protection; and that they must look to some law or power higher than the human if they would enjoy that security and freedom which we instinctively feel is the natural heritage of all people and all nations. It is the experience of those who adopt Christian Science that they find an ever increasing sense of health and happiness as they learn to understand and obey the divine law upon which Christian Science is founded.

This divine law is unchanging and impartial. It has equal benefits for all; it makes no distinction of age, sex, or class. Whatever the profession or walk in life may be, it is found

Digitized by Google

by those who rely upon it that they can apply this law to their daily problems and solve them in such a way as to benefit all. It brings order and obedience into the home or schoolroom which is governed by it, giving health instead of sickness, replacing anxiety and fear by courage and confidence. Christian Science has a faithful promise of help and comfort for all those who are in any wise afflicted or distressed in mind, body, or estate.—*Correspondence.*

✧

Cotuit, Mass.

The remarks of Arthur P. De Camp, in introducing John Randall Dunn, who lectured on Christian Science, were in part as follows:—

"Who is my neighbor?" was the question once put to Jesus by a certain lawyer, and the world has been asking the same thing ever since. In answering the question the master Christian painted a most vivid word-picture of the true neighbor, whose instant sympathy knew no bounds of race or creed, discerning the needs of his fellow man and ministering to those needs with devoted and intelligent affection.

I am deeply impressed with the thought that it is the high destiny of Christian Science, which is nothing more and nothing less than Christianity known and applied, to make of this wide world one great neighborhood, where each shall be for all and all for each, and the knowledge of Truth shall cover the earth "as the waters cover the sea." I am convinced that as time goes on it will be generally acknowledged that Mrs. Eddy, the Founder of this movement, has been the truest and most self-sacrificing neighbor to the whole of mankind who has appeared among the later generations of men, and that her great work was impelled and inspired solely by love of Truth and love of humanity; that she has discerned humanity's need and shown how divine Truth and Love may be applied as the remedy for all human ills.

Lectures to be Delivered

[By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.]

ARKANSAS—Pine Bluff: Prof. Hermann S. Hering, Hauber Theater, Second and Pine Streets, 3 p.m., Nov. 26.
Monticello: Prof. Hermann S. Hering, Church Edifice, North Main Street, 8 p.m., Nov. 27.

CALIFORNIA—Alhambra: William R. Rathvon, Superba Theater, 3 p.m., Nov. 26.
Arcata: William R. Rathvon, Arcata Woman's Club Building, 8 p.m., Dec. 1.
Fillmore: Clarence C. Eaton, Barnes New Theater, 3 p.m., Nov. 26.
Fortuna: William R. Rathvon, Church Edifice, Seventh and D Streets, 8 p.m., Nov. 30.
Oakland (Fifth Church): William R. Rathvon, Masonic Temple, San Leandro, East Fourteenth and Hepburn Streets, 8 p.m., Nov. 27.

CANADA—St. Thomas, Ontario: Virgil O. Strickler, Engineers' Auditorium, 8:15 p.m., Nov. 27.

COLORADO—Canon City: Charles I. Ohrenstein, Majestic Theater, 8 p.m., Nov. 23.
Denver (First Church): Charles I. Ohrenstein, Church Edifice, Fourteenth Avenue and Logan Street, 3 p.m., Nov. 26, and 8 p.m., Nov. 27.

ENGLAND—Bushey, Hertfordshire: John Sidney Braithwaite, Bucks Rooms, 50 High Street, Watford, 8 p.m., Dec. 8.
London (Sixth Church): John Sidney Braithwaite, Baths Hall, Latimer Road, Wimbledon, S.W., 8 p.m., Dec. 11.
London (Seventh Church): John Sidney Braithwaite, Town Hall, Chiswick, S.W., 8 p.m., Dec. 7.
Portsmouth, Hampshire: John Sidney Braithwaite, The Portland Hall, Southsea, 3 p.m., Dec. 10.

FLORIDA—Jacksonville: William W. Porter, Duval Theater, 8 p.m., Nov. 28.

ILLINOIS—Chicago (Second Church): Virgil O. Strickler, Church Edifice, Wrightwood and Pine Grove Avenues, 8 p.m., Nov. 30 and Dec. 1.
Chicago (Fourth Church): Bicknell Young, Church Edifice, Harvard Avenue and West Marquette Road, 8 pm., Nov. 24 and 25.

INDIANA—Evansville: Edward A. Merritt, Evans Hall, 8:15 p.m., Nov. 27.
Goshen: Willis F. Gross, Jefferson Theater, 3 p.m., Nov. 26.
Winchester: Bicknell Young, Irvin Theater, 8 p.m., Nov. 30.

KANSAS—Arkansas City: Prof. Hermann S. Hering, Church Edifice, A Street and Chestnut Avenue, 8 p.m., Nov. 21.

MICHIGAN—Ann Arbor (Society of University of Michigan): Virgil O. Strickler, University Hall, 3 p.m., Nov. 26.
Detroit (Second Church): Edward A. Merritt, Arcadia Hall, Woodward and Stimpson, 4 p.m., Nov. 26.
Hastings: Bliss Knapp, Reed's Opera House, 8 p.m., Nov. 28.
Lansing: Virgil O. Strickler, Prudden Auditorium, 8 p.m., Nov. 28.
Muskegon: Bliss Knapp, Woman's Club Building, 8 p.m., Nov. 27.

MINNESOTA—St. Cloud: George Shaw Cook, 8 p.m., Nov. 27.

MISSOURI—Jefferson City: John Randall Dunn, County Court House, 8 p.m., Nov. 27.
Kirkwood: Bliss Knapp, Church Edifice, Washington and Clay Avenues, 3 p.m., Nov. 26.
St. Louis (First Church): John W. Doorly, Columbia Theater, 12:30 p.m., and Church Edifice, Kingshighway and Westminster Place, 8 p.m., Dec. 1.

NEBRASKA—Omaha (Second Church): Charles I. Ohrenstein, First Church Edifice, St. Marys Avenue and Twenty-fourth Street, 8 p.m., Nov. 28 and 30.

NEW JERSEY—Atlantic City: Willis F. Gross, New Nixon Theater, Boardwalk and Delaware Avenue, 3:30 p.m., Nov. 30.
Ramsey: Paul Stark Seeley, Superba Theater, 3:15 p.m., Nov. 26.

NEW YORK—Buffalo (Third Church): John Randall Dunn, Elmwood Music Hall, Virginia Street and Elmwood Avenue, 8:15 p.m., Dec. 1.
Elmira: Frank Bell, Regent Theater, East Water Street, 3 p.m., Nov. 26.
New York (Second Church): Paul Stark Seeley, Church Edifice, Central Park West and Sixty-eighth Street, 8 p.m., Dec. 1.

OHIO—Lancaster: Bliss Knapp, Church Edifice, North Broad Street, 8 p.m., Dec. 1.
Washington Court House: Edward A. Merritt, Memorial Hall, 8 p.m., Dec. 1.

OKLAHOMA—Guthrie: Prof. Hermann S. Hering, Guthrie Theater, 3 p.m., Nov. 19.
Muskogee (First Church): Prof. Hermann S. Hering, Hinton Theater, 8 p.m., Dec. 1.
Perry: Prof. Hermann S. Hering, Court House, 8 p.m., Nov. 20.
Sapulpa: John Randall Dunn, County Court House, 8 p.m., Nov. 21.

PENNSYLVANIA—Johnstown (Second Church): Bicknell Young, High School Auditorium, Market Street, 8 p.m., Nov. 28.
Philadelphia (Third Church): Ezra W. Palmer, Nixon's Grand, Broad Street and Montgomery Avenue, 3:30 p.m., Nov. 26.
Pittsburgh (First Church): Bicknell Young, Carnegie Music Hall, Schenley Park, 8:15 p.m., Nov. 27.
Washington: Willis F. Gross, Masonic Temple, West Wheeling Street, 8 p.m., Nov. 28.

TEXAS—Corsicana: John W. Doorly, Carnegie Library, 8 p.m., Nov. 28.
El Campo: Clarence C. Eaton, Melcher Opera House, 8 p.m., Dec. 1.

WISCONSIN—La Crosse: Bicknell Young, La Crosse Theater (note change), 8:15 p.m., Nov. 21.
Portage: George Shaw Cook, Home Theater, 2:30 p.m., Nov. 26.
West Bend: Frank Bell, Commercial Club Hall, 8:15 p.m., Nov. 30.

Testimonies of Healing

Ten years ago I was persuaded to visit a Christian Science church one Sunday morning, and it was the grandest thing I ever did. I did not seem to understand or get much from the reading, although paying close attention, but there was something in the service that I had never experienced before in any other church,—a feeling of peace and harmony. After the service I promised my friend to attend the Wednesday evening meeting. At this meeting some remarkable testimonies of healing in Christian Science were given. It was all strange and wonderful to me. A gentleman to whom I was introduced gave me some literature and offered to lend me a copy of Science and Health, which was received two days later through the mail. I read the literature and studied the text-book.

At this time I was suffering from sleeplessness, and the least bit of noise would keep me awake; the ticking of a clock would so annoy me that I would have to get up and stop it, or put it out of the room. I had been studying Science and Health two weeks, when the thought came to me that if Christian Science was the truth I could be healed of this trouble. Under conditions which were not at all favorable, I therefore put into use my little understanding of Christian Science; that is, the understanding that God is Love and that God loved me. I did not sleep immediately and had to exercise some patience, but when my wife awoke me the next morning at six o'clock I found I had slept soundly the whole night and gotten the rest so much needed.

At work the next day the thought came to me, If Christian Science is the truth, then what? Fear seemed to take possession of me, for I saw the drink going and I loved my beer. Also, I would have to give up gambling, playing the races, smoking, and all the things which I thought made life worth living, so I began to fight for the things I thought I loved. I began to reason that to use them was only common sense and natural; but I remembered that Christian Science claims to be common sense. I thought of the book and of the author. Mrs. Eddy offered it as a "Key to the Scriptures," and I had to confess that to me it had been so, for it was the truth of the Bible which had healed me. That evening when I reached home I was honest with myself; I read and studied, and again found the rest so much desired. I was healed, and a short time afterward all desire for alcoholic drinks disappeared. I no longer felt the need of a sedative or a stimulant. I found what a poor substitute drink is for "the divine energies of Truth" (Science and Health, p. 186) that bring life more abundant in happiness, peace, and joy.

A month after this healing, while in the midst of a crowd of gamblers, I was healed of the desire for gambling. There came to my thought scenes of mothers waiting patiently, though fearfully, for their boys, wives waiting for their husbands, and family groups patiently waiting for their loved ones, whom they knew to be somewhere drinking or gambling. That was ten years ago, and the healing was permanent. Gambling is a bad sickness. I ought to know, for I tried hard to quit it. Now I understand what an illusion it all is. I had been following a will-o'-the-wisp, and Christian Science has given me in place of this the divine Principle, which is a pillar of cloud by day and of fire by night, leading me into paths of righteousness.

A short time after this came the healing of the tobacco habit of some twenty-five years' duration. I have worked at the cigar business all my life, but this healing completely destroyed all desire for tobacco. I found what a poor substitute it is for the peace and quiet of clean, right thinking. Christian Science has healed thousands of cases just like mine all over the world, bringing peace, health, happiness, and joy into these homes, throwing a new light on the hearthstones. Men have caught a vision of the Christ, and as a result of this vision those reborn are transformed by the renewing of their mind through Christian Science.

Mrs. Eddy says in Science and Health (p. 313), "Jesus of Nazareth was the most scientific man that ever trod the globe," and I say that Mrs. Eddy was the most scientific woman who ever lived. She has swept away the ashes of materialism, and with the gentle breeze of demonstration has fanned a spark of vital Christianity into a flame which is healing the sick and reforming the sinner. This flame has grown into a conflagration beyond the control of all who have tried to hinder the action of the purifying fire, the inspiration of Love. It is the eternal truth come down through the ages, and who or what can stop this revelation of the omnipotent, omnipresent, and omniscient God, our God?

JAMES P. EILENBERGER, New York, N. Y.

Over nine years ago I read Christian Science literature and the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, but I did not accept Science until a few years ago. At that time about every material remedy had been tried and exhausted. I was afraid to go on living, and very much afraid of death. For twelve years I had been an invalid, suffering from kidney disease (said to be in the last stages), bladder and stomach trouble, uterine weakness, and bowel inaction.

A lady with her husband, both interested in Science, came to live next door, and gave me some literature to read, including Science and Health. With the reading my condition began to improve and in three months I took treatment. Through patient obedience and study, with the practitioner lovingly pointing the way, health and strength have been regained. I rejoice as only those can who know what it is not even to walk out in the air and sunshine for years. I shall never forget a Christian Science lecture it was my privilege to attend in October, 1914, for that was the first time I had been out at night in twelve years.

We give thanks for the healing of disease, but our deepest gratitude is for the spiritual understanding of God and man which has come to us through the study of Christian Science. I am also grateful to Mrs. Eddy, who gave us this revelation of Truth, and for the faithful workers who publish the literature. I have had the privilege of becoming a member of The Mother Church, and my desire is to be a loyal, faithful Christian Scientist.—ALICE J. GITTINGS, Camas, Wash.

Fifteen years ago I was looking in every direction but the right one for physical harmony and mental peace. While making plans for an operation, I visited a friend who said, in reply to my questions about Christian Science, "I believe in the healing, but not in the religion." As she talked I was convinced of the reasonableness of the religion, but doubted its healing efficacy. (Two years later we had class instruction and were set right by the teacher.) As I remember it, I forgot about my physical condition after two weeks' treatment, but continued going to the practitioner for seventeen weeks, she dismissing me at the end of that time. In these years I have had deep grief and bitter experiences, but am now well and happy, learning daily that, as we are told on page 6 of Science and Health, "divine Love corrects and governs man."

I have many times voiced my gratitude for Christian Science in our mid-week meetings, and now think it time to send my testimony for publication, although mere words are

Digitized by Google

not sufficient to express my heartfelt gratitude. That can be duly shown only in an honest endeavor to work out my own salvation and do what I may to lessen the world's woe.

VIVIA HARVEY SCHUSTER, Detroit, Mich.

For over five years I was a constant sufferer from chronic stomach and bowel disorders. During these years I had treatment from one of the best physicians in the town where I was then living, but received only temporary relief. A little more than nine years ago my attention was drawn to Christian Science by a member of the family in whose home I lived, who had been healed of stomach trouble by this Christly method. I bought a Bible, also a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and through the study and application of this wonderful revelation of Truth I was healed.

For this healing and many other blessings which have come to me through Christian Science I am very thankful, and am daily striving to put into practice what I understand of this practical religion. I rejoice to know what Paul meant when he counseled the Thessalonians to "pray without ceasing." Mrs. Eddy has made it very clear in our text-book (p. 4), where she says, "The habitual struggle to be always good is unceasing prayer."—JACOB M. SCHUSTER.

[Translated from the German]

It is impossible to describe in words the blessed influence which Christian Science has had upon my life. From childhood on I was greatly given to worrying and rarely was able truly to rejoice over anything, as I lived in constant fear of the future. My sister called my attention to Christian Science, but I had not yet grasped the subject when I experienced a severe blow, the sudden loss of a child.

Having taken up my abode near Dresden at the time, I would often go to see a dear Christian Science practitioner, who most lovingly pointed out to me the straight and narrow way which "leadeth unto life." During the darkest period of my life I was made to see that nothing can separate us from the love of God. Worries vanished through the recognition that I could cast all my care upon Him, as He cares for us all. I began to understand the beautiful teachings of Christian Science. While others believed me to be on the verge of despair, light had dawned within my consciousness; I had caught a glimpse of Truth. The practitioner who had shown me so much love gave me absent treatment a year later, when a child was born to us. The birth was painless, and the child is growing splendidly.

These lines are written in deep felt gratitude to God for Christian Science, as well as to all the dear ones who have helped me on the way of Truth.

FRAU ILONA MANNINGER, Ráczboly, Hungary.

I was led to study Christian Science through a healing I had before I understood anything about this teaching. For years I had suffered from ill health, and although I tried about every known material treatment, it was still impossible for me to do even the ordinary things of life. After my healing, which was instantaneous, my health improved steadily, until now I can do with ease more than was possible for years.

The healing occurred while I was on a visit to a friend who had just begun the study of Christian Science. Her improved mental and physical condition made me interested in everything she had to tell about Christian Science. The day following my arrival I was introduced to one of her neighbors who had been wonderfully healed, and her testimony, given in such a simple, honest, convincing way, made a deep impression on me. That afternoon I went with my friend to her practitioner, and while there heard other testimonies that deepened the impression already made, to such a degree that I asked for a treatment. This was given, and at the end, when the practitioner told me that I was healed and that I need never take any medicine for anything, I said, "That is lovely, if it is true." She assured me that it was true, and so it proved to be.

To be made free from bowel trouble, an ailment which had clung to me all my life, gave me a great desire to understand the healing power, and to accomplish this I read faithfully the Christian Science literature, getting at first only an occasional gleam of light. Little by little the truth was revealed, and now I know that the healing power is the God-power; that it is always here for us to use; that it is always active, and that all who seek shall find. I trust that I shall be able to pay my debt of gratitude to Christian Science by right thinking and right living.

JENNIE E. PIERCE, Paterson, N. J.

For several years I suffered from a stomach complaint which a well known local physician pronounced due to a malignant growth. In October, 1913, I was operated upon but was not relieved. The following February Christian Science was brought to my attention by a friend. I had no idea what it was, but was willing to try anything that would heal me. My friend talked to me that evening, and after the conversation I threw away the medicine I had been carrying with me. Two days later a Bible was purchased, also a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and a *Quarterly;* then I went to a practitioner and was given a treatment. Immediately after this I ate a substantial meal, the first in nine months, having been on a very light diet. I suffered no inconvenience whatever, and was completely healed in one treatment. During the next five days my weight increased considerably. The habit of using profane language and drinking intoxicating liquors was also overcome.

While I thank God daily for this healing, I also feel thankful for all that is being done for mankind today through Christian Science. Mrs. Eddy's words in the Preface of Science and Health (p. vii) have met a great need with me, "To those leaning on the sustaining infinite, today is big with blessings."—G. G. MCGARRAH, Wichita, Kan.

I have been interested in Christian Science for some time, having had an instantaneous healing a few years ago of so-called German measles. I have also been healed of eye trouble for which I had been wearing glasses for two years and which a reputable oculist had told me could only be corrected by wearing glasses all my life; also of a throat affection which I had had for a number of years and which a specialist had pronounced incurable.

In the fall of 1914 I had occasion to prove what Christian Science can do in a financial and business way. My husband lost his position in a small town on account of the general depression. We then came to Atlanta, and the only opportunity offered was one of starting a business of our own. To mortal sense, with conditions as they were at that time, this seemed an almost hopeless undertaking, especially to people without any capital. By help in Christian Science, however, we were enabled to see our way toward obtaining sufficient capital on which to begin a small printing business. My husband was a practical printer. I knew nothing of the

Digitized by Google

business, but being most anxious to do anything to insure success, with the help of Christian Science I attempted the soliciting of business. Through the understanding that the one Mind governs, and knowing my relation to this Mind, I was enabled to succeed beyond my most sanguine expectations. We had so many beautiful proofs of the ever-presence of good that it would take too much space for me to tell of them, but I wish to acknowledge that everything we accomplished was due to the understanding of God as gained in Christian Science.

Since then a trial has come to me which without Christian Science would have been almost unbearable, but through the understanding of this teaching it was transformed into a most sacred and uplifting experience. I was enabled to see the perfect man, to know that there is no sorrow or separation, to realize that nothing can be destroyed in the divine Mind, and through this experience I have gained a much higher conception of universal man in the image of God. I have found Life and Love to be ever present, and sorrow to be only a belief which can be destroyed. I have not words to tell what this means to me.

I am most grateful for class instruction and for all the blessings which come to me daily in Christian Science. I gladly give thanks to God, and am most grateful to Mrs. Eddy and to all the Christian Scientists who have given kind and willing assistance.

LAURA BURCKEL MCDOWELL, Atlanta, Ga.

✧

In the Bible we read that as Paul journeyed in Athens he found an altar with this inscription: "TO THE UNKNOWN GOD." Only five years ago I too built altars to an unknown God, to one who I believed sent sickness and trials. I was therefore most miserable, and then it was that a dear friend gave me a copy of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. This book has made me a Bible student and has taught me that we are now living in a spiritual universe, governed by our loving Father's perfect law, and that as John said, "Now are we the sons of God."

I realize more every day that we are the sons of God only as we reflect Life, Truth, and Love. So we must choose today whom we will serve,—whether it shall be an altar to "the unknown God" or "an offering pure of Love," as our Leader says (Hymnal, p. 243), "whereto God leadeth me."

Many times each day my heart goes out in gratitude for the Christian Science understanding of God.

ETTA RANDALL GILBERT, Plattsburg, N. Y.

✧

For a long time it has seemed to me that I ought to tell of the many blessings which I have received in Christian Science. This teaching was presented to me a few years ago by a young man with whom I was working, and the power of Truth began at once to take effect. At the time I was suffering from stomach and bowel trouble, nervousness, almost constant colds, and a general run-down condition. I was also a slave to tobacco and indulged freely in the use of alcoholic liquors. A copy of Science and Health was purchased, and I began an earnest study of it together with other Christian Science literature and the Bible. The result was that in an astonishingly short time the physical ailments disappeared, likewise all desire for liquor. With the aid of one Christian Science treatment the tobacco habit was overcome, and a few months later I was healed of an ulcerated tooth in a few treatments.

For all the physical healings much gratitude is felt, but that for which I am most grateful is the moral regeneration,—the spiritual uplift and the understanding of God and man,—and for the light that Christian Science throws on the Bible. My mother had often tried to persuade me to study the Scriptures, but I had always looked upon them as being too deep for me. Now I can see that they had to be unlocked first, and Christian Science has done this for me, so that instead of considering it a duty, it is now a pleasure to study them. Words can never express my gratitude to Mrs. Eddy for that wonderful book, "Science and Health with Key to the Scriptures," and her other writings. I am grateful for all the Christian Science literature, and above all thankful to God, the giver of all good.

MAURICE K. G. SMITH, San Francisco, Cal.

✧

It is only about two years since I took up the study of Christian Science, but many blessings have been received. I did not seek physical help; it was more a mental case. I had met with what seemed an almost unbearable sorrow, but through the work of a faithful practitioner and through reading Science and Health I was comforted. While studying earnestly in Science I have been able to demonstrate this practical and healing religion, and former ailments have disappeared. I was under a physician's care for over four years, suffering from sleeplessness, also acute kidney, bladder, and bowel troubles. All these have left me. I am well and strong, and do my own work.

For the physical freedom I am very grateful, but most of all for the unspeakable peace and spiritual uplift which we receive in Christian Science. My heart overflows with thankfulness to God, and with gratitude to our dear Leader, Mrs. Eddy, for this glorious truth.

MARIE E. LUNDIN, Chicago, Ill.

✧

In 1904 I first became a student of Christian Science. After a nervous breakdown in school, and suffering from sleeplessness for about seven years, I longed for death, which seemed the only solution to my problem. Not only was I suffering in a physical way, but from unrest because I had no assurance that God existed. The blind faith of childhood had been shattered when I arrived at the stage of progress where proof was demanded before acceptance. A kind teacher had often quoted to us a thought from the Bible, that if one is willing to do the Father's will he shall be taught it, and in weary nights of struggle this seemed my only hope. I am confident that Christian Science came in answer to this desire to know God's will.

While I took treatment for physical ills, yet from the first hope was revived and peace restored. My healing was slow, as it was many months before false trusts were broken down and I was ready to admit that God is our only Life. I am now grateful that I had to learn this. Glasses have been laid aside as not needed, teaching has become a joy instead of a burden, a broken arm has been set without pain and perfectly healed in a few weeks; indeed I have been kept well and happy.

When I think of these blessings, should I not be grateful to God for the Discoverer and Founder of Christian Science, Mrs. Eddy?—FLORENCE V. BOOKWALTER, Dayton, Ohio.

✧

It is several years since through the instrumentality of a dear friend I first became interested in Christian Science. I shall never forget my experience when I attended my first service in a Christian Science church and the inspiration I received, especially during the beautiful solemnity of the period allowed for silent prayer. Naturally my interest was aroused, and I read with profit a copy of the *Sentinel* which

Digitized by Google

had been given me. I was not satisfied, however, until I obtained a copy of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, from the public library. This I was able to borrow for about six weeks and from the study of it I derived much light.

When the time came to part with the book it was like giving up a treasure. Although I was privileged to read many of the pamphlets and much of the other literature issued from the publishing house, I was not satisfied until I became the happy possessor of a copy of Science and Health of my own. It meant many acts of self-denial, but my heart was full of gratitude when I found upon counting up my savings that I had more than sufficient to purchase the book. After studying a few weeks the liquor and tobacco habits left me, and I have had no desire for these things since.

For the healing of many phases of discord I am indeed grateful. I find that if error of whatever form tries to assert itself, the application of the truth as taught in Christian Science is sufficient to make it disappear into its native nothingness. It is indeed a beautiful experience to become interested in something which is perfectly good, and to know that God is omnipotent, omnipresent, omniscient. For the help received through the church services I am deeply grateful, as they have enabled me to make many demonstrations over domestic and financial anxieties, and to see what appeared to be mountains of trouble disappear like mist before the summer sun. Truly have I realized that divine Love has met my every need.

Christian Science has changed my outlook on life, and I am striving each day to rise into a higher sense of Life and Love, and to see God as He is, to know that He is ever present. The thought that God is Love fills me with joy and gratitude, and I can never sufficiently express my appreciation of the help received through the discovery by our revered Leader, Mrs. Eddy, and also for the many means she has provided whereby we may attain to a greater knowledge of this truth.

JAMES STEPHEN CURRIER, London S.E., England.

✧

It is with a feeling of deep gratitude for the understanding of the Bible which I have gained through reading "Science and Health with Key to the Scriptures" by Mrs. Eddy that this testimony is written. I was healed of serious rupture of long standing, also of severe headache, through Christian Science treatment. I had reached the mental state which knows no peace or rest, and was in fact very sick both mentally and physically at the time the text-book was given me to read, about eight years ago. Physicians had said there was no cure for me; that I was a physical wreck.

Added to the physical suffering, I was in deep sorrow, and my grief seemed beyond human endurance. With it all I was tired of living at the time I began to read the chapter entitled Prayer in Science and Health. I cannot express the joy that came with the realization that God does not send sickness and sorrow to His children; that I had a right to life, health, and happiness. Since coming into Christian Science I have had many difficulties to surmount, but with my understanding of Truth and the help of a practitioner I have been able to rise above them. The way has seemed dark at times, but by clinging steadfastly to God and knowing that He is Love and an ever present help, relief has never failed in the hour of need. I cannot express my thankfulness to God, also my gratitude to Mrs. Eddy for this understanding of Truth. Christian Science has brought that peace "which passeth all understanding." I am also deeply grateful to all who have helped me.—MAMIE FOSTER, Fort Worth, Texas.

From Our Exchanges

[*The Congregationalist and Christian World*]

The Pilgrim fathers were builders of a new civilization. They did not come here to propagate Congregationalism. They had minds large enough to grasp the conception of a real kingdom of God on earth. Their labors, their hopes, their prayers are keyed to the idea of brotherhood, embodying itself in institutions, laws, and customs, and of permeating the very atmosphere in which children should grow to manhood and womanhood.

We of today are face to face with the same duty and the same opportunity. The industrial structure founded by the Pilgrims on justice and righteousness threatens to fall before the assaults of force on both sides the social gulf that emphasizes personal advantage rather than the common welfare. The structure of world civilization itself seems at times on the verge of collapsing. Into its foundations has never been put enough moral granite to sustain the vast material growth and expansion. The Christianity of Jesus Christ, mediated through the witness-bearing and practices of Christians, must be brought to bear not only upon the preservation of all that is best in the civilization of the past, but upon the making of a new civilization in fuller accord with the mind of Christ.

[A. E. Whitman in *The Methodist Recorder*]

Life can be a very tame, insipid thing, or it may be exhilarating, sparkling like wine; it will depend upon the cause to which life is devoted. Life is made great by the purpose to which life is yoked. You may give a banquet to a thousand, and heaven may not even note it in the log-book. You may give a cup of cold water in the name of the King, and all the angels of heaven shall crowd about the gates of the celestial city to witness the deed, and the reward is sure. It is not what you do, nor how long you take in doing it, but rather why you live and strive. Is there a flaming love behind the simple deed? Is there a full consecration that like a golden thread runs through the warp and woof of your life? Then, whenever you are taken it shall be said of you: "It is finished." "Well done, good and faithful servant."

[*Pacific Christian Advocate*]

It is more than trite, it is true, to declare this a crisis hour. National life, international life, is in the crucible. The church, organized Christianity, is passing through the sifting process. New adjustments are demanded to meet new conditions. But the deepest need is vision, a vision of the holy, just, fatherlike God of Jesus Christ. The sight of God is the cure of the world's pessimism, the healing of its heart wounds, the sure stay of every man and woman who is struggling for the best of life. With this vision, fate cannot subdue him, circumstances can neither make nor mar him, the backward pull of heredity is powerless to stay his progress toward truth and justice, for he has seen God, who is holy and just, and that is the assurance to him that truth and justice must finally prevail.

[Rev. W. Fuller Gooch in *The Christian*]

The great need today is of heralds, men and women, Spirit filled, Spirit taught, Spirit led, whose one end and aim shall be to sound out the message of God and summon men to hear the voice which calls from heaven; men and women like those in Thessalonica, from whom "sounded out the word of the Lord not only in Macedonia and Achaia, but also in every place."

Men can never be reached savingly by negations or by

Digitized by Google

surmises. The accent of conviction is essential to successful preaching. Men are crying out for verities, certainties, and realities. These, concerning the things of God, can only be found in the revelation He has given; and therefore if we are to speak and testify with "signs following," we must ourselves be sure of and true to the law and the testimony as given in the Scriptures. We must act on the apostolic injunction which says, "Take heed unto thyself, and unto the doctrine; . . . for in doing this thou shalt both save thyself, and them that hear thee."

[*The Christian Work*]

The one reason why we say with confidence that so long as a man holds to the evangelical views he may stay in his denomination, although he may differ somewhat from a majority of his fellow denominationalists in his interpretation of certain doctrines, is that these interpretations are constantly changing and are tending with every year to be less and less fixed in form, and, most important of all, the interpretations of the few today are the interpretations of the many tomorrow.

[*The Christian Intelligencer*]

The events of the time command all men everywhere to repent. And those who have left their first love are under special obligation to return unto the Lord and to be faithful to their light. The one clear path which is blazed for us all by the fiery trials of our modern world is that of obedience to Christ. It is the way of holiness, of love, of service, of sacrifice. Along that pathway lies the healing of our sorrows and the insight which will discover that "the judgments of the Lord are true and righteous altogether."

[*Western Christian Advocate*]

God can only trust power to the man in whom the Spirit of Christ dwells. If it is heaven-born power it will purify itself and be pledged by tears and crucifixions to the honor of God and the service of man. It will be emptied of presumption, fraught with prayer, separated from evil, and identified with all things of Christ. The baptism of power and of the Holy Spirit, for which many men have prayed and continue to pray, is to be trusted to men only when it is absolutely one with holy love.

[*The Universalist Leader*]

The old way of the church was to set itself apart from the world, and to try to call the people out of the world and into the church. The new way is different; the church is designed to be the method of introducing religion into the world. This is the new way, and yet it is the way as old as the Master. His purpose and method was to bring the kingdom of heaven into the world, and after all these centuries the religious world is getting closer to the old ideal.

[*The Church Family Newspaper*]

There can be no doubt that the church of Christ has reached a momentous crisis in her history. She is being tested as never before. The horizon is black with ominous clouds. But above the storm and the strife comes the message clear and unmistakable: "Be still, and know that I am God." The present temptation is to forget God, and when peace is declared the danger will be even greater.

[*The Biblical World*]

Jesus himself would tell us that if we really believe what he teaches we have only to shape our lives by that teaching, cost what it may. Nor is this a new legalism. Ideals are not statutes to be obeyed, but goals to be reached. If he is the way, we walk by him and toward him. An ideal works when men work toward the ideal.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00; six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

As the advertising pages of the *Journal* and *Herold* go to press the 20th of the month, to insure publication in a desired number requests for changes in a church or practitioner's card should reach the Publishing Society at least six weeks previous to the actual date of issue.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy. Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 361 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 61 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 91 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Address all orders for above works, and make remittance by New York or Boston draft or money order, to

Entered at Boston, Mass., post-office as second-class matter.

Items of Interest

Hankow and its environs is one of the greatest egg producing regions in China, shipping to Chinese and foreign ports over 16,197,000 pieces of fresh whole eggs, valued at $53,531, during the year 1915,—this is in addition to 12,347,867 pounds of frozen egg exports, valued at $462,716. Of the egg products exported, dried albumen is far in excess of the others, totaling during 1915 over 2,207,000 pounds, valued at $737,358. Liquid egg yolk is second, with 7,692,000 pounds, valued at $417,363. Dried egg yolk is third, with an exportation of 2,752,000 pounds, valued at $320,592. Upon the arrival of the eggs at the factory they are subjected to a candle test, then washed and brought into the breaking room, where the yolks and whites are separated. The liquid albumen is then allowed to ferment for two or three days, during which time the clear liquid settles to the bottom of the barrels and is drawn off into pails by means of a stopcock. During the process of fermentation the acidity of the albumen becomes rather high, and in order to neutralize this an alkaline substance, usually ammonia, is added until litmus gives the alkaline test. The final stage in the conversion process is the drying of the albumen in shallow metal pans previously coated with vaseline, which takes place in steam heated rooms ranging in temperature from 130 to 140 degrees Fahrenheit. When completely dry the albumen is packed in wooden boxes lined with metal, zinc being used as a rule. Shipments are generally made in 100 to 120 pound cases.

Singapore, in the Straits Settlements, has a fortunate geographical position at a point where practically all shipping from Europe to the Far East, and *vice versa*, must pass. Sir Stamford Raffles in 1819 established the settlement of Singapore on a practically uninhabited island, which has today developed into the seventh port of the world in point of tonnage. The port facilities at Singapore are extensive, and have been improved during the last ten years by dredging, filling swamp lands, and the erection of dry docks and warehouses at an expenditure of some thirty million dollars. The harbor is well protected by near-by islands and has improved docking and coaling facilities. Although but eighty miles from the equator, the average mean temperature is only 82.1 degrees Fahrenheit, with practically no variation during the year. The average annual rainfall is about ninety-five inches, well distributed throughout the year.

About eight million four hundred and ninety-two thousand dollars is to be spent in the renovation of a certain quarter of Marseilles, France, which, situated between the stock exchange and the post office, forms a quadrangle of 699,660 square feet in the heart of the business section. In this quarter 534 houses, dating from the seventeenth and eighteenth centuries, occupied 473,616 square feet, leaving only 226,044 square feet for thirty-six streets and squares. The new project assigns 397,514 square feet to new streets and squares, and leaves 302,116 square feet for building purposes. Many of these antiquated buildings have already been removed, and plans for reconstruction of this quarter will without doubt be made shortly after the close of the war.

Progress has been made by the United States Bureau of Standards in the preparation of the text for the joint research with the Pennsylvania Railroad on ingots and their characteristics as shown in the quality of rails made from several types and methods of manufacture. It is also stated that an investigation on rails has progressed to such a point that the reports on the Great Northern Railroad and Pennsylvania Railroad rails which have failed by transverse fissure will be finished shortly, when the chemical work is done. The completion of these reports will make it possible for the redesigning of the alternating stress machine for rail investigation to be pushed to completion.

Colombia has protested to the United States against the new canal route treaty with Nicaragua, on the ground that the granting of a ninety-nine year lease by Nicaragua of Great Corn and Little Corn Islands is a denial of Colombian sovereignty in those islands. Colombia claims that the islands, though recently subject to Nicaraguan administration, are part of her territory under the cedula of Nov. 30, 1804, issued by the King of Spain to demarcate the various Spanish provinces in the New World. The islands are not claimed to be of any special value except strategically. They lie about ten miles off the coast and have about two thousand population.

The Massachusetts Agricultural College Extension Service has issued a bulletin entitled "The Cost of Milk Production." The results are based on the experiments and data of the five state experiment stations in Massachusetts, Connecticut, New Hampshire, New Jersey, and New York, and the bulletin states that the average cost of milk production to the farmer is 4.31 cents a quart. The average cost of producing milk in Massachusetts, according to the bulletin, is 5.38 cents a quart, in Connecticut 4.78 cents, in New Hampshire 4.13 cents, in New Jersey 3.70 cents, and in New York 4.31 cents.

In the past fiscal year, ending March 31, eighteen labor disputes were dealt with in the Dominion of Canada under the industrial disputes act, or as it is more generally known, the Lemieux act. Of these, boards of conciliation settled seventeen, and the result of one was still pending at the close of the year. Since the adoption of the act in 1907 there have been in all 191 applications from employers and employees to adjust labor disputes, and conciliation boards were granted on 169 of these, with the result that in all but twenty cases strikes were averted.

The first real exchange professorship ever entered into by the University of Washington at Seattle was established recently, when the board of regents authorized the exchange of language professors between the University of Washington and the University of Chile. Prof. Charles Strong of the Spanish department of the university will go to Santiago, Chile, Feb. 1, to teach the English language and literature for one year in the Institute Commercial, a division of the University of Chile. The University of Chile will send Prof. Benjamin O. Lorca, head of the department of English, who will teach Spanish.

Of Asiatic Russia, western Siberia is the most important section agriculturally and is the most thickly settled. Out of a total population for Siberia of 11,500,000, nearly nine million are settled on the plains of western Siberia and in the foothills of the Altai. These plains stretch across the continent for almost twelve hundred miles without a break to the Altai Mountains and are watered by the great rivers of Siberia, the Ob, the Irtish, and the Yenisei.

According to the annual report of the secretary for mines, southern Rhodesia, for the year 1915, the number of producers of gold from reef claims was 489; there were also nineteen producers of alluvial gold, mainly from the Angwa River. Three mines in the country produced 27.6 per cent of the total output,—the Shamva, the Globe and Phoenix, and the Cam and Motor. The value of the 1915 output was $18,605,446. The monthly average of Europeans employed in mining operations was 1819; that of natives, 37,928.

Hobart, situated near the mouth of the river Derwent, possesses one of the best harbors in Australia. Vessels of the largest size can be easily accommodated, and the open roadstead furnishes excellent anchorage, while the pier accommodations are equal to any demands that may be made upon them. The total number of steamers and sailing vessels entering the port of Hobart in 1915 was 596, with a net tonnage of 659,568. The number departing was 601, with a net tonnage of 667,579.

The world's entire supply of gold in coins or bars in circulation or in banks or Government treasuries is estimated at the equivalent in weight and value of about eight billion dollars. Figuring at 25.8 grains to the dollar and 4900 grains to the cubic inch, this quantity of gold would be contained in a sixty foot cube.

The United States Department of Agriculture for 1915 shows that Montana leads the twelve principal agricultural states of the country in the average per acre production of wheat, oats, barley, flax, potatoes, and rye. In fifteen years the farm value of these products in Montana has increased more than seven hundred fold.

In the *Panama Canal Record* for Oct. 11 an interesting computation is published to show that the aggregate length of the 149 ships passing through the canal in July last was approximately 10.2 miles.

Peanuts are grown to some extent in Madagascar by the natives, principally in the villages of the interior. About eighteen thousand acres are said to be devoted to their culture.

Baton Rouge, the capital city of Louisiana, two hundred and twenty miles from the sea, on Oct. 17 celebrated her official designation as a port of entry.

The copper production of Cuba for 1915 was 200,000 tons, valued at $2,200,000.

The Eternal Now

LOUISE KNIGHT WHEATLEY

THERE is perhaps no more favorite method whereby the so-called human mind attempts to defeat or to delay a Christian Science healing than that which continually puts it off until tomorrow. All good is ours today, and we have a right to receive it; yet that mind which is ever enmity to God, good, would fain persuade us to overlook the golden possibilities of the eternal now in pursuing that evanescent thing called tomorrow, which, like some frail will-o'-the-wisp, dances ever alluringly just a step ahead of us, but is never reached.

It is not only the so-called patient in Christian Science, but the so-called practitioner as well, who sometimes seems to succumb to this fallacious argument whereby the realization of God's goodness to His children is indefinitely postponed. Every treatment should be given with the firm conviction that it is the only one which will ever be needed, that the work is completed, then and there. A student of Christian Science who was noted for his instantaneous demonstrations was once asked the reason for his success. "I never take into account the possibility of a tomorrow," was the reply. "I always work as if today were my first, last, and only chance to heal the case."

This may partially explain why cases which to human sense seem critical are often healed so quickly that the world would say a miracle had been wrought. Christian Science treatment has been asked for only as a last resort, when the physicians and family have given up all hope and the patient appears to be passing on. The Scientist called in such an emergency instantly recognizes that the work must be done quickly, if at all. There is no chance here to postpone the issue. Seeing the patient again tomorrow will not do. It is a quick, hand-to-hand encounter with the "last enemy," and everybody knows it. In such instances, spurred on by the exigency of the moment, and realizing as perhaps never before the utter insufficiency of human help to meet the situation, the practitioner often rises to such calm heights of spiritual exaltation that the sick man has been known to rise from his bed, and walk.

Why should we not be just as much in earnest in all cases? The man who lay at the pool of Bethesda, waiting to be healed, was not in imminent danger of passing on. If Jesus had not come by that day the chances are the patient sufferer would have been at his accustomed post again tomorrow, just as he had been for the last thirty and eight years. Although the Master knew that "he had been now a long time in that case," he saw no reason why he should be a long time getting out of it. There was one quick, simple, unanswerable word of command, and the work was done. That was Jesus' way. We have no record of any case of healing begun today and finished tomorrow. He lived in the eternal now, wherein his Father's omnipotence was all sufficient.

But what about similar so-called chronic cases of today? Are we not sometimes like those of old whom Jesus rebuked because they maintained "there are yet four months, and then cometh harvest"? Christian Science reiterates, "Now is the time for so-called material pains and material pleasures to pass away, for both are unreal, because impossible in Science" (Science and Health, p. 39). Yet when a belief of many years' standing presents itself at the door of our consciousness to be healed, calling itself a man who has it, do we not sometimes become so mesmerized by this belief of "time" that we have even been known to take his case by the week, or possibly by the month, at what we consider to be a generously reduced price? Truly, the ways are many and devious whereby the adversary will seek to nullify a Christian Science treatment, even to the extent of persuading the very practitioner himself to lend a hand!

It is obvious that if we thought the patient would be healed on Monday, we would not arrange to continue the work until Saturday; and if he is not to be healed until Saturday, why begin on Monday? This stupefying belief of time never laid its spell upon the clear consciousness of our Master. When he had need to be at the other side of the lake, he entered the ship, and they were at the other shore "immediately." The dictionary defines the word immediately as meaning, "Without interval of time; without delay; straightway; instantly; at once." Why is it that the followers of the Christ today do not reach more quickly the haven where they would be? Why do we not reach the other side of the lake "immediately"? Simply because we do not know that we can.

When one awakens from a dream, how long does it take for the dream to disappear? Although one might have been all night in getting to sleep, he could wake up in an instant. Suppose we were dreaming of a castle perched on beetling crags far above a swiftly rushing river, in which we were held a prisoner: would the castle have to fall into ruins before we could get out? Would long years have to elapse, wherein mortar would disintegrate, and stones crumble, and iron bars rust, and hinges break, in order that we might go free? Yet the whole of mortal existence is but a dream of pain and pleasure in matter, no more real than the dream-castle, did we but know it. Mrs. Eddy says (Science and Health, p. 530): "The history of error is a dream-narrative. The dream has no reality, no intelligence, no mind; therefore the dreamer and dream are one, for neither is true nor real." Then what is the quickest, surest, sanest, simplest way to destroy the dream-castle wherein we feel ourselves imprisoned? Is it not just to wake up?

It seems so easy to see this about the fantasies of a dream! Why not try to see it also of those grim prison-houses of disease, sin, sorrow, want, and woe, wherein we fancy in our waking moments that we sometimes dwell? Those whose eyes are shut are not the only ones who dream. In her famous sleep-walking scene, one watcher says of Lady Macbeth, "See, her eyes are open." "Aye," replies the other, "but their sense is shut." Let us arouse ourselves from the belief of any consciousness apart from God. Mortal mind would fain prolong this dream. "You have been sick a good while," it says. "Your system needs to be built up. You cannot expect to get well in a moment. All this takes time."

Copyright, 1916, by The Christian Science Publishing Society.

Digitized by Google

Does it? How long did it take for the dream-castle to go? You once believed yourself a prisoner there. But were you? Your present belief in sickness, or discord of any sort, is no more real than that castle, and can be destroyed by the same simple process. Where does it go? To the same place where the dream-castle goes when you wake up. Where did it come from? From just the same place that the dream-castle came from. There is no use in speculating as to where error comes from. There is no use looking for the origin of evil, for it has none. Do we not sometimes get so busy "uncovering error" that we forget to thank God because there is no reality in error?

What matters the type, length, breadth, thickness, and general appearance of our dream-castle? Who cares who built it, and when? Will the illusion vanish any more quickly after we once decide whether its style of architecture is Gothic, Renaissance, or early English? Will it help us to wake up to know whether it is built of granite, marble, or only of stones from the river bed below? And if we cannot figure it out for ourselves, will it expedite matters any to call in some one else to look at it and tell us its name?

Who gave the names to everything mortal and material in the first place? Mrs. Eddy says, "Beholding the creations of his own dream and calling them real and God-given, Adam —*alias* error—gives them names" (Science and Health, p. 528). Why prolong the dream? Since the one object of Adam, or error, is to prevent us from waking up, it would keep us at work indefinitely counting the windows and doors of our castle, if it could. It would keep us forever staring at matter, if it had its way. But why give so much flattering consideration to anything so obviously false? The one point which should interest us is this: How are we to get out?

The important thing then is to wake up. When this is done the dream-castle will disappear of its own accord, because there is nothing else left for it to do. Then let us cease our hopeless contemplation of our prison walls. Have we not already stared at them long enough? Let us know that it never existed in God's beautiful realm of the real, and that we were consequently never in it. Let us realize that inharmony of any kind is no part of man, that it cannot attach itself to man, nor call itself either the dream or the dreamer. Let us remember, instead, that we are living in God's eternal now, wherein no laggard element of time can ever enter, where no stone walls crumble, but where all is as perfect and harmonious and complete as in that primal hour when Mind spoke, "and it was so."

Destroying the Evidence

J. THOMAS MUMFORD

THE real Christian Scientist is not discouraged by criticisms ignorantly made against Christian Science, even though they seem severe. Jesus said, "These things will they do unto you, because they have not known the Father, nor me," and the reason given by Paul for his part in the persecution of Christians was that he did it ignorantly, thinking that he was doing God a service. Jesus said to the Jews, "Ye do err, not knowing the scriptures, nor the power of God." When he was hanging on the cross he said of his persecutors, "Father, forgive them; for they know not what they do." The criticisms offered against Christian Science may seem to those who use them to supply good reasons for opposition, but to those who are enlightened along spiritual lines, they are utterly without foundation.

Many of these criticisms are attempts to minimize the evidence, so as to make it less convincing. In the twelfth chapter of John we see that many were attracted to Jesus because of the great works of healing which he did, but "they came not for Jesus' sake only, but that they might see Lazarus also, whom he had raised from the dead." That is, they wanted to see the evidence. But, it is added at the tenth verse, "the chief priests consulted that they might put Lazarus also to death; because that by reason of him many . . . believed on Jesus." That is, they consulted how they might destroy the evidence of Christ's power over death and the grave.

To the enlightened and spiritual it seems astounding that people will study to destroy the evidence of "God with us," and try to put out of the way anything which will place the power of God, good, above mortal limitations. They do it, however, because they are not acquainted with the true nature of God, and the real man made in His image and likeness.

The attempt to destroy the evidence of God's power over sin, disease, and death has been peculiar to mortal mind in all the ages. The history of the world is largely characterized by the effort of mortal mind to rule God out of His own universe, and to minimize the evidence of His hand in human affairs. On the day of Pentecost some critics tried to weaken the evidence at hand by saying, "These men are full of new wine." After the crucifixion the rulers attempted to destroy the evidence of Christ's power over death. To do this they placed a guard about the sepulcher, and after the great event had taken place and the soldiers had fled into the city and told what had occurred, they bribed them to say that the disciples had taken the body of Jesus away while they slept.

Criticism against divine Science is of the same nature today. The attempt is even made to show by sermons and the printed page that God is not healing the sick through spiritual means, and that Christian Science is akin to suggestion or hypnotism. The man born blind who was healed was a living testimonial of the Christ-power over disease and human limitations, but to destroy this evidence the Jews cast him out of the synagogue. Contact with a man like that was obviously dangerous to the old way of thinking. In these days the attempt is made to have it appear that there was virtue in the clay with which Jesus anointed the blind man's eyes, and that it did not take quite so much power when the clay was used. What is this but an attempt to weaken the evidence?

In the dark ages, when a man had an advanced thought which brought him nearer to the right conception of God and man, he was burned at the stake, or otherwise put out of the way. In the old way of thinking he was considered a dangerous person. This kept the evidence in the background and the world was impoverished thereby. Who knows what advancement might have been made in spiritual enlightenment had such men as John Huss, John Tyndall, and hundreds of others been permitted to preach the truth as they understood it without hindrance? We owe much to religious liberty and to the freedom of the press, and that is one reason why such great progress is being made in this day and age.

Nothing deserves to survive that cannot bear the light of honest and sincere investigation. If it is not the truth, it will come to naught; if it is the truth, it will prevail. In the words of the poet Bryant:—

> Truth crushed to earth shall rise again,—
> The eternal years of God are hers.

Christian Science is not injured by criticism. Many have been led into Science by the statements of some overzealous critic. We are informed that "the wrath of man shall praise

Digitized by Google

thee: the remainder of wrath shalt thou restrain." The one who seeks to destroy the evidence of the ever present divine Life is blinded by the god of this world (material sense), but some day this blindness will disappear and together we shall all see as God sees and know as God knows.

Spiritual Awakening

BRIGMAN C. ODOM

CLEAN hands and a pure heart are requisite to communion with the ever present Father. To reflect Love and at the same time to harbor thoughts of resentment is foreign to reason. The psalmist said, "If I regard iniquity in my heart, the Lord will not hear me." Things that are wholly at variance cannot dwell together, for as our Master declared, "No man can serve two masters." According to Christian Science, spiritual man, the image and likeness of his Maker, is as free from infection as are the stars. A mortal awaking to this truth finds himself on the highway leading to complete emancipation from error. This indicates that the process of regeneration is one of spiritual awakening.

The seers of the Old Testament caught occasional glimpses of spiritual truth and made practical use of it. Abraham, through his acute spiritual sense, was awakened to a recognition of God as the Almighty, a God who is all-power. The perception of God as omnipotent was the beginning of Abraham's fitness to be a father of many nations, and the mark of his greatness was his ready and willing obedience to every call of duty. The liberal educational training of Moses—his varied experience in human affairs, his good judgment, his courageous nature, coupled with his spiritual discernment—made him a safe spiritual guide and counselor. The special work of Isaiah was to emphasize the mission of Israel. He saw clearly the spiritual ideal, and strove to lift the thought of his people to an apprehension of that spiritual reality. Isaiah made forceful appeal for complete turning away from all unrighteous living, and strongly urged the necessity for an awakened and enlightened sense of glories and realities supernal. He said, "The work of righteousness shall be peace; and the effect of righteousness quietness and assurance forever."

Christ Jesus was "the way, the truth, and the life;" hence he was able to present a ministry applicable for all time to the physical and spiritual needs of humanity. Mrs. Eddy says, "Jesus taught the way of Life by demonstration, that we may understand how this divine Principle heals the sick, casts out error, and triumphs over death" (Science and Health, p. 25). He it was who declared: "As Moses lifted up the serpent in the wilderness, even so must the Son of man be lifted up: that whosoever believeth in him should not perish, but have eternal life." This brazen serpent, upon which those bitten by poisonous reptiles could look and be healed, was symbolic of the spiritual teachings of the uplifted thought of Jesus the Christ.

The New Testament abounds in the moral and spiritual instructions of the Master, the Sermon on the Mount being the most notable, since it touches practically every phase of human experience. One who perceives the truths therein taught gains a new outlook upon life, and goes forth to fight all his seeming battles with assurance of victory, remembering that "with God all things are possible." These blessings, however, come only to those who are striving to do the will of the Father. Again we read in Science and Health (p. 25): "Though demonstrating his control over sin and disease, the great Teacher by no means relieved others from giving the requisite proofs of their own piety. . . . We must go and do likewise, else we are not improving the great blessings which our Master worked and suffered to bestow upon us."

The angel of the Lord—spiritual intuition and guidance—appears to every one at times, but unlike Moses, many fail to "turn aside, and see this great sight, why the bush is not burnt," and hence do not receive the call to higher and better work, with its inevitable rewards of present material supply and the higher manifestations of Love,—goodness, gentleness, joy, peace, and progress. This vision is not experienced until human thought is awakened to the recognition and realization of good, divine Principle, as the only intelligence and might. Then, conscious of the divine allness and protection, one can have no temptation to go in the way of the ungodly and can realize no pleasure or profit from sinful indulgence, but such a one finds delight in the truth of Life and abides in the consciousness of divine Love. Accordingly, he that rejects, through the law of divine Mind, the false for the true, the selfish for the unselfish, the impure for the pure, shall be, in the prophet's words, "like a watered garden, and like a spring of water, whose waters fail not."

Why Study the Manual?

GIZELLA VON WALTHERR

THE following account illustrates the fact that the desire to be obedient to one of the by-laws contained in the Manual of The Mother Church proved the truth of these words of our Master: "According to your faith be it unto you." The present-day value and applicability of that truth is thus restated by Mrs. Eddy: "To those leaning on the sustaining infinite, today is big with blessings" (Science and Health, Pref., p. vii). The by-law referred to is one of the group under Article VIII, entitled "Guidance of Members," and Section 14 reads: "It shall be the privilege and duty of every member, who can afford it, to subscribe for the periodicals which are the organs of this Church."

At the close of last year a student of Christian Science was pondering the meaning of this by-law. She was not a subscriber to the periodicals, because she felt that she belonged to that group of truth-seekers who cannot afford to subscribe for them, and who sometimes read them in the Christian Science reading-rooms and occasionally, but very rarely, purchase them. In pondering over the meaning of this by-law she finally came to the conclusion that it was inconsistent for any student of Christian Science to believe that one cannot afford a good thing which is essentially helpful in the process of one's spiritual growth. She also perceived that this might be made an opportunity to prove her faith by her works. There was the by-law, and she desired to obey it, but was it possible to do so when she did not have the money needed for the subscriptions?

At that time her financial status was rather unsettled, but she decided to depend on divine Love to show her the way. A few days later she unexpectedly received the sum necessary for a year's subscription to the *Sentinel*, *Journal*, and *Monitor*, but she put it aside, thinking that it would be a good plan to enter her subscriptions from the first of the year and thus start the new year right. A few weeks later, in a moment when spiritual vigilance was not exercised, the money which had come so beautifully in answer to a right desire, the desire of being obedient to the above mentioned by-law, was inadvertently spent for something else.

Then came the test of her faith in the present-day applicability of the statement, "According to your faith be it unto you." She felt tempted to condemn herself for not sending in her subscription at once, but the words from

Digitized by Google

Science and Health, "To those leaning on the sustaining infinite, today is big with blessings," came to her troubled spirit like a gentle benediction, and she was grateful for the blessed teaching of Christian Science. A few days went by without any apparent results, but the conviction abided that if it was right to obey a by-law, it was also possible to do so.

The necessary funds with which to subscribe for the periodicals came to her for the second time without any effort on her own part. Needless to say she sent the money right on to the Publishing Society. While she is joyfully grateful to receive these periodicals regularly, she is by far more grateful for this additional proof of the fact that the Christian Scientist who tries to obey the spirit and the letter of the Church Manual is already blessed. Our revered Leader wrote: "Of this I am sure, that each Rule and By-law in this Manual will increase the spirituality of him who obeys it, invigorate his capacity to heal the sick, to comfort such as mourn, and to awaken the sinner" (The First Church of Christ, Scientist, and Miscellany, p. 230).

Even so; we need our Church Manual because, while we know the Bible contains the truth, it is only by faithfully obeying the rules laid down that the Scientist gains the ability to silence all arguments to the contrary. All men can see that an intelligent understanding of God, the inevitable result of studying and applying Christian Science, proves the truths contained in the Bible to be true today.

"Our only preachers"

HELEN FRIEND-ROBINSON

In the Explanatory Note found in the *Quarterly* we read that "the Bible and the Christian Science text-book are our only preachers," and the longer we study this Christ Science the more we appreciate the wisdom of our Leader in giving us these impersonal preachers.

Several years ago, when the writer was very young in Christian Science, the time came when the term of office of the readers in The Mother Church had expired and new readers were chosen to take their place. To many this may seem a prosaic statement and a very ordinary course of procedure, but to me it was an event fraught with vital issues in my spiritual development. About two years prior to this I had found my way to The Mother Church in great mental anguish, as well as burdened with many serious physical ailments (one internal condition being so serious that the only relief offered me was a surgical operation), and I was instantaneously healed during this my first visit.

It was while the first reader was reading the "scientific statement of being" (Science and Health, p. 468), which is read at the Sunday services of all the Christian Science churches throughout the world, that I felt the spiritual uplift which freed me permanently from all those terrible sufferings of so many years' standing. I knew that it was the spiritual influence of divine Truth, the absolute power of the word of God which had healed me; nevertheless, as time went on, quite unconsciously to myself I was forming a halo about the personality of those readers, which was not only retarding my own spiritual growth but perhaps adding as well an unnecessary burden to the readers, which they would later have to overcome. I had received healing under their ministry, and to my undeveloped sense this justified me in thinking that no other readers could ever bring out the meaning of the divine message as they did. Every intonation was treasured; every statement became imbued with a personal interest, until I was drifting perilously near the brink of breaking the first commandment, "Thou shalt have no other gods before me."

And so it came about that when these readers, the only ones at that time whom I had ever heard read our Lesson-Sermons, were to retire and their places to be filled by strangers, I rebelled in my secret heart and for a time felt that the reading could never seem quite the same to me again. This experience proves again the wonderful foresight of our dear Leader when she made the by-law (Manual, Art. I, Sect. 4) limiting the term of office of the readers in The Mother Church to three years of service. I thought I had listened to the truth only, but this change of readers awoke me to the fact that in my consciousness I was losing sight of the absolute truth laid down in the text-books which Mrs. Eddy had ordained as "our only preachers," because of the pleasing manner in which the truth was being presented to me; in other words, I was straying from entire reliance upon Principle.

Fortunately my sense of loss and change lasted only for a moment, but the lesson derived from this experience has been long and far reaching. The dream was soon broken, as I gave myself a good mental "shaking-up" and asked myself some very searching questions, at the end of which time I reached this conclusion: that if I went to church to hear the truth and nothing but the truth, it could not matter to me what particular personality uttered this truth, or how pleasing or how distasteful to mortal sense the truth might seem, for the truth was what I needed and all I needed to help me in my progress onward. The lesson was sufficient, and it is needless to say that when I heard the new readers the next Sunday, not the slightest sense of loss or change was perceptible. Although I have heard many different readers in our Christian Science churches since that experience, the temptation to criticize the style of reading or to compare the efforts of one reader with another has never occurred to me, and for this I am more grateful than words can express.

Mrs. Eddy says, "Gratitude is much more than a verbal expression of thanks" (Science and Health, p. 3), and I hope and believe that all our church members throughout the field fully appreciate the faithful, consecrated service of their retiring readers during their term of office; yet I feel sure that we can do still more if we prayerfully consider, especially when new readers are elected, that the truths contained in the Bible and our text-book, "Science and Health with Key to the Scriptures," are really "our only preachers," as our Leader has so wisely provided. Surely if we listen to these inspired words with all our hearts, there will be no room for criticism, nor shall we feel any loss with the change of our readers, for God's word is "the same yesterday, and today, and forever," and in addition to this our Master has given this comforting assurance: "Lo, I am with you alway, even unto the end of the world." This true attitude of thought will not only help us effectually to hold up the hands of all our readers and leave them free for broader work, but a more general uplifting and healing of the stranger who comes within our gates must result, and an ever increasing spiritual growth and prosperity will be brought to us all, individually and collectively.

May we pray each day more sincerely for that unity of thought and purpose which will enable us to rejoice in the progress and demonstrations of another as we would in our own; may we ever more earnestly strive for "that Mind to be in us which was also in Christ Jesus; to do unto others as we would have them do unto us; and to be merciful, just, and pure" (Science and Health, p. 497). Thus, as "lively stones," cemented and welded together by universal love, may

Digitized by Google

we become an integral part of that great "church triumphant" against which the winds and waves of sin and sorrow may beat in vain, for it is founded upon the Rock.

✧

"Streams in the south"

PETER B. BIGGINS

THERE is a group of brief and beautiful psalms, from the 120th to the 134th inclusive, each of which is styled "A song of degrees," or of ascents. According to the generally accepted view these were pilgrim songs, and were sung by the pilgrims on their periodic journeys up to Jerusalem. It is very significant that the pilgrims should sing as they journeyed upward, and this is a good lesson for us. Why should not we sing and rejoice as we pursue our upward mental journey to the New Jerusalem, the perfect and abiding consciousness of divine Love?

The 126th psalm brings out a beautiful spiritual lesson from the return of the Jewish captives from Babylon. It begins, "When the Lord turned again the captivity of Zion, we were like them that dream." The meaning is rendered very clear by referring to Mrs. Eddy's definition of Zion in the Glossary of Science and Health. The spiritual meaning is there given as "spiritual foundation and superstructure; inspiration; spiritual strength." The material sense, the result of the Adam-dream, is given as "emptiness; unfaithfulness; desolation" (p. 599). It is proved in the experience of every Christian Scientist that when the evidence of material sense is reversed, when Zion's captivity is turned, desolation and sorrow are replaced by inspiration and joy. Before learning in Christian Science of the allness of infinite Love, life seemed indeed empty and desolate; but this satisfying understanding fills anew the dried-out channels of human thought with overflowing streams.

This very naturally leads to the beautiful spiritual meaning contained in the reference in this psalm to "the streams in the south." The wadys, or valleys, in the desert region at the south of Judæa, though dry in summer, were filled to overflowing during the season of rain. The Jews' desolation during their captivity in Babylon is likened to the dry season. The freedom and joy of their return are compared to the filling up again. The pilgrims recognized the analogy between these events and their spiritual experiences, and present-day pilgrims also may profit by this lesson.

Here some one may remark, "I have been studying Christian Science for some time, and yet I do not experience this promised fulness of joy and harmony." The question then arises, Has "the captivity of Zion" been "turned again"? Is the evidence of the senses, as to mortal man's bondage to matter, sin, and disease, being accepted, or is it being turned back, reversed, and so annulled? This work of reversal cannot fail to bring a sweet, satisfying sense of the ever-presence of divine Love; therefore we should be encouraged to persist patiently in this profitable work.

The closing words of the psalm cover this point exactly, with an appropriate change of metaphor which lends additional charm to this poetic gem: "He that goeth forth and weepeth, bearing precious seed, shall doubtless come again with rejoicing, bringing his sheaves with him." Our efforts during times of trial may seem sorrowful, but underlying the turmoil there is a deep conviction that all is well. We are thus enabled to continue to sow the seed, to continue to declare and realize the truth that man, made in God's image and likeness, reflects unchanging harmony. In due time the reward is apparent in a bountiful spiritual harvest, and we can rejoice in the abundant fruition of our efforts.

Selected Articles

[Judge Clifford P. Smith in *Boston* (Mass.) *Transcript*]

In two different departments of the *Boston Transcript* were references to Mrs. Eddy, the Discoverer and Founder of Christian Science, which must have escaped the usual scrutiny of its responsible editors. In one of these departments Mrs. Eddy was referred to as "Mother Eddy," although it is well known, I believe, that she objected to this prefix and it is not used by Christian Scientists.

In the other department to which I have referred, the *Transcript* quoted a statement from a certain unreliable life of Mrs. Eddy to the effect that the Rev. Mr. Wiggin was joint author with her of the Christian Science text-book, "Science and Health with Key to the Scriptures." This canard has been refuted frequently. It rests upon a story, not told by Mr. Wiggin himself, to the effect that Mrs. Eddy employed him as a literary expert to criticize the manuscript of Science and Health when she was preparing a new edition of this book, and that he found the manuscript in such illiterate form that he had to revise it from beginning to end.

The author of this story admits, what could not be denied, that Mr. Wiggin was not employed by Mrs. Eddy for any purpose until the fall of 1885. Now Science and Health had been published for ten years at that time, and it had passed through fourteen or fifteen editions of one thousand copies each. It can be seen, however, by any reader, that these editions did not need any such polishing as the fiction in question implies, and that the changes made in the next revision of Science and Health were not different in kind or degree from the changes made at the several other times when Mrs. Eddy revised this book. In short, the editions of Science and Health from first to last constitute a series of documents which attest Mrs. Eddy's sole authorship beyond question.

There are not many authors who have a more distinctive style than Mrs. Eddy, and there are not only dozens but hundreds of persons who are familiar with her literary style and its development from 1875 to 1910, between which years she was a prolific writer. Her published poems include several which were originally published before 1850.

✧

[John W. Watkins in *The Tampa* (Fla.) *Tribune*]

According to report our critic tries to make it appear that Christian Science is a false religion. There is no religion today that more closely adheres to the teachings of the Scriptures, and especially to that which the Master taught and commanded, than does Christian Science. Every day Christian Scientists are striving to put into practice the Master's command, as recorded in the last chapter of St. Mark's gospel, "Go ye into all the world, and preach the gospel to every creature. . . . And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

Our critic has also said that too little was made of sin and that Mrs. Eddy wanted to do away with sin—that is, to deny that there is sin. In "Science and Health with Key to the Scriptures," the Christian Science text-book, there are upward of five hundred references which denounce sin. In none of her works does Mrs. Eddy say that to the human sense there is no sin; on the contrary, she warns every human being that so long as he sins he will be punished.

Digitized by Google

One of the tenets of the church reads (Science and Health, p. 497): "We acknowledge God's forgiveness of sin in the destruction of sin and the spiritual understanding that casts out evil as unreal. But the belief in sin is punished so long as the belief lasts."

Jesus said, "I am not come to destroy, but to fulfil;" and again it is written, "For this purpose the Son of God was manifested, that he might destroy the works of the devil." He must have considered disease, as well as sin, evil works and unreal, for he was always found healing, or destroying, both sin and disease. Sin is only in the human or carnal mind, and when one ceases to think evil and thinks only good, the good has displaced or destroyed the evil, just as when you throw open the blinds of a darkened room and the darkness is instantly displaced by the light.

✧

[James D. Sherwood in *The Church News*, Denison, Texas]

The editor says, "Many people of today are embracing Christian Science under the pretext that it is a superior form of the Christian religion—that it is the highest and best form of that religion to be found in the world today," and I agree with that statement of the editor, for it is now very generally conceded that Christian Science is indeed the very "best form of religion to be found in the world today."

Saying that Christian Science is neither Christian nor Science does not make the statement true. The mere statement means nothing when it is opposed by the record of wonderful accomplishments that are to the credit of Christian Science. The claim that Christian Science is neither Christian nor Science is not original with the editor. It has been made many times before by others and is now well-nigh threadbare from overuse. Overwhelming proof that Christian Science is both Christian and Science is pouring in daily from the civilized world. Men, women, and children who have been delivered from the depths through the ministry of Christian Science are freely testifying of its unfailing efficacy in meeting "every human need" (Science and Health, p. 494).

Christ Jesus said, "Ye shall know the truth, and the truth shall make you free." Knowing God and knowing Truth is one and the same thing. The applicability of the Master's promise to present-day necessities is evidenced in the experience of thousands of persons who before taking up the study of Christian Science had suffered from constant disappointment because, not having an exact knowledge of God, they had been hitherto entertaining a mere blind belief about Him, a belief that was void of any satisfactory accompaniment. Now that they have touched the hem of the garment of Christ they are enjoying the fruits of the Spirit. That Christian Science is Christian is proved by the good it accomplishes. By it the sick are healed; by it the sorrowing are comforted; by it the sinner is reformed; and to them who are "dead in trespasses and sins," the gospel is preached with "signs following."

Christian Science is not an ism. It is not the personal opinion of any one. It is not Mrs. Eddy's opinion. It is the name she gave to her discovery; and it is the term that should be used when reference is made to Christian Science. Christian Science is a demonstrable scientific knowledge of God, a spiritual understanding of Him, that is found available to meet the needs of any honest, fair-minded student. Its teachings and practice are in full accord with the teachings and practice of Christ Jesus and his disciples.

Christian Science admits that there is a claim of sin, and that many mortals indulge in the practice of sin when seeking pleasure through the senses of matter. Christian Science teaches that punishment for sin continues as long as the practice of sin is indulged. In Science and Health (p. 40) Mrs. Eddy writes, "While there's sin there's doom." Christian Science takes away a sinner's belief in the pleasure of sin, and this improved mental state, when utilized by him, saves the victim from the consequences of sin. Christian Science teaches that there is but one creator, even God, who made all and pronounced "very good" all that He had made. It might be asked, Is there any good in sin? and if it be admitted that there is none, are we not justified in contending that God is not its author? Is there more than one creator? No; "to us there is but one God," Paul writes; "the Father, of whom are all things, and we in him." Let us keep intact the first commandment, which reads, "Thou shalt have no other gods before me."

Baptism is not "set at naught by the Christian Scientists," as our critic seems to believe. Baptism for the Christian Scientist means "a purification from all error" (Science and Health, p. 35),—a cleansing from all sin,—a spiritual purgation where the *modus operandi* is wholly mental. It is that spiritual baptism mentioned in Luke as the baptism of the "Holy Ghost and with fire."

Our critic says, "Neither is there a place for the resurrection of Jesus in her [Mrs. Eddy's] system." In her book "Science and Health with Key to the Scriptures," on page 497, Mrs. Eddy gives the tenets of Christian Science, two of which will be sufficient to answer our critic's objection. The fourth tenet reads as follows: "We acknowledge Jesus' atonement as the evidence of divine, efficacious Love, unfolding man's unity with God through Christ Jesus the Wayshower; and we acknowledge that man is saved through Christ, through Truth, Life, and Love as demonstrated by the Galilean Prophet in healing the sick and overcoming sin and death." The fifth tenet reads: "We acknowledge that the crucifixion of Jesus and his resurrection served to uplift faith to understand eternal Life, even the allness of Soul, Spirit, and the nothingness of matter."

If our critics would merit the confidence of the public, they should learn to be just and permit a man's faith to be judged by its fruits; then it will be seen and acknowledged that Christian Science is the greatest moral influence and the most effectual remedial agency known among men.

✧

[William C. Kaufman in *Anaconda* (Mont.) *Standard*]

Our critic admits that healing is accomplished through Christian Science, but he claims that this healing is accomplished by psychic suggestion, which could be practised outside of Christian Science. This at once shows his ignorance of what Christian Science teaches. Christian Science practice is not one human mind exercising power over another; it is not the suggestion of one mind to another; it is not mental or physical manipulation; it is not will-power or psychic suggestion. It is the truth of being realized.

Christian Science takes the position that God is the only power, presence, cause, the only lawgiver; that God is infinite good, divine Life, Truth, Love, Spirit, Soul, Mind. It regards Christ as the Son of God and the divine manifestation of God's infinitude. It regards man as spiritual, perfect, and immortal. It looks upon sin, sickness, and death as false conditions which exist only in human experience, and which can be overcome through the right understanding of God and man.

Mrs. Eddy never claimed to be God or the equal of God or of Christ Jesus. She claimed nothing more than that she was the Discoverer and Founder of Christian Science. This came to her through her investigation of an instantaneous

Digitized by Google

healing which she experienced as a result of reading the Scriptures. She had been given up by the doctors to die, and turned to the sacred Scriptures for relief. "Science and Health with Key to the Scriptures" and her other writings on Christian Science are the result of her Scriptural search for the Principle which had healed her. Thousands of men and women have been healed through the reading of this book. In Christian Science, healing the sick and reforming the sinner are one and the same thing, because healing follows spiritual exaltation.

Christian Scientists do not neglect their children. Where both parents are Christian Scientists they naturally rely upon God for the healing; and it is a fact that there is less sickness among the children of Christian Scientists than among those who rely upon medicine. Christian Scientists believe in sanitation, obey the quarantine regulations, and are law abiding.

✧

[Editorial in *Austin* (Texas) *American*]

The chief justice of the New York court of appeals, in a memorandum accompanying a decision handed down by that court last week, said, "I deny the power of the legislature to make it a crime to treat disease by prayer." This was in the decision of the celebrated Cole case, in which the defendant, a Christian Scientist, had been charged with practising medicine without a license and convicted. The court of last resort in New York state reversed the finding of the court below and discharged the defendant.

The decision was a signal victory for a people who believe absolutely in the efficacy of prayer,—believe in it to a degree exceeding the accepted tenets of the general churches of the Christian religion. In their excess of belief they have often found themselves in conflict with the laws of the land, and in this case the court specifically held that where a person goes forth to practise medicine for gain, for pay, be the method of practice what it may, he must comply with the laws enacted for the protection of the public health. But in this case it was different, and the act complained of appears to have been in keeping with the principle laid down by the chief justice, and was a question of religious belief and prayer,—prayer expected to be recompensed, not in return of worldly pelf, but in the promise of the divine Ruler.

Where this decision is of particular interest to others than the members of the Church of Christ, Scientist, is in that it upholds that constitutional guaranty given every American citizen for the full, free, and unhampered pursuit of his own religious beliefs. This decision is only an accentuation of that many times established law which too often has been attacked by designing persons or through religious jealousies. It tends to clarify an atmosphere which has too often been clouded by these causes, and will prove far reaching in its effect.

✧

[H. R. Colborne in *The Newsletter*, Sydney, New South Wales, Australia]

The quotation in a recent issue shows that at the present time Christian Science is obtaining a hearing and an admission from thoughtful men of the practical utility thereof. To think, however, that there ever has in the past been anything tawdry or vulgar in Christian Science is as unwarranted as to imagine that light and darkness, knowledge and ignorance, can dwell together; for its teaching is the exact opposite, as will be seen from a perusal of Mrs. Eddy's works. If some of the younger and inexperienced students should at times have manifested such characteristics, it is only because they have not attained to a full understanding of its teaching.

In this connection it should be remembered that one of the Master's own immediate disciples betrayed him, another denied him, and they all at a critical moment forsook him and fled, but no one at this date would think of associating the Master's Christianity with treachery, lying, or faithlessness. They all with one exception thereafter, as a result of the lessons learned, went about preaching the gospel of salvation and healing all manner of sickness and disease, and this is what Christian Scientists are doing all over the world; in fact, bringing to it salvation, which on page 593 of the textbook of Christian Science, "Science and Health with Key to the Scriptures," is defined by Mrs. Eddy as "Life, Truth, and Love understood and demonstrated as supreme over all; sin, sickness, and death destroyed."

✧

[Lloyd B. Coate in *Columbus* (Ohio) *Dispatch*]

A speaker in his excellent address on "Pain and Its Significance," makes reference to Christian Scientists, intimating that under the spell of religious zeal they are able to efface the sensation of pain. He also refers to the ancient Stoic, who held that pain, though evil, would be triumphed over by a mind properly disciplined.

Christian Science healing is not the seeming control of matter by the human mind; it is the operation of divine law. Christian Science healing is directly opposed to so-called mental science, to mesmerism, or hypnotism. In Christian Science it is the power of God, or the divine Mind, that heals the sick and reforms the sinner. The more one thoroughly understands the divine Principle taught and practised by Jesus the Christ, the more one is led away from all thought of matter or the human mind as being a healer.

It was not the philosophy of the ancient Stoic, but the understanding of God's all-power that enabled the three Hebrew captives in the fiery furnace to escape unharmed. The understanding of this same divine Principle enables Christian Scientists to subdue pain and overcome sin and disease.

Seekers of the Light

ETHEL M. GOSS

THROUGH light and shadow,
Tears and pain,
Helping each other the heights to gain,
Onward forever,
Working together,
Are those who are striving to follow the gleam.

Always preceding,
Still upward leading,
Sometimes dimly we see the gleam.
When faith burns lower
Our march seems slower,
But courage, dear heart, and follow the gleam.

The path winds upward,
And steep seems the way
Out of self to the light of day;
But our pilgrim band
United will stand,
With gladness and courage to follow the gleam.

Divine Love is strong,
Though the way seems long;
And when at last comes the even-song,
Still through the twilight,
Truth keeps our torch bright,
And guides us till full light replaces the gleam.

Editorial

Healing by Prayer Not a Criminal Act

Bench and Bar, a monthly magazine for lawyers, published in New York City, commenting editorially on the Cole case recently decided by the New York Court of Appeals, calls special attention to the concurring opinion of Chief Judge Bartlett, in which he said: "I concur in Judge Chase's construction of the statute. But I would go farther. I deny the power of the legislature to make it a crime to treat disease by prayer." We quote from this most interesting comment as follows:—

This suggestion raises perhaps the most interesting feature of the case. Can the attempted cure of disease by prayer be constitutionally inhibited? That the treatment of disease so closely concerns the public health as to come within the police power of the state is, of course, too plain for serious argument. The licensing of physicians and surgeons is manifestly a valid police measure. Both operate directly upon the body. The one administers drugs; the other wields the knife. If the doctor knows nothing of the effect of his medicines upon the human body, or the surgeon has no knowledge of anatomy, the results are likely to be disastrous. Knowledge on these points is essential, and the state has a right to require it.

The case of the Christian Scientist is radically different. He does not operate upon the body at all. He even denies its existence. His theory is, that disease originates in the mind, and can be cured only by treatment of the mind; and that even the mental concepts resulting in what is called disease are false and unreal, and can be dispelled by the apprehension of truth. A treatment based upon such theories cannot result in malpractice upon the body; and to a great extent the reasons which necessitate the licensing of the ordinary medical practitioner disappear.

There remains, however, the argument from neglect—that the patient may resort to the Christian Science practitioner, without benefit, whereas his case, if taken in time, might have been cured by more familiar methods. But how could the patient be forced to resort to the established school of medicine? Again the distinction in method is of vital importance. A believer in the use of drugs might resort to some unlicensed quack or harmful nostrum, and receive serious injury. In his case there might have been protection in a law forbidding the quack to practise, or preventing the sale of the nostrum. Christian Science, however, holds out no hope to such a person. His belief that the seat of the disease is in the body, and beyond the control of the mind, would prevent his resorting to it. On the other hand, if the patient did believe in the healing power of mind, and disbelieved in material methods, it is difficult to see how the legislature would protect him by forbidding the Christian Scientist to practise. He could not then resort to such a practitioner, but neither would he apply to the established school of medicine.

The question raised by Chief Judge Bartlett seems to us an interesting one, which is worthy of serious consideration. It will not arise in this state, however, unless the legislature amends the public health law in the particular which came under consideration in the Cole case. Whether or not the amendment might constitutionally be made, the only justification for such legislation is the protection of the public health. If that is not threatened by Christian Science practice, such practice ought not to be forbidden. The legislatures of ten other states, as the opinion in the Cole case shows, have not believed in the existence of any such danger, for the Christian Science church is expressly excepted from the scope of their medical practice acts. This is true in Maine, New Hampshire, Massachusetts, Connecticut, North Carolina, North and South Dakota, Kentucky, Tennessee, and Wisconsin.

Christian Scientists are indebted to *Bench and Bar* for so clearly stating the theory upon which laws have been and are considered necessary for the regulation of the practice of medicine and surgery, and why the practice of Christian Science is not under the same necessity. Notwithstanding the scores of attempts to define by statute the practice of medicine in such a way as to include Christian Science, it is becoming more and more evident to the courts and to the thinking people of the United States that these two systems are in no wise related, and in fact that they have nothing whatever in common except that both are depended upon to heal the sick.

But even on this common ground the difference of method is so great that it only tends to emphasize that Christian Science is not the practice of medicine. One system is solidly material and physical, both in its viewpoint and methods as well as in the agencies which it employs. The other is purely spiritual in both Principle and practice. To one the healing of sick bodies is Alpha and Omega—"the beginning and the end." To the other the healing of sickness is, as Mrs. Eddy writes on page 2 of "Rudimental Divine Science," "the smallest part of Christian Science. It is only the bugle-call to thought and action, in the higher range of infinite goodness. The emphatic purpose of Christian Science is the healing of sin; and this task, sometimes, may be harder than the cure of disease; because, while mortals love to sin, they do not love to be sick."

Even in the use of mental suggestion, to which the medical profession has given some study and for which it has made broad claims, the mind which is exploited is simply the human or mortal mind, and the effect sought to be produced is hypnotic or mesmeric. This is frankly admitted by those who use this method. On the other hand the Mind invoked by the Christian Scientist is that divine Mind which Paul declares was in Christ Jesus. This divine Mind is God Himself, the creator of man and the universe. It is that Mind of which Mrs. Eddy writes, "The perfect Mind sends forth perfection, for God is Mind" (Science and Health, p. 239). It is divine Principle, the source of all true being. It is the Father to whom Christ Jesus prayed, "Not my will, but thine, be done."

Close reasoning proves, in the light of the decision of the highest court of the state of New York, that the law under which Mr. Cole was tried does not purport to confine the healing art to the mere administration of drugs or the practice of surgery. On the contrary, the very words of the statute and the decision which interpreted this statute clearly recognize that healing may be brought about by means which are the direct opposite of these methods—means which are distinctly a part of the religion of citizens of the state, and that these means are lawful. It was clearly the intention of the legislature so to construct the statute as to make impossible the perversion of its meaning which was attempted in the Cole case, and the court in deciding this case as it did simply interpreted the will of the legislature in this regard.

ARCHIBALD MCLELLAN.

✧

Protection in Divine Originality

THE growth of the Christian Science movement has been so wonderful in so many ways that it has sometimes occurred to the onlooker to ask himself what this movement will be like, say, in another quarter of a century. No uninspired mortal can draw the exact outline which the future holds in store for our cause. Apart from its inevitable growth and the conditions prescribed by the Manual of The Mother Church, as well as those necessarily resulting from the teaching and practice of Christian Science itself, nothing can be definitely predicted of our cause itself except its continued originality. Herein lies safety, for if uninspired mortals could foresee the exact outline of this movement, mortal mind might be tempted to plan its destruction, might even now initiate an attempt to efface that outline. Since, however, no uninspired mortal can foreknow God's ways, which are always original, mortal mind itself is powerless to forestall or frustrate His plans. Divine unfoldment is meaningless to that state of mind which desires to overthrow Christian Science.

A study of Mrs. Eddy's career reveals the fact that she did not endeavor to fulfil the expectations of mortal mind, or to follow its methods, but on the other hand constantly surprised and frequently antagonized it. Herein lay her

Digitized by Google

eventual security from the various efforts made to destroy her work both in discovering and founding Christian Science. It may be added, without thereby expressing any criticism of her followers, that Mrs. Eddy rarely acted in a manner which was understood at the time by Christian Scientists themselves. The stamp of divine originality marks every phase of the work which she founded. The Metaphysical College, the Church of Christ, Scientist, and the various provisions for reading-rooms, periodicals, committees on publication, lecturers, teachers, practitioners, etc., all reveal the touch of inimitable uniqueness. Not mortal ingenuity but divine inspiration worked out these plans through a consciousness willing and obedient to take necessary human footsteps under divine impulsion.

The rules and by-laws in the Manual of The Mother Church are thus described in a letter to be found on page 148 of "Miscellaneous Writings": "They were not arbitrary opinions nor dictatorial demands, such as one person might impose on another. They were impelled by a power not one's own, were written at different dates, and as the occasion required." Evidently they were far removed from any theoretical or doctrinaire influence, and we may add, they reveal the touch of woman as well as of man. The Mother Church nourishes and cherishes, and its Manual is therefore designed in the first instance to protect, not to penalize. It is clear, then, that scientific protection does not lie merely in following the line of least resistance, or in a perpetual attempt to smooth things over. In Isaiah we find a rebuke uttered against "a rebellious people, lying children, children that will not hear the law of the Lord: which say . . . to the prophets, Prophesy not unto us right things, speak unto us smooth things." Protection follows the line of obedience, and may sometimes lead temporarily into places humanly conceived of as rough.

A supreme proof of originality is furnished by Mrs. Eddy's writings. They are the necessary expression of the originality of her discovery. This quality, manifested both in the content and in the style of her writings, protects them, for it is obvious to any one who is familiar with them that they could not possibly have been derived from any one else, nor can they ever be successfully plagiarized. Had Mrs. Eddy written "smooth things" to please mortal mind, her work would have lacked the divine protection.

A necessary conclusion drawn from meditating upon the originality which marked the Leader's career, and the nature of her writings, is that the movement which she inaugurated will be protected in proportion as it remains divinely original. Greater protection can no man have than to be original with God.

WILLIAM D. MCCRACKAN.

"Everlasting punishment"

TEACHERS in Christian Science Sunday schools are often asked by their pupils to explain the meaning of "everlasting punishment," when this subject comes up twice a year in the Lesson-Sermon. It goes without saying that both young and old shrink from the thought held by people at large on this subject, which in many instances means a belief that sinners are punished eternally, either in a literal fire or by mental or physical suffering of a terrible sort. Now it is very important that children should not be taught anything which is contrary to our Master's instructions as spiritually explained in our Leader's writings, and Christian Science presents no easy concessions to error, although a good many outsiders suppose this to be the case. The Master himself was responsible for the term "everlasting punishment," but as it appears in the twenty-fifth chapter of Matthew we find in close connection therewith a promise of life eternal, and this does not mean an endless duration of misery but eternal unfoldment of the true consciousness of Life.

The student of Christian Science soon learns that with the true understanding of cause and effect he must constantly keep in view divine reality, proceeding from God and giving eternal life to man as His idea, and at the same time he must remember the words of Scripture, "Whatsoever a man soweth, that shall he also reap." Throughout his whole teaching Christ Jesus showed that not only must we never sow tares in human consciousness ourselves, but that we must never go to sleep and allow the carnal mind to sow them in our consciousness. From the Christian Science viewpoint these tares not only typify the lusts of the flesh and all erroneous tendencies, but they include the belief in diseases of every sort and also the belief in death.

It is too well known that until the revelation of Christian Science came to humanity Christian people were not aware that they were constantly consenting to the sowing of tares as disease beliefs, if not actually participating in moral offenses, quite forgetful of the Master's words, "Every plant, which my heavenly Father hath not planted, shall be rooted up." They would, however, have been greatly surprised to be told that for this reason their sufferings were mainly self-imposed, that in no case did they ever come from God; yet this is what Christian Science affirms, and it is now being understood to a large extent even by those who have not yet accepted all that Christian Science teaches.

Most people would be surprised if in answer to their questions as to whether Christian Scientists believe in everlasting punishment they were told that it was largely a matter of individual choice. To the student of Christian Science it is no longer a question of an uncertain experience in an unknown future, but relates itself to the individual's acceptance or rejection of Truth from day to day. If one fails to understand or to accept the divine law which St. Paul names "the law of the Spirit of life in Christ Jesus," and which he says makes "free from the law of sin and death," he will be under a self-imposed sentence of "everlasting punishment."

Christ Jesus said on one occasion, "Ye will not come to me, that ye might have life," and the failure to do so is followed by suffering and disappointment until the lesson is learned that when we come to God through the understanding of His Christ there is for us no longer either sin or suffering. In one of the tenets of The Mother Church we are told (Science and Health, p. 497) that "the belief in sin is punished so long as the belief lasts." Humanity may well rejoice that the belief that sin has either power or pleasure attached to it is being broken by the understanding of divine Truth.

The one enlightened by spiritual understanding rises above the dreary belief in the everlasting punishment which comes from day to day because of ignorance of divine law or disobedience thereto, and instead finds in the Scriptures the Master's glorious promises of everlasting life, which are echoed by the apostles one after another, and thus one gains new strength and courage each day to lay hold upon all that divine Love so freely provides for us.

ANNIE M. KNOTT.

War Relief Fund

OUR readers will be interested in the following excerpts from letters received from the relief committees in Holland and Switzerland.

"The requests for help have been very numerous in September, and we have spent f.1185 [$459], feeling very grateful to be able to extend a helping hand in so many cases of great

Digitized by Google

difficulties, through the love and unselfish generosity of our friends in America. I wish that all the kind givers could witness the deep gratitude of the suffering ones, when they realize that divine Love is meeting their need and that the brotherhood of men is being demonstrated in Christian Science."

"There has been great need among our people, and much suffering which we were able to lessen. To them it seemed very wonderful that loving hearts three thousand miles away should send bread to their children, wood for their fires, and last but not least, words of comfort, of hope, —of Truth and Love. They are so ready to listen; to hear about a loving Father who is able to meet every human need, to whom they can turn without doubt or misgiving; a Father near at hand, unchangeable, bestowing all good upon His children. And when they are taught our way of thinking and working with God, they are so grateful for the light which has flooded their consciousness, that they have joyfully joined our ranks with hearts overflowing with gratitude to those who, led by divine Love, have bestowed so many blessings.

"Two years of war all around us, and no immediate prospect of peace—if it were not for the generous help vouchsafed by The Mother Church the future would look black indeed to many; but now, with the understanding which they have gained through their study of Christian Science, they look forward, unafraid, knowing that 'with God all things are possible.' His angels will whisper their need to the loving hearts so far away, and until they can once more walk alone, a helping hand will be outstretched to them."

Among the Churches

Current Notes

SPOKANE, WASH.—The distribution work at this place has shown a steady growth in the past year. During the months of June, July, and August the following literature was given out: 1871 *Sentinels*, 258 *Journals*, 56 *Heralds*, 7930 *Monitors*, and 42 pamphlets. The *Journals* have also been placed on sale at the news stands on the Northern Pacific Railway at Billings, Butte, Helena, and Missoula, Montana; also in Spokane. There are a number of free subscriptions for city and county jails, county infirmary, state penitentiary, state asylum, fire stations, rest-rooms at department stores, high school, and the Y. M. C. A.—*Correspondence.*

ST. PETERSBURG, FLA.—First Church of Christ, Scientist, has acquired by purchase the property and building known as the Auditorium, the price being ten thousand dollars. The church has been holding its services there since last fall. As this is a city to which tourists come in large numbers during the winter season, and as the Scientists feel that Truth cannot be cramped or limited in any way, the securing of a new church home was taken up with the result given above.—*Correspondence.*

MIDDLETOWN, N. Y.—The Christian Science Societies of Port Jervis and Middletown, and First Church of Christ, Scientist, of Newburgh, united in maintaining a tent for the purpose of distributing Christian Science literature at the Orange County agricultural fair, Aug. 22-25. There were 270 *Sentinels*, 30 *Journals*, 315 *Monitors*, 2 *Quarterlies*, 136 pamphlets given away, a total of 753 pieces. This was the first time a church had ever undertaken work of this kind here, and the innovation was well received.—*Correspondence.*

The Lectures

Cordova, Alaska

A lecture on Christian Science, under the auspices of the Christian Science Society of Juneau, was delivered by Prof. Hermann S. Hering at the Empress Theater, which was filled to its capacity. Judge E. F. Medley, who introduced the lecturer, said:—

About the time "Looking Backward" was written, a woman, Mrs. Eddy, was teaching along new lines of religious thought, looking at the Bible with a fresher vision than the older theologians, and spreading the gospel of healing through right thinking and right living. To the ordinary person of that time Mrs. Eddy and her book "Science and Health with Key to the Scriptures" were far more visionary than Edward Bellamy and his "Looking Backward." Yet within a few short years Christian Science as taught by Mrs. Eddy has become a living, vital force to over a million people in the United States alone, while we are almost as far away as ever from the wonderful things which Bellamy predicted.

I am not a Christian Scientist, nor can I pretend to speak with authority upon the subject. Rather should I be numbered among the large majority of our citizens who, while essentially fair minded, have not, from a variety of reasons, sufficiently examined Christian Science either to accept it or to reject it. But we all must admit the remarkable progress the teachings of Mrs. Eddy have made, as shown by the spread of Christian Science all over the world. New things are looked upon askance by most of us. We are essentially conservative and prone to criticize those with courage enough to enunciate new truths; yet if what they speak is the truth, in the end they must prevail. Christ Jesus was crucified because he was looked upon as a radical by the people of his day. Lincoln won a martyr's crown because of his heroic espousal of abolition. Yet today slavery is an abomination in the minds of us all, and Christianity has revolutionized the world.

Who knows but what in time Mrs. Eddy will be equally well accepted as one of the great benefactors of the human race through the banishment of sickness and sin by her teachings? In any event, the fact that a great mass of the thinking and intelligent people of our own race are already following the path she blazed, should at least lead us to grant the advocates of Christian Science a respectful and impartial hearing. Jesus said, "He that believeth on me, the works that I do shall he do also." This is a simple statement and easily understood. Christ Jesus healed the sick and even brought the dead to life. With the force of his example before us we should all listen with earnestness and attention to the gentleman who will address us this afternoon on Christian Science.—*Cordova Times.*

Laconia, N. H.

Mayor George P. Munsey, cashier of the People's National Bank, in introducing William W. Porter, who lectured on Christian Science, said:—

I do not come before you as an advocate of Christian Science, neither do I appear as an opponent of this belief, for my own lack of experience and information along this line would prevent me from either accepting or rejecting its teachings. I can see no reason, however, for serious differences between us, for as the drowning man is not interested in the exact manner of life saving so long as results are obtained, so I have no quarrel with any man over his religion if by it he is accomplishing the great end of making men better. I know very little of the teachings of Christian Science,

Digitized by Google

but I have seen evidence of much good emanating from this source; and when we realize that a few short years ago there was not a Christian Science church in existence, that there were but few believers, and that the teaching was confined to a small portion of New England, whereas now there are hundreds of churches, thousands of believers, and the creed is known in every country on God's green earth, we are compelled to admit that Christian Science has had a wonderful and apparently healthy growth and demands that we give the matter most serious thought and consideration.

To the inexperienced many of the claims of Christian Science seem impossible; but if it can, as some one has said, turn life's bitterness into sweetness, evil tendencies into purity of thought and speech, hate and anger into good will and love, and bring men and women into one broad, universal brotherhood of love, then such religion under whatever name compels our admiration. In these eventful days when nation is arrayed against nation, when labor and capital are in serious conflict and the business world is going at a pace never before known, we need a religion that will guide us as we approach the many problems of life,—a religion that will offer a helping hand, teach us how to live, and give to us a message of hope.—*Correspondence.*

Chicago, Ill.

In introducing Clarence C. Eaton, who lectured on Christian Science at First Church of Christ, Scientist, Milton B. Marks said:—

One of the most important discoveries awaiting the investigator of Christian Science is that the spiritual meaning of the Scriptures heals the sick. The theology of Jesus heals the sick and destroys sin in every age. His work was done in demonstration of God's unerring law,—the only real and eternal Science. In relating the circumstances attending her discovery of the operation of this scientific law, our revered Leader, Mrs. Eddy, writes in "Retrospection and Introspection" (p. 25), "I named it *Christian*, because it is compassionate, helpful, and spiritual." The world is coming to an appreciation of the fact that the name given to Mrs. Eddy's discovery—Christian Science—was divinely wise and fitting.—*Correspondence.*

Lectures to be Delivered

[By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.]

CALIFORNIA—Eureka: William R. Rathvon, Church Edifice, Eleventh and H Streets, 2 p.m., Dec. 3.
Santa Ana: William R. Rathvon, Grand Opera House, Fourth and Bush Streets, 8 p.m., Nov. 25.
CHINA—Shanghai: Clarence W. Chadwick, 9 p.m., Jan. ——.
ENGLAND—Liverpool: John Sidney Braithwaite, St. George's Hall (Concert Room), 3 p.m., Dec. 17.
London (First Church): John Sidney Braithwaite, Church Edifice, Sloane Terrace, S.W., 3 p.m., Dec. 14.

Testimonies of Healing

It is with a heart filled with gratitude and an earnest wish that my experience may help some one in a like condition, that I send this testimony of healing through Christian Science. From childhood I had never been well, and every spring and fall brought a siege of illness confining me to bed for several weeks.

About four years ago I was taken very ill and my people got the best medical aid which their means permitted. All the doctors pronounced the trouble tubercular disease and said they could do nothing for me; that if I were taken to New Mexico, providing I stood the trip there, my life might be prolonged six months. I had several severe hemorrhages, and one night after the worst hemorrhage of all, when so weak I could hardly raise myself in bed, my husband's mother asked me to try Christian Science. I knew nothing of this teaching and neither did my people, but she told me several things about it and at last I decided to try it, thinking it at least could make me no worse than I was then. Treatment was begun, and at the end of a week I was up and had no return of the hemorrhages; at the end of the second week all traces of the disease were gone and it has never returned.

Since then I have been helped through several illnesses, and lately have been able to lift myself, through my small understanding, out of severe attacks of fear, lack, and discouragement. For three years after my healing I studied little, but the kind and encouraging talk of a friend who is an earnest worker in Christian Science, when I so sorely needed her comforting words, firmly convinced me that I needed Christian Science more than all else. I am now earnestly striving to know God's allness, and in our present seeming want and lack to know that ample supply was meant for me, and that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

I am deeply thankful to God, and grateful to our dear Leader, who has been enabled by her sincere and earnest work to teach us to know God as Life, Truth, and Love.

HAZEL LYON, Los Angeles, Cal.

I vouch for the accuracy of all the statements in my wife's testimony. I also wish to state that I have been helped through Christian Science. I thank God, and feel deep gratitude to Mrs. Eddy for her untiring efforts to benefit humanity by showing the way to find their divine heritage.

ROBERT E. LYON.

✧

In August, 1909, my family physician, after two years of constant attention, told me I was in a very critical state, owing to a complication of diseases and ten different ailments for which he could not give me medicine on account of the condition of my stomach and heart. For nine months I had been on a rigid diet. My friends thought it time to get other advice, so I went to a specialist connected with one of our best hospitals. He corroborated all the family physician had said, and told me I had a disease which he could only hope to alleviate, as there was no cure for it. When asked the cause of such a disease, he said neither the cause nor the cure had ever been found by the medical faculty. The next specialist consulted said he could not give me any encouragement, and told the one who had sent me to him that I could not possibly live until the holidays. To make a long story short, I was given up as incurable by five able physicians of this city and plainly told there was no chance of recovery.

All my life I had had more or less trouble with my heart, fainting often, regardless of place or circumstance, and for about twenty years had suffered from intestinal disorder. For more than two years I had not slept four hours out of the twenty-four, and then for such short periods that it was hard to tell if I slept at all. My suffering was so intense that at night I prayed for morning and at morning for night. Nothing could be given me to produce sleep, owing to the heart trouble.

I had promised a friend who had been healed in Christian Science that if the fifth specialist gave me up I would let her introduce me to a practitioner, so in April, 1910, she did so. I expected nothing from Christian Science, but I wish it were possible to describe the love and patience with which the practitioner treated me. I was a nervous and physical wreck, without hope or faith in anything, and had fully determined to end it all after that visit to her; but after the first treatment I slept so well that we could hardly believe it. When the heart trouble went I do not know, but it just seemed to vanish, and the intestinal trouble went with it, as well as chronic bronchitis. Since coming into Science I have fainted only once, and that was through an accident. The disease which was said to be incurable was very stubborn, but finally yielded on New Year's day, 1915.

Since I came into Science many serious ailments have had to be overcome, among them acute lung trouble and hemorrhage of the lungs and the kidneys. They have all been healed with Christian Science treatment, for no doctor has been consulted since the first week of April, 1910, nor have any material remedies been used.

I have not words to express my gratitude to all those who have been kind to me in Science, and I can only hope to show my gratitude to our dear Master and to Mrs. Eddy by trying to follow their teachings.

ELIZABETH F. COLEMAN, New York, N. Y.

✧

Most testimonies enumerate the blessings derived from Christian Science from a physical standpoint, but while I have received unlimited good in a physical way, I am more grateful for the healing of mental distress. For several years previous to taking up Science I had been an invalid, but with the help of friends was able to eliminate most of the thought that I classified as limitations, and at first was quite happy. I soon became discontented, however, and allowed myself to think of what others could do, and what I could not do, until I had reached a point of such discouragement and self-condemnation that I was planning to put an end to everything. Then the message of Truth and Love came to me, assuring me that I had a right to be, and I gained a glimpse of what it means to be a child of God.

For almost eight years now I have been following that glorious light and have daily proved that God's kingdom "is come" (Science and Health, p. 16) and perfect harmony can be experienced here and now. All that I am and ever can be I owe to Christian Science, which has revealed a perfect God and perfect man as the basis of all our work. I am glad we have a Leader who has reflected so much of God that we may all see the light.—J. OSBORN BRINK, Laporte, Ind.

✧

I wish to express my gratitude for what Christian Science has done for me and mine. It has been our only physician for the past fifteen years, during which time we have had many beautiful demonstrations.

I had been suffering from rheumatism for some time, but was completely healed in one week through Christian Science treatment. After a year and a half my youngest child was taken with severe cramps during the night, and as my hus-

Digitized by Google

band was not then interested in Christian Science he went to call a physician. While he was gone I repeated the "scientific statement of being" (Science and Health, p. 468) and tried to declare the truth the best I knew how. As a result, when he returned with the physician the child was calm and asleep. As soon as daylight came I called on a Christian Science practitioner and had her help us destroy fear. The baby never had any return of this trouble. The same child was healed of a throat disease which had seemed to affect her every winter.

Several years later my four children, then quite young, were taken with scarlet fever, but with the aid of a practitioner they were healed of this ailment in a very short time. Whooping-cough, sprained ankle, bladder trouble, extreme nervousness, and other ills have likewise been overcome. My husband has been cured of weak eyes, chronic stomach trouble, and bowel disorder.

My family join me in expressing gratitude to Mrs. Eddy and to all the dear friends who have helped us to an understanding of this beautiful truth. We have found that Christian Science is not only a curative but a preventive agency and that the truth can be applied not alone for physical but for financial troubles. We are grateful for the physical healing, but much more for the spiritual uplift which has come to us through the study and application of Christian Science.—Anna M. Edmonds, Milwaukee, Wis.

✧

Following an experience which was the source of unspeakable mental anguish and sorrow as well as great physical suffering, I underwent a series of illnesses, surgical operations, and the like, until it seemed that I had run the gamut of the ills to which flesh is heir. The climax seemed to be reached in April, 1910, when I lay for days in what was supposed to be death's stupor, as the result of an acute attack of peritonitis. A specialist was summoned, and after consultation with the attending physician announced that the end was at hand.

At eleven o'clock at night the minister whose church I had attended was called. While those about thought me in a state of coma, yet I knew when the minister came into the room and why he was there. A great hope surged up within me and I thought, "Now here is one who will understand how to pray, and he will pray for me to get well." But imagine my disappointment as he prayed for comfort for the sorrowing husband and mother, and that my sins might be forgiven and my soul saved in heaven. He was, in fact, entirely resigned to the thought that I must die. In that moment rebellion swept over me, and I knew that this man's understanding of God was incorrect. I no longer wanted to live because of the sweetness of life, but that I might search out the meaning of life and be of service. To the surprise of the doctors and nurse, morning brought a slight change for the better, which continued slowly for two weeks, during which time no medicine was taken and no tangible help rendered. At the end of this time I was able to be taken by my mother to her home in another state. There I lay in a state of apathy and weakness, yet reaching out with hungry heart for peace and satisfaction.

I knew nothing of Christian Science, having known but one Christian Scientist in my life, but one morning I recalled the remark of a friend that I might be helped by it. Immediately I took up the telephone and called the first Christian Science practitioner listed in the directory. I at first insisted that he must call at my home, but after a little I promised to go to his office the next afternoon. It was only with a supreme effort that I made the trip, accompanied by my sister, and this helplessness was extremely humiliating, though I now understand it was a great rebuke to personal pride, as I had always been remarked for my strength and endurance.

Words fail me here, for how can I explain to those who have not had a similar experience the change which that treatment brought. The kindly sympathy and tender patience of the practitioner struck a responsive chord in my consciousness, and during the silent treatment an ineffable peace and joy and hope seemed to blossom in my waiting heart like a great white flower, and strength, the result of trust in an omnipotent God, encompassed me round about like a rich mantle. The surprise of my sister as I walked into the reception room with body erect, face aglow, and eyes alight, well-nigh amounted to fright. Indeed I had been on the mount and seen the vision,—the glorious revelation of God as infinite divine Mind, and of man as an idea of that Mind,—and understood something of what Paul meant when he said, "For in him we live, and move, and have our being." The reasonableness of the statement that being is immutable and harmonious, since God is without variableness or shadow of turning, appealed to me instantly as the truth.

In the six years which have followed I have known what it means to have life more abundant; that is, to have a larger measure of right and true thinking. My heart goes out in gratitude to Mrs. Eddy, who through unflinching faithfulness to her mission was enabled to put her discovery into such form that all who diligently seek may find. I am so grateful for the change in disposition which has followed the physical healing, a quick temper giving place to greater sweetness and unselfishness. More than all else I am grateful for the trust and confidence in the supremacy of good and the ultimate overcoming of evil,—for that perfect ideal of the perfect man which in this age has rekindled for countless thousands "the kindly light of hope."

Mrs. Merle Scott Reder, Forest Grove, Ore.

✧

I first became acquainted with Christian Science in Kalgoorlie, Western Australia, six years ago; and I have been studying it progressively ever since. My object in writing a testimony is to give expression to the gratitude I feel for the help that has come to my family and to myself through this teaching.

One evening in January, 1914, our second son, aged six, became very ill and was put to bed. He was delirious, but his mother noticed that from time to time he would break off from the delirium to repeat the prayers he had learned at the Christian Science Sunday school. The next morning he was quite well and was running about with the other children. My wife had told me that she supposed the boy was coming down with a so-called acute infectious disease, since he had the symptoms, but as he was well next morning she thought she had been mistaken. Three weeks later we noticed that he was talking in a very peculiar manner, and I decided to ask for a treatment from a Christian Science practitioner. As I was informed on the following day that the child was suffering from the after effects of the disease referred to, it was necessary, in order to conform to the health regulations of the district, to call in a medical officer. The doctor examined my son and stated that he certainly had had diphtheria and was now suffering from paralysis of the soft palate, and he was surprised that the heart had not been affected. He ordered my family into isolation until a bacteriological examination was made and the Government analyst certified a negative result from his investigation, when the quarantine was removed.

The Christian Science practitioner went on with the treatment, and in three or four weeks the boy was talking nor-

Digitized by Google

mally again. This was over two and a half years ago, and the child has been perfectly healthy ever since. I wish to draw attention to the fact that from what he learned at Sunday school he was able to go himself straight to the divine Principle of all healing.

My study of Christian Science has been of the greatest help to me during the last two years. It is six years since I tasted medicine, and I have been able through my slight understanding of Science to overcome such ills as dysentery, influenza, and deafness due to the shock of gun explosion. One morning I was in charge of a trench when it was being closely attacked, and a bomb fell amongst five of us. I covered it with a blanket, and as I was putting a filled sand-bag on top of the blanket the explosion occurred. This thought came very clearly: "There shall no evil befall thee." We were very busy in the trench until afternoon, when the attack died away and I was relieved. Although I had been awake all night, I could not go to sleep in my dugout until I had read through the whole of the Lesson-Sermon. I slept about an hour and when I woke I saw that the knee of my trousers was torn, so decided to visit the dressing station to see if I was wounded. I was surprised when the doctor found a hole in my knee down to the bone. A splinter of the bomb had gone in and out without my feeling it. I was sent away because I might get a stiff knee; but I knew I would not. The wound healed in two days and I was back to work in three weeks, after enjoying a rest in a convalescent home, where I put in much time reading and studying.

I have been fortunate in always getting a regular supply of literature. The *Monitor*, *Journal*, and *Sentinel* have always followed me wherever I have been sent, and have been much appreciated both by myself and by friends to whom I have handed them. I am grateful for the discovery of Christian Science, and to the Discoverer, Mrs. Eddy. I feel it a privilege to be a member of The Mother Church.

J. Boyd Aarons, Major, London, England.

⟡

It is with a heart full of gratitude that I give this testimony of the numerous benefits that have accrued to me and mine since gaining an understanding of the healing truth as revealed in Christian Science. The first awakening came some eight years ago, at a time when there seemed nothing left to do but endure as best I could the sickness, inharmony, unhappiness, and trouble which apparently engulfed me.

Although in a wretched state of health myself, still it was for our little girl that Christian Science treatment was first tried. At this time she was a baby less than two years of age and suffering from a serious bowel difficulty. After exhausting every other means of help, we decided to try Christian Science, although we had no faith in it; in fact I was ashamed of what I thought it to be, but I am happy to say that it proved to be so entirely different from my conception that I was deeply grateful for being led to investigate it.

Since then our little family have in an ever increasing measure relied upon Christian Science to meet all our needs, and we have not found it wanting. In addition to the ailment already referred to this same child has been healed of measles, croup, small-pox, and numerous minor ills. All of this, however, is not so wonderful as the transformation that has taken place in her disposition. As for myself I have been changed from an emaciated woman with scarcely a sound organ in my body to one of robust health. I am perforce grateful for these physical benefits, but rejoice more in the spiritual uplift that has come to me, and for the consciousness of the ever-presence and omnipotence of divine Love, God, who is ever ready to guide our feet in paths of peace and loving-kindness.

Previous to taking up the study of Christian Science I had never known of a religion that satisfied the reason. Although in the first efforts to comprehend Christian Science there was found a great deal which did not coincide with earlier training and instruction, nevertheless it was discerned that the logic was correct, therefore the former beliefs could not be true. In this way many false conceptions have been replaced by a demonstrable knowledge of the real and true status of man.

I am thankful to God that I am learning how to exchange disagreeable experiences for heavenly ones, also grateful to our revered Leader, Mrs. Eddy, that she through self-denial, purity, and spiritual discernment has shown us how to make the exchange.—Maxie Dona Scoffern, Kansas City, Mo.

I can verify the testimony given by my wife, and wish to add that I have found Christian Science a great benefit in the business world as well as a very present help in all other circumstances.—R. C. Scoffern.

⟡

I wish to express my gratitude for the many blessings that have come to me through Christian Science, and for the healing and understanding of this truth, which is an ever present help. Some years ago I met with an accident while hanging a heavy picture. I was standing on a step-ladder and fell to the floor. When I landed I was unable to move, so my two daughters picked me up and placed me on a couch. I told them to sing a Christian Science hymn, so that I could hear the words and know the truth until I was able to treat myself.

Within an hour I was up and pretty well able to be about the work. This was on Thursday evening. Sunday morning I did not know whether it would be possible for me to go to church, as the ligaments of one leg seemed to be out of place and I could not bear my weight on the foot. I however kept on declaring the truth and left the result with God. I went to church and got along finely, and from that hour the foot was all right, although it was weak for about two weeks.

Nine years ago my husband lost his business, home, and everything we possessed. At first my pride was very much hurt; then the final blow came in the loss of my husband. I could not see why all this should come to me when I was trying to be a good wife and mother and was giving most of my time to the study of Christian Science, but I learned another lesson. I had to know there was nothing lost; that God was my Father and my all, the source of all supply,—and it certainly has been proven to me. Blessings came from all sides, and whenever there was a call from the field or church, or anywhere else, I was always able to give my portion.

I am indeed thankful to God for the many blessings my family and I have received, and grateful to Mrs. Eddy for the wonderful book, "Science and Health with Key to the Scriptures," that is showing us how to demonstrate the truth.

Mary Hass, Chicago, Ill.

⟡

For many weary years I was a sufferer from nervous trouble. Mentally I was in great agony, as pain in the head was so intense at times that I feared my reason would leave me. Many eminent physicians all over the United States were consulted, but none of them helped me. I oftentimes prayed that God would send me to a good physician. That prayer was answered, and if I had not rejected Christian Science the first time it came to me I would be two years ahead. With what understanding I now have of this teaching I have become mentally, physically, and spiritually a better man.

Healing and understanding came slowly, and at times I was much discouraged, but the practitioner assured me that these

Digitized by Google

blessings would come; and so they have. I have found the great Physician, "who healeth all thy diseases," and for this I am thankful to God, as well as grateful to that gentle woman, Mrs. Eddy, and to all who have helped me from darkness to light.—GOTTHARDT B. OERTEL, Seattle, Wash.

✧

[Translated from the French]

Since we have been acquainted with the teachings of Christian Science I have had opportunity to appreciate the benefits accruing from their study and to experience the power which comes with the realization of the truth. Last year, while on a journey, our little boy during the night began to cough, and to breathe with so much difficulty that a great effort was required on my part to banish all fear, as I was apprehensive that it might be a serious trouble. Having regained my calm, I was able with the help of my husband to realize that the trouble was no part of reality and therefore had no power over God's child, and opening Science and Health I read and reread the "scientific statement of being" (p. 468). The child went to sleep, and great was my gratitude to God when about six o'clock in the morning he took some milk without difficulty. When we arrived in Geneva at nine o'clock, the child did not show the slightest trace of a bad night.

For a good many years I was subject to attacks of rheumatism and used many drugs. When recently the ailment returned, and as a result of a rather severe attack two fingers of the right hand became paralyzed, the pain completely disappeared within two days through the affirmation of the power of Truth.

A splendid demonstration, for which I am most grateful, is one experienced a month ago at the birth of a little girl. During the whole period of gestation I felt well, thanks to the understanding of the Principle of Christian Science which I was able to apply daily. One morning at half past six, as I felt somewhat distressed, we telephoned to the Christian Science practitioner, asking her to lend me her assistance, and at quarter past seven, that is three quarters of an hour later, the baby had arrived and I was as well as if nothing had occurred, and happy to have had once more the proof that God is an ever present help in moments of difficulty. The midwife who attended me declared that during her long professional activity she had never witnessed so harmonious a case, and while she is not a Christian Scientist and has no understanding of it, she can but pay tribute to so convincing a proof.

It is with a deep sense of gratitude to God, and also to our revered Leader, Mrs. Eddy, who through her marvelous teachings has reopened to us the way of true spiritual comprehension, that I submit this testimony.

EMMA SPIEGEL, Geneva, Switzerland.

✧

I am very grateful for Christian Science, not alone for the spiritual healing but for the understanding about God. I know I have found something that no one can take from me, and that neither things past nor things to come can separate me from God. My only prayer is that not my will but God's will may be done, and that I may prove worthy to be called a Christian Scientist. Since I came into Science three years ago, headache, sore feet and hands, colds, and many other discordant conditions have left me. Pride has been overcome, and through Christian Science I have learned to love more. My health is better now than it ever was. I am grateful to Mrs. Eddy for giving to the world the understanding of this beautiful truth which makes men free.

CARLA M. EDLER, Highland Park, Ill.

From Our Exchanges

[T. Rhondda Williams in *The Christian World*]

Christians have often spoken of the apostolic age as if the apostles had succeeded in adapting themselves to every age, so that their creeds and forms and institutions must be the model for all time. The apostles never made such pretensions as have since been made for them. Paul exhorted the Christians of his day to adapt themselves to the age in which they were living. Christians of every age must do the same. As the times change we can follow Paul's principles at times only by departing from his practices.

If by clinging to the form of an apostolic institution or to apostolic opinions we get out of touch with the mind of our time and fail to reach our people, we are not buying up our opportunity. If the needs of our age require a different kind of service from that which other ages required, it is only by being prepared to render the service now that we can do our duty. In order to do this we must take account of the prevailing modes of thought in our time and its prevailing methods of life, and we must learn the language of our age. Some old forms of service are dropping out simply because the age no longer needs them, and because it does need the old religious spirit to incarnate itself in other forms of service. The main reason why so much of the modern world is outside the Christian churches today is because it feels that the churches belong so much to a world that has passed away. A clear and candid recognition of this is the first condition of advance.

[Rev. E. S. Woods in *The Christian*]

It remains tolerably clear that Jesus Christ did intend faith in himself to be a force which should remold society, and it is also clear that the early Christians found their faith to produce in large measure precisely that practical result. This, unless I am mistaken, is the line along which we may look, and ought to look, for a real advance. History has shown, unmistakably though fitfully, something of what the faith of Christ can do in and through isolated individuals, men or women, who go all lengths for him. It is for the future to unfold what infinitely more wonderful things that same faith will do when it once dominates men generally, in every part of their living together, when it establishes itself at the very heart of the common life of the community, the nation, the world.

[*The Methodist Recorder*]

The church of the future will be composed of members whose religion is the dynamic of their ethics. "Feeling good" will not be sufficient; "doing good" will be the criterion of membership. The power of the church will not rest on priestly authority or tradition, nor will its foundations lie on formal creeds and long inherited opinions. Its influence will be felt by the might of its "saved-to-serve" members, and the logic of their lives will be irresistible. We shall see Christianity in its essence as the spirit of heavenly Love binding human society together in a brotherhood of service; or as the writer of the Hebrews epistle says, "He taketh away the first, that he may establish the second." If it be He that destroys and establishes, have we any cause for fear?

[Rev. H. Maldwyn Hughes, D.D., in *The Methodist Times*]

The truth is not that the decline of spiritual life is due to worldliness, but that worldliness is due to the decline of the spiritual life. We shall overcome the spirit of the world not by expanding the ten commandments into a hundred and by legislating as to pursuits and pleasures that in themselves

Digitized by Google

are neither moral nor immoral, but by deepening the spiritual life. When the heart is full of Christ we learn the right use of "the world," and we possess all things without being possessed of them.

[*The Continent*]

An ambition to advance in place, recognition, and prestige works its way into the inner shrines of the life where, in a true minister, no thought belongs except the passion to honor God and help men. Many and many a pastor who is troubled to know why he is not succeeding better, ought to look for the answer right here: He is not succeeding because he cares too much for success. If the world of spiritual fact is not real enough to a man for him to depend literally on the promise of Christ that when he seeks the kingdom of heaven all needful things shall be added to him, the ministry is certainly not the place for him.

[*The Watchman-Examiner*]

It is to our shame that our religion has dropped out of our every day speech. Men usually talk most freely about the things in which they are most interested. Lack of interest, however, is not the only reason why men are silent about their religion. They have a notion that to talk about religion would make them appear to be either pharisaical or sanctimonious. They dread also to obtrude their religious views for fear of giving offense or wounding the feelings of somebody. Perhaps we may sum it all up by saying that in polite circles it is not considered "good form" to talk about anything so strictly personal as religion.

[Pres. Carl G. Doney in *Pacific Christian Advocate*]

Moses had a pattern shown him in the mount; and all men have a pattern shown them in Christ. He is greatest and best who takes into his life the perfect interpreter, guide, and inspirer. He who follows the lead of God sees a burning light which does not delude or grow dim. Ruled by whim or fancy, life loses its glory and inspiration, but he who follows heaven's gleam has the secret of everlasting satisfaction and success. He never stagnates: he sees and believes in the unattained possibility beyond.

[*The Biblical World*]

The kingdom of God will not come because men in orthodox fashion say, Lord, Lord; but because they do their Lord's will, teach men to be as sane as their Lord's ideals, and manfully endeavor to have every piece of legislation, every foreign policy, every industrial program governed by their Lord's example of love and sacrifice. Some idealism may be a mere apotheosis of selfishness; the idealism of the teaching of Jesus is the apotheosis of love. For God is love.

[Prof. John Wright Buckham, D.D., in *The Homiletic Review*]

The "great awaking" is having its effect upon the conscience of the church in summoning her, with a voice too clear to be mistaken, to the long deferred duty of unity. The war has plainly registered the failure either of Christianity or of the church—which? The church knows, and knows well, that one of the chief reasons of her world shame has been her shameless, selfish disunion.

[*The Christian Work*]

Surely to be generous means to give of self without so much as a thought of exacting a return either in feeling or kind. Yet how many of us are really capable of such giving? Deep down in our hearts lies the expectation of return. Generosity is, we repeat, a word badly knocked about.

Special Announcements

From the Publisher of Mrs. Eddy's Works

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—For styles of bindings and prices see back cover of this periodical.

A NEW CONCORDANCE.—The publication is announced of a Concordance to Mrs. Eddy's published writings other than Science and Health.

The new volume has been compiled with the same comprehensive care and is issued in uniform style with the Concordance to Science and Health. It contains 1103 pages, and is published only in the Oxford India Bible paper edition, with stiff morocco covers. The thumb index will not be used in this Concordance, as it is to be discontinued in future editions of the Concordance to Science and Health. Prices: Single copy $6.00; in lots of six or more to one address, each $5.50.

Announcement is made of the publication of a German translation of the Manual of The Mother Church. The volume is uniform in size, style, and price with the regular cloth-bound edition, and the publisher is now prepared to fill orders. Single copy $1.00; six or more to one address, each 75 cents.

Orders for the books named above and other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

From the Editor

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

From the Publishing Society

As the advertising pages of the *Journal* and *Herold* go to press the 20th of the month, to insure publication in a desired number requests for changes in a church or practitioner's card should reach the Publishing Society at least six weeks previous to the actual date of issue.

"Law and Work," one of the pamphlets recently issued by the Publishing Society, is now printed in the New York point system, and the American Braille system of type for the use of the blind. For convenience in reading, the pamphlet has been printed in two volumes, and may be purchased at the following prices: Single copy (in two parts), prepaid, $1.00; six or more copies, prepaid to one address, each 75 cents. When ordering please specify whether the New York point or the American Braille system is desired. Arrangements have also been made to issue this pamphlet in the English Braille system, and copies will be on sale at a later date.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church, should be sent to J. V. DITTEMORE, Clerk, Suite 550, 236 Huntington Avenue, Boston, Mass.

From the Church Treasurer

The annual per capita tax of members of The Mother Church is due June 1, but may be paid at any time during the year. The per capita tax of members uniting in November is reckoned from the preceding June, this being the beginning of the church year. Unless otherwise directed by the sender, the full amount of each remittance will be credited for the current year.

Please remit by postal or express money order, bank draft, or check. Currency should be sent by registered letter only.

Please advise promptly of any change in name or address.

Send per capita taxes and contributions to ADAM H. DICKEY, Treasurer, Suite 500, 236 Huntington Avenue, Boston, Mass.

The Christian Science Journal

Published Monthly

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, editorials, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, one year $2; six months $1; three months 50 cents. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 15 cents. For Canada add 25 cents for postage. SALE PRICE: Single copy 20 cents; four or more copies to one address, each 17 cents. In all other countries add 65 cents for postage for each annual subscription. SALE PRICE: Single copy 25 cents; four or more copies to one address, each 20 cents.

BOUND VOLUMES: Current and past year, cloth $3.00; half calf or half morocco $3.75. On earlier volumes write for prices.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, one year 50 cents; single copy 15 cents; four copies or more to one address, each 12½ cents. In all other countries one year 60 cents; single copy 18 cents; four copies or more, each 15 cents.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

The Christian Science Monitor

Published Daily, Except Sundays and Legal Holidays

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for publication in the columns of the MONITOR should be addressed: Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, one year $5; six months $2.50. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. Quantity rates will be furnished on application.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also as a supplement the Lesson-Sermons of the following month which are read at the Sunday services in all the Christian Science churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, one year $1; six months 50 cents; three months 25 cents. In all other countries, one year $1.25; six months 63 cents; three months 32 cents.

SALE PRICE, DOMESTIC TERRITORY AND CANADA, POSTPAID: Single copy 10 cents; four or more copies to one address, each 8 cents. Foreign rate, single copy 12 cents; four or more copies to one address, each 10 cents.

Bound Volumes in cloth, $2.75 each; half calf or half morocco $3.50 each. Write for list of volumes in stock.

Works on Christian Science

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Text-book

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only text-book on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book) single copy $6.00; twelve or more, each $5.75.

LARGE TYPE EDITION. Designed especially for the use of first readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 10¾ inches long by 8 inches wide. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

GERMAN TRANSLATION. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include both English and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 364 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1,103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each, $5.50.

Christ and Christmas. An illustrated poem. Single copy $3.00; six or more, each $2.50.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Cloth, single copy $1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

Unity of Good. This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy $1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point system of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

Christian Science *versus* Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address only, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings, as given under these titles in this price list.*

Address all orders for above works, and make remittance by New York or Boston draft or money order, to

Items of Interest

President Wilson has signed the national park service bill, and the sixteen national parks of the United States will in the future be administered under one management. The chairman of the conservation department of the General Federation of Women's Clubs says: "Our national parks are of little use to us unless they are developed with roads and trails, and provided with hotel accommodations so that the people may visit them. This will be the work of the national park service. Provision is to be made for people of all degrees of income. Those who require luxurious quarters will find them; and those who enjoy simple camp life and want to keep their vacation expenses down to a small figure will find the opportunity to do so, and still see just as much of the parks as the more luxurious traveler."

The Chicago, Milwaukee & St. Paul Railway has just added 110 miles to its electrically operated lines in Montana. This section extends from Deer Lodge to Alberton, Mont., and is the third unit to be changed from steam to electricity, bringing the electrified mileage up to 336. The 226 miles of railroad between Harlowton and Deer Lodge were put under electric operation some months ago. Work on the fourth and last unit between Alberton, Mont., and Avery, Idaho, is being completed, and when that is ready, about the first of the year, the St. Paul will have 440 miles of electric line in operation, reaching an elevation in the Rocky Mountains of 6350 feet above sea level, in the Bitter Root Mountains of 4200 feet, and in the Belt Mountains of 5768 feet.

The Rhone Canal, which will be open to navigation within a few years, will connect Marseilles, France, with the Rhone River. The first section of the canal places Marseilles in direct communication with the Etang de Berre, a small lake. The second section connects the Etang de Berre with Port de Bouc, a small seaport town. From this point the canal proceeds in a northerly direction and joins the Rhone River at Arles. When the canal is completed, barges of 600 tons will be able to penetrate for a distance of 335.5 miles into the interior of France. Barges of lesser tonnage may continue northward to Paris, Havre, and the British Channel.

Two years ago the Kansas State Prison and the Kansas Agricultural College began an experimental course of correspondence for the men confined in prison. Over two hundred prisoners are now enrolled, and the prison is fitting up a vocational school where the prisoners can work out the problems presented through the correspondence study. Until this year none of the women prisoners was enrolled in the correspondence work. The agricultural college is now at work on a course of study in home economics which will be made available for the women prisoners about the first of the year.

Bulgaria devotes to rose culture about twenty thousand acres, on which are grown about eight billion roses. A one acre garden under favorable conditions produces about twenty-five hundred pounds of roses, from which ten to fifteen ounces of attar of rose may be distilled. The total production of the attar varies with the seasons, but it averages 175,000 ounces. The rose fields are on the southern slopes of the Balkan Mountains, the rose district being 80 miles in length, 30 miles in width, with an average height above sea level of 1300 feet.

The export article of greatest importance to Hankow, China, is tea, which was exported in 1915 to the value of $17,917,665. Next in importance are cow hides, which were exported to the quantity of 30,931,400 pounds. Next in rank, according to value in 1915, are raw cotton, sesame seed, nut and wood oil, peanuts, bean cake, beans, pig iron, vegetable tallow, antimony, ramie, miscellaneous silk products, prepared tobacco, and bristles—each valued at more than one million dollars.

The area under rubber cultivation in Madras Presidency, India, is 12,922 acres, and the number of trees is estimated at 1,636,476. The only other rubber producing regions in India are Assam, with 4681 acres and 137,430 trees, and Burma, with 29,544 acres and 4,911,399 trees. The yield of the Assam plantations is relatively small. The outturn in Madras in 1913 was more than double that of Burma, where most of the trees being less than six years old were still unproductive.

In Rio de Janeiro recently a good roads congress was held under the auspices of the Brazilian Automobile Club. There are relatively few highways in this vast republic, and until now no attempt has been made at anything like a continuous system of highways of interstate character. Transportation throughout the interior is consequently costly, and this is a serious obstacle to the development of the country in many ways.

The President of Panama has recently submitted to the National Assembly seven codes of laws that have been carefully prepared by a commission especially appointed for the purpose which has been working on this task for the last three years, and these codes have been approved and will take effect on and after Jan. 1, 1917. These codes relate to civil, penal, commercial, judicial, administrative, fiscal, and mining law.

The great barrage scheme of the Rand Water Board proposes to dam the Vaal River in southern Africa at a point about twenty-five miles below Vereeniging. The cost is at present estimated at £750,000, but it is probable that a scheme designed ultimately to impound 20,000,000 gallons of water and to pump 10,000,000 gallons to the Rand will involve a much larger expenditure.

The Texas peanut crop, now being harvested, will yield about twenty-one million bushels. The area planted is 350,000 acres. Each acre also produces a ton of peanut hay, now bringing twelve dollars a ton. The price for peanuts ranges from eighty cents to one dollar a bushel. This season's crop will bring Texas farmers $24,000,000.

The President of Peru has issued a decree directing the minister of fomento to organize a service of industrial statistics of the republic. By this decree all the industrial establishments of the country are obliged to furnish the minister with such data as he may desire. The information so collected will be published annually by the Government.

Ten thousand bituminous coal miners in the Fairmont region of Virginia were officially notified on Nov. 1 that their wages had been advanced 10 per cent. The new scale was decided upon at a meeting of the Central West Virginia Coal Operators' Association, and was without solicitation on the part of the miners.

Since gold was discovered in the Auckland province, New Zealand, in 1852 there has been exported from that district gold to the value of $116,796,000. Great progress has been made since the introduction of the cyanide process in 1906, when it became possible to work the lower grade ores and tailings at a profit.

More than two thirds of the world's supply of tin is mined in the Malay Peninsula. Straits tin, as it is known in the trade, is of exceptionally good quality. The total exportation of tin from Malaya for 1915 was valued at $17,991,042.

At the United States mint at Philadelphia, Pa., in October, the total number of coins turned out was 45,231,413, or more than one fourth the coinage for any of the past five years, the yearly output having averaged around one hundred and fifty million pieces.

The area under sugar in British Guiana in 1915 was 73,108 acres, thirty-seven estates manufacturing it, and the total production was above 120,000 tons, of which 116,224 tons were exported. The local consumption of sugar is about 6000 tons.

On July 28, 1916, all clocks in Greece were set forward twenty-five to thirty minutes, depending upon the difference between mean local time and astronomically correct time at Athens. This brings Greece within the zone of eastern European time.

A plan has been broached to have the entire New Orleans-Houston Highway bordered by palm trees the entire distance between the two cities,—some 400 miles.

The amount of coal produced in Bengal and Bihar and Orissa, India, in 1915 was 15,086,816 tons. For the whole of British India the production was 16,352,480 tons.

The law which provides for the construction of port works at Antofagasta, Chile, was promulgated Sept. 8. The cost is limited to £1,700,000 sterling.

For the nine months ended Sept. 30, 1916, the total value of the exports of pottery from the United Kingdom was $9,473,800.

The French customs returns of exports of silk goods during the first half of 1916 give the total value as 210,966,000 francs.

Jamaica's foreign trade in 1915 reached a total value of $22,172,374.

Scientific Affirmation

CLARENCE W. CHADWICK

ALL scientific mental work is based upon spiritual understanding, which at once separates such work from anything that may seem to be accomplished upon the plane of human suggestion or will-power. An affirmation of spiritual truth must of necessity come through a mentality permeated with the spirit even more than with the letter of truth. The student of Christian Science learns from the very start that argument alone does not heal, and that he must possess the spirit and the love of good if he would accomplish anything in Christian Science; for, as our Leader says (Science and Health, p. 454), "the letter and mental argument are only human auxiliaries to aid in bringing thought into accord with the spirit of Truth and Love, which heals the sick and the sinner."

There is therefore a legitimate use which can be made of the letter of Christian Science, but to formulate a treatment or to make use of any argument calculated to bring about anything of a purely selfish nature would mean inevitable defeat. It would be the perversion of Christian Science practice or right mental treatment. It would be human suggestion rather than scientific affirmation. The user of literal statements of truth must have within himself some degree of understanding of the divine Principle which makes such statements true, else they fall short of being scientific affirmations. They cannot be powerful, positive, and exact unless supported mentally by some degree of comprehension of the true nature of God and man.

One who believes in two powers could not make any practical use of scientific statements. His use of such statements would be confined to the realm of human will-power. If he believes in the reality of evil, he would have no moral right to declare that God is All. Until he can acknowledge with Christlike humility that because God is infinite good there is and can be no evil, he is not divinely authorized or empowered to declare any scientific fact of being. Affirmations of the truth will transform men into saints only as they learn to subjugate the human will and to attest by thought and act that ever present good precludes the power and presence of evil. If they continue to affirm the supremacy of good but fail to live in conformity to their profession, their use of the letter of Christian Science will certainly make mental nuisances of them, to say the least.

It is no strange thing that students of Christian Science should sometimes be criticized for seeming to cover up evil. The too frequent use of absolute statements of truth, which deny the real existence of evil without furnishing any proof of evil's unreality, lays them open to this very criticism. Right at this point we should pause to ascertain whether we are making practical scientific affirmations of truth, or whether we are mentally experimenting with the letter of Science as a chemist might with certain material elements. The heart must be right if we would go forward in the ennobling strife. We cannot deceive the divine Principle of all righteousness, but we shall deceive ourselves if we believe that mere intellectuality can appropriate and demonstrate the facts of divine Science.

When the Christian Scientist affirms that God is Love, he knows that the one and only thing which will make this a scientific statement with power to bless himself or any one else, is a deep seated love for his fellow man, coupled with an honest, sincere desire to express this love at all times and under all circumstances. It must become an axiomatic truth in the hearts of humanity that Love operates only through channels of love, before the letter of Science can be rightfully employed for the benefit of mankind and instantaneous healing become the rule rather than the exception. Let not a carping, complaining, and unmerciful mentality imagine for one moment that it is employing the weapons of divine Science in its own defense or for the protection of others.

The sword of Truth cannot be wielded by a tyrant, but only by a kind, loving, considerate, and compassionate mentality, pure and undefiled in the sight of God. The Master said, "Blessed are the pure in heart: for they shall see God." Unless one is seeing good scientifically, he is not in possession of any demonstrable knowledge of Christian metaphysics. Because an evil mentality can quote Scripture to further its own selfish ends, this is no proof that it is either scientific or Christian in its attitude toward God. One could repeat Science and Health from beginning to end and yet not have a spiritually scientific realization of truth unless his heart is right in the sight of God.

The sacred word of God is expressed in demonstration. It is said of Jesus that "his word was with power." So must our affirmations of truth be before we can be called scientific Christians. It is no uncommon occurrence for healing to take place in the Christian Science church, because its readers are rising in consciousness to the zenith of spiritual understanding, or the holiness "without which no man shall see the Lord." They are doing something more than reading from an intellectual or elocutionary standpoint,—they are declaring the truth; in other words, they are voicing the word with power.

Let no mortal be in the least discouraged because of the high standard which Christian Science sets for him, but let him in all meekness, humility, and love begin to meditate upon those things which make for righteousness, and he will soon feel the touch of that ever present influence for good which is destined to purify human consciousness until it can affirm the scientific facts of being with power and authority from on high. He who sees the truth in the smallest degree, and is ready to consecrate himself to the great task of overcoming evil with good, will find that it is God who worketh with him "both to will and to do of his good pleasure." He will be modest in his presentation of spiritual truth, striving always to let the spirit of Truth and Love find expression in his consciousness. If he persists in correcting a corporeal or material sense of life in order to gain an incorporeal or spiritual sense of existence, he will learn, in response to the declaration voiced by the psalmist, to open his mouth wide for Truth to fill it with scientific affirmations of the power, presence, and reality of good.

Let us not say that "all is Mind" (Science and Health, p. 492) if we believe in the reality of matter; let us not say that God is Love if we believe in any opposite to Love; let us not say that God is Life if we believe in death; let us not say that God is divine Principle if we believe in and practise any phase of dishonesty, and all the while imagine that we are voicing the truth to the world. But let us rather ponder these words of our Leader on page 149 of Science and Health: "We need to understand the affirmations of divine Science, dismiss superstition, and demonstrate truth according to Christ."

Thought Testing

HORTENSE W. LEWIS

THE study of qualitative and quantitative analysis in chemistry requires much time and thought on the part of the would-be chemist. He must become proficient in these branches of this science if he is ever to know the quality and amount of the various ingredients forming any material substance. In chemistry all analysis is based on the belief that matter has existence, form, action, law, power, attraction, and force,—that there is material causation.

The Christian Scientist, having learned that all is Mind and the expression or revelation of Mind, concludes that Mind, God, and His ideas are all that have reality and existence. He finds that cause being Mind, the effect must be mental; he also learns that it is thinking which counts, and so forthwith he begins to watch, to test his thinking. Then the important questions are no longer, What have I eaten or drunk? How long have I slept? but, What am I thinking? Am I thinking in accord with that which is divine, spiritual, and eternal, or am I believing that which is mortal, material, and temporal? To watch one's thinking, to test his thinking, then, becomes the first duty of the Christian Scientist.

If we are to test our thinking, there must be a fixed, unchanging, unvarying, perfect standard of thinking. That standard is to think in accordance with God's thought, to express the qualities and attributes of divine Mind. The reproach given through the prophet Isaiah, "My thoughts are not your thoughts, neither are your ways my ways, saith the Lord," should no longer characterize our thinking and doing. Rather should we one and all heed the command, "Let the wicked forsake his way, and the unrighteous man his thoughts." We shall thus maintain man's likeness to and inseparability from Spirit, Soul, express that which is correct, true, intelligent, and thereby represent aright the divine consciousness.

Through the study of the Bible and Mrs. Eddy's writings we acquaint ourselves with the truth about divine Mind and its manifestation, and learn to recognize the qualities of all that is godlike and spiritual. We are taught that man as God's likeness is the expression of Life, the manifestation of Love, which is ever impartial and just; that he expresses the intelligence of the all-knowing Mind, which is never deluded or deceived; and that he utilizes the power and dominion of omnipotent Mind.

Since true thinking, righteousness, divine thinking, is our standard and aim, let us note some of the characteristics of Truth. Truth never has changed, never can change, never will change, for Truth is eternal. Truth can be explained and understood by humanity; but error, the opposite of Truth,—a lie,—can never be understood or demonstrated. Truth is always beneficial and harmless. Truth is universal, impartial, just, unprejudiced; is no respecter of time, place, person, nation, sex, or creed. Truth always liberates, enlightens, and frees from bondage. To use the words of St. Paul, Truth casts down "imaginations, and every high thing that exalteth itself against the knowledge of God," and brings "into captivity every thought to the obedience of Christ." In Science and Health (p. 130) Mrs. Eddy says, "Truth should not seem so surprising and unnatural as error, and error should not seem so real as truth." Truth is omnipotent, and always annuls the so-called material laws and conditions.

The Bible records proof after proof of the supremacy of the spiritual fact over material fiction. For our reassurance and for encouragement in our thought testing, we can read in the Bible many instances of the overcoming of the so-called law of gravitation; likewise of the so-called law of combustion; also of the so-called law of molecular attraction; and of the asserted laws of *materia medica*. Innumerable instances of the extinction of error by Truth could be given from the Bible, and to these could be added the testimonies in our Wednesday evening meetings and those published in our periodicals. In the recognition of the fact that Spirit is divine substance, and that matter is the lie about substance; that law is the will of divine Mind made manifest, and that so-called material laws counterfeit God's laws, we have the true basis for our thinking, and we are accepting the standard of the patriarchs and prophets, of Jesus, of Paul, and of Christian Science.

These words by our Leader, Mrs. Eddy, found on page 3 of "Pulpit and Press," are full of inspiration and encouragement to us all in our thought testing: "Know, then, that you possess sovereign power to think and act rightly, and that nothing can dispossess you of this heritage and trespass on Love."

✧

Our Literature

EDWARD G. WRIGHT

QUITE often we say to ourselves that if we could only remember everything we read what wonderful knowledge we would possess; but does it ever occur to us that perhaps we have been trying to remember the wrong things, or the non-essentials, instead of sifting the chaff of mortal, finite sense from the wheat of spiritual truth? Mrs. Eddy says (Science and Health, p. 312), "How true it is that whatever is learned through material sense must be lost because such so-called knowledge is reversed by the spiritual facts of being in Science." Do we sometimes find ourselves trying to remember a particular sentence or word in order that we may be able to quote it at some future time, giving more attention to the words than to the thought which is contained in the article, and in this way missing the kernel which is underneath the husk? In other words, are we seeking life in matter when we ought to know that "it is the spirit that quickeneth," and that the mere letter "profiteth nothing"?

The seeker after truth in Christian Science would do well to apply the words of Paul to the reading of its literature, as well as to the practice of its teachings. "We look," he says, "not at the things which are seen, but at the things which are not seen: for the things which are seen are temporal; but the things which are not seen are eternal." Keeping this thought in mind let us read, if possible, Christian Science literature with the sole purpose of obtaining the spiritual facts, for by gaining these facts we are acquiring a knowledge which cannot be reversed.

As we thus read we begin to realize and understand the wonderful truths which are being disclosed to us, truths which previously were hard for us to understand because their meaning seemed to be hidden. We thus advance spir-

Digitized by Google

itually, mentally, and physically, and begin to experience for ourselves the great truth of being,—that God is Spirit, and that man is His image and likeness.

In reading our literature we are sometimes prone to select those articles which interest us and to pass by those which make no appeal, thinking, perhaps, that at some future time we will become interested in what we formerly laid aside. This habit is apt to grow if we are not awake to the subtlety of it. We should be careful not to allow an article to go unread for this reason, since it is possible to become interested at any time if we overcome the habit of reading carelessly, that is, if we master the subject rather than let it master us. In other words, we should read every article as though we had written it ourselves, and were going over it again to see if we had expressed the thought in the clearest manner. In this way we are more likely to get the spirit of it.

Christian Scientists are, and rightly should be, enthusiastic when they speak of their publications as world benefactors; and those whose articles appear in them are not actuated by anything less than the desire to spread truth and to elevate human consciousness to an understanding of the allness of good and the nothingness of evil. We need all the publications, because each serves a separate and distinct purpose in the cause of Christian Science, as can be observed from a careful study of them and by reading our Leader's messages pertaining to their issuance.

From the Prospectus of the *Journal*, the first of Mrs. Eddy's publications, and in fact the first periodical ever issued which circulated a current literature that healed, we have the following extract: "Dear reader, the purpose of our paper is the desire of our heart, namely, to bring to many a household hearth health, happiness, and increased power to be good, and to do good." These purposes and desires are being fulfilled every day, for one has only to read the testimonies given to realize what a wonderful blessing this message of truth has been to mankind. With the continual growth of the cause, however, came the need of reaching its increasing number of students more quickly, and Mrs. Eddy met this need by publishing what is now known as the *Christian Science Sentinel*.

The following is taken from the Salutatory which appeared in the first issue of *The Christian Science Weekly*, afterward called the *Sentinel*. "The growing necessities of the situation seem to demand, at times, a speedier means of communication with the field than our monthly *Journal* affords. . . . Then, too, our files contain many communications in the nature of experiences, testimonies, and dissertations which, for want of space in the *Journal*, must often be indefinitely laid aside or entirely withheld from publication, and which are too valuable and helpful to meet such a fate. . . . Let it not be inferred, however, that the *Weekly* is to take the place of the *Journal*. Not so. . . . The *Weekly* will be but a convenient, and, we trust and believe, an invaluable adjunct to the *Journal;* a friend and colaborer, as it were. . . . The *Journal* will be the mother publication; the *Weekly* its child."

Ten years after the founding of the *Sentinel*, and twenty-five years after Mrs. Eddy began to publish the *Journal*, a daily newspaper was established, *The Christian Science Monitor*. This paper was instituted by Mrs. Eddy's direction, for it was one of her earliest desires that Christian Scientists throughout the world should have a daily newspaper which would be entirely free from all sensationalism, and it has been proven by the *Monitor's* success that clean journalism is not merely an ideal in newspaper work, but that it is a practical fact. The world has always needed a daily paper of this character, but was not ready for it until the way had been prepared by the *Journal* and *Sentinel*, and also by the influence for good which the teaching and practice of Christian Science was spreading throughout the whole world. The *Monitor* is the only daily international newspaper in the world, and is read by people of every class, regardless of their religion, for it embodies everything which may be desired by the reading public, not only in its clean and unbiased information but in the truthfulness and purity of the advertising which it prints.

The leading editorial in the first issue of the *Monitor* was written by Mrs. Eddy, an extract of which is found in "The First Church of Christ, Scientist, and Miscellany" (p. 353). It reads: "I have given the name to all the Christian Science periodicals. The first was *The Christian Science Journal*, designed to put on record the divine Science of Truth; the second I entitled *Sentinel*, intended to hold guard over Truth, Life, and Love; the third, *Der Herold der Christian Science*, to proclaim the universal activity and availability of Truth; the next I named *Monitor*, to spread undivided the Science that operates unspent. The object of the *Monitor* is to injure no man, but to bless all mankind."

Because we are able to demonstrate only what we understand, it is therefore necessary that we gain more of this understanding of infinite Mind, in order that our demonstrations may be more frequent and complete. To do this we should devote all the time we can possibly give to the study of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and to the reading of the literature furnished us by The Christian Science Publishing Society. By so doing we are acquiring a spiritual knowledge, the understanding of God, the divine Principle, which leads unto eternal life. In the book of Proverbs we read, "Wisdom is the principal thing; therefore get wisdom: and with all thy getting get understanding."

✧

Our Text-book

HENRIETTA MARCUS

ONE of the marvels of Mrs. Eddy's writings is the way our attention is held by her interpretation of certain words and expressions unnoticed by us before. Our imagination is stirred, our interest aroused, by the spirituality of her thought; the mists of mortal opinion that formerly obscured the brightness of the Bible have been cleared away effectually, and a new vista is opened to us. It is like gazing for the first time through a telescope and realizing the presence of distant and beautiful stars of whose existence we were unconscious,—something new is revealed to us which increases our knowledge of good. All that stimulates our desire for a better comprehension of God is as the rending of the veil of the temple, the brushing aside of mere ritual, which gains for us a glimpse of reality. Beyond the truth of the statements and the logic of the arguments in Science and Health, is added the charm of following to its source many a stream of living water, the clue to which has been indicated but not followed out in detail by Mrs. Eddy.

The value of literature is in proportion to the moral and mental stimulation that its study sets up in the thought of the reader. The best work is that which awakes in the student the dormant appreciation of truth and beauty, and the most invaluable of all writing is that which offers a logical explanation as to why our acts should always be on the side of good. Can any book compete with Science and Health on one or all of these points? Not one. We all know that gleams of truth flash out from the writings of many a genius; but in no book, except "Science and Health with Key to the Scriptures," can be found the constant, unwavering consecration of effort to explain and elucidate the simplest of all

Digitized by Google

statements, and yet, for practical use, the most difficult of theories,—that God is All-in-all. It is only through the study of our text-book that the greatest book in the world, the Bible, is made comprehensible to us. The surest sign of the connection of the Bible with Science and Health is the undoubted fact that only through this book can we rightly appreciate the Scriptures; and, conversely, only through their study do we gain a better understanding of Science and Health.

In studying a particular word, or group of words, in the Christian Science text-book one cannot but be astounded at the original method employed in its composition. One sees that an opportunity is offered to each student to work out the application of its teaching to various problems from his own mental standpoint, and yet at the same time the subject is enclosed within safe boundaries, for however lightly Mrs. Eddy may touch upon a theme it is nevertheless always used in connection with a definition of the unity of the divine nature. One can clearly see how innumerable are the applications of each word used in Science and Health and yet how impossible it is to falsify or misinterpret its use. For students of Christian Science the chief value of words lies in their metaphysical significance, and it is not merely of interest but highly important to interpret them aright and reveal the thought which they embody, like the miner who brings to the light the gold which lies hidden till sought for.

Truth in its entirety, however, is never discovered by human sense; a portion only is revealed at a time, and it is this fact which allows of the countless interpretations of words used by Mrs. Eddy. They are chosen by her as symbols of an idea, and they cannot possibly be confused with the idea itself, which remains apart, eternal and unlimited. If we take up Science and Health and look up all the references to any important noun, it will be found that the single reference is always a confirmation of the unvarying statements in Christian Science as to the reality of good and the unreality of evil, and the combined references form a detailed argument of the same statement. There is no other book in the world, one would imagine, in which the reiteration of a certain postulate is made in so many ways with such force and such originality, and yet withal so clearly that the whole of the book when viewed as a statement can be found in a sentence, while the whole volume merely expresses with greater precision and amplification the simple declarations made in each chapter, page, and paragraph.

Most of us know the exquisitely carved Chinese ivories which when closely examined reveal an inner carving, smaller but equal in beauty to the outer shell; and wonder of wonders, within that is another carving and yet another, each conformed to the other and yet separate and complete in itself. So in Science and Health each chapter, page, and sentence forms in itself a statement of the premise on which the book is written. The paragraph amplifies the statement of the sentence, and the page that of the paragraph, while each chapter though distinct in its theme links itself to the others, and the whole book reiterates the theme of the component parts. Thus also one can refer to a particular word and find that it is always used in consonance with the main argument on which the book is founded.

Christ Jesus said, "There is nothing covered, that shall not be revealed; neither hid, that shall not be known." Since words are but a vehicle for thought, the highest interpretation of them is necessary when they are used to convey a spiritual message to the human understanding. The great bridge of words reaches across the centuries, linking up the thought of the past with the present and spanning the ever flowing river of doubt and fear. The only value of this bridge consists in its strength to resist the force of the turbulent waters rushing underneath, so that the highest inspiration to man can come direct to us across its path, untouched by the swirling tide of mortal thought below. In traveling over level country one has at times, unconsciously, a feeling that after all the earth must be flat; but the sight of the curved horizon appeals to reason and dominates the material supposition that falsity can be real. Mrs. Eddy in her writings never lets us lose sight of the mental horizon, and if we are faithful students we shall keep our gaze fixed on this reality, God, and man in His image and likeness, which alone can render null and void the evidence of the senses.

Christian Science Teaching

KENNETH B. ELLIMAN

WHILE Christian Science makes its appeal to intelligent thought, the pride and self-satisfaction of the human intellect rob it of teachableness; and since Christian Science is not humanly intellectual, but spiritual, it can be understood only through spiritual sense. On the other hand, dogmatism is the attempt of the human mind to formulate its own conceptions, and these may be stated intellectually and accepted intellectually. An individual's conception of Christian Science may also be formulated and stated intellectually, but it then becomes a finite conception. Intellect defines; spiritual sense unfolds.

Some readers of our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, object to what they call its vagueness and lack of formulation. Some have even claimed that they could write a clearer statement. But Science and Health needs to be understood spiritually; its teaching appeals not to the human sense of intellect, but to spiritual understanding, and he who persists in reading it with open mind and sincere desire to apprehend the truth, will find the spiritual understanding of God, man, and the universe gradually unfolding in his own thought.

Thus Christian Science is seen to be a revelation, not a dogmatic statement or mere human system; and since each individual may gain an understanding of his own, direct from divine Mind, he does not need to depend upon another's theology or formulation of truth. Through his study of the Scriptural truth as interpreted in Science and Health, his spiritual sense is roused to activity and he gains his own understanding. Instead of having to rely on another person's statement or proof for authority, he has his own inward conviction or intuition of what is true, and can prove its truth by testing it in his daily life and experience. Since one's own experience includes all he really knows,—all else being believed or accepted on faith,—the student of Christian Science who demonstrates the verity of his understanding has the strongest possible evidence of its correctness.

Some statements of Science and Health (p. 330), such as God is "the only Life," or "God is Mind," may seem dogmatic, but on analysis they prove to be infinite, not finite, and they can be understood differently by each student according to the stage of his progress; therefore they do not limit one. Instead, they serve to guide the student and to point him in the right direction, without depriving him of the benefit of working out his problem for himself.

The human mind wants to bind and limit everything; and to this end the human intellect formulates statements of what it conceives to be true,—as much as to say, "Thus far and no farther,"—and mankind likes lazily to accept these formulas and systems. The purpose of Spirit, however, and the method of spiritual sense, is not to limit or bind, but to

Digitized by Google

liberate; and Science and Health, when understood by the individual, does just this. It needs no interpreter but spiritual sense, and the student should accept no other.

Lesson from a Tree

ABBY BEECHER ABBOTT

WHEN the home was built twenty-five years ago a shapely sycamore was planted, and each year added to its beauty and matchless dignity. The tree became a part of the home. Its proud owner, a true lover of trees, watched its growth and gloried in the fact that he had the finest tree in the neighborhood. The birds flew to the tallest branches and sang their morning carols. During the heat of the day the children played beneath its sheltering boughs, and late in the afternoon its grateful shade protected the home from the hot summer sun. It was vigorous, useful, and beautiful.

Then the day came when the fact dawned on the tree lover that this beautiful, useful tree was nevertheless keeping the sunlight from his much loved flower garden. To consult a tree expert seemed the wise course to pursue, but the verdict was a trying one: "All the lower limbs must come off." To sacrifice this beauty was a severe ordeal, but it must be done to let in the light. One by one the branches fell under the hand of the skilful pruner, until the tree stood more shapely and beautiful than ever with its lofty branches lifted to the sky. Now the sunlight could shed its radiance over the flowers which were being dwarfed by the constant shade.

On page 84 of "Miscellaneous Writings" Mrs. Eddy says, "A true sense of the falsity of material joys and sorrows, pleasures and pains, takes them away, and teaches Life's lessons aright," and out of this experience I gained a valuable lesson. Our earth life appears like the tree—beautiful, vigorous, and glowing with growing interests and sweet delights. Our higher thoughts reach heavenward; our earth thoughts ever hide the all-encompassing light which forever sheds its radiance and is only hidden for a time by our material desires and pleasures. The call for the vision of more light reaches the heart of the earnest seeker. Our "inner guide," the expert of all true living, soon reveals to us what must be cut away in order to bring that glowing radiance into our lives. Worldly ambition, the lust of the flesh, the pride of life, and all unworthy desires must be severely dealt with to let the light of God's presence bring to fruitage the flowers of spirituality so long hidden by materialism. Then our lives, grander and nobler than before, reach ever toward the light, testifying to the victory of Spirit. No sacrifice can be called too great which reveals the sunlight of Truth and Love to a sin-darkened world. I have learned many a lesson from the book of nature, which reveals not the knowledge of Solomon but the wisdom of the gentle Nazarene.

[Written for the *Sentinel*]

The Pleasant Land

W. EDSON SMITH

"LOVE never faileth": Up—around—
Our joyous thoughts are winging,
With Love pervading every song,
Love smiling at their singing.

"Love never faileth": We too smile,—
Clasp hands and go our way,—
Each springtime but a little while
Beyond November's gray.

Selected Articles

[Judge Clifford P. Smith in *Morristown* (N. J.) *Jerseyman*]

The attack on Christian Science by a Newark preacher which was printed in the *Jerseyman* was so mistaken as to be an imposition on the public. The writer's bias was betrayed by the manner in which he referred to Mrs. Eddy. For instance, he spoke of her as the "much be-married Mrs. Eddy." Such an expression constitutes what Jesus called "the leaven of the Pharisees." It does not explicitly state a derogatory fact, but it is calculated to convey a derogatory impression by insinuation.

Mrs. Eddy was married three times in eighty-nine years. Her first marriage occurred when she was twenty-two years old, but it was ended within six months by her husband's decease. Her second marriage took place nearly ten years later, when she was thirty-two years old. It was dissolved twenty years afterward by a divorce which she obtained for long continued desertion caused by her husband's adultery. Her third marriage occurred four years later, when she was fifty-six years old, and it was followed after five years by twenty-eight years of widowhood, which continued to the end of her earthly life. The facts are such, therefore, that Mrs. Eddy's marriages furnish no reason for criticism nor excuse for insinuation.

The same assailant also said that Christian Scientists put Mrs. Eddy before Christ, and he offered as proof the alleged fact that Christ is not given credit for his words over the pulpit of The Mother Church in Boston, while quotations from Mrs. Eddy are "blazoned" with her name. Christian Scientists do not put Mrs. Eddy before Jesus or Christ; they could not do this without rejecting her teaching. The quotations on the walls of The Mother Church have the names of the persons quoted immediately under their words. The quotations over the pulpit or readers' platform are from St. Paul and Mrs. Eddy. At the sides of this platform and above it are two quotations, one credited to Christ Jesus, the other to Mrs. Eddy. All these quotations and names are cut in gray stone, not artificially colored, and the names are cut in the same sized letters as the quotations. The condition of thought which would make a visitor see these quotations with one name omitted and the other blazoned is not conducive to just or fair criticism.

It is almost usual for clerical opponents of Christian Science to claim, for one reason or another, to be specially qualified to speak against it. This gentleman's claim was that he lived for ten years in India and could speak as an authority on Hinduism. Thus equipped, he tried to identify Christian Science with Hinduism and to produce the impression that the latter, hence the former, is very bad and dangerous. His first and main specification was that both Hinduism and Christian Science teach that God is all. He neglected to say that this is also taught by the New Testament. The following citations are pertinent: Acts xvii. 28; I Cor. xv. 28; Eph. iv. 6; Col. i. 17; Heb. xi. 3; Rev. iv. 11. The proposition that God is All-in-all is understood by Christian Scientists to mean "one God and His creation, and no reality in aught else" (Christian Science *versus* Pantheism, p. 9). The beginning of this teaching is to be found, not in Hinduism, but in the Hebrew Scriptures. It can be found in the first chapter of Genesis (thirty-first verse), the twenty-ninth chapter of I Chronicles (eleventh verse), and elsewhere in the Old Testament.

Two other contentions of the same critic may be disposed of in this connection. One was that Christian Science teaches or permits its adherents to ignore the difference between good and evil. The other was that its denial of evil dispenses

Digitized by Google

with the need of a Saviour. These are fables that could not survive a fair minded reading of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, a book which any one may examine for himself by going to a public library. It would be as just to say that Jesus ignored the difference between good and evil and dispensed with the need of salvation by asking, "Which of you convinceth me of sin?" The viewpoint from which he spoke is that of Christian Science.

Continuing his attack, the gentleman in question declared that Christian Science "emphasizes the motherhood of God in Mother Eddy." Here is more of the leaven of the Pharisees. Christian Scientists do not speak of their Leader as Mother Eddy, nor do any of her friends. It should be evident, however, to all thoughtful people, or at least to all who believe in one creator, that the infinite One must possess completely all the attributes of being. Unless the Deity is Mother as well as Father, men and women considered together would possess more mental and spiritual qualities than their creator. Unless God is Father and Mother, Paul should have said, In Him we men, but not women, live and move and have our being.

Not constrained to be consistent, the gentleman in question also charged Christian Scientists with regarding themselves as God and with praying to themselves accordingly. There is no decent pretext for this canard. Whether Hindus do this or not is another question. However this may be, Christian Science teaches specifically that "man is not God, and God is not man" (Science and Health, p. 480), and Christian Scientists not only pray to God but try to make their lives a constant prayer.

The final thrust was as follows: "Since God is all, to the Christian Scientist as to the Hindu, there is no personal God." Now, Christian Science teaches that God, though not like a human being, is personal in the highest and best sense of this term, and that He is the infinite Person. This religion also teaches that God is personal to each of His children in that sense which Jesus implied when he spoke of Him as "my Father, and your Father; . . . my God, and your God." In short, to quote from Mrs. Eddy, "human philosophy has made God manlike. Christian Science makes man Godlike" (Science and Health, p. 269).

The Scriptures declare, "The wrath of man shall praise thee: the remainder of wrath shalt thou restrain." An attack on Christian Science may praise God and bless men by inducing them to learn what this religion actually teaches and what it does for its adherents. Sooner or later its present adversaries will seek its benefits. Meanwhile there is food for thought in the fact that it was not the chief priests but the common people who heard Jesus gladly.

[Editorial in *Brooklyn* (N. Y.) *Eagle*]

The court of appeals has ordered a new trial for Willis Vernon Cole, accused of "practising medicine without a license." As the court of last resort throws out all the supposed theories of law on which Cole was convicted, this means victory in the state of New York for the Christian Scientists. So long as they are following the tenets of their religion they may cure people by prayer if they can, and take money for the praying. Of course, it is a laughable travesty on "prompt justice," a desideratum emphasized ever since the Magna Charta, to the more than four years taken up with the settlement of this issue by the courts.

Nobody is compelled to go to a Christian Scientist. The principle of *caveat emptor* governs. If you choose to spend your cash for prayers, that is your affair. The Scientist does not do anything that aggravates the complaint; he does not administer drugs; and even though failing to cure, he may give mental comfort that is worth all it costs.

The decision is that the "religious tenets" exception in the statute covers Christian Science, and that healing people without a license is not a *malum in se*, under the common law. Chief Justice Bartlett went further than the majority of the court. He said, "I deny the power of the legislature to make it a crime to treat disease by prayer." Certainly the trend of sentiment, even among those who are not Christian Scientists, is toward the Bartlett view. There is a growing resentment of the notion that medical men and their medicine are sacrosanct.

It is the duty, the immanent obligation, of physicians of high character to wipe out some impressions if they can, and the way to do it is to stop worrying over the fees paid to Christian Scientists or other persons rendering psychological rather than physical relief, and give more attention to the division of fees between family doctor and surgeon, and like scandals within the profession. If dishonesty is stopped among its own members, the medical society's existence is fully justified.

[Hector Wallace Smith in *The Mearns* (Scotland) *Leader*]

A speaker is reported to have said that although there was a little truth in Christian Science he did not wholly believe in it. What I wish to point out is that Christian Science is the Science of the Christ and is nothing else than the restoration to humanity today of primitive Christianity as it was practised by Jesus, the apostles, and the early Christians for nearly three hundred years after the time of our Lord. The Authorized Version of the Bible, and "Science and Health with Key to the Scriptures" by Mrs. Eddy, are the two text-books of Christian Science. On page 341 of the latter book the author says: "In Christian Science mere opinion is valueless. Proof is essential to a due estimate of this subject." It is therefore evident that one can only speak with authority upon this subject after he has obtained the necessary proof of the truth of the teachings of Christian Science. Without such essential proof any statements upon the subject are usually made more or less at random, and are therefore unreliable and rather apt to mislead the general public. The saying of the apostle James that "faith without works is dead" is full of significance in these times.

[Thorwald Siegfried in *Wenatchee* (Wash.) *World*]

A correspondent recently attempted to connect Christian Science with Buddhism. Judging from the tone of the letter, he had satisfied himself that Christian Science and Buddhism have much in common, but I am certain that no person who has made the teaching of Christian Science his own sufficiently to heal sin and sickness by purely spiritual means will agree with him. This and similar charges have been made against Christian Science by persons of varying degrees of apparent hostility.
