To live on the mount of revelation opens the way for continual messages of joy from God. These divine messages shed constant light for a higher ascension. Loyal Christian Scientists, obeying the call of Spirit, gratefully and lovingly following their Leader, have nothing but good awaiting them. Courageously marching forward they pass through the nothingness of evil into the glories of ever present bliss. They hear the inspired words of Mrs. Eddy: "Clad in invincible armor, grasping the sword of Spirit, you have started in this sublime ascent, and should reach the mount of revelation; for if ye would run, who shall hinder you? So dear, so due, to God is *obedience*, that it reaches high heaven in the common walks of life, and it affords even me a perquisite of joy" (Miscellany, p. 189). What must have been the joy of victory which came to Mrs. Eddy when the white ray of divine Science pierced the world's gloom for her! We enter into that joy of victory as we receive that light and are loyal followers of her leadership.

WILLIAM D. MCCRACKAN.

## Angel Visions

THE Bible has a great deal to say about angels. We read that early in Abraham's spiritual experience divine messages were brought to him by some who are spoken of as angels and also as men, yet the important thing is the fact that the divine Mind was guiding him continually, and that he was always ready to recognize the message and respond to it. We further read that Abraham was warned in this way of the impending destruction of Sodom, and that the messengers went from him to Lot and helped to rouse him from the awful mesmeric condition into which he had seemingly fallen. We see that save for this divine guidance Lot would have perished with those who continued to love darkness rather than light; and this surely is a most important lesson for us, showing, as it does, that in the crises of human history, when faith in material things falters and falls, the word of God points the way to deliverance.

In Daniel's very remarkable experiences we find that the divine messages came to him through what seemed to be messengers not wholly unlike the human concept of man, and yet different. Here again we should see the necessity of holding firmly to the essential truth that however they may appear to the human sense, angels really are, as Mrs. Eddy tells us on page 581 of Science and Health: "God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality." When we come to the book of Revelation we find this divine idea very frequently presented. We read of seven angels engaged in the divine ministry, and then many angels doing the will of omnipotent Mind in the midst of human conditions. In the twelfth chapter of Hebrews we read of "an innumerable company of angels." Take these passages as we may, there can be no question that throughout the ages those who were spiritually illumined were fully aware that God draws near to men, and that His messages are going forth continually and reaching those whose ears are attent to catch and obey the divine purpose.

In a grossly material age the thought of angels being recognized by humanity is treated with doubt if not with scorn, and yet we may remember that a famous writer has declared mere incredulity to be "the surest sign of a weak head and a corrupt heart." The statements made by a large number of men in the allied forces respecting angelic visions which they claimed to have seen at Mons, when facing what appeared to be certain annihilation, were regarded by many as due to overwrought nerves, or something of the sort. The fact remains, however, that those who saw the vision not only gathered new courage to dare and to do, but inspired their comrades to face fearlessly the issues of the hour and to escape what seemed deadly peril. To the student of Christian Science it is of small consequence that a number of the men who had this experience made written statements respecting it to nurses and others immediately after having seen the vision; that which would impress him more deeply would be the fact that in a number of instances the men were conscious

Digitized by Google

of a moral transformation beginning at that very hour and remaining to do its uplifting work.

To the Christian Scientist even such an unusual experience would not be supernatural. He would know that as God is omnipresent His thoughts are continually going out with life-giving power to bless all who have eyes to see and ears to hear. The experiences of a battle field are not everyday events in the history of humanity, and for this we may rejoice; but in the hour of greatest peril, when there is no longer anything to hope for on the mortal plane, man's real being asserts itself, and the veil grows so thin that spiritual realities—the eternal facts of being—appear; and as death has no place in the divine creation, men cease to fear it, and reach out for the truth which saves to the uttermost.

That the divine ideas should appear to men according to their own concepts of angels is not to be wondered at; but after all the one vital thing is the message itself, and so the Christian Scientist rejoices in knowing that as surely as God's thought heals the sick and reforms the sinful, the divine thought is no less ready to reveal to those in deep distress the omnipotence of Truth and Love. In the sixty-eighth psalm we read: "The chariots of God are twenty thousand, even thousands of angels: the Lord is among them." In the prophecy of Joel is this assurance: "Ye shall know that I am in the midst of Israel, and that I am the Lord your God, and none else: and my people shall never be ashamed." This is followed by the statement: "Your sons and your daughters shall prophesy, your old men shall dream dreams, your young men shall see visions: . . . and I will shew wonders in the heavens and in the earth."

In thousands of instances Christian Scientists have proved for themselves in time of trial the absolute truth of the promise found in the ninety-first psalm, "He shall give his angels charge over thee, to keep thee in all thy ways,"—and to this they cling at all times, not only for themselves but for those who are dear to them, for the promise means certain deliverance to all who turn with love and trust to our Father-Mother God.

ANNIE M. KNOTT.

# Among the Churches

## Current Notes

MARION, IND.—One of the most important activities of the church work, that of literature distribution, was undertaken in April, 1914. There has been a gradual growth since then, and at the present time we have a committee of active and earnest workers. During the year ending January 1, boxes and subscriptions, the customary channels for distributing the literature, were used, and in addition the needs of those who were seeking the truth were supplied in the following ways: *Monitor* distribution at factories, two adjoining towns furnished with the periodicals, thirty-one copies of the vest pocket edition of Science and Health ordered for soldiers at the front, and literature provided for our boys when in camp at the National Military Home.

The literature distributed totaled 8964 pieces, including 3439 *Sentinels*, 373 *Journals*, 4772 *Monitors*, 198 *Quarterlies*, 1 *Herold*, 49 lectures, 132 pamphlets. A year's subscription to the *Monitor* was sent to five fire stations, the Marion Normal Institute, High School, Y. M. C. A., Orphan's Home, National Military Home, and County Infirmary. A year's subscription to the *Sentinel* was also sent to the County Infirmary and the National Military Home. The *Monitor* has been delivered by the month through a local news agency to the jail, the Masonic and I. O. O. F. Lodges, one barber shop, and one fraternity.

MERIDEN, CONN.—We have distributed during the year ending April 1, 1918, including nine yearly subscriptions to the *Monitor*, 800 *Sentinels*, 303 *Journals*, 5033 *Monitors*, 31 *Herolds*, 3 *Hérauts*, 40 *Quarterlies*, and 61 pamphlets. We are now giving ten yearly subscriptions to the *Monitor*, which are all gratefully received, as follows: Poor farm, tubercular sanitarium, library, high school, police station, Y. M. C. A., hospital, two men's clubs, Masonic Home in Wallingford, also three-month subscriptions to two men's clubs in Wallingford. We have sent out nine hundred copies of our two lectures given during this year, which were printed in full in one of our local papers.

There have been but two public criticisms of Christian Science during the past year, both by ministers. Each time the papers have been courteous, and willing to print corrections of erroneous statements. There has been shown a marked increase of interest in Christian Science. Our sale of *Quarterlies* from the reading room, outside of the regular subscribers in the church is now more than double the sale during last year. Also a greater number of all Christian Science periodicals have been sold than in any previous year.

CARPINTERIA, CAL.—The Christian Science Society has purchased a lot on the corner of Seventh and Walnut Streets and expects to build a church on it.—*Carpinteria News.*

# The Lectures

## Lecture Recommendations

The need for thorough metaphysical work in preparation for and protection of every Christian Science lecture should never be lost sight of. In his second epistle to the Corinthians Paul said, "The letter killeth, but the spirit giveth life." When Jesus led the five thousand across the desert place and provided for their human needs, these human arrangements—that is, the mere letter—would have come to naught but for the fact that he was able to provide them with "the bread of life" through metaphysical demonstration.

Christian Scientists have learned that the letter and the spirit, the practical human details and the spiritual demonstration, must go hand in hand in arranging for a lecture. Every detail, including the bringing together of the audience, should be recognized as under the operation of the divine law referred to by Jesus when he said, "I, if I be lifted up from the earth, will draw all men unto me." "No man can come to me, except the Father which hath sent me draw him." These statements make plain the imperative necessity in our day for that metaphysical work which recognizes the import and power of the Christ message as most essential in rightly directing the preparatory arrangements and the assembling of the audience for a Christian Science lecture.

A church or society giving a lecture or lectures during the coming lecture year, which begins July 1, should correspond at once, through the clerk, with that member of the Board of Lectureship whose services are desired. Joint lectures may be arranged through special committees representing the churches.

A memorandum circular prepared by this Board and containing important information and recommendations for

Digitized by Google

the lecture year ending June 30, 1919, will be mailed to clerks of churches before July 1. This information includes a summary of the best methods to follow in making lecture arrangements, based upon the experience of the field and members of the Board; it is issued for the benefit of church boards, clerks, lecture committees, ushers, and other workers upon whom may devolve the local responsibilities for the lecture work. The Board would ask of the field its careful and considerate study of this circular, that unity and efficiency may be promoted in the carrying forward of this vital branch of Christian activity.

CHRISTIAN SCIENCE BOARD OF LECTURESHIP.

CLEVELAND, OHIO (Second Church).—Prof. Hermann S. Hering, lecturer; introduced by Albert M. Peters, who said in part:—

In the gospel according to Matthew we find these immortal words: "Come unto me, all ye that labour and are heavy laden, and I will give you rest." All down the ages weary and heavy-laden humanity has sought rest, but how seldom has it found that which it sought! True, now and then one would come forth who understood God clearly enough to obtain for himself, and perhaps for those with whom he came in direct contact, a degree of this peace which the world is so anxious to obtain; but it was not until Mrs. Eddy gave to this age what she has named Christian Science that mankind was able to know positively what Jesus meant when he said, "Come unto me." And this is what Christian Science is doing; it is teaching humanity how to leave its false thinking and to turn to the infinite One, whom to know aright gives surcease from confusion and pain, and brings peace and rest.

PASADENA, CAL. (First Church).—Clarence W. Chadwick, lecturer; introduced by J. L. Mothershead, who said in part:—

The world to-day is facing many needs. There are many imperative demands made upon all its people. To-day whole nations are in arms, and their necessities are innumerable. There is imperative need for food, arms, soldiers, sailors, ships; and that need is being met. However, there is something which we must not overlook. This whole warfare is resistance to an idea, and we who are on the side of that right idea must maintain our pure vision of what the conflict signifies; for, as we read in Proverbs, "where there is no vision, the people perish"—the vision of the absolute triumph of good, the vision of God's power to govern national affairs, the vision of God's ability to protect our soldiers and sailors, the vision which will make us sure that in the end right does triumph, the vision which will protect us from a premature peace. Christian Science gives us that practical and demonstrable vision.—*Pasadena Star-News.*

TULSA, OKLA. (First Church).—Charles I. Ohrenstein, lecturer; introduced by Courtland L. Butler, who said in part:—

Radical changes in religious beliefs occur between one generation and another, and frequently quite unconsciously. I once asked a man to try Christian Science for his physical ills, and he promptly replied that his father's religion was good enough for him, when all the time, in matters pertaining to God, sin, heaven, hell, salvation, and so forth, he was in agreement with his father about as much as day is with night. This man thought he was an opponent of Christian Science, but he was not, because he did not know the first thing about it.

I submit that there never lived an honest and sincere man or woman who ever entertained the slightest opposition to Christian Science. This may seem to be a radical statement, but it is nevertheless true. One cannot oppose that about which he knows nothing. I cannot oppose the fourth dimension when I do not know anything about it; and if I do, I am opposing only a mental picture of my own. So it is with the so-called opponent of Christian Science. He is not opposing the truth of Christian Science, but a figment of his imagination, a misconception of Christian Science.

COLORADO SPRINGS, COL. (First Church).—Paul Stark Seeley, lecturer; introduced by A. A. Hubbard, who said in part:—

Christian Science has helped multitudes to understand and to know God, and so themselves and their fellowman. Their written and spoken testimonies and their changed lives are sufficient proof of this. Having finally turned to God in their deep need, they have felt his protection and salvation; with faith and confidence they have reached out for more of the healing truth, and taking their Bible, and studying it in the light of the Christian Science textbook and their own experience, its message of divine Love has been revealed. They are thus enabled to look up to God as the loving Father and to understand their relation to Him and to their neighbor.

MANCHESTER, ENG. (First Church).—John W. Doorly, lecturer; introduced by William Pitfield, who said in part:—

Nearly nineteen hundred years ago the spiritual revelation of the Christ-idea blazed into the consciousness of Saul of Tarsus with such startling suddenness and dazzling brilliancy that henceforth the character of the man was mightily changed. The proud and persecuting Pharisee became the tireless apostle and faithful bondslave of the healing Christ of God. In these latter days through the discovery of Christian Science the same spiritual evangel of Truth is silently but powerfully working in the general thought, illuminating and transforming it to a higher manifestation of health and happiness, as evidenced in the lives of countless men and women all over the world.

## Lectures to be Delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

CALIFORNIA—Los Gatos: Strand Theater, 8 p.m., June 25.

CANADA—Chatham, Ontario: I. O. O. F. Auditorium, 4 p.m., June 30.
Greenwood, British Columbia: Star Theater, 8:30 p.m., June 27.
White Horse (auspices Dawson), Yukon Territory: Monday evening, July 22. (For place and hour see local papers.)

COLORADO—Boulder: Curran Opera House, 3 p.m., June 30.
Denver (First Church): Church Edifice, Fourteenth Avenue and Logan Street, 8 p.m., June 27 and 28.

MISSOURI—Independence: Maple Theater, West Maple Avenue, 8 p.m., June 28.

OHIO—Lancaster: Church Edifice, North Broad Street, 8 p.m., June 27.
Sidney: High School Auditorium, East North Street, 8 p.m., June 28.
Xenia: Xenia Opera House, 8:15 p.m., June 25.

WASHINGTON—Bellingham: Coliseum Rink, Holly and Garden Streets, 8 p.m., June 29.
Cashmere: Grange Theater, 3 p.m., June 30.
Centralia: Church Edifice, Main and Rock Streets, 8 p.m., June 27.
Mt. Vernon: Rex Theater, 8 p.m., June 25.
Port Angeles: Opera House, 8:15 p.m., June 28.

# Testimonies of Healing

It is with a sense of deep gratitude that I testify to the blessings received through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. Since I was quite young I have regularly enjoyed the study of the Bible and found therein help to do what is right; but the study of the Christian Science textbook is certainly helping me to a better understanding of God as the divine, ever present, and omnipotent Mind and Principle. I believed that God was all-powerful and loving, and that He took care of those who loved Him and tried to live according to His commandments, but Science and Health is giving me a clearer perception of divine Truth; all seems brighter and more beautiful, as if a new life had been revealed to me. Although I did not sorrow, knowing that God is almighty to guide and to help according to His promise in Psalms, "Cast thy burden upon the Lord, and he shall sustain thee: he shall never suffer the righteous to be moved;" yet I find that Mrs. Eddy's teaching respecting the power of Love makes me ever glad, and I no longer wonder what the future is going to be. When I awake in the morning I feel like a child who knows no care. Before studying Christian Science I used to plan for a good and successful day; now I realize that I need only follow the Shepherd's guidance, moment by moment.

I came to Christian Science for physical healing, after having suffered much for many years. Although I trusted the divine Physician, I was considered to be very ill last spring, unable to walk even across the room, and I was advised by the doctor and my friends to submit to a surgical operation that would cause me to be laid up in the hospital for a considerable time, as the only means to get better. Having heard of the healing work done by Christian Science I preferred to dispense with all material help and turn to God for healing, so dear Christian Scientists informed a practitioner of my wish and need. The first treatment brought relief and in one week I was better—able to walk and to demonstrate the truth.

I find that this teaching can be grasped as the clouds of corporeal sense roll away; it is indeed a new birth, the true idea of God, the spiritual sense of being, which helps us to live, to work, to watch for wisdom, Truth, and Love. When we awake to the truth of being, all disease, pain, weakness, sorrow, and sin vanish into nothingness. Nothing ever gave me more joy and happiness than the spiritual uplift of Christian Science which brings peace and harmony; it is the greatest blessing to all who are willing to avail themselves of our Savior's call, "Come unto me, all ye that labour and are heavy laden, and I will give you rest." I wish to express my gratitude to the faithful followers of Christian Science for their loving, encouraging thoughts. I am thankful to God for all the good that has come to me through this teaching, and grateful to Mrs. Eddy for her loving service to mankind.

(Mrs.) Julia C. Chollet, Victoria, B. C., Canada.

✧

Words can never express my heart's deep gratitude for the great truths Christian Science has brought to me. I was always considered a strong woman and loved to do almost all kinds of work on the farm, but I was alone, as my son was a telegraph operator and away from home most of the time. Through work and worry I began to decline in health, and my condition became worse, until I was a nervous wreck, and spent most of my time in bed. My neighbors tried to help me, but I fell into such mental distress that my only relief was just to scream and cry. My son left his position to care for me, but I would not allow him to work; all he did was against my protest.

Finally the doctors planned to take me to a hospital for the insane for treatment. This so worried me that I contemplated suicide. Seeing my deep distress, my son promised to do all in his power to help me remain at home, and said he would stay by me. I was in this condition for five years; I could not endure having water touch my flesh, and did not take a bath, nor comb my hair in all those years. At last I was stricken with partial paralysis, and the doctor who was sent for declared my time was short, saying he could do me no good. Other physicians said my case was incurable, but my son said he wanted to try one thing more. Knowing I was not opposed to Christian Science, he sent for a practitioner, who lovingly told me of the precious truths contained in this, to me, new religion and began treatment. One morning I awoke to the fact that I was much better. The day was bright, and I arose, feeling like a child taking its first step; I did well, and in a few days the paralysis was gone. I continued to improve. First I began to notice my unkempt condition, and each day I kept brushing back the tangled mop of hair; then I saw, too, that I needed some clean clothes. It seemed as if I was awakening from an awful dream.

After about three weeks' treatment the practitioner said to us, "God's work is even now done." She brought a neighbor in one Thursday to help her. I shall never forget that day. They brought dinner with them, then they began to clean my house. While they worked, I too, for the first time in five years, felt a desire to work. I took a clean table cloth from a drawer, got out dishes, and set the table. In the afternoon they cut my hair. I took a bath, and was dressed in new clothes. The next day I cut out a dress and did the first sewing since my collapse. The following day I set the cream for churning. It was not long before we were housekeeping again; for on Saturday my Christian Science friends gave me a "kitchen shower," even papered the walls and painted the ceiling, until my dismal home was made new for a new child in Christian Science. Over three years have passed since this healing. I have been doing all the housekeeping and lots of farm work, and my son has his former position back again. Other ailments have come up, but through the power of Truth they have disappeared. The uplift from wrong beliefs about man and God is grand to me.

I own a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and it helps me to read the Bible aright. I must work out my own salvation and am so thankful for my release. I am anxious to keep putting off the old and taking on the new truths that Mrs. Eddy so wonderfully discovered in our time.

(Mrs.) Matilda Johnson, Spencer, Ind.

I wish to verify Mrs. Johnson's testimony. I was a neighbor of hers all the five years of her deep distress; I helped cut her hair and clean up her house. Her beautiful healing has been a wonderful help to me, as I was young in Christian Science when I was called upon to help out in this little home.

With a deep sense of love for this teaching, I add my tribute to the Christ's demonstrable truths. Thirty-one years ago, when my first child was born, I was in bed many months with milk leg. What I suffered from this disease no one knows. The doctors said there was a diseased condition of the heart, along with the other trouble. I also had a growth in my right side that pained me, so I was very much

Digitized by Google

discouraged. My husband took me to a specialist, who gave me a thorough examination and then told us he could do me no good.

With great fear I passed one more week and then went back to the doctor to beg for some kind of medicine to relieve the intense pain; but he shook his head pityingly, saying he could not help me, but would recommend rubber stockings to ease the pain in the legs. Then he sent me to Indianapolis to get them made, and while I was there my daughter-in-law asked me to try Christian Science. I became interested, and she began treatment. I read the *Sentinel* and other authorized literature and could see a faint light through the veil of mortal sense; then, too, her quiet, honest way of putting it helped me. After a few days I wrote asking her to keep up treatment. We exchanged letters often, she explaining Christian Science, I telling her of every pain.

After a few weeks I noticed one day that I had accomplished more housework than usual and yet was not tired; then I remembered I had not had any heart trouble for three or four days, and it dawned upon me that I was healed. I stamped on my once lame feet, but there was no pain. I walked out in the yard and found that I could take steps to the ends of my toes. This was joy to me, as I had been obliged to make my steps short on account of severe pain in the ankle. Then with my hand I beat my right side—no pain there, the lump was gone. All this was greater than my expectations, and with this grand proof I rejoiced to know that Christ's teachings are demonstrable now the same as centuries ago.

A few days after these glorious truths were revealed to me, I was reading in my new copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and discovered I was reading without glasses. It has been three years since my healing, and I have not used glasses during this time, nor have any of the old troubles come back. I am learning not to accuse God of being the author of any of mortal mind's make-ups—learning that disease is not material, but mental. I have also been healed of a continual ringing in my right ear. I thought it of little consequence and tried to declare the truth for myself, but the trouble kept getting worse until it annoyed me very much. Then I asked for help in Christian Science, and in a few treatments was free from this condition.

How glad I am to know it is Spirit, God, who heals all our diseases. It helps me to understand that God is Life, Mind, Soul; that I live, move, and have my being in Him. I am grateful to our honored Leader, Mrs. Eddy, through whom these truths were so generously unfolded, and for her ability to give them to us in a way easy to understand.

(Mrs.) CLARA B. WHITNEY, Noblesville, Ind.

✧

It is with great joy and with heartfelt thankfulness to God and gratitude to our dear Leader, Mrs. Eddy, that I give this testimony. Christian Science has made me free not only from physical bondage but from many business doubts and fears; indeed, the results when this teaching has been rightly applied to my everyday affairs have been most satisfactory, and many things have come to pass which to sense testimony seemed impossible. One of the many things for which I am grateful is the desire to help others. The joy that comes from showing others where they can find the truth cannot be expressed in words.

Three years ago some dear friends brought Christian Science to my notice, and I shall never forget the loving way they helped me, as they have done many times since. Although I did not take up the study for physical healing, I have had many beautiful demonstrations. A severe headache, which had been troubling me for several hours, was immediately overcome when I turned definitely and unreservedly to God. Words cannot express my gratitude for the unlimited blessings I have received through the understanding of God as taught in Science and Health. I am especially grateful for the spiritual healing and the regeneration which have come to me through the study and application of the truths of Christian Science. I pray each day for that Mind to be in me "which was also in Christ Jesus," that I may be of greater service to the people and our nation.

HERBERT H. THORNE, Burnham, Somerset, England.

✧

For seven years I have been a student of Christian Science and have received great benefit from it. I am thankful for having learned that God, good, is the only Mind, and that man coexists with Him. I first read "Science and Health with Key to the Scriptures" as I would read any textbook on theology, but with further study I began to realize that its pages were illumined with the light of Truth.

During my spring vacation one year I had a severe attack of throat trouble, and was unable to speak above a whisper. Besides this, it was so difficult to swallow that I refused everything to eat; consequently, I grew very weak. School was to open the following Monday, and I was afraid that I would be unable to discharge my duties as teacher. A practitioner was called and gave me treatment. She told me to rejoice and sing, but I felt this to be impossible, because I could scarcely open my mouth. For two days I seemed no better. The healing came, however, on Sunday night when I suddenly started to sing clearly, "Shepherd, show me how to go" (Poems, p. 14). I was very grateful for this healing. I have seen fever and alarming symptoms vanish with the reading and spiritual understanding of the ninety-first psalm. When my mother passed on there came wonderful strength to know that all Life is in God, Spirit.

I am deeply grateful for the privilege of teaching in the Sunday school. Christian Science is the greatest blessing that has come into my experience, and my heart fills with gratitude to Mrs. Eddy for her untiring efforts and self-sacrifice. My desire is to be an instrument of good, a channel for love.—(Miss) ALICE L. BAKER, Highland Park, Ill.

✧

I accepted the teachings of Christian Science as the truth about ten years ago, because of the healing of my mother, who at that time was pronounced by two physicians as past all help, unless an operation could be performed, which they said could not be done because of her age. The trouble was diagnosed as gallstones. The doctors both said she could not live through the night; she did, however, but knowing that they had given up all hope of her recovery, she asked if she might have Christian Science treatment. No member of the family knew anything about this teaching, and most of us condemned what we thought it to be, as she herself had done, but a practitioner was sent for and came immediately, remaining for some time. That evening my mother arose from her bed, dressed, and walked downstairs. She sat at the table and partook of the evening meal with the family, eating of the same food as the others, and partaking of a vegetable which she had long feared, with no bad effect.

I was not present at the time, but was on my way from another state, having been sent for. I arrived the day after, and when I was told that it was through Christian Science she had been so wonderfully healed, all my prejudices faded

Digitized by Google

away instantly, and I began from that day to investigate its teachings. I accepted without question what I read in "Science and Health with Key to the Scriptures" by Mrs. Eddy, and was grateful for every smallest ray of light which came to me through the help of others. I began to apply its teachings very soon, and by this application gained in the understanding of the might of Mind, with some realization of the allness of Principle, and was able to prove Christian Science to be the truth.

From the day I was told of my mother's healing, I have never used any material remedy, although we had a medicine case which was kept filled with the many remedies on which we relied. When I returned to my home and told my family of the great change in my thought of Christian Science, they were not all pleased at first; but one daughter decided that as I was so earnest about it, it must be the right thing, so she and I began the study together. Gradually others began to rely on the healing power of Truth as taught in Christian Science, and to realize that we had been blessed, as have thousands of others, by this wonderful discovery of Mrs. Eddy, through whose close communion with God the truth of being was revealed to her.

Among the physical ailments which have been overcome by the application of the "word of God" are diphtheria, ptomaine poisoning, severely injured ankle, blood poisoning, appendicitis, severe pain in the head, also sudden and serious failure of the heart. The spiritual help Christian Science has been during these years, is past my telling, but let me say that when I have remembered to rejoice, the discordant condition, whatever it was, has always vanished almost immediately. This does not mean that we should rejoice because there is an ailment to be overcome, but because we have an understanding of the power of Truth to banish every erroneous condition.

My mother's healing occurred in 1907, and she has never had the least return of the trouble. She is eighty-eight years old and is well. I am truly grateful that this most wonderful teaching has come into our lives; for it makes the Bible promises so rich and full of meaning. We do not need to fear if we listen to them. In Psalms we read: "God is our refuge and strength, a very present help in trouble." I am sincerely grateful for a religion which is a remedy for every ill, a remedy which needs only to be rightly applied to give right results.—(Mrs.) CLARA C. MAGRUDER, Lansing, Mich.

✧

With a heart overflowing with gratitude to God for the numerous blessings that have come to me and mine through Christian Science, I give my testimony. I was healed of pellagra after it had reached the worst stage and medical doctors had pronounced my life of but few days. I have also been healed of chronic kidney trouble after suffering for many years, and many other discordant conditions have been overcome; but my gratitude for all this is indeed small when compared to the love and gratitude I feel for the spiritual uplift, the understanding in a degree of the ever presence and allness of God.

One morning not long ago I awoke with a sense of great depression. My mentality seemed in utter darkness; I could not get one clear thought. I arose, however, and went about my morning's work, though to sense I was most miserable. Soon the family had all gone out to their work or to school, and I was left alone. I kept trying to realize the truth, earnestly desiring to awaken myself from this state. About nine o'clock I was seized with almost unbearable suffering; then fear took possession of me. It was only a short distance to a practitioner, but I felt that I could never reach the place if I started; so I suffered on for hours. Finally the thought came that surely God knew my need and would send some one to help me. Then suddenly, as if they had been spoken, these words came to me: Now you are suffering and waiting for some person to come and help you, when God is an ever present help. In a moment my mentality cleared up. I realized at once the infinite ever presence of God and was healed instantaneously. This brought out to me clearly the thought that desire of a right nature is prayer, for I was desiring this good earnestly, although I seemed in mental darkness; and I feel that God answered my prayer. For this and all other blessings I am very grateful. I am well and happy and rejoicing daily in the truth that saves from every ill.

(Mrs.) JULIA F. ADAMS, Crescent, Ga.

✧

A deep sense of gratitude to God prompts me to add my testimony to the many already published. Prior to the year 1915 I had practically no occasion to investigate the teachings of Christian Science, and even went so far as to ridicule the many accounts of healing attributed thereto; a genuine awakening was, however, in store for me. In the fall of 1915 my two-year-old boy contracted a severe case of bronchitis, which eventually became chronic, and according to several physicians there was little likelihood that he would ever be entirely free from it. Then, too, he was said to have enlargement of the heart, which we were told but aggravated the other trouble, and grave doubts were expressed as to his survival.

Having exhausted every means known to the medical profession, and having tried change of climate three times in the hope of obtaining relief for him, I decided to try Christian Science. At this juncture we moved suddenly to Los Angeles, California. The child contracted a severe cold on the train and the old trouble returned with additional severity, so I telephoned to a Christian Science practitioner. Shortly afterward she arrived, and I shall never forget the encouraging atmosphere she seemed to create. The little fellow was given a treatment, after which he was put to bed. He went to sleep immediately without coughing, something he had not done for two years, and awoke but once during the night; then my wife read from the copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, which the practitioner had left with us, and he was soon asleep again. Treatment was continued for six days, after which time all symptoms had disappeared. Since this healing we have had many other beautiful demonstrations, and our boy is now healthy and happy.

Words cannot express the gratitude in my heart for the many blessings bestowed through the healing truth that God has given us, and for that peace of mind which indeed passes all understanding.—G. P. KENNEDY, Santa Ana, Cal.

✧

As I have had the privilege of reading a great many testimonies, I would like to add one more to those already given in the Christian Science periodicals. About four years ago our home was very discordant on account of sickness, and it seemed as though there was no help for us. My mother had been troubled with nervousness in its worst form for about a year and a half or possibly two years, and also could not retain food. She had been attended by three physicians, one of whom was a relative. Very often my sisters and I remarked, "If there is a God in heaven, why does He not help us?" He most certainly has answered our prayer; for these conditions have been overcome through the power of

Digitized by Google

Truth, and my mother enjoys better health than she did for a good many years; in fact, I am quite sure that she would not be with us to-day if it were not for Christian Science. We are not only grateful for the physical healings which have taken place, but also for the fact that God protected my mother at a time when she did not care to live, as everything seemed so dark.

Another healing was that of my niece. One day in visiting my brother, I found she had been quite ill for two or three weeks. The doctor had called at their home several times, and although he could not diagnose the case, he thought she had malarial fever. I asked permission to treat her, and did so to the best of my ability. As she wished to go home with me, even though she had been in bed for at least a week, we started on a two hours' trip the following day, and upon arriving at my home she was able to eat a good supper. In about a week there was a decided change; after that, however, we became neglectful, and as the condition had not been entirely met, there seemed to be a relapse. At this point we asked for help from a practitioner, and with three treatments my niece was healed. Here again was proof of God's omnipotence.

I could tell of any number of other healings and experiences, but suffice it to say that I am very grateful to have learned that God is good and heals all our diseases. I am grateful to Mrs. Eddy, through whom this truth was brought to humanity again, and my gratitude also goes out to all the friends who have helped us to get a better understanding of God and man.—(Miss) MINNIE FUCHS, Bronx, N. Y.

This is to verify the truth of the above testimony of Miss Fuchs about the healing of her mother, whom I have known ever since she took up Christian Science. I can say that she is changed from a nervous wreck to a strong, healthy woman.

(Mrs.) ELIZABETH H. SOMERS.

✧

I took up Christian Science after the doctor said he could do no more for me, and with the aid of a practitioner I was healed both mentally and physically. It seemed weeks that I had been unable to sleep, and several weeks that I was hardly able to eat. When other complications set in I was miserable; I was not interested in anything, would not even read a newspaper.

I could not see much change for about three months after beginning treatments in Christian Science, except that my appetite improved and I was able to sleep a little better. I got so discouraged that I stopped treatments for about two weeks, also gave up reading the Bible and Science and Health or any of the Christian Science literature; then I was indeed most miserable. One day my husband urged me to try Christian Science again, so I consented, to please him, for I had given up hope of anything doing me any good. He wrote to the practitioner, and the day that treatment was resumed I got out my books and began to study the Lesson-Sermon and have kept it up ever since. That was indeed a happy day for us. Gradually my condition improved and in about two months I was healed. My health is now excellent; I can work all day and seldom get tired. Fear and worry are being eliminated and other things have been overcome, such as sick headaches, dysentery, colds, and hay fever, some by the aid of a practitioner and some through my own understanding of the truth. My husband has also been helped, and every day we read the Lesson-Sermon together. The Bible seems a new book to me now. I enjoy the Christian Science periodicals and am much benefited by reading them.

Words cannot express my thankfulness to God, and my joy that we are governed by His law instead of the so-called material law. I am also grateful to Mrs. Eddy, who has helped us to see the true way, and to the loving friends who have been such a help to me. My sincere desire is to be a true follower of Christ and to be able to show others the way.—(Mrs.) FRED D. FULLER, Fullerton, Neb.

✧

A short time ago, after a Wednesday evening meeting, a gentleman asked if I did not think it would be of great benefit if more testimonies were given of what Christian Science can do for business men. The testimony I had given had encouraged him, and thinking that it might do the same for others similarly placed, I am writing some of my experiences for publication, hoping they may prove helpful.

About twelve years ago I came to New York a stranger. I sought employment, and in almost every instance seemed to answer all questions satisfactorily. Several times I was even told I could fill the position, when the final question would be put, "Have you a city reference?" I had none; therefore was considered not qualified. I became discouraged, as day by day my need was greater, and having been successful in other cities, I began to resent my apparent failure. In desperation one day I visited a branch Church of Christ, Scientist, and saw on a wall this inscription from Science and Health (p. 494): "Divine Love always has met and always will meet every human need." To a lady near me I cried out that that was what I needed; then told her my story. She said, "Divine Love will certainly help you," and with this comfort I left the church. A few days later I had a position. Many other business problems have been solved in like manner.

Some years before the above mentioned experience Christian Science had proved itself the great physician. I had been suffering from a number of organic diseases which at short intervals caused extreme pain. Although cared for by physicians I grew rapidly worse, until operations promised the only relief. I had been on diets for several years, and resting comfortably at night was out of the question, due to pain in the heart. After a few treatments in Christian Science there was relief, and hope was revived. One after another the ills disappeared. Since then diphtheria, melancholia, necrosis of the lower jaw causing it to lock, sick headaches, intestinal inflammation, grief, and many minor ailments have been overcome.

The greatest blessing of all has been the closer acquaintance with God, which has taught me to take to Him every problem small and great, knowing that He is able and willing to help. I thank God for our beloved Leader, Mrs. Eddy, who has made it possible for thousands of people all over the world to be freed from the bondage of sickness and sin.

(Mrs.) VERONA SMITH, Ridgefield Park, N. J.

✧

I am indeed happy to be living in the age of Christian Science, and thankful to God for all the benefits I have received since taking up the study of this teaching. I have been healed of quinsy, lung trouble of many years' standing, rheumatism, and many other ailments. As my mother, two sisters, and two brothers had passed on with lung trouble, I was advised to come West for my health; and it was here that I found Christian Science and through it regained my health, for which I am indeed grateful. I am also grateful for the periodicals; the *Sentinel* I have enjoyed ever since beginning to read it.

(Mrs.) ISABELLE J. BOSWORTH, Spokane, Wash.

# From the Press

[Rev. Richard Roberts in *The Biblical World*]

Standing amid the smoking ruins of a civilization which has carried through to its issue the logic of worldly wisdom, can we return any answer but that the wisdom of this world has shown itself to be the tragic folly it really is and that there is no hope of healing for this stricken race but in that foolishness of God which it has denied?

[*The Watchman-Examiner*]

In railway stations, waiting rooms, and other places of public assembly throughout the country Christian Science publications are to be found. In hotels, clubs, and public libraries the Christian Science daily newspaper greets you. In several southern hotels we recently found neatly folded copies of *The Christian Science Monitor* on the desks in the writing rooms. Other papers were five cents a copy; *The Christian Science Monitor* was offered to guests without charge. We have no unfriendly criticism to make. We congratulate the Christian Scientists that they believe in Christian Science sufficiently to make sacrifices to propagate it; and the sacrifices must be large, for the method of propagation is expensive. In not a single railway station, waiting room, or other place of public assembly; in not a single hotel, club, or public library; in not a single railway train, street car, or steamboat, did we see a single copy of *The Watchman-Examiner* lying around. We have a notion that *The Watchman-Examiner* is quite equal to the best Christian Science literature published, but as propagandists and promoters Baptists are not in the same class as the Christian Scientists.

[*The Living Church*]

God works through history and humanity chiefly by means of spiritual forces. Normally, the church should be the power that would make wars among professing Christians impossible; and if unhappily this should fail in any particular land, through any prostitution of spiritual to baser ends, the church should at least be the power for righteousness in the making both of war and of the ultimate peace. The helplessness of the church in this present conflict has brought heart searchings and heart burnings to great numbers of Christian people. Her division was never so odious as now. The transcending importance of unity was never so overwhelmingly apparent.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlet

"Christian Science: Applied Righteousness," a lecture by Frank Bell, has been published in pamphlet form, and is now on sale at five cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

"The Christian Science *Monitor* has been a very welcome visitor during my incumbency at this post, and of all the newspapers coming to this office I have no hesitancy in saying that the *Monitor* is the most popular. The American seamen especially are very fond of reading your paper, and its continuance will certainly be appreciated."
From Göteborg, Sweden.

"Because of the accuracy of important news and the wealth of valuable information contained, and because of broad views and high principles which permeate your daily newspaper, the *Monitor* has proved to be of great use to me and to my friends here."
From Uyeno, Tokyo, Japan.

"*The Christian Science Monitor* has been on file in the office during the past year, and I assure you it is a most acceptable addition to our list of newspapers. When a mail arrives the papers and other reading matter are sent out to different people and firms for their perusal, thus making all the reading matter received at this office do a double duty."
From Durban, Natal, Africa.

"Occasional copies of *The Christian Science Monitor* have come down from London. They were read with great interest, and we shall, with full faith, look to the entrance of much sunshine into the surrounding gloom and sorrow—war-created—by the presence of a home paper of such high type and character.
"Here in the midst of things,—back of the great supply lines,—one needs to be lifted up and away from the shadows which fall in so many ways, and during so many hours. When read, they will be passed over to those who are on beds of pain and illness, maimed and broken by the machine of war."
From Southampton, England.

"It is needless to say that *The Christian Science Monitor* is very highly considered here, and is read not only with interest by the staff, but also by many visitors. Unfortunately it has arrived here during the war with more or less delay.
"Since the Balkan wars, I have read the *Monitor* with great interest, and I consider that the articles by your correspondent on the condition of affairs in the Near East are almost classic, especially in view of the turn matters have taken."
From Moscow, Russia.

# Universality

"Give thanks unto the Lord, for he is good . . .
"Let the redeemed of the Lord say so, whom he hath redeemed from the hand of the enemy;
"And gathered them out of the lands, from the east, and from the west, from the north, and from the south." Psalms 107:1–3.

As an international daily newspaper, THE CHRISTIAN SCIENCE MONITOR knows no boundary lines, no class distinctions, no limit of time or place, no impairment of its ability "to bless all mankind" (The First Church of Christ, Scientist, and Miscellany, p. 353).

In home, business, or profession; in commerce, finance, or politics, the MONITOR is essentially universal, supplying the particular needs of every reader, wherever or whatever his place may be.

"I hesitate to take one moment of your time, yet I cannot resist longer the desire to tell you what *The Christian Science Monitor* means in our home, with the hope that it will bring happiness to you.
"We have been subscribers to the paper ever since its first number, and we have also read carefully each number as was our Leader's desire, with the result that the paper is as much a part of our daily sustenance as is our food. Our family, owing to my father's business, a captain, has traveled in parts of the world, and sometime since, he passed away at Rio Janeiro. We have lived at different times in Italy, France, and Germany. Now the *Monitor* comes to us every day with its message of exactness, truth, and purity from all parts of the world and from all parts of our own dear country, with such fine discrimination of news, given in perfect language, that I know I could receive no finer instruction were I to attend daily lectures at the Sorbonne or at Oxford. But to go still further, and leave the perfection of its literary value, we drink of its spiritual power which clothes it all. I have been healed of disease by reading its Home Forum articles, and indeed am being daily healed, as an understanding of divine Principle replaces material belief."
From Kennebunkport, Maine.

"A member of our literature distribution committee stated that she was asked for something to eat one day by a tramp. She prepared a lunch for the man and he went on his way.
"A little later her husband took a bundle of Christian Science literature to a small waiting station to place in a rack kept there for that purpose.
"Here he again met the man whom his wife had recently fed, who approached him and asked him what he was putting in the box. Upon being told 'Christian Science literature,' he asked if he had a *Monitor* there, and went on to say that, in fact, all of the like to read the *Monitor*, in fact, all of the Christian Science literature.'
"A short time ago one of our members told me about her little daughter's coming home from school one day and happily telling her that her teacher 'asked right out before the whole room' how many of them took *The Christian Science Monitor*. She pointed out to the school the value of the pictures of foreign countries, historic buildings, etc., for their geographical work, and advised them to procure these articles and pictures and bring them to school.
"This teacher is not a Christian Scientist, but has occasionally received a marked copy of the *Monitor*."
From Ontario, California.

# WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder
of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## The Christian Science Monitor

AN INTERNATIONAL DAILY NEWSPAPER

Founded, 1908, by Mary Baker Eddy.

Published daily, except Sundays and legal holidays. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions to the columns of the Monitor should be addressed: Editor, The Christian Science Monitor.

Subscription price, payable in advance, postpaid, to all countries: One year, $9.00; six months, $4.50; three months, $2.25; one month, 75 cents; single copy, 3 cents. By carrier through a local newsdealer, one month, 80 cents.

## The Christian Science Journal

Founded, 1883, by Mary Baker Eddy.

This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, list of Christian Science Practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 30 cents.

## Der Herold der Christian Science

Founded, 1903, by Mary Baker Eddy.

A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Founded, 1890, by Mary Baker Eddy.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Also printed in English-Dutch and English-German.

Subscription price, payable in advance, postpaid, to all countries: One year, $1.00; single copy, 25 cents.

## Pamphlets

**Price, Postpaid: Single copy, 5 cents.**

**Christian Science: Applied Righteousness**—By Frank Bell.

**Christian Science: Its Religious Philosophy**—By Hon. Clarence A. Buskirk.

**Christian Science: "The Resurrection and the Life"**—By Clarence W. Chadwick.

**God is Good**—By George Shaw Cook.

**Causation: Viewed in the Light of Christian Science**—By Frederick Dixon. Also printed in Norwegian and Swedish.

**Christian Science Healing vs. Mental Suggestion**—By Frederick Dixon. Reprinted from the "Weekly Budget," London, England. Also printed in Norwegian.

**Christian Science: The Revelation of Christ**—By John W. Doorly.

**Christian Science: The True Christianity**—By Clarence C. Eaton.

**Christian Science: Pure Metaphysics**—By Dr. Francis J. Fluno.

**Christian Science: The Gospel of Freedom**—By Willis F. Gross.

**Christian Science: The Science of Salvation**—By Prof. Hermann S. Hering.

**Christian Science Healing: Spiritual and Scientific**—By Prof. Hermann S. Hering. Also printed in German.

**Answers to Questions Concerning Christian Science**—By Edward A. Kimball. Also printed in Dutch, German, and Norwegian.

**Christian Science: Its Advantage to Mankind**—By Edward A. Kimball. A London lecture. Also printed in French.

**Christian Science: Man's Dominion Over Evil**—By Edward A. Kimball. Also printed in French, modern Greek, Italian, Norwegian, and Russian.

**Christian Science: Its Divine Authority**—By Bliss Knapp.

**Christian Science: The Explanation of the Ideal Man**—By William D. McCrackan, M.A. Also printed in German.

**Christian Science: Its Discovery and Development**—By William D. McCrackan, M.A. Also printed in German and Norwegian.

**Christian Science: God's Lovingkindness Proved to Men**—By Rev. William P. McKenzie. Also printed in German.

**Christian Science: A Message Which Heals and Saves**—By Edward A. Merritt.

**Christian Science: Its Results**—By William R. Rathvon. Also printed in German.

**Christian Science Healing Not Medical Practice**—By Judge Clifford P. Smith.

**Christian Science: A Religion of Love**—By Virgil O. Strickler. Also printed in German and Norwegian.

**Christian Science: The New Birth**—By Bicknell Young. Also printed in German and Norwegian.

**Christian Science: Its Principle and Rule in Business.** Noonday lecture delivered by Bicknell Young.

**"Awake Thou That Sleepest."** Printed in English only.

**Birthright and Dominion.** Printed in English only.

**Confidence and Supply.** Printed in English only.

**Environment and Opportunity.** Also printed in French.

**Fulfilling the Law.** Also printed in Danish.

**Law and Work.** Also printed in French.

**Prayer and Healing.** Also printed in French and German.

**Seeking and Finding.** Also printed in Dutch, German, and Swedish.

**The Divine Nature.** Also printed in Dutch and Norwegian.

**The Father's Business.** Also printed in German and Swedish.

**The Law of Kindness.** Printed in English only.

**The Providence of Good.** Also printed in French, Spanish, and Swedish.

**"Then the Full Grain in the Ear."** Printed in English only.

**Upward Footsteps.** Also printed in Dutch.

**"What Went Ye Out for to See!"** Printed in English only.

OTHER TRANSLATED PAMPHLETS

**Not printed in English separately.**

**Faith and Generosity.** Printed in French.

**Man's Unity with God.** Printed in German only.

**"Peace on Earth."** Printed in German only.

**Prayer and Confidence.** Printed in German, Dutch, and Swedish.

**Mary Baker Eddy**—By Arthur Brisbane. Printed in German only.

**Mary Baker Eddy: Her Purpose and Accomplishment**—By Frederick Dixon. Printed in German and French.

**The Founder of Christian Science**—By B. O. Flower. Printed in German only.

**Christian Science: A Reasonable and Rational View of All Things**—By Francis J. Fluno, M.D. Printed in Dutch.

**Christian Science: Its Teachings, Methods, and Works**—By Judge Septimus J. Hanna. Printed in Swedish.

**Christian Science: Humanity's Helper**—By Prof. Hermann S. Hering. Printed in Dutch.

**Christian Science: The Comforter of Promise**—By Frank H. Leonard. Printed in French.

**Christian Science: Demonstrable Religion**—By Frank H. Leonard. Printed in Norwegian only.

**Christian Science: A Religion of Progress**—By William D. McCrackan, M.A. Printed in Swedish and French.

**Christian Science: The Christianity of Jesus**—By Mrs. Sue Harper Mims. Printed in Swedish.

**Christian Science: The Gospel of the Kingdom**—By Judge Clifford P. Smith. Printed in German and French.

**Christian Science: Its Principle and Method**—By Bicknell Young. Printed in Swedish and French.

VEST POCKET PAMPHLET

**Possession**—By Adam H. Dickey. Price, postpaid, single copy, 4 cents.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50. Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

VOLUME XX JUNE 29, 1918 NUMBER 44

## That Men May See

FRANK BELL

THESE are times of supreme testing, not only for nations and peoples, but for churches and religions. The Christian Science church, it is gratifying to observe, is meeting the test in a manner which cannot fail to hasten the day when all mankind will see and acknowledge the embodiment and expression of the true Church, defined by Mrs. Eddy on page 583 of Science and Health as "the structure of Truth and Love."

It is a fact of significance and importance that the official publications of the Christian Science church were among the first to proclaim that in the great world war the struggle was not essentially between nations, but between right and wrong mental concepts, with relation to which there could be no such thing as intelligent neutrality. Knowing the inevitable tendency of right thinking to multiply "after his kind," and of wrong thinking to counterfeit the reproductive activity of good, Christian Scientists are able to see far ahead of the working out of things materially, and thus participate in each of the world's successive awakenings to the issues actually involved. They will of course continue to do this, thereby, as in many other ways, justifying their right to speak for the church "which affords proof of its utility and is found elevating the race," as we read on the page already quoted.

If anyone had expected that Christian Scientists, in the presence of a great human crisis, would lose themselves in a maze of so-called hypermetaphysics, the war period has provided for him a number of helpful surprises. He may have observed, for instance, the alertness with which The Christian Science Board of Directors uncovered and publicly repudiated the enemy suggestion that the teachings of Christian Science could be used as the basis of claims for exemption from military service. Of other significant developments a few only need be cited. The opportunity for the Christian Science church to be represented officially in the United States Army and Navy in the appointment of Christian Scientists as chaplains, was promptly accepted. Since the beginning of hostilities in Europe, the War Relief fund of The Mother Church has provided for the distribution of vast quantities of needful material things among suffering and destitute war victims in many lands. Busy workers in the Christian Scientists' Comforts Forwarding committees are fashioning and sending out thousands of knitted and sewn garments that carry messages of love and good will to those who in trenches, camps, hospitals, and stricken homes are making the great sacrifice for human freedom. The Christian Science Camp Welfare committee, supported by The Mother Church and the branch churches, and represented in camps and other military establishments by practical humanitarians, is serving in every possible and proper way the needs of the men in the armies which stand for righteous government.

There need have been no surprise when Christian Scientists proved their unwillingness to fall into the trap of the suggestion that a material human body, any more than a material church edifice, is entitled to some sort of sacred exemption from the proper requirements of human service. The Christian Science textbook makes it perfectly clear that one could not rightfully claim to be a Christian Scientist without manifesting the fruits of Christianity in ways that mankind may recognize as good. Whatever would attempt to ignore any human need, would fall short to that extent of the right to be called Christian. On page 25 of Science and Health is the assurance that "the divinity of the Christ was made manifest in the humanity of Jesus." Can it be unreasonable, then, to expect that the divinity of Christian Science be made manifest in the humanity of Christian Scientists?

A church whose authorized publications include a great daily newspaper chronicling the affairs of the world, would scarcely try to encourage in its adherents a lack of intelligent and sympathetic interest in human affairs. It was the Discoverer and Founder of Christian Science who established *The Christian Science Monitor,* and who said (Miscellany, p. 352), "My desire is that every Christian Scientist, and as many others as possible, subscribe for and read our daily newspaper." Each issue of this newspaper draws humanity and Christian Science nearer together, bringing out a mutuality of interest which makes for unity of thought and action in most surprising ways. The Christian Scientist who reads the *Monitor* is astonished to find how largely the world's aspirations are inclining toward the right. The so-called outsider who reads the *Monitor* is as often astonished to learn how much he has in common with the viewpoint of the Christian Scientist.

The war relief activities mentioned are significant in proving that Christian Science has not taken the heart out of Christianity, but put even more of love into it. They show that the Christian Science church is not unmindful of the debt of gratitude it owes to the governments and peoples that have stopped at no sacrifice, however great, to provide an atmosphere of civil and religious liberty in which the fair flower of the Christ Science could unfold before the eyes of men.

## Individual Distribution

BESS NALL SCHAEFFER

THE interest that centers around the young men in our training camps, at home and abroad, is well-nigh immeasurable. To these men and to the others who will follow them in the camps a large portion of the world looks with the greatest hope and encouragement. Everything humanly possible is being done to equip our men materially for the great struggle in which they are expected to engage. A good deal is being done, too, to equip them spiritually for their duty. Through the ruling of the Postmaster-General of the United States, a great opportunity is offered individual Christian Scientists to aid in this spiritual equipment. It has been made so easy, by this ruling, to forward our periodicals that there is no excuse as to effort or expense which can be offered. For some time it has been a great source

Copyright, 1918, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter

Digitized by Google

of joy to the writer, in looking through the testimonies in the *Journal* and *Sentinel*, to find some from soldiers and sailors who have served in the war and have felt the protection of even a measure of understanding of Christian Science under most difficult and dangerous circumstances. These testimonies cannot help being of great encouragement to other soldiers and sailors who may soon be called to go through similar experiences. They are the "Peace, be still," to any sense of fear or apprehension which may be entertained, even unconsciously, in the hearts of the men; for they are proof that the same protecting, guiding Principle, Love, is at the battle front for "those leaning on the sustaining infinite" (Science and Health, Pref., p. vii), as we have recourse to in time of trial within the shelter of our homes.

The writer wishes particularly to mention the appreciation of two young men in camp. Both the young men, one from our own home, the other a friend, had been benefited by Christian Science and were more or less interested. The one, while in our home, had read some of the literature, but had kept putting off a more serious study until there was more time, so busy did he feel himself to be with material pleasures. These young men enlisted in the Army, the friend going to the Houston camp and our relative, after rejection and subsequent draft, to Rockford. I wrote to both, inquiring if they would read Christian Science periodicals if sent to them, and each promptly answered that he would. Upon receipt of the first *Sentinel* I sent, the young man in Houston immediately expressed his appreciation, saying the paper had seemed especially good to him, and that as soon as he had opened it, a number of the boys had asked for it in turn. Our young man at Rockford writes that the boys are very appreciative of the Christian Science publications. When he has finished with a paper he places it on a table in his quarters so that the other boys who are interested may have access to it. He states that the *Monitor* is much in demand, that the other newspapers delivered there cost more than they do in the city, and that the average boys do not see newspapers frequently except in a more or less tattered condition.

The *Monitor* gives these soldier boys reliable and wholesome news from all over the world, and the manner in which are handled all subjects relating to the war—the subject so near the hearts of these men—is very helpful indeed; for they do not have to wade through columns of theories, speculation, and more or less unreliable reports, as well as masses of so-called news items in which they have absolutely no interest. For their spiritual comfort and encouragement they find the metaphysical article on the Home Forum page, which "leavens the lump" of the day's effort. Almost every letter tells of the appreciation of the *Monitor* and asks that I do not forget to send this paper. Under such circumstances, one does not need a reminder, for his own joy is so great because of this helpfulness of our literature.

A suggestion which came to me for convenience in sending literature may be helpful to others who have not heard about it before. It is to remove the periodical from its wrapper when received, without cutting or tearing the wrapper. After having finished reading the publication, it may be slipped back into its original wrapper for remailing. All that is necessary is to write the word "from" before your own printed name and address, and add below the name and address of the one for whom it is intended, with the postage required. The *Monitor* does not come under the class of publications indicated in the ruling of the Postmaster-General, but by using the original wrapper, it is not at all tedious to forward these papers to some friend or acquaintance in the Army or Navy, and they will be appreciated whether he is a Christian Scientist or not. A one-cent stamp will carry the *Monitor*, if not more than sixteen pages, and it is well to mail the papers as soon as possible after their receipt.

Upon a visit to Rockford in September, I looked over the rather demolished papers on the eight or ten reading tables in the barracks of a machine-gun company, but was unable to find a piece of Christian Science literature, although I was told that the literature could be read in the Y. M. C. A. buildings. Many of the boys find their days so strenuous that they remain in their own quarters for the evening, and if they have right at hand a helpful Christian Science article, it does much toward setting their mental house in order after the day's work. The letters we receive are full of the accounts of the help that Christian Science is to our boy, mentally, physically, and spiritually. One told of the healing of a heavy cold in a day or two, the healing of an ear injured when he jumped from a falling horse, the overcoming of discords in his relations with the little band of men under his care, the overcoming of mental depression, homesickness, and many other things. There has been so much gratitude and joy for me in this personal distribution work that I am heartily recommending it to other subscribers to our periodicals.

## Error Cast Out of the Temple

SILAS COBB, LL.B.

MATTHEW tells us that at the time of the Passover Jesus went into the temple, where he saw various conditions which were letting the things of this world keep out of consciousness the spiritual things. When he found the people selling and buying in the temple, he made a scourge of small cords, and drove them all out, as well as the sheep and oxen. He poured out the money that had been used in the exchange of material things in the temple; he overthrew the tables upon which the money was placed for worldly traffic in the place where God should be worshiped "in spirit and in truth."

Many have tried in vain to buy happiness. After failing to obtain surcease from disease by means of matter and drugs, they have turned away in despair, and have turned toward the temple of Christian Science with a hope that they might find the "pearl of great price" and be healed. Some are not willing, however, to give up all trust in material means, but like the rich man who came to Jesus to ask what he needed in order to obtain eternal life, they go away sorrowing after they are told that they must give up all trust in material things, for they think they have great possessions. Some still have faith in material remedies; some have great fear; some pride; others fear that their friends, their churches, their relatives, or their political constituents will know about their interest in Christian Science. Some with much of this world's riches come trusting in them for the present and also for the future. Some come who are puffed up with family pride and name, believing that God needs their help to establish His kingdom on earth. They talk of how much good they could do for Christian Science if they could be healed through it, but they demand that they first be healed, before they are willing to extend this helping hand. To all such, Christ, Truth, says as of old, "Take these things hence; make not my Father's house an house of merchandise." If they do the Master's bidding, they see a great light—and are then healed.

After Jesus cast out all who sold and bought in the

Digitized by Google

temple, the blind and the lame came to him, and he healed them. But not until then! After the temple was purified the healing came, and many were made free by him who used a scourge to drive all evil out of the temple, which symbolized the true temple, the embodiment of all spiritual consciousness. Do we realize that when we enter our church and take seats before the service begins, there may be some one near us, possibly in the same pew, who has come seeking relief from sorrow or disease from which he has been suffering mayhap for years? Had we not better rid our consciousness of all disturbing thoughts before we enter the temple? Ought we not to take these things hence and purify our consciousness with love and truth? If all were to do this, the sick and sorrowing would realize the import of these words from Isaiah: "They shall obtain joy and gladness, and sorrow and sighing shall flee away."

As we press on with honest endeavor, using the scourge of small cords to drive out of our consciousness sensitiveness, malice, and evil of all kinds in obedience to the command of Christ, then sin, sorrow, and sickness will be dispelled by the Christ light. This purifying process will also reach others with whom we come in contact and those upon whom our thoughts rest.

Are we tempted to hate, and do we strive to overcome the temptation properly? If so, we are cleansing the temple. Do we cast out of thought resentment? If so, we are sweeping out the temple. Are we possessed with great fear? If so, we should remember that it is "perfect love" which casts out fear. Then the blind thought that could not perceive the truth will see the light, and the lame that could not stand erect will be given strength; and thought will soar in love, and sing in the spirit of our Leader's words (Poems, p. 4):—

O make me glad for every scalding tear,
For hope deferred, ingratitude, disdain!
Wait, and love more for every hate, and fear
No ill,—since God is good, and loss is gain.

## Declaring the Truth

W. STUART BOOTH

ALTHOUGH the teachings of the Bible make it abundantly clear that as a man "thinketh in his heart, so is he," the materialism of both medicine and scholastic theology so darkened and perverted the view of mankind that the metaphysical and true sense of all things was practically lost for centuries. The discovery, practice, and inevitable spread of Christian Science have, however, revolutionized the world's sense so far that even the doctor of medicine now agrees that the mental state of a patient is important and must be considered in many cases. Mrs. Eddy, with a radicalism born of Truth, based her teachings on the spiritual and demonstrable fact that all is Mind and its ideas, that thought conditions are the only conditions. On page 108 of "Science and Health with Key to the Scriptures" she writes, "My discovery, that erring, mortal, misnamed *mind* produces all the organism and action of the mortal body, set my thoughts to work in new channels, and led up to my demonstration of the proposition that Mind is All and matter is naught as the leading factor in Mind-science."

Jesus of Nazareth had substantially said the same thing in the words: "It is the spirit that quickeneth; the flesh profiteth nothing." His miracles, or signs, attested the verity of his words so that the people "were astonished at his doctrine: for his word was with power." Hundreds of years before this time the power of God's word was recognized and acclaimed by the psalmist, who wrote, "He sent his word, and healed them, and delivered them from their destructions." It was the psalmist also who spoke of the value of declaring the truth about God and man when he said, "I will declare the decree: the Lord hath said unto me, Thou art my Son; this day have I begotten thee."

Many Christian Scientists have found it helpful to commit to memory strong and appealing passages from the Bible and Mrs. Eddy's writings. This quite naturally causes them to turn to and use these references in clearing their thought in times of temptation and trouble. This is often referred to as "declaring the truth." But here let the student of Christian Science beware of the temptation to believe that the mere repetition of certain statements regarding God and man constitutes the declaring of the truth, or, in other words, is a Christian Science treatment. Mrs. Eddy says on page 454 of Science and Health, "Remember that the letter and mental argument are only human auxiliaries to aid in bringing thought into accord with the spirit of Truth and Love, which heals the sick and the sinner." By remembering that the primary meaning of the word declare is to make clear, the student will see, not only the true signification, but the full import, of declaring the truth. He will then be immune to the subtle suggestion of discouragement, which would come to one who has unavailingly repeated scientific statements of truth, believing himself to be thereby declaring the truth.

Certainly the memorizing of Bible verses and passages from our Leader's writings is a great help in cultivating the habit of right, orderly, and spiritual thinking. Jesus, in common with other Hebrew boys, probably learned much of our present Old Testament when but a mere youth, and his effective use of the letter, vitalized, of course, by a marvelously clear spiritual understanding, was shown early in his three years' ministry, when the arguments of the tempter were nullified by his apt use of Scripture. It is not improbable that at the hour of our Master's supreme struggle, the crucifixion, he was aided in holding steadfastly to the spiritual verities by means of repeating from the psalms to himself; for it is to be noted that the words, "My God, my God, why hast thou forsaken me?" are part of the first verse of the twenty-second psalm. Every one present there, except Christ Jesus, saw in the crucifixion nothing but the defeat and utter failure of the one from whom so much had been expected by his followers, and so it was natural for them to hear and record as his own thought and expression these words quoted from the psalms.

Of course personal sense never yields without a struggle, and Mrs. Eddy calls attention to this on page 30 of Science and Health when she says, "Born of a woman, Jesus' advent in the flesh partook partly of Mary's earthly condition, although he was endowed with the Christ, the divine Spirit, without measure. This accounts for his struggles in Gethsemane and on Calvary, and this enabled him to be the mediator, or *way-shower,* between God and men." Certainly personal sense would have had Jesus believe that God had forsaken him; for, as Paul writes, he "was in all points tempted like as we are," but the apostle straightway adds, "yet without sin;" in other words, the great Master was tempted in every conceivable way, but he never yielded to, nor was deceived by, these temptations. It was necessary during his times of struggle for Jesus to employ fully his marvelous spiritual understanding, his Christ endowment, that the evil suggestions based on the false, fleshly sense might be corrected and reversed. In that wonderfully clear exposition of our Master's struggle and triumph given in

Digitized by Google

the chapter entitled Atonement and Eucharist in "Science and Health with Key to the Scriptures" these are mentioned; but, as a matter of fact, the Master was even then standing on the very threshold of complete victory over "the last enemy," although his triumph was not seen by others until after the resurrection.

Jesus commended both the letter and the spirit when he said, "It is the spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life," and Mrs. Eddy has emphasized this truth many times in her writings. This will lead to that scientific declaring of the truth which will inevitably result in better and quicker healing; for the word of God is not only quick and powerful, it is irresistible as well.

## Listeners

LILIAN BARLOW

HE is a wise man who has learned the importance of listening with ears attuned to the harmonies of the divine Mind, and such a one only can claim to have ears that hear, or to have learned his new name in Christian Science. The right listener is the right doer; for right acting is but the result of listening obediently to the still, small voice that is ever expressing itself through divine ideas. These, when entertained, protect us from the whispered falsities of mortal mind, which would, if it were possible, crush out all expression of infinite Mind and thereby annihilate mortal man.

The careless listener is but the cat's paw of evil, for he willingly lends his mental ears to two voices,—to that which is erroneous and to that which is true,—thereby establishing a house divided against itself, a house built upon the ever shifting sands of false sense, which calls evil good and good evil. Such a one may desire to do right; and surely these desires, if sincere, are prayers which will eventually make a Christian metaphysician of him, but not until there is a humble willingness to be established upon the sure foundation of oneness with God. The chief requirement here is that transparency of thought which realizes its sonship with the loving Father-Mother God. This leads to an unshaken conviction that all sincere seekers after Truth may in turn likewise reach the same realization, thus establishing an unbroken circle of right thinking, and ceasing to be channels whereby mental malpractice may perpetuate itself. Steps firmly taken in this direction would destroy that sense of self which builds on another's defeat, whose importance is so exaggerated that it lives in an atmosphere of egotistical self-exaltation, confident that everything and everybody is at fault but himself. Unless one does claim sonship with God, he may be swept along by every gust of evil gossip, criticizing individuals and organizations alike, listening to that which would, if generally believed in, undermine individual character and constructive activities.

When consciously examining ourselves to ascertain our practice, are we not immediately confronted with these seemingly justifiable excuses, that we are seeing evil only to unsee it, and that it is necessary to uncover error? True, for Mrs. Eddy so teaches; but do we also remember her admonition to have "a charity broad enough to cover the whole world's evil," as we read on page 224 of "Miscellaneous Writings"? How necessary, then, that we ask ourselves if we are always holding to this admonition, and faithfully keeping watch lest "the little foxes" that enter in at unguarded moments and "spoil the vines" may tempt us to perpetuate their work by passing from individual to individual those seemingly insignificant suggestions which construct in thought a false concept of some one or some activity. It is much easier to see the truth rather than the lie for those we love, but how often do we unguardedly let pass wrong feelings and attitudes toward one in whom we have no interest? When called upon to unsee the lie for the latter, we find our work made doubly hard by such unfaithful watch.

It is plain to be seen, then, that to become a scientific listener one need but set self aside sufficiently to follow, if only to a degree, the potent example of the Way-shower. He was unswerving in his obedience to the voice of Truth, never lending his thought for an instant to the argument of mortal mind that it had created or could create a man who could be influenced to accept the suggestions of error. At no time in his experience did he have a greater test of his divine sonship than when they "led him away into the hall, called Prætorium," where in mockery of the prevalent belief that he claimed to be "King of the Jews," they clothed him in purple, and put a crown of thorns upon his head. He was tested in all points, yet he unflinchingly kept faithful guard over his divine trust. His years of experience made this ordeal as nothing. He rose higher in the glorious realization of his dominion as the Son of God, and opened the way for every true listener who came after him. Our revered Leader was unfaltering in her obedience to the demands of Truth, never keeping from a waiting world with its unheeding ears the second coming of the Christ, as manifested in Christian Science. The world is, and ever will be, under the greatest obligation to these two faithful witnesses of God's ever presence. The seeker after Truth cannot be too faithful to that unfailing guide and gift of gifts, the Christian Science textbook, "Science and Health with Key to the Scriptures," in which Mrs. Eddy has given every rule necessary for right listening.

This important requirement of a true metaphysician is met by consecrated application and demonstration of the spiritual significance of the letter. There must also be faithful watchfulness lest we take a halfway and halting position. Unwavering perseverance is needed in order to secure an impregnable armor against every attack of the enemy; but if there is continued obedience to the divine commands, "Thou shalt have no other gods before me," and "Thou shalt love thy neighbour as thyself," human consciousness will rise out of the suggestion of life in matter ever nearer to the sunlight of spiritual sense, and, with immortal strength, withstand error's most devastating blasts, thereby learning that all is Love—and "against such there is no law."

## "Speak gently"

FRANCES BAINES

THE good which may be done by a few lovingly spoken words, commonplace in themselves perhaps, was forcibly brought home to the writer in the following way. When leaving home to keep an appointment, she heard a voice upstairs calling, "Oh, do come here a minute!" The tone indicated that the speaker was in some difficulty, but personal sense at once whispered, "You have not time; call some one else; this will make you late." The objection was immediately silenced by recalling our Leader's injunction found on page 116 of "Miscellaneous Writings," to be "never off guard, never ill-humoured, never unready to work for God," and in an instant the answer rang out, "Yes, dear, I'll come." Truth, however, was already there, and in less time than it takes to tell, a cheerful voice called back, "Don't trouble, it's all right now; your gentle answer helped me."

The Christian Scientist then went on her way, rejoicing

Digitized by Google

in this fresh proof of the ever presence and availability of Love. She did not even know what the trouble had been, but she gave thanks that the words given to her had healed it. "Life is not so short but that there is always time enough for courtesy," Emerson tells us; but have we not many times forgotten this, and also that to "speak gently" takes no longer than to speak impatiently or curtly? This is pointed out by Mrs. Eddy on page 127 of "Miscellaneous Writings" where she says: "Wise sayings and garrulous talk may fall to the ground, rather than on the ear or heart of the hearer; but a tender sentiment felt, or a kind word spoken, at the right moment, is never wasted." Surely the hasty and ungracious words that may formerly have risen to our lips on slight provocation, are amongst some of the first things which ought to be controlled when we become students of Christian Science.

Who is there that has not felt the blessing of a kindly "Good morning," or the help of a simple "Thank you," or the uplift from a few pleasant words, it may be from a stranger, their cheer and benediction going with us sometimes throughout the day and lifting our thoughts to the One who is always loving and kind? A verse of a beautiful hymn reads:—

Speak gently! 'tis a little thing
Dropp'd in the heart's deep well;
The good, the joy, that it may bring
Eternity shall tell.

In the measure that we take to heart these words and make them a rule of our lives, we shall spare ourselves and others pain; and more of God's sunshine will be shed on all around.

## Good Will to the Soldier

KENNETH L. JEFFERY

THE present age is daily unfolding greater opportunities for the demonstration of Christian Science. It is provable to-day as in the past that divine Love really does meet every need of mankind. One of the chief problems which perhaps confronts us to-day is how to think correctly regarding those Christian Scientists who have entered the armed forces of our country.

The thing which is most necessary is to obey the command given by Christ Jesus at the grave of Lazarus: namely, "Loose him, and let him go." In other words, the soldier must not be fettered by the fears and imaginations of mortal mind. No matter how perilous a position he may seem to be in, he is a soldier of God; and he goes to fight for the right, and must be free to rise above the limitations of mortal sense. With the army of the Lord he advances upon the hosts of error. He is armed with the two-edged sword which pierces even to the joints and marrow. The hosts of error, which are in reality only the myths of mortal mind, vanish at the coming of Christ, Truth, as the mist before the rising sun. They have no power to inflict death, to destroy man's life. God is the life of man, and man cannot be separated from God.

Man's divine creator will forever preserve him. The shield of Love is his strong defense, against which the shafts of error have no power. Error cannot conquer him, for the power of the one God is with him. It is an irresistible power, overthrowing the organized schemes and machinations of those most wise in worldly ways, and freeing the peoples of mesmerized and hypnotized nations so that they are made ready for "the glorious liberty of the children of God." He who goes forth with this thought is helping to establish the brotherhood of man and to bring God's kingdom "in earth, as it is in heaven."

# Selected Articles

["And this man, what?"—*The Christian Science Monitor*, Boston, U.S.A., Dec. 1, 1917]

There is perhaps nothing the world dislikes more than minding its own business. This is, of course, largely because it has, so frequently, no business of its own that amounts to anything. That is to say, its business is not to do that which falls to it, so nearly as it may in accordance with Principle; it is rather to get through certain duties, which it quite frankly proclaims are against the grain, by reason of the very fact that they are duties, in order that it may engage in the more serious duty of amusing itself, and so in hastening the weariness and disillusionment that ultimately accrue from that also. "Blessed," Carlyle once declared, "is he who has found his work; let him ask no other blessedness." The danger is that even those who have found their work do not always surrender themselves whole-heartedly to it. "Good," writes Mrs. Eddy, on page 261 of Science and Health, "demands of man every hour, in which to work out the problem of being." But, as Mrs. Eddy is careful to point out, on page 2 of her Message to The Mother Church for 1900, an obedience to this demand is the attitude only of the right worker. The idler is, of course, quite hopeless; whilst the intermediary compromises with evil suggestion. "He says: 'It is my duty to take some time for myself; however, I believe in working when it is convenient.'"

Now working when it is convenient is not working. It is either making work a phase of amusement or using it as the milch cow of necessity. The man really at work has neither time, nor, what is much more to the point, inclination, to trouble himself about his neighbor's business. Being engaged all the day in his Father's business, the business of Principle, the opportunity for bothering about that which is outside Principle is not presented to him, nor does he seek it. Besides this he is learning joyfully and scientifically that Principle governs, and that it is no part of his work to do his neighbor's work or mind his neighbor's business. As, indeed, Mrs. Eddy admirably says on page 8 of the Message already quoted from, "We lose a percentage due to our activity when doing the work that belongs to another." It is always ignorance of Principle or vanity that leads a man to attempt to do his neighbor's work, which is only another form of minding his neighbor's business.

Jesus himself stated this with that tremendous directness with which he literally withered up all argument. It was on the occasion of that last meeting by the Sea of Galilee with his disciples, when, after having been warned by his Master of the struggle which was before him, Peter, with his accustomed impetuosity and lack of reticence, suddenly turned toward John, and blurted out the question in perhaps both their minds, "What shall this man do?" Or to adhere to the terse incisiveness of the Greek text, "Lord, and this man, what?" Jesus' reply, with its terrific rebuke and warning to human curiosity and interference to mind its own business, has come all down the centuries: "If I will that he tarry till I come, what is that to thee? follow thou me." The full signification of the Greek, as has been pointed out by a certain famous scholar, is lost in the translation. The words "tarry till I come" should rather be "tarry while I am coming." It is as if Jesus had said: I have told you what is before you; that is your affair; but supposing this man goes on learning more of the true me, of the Christ, Truth, until that Truth is fully manifested to him as to me, what business is that of yours?

The Mind of Christ is not acquired in an hour or in a

Digitized by Google

day. It comes as the reward of a man's turning his back upon this world and its lusts, and setting his face toward heaven. It is gained only as he strives and succeeds in his striving to know more of God, of Principle; and he cannot safely give to his neighbor's business, when it is not his own, one moment of that time. As Mrs. Eddy warningly writes, on page 3 of Science and Health, "The Divine Being must be reflected by man,—else man is not the image and likeness of the patient, tender, and true, the One 'altogether lovely;' but to understand God is the work of eternity, and demands absolute consecration of thought, energy, and desire."

At the same time, minding your own business does not mean a selfish aloofness from the world. It is the ordinary man's business, indeed, to be in the world, without being of it. There is a sense in which the world is every man's patient, but it is in the sense of the individual bringing himself into obedience to spiritual law, so as to demonstrate all men's sonship to Principle, by demonstrating his own sonship. In doing this, however, it is not the business of the practitioner to attempt to carry the patient on his own back into the kingdom of heaven, any more than it is to convert himself into a Holy Office for searching the patient's inner consciousness, and torturing him in the process. The true purpose of treatment is so to assure a man of his divine sonship, of his spiritual at-one-ment with divine Principle as to free him from the false beliefs of material dominion which make him sick and sinful. And the most efficacious way of doing this is to teach him how to be and how to remain about his Father's business.

Jesus made it perfectly clear that it is impossible to serve God and mammon, to be in obedience to Spirit and the flesh. Much of the subjection to the latter is caused by neglect of the former. People will not trust to Principle. They will inject their own personalities, often in perfectly good faith, into the arrangement and settlement of matters which are not their business. Of course they convince themselves easily enough that the question at issue is their business; and from this to rank interference is only a short step. Unfortunately the material appetite is always whetted by gratification up to the point when it is satiated. Consequently the habit of interference grows, and grows simply because in failing or neglecting to serve Spirit a man finds the opportunity to serve matter. He is found, in short, serving not his Father who is in heaven, Principle, but his physical father, the flesh.

✧

[Warren O. Evans in *The Times*, Pawtucket, R. I.]

In an article headed, "Explaining National Blindness," copied from the *New York Times*, many strange statements were made, among them one pertaining to Christian Science. To attempt at this late date to explain why certain, now obvious, conditions were not foreseen by the "intellectuals" of the allied nations, would seem rather childish; and would stamp the would-be critic as woefully lacking in discernment himself. For who is there egotistical enough to claim that he had perceived in advance the trend of events as they have developed during the past four years?

To say that the inability on the part of the great men among the allied nations to discern the real conditions before the beginning of this world struggle, and to make proper provision for handling them, was due to "the theory that undesirable things are created by admitting their possibility, and that they can be avoided by denying their possibility," is absurd, and is certainly not very flattering to the noble men who have ably handled the situations as they arose.

But to classify Christian Science with such a theory is entirely erroneous. Christian Science stands alone and is purely scientific, based upon fixed Principle, with definite and positive rules for demonstrating it. So that a Christian Scientist is as sure of himself in the working out of any apparent situation as is the mathematician in the solution of any problem. He would no more think of attempting to avoid or prevent anything by merely denying its possibility, than would one attempt or expect to solve a problem in geometry by blind mental effort or will power. What is needed in the solution of any problem, is acquaintance with the principle involved, and knowledge of the rules necessary for its application.

This acquaintance with God as divine Principle, and the knowledge of the truths underlying Jesus' work, are what Christian Science has revealed. Inasmuch as he was the Way-shower and left his example for us, would it not be wise and reasonable for human beings to seek first an understanding of his teachings before attempting to find a cause for any apparent condition. While Jesus was the very embodiment of compassion and love, yet he was most severe in some of his declarations of positive truth; and he distinctly said: "Think not that I am come to send peace on earth: I came not to send peace, but a sword." Some day the world will wake up to learn just what he meant by that statement; and will realize that one cannot cry "peace, peace; when there is no peace" within. Then the real cause of this world upheaval will be recognized.

Mrs. Eddy, the Discoverer and Founder of Christian Science, in "Science and Health with Key to the Scriptures," the textbook of Christian Science (p. 313), declares that "Jesus of Nazareth was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found the spiritual cause."

✧

[Peter V. Ross in *Vacaville* (Cal.) *Reporter*]

The evangelist whose remarks appeared in part in the *Reporter*, contends that Christian Science is inconsistent with the Bible and has its source elsewhere than in the Scriptures. As to the source of Christian Science, it will be remembered that some fifty years ago Mrs. Eddy, when apparently near the end of human existence, turned to the Bible for help, and while reading the gospel accounts of healing performed by Jesus, suddenly found herself restored to health. She then determined, if possible, to discover the law back of her healing and to understand the science practiced by the Master in effecting his remarkable cures and other works.

Speaking of this experience, Mrs. Eddy has said (Science and Health, p. 109): "I knew the Principle of all harmonious Mind-action to be God, and that cures were produced in primitive Christian healing by holy, uplifting faith; but I must know the Science of this healing, and I won my way to absolute conclusions through divine revelation, reason, and demonstration." On page 110 she continues: "In following these leadings of scientific revelation, the Bible was my only textbook. The Scriptures were illumined; reason and revelation were reconciled, and afterwards the truth of Christian Science was demonstrated."

It is clear from this that Mrs. Eddy in discovering and founding Christian Science has not gone outside the inspired pages of the Bible. In fact, one can hardly read her writings without being irresistibly drawn to the Scriptures for further investigation; and as one pursues such course he begins to see that the healings narrated in the Bible were based upon Principle, that its science can be understood by all people in all ages, the present included, and, better than all, that

Digitized by Google

one can put in practice this science in proportion to his understanding of it.

In stating that Christian Science is not consistent with the Bible, the evangelist insists that the Bible describes God as having eyes, hands, and other members making up a corporeal body. It is undeniable that the Bible speaks of the hand of the Lord and the eye of the Lord, but are not these expressions to be taken figuratively rather than literally? Is it not reasonable to say that the word hand is used metaphorically as signifying spiritual power, and eye as spiritual discernment?

It is difficult to reconcile the notion of Deity in the form of a human being with the Bible description of God as omnipresent. How could Deity, in the shape of mortal man, meet the requirements of omnipresence? Yet the Bible clearly declares that God is everywhere present, and moreover has all power and all knowledge. Hence it is that Christian Science defines Him as: "The great I AM; the all-knowing, all-seeing, all-acting, all-wise, all-loving, and eternal; Principle; Mind; Soul; Spirit; Life; Truth; Love; all substance; intelligence" (Science and Health, p. 587). Taking this view of Deity, one can understand the Bible statements that in Him we live, move, and have our being; that He is a very present help in trouble; and that He healeth all our diseases.

✧

[Albert F. Gilmore in *Lynbrook* (Long Island, N. Y.) *New Era*]

In a recent issue, in reporting the activities of the Training Camp for Young Christians, established by St. James Church, notice is given of a meeting to be held at which there will be a discussion of "Christian Science and Other Modern Aberrations." The propriety of so characterizing a religious denomination which has done and is doing so much to stimulate real Christian activity in healing and saving mankind from its self-imposed sin, disease, and woe, might well be questioned. The real issue is this: To what extent have our critics taken up the real discipleship of the Master? Have they obeyed to the letter his injunction to heal the sick and cleanse the leper? Have they brought forth the "signs" which he declared should "follow them that believe"? If so, then their works will justify them. It is just this healing and saving work that Christian Science is doing in the world; and no amount of condemnation or fine contempt will undo it. "I will shew thee my faith by my works," is the watchword of every earnest Christian Scientist, for he perfectly well knows that "faith without works is dead."

One must be quite sure of his ground before presuming to tear down that faith in God and His Christ which many earnest men and women are finding the sure way to salvation. On page 104 of "Miscellaneous Writings," Mrs. Eddy says, "In obedience to the divine nature, man's individuality reflects the divine law and order of being. How shall we reach our true selves? Through Love. The Principle of Christian Science is Love, and its idea represents Love. This divine Principle and idea are demonstrated, in healing, to be God and the real man."

✧

[Robert G. Grant in *Arizona Republican*, Phoenix, Ariz.]

The teachings of Christian Science are based entirely on the Bible. Before becoming a member of any Christian Science church, the applicant must subscribe to six tenets, the first of which reads as follows, "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (Science and Health, p. 497). In accordance with instructions contained in the Manual of The Mother Church, by which all branch churches are governed in such matters, the children in the Sunday school must be taught the Scriptures, and their first lessons include the Ten Commandments, the Lord's Prayer, and the Sermon on the Mount. Teachers of adults are directed to enjoin their students habitually to study the Scriptures. In her textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy says (p. 547), "The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained."

From her earliest childhood Mrs. Eddy was a devoted student of the Bible, and for three years preceding her writing of Science and Health she searched the Scriptures and read little else. Instead of Christian Science being destructive to the faith of many in the Bible as the word of God, as claimed by our critic, thousands testify that the study of Christian Science has given them a living faith in the Scriptures.

✧ ✧ ✧

## Extracts from Letters

"Inclosed find a draft for five dollars from a small circle of students who are glad to add their little to help on the work of relief. We are far from any church or society, but feel we have so much to be thankful for that we must give it expression in some way."

"We are grateful for the opportunity to pay a little on the debt of love which we owe to every activity of the Christian Science movement, and thereby to support 'that institution' which so wonderfully to-day 'affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science' (Science and Health, p. 583). In doing this we are beginning to see how 'beautiful for situation' our church is.

"Please divide the amount of inclosed check between the Real Estate, the Christian Science Benevolent Association, and the War Relief funds."

"Inclosed you will find check for $851.32, which is the amount received from a special collection in this church and is to be applied to Christian Science activities in Army and Navy camps.

"You will also find check for $1020.51, which is the combined amount of two Sunday collections and is to be devoted to The Christian Science Benevolent Association fund."

"For the contribution received from the War Relief fund in Boston, through the distribution committee at Winterthur, and to all kind benefactors, I wish to express my deepest gratitude. This beautiful religion of loving one's neighbor as one's self has already blessed with financial help thousands who are heavy-laden, and proves anew the never failing supply of the kind Father.

"My deepest gratitude to God I wish to express through daily living and helping to build up this true Christianity, as our beloved Leader, Mrs. Eddy, lived and taught it."

"I wish to express my gratitude to God for the many proofs of divine Love which have helped me in times of great distress. As my earnings were always scant I was doubly grateful to receive support in the way of money, in such a grievous time as this. While I do not wish to underrate the material worth of the gift, it is a benefit to feel divine Love in this way. Daily I feel more grateful to God in that he always cares for His children. I am also deeply grateful to Christian Science for all the good which I have received therefrom."

## "The hoar fight is forgotten"

THE quotation which heads this article will be found on the tenth page of Mrs. Eddy's published poems. Its author was both poet and prophet, but she never took poetic license to declare other than truth, and as a prophet she spoke truth at the very moment when people were saying, It is not so. The prophet testifies of the unseen verity, the appearing fact, which eventually all shall know, from the least to the greatest.

The unavoidable, irresistible struggle for liberty has had its vicissitudes. It will finally be interpreted to the world by those who speak the language wherein Christian Science was proclaimed and explained. Ever since the Bible was translated into English, the effort to establish freedom has had promise in it. Why? Because the struggle has become less personal, not as king against king, or barons grouped against a king, or people struggling against a bishop. It has become the effort of those who dimly grasped Principle, struggling up and through the hindrance and persecution of those in no wise understanding it, hence misled to serve the carnal mind in order to preserve its cruel dominion. This carnal mind is well illustrated in the career of the unscrupulous prince of this world who boasts of robbery, cultivates suavity in lying, and makes treachery his delectable art. Such a one was he whose published ideal was, "One takes when one can, and one is wrong only when obliged to give back."

From among those who found such ideals of kingly license commendable came foreign speaking heirs to a throne supported by men for whom the English Bible was the standard of their speech. Of the spiritual import of the Bible they may not have grasped a great deal, yet somehow they breathed freer breath because of it. Already many had gone from them to a new land as pilgrim fathers (and pilgrim mothers), calling the Bible their Magna Charta. In spite of attitudes of religious tyranny in this new-forming society, the leaven of liberty worked quickly, transforming men in spite of old habits and customs. So when the time for quick decision arrived, behold, they stood forth with courage. Their stand was against a king brought up to believe that a king must rule or ruin. His kingly power was visibly supported by mercenary soldiers, sold for a price by a princeling who had this power over subjects. The end of the contest was as it had to be, and a great republic began to be born.

What prophet could have foretold that the grouping of little nations, which the separate states were, would grow to a union of hearts and minds indissoluble, and make ready for the coming of Christian Science, and furnish its retinue and support? Who could have known that the mother country itself, by painful evolution, would learn to parallel this experience and establish freedom in the hearts of its citizens the world around so that Christian Science could be accepted by them with the ready mind and the understanding heart? In that dominion which is from sea to sea, in that island itself a continent, in that commonwealth, or union, wherein former enemies are now its ministers and the defenders of its integrity, in the isle where is the visible head of the Britannic Alliance, as well as in the continent-wide oldest republic, there is known the uniting power of divine Principle, because what Mrs. Eddy has said (Science and Health, p. 340) is becoming ever more clearly understood: "One infinite God, good, unifies men and nations; constitutes the brotherhood of man; ends wars; fulfils the Scripture, 'Love thy neighbor as thyself;' annihilates pagan and Christian idolatry,—whatever is wrong in social, civil, criminal, political, and religious codes; equalizes the sexes; annuls the curse on man, and leaves nothing that can sin, suffer, be punished or destroyed."

The wrong ideal for government which by the liberated men in the new land and by the thoughtful men in the old country whence they came was resisted, has in one environment been able to grow like an unhindered weed, till even the purblind pacificist can see its character. Its action is governed by that oldest motto of priests, "Let us do evil that good may come." It defines good quite wrongly, naming it human power and glory. That definition calls for world-wide treachery, injustice, cruelty, hatred, brutality, timed and calculated to produce fear, which in turn is expected to produce submission to power. The good conditions desired by autocracy in church or state require ignorance and superstition (hence the mesmerism of abject fear) in the minds of the many so that power may be supreme in the hands of the few, and they may believe that they sit in the seat of God.

To this false ideal the people who read the English Bible will never submit. They cannot were they to try. In the fight for the welfare of their homes and the liberty of the world they do not count their lives dear unto themselves, and those who read the English Bible are inevitably united the world around by its enlightening influence. When the representative of the Britannic Alliance takes part in the celebration of the Independence Day of the United States it is the sign that now is true outwardly what Mrs. Eddy saw inwardly and knew to be true when she said:—

> The hoar fight is forgotten;
> Our eagle, like the dove,
> Returns to bless a bridal
> Betokened from above.

This brings us to remember that when our Leader said she had prayed "that all the peoples on earth and the islands of the sea have one God, one Mind; love God supremely, and love their neighbor as themselves" (Miscellany, p. 286), she also declared, "It is unquestionable, however, that at this hour the armament of navies is necessary, for the purpose of preventing war and preserving peace among nations."

WILLIAM P. MCKENZIE.

## The Gift of God

THERE can be no question that the love of life comes to us consciously and unconsciously from our earliest hours; and this is right, for despite the many human misconceptions of life, man's life can only be truly known as the gift of God; indeed Christian Science makes it clear that God is man's Life, and that man lives truly only as he reflects the divine Life. In the first epistle of Peter we read: "He that will love life, and see good days, let him refrain his tongue from evil, and his lips that they speak no guile: let him eschew evil, and do good."

Digitized by Google

We cannot overlook the fact that life was the theme upon which the Master dwelt continually; he said that his mission was to bring more abundant life to humanity, and this he did in the healing of all manner of sickness and disease, and even in the overcoming of death itself. In that memorable interview with the Samaritan woman at Jacob's well we find that he took occasion to present this great theme when the Samaritan woman refused to give him a drink of water. To this he responded: "If thou knewest the gift of God, and who it is that saith to thee, Give me to drink; thou wouldest have asked of him, and he would have given thee living water." Although Christ Jesus constantly directed all thought toward life in its spiritual sense, which means eternal life, he was not inconsistent when he declared, "He that findeth his life shall lose it: and he that loseth his life for my sake shall find it." To the Christian Scientist this would mean that one must give up the material sense of life in order to gain life spiritually, but this does not mean that one must pass through the experience called death in so doing.

In Christian Science we learn beyond question that Life is not in matter nor dependent upon matter, and it is only as we demonstrate this vital truth that we can find the life which is truly the gift of God, which is God's idea understood and demonstrated. A good deal of the religious teaching of the past was to the effect that we must not love life, but must accept the thought of death as of divine ordination and purpose, and this mistaken belief was responsible for much of the hopeless illness experienced by mankind the world over. It was too often believed that God indeed gave life, but also took it away, in spite of the fact that there is nothing in the Master's teachings to support this supposition, for Jesus said in the most unequivocal terms, "If a man keep my saying, he shall never see death."

From the Christian Science viewpoint it is assuredly right to love life as life was known by Christ Jesus and as it was understood by Mrs. Eddy when she gave to the world "Science and Health with Key to the Scriptures," also her other writings, which are doing such marvelous service to humanity at this hour,—which indeed have been blessing all the world for the last half century. On page 253 of our textbook we find this declaration of divine Love: "I give life, without beginning and without end, for I am Life." In one of Tennyson's Idyls we find King Arthur speaking of his life in this wise:—

> . . . this life of mine
> I guard as God's high gift from scathe and wrong.

It is most certainly right to guard this gift of God from scathe and wrong of every sort, and our guardianship must mean the utter exclusion of all impurity in thought, word, or deed, that thus the divine Life may be reflected by us in eternal life, for this was undeniably the full purpose of our Master's glorious ministry. It also goes without saying that we should unceasingly avail ourselves of the protection of life-giving Truth against sin, disease, accident, or "the destruction that wasteth at noonday,"—wherever the paths of daily duty may call us.

In his epistle to the Romans, Paul echoes the Master's teaching when he says, "The gift of God is eternal life;" and we should never forget that the life which God gives means joy and strength, with such clearness of mental vision that we may at all times discern the real, whatever be the evidence presented by material sense. In John's apocalyptic vision, Life in its fullness and grandeur was dawning upon him, and he could see the utter fading out of all the delusions which are not and never were any part of Life or its manifestation; and so he records with sublime confidence the words: "To him that overcometh will I give to eat of the tree of life, which is in the midst of the paradise of God."

ANNIE M. KNOTT.

## What Hast Thou Done?

EVERY advancing Christian hears the searching question, Hast thou been jealous of thy brother's gift? Hast thou been wroth, and has thy countenance fallen because thou hast seen in another and hast not demonstrated in thine own life that which Abel typifies: "Watchfulness; self-offering; surrendering to the creator the early fruits of experience" (Science and Health, p. 579)? Human consciousness is exposed to the danger of harboring Cain. Merely naming the name of Christian Scientist does not master this inclination, but the spiritual understanding for which Christian Science stands does uncover it and provide the remedy.

On pages 540 and 541 of the Christian Science textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy writes: "Cain is the type of mortal and material man, conceived in sin and 'shapen in iniquity;' he is not the type of Truth and Love. Material in origin and sense, he brings a material offering to God. Abel takes his offering from the firstlings of the flock. A lamb is a more animate form of existence, and more nearly resembles a mind-offering than does Cain's fruit. Jealous of his brother's gift, Cain seeks Abel's life, instead of making his own gift a higher tribute to the Most High." The destructive criticism which Cain typifies spares not the oil and the wine, respects neither mother nor child, neither compassion nor joy. It takes the brother's nobler gift and tries to make out of it the worst; it condemns Mary for having chosen the better part; it ostracizes the repentant publican; it doubts the wisdom of Jesus in associating with sinners, and at his crucifixion, at the moment of his triumph over death, utters the ill-timed taunt: "He saved others; himself he cannot save. If he be the King of Israel, let him now come down from the cross, and we will believe him. He trusted in God; let him deliver him now, if he will have him: for he said, I am the Son of God."

One can imagine this jealousy of the Cain consciousness prying into the sanctity of Jesus' struggle in the Garden of Gethsemane and seeing him fall on his face, and sweat "as it were great drops of blood," criticize this weakness of the flesh. Jealousy of spiritual progress is capable of calling woman's fidelity at the cross and the sepulcher both a waste of time and a delusion. What hast thou done? is the question which turns the light upon error.

Every Christian Scientist who is helping forward the progress of the movement has put the destructive criticism of Cain behind him and is bringing his self-offering to the only true God. The admonition of the Master rings in his ears: "Feed my lambs. . . . Feed my sheep." When he is inquisitive about the demonstration of a fellow Scientist and asks, "Lord, and what shall this man do?" the answer comes sharp and clear, "If I will that he tarry till I come, what is that to thee? follow thou me." Those who advance find themselves in each other's company. Those who hang back are left behind; there is no alternative. The effort to retard the spiritual growth of others by forcing them to conform to the standard of Spirit's opposite rebounds upon the critic. The question is always, What hast thou done? not, What has thy brother done?

The belief that existence is material leads to the acceptance of material law, so called. Human beings grouping

Digitized by Google

themselves in families, communities, and nations are in danger of subjecting themselves to material religion, material medicine, and material science. But the teaching of Christ Jesus substituted for mere human concepts the family of those who "do the will of my Father which is in heaven," the medicine of Him "who healeth all thy diseases," the new nation of "devout men, out of every nation under heaven." The destructive criticism of Cain seeks to hold the followers of scientific Christianity to the outlived laws and traditions of the elders, or to slay them for their obedience to God. As the Christian Science textbook puts it (p. 541): "The erroneous belief that life, substance, and intelligence can be material ruptures the life and brotherhood of man at the very outset."

The remedy is simple. It is summed up in the homely phrase, minding one's own business, making real business being about the Father's business. Unless we are actually putting into practice the teachings of Christian Science, we cannot understand Abel's offering. As long as Christian Science is viewed merely as an acceptable philosophy of life or as a convenient religious belief, which has now received the world's approval, the fratricidal war will continue; but in obedience to God there is unity and the complete reflection of the divine Father-Mother.

WILLIAM D. MCCRACKAN.

# Among the Churches

## Current Notes

DAYTONA, FLA.—Dedicatory services were conducted this morning [March 31] in the Christian Science church at Live Oak and Palmetto Avenues, payment on which has just been completed. The building has been in use since the first of last year. The edifice and furnishings have cost approximately seventeen thousand dollars. The auditorium proper is furnished with opera chairs, and can seat about five hundred.

Christian Science was first introduced in Daytona in October, 1898, when a devout Christian woman who had been a semi-invalid for many years was healed through reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. A few months later, services were first held in a private home, and in 1903 a hall on Beach Street was secured to accommodate the increased attendance. On January 6, 1911, Christian Science Society of Daytona was organized, and the Palmetto Clubhouse was secured in which to hold services. During the winter of 1915 the lot upon which the church stands was purchased and paid for. In the spring of 1916 plans were obtained and the contract was let for the building. The corner stone was laid on July 10, 1916, and the completed structure was ready for occupancy at the close of the year. On January 5, 1917, First Church of Christ, Scientist, in Daytona, Florida, was organized and immediately began to hold services in this beautiful church home.—*The Daytona Journal.*

LIBERTY, MO.—A service dedicating the church building was held April 14.

ALTON, ILL.—The members of First Church of Christ, Scientist, having liquidated the debt incurred in acquiring and remodeling for their church uses the building at 533 East Tenth Street, selected Easter Sunday [March 31] as the time for the formal dedication of their house of worship. The Christian Scientists purchased the property last summer and remodeled it to suit their purposes. They have transformed it into one of the prettiest and most comfortable houses of worship in the city. The first service in the new church was held September 30, 1917.—*Alton Telegraph.*

EVANSTON, ILL.—First Church of Christ, Scientist, Chicago Avenue and Grove Street, was dedicated March 31. The corner stone was laid November 27, 1912, and the first service in the building was held Sunday, November 16, 1913.

EL CENTRO, CAL.—The board of directors of First Church of Christ, Scientist, met last evening [May 3] and decided to postpone indefinitely the plan to build on the lots at Seventh and Olive Streets. This action was taken in connection with the Government's request to postpone unnecessary building operations at the present time. The money in the building fund was immediately invested in Liberty Bonds. The membership will continue to contribute to the building fund, but the proceeds will be put into Liberty Bonds or such other form of investment as will aid in the successful prosecution of the war.—*El Centro Progress.*

BELLEVUE, OHIO.—With a large congregation in attendance and impressive ceremonies, the building erected on West Main Street by the Bellevue Christian Science Society was formally dedicated Sunday morning [May 19]. It had been in use for some time for meetings of the society, but the dedication was delayed until all debt in connection with its erection had been removed. The building itself, 30 by 50 feet, is constructed of stucco, and has a seating capacity of one hundred and twenty persons.—*The Belleville Gazette.*

OSSINING, N. Y.—Last Sunday [May 12] Sing Sing Prison quietly celebrated the fifth anniversary of the inauguration of Christian Science work in the big institution. Five years ago Christian Science services were started there, and they have continued in existence since that time, continuing to grow steadily, until now there are a large number of regular attendants at the services.

*The Democratic Register.*

CLEVELAND, OHIO.—A report of the Comforts Forwarding Committee of the Christian Scientists, a war relief organization, yesterday [May 11] showed that members of the committee have knitted 1163 sweaters, helmets, trench caps, etc., since November. Eight boxes of clothing have been sent to Belgian refugees and twelve dozen undergarments have been sent to Belgian children.

*Cleveland Sunday Leader.*

# The Lectures

NEW YORK, N. Y. (First Church).—Virgil O. Strickler, lecturer; introduced by Campbell MacCulloch, who said in part:—

Not long ago, during the course of an interview, one of the prominent attorneys of this city told me that in his opinion the affairs of the country—and in fact of the world at large—were being more and more influenced by the practice of Christian Science. He went on to say that he knew little of the teachings of Mrs. Eddy, but he was certain that the presence of many thousands of right thinking people endeavoring to apply the fundamentals of Christian Science to their daily lives must have a radical effect for good upon any community, and that in his opinion the moral changes that have swept the country of late years were due largely to this influence.

Digitized by Google

The recent passage by the Congress of the United States of a national prohibition amendment is but another indication of the influence of right thinking upon the conscience of the land. Largely the work of Christian Science is the building up and improvement of character, and the gradual elimination of all diseases and discords from the human consciousness and the body politic. On page 348 of her textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy has said, "I have never supposed the world would immediately witness the full fruitage of Christian Science, . . . but this I do aver, that, as a result of teaching Christian Science, ethics and temperance have received an impulse, health has been restored, and longevity increased. If such are the present fruits, what will the harvest be, when this Science is more generally understood?" Christian Scientists believe that national prohibition is one of the fruits of this harvest, with many more in prospect.

MINNEAPOLIS, MINN. (Society, University of Minnesota).—Dr. Walton Hubbard, lecturer; introduced by Dr. W. F. Holman, professor in the College of Engineering, who said in part:—

We of the University and of the University community should, on account of our privileges, be special seekers after truth. We are encouraged to seek for truth in the sciences, in literature, and in the arts, wherever it may be found, and to be able to recognize and accept the truth as it may appear. As earnest seekers after truth, we quite naturally turn from the material to the spiritual, from the temporal to the eternal. We are fortunate to have with us to-day one so well qualified to explain the great truth of Christian Science.

SEATTLE, WASH. (Third Church).—William D. Kilpatrick, lecturer; introduced by R. E. Forbes, who said in part:—

The doctrine of Christian Science as presented to the world to-day holds out to humanity the correction of every phase of moral and physical discord through the gaining of a more scientific understanding of life, as exemplified by Jesus of Nazareth, "the most scientific man that ever trod the globe" (Science and Health, p. 313). Christian Scientists are proving the truth of this doctrine by its practical application in the solution of daily problems of every description, the only limit to their scope of activity being their ability to grasp the fundamentals of this great teaching as demonstrated by Jesus.

NEW YORK, N. Y. (First Church).—John W. Doorly, lecturer; introduced by Albert F. Gilmore, who said in part:—

Christian Scientists are profoundly grateful to Mrs. Eddy, the Discoverer and Founder of Christian Science, for the teaching that has enabled them to come into that understanding of God and man which makes available His protecting power under all circumstances, in whatever condition of peril or disaster. To their full satisfaction it is being proved that dwelling "in the secret place of the most High," man does "abide under the shadow of the Almighty," and so abiding "there shall no evil befall" him nor "any plague come nigh" his dwelling.

INDIANAPOLIS, IND. (Third Church).—Frank Bell, lecturer; introduced by Mrs. Elizabeth Miller Groninger, who said in part:—

Your presence indicates a desire for a larger understanding of the divine laws of Life, Truth, and Love which, "reduced to human apprehension," as Mrs. Eddy tells us on page 471 of Science and Health, she has named Christian Science. These spiritual laws, or the divine order of right thinking, are the spiritual interpretation of the Bible, which she has adapted to the thought of the age, and which, when understood and correctly applied, will solve harmoniously every discordant condition to which mankind is heir.

MAPLEWOOD, N. J. (Society).—John Randall Dunn, lecturer; introduced by Samuel J. Macdonald, who said in part:—

Christian Science illumines the Scriptures. It gives vivid and vital meaning to the recorded experiences of the patriarchs, judges, kings, and prophets. It raises these experiences out of the cerements of circumstance into the immortal reality of spiritual truth, so that instead of mere picturesque stories of bygone, far-off days, they become living demonstrations of eternal truth. Thus in our present day problems we find light and aid, help and healing, in the study of the problems met and solved by patriarchs and prophets.

PEORIA, ILL. (Second Church).—Prof. Hermann A. Hering, lecturer; introduced by E. A. Johnson, who said in part:—

In our study of religion we find a few individuals who stand out as milestones on the way. Moses labored to establish the idea of one God, Elijah overthrew the worship of Baal and developed the idea of an infinite incorporeal God, and Christ Jesus demonstrated the allness of God and the perfection of man. He proved by his work that he had the true conception of God and man. Only recently have these works been resumed. This has been made possible through the work and writings of Mrs. Eddy.—*The Peoria Star.*

SAN FRANCISCO, CAL. (Eighth Church).—Clarence W. Chadwick, lecturer; introduced by Mrs. Elizabeth A. Ross, who said in part:—

So comforting is its message and so joy inspiring are its promises, that the subject of Christian Science becomes of more importance to the world to-day than any other subject. This understanding of the Science of Christianity comes to us with healing in its wings. It presents to the world a sovereign remedy for sin, disease, disaster, and the various other ills of the flesh to which humanity is heir.

MCMINNVILLE, ORE. (Society).—Paul Stark Seeley, lecturer; introduced by Charles Ladd, who said in part:—

Christian Science, discovered by Mary Baker Eddy, demonstrates that the one God lovingly maintains and sustains His creation; that man can receive into his individual consciousness the understanding which Jesus had of the one God; that he can and must have that Mind in him "which was also in Christ Jesus," to enable him to possess here on earth the peace and harmony of the kingdom of heaven set forth in the writings of Mrs. Eddy.

## Lectures to be Delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

ALASKA—Skagway: Church Edifice, Main Street and Fourth Avenue, 8:30 p.m., July 12.

MASSACHUSETTS—Ayer: Town Hall, 3:15 p.m., June 30.

NEW YORK—Hempstead, Long Island: Church Edifice, Fulton Avenue and Franklin Street, 8 p.m., July 2.

WASHINGTON—Centralia: Church Edifice, Main and Rock Streets, 8 p.m., July 5 (note change).
Friday Harbor: Fribor Theater, 8 p.m., July 2.

Digitized by Google

# Testimonies of Healing

My desire is to share with others the good that has come to me from the study of Christian Science. I had never been a thorough student of the Bible, only reading it occasionally and especially the New Testament; but I revered it because my early teaching had been that it was the Word of God and that I must believe it whether I understood it or not. This blind belief and faith were not very satisfying, and as my daily problems grew and there seemed to be no answer, I finally began to investigate Christian Science.

My first reading of the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, seemed rather laborious on account of the new vocabulary it required me to become familiar with; but I was greatly impressed by the beauty of language and thought and the choice of words; also by the various subjects discussed with freedom and authority. The chapter on Prayer revealed to me the God I had long sought, and true communion with Him became an inspiration. Here was encouragement for every right thought and desire, and a rebuke for every wrong thought; but most wonderful of all, I learned the way to get rid of the wrong thought. Many writers had brought to our attention the evil of the world, and certainly we could see far too much of it ourselves, but no one before Mrs. Eddy had shown us how to get rid of it.

While this was occupying my thought, glasses that had been fitted for my eyes on account of an injury to one of them which had caused a great deal of trouble, were put aside almost unconsciously, and my eyes were used in close work from eight in the morning until twelve at night with no bad results. Chronic bowel disorder, catarrh, lumbago, colds, and sick headaches from which I had suffered almost every other day since starting to go to school, disappeared, and I began to prove something each day of the truth of being. The realization that this law of God which I was learning about was lessening the seeming power of evil throughout the universe, and that now the brotherhood of man could be seen, brought a sense of gratitude and happiness which surpassed everything else; and a greater desire to live and reflect this truth—this Comforter which Jesus promised he would send to us—became uppermost in my thought.

I love and understand the Bible better every day, and deeply appreciate the work of our revered Leader, Mrs. Eddy, in giving us Science and Health, and her wonderful foresight and sacrifice in establishing and safeguarding so effectively the Christian Science movement. For the Manual of The Mother Church, and for the *Monitor,* the greatest newspaper in the world, I am very grateful.

(Miss) RUTH E. PATTON, Kansas City, Mo.

✧

It is with a very grateful heart that I testify to the healing and regenerating power of Christian Science. I suffered for some years from throat trouble; there was a growth on the windpipe which gradually began to flatten it and to cause continual irritation, also choking attacks which almost amounted to suffocation. The best advice obtainable was sought, and at last I was advised to have an operation, which I objected to very much and put off as long as possible. Consent was given at last because of the great fear that one of these attacks would end my life. The operation, however, did not relieve me of the alarming attacks, and for three years I struggled on. I went to London for further advice, only to be told that half of my throat was paralyzed and there was no hope of recovery.

Just here a friend told me of her wonderful healing in Christian Science, and asked me to try it. At first I began to fear it would take from me the only God I knew, but I bought a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and began to read it very carefully and prayerfully, and soon found that Christian Science teaches us that God is the all-knowing, all-wise, all-loving Principle. About three weeks later it suddenly dawned on me that I was healed; there was not a bit of evidence of the old trouble. That was five years ago and I have enjoyed good health ever since. It is a great joy to be able to lead a busy, useful life after being an invalid so many years. Many minor ailments have been promptly overcome by the application of the truth.

I am very, very grateful for the understanding I have gained of the wondrous love of God through the teachings of Christian Science.—(Miss) ALICE MARY MOORE, Monkseaton, Northumberland, England.

✧

With a deep sense of gratitude I write this testimony in the hope that my experience may help others who are seeking the truth. From childhood I suffered from stomach trouble and had considerable pain. I was always on a strict diet, but in spite of care and watchfulness never became strong. About two years ago a well-known specialist advised an operation, diagnosing my case as chronic appendicitis. Instead of becoming a well man after the operation, however, I became worse; the pains were more severe than ever. I also suffered from bowel trouble, which I never had before, and became so miserably weak that I was a physical wreck. A few months later, observing that there was no improvement in my condition, this physician expressed his opinion that I was suffering from colitis, and that the appendix was not the cause of the pain; but by way of consolation he added that since the appendix had been removed it surely could not trouble me again. He then advised another method of treatment, which was very painful, and I had to remain in bed constantly for a week, my only nourishment consisting of a glass of buttermilk every two hours. The end of the week found me in a very weak condition with no sign of relief; in fact, I was gradually becoming worse.

At this period I changed doctors. This doctor found me very much underfed and a nervous wreck. During his treatment I improved somewhat, but again suffered a relapse. Besides stomach trouble, sleeplessness had developed, the latter covering a period of about nine months. The strongest opiates were of no avail, having absolutely no effect, except to leave me in worse shape each time. I grew very despondent and at various times had suicidal intentions.

My dear sister-in-law then told me of the wonderful healings Christian Science was bringing about and begged me to take it up. I certainly had no more faith in doctors, so immediately wanted to know something about it. That evening my wife borrowed from the reading room in the vicinity a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I began at once to read the book, but it was difficult for me to grasp its meaning. I therefore thought it best to visit a practitioner, and words cannot express how deeply interested I was when this loving woman unfolded the truth to me concerning man's relation to God. About a week later I purchased a copy of Science and Health, also a Bible, which I had never read. In about ten treatments I improved wonderfully; so much so that I felt reborn. I have been entirely healed of the stomach trouble, and sleeplessness is yielding to the truth.

Digitized by Google

I am thankful not only for the physical healing I am receiving each day, but also for the spiritual uplift. Christian Science has made me love my neighbor as myself, and I am a more loving son and a more loving husband. I am so grateful for all our literature, for the lectures and the church services, to which I so longingly look forward, because I well know the spiritual understanding one derives from them. What impresses me most is the evidence of the loving regard in which one is held by Christian Scientists everywhere. For all these blessings I am most thankful to God and to Christ Jesus the Way-shower. I am also grateful to Mrs. Eddy, who so unselfishly gave to the world a religion which when rightly applied meets every need, and to all those beloved ones who have helped me to a knowledge of Truth. My daily prayer is to live close to God, to understand and to be obedient to His laws.—JULIUS BARIN, New York, N. Y.

✧

Words cannot express what Christian Science has done for me. After refusing to live in blind faith, I became an agnostic, and it was out of mere curiosity that I took up the study of Christian Science. With the change of thought which is inevitable, I was healed of rheumatism of the throat, after one of the foremost throat specialists had pronounced the trouble incurable.

There have been many physical healings in our family, but these are secondary compared to the wonderful spiritual enlightenment and understanding that has come to us. I am deeply thankful to God for it all, and grateful to Mrs. Eddy for her untiring and unselfish devotion to mankind.

(Mrs.) ALBERTA MASTERS FULMER, South Orange, N. J.

✧

Impelled by a sense of gratitude and the hope that it may be helpful to others, I give this testimony in recognition of the power of Truth and Love to heal and bless. On November 5, 1916, following a strenuous two months' care of my sister's children, aged respectively three and six years, through a siege of typhoid fever, during most of which time the younger was alarmingly ill, I, too, succumbed to the disease. I am convinced I would never have survived medical treatment, for I did not have the vitality to withstand the ravages of the disease, with which I was fully conversant, being a trained nurse. My last conscious request and stand was for Christian Science treatment, and I entertained not a doubt or fear of the outcome. The practitioner, many miles away, was written to and also asked to send a Christian Science nurse to care for me. In compliance with material laws a doctor was called to diagnose the case, and unhesitatingly pronounced the ailment typhoid fever. I ate almost nothing for four or five weeks, but was given whatever I thought I might relish. While for a time I was so ill that my passing on seemed imminent, yet on the sixteenth day I was able to rise, walk the length of three large rooms to the bathroom, have a warm bath, and walk back again. The next day I sat out on the porch for some time, and in that same week I took the train, in company with my nurse, for Berkeley, a distance of about one hundred and forty miles. For at least two weeks after my arrival I was too weak to write a legible hand; then followed an exceedingly sore and painful condition of my leg, but this also was overcome. Abscess in the ear, with subsequent deafness, and chronic bowel trouble were also overcome. I am now and have been for some time enjoying health, and have regained my normal weight.

I have received immeasurable benefits, mental as well as physical, through the study of Christian Science, and my prayer is that I may grow in grace and a knowledge of the truth until I become a worker worthy to toil in God's vineyard. I am most grateful for the daily manna provided in the study of the Bible and our periodicals, and to Mrs. Eddy, whose consecrated life has made this blessing available to us.—(Miss) MYRA E. HOPKINS, Berkeley, Cal.

✧

In November, 1913, I was told by the physician who had operated on me nine months before that I would have to undergo another operation and then rest for three months. A friend inquired of him the next day what my condition would be at the end of that period, and his reply was that I probably never would be well. That evening she asked me to try Christian Science first, and after she had talked with me for some time, to please her I promised to see a practitioner, and made arrangements to do so the following Monday, the first day of December.

I was not confined to the bed, but suffered intense pain every minute; and on the way to the practitioner I kept thinking how useless it was to try anything else. After entering the practitioner's home, however, I had a sense of peace that I had never known before. She talked with me for a while, telling me that God is Love and does not send illness to His children (I had been taught that He did), and then asked if I wanted treatment. I did not know what that was, but thought if it meant any more of the peace that had come to me, I wanted it; and I answered, "Yes." I did not know then that this was the peace which Jesus tells us about in the fourteenth chapter of John.

On the way home I realized that I was walking much straighter than I had walked for some time; and thinking over what I had heard, the thought came to me that I was really God's child, and was getting ready to live, not die. Within two weeks I was completely healed of the condition which had led me to ask for treatment, and during that time the bowels, which had troubled me since childhood, became normal also. The following April my eyes were healed. I had worn glasses nearly twenty-one years and was told by one of the best specialists in the East that they would always have to be worn. To leave them off an hour would mean a sick headache, but since the healing I have done more studying than I had in years put together before.

A little over a year after my first healing, in running for a ear I slipped on the ice and fell, straining the ligaments and sustaining a fracture. I was not in bed as a result of this at all, and the worst manifestation was overcome within ten days, although I limped for about six weeks after that. The practitioner lovingly helped me and I did not have the least fear; I knew that divine Love was taking care of me. In II Timothy we read, "For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind."

Many other healings have been experienced; discontent, discouragement, unhappiness, and fear are all gone; I am happy, contented, well, and grateful. For three years and a half I have not been in bed even one day, whereas formerly I always had some hard illness during the year. I have studied the Bible since childhood, but with the help of Science and Health it is a new book to me. I owe all this to Christian Science.

The love for God and man is surely expressed in all our Leader's writings, the fruitage of the loving toil of years devoted to searching the Scriptures that she might help us find and know God as divine Principle. Our hymns have been a source of great comfort to me, especially those written by Mrs. Eddy. I am grateful for class instruction and all the activities of this great movement; also to those who have so

Digitized by Google

lovingly and gently helped me to see the light along the way. My desire is to reflect good in everything I do or say, so that my fellow men will want to know God for themselves. I am thankful to God, and grateful to our dear Leader for this beautiful truth.

(Mrs.) Nellie Bliss Atkins, Chicago, Ill.

✧

It is with a heart full of thankfulness to God and of gratitude to Mrs. Eddy that I give this testimony, hoping thereby to cheer some one who is hungering and thirsting after righteousness. When Christian Science was brought to my notice more than six years ago, I was, according to the verdict of the doctors, a hopeless invalid, and the God whom I had worshiped and obeyed from early childhood to the best of my understanding, seemed far away. For many months I could neither read the Bible nor pray. My physical suffering seemed to myself and my friends pitiful and severe. For more than twenty-five years I had suffered from stomach trouble with numerous complications, all of which yielded to treatment in Christian Science; the healing was quick and perfect. I was healed of sleeplessness through the study of the Lesson-Sermon which has for its subject: "Are Sin, Disease, and Death Real?"

With joy for some understanding of the truth which Jesus said would make men free, I exclaim with the psalmist: "Many, O Lord my God, are thy wonderful works which thou hast done, and thy thoughts which are to usward: they cannot be reckoned up in order unto thee: if I would declare and speak of them, they are more than can be numbered." For the physical harmony my gratitude is genuine; but words are inadequate to express my joy for the spiritual freedom, an assured certainty that God is an ever present help in times of need. Every day brings opportunity to prove the truth of the words of our Way-shower, "Lo, I am with you alway, even unto the end of the world." My desire is the same as that of every earnest and honest student of this beautiful, new-old religion, and that is to prove my words by the demonstration of purity of thought, Christian love, and honesty of purpose.

(Mrs.) Nancy E. Plaskett, Oklahoma, Okla.

✧

Christian Science found me when to mortal sense all was darkness. I often wished I could leave this life of sickness and discord. To-day I am more than grateful that Christian Science was brought to my home. Through reading the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I was healed of a condition of the eyes which the doctor said would result in blindness. After reading for two weeks I was able to lay away my glasses and have had no need of them since. I have been healed of a very severe nervous condition for which I had been treated by many physicians, with only temporary relief. This healing occurred nearly six years ago and has been permanent. I have also been freed from sick headaches, from which I had suffered since I was a small child. I used to be confined to the bed several days at a time with these attacks, but it has been several years since I have been in bed even half a day on account of them. The physical healing seemed slow to mortal sense, but this made me study the literature more earnestly, and I was thus getting the spiritual healing which was most needed,—the overcoming of wrong thoughts, such as condemning and judging those around me.

I know Christian Science is a wonderful protection, for I have proved it. One night when alone in the house I was overcome by gas from the coal stove and was unconscious the greater part of the night. When I rallied I was holding to these words: "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty." A friend called the next morning, and while she read the ninety-first psalm I was entirely freed.

Words feebly express my thankfulness to God for our beloved Leader, Mrs. Eddy, who sacrificed so much to give us this beautiful truth that enables us to work out our salvation. I am also grateful to the loving friends who have helped me on my journey from sense to Soul.

(Mrs.) Dora Rogers, Williamsport, Pa.

✧

Christian Science is a great help to me in my everyday work, and reduces to a large extent the fear of accidents. Everything goes much better when we learn that "the government shall be upon his shoulder," and that all we need is to do our part, and not worry about the result.

One day while we were testing an air compressor, the gas which had been collected in the tank exploded. The air gauge, safety valve, and also the connecting pipes were blown off, windows were broken, and some parts were blown the whole length of the building; but although we were only a few feet from the tank at the time, no one was injured. On another occasion, while I was standing by a die-casting machine, some molten aluminum squirted out and struck my arm, setting the clothes on fire. I declared the truth as best I could, and soon forgot all about the incident. That evening there were a lot of pits on the arm, caused by the hot metal, but these have all disappeared. One day I hit one of my fingers such a severe blow with a hammer that the glove I was wearing was cut through. At the end of a week there was practically no evidence of the accident, although similar bruises had taken about a month to heal when material remedies were used.

Once, while I was walking through a building which was being remodeled, a workman dropped a piece of scantling upon my head. I was dazed for an instant, but soon realized the truth sufficiently so that nearly all pain disappeared in a short time. I was pleased to find that there was practically no sense of resentment toward the man whose carelessness had caused the accident. Before coming into Christian Science it would have been a long time before I could have forgiven him. Needless to say, I am more grateful than I can express for this practical religion.

Harry Dean, Detroit, Mich.

✧

Twelve years ago last October I turned to Christian Science for healing, after medicine and surgery had failed to cure me. With my first treatment I was healed of fluid on the knee joint, after two years of suffering. I went to sleep and slept about an hour, and when I awoke all the swelling and pain, every trace of the trouble, was gone. In a few weeks I was healed of acute indigestion, from which I had suffered extremely for a long time. In about three months an organic disorder of many years' standing was overcome. After the second operation failed, my physician told me I would never be well and strong, and should spend as much time in bed as possible. One day before I realized that I was healed, I found considerable work about the home that had been neglected. I began to work at six o'clock in the morning and was on my feet all day, doing heavy lifting and reaching, with no bad results. All day I kept repeating the last verse of the fortieth chapter of Isaiah: "But they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be

Digitized by Google

weary; and they shall walk, and not faint." When night came I realized that I had been absent from the body, and present with the Lord. I was neither weak nor weary, and from that time I have done all kinds of hard work. The past twelve years have been the healthiest and happiest years of my life. Many physical ailments have been overcome; influenza and headaches disappeared in a much shorter time than under the old method of treatment.

About a year before turning to Christian Science I laid the Bible aside, because there seemed to be nothing in it for me; my prayers were not answered, and there seemed to be no help for me. Science and Health has, however, taught me to understand the Bible as never before, and through this better understanding I have learned to know God as an ever present help at all times and under all conditions. He is the great and only Physician. Christian Science is indeed the truth that makes men free.

I am grateful for the help I receive from the periodicals and the daily study of the Lesson-Sermon, also for the privilege of class instruction. I am most grateful for the spiritual uplift that came with my first treatment. My daily prayer is that I may live and study this truth so as to be able to help others as I was helped. I am thankful to God for the blessings received, and grateful to Mrs. Eddy, who gave this truth to the world that all may be healed who are ready to accept it.—(Miss) HELENA L. SHAPER, Canajoharie, N. Y.

✧

It has come to me forcibly of late that having been helped so much by the testimonies, I ought to show my gratitude by adding mine. A little over a year ago a much loved brother passed on after only a day's illness, and Christian Science was the only thing that sustained us then. When some one remarked to my mother that it was too bad to have our family circle broken, my mother said to herself, "A real circle can never be broken; otherwise it is no longer a circle." This thought of perfection and completeness has helped me to feel that though our brother is not with us in the flesh, nothing can take away the good he said and did. A few months ago my father passed on, and again Truth sustained us through this trial which seemed so great, and all at home were lifted above the mortal belief of death into the knowledge that there is in reality no separation from God or His children.

A few years ago the top of my thumb was cut off through the middle of the nail and up, not taking the bone. I declared the truth at once, and placed it on again. After one treatment from a practitioner the pain ceased, and in a few more the hard throbbing stopped; soon the thumb was healed. This healing was indeed a proof of God's loving care for His children. One day my brother pushed his arm through a pane of glass, which made a deep, jagged cut. At first he seemed to be in great pain, but through treatment from a practitioner relief came in a little while and the complete healing soon followed.

Last winter my small son became very ill with a so-called serious disease, but through the faithful help of a practitioner, although the disease returned with renewed force when he was almost well, he was entirely healed and there were none of the after effects which are sometimes looked for in these cases. Train sickness, colds, burns, whooping cough, a swollen foot, cuts, and many other errors have been quickly overcome.

My husband is an army officer, and in the numerous and sudden moves we have had of late, I have been able, through my understanding of Christian Science, to put up agreeably with many unpleasant conditions. The periodicals are a great help to me now in knowing that our Army will be protected in France because it represents the right, and that when the time comes for my husband to go there, he will have the protection of our Father. My heart is filled with gratitude to Mrs. Eddy, whose unselfish life has given us the knowledge which has made it possible for those who are willing to follow Christ to overcome all evil.

(Mrs.) KATHLEEN CARROLL MITCHELL, Portland, Ore.

✧

All I have and all I am I owe to Christian Science, and having received so much comfort from the testimonies given in our periodicals and at the Wednesday evening meetings, I would like to tell my experience in gratitude for what this healing truth has done for me. I was a very unhappy, discontented, nervous, and discouraged woman. At the first Christian Science lecture I attended, I was healed of discouragement. My first physical healing was that of chronic bowel trouble, which vanished to its native nothingness through the reading of our textbook "Science and Health with Key to the Scriptures" by our beloved Leader, Mrs. Eddy. The healing has been permanent. Since then I have been healed of extreme nervousness, irritability, impatience, sleeplessness, rheumatism, tonsillitis, loss of voice, colds, and coughs, and there has come through the daily study of the Bible and the Christian Science literature a better understanding of God as Love, who sends nothing but good to His children.

I am deeply grateful for the privilege of class instruction and what it has meant to me, also for the privilege of church membership; and my gratitude goes out to all who have helped me to a better understanding of God. I am grateful, too, for our periodicals, and want so to live that my life will attest my sincerity.

(Mrs.) MARGARET C. QUINT, Los Angeles, Cal.

✧

I have received so much help from the testimonies in the *Sentinel* and *Journal* that I wish to add mine to those of others who are thankful for the light as revealed to us through "Science and Health with Key to the Scriptures" by Mrs. Eddy. I was in dense darkness, burdened by sin, disease, fear, worry, and all the ills belonging to the Adam race. I have been healed of nervousness, chronic appendicitis, bowel trouble, neuralgia, a serious spinal injury, and many other discordant conditions, also imperfect eyesight, for which I had worn glasses several years. I was never so healthy in my life as I am now.

The physical healings are, however, small in comparison with the spiritual uplift. An ugly disposition has been overcome, also the habit of always being in a hurry. I used to have no love for my neighbor, only thoughts for myself; but I have learned in Christian Science that these must be gotten rid of if we wish to have that Mind in us "which was also in Christ Jesus." I have also learned to love the Bible, which had before been a closed book to me. How I delight to rely upon its promises, which I know belong to me now and not in a future state. In the passing on of my son, Christian Science enabled me to say: "O death, where is thy sting? O grave, where is thy victory?" I have the joy which the world cannot give and cannot take away.

My desire is to live so that I may never send forth a thought which would not bless, cheer, purify, or heal. I am so thankful to God and to Jesus the Way-shower. I am also grateful to Mrs. Eddy for her pure life of consecration so that a sin sick world might realize the peace "which passeth all understanding."

(Mrs.) FLORENCE SCHOBE, Buckhannon, W. Va.

# From the Press

[*Anaheim* (Cal.) *Herald*]

There is something out of tune about this present uproar concerning the action of the Secretary of War in appointing three chaplains for the Army from the Christian Scientists. It jars on the nerves of many fair-minded men who feel that now, when the whole fabric of civilization and Christianity is in danger of destruction, there is something too patently narrow about the whole criticism to stand the light. Now, it would seem, is the time when dogma of sect and creed should be thrust aside, and all efforts turned toward the common enemy. The united concert of churches is upholding the cause of democracy, and chaplains have been selected from all denominations to minister to the needs of the boys in the service. The records show conclusively that no particular church has a monopoly on patriotism, and thousands of Christian Scientists are in the Army ready to die, if necessary, to preserve democracy, which carries with it the idea of religious freedom of thought. It should be borne in mind that when the peace treaties are signed and the democracy of the world dictates those terms, there will be little hope of permanent peace unless the spirit of brotherhood has in a measure smoothed out the boundary lines between sects and creeds and has broadened the viewpoint of the nations of the world to an international plane.

[The Countess of Warwick in *The Hibbert Journal*]

Nations repudiate so many Christian doctrines for the sake of war, that by the time peace returns they are ill-prepared to turn their poor remains of Christianity to account in welcoming it. All nations are apt to regard moral law as an institution for peaceful times and uneventful seasons. When on a sudden they are called on to deal with an after-war situation in the light of the higher morality, they are at once in gravest difficulty because they have relinquished or actually thrown away the only lamp that can illumine their darkness.

[*The Presbyterian*]

Every day we are becoming more and more like our thoughts. What we are to-day is the outcome of the thoughts we have cherished in the past, while the thoughts that we are cherishing to-day are determining what we shall be in the future. If our thoughts are low and base and ignoble, then we ourselves are becoming low and base and ignoble. If our thoughts are pure and clean and Christlike, then we are becoming pure and clean and Christlike.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlet

"Christian Science: Applied Righteousness," a lecture by Frank Bell, has been published in pamphlet form, and is now on sale at five cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# "Retrospection and Introspection"

**The title which Mary Baker Eddy gave to the book she wrote presenting the record of her life is one of the most expressive and significant of any of the titles given to her numerous writings.**

**In it are related the facts about Mary Baker's early education, incidents concerning her family, her first religious experiences, medical experiments, her discovery of Christian Science and the work of founding it, the issuance of the first Christian Science publication, included later in the Christian Science textbook "Science and Health with Key to the Scriptures," her work in the Massachusetts Metaphysical College and the founding of the Christian Science periodicals.**

**"Retrospection and Introspection" is rich in individual experience and replete with simple and authentic history. The closing chapters of admonition and counsel, particularly, inspire the reader to higher, holier living.**

**Unprejudiced and earnest study of "Retrospection and Introspection" will aid Christian Scientists and others to understand better the work in and for the world of the Discoverer and Founder of Christian Science.**

**"Retrospection and Introspection" may be read, borrowed, or purchased at Christian Science Reading Rooms throughout the world.**

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50. Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

*"What I say unto you I say unto all, WATCH."* Jesus

VOLUME XX JULY 6, 1918 NUMBER 45

## Guidance and Law

SAMUEL JOHNSTONE MACDONALD

NO experience is trivial. No manifestation of truth can be insignificant. God being eternal and infinite Truth, every concept of truth must be an apprehension of the infinite, a step toward that knowledge which is life eternal. As in mathematics the same basic law is proved whether we figure in units or millions; as in music the law of harmony appears as truly in a simple chord as in the full diapason of a mighty chorus; as truth dwells in an elementary statement equally as in the most profound; so spiritual law may be recognized as clearly in the sustenance of one of the smallest of the fowls of the air as in the feeding of the five thousand in the wilderness. Likewise in individual experience the omnipresence and omnipotence of divine Love is revealed as fully in some familiar daily action as in some so-called great emergency; in the purveyance of daily food as in the more dramatic and spectacular "hair-breadth 'scapes i' the imminent deadly breach." In the same manner as the falling apple revealed to the observant eye and attentive thought of Newton the mode of action now familiarly known as the law of gravitation, and as the daily commonplace of the steaming kettle spoke to the inquiring mind of Watts of the dynamic energy of steam; so to the thoughtful student of Christian Science is made visible in "the trivial round, the common task," the ever present universal law of Spirit, controlling and directing all. He thus learns it to be practicably and demonstrably true that "the Lord is King for ever and ever" and that He is indeed "the governor among the nations."

The law of guidance, as for practical convenience it may be named, may be found stated succinctly but clearly and comprehensively in Proverbs 3:6, "In all thy ways acknowledge him, and he shall direct thy paths." In this law, it is evident at once, there are no reservations; it applies to "all thy ways," without exception. It is not reserved for what are known to men as striking events, vital emergencies, great crises, or deadly perils; it is equally operative in the simplest daily problem. As we constantly use the numeration table and its basic law in calculations which are apparently the most trivial, and are, also, equally guided by it whether the operations be elementary or abstruse, so we should learn to rely with equal confidence upon the universal law of guidance in our most familiar and intimate affairs. These surely need the direction of divine Mind no less than "Arcturus with his sons."

When the student awakes to the spiritual fact that the declaration quoted from the book of Proverbs is not a mere poetical, emotional, or ecstatic utterance, but is the clear scientific statement of an eternal, universal law, omnipresent as well as omnipotent, he begins to see that it must be operative in every detail of daily life. It cannot be otherwise. Either it is a law governing all equally and alike, or it is not a law at all and governs none. God's law, being the expression of infinite Mind, must be infinite and universal. Perceiving this, the apostle James could confidently affirm that God "giveth to all men liberally," and also that with Him "is no variableness, neither shadow of turning;" and the apostle Peter declared, "Of a truth I perceive that God is no respecter of persons." It should be clear, therefore, that we are to seek and to recognize the divine guidance in every affair of our lives, in the simplest as well as in that which appears to be most momentous. A proper study of the law will, indeed, make manifest that if we cannot see its operation in our ordinary routine, we shall not find it when confronted by some heart-rending dilemma. It must be our daily reliance, or it cannot be our reliance at any time; moreover, the student will also learn that when he is constantly acknowledging, seeking, and obeying the divine guidance as the governing and controlling influence of his daily life, it will be operative to guard and guide him even when he has not consciously sought guidance. In those actions which are commonly said to be instinctive, intuitive, unconscious, or automatic, he will still find the law of divine guidance in control. This law will not only be a pillar of fire to illumine the ways which seem to be dark and obscure, but will also be a pillar of cloud to warn and stay when human sense might believe the way ahead to be clear and safe. "We are his people, and the sheep of his pasture," said the psalmist. The sheep may think that it has strayed beyond the shepherd's watchful care and is left to its own poor, foolish guidance, but presently it finds that the good shepherd "seeketh that which is gone astray." It will be found then that no event is trivial, no way insignificant; but that we must at all times and in all our ways seek of God, Spirit, watch and ward, guarding and guidance. We will thus be well assured that, as our revered Leader so beautifully and lovingly writes on page 234 of Miscellany, "God will . . . guide them every step of the way from human affection to spiritual understanding, from faith to achievement, from light to Love, from sense to Soul."

It is needful in considering this law to guard against a wrong impression which may be received from a mere cursory reading of it. One might hastily conclude that God guides only those of His children who do acknowledge Him in all their ways; in other words, that the operation of this divine law is dependent upon a human contingency. This, however, cannot be. God's law cannot wait upon human will. As our Master declared, "He maketh his sun to rise on the evil and on the good, and sendeth rain on the just and on the unjust;" but the operation of God's law may not be visible to eyes blinded by passion, self-seeking, or self-will. Jesus also said, "Having eyes, see ye not? and having ears, hear ye not? and do ye not remember?" It is only to him whose spiritual vision is kept clear by the constant acknowledgment of the omnipotence and omnipresence of divine Love and law that the joyous assurance of God's guidance is always manifest, and "God is seen with men to dwell."

An experience which to human sense might have appeared to be ordinary and of little or no significance, served forcefully to make clear to the writer this ever present and

Digitized by Google

ever operative law of guidance. Upon making a visit on a Wednesday to another city, the intention was formed to attend the Wednesday evening services in First Church of Christ, Scientist, in that city. An added reason to that of custom for selecting this church was that a message was to be delivered to one who had been formerly its First Reader; but apparent oversight had neglected to provide the street address of the church, or a copy of *The Christian Science Journal* which would have furnished the needed information. Consequently, recourse was had to the Information Bureau of the hotel, where a courteous attendant consulted a Church Directory and directed the inquirer. The evening being fair and cool, and the way direct and pleasant, the visitor walked to the church; but upon arriving there and looking up at its friendly façade, he was chagrined to find that he had been directed to Second instead of First Church. Suggestions of disappointment, vexation, and self-condemnation came clamoring for admission and expression in consciousness until, seated in one of the hospitable pews of the church, he awoke to realize and affirm that God's children are always directed rightly to their proper place and that no error or negligence has power to deflect them therefrom.

Presently the apprehension of divine guidance dawned upon him and he began to see in growing light that no human act or omission can subvert or stay the operation of God's purposes wherein "all things work together for good to them that love God." This contemplation led to such a peaceful and joyous frame of mind that the church service and testimonies appeared to be the most harmonious and helpful he had ever known. At the close of the meeting the first individual to greet the visitor proved to be one whom he had been wishing for several years to meet, one whose writings in our periodicals had always brought him help, comfort, and joy. A little later, in the hospitable sociability following the service, he was presented to the person for whom his message was intended and whom he would have failed to meet had he followed the way which he himself had outlined. Thus two excellent reasons became manifest for his having been apparently misdirected, and he saw with overflowing gratitude that error has no power to mislead those whom God guards and guides.

## The Word Everywhere Present

CAROLINE S. ROWELL

IN the prophecy of Isaiah we find a beautiful reference to the rain which waters the earth and makes it to "bring forth and bud, that it may give seed to the sower, and bread to the eater." This is followed by the divine declaration, "So shall my word be that goeth forth out of my mouth: it shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it." Instances of the power of the word to "prosper" have been accumulating in the experience of one who has been interested in the free distribution of our periodicals; indeed, the power to deliver its message and to do its work has been proved over and over again to be inherent in the word, and nothing but carelessness or lethargy, a false sense of fear or of limitation, can even seem to obstruct its course or to annul its power.

We know that our Leader's purpose in founding "the periodicals which are the organs of this Church" (Manual, Art. VIII, Sect. 14) was that they might be messengers to carry tidings of salvation to every hungering heart. As this purpose was one of unselfed love, grounded in spiritual understanding,—even the understanding that the word is, in truth, everywhere present all of the time,—it had back of it omnipotence; and so the thought of love which goes out with every piece of Christian Science literature unites it to the spiritual law, which takes it where it belongs and makes it do its work. Is it possible, then, that even one of these messengers sent on its way lovingly and intelligently may fail of accomplishment?

While in our experience it does not always appear that the particular one to whom the cup of cold water is offered is grateful and appreciative, yet that same gift of love which was seemingly misplaced has so often found another who was athirst and eager for its message, that one stands humbled in the presence of divine goodness. The following well authenticated cases in evidence are gratefully submitted—gratefully, because of the lesson that they and many others like them have taught, that when work is done in humility and love, God will give the increase.

A woman living in an apartment in a western city had received occasional marked copies of *The Christian Science Monitor*. It is not known that she ever opened one of them. The janitor of the building, seeing the same kind of unopened package in the wastebasket several times, was led to pick one out, and during his rest period opened it. He read the paper with interest and took it home. His father, who had been ill for a long time, also read it. He included in his reading the metaphysical article on the "Home Forum" page, which, in this instance, was in regard to healing. He decided to trust his case to Christian Science; a practitioner was called, and the man was healed. Subsequently the whole family became students of Christian Science.

A young Swedish woman, a trained nurse, was asked by some friends to remain in their home during their vacation absence. She was to have no duties, and so accepted the offer, glad of an opportunity to rest. After a time mere "resting" grew monotonous, and she looked about for things to read. Several stories and poems were read and enjoyed, but still unsatisfied she kept on seeking. One day in an attic room she came across a bundle of Christian Science periodicals, so she sat down on the floor and began to read. As she sat there in the dim light of the low roofed room, "the light that never was, on sea or land," illumined her thought, and she sat absorbed. The periodicals were taken downstairs with her and were her close companions during the rest of the stay. She left that home knowing that she had found the truth, and she is now a Christian Scientist. The most striking part of the story is that the friends who owned the home were not Christian Scientists, nor were they at all interested. A relative who had visited them had received the periodicals from a friend whose loving thought intended them for her. The relative had left, and the family, not wishing to destroy another's property, had put the papers in the attic awaiting her word concerning them.

One who was on his way to fill a free literature box with Christian Science literature, accidentally dropped a *Sentinel* as he stood on a corner waiting for a street car. The man went on, leaving the *Sentinel* unnoticed on the muddy pavement. A woman stood there in deep mental distress, waiting for a car to take her to a lawyer's office where she intended to begin suit for divorce. She picked up the *Sentinel*, and turning its pages, she came to the testimonies of healing. One of these she read eagerly; it told of a husband healed of drinking, a home restored. "Perhaps," hope whispered, "your own troubles can be overcome." She knew a Christian Scientist, and decided she would go to see her. She did so, boarding a car going in an opposite direction from the one she had intended taking. She talked with her friend; they

Digitized by Google

sought a practitioner; and to-day the husband is an usher in a Christian Science church, and the happy wife teaches in the Sunday school. Numerous incidents like these might be related, each one a sermon in itself, having for its text this from II Thessalonians: "Finally, brethren, pray for us, that the word of the Lord may have free course, and be glorified," and, if they may be added, the Master's words, "Herein is my Father glorified, that ye bear much fruit."

## Changing One's Views

WILLIAM FRYE WHITE

WHEN once we grasp the full significance of the fact taught in Christian Science that human existence, with all the phenomena peculiar to it, is mental, it is not difficult to understand that healings worthy of expressions of gratitude at Wednesday evening meetings or in our periodicals need not necessarily be of physical or bodily disease and the suffering incident to it. Any experience out of which, through which, or by which, mortal mind is forced to humble itself and bow to the reality of God, good, as All-in-all, and therefore as ever present Principle, constitutes a healing.

The writer remembers the first Wednesday evening meeting which he ever attended in our wonderful Mother Church, and how he was awed by all that he saw and heard. There was one testimony given by a lady that night which made a deep impression upon his mind. She told how Christian Science had crossed her path on different occasions and how she had ignored it and refused to have anything to do with it because of a deep-seated prejudice which she entertained against Mrs. Eddy, due to many stories she had heard about her. Finally came a time when sickness attacked her, a sickness which did not surrender to material remedies. Then in some manner Christian Science was again brought to her attention, and she reluctantly began the reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy. She was eventually relieved of the bodily sickness, but not until she became conscious that her prejudice against Mrs. Eddy and her teachings had been destroyed. In relating her experience, joy and gratitude were expressed, not so much for the relief from sickness, which to her illumined sense was only an incident, as for the destruction in her thought of that unjust prejudice which, she comprehended, was not an offense against Mrs. Eddy herself, but rather against Principle, God,—the foundation of all Mrs. Eddy's teachings.

This lady's denial or refusal of Principle resulted in a form of bodily pain and suffering. The denial of Principle is sin; for every denial of God necessarily carries with it an affirmation of the existence of some other power or reality. This affirmation constitutes a specific breach of the First Commandment, "Thou shalt have no other gods before me." Mrs. Eddy says in "Retrospection and Introspection" (p. 67), "Sin was, and *is*, the lying supposition that life, substance, and intelligence are both material and spiritual, and yet are separate from God." Sin always eventuates in suffering. The certainty of such suffering is constantly reiterated throughout the Bible. Mrs. Eddy explains this to us again and again throughout her writings. In Science and Health (p. 6) she says, "We cannot escape the penalty due for sin;" and further she says, "To cause suffering as the result of sin, is the means of destroying sin."

An attempt to add a column of figures without applying the rules necessarily results in a wrong answer to the problem. It is in just this sense that divine law punishes men for refusing or neglecting to obey God's commands; therefore not only can suffering and discord be relieved when one turns to Principle, but they may be avoided by constantly holding to Principle. In Exodus we read, "If thou wilt diligently hearken to the voice of the Lord thy God, and wilt do that which is right in his sight, and wilt give ear to his commandments, and keep all his statutes, I will put none of these diseases upon thee, which I have brought upon the Egyptians: for I am the Lord that healeth thee." Our escape from bodily suffering, then, is limited only to the extent that we fail to seek, listen to, and understand Principle, God. If the understanding of God as the only creator, and of man as created in His image and likeness, is becoming clearer to us, then one source of suffering is being destroyed, namely, the belief in a material body having power to make us suffer.

Whenever we realize that we have broken down some barrier, no matter how small it may be, which separates us from Principle, then indeed we have occasion to rejoice; for by this act we may be assured that we have saved ourselves some pang of suffering which otherwise would have been inevitable. We cannot hold in too high regard every instrumentality which in any manner acts as a channel for the expression of Principle or Truth, or assists us in any degree to approach a better understanding of God. Our periodicals, including the *Monitor*, are messengers through which the truth is being explained to the world to-day in such terms that mortal mind can be induced to bow before Truth.

The writer's experience with the *Monitor* has been full of significance to him, as illustrating the healing of a mental condition. This causes him as much gratitude as if he had been healed of a physical disease, because of the fact that he has come a step nearer the realization of Truth and all that this signifies. When he came into Christian Science he was schooled in the fundamentals of government, economics, and politics, which to him were part and parcel of his being. He read two well-known Boston newspapers, because they were clean, as newspapers go, and because they preached what he considered to be sound political doctrine. Later on he felt it his duty to read the *Monitor* because he had begun to call himself a Christian Scientist, and he saw at once that the cleanliness of this paper was of quite a different sort from that of the others. He, however, read it with indifferent pleasure, because it seemed to him that too much of its space was devoted to foreign affairs and too little to home happenings; besides he found in it much that did not accord with his notion of things.

The editorial page in particular became for him a veritable battle ground. He did not agree with the editor's treatment of public questions. Its position upon the question of woman suffrage during the referendum campaign in Massachusetts a few years ago served to bring to the surface of his thought every argument against it. He was willing to grant that there was no good reason why woman should not vote, but tested by the practical standard of expediency, the paper failed to justify its acceptance, as he then saw things. In the early stages of the war he became much dissatisfied with the *Monitor's* attitude upon certain international questions. He did not care for the attitude taken during the presidential campaign; indeed, he rarely found anything on the editorial page which he thought he could read either with pleasure or profit, and the result was that for a long time he scarcely read the paper as a whole, devoting himself to the Home Forum page and its metaphysical article.

At some time,—it would be utterly impossible to say when,—something happened. Unconsciously his thought changed, and he began to read the editorial page. He began

Digitized by Google

to be attracted to the wonderful display of scholarship evidenced in the editorials,—history, religious and secular; politics, domestic and foreign, ancient and modern; geography, science, biography, anecdote, and wit. Gradually he found himself entertaining a different point of view on the war, its status, its ultimate, until to-day he is in entire accord with the sentiments expressed in the *Monitor*. Gradually he has found himself losing much of his eagerness over the proposition of expediency involved in the suffrage question. Gradually he has found his appreciation of the President developing into a genuine respect, and admiration of his poise, dignity, and courage. Gradually also he has found new vistas of thought opening up to him upon the pressing economic questions of the day and the immediate future,—the relations of labor and capital, government regulation and even ownership, taxation, and so on. So to-day he finds himself reading first of all the editorial page, then the general news, and finally the metaphysical article on the Home Forum page.

This experience the writer considers a genuine healing,—a healing for which he is deeply grateful, a healing as worthy of note as any deliverance from bodily ills. He was diseased; he was blind—blind to the great underlying and overlying Principle which is at work in the experience of mankind in these days as never before in human history. Well may he now say in the words of the blind man whom Jesus had healed, "Whereas I was blind, now I see."

## "Understood spiritually"

MARY H. MCALONEY

IN Science and Health (p. 547) Mrs. Eddy writes: "The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained." A student of Christian Science once asked her teacher how she could be sure her understanding or interpretation of the Scriptures was correct. His reply was, "Prove it by demonstration."

This student sat one day in deep thought. One whom she loved lay in the next room with aching head and burning brow. She earnestly sought divine guidance and help, but conflicting and confusing thoughts persisted in presenting themselves to her. Why had she not been able to protect her household against this intruding evil? Was it her fault that she had not made her own the promise that "there shall no evil befall thee, neither shall any plague come nigh thy dwelling"? Perhaps the fault was not with herself after all; it might be that the sufferer had neglected to do his mental work aright. While attempting to pray, she was admitting to her thought a continual round of questions, not one of which seemed to bring her near the solution of her problem. She opened the Bible to the ninth chapter of John, and read again the account of the healing by Jesus of the man born blind. His disciples asked him, "Who did sin, this man, or his parents, that he was born blind?" Jesus answered: "Neither hath this man sinned, nor his parents: but that the works of God should be made manifest in him. I must work the works of him that sent me, while it is day: the night cometh, when no man can work."

According to the doctrines in which she had been reared, suffering was not necessarily the result of specific sin on the part of anyone, but was sent by God for some good purpose; this, however, was at variance with all the teachings of Christian Science. On page 127 of Science and Health Mrs. Eddy writes, "Christian Science reveals God, not as the author of sin, sickness, and death, but as divine Principle, Supreme Being, Mind, exempt from all evil." And yet the recorded words of Jesus were that the man was blind, "that the works of God should be made manifest in him." Human reason led from one difficulty to another until the confusion seemed complete. On page 161 of Miscellany Mrs. Eddy warns us against allowing human reason to "becloud spiritual understanding," and she adds, "Trust in God, and 'He shall direct thy paths.'" Closing her books, this baffled student turned unreservedly to God and humbly asked for help. With material sense silenced and with thought ready to receive God's message, it is not surprising that there came a clear revelation of Truth and a demonstration of Truth's power to heal.

Students of Bible history know that in the earlier manuscripts all of the letters are capitals and are written mostly without breaks or stops. The margins of the page and the uniformity of the lines are not broken, even for the sake of preventing the division of a word. This was the method of writing used during the period in which Jesus lived. It was changed very gradually through the centuries that followed. In the course of time spaces began to appear between words, and then the text was divided into sentences, with more or less inaccuracy of punctuation and capitalization. It is entirely possible that the changing of one capital letter or one punctuation mark, while in no way altering the literal wording of Scripture, may change the entire meaning of a passage.

This was clearly evidenced to this student. Reading again the passage of Scripture referred to she suddenly saw clearly the full meaning of Jesus' words: "Neither hath this man sinned, nor his parents: but that the works of God should be made manifest in him. I must work the works of him that sent me, while it is day." With her clearer vision and a different punctuation she interpreted it to read: "Neither hath this man sinned, nor his parents. But that the works of God should be made manifest in him, I must work the works of him that sent me, while it is day." How clear it all was! No specific sin had caused the suffering, because sin is not a creator, and has no power with which to create discord; but since this one whom she loved had come down under the universal belief in the reality of sickness, she with her knowledge of God as divine Principle must voice the truth that destroys all belief in a power apart from God. The loved one was healed,—she had proved it by demonstration; and this student is rejoicing that again God's love and mercy have been made manifest to her.

## Working for God

KATHERINE E. VARGA

EVERY Christian Scientist knows what it is to have a Bible verse, a line from one of the hymns, or a passage from one of Mrs. Eddy's writings come to him over and over, just seeming to sing itself into the thought, even when the person is busy with other things. As these messages come from Truth and Love, and we welcome them, the word angel comes to us in connection therewith; for we know they are God's thoughts passing to us through these channels of inspiration.

To one student this better understanding of the word angel, gained through the study of Christian Science, has been of no small value; for before, angels had been simply flying feathered creatures. When a child, and later, she would as soon have seen a grizzly bear approaching as a winged angel, and there was no desire to see one either coming to her or passing to anyone else. Now, because of the right concept held, she prays daily that angels, which are

Digitized by Google

defined on page 581 of Science and Health as "God's thoughts passing to man; spiritual intuitions, pure and perfect," may constantly dwell with her. One evening at a testimony meeting a woman gave an experience, telling of protection coming to her through a certain verse of Scripture. She lived out in the country, and had gone into town to do some shopping one day. In the midst of her shopping the first verse of the ninety-first psalm came to her distinctly. She did not give it any special attention, but it came again, and that time she paused and thought, "Why, that is from the ninety-first psalm and stands for protection." Affirming her right as God's child to that protection, no more thought was given the incident, until on arriving home she found in the door a skeleton key which had broken off.

Recently part of a passage from Mrs. Eddy's "Miscellaneous Writings" came to the writer over and over again. For about a week it kept repeating itself, "Never ill-humored, never unready to work for God" (p. 116), until it began to sound rather monotonous. Finally she decided that she needed to give the passage some consideration, and she began to do so. "Never ill-humored" was plain enough, and was hastily passed over. She knew what she needed in that respect was not more knowledge, but practice of that which she already possessed. But "never unready to work for God" was more gladly considered. Was she not almost invariably at the church services? And since there was a distance of twelve miles to go, over roads that were often bad, surely this was working hard for God. How eagerly the periodicals were read by her,—and was any effort too great for her to make to get to a Christian Science lecture? For some time mortal mind dwelt on this pleasing picture, but it was finally left behind; for deep in her heart the student wanted to serve God in His way, and she knew she would be given more light on the subject when she desired it earnestly enough.

She then began to ponder the word work. Work in the home meant largely the correcting of wrong conditions. Disorder must be replaced by order, and so on. It was giving, not receiving, and required some effort. The much loved services and lectures, the helpful literature, were plainly gifts from the Father, and could the acceptance of Love's gifts be construed to be work? Suppose a man was offered a million dollars if he would come for it. It was his for the coming, and if he said, or even thought, that he had worked for that money, how would his attitude be regarded? What if a Christian Scientist did show a reasonable amount of activity when it came to receiving spiritual good? Was that working for God?

When this particular student had cleared away a little of her own self-righteousness, these words from Science and Health (p. 182) came, answering the question: "The demands of God appeal to thought only." Evidently then it all had to do with her thoughts, and "never unready to work for God" resolved itself into never unwilling to replace the wrong thought with the right. The above statement from Science and Health is one which gave her the greatest rebuke to error of any that our textbook contains, and so at least one individual was, by the timely remembrance of it, made to realize that she had indeed received much, but she could not vainly imagine that receiving would take the place of giving. She also saw that this giving must consist of the giving out of true thoughts constantly, so that daily she could say with more and more honesty that she was endeavoring to make her own the song of Christian Science which Mrs. Eddy gave in her Message to The Mother Church for 1900 (p. 2): "Work—work—work—watch and pray."

# Selected Articles

[" 'God is with men' "—*The Christian Science Monitor*, Boston, U.S.A., April 19, 1918]

Christian Science is doing the greatest service to mankind by revealing the truth that God is not afar off but actually omnipresent. One frequently hears such questions as these: Does God, after all, really exist? If He does, how can He become known in order that His aid may be obtained? The evil beliefs of the world so obscure the spiritual facts of being that skepticism takes the place of spiritual understanding and faith becomes lost in doubt, and then despair supervenes. Now the mission of Christian Science is to declare the truth about God, and thereby to establish the faith of men in Truth.

On page 471 of Science and Health, Mrs. Eddy writes: "God is infinite, therefore ever present, and there is no other power nor presence." As will be seen from this, Christian Science teaches that there does not exist anything real outside of the divine Mind; or, in other words, it proclaims the reality of Spirit and the unreality of matter. But, some one asks, does not this conflict with the experience of human beings? Does not the human mind feel itself convinced that matter is real? Christian Science answers that the truth does conflict with human experience, and it says further that all the experiences of the so-called human mind are unreal, that they are false beliefs and not the truth of being. Starting from the absolute truth that God exists as the one infinite Mind, Christian Science holds that all that can possibly exist as reality must be in Mind, or must be the manifestation of Mind.

It is obvious, then, that what is going on in the awakening human consciousness is a conflict between truth and error, between the facts of spiritual being and false material sense. The latter, appearing to be real to this consciousness, alienates from the truth, and the result is that human beings are subject to the storms that rage throughout mortal existence. But as they perceive the falsity of material belief through the spiritual understanding of the allness of God, they become less subject to the assaults of error, and realize more clearly man's at-one-ment with omnipresent, harmonious, divine Mind.

The fact of the inseparable union between God and man had been very clearly realized by the seer of Patmos when he wrote: "Behold, the tabernacle of God is with men, and he will dwell with them, and they shall be his people, and God himself shall be with them, and be their God. And God shall wipe away all tears from their eyes." This realization could only have come about by the spiritual understanding, on the part of John, of the nature of God as infinite Mind and of man as the spiritual idea of Mind. Is it possible to doubt that John was sustained amid the hardships of his earthly career by his knowledge of spiritual things? Could he have endured the life of loneliness on the isle of Patmos without that knowledge? Instead of breaking down under the strain he found the leisure and possessed the composure necessary to write the most prophetical book in the Bible, in which is depicted the struggle against the divine Principle, good, of the false claim of evil belief to place and power, and the final and total destruction of that false belief of evil. Like the Master, John had seen through the illusion of matter by discerning the allness of Spirit, and simultaneously he had become aware of the entirely spiritual nature and perfection of man.

John perceived the truth about the perfect unity existing between God and man, and so did the Discoverer of Chris-

Digitized by Google

tian Science. On page 465 of Science and Health Mrs. Eddy writes: "Principle and its idea is one, and this one is God, omnipotent, omniscient, and omnipresent Being, and His reflection is man and the universe." That statement is without ambiguity. It breaks through the incrustations of material belief which suggest that man is an intelligence in matter, subject to material environment and laws; and it enables one to behold man as he really is, indissolubly united to the source of his being, God. It is this perception of God and the real man which gives to human beings the certainty that "God is with men."

What a help it is for humanity to learn something of the true relationship existing between God and man. God is "omnipotent, omniscient, and omnipresent Being," and man is at one with this Being. What does this imply? It shows at once whence comes man's strength and intelligence. The general belief is that man is material, or partly material and partly spiritual, and this makes impossible any demonstration of man's divinely bestowed power. Christian Science teaches the true nature of God and man, drawing the firmest possible line of demarcation between the real and the unreal. As men assimilate these truths mankind will become assured of the presence of "God with us" and will better realize the true nature of God and man.

It is a matter of common knowledge that Christian Science heals disease and sin. All the healing which results from the practice of Christian Science comes through the spiritual understanding of God and of man, His spiritual idea. As the fact is discerned that man is never separated from God, the divine Principle of his being, disease and sin are recognized to be unreal, and then they disappear. It is like the dawning of the morning. As the sun's rays stream into the airy envelope surrounding the earth, they dispel the darkness of night. But darkness is a negative condition. It is the absence of something—the light; so that when the light dawns, nothing really is destroyed, but something is gained. This is analogous to the destruction of human error by truth. Error is a negative condition, a belief in the absence of divine Mind. As the spiritual facts of being are recognized they dispel error, with the result that there is experienced a truer and so more harmonious sense of existence. Thus the destruction through Truth of inharmony, whether of sin or disease, is the sign that "God is with men."

✧

[S. T. Downs in *Peru* (Ind.) *Journal*]

Because the statement is not qualified or explained, it is not clear what the revivalist holding services at Peru meant in an attack on Christian Science, as reported, when he said, "There is (in Christian Science) no sacrificing service in Christ's name." If the statement means that Christian Scientists are not sacrificing self and all that is not Christlike, the speaker displays a degree of ignorance that is amazing, because no one who is the least informed would attempt to deny that Christian Scientists are seeking and striving after what Paul called that mind "which was also in Christ Jesus," and sacrificing all that would interfere with gaining this mind. If he meant that Christian Scientists are doing nothing for suffering humanity, he displayed an equal lack of information, because no body of people give up more or strive to do more for the sick, the sinning, and the suffering wherever they may be found than do the followers of Mrs. Eddy. The fact is that most any construction that might be placed on the statement made by the revivalist shows it to be prompted merely by prejudice.

Our brother said also, to quote his own words, "Mrs. Eddy missed taking the whole Christ." The more common contention of religious critics is that Mrs. Eddy took too much; but the fact remains that Christian Science demands for humanity to-day just what the Bible promises, and its mission is to establish these promises now, as the Word commands. The works of Christian Science prove its claim to bring the whole of Christianity into human consciousness, and wherever one may go he finds Christian Scientists at work reforming the sinner and healing the sick.

✧

[Duncan Sinclair in *Glasgow* (Scotland) *Times*]

In a recent issue under "Gossip and Grumbles," the following occurs: "I have a sort of vague idea, though I have not read Mrs. Eddy's works, that Christian Science teaches there is no such thing as dirt, or suffering, or major and minor nuisances in the world." And then the writer adds that he is open to correction. Let me say at once that Christian Science does not teach what has just been quoted. It is fully alive to the squalor and suffering that are in the world; but, at the same time, its endeavor is to have these evils eliminated from the lives of men so that the world may become a happier and a healthier place in which to dwell.

What Christian Science does quite definitely teach is that God, the divine Principle of all reality, is infinite good, and that God's spiritual creation, which is the only real creation, is perfect like Himself. It teaches, further, and as a logical consequence, that evil does not exist in the consciousness of God, and that evil, therefore, whether it be named sin or suffering, has, in the absolute sense, no reality. Moreover, Christian Science holds that the false belief of evil or inharmony is destroyed in human consciousness in the exact ratio in which divine Principle is understood by human beings.

✧

[W. Stuart Booth in *Colorado Manufacturer and Consumer*, Denver, Col.]

Since the Christian Science textbook, "Science and Health with Key to the Scriptures," was first published forty-two years ago by Mary Baker Eddy, it has weathered the storms of hatred, opposition, and misinterpretation. The sharp winds of sarcasm and vilification have driven furiously at Mrs. Eddy, but all to no avail; for the Christian Science movement, in its spread around the world, has earned and is continuously accorded a larger degree of the respect it deserves. The fact that acquaintanceship with the teachings and practice of Christian Science dispels the storms of opposition shows that these storms are gendered in the darkness of ignorance and the vacuum of fearsome bigotry.

No one is justified in making a butt of the religious faith of his fellows, especially of Christian Science, which has been proved, not only by its teachings, but by the "signs following," to be the reinstatement of primitive Christianity. The Christian life and accomplishments of the Discoverer and Founder of Christian Science entitle her to the respect and honor of all who are seeking the betterment of mankind, and it is significant that she is most highly esteemed by those who knew her best. The Governor of New Hampshire spoke of Mrs. Eddy as: "The Granite State's greatest woman. She has left the impression of her work not only on New England, but on the entire world, and we are proud of her."

✧

[Percy Heywood Brooks in *Nottingham* (England) *Express*]

Christian Science does not teach that the man of flesh can live without food. Christian Scientists recognize that food is necessary while we are in the flesh. It would be absurd and visionary to think otherwise. They have, however, out-

Digitized by Google

grown a deal of the fear that besets mortals as to what they dare or dare not eat. Having experienced the healing power of Christian Science, they can eat the things that are set before them without fear of consequences, and in this they are living witnesses to the Scripture passage, "Take no thought for your life, what ye shall eat."

No Christian Science practitioner would tell a wounded soldier that his maimed arm or leg had no sensation or inflammation, but would first set to work to heal the limb, and then explain to him after showing him something practical. There is a deal of Christian Science healing going on amongst wounded soldiers, to the great surprise of their comrades who know nothing of this Science. Can a doctrine be called heartless that brings the healing of divine Love after all other means have failed? Hear what is written on page 113 of "Science and Health with Key to the Scriptures," the Christian Science textbook by Mary Baker Eddy: "The vital part, the heart and soul of Christian Science, is Love." What teaching other than Christian Science does our critic offer that will heal the sick by the spoken or unspoken word of Truth? Christian Scientists are proving their faith by their works, and this is the only basis upon which to found an opinion of them.

✧

[F. Elmo Robinson in *Medford* (Ore.) *Sun*]

Our great Master did not escape the bitter misrepresentation and assault of those who failed to understand him, or were unwilling to conform their lives to his regenerative teaching. He was accused of being a blasphemer, a glutton, a winebibber, a friend of publicans and sinners. When finally brought before Pilate for trial in answer to the taunts and vicious charges of his enemies, he opened not his mouth. He made no answer in the civil courts of his day to the charges brought against him, and yet he made an answer in the court of universal public opinion which has been ringing down the centuries and is to-day reechoed in Christian Science. To the boastful claims and challenges of the assailants of Christian Science, the answer will ever be more healings of hopeless sufferers, more reclamations of the despairing victims of sin, and the making of the whole wide world a brighter, better place to live in.

✧

[Albert F. Gilmore in *Newburgh* (N. Y.) *News*]

In a sermon recently reported in the *News*, the pastor went not only out of his way, but so far astray that the wonder is he did not entirely lose himself, when he coupled Socialism and Christian Science in the following words: "My charge against it [Socialism] is the same as against Eddyism. It deals with only one phase of the life of man—the physical, the material needs."

Christian Science is the one religion that teaches pure idealism, the allness of God and His spiritual creation, and conversely, the absolute unreality, the nothingness, of matter. Mrs. Eddy, the Discoverer of Christian Science, says in "Science and Health with Key to the Scriptures" (p. 468): "Spirit is the real and eternal; matter is the unreal and temporal. Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual."

Upon this foundation the whole structure of Christian Science is built. It is the understanding of what God is and what man is, the Christ illuminating the human consciousness, that corrects the illusions of the senses, sickness, sin, and disease of every type and form. But the process is wholly mental and spiritual, never material. The Master's precept, "Take no thought for . . . your body," becomes a practical possibility, even a constant necessity, if one is to gain the Mind of Christ, which constitutes the kingdom of heaven. This is indeed the strait gate and narrow way "which leadeth unto life."

Instead of exalting the physical, Christian Science teaches that man is wholly spiritual. On page 383 of Science and Health we read: "The Christian Scientist takes the best care of his body when he leaves it most out of his thought, and, like the Apostle Paul, is 'willing rather to be absent from the body, and to be present with the Lord.'"

## Funds of The Mother Church

### War Relief and Camp Welfare

"Inclosed find check for ten dollars to be added to your War Relief fund. I wish to express my appreciation of the work you are doing and to thank you for the opportunity it affords of expressing my gratitude."

"I send this mite ($25.00) with deep gratitude for all the blessings which have come to me through Christian Science, and I trust since it is an offering of love it will help alleviate the suffering of some war stricken one."

"Please find check for twenty dollars inclosed as an expression of gratitude for what Christian Science has done and is doing for us and the world. We are indeed grateful that a channel has been provided wherein one can contribute to the war relief through avenues where it will do the greatest and most good, where a contribution to war relief is also a contribution to Principle in the fullest sense of the word."

"Find inclosed postal money order for ten dollars to be used for Christian Science Camp Welfare fund. This is sent in appreciation of the help our boy received while stationed at Mineola, and also in gratitude for his being one of the survivors of the 'Tuscania.'"

### Real Estate

"An article in the *Sentinel* prompted me to turn the searchlight of spiritual understanding upon my own consciousness, to see what I have 'in the house.' As the result of this illumination, I am sending the inclosed check for twenty-five dollars to be applied to the Real Estate fund of The Mother Church. With heartfelt gratitude for these 'channels for the streams of Love' . . ."

"A year ago my wife and I pledged five dollars a month to the Looking Forward funds, The Christian Science Benevolent Association and the Real Estate funds. I am inclosing herewith check for thirty dollars which will cover our subscription from December 1, 1917, to June 1, 1918."

"Inclosed please find check for three dollars, which please apply to The Christian Science Benevolent Association fund and to the Real Estate fund. We rejoice in the privilege of contributing to both these worthy causes."

### Christian Science Benevolent Association

"Inclosed please find check for one hundred dollars which our Association wishes to give to The Christian Science Benevolent Association fund. We believe that there is a necessity for completing this fund, that the institution may be in an immediate position to do its part in the War Relief work which the Christian Scientist alone is privileged to understand and demonstrate."

## Metaphysics versus Human Psychology

IF one seeks to study pure metaphysics in the ordinary school or college, he will not find those who can adequately instruct him, for the simple reason that the metaphysics of ordinary textbooks is based on the testimony of the physical senses and does not reach to that vision above and beyond the physical which the very word metaphysics implies. Metaphysical vision is the insight of pure mind, not the seeing of the eyes, the hearing of the ears, nor the emotions despairing or ecstatic which tremble in the nervous system. Learned professors have done their best to find order and system and method amid the data of physical discord and delight, potency and sickness, life and death, but it is found, as "Science and Health with Key to the Scriptures" (p. 549) makes clear, that "these material researches culminate in such vague hypotheses as must necessarily attend false systems, which rely upon physics and are devoid of metaphysics."

Viewing the history of accepted systems we see how the theory of one age would be discarded by the next and the guessing would begin again. The world, and its perplexed learned men, and its weary unanswered multitudes, was waiting for true metaphysics, which Christian Science unfolded because Mrs. Eddy's discovery and healing enabled her to base her system upon Mind. She says (Science and Health, p. 279): "Every system of human philosophy, doctrine, and medicine is more or less infected with the pantheistic belief that there is mind in matter; but this belief contradicts alike revelation and right reasoning. A logical and scientific conclusion is reached only through the knowledge that there are not two bases of being, matter and mind, but one alone,—Mind."

There are several terms for that which is the reverse of metaphysics, pretending to be its imitation or substitute. At the same time when American independence was being established, Mesmer in Germany brought animal magnetism into notice, which gave us the term mesmerism. This word erelong came into ill repute, and desire for a more high sounding name brought on the word hypnotism. Then for a time the hypnotist had a certain distinction, and physicians boasted of using upon trusting patients this subtle mental influence. Since the world has now learned to distrust both mesmerism and hypnotism it has become necessary for those who do evil in secret, trying to work out the will of the flesh and the will of man, to find cover under another name. The term psychology is in use to camouflage mesmeric and hypnotic methods of mental suggestion. By its etymology it would mean the sum of learning referring to the "animal soul" whereof the second record of creation speaks. It is there said that God formed man of the dust of the ground and breathed into the image the breath of life so that it became "a living soul."

This Chaldaic tradition suggests the existence of man as a separate soul in a body, as a portion of creation disintegrated from its source. The story goes on to show that complete separation from God was inevitable. Such learning, then, as may be promulgated and gathered into a so-called scientific system which would seek to reveal ways for understanding soul in body and governing bodies through the "animal soul" therein resident, can never reach to nor understand one God and His creation harmonious with Spirit. Christ Jesus revealed his own harmony with the creator, saying, "I came down from heaven, not to do mine own will, but the will of him that sent me." He clearly recognized the fact of spiritual life, that man lives and moves and has his being in Soul; but a man thinking of himself as soul in body says, My glory in living is to do my own will and force others to submit to it. The would-be world conqueror stands by his high pyramid of skulls like Timour at Damascus and gloats upon his own power to do evil. Christ Jesus said, "I can of mine own self do nothing."

The conqueror of ancient times boasted of overt evil. The scheming and lustful animal mind of to-day with human brain for its instrument seeks to accomplish covert evil. Its silent prayer is, My will be done, and its belief is that its wish must gain power in proportion to the number of those who agree with it, just as the discharge force of an electric battery is increased by adding cell to cell. However, it is all quite harmless, and the power of malpractice is not increased by the increasing of units. It is like adding zero to zero—much appearance but nothing doing. They who live in Spirit are insusceptible to the supposed influence or control of carnal minds. What then if wells of information be poisoned by mortal mind? What if hypnotic influence is raging and the psychologist imagines every day a vain thing in his determination to control the imagination of all men till they worship through fear and concede power to a human mind, self-exalted and claiming to sit in the seat of God? Let us be sane and trust to Christianity renewed, and gain the vision of its Founder, who saw Satan fall from heaven as lightning —dethroned and cast down in a moment.

Metaphysics is as clean as the blessed daylight. It is the real "psychology, or the Science of Spirit, God," as Mrs. Eddy explains (Science and Health, p. 369). Its mystery is only the "mystery of godliness" which the wicked cannot comprehend until they repent. Mesmeric and hypnotic manipulation has been operated in darkness, but already the searchlight of Truth invades its hiding place and leaves to it no mystery and no potency. It is quite true that an honorable people will be singularly unsuspicious. They may receive exchange professors and trust their youth to their instructions, never guessing that these agents are themselves instructed to study out the weaknesses of the nation so that through these ways of entry the integrity of the people might be secretly assaulted. But if one such agent boasted that for a score of years he had been able to tinge the flow of thought in America by coloring matter he had injected through the press, the termination of all such efforts has deathly disappointment. This is the era when evil deeds are revealed because of the growing light. Through multiplying proofs of healing, Christian Science is disclosing the character of God to be that friend whom Abraham knew; to be "the God and Father of our Lord Jesus Christ;" to be our Father in heaven; hence the psychological theory of a god of horror appearing in the recentest empire is shown to be human invention.

They who practice Christian Science acknowledge one Mind, and that God. They make it their business to work the works of God, even as Christ Jesus did. They are thus delivered from the devil of carnal mind and all its works. They recognize the falsity of belief in a separate mind from

Digitized by Google

God, or a segregated soul in body that can be victimized by evil influence. They find life in Soul. Mind is their intelligence and divine Love their wisdom. The Father in heaven provides their health and peace. True metaphysics reveals man thus as inseparable from his Maker, consequently as working out the purpose of good. Real man is always working together with God. Darkness cannot injure the sun's rays which dispel it. No more can any evil influence come nigh man who is as a ray of light proceeding from and yet one with Soul.

WILLIAM P. MCKENZIE.

## "A land flowing with milk and honey"

CHRISTIAN SCIENCE opens the eyes of those who are ready to see the real land flowing with milk and honey, the ever present spiritual reality of the kingdom of heaven. The materially greedy may picture the promised land as an opportunity for unlimited enjoyment; but those who are looking Spiritward think of it as a state of consciousness in which harmony and justice, joy and unselfishness, brotherly kindness and genuine friendship, are forever safeguarded from fear and hate. Through much labor the materially minded may enter a Canaan of their own imagination and taste of the fruits of the flesh until they revolt against these unsatisfying experiences and become receptive to truth. In the meantime the righteous are led out of an Egypt of mental darkness, through the severe tests of the wilderness into a promised land which is spiritual and not material, which is full of scientific satisfaction and peace, sheltered by the Zion of God's presence, and nourished with the milk of spiritual substance and the honey of divine Love.

Ignorance and fear everywhere go hand in hand. The uncertainty as to the promised land keeps many in bondage to Pharaoh, but if real existence and activity were known to be purely of God and evil was recognized as illusive, the fear of the future would disappear. Every individual is scientifically justified in realizing that God has nothing but good in store for him. Whatever personal sense may argue about advancing years, God places no failure of force, no decrepitude, no ugliness upon those who are growing in wisdom and experience. Christian Science teaches the permanence of goodness, beauty, and vigor and encourages and sustains its followers through good and evil report.

The universality of the appeal of Christian Science is illustrated by the fact that it provides milk for babes as well as meat for the strong. Children profit by its declarations of truth quite as readily as their elders; the unlearned and unlettered grasp its liberating truth as firmly as the so-called educated. In describing the purpose of her little work entitled "No and Yes" Mrs. Eddy states in the Preface: "To those who are athirst for the life-giving waters of a true divinity, it saith tenderly, 'Come and drink;' and if you are babes in Christ, leave the meat and take the unadulterated milk of the Word, until you grow to apprehend the pure spirituality of Truth."

Those who turn to Christian Science will gain by following the advice of Peter, "As newborn babes, desire the sincere milk of the word, that ye may grow thereby." Without childlike humility the joy of Christian Science is kept waiting at the door. The pride of power, of intellect, of riches, of learning bars the way to the healing of disease and the reforming of character. Humility is strength, for it acknowledges the weakness of personal effort and so makes way for the power of God to operate in human affairs. While hate pursues its self-destructive path, love takes the upward way.

Amid the baffling complications of the world conflict the sincere milk of the Word tells of the simplicity of Truth, of the oneness of good, of God at hand. To mortal sense the battle line may waver to and fro, its roar may rise and fall, seeming disasters may succeed each other, hope may fail temporarily, but Christian Science remains pure as milk and sweet as honey. The little book of Truth's revelation may indeed, as the angel forewarned, "make thy belly bitter," *i.e.*, produce a chemicalization of false beliefs, "but it shall be in thy mouth sweet as honey." "Murmur not over Truth, if you find its digestion bitter," is good advice (Science and Health, p. 559), and our Leader also says (p. 130), "Good and its sweet concords have all-power."

Then let Israel, as it goes forward, be fed by spiritual understanding, by the spontaneity of joy, by the inspiration of truth. Let the tender young be nourished and cherished, the fallen be raised, the sick healed, the lame made whole. Let the dumb speak, the deaf hear, and the blind see. Let the proud be humbled and become as little children. Let those laden with the wisdom of this world grow agile and alert with divine intelligence until upon the horizon of the desert of Sinai there loom the highlands of the promised land, flowing with milk and honey.

WILLIAM D. MCCRACKAN.

## A Refuge from the Storm

CHRISTIAN SCIENCE teaches its students to search for and find the reason for things, and never to stop until they have reached the unchanging basis of divine Principle. Throughout long years Christian people have believed, and believed rightly, that God governs all things; it must be understood, however, that by all things is meant all that is included in the divine creation which was pronounced by its creator good. People have been led to believe that somehow or other God had changed His original standard of infinite good, and had come to express His power in evil. Thus it has been believed that God is responsible for storm and tempest, for the destructive forces which are the cause of so much human suffering, and also for the pests which destroy vegetation and deprive mankind of the grains and fruits needed for their sustenance. Christian Science challenges this belief, and insists that God, divine Principle, can never be untrue to His own nature, can never express Himself in aught unlike Truth and Love.

The question then arises,—and it is one which cannot be evaded in the present age,—If God does not send storm and tempest, and is not responsible for sin, sickness, and death, whence come these terrible and undesirable conditions? The one outside of Christian Science who hesitates to charge these ills to the Almighty replies at once that these things are the necessary expression of nature's laws; but this reply only evades the question, for if God is admitted to be the one Lawgiver, then He would be responsible for all the conditions which are the outcome of the laws instituted by Him. It is true that we find much in the Scriptures which seems to support the belief that God is the author of the storm as well as of the calm, but from the Christian Science viewpoint this was merely an expression of the mistaken belief which has been held by mortals throughout the ages, so long as they accepted as real the evidences of material sense. Ever and anon there came, however, gleams of divine light; and so we find the psalmist telling us of those who were delivered by God "from their destructions." Then follows this beautiful passage: "They cry unto the Lord in their trouble, and he bringeth them out of their distresses. He maketh the storm a calm, so that the waves thereof are still."

Digitized by Google

In Christian Science we are taught that the carnal mind which Paul tells us "is enmity against God" is responsible for everything unlike God, and it also teaches that the understanding of divine law, and reliance upon it up to the point of demonstration, will destroy this false evidence of a power opposed to God and unlike Him. In the fourth chapter of Mark we read that after Jesus gave one of his marvelous discourses to the multitudes he took ship with his disciples, and that a great storm arose, so that they were apparently in peril of their lives. The Master was, however, asleep, so we read, and the disciples awoke him with the reproachful question, "Master, carest thou not that we perish?" What follows is of the deepest interest to the student of Christian Science. We read that Jesus "arose, and rebuked the wind, and said unto the sea, Peace, be still." The result was immediately in accordance with his words, and we are told that there was "a great calm." It goes without saying that if Christ Jesus had regarded this storm as a manifestation of divine law or divine will, he certainly would not have rebuked it. From the Christian Science viewpoint it was simply a manifestation of the carnal mind which was even then plotting to destroy the divine idea expressed by Christ Jesus; and he addressed himself to it as he did knowing its utter powerlessness. He knew, what the student of Christian Science should never forget, that evil has no more power over God's man than it has over God Himself.

On page 67 of Science and Health Mrs. Eddy says: "The notion that animal natures can possibly give force to character is too absurd for consideration, when we remember that through spiritual ascendency our Lord and Master healed the sick, raised the dead, and commanded even the winds and waves to obey him." It is therefore the sure privilege of every one who has begun to recognize himself as the child of God to declare truth in the way the Master did, and then to live up to his own spiritual declaration. The so-called forces of nature are really forces of Mind, and it rests with us to prove that mortal mind has no control over them, over us, or, indeed, over anything. It has no power to destroy human life or anything which is divinely provided for human need, and this calls upon us to "watch and pray" constantly, both for ourselves and for others, that the omnipotence of Truth and Love shall prevail at all times. Let us ponder these beautiful words from the twenty-fifth chapter of Isaiah's prophecy: "For thou hast been a strength to the poor, a strength to the needy in his distress, a refuge from the storm, a shadow from the heat, when the blast of the terrible ones is as a storm against the wall." On page 362 of "Miscellaneous Writings" Mrs. Eddy says, "We all must find shelter from the storm and tempest in the tabernacle of Spirit." It is indeed good to know that this shelter is prepared for all of us, wherever we may be, and we have but to avail ourselves through spiritual understanding of this rich provision of divine Love.

ANNIE M. KNOTT.

## Notice

In order to be better prepared to give spiritual help in the Army and Navy through Christian Science literature and in other ways, it is desired to secure the names and present complete mail address of all officers and men in the military, naval, or aero service of the United States and of its allies, who are Christian Scientists or who have shown an interest in Christian Science. Such men, or members of their families, or friends, are requested to send this information to

Christian Science War Relief Committee,
236 Huntington Avenue, Back Bay, Boston, Mass.

# Among the Churches

## Current Notes

BOSTON, MASS.—The First Church of Christ, Scientist. Services (during July and August): 10:45 a.m.; Sunday School, 10:45 a.m.; Wednesday, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

PAINESVILLE, OHIO.—The dedicatory services of First Church of Christ, Scientist, were held Sunday, May 5.

*Painesville Herald.*

BEAUMONT, TEXAS.—The paying off of all indebtedness made it possible for the Christian Scientists of this city to dedicate their church yesterday morning [May 5]. The church building, furnishings, and lot represent an investment of about $22,500.—*Beaumont Enterprise.*

TEXARKANA, ARK.—The beautiful little bungalow church building of gray stucco, trimmed with white, and costing approximately six thousand dollars, which has just been erected at 612 Walnut Street by the Christian Science Society, was dedicated at the Sunday service [May 12].

The Christian Science movement started in Texarkana in 1901. A church was first organized, but as the movement was not strong enough to comply with the by-laws of The Mother Church, this organization was disbanded, and in 1910 the present society was organized. This society first met at the corner of Seventh Street and State Line, moving from that location in February, 1912, to Mount Sinai Temple, where it remained until May, 1913, when the society moved to rooms in the State National Bank Building, and from there to the Heilbron Building, which they have occupied until the present.—*The Texarkanian.*

NEW YORK, N. Y.—Three services marked the opening [May 26] of the new building of Fourth Church of Christ, Scientist, at 178th Street and Fort Washington Avenue. The building cost two hundred and fifty thousand dollars. The church is the outgrowth and development of a work started in 1894 by two students of Mrs. Eddy, on the West Side, near Eightieth Street. On November 4, 1898, a charter was obtained for West Side Church of Christ, Scientist, which name was retained until June 18, 1901, when it was changed to Fourth Church of Christ, Scientist.

The church was moved on September 27, 1911, to a large hall at the corner of St. Nicholas Avenue and 181st Street, which was outgrown in a short time. The northeast corner of Fort Washington Avenue and 178th Street was purchased for seventy thousand dollars. The Sunday school portion of the structure has been in use since August 4, 1914, but the finishing touches of the main auditorium, which has a seating capacity of twelve hundred and fifty, were not given until Saturday afternoon [May 25].

# The Lectures

NEW YORK, N. Y. (Fifth Church).—John Randall Dunn, lecturer; introduced by Albert F. Gilmore, who said in part:—

It is nearly twenty centuries since Jesus the Christ proved by demonstration his understanding of what Truth is and its ability to achieve victory,—healing the sick, making the blind to see, regenerating the sinner, raising the dead, and overcoming what were supposed to be unvarying physical laws. In less than three centuries after the close of his brief earthly ministry, the light of spiritual understanding burned so low that its healing efficacy was lost, and the world passed into those well-named dark ages of fear and doubt and superstition. "Where there is no vision, the people perish," and this vision is spiritual perception, the understanding of what Truth is.

We should be deeply grateful that in our own time has appeared one whose mentality was so spiritual, whose vision was so clear, that she, too, was able to give a full and complete answer to this question. Mrs. Eddy has given to the world the great fact that God is Truth, and she has proved her understanding by her works—proof beyond the possibility of refutation. She has answered the question, "What is truth?" She has given to the world its most perfect therapeutic system, a religion that heals and saves through spiritual regeneration.

STERLING, COL. (Society).—Paul Stark Seeley, lecturer; introduced by John A. Jameson, who said in part:—

The mighty works of Christ Jesus many centuries ago in the destruction of sickness and sin, in healing the lame, restoring sight to the blind, and raising the dead, revealed the operation of a divine law, which he declared all could understand and prove, when he said: "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father."

For three centuries the early Christians, through the understanding and use of this divine law, overcame sickness and sin, healed the lame, restored sight to the blind, and raised the dead. However, this great truth or law was lost sight of until Mrs. Eddy, the Discoverer and Founder of Christian Science, discovered this "pearl of great price"—this spiritual truth that God is the only creator, is Spirit, Life, Truth, and Love, and that man, His offspring, is not the victim of sin, sickness, and death.—*Sterling Advocate.*

MADISON, WIS. (Society, University of Wisconsin).—Frank Bell, lecturer; introduced by Charles W. T. Weldon, who said in part:—

To-day Christian Science stands in much the same position as did Christianity nearly two thousand years ago. It makes the same plea as did Jesus of Nazareth, when he said, "Though ye believe not me, believe the works." The Christian Science church wishes to be judged by the standard of him who said, "By their fruits ye shall know them;" for this teaching has already performed such works as should command the earnest and unprejudiced consideration of all thoughtful people.

ST. PAUL, MINN. (joint community lecture).—Dr. Walton Hubbard, lecturer; introduced by Charles J. Andre, who said in part:—

There are few, if any, in this audience who have not at some time longed to know and understand the secret of the works wrought by Christ Jesus and by his disciples and followers in the early centuries of the Christian era; but the belief is general—and has prevailed for a long time—that these works cannot be understood, because the power to perform them was delegated to only a select few in that remote period of the world's history. In our own time a spiritually minded New England woman, Mrs. Eddy, discovered that these works were based on Principle, or spiritual law, and that this law is as operative to-day as it was nineteen hundred years ago and can be understood and applied now as it was then. She named her discovery Christian Science, and defined it as "the law of God" (Rudimental Divine Science, p. 1). In consequence, primitive Christianity has been reestablished in the world, again sin is being destroyed, and all manner of diseases are being healed.

WEEHAWKEN, N. J. (Society).—William D. Kilpatrick, lecturer; introduced by Alvin Hunsicker, who said in part:—

It is a fundamental teaching of Christian Science that error, or evil, must be uncovered in order to be destroyed. Does anyone question that it is being uncovered the world over at this time and that it will eventually be destroyed? Are the great sacrifices now being made to go for naught? Will not the spiritual or real nature of man be revealed in the reconstruction days that seem close at hand? Do we not now see indications that the brotherhood of man is taking tangible form? Wrongs are being righted; men are being made free socially and spiritually. The world will never be the same; it will be better, much better.

PARK RIDGE and EDISON PARK, ILL. (First Church).—Virgil O. Strickler, lecturer; introduced by Mrs. Minnie G. Cook, who said in part:—

Jesus the Christ revealed God to humanity as Love, Truth, and Life. In the gospel of John we read: "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent. . . . I have given unto them the words which thou gavest me." If a true and scientific knowledge of God is Life, then it must follow that all sin, sickness, and death is the result of ignorance, lack of such knowledge. Christian Science has come into the world to restore this demonstrable understanding of God.

HOLYOKE, MASS. (Society).—John W. Doorly, lecturer; introduced by Judge Robert Allyn, who said in part:—

The Christian church will tell you that God is Spirit, Life, Truth, Love, and in the next breath ask, Why does God permit this terrible war? Christian Science answers that men have created a material god and worshiped that god, and that this war, as well as sin, disease, and death, is man made and no part of the kingdom of God. Christian Science further claims that the worship of the only true God, who created only good and knows no evil, and living the life that Christ Jesus lived, will overcome sin, disease, and death; and that the destruction of sin and the healing of the sick are the works that give evidence of the true follower of Christ. This is primitive Christianity, upon which Christian Science is built.

## Lectures to be Delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

NEW YORK—Far Rockaway, Long Island: German Evangelical Church Building, 8:15 p.m., July 11.

## Notice

Lecture notices must reach the Editorial Department not later than twelve days preceding the date of the *Sentinel* in which they are to appear.

# Testimonies of Healing

It is with heartfelt gratitude that I take this opportunity of telling others of the enormous blessing and help which Christian Science has been to me. I have been a student of this truth for five years. On the outbreak of war I joined one of the first of Kitchener's battalions, and in August, 1915, crossed to France, where I spent twenty-six months on active service, taking part in the battle of Loos, 1915; battle of the Somme, 1916; battle of Messines-Wytschaete Ridge, 1917; and the third battle of Ypres, 1917. In every case I was in the front line, and throughout this time, divine Love was my sure protection. I came through unscathed, perfectly fit and well, for which I owe deepest gratitude to God.

The whole time I was on service I just knew that God is omnipotent and omnipresent, and that nothing could harm me since man is a reflection of God, divine Love. I found Christian Science invaluable in enabling me to demonstrate the truth against the false claims of error in the forms of trench feet, frostbite, etc., during the winters of 1915–1916 and 1916–1917, when on several occasions I spent stretches of eighteen days in what is called "the Salient," thigh deep in mud, and icy cold; but every time divine Love met my needs and I maintained a harmonious condition of perfect health. I just held to the truth knowing that since I was doing my duty I was doing right, and in doing right I could not suffer from erroneous beliefs; since sickness is unlike God and unreal, therefore I, as God's child, could experience only harmony, perfect health. Under every condition divine Love has met my need, and my understanding of Christian Science has enabled me to overcome every form of error found in a front line trench,—shell fire, poison gas, etc., as well as privation and hardship,—knowing that God is omnipotent, and that I was and always would be in the care of divine Love, for "underneath are the everlasting arms."

I am more thankful to God for Christian Science than words can express; for the confidence it has given me in facing the problem of active service, and especially for the understanding of God, good, which my experiences and demonstrations have given me. I am very grateful to all Christian Scientists at home who are always declaring the truth and helping the "boys out there" by their right thinking. I owe immense thanks to the practitioner who worked so lovingly and faithfully for me when I needed help. There have been many particular occasions when without Christian Science I should have feared; but Christian Science taught me to know that God could and would keep me safe, no matter what the senses said of the seeming danger. And as the Bible tells us, "Perfect love casteth out fear." I am also deeply grateful for the help Christian Science has been to my wife, mother, and sisters in helping them not to worry, but just to know that I was safe in the care of divine Love and that nothing could harm me.

Men on service, know the truth,—that God is omnipotent and is ever present with you in the trenches or in the attack; and keep your minds clear of mortal belief, clinging steadfastly to the good, enduring, and true. Thus you will prove that although, as the psalmist says, a thousand shall fall at your side, you will be perfectly safe; for nothing can harm God's child. And, dear friends at home, who have loved ones at the front, know that because divine Love is looking after them they cannot be harmed, not a hair of their head shall be disturbed; for they are children of God and reflect Life, Love, and Truth. My wife, mother, and sister are Scientists and helped me enormously by their cheery, confident, right thinking letters whilst I was overseas. I am now attending a course at an Officers Training Camp preparatory to taking up my commission, and here as on service I find Christian Science invaluable.

I am grateful to Mrs. Eddy for giving the world a practical religion that meets our needs, helping a fellow even in the trenches. Again I would express my deep gratitude for Christian Science and to the Scientists who so loyally helped me. I hope this testimony may be helpful to others.

SERGEANT E. C. ERICSON, M.M., East Surrey Regiment, London, England.

✧

In going through "The Cave of the Winds" at Niagara Falls in 1910, my left eye was slightly injured. My sight had been normal all my life, and inasmuch as my eye seemed to be all right in about two weeks after the accident, the incident was forgotten. About a year later I entered the business world as a stenographer, and noticed for the first time a very slight defect in the sight of that eye. I thought nothing about it at first, but the defect seemed to enlarge slowly and in another year was quite noticeable. At that time a scratching sensation began in the eyelid, and I was worried for fear that something lodged beneath the lid was the cause of the whole trouble. I therefore consulted an oculist, who said I had iritis and should obtain medical help. I went, however, to a Christian Science practitioner; but I did no Science work myself and did nothing that I was not made to do in the way of reading our literature.

My sight grew worse gradually, and in 1913 I was unable to read with that eye unless the print was extremely large. I was always in pain and was forced to obtain glasses, for I could under no circumstances stop work. I underwent a thorough examination, and was told that the *blind spot* was the result of an injury which had been dealt that eye years before. The oculist stated that the spot was permanent, and that the scratching sensation was caused by granulated eyelids. I wore glasses about a year, having treatment from the practitioner nearly all the time; but instead of assisting in the healing work of Truth, I consoled myself with the fact that if I became blind in that eye I would still have the other to see with. Stronger glasses were obtained from the same oculist, but by the end of 1914 the sight had practically gone, as I could distinguish nothing except light and darkness. In the beginning of 1915 I discovered that the diseased condition had spread to the right eye.

I became frantic with fear, and tried to make up for lost time in Science study, but reading was so painful that at the end of a day's work I was ill, and was forced to stay home many days on account of the pain. The sight in the right eye went so rapidly that I despaired of healing, lost the desire to live, and was on the verge of nervous prostration and insanity. In March, 1916, one of the best eye specialists in the city stated that the left eye was beyond help, but that he might bring out the sight in the right one with extra strong glasses. I had worn his glasses three days when I collapsed.

I was sent to Bloomington, Illinois, and put under the care of a Christian Science practitioner in that field. I was extremely ill, and my mother, who had done nursing when a young woman, said that nothing but Christian Science saved my life. When I was sent home I still had absent treatment from this practitioner. My mental condition improved rapidly and the physical healing followed. During my confinement in a dark room I was cured of sleeplessness, and my general health improved, until I felt that I had been made over. I was soon enabled to lay aside blindfolds and dark

Digitized by Google

glasses, and treatment was discontinued, as I thought I could do my own Science work; however, I was forced to obtain help from a practitioner in this city.

The sight of the right eye returned rapidly, and by September it was normal and I went back to work, although I wore glasses. The left eye grew better gradually, and in February, realizing that the glasses annoyed me, I returned to the specialist to see if I needed any. He put me through another examination and declared my eyes healed. The so-called permanent blind spot was gone, and my left eye was in as normal a condition as the right. He declared it to be one of the most unusual healings he had ever seen, and requested the name of the physician who had treated me. On being told I had Christian Science treatment only, he was speechless. I have not worn glasses since, and my eyesight is as keen as it ever was in my life. I have been practically in perfect health ever since. Were it not for Christian Science I would either be dead, or blind and dependent.

Is it any wonder that I am overjoyed to have been privileged to live in this age when the truth is available? Is it any wonder that I, like thousands of others, am grateful to Mrs. Eddy for explaining this truth to us?

(Miss) Cecil E. MacMahon, Chicago, Ill.

✧

Unspeakable joy in finding God through Christian Science prompts me to join the happy chorus of those giving grateful testimonies from all parts of the world. This teaching was first presented to me when, materially speaking, I was enjoying health, prosperity, and social success. Regarding it lightly, however, I did not think of it again until a time of great need.

During the three years that followed, material success was swept away, and with this reverse in fortune came ill health. Very suddenly my husband faced the penitentiary. Our lovely home was taken over by creditors, and we were no longer able to maintain our social position. Brooding over these things, and mainly over my husband, an illness fastened itself upon me for which all material remedies were tried without success. Relatives were caring for me, clothing and feeding both my child and myself; I had no home, no husband; and despair so overwhelmed me that I wished to die. I sought comfort in the Bible, turned to a church for consolation, but failed to receive that for which I was looking.

A friend who had experienced a beautiful healing in Christian Science told me, when I said to her that I had been pronounced an invalid for life and was not expected to be able to walk again, that if I could only understand God as she did through her study of Christian Science, I would be well. For several months I pondered over what my friend had told me; then the seed she had lovingly planted brought forth fruit, and I became a student of Christian Science. Gradually, with an occasional treatment by a practitioner, I became well and happy. I learned that evil has no foundation, no creator, and such reasoning made it clear that these inharmonies existed only in mortal belief. Reasoning farther, I saw that evil has no real existence, for God, the one creator, could not create inharmony or a consciousness to cognize inharmony. This glimpse of infinite Truth rewarded my constant effort to see only spiritually. The understanding of the truth of being made me well, made me successful in my business undertaking, brought me a wealth of friends, and made me one of the happiest women in the world, for I could understand the nothingness of my husband's seeming misfortune, though he did not remain on this plane to work out his problem as I have done.

My home now is in God; my supply is abundant and is from God; my health is of God,—so God is All-in-all to me and harmony rules in my life. Discords may seem to arise, but not long can they find lodgment in our thought when we desire truth above everything else, and rest our gaze in the realm of Spirit. I am indeed grateful to Mrs. Eddy for Christian Science.—(Mrs.) Bessie P. Irby, Electra, Texas.

✧

I wish to express my thankfulness for what Christian Science has done for me during the last six years. From birth I was considered weak and sickly, and physicians said I would probably not live to grow up. Until past thirty years of age I cannot remember a day that I did not feel tired or sick, although, my father being a physician, all material remedies possible were given for my relief. I had heard of Christian Science, and while at school boarded with a family who were Scientists, but was so prejudiced that I would not even attend one of their meetings with them.

About six years ago, however, my sister came home for a visit and told of cures through Christian Science which she knew to be true. As my suffering seemed to be growing worse, in desperation I at last turned to God for help, although I thought I had always been trusting Him. There were no Christian Scientists living near, so I wrote to a practitioner in Washington, District of Columbia, where my sister had become acquainted with Scientists. I also studied "Science and Health with Key to the Scriptures" by Mrs. Eddy. Absent treatment was given me for about two weeks, and I was healed of dyspepsia, liver trouble, and a weeping sinew on my wrist. I had worn glasses for thirteen years, but had to discontinue using them, because my eyes became normal and I could not see well through the glasses. Gradually nervous headaches also left me. I had the habit of taking cold very easily, but seldom am troubled that way now, and any erroneous condition disappears in a few hours, as the truth is realized.

During my six years' study of Christian Science I have gained in weight, and my health keeps perfect so long as I study and continue to hold fast to Christ's teachings, which are explained so clearly by Mrs. Eddy. I feel deeply grateful to our Leader for giving to the world the "Key to the Scriptures" which has brought such peace and happiness into my life, as well as the lives of all who learn to understand God. I cannot be too thankful for having learned to know that we live in Him, and He in us.

(Miss) Edith H. Day, Wilcox, Pa.

✧

Christian Science found me when I was ready for it. For about ten years I had been battling with a facial affliction which doctors could not help or even diagnose. Not only did I try ordinary physicians, but specialists, surgeons, and various supposed remedial agencies, including the process of inoculation. My face and neck were in such a condition that the end of one's little finger could hardly be placed upon flesh which was not inflamed and distorted. There were bunches from the size of a pea bean to that of a duck's egg, and they were very painful. For a long time I could only lie with the back of my head on the pillow. For months there had been little rest or sleep; poultices were applied practically every half hour, and as the bunches softened sufficiently the surgeon would operate on them. Otherwise there was no relief.

After all material means had proved of no avail, and there had been over forty incisions on my face and neck,

Digitized by Google

with the verdict from one of the best medical authorities that there was no known cause of the disease and no known cure, I turned to Christian Science. The strain and suffering I had been under for so long had its damaging effects upon my nerves and entire physical system, and there were times when I was not considered mentally responsible. Upon consulting a practitioner I learned that I must give up material remedies and sever my connections with the doctors. The third evening after discontinuing the usual applications, the pain was so intense that it seemed as if I could not stand it, and about eleven o'clock that night I felt that I must call the surgeon, and so telephoned the practitioner to that effect. She very quietly but firmly asked me to wait two hours and if possible until morning, and then let her hear again, saying that she knew I could be relieved and she would give me a treatment at once. Within the next twenty-four hours the bunch had opened itself and discharged copiously; needless to say, since then I have needed but the one and only real physician and surgeon—the word of Truth.

My healing was not complete for over four years, but during that time I had quick and beautiful proofs of the allness of God. Laryngitis, from which I suffered each year for seven years, was overcome in three treatments, and an acute attack of appendicitis in thirty-six hours. When I turned to Christian Science, nearly ten years ago, I was very worldly, —more a lover of pleasure than a lover of God,—and the forced period of retirement from social duties and associates previous to the complete healing of the facial trouble, was just what was needed to bring about a change of thought and action. I am grateful for all the experiences along the way, although many of them at the time seemed serious stumblingblocks. Thanks be to God, that divine Principle ever operating for good, and to Mrs. Eddy for our textbook, "Science and Health with Key to the Scriptures," which unlocked the Bible, closed to me for years. I have been able through earnest and continual study of those two books so to apply the truths therein contained as to prove their efficacy, and in every instance the seeming stumblingblocks have proved stepping-stones to a clearer understanding of God and a higher, purer sense of life and living. Whereas I used to love to live, I now live to love.

I am grateful for church membership, for class instruction, and for the privilege of being a worker in God's vineyard. If there is anyone who is having a seemingly slow healing, I want to say, Press on; do not allow discouragement to enter in, but "fight the good fight of faith," and you, too, shall know the truth which makes free.

(Mrs.) Adelaide F. Rollins, Denver, Col.

✧

I am sending this testimony to the *Sentinel* in gratitude for healing and happiness received through the study of Christian Science. My attention was first called to Christian Science almost fifteen years ago when we lived in Denver, Colorado, by the help received by one of my family through the aid of a loving practitioner. A short time after this I became ill myself, and asked for help and was healed quickly. I then wanted to know more about this beautiful truth, which heals the sick as they were healed in the time of Christ Jesus, so I began to read the Christian Science literature, and to study the Bible in connection with Science and Health. I have indeed found health and peace and joy in this study.

In 1910 we moved to Quanah. It was then, when I found myself among strangers and away from other Scientists, that I realized how much Christian Science meant to me; and I continued the study of the Bible and Science and Health more earnestly than ever. I find that if in our daily lives we live this truth as taught in Christian Science, it does indeed meet our every need. Many discordant conditions have been overcome in our home. I have been able to lay off glasses that I had worn for years on account of a structural defect of the eyes.

I wish to speak of another healing. My youngest daughter awoke one morning with her face and neck badly swollen and inflamed with mumps. She asked me to call a practitioner to help her, which I did about seven-thirty in the morning. The pain and inflammation left immediately, and by noon the swelling was almost gone, and by four o'clock it had all disappeared. She missed just one day of school.

I am more grateful than I can express in words for Christian Science. I am grateful for the *Monitor*, the *Sentinel*, and the *Journal*, and to every one who has helped me to have a better understanding of this beautiful truth.

(Mrs.) Elizabeth Young, Quanah, Texas.

✧

In April, 1910, I took my first Christian Science treatment for what seemed to be an incurable case of gallstones. I had undergone three surgical operations, and was told that another would be the only means of saving my life. Not caring to go through the ordeal again, I turned to Christian Science—for I felt that man's extremity was God's opportunity—and was healed within a very short time. Several minor ailments have also been overcome, and I desire to express my profound gratitude for the many blessings received since I turned to this healing truth. I am indeed thankful for the better concept I have gained of God and of man's relationship to Him, and grateful to all those who have helped me to get a better understanding of this beautiful truth.—(Miss) Lillian Klotz, Dayton, Ohio.

✧

The following testimony has long been waiting for expression. I became interested in Christian Science through a conversation with the First Reader of the local church, who extended to me a cordial invitation to attend the services. For twenty-five years my wife and I were members of an orthodox church and were active and faithful helpers in sharing the responsibilities this relation entailed. Wider reading at length and investigation along other lines gradually weaned us from the orthodox faith and creeds and we did not attend any church for several years.

My wife, my daughter, and I were all suffering from chronic ailments, with no assurance of permanent relief; and the home was a depository of drugs and lotions, faithfully taken and applied, with no profit save to the druggist and the family physician. Such were the physical conditions of the family, and coupled with these were discouragement, inharmony, unrest, and small measure of faith for anything better in this life. Then came the invitation to attend the Christian Science services. The first Sabbath my daughter and I went to church, and the following Sabbath all three went together; and our attendance has been constant ever since, a period of nearly fourteen years. The truth as there spoken appealed to each of us, and the study of Christian Science was sincerely entered upon. With the aid of practitioners and our own study of the literature, the belief in the reality of sickness and suffering was overcome, and we have since enjoyed such health, hopefulness, and activity as we had never before experienced. The home was early cleansed of its medicinal stores and appliances, and the call for a physician became but a memory. We soon became

Digitized by Google

members of the local church and of The Mother Church and entered heartily into the work of helping to do for others what had been done for us.

I am indeed grateful to Mrs. Eddy, whom the loving Father privileged to do a work for humanity which has blessed and will increasingly bless mankind, and will ever afford an unfailing covert from the storm.

JOEL B. DOW, Beloit, Wisconsin.

✧

I rejoice every day in an increasing measure of freedom, physical and mental. It has been proved to me, absolutely, that when applied according to the teaching of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, Christian Science is an unfailing remedy for every form of error. While sojourning in Riverside, California, in 1912, during an hour of great darkness, sorrow, and distress, I turned to it as a last resort, not caring what the result might be, as the physicians had told me I could only be made comfortable; but the dawn of a better day came through the faithful assistance of a loving practitioner, proving God's allness.

For years I had been under the constant care of physicians, who could only give me temporary relief; for change of climate and all material means were useless. A severe operation was performed, but after a year and a half a state of semi-invalidism still remained. I again returned to my daily vocation, but it was a severe trial, owing to extreme nervousness, sleeplessness, bowel trouble which had bound me from childhood, and other ills. The bowel disorder was overcome in eight days through Christian Science treatment, and during this period no fear was manifested. This was a wonderful demonstration, as physicians claimed the bowels were paralyzed. Drugs, to which I had been a slave, were given up, and I am now free from the bondage of mental and physical ills. Fear held me so tenaciously I was afraid to cross the streets of our cities, but this has all vanished since I have learned that God, being omnipresent, guides and protects, governing this universe and His children.

Each day brings to me joy, gladness, and peace through the study of our textbook together with the Bible. God has proved a very present help in time of trouble, our refuge and strength, a guide in every affair of life.

(Miss) CHRISTINA C. HENDERSON, Long Beach, Cal.

✧

It is with sincere gratitude that I offer this testimony. Christian Science has done much for me in the way of physical healing, the most important being the healing of chronic bowel disorder, together with hemorrhoids. The law of heredity seemed to be strong, and the hours of sedentary service extremely long, and having to eat my lunch hurriedly while on duty, as at that time I had no lunch hour, these things seemingly made the healing slow. Daily as I realized God's law, and that there is no law but of God, and that no matter how strong the material law may appear to be, the law of God is "over all, and all" (Science and Health, p. 17), therefore annulling all other claims of law; realizing further that in God "we live, and move, and have our being" just as much while sitting as walking, and that Mind, divine Mind, moves all, I could see it must necessarily follow that all movement is perfect, either sitting or standing.

By daily realizing and affirming this truth the sluggish condition was overcome, and almost simultaneously the belief of heredity was broken. It proved to me that there is but the one source of all movement, and that all God's children have their inheritance from the same source, so that I was able to look up to a perfect inheritance from God, coinheriting with Christ. About this time it was proved to me truly that God's ways are not our ways. I had complained much about having to eat my lunch while on duty, but without avail, and had quite given up thinking about it; but I found this healing was yet to be perfected, for I no longer eat while on duty, a provision for lunch relief having been made. I am completely healed of this chronic condition of sixteen years' standing, and I am as free from any symptoms of hemorrhoids as if I had never experienced years of suffering. I hope this testimony may help those afflicted as I was to keep on working in truth, knowing that the perfect law of God does annul all so-called law which may be laid down by mortal mind.

(Mrs.) JEAN RICHARDSON, Kansas City, Kan.

✧

I have long wanted to testify to the healing power of God as demonstrated in Christian Science. When this blessed truth found me, I was in a state of melancholy that neared insanity; but with the help of a dear sister and the study of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I was entirely healed, and my gratitude knows no bounds. This is only one of the many blessings that have come to me and to my family. While I am grateful for the healings, I am most grateful for the spiritual uplift which came as a result of the healings and the study, and my daily prayer is that I may be guided in the straight and narrow path.

(Mrs.) MAMIE WALKER, Colorado Springs, Col.

# From the Press

[Letter in *Boston* (Mass.) *Herald and Journal*]

There is a good deal of talk going around to the effect that our men at the state house did a foolish thing when they voted to ratify the resolution for national prohibition.

Can anyone read the following figures, which I myself got from the police records of Boston, and continue to call closing the saloons foolish, weak, an outrage, etc.? Arrests for drunkenness in Boston on Mondays with saloons open: Jan. 7, 154; Jan. 14, 129. On "dry Mondays": Jan. 21, 50; Jan. 28, 18; Feb. 4, 7; Feb. 11, 10; Feb. 18, 18. On Mondays, with saloons open: Feb. 25, 125; March 4, 141.

Imagine for one moment all the wives, the children, the broken homes, the empty purses, that those arrests mean! Can any sane man, who values the welfare of the race, really say that a vote to close the saloon is foolish, weak, outrageous?

["Special" in *The Christian Science Monitor*]

Gov. Charles S. Whitman has signed a bill, which passed both houses of the legislature without opposition, giving to the Churches of Christ, Scientist, in this state an article of their own in the Religious Corporations Law of New York State. Heretofore when the Churches of Christ, Scientist, have been incorporated, they have acted under an article of this law applicable to churches not otherwise provided for.

[Editorial in *Riverside* (Cal.) *Enterprise*]

The *Enterprise* fully indorses the sentiment in an editorial of the *Los Angeles Times* which calls attention to the fact that our republic was founded upon the principle of religious freedom of thought under the law of the land and that the present time is especially unpropitious for the injecting of the spirit of intolerance into the religious side of

Digitized by Google

the war work ahead of the nation. The expression was called forth by the result of a meeting in Los Angeles as a result of which a telegram was sent to the President in opposition to the establishment of a few Christian Science chaplains in the Army, on account of the fact that there are thousands of Christian Scientists among the soldiers of the nation. The bigot who raises such questions as these to harass the President when the human liberties of the world are hanging in the balance and when boys of the Christian Science faith are fighting manfully beside Catholic, Protestant, and Jew, himself needs to acquire a new brand of patriotism.

[A correspondent in *The Times*, London, England]

Revival in religious activity is not necessarily a revival of religion. Here as elsewhere it is the Spirit that quickeneth. The first note of the preacher of the gospel must be that of sincere regard for truth. He must first persuade men that he both believes the gospel he preaches and respects the rights and claims of human thought to which he appeals. Then he must make the vision of the ideal so real that men will sacrifice all in their endeavor to make it part of their own experience, and since the Christian ideal is manifested in a perfect life he must seek to win men to the attempt to imitate it in their own lives, with the earnest desire of those in whom humility has been disciplined by the consciousness of failure. Moreover, the new evangelism must insist on the duty of service to God and man in a fellowship founded on a common faith, expressed in corporate life, and sealed by personal loyalty. It is the first duty of the church to proclaim this new, yet old, gospel of the divine kingdom.

[Rev. Cyril Hepher, M.A., Canon of Winchester, in *The Church Times*]

To an age emerging from the materialism of the nineteenth century Christian Science brings the kindling conviction of the supremacy of Spirit over matter. To a psychological generation like our own it offers an education in healthy thinking. To a nervous and high-strung folk it brings health by ridding them of a hundred fears and fancies. . . . Christ was a healer of men's bodies. He bade the disciples pray, anoint, and heal. James stands witness against us for our neglect to claim the healing grace of Christ, the Christ whom we believe to be present in His church. We have had faith enough to believe that He was present to absolve, but we have lacked faith to put His power and presence to the visible test of bodily healing. The whole structure of Christian Science, I would almost venture to say, rests upon this gap in our own faith and practice, this imperfection in our catholicity.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# To Win the War

The Christian Science Monitor, as an international daily newspaper, presents to its readers a clear, calm, and exact record of world happenings, and interprets them editorially from the viewpoint of Principle and universality.

The Monitor supports every right effort to win the great struggle now engaging our national attention. Its fearless exposure of the attempts of evil influences to interfere in our affairs aids and encourages all people to united service for the certain triumph of right.

With its own news-gathering service in every part of the world, the MONITOR publishes in detail the facts about the most important world events, and, through its international circulation, promotes a better understanding between peoples and nations.

The Christian Science Monitor, 3c a copy, is on general sale throughout the world at news stands, hotels, and Christian Science reading rooms. A monthly trial subscription by mail anywhere in the world for 75c, a sample copy on request.

# "Citizens of the World"

The patriarch Abraham and the apostle Paul, John Wycliffe and Christopher Columbus, Benjamin Franklin and Abraham Lincoln, were "citizens of the world."

They and many others to some extent thought universally; saw every man as his brother's keeper, and were the prophets of the day when a great contest would be waged to make the world one world, and that one safe for democracy.

## The Christian Science Monitor

An International Daily Newspaper

embodies this idea in a daily newspaper. It publishes the news of all the world. It circulates throughout all the world. It advertises firms in all the world. Its editorial columns give courageous attention to all phases of the world's activities.

It regards all men as created free and equal, respects religious freedom, insists on medical freedom, and is a volunteer for service in the cause of all "citizens of the world."

The Christian Science Monitor, 3c a copy, is on sale throughout the world at news stands, hotels, and Christian Science reading rooms. A monthly trial subscription by mail anywhere in the world for 75c; a sample copy on request.

Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50. Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

## A Friend of Sinners

WILLIS F. GROSS

WHEN Jesus came demonstrating the infinitude and omnipotence of good by healing the sick and casting out evils, the Pharisees accused him of being a friend of publicans and sinners. Because they had no true appreciation of good, they entertained a wrong sense of evil and the evildoer. Their distorted sense of good made them self-righteous. They were content with the observance of forms and ceremonies, seemingly oblivious of the fact that God requires the strong to help the weak in time of need. Because of their unwillingness to sympathize with and encourage the sinner in his struggle to free himself from the fetters of evil, they could not appreciate the efforts of the one who was able and willing to help those who desired to forsake sin and gain a truer consciousness of being. In the truest sense of the word Jesus was the friend of sinners; there never lived a man so far above sin as was he. Because he understood the eternal reality of good he could see evil as it is, and this made it possible for him to help those who were aroused to perceive "the exceeding sinfulness of sin," and who desired to be saved therefrom.

Jesus taught and demonstrated the only right method of healing sickness and destroying sin. His followers in this and every age must do as he did, if they would have part in the great work of saving humanity from sin and the suffering which must of necessity follow its indulgence. Here arise two very important questions: How shall one meet sin, and what should be his attitude of thought toward the sinner? One's success in healing the sick and reforming the sinner depends upon the way in which these vital questions are answered. From the human point of view it is hard to separate the individual from his sin, but spiritual understanding reveals individual man as an entity, and sin as a nonentity.

In his love for humanity Jesus of Nazareth was no respecter of persons, although to human sense it hardly seems possible that his words on different occasions and to different persons could have been inspired by the same unselfish love. To the woman taken in adultery he said, "Neither do I condemn thee; go, and sin no more." Had he no condemnation for the one who had fallen so low? It seemed not. Surely greater love than this was never manifested toward a wrongdoer. On another occasion we hear him say repeatedly: "Woe unto you, scribes and Pharisees, hypocrites!" Had he no mercy for them? Could he not have manifested toward them the same forgiving spirit of love and thus have saved them from their sins? To personal sense it seems that his love for the one was not equal to his love for the other; for one he had a blessing, for the other a rebuke.

In these two instances we find the answer to our questions. In the one case was manifest Jesus' attitude toward a repentant sinner, while in the other he rebuked sin. The Master's earthly life was the expression of that Love which saves the individual but destroys the sin. Love prompted the words of rebuke as well as those of forgiveness. "For the Son of man is not come to destroy men's lives," he said, "but to save them." Jesus' love for those unrepenting scribes was not less than his love for the repentant woman. It would be unreasonable to assume that he loathed the sin of adultery in the woman less than the sin of hypocrisy in the scribes and Pharisees, and for that reason was more lenient. Jesus loathed sin as never man loathed it, because to him it was all uncovered,—the most secret thought as well as the greatest outward crime. He saw mortals asleep in the dream of error,—enjoying its so-called pleasures and suffering its pains. He knew that they must be awakened to perceive the sinfulness of sin before they would be ready to turn from it.

The scribes and Pharisees were asleep in error, content to remain as they were. Jesus loved them and would save them from their sins. He loved not the sinner nor the dream of material existence, but he loved the individual. They did not realize the terribleness of their condition. They did not know how far they were from Truth. Jesus had for them something better, but they must be awakened to realize their need before they would accept it; hence the strong language he sometimes used in pointing out the dreadful consequences that must inevitably follow the indulgence of sin. Jesus loved humanity, but he was unrelenting toward sin. We read in "Science and Health with Key to the Scriptures" (p. 53), "He rebuked sinners pointedly and unflinchingly, because he was their friend; hence the cup he drank." The purity of his thought made his rebuke all the more tremendous. The suffering of mortal thought, when rebuked by Love, serves to destroy the belief in sin and thus saves the individual, revealing man as the child of God, untouched by sin, disease, or death.

How different to human sense was the manifestation of love toward the truly repentant woman! No need of rebuke there. She had been awakened to a keen sense of her condition and desired to be saved from it. Jesus knew the sincere desire of her heart; he knew that she was prepared to receive the blessing of Truth; hence he said to her, "Neither do I condemn thee; go, and sin no more." In this he manifested the same love as when he rebuked the scribes and Pharisees, but it seemed otherwise to mortal sense. While Jesus rebuked error unflinchingly his heart overflowed with love for God and man. Without this love his rebuke would have availed nothing. He was just as willing to say to the Pharisees as to the woman, "Neither do I condemn thee," but had he thus spoken they would not have understood him. They would have interpreted him to mean that he did not condemn the sin they indulged. He loved the man of God's creating but he abhorred every sinful sense. He exposed and denounced sin because in this way only is it possible to reform the sinner.

The true Christian Scientist follows in the footsteps of the Master, and he, too, is a friend of sinners. He understands that only to the extent he has overcome error in his own thought is he enabled to rebuke in love and save others from their sins. He is ever mindful of the Master's words,

"First cast out the beam out of thine own eye; and then shalt thou see clearly to cast out the mote out of thy brother's eye." To mortal sense it may seem an easy matter to denounce the shortcomings of others, but to do this in the right spirit and for the right purpose requires a pure and unselfish love for all mankind. How truly has Mrs. Eddy written in our textbook (p. 30): "If we have triumphed sufficiently over the errors of material sense to allow Soul to hold the control, we shall loathe sin and rebuke it under every mask. Only in this way can we bless our enemies, though they may not so construe our words." Again she says (p. 453), "You uncover sin, not in order to injure, but in order to bless the corporeal man; and a right motive has its reward." With a courage born of spiritual understanding, inspired by divine Love, strengthened by the might of omnipotence, the loyal Christian Scientist goes forth to battle with sin in himself and others, and he ceases not from his labors until the battle is fought and the victory won.

## The Joys of Childhood

AMANDA COLBATH

ONE cannot long be a student of Christian Science before his attention is directed to the numerous references in Scripture comparing the spiritual progress of the adult to that of a little child. The question then arises, How is this to be made practical? There comes a time in the life of the adult when he can no longer depend on human parents for protection and guidance. He has reached the milestone which is termed the age of accountability. The responsibilities which confront him may cause him to recall the freedom which attended his childhood, and a desire goes out to experience again the joy of former years when childish confidence and trust in human parents to care for him shielded him from present care as well as from anxiety for the future.

It is a well-known fact that no one would wish to return to his childhood, with all which the word implies; but he feels the need of something outside of himself on which he can rely, and his thought therefore goes out to the days of his childhood when his burdens were largely borne by human parents. Mrs. Eddy has written in "Science and Health with Key to the Scriptures," on page 74: "In Christian Science there is never a retrograde step, never a return to positions outgrown." It is, therefore, impossible to reach again the joys of childhood or the joy of any past experience through the beliefs of the flesh. This can be done only through an understanding of God and of man's relationship to Him.

In the third chapter of John's gospel we have these significant words: "Verily, verily, I say unto thee, Except a man be born again, he cannot see the kingdom of God." But without the light of spiritual understanding one may exclaim in the words of Nicodemus, "How can a man be born when he is old?" Jesus answered this question when he said, "Except a man be born of water and of the Spirit, he cannot enter into the kingdom of God." Mrs. Eddy has given to the world throughout her writings a spiritual sense of the new birth as a mental change, whereby the joys of childhood become a present possibility to the adult, not through a return to material childishness, but through childlike faith and trust in God. We also have a wonderful article by Mrs. Eddy entitled "The New Birth," which begins on page 15 of "Miscellaneous Writings." In this she says: "The new birth is not the work of a moment. It begins with moments, and goes on with years; moments of surrender to God, of childlike trust and joyful adoption of good; moments of self-abnegation, self-consecration, heaven-born hope, and spiritual love." When an individual takes up the study of Christian Science he has begun to experience the new birth, and from that time his growth in spiritual understanding goes on. He now relies upon spiritual sense and strives to lift his thought up to spiritual apprehension. He recognizes man's real origin as a child of God, and his position may well be likened to that of a little child. As he progresses spiritually he finds many changes taking place in his thinking and likewise in his environment. He experiences a continuous dropping off of the old and putting on of the new.

Much of the sorrow and regret of the adult is due to the changes which take place in his life; but not so with the child. Rather does he rejoice at every forward step; every toy outgrown is cheerfully laid aside for the one that is to take its place. When progress is viewed from the point of spiritual understanding it is always profitable and enjoyable to the adult; for through it he is given an opportunity to work out his salvation. He also learns that there is always cause for rejoicing at every progressive step.

The disappearing of material things cannot bring sorrow to mortals if their mental footsteps have kept pace with each passing scene. When we learn that the present experience is just as enjoyable and holds just as much opportunity for good and for unfoldment as does the past, we shall not cling to that which we have outgrown because we are afraid there will not be something as good to take its place. Willingness to give up the material for the spiritual unfolds unlimited opportunities for advancement. It must be borne in mind that the experiences of childhood are attended with the trials which accompany systematic study and discipline, as well as its joys. The adult cannot acquire spiritual education without painstaking study and self-sacrifice. Real joy comes as a reward for obedience and work well done. Valuable knowledge cannot be attained without directed effort. It demands self-abnegation, patience, and perseverance. The student of Christian Science cannot, in his effort to gain spiritual understanding, escape the discipline which is sure to accompany his departure from material belief.

The following illustration may prove helpful to the student of Christian Science. One might doubt the wisdom of the teacher who permitted a pupil at school to continue the working out of a problem in mathematics while he observed an error in the work but did not point it out. The teacher, however, knew that the pupil had the principle of mathematics back of the rules which he should apply. If he did not apply these rules correctly to every part of the problem, he would fail to get the right answer, but the trying experience of detecting and correcting the error could be turned to good account by the pupil in avoiding a repetition of the mistake. Paul declared that "the law was our schoolmaster to bring us unto Christ."

"In the sacred sanctuary of Truth are voices of solemn import, but we heed them not." These words of our Leader on page 232 of Science and Health, remind us that the need of mortals is to gain spiritual perception. When God seems silent, and we are to all outward appearance at a standstill, receiving no intimation of His presence or guidance, is it not an opportune time to question ourselves and learn whether we would be willing to correct an error in our work if it were pointed out to us,—holding no reserve? Possibly we could not be convinced that an error had been made which would necessitate the complete working again of the problem, our conviction coming only when the correct answer was withheld, and we had learned from the things we suffered.

The impersonal nature of the correction of divine Principle may seem to leave the individual free to follow his own

Digitized by Google

inclinations, but we never get a correct answer to our life problems through the exercise of human will. We can work them out only through obedience to spiritual law. God's work is finished; it is our part to grow, and to outgrow all that does not belong to a child of God. When we are bound with heavy burdens, with our thought confined to the narrow limits of material sense, the suffering occasioned by the discomfiture will hasten the donning of the "garment of praise" spoken of by the prophet Isaiah, and it is peculiarly befitting to all.

An understanding of Christian Science brings to the consciousness of the adult, and makes practical, the childlike qualities of obedience, simplicity, and trustfulness. Through it God is revealed as Father-Mother, and we can rejoice in this even as we rejoiced in the love and devotion of human parents. It restores the joyfulness of childhood and perpetuates these qualities in man.

## Lessons from a Mirage

CHARLES C. BOYNTON

ONE afternoon when I was motoring in the San Joaquin valley in California with two of my young sons, our attention was drawn to what seemed to be a great body of water covering the road ahead and extending over a wide stretch of country on both sides of it. We viewed the phenomenon with interest. Although to the senses we were impassably cut off from our home, the boys felt no fear, as they had previously had experiences with a mirage, and knew that in such experiences all that it is necessary to do is to keep right on, just as if the mirage were not there, and that it would vanish on our approach.

The experience had, however, a deeper significance for me. I knew that the appearance was merely an illusion, but I also knew that Christian Science proclaims all material appearances to be illusions, because they are the reverse of spiritual reality. My train of thought was somewhat as follows: Jesus gave us the rule by which we are to obtain our freedom from all illusions; it is for us to know the truth,—and the promise is that the truth will make us free. Make us free how? By destroying our belief in the material illusion; by healing us of our false sense. We all know that a mirage is an illusion; we know this absolutely. We do not have to work to realize this. Then, it may be asked, why does it not disappear? In this case I was realizing with great certainty of conviction that the mirage was an illusion, a false sense; but there it was, just as real to my senses as when I first saw it. Then personal sense argued, If you cannot handle something which you know with all your heart and soul to be an illusion, what hope have you ever to handle claims of evil, of sickness, of misfortune, which for so many years you have regarded as real, and which mortal sense and physical experience have always conceded to be very real, and often terrible indeed?

While this train of thought was taking my attention, we had been driving rapidly ahead, and I suddenly realized that we had arrived at a place where the mirage had seemed to be when our attention was first attracted to it, but the mirage had retreated before us as we proceeded, and was still the same relative distance in advance of us. Then there came to me an added significance to Jesus' promise that we should be free. I could not say that there was anything in the presence of that mirage which had power to limit my freedom. My faith that a clear road was ahead was not dimmed. I had not stopped on my journey on account of the mirage, nor turned aside in an endeavor to go several miles around this seemingly impassable body of water which my eyes told me was spread out over the country into which our road directly led. I had in no manner been troubled or inconvenienced. As a matter of fact the apparition was, if anything, an interesting experience, for the reason that I knew it to be an apparition which, though temporarily obscuring the road ahead, would nevertheless move on or vanish as we approached. Then could I not say I was free,—free in the knowledge of the nothingness of the apparition, and the consequent faith in the unobstructed continuity of the road ahead?

The knowing of the truth had made me free, even though the mirage still seemed spread out over the ground before me. I saw that I had all the freedom I needed. I had the healing which was in the knowledge of the nothingness of the illusion. The fact that to the so-called material senses it still seemed to persist, was of no importance. It would vanish to its nothingness in due time.

Then the thought came to me: As is this illusion, so is all mortal experience. The same conviction of faith which enabled me to drive ahead undisturbed toward this seemingly impassable body of water that lay across the road ahead of us, with the knowledge that it would vanish or move on with our approach, would, if simply adhered to, work the same results with any and all seeming obstacles which rise up to obstruct our path through life. I saw that all that was lacking was spiritually scientific knowledge of the illusory nature of all evil and materiality, and faith that it will vanish or move aside with our fearless and undisturbed advance. Then I caught a glimpse of what the belief of life in the flesh must have meant to Jesus. Was it not simply a mirage which at times might seem to obscure the way, but at no time could conceal the life that is of Spirit, the real? Thus he had his great, divine peace, and even though the storm of mortal hate raged around him in increasingly intense and threatening degree, yet to his clear sense of man's spiritual being it was naught but a mirage, which could not touch or harm him. Knowing this he could say to those who partook of his understanding: "Peace I leave with you, my peace I give unto you: not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be afraid."

The mirage of material sense persisted even as an illusion to Jesus only long enough for him with his great love to prove to humanity for all time that every phase of this material life, even unto death, is nothing more than the varying phases of an illusion, to be faced in loving fearlessness, for thus faced they disappear. This was Jesus' work in the world. This work accomplished, the mirage vanished from his sight in his ascension into the realm of spiritual reality, where the shadows of materiality have no place.

## Inexhaustible Love

JESSIE BENNETT

IT is related of an aged Scottish divine that when very near the passing "from this room into the next," he was questioned by two of the elders of his church as to whether he was quite sure of his faith in the doctrines of the church in which he had served. He replied, "There's just one thing that I am quite sure of now, and that is the love of God." Predestination and election had dropped away as matters of small moment, but the love of God remained: and so with us; when drifting clouds gather and our way appears perplexed and doubtful, to this sheet anchor we can cling—our assurance of the love of God.

One of the greatest blessings for which the writer has

Digitized by Google

cause for deep gratitude to Christian Science, lies in the growing understanding of the reality and boundlessness of divine Love, its power and availability to help at all times and in all places. There is no room for fear, or dread, or limitation, when consciousness is filled with positive certainty of the ever present Love that is God. In looking back over years previous to the time when the light of Christian Science came to illumine the pages of the Bible, it can be seen that "hidden in the dark recesses of mortal thought" (Science and Health, p. 102), were ugly cowering fears of many kinds,—fear of ill health, lack of love, lack of friendship, lack of supply,—all having their root in distrust of God; for it is impossible to believe in shortness of supply of any needful thing, for ourselves or for others, if firmly convinced of the illimitable love of God, and that He knows our need before we ask Him. More and more as this conviction and spiritual understanding are applied to the claims of everyday existence, the hungry heart is truly fed with the bread of Life, and weakness, suffering, and nameless terror diminish and disappear, replaced by a knowledge of the true man's reflection of omnipotence, his possession of joy, health, courage, confidence, and peace, all gifts from a loving Father, supplied from the exhaustless fount of divine Love.

Surely all those who have gained, through the life and work of our Leader, Mrs. Eddy, the understanding of the truth contained in the Bible, should find in their hearts and lives a wellspring of glad thankfulness, overflowing and outpouring to comfort the weary and heavy-laden. So shall we reflect and express, in some measure, in acts of daily helpfulness, of loving service, that universal, impartial Love, of which Whittier wrote in noble words that we rejoice to find in our Christian Science Hymnal (p. 80):—

Immortal Love, forever full,
Forever flowing free,
Forever shared, forever whole,
A never-ebbing sea!

## Discipline of Love

MARTHA BURR BANKS

FOR centuries men have believed that sickness, suffering, sorrow, and even temptation are ordained of God, or at best are allowed by Him, for the education or the disciplining of the children whom He has created, who, as we have been taught, are so frail and faulty that they are in sore need of training. Thus mortals have shifted the burden of responsibility for their mistakes, misfortunes, and misdeeds from their own shoulders, and shirked work and self-correction by accepting the superstition that God is the source of all their woes and that these are, therefore, natural. In excuse for their failings they have, like Adam, argued that they are not responsible for their delinquencies. They say: "The weather that God sends makes us ill." "The bodies which God has provided get out of order." "The tastes and the dispositions with which we are endowed bring us into trouble." Then they have sung fervently, "I lay my sins on Jesus," hoping that because of this substitution, God will mercifully overlook their shortcomings; in other words, that perfection will be satisfied with imperfection.

Yet when we realize that most of the disease and heartache in the world is the result of wrongdoing or careless action of somebody somewhere, we can hardly lay the blame of this sin or discord at the door of infinite righteousness and Love; and no matter how ardently we may wish to escape the consequences of our failures or our iniquities, they are bound to bear fruit in some way. Now James has written: "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning." If God's gifts, then, are sometimes good, they are always good. The Father of lights cannot change and become the source of darkness. Again James tells us: "Let no man say when he is tempted, I am tempted of God: for God cannot be tempted with evil, neither tempteth he any man. But every man is tempted, when he is drawn away of his own lust, and enticed." There have been thinkers here and there in the history of mankind who have raised their voices in protest against the teaching that God is the author of evil and unhappiness; but it was not until Christian Science dawned upon humanity through the enlightened thought of Mrs. Eddy that any serious attention was paid to this denial. Now the thought is echoed by one or another from the pulpit or through the press, that in time of affliction, instead of submitting blindly to what they have held as of divine decree, men should look to God for the cheer, inspiration, and help which will lift them out of their tribulation.

Some people still argue, however, "Why do we pray to God, 'Lead us not into temptation, but deliver us from evil,' if God has not known about the evil, or has permitted it, or even planned it?" The spiritual interpretation of the Lord's Prayer, on page 17 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, explains the petition in this rendering: "God leadeth us not into temptation, but delivereth us from sin, disease, and death."

Surely there is no support from God for evil of any sort; it has no claim to recognition, no quality of usefulness. It can have, then, in reality, no power, no value, no actuality. How, therefore, can God employ it as appeal, or test, or means of discipline in His dealings with His children? On the contrary, God is eternally good and has no consciousness of anything except good, and His law of good is ever at work. It does not admit anything opposed to that law, but simply rectifies by its presence whatever seems to be wrong. If Love could acknowledge a fraction of anything outside of Love, or could stop short of absoluteness, it would have in it a trace of criticism or incompleteness, and would not be Love; consequently it must be limitless, affluent, ever constant. So when mortals forsake the leadings of Love and follow the lure of will-o'-the-wisps, or false desires, and fall into difficulties, dilemmas, or disasters, this law of Love is still operative, always ready to deliver them from their distresses, without reproach, without condescension, as soon as they are willing to turn to it for guidance. Should they sink as low as hell, even there Love and Truth will be available to them, just as a prisoner in a dungeon could make use of the law of mathematics.

Trials are frequently supposed to be special signs of divine interest in some individual who shows marked susceptibility for spiritual growth. In support of this doctrine the following text from the Bible is quoted: "Whom the Lord loveth he chasteneth." Some one once said in a season of joy, "I'm so happy I'm afraid the Lord does not love me." The manner in which Love chastens the beloved is made clear in the story of the prodigal son. The father in the parable had shared with his sons all that he had, and had showered upon them the blessings of his love and care. The younger boy, however, apparently of the opinion that the pleasure and comfort which he felt in his father's house were the effect of material possessions, wrongly believed that he would gain more enjoyment and freedom if he could have his portion of goods to spend, with nobody at hand to advise

Digitized by Google

or hinder him in its use. But the prodigal soon discovered that his riches and happiness had come from his unity with his father. When his material inheritance was squandered and he was perishing with hunger, he remembered that in his father's house was "bread enough and to spare;" and he realized, too, that it was not material things which had made for him home and blessedness.

Now the father had done nothing to place the boy in want. He had not turned his back on his child nor sent him away in punishment. But the father's love for his son and the son's love for the father caused the lad to be unhappy until he fully understood their need of each other and arose to go to his father, not only for the sake of partaking of his bounty, but because he was assured that apart from the father's love he could find no rest or contentment. Then according to the endless fashion of Love, the father met the wanderer, and in that meeting there was at once restored to the son all that he thought he had lost. So by the indispensability and unchangeableness of Love we shall, as Mrs. Eddy tells us, all be drawn sometime to the Principle of our being, God. She says (Science and Health, p. 322): "The sharp experiences of belief in the supposititious life of matter, as well as our disappointments and ceaseless woes, turn us like tired children to the arms of divine Love."

## "Sell that thou hast"

HENRIETTA WILDE

TO a student who was reaching out to the heart of Love for thoughts which should bring comfort and healing to one in mental and physical distress, came the saying of our Master to the rich young man, namely, "Sell that thou hast." The student's first thought was that this surely could not apply to the case in hand; for had not this dear one just stated that she had lost all she had, that she had been defrauded and forsaken by one who legally and morally was pledged to protect and cherish her? Was she not heart-bruised and "sick nigh unto death"? What had she to sell? Again into the consciousness of the student came the Master's words: "Sell that thou hast, and give to the poor, and thou shalt have treasure in heaven: and come and follow me."

Here the student was led to ponder what is meant by a sale. Why did not the Master tell the young man to divide his possessions among the poor, rather than to sell and give the proceeds of the sale to the poor? Was it, perhaps, that having once sold that which he had, and received his price therefor, he could never claim the things again? And while the poor were being blessed by the distribution of what he gained from selling, he would be unfettered and unburdened in following our Lord and learning the way to eternal life.

How plainly the student now saw the wisdom and saving grace of this advice, if followed. If the one seeking help would only be willing to sell her grief, her sense of betrayal and of loss, then all that had come along with it—the resentment, fear, and so on, that were making the body sick—could be thrown into the bargain, sold, given up for Truth. And what could Truth give for all this that she had lost? Even a true, permanent idea for every fleeting human concept. A true idea of man instead of the one that had seemed so unreliable and unstable; a true sense of substance and the source of unlimited supply; a fresh incentive to activity, and wisdom to guide her to make the right choice. To the student's great joy the message was heeded; the sale was made, and the proceeds,—the peace, gratitude, tenderness, and love of service gained from the experience,—are through the one thus uplifted blessing others who are in need.

# Selected Articles

["Realization of the Christ"—*The Christian Science Monitor*, Boston, U.S.A., Feb. 6, 1918]

Jesus of Nazareth realized the Christ. He made real to human sense "the divine manifestation of God, which comes to the flesh to destroy incarnate error." The quoted words are the definition of "Christ," found on page 583 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. Because the manifestation of God is infinite, its realization is not limited but applies to every individual as it did to Christ Jesus, which is a fundamental fact of Christianity that mankind must recognize.

Christian Science states so simply the universal, eternal Science of being and its Principle, God, that every one may understand it and realize the Christ,—may make real and practical here and now the expression of God that exalted Jesus. Christian Science shows that as Christ, Truth, is realized, all that is not like Truth loses all semblance of reality, —is seen to be error, the opposite of Truth. Thus the Messianic works, commonly called miracles, are explained and shown to be inseparable from the realization of the Christ, the Truth; for full recognition of the infinitude of righteousness eliminates sin, adherence to the fact of health dispels disease, knowledge of the reality of life excludes death, understanding of the allness of good reveals the nothingness of evil.

The Christ, or Truth, is ever here for each one to realize. The manifestation of infinity cannot rightfully be conceived of as absent. Christ Jesus made this clear in his statements that the Christ antedates Abraham and is always with his followers. By such illustrations as the parable of the vine and its branches, the Master taught the inseparable relationship of man to God, the complete unity of all entities in Christ. All this clearly means that the Christ is the revelation of real individuality, the spiritual and only true self; therefore, the Christ is never beyond the realization and demonstration of man. It must be equally clear that a limited, materialistic, personal estimate of man, individuality, self, is just as mistaken as is a finite concept of the Christ. The true concept of one is the true concept of the other, and it is not physical, finite, but metaphysical, infinite.

When Simon Peter declared: "Thou art the Christ, the Son of the living God," Jesus' answer revealed the fact that the spiritual understanding of that declaration is an expression of God. His words were: "Flesh and blood hath not revealed it unto thee, but my Father which is in heaven." It was with a true understanding of Spirit that Peter spoke on this occasion, as it was always that with which Christ Jesus spoke. As the Father is All, this expression of Him, discernible in the words of the disciple, is spiritual man, the real man, the rock upon which the Master said that his church is founded.

To-day, as of old, scholastic theology may reject the proof of the actual presence of Christ as the revelation of man, the true self, and may blindly declare: "He made himself the Son of God." This accusation assumes that the realization of the Christ is the glorification of one individual to the exclusion or derogation of any or all others. This is a false view. The true concept of the Christ is scientific, universal. The test of the realization of the Christ as revealing God and all real individuality is the knowledge that there is no other reality, either self or some one else. The Mind of Christ must recognize as real nothing else but the manifestation of God; so any such statement as, "I am the Christ," if it leaves

Digitized by Google

the conclusion that there is a you, a reality that is not of Christ, contradicts and confounds itself, for it disproves its own claim to infinity.

Christ Jesus consistently maintained the allness of God, rejecting every limited sense of being. He was faithful to the teaching of Moses that I AM is the peculiar designation of Deity. In the Glossary of Science and Health (p. 588) we find: "I AM. God; incorporeal and eternal Mind; divine Principle; the only Ego," and the spiritual meaning of the first personal pronoun, as follows: "There is but one I, or Us, but one divine Principle, or Mind, governing all existence; man and woman unchanged forever in their individual characters, even as numbers which never blend with each other, though they are governed by one Principle." This correlates with the declaration of the Savior: "And I, if I be lifted up from the earth, will draw all men unto me." This was his answer to those who sought the human Jesus instead of the spiritual Christ.

Human belief rejects as impractical the realization of the Christ as expressing the allness of perfection and the perfection of all that is real. Jesus, apparently, did not share this belief that the perfection and universality of Truth are beyond the present reach of men, for he said plainly in his Sermon on the Mount: "Be ye therefore perfect, even as your Father which is in heaven is perfect." The fact that he said "your Father," proves that he saw the multitude as children of Spirit, not children of the flesh; and this brings out the essential universality and perfection of the Son of God.

A demonstrable understanding of the Sermon on the Mount is preeminently practical, as shown by Christ Jesus' works of healing, transformation, and reformation. He proved that the correction of seemingly small evils dispels supposedly great ones. Purity of thought, correcting sinful desire, wipes out lust. When aggression is replaced by kindness, avarice by charity, selfishness by generosity, hatred and evil by love and good, then impiety, disobedience, theft, falsehood, wrong desire, disappear along with their concomitants, disease and death.

The Christian Science standard is spiritual perfection, the Christ, or Truth, realized. Mrs. Eddy writes: "Christian Science is absolute; it is neither behind the point of perfection nor advancing towards it; it is at this point and must be practised therefrom. Unless you fully perceive that you are the child of God, hence perfect, you have no Principle to demonstrate and no rule for its demonstration. By this I do not mean that mortals are the children of God,—far from it" (The First Church of Christ, Scientist, and Miscellany, p. 242). Human or materialistic estimates of perfection are not the perfection of Principle nor the basis for permanent results. Christian Science shows the seeker how to surpass a human sense of perfection by lifting up the standard of the Christ.

✧

[Frederick R. Rhodes in *Leeds* (England) *Citizen*]

Christian Science healing is not accomplished by any human means, nor have its teachings anything to do with the carnal mind, but it is the direct result of true prayer. Mrs. Eddy writes in the Preface of "Science and Health with Key to the Scriptures" (p. xi): "The physical healing of Christian Science results now, as in Jesus' time, from the operation of divine Principle, before which sin and disease lose their reality in human consciousness and disappear as naturally and as necessarily as darkness gives place to light and sin to reformation."

Will power, through which mental suggestion operates, is a product of the carnal mind, which Paul assures us "is enmity against God" and as such is just as likely to be used for an evil purpose as for a so-called good one. The healing and regenerating effects resulting from the ministrations of Christian Science are the physical evidence of, or signs following, the renewing of the mind. This true method of Christ healing and saving is referred to by Westcott as follows: "Perfect conformity to the absolute—to that which is." When we consider that the absolute is the real or spiritual consciousness, we see that it is only possible to conform to its teaching through the exact knowledge or understanding of God.

The statement that Mrs. Eddy has built a church around the central fact of the control of the body through the human mind is not in accordance with the truth. The thousands of Christian Science churches all over the world have been built through the loving desire of the millions of grateful men and women who have received through the better understanding of the presence, power, and availability of their Father's loving care, a measure of health and happiness which in most cases had, from a material standpoint, been deemed either very improbable or impossible. If it is remembered that in a large percentage of cases the Christian Science practitioner never sees the patient at all, it must be conceded that mental suggestion or the human will cannot possibly be the agent through which the help is given. It would be just as truthful to say that when the prayers of a church congregation are asked for on behalf of some poor sufferer, the responding members of the congregation are practicing mental suggestion.

If, then, it is in accordance with the teachings of our Master to ask for God's help anywhere in this way, it must be logically right to ask for His comfort and rest wherever and whenever there arises the human need. The results of this scientific and trustful prayer can be heard at the Wednesday evening meetings of any Christian Science church or society, and did not our Master say, "By their fruits ye shall know them"?

✧

[Peter V. Ross in *Palo Alto* (Cal.) *Times*]

But what of the failures and inconsistencies of Christian Scientists? Christian Scientists are as keenly conscious of their shortcomings as is their exultant critic. They are not so confident as he, however, that any particular failure could have been avoided by a "perfectly simple operation." Most of us can recall several instances of people who submitted to perfectly simple and entirely successful operations, but who did not survive to enjoy the success or repent the simplicity.

When the great bridge in course of construction at Quebec fell into the river some eighteen months ago, no one questioned the principles of mechanics or censured the engineers. The case was simply one of unerring principles faultily applied by erring mortals. "The physical healing of Christian Science results now, as in Jesus' time," Mrs. Eddy tells us on page xi of the Preface to "Science and Health with Key to the Scriptures," "from the operation of divine Principle, before which sin and disease lose their reality in human consciousness and disappear as naturally and as necessarily as darkness gives place to light and sin to reformation."

But sometimes Christian Scientists err in applying the truth of divine Principle to individual cases. They make no pretension to infallibility. They claim no more than to have learned the alphabet of Christian Science and to have glimpsed the possibility of a full understanding, with the potentiality for good that rests therein. "I have never supposed the world would immediately witness the full fruitage of Christian Science," Mrs. Eddy writes (Science and

Digitized by Google

Health, p. 348), "or that sin, disease, and death would not be believed for an indefinite time; but this I do aver, that, as a result of teaching Christian Science, ethics and temperance have received an impulse, health has been restored, and longevity increased. If such are the present fruits, what will the harvest be, when this Science is more generally understood?"

✧

[Louis E. Scholl in *Tacoma* (Wash.) *Church Record*]

The space allotted to this article gives no opportunity to reply to the various "counts" on which Christian Science and Mrs. Eddy are indicted by our critic. It is sufficient to say you are right in stating that "the public is entitled to know all there is to be known regarding any system of religion." Reliable information concerning Christian Science is free, and easily accessible in any good public library, where Mrs. Eddy's books and "The Life of Mary Baker Eddy," by Sibyl Wilbur, may be had for the asking. Christian Science reading rooms are open daily, where the Bible and all authorized literature may be read or purchased. The Wednesday evening testimony meetings are open to the public. There each may decide for himself whether the Christian Science healings are genuine or not.

In this, the most crucial hour of our nation's history, when every ounce of effort should be spent in unifying and harmonizing our people, is it opportune for the pulpits to lend themselves to a message of hate whose manifest purpose is only to stir up strife and bitterness? Is it the part of a full grown man to spend his time in reviling a woman, who like her Master, when she was reviled, reviled not again, and admonished all Christian Scientists to do likewise; a woman of whom Clara Barton, founder of the Red Cross, in an interview reported in the *New York American*, and repeated in the *Sentinel* of January 18, 1908, said: "Mrs. Eddy should have the respect, admiration, and love of the whole Nation, for she is its greatest woman. . . . Without malice, always with a kindness and charity that is almost beyond human comprehension, has this woman fought antagonism, and that only with love."

✧

[Hugh S. Hughes, Jr., in *Appleton* (Wis.) *Crescent*]

Christian healing, as taught in Christian Science, and the power of suggestion are as far apart as the poles. The latter is based on the human mind, referred to by Paul in his letter to the Romans as the "carnal mind" which "is enmity against God;" while Christian Science teaches and proves that true healing is based on the divine Mind, Spirit, God—the Mind that was in Christ Jesus, the Mind that is the only governing power of man and the universe.

Mrs. Eddy says (Science and Health, p. 102), "There is but one real attraction, that of Spirit." Spirit being identical with God, the one Mind, is the only attraction. She says further in the same book (p. 536), "If man's spiritual gravitation and attraction to one Father, in whom we 'live, and move, and have our being,' should be lost, and if man should be governed by corporeality instead of divine Principle, by body instead of by Soul, man would be annihilated."

This law of spiritual gravitation and attraction to God is what impels the men in the trenches, in their hour of great need, to turn to Christian Science in such great numbers, for man instinctively knows that the power of God is the only thing that can save him, and when he reaches out earnestly and with a longing desire to God to help him, his prayer is answered, and he is restored to health, peace, and harmony, the kingdom of heaven.

The church that teaches the ever presence of God, His willingness and ability to meet the present needs of man, is the church that will attract all men unto it, and Christian Science teaches and proves by demonstration that God is an ever present help in solving every human problem, physical, mental, moral, or financial. In short, that He "is the God of all comfort" "who forgiveth all thine iniquities; who healeth all thy diseases." Not only the French soldiers, but all humanity as well, are fast finding this simple teaching to be true, and turning naturally to it for help and comfort in time of need.

✧ ✧ ✧

## Funds of The Mother Church

"We thank you heartily for the financial help which God has given us through the Christian Science War Relief fund since the war began. We received regularly every month the bountiful contribution of twenty-five francs, which was for us a very great help. Words are inadequate to express our gratitude, and we will endeavor to prove it by deeds and by striving to understand and make practical the teachings of Christian Science. May God bless all who are connected with this great religion of loving one's neighbor as one's self."

"I cheerfully confide to your care the sum of two dollars to help pay a small return for my beautiful book [French Science and Health] which you were so kind to forward to me. I cannot give much, but what I give is with all my heart. This will help to convey Christian Science to some of those who are in ignorance."

"I also have a duty to fulfill in expressing my hearty thanks for the receipt of twenty-five francs, which was at the time such a great relief. The words, 'Before they call, I will answer,' have been fulfilled in this case."

"We are a small band of Christian Scientists, too small as yet to form a regular society, yet not too small to meet and read Science and Health, and to talk over our many blessings, which are daily increasing as we learn more and more of this beautiful truth. We also take up a collection at these meetings, with the hope that we may have a church building some day. A part of this collection we wish to be used to relieve some sufferer through this terrible war, and so send the sum of fifteen dollars to the War Relief fund, knowing that it will do some one good, as it has done us good in the sending."

"I wish to express my gratitude for the wisdom of the Board of Directors in opening these 'channels for the streams of love,' and am also deeply grateful for a little understanding of the statement in our Hymnal that 'love has overflowing streams, to fill them every one.'"

"At the first regular semiannual business meeting of the members of our newly organized Christian Science Society, it was unanimously agreed that the collections of the Sunday school and church on the fourth Sunday in each month be sent to the Treasurer of The Mother Church, to be used for the War Relief fund, the Real Estate fund, and the Benevolent Association fund. I inclose a check for ten dollars, the sum of the collections for January 27. As a new Christian Science society, we wish to express our love and loyalty to The Mother Church, and our gratitude in being able to contribute toward the splendid work being done by the Board of Directors."

## The English Bible

VASTLY increasing in the world is the number of those who understand the English language. To a great multitude it is their mother tongue. To many it is the language of convenience, acquired in order to be a medium for their commerce. To many it is their language of thought, a tongue either inherited or acquired, wherein and whereby their deepest thoughts find expression. And always central to their thinking is the English Bible with its revelation of divine law, spiritual, prophetic insight, and gospel teaching and healing.

Furthermore, this age has seen the appearance of Christian Science, which has proven its ability to deliver the student of the Bible from the babel of divisive theories promulgated about it by reestablishing the method of healing which it records. "Science and Health with Key to the Scriptures" by Mary Baker Eddy gives the unfolding of Scriptural truth whereby all Christians can become as united as mathematicians are and as mentally satisfied because of proof given. The author of the Christian Science textbook, when arranging for its translation, stipulated that opposite the text which would be the translation should appear "the divinely inspired English version which shall be the standard." This was in a letter to her publisher under date of March 31, 1910, which is quoted in the Preface to the German translation, and this rule was, of course, regarded when the French translation was published. By means of these two translations many more students will be able to come to an appreciation of "the divinely inspired English version."

In the translation of the Old Testament Scriptures from Hebrew or Chaldee into Greek, it is to be noted that where the first translators blundered, the translators into other tongues, following them, repeated the mistakes; therefore dogmas based on Latin, Italian, Spanish, French, German, and also English translations are sometimes quite insecurely founded, and, with whatever reluctance, must be given up. Mrs. Eddy's teachings bring us back to the spiritual intuition of the original writers, making us understand their message and able to prove it true, for she gave us an example by her own demonstration. She says (Science and Health, p. 24): "Acquaintance with the original texts, and willingness to give up human beliefs (established by hierarchies, and instigated sometimes by the worst passions of men), open the way for Christian Science to be understood, and make the Bible the chart of life, where the buoys and healing currents of Truth are pointed out."

The Bible has been the chart of life to the English speaking people from the days of Wycliffe. His real and wonderful work was in setting forth fundamental liberty of thought by giving the Bible to plowman and merchant, soldier, sailor, traveler, rich and poor, learned student and common man. That translation of the message of God into the common tongue was the yeast of freedom from which resulted the penetration into the world's thought of ideals for which civilization itself is contending to-day.

England stands for the free Bible, and so does the Atlantic-sundered commonwealth which, for freedom's sake, broke away from the mother country when its alien king and unwise rulers contravened the rights of freedom. Mrs. Eddy's ringing call for unity between the representatives of freedom in the world was given in that poem where she said (Poems, p. 11):—

> Brave Britain, blest America!
> Unite your battle-plan;
> Victorious, all who live it,—
> The love for God and man.

On the publication of this poem a Christian Scientist found in his own mind a sense of opposition to his Leader, because of unreasoning prejudice against England. He could find no actual reason for the hostility he felt, which was an irritating belief making him feel ugly. This inoculation of prejudice probably went back to school days, and it is well to remember that hidden agencies have worked through schoolbooks and the thousand influences that touch childhood and youth, intentionally endeavoring to inoculate their minds with misunderstanding of the land of the free Bible. Those who scheme that human minds shall be pervaded by theories which will enslave their lives realize that where there is the free Bible there will be free life, liberated thinking, representative government, democratic institutions necessarily following the acceptance of the truth found in the law and the prophets and fulfilled and established in the demonstrations of Christ Jesus. Consequently, whatever believes in autocratic government and denies the fundamental freedom of man will seek to instill mesmeric hatred, that is hatred without a cause, as an obstruction against the progress of the liberating ideas.

Let us frequently lift our eyes to the vision of the angel with the book, the book which Mrs. Eddy says is "open for all to read and understand" (Science and Health, p. 559), and let us recognize concerning the message which thus has come to us the admonition written by John, the Revelator, regarding his vision of things to come: "Blessed is he that readeth, and they that hear the words of this prophecy, and keep those things which are written therein: for the time is at hand."

WILLIAM P. MCKENZIE.

## Distribution

DISTRIBUTION is a very inclusive word in Christian Science. It relates itself naturally to the sending out of the life-giving literature of the movement and in this way points to the beneficent activity which represents the ceaseless operation of divine law. When the rich young man came to Jesus, asking the way to eternal life, the great Teacher called his attention to the Commandments, and the young man with childlike sincerity replied that he had obeyed them from his youth up. Mark tells us that Jesus looking on him loved him! We however find these words in Luke: "Yet lackest thou one thing: sell all that thou hast, and distribute unto the poor, and thou shalt have treasure in heaven: and come, follow me."

The young man's decision is not of so much consequence to us as students of Christian Science as is our attitude toward the call of Christ, Truth, to-day when we have the opportunity presented to us of becoming "rich toward God" through the sacrifice of the material sense of riches in order to advance the cause of Truth. We have learned through very deep experiences that nothing less than the bread of

Digitized by Google

Life—the word of Truth—can feed the world's hunger, and so we must give of our best even though, like our Master, we at times pause in our ministry to give also the loaves and the fishes. The prophet Amos foresaw a famine, not of material bread, "nor a thirst for water, but of hearing the words of the Lord," and now when all eyes are turned toward this land with deep desire for aid we must not fail to give that which really satisfies and which brings with it boundless blessing; for on page 494 of "Science and Health with Key to the Scriptures" our dear Leader says: "Divine Love always has met and always will meet every human need."

A number of years ago Mrs. Eddy was asked by a student in one of her classes to what extent Christian Scientists should endeavor to bring this healing truth to the notice of the public by printed articles. At that time the *Journal* was our only periodical. Mrs. Eddy's reply was profoundly metaphysical, and its full significance grew upon those who heard it as they advanced in spiritual understanding. She began by saying that the silent declarations of truth which heal the sick and transform the sinful may be typified by gold coinage, and the audible declarations of truth by silver coinage. She then explained that published utterances of Christian Science were like paper money which finds its way everywhere and is a wonderful medium of exchange, provided always that it represents the gold. It goes without saying that *The Christian Science Monitor* is a tremendous agency for good in this respect. We all know how unfortunate it is in the world of commerce to have restricted or obstructed circulation, when fear paralyzes human activity sometimes to the extent of producing a so-called panic; and yet the gold and silver coinage is not in any wise lessened by this mental condition on the part of mortals, only it is not available for human need. The articles and testimonies in the *Journal* and *Sentinel* show incontrovertibly how the free circulation of the truth through the Christian Science literature is meeting all human need.

Christian Science has brought to light the limitless riches of divine Love and wisdom, symbolized in ancient days by the tabernacle with its mercy seat of pure gold, and again by the holy city which John saw as pure gold,—the city wherein is no sickness, sin, or death. To the student of Christian Science the question is how we can best bring to the needy this great treasure. Paul counsels men to turn away from "uncertain riches," and be "rich in good works, ready to distribute, willing to communicate; laying up in store for themselves a good foundation against the time to come."

In the nineteenth chapter of Revelation we have a wonderful picture of a rider on a white horse, leading to victory the heavenly hosts that make war upon all error,—characterized on page 571 of Science and Health as "sin, sorcery, lust, and hypocrisy." This victorious warrior and leader is called "The Word of God," nor do we find any intimation in Scripture that in any other way or by any other means can the almightiness of God, good, and the supremacy of Spirit be demonstrated. Though the vesture of this great warrior is said to be "dipped in blood," those who follow him are clothed in "linen, white and clean," while the utter destruction of all evil comes from the sharp sword, proceeding out of his mouth, with which all mortal beliefs are smitten. Who would not then be enrolled in this great army, the battle cry of which is ever the same, "Salvation, and glory, and honour, and power, unto the Lord our God"? Blessed truly are they who do His will and thus know that here and now "the Lord God omnipotent reigneth."

ANNIE M. KNOTT.

## Godly Jealousy

THE spiritual original of the word jealousy, as used in the Bible with reference to God, needs to be recalled. That which is generally described as one of the worst qualities of the carnal mind is but a counterfeit of God's tender care for His creation. God is jealous for us. God demands our entire worship and love. He brooks no rival in our affections, for He is supreme and infinite, the one and only Father-Mother. When Moses was warned not to make a covenant of any kind with the Canaanites, he heard the words: "For thou shalt worship no other god: for the Lord, whose name is Jealous, is a jealous God."

In return for our whole-hearted adoration, obedience, and gratitude God cares for us and watches over His own. Interpreting the meaning of the name Japhet, Noah's son, Mrs. Eddy writes on page 589 of "Science and Health with Key to the Scriptures": "A type of spiritual peace, flowing from the understanding that God is the divine Principle of all existence, and that man is His idea, the child of His care." Why should not Deity exercise this perpetual watch over His own creature, turning aside the arrow that would wound, the plague which would come nigh our dwelling, the sting of hate which pretends it can be the sting of death? There is no indifference in the divine Mind toward the idea which emanates from it. The reflection is dear to the light; the rays to the sun. God is not apathetic or neutral; He is ever active in showering blessings and benefits.

Human beings in every walk of life meet the argument at times that they stand alone, that nobody loves them. Some feel the condemnation of failure; others the desperation of being misunderstood. They have experienced the sensation of finding that the more they try to explain their motives the more they are suspected. Advancing Christians encounter the storms raised by resistance to truth. Timidity and doubt assail them when unsuspected phases of evil first appear, either in their own thought or that of others. Perhaps they stand aghast, for the time being friendless and forsaken. Then is the time for them to remember that God is a jealous God, who is more considerate of their own welfare than they can possibly be themselves. The maximum of joy, harmony, ability, talent, power of expression, peace, victory, activity, which they may wish for themselves is as nothing compared with what a jealous God has already given to His obedient and grateful child. "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him."

Christian Science alone can reveal what God has already and actually given His little ones; for all other religious systems merely hold out a promise without being able to demonstrate the carrying out of the promise. The wounded soldier deprived of a limb is not less a man than before the seeming loss. Flesh, blood, and bones do not constitute man. The jealous God who watches over His own does not permit His creation to be rendered less than perfect, His man to be mutilated, His woman bereaved or dishonored, His child sacrificed to Moloch. War can neither make nor unmake men and nations. The mortal ruler expressing his haunting sense of poverty by a lust of conquest adds nothing to his possessions in subjugating humans and adding matter to matter. War does not touch the real creation. It can never add one iota or take an iota from God's man, for God has already provided His creation with gifts innumerable and joys unspeakable.

The same jealous care which the heavenly Father-Mother exercises in behalf of man, men should exercise in behalf of

Digitized by Google

each other. To receive and then to give, to gather and to sow, to be loved and to love in return, to be anointed and to bless others, is to reciprocate and to reflect. This is the normal activity of man. This puts the currency of true Christianity into circulation and proves the presence of God to be a living fact. Paul declared to the Corinthians: "For I am jealous over you with godly jealousy." In this sense one can imagine the Discoverer and Founder of Christian Science moved with "godly jealousy" for the spiritual success of her students and her church. It is known that her husband, Dr. Asa G. Eddy, watched over Mrs. Eddy's works with the same godly jealousy against the world's ungodly jealousy, thus conferring a lasting benefit on the world.

What depth of consolation in this admission that God is a jealous God! The least of these our brethren are the objects of His special love. All that He has made is good. Wayward children, false brethren, cruel parents, professional thieves, drones, and exploiters of others, ruthless and arrogant conquerors, adepts in diabolism, monstrous self-glorifiers, ecclesiastical past masters in hypocrisy—all these are but false beliefs which neither touch nor soil God's creation. As they are put off, the immortal man of God's jealous care appears, crowned with the authority and dominion of that greatness which is good because it is of God.

WILLIAM D. MCCRACKAN.

# Among the Churches

## Current Notes

TOLEDO, OHIO.—About nine thousand pieces of literature are distributed monthly in Toledo by the two Christian Science churches. The work is done from distributing centers maintained by each church.

The purpose of disseminating Christian Science literature, members say, is threefold. It is not done to proselyte; in fact, no Christian Science propaganda is ever thrust upon anybody, and is never done in an aggressive or annoying manner. The literature is simply placed where those who care to may avail themselves of it. Its threefold purpose is explained to be that of breaking down the prejudice against Christian Science by giving the public a clear idea of what Christian Science really stands for, and lastly, as a healing and enlightening force.

The two Toledo churches jointly maintain over one hundred distributing points, including all of the public charitable and corrective institutions of the city, the county infirmary, the free employment bureaus, rest rooms in hotels and railway stations and many of the large factories and industrial plants of the city.—*Toledo Blade.*

NEVADA.—In many cases newspapers, having had items corrected in the past and having appreciated more of the real import of Christian Science through receiving *The Christian Science Monitor,* have asked whether certain news items were correct before publishing them. The stand of the *Monitor* on various subjects has been editorially commended rather than disapproved. About one hundred items from the *Monitor* were printed in the state newspapers, including mainly editorials, extracts from the column called "Notes and Comment," items about Nevada, and some news items. The state newspapers are treating the Christian Science movement with respect because they are recognizing that Christian Science operates on the basis of Principle.

*Committee on Publication.*

CALGARY, ALBERTA, CANADA.—The Christian Scientists of Calgary have just completed the extension to their church edifice at a cost of approximately forty-five hundred dollars. The new addition will double the seating capacity of their auditorium as well as give them a very serviceable foyer or entrance hall. The growth of the Christian Science movement in Calgary has been very marked, especially during the last year.—*The Canadian.*

OAKLAND, CAL.—The beautiful bungalow church building of Seventh Church of Christ, Scientist, at 2333 Harrison Boulevard, was dedicated yesterday [May 12]. Seventh Church was organized May 15, 1914, and held its first service in Ebell Hall Wednesday, May 20, 1914. The building, equipped, cost approximately $34,300.—*Oakland Tribune.*

BENNINGTON, VT.—The local Christian Science Society has purchased the building on Main Street where their services have been held for the past year.—*Bennington Banner.*

❖ ❖ ❖

# The Lectures

PORTLAND, ORE. (Third Church).—Paul Stark Seeley, lecturer; introduced by Ernest Percy Morgan, who said in part:—

In John's gospel we read that one of Jesus' disciples made the following request of the Master: "Lord, shew us the Father, and it sufficeth us." This heart yearning of Philip for a knowledge of God has been the cry of humanity all through the ages, all of whom have been echoing Job's plaint, "Oh that I knew where I might find him!"

In harmony with this, one of the great American newspapers in commenting on the life work of our revered Leader, Mary Baker Eddy, made the following statement: "She made God easy of approach to hosts of men and women, who losing faith, else had not known Him." An innumerable multitude of people all over the world bear grateful testimony to the truth of this statement; for from the study of Christian Science we have found God, and are, in a measure, able to say with Job, "I have heard of thee by the hearing of the ear: but now mine eye seeth thee."

MONROVIA, CAL. (First Church).—John Randall Dunn, lecturer; introduced by John W. Thomas, who said in part:—

Mrs. Eddy, in the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 476), says: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." This way of spiritual attainment, which leads out of the wilderness, through Gethsemane, by way of Calvary, up to the Horeb height where God is revealed, is reached only as we are born again; or in the words of St. Paul, as "ye put off concerning the former conversation the old man, which is corrupt according to the deceitful lusts; and be renewed in the spirit of your mind; and that ye put on the new man, which after God is created in righteousness and true holiness."

*The Monrovia News.*

SEATTLE, WASH. (First Church).—William D. Kilpatrick, lecturer; introduced by Roy J. Hutson, who said in part:—

Just now, when excellency and efficiency are the watchwords in every walk of life, it is most appropriate that the

Digitized by Google

business man should enjoy the privileges and benefits of a religion, the correct application of which restores health, hope, and harmony. Christian Science is applied knowledge. Ever available to all mankind and given in so simple a manner that children demonstrate it, Christian Science is healing the world. On page 13 of Science and Health we find these statements: "Love is impartial and universal in its adaptation and bestowals. It is the open fount which cries, 'Ho, every one that thirsteth, come ye to the waters.'" During these strenuous times, when the worst seems to be coming to the surface, to be possessed of a demonstrable rule—a panacea for every human ill—is indeed a blessing.

NEW YORK, N. Y. (Fourth Church).—Virgil O. Strickler, lecturer; introduced by Mrs. Lillian P. Mokrejs, who said in part:—

Healing has come to people from the study of the Bible throughout the ages, but this was always attributed to a miracle, a departure from law as man understood it, and therefore regarded as a special favor to that particular individual. Mrs. Eddy was healed through reading the Bible, but instead of attributing it to a miracle, she set about to discover the divine law that had been manifested in her healing, and never rested until she had proved and made clear to others the application of that law in her textbook "Science and Health with Key to the Scriptures." This way of looking at the Bible is bringing back the faith and understanding demonstrated by Jesus and the early church.

ST. PAUL, MINN. (joint community lecture).—Dr. Walton Hubbard, lecturer; introduced by Miss Nelle B. Beardsley, who said in part:—

On the corner stone of this church building is carved this line from the Scriptures: "He sent his word, and healed them." According to some authorities, word, as here used, means either the gospel message or the Christ. But the gospel message and the Christ are one and inseparable; for it has been said, and truly, "What is the Christ except the spiritual truth about anything and everything." This is the gospel the Christ has revealed down the ages—the word of spiritual truth; and this is what the same dear Christ is revealing to-day in Christian Science—this very word of truth—and making it demonstrable in our lives.

MEMPHIS, TENN. (First Church).—Frank Bell, lecturer; introduced by Mrs. Alice M. Leonard, who said in part:—

The study of Christian Science has caused many to know that whereas they ignorantly worshiped an unknown God, they have found that here and now a demonstrable knowledge of God can be obtained whereby sickness as well as sin may be overcome. Jesus said, "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." Christian Scientists are earnestly striving to know more of God, and in so far as they have gained the spiritual understanding of the Christ, to follow in humility and love in his footsteps.

WATERBURY, CONN. (First Church).—George Shaw Cook, lecturer; introduced by Lee H. Dowd, who said in part:—

In seeking truth as understood in Christian Science there is ever increasing pleasure, and when one attains a demonstrable knowledge of this truth and applies it, he experiences health, happiness, harmony. The Discoverer of Christian Science, Mary Baker Eddy, by consecration to God's work was enabled to prove by demonstration the psalmist's statement that "the truth of the Lord endureth for ever," in that it is as efficacious now as it was centuries ago when it was applied with convincing results in healing the sick, casting out error or evil, and raising the dead.

CHADRON, NEB. (First Church).—Ezra W. Palmer, lecturer; introduced by George W. Plants, who said in part:—

Many persons who do not readily grasp the meaning of Browning, love to linger over his lines:—

God's in his heaven:
All's right with the world;

and for nearly two thousand years little children have been taught to lisp the words of the Savior of men, "Come unto me, all ye that labour and are heavy laden, and I will give you rest." Christian Science, as I understand it, is the optimistic dream of Browning come true; it is the living, loving promise of the sweetest singer of all the ages applied to the everyday life of men.

CINCINNATI, OHIO (First Church).—Paul Stark Seeley, lecturer; introduced by William S. Sterrett, who said in part:—

The Scriptures tell us that the Lord Jesus said, "It is more blessed to give than to receive." Mrs. Eddy, the Discoverer and Founder of Christian Science, and author of its textbook, "Science and Health with Key to the Scriptures," evidently had these words of Jesus ever before her; for she was constantly giving, giving, giving. Her greatest gift to humanity was the divine revelation or Science of the Christ, or Truth, and with it the "signs following" in the destruction of sin, sickness, and death, and which she named Christian Science.

CHICAGO, ILL. (Tenth Church).—Virgil O. Strickler, lecturer; introduced by Maud W. McCormick, who said in part:—

More than nineteen hundred years ago Jesus of Nazareth offered to the world a rule for complete and perfect salvation in these few simple words: "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free." But men have turned away from this divine message with the despairing cry, What is truth? Christian Science answers this question, answers it fully and satisfactorily—satisfactorily, because its every statement is susceptible of proof.

BAYONNE, N. J. (Society).—John Randall Dunn, lecturer; introduced by Lee Dare Young, who said in part:—

Because Christian Science has proved God's power through healing as well as through spiritual uplift, and because it has made the world see the Bible as a practical help and daily counselor instead of as mythology, hundreds of thousands of people lovingly acknowledge its truth. It has helped men on the sea and in the trenches to find that God is a truer protection than armor plate.

## Lectures to be Delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

ILLINOIS—Chicago (joint lecture): Woods Theater, 12:10 to 12:50 noon, July 16.

## Notice

Lecture notices must reach the Editorial Department not later than twelve days preceding the date of the *Sentinel* in which they are to appear.

Digitized by Google

each other. To receive and then to give, to gather and to sow, to be loved and to love in return, to be anointed and to bless others, is to reciprocate and to reflect. This is the normal activity of man. This puts the currency of true Christianity into circulation and proves the presence of God to be a living fact. Paul declared to the Corinthians: "For I am jealous over you with godly jealousy." In this sense one can imagine the Discoverer and Founder of Christian Science moved with "godly jealousy" for the spiritual success of her students and her church. It is known that her husband, Dr. Asa G. Eddy, watched over Mrs. Eddy's works with the same godly jealousy against the world's ungodly jealousy, thus conferring a lasting benefit on the world.

What depth of consolation in this admission that God is a jealous God! The least of these our brethren are the objects of His special love. All that He has made is good. Wayward children, false brethren, cruel parents, professional thieves, drones, and exploiters of others, ruthless and arrogant conquerors, adepts in diabolism, monstrous self-glorifiers, ecclesiastical past masters in hypocrisy—all these are but false beliefs which neither touch nor soil God's creation. As they are put off, the immortal man of God's jealous care appears, crowned with the authority and dominion of that greatness which is good because it is of God.

WILLIAM D. MCCRACKAN.

# Among the Churches

## Current Notes

TOLEDO, OHIO.—About nine thousand pieces of literature are distributed monthly in Toledo by the two Christian Science churches. The work is done from distributing centers maintained by each church.

The purpose of disseminating Christian Science literature, members say, is threefold. It is not done to proselyte; in fact, no Christian Science propaganda is ever thrust upon anybody, and is never done in an aggressive or annoying manner. The literature is simply placed where those who care to may avail themselves of it. Its threefold purpose is explained to be that of breaking down the prejudice against Christian Science by giving the public a clear idea of what Christian Science really stands for, and lastly, as a healing and enlightening force.

The two Toledo churches jointly maintain over one hundred distributing points, including all of the public charitable and corrective institutions of the city, the county infirmary, the free employment bureaus, rest rooms in hotels and railway stations and many of the large factories and industrial plants of the city.—*Toledo Blade.*

NEVADA.—In many cases newspapers, having had items corrected in the past and having appreciated more of the real import of Christian Science through receiving *The Christian Science Monitor,* have asked whether certain news items were correct before publishing them. The stand of the *Monitor* on various subjects has been editorially commended rather than disapproved. About one hundred items from the *Monitor* were printed in the state newspapers, including mainly editorials, extracts from the column called "Notes and Comment," items about Nevada, and some news items. The state newspapers are treating the Christian Science movement with respect because they are recognizing that Christian Science operates on the basis of Principle.

*Committee on Publication.*

CALGARY, ALBERTA, CANADA.—The Christian Scientists of Calgary have just completed the extension to their church edifice at a cost of approximately forty-five hundred dollars. The new addition will double the seating capacity of their auditorium as well as give them a very serviceable foyer or entrance hall. The growth of the Christian Science movement in Calgary has been very marked, especially during the last year.—*The Canadian.*

OAKLAND, CAL.—The beautiful bungalow church building of Seventh Church of Christ, Scientist, at 2333 Harrison Boulevard, was dedicated yesterday [May 12]. Seventh Church was organized May 15, 1914, and held its first service in Ebell Hall Wednesday, May 20, 1914. The building, equipped, cost approximately $34,300.—*Oakland Tribune.*

BENNINGTON, VT.—The local Christian Science Society has purchased the building on Main Street where their services have been held for the past year.—*Bennington Banner.*

# The Lectures

PORTLAND, ORE. (Third Church).—Paul Stark Seeley, lecturer; introduced by Ernest Percy Morgan, who said in part:—

In John's gospel we read that one of Jesus' disciples made the following request of the Master: "Lord, shew us the Father, and it sufficeth us." This heart yearning of Philip for a knowledge of God has been the cry of humanity all through the ages, all of whom have been echoing Job's plaint, "Oh that I knew where I might find him!"

In harmony with this, one of the great American newspapers in commenting on the life work of our revered Leader, Mary Baker Eddy, made the following statement: "She made God easy of approach to hosts of men and women, who losing faith, else had not known Him." An innumerable multitude of people all over the world bear grateful testimony to the truth of this statement; for from the study of Christian Science we have found God, and are, in a measure, able to say with Job, "I have heard of thee by the hearing of the ear: but now mine eye seeth thee."

MONROVIA, CAL. (First Church).—John Randall Dunn, lecturer; introduced by John W. Thomas, who said in part:—

Mrs. Eddy, in the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 476), says: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." This way of spiritual attainment, which leads out of the wilderness, through Gethsemane, by way of Calvary, up to the Horeb height where God is revealed, is reached only as we are born again; or in the words of St. Paul, as "ye put off concerning the former conversation the old man, which is corrupt according to the deceitful lusts; and be renewed in the spirit of your mind; and that ye put on the new man, which after God is created in righteousness and true holiness."

*The Monrovia News.*

SEATTLE, WASH. (First Church).—William D. Kilpatrick, lecturer; introduced by Roy J. Hutson, who said in part:—

Just now, when excellency and efficiency are the watchwords in every walk of life, it is most appropriate that the

Digitized by Google

business man should enjoy the privileges and benefits of a religion, the correct application of which restores health, hope, and harmony. Christian Science is applied knowledge. Ever available to all mankind and given in so simple a manner that children demonstrate it, Christian Science is healing the world. On page 13 of Science and Health we find these statements: "Love is impartial and universal in its adaptation and bestowals. It is the open fount which cries, 'Ho, every one that thirsteth, come ye to the waters.'" During these strenuous times, when the worst seems to be coming to the surface, to be possessed of a demonstrable rule—a panacea for every human ill—is indeed a blessing.

# Testimonies of Healing

Christian Science has brought the greatest blessings into my life, for it has given me health and peace. For about twenty years I was practically an invalid and always under the care of a physician. When only sixteen years of age I was sent to an eastern college, apparently in good physical condition, and after two years returned to my home in the Middle West a nervous wreck. When I married I went to live in Concord, New Hampshire, and our home was not far from that of Mrs. Eddy, for whom I cared nothing then. For a few years I was fairly well. Then came a complete breakdown, and for four years a trained nurse was kept in the house to care for me. Mrs. Eddy usually took her daily drive past our house, and I could easily see her love for little children, for she always seemed to watch our two little girls at their play and was always smiling at them, and her sweet smile is something I shall never forget. I used to look at her and say to my nurse, "If there is anything in Mrs. Eddy's religion, why cannot I be well just by looking at her every day as I do?"

If I had only known then what the truth really is; but I did not. There was a great deal of prejudice against Christian Science among my friends; so I lay and suffered physically, mentally, and nervously with what the doctors called stomach, heart, and catarrhal trouble, and every misery nerves could cause, besides an internal weakness that doctors could only relieve by constant treatment. After twelve years we sold out everything and came to California, hoping that the change of climate would benefit me and our eldest little daughter, who was very frail at the time. I felt very fearful of the trip on account of my heart.

For a few years I seemed much better, but soon broke down and was again under the care of a physician. I thought myself no comfort to myself or anyone else, and life seemed a terrible burden. I longed to die so as to be free from suffering, yet feared death greatly, and always carried a bottle of medicine in my pocket and kept it under my pillow at night.

One day we heard of the healing by Christian Science of a malignant growth, and it seemed so wonderful to me that my husband took me to see the one who had been healed. After that visit we felt that if Christian Science could heal such a disease, it could surely heal me, or at least it could do me no harm to try it. After my first treatment I began to sleep quietly and restfully, a thing I had not done for years, and then gradually all my troubles left me. I was so grateful that I began to study "Science and Health with Key to the Scriptures" by Mrs. Eddy, and all the family followed; the children started in at Sunday school, and the whole atmosphere of our home changed. Now I am well enough to enjoy everything that others do, and can say that it is a pleasure to live. For years I could not stay in a room filled with people. Now I can go anywhere in a crowd, and can walk a long distance. I can also do my own housework.

A few months ago I was in what seemed to be a frightful accident when the automobile in which I was riding through one of the canyons tipped over and rolled completely over two and a half times into a deep ravine. As I heard the crashing of glass and was rolling over on my head I realized we were going to the bottom of a deep ravine inside of a closed automobile, and the danger of it frightened me. Then like a reproach came the thought, "Is not God with you here as well as in your own home?" and just that instant the automobile stopped upside down halfway down the side of the hill, and in looking over the ground afterward we could find nothing, not even a little bush, that could have stopped it. I realized then as never before that God is with us in time of trouble. I was the only Christian Scientist in the party, and I was the only one to escape without a scratch or bruise or a nervous collapse. I kept declaring the truth and helped all the others get home and cared for them.

Words cannot express my gratitude for this return to health, and I am most grateful for the peace and joy that Christian Science has given me. I never loved to read the Bible as I do now, nor did I understand it, although I have been a member of an orthodox church since I was a young girl. I am also grateful for our Sunday school, for it has taught our daughters that God is Love and an ever present help. One of our daughters has learned in a short time to work out almost all of her problems.

(Mrs.) LILLIAN NEALLEY ROY, Santa Ana, Cal.

I can state that the foregoing statement is correct, and I also believe that Mrs. Eddy's life and teaching are like the beautiful lake to which she refers in Science and Health (p. 477), poetically named by the Indians "The smile of the Great Spirit."—GEORGE C. ROY.

✧

It is now some ten years since I first learned of Christian Science, and it has completely changed my life. Physically it has acted more as a preventive than a curative, for I have had scarcely any ailments during those ten years. When our baby girl was born a year ago, I was able to be up the third day and attended church on the ninth day. I have had many proofs of the efficacy of Christian Science in overcoming financial difficulties. At the time I took up the study of this truth my father had been gone less than a year and his passing had left my mother and me practically penniless; but as our understanding of Christian Science grew, our supply increased, and each position I obtained was better than the last, and our needs were much more than supplied.

The last proof of God's care in this connection was especially pleasing to me. Just a week before I had planned to take my yearly vacation, the office in which I was then employed suddenly decided to move that branch to its headquarters in another city. This left me without employment. In my old way of thinking I should have given up my trip, as I possessed little more than the necessary amount of money to take it, and I should have stayed at home to look for work. At this time, however, I decided that there was work for all God's children, and that when my vacation was over my work would be ready for me. I took the trip some three hundred miles from my home, and had been gone but a few days when a telegram reached me stating that if I would go on to a certain near-by city I could have a position then vacant there. This offer was from a source altogether unexpected, and the position was much better than any I had ever had; and as time passed, it grew even better still, until I was doing almost exactly the kind of work to which I had always aspired and at a much higher salary than I had ever hoped for.

I was also healed of worrying over my work. Before coming into the knowledge of Christian Science, I had to give up the first position I held because of ill health caused from fear that my work was not done correctly. This fear amounted to a sort of insanity. I spent every spare moment during office hours and often after hours going over records and files to be sure my work was right. I could not rest until I had gone over the whole year's work, and as a result I had to give it up until I was well again. When I next took a posi-

Digitized by Google

tion, I had learned of Christian Science and even then this trouble returned several times, though not with such force. But it was finally overcome with the help of a loving practitioner. From that time on I scarcely gave my work a thought after office hours, and it became a source of constant pleasure and happiness to me.

Every member of our household is a follower of Christian Science, and every difficulty which arises is overcome by this wonderful truth. I thank God that I know of it now so that our little daughter may grow up with a knowledge of God as a never failing guide and protector. My gratitude is boundless indeed.—(Mrs.) JOHN T. TYLER, Lansing, Mich.

✧

I am glad to be able to tell of a few of the blessings that Christian Science has brought to us. In the winter of 1912 I turned to Christian Science for help, and truly I found that "man's extremity is God's opportunity." I was suffering from an internal trouble and the doctors gave me very little hope of recovery from it, but with the loving help of a practitioner I was healed and am stronger than I ever was before. At times my healing seemed slow, but now I am glad, for it made me study harder. I had much to overcome, for I was so prejudiced against what I thought Christian Science was.

Since then I have seen God's power proved many times, a few of which proofs were the overcoming of lung fever, malaria, cuts, toothache, and a weak heart, from which trouble we nearly lost our baby. I am grateful for the physical healings, but much more for the spiritual uplift and for knowing that we can prove that God is an ever present help. And just in the proportion that we learn to love more and to seek "first the kingdom of God, and his righteousness," are these other blessings added unto us. I am so thankful to God for the truth, and grateful to Mrs. Eddy, our Leader, for showing us how to seek it. My prayer is that I may so live this truth that my light may shine and help others.

(Mrs.) LAURA BAKER, Springer, N. Mex.

I am glad to be able to say that my mother's testimony is true. I have received great help from Christian Science also. I had been having much trouble in school with my eyes and doctors said glasses were necessary, but I am thankful to say that my eyes hurt no more and no glasses have to be worn.—(Miss) VIOLA BAKER.

✧

I wish to express my deepest gratitude for all that Christian Science has done for me. From childhood I had been very delicate, and as time went on I seemed to grow worse instead of better, having frequent attacks of bad stomach trouble, which meant months in bed, when it was almost impossible to take any food at all. I tried many different remedies and was many times in hospital, only to find that after a little while the old trouble returned in a more severe form. In the spring of 1913 I was very ill indeed, worse than ever before, and at last the doctors said an operation was the only thing for me. I once again went into hospital—this being the eighth time—and the operation was performed. After a long, weary time of pain and weakness, I was once more able to start work, and hoped I was really cured of the trouble.

In the autumn of that year I went abroad. Soon after leaving England the old conditions returned, and I lost all hope of ever being well again; life seemed a burden, and I felt I would rather give up the struggle, for it seemed to me that God could not care about me, or He would not allow so much suffering to come into my life. I was thoroughly miserable and wretched, and had lost all the faith of my childhood; for I had been brought up in a Christian home. At this time I was asked to try Christian Science; but I refused at first, as I did not believe there was anything in it. Finally, however, feeling too ill to care what I tried, I said I would.

I can never express what my first visit to the first Christian Scientist I had ever known, meant to me. It was indeed "the dawn of a new light," as Mrs. Eddy so beautifully describes the disciples' "spiritual meeting with our Lord," on page 35 of Science and Health. So patiently and lovingly did the practitioner explain the truth to me that I knew at once I had found what I had unknowingly been seeking for years, and straightway I realized that divine Love is indeed ever present and that sickness has no part in that divine Love. For two or three days the conditions seemed more aggravated, but I never lost the peace and joy that came from my first treatment. In ten days I was healed and could eat any food, and since then have continued to do so with no ill effects.

Though this healing was wonderful to me, it cannot be compared to the spiritual uplift which Christian Science brought into my life. To know that God is Love only, that there can be no sorrow or sickness in reality, and that evil in all forms is only an illusion, is far beyond even bodily health. As time goes on, and day by day Truth unfolds, I can only wonder how I ever lived without this knowledge, and I am unable fully to express my deep gratitude to Mrs. Eddy for so plainly pointing out the way. The services at church, and the periodicals, I have also found most helpful. My daily prayer is that each day I may be able to do some good for others.

(Miss) ETHEL GRAY, Alverstoke, Hants, England.

✧

I would like to express my gratitude in the following testimony. About three years ago Christian Science treatment was recommended to us for our little boy. Doctors had treated him for several years for tubercular glands and paralysis of the intestines. He was healed of the intestinal trouble in one Christian Science treatment, but it was some time before the other ailment was entirely overcome. Since taking up the study of this teaching my wife has had good health for the first time in her life. She has been healed of chronic earache, colds, chilblains, defective eyesight, and a number of other ailments. I have been healed of neuritis, colds, toothache, and nervous headaches, and a serious financial problem has been successfully worked out. We are very grateful for Christian Science.

WILLIAM V. FROMHAGEN, Philadelphia, Pa.

✧

I gladly give this testimony of what Christian Science has done for me and for my family. I tried one physician after another to get relief from what I thought was a canker in the cheek, and none seemed to know or would tell me what the trouble was. At last my husband persuaded me to see a doctor who was an old friend, and this physician told me it was a malignant growth, but said that I would be all right after an operation. In accordance with his advice I went to a specialist and was operated on, a large piece of flesh and the glands in my throat being removed; but in fourteen months I had to undergo another operation. In less than a year five different remedies were used and I came near passing on, so severe were the treatments. I had to call in a doctor from our home town for help.

Then a friend told one of my daughters that he wished

Digitized by Google

I would try Christian Science. He sent me copies of the *Journal* and *Sentinel*, and said he knew I could be healed. I went to Duluth, Minnesota, for treatment, but apparently got no relief. Then I tried another practitioner. The trouble moved to the lip. My husband was getting desperate, and hearing of a specialist in Chicago advised me to consult him. As my children were heartbroken from fear that the disease might prove fatal, I did so; but in less than a year my condition seemed worse than ever. Through it all I clung to Science and Health, and took it with me wherever I went; it was my guide. I read it for over two years before I knew there was a Christian Scientist in Ashland. Then I met one, and she asked me why I did not attend the Christian Science meetings. I told my husband that if he would read the literature and go to church, I felt sure I would be healed, so he went just to please me; but it did not take him long to see the truth. Now we are both members of the society here and of The Mother Church.

I can truthfully say that I am free from the malignant growth and my face hardly shows that I ever was operated on. Heart trouble, too, has been overcome, although it was so severe at times that my family thought every attack would be the last. Rheumatism and headaches have also yielded to the truth. For over six months I have not missed having a five o'clock breakfast ready for my family. I do all the housework and never was in better health, but most of all is the spiritual uplift. I have lost all fear of accidents for my husband and sons, whose work at times is very dangerous. My husband was cured of gallstones, profanity, and smoking. He fell on a hayfork, running a tine into his hip, and it pointed toward the heart. Two doctors were called, and they would not move him to a hospital, for they said he would die on the road. After that a Christian Science practitioner treated him, with the result that in two weeks he walked about five miles and rode fourteen miles on street cars. In three weeks he helped to build a big barn for the hay. Previous to this experience he had not lost one day through sickness for three years. I can truthfully say that he had nothing but Christian Science treatment after the first treatment by the physicians.

Two sons and two daughters were taken ill with ptomaine poisoning, but they were almost instantly cured. I could write to a great length and then not tell all the good we have received physically and spiritually through Christian Science. I can never tire of telling suffering humanity that "man's extremity is God's opportunity," and if they will but turn to God, divine Love, they will surely win out. There is not an hour in the day when the teachings of Science and Health are not made use of in our family. I thank God for giving us this truth through our wonderful Leader, Mrs. Eddy, who has made it so clear to us. It is six years since I came into Christian Science.—(Mrs.) PETER E. RUDE, Ashland, Wis.

✧

It is said of Christian Scientists that they have a reason for the hope that is within, and I have proved this to be true. Nearly four years ago, when almost a wreck physically, Christian Science showed me the way out of suffering. The first demonstration was the healing of my eyes. Knowing nothing of this teaching, except that through it people were made happier and healthier, I went to see a practitioner, who before treating me told me to get the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and read the chapter on Prayer. While reading this I took off my glasses for some reason, and resumed the reading with no thought of them again, and have never needed them since. I had worn them for a year, for six months constantly, and had been told they had been needed for years and would probably have to be worn always. This is just one of the many reasons I have for the hope within, but if I had never experienced another healing, this one proof would have convinced me of the truth of Christian Science.

I am grateful to Mrs. Eddy, who sought and found the understanding of God, which heals the sick and reforms the sinful. She has shown the way, the truth, revealed by Christ Jesus.—(Mrs.) J. H. HANNAH, St. Louis, Mo.

✧

When I took up the study of Christian Science I was in a hopeless condition and could see no help at hand. For several years I had spent most of my time in hospitals in this city, and all the specialists said there was no permanent cure for me; but with the loving help of a Christian Science practitioner I was healed instantaneously of two very severe attacks of intestinal obstruction. I used to suffer a great deal from chronic bowel and stomach trouble, and retained very little food. I also had a carious bone of the nose for years, and a surgeon said a portion of the bone would have to be removed. The practitioner did not treat me for this trouble, but the soreness disappeared and has never returned. In the year 1916 I awoke one morning with a rash which seemed to spread over arms, neck, and face. I asked for Christian Science treatment, but the itching was almost unbearable, and the eighth day it seemed as if I could not endure it any longer. I just did nothing but cry and walk the floor. At three o'clock in the afternoon I called up the practitioner, and while talking to her I was healed. Christian Science has also helped me much in a business way, and has shown me my true place.

We owe our revered Leader, Mrs. Eddy, a gratitude we can only express by earnestly trying to reflect the nature of our Father-Mother God, and by faithful study of the Bible and the Christian Science literature. I pray each day that I may live closer to God and have that Mind in me "which was also in Christ Jesus." Mrs. Eddy says on page 254 of Science and Health, "When we wait patiently on God and seek Truth righteously, He directs our path." This statement has been proved true in my experience.

(Mrs.) IRMA GERTRUDE KILBY, Boston, U.S.A.

✧

Realizing the truth of the familiar words from one of our hymns, "Ceasing to give, we cease to have," I gratefully offer my testimony of physical healing gained through the study of the Bible as illumined by Science and Health. For years I suffered from a catarrhal condition of the stomach which gradually grew worse until I was in an alarmingly weakened and emaciated state. All systems of treatment failed to effect a cure, and although upon a strict diet, I could not eat the lightest meal without suffering. Physicians could do no more for me, and few of my friends had any expectation of my recovery. I also suffered intensely with my eyes, for several years having been unable to read without severe headaches. Prominent oculists had been consulted, glasses worn, and a number of operations submitted to without relief.

At this time a friend who had been interested in Christian Science only a short time, but who had experienced its healing power, asked permission to read to me from Science and Health. From the first day I drank in the wonderful truths eagerly, and during the reading on the third day this verse of Scripture caught my attention: "If any man will do his will, he shall know of the doctrine, whether it be of God,

Digitized by Google

or whether I speak of myself." From that moment all doubts as to the truth of this religion vanished forever.

During the short walk home from my friend's house, I decided to get out my Bible and make a trial at least of attempting to read for myself some of the passages that had just been read to me. Simultaneously with the thought of reading began the old headache, and I stopped short, realizing that a thought alone had caused all those years of suffering. My healing was instantaneous. Overjoyed at this proof, and satisfied that fear had been holding me in bondage, I began to hope for deliverance from the other distressing condition. I did not then possess a copy of "Science and Health with Key to the Scriptures," but I clung faithfully to the ninety-first psalm, and through the realization of God's allness and love as expressed in those verses, in a week I was completely healed. So rapid was my gain in strength and weight, that a friend who had known me from childhood passed me on the street a month later without recognition.

Words are unsatisfactory channels through which to convey my gratitude for Christian Science and for the daily spiritual unfoldment that a study of this truth brings. Christian Science is indeed the "shadow of a great rock in a weary land," in whose shelter all may find peace and protection from the seeming storms of mortal sense. With wonderful patience and selfless love Mrs. Eddy has brushed aside one by one the brambles of material thinking, heedless of their thorns and stings, and lo, "the people that walked in darkness have seen a great light."

(Miss) Elsie H. Comegys, Snohomish, Wash.

✧

I gladly acknowledge the many blessings Christian Science has brought into my life. I became interested in this teaching through the instantaneous healing of a friend, and have since been healed of the liquor and tobacco habit, of gambling, and of the use of profanity; also of the habit of hating. I have been healed of neuralgia, headaches, stomach and bowel disorder, kidney trouble, and heart disease. Many nights I have walked the streets, being so full of fear I dared not go to bed.

Words cannot express my gratitude for what Christian Science has done and is doing for me. I want to thank the Publishing Society and the Board of Lectureship for the noble work they are doing. I am also very grateful for the reading rooms, and to all who have helped me in my fight against false beliefs and false appetites. I am indeed thankful to God for having given us that gentle woman, Mrs. Eddy, who was spiritually minded enough to discover what had seemingly been lost to the world—the healing power of Truth.

Ira J. Lanphear, Chicago, Ill.

✧

I have been helped so many times by the testimonies given in our periodicals and at our Wednesday evening meetings, that I should like to give my testimony with the hope that it too may help some one. I have been healed of influenza, catarrh, severe stomach disorder, and a trouble with my eyes from which I had suffered for many years. After a few treatments in Christian Science I was able to lay aside my glasses and have not needed them since.

While deeply grateful for these physical healings, I am much more grateful that Christian Science heals sorrow. About seven years ago my father passed away; immediately after that I took up the study of Christian Science, and every trace of grief and the feeling of separation was instantly lifted from me. My mother had passed away when I was a little girl, and having never known a mother's love, my father was very near and dear to me; but Christian Science taught me that the Father-Mother God is ever present to guard and guide His children. Three years ago an only brother passed out, and again Christian Science brought peace and comfort. On page 66 of Science and Health Mrs. Eddy says: "Sorrow has its reward. It never leaves us where it found us." So it was with the passing of my brother—it did not leave me where it found me, but instead lifted me to discern "the Life which mortal sense cannot impair nor mortal belief destroy" (Science and Health, p. 428). If Christian Science did nothing but dispel sorrow for suffering humanity, the world would owe Mrs. Eddy a deep debt of gratitude.

I am most grateful for our literature and for our reading rooms, which are certainly a haven of rest for all who come within their shelter. I am grateful for all the blessings that have come into my life through Christian Science, grateful that one was found pure enough to receive this truth and with sufficient courage to give it to the world. Christian Scientists certainly owe our beloved Leader an ever increasing debt of gratitude for unlocking the spiritual treasures of the Bible.—(Mrs.) Luna W. Butler, San Diego, Cal.

✧

It is over two years since we became interested in Christian Science. Our little girl, then past five years old, had never had a natural action of the bowels, and so material remedies were constantly used; but she was entirely healed after a few Christian Science treatments. We have had many other proofs of the healing power of divine Love. Words cannot express our gratitude for the proof of Love's power in the birth of our baby, as the doctor had said that I would never live to give birth to another child on account of kidney trouble. This disease manifested itself, but was overcome in two treatments by the practitioner. We are striving earnestly to learn more of this Christ-teaching daily.

(Mrs.) Della Marr, Portis, Kan.

✧

A friend had sent me Christian Science literature, and in my reading of it I came across this wonderful declaration of John: "God is light, and in him is no darkness at all." This illuminating message had for several days been frequently in mind, until one noon in preparing lunch I took the corner of my apron to remove a basin of boiling syrup from the gas stove. At that moment my fourteen-year-old son called to me, and as I turned quickly, the apron sticking fast to the basin brought down the contents over my left hand. I glanced at the red hand and exclaimed, "Oh, George, you must help mother to think the right thoughts!" Instantly the thought came, "God is light, and in him is no darkness at all." I do not know how many seconds this thought filled my consciousness, but in an incredibly short time, feeling no sense of burn, I uncovered my hand and found it the same as the other. It was a complete healing. A day or two after, I said to George, "If mother should tell that to people, they would not believe it, would they?" "No, mother," he said, "but I saw it."

To-day George with his brother Carle is at the front in France, and my heart goes out with an unexplainable happiness for Christian Science—this divine Principle of life, whose loving message came to a suffering world through Christ Jesus, and since has been given to us by dear Mrs. Eddy, until millions echo the glorious message, "God is light, and in him is no darkness at all."—(Mrs.) Josephine Perrine Stevens, Eaton Rapids, Mich.

# From the Press

[Rev. Joseph Fort Newton in *Christian Commonwealth*]

An aristocratic church, vain of its prestige, is not simply a travesty; it is a tragedy. Jesus, the Founder of the church, was of the democracy,—not a priest but a workingman, a layman whose pulpit was the hillside. When the church becomes Christlike, it will once more win the love and loyalty of the common people who, as Lincoln said, God must love, because He made so many of them. When the pulpit forgets its debate about rites and dogmas, of which Jesus knew nothing, and gives itself to his friendly and brotherly spirit, its evangelism will send men to the fellowship and service of their fellows, as of old it taught them to flee the wrath to come. The hope of the church—and of the world—lies not in ritual word or legal policy, but in the spirit of him who said, "Whosoever will be chief among you, let him be your servant."

[*Southern Churchman*]

If the energy, means, and enthusiasm which are now expended on merely sectarian propaganda and defense were liberated for aggressive and united effort in behalf of the upbuilding of Christ's kingdom, and the distracting and benumbing and belittling influence of denominational narrowness and jealousy could be obliterated for wider vision and a mightier aim, the church of God, with a single front and a single purpose, with all needful diversity of views and methods, could hold America true to the faith and obedience of Christ and bring the world to his allegiance. As at present divided, failure to an increasing extent will mock its efforts and the cause of God will suffer from the faithlessness of men.

[*The Christian Intelligencer*]

The grace of God is but the love-energy of God, whereby the life is continually inspired to seek the will of God and to get it done on earth as it is in heaven. Whatever prevents God's rule must be resisted and conquered. The kingdom of God is a kingdom of kingly men who undertake and perform valiant exploits in furthering the program of the King.

[Prof. Charles R. Skinner in *The Universalist Leader*]

When we cease quoting texts and other men's religious opinions as proof of the validity of our ideas, and begin to refer to our own experience as authentic, then we shall know that God has become real to us. That such a moment of intensified religious consciousness has come in the history of mankind can hardly be doubted.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# Christian Science Literature for the Soldiers

A soldier recently voiced his appreciation of the fact that Christian Scientists realize that the soldiers and sailors want something more than material provision for their help and strength.

One of them, on being told that the price of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, was a guinea, put down the money with the remark that the book would be of greater value to him than ever the guinea would be in his pocket.

A letter from another soldier at the front spoke of having a copy of the CHRISTIAN SCIENCE SENTINEL which he had read so often that he "knew it by heart, including the advertisements."

> "Please, please, and then please again, send me some [Christian Science] literature," writes one of the men from France. "I offered to pay a bookseller's way to Paris (115 miles) to get some. He went, anyway, and there was nothing left except a Monitor for February 4, which he says he will get me for three francs. . . . I told him to go ahead and get it."

"Millions of unprejudiced minds—simple seekers for Truth, weary wanderers, athirst in the desert—are waiting and watching for rest and drink," writes Mrs. Eddy on page 570 of "Science and Health with Key to the Scriptures." "Give them a cup of cold water in Christ's name, and never fear the consequences."

THE CHRISTIAN SCIENCE JOURNAL, the CHRISTIAN SCIENCE SENTINEL, and LE HÉRAUT DE CHRISTIAN SCIENCE may be sent to soldiers and sailors destined to proceed overseas, at nominal postage, without address, under a special plan of the Postmaster-General of the United States, as explained in a printed notice on the front cover of these periodicals.

Although THE CHRISTIAN SCIENCE MONITOR is not included in this special mailing privilege, individual subscriptions for the MONITOR, as well as the other periodicals, and orders for Mrs. Eddy's writings, pamphlets, or other authorized Christian Science literature for soldiers and sailors, may be sent direct to The Christian Science Publishing Society or placed at any Christian Science Reading Room.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## The Christian Science Monitor

AN INTERNATIONAL DAILY NEWSPAPER

Founded, 1908, by Mary Baker Eddy.

Published daily, except Sundays and legal holidays. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions to the columns of the Monitor should be addressed: Editor, The Christian Science Monitor.

Subscription price, payable in advance, postpaid, to all countries: One year, $9.00; six months, $4.50; three months, $2.25; one month, 75 cents; single copy, 3 cents. By carrier through a local newsdealer, one month, 80 cents.

## The Christian Science Journal

Founded, 1883, by Mary Baker Eddy.

This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, list of Christian Science Practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 30 cents.

## Der Herold der Christian Science

Founded, 1903, by Mary Baker Eddy.

A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Founded, 1890, by Mary Baker Eddy.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Also printed in English-Dutch and English-German.

Subscription price, payable in advance, postpaid, to all countries: One year, $1.00; single copy, 25 cents.

## Pamphlets

**Price, Postpaid: Single copy, 5 cents**

**Christian Science: Applied Righteousness**—By Frank Bell.

**Christian Science: Its Religious Philosophy**—By Hon. Clarence A. Buskirk.

**Christian Science: "The Resurrection and the Life"**—By Clarence W. Chadwick.

**God is Good**—By George Shaw Cook.

**Cansation: Viewed in the Light of Christian Science**—By Frederick Dixon. Also printed in Norwegian and Swedish.

**Christian Science Healing vs. Mental Suggestion**—By Frederick Dixon. Reprinted from the "Weekly Budget," London, England. Also printed in Norwegian.

**Christian Science: The Revelation of Christ**—By John W. Doorly.

**Christian Science: The True Christianity**—By Clarence C. Eaton.

**Christian Science: Pure Metaphysics**—By Dr. Francis J. Fluno.

**Christian Science: The Gospel of Freedom**—By Willis F. Gross.

**Christian Science: The Science of Salvation**—By Prof. Hermann S. Hering.

**Christian Science Healing: Spiritual and Scientific**—By Prof. Hermann S. Hering. Also printed in German.

**Answers to Questions Concerning Christian Science**—By Edward A. Kimball. Also printed in Dutch, German, and Norwegian.

**Christian Science: Its Advantage to Mankind**—By Edward A. Kimball. A London lecture. Also printed in French.

**Christian Science: Man's Dominion Over Evil**—By Edward A. Kimball. Also printed in French, modern Greek, Italian, Norwegian, and Russian.

**Christian Science: Its Divine Authority**—By Bliss Knapp.

**Christian Science: The Explanation of the Ideal Man**—By William D. McCrackan, M.A. Also printed in German.

**Christian Science: Its Discovery and Development**—By William D. McCrackan, M.A. Also printed in German and Norwegian.

**Christian Science: God's Lovingkindness Proved to Men**—By Rev. William P. McKenzie. Also printed in German.

**Christian Science: A Message Which Heals and Saves**—By Edward A. Merritt.

**Christian Science: Its Results**—By William R. Rathvon. Also printed in German.

**Christian Science Healing Not Medical Practice**—By Judge Clifford P. Smith.

**Christian Science: A Religion that Heals through Spiritual Law**—By Virgil O. Strickler.

**Christian Science: The New Birth**—By Bicknell Young. Also printed in German and Norwegian.

**Christian Science: Its Principle and Rule in Business.** Noonday lecture delivered by Bicknell Young.

**"Awake Thou That Sleepest."** Printed in English only.

**Birthright and Dominion.** Printed in English only.

**Confidence and Supply.** Printed in English only.

**Environment and Opportunity.** Also printed in French.

**Fulfilling the Law.** Also printed in Danish.

**Law and Work.** Also printed in French.

**Prayer and Healing.** Also printed in French and German.

**Seeking and Finding.** Also printed in Dutch, German, and Swedish.

**The Divine Nature.** Also printed in Dutch and Norwegian.

**The Father's Business.** Also printed in German and Swedish.

**The Law of Kindness.** Printed in English only.

**The Providence of Good.** Also printed in French, Spanish, and Swedish.

**"Then the Full Grain in the Ear."** Printed in English only.

**Upward Footsteps.** Also printed in Dutch.

**"What Went Ye Out for to See!"** Printed in English only.

**OTHER TRANSLATED PAMPHLETS**
Not printed in English separately

**Faith and Generosity.** Printed in French.

**Man's Unity with God.** Printed in German only.

**"Peace on Earth."** Printed in German only.

**Prayer and Confidence.** Printed in German, Dutch, and Swedish.

**Mary Baker Eddy**—By Arthur Brisbane. Printed in German only.

**Mary Baker Eddy: Her Purpose and Accomplishment**—By Frederick Dixon. Printed in German and French.

**The Founder of Christian Science**—By B. O. Flower. Printed in German only.

**Christian Science: A Reasonable and Rational View of All Things**—By Francis J. Fluno, M.D. Printed in Dutch.

**Christian Science: Its Teachings, Methods, and Works**—By Judge Septimus J. Hanna. Printed in Swedish.

**Christian Science: Humanity's Helper**—By Prof. Hermann S. Hering. Printed in Dutch.

**Christian Science: The Comforter of Promise**—By Frank H. Leonard. Printed in French.

**Christian Science: Demonstrable Religion**—By Frank H. Leonard. Printed in Norwegian only.

**Christian Science: A Religion of Progress**—By William D. McCrackan, M.A. Printed in Swedish and French.

**Christian Science: The Christianity of Jesus**—By Mrs. Sue Harper Mims. Printed in Swedish.

**Christian Science: The Gospel of the Kingdom**—By Judge Clifford P. Smith. Printed in German and French.

**Christian Science: Its Principle and Method**—By Bicknell Young. Printed in Swedish and French.

**VEST POCKET PAMPHLETS**
**Price, Postpaid: Single copy, 4 cents**

**Possession**—Printed in English only.

**Protection**—Printed in English only.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x18), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.00.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.05.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50. Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

Address orders and make checks payable to

*"What I say unto you I say unto all, WATCH."* Jesus

VOLUME XX JULY 20, 1918 NUMBER 47

## Protection

WILLIAM R. RATHVON

NEVER was there a time when so many prayers for protection ascended from so many loving hearts; prayers that are worded in many strange tongues but with one common purpose, and directed to one common Father who understands them all even before they are uttered. Never, too, was there greater need to pray understandingly and scientifically that protection may be assured for those in peril. The nature of evil is always to destroy, never to protect. Its purpose is to impede, to harm, to damage, to injure, that destruction may follow. In nature all creatures seek protection through their natural endowments. The strength of the lion, the speed of the deer, the invisibility of the hare, are qualities of protection to each of them. Mortal man, endowed with discernment above the beasts of the field, relies upon human intellect to direct him in his search for protection. He has evolved and invented processes and devices to protect him from the dangers which threaten the beast. He has protected himself from the extremes of heat and cold, from hunger, fire, flood, and tempest. He has harnessed the lightning, made the wind do his bidding, and has in many ways annihilated time and space. The dynamo, the aeroplane, and the telephone are as commonplace to him as eating and drinking are to the creatures of forest and plain.

In their search for protection and advancement men have, however, allowed intellect to outstrip intelligence. They have readily seen the need of protection from physical evils but have ignored those powers of darkness that are none the less pernicious because unseen. Through zeal to overcome the forces of nature they have neglected to cultivate an acquaintance with the forces of Spirit and disregarded the one and only power that will protect a man from the creations of his own intellect, which when misdirected bring destruction upon him. The knowledge of matter has enabled men to invent many marvelous things, but it has not protected them from the dangers of their own inventions.

The chemicals, the explosives, the fire, the gas, which in this war have been hatred's instruments of destruction, are inventions of mortal man's fertile brain, and in times of peace they have contributed to his material development. War has not changed their nature. They are no worse and no better than before they became the horrible servants of war; but their use has emphasized the teachings of Christian Science that God is always good, and that the inventions which may be employed in one form for utilities and in another for destruction do not lift mankind closer to God or save from evil. Mrs. Eddy expresses this pointedly when she tells us in "Science and Health with Key to the Scriptures" (p. 196), "Man has 'sought out many inventions,' but he has not yet found it true that knowledge can save him from the dire effects of knowledge."

The war is bringing home to many who are seeking protection for their loved ones the fact that it is not a knowledge of earthly things but an understanding of spiritual things which insures protection. Ordinary Christians who have long known that it is the nature of evil to maim and destroy are now remembering in the hour of distress that it is the nature of good to sustain and protect. The universality of good makes it possible for those at the front to be protected by the prayers of those who remain behind. The prayer of Christian Science includes more than fervently beseeching God to divert those agencies of destruction that war employs, which are but effects of the cause that brought about the war,—that is, spiritual wickedness in high places. The prayer which protects deals first of all with causation, and is directed toward the overcoming of evil by the realization of good. When physical danger is reduced to terms of thought it leaves but two elements to be considered, good and evil. Thus seen, every perilous contest becomes a test, the test of man's fidelity to God. Then protection follows in proportion to one's faith and understanding.

In Christian Science the prayer which protects is the prayer in which the omnipotence, omnipresence, and omniscience of God is affirmed and realized. Against the realization of this infinite power none of the forces of evil can stand. Hatred, malice, slaughter, cruelty, deceit, and oppression when faced by omnipotence dwindle away and cannot manifest themselves in fire, explosion, missile, crash, shock, or submergence. The prayer which asserts God's omnipresence obliterates all beliefs of danger, and imparts safety, protection, health, confidence, and courage. As His presence is seen to be everywhere and with every one, there is no sense of loneliness, separation, despondency, fear, or discouragement. In God's presence there are no shades or degrees of danger. One place is no more hazardous than another; no one duty is any more perilous than the rest. Safety is an element of harmony, and in His presence, air, earth, and water are perpetually harmonious. God's omniscience is also affirmed and realized in the prayer that protects. Reflecting infinite intelligence, man has the wisdom to know what to do and how to do it. He knows where to be at the right time. He is not confused or misled. He makes no disastrous blunders, no fatal mistakes. He cannot be erroneously influenced.

The man who is facing danger in the war needs to be grateful for the protecting efforts of others in his behalf, but he needs also scientific self-protection. He must declare, affirm, and realize for himself God's infinite power, presence, and intelligence. He needs to uncover for himself the mental causes which underlie the physical effects before him, to turn things into thoughts. This mental transformation shows the combat to be between the invisible forces of light and darkness, and not merely a series of struggles between nations, units, and individuals. He realizes then that he is enlisted on the side of right against material might, Truth against error, Spirit against matter,—and he thus becomes a soldier of the cross whose main protection lies not in armor plate but in the armor of righteousness, whose lasting victory comes not through the power of powder but through the power of prayer.

His time of prayer should be not only in the moment of acute danger but before danger raises its head. Prevention is an attribute of protection that to be gained must early be sought. Most men turn to God at the last; the wise man is learning through Christian Science to turn to Him first. Then in prevention he finds preservation. The emergency prayer is good; the constant prayer is better, for it not only defends but prevents. Mrs. Eddy says (Miscellaneous Writings, p. 115): "Your means of protection and defense from sin are, constant watchfulness and prayer that you enter not into temptation and are delivered from every claim of evil, till you intelligently know and demonstrate, in Science, that evil has neither prestige, power, nor existence, since God, good, is All-in-all."

## Hymns and Healing

VANESSA PERRY LOBDELL

ABOUT twelve years ago when I was first learning of Christian Science and how to apply it in overcoming all discordant conditions, physical and mental, I heard another student of this truth say that whenever error presented itself to her so strongly that a clear comprehension of the Lesson-Sermon or consecutive reading from the Bible or Science and Health seemed impossible, the singing of familiar hymns from the Christian Science Hymnal was resorted to, and peace was always realized. This counsel remained with me, and many were the times when fear and the sense of pain were dispelled by the truth found in the hymns. How many times the Bible urges us to sing and be glad; to "make a joyful noise" unto the Lord. Mrs. Eddy says in Science and Health (p. 234), "Whatever inspires with wisdom, Truth, or Love—be it song, sermon, or Science—blesses the human family with crumbs of comfort from Christ's table, feeding the hungry and giving living waters to the thirsty."

There came a time in the writer's experience when these "crumbs of comfort" and "living waters" were sorely needed, and the songs of the Hymnal were often the source whence came new inspiration. Her little boy, then a child in arms, was stricken suddenly with a strange malady which not only reduced him to a state of semiconsciousness but, to the mortal sense of things, very much disfigured his face and mouth. As he lay moaning, the family were extremely fearful, and it seemed at times that but little comprehension of the written word could be gained. At such times the mother walked with the child in her arms, comforting him and dispelling her own fears by singing the hymn on page 180 of the Hymnal:—

> What is thy birthright, man,
> Child of the perfect One!

which comforted her. It then seemed easier to realize for this baby what was meant by "child of the perfect One," no matter what the physical senses testified. Farther on this same hymn says, "Thou art not error's thrall!" and how glorious was the relief in catching a glimpse of this truth! On page 181 is another hymn which helped. It begins,—

> If God is all in all,
> His children cannot fear.

The "Communion Hymn" and "Mother's Evening Prayer," both written by our Leader, were two which seemed most applicable to the case.

This period of extreme stress extended over several days, but whenever the waves of fear threatened to overwhelm her, the mother sang, and Truth was victorious, as Truth is ever bound to be. The child was restored, and the mother has never forgotten the beauty and inspiration of those hymns. Whenever the opportunity arises in church or at home to sing them, she lovingly and gratefully recalls the comfort and healing they brought her at that particular time. The few which have been mentioned specifically are not the only ones for which she is grateful; for all the pages of the Hymnal declare that divine Love is ready to heal and uplift all who go to God for help in their need.

## Criticism

STOKES ANTHONY BENNETT

IT was Dryden who declared that "by criticism, as it was first instituted by Aristotle, was meant a standard of judging well." How regrettable, then, that criticism, as it is commonly understood and employed to-day, should have lost its original high standard and deteriorated into practically the exact opposite,—animadversion, stricture, censure, blame, faultfinding, and the like.

The inclination to criticize is indeed a dangerous one, for if not checked in the very beginning it soon becomes a fixed habit which is productive of much that hinders genuine progress. To criticize unkindly or unjustly, it matters not what are the circumstances, is to yield to mortal mind temptation. It is to manifest that quality of carnal thought which is responsible for "debates, . . . backbitings, whisperings," and kindred "evil speakings," against which the Scriptures emphatically warn us. Such criticism is always the outcome of some measure of jealousy, envy, anger, or malice, than which nothing more hurtful and blighting could occupy consciousness and direct activity. It is that error which would alienate individuals upon the slightest pretense, and make them enemies.

Had mankind been wise enough to forestall criticism, it would also have been wise enough to forestall those innumerable discords and woes which have resulted therefrom. Had mankind really seen criticism for what it is,—a disturbing, disheartening, and destructive agency,—it would not have fallen a victim to this adversary. Thus would the world have been saved those bitter contentions and strifes which have ultimated in what is practically a world war, a conflict in which criticism, hatred, and revenge are probably having as much to do as in any other struggle recorded by history; and this simply because some of the great men of the earth have forgotten to "honour all men," as the apostle commanded, and to "love the brotherhood,"—have forgotten that, in the words of Mrs. Eddy as given on page 32 of "Miscellaneous Writings," "love alone is admissible towards friend and foe."

Just here it is well for us as Christian Scientists to examine our own thoughts in order to see whether we are in any wise under the mortal mind claim of criticism. So subtle and deceptive is this claim that we may have to go deep down into consciousness to make our examinations complete; but let them be made nevertheless. Come what may, let the uncovering be strictly honest and thorough. There never was a better time than now for us to ascertain what our true attitude is toward criticism, and whether we really are living up to the teaching of Christian Science which we have accepted and profess to follow,—a teaching which embodies no critical faultfinding whatever, but sets forth continually a righteous standard of judging well.

In this examination process let us ask ourselves a few pertinent questions, and let us answer them in all sincerity and truth. Do we sometimes criticize our neighbors and associates just because their sayings and their doings are

Digitized by Google

not in full accord with our opinions, and then do we proceed to follow up this criticism with more or less antagonism? Do we criticize and assail those placed in authority by the majority vote of the people,—such as the President of the United States and his official family, the national Congress, the governors of the states, the various legislatures, the judiciary? Do we criticize those who hold the reins of government in our respective municipalities, and do we, in one way or another, put difficulties in their paths?

Are we who call ourselves loyal adherents of Mrs. Eddy's teachings ever guilty of criticizing any of the words and works of this noble woman, who has done for mankind vastly more than has yet been acknowledged? Are we criticizing the Christian Science movement which she labored so unselfishly and indefatigably to found, and which finally became her joy and satisfaction? Are we criticizing the customs or the activities of The Mother Church which she established and sanctioned, or its Board of Directors, who like ourselves are striving to make demonstrable the teaching of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and to obey the Church Manual, which she also wrote, thereby fulfilling the important mission intrusted to them?

Are we criticizing the editors of and the contributors to our periodicals, all the while forgetting the perplexing and difficult problems which daily confront these editors, and the labor of love in which our writers are seeking to be faithful? Are we forgetting too that we ourselves may never have undertaken to write a single line for publication? Are we criticizing in particular *The Christian Science Monitor*, which after twenty-five years of prayerful consideration on the part of our Leader was established by her, and which in its sphere of usefulness is just as important and just as deserving of our support as is any other department of our cause? or are we criticizing any of those who are directly identified with the *Monitor* and are doing what they can to make it more and more successful?

Are we as members of Christian Science churches criticizing our fellow members, particularly those who are holding office,—the directors or trustees, the readers, Sunday school workers, ushers, also the soloists, organists, and even the caretakers? Are we criticizing those who at the Wednesday evening meetings testify as best they can to the healing, transforming power of Christian Science, when we ourselves claim to be beneficiaries of this Science and yet make no effort to rise to our feet? Are we criticizing the members of the Board of Lectureship, and asking why they were selected for this work? Are we criticizing the practitioners and teachers listed in *The Christian Science Journal;* the committees on publication,—yes, and the churches which made the last appointment of these committees? Are we singling out certain individuals who had the benefit of Mrs. Eddy's personal instruction and guidance and have been fully tried and found not wanting, and criticizing them just because some of their ways do not happen to be our ways?

On the other hand, let it not be gathered from this article that we are either to condone or to overlook error. Not for one moment! Neither let it be gathered that we are to excuse or shield those who are knowingly and maliciously doing wrong. But let it be understood that the purpose of this article is to emphasize the fact that criticism never yet healed a man or a woman, and that it never will. Even in what are called hard, unyielding cases, where resistance to right thinking and right doing is stubborn beyond degree, criticism, if employed, can only serve to aggravate the conditions and to make them still worse. Notwithstanding the appearance that these cases are altogether hopeless, nevertheless we have no right whatever to enter upon a crusade of criticism, thus adding another error to the train already in evidence. In such experiences we shall doubtless do well to keep our lips tightly sealed, and to leave the persons involved kindly alone. Whenever our thoughts turn in their direction we should make sure to have them governed by that scientific spirit which lay behind St. Paul's words to the Ephesians, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light."

Speed the day when criticism shall have spent its force and wasted away. Speed the day when divine Love in all its beauty and power shall have taken possession of men and women everywhere and transformed them into the image and likeness of our Father-Mother God. Then will the kingdom of heaven—the kingdom of kindliness, forbearance, mercy, and justice—have come on the earth, and immortal Truth have been forever enthroned. Then will the peace that passes understanding and the joy that knows no bounds be recognized as eternal.

## Gratitude

KATHRINE JONES

GOD'S love for us cannot be measured. The human heart is overwhelmed by the shining of the divine glory when it glimpses for a moment the treasures that Love has prepared for Love's children. Beauty, color, joy, and happy activity are the rightful heritage of the sons of God. We are not truly grateful until we realize this,—until, in the farthest reaches of our thought, in the deepest secret places of our life, we find only contentment and peace. There is no shadow over the child of God. He is created by Love, sustained by Love, guided by Love, and enjoys the revelation of the Christ. He never lacks any good thing, and he is never unhappy, for he is conscious each moment of the presence of Love.

This vision of supreme good, which comes to us in rare moments, must become, eventually, the habitual consciousness of the Christian Scientist, and there is no greater help along the way than that which comes from a constantly cultivated sense of gratitude. First of all, as we pray that we may grow into a continuously grateful and joyous quality of thought, let us define our attitude as Christian Scientists. Which do we want, the world, or Christ? If it be Christ, then we must realize clearly at the outset that our growing conception of the Christ-idea will compel us to pluck out the right eye and cut off the right hand if they offend. The law of Truth, which tolerates nothing but absolute cleanness of thought and purity of desire, will declare itself so clearly and completely to us that we shall have no choice but to obey its holy commands. We shall be obliged to choose again and again the giving up of sinful pleasures, the abandonment of hidden, material indulgences, the forgiveness of injuries, the blotting out of hate. If, however, we really want Christ, even "Christ crucified," though we suffer in the process of overcoming self, we shall gain, little by little, through encouraging and reassuring experiences, the consciousness of the kingdom of heaven.

In the working out of our salvation we often feel that if we could have a different environment, a great deal more money, congenial work, and robust health, we should quickly become excellent Christian Scientists. At this point we need to cultivate and use a scientific understanding of meekness and gratitude. We must boldly reverse the evidence of the senses, and learn to dwell in the understanding that man's

Digitized by Google

environment is perfect, because man is always with God. As ideas of infinite Mind, "we live, and move, and have our being" in harmonious Mind. Spiritual man's environment is beautiful, and he can say in his heart, "Out of Zion, the perfection of beauty, God hath shined."

In order to realize, without any lurking sense of fear, that our supply is from God, we must prayerfully strive to gain the metaphysical perception of substance. Christian Science teaches that substance is Spirit, that man is the creation of Spirit, and that this pure consciousness which is man, needs only the substance of right ideas. Standing solidly on this spiritual platform, assimilating this liberating truth until it becomes the substance of our thought, we shall find that really and practically our supply is in Spirit. Our idea of congenial work may be found, on examination, to be something which exalts self, but when we understand that man's only work is "to glorify God," we shall find our work, and be satisfied. We shall have health just in the degree that we are willing to lay down our materiality. God is man's life, and Love will gently open our eyes to this fact.

So we see that there is no condition, no place, no environment, where we may not rise above the cloud illusions of worry and fear and sorrow, and immediately think as God would have us think. As we learn to give thanks to God at all times, whether the times be pleasant or hard, we shall receive, in ever greater degree, the divine joy which God imparts to man.

## Shifting Responsibility

EVA DONALDSON ADAIR

OFTTIMES a seeker for a better human outlook finds himself face to face with a problem seemingly impossible of solution. He has summoned to action that pitiless weapon, will power, only to find himself crying the louder to be released from some long suffered ill; he has tried to choose rightly and then to force through his ideas, only to find that every one with whom he associates disagrees with him or has some idea that conflicts. At last the seeker calls on every humanly known force to help him succeed, in spite of ill health, contention, and strife, but battle-scarred and weary of the conflict he tightens the fetters of bondage by recourse to self-pity and self-justification. "Ah," he pleads, "how can I succeed when all about me are men and women doing their work incorrectly? I want to be cheerful, but I am sick; I want to love, but every one hates me; I want to study Christian Science, but how can I when my misery keeps my thought constantly recurring to my body and away from the text."

Hark, the clarion voice of a woman calling to the ages, and the sufferers are hearing her words, sometimes with resentment, when she explains that disease is not material, that it is mental. But the human mind cries back its justification, "I have put up a good fight; I see the path plainly enough; my mind is clear if only I were well and were not hemmed in on every side by opposition, poverty, and hatred." We hear the voice again drowning the wail of mortal argument, "Ah! but Christ, Truth, the spirit of Life and the friend of Mortal Man, can open wide those prison doors and set the captive free" (Science and Health, p. 433).

Mortal mind, cunning in its own defense, claiming some knowledge of what scholastic theology denominates the Christ, argues that it has known of the doctrine since infancy, has always believed in God, has never actually sinned —unless hating one's associates and ill fate might indeed be called sin; but how can one be blamed for hating, when others hate? So mortal mind is seen shifting, ever shifting, the responsibility,—others are to blame because we are sick or poor, unhappy or sinful; yet quite dissatisfied with this reasoning one hears as a trumpet call the question of the master Physician, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?"

When mortal mind is trapped in its own argument, it loves to turn to the Scriptures to support its views, though still arguing in defense of old religious opinions, old modes of thought, arguing for everything except an erroneous physical condition, which, it contends, is to blame for all inharmony. While thus on its shifting sands mortal mind seeks a sure resting place, this Scripture is found: "Wherefore gird up the loins of your mind, be sober, and hope to the end for the grace that is to be brought unto you at the revelation of Jesus Christ; as obedient children, not fashioning yourselves according to the former lusts in your ignorance." This, then, has been the stumblingblock—even ignorance.

One need not feel any surprise at this temptation to shift responsibility. Let us turn to Genesis and see what Adam did in the allegory. He shifted the responsibility when he said, "The woman whom thou gavest to be with me, she gave me of the tree, and I did eat." The woman, recognizing the error, called the subtle lie by name when she said, "The serpent beguiled me, and I did eat." She still believed in the error, however, enough to obey its suggestion, though recognizing it as evil; the serpent, being thus recognized, has the blame turned on him. What do we see now? In the beginning of the argument the serpent, evidently expecting to be trapped, turned the blame on God, even before being accused, by saying, "God doth know," and a large percentage of tired humanity has ever since accepted this erroneous statement about God knowing evil, and has become so enslaved by it that one may hear it preached from the housetops, that God sends sickness to punish His children. Mankind has been taught to bow the head in helplessness when seeing a child torn from its mother's arms by death, a widow left with little children, or a motherless little group clinging to their father's hand, while mortal man has attempted, all blindly, to console his fellow man by saying that one must not be resentful nor rebellious; it is the will of God. Thus our heavenly Father, in contemplation of whom the Master said: "Even so it is not the will of your Father which is in heaven, that one of these little ones should perish," has been ruthlessly blamed for the works of darkness down through the ages.

The unenlightened human mind in its ignorance of God, seldom prays "Thy will be done" until it has tried all available material means; then in piteous resignation it utters the words and crouches for a blow, expecting the worst. So prevalent has this conception of the Scriptural passage become that one sees it most often in floral wreaths, inscribed on cemetery arches and on tombstones. It is so in the Adam-dream to-day; when one comes face to face with trying problems, the last and most subtle of arguments comes implying that God is withholding the good and giving evil. One has plenty of ground to insist that his religion has always taught this, and that there is no disputing the fact that we are not in the garden of Eden, and yet the daily plea is, How can I find the "new heaven" and the "new earth" spoken of in Revelation?

How better can one understand a writer than through reading his writings? Let us turn to the gospel of St. John. If John had not understood Genesis he could not have written the Apocalypse. Had he not understood a perfect Alpha he could not have understood the perfect Omega. He it was

Digitized by Google

who wrote: "In the beginning was the Word." Then let us start at the beginning with the Word. "In the beginning God created the heaven and the earth." As we finish the first chapter of Genesis we see that all of God's creation is perfect, all good and beautiful. Mortal reasoning, quick to criticize, admits that it is all there but the Adam, that there is no Adam in it. No, there is not, and Christian Scientists are thanking God that there is no Adam-concept in God's creation. That is why we are looking for the new heaven and the new earth.

Does mortal thought seem bewildered at this and not know how to think? If we are seeking God, can we not trust Him to lead us to Him? Mrs. Eddy says: "Spirit, God, gathers unformed thoughts into their proper channels, and unfolds these thoughts, even as He opens the petals of a holy purpose in order that the purpose may appear" (Science and Health, p. 506). This ray of hope, forming, molding, beautifying human thought, gives mortal man relief from pain, and a broader outlook. He sees there is something he can do. He is no longer looking for some one to blame for his failure; he is now on the path that leads upward, and failure is behind him in the dim, fast dissolving past.

To shift responsibility in no wise affords safety. Peace is the result of a wide-awake knowledge gained by absolute reliance on God. To whom could one's welfare be of such stupendous importance as to one's self? "Thou wilt keep him in perfect peace, whose mind is stayed on thee," reads the Scripture, and all will agree that "thee" in this instance refers to God,—divine Principle, Life, Truth, Love.

This staying upon God is the defense impregnable of which David sang: "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty. . . . Thou shalt not be afraid for the terror by night; nor for the arrow that flieth by day; . . . he shall give his angels charge over thee, to keep thee in all thy ways."

## Household Problems

GRACE M. SMITH

THE writer finds Christian Science of inestimable value in dealing with household problems under present conditions. When the sugar shortage was presented to her, she immediately called to mind the account of the widow's cruse of oil, as given in the seventeenth chapter of I Kings. When urged by fear and other agencies to put in a supply of sugar, she refused. She had every opportunity to get whatever she wished along this line, but she obtained the usual week's supply, knowing that when this was exhausted more would be in evidence, if needed.

It is a satisfaction to know that we are taking only what is our portion and placing no obstacle in a brother's way to prevent him from getting his portion also. Our revered Leader tells us (Miscellany, p. 186): "Rest assured that He in whom dwelleth all life, health, and holiness, will supply all your needs according to His riches in glory." She also refers, on page 45 of "Miscellaneous Writings," to "the deific law that supply invariably meets demand." When we realize that God is the real source of supply, no error, however subtle, can disturb us. The writer gets what household supplies seem necessary and does not hoard food, although at all times she tries to follow what our dear Leader has said in regard to true economy. The many references to economy in Mrs. Eddy's writings, also in the Christian Science periodicals, are interesting and instructive. The way in which the writer's needs are being supplied is to her another sure foundation stone of the complete structure of Love.

# Selected Articles

["Consciousness"—*The Christian Science Monitor*, Boston, U. S. A., March 21, 1918]

Prophets and poets, psalmists and apostles, have iterated for ages that true richness is mental; but it has remained for Mary Baker Eddy to rediscover the Principle of real abundance as well as of real health, and to explain this Principle so thoroughly in the nineteenth century that all may avail themselves of spiritual wealth as actually sufficient for every need.

When all material streams are dried,
Thy fullness is the same;
May I with this be satisfied,
And glory in Thy name,

wrote John Ryland, for instance, in a hymn which for over a hundred years has uplifted the thought of countless congregations. Two hundred years before that, such lines as Greene's "The quiet mind is richer than a crown," were the merest commonplace. And far earlier yet, Christ Jesus declared in his Sermon on the Mount which stands forever the perfect guide for right living, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." What then is the reason why righteousness of mind is absolutely practical supply even for the payment of one's bills?

At a time when everything seems to go wrong, in the midst of sickness, pain, sorrow, loss, lack, or perplexity of any sort, it is good, in the first place, just to pause and rejoice in the fact of consciousness. If a man were blind or deaf, he would still be conscious. If he were without smell, taste, or feeling, likewise, he would still be conscious of his own existence. And that very being conscious, independently of the material senses, is good in itself, whether one be hungry and in rags or on a raft in the midst of the ocean; for, knowing that he is conscious and that there must be some cause for this being conscious, one is divinely sure that, though there be upon earth distress of nations, with perplexity, the sea roaring, and men's hearts failing them for fear, nevertheless consciousness is. In the last analysis, what more could one ever know absolutely? Unable to depend infallibly upon sense testimony that is fooled by such simple phenomena as the sunrise or an echo, what can a man really prove beyond the presence of consciousness? Consciousness is. That alone man knows. Then since, axiomatically, what is must be all there is, consciousness is the only real existence, the infinite Being, cause, or intelligence which from time immemorial human thought, whether through a glass darkly, or yet face to face, has been bound to regard as God.

For true consciousness ever to lapse into unconsciousness would be just as impossible as for God to fall asleep. What really is always is. True existence could not possibly include any element of nonexistence. God is forever indestructible. Being conscious, man needs to know, therefore, that he always has been and always will be conscious, or rather that he lives forever in the eternal now. No matter in what state of consciousness one may seem to be, God is always man's eternal Life. Only in proportion as a man rejects utterly the belief that he could really ever lose consciousness, is he able to prove step by step the immortality of God's true creation. As Mrs. Eddy says on page 598 of Science and Health: "One moment of divine consciousness, or the spiritual understanding of Life and Love, is a foretaste of eternity. This exalted view, obtained and retained when the Science of being is understood, would bridge over with life discerned spiritually the

Digitized by Google

interval of death, and man would be in the full consciousness of his immortality and eternal harmony, where sin, sickness, and death are unknown."

Man's real experience is the effect of the one infinite consciousness or Mind which is God. Whatever truly exists must exist in the Mind which is all there is. From its very nature this Mind must be active. In fact all that the divine consciousness knows is its active manifestation, and this is the whole of true man in God's image. Right activity is the essence of genuine living,—right activity which is entirely spiritual because it is the activity of the divine consciousness. The infinite consciousness of right activity is the only cause or power with which man can do anything, the only source of happiness, the divine Principle of success. Expressing divine consciousness, man is perfectly supplied with all there is to depend upon for his living. Then since all is certainly plenty, the real man in God's likeness has abundance of consciousness, and manifests abundance of activity. With such spiritual richness, could he ever possibly be poor?

Obviously if a man is on a torpedoed ship or in a disabled aeroplane, what he needs is not money but a supply of intelligence. In proportion as he knows that man has all intelligence, which is expressed in enduring, right activity, he finds himself supplied with just what he needs under the circumstances. Even though it seem a miracle, the turning straightway to God shows him the right way to act and to rejoice. Any doubt as to this Mrs. Eddy reduces to its native nothingness when she says on page 135 of Science and Health: "There is to-day danger of repeating the offence of the Jews by limiting the Holy One of Israel and asking: 'Can God furnish a table in the wilderness?' What cannot God do?" That God, divine consciousness, always does furnish plenty of righteous activity, those who are putting Christian Science into practice are proving everywhere with absolute sureness in the most trying situations.

What one needs under all circumstances is, in fact, not mere material money, but activity in accordance with intelligence. The expression of intelligence is the one valuable service for which all mankind is looking and with which one must fulfill all obligations. Content with spiritual activity for its own and God's sake, man finds himself with unlimited spiritual currency, as well as unlimited spiritual health,—with, in short, the true way to manifest plenty of intelligence. As Mrs. Eddy says on page 232 of "The First Church of Christ, Scientist, and Miscellany": "The right way wins the right of way, even the way of Truth and Love whereby all our debts are paid, mankind blessed, and God glorified."

✧

[W. Stuart Booth in *Trinidad* (Col.) *Picketwire*]

Christ Jesus, in fulfilling his avowed mission of bearing witness unto the truth, overcame sin, sickness, and death, thereby proving these conditions to be without divine authority, hence untrue in the sight of God. Mrs. Eddy's words on page 495 of "Science and Health with Key to the Scriptures," make this sufficiently clear: "If sickness is true or the idea of Truth, you cannot destroy sickness, and it would be absurd to try. Then classify sickness and error as our Master did, when he spoke of the sick, 'whom Satan hath bound,' and find a sovereign antidote for error in the life-giving power of Truth acting on human belief, a power which opens the prison doors to such as are bound, and sets the captive free physically and morally."

It is but just, however, that a vigorous denial be entered against the classification of Christian Science with such antipodal teachings as paganism, theosophy, Hinduism, and mesmerism. The unprejudiced study of Christian Science and the application of its teachings have convinced large numbers of both lay members and clergymen of many churches that it is nothing other than the precept and practice of primitive Christianity. Christian Science is indeed justified by its fruits, which are those promised by Jesus, and are the fruits of the Spirit, against which, as Paul says, "there is no law."

✧

[Charles W. J. Tennant in *Hackney and Stoke Newington* (England) *Recorder*]

"H. T.," writing in a recent issue, says: "One may be prepared to welcome Christian Science in so far as it advocates the merging of the human mind in the Divine, the essence of all true religion." Christian Science teaches that God is divine Mind, and that God is infinite; hence there is only one Mind. The human or carnal mind is not true mind, but is, as Paul terms it, "enmity against God;" therefore it can never be "merged" in the divine, but must be put off. When our Master said, "Not my will, but thine, be done," it is evident that he was willing to sacrifice the human for the divine. His life work was a constant demonstration of this. If the heaven and earth referred to by our critic were material and created by God, why should John have had a vision of a new heaven and a new earth, wherein dwelt no pain, sorrow, or death? He cannot imagine that the new heaven and earth were a material condition. John's vision was of a spiritual, divine state of consciousness, in which the material, finite, and temporal sense had passed away.

✧

[Frederick R. Rhodes in *Armley and Wortley* (England) *News*]

Christian Science does not teach such nonsense as that there is "no such thing as pain" and "that if we thought of something else, pain and sickness would pass away." On page 460 of "Science and Health with Key to the Scriptures," Mrs. Eddy writes: "Sickness is neither imaginary nor unreal,—that is, to the frightened, false sense of the patient. Sickness is more than fancy; it is solid conviction. It is therefore to be dealt with through right apprehension of the truth of being."

Our reverend critic must, as a follower of the great Physician, recognize the power of God to heal and save. Did not the Master command all his followers to "preach the gospel" and to "heal the sick"? As there is no record of that injunction ever having been rescinded, it still remains the duty of every true Christian to endeavor to carry out these specific commands of the Way-shower. Our critic himself states that God "spoke to us through His Son," and was not one of these loving and wonderfully encouraging messages to the effect that we should do the works that he, through the presence and power of his Father, did, in healing all manner of disease and sin? Christian Scientists are but very humbly trying to follow that command, and the results of these efforts can be seen and proved in most cities and towns all over the civilized world.

✧

[Peter V. Ross in *The Bulletin*, San Francisco, Cal.]

*The Bulletin* of February 20 contains a news item to the effect that Californians who do not believe in drugs nor rely upon medical doctors for healing, are opposed to compulsory health insurance. The article might well have gone farther and pointed out that other classes of citizens besides the "anti-drug believers" are opposing this kind of insurance in the form in which it is being put forward in California. In order to understand the reason for this opposition now

Digitized by Google

springing up in all directions and from people in all walks of life, it is necessary only to examine into the nature of this system of insurance and ascertain how it would work if put into operation.

The general plan is to compel all employees whose earnings do not exceed one hundred dollars a month to insure against sickness. Employees and other persons whose incomes exceed one hundred dollars a month, or twelve hundred dollars a year, are still to enjoy their liberty and insure or not insure, as they please. The insurance entitles employees to part of their wages during illness, and affords them and their families also medical attention. The wage benefits, however, will not be paid if the system as now advocated prevails, unless the employee accepts the physician and medical service offered. In fact, the wage benefits are a secondary consideration. The leading feature is medicine and surgery, and these not only for the employee himself but for those dependent on him. Thereby the system is made operative not merely on the premises of the employer, but in the home and private relations of the employee.

In order to provide these wage and medical benefits, an enormous insurance fund must be raised and maintained. Experts say that about forty-five million dollars would be needed in California for the first year, and probably an increasing amount each year thereafter. Of that tremendous sum employers would be required to pay forty per cent, employees forty per cent, and taxpayers twenty per cent. These payments would be forced contributions.

Here, then, is presented a vast scheme of insurance, mandatory upon people of limited incomes and having compulsory medicine as its principal purpose; for it is to be kept in mind that, if present plans carry, ailing employees can have no wage benefits unless they accept the medicine and surgery provided for them.

This is a startling innovation. Never before has anything of the sort been proposed in America. So revolutionary in character is it, so foreign to democratic ideals, and so strikingly un-American in every detail, that its friends confess that the legislature, as the Constitution of the state now reads, has no authority to put it in operation. Therefore an amendment to the constitution has been proposed, giving the legislature the extraordinary power necessary. That amendment comes before the people for their rejection or acceptance at the November election.

The legislature already has full power to provide voluntary or any rational system of health insurance, but this does not satisfy the promoters of the compulsory scheme. They have the effrontery to ask the people to surrender a large measure of their constitutional rights, which have been purchased at such a price, in order that this compulsory scheme can be put into effect. If the people yield and in sufficient numbers vote for the amendment, the legislature thenceforth will be equipped with full power to put compulsory health insurance in force, and we shall be in constant danger of such an event. If they vote against the amendment—and it is unthinkable that they should do otherwise—the danger is passed, and the iniquitous thing done for in California.

✧

[Peter B. Biggins in *High River* (Alberta, Canada) *Times*]

Our critic asserted that Christian Scientists deny the need of a Savior, and that they deny the atonement. That these assertions are not true is readily seen from the following passage from the tenets of Christian Science (Science and Health, p. 497): "We acknowledge Jesus' atonement as the evidence of divine, efficacious Love, unfolding man's unity with God through Christ Jesus the Way-shower; and we acknowledge that man is saved through Christ, through Truth, Life, and Love as demonstrated by the Galilean Prophet in healing the sick and overcoming sin and death." Prayer in Christian Science is not "a kind of auto-suggestion to their own minds" as this critic says it is. The Lord's Prayer is the model accepted by Christian Scientists; it is repeated audibly at all Christian Science services and its spirit is silently realized. As a result it is quite usual for healing to take place at these services. Needless to say, Christian Science denounces mental suggestion in all its forms.

The influence of Christian Science in the lives of those who study it, is good only. Those who know of the large numbers who have been healed of seemingly hopeless disease and vice regret to learn of Christian clergymen through mistaken motives making such public utterances about it. It would be far better to investigate the subject fairly, to consider without prejudice or bias the evidence of its beneficent influence. This is more in keeping with the increasing spirit of tolerance of these times,—times in which it is important that all that is good should be available for those who are in need.

✧ ✧ ✧

## Services in Camp

Early in August, 1917, a few students of Christian Science in the ranks of what was then the ——— National Guard, determined that lack of a Christian Science organization in the near vicinity could act as no obstacle to their attending services while in camp. Consequently they met one Sunday evening at the home of a lady interested in Science, and after reading the Lesson-Sermon together and singing one of Mrs. Eddy's hymns, decided to hold services of their own. Through the efforts of this lady, the little Protestant chapel in the near-by village was secured, and regular church services were inaugurated, including both the Sunday morning and the Wednesday evening meetings.

The Sunday morning service was held at eight o'clock in order not to conflict with the Sunday school and service of the charitable orthodox congregation which was sharing the place of worship. Permission was obtained to publish church notices on company bulletin boards, and within a very short time the services were attended by a considerable number of soldiers, as well as by a few civilians. Attendance at the Sunday services was augmented by visiting friends and relatives of the fifteen thousand soldiers quartered in camp; thus the glad news of the flourishing young branch spread rapidly throughout the entire state. *Quarterlies* and Hymnals were contributed by a Church of Christ, Scientist, in the state. The collections taken were used to defray the nominal rent charged, and a balance of over ten dollars was remitted to the state committee on publication, from whom great encouragement had been received. The First Reader, pianist, and usher were soldiers; the Second Reader was the wife of an officer; all were members of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

It was a very great privilege to announce from the desk that the Christian Science periodicals and the works of Mrs. Eddy, including the textbook, "Science and Health with Key to the Scriptures," could be borrowed from, or be read at, any of the three libraries maintained in camp by the Y. M. C. A. Toward the close of September the last troops left for the South, and the services, which had been conducted regularly up to that time, were then discontinued.

## Heralds of Healing

IN days gone by the heralds were the officers who proclaimed great tidings of war and peace. They also were the messengers going between rulers, and hence their persons were "invested with a sacred and inviolable character." *The Herald of Christian Science* proclaims truth, publishes righteousness, and announces through records of healing how "God hath visited his people." It is not a strange thing but a matter of helpful kindness that heralds should speak the tongue of those to whom the message is sent.

When Mrs. Eddy made request that the Publishing Society should issue a translation from the periodicals into German, her thought of love reached out to a great nation having in its formative stage great need of the illumination of divine Principle. Difficulties in the way of the publication of this periodical, which seemed at first insuperable, were overcome at last, and *Der Herold der Christian Science* began to be regularly published in 1903. The readers for whom it was intended did not speak a uniform language and so there were at first many controversies over translation, but gradually, through its continued publication, there was gained such a consensus of opinion regarding the use of words that within nine years after its appearance a translation of "Science and Health with Key to the Scriptures" could be made into German, and the message which came from Mind for the enlightenment of all mankind was made available for this empire at the very time when clouds of materialism were darkening its sky.

The point to be remembered now is that the herald is inviolate and free to bear his message of truth, righteousness, and healing, whether there be war or no. Christian Scientists and others surely are not giving due thought to the opportunity they have if they class a Christian Science periodical as an enemy publication, because it has its message translated into the language of those who are foes. Is it not a privilege of the Christian to love his enemy, that is, to give him opportunity for the curing of his enmity and for learning about God? This good will has all conceivable distance from condonation. Love really unfolds the meaning of the words, "Our God is a consuming fire." The pure in heart rejoice in the cleansing fire of divine Love, but to those who love evil it is wrath and judgment. Christian Science declares the consuming of sin, not the condoning of it. In her Communion Address in 1899, Mrs. Eddy asks, "Now what have you learned?" (Miscellany, p. 124), and then continues: "The mystery of godliness—God made 'manifest in the flesh,' seen of men, and spiritually understood; and the mystery of iniquity—how to separate the tares from the wheat, that they consume in their own fires and no longer kindle altars for human sacrifice."

*Der Herold der Christian Science* we may look upon as a herald was viewed of old, as being sacrosanct and inviolate because the message it bears is from Principle, affirming as true to-day what was declared true of old regarding God, that "he sent his word, and healed them, and delivered them from their destructions." Here is the message it carries (Miscellaneous Writings, p. 82): "Mortal mind is a myth; the one Mind is immortal. A mythical or mortal sense of existence is consumed as a moth, in the treacherous glare of its own flame—the errors which devour it. Immortal Mind is God, immortal good; in whom the Scripture saith 'we live, and move, and have our being.'" Such a message gives no aid and comfort to any enemy, but is the proclamation that enmity must torture its own self, for they who love good are delivered from death.

Jesus said, "Judge not according to the appearance, but judge righteous judgment." Regarding a periodical containing articles and testimonies, Mrs. Eddy's guidance is clear enough to enable us to come to a right judgment. She says (Manual, Art. VIII, Sect. 11): "A member of this Church shall neither buy, sell, nor circulate Christian Science literature which is not correct in its statement of the divine Principle and rules and the demonstration of Christian Science. Also the spirit in which the writer has written his literature shall be definitely considered. His writings must show strict adherence to the Golden Rule, or his literature shall not be adjudged Christian Science." It seems clear then that Christian Scientists should not take a superficial view that as *Der Herold der Christian Science* offers translations in the tongue of those against whom so many countries are at war, it must be judged from that fact alone and not from its contents, its motives, and its potencies for good.

In due time the advancing glories of the Christian Science movement may require many *Heralds* to bear the proclamation of truth and emancipation to all nations and peoples and tongues, but then, as now, while the message may be presented through many different translations, it will always be set forth also in that language in which the Christian Science textbook appeared, so that those who receive the message may come to the understanding of one tongue, and eventually be one people, one brotherhood, one "commonwealth of Israel."

WILLIAM P. MCKENZIE.

## The True Rock

THE true rock is the Christ, Truth. Upon it God has built the structure which outlasts human religion. Scientifically understood this rock will provide health and wealth, oil and wine, milk and honey, because the Christ, Truth, is the Word, "and the Word was with God, and the Word was God." As Israel goes forward from Egypt into the promised land the Word of God feeds, clothes, and protects its loyal ranks. On page 153 of "Miscellaneous Writings" Mrs. Eddy says: "When God went forth before His people, they were fed with manna: they marched through the wilderness: they passed through the Red Sea, untouched by the billows. At His command, the rock became a fountain; and the land of promise, green isles of refreshment. In the words of the Psalmist, when 'the Lord gave the word: great was the company of those that published it.'"

We read in the book of Numbers that Moses smote the rock in the wilderness "and the water came out abundantly, and the congregation drank, and their beasts also;" but he received a reproof from his own highest sense of good for the manner of his smiting, and as a consequence neither he nor Aaron brought the congregation of Israel into the promised land. The command to Moses and Aaron was, "Speak ye unto the rock," but the record states that Moses spoke to the people instead, and "said unto them, Hear now,

Digitized by Google

ye rebels." Was this mistake in addressing himself to person rather than to Principle the reason for his not crossing the Jordan? If so, then the incident may act as a warning. In the Glossary of Science and Health (p. 593) Rock is defined as "spiritual foundation; Truth. Coldness and stubbornness."

The real rock must always be recognized as superhuman and divine. The business man who tries to smite the rock of success, relying upon mere human ingenuity, who addresses himself to personal influence, to the push and pull of commercialism, does not enter the promised land by this means. The child at school trying to force good marks, the housewife goaded by fear of want, the gambler, the one who worships a false sense of money, the ruler driven by lust of conquest, the ecclesiastic insisting on temporal power, the hypnotist relying on human will power, are all keeping themselves out of the promised land by addressing themselves to mortal mind instead of to divine Principle, God.

The spiritually minded discover "the stone which the builders rejected" to be "the head of the corner." They avoid the rocks of Scylla and Charybdis, the points of allurement and danger which threaten the unwary traveler on life's sea. When they feel the tide of human opinion setting in strongly toward these rocks, they turn the helm and sail into the open sea where they can more readily take counsel with God rather than men. When they find themselves wandering for a time in the desert of human loss and lack they do not moan, "Can God furnish a table in the wilderness?" They come to the rock of inexhaustible bounty, and as in Moses' day "the waters gushed out, and the streams overflowed," so for them the fountains flow, slaking their thirst and cleansing their minds.

Christian Science demands activity and alertness. It does not thrive in an atmosphere of passivity and drowsiness, but destroys these noxious gases. The fact that Christian Scientists understand Principle to be Love does not mean that they are nonresistants to evil. They have no conscientious objection to smiting with the sword of Truth; they are not afflicted with the sleeping sickness of pacificism; they do not raise the banner of peace at any price nor play into the hands of that perverted psychology which consents to be used by adept necromancy and political ecclesiasticism. With piercing keenness Christian Science detects the mental attempts to disorganize the army and navy of the Lord, to disrupt the families of the men at the front, to draw supplies from unguarded coasts, to instil hesitation at the moment of attack, to manipulate the national consciousness through its weaknesses, to excite local territorial ambitions, to fan racial misunderstanding into racial hatred. All the etceteras of expert mental malpractice are uncovered by the practice of Christian Science, which handles serpents with impunity and immunity, because it fulfills the prophecy of Christ Jesus, "They shall take up serpents; and if they drink any deadly thing, it shall not hurt them."

The Discoverer and Founder of Christian Science did not take her orders from men but from God. On page 30 of "Retrospection and Introspection" we read: "As the pioneer of Christian Science I stood alone in this conflict, endeavoring to smite error with the falchion of Truth. The rare bequests of Christian Science are costly, and they have won fields of battle from which the dainty borrower would have fled. Ceaseless toil, self-renunciation, and love, have cleared its pathway." When the call comes the loyal followers of Mrs. Eddy are always ready to smite error. When the serpent bites the heel of woman's seed, that seed bruises the serpent's head. Likewise when Christian Scientists find themselves in the desert either of persecution or of popularity they smite the rock of living waters; for as Hannah sang in thankfulness, "There is none holy as the Lord: for there is none beside thee: neither is there any rock like our God."

WILLIAM D. MCCRACKAN.

## A Nation's Growth

WE sometimes forget that nations are born as truly as are individuals, that they must grow, and unless they forget the vital truth to which they owe their very existence they will pass the barriers of time and unfold in the infinitude of Mind and Mind's eternal manifestation. At this period no thinker would deny that when any nation allows itself to be submerged in materiality, and thus loses sight of the moral and spiritual, its decadence has begun, and unless an awakening comes it will go the way of all flesh. The strength of a nation is the ideal which impels it at any cost to seek after righteousness, for this alone is its "saving health," to quote the psalmist's words. Abraham forsook one of the great nations of antiquity because he was weary of its many gods, its false knowledge, and its hopeless materialism; and while he never realized on earth the fruition of his hope and faith, he laid deep in human consciousness the imperishable seed of a lofty ideal which was to save the whole human race.

To those who rejected the life-giving truth which he came to declare, Christ Jesus said, "The kingdom of God shall be taken from you, and given to a nation bringing forth the fruits thereof." No nation can continue to exist, much less grow, which does not bring forth some of the fruits of righteousness, and these have usually been most in evidence in times of trial and conflict. Sodom was nearing destruction when sensualism revelled in idleness and "fulness of bread," and Ezekiel adds to this charge, "Neither did she strengthen the hand of the poor and needy."

Here it may be said that the result of Mrs. Eddy's teachings is becoming very apparent the world over in well-directed energy, and especially in the generous outgoing of true charity toward the needy of earth, whether their seeming necessities are most deeply felt on the material plane or on the spiritual. In spite of the clouds which hang heavy over the material horizon, all true thinkers are beginning to heed the command of Christ Jesus, which has special significance at this period, "Lift up your heads; for your redemption draweth nigh." Strange as it seems, people are all acknowledging that the late Fourth of July was not only the greatest day in this nation's history, but that it was a prophecy and promise of boundless blessings to the whole human race, of the coming of true activity, true brotherhood, and the elevation of moral and spiritual ideals above all material considerations.

On every hand we find that the eyes of mankind are opening wide to look for spiritual signs, and they rejoice in seeing the slightest evidence of it which marks the coming to humanity of God's kingdom, with all it implies. Because of the very necessities of this hour not only are people learning that kindliness and unselfishness make us forget the inconveniences and deprivations associated with the world's great struggle, but they are finding their joy in giving up the lesser in order to possess the greater, and are thus proving the truth of their Leader's inspired words on page 192 of Science and Health, "Whatever holds human thought in line with unselfed love, receives directly the divine power."

Two thousand years ago this call came to the nations of that day: "All that is in the world, the lust of the flesh, and the lust of the eyes, and the pride of life, is not of the Father,

Digitized by Google

but is of the world. And the world passeth away, and the lust thereof: but he that doeth the will of God abideth for ever." The nations, however, continued to love the world and to cling to it, and now the things which please the senses are being ruthlessly torn from mortals by the exigencies of these times and in consequence of the utter failure of belief in material pleasures and possessions to make existence even endurable. Now, louder than ever, comes again the call of Truth, "Love not the world;" and those who have become better acquainted with God through Christian Science respond joyfully to the summons. In so doing they find that what seemed great sacrifice actually means the giving up of the unreal for the real; and so instead of the illusive pleasures of eating and drinking there comes a new and vital sense of the command to love our neighbors as ourselves; and since it is meeting with a marvelous response this nation and other nations are growing into a new sense of man's possibilities as a child of God.

John was repeatedly told by the angel that glory and honor were to characterize the ideal city which came down from God "prepared" to meet all human need; and who would question that this glory and honor could ever mean anything less than absolute rightness in all things. As the nations become rich in spiritual understanding they will respond to the divine law of growth, which means unfoldment from within, from the infinite depths of spiritual being, and this will spontaneously and inevitably express itself in all outward things on the part of nations and individuals alike. These lines which appeared in *The Christian Science Journal* in May, 1886, are deeply significant at the present hour:—

Art Thou the Strong?
To Thee, then, though the air be thick with night,
I trust the seeming-unprotected Right,
And leave the wrong.

These words were not written by a Christian Scientist, but they indicated in a wonderful way the outward and upward trend of thought, and so it is well to recall them at an hour when unnumbered thousands of Christian Scientists know that the right is never for a moment unprotected; nor are those who are giving themselves in its service ever without the unfailing protection of Love and wisdom. The master Christian foresaw and foretold that every branch in the vine which bears not good fruit must be taken away; and while to mortal sense this may indicate deprivation, it really means true growth and ceaseless unfoldment. Those who look away from merely material evidences are fully aware that the past year has been a year of growth, not decadence; and while the pruning knife cuts deep into the material sense of things, yet the results will more than compensate for the sorrows of an hour.

On page 282 of Miscellany we find these words by Mrs. Eddy: "Through the wholesome chastisements of Love, nations are helped onward towards justice, righteousness, and peace, which are the landmarks of prosperity. In order to apprehend more, we must practise what we already know of the Golden Rule, which is to all mankind a light emitting light."

ANNIE M. KNOTT.

# Among the Churches

## Current Notes

DETROIT, MICH.—Third Church of Christ, Scientist, has leased portions of the Duplex Theater Building on East Grand Boulevard, near Woodward Avenue, for its services. The first service in the new quarters was the testimony meeting, May 1. This is the second move to larger quarters made necessary by the growth of this church since its organization as an outgrowth from First Church a little more than five years ago.

Another step of equal, if not greater, importance in the history of Third Church, is its purchase of two large lots aggregating 130 by 175 feet on the northwest corner of Seward and Second Avenues to be used as a site for its future church home. This is one of the most beautiful residence sections of North Woodward, and it is thought will be an ideal location for the church. The buildings now on the lots will not be disturbed until the church is ready to start building operations.

The other three Christian Science churches in Detroit are assisting in paying for the lots, this cooperative method of financing Christian Science church building having been adopted several years ago when Second Church built its edifice, and again carried out in the more recent building of the handsome First Church structure at Cass and Hancock Avenues, which was dedicated last November.—*Detroit Times.*

BERKELEY, CAL.—The University of California observed its semicentenary during the week March 16 to 23, 1918. The regular fortnightly testimony meeting of the Christian Science Society of the University did not occur during this week, and it was realized that some of the alumni would be grateful to attend a testimony meeting of this organization, so a special meeting was held Saturday afternoon, March 23, at four o'clock, in the edifice of First Church of Christ, Scientist, of Berkeley. Announcements were sent to Christian Science churches and societies throughout the state inviting the alumni.

Deep gratitude was expressed, especially by those students of Christian Science who graduated from the University before this organization was formed, that an opportunity was thus afforded to attend one of its meetings. The closer feeling of unity between the active members and the alumni resulting from this meeting has been the occasion of great rejoicing to all concerned.

WESTFIELD, N. Y.—The Christian Scientists in this place have recently adopted a French war orphan. Since July, 1917, the society has contributed one fourth of its regular contributions for war relief. This little society has maintained the reputation, which Christian Scientists have all over the world, of being able to raise money for any righteous cause without apparent effort, and has raised more than a thousand dollars during the past year.

*The Westfield Republican.*

HONOLULU, HAWAII.—One of the most imposing church structures in Honolulu is the new Christian Science church at the corner of Wilder Avenue and Kewalo Street that is now near completion. Work has been in progress on it for the past six months, and with all parts of the main structure completed, there remain only the interior decoration and a number of details to be finished. The cost of the structure will be well over seventy-five thousand dollars.

The general dimensions of the new building are 106 by 76 feet and it occupies a spacious lot which has a frontage of 178 feet on Wilder Avenue and 125 feet on Kewalo Street. The building stands back from the streets, leaving a considerable area of surrounding grounds. Work on the structure has proceeded slowly by reason of the fact that the congregation has adopted the policy of paying for everything as it is done.—*Pacific Commercial Advertiser.*

# The Lectures

REPRESA, CAL. (Folsom State Prison, auspices First Church, Sacramento).—Virgil O. Strickler, lecturer; introduced by Arthur E. Miller, who said in part:—

Up to five years ago I was quite bitterly opposed to what I then believed Christian Science to be. I never lost an opportunity to ridicule it or to make fun of its students; and in my ignorance I frequently warned people against it. Then a change began to come over my thoughts. I found that many bright, capable, intelligent men and women not only were accepting it but were finding great peace and joy and health and happiness through it.

Four years ago while in San Francisco, I was persuaded to attend Christian Science services. I would not have done that at home; I would have been ashamed to do so, but among strangers it seemed different, so I went. I soon learned that these people had found something which I needed, something I should have; something you need, something you should have; something the whole world needs, and something the whole world should have and will have. My prejudice was gone; my eyes were opened; and I began to see there was a mental world, a new heaven, a new earth, which I had never seen before, and I learned something of what real life is, of what real man is, of what God is. How I have since blessed those who led me to this source of all good, this open fount that is free to all!

NEW YORK, N. Y. (First Church).—Dr. Walton Hubbard, lecturer; introduced by Charles E. Heitman, who said in part:—

It is evident that when Christ Jesus said to his followers, "By their fruits ye shall know them," he considered works and not words as furnishing the only true basis for judging "righteous judgment." It is on this same simple but sure basis that Mrs. Eddy has asked the world to judge Christian Science, and so successfully has Christian Science met the test that to-day a great multitude of people from all walks of life bear grateful testimony to it as an effective agency for the healing of both sin and disease. Thus it is that this Science of Christianity, taught by Jesus and revealed and restated to this age by Mrs. Eddy, is awakening the world, and proving that nothing is so convincing, nothing is so powerful, and no arguments are so unanswerable as Truth demonstrated.

FLINT, MICH. (First Church).—William D. Kilpatrick, lecturer; introduced by Walter W. Powers, who said in part:—

One of the helpful things which I have learned from a study of Christian Science is that the events recorded in the Bible, however remote in history, are typical of daily human experience; that each lesson learned by those interesting figures who people the pages of the Bible is a lesson applicable to to-day's needs, applicable here and now; that the faith which freed the early patriarchs and their followers from sin, disease, and death, and which Jesus the Christ applied so constantly and so unerringly, rested on the operation of law based upon Principle as effective now as it was then.

LOS ANGELES, CAL. (Ninth Church).—John Randall Dunn, lecturer; introduced by Douglas L. Edmonds, who said in part:—

Christian Science has proved its healing power over all manner of diseases formerly considered incurable; but this is not all of its mission. It is bringing to unnumbered thousands in every experience and condition of life a demonstrable knowledge that God is man's life, his strength, his happiness, his health, his all; and to realize this in its fullness is to have that "peace of God, which passeth all understanding." The message of Christian Science to the world of to-day is that real peace comes only through the recognition of man as the image and likeness of God; and that, as Mrs. Eddy, the revered Discoverer and Founder of Christian Science, has stated in "Science and Health with Key to the Scriptures" (p. 467), "mankind will become perfect in proportion as this fact becomes apparent, war will cease and the true brotherhood of man will be established."

PROVIDENCE, R. I. (First Church).—Dr. Walton Hubbard, lecturer; introduced by Charles A. Danforth, who said in part:—

Whatever may be the world's thought concerning Christian Science, whatever the world's careless or erroneous estimate of it, Christian Science still remains, as it always has remained and ever will remain, the healing, correcting, and protecting religion of Christ Jesus. In every detail of its thought and work it follows implicitly the teachings of Christ Jesus; its understanding of God is the Christ understanding of God; its model is at all times Christ Jesus.

To the present condition of the thought of the world, which seems to be so universally filled with a sense of strife and discord, Christian Science comes as a beacon to light the way from this discordant material sense up to the harmonious spiritual sense. So the soldier and the sailor, the business man and the student, the home maker,—all those who are applying the truth and Principle of Christian Science in the daily routine of work,—are finding that Christian Science is giving to them health and strength, integrity, courage, harmony, and love.

LANCASTER, PA. (First Church).—William W. Porter, lecturer; introduced by H. A. Garrett, who said in part:—

Jesus in his work of teaching and healing made no distinction between the healing of sin and of sickness. He said, "Ye do err, not knowing the scriptures, nor the power of God." He admonished his followers: "As ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give." A number of years ago Mrs. Eddy, after a long and careful study of the Bible, discovered this divine Principle of healing and the laws governing its application and demonstration and named her discovery Christian Science. In the Preface to her book "Science and Health with Key to the Scriptures" (p. x) she writes, "The divine Principle of healing is proved in the personal experience of any sincere seeker of Truth."

## Lectures to be Delivered

**By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.**

ENGLAND—Bexhill-on-Sea, Sussex: Pergola, Egerton Park, 3:30 p.m., July 28.

NEW YORK—Dannemora (auspices Saranac Lake): Clinton Prison, 4 p.m., July 28.

SCOTLAND—Edinburgh: Synod Hall, Castle Terrace, 3 p.m., July 21.

## Notice

Ezra W. Palmer, C.S.B., will not be available for lectures in the United States and Canada between September 1 and December 31, 1918, as he goes on a lecture trip to Australia and New Zealand.

# Testimonies of Healing

Seven years ago, at a time when I felt a sense of need, my attention was first drawn to Christian Science by some *Sentinels* that were lent to me, and I procured a copy of Science and Health. It was, however, the wonderful accounts of physical healing that attracted me, and as my sense of need seemed to pass for the time, I did not realize the beautiful truth revealed by this teaching until later. Now, after some years of continued study and considerable help gained from it, I wish to send from this far-away corner of the field my acknowledgment of indebtedness.

I always enjoyed physical health, but it is even better now, and I manifest a much greater degree of energy than ever before. Material laws that I was taught from childhood carefully to obey in order to avoid the penalty of sickness, I now disregard with impunity, knowing that they are not laws at all, but only mistaken beliefs. It is, however, mentally and spiritually that Christian Science means so very much to me. I can truly say it has reversed my outlook on life, which was before decidedly gloomy and morbid; it is now full of hope and interest, gained from the broadening view that results from having a spiritual in place of a material basis for thought. Christian Science has enabled me to overcome to a great extent resentment, fear, worry, and a lack of interest in those outside my own immediate circle. It has shown me the unreality of the experience called death, thus removing the fear of it for myself and others; and for this I am more grateful than for anything else. The study of the Bible has become a pleasure, many of what formerly seemed hard sayings having become plain. Such understanding of the truth as I have gained is most helpful to me in my daily life, and I know that when I fail to demonstrate the supremacy of good, it is entirely due to imperfect understanding and lack of faithfulness in living the golden rule.

I cannot express in words how thankful I am for Mrs. Eddy's writings and all the Christian Science publications; also for the loving-kindness of Christian Science friends here, who are always ready to give help and encouragement. I have still much, very much to achieve in overcoming error in numerous forms, and feel I am only on the threshold of the understanding of the true nature of God; but I earnestly desire to put into practice the little I do understand, in order to grow spiritually and be able to pass this priceless truth on to others.

Our little society here manifests love and unity among its members, and I know that if we do our part faithfully in maintaining scientific purity of thought, the law of Love can be relied upon to operate in spreading our light in this part of the world. I am thankful to God for this wonderful truth and to Christ Jesus for revealing it to the world; also grateful to Mrs. Eddy for her selflessness in rediscovering the way and pointing us to it.—(Miss) ANNIE R. W. JOHNSON, Barbados, British West Indies.

✧

In my travels as a seafaring man I came to New Orleans, Louisiana, in June, 1915, and there I met a lady, a frequenter of the Christian Science church, who talked of this religion to me and offered to bring some literature on board for me to read on the voyage. This was the first I had heard of Christian Science, and there was no intimation that it would alter my whole life. God bless her! I am trying now to follow her example in bringing this truth to others. When I commenced to read the literature, it was like the sun coming out clear, after a long, dark night. It seemed as if I had been waiting all my life for the disclosure of the truths contained therein, and I felt convinced that "signs following" would be the result of living in accordance with this teaching. A great uplift was experienced, but it did not heal me of an appetite for liquor.

I was bound for Buenos Ayres, Argentina, and on arriving there went to the Christian Science reading room, where I bought a copy of "Science and Health with Key to the Scriptures," also a Bible, and obtained the address of a practitioner, who later on lovingly gave me a treatment and promised to treat me while I was on my way to New York. That was the last of my desire for strong drink, and the smoking habit was overcome on the same trip. Neither went without a struggle, but they left me for good. The practitioner said she would treat me, but I would have to work out my own understanding. That is what I have been doing these last two years and a half, and am still doing. It has been a long night's travel, but the dawn is coming on fast; Christ, Truth, has helped me. Christian Science has been a blessing from the start, in every way imaginable. My life has now an object, and a bright hope lights up the present and the future. It was quite a while before I could overcome a sense of prejudice against Mrs. Eddy, but I am now truly grateful to her, and appreciated the privilege of contributing to the Memorial fund.

R. RASMUSSEN, New York, N. Y.

✧

About eight years ago Christian Science was first brought to my attention. At that time I was in the depths, mentally, physically, and financially. Besides the mental strain as the result of great trouble and anxiety, I was told by two of the best physicians in the place where we lived that I had an incurable case of Bright's disease. My father had passed on about six months prior to this with the same ailment, under medical treatment.

At that time I had three children, all having been reared under *materia medica*. The birth of each of these children was accompanied by terrible suffering and with every discordant condition connected with an experience of this kind. Another little one was expected in my home and I was condemned to die by my physicians and friends; but this healing truth came to me, removing all fear, and the ever presence of God's protecting love was realized. When the so-called critical hour came, I had no fear. There was a nurse and my husband in the house at the time, but as both were very antagonistic to Christian Science I thought it wise not to let them know the situation; so I went to my mother's home next door to telephone the practitioner who had so lovingly helped me along the rugged path. It was past midnight, and all was calm and peaceful—even the stars seemed to tell me that God is All-in-all. My mother wished to accompany me home and stay with me; but knowing that God was there, I was not afraid to go alone, and I thought it wise to have no undue moving around in the house so as not to awaken anyone. I made all arrangements myself, alone with God.

The demonstration was completed in about ten minutes from that time and was without pain. I read the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, to keep my thought clear. I remember well the substance of what I read when I knew the work was complete: that God is with us most, when we need Him most. What a deliverance! I called my nurse and husband, and the demonstration was incomprehensible to them. The child is now eight years old and has never had but one drop of medicine,

Digitized by Google

that having been given him by the nurse, who did not know any better. He has a clear sense of the truth and practices it in his little problems. The other three children are Christian Scientists now, and depend entirely on God as their Physician and ever present help. The oldest, a girl of fourteen, is a soloist in our little church.

When the youngest child was ten months old my husband passed on, and I was left seemingly alone, and not knowing how to do any manual work for our support, the problem looked big. Then through the understanding that man reflects intelligence and has the presence of Mind always, I learned to teach music, to be a stenographer, do orchestra work, and sing, and thus slowly but surely the financial problem was solved. The children are realizing more each day that God is their Father and Mother and source of supply. This has been proved many times.

In the beginning of my experience in Christian Science the next youngest child, then a boy of two years, had acute lung trouble. The point was reached when I could not tell that he was breathing. The faithful practitioner, who had gone home, was called over the telephone, and she told me to rejoice, that the work was done. I took my Hymnal and began to sing, having the child in my arms. When I came to the words, "Faint not nor fear, His arms are near, He changeth not, and thou art dear," the child looked up in my face and smiled. He was healed! In a few hours he was playing on the floor. After this the youngest child had what is called colitis. Several children had passed on under medical treatment with the same disease during that week. To sense the attack continued for five days; but in the early morning hours, when it seemed that the child was passing from us, Life was realized, and the power of Truth was again proved.

I am so thankful that I could realize that these were only tests which make us stronger in the truth. These are just three of the many demonstrations made in my family by the application of the truth as given us by our dear Leader. In the business world Christian Science is everything to me, enabling me to work in harmony with those who are not Scientists, and my friends and fellow workers are seeing that I have an understanding of Principle that can be applied to any circumstance. I am indeed grateful to Mrs. Eddy for bringing the truth to light.

(Mrs.) Eva Cummings, Kinston, N. C.

✧

Six years ago I became interested in Christian Science, and after only partly reading the book "Science and Health with Key to the Scriptures" by Mrs. Eddy, I became free from a trouble which had caused me much suffering and discomfort for years. We were then in California, and prominent physicians of San Francisco had advised an operation as the only way of restoring my health. I have had no return of the ailment. We have experienced many other wonderful healings. A very painful abscess was overcome within a short time, the pain and inflammation disappearing after the first treatment. A case of erysipelas was cured with only a few absent treatments, and our three-year-old son was healed within thirty-six hours after falling and injuring his back and shoulder so badly that he could not move at all without intense suffering.

Several times we have had the help of practitioners in Sweden. One of the most remarkable healings was, I think, when our little daughter became very ill with all the symptoms of scarlet fever during a time when many in our town were suffering with the disease. We reached a practitioner over the telephone, and shortly after treatments were begun the child fell into a quiet sleep that lasted for three hours. When she awoke the high fever was nearly gone and so was the redness on her chest. She smilingly told me that she felt the practitioner had treated her, because she was much better, but she wished to sleep some more. After yet another refreshing sleep she awoke feeling entirely well. The next day being New Year's day, we took her with us on a long sleigh ride in what was considered unusually cold weather even here, but she suffered in no way after the outing.

At another time I became ill with a serious internal disorder that might have meant many months in a hospital had I turned to the medical profession for relief, but with the help of a Christian Science practitioner I was entirely well after two months. This malady was slow to yield, but I did much reading of the textbook during this time and thus gained in understanding of the truth.

We are very grateful for Christian Science, which teaches us how to understand God as Love, and consequently that suffering and sin are not in accord with His laws; also to the friends who have helped us in our struggles to learn the truth.—(Mrs.) Ingegard Leijonflycht, Leksand, Sweden.

✧

I am indeed grateful for Christian Science. About eight years ago it was presented to me by my physician's wife, who gave me the first copy of the *Christian Science Sentinel* I had ever seen. She had read it and found it very good, so told me to take it home and read it, saying she thought I would find some very good ideas in it. I was sure I would if she had done so, for I had great faith in her judgment. We had taken up the study of religions in a class in her home, and for many years were close friends and students. I began reading the *Sentinel* that evening, and before I had read very far, found it was the truth for which we had been searching so many years. During the first three weeks of reading just the *Sentinel*, I was healed of muscular rheumatism, nervous indigestion, and neuralgic headaches. I then purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and before I had read it half through, eyeglasses were laid aside after having been worn over sixteen years on account of a structural defect of the eyes.

Six months after beginning the study of Christian Science I came to Detroit, Michigan, and a year later had my first Christian Science treatment, for quinsy sore throat. A sister had passed on with that disease, and I always dreaded it. My parents and relatives said that as I had inherited it, I would suffer from it all my life. As a child, and while going to school, I did have it sometimes twice a year. Nothing much was done for me except to give me a gargle, and when the throat was closed so I could not even use that, I was told the disease would run its course; that meant a week, sometimes longer, before relief was experienced. With Christian Science treatment I was healed in seven hours. This was wonderful to me, and to all the people in the home where I was living. I did not see the practitioner until the day after my healing.

Seven years ago I had to go to work, and when help in Christian Science was given me I found a position. The following year I took up more complicated work, and by knowing each day that I reflected divine intelligence, I was able to do work I never would have thought of attempting without the help of Christian Science. Although every ailment I ever had came to me during those years, with the better understanding I was gaining each day of the power of Truth,

Digitized by Google

they were overcome, as was also bowel trouble from which I had suffered for years. Impatience and resentment are also being overcome, and I know that as I go on with the study of the Bible and Science and Health all errors of thought will be corrected. I have not lost an hour from my work on account of illness in all these years. I have been at my work every day, no matter how cold or stormy the weather. My relatives think it very wonderful that I can stand it. In a large room full of women and girls I was the only one who was able to stand the severe cold of last January, but I am the only Christian Scientist in that room.

I am grateful to God for all the healing that has come to me; grateful to Mrs. Eddy for making the Bible an open book to me so that I can use and demonstrate its truths in my daily living; grateful for all the Christian Science literature, especially the *Monitor*, which comes with its daily message of hope and cheer.

(Mrs.) A. E. TWITCHELL, Detroit, Mich.

✧

I would like to try to express my gratitude for Christian Science, although to do so in words is impossible. When I was a high school girl I was healed of scarlet fever in its worst form. My mother and I had been interested in Christian Science for a few months, but this was the first chance to test its efficacy. The healing was perfect, and I lost only three weeks of school.

When my baby was born Christian Science again saved my life, as well as the baby's. It was a hard trial, but through the loving, constant work of a practitioner and members of my family, we again proved God's care. My little girl was a fine, healthy baby, normal in every way. When she was five months old she had whooping cough; but that was wonderfully overcome in a short while, during which time she gained one pound. Since then, over four years, my husband, my daughter, and I have had many proofs of God's loving care, and we can never begin to tell how grateful we are for Christian Science.

(Mrs.) ELSA SHOCKLEY KRUSE, Cincinnati, Ohio.

✧

Christian Science came to me seven years ago, about a month before I suffered a great bereavement, so that I received "Science and Health with Key to the Scriptures" first as a comforter—and a wonderful comforter it proved to be, beyond my power to express in words. Before reading this book, we and our four children were more or less constantly in need of medical treatment; but after studying this book a few months I was surprised to find that both the doctor and the drugs were no longer required. Then, too, I discovered that instead of feeling oppressed by the heat, as in former years, I was able to attend to my business—that of building construction—in the open air under a hot sun without the slightest suffering. Just four years previously I had been prostrated by the heat three times, and on the third occasion was warned to keep out of the sunlight in hot weather; otherwise the doctor would not answer for the consequences. I was also healed of an annual attack of influenza which confined me to bed for at least two weeks. Bronchial colds, coughing, and tiredness were likewise overcome, as well as the liquor and tobacco habits. Before Christian Science came to me I had tried by will power to overcome profanity and bad temper, but without success. One month after I began to read the textbook, profanity disappeared like darkness before the light, and the bad temper has gradually become less and less.

I have been blessed by many wonderful proofs of the allness of good and the nothingness of evil as revealed in Christian Science, both for myself and my children, and on behalf of friends who have sought the Christ-cure. I study the Christian Science Bible Lessons, and am a constant reader of Mrs. Eddy's writings and of the literature issued by the Publishing Society. To this I attribute all my success, my health, and my happiness. My heart is full of love and gratitude to our revered Leader for revealing the truth to this age, and for the courage shown in uncovering hidden evil by our wonderful daily newspaper *The Christian Science Monitor*.—HENRY JAPP, Westmount, P. Q., Canada.

✧

I took up the study of Christian Science about twelve years ago, not for physical healing, but to investigate its teaching. I found what I had been looking for—a more spiritual interpretation of the Bible. For many years I had been a devout member of an orthodox church, searching the Scriptures and trying to follow the teachings of our Master; but not until after I began to study Science and Health did I understand how the healing work could be done. Although I had faith to believe that it should be done through prayer, and many times prayed for the sick and they were helped and comforted, I had no basis to work on except my faith in God and that He does hear and answer prayer. Now I understand the divine Principle of healing, and am very grateful to our revered Leader, Mrs. Eddy, who has shown us the way.

Through the study of Science and Health in connection with the Bible and the *Quarterly*, I have received a much clearer understanding of the Scriptures and a greater spiritual uplift. I have learned the allness of God, good, and man's relation to Him. Christian Science is a beautiful religion, which helps me every day to work out my problems; it is a demonstrable religion that gives me joy, peace, and complete satisfaction, for which words are inadequate to express my thankfulness to God. I am indeed grateful to Mrs. Eddy for the rediscovery of this new-old truth which is blessing the whole world. I have been healed of many discordant conditions, among them chronic sick headaches from which I had suffered nearly all my life, colds, throat trouble, rheumatism, injured ankle, and biliousness. The healings have been permanent and my health is perfect.

My greatest joy is to be able to help others, and my highest ambition is to live so that I shall be worthy to be called a Christian Scientist.

(Mrs.) MARY L. K. BARR, Fresno, Cal.

✧

I wish to express my gratitude for the many blessings that have come to me through the study and application of Christian Science. I am learning what God is, what man is, and what God has done for man. Christian Science is lifting my thought from the physical to the metaphysical, from the dis-eased to the eased, from the material to the spiritual.

My first healing, that of a skin disease, was brought about through the reading of Science and Health. I have also been healed of liver trouble, soft corns, colds, headaches, and rheumatism, and have been lifted out of the thralldom of hate by learning through the study of Christian Science how to love my enemies, how to pray for those who despitefully use me and persecute me, how to bless them that curse me, and to do good to them that hate me. This was all made easy for me when I learned that my enemies were but wrong thoughts, never persons, places, or things. I am deeply grateful for the Christian Science literature, which is so helpful in gaining a fuller understanding of the truth, and which

Digitized by Google

also enables us to be witnesses for Truth in all parts of the world. I am also grateful to our beloved Leader for the many channels provided for the dissemination of this truth.

(Mrs.) FRANCES J. TUCK, Seattle, Wash.

✧

Having put Christian Science to the test for over three years, I would like to add my offering of gratitude. An 1892 edition of "Science and Health with Key to the Scriptures" had been given me with some old books. After reading a chapter and not understanding what was read, I put it away. Two years later, when very despondent over physical and financial troubles, my husband and I decided that we would attend every church in our city in search of one that would comfort us more than the church to which we belonged. The next thought which came was that I should find Science and Health and see if I could read it from an unprejudiced standpoint and with no preconceived opinions of my own. This time the message of Truth was understood, and the book hardly left my hands until it had been read through. The following Wednesday evening was spent at a Christian Science church and the testimonies of healing were eagerly listened to. A practitioner was next sought, and in one treatment a severe cold was completely overcome. Upon reaching home I made the discovery that I could read without glasses, which had been worn for eleven years. My eyesight is now normal and I never suffer with severe headaches as I formerly did. An injured ankle, burns, and bilious attacks have also been overcome by applying this truth.

I am very grateful for freedom from these ills, but far more so for the spiritual blessings which Christian Science has brought to me. It has indeed given me a God whom I can love and understand. I am also thankful for the privilege of having class instruction. My heart goes out in gratitude to our revered Leader for her loving labor on our behalf.

(Mrs.) J. MARGUERITE BROWN, East Ely, Nev.

I gladly verify my wife's testimony. I would like to add that I have received innumerable blessings through Christian Science and am very grateful for class instruction.

EARL R. BROWN.

✧

I want to tell the world how grateful and glad I am that I have found God,—have found that I can know Him, and understand Him, and adore Him, as Mind, Love, and can live in His presence now. I have learned something of what the psalmist meant when he said, "Thou wilt shew me the path of life: in thy presence is fulness of joy; at thy right hand there are pleasures for evermore," and of what Jesus meant when he said, "Blessed are the pure in heart: for they shall see God." I am also learning that man, instead of being a fallen, degraded sinner, is the child of God, pure, perfect, spiritual. Christian Science is teaching me these things; and in the light of this understanding of God and man, physical troubles, great mental depression, sorrow, and sin are all vanishing as the mist before the sun, and I am beginning to realize something of the "glorious liberty of the children of God,"—beginning to find my birthright as a child of God and to have more love for all mankind.

An experience a few months ago proved to me the omnipotence of Mind. I came home from my work one evening and found I was alone, the other people living at the house being out for the evening. I picked up the *Monitor* and read the article on the Home Forum page. After reading it, my thought was very clear and uplifted. I then started down the back stairs on an errand. This stairway was rather winding and hard to descend, and I had no light. When part way down, in some way I lost my footing and started to fall. There was no banister to support me, there being just the wall on either side. Instantly the thought expressed in the article came to me, "Held in Thy law I stand," and the fact of the omnipresence and omnipotence of Mind was very clear to me. In another instant my footing was sure again and I was walking down the stairs, with no injuries except a slight turning of one ankle and a slight bruise on one elbow which had struck the wall. To mortal sense I had completely lost my footing and balance; yet I had not fallen. I felt that the power of God was sustaining me, and know that nothing else could have kept me from falling.

This is only one of the many proofs I have had of the protecting power the understanding of Christian Science gives. I am grateful to Mrs. Eddy for having given this truth to the world, and for her life of devotion. I am also grateful for all other faithful workers in the field, for our literature, and for class instruction. It is my sincere desire to reflect God's healing love to all mankind.

(Miss) MABEL E. DUTTON, Cedar Rapids, Iowa.

✧

I wish to express my gratitude for the innumerable blessings that have come to me from God through the study of Christian Science. As I look back upon the years spent in the belief of poor health and discord, I feel that I have been born again. For many years I suffered from intense headache and bowel trouble. The best physicians were consulted, and so many drugs were given me that I felt the craving for them. Only temporary relief was experienced, and at last, in sheer desperation, I listened to the advice of a friend to try Christian Science. Treatment was begun, and I had immediate relief from the bowel condition. The other healing came more slowly. It is about three years since my healing took place. I am enjoying perfect health and more harmony than ever before. My two children attend the Christian Science Sunday school and are growing in the understanding of Truth, which is a daily guide in all their affairs. My son was entirely healed in three days of a rash, which the physicians tried to diagnose as measles or scarlet fever. Manifestations of influenza and fever have been overcome by absent treatment from a practitioner.

After experiencing all these wonderful healings, there came the unfoldment which caused me to turn to God not only for my health but for the solution of all my problems, and divine Love has met our every need. My husband has shared our every blessing, and is indeed grateful for the Christian Science literature as well as the Lesson-Sermons. My daily prayer is to be worthy to share in the abundance that it is our Father-Mother God's good pleasure to grant us all.—(Mrs.) RUTH DAHLMAN, Philadelphia, Pa.

✧

Nearly four years ago I took up the study of Christian Science, and it was a great help when a loved one passed on. I have been healed of chronic throat trouble through the reading of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy; and severe burns, an injured ankle, ulcerated tooth, stomach trouble, and a very disagreeable disposition have been overcome. I am most grateful, however, for the spiritual uplift. I am indeed thankful to our heavenly Father for the blessings that have come to me, and grateful to our beloved Leader, Mrs. Eddy, for all our literature and the reading rooms. The testimonies in the *Sentinel* have helped to lead me step by step to gain more understanding of the truth of being.

(Miss) ELSA ANNA BESECKE, Kansas City, Mo.

# From the Press

[*Brooklyn* (N. Y.) *Eagle*]

War is deeply, terribly evil, but from it good may come; indeed, good has already come. It has brought this people, but a few years since branded as crass materialists, face to face once more with the eternal verities. In that confrontation there is falling from us that flamboyant display and that ready worship of wealth which had overgrown and concealed our native idealism and led the world to doubt its existence. Once more as a nation we are coming to realize that righteousness is the corner stone; that to attain not merely personal but world righteousness is a cause so holy that it is worthy the supreme sacrifice, the sacrifice of our sons.

[Bishop Charles H. Brent in *Christian World Pulpit*]

The key to life is Love, Love not according to the best definition, but according to the best exhibition. It is easy to quibble about the contents of Love so as to denature it. But one thing is sure—the proportion of austerity and gentleness, of discipline and beneficence, is not likely to be lost to one who takes the gospels as his constant companion. Jesus Christ as there portrayed is the normal, and therefore the pattern, man. The most daring, the most stupendous, the simplest thing a Christian can do is his common duty. It is to take Love for his sole inspiration and master, not in spots or at times, but everywhere, always, Godward, manward.

[*New York* (N. Y.) *Mail*]

The ends of material knowledge, material power and greatness are destruction. They hold the seeds of their own certain downfall. Among nations, as among men, science, knowledge, achievement, if without morality, end in a ruthless competition for the destruction of others and finally of ourselves. May prophets arise to lead the nations to put their trust no more in these great mechanisms, but in the spirit which must guide them, the spirit of love and charity and good will.

[Charles W. Harvey in *New-Church Messenger*]

The world to-day is pioneering. We are trying to break ground in a new country, International Neighborliness. Starting with the little experience we have gained in our own lands we are trying to push out into that immense territory which no one has hitherto attempted to settle under any such name. We are reaching after something never before thought of, the broadening of our selfish, national patriotism to make it include the world.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlet

"Christian Science: A Religion that Heals through Spiritual Law," by Virgil O. Strickler, is now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# Truth Eagerly Awaited

That the mission of THE CHRISTIAN SCIENCE MONITOR is universal, and that the benefits received therefrom are not limited by either the distance the MONITOR travels nor the time which lapses between the date of its issue and the date it reaches the reader, is illustrated in the following letters:

## IN AUSTRALIA

"One of the most important advances made in this field is the establishment of the Australian News Bureau of THE CHRISTIAN SCIENCE MONITOR in Melbourne. This has drawn the attention of many public men and women to our newspaper with the result that THE CHRISTIAN SCIENCE MONITOR is being welcomed in all directions. . . . The Committee on Distribution finds that THE CHRISTIAN SCIENCE MONITOR'S arrival is eagerly awaited, although four or five weeks old when it reaches Australia, and the Committee can distribute as many copies as it can procure."

## IN CUBA

"During the past winter, while working for a sugar company in Cuba, I was stationed in a camp some distance from a post office, and our mail from the States was usually about fourteen days late. We received many different newspapers from the States, which were read by all the men of the camp. THE CHRISTIAN SCIENCE MONITOR was sent to me through the kindness of the distribution committee of Havana.

"At one time none of the newspapers except THE CHRISTIAN SCIENCE MONITOR arrived. I offered it to the men. They asked me if it was a religious paper. My answer was that I found it to contain good news from all over the world—any kind of good news that one would wish to read. One of the men said he would look it over. In a short time I noticed all of them reading the MONITOR.

"Shortly after this incident, occurred the big drive in France, and for some unknown reason all the other papers except the MONITOR arrived. The men in the camp kept asking me if it had come. They told me that they had read the other newspaper accounts of the big drive in France by the German army, but wanted to read the MONITOR to know the truth about the battle, as they had learned that THE CHRISTIAN SCIENCE MONITOR dealt fairly with all subjects and contained nothing but the truth."

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50. Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

*"What I say unto you I say unto all, WATCH."* Jesus

VOLUME XX JULY 27, 1918 NUMBER 48

## Principle

FRANK H. SPRAGUE

POPULAR concepts of Deity keep pace with the moral and spiritual progress of the race. Cruel and barbarous tribes visualize and worship crude material images, while humane and refined natures cherish diviner, more ideal concepts of a Supreme Being. The true leaders of mankind have ever been seers and prophets, individuals whose purity, sincerity, and unselfish motives enabled them to draw near to the living God and gain some adequate appreciation of spiritual reality.

The understanding of Deity unfolded to the inspired leaders of the Hebrew people according to the measure of their spiritual discernment or capacity to apprehend the divine nature, until the revelation of truth culminated in the life of Jesus of Nazareth. Then, after the early Christians had realized for a brief spell the spiritual quickening which followed their Master's demonstration of the truth of being, the tide of spirituality gradually receded until concepts of Deity well-nigh as materialistic as those prevalent in heathen lands darkened the thought of Christendom. Following this period of apostasy a reaction set in, and the religious world was once more baptized with a spirit of faith and moral earnestness. Influenced by modern scientific opinion, estimates of Deity came to embrace law, order, and justice, until at length the anthropomorphic ideal expanded into the vision of God as a loving Father. Even this view, however, fell far short of the standard of Immanuel set by the Wayshower, Christ Jesus. Comforting and uplifting as was the thought of God as merciful and compassionate, the practice growing out of the theology of that period lacked the spiritual unction which made possible the mighty works of the early Christian church.

Spiritual truth is generally revealed in unexpected ways and under circumstances which prevent its discernment by the wise and prudent thought of this world. It was only natural, therefore, that the demonstration exemplified centuries ago by Jesus the Christ should have been reinstated, not through the accredited channels of ecclesiasticism, but through the consecrated endeavor of a devout woman reared amid an environment molded by the spirit of religious and political freedom. Turning unreservedly to God and relying on His power to heal in a time of urgent need, Mrs. Eddy caught a glimpse of man's oneness with his creator. As childlike faith grew to spiritual understanding, the vision of God as Principle and man as the idea or reflection of Principle dawned on her consciousness.

Although pointing to the reign of universal law, material observations give no inkling of such a thing as one Principle governing man and the universe; indeed, so-called physical laws, however valid they may seem to material sense, testify to a "kingdom divided against itself," inasmuch as they contradict and outrage the highest moral sense of law, order, and justice. The realm of real or spiritual being, in which Principle is supreme, is accessible, therefore, only to the unbiased mind which is willing to close the door on material evidence and listen to spiritual promptings. The multitudes marveled at Jesus because he spoke and acted "as one having authority, and not as the scribes." The authority which he exercised alike over the so-called elemental forces of nature and the passions of men, was derived, as his teachings show, not from material knowledge but from the understanding that God is Principle, All-in-all, and that man can of himself do nothing. The authority of Principle alone is able to overrule and silence material self-assertiveness in the form of evil, disease, lust, and every aggressive suggestion which vaunts itself in opposition to spiritual being.

Mrs. Eddy's exposition of scientific Christianity, or Christian Science, departs radically from the canons of traditional theology by defining God in such synonymous terms as "Principle; Mind; Soul; Spirit; Life; Truth; Love; all substance; intelligence" (Science and Health, p. 587),—terms which in general usage had signified little more than mere attributes of Deity. Now, mortal sense may assent more or less readily to the proposition that God is Love, but spiritual sense alone grasps the fact that Love is Principle, "I AM THAT I AM," imperious over all conditions which would violate the perfect harmony and godlikeness of creation. The Master referred to Peter's recognition of the Christ, the spiritual idea or reflection of Principle, as the rock on which his church was established. In strict accord with this designation is our Leader's definition of church as "the structure of Truth and Love; whatever rests upon and proceeds from divine Principle" (Science and Health, p. 583). It is the acknowledgment of God as Principle, and the direct application of this understanding not merely to a certain class of problems, but to all the problems of existence, which differentiates Christian Science from other systems and identifies it with the teaching and demonstrations of Christ Jesus and the apostolic era.

Principle has its suppositional antithesis in a finite, limited ego of which personal sense claims to be the exponent, a self-constituted fiction which Jesus characterized by the terms "devil," "liar," "adversary." This falsifying sense evolves, in belief, a world of mortals supposedly under the government of gods who work through material laws capable of producing both good and evil results. Nothing short of the understanding of God as Principle can expose the delusion of personal sense existence and compel human experience to square with the spiritual fact.

To such an extent is the traditional order of mortal mind changing in the current debacle of material beliefs that a return to the former *status quo* is out of the question. Latent forces of evil are being loosed so rapidly that ordinary human processes are powerless to deal with the situation; consequently, amid the hopeless confusion of warring elements, mortals are driven as a last resort to seek refuge in Principle. Time and again in crises and catastrophies, when men have been brought to a realizing sense of the need of Principle, lack of spiritual understanding and inadequacy of human paraphernalia have prevented the reestablishment

Copyright, 1918, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter

Digitized by Google

of scientific Christianity as a continuing dispensation. And so it is that the issue takes on an entirely new significance in these latter days when Principle stands revealed and avenues for disseminating a knowledge of the truth are opening on every hand. While materially minded observers may undertake to explain on purely political or economic grounds the events which are convulsing the world, the student of metaphysical causation knows that it is just because the demonstration of Principle, operating through scientifically determined channels, is rebuking evil desires in a most telling manner, that the smoldering fires of mortal belief seem to have chosen this particular occasion to break forth in devastating fury.

Although contemporary conditions might be taken to indicate that the vision of Principle was being eclipsed, the fact is that men and women are hastening to respond to the moral obligations of Principle on a scale never before approximated. Thus once more the baptism of John unto repentance is preparing the hearts of men to receive Christ, Truth, through the spiritual understanding of Principle. The conflict of self-destructive forces and brutal passions let loose marks the preliminary stage in the passing of the belief that man is conceived, born, and educated in lust and mortality. This is the belief about man to which our Lord referred when he spoke of "an evil and adulterous generation." Although the Christian Scientist knows that the procession of mortal characters and material events which seems to pass in review before his gaze in the phantasmagoria of the senses is, judged by the standard of Truth, but a fleeting dream, he will not on that account become party to the delusion by dwelling in a fool's paradise; rather will he be roused to greater diligence in seeking to dissolve the dream sense by demonstrating his understanding of Principle.

On page 567 of Science and Health "the beast and the false prophets" depicted in the Apocalypse are identified as "lust and hypocrisy." Because the great demonstrator of Principle struck at the very root of these ensnaring beliefs which sought to maintain themselves under the protection of ecclesiastical authority and social sanction, mortal malice, operating through political and religious organizations, tried to discredit his mission and overthrow his work. The lapse of centuries has neither changed the issue nor altered the methods of suppositional evil. As time goes on, the basic issue between the authority of Principle and the asserted authority of personal sense stands out more clearly amid sense phenomena. Nor will the issue disappear with the sheathing of the material sword; for, until they are conclusively met, the claims of lust and hypocrisy seek to defy the authority of Principle by making use of such organized channels as lend themselves most readily to the methods of animal magnetism.

There are but two sides in this conflict. On one side are marshaled the forces that accept Principle as the basis of scientific deduction and demonstration, even to the extermination of all carnal beliefs; on the other side are the seemingly formidable hosts of Antichrist, subservient to "the mind of the flesh," striving for mastery, seeking supremacy through craftiness, deception, sophistry, sensual appeal, and material inducements.

That the aggravation of evil beliefs is transient, however, we are given assurance in the twentieth chapter of Revelation, where it is recorded that, having been routed in battle and his armies destroyed, the devil who deceived the nations "was cast into the lake of fire and brimstone, where the beast and the false prophet are." Then, as a sequel to this portrayal of the doom of evil, the inspired seer goes on to depict the glories of the "new Jerusalem," symbolizing a state of spiritual harmony where Principle, "Alpha and Omega, the beginning and the end," reigns unchallenged by material beliefs. He concludes his description with these significant words: "And there shall in no wise enter into it any thing that defileth, neither whatsoever worketh abomination, or maketh a lie: but they which are written in the Lamb's book of life."

## Our Lectures

JOHN SIDNEY BRAITHWAITE, M.A.

"NEITHER do men light a candle, and put it under a bushel, but on a candlestick; and it giveth light unto all that are in the house." These words from the Sermon on the Mount seem to offer some helpful reflections on the subject of the lecture work in Christian Science. It should not be forgotten that Mrs. Eddy herself was the first lecturer on Christian Science, years before she arranged for the Board of Lectureship. On page 304 of Miscellany she says: "I have lectured in large and crowded halls in New York City, Chicago, Boston, Portland, and at Waterville College, and have been invited to lecture in London, England, and Edinburgh, Scotland." The object of a Christian Science lecture, whenever or wherever it is given, may be compared to the lighting of a candle. In either case the purpose is twofold: first, the dispelling of darkness (that which fosters false and confused notions); second, the bringing of light (that which reveals the true facts). The resulting sense of illumination must necessarily prove a blessing to "all that are in the house"—in other words, to those who are in readiness to receive it.

There are two main points for consideration in this helpful parallel; namely, the composition of the candle, and what is to be done with it when lighted. The main constituents of a candle are the wax and the wick. If either one of these is missing, there can be no flame. Comparing a Christian Science lecture to a lighted candle, we find that here also two essential elements are present: first, the lecturer and his work; second, the work of the members of the church or society which gives the lecture. The former may be likened to the wick, which to some extent determines the shape and size of the flame; and the latter to the wax, which largely determines its quality and brilliance. According to this illustration, so long as the wick remains a reliable factor, there is always room for improvement in the quality of the flame, if constant attention is given to the quality of the wax which feeds it.

Of course an illustration of this kind must not be pressed too hard, but it may be useful if it keeps us from losing sight, in the lecture work, of the proper relation which the various contributing factors bear to one another. For instance, it is quite generally thought that it is the lecturer who gives the lecture. So, in one sense, he does; but it would be more correct to say that he delivers it. The real giver of the lecture is the church or society which calls the lecturer, engages the hall, issues the invitations, and makes all necessary arrangements. This is a free gift on the part of the church or society to its neighbors and to the community at large, and therefore the preparatory work of each individual member of that church has its contributing value, as wax to the candle, and is a factor by which the success of the lecture will be largely determined.

Now comes the question as to where the candle shall be placed. Is it to be put under a bushel? A bushel, be it remembered, is a measure that is used in the ordinary everyday commercial transactions between man and man. To put a

Digitized by Google

lighted candle under it would be to shut out its light. The policy of relying wholly on human arrangements, rather than on demonstration, to provide a suitable setting for the lecture, may result in much of its illuminating value being lost, if it is not wholly extinguished. The point is, of course, that the candle must be put upon a candlestick. The lecture must be held with due regard to the suitability of the hour, the hall, the notices, and other details, all of which are dealt with in the annual circular of the Board of Lectureship, in which are to be found the fruits of the accumulated experience of years in this work.

It has been said that there are three main contributing factors to eloquence,—the subject, the man, and the occasion. In Christian Science we have a subject large enough to attract the thinker in every quarter of the globe; the Board of Lectureship provides the man; it rests with the individual church to provide the occasion,—that is, the candlestick in which this candle shall be set, "that they which enter in may see the light."

The church, then, in making its preparations for a lecture, is providing the candlestick. The work of the individual members, their clear realization of the purity of their own motives in inviting their neighbors to share with them in the participation of this healing and saving message, we have seen to be likened to the wax. And lastly, the wick burning steadily and clearly, the illumination will be there to dispel many of the false impressions that ignorance and malice have fostered, and to bring health and comfort to many who have been groping in the darkness of uncertainty and doubt. Each contributing factor having thus received its due share of attention, it is certain that the clearness of the statement, the attention with which it is received, and the general note of orderliness that prevails, will not fail to convey to the community a better sense of what it is for which Christian Scientists are standing to-day, and to remove much misunderstanding as to the reason of the hope that is in them.

In view of the work accomplished already by the churches through their lectures, the words of Mrs. Eddy in "Science and Health with Key to the Scriptures" (p. 271) are interesting: "Those, who are willing to leave their nets or to cast them on the right side for Truth, have the opportunity now, as aforetime, to learn and to practise Christian healing. The Scriptures contain it. The spiritual import of the Word imparts this power. But, as Paul says, 'How shall they hear without a preacher? and how shall they preach, except they be sent?' If sent, how shall they preach, convert, and heal multitudes, except the people hear?"

## Silence and Harmony

SIBYL SAMMIS-MAC DERMID

CHRISTIAN SCIENCE reading rooms all over the world are a means of helping and healing not only the beginner in his first efforts to learn about God, but also the older student who for years has depended upon his understanding of Principle to heal, comfort, and sustain him. Many times in the daily activities of life there arises the need to be alone where the harsh noises of the day may be shut out and where the command, "Be still, and know that I am God," may be obeyed. Gratitude for all our dear Leader, Mrs. Eddy, has done for mankind is continual, but at such times one's gratitude to her is unbounded for having so lovingly provided the Christian Science reading rooms. Some months ago in the midst of a long day there came an interval between engagements which allowed the writer to go to the Christian Science reading room, that was not far distant. The sense of weariness was emphasized by a severe cold and a cough which suddenly made their appearance, the latter seeming to be even more in evidence in the quiet of the reading room.

The writer hastened to study the Lesson-Sermon for the day, also to work mentally as we are taught, but there seemed to be a great deal of discord manifested, and there was much anxiety for fear this might disturb the many others in the room. Just then her eyes were arrested by the sign on the table, "Silence is maintained in this Room," and gradually the real import of these words began to take possession of her thought, and it became clear that the material senses must be silenced in order to gain a vision of the real senses of man. It was realized that if a sense of pain seems to be clamoring for recognition, this can be silenced by truth; if mortal opinions, self-condemnation, resentment, and fear try to make confusion, these voices can be silenced, the still, small voice of Love can then be heard, and the omnipotence of Mind revealed. Thought had risen from the contemplation of matter to a realization of spiritual reality, so when at last it was necessary to return to the duties of the day, all weariness had fled, peace and calm had flooded consciousness, and the silencing of the false material senses had been brought about by the spiritual interpretation of silence presented by the sign on the table.

It is always true that in working out any problem the right idea is armed with authority and power, and there is always the right idea waiting and ready to be utilized. The mortal, discordant tone will be silenced in proportion to our honesty, our faithfulness in overcoming criticism, self-pity, self-justification, or any other form of selfishness. The divine harmony of being will be realized as we gain the meaning of Mrs. Eddy's words in "Retrospection and Introspection" (p. 93): "The best spiritual type of Christly method for uplifting human thought and imparting divine Truth, is stationary power, stillness, and strength; and when this spiritual ideal is made our own, it becomes the model for human action."

## Bread Cast upon the Waters

RUTH E. WILLIAMS

ON page 79 of Science and Health we read, "Giving does not impoverish us in the service of our Maker, neither does withholding enrich us." It is not so much the material giving or mortal sacrifice which helps us in our growth in Christian Science, as it is the spiritual insight, the obedience to the law of God, which makes for good. "I will have mercy, and not sacrifice," we read in Matthew's gospel. The putting out of material thoughts and desires will enable spiritual ideas to enter consciousness, and in turn they supply all our needs.

Memory often turns to a helpful lesson learned many years ago. After a Wednesday evening meeting a small congregation of Christian Scientists held a business meeting to ascertain whether or not they were able to call a lecturer. A paper was passed to get an estimate of how much money could be given, and one young Scientist, being very desirous of having a lecture, pledged nearly a third of the monthly income of her home. The paper passed again, but she could make no change in her first offer; moreover, remorse began to gnaw, as she feared what other members of the family might think about the amount she had subscribed.

The necessary funds were raised, and the lecturer was to be called. On the walk home error tantalized the young student by suggestions that she had given too much, more than they were able to pay, more than the husband would

Digitized by Google

approve, and so on. In seeking earnestly to be guided, and for a prayer for light, these words from Ecclesiastes came clearly to thought: "Cast thy bread upon the waters: for thou shalt find it after many days." The arguments of material sense were silenced, the burden was lifted; no doubt remained, and there was no wish to change anything. During the following days, only gladness and rejoicing and a desire to take in and keep all the truth to be spoken, filled her consciousness.

The lecture proved fruitful for good to the young worker and awakened her to much new activity. The shortage from the material supply showed its effects for some time, yet all had received such an uplift that the sacrifice had been well worth the making. A decade or more after this experience the shadow of death seemed to be closing over this same student, and the words spoken at this first lecture came back with such force that instantaneous healing followed. In the language of Scripture, she rose from her bed "and walked."

Pondering over this experience later, she remembered the walk home on the Wednesday night years before, also its promise, "Cast thy bread upon the waters," and she knew her bread had returned, the eating of which had given life and saved the little family their mother. The few dollars given at that other day looked small indeed in comparison with the great blessing returned. A lesson was learned that giving, even though it seemed to be with much sacrifice, when accompanied with the right spirit, is never without its reward.

## "Casting away his garment"

JOSEPHINE O. DUNN

"THE hour has struck when proof and demonstration, instead of opinion and dogma, are summoned to the support of Christianity, 'making wise the simple.'" So we read on page 342 of the textbook of Christian Science, "Science and Health with Key to the Scriptures." Are we, like blind Bartimæus, as recorded in Mark's gospel, sitting by the wayside begging, waiting for the proof of the Christ-message to enlighten our darkened sense? Have we called out in our frantic efforts for deliverance, as did he, and been told by those about us that we should hold our peace; and have we cried the more? Then we, too, shall surely be heard. The very fact that Christian Science literature has been brought to our notice, and has caused us to investigate its teachings, is evidence that we have been calling, "Have mercy on me."

It is recorded that the blind man cast away his garment when he went to Jesus. Now have we cast away our garment, our cloak of self-righteousness, of personal opinion, which we have no doubt been cherishing for years as very necessary to our sense of comfort and protection? Have we put away our material sense of things, and are we ready to receive our healing in Truth's way? To prepare ourselves for this Christ-message we must cast away thoughts of self, and think as God would have us think. Mrs. Eddy says on page 192 of Science and Health, "The good you do and embody gives you the only power obtainable."

We might think that the blind man in his condition would have felt helpless about going to Jesus. He might have said: Why should I try? I could not find him or go to him alone. But was there not help at hand, when he was ready to go? No matter what our condition or circumstance may be, no matter how helpless or unworthy we may seem to be, if we rise up and look about us, divine Love is there, ever ready to help us. We have many blessings, if we but count them. We have the Christian Science literature in abundance and helpful, willing, and ready practitioners and friends. We have the Bible and the textbook, and the churches and reading rooms. Paul writes in his second epistle to Timothy that "all scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness: that the man of God may be perfect, throughly furnished unto all good works." What, then, had been most needed? Faith, love, humility, meekness, a consciousness ever ready to know and receive the good when needed—and when is it not needed? By throwing away the cloak of self we shall be prepared to hear the voice of Truth when it says to us, "Thy faith hath made thee whole." We shall then have the proof and demonstration required for the support of Christianity.

## Results of Sunday School Experience

LEON J. CORBEY

ALTHOUGH I have had a number of proofs of the healing power of Christian Science in regard to physical ailments, I am especially grateful to God for having directed our Leader to establish the Sunday school for us, in connection with our church services, because it was here that the seed of truth was sown in my consciousness. It had been my privilege to attend the Christian Science Sunday school for some twelve or thirteen years; but not until later, when I had the beautiful experience of teaching there with some of those who taught me, did I realize that I, indeed, had had a rare opportunity.

Perhaps some who have not had the advantage of the instruction given in a Christian Science Sunday school, may be tempted to regret that such was not their experience, and to think that had they received this instruction they would now be better Christian Scientists. Such an argument is merely a suggestion of the tempter, because the various activities of the Christian Science movement and its authorized teachers afford ample opportunities for progress; for, as Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 462), "self-denial, sincerity, Christianity, and persistence alone win the prize, as they usually do in every department of life." Mere attendance at Sunday school will no more make one a Christian Scientist than will mere attendance at a Christian Science church. In both cases progress rests entirely with the individual, and activity, study, application, and practice are essential.

I found in my own experience that such is the case, and that in my association with other boys mere attendance at a Christian Science Sunday school did not keep me out of quarrels, nor prevent me from actually participating in fights, throwing stones at my assailants and calling them names; neither did it prevent me from participating in the many mischievous frolics and sins of my "gang." However, when I actually applied and put into practice the truths I had been taught in the Sunday school, peace, harmony, and right prevailed. The psalmist says, "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty," and herein is the secret of progress in spiritual understanding. Just so long as we dwell in the "secret place of the most High," in the realization of the truth about God and man voiced in the Christian Science services and Sunday school, we are safe; but let us for one moment step out from "under the shadow of the Almighty," or descend from the "secret place of the most High" to the thoughts of the carnal or mortal mind, and "the arrow that flieth by day" is liable to reach us and bring us under the influence of mortal laws and beliefs. And so I learned that

Digitized by Google

in the degree I made the Lord my refuge and habitation, and in the degree I held to the truths taught in the Sunday school, did His angels have charge over me, and keep me in all my ways, and bear me up when I would have dashed my foot against a stone.

In my Sunday school work I received no assistance from my parents; but preparation of my lessons and regular attendance were insisted upon, often contrary to my own desires. I am now very thankful for that teaching, because I learned that even though I was not spared many unpleasant boyish experiences, if I took the necessary action and called upon God, He would answer me, and would always make His presence felt in times of trouble, and also would show me His salvation. It was only when I neglected to act, to call upon Him, that my salvation seemed hopeless.

All may avail themselves of instruction similar to that given in the Sunday school, by daily studying our Lesson-Sermons, reading our literature and periodicals, and by activity in church work, combined with regular attendance and mental activity at our services. The Wednesday evening meeting is like the Sunday school for the "grown-ups," for the young students as well as for the more advanced; it is here we can tell each other our experiences and how we solved our problems, and we do not outgrow our usefulness or learning capacity. On page 340 of "Miscellaneous Writings" our Leader says, "Be active, and, however slow, thy success is sure;" and thus we learn that whether we are the older ones in the church or the little ones in the Sunday school, something more than mere attendance is required if we desire to progress.

[Written for the *Sentinel*]

## Facing the Light

A. JACQUELINE SHAW

"Whatsoever things are pure, whatsoever things are lovely . . . think on these things."—Phil. iv:8.

ONE morn, one summer's morn, I saw
A little child who stood and wept
Most bitterly; and asking why,
He said that ever near him kept
A shadow, dark and deep, that went before
His steps, by field or stream or sanded shore.

And when to ease himself he tried
By work or play, the shadow came;
In tasks he saw its gloomy strength,
It overshadowed every game.
Then answered I, But why not turn and find,
Facing the sun, the shadow falls behind?

He turned himself and saw—the sun;
The light, the joy was everywhere!
For who can see what is behind,
Rejoicing that the sun is there?
Now, every time the shadow cometh near
He turns and sees the sun, and frees himself from fear.

So can we all forget the past,—
The faults, the fears, the shadows gray,
And gladly turn to see the light,
Rejoicing in our sunlit way;
For where God is the shadows come not near,
And facing Love we nothing see to fear.

O breaking hearts, that sit and mourn
The battle fields, and count the slain,
Turn from those open graves which keep
Within themselves their meed of pain;
This thought held fast will sorrow's weapons bind,—
Facing the Truth, the shadows fall behind.

# Selected Articles

["Truth"—*The Christian Science Monitor*, Boston, U. S. A., Jan. 19, 1918]

"'What is truth?' asked jesting Pilate, and did not stay for an answer." It was Whately, Archbishop Whately of Dublin, who was guilty of that extraordinarily inept atom of exegesis, and it proved that the writer understood Pilate quite as little as Pilate understood Jesus. Pilate was puzzled, mystified, frightened, even angry, but if there was one thing he was not, it was jesting. Neither was he asking the question to obtain or in hopes of obtaining an answer. He was not in a hurry either. He had been all day maneuvering to put off the inevitable and to find an excuse for not doing something he felt that he was being inexorably forced into doing. Accusers and prisoner alike seemed adamantine in preventing his escape; and so the ejaculation, What is truth? became not so much a question as a partly contemptuous, partly despairing, and altogether incredulous dismissal of the ability of any man to answer the question.

It would, of course, have been impossible for a rank materialist, like Pilate, to have found an answer to the question. Jesus had mystified him by the use of the word truth in a spiritual and metaphysical sense in which the poor self-seeking sensualist did not even know it could be used. And so he picked up Jesus' phrase without a suspicion of the irony of the great Teacher's meaning, and the tragedy of his own situation. But seeing that Archbishop Whately, writing eighteen centuries later, had not discovered the answer to the riddle Pilate could not solve, it is, perhaps, a little unfair to judge too hardly the Roman governor, thinking only of how he might retain the favor of a pagan emperor in Rome.

Later scholars, however, have found the explanation Whately missed, and have found it by a patient study of the Greek text of the fourth gospel, but even they have failed to realize the significance of their own discovery, with the result that it was left to Mrs. Eddy, working on her own dictum, expressed on page 320 of Science and Health, that "the one important interpretation of Scripture is the spiritual," to solve the riddle which proved too much for Pilate and all the commentators. The solution lies in the little word the. What Pilate speaks of as truth, Jesus speaks of as the truth. Now, in the vocabulary of the fourth gospel there is a great gulf fixed between the use and the omission of the definite article. *The* truth means the absolute, spiritual Truth, God. Truth means the human sense of truth. Thus when Jesus replied to Pilate's demand as to whether he was a king, in the words, "Every one that is of the truth heareth my voice," he was simply saying, that every one who was of God understood Principle. Whereas Pilate's wearied ejaculation, "What is truth?" simply meant, Oh, well! what after all does anyone know about anything?

Absolute Truth, then, is that which absolutely is,—is Principle, God. It is the Truth, God, to which Jesus referred, when he said, in the words of the fourth gospel, "Ye shall know the truth, and the truth shall make you free." In other words you shall know God absolutely, and so scientifically, and this absolute or scientific knowledge shall free you from all false impressions about God. Now, that this absolute knowledge is, beyond question, scientific knowledge the whole New Testament makes clear, by the use, amongst other things, in the Greek text, of the term full, exact, or scientific knowledge of God. It was through this knowledge that the miracles were wrought, for the miracles were only the demonstration of the Science of this knowledge. And it is through this knowledge that the miracles can be repeated, at any time, and by any person who possesses it.

Digitized by Google

What, then, emerges from all this is the overpowering necessity for human truthfulness. The human mind is a counterfeit of the divine Mind, and as such an unreality. It is incapable of reformation, and exists, even supposititiously, only as the mist which, in the simile of Genesis, obscures the absolute truth about Truth, God. As this mist is dissipated the human ignorance of Truth gives place to a spiritual consciousness of Truth, God. The human mind gives place to the divine Mind, the carnal mind to the Mind of Christ, and a man is found governed by good, Truth, where he has previously been governed by evil or ignorance. In other words, the nothingness of the human, mortal mind has been partially demonstrated, and the infinity of the divine Mind partially manifested. "Usage," Mrs. Eddy writes on page 114 of Science and Health, "classes both evil and good together as *mind;* therefore, to be understood, the author calls sick and sinful humanity *mortal mind,*—meaning by this term the flesh opposed to Spirit, the human mind and evil in contradistinction to the divine Mind, or Truth and good."

In order, then, that sick and sinful humanity or mortal mind may disappear, and the infinity of the divine Mind or Truth be manifested, the world must begin to know the truth about God in order that Truth, God, may heal it. What obliterates the mortal, human mind is the fact of infinite Truth, which leaves no room anywhere for this human, mortal mind except as a supposititious presentation or counterfeit of Truth. That is to say, as the carnal mind gives place to the Mind of Christ, this carnal mind ceases to impose itself even supposititiously as Truth. Where the carnal or fleshly mind once seemed to oppose itself to Spirit, the absolute Truth or Spirit alone appears.

This was the process of healing through which Jesus passed, and through which, because Jesus was the way, every human being must pass. Every day as Jesus learned more of the Christ, Truth, the mind of Jesus gave place to the Mind of Christ, the flesh disappeared, and the Spirit became manifest. But the mortal minds of sinful humanity round about Christ Jesus were quite unable to keep pace with this change. First they saw with astonishment and then with anger the demonstrations of the truth of Truth which healed the sick and raised the dead, turned the water into wine and fed the multitude. But when later the human Jesus had so given place to the spiritual Christ as to defy death on the cross, and rise from the grave totally unaffected, human mind, as expressed in the Roman soldiers and the Pharisees, was unable to perceive him, and he was only visible to the partially dissipated human mentality of the disciples themselves, and to them only on such occasions as the breaking of bread at Emmaus. But when the human Jesus had totally given place to the Christ, Truth, the material human minds and eyes of the disciples could no longer cognize him, even though his true self or the Christ remained with them as it always had, and as it was bound to do, since Spirit is indestructible, "unto the end of the world." The obliteration of the material counterfeit leaves the spiritual conscious of Spirit, as they have ever been.

[Albert F. Gilmore in *Railroad Men*, New York, N. Y.]

The reference to the Christian Science textbook and to its author, Mrs. Eddy, in connection with the Russellites and the International Bible Students Association in your May issue seems quite unwarranted and equally unjustifiable. To a very large and rapidly growing number of earnest people the Christian Science textbook is a veritable key to the Bible by means of which spiritual understanding of the Scriptures has been gained,—an understanding which enhances faith in God to complete reliance upon Him as ever present good, a power immanent and available to heal and save under whatsoever conditions of peril or disaster, and to destroy both sin and disease. To these faithful students of the Bible there has been revealed through this textbook the knowledge of the healing truth which Jesus declared, as the assured result of continuance in his word, "shall make you free."

That Christian Science teaching is true is proved to the utmost satisfaction of its followers by its practical application to all the problems of the daily round, healing disease of every type, bringing an uplifting faith, courage to face the road, cheerfulness, and an abiding interest in the welfare of their fellow men. Christian Scientists ask only to be judged by their works, which seems to be the only true basis for righteous judgment; and so judged, it is believed they will not suffer in comparison with any other fellow religionists.

✧ ✧ ✧

## "The Lord looseth the prisoners"

A Christian Science lecture was given in a large prison before an audience of approximately eight hundred men, who were spoken of as "exceedingly attentive and appreciative." The introduction to this lecture, and some excerpts from letters sent to the lecturer, are presented as being of general interest. The chairman of the Christian Science committee in charge of the services and the distribution of Christian Science literature at the prison, who has, in connection with this work, been making personal visits to the men for the past two years for the purpose of imparting some of the truths of Christian Science and ministering to the wants and welfare of all interested in Christian Science, in introducing the lecturer, spoke as follows:—

"Friends: When Christian Science was first called to my attention about fifteen years ago, I read the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, in a very critical way, and then proceeded to mark a good many articles that did not appeal to me. After rereading a number of these articles carefully, I concluded that I had no foundation whatever for criticism against Christian Science.

"About one year later I suffered from intense pains in my side. I decided to call on a friend of the family, who was a resident physician of one of the largest hospitals in San Francisco, to be examined for the purpose of ascertaining the name given by *materia medica* to the disease from which I was suffering. After a very thorough examination my friend, the doctor, told me I had a very severe case of rupture. He stated that I should undergo an operation immediately; and, knowing my habits, said this condition had been brought about by horseback riding. I told him that I would not be able to undergo this operation just then, as I had been reading and studying Christian Science for some time and desired to either prove or disprove the efficacy of Christian Science for myself. He then pleaded with me, both as a friend and a physician, and stated positively that I could not be healed of my affliction by Christian Science. I said that I firmly considered this my opportunity to make a test of Christian Science; that I had heard of the many healings which had been effected by Christian Science, and now I wanted to be convinced myself; that after giving Christian Science an honest, fair trial, if I were not healed I would then submit to an operation and not waste any further time on the study.

Digitized by Google

"It is needless to say, however, that I was completely and permanently healed and restored to my natural health through Christian Science, and that I suffered no ill effects or inconvenience whatever, and furthermore, I continued to ride horseback as usual throughout the entire experience. My healing was not fast, for which I am grateful, because the time was spent in studying Christian Science to obtain my healing and it developed a good understanding of the truth. It is your privilege this afternoon to gain the same understanding of Christian Science by hearing a lecture from one who is well qualified to speak on this subject."

There were distributed at this lecture some four hundred *Sentinels,* about five hundred pamphlets containing lectures and the like, fifty *Journals,* and about three hundred *Monitors,* all of which were very much appreciated, especially the *Monitors,* which are very much in favor.

Some quotations from letters follow:—

"I wish to thank you for the message of hope and cheer that came from your lecture, and in so doing I only voice the opinion of every man who heard you speak. I am very interested in Christian Science and realize more and more each day that there is nothing that replaces with hope and a true faith the self-pity and condemnation in a sore heart as do the teachings of Mary Baker Eddy. No doctrine has ever accomplished what Christian Science has in the prisons of this country, and my earnest wish is that this institution may again have the honor of hearing a Christian Science lecture."

"Knowledge of Christian Science is rapidly becoming universal. In every civilized clime it is to-day growing by leaps and bounds. And while what is often designated as 'organized society' is coming very rapidly to a full understanding of divine Principle, we, who by the great masses are considered outcasts of society, are not a step behind our brethren who maintain their physical freedom. Though high and massive walls surround our present place of abode, there are not a few of us here who are learning that even here we may possess freedom as full as is our knowledge and practice of divine Science."

"Up to the time of coming in here about six months ago, I knew absolutely nothing of the teachings of Christian Science. I immediately became interested in the study through the help of the chairman of your committee. I need not tell you that this wonderful experience so changed my views of life that I now consider my stay here an opportunity instead of being a great loss, as I first thought, for no doubt I would never have found myself without having come to a place such as this. There will come a time some day when I will be through with prison life, but I will always be interested in and anxious to know more about Christian Science, for through that understanding I know that within myself I'm free."

"I was one of the many men present in our assembly hall to hear your lecture and address on Christian Science. This was my first time to hear the teachings of Christian Science fully and clearly explained. Since that Saturday afternoon I have found myself on many occasions thinking of the subject of your lecture, and something prompted the writing of this letter. I fully realize that everything must have a cause—a sufficient cause, a cause big enough to produce the whole effect,—and for this something that has prompted the writing of this letter there must be a cause; after listening as intently as possible with a desire of absorbing every word of your lecture, and then thinking over that portion—the real essence of the lecture—which was retained, I am brought face to face with the cause, and upon close examination I find that cause lies within myself. Your lecture, therefore, brought to me this 'awakening,' and has caused me to do some real thinking along the trend of your lecture.

"When I came to this place I was down in sin of mortal mind, wrong in my living and thinking. Some one asked me if I had ever studied Christian Science. I replied I had not. I went to service the next Sunday, and on the following Saturday had a long talk with one of your workers. I began studying, and have kept it up for sixteen months, and now I would not give up Christian Science for anything. I had better not say any more about myself but of the message which you left us here. You made things so plain to those who wished to understand the truth, and right living and thinking. Your tender message touched many a man's heart, and set him on the right way of thinking; the result, therefore, will bring him much good and harmony."

"I went to the lecture expecting to hear a great deal which I could not understand, but wishing to get what I could from it. Needless to say, I was very much pleased to find that either your way of stating the truths or else the fact that you adapted the lecture to men of my understanding, enabled me to get a firm grasp and thorough understanding of many points with which I had been struggling in my efforts to discern wherein I was in error. It was the first lecture I have ever attended on Christian Science, but I sincerely hope that it will not be the last."

"It gives me the greatest satisfaction to tell how much I have appreciated the wonderful lecture which helped to open the way that leads to true happiness. When Christian Science comes to a man bound hand and foot with evil, as he tries to improve himself he gains in so many different ways. It is such a glorious sensation. I do not need to dwell on the joy that came to me; there entered such a peace, such a calmness. It is impossible to explain or express my gratitude for all that Christian Science has done."

"While I found myself interested right from the start, nevertheless I paid special attention to that part of your lecture wherein you made it applicable to everybody, in every clime and in every walk of life, even to the man confined behind prison walls. This was one of the many points that came home to me, because I am interested in anything that can help me to 'brace up' and be the man that my mother intended I should be. It may occasion you some surprise to learn that you seemed directing every word of your lecture wholly to me. Every word uttered seemed to have been chiseled to fit somewhere in my 'make-up,' and as I said before, you caused me to examine myself carefully and thoroughly—and in some, yes many, places, I found myself smarting; but I let it smart awhile and did not try to escape it, because on several other occasions when I tried to make this same examination, I found later on that I had only used a whitewash to cover up my weak spots. What I really needed was an 'awakening' so that I might discover these spots and either correct them or root them out, and your lecture has given me the insight and the inspiration as to how I can and must go about my task. I sincerely trust that the good people supporting this prison work may in reading this letter feel that their efforts toward the uplifting of mankind have not been in vain."

## Teachers of an Earthly Wisdom

WHEN a church becomes decadent it is because spiritual power is no longer manifested whereby men are convinced of sin, impelled to repentance, and made steadfast in righteousness. The church then, feeling it is not steadfast, reaches out into statecraft for power to steady itself and to maintain control over men. It is to be noted, however, that love never needs to ask for control. Paul did not have to ask the aid of a Roman soldier to compel obedience from Timothy who loved him, from Eutychus whom he raised from the dead, nor, we might say, from the father of Publius whom he healed in Melita when the ship's company was cast ashore there.

Peter has been supposed to be the first bishop of Rome, and much political claim has been built on that supposition, but Peter did not invent the Holy Office to torture Dorcas so that she might give him due honor after he had raised her from the dead. He and John did not use methods of subtle inquisition to find out the inner thoughts of the lame man healed at the temple gate called Beautiful. This man followed them into the temple, "walking, and leaping, and praising God." They did not, evidently, demand that he think of God according to the formula of some cold-hearted theologian who knew nothing about healing the sick and yet declared that those who thought otherwise of God than as his formula set forth would "no doubt perish everlastingly."

Peter's epistle invites the reader morally to stand on the rock, and makes no threat political that the police power of the state will be used for a man's injury if he dares to think for himself. The spirit of Christianity, illustrated indeed by Peter's integrity, Paul's wisdom, and John's metaphysical vision of divine Love and its sure overcoming of evil, has already leavened the world so much that men in growing numbers see the evil effect of the union of church and state. In fact, the world has tried out the theory that the state should have the place of second to the church and be called upon to support with its force the subtleties and schemes of priestcraft, and it has practically repudiated the theory.

Another theory will also be repudiated in due time, namely, that it is the duty of the theologian to make the state his divinity and to frame his theology in order to justify the subtleties and schemes of rulers. The Bible is surely the true basis for practical theology. Mrs. Eddy says (Science and Health, p. 547): "The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained." Continuing, she says: "It is this spiritual perception of Scripture, which lifts humanity out of disease and death and inspires faith." Elucidating this spiritual perception, she adds: "Christian Science separates error from truth, and breathes through the sacred pages the spiritual sense of life, substance, and intelligence. In this Science, we discover man in the image and likeness of God."

Now the Bible gives us strong prohibition in regard to certain fleshly conditions, as for example, "fornication, uncleanness, inordinate affection, evil concupiscence, and covetousness, which is idolatry." This follows the original clear direction for moral conduct comprised in the law, "Thou shalt not covet." Let the individual obey moral law, and in time the state will be righteous. It will, in fact, be a theocracy governed by divine Principle. It will therefore evidence honesty, integrity, honor, and truth, and become a potency in the redemption of the world, helping to bring the glory and honor of its kings into the realm of the kingdom of heaven. Reports, however, come regarding some theologians of the recent empire fashioned about the time when Mrs. Eddy was preparing to publish what we now know as the Christian Science textbook, "Science and Health with Key to the Scriptures," that such theologians take the stand that honor and morality are not essential in the state, evidencing that they are unaware of the change in the world already wrought through this Christian Science textbook. The argument of the theologian as stated is that war is a necessity because another country has so much that it is absolutely necessary for his country to possess.

The sanction for this covetousness is supplied by the threat of horror and death to those who oppose. In fact, opposition to invasion, or resistance of those who invade and reach out to take, is looked upon as reprehensible wickedness. Now the theologian who, because he cannot set forth as Christ did healing and life, thinks to be influential with the threat of torture and death, quite mistakes mankind. Men will not be frightened as the one ambitious to be world ruler dreams and desires. There is a greatness in man which stands for justice. It is strong, and bravery is its expression. Courage in the heart of the weak ones, the women and children, appears also, and we must not forget the record of history, how "God hath chosen the weak things of the world to confound the things which are mighty . . . yea, and things which are not, to bring to nought things that are: that no flesh should glory in his presence."

The teachers of this world's wisdom do not seem to recognize that through their lips it is the spirit of Cain talking. Cain indeed was abhorrent of his act and fled, but to-day we find those who claim to be wise planning long beforehand for the destruction of other peoples, with the excuse that covetousness has its necessities. These teachers are actuated by the same motives apparently which brought Jezebel to glooming Ahab, seeking to win his favor by showing how he might possess the vineyard which belonged to another. Now this princess was a heathen, and from her point of view and standpoint she thought of her advice as thoroughly practical. Is the theologian now to take the place of that ancient idolater and become a representative of the false gods of old and counsel divergence from the commands and the guidance of the one God?

How are people to be helped when by leaders misled and by theologians mistaught, when mesmerized by their own undestroyed lusts and beclouded and confused by pride and evil prophecy? What they need is the rediscovery of the ideals of Christianity. It can be quite clearly seen that the practice of Christian Science would liberate any people. Both men and nations need to understand the valuing of the Bible which we find in "Science and Health with Key to the Scriptures" (p. 406): "The Bible contains the recipe for all healing. 'The leaves of the tree were for the healing of the nations.' Sin and sickness are both healed by the same Principle. The tree is typical of man's divine Principle, which is equal to every emergency, offering full salvation

Digitized by Google

from sin, sickness, and death. Sin will submit to Christian Science when, in place of modes and forms, the power of God is understood and demonstrated in the healing of mortals, both mind and body."

WILLIAM P. MCKENZIE.

## Unbelief Cast Out

UNBELIEF is merely another name for the preponderance of materiality in human consciousness, and truly did the poet characterize it in saying:—

> Blind unbelief is sure to err,
> And scan His work in vain.

Early in his experience the student of Christian Science learns that he is not expected to accept blindly any statement, whether religious or secular, but must apply to it the inexorable test of Principle. He thus sees that nothing material can ever furnish positive evidence of reality, indeed that such evidence is of value only when scientifically corrected. In the Scriptures we find the most unequivocal condemnation of the mental quality spoken of as unbelief, and yet to-day many persons rather pride themselves upon their unwillingness to believe in or accept spiritual things, on the ground that they are intangible and according to mortal belief not subject to proof. This last supposition has been proved baseless in Christian Science, which furnishes proof of the reality of spiritual law and spiritual being and thus destroys the material evidence of sickness and suffering, replacing these unnatural conditions with the harmony which is inseparable from spiritual being.

In the New Testament we read that in Jesus' wonderful ministry of healing he was confronted with unbelief to such an extent that in one place, as we are told, "he could there do no mighty work, save that he laid his hands upon a few sick folk, and healed them." We also read: "He marvelled because of their unbelief. And he went round about the villages, teaching." This statement will be readily understood by the Christian Scientist, who will see that Jesus' work along the line of healing was temporarily given up until through spiritual teaching the darkened understanding had gained enlightenment from the truth he taught. The strange thing is that the centuries should have lost sight of this important lesson and that those who called themselves the Master's followers should have felt no regret for their own unbelief, indeed should have sought to justify it on the basis of material evidence, which their Master denied in order to heal the sick.

Following the wonderful story of the transfiguration we read that when Peter, James, and John descended from the mountain with their glorified Master they came upon a case which the other disciples had been unable to heal,—the epileptic boy whose distressed father sought the Master's aid. This was readily given, and Matthew says, "Jesus rebuked the devil; and he departed out of him: and the child was cured from that very hour." When Jesus was alone with his disciples after this incident they very naturally asked him why they had failed to heal the boy, and the great Teacher's reply cannot be too often pondered by students of Christian Science to-day. It was this: "Because of your unbelief: for verily I say unto you, If ye have faith as a grain of mustard seed, ye shall say unto this mountain, Remove hence to yonder place; and it shall remove; and nothing shall be impossible unto you."

The question is sometimes asked whether the unbelief which Jesus condemned in this case was that of his disciples or of the afflicted father and the multitude which stood by and mocked. In taking the different accounts of this incident found in the first three gospels it is very clear that his criticism included all who doubted the power of Truth to heal the sick and suffering. On page 449 of "Science and Health with Key to the Scriptures" by Mrs. Eddy we have this assurance: "A grain of Christian Science does wonders for mortals, so omnipotent is Truth." It cannot be denied that many cases of delayed healing in Christian Science are due directly and indirectly to this error of unbelief, but this must never be held over the sufferer in the way of condemnation, for if the obstacle happens to be a solidified form of unbelief in the thought of the patient, or possibly in that of some close relative or friend, this must be cast out by the truth, and the results will be in accordance with the words of Christ Jesus. Not only is it true that with God all things are possible but it is also true that they may be applied to every faithful follower of the Master, if we are to accept his words, "Nothing shall be impossible unto you."

In the third chapter of the epistle to the Hebrews we read: "Take heed, brethren, lest there be in any of you an evil heart of unbelief, in departing from the living God." The apostle goes on to explain that if any of us fail to enter into the rest provided for the people of God, it is because of unbelief. There can be no question on the part of any Christian Scientist as to the effectiveness of the divine Word, and it therefore remains with those who look to it for aid that they cast out of their consciousness everything which would tend to hinder its operation. It may be well for us while advancing along spiritual lines to turn all our doubt upon the arguments and aggressions of evil. We certainly have authority and good reason to doubt everything which is unlike God, and the doubt should be followed up by a swift and vigorous denial of evil's reality. This scientific process of reasoning will establish us more firmly in the truth, which is not dependent upon us for its support, although we are entirely dependent for all things upon the truth taught and demonstrated by Christ Jesus and revealed anew to-day in Christian Science. The chilling, deadening tendencies of unbelief are likely to hold sway on the plane of mortal thought so long as we look to materiality for evidence of our progress; but when we gladly and obediently refuse to look at the "things which are seen" by mortal sense, we shall begin to see the glorious things so freely provided for us by divine Love.

ANNIE M. KNOTT.

## Fads Analyzed

WITH delightful humor Mrs. Eddy exposes a common human frailty when she writes on page 197 of "Science and Health with Key to the Scriptures": "A new name for an ailment affects people like a Parisian name for a novel garment. Every one hastens to get it." If humanity understood the solid facts of Science it would not run after the fads and fancies of blind belief. Fads are contagious because they act as suggestions put forth by mesmerism; spiritual facts, because they come through obedience to God, illumine consciousness, thus saving and healing the sick and sinning. Without the spiritual light which destroys darkness or mesmerism, human beings continue to pursue passing fashions of belief concerning God, man, and the universe, popular innovations, caprices and hobbies about science, or to adopt sententious philosophies on the supposition that they are truth. Medical fads are particularly noticeable, and while they lend themselves easily to humorous treatment, their main contention is based on false belief about cause, hence about God.

Digitized by Google

The votaries of *materia medica* itself must be amused at the revolving changes which time has brought in their theory and practice. It is sometimes assumed that going around in a circle like a white mouse in a cage means progress. Unless the advance is made from a right basis and the light is clear the traveler will err on the way. How can the basic hypothesis that senseless, unthinking matter is cause lead anywhere but into the ditch? But Christian Science does not leave the unfortunate there. It gives them the scientific understanding of divine Truth wherewith to extricate themselves.

Mrs. Eddy tells us on page 24 of "Retrospection and Introspection" that in 1866 she "gained the scientific certainty that all causation was Mind, and every effect a mental phenomenon." From this it results that the healing art must be mental or spiritual, that scientific prayer must be the cure for all human ills. "When thou prayest," Christ Jesus said, near the close of the Sermon on the Mount, "enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly." The prevalent method of attempting to heal the sick is to set up some fad in place of the Father, and to trust in it rather than in Him. With the passing centuries almost every material substance in the earth or under the earth has at some time or other been tried as a remedy for physical ills. It would be unkind to list these remedies, but those who still believe in matter as power should awaken to the fact that in the modern fads and fancies there is absolutely no advance over those ancient horrors. The aberration of thought regarding to-day's poison serums and vivisection are in no wise less aberrant than the listed remedies of the past. In proportion as contagious mesmerism is allowed to rule mankind, so will fads and fancies seem to crowd out the saving and healing truth.

The effort of Christ Jesus to have his students understand the true nature of man uncovered prevalent fads and fancies. His inquiries about himself brought strange answers, except for the illuminating declaration made by Peter. They told him, "Some say that thou art John the Baptist: some, Elias; and others, Jeremias, or one of the prophets." It seemed difficult for his contemporaries to concede to Christ Jesus his unbroken identity and individuality. They must needs believe him to be some one else. They were unwilling to admit his greatness, because his spirituality startled them out of the mesmeric slumber of their ecclesiastical and secular beliefs. Commenting upon this attempt of public opinion to identify Christ Jesus with various prophets of the past Mrs. Eddy writes on page 136 of Science and Health: "These prophets were considered dead, and this reply may indicate that some of the people believed that Jesus was a medium, controlled by the spirit of John or of Elias. This ghostly fancy was repeated by Herod himself."

When, therefore, the veil called death has grown transparent to the spiritually minded who realize that true life is eternal, they risk being misunderstood by popular opinion. Spirit, which is substance, still seems "ghostly" to superstition. But keeping pace with the self-destruction of matter and its manipulations there is a wholesome uncovering of the popular fads and fancies of belief. The everlasting facts are emerging out of chaos. Spirit moves upon the face of the waters. God says, "Let there be light," and there is light, dispelling false beliefs about real causation, explaining the healing of sin and sickness, and revealing the one life that is and is to be, unbroken, continuous, eternal.

WILLIAM D. MCCRACKAN.

# Among the Churches

## Current Notes

GALESBURG, ILL.—First Church of Christ, Scientist, has taken a forward step in establishing beautifully furnished reading rooms down town in the busiest part of the city. A member of the reading room committee appointed to select and furnish them, offered to lend the money to the church without interest, payments to begin in 1919. The furnishings cost $958. When all was completed, a business meeting of the church was called, at which this munificent gift was presented to the church by this member in the name of his wife. He proposed that the church send, for the relief of the boys in the trenches, a sum of money equal to what it would have had to pay him. The church acted upon this recommendation and voted to send one thousand dollars for the War Relief work, five hundred of which was taken from the building fund and forwarded the next day; the other five hundred is to be paid in monthly installments.

ST. LOUIS, MO.—Sixth Church of Christ, Scientist, has purchased several lots on the south side of Palm Street, about 250 feet east of Grand Avenue. The lots have a frontage of 160 feet on Palm Street and are 154 feet deep. The purchase price was twelve thousand dollars. A church building will be erected on these lots and over one hundred thousand dollars will be spent for this purpose. The church, which was organized in North St. Louis about a year ago, holds services in the Mount Moriah Temple, one block north of the property purchased for the new church.

*St. Louis Globe.*

MILWAUKEE, WIS.—The joint reading room of First and Second Churches of Christ, Scientist, was changed April 26 to new quarters in the Security Building, which is centrally located in a good business section of the city. The space occupied, sixteen hundred square feet, is double that of the former room, which had been outgrown. As the room is on the eighth floor, street traffic disturbance is avoided. Abundant light, the general arrangement, and the harmony of the appointments render it unusually attractive as well as practical.

OKLAHOMA CITY, OKLA.—First Church of Christ, Scientist, has subscribed twenty-three thousand dollars to the Third Liberty Loan, this representing the entire amount of cash in its building fund. This subscription was one of the four on the closing day of the Liberty Loan campaign that put Oklahoma City "over the top" and ahead of the quota.

*The Oklahoman.*

SAN QUENTIN, CAL.—For the second time in the history of San Quentin Prison, a Christian Science lecture was given on April 13, 1918, the speaker being John W. Doorly. The lecturer was greeted by an exceedingly attentive and appreciative audience of approximately eight hundred men.

# The Lectures

SAGINAW, MICH. (First Church).—Paul Stark Seeley, lecturer; introduced by John S. Porter, who said in part:—

A little more than fifty years ago Mary Baker Eddy believed that the power Christ Jesus used in healing the sick was in accordance with laws as definite and unchangeable as the laws of electricity or mathematics, and with unselfish devotion she consecrated her life to investigating and learning the truth, until she proved that her belief was true, and many cases of healing followed her understanding of this power. In a book called "Science and Health with Key to the Scriptures" she gave to the world the result of her study, which she named Christian Science. Since that time many thousands have felt the healing potency of this Science.

MINNEAPOLIS, MINN. (Sixth Church).—John Randall Dunn, lecturer; introduced by Frank L. Thresher, who said in part:—

The one central purpose of the Bible, as I understand it, is to assist mortals to work out their salvation—their salvation from sin, sickness, and death. The Old and New Testaments both are replete with declarations and promises. The mission of Christ Jesus, our Lord and Master, was to assist mankind to work out their salvation. He wrought many works of healing, thus demonstrating the power and willingness of Spirit to heal disease as well as to forgive sin. Likewise, our revered Leader, Mrs. Eddy, presented Christian Science so that we, in this age, might be assisted to work out our salvation from sin, disease, and death. Christian Science does heal both sin and sickness.

SALEM, ORE. (First Church).—George Shaw Cook, lecturer; introduced by W. H. Mulvey, who said in part:—

Christian Science is the name given by Mrs. Eddy to her discovery of the same Principle that was taught and demonstrated by Jesus. The miracles that he did were but the natural result of his correct knowledge of God and of man's true relation to God. Students of Christian Science, therefore, are students of the healing truth that Jesus taught nineteen hundred years ago. He said to his followers, "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free."

PASADENA, CAL. (First Church).—John Randall Dunn, lecturer; introduced by Miss Ethel Putnam, who said in part:—

It is safe to assume that practically every one of you is here either because he knows that Christian Science is true or because he hopes it is, and the same statement might be made of almost any audience assembled to hear a lecture on this subject. Those who have proved through the healing of sickness, sorrow, and sin that Christian Science is true, want to know more of its theory and practice, and the others want to be given a reason for their hope that its rich promises will be fulfilled.

LIVERPOOL, ENGLAND (First Church).—John Sidney Braithwaite, lecturer; introduced by the Hon. Mrs. Frances Porter, who said in part:—

Up in the north of Ireland, in Belfast, is a road called the Shankill Road on which is a well-known grocer's shop. One day there appeared at the door of this shop a notice "No butter;" the next week appeared, "No butter, no margarine." A bad boy came along and added his bit underneath, so that it read, "No butter, no margarine, no pope, no Home Rule, no surrender, no nothing." I laughed when I heard this story; and yet, is not that just what all the world is feeling to-day? The old sense of supply, the old sense of religion, of politics, of human will—all are gone and in their place just "no nothing;" and because everything else has failed the world is somewhat ready to listen to the wonderful teaching of Christian Science, that Christ's promises are true, that God's power to heal and save to the uttermost is just as great to-day as it was in the time when our Master taught about it on the shores of Galilee.

STOCKTON, CAL. (First Church).—Virgil O. Strickler, lecturer; introduced by Mrs. Nancy Jane Felt, who said in part:—

We read in the eleventh chapter of Matthew these words of Jesus: "Come unto me, all ye that labour and are heavy laden, and I will give you rest." Perhaps there has never been so great a need of accepting that invitation as there is at the present time. Weary and heavy laden with the weight of woe that the world seems to be carrying, humanity is turning away from the material sense of things and looking for the joys of Spirit. Students of Christian Science are finding that rest of which the Master spoke.

CHICAGO, ILL. (Society, University of Chicago).—Dr. Walton Hubbard, lecturer; introduced by Derwent S. Whittlesey, who said in part:—

I have always found that truth in any of its aspects is courteously and hospitably received and sheltered here, even though it be presented in a guise not familiar. Thus the University has extended every facility to those who would work out new formulæ in the sciences, to those who are endeavoring to interpret the past anew, and to those who bring messages from distant and strange lands. Thus, also, the University has permitted those of its members who believe that Christian Science expresses truth to organize for mutual help and for bringing to those who are interested some knowledge of its teachings.

TUPELO, MISS. (Society).—George Shaw Cook, lecturer; introduced by Green M. Crook, who said in part:—

Christian Science maintains that there is no reason why the works done by Christ Jesus and his disciples should not be repeated to-day, and it certainly has his word for this in the Bible, for he said, "The kingdom of God is within you." Christian Science accepts this statement of Jesus, and this lecture is given to point mankind heavenward, not through death but through life; not through matter, but through spiritual understanding of and obedience to Jesus' commands: "Go ye into all the world, and preach the gospel to every creature," and "Heal the sick."

# Testimonies of Healing

I feel most grateful to Mrs. Eddy and Christian Science for rescuing me from what seemed a living death. Ever since childhood, or for practically twenty-two years, I was a mental and physical wreck, suffering from one of the worst forms of so-called incurable disease. Christian Science was brought to my notice in 1917 by a friend who lent me "Miscellaneous Writings" by Mrs. Eddy. My first thought whilst reading this beautiful book was, "This is the very thing which I have been looking for all my life." I was so overjoyed to know there was hope for me after all, that I immediately purchased a copy of "Science and Health with Key to the Scriptures" and began to attend the Christian Science church here. I also called upon a practitioner, who gave me treatment and explained to me clearly and faithfully the Principle of Mind-healing. In three treatments I was healed, but at first I could hardly realize my physical healing as it came so naturally. I did, however, realize the spiritual uplift which Christian Science brought to me, and the bright hopes it gave me for that glorious future which is at hand.

My daily desire is to be more grateful to divine Love for all the blessings that I am and always shall be receiving through gaining some understanding of Christian Science. I can only say in the words of Martin Luther: "Here I stand; I can do no otherwise. God help me. Amen!"

WILLIAM ERNEST LOWENSTEIN, Sydney, Australia.

✧

I have often had a desire to share with others who are struggling as I was for relief from suffering, what Christian Science has done for me. From childhood I was always sick, being seldom free from pain due to a rupture. As I grew older the suffering became more and more unbearable. Several physicians said that an operation would cure me, but I was so afraid that I would not submit to it. I asked God to enable me to know Him, to know where He was and if there was any relief from suffering. Very shortly after this desire was expressed, many changes came. I was separated from all my family and moved to another city.

Some months later I was invited to attend the Wednesday evening meetings at a Christian Science church, which I did. A friend saw me reading the *Sentinel* and gave me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. Very soon after this book was given to me, I was attacked with acute lung trouble. At first I did not think of Christian Science or the book. I was quite ill all day and night, my husband having to move me, as I was unable to help myself; by morning I was much worse and thought I must send for the doctor. Immediately, however, the thought came, Why have a doctor when you have help at hand? I did not question; I can only remember that I found myself sometime later healed, sitting up in a chair reading Science and Health. I finished a dress that same day and walked several blocks to take it home. I could not understand this healing, but knew that it really took place; and I have never suffered from that difficulty again.

A year passed, and all this time I was suffering from the first mentioned trouble. Then a friend asked me to have a practitioner treat me, which I did. After three months' treatment I removed a support which I had worn for many years and without which I could not long stand on my feet, and I have never felt the need of it since. I have also been healed of stomach disorder, catarrh in a severe form, and many other ailments. Especially am I grateful for the overcoming of a miserable temper, of suspicion, prejudice, and many false beliefs by finding, to some extent, what God is and where He is.

I am grateful to Mrs. Eddy for her tireless efforts to give this means of relief to all mankind, for our periodicals, for the Lesson-Sermons; indeed, for all the helps to understanding that she has provided, I am truly grateful.

(Mrs.) ESTELLE L. HUDSON, Berkeley, Cal.

✧

That God is a very present help in time of trouble, was clearly demonstrated to me about one year ago. I was riding in an auto when it was struck by another and heavier car running without lights. The force of the impact threw me against the wind shield, the iron dividing bar striking me just below the nose, and causing a compound fracture of the bones of the face and roof of the mouth, while the glass cut my face almost beyond recognition. A ligament was torn from one knee, one arm was terribly crushed, and there was also a slight injury to the skull in front of the temples.

As soon as consciousness was regained I declared the truth audibly, and tried to reach a telephone to ask for help in Christian Science, but I was prevented from doing this and put into a car by a physician who had arrived upon the ground and had sent for an ambulance to take me to a hospital. While I sat there against my desire, some friends came up, and seeing me took me in their car and brought me home under protest from the doctor. That was a proof of God's loving care, for which I was very thankful. As soon as I arrived home a friend called up a practitioner and I was able to talk to her enough to make her understand my need. The police officer who insisted upon coming home with us said a medical doctor would have to be called so he might have a police report of the case, as required by law; accordingly we called a doctor who was an old-time friend. An examination was made, and he told me next day that had he not known I was having Christian Science help he would have been obliged to administer morphine, for I never could have stood the pain through the night. As it was, there was no pain, but just a dull, heavy feeling and hemorrhages every few minutes. The next morning so many friends in their loving sympathy came to see me, that it made the occurrence so real I could not seem to work out from the mesmerism of it; so I asked the practitioner if she would come to the house and give me treatment, which she lovingly did.

The second night I slept well until after midnight, when I was awakened by what felt like an unseen force putting each bone into its proper place and fastening it there. In the morning a dental surgeon examined my mouth and face and said every bone was properly adjusted and the knitting taking place. This was in advance of the time set by medical law. I was told by the medical doctor that I would not be able to eat solid food for six weeks, but I ate it in ten days after the accident, as the complete healing had taken place in that time. The flesh wounds were healed, leaving no scars to speak of, and these have since disappeared except an almost imperceptible mark where the lip was cut through. All the material laws, so called, were annulled by divine law, which is ever operative and does not wait for time or place. The healing is complete in every way.

While I have experienced many other beautiful healings through the application of the knowledge of God and man gained through Christian Science, yet to me this has been the most beautiful; for it taught me that divine Mind is the only perfect healer, working silently, lovingly, and quickly

Digitized by Google

in cases of surgery as well as in other needs. Through this experience there has come to me a wonderful spiritual uplift from the realization of the ever presence of the loving Father-Mother God and of the immediate protection given to each and all of His children.

The practitioner has since spoken of how much help the articles in our periodicals and pamphlets were to her while working on this case. How thankful we all should be every minute for the gifts of God which are being hourly bestowed upon us through all the channels provided by our beloved Leader. To me they are the "bread of life," for they supply our spiritual nourishment.

(Miss) GERTRUDE P. BELDEN, Chicago, Ill.

✧

Christian Science has made such a great change in my life that I feel it my duty to express some of my gratitude. About five years ago this teaching first came to my notice through reading copies of the *Sentinel*, which had been left from time to time at a police station where I went very often to have my lunch. I have been a church attendant as long as I can remember, as a pupil, chorister, Sunday school teacher, and later as a church officer; but in spite of all this, religion was vague, theoretical, and very unsatisfactory to me. In the *Sentinels* I found very good reading, which had a sound, reasonable basis, and impressed me, while explanations were given in the columns headed "Selected Articles" which removed many erroneous impressions and convinced me that I had found something worth knowing. I therefore went to the reading room to learn more of the subject and was delighted with the kindness and patience shown me by the librarian. I borrowed the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, from the reading room and afterward from the public library.

I still continued as a church officer, but was undergoing great mental change. I began to find more and more that Christian Science is intensely practical, so bought a copy of the textbook; and since I got that book we have never had a doctor in our home. Finally I saw that I could not hold two opinions, and after about three years of reading and studying to find something wrong in Christian Science, I was convinced that it is all good; therefore I commenced to attend the church. My daughter is now a pupil in the Sunday school, and I hope the boy will also have that great privilege.

I have to thank Christian Science for a better knowledge of the Bible, which is a new book to me; for hope, confidence, entirely new thoughts about my fellow men, a better idea of manliness, and above all a growing understanding of our ever present Father-Mother God. A strong desire for tobacco has been replaced by a longing to know more of the truth that makes free.

As a churchman I marvel at the way every situation that can arise in the church and organization is anticipated and provided for by the wisdom of Mrs. Eddy, who has shown us how to follow our great Exemplar, Christ Jesus, by keeping strictly in the path of Truth. I am very thankful to those who left the *Sentinels* at the police station and gave me the opportunity of knowing something of Christian Science, and for the unvarying kindness I have found in the church. I hope to show my gratitude by putting into practice the teachings of Christian Science.

We have been through times of stress, which were faced with calm and confidence that would not have been possible to us without the practical teachings of our textbook and periodicals. The war has caused a great alteration in our home and in my employment, and we are sure that all the happiness and comfort we enjoy is wholly to be attributed to Christian Science, which has never failed when applied to our problems. My greatest desire is so to live as to be worthy of the name of Christian Scientist. The healing mentioned has been permanent, and we are all healthier and happier than we were before gaining a knowledge of this healing truth.

LEONARD ILLINGWORTH, Manchester, England.

✧

With a heart filled with gratitude, I give my testimony to the field. For three years I heard of Christian Science, and was offered the care of a practitioner, a dear friend. At the end of that time my extremity proved to be God's opportunity. To-day all I have and am I owe to the help and study of Christian Science. I am indeed thankful to God and to Christ Jesus, the Way-shower, also grateful to our beloved Leader, Mrs. Eddy, for the discovery of this truth, which has healed me in a very short time of many troubles, such as weak eyes and deafness. Through the reading of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, rheumatism, stomach disorder, fallen arches, hemorrhoids of many years' standing, heart trouble, nervousness, and headaches have been overcome, while a throat affection was overcome in less than twenty-four hours. I suffered fourteen years from one ailment or another, until as a last resort I accepted Christian Science and was healed in God's own way.

Words cannot express my thankfulness to God for Christian Science, and my gratitude to all the friends who have helped me from day to day, step by step, to an understanding of the truth that makes free.

MRS. LOUISA C. S. MARSHALL, Edenburg, Pa.

✧

Christian Science has done so much for me and mine, that words can never express my gratitude. For over a year before being healed in Christian Science I suffered from frequent attacks of appendicitis. One of the well-known physicians in San Francisco did all he could to relieve my suffering by prescribing medicine and other material means, but these only gave temporary relief. During an unusually severe attack I was advised to submit to an operation; but I had great fear of operations, so refused to be guided by this advice. I slowly recovered, but was very weak and discouraged. There seemed to be nothing to look forward to but suffering.

I had heard much of Christian Science, but it had been misrepresented to me and I was antagonistic, often speaking of it as a new religion to be guarded against. I had read portions of "Science and Health with Key to the Scriptures," the textbook of Christian Science, but only to criticize it. Nevertheless, "man's extremity is God's opportunity," and when all material means failed to heal me, I turned to God. One day I witnessed an instantaneous healing by Christian Science and then realized that this religion must be the truth. I had become acquainted with a practitioner, and after witnessing this healing, visited her and asked her to tell me something of this religion. Her explanation was so lovingly given that I received the truth and was instantly healed. Just a few statements of truth healed me of the false belief called appendicitis and destroyed for me even the memory of months of suffering. It faded away like a bad dream and I was as one transformed. My old suffering self seemed to vanish, and I had a glimpse of man's real selfhood. I was indeed born anew. I received this healing in November,

Digitized by Google

1913, and since that time divine Mind has been my only Physician. I began at once to study the textbook, and for me each day was filled with joy, for I knew that God had healed me, and I was beginning my journey from sense to Soul.

A short time after this my right side suddenly became numb, and I could scarcely speak. I again asked for help and the healing was instantaneous. I have also been healed of colds and of a supposed enlargement of the heart which caused great pain and weakness. We have had many beautiful healings in our home, and are daily proving true the words of our Leader (Science and Health, p. 494), "Divine Love always has met and always will meet every human need."

I am so grateful to God for the many healings which I have received through Christian Science and for the spiritual understanding that I am gaining each day; also to our dear Leader, Mrs. Eddy, whose purity of thought and unselfed love enabled her to be the messenger through whom the light of Truth came to the world. I am endeavoring to prove my gratitude by living the truth each day and letting my light shine.

(Miss) MABEL LANSING, San Francisco, Cal.

✧

For more than ten years Truth, as taught in Christian Science, has been my only physician. I feel it a privilege to give to other sick and sorrowing ones an account of my own healing, that they may share my blessings; for God is not partial, and what He does for one He does for all, when we understand His law and are obedient thereto.

For a number of years I suffered from a spinal affection. The several doctors consulted told me there was no cure for my trouble and that as years went on I would get worse and probably become a hopeless invalid. No one can realize the darkness and despair of contemplating such a future who has not experienced such a verdict. Since having Christian Science treatment I have gained in strength and health every day, and now I am able to be a help to my loved ones, whereas once I thought I could only be a burden. The joy which comes with the knowledge of man's freedom as a child of God, and that God never created imperfection, is a heritage which can never be taken from me.

I am so grateful that the wisdom and courage was vouchsafed our dear Leader, Mrs. Eddy, to give this message of Love to the world and to safeguard it by the Manual of The Mother Church. As followers of the Christ we can accomplish most by obedience thereto. The way is plain; we have only to follow.

(Mrs.) WOODFIN C. HILL, Morgantown, W. Va.

✧

To enumerate the many blessings which Christian Science has brought me would be, practically, to write the story of my life for the past year and a half. During that time no day has gone by without this healing truth helping me mentally, morally, physically, and even financially. It has indeed given me all things, given them to me in spite of the fact that when I began the study of this teaching I had for my object that which, in the final analysis, meant its destruction. Believing that science was degraded by being considered in the same breath with religion, I felt certain that something fallacious must exist in the logic which would couple the terms Christian and Science; and I began the study of "Science and Health with Key to the Scriptures" with the prime object of discovering its fallacies. That my search was fruitless is evidenced by the fact that to-day my sincerest desire is to know more of the truth as taught by this scientific religion.

Christian Science found me with no religion whatsoever and a materialist to the minutest detail. To-day it presents me buoyant with hope, with an unquestioned faith, firmly convinced of the existence of Deity, and with some understanding, at least, of the nature of this divine, all-inclusive Principle. It has brought me from the darkness of almost hopeless despair into the light of the "glorious liberty of the children of God."

Although I did not come into Christian Science for physical healing, yet I needed it. At more or less frequent intervals I had been a sufferer from digestive troubles, which, as I grew older, became more frequent and more severe, always being accompanied by violent headaches. What is called intestinal stasis was finally added. Doctors had been consulted and much medicine taken, but with only temporary relief. An operation was finally submitted to, but the hoped for results did not materialize, and it was still necessary for me to take some kind of medicine every night. Six months after the operation, I commenced the study of Christian Science. Two weeks after I had read the Preface to Science and Health, I had gained some perception of the mental cause of disease and of the utter folly of trying to produce motion or action with inanimate drugs. With this realization I gave up the use of material remedies, and from that day to this have had no occasion to return to them. The healing was not instantaneous, but decided improvement was noted from the start; and in a remarkably short time, with treatment from a practitioner, the trouble was completely overcome. Throat trouble, headache, and many minor ailments have likewise vanished into their native nothingness.

For all these blessings I am indeed thankful to God. I am also grateful to those who have helped and are helping me on my journey from sense to Soul, and to Mrs. Eddy for having made practical to this age the truth which is lifting me out of that type of thought which nineteen centuries ago attempted to destroy him of whom Mrs. Eddy speaks on page 313 of "Science and Health with Key to the Scriptures" as "the most scientific man that ever trod the globe."

A. G. LEVY, New Orleans, La.

✧

As a child I was brought up in a Christian household. My mother was a very devout woman and had implicit faith in the power of God. She instilled in me a great deal of this faith, but because of not understanding the Science of being, I did not know how to apply this wonderful truth. I never knew much about Christian Science until June, 1914. While staying in the home of some Christian Scientists, I became so interested in the beautiful teachings of this religion that I began to look into it for myself, and went to a practitioner for treatment. There came to me wonderful glimpses of this great truth, but I did not attain a perfect healing at that time.

In June, 1916, while attending summer school, I collapsed. The doctor said it was a nervous breakdown and that I needed rest. After I had rested for two months with no apparent results, I again went to a Christian Science practitioner, and this time became more vigilant with my studying; but I continued to grow worse and could neither eat nor sleep. When pain located in my side I was hurried to a hospital, but the condition had become so complicated that the physicians did not know what to do for it. They tried almost every imaginable kind of medicine and various

Digitized by Google

quieting lotions, but without effect. A consultation of physicians was held, but even then no better results could be obtained. My doctor finally said he could do nothing more for me as my nerves had entirely given out, but that I was young and he hoped the trouble would gradually be outgrown, that if I were ten years older he would not give me any hope at all. He dismissed the case, and I went home.

I continued to grow worse; nothing would relieve the suffering. We then heard of a Christian Science practitioner who had some wonderful results in healing. I had given up all hope of recovering, but consented to have him come, and shall never forget his smile of trust and confidence, when I asked if there was any chance of my recovery. I lingered for about two weeks between life and death; but gradually the truth reached through my befogged senses and in three weeks I was able to take my meals at the table. My healing was perfect. Strength and health came so rapidly that my friends could only exclaim in wonder and could not understand it. I have been teaching all this school year and have not missed a day.

I had worn glasses for nearly nine years, and as such long hours were spent in the schoolroom, I felt that it was necessary to have the lenses changed often. In spite of the care I gave them, however, my eyes seemingly gave out entirely. I then went to a specialist, who said they were in a very bad condition and would always trouble me. He referred me to a nose specialist, who stated that the bones were diseased and a piece of bone must be removed often, but when I was healed of the other troubles, this condition also was overcome, and I have learned that as God's child I do not need glasses.

Words can never express my gratitude for the physical healing, but even that sinks into insignificance when compared with the understanding of this wonderful truth that has come to me. Now I can say, in the words of a familiar hymn:—

O Lord, I would delight in Thee,
And on Thy care depend;
To Thee in ev'ry trouble flee,
My best, my only Friend.

(Mrs.) Lula L. Helm, Sedro-Woolley, Wash.

✧

I am sending my testimony, which means a great deal to me, and it may help some others who are in the same condition. It is such a wonderful privilege as well as a pleasure to feel we can turn to and depend on something higher and better than material things for physical relief. I am so grateful for the benefits I have received both spiritually and physically since I have taken up the study of metaphysical healing. I want to tell one of the benefits received. It may seem small to some, but it is wonderful to me and to my husband. It may help some one who is seeking for light and health as I had been for over nine years. During that time I had been an almost constant sufferer from so-called bilious and nervous sick headaches, sick stomach, and backache until at times I could hardly stand up straight. I had consulted the leading surgeons and physicians in Philadelphia, Trenton, and Altoona. I had two surgical operations and numbers of local treatments, and all the doctors told me the same thing,—that they had done everything they could for me and given me every kind of medicine they knew of for such a condition as I was in—and all of no avail. The thing they at last resorted to was a hypodermic, which only seemed to aggravate my case, and the after effects would last two or three days; in one instance it caused an abscess on my arm which lasted three months, and during part of the time I was delirious with pain.

I also have had several other beautiful demonstrations this winter. I had suffered from frosted feet every winter for seventeen years; and as soon as the error manifested itself this year, I declared the truth, and my feet were cured in two days. While I had heard of Christian Science some time before, yet I only took up the study in earnest in August, 1916, and since September the same year I have not gone to any doctor or taken medicine of any kind, and have entirely done away with all medicine (of which I had a goodly supply) in our home.

I am more thankful than I can express for the wonderful spiritual uplift as well as the healing. My husband and I read the Lesson-Sermon every morning before he goes to business, which gives us both spiritual food for the day.

(Mrs.) May G. Hicks, Hammonton, N. J.

I can testify to the above statement of my wife, and say for myself that Christian Science has also been a wonderful uplift to me. Through studying the Bible and Science and Health I have been able to give up smoking entirely. I was a very heavy smoker for about twenty-eight years.

Norman S. Hicks.

✧

In the fall of 1906 I heard of Christian Science through a dear sister who had been healed of chronic ailments. I cannot express the joy and feeling of happiness it gave me to know the truth about God and man. For years I had taken drugs prescribed by different doctors, with only temporary relief. My healing was not quick, but I am not sorry; for during the time of treatment I was getting spiritual understanding, which was best of all. Stomach disorder and sleeplessness were soon healed. The other difficulties, such as heart, liver, kidney, and throat troubles in very severe forms, yielded more slowly. I could not swallow any solid food for two years. I had spells of strangling every day, and thought each one would end my life; but with the help of a practitioner and my own faithful study, I have overcome it all.

I would say to others who are waiting for healing, Do not be discouraged; study, and get understanding, and your healing will come. I wish to express my gratitude for our dear Leader, Mrs. Eddy, who brought this demonstrable truth to us all; also for the *Sentinel* and *Journal*, and for all our literature that is teaching us to live nearer to God.

(Mrs.) Jennie F. Freer, Ohioville, N. Y.

✧ ✧ ✧

# From the Press

[*The Yorkshire* (England) *Observer Budget*]

Preaching at a midday service at Holy Trinity Church, Leeds, on "Spiritual Healing," the Rev. Harold Anson remarked that we had always been familiar with the fact that there was a great influence of the mind over the body, and in all sorts of ways we were constantly aware of it. . . . Was it not rather a disgrace to the church which preached the gospel of Jesus Christ that they should not be able to show people that the same results now followed the preaching of the gospel that followed when Christ was on earth? In our own day, he was thankful to say, that reproof was being in some measure taken away from the church. There had never been a time when healing by spiritual means had altogether died out of the church, but it was only in our day that it had been revived in a great measure. Whatever differences they might have from Christian Scientists, how-

Digitized by Google

ever much they might feel that Christian Scientists were mistaken in some parts of their theology, and whatever practical mistakes they might, and he thought did, make, they must always be thankful to Christian Scientists for what they had done toward the recognition of the play of spiritual forces in healing.

[Editorial in *Morning Telegraph*, New York, N. Y.]

Recognizing the good work of Christian Scientists, the Government is appointing chaplains of that faith to serve with regiments which are going abroad. The more Christian Scientists in the Army the better. Without doubt the optimism that prevails in America is due to the preaching of the members of this church, for every Christian Scientist is an optimist. Their influence in the country is great and their influence in the Army will tend to make men believe they cannot fail; that victory will be theirs.

[*Case and Comment*, Rochester, N. Y.]

Bequests to be used in promoting the spread of Christian Science and to encourage the building of Christian Science churches are not invalid as being contrary to public policy, according to the decision of the Ontario Appellate Division in re Orr, 40 Ont. L. Rep. 567. It is not enough, said Chief Justice Meredith, that the views of Christian Science are opposed to what is generally accepted as true. To deny the right to propagate such views presupposes the infallibility of human judgment, and would bar the way of progress in every direction, scientific or otherwise.

[Christian Scientists in Michigan and elsewhere will be interested to know that the rights of parents to choose the best method of treatment for their children have again been sustained by court action, as shown by the following item from *The Times News*, Ann Arbor, Michigan.—Ed.]

Upon advice of the special counsel called in by the Board of Education to confer with the prosecuting attorney in the matter of sending Ruth and Helen, minor daughters of Mr. and Mrs. Hugh H. Dowler, to the University hospital for examination and treatment, action in the matter has been dropped. The circuit court yesterday [May 8] entered an order setting aside both orders of the probate court issued December 14, 1917.

[*The Globe*, New York, N. Y.]

Last night [May 28] the Christian Scientists met at Carnegie Hall. For some hours many of them stood in line waiting to be admitted. This line, which we passed twice, was a study. Every face shone. There was no gloom. No sick-about-to-be-cured types. Well-groomed, well-dressed people, apparently eager to let others know what "Know thyself" meant to them. Think of it—a religion which causes people to stand in line! Where's the church that does it?

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly.

The Christian Science Publishing Society.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

The Christian Science Publishing Society.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlet

"Christian Science: A Religion that Heals through Spiritual Law," by Virgil O. Strickler, is now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

Per Capita Tax.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to William R. Rathvon, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# Christian Science Churches and Reading Rooms

Christian Science Churches and Societies may be found generally throughout the United States, Canada, and the United Kingdom, as well as in important cities elsewhere throughout the world. They are all branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, organized in 1879 "to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Manual of The Mother Church, p. 17).

Selected lessons read from the Bible and "Science and Health with Key to the Scriptures" (the Christian Science textbook by Mary Baker Eddy) constitute the only sermons at the Sunday services in Christian Science churches.

Wednesday evening meetings are also held, which include testimonies of healing and experiences and remarks on Christian Science.

In connection with every church there is conducted a free reading room at which all the writings of Mary Baker Eddy and all authorized Christian Science periodicals and pamphlets may be read, borrowed, or purchased.

The public is cordially invited to attend these services and visit these reading rooms.

A complete directory of Christian Science churches and societies is published monthly in THE CHRISTIAN SCIENCE JOURNAL, which also contains quarterly (in January, April, July, October) a directory of Christian Science practitioners.

---

Opportunity to send the messengers of Christian Science on their healing mission to the world is maintained through the plan of the Postmaster-General of the United States to send to soldiers and sailors destined to proceed overseas, at nominal postage, literature offered at post offices in the United States. A printed notice on the front of *The Christian Science Journal, Christian Science Sentinel,* and *Le Héraut de Christian Science,* signed by the Postmaster-General, explains the simple plan.

While the post office department has ruled that the above mentioned Christian Science periodicals are to be accepted by postmasters for use under this plan, the department order states that only "clean copies of current or comparatively recent issues" will be received.

Those desiring to send periodicals other than their own copies, or copies previously given for local distribution work, can doubtless make arrangements with any Christian Science reading room to mail these periodicals regularly as desired.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

VOLUME XX AUGUST 3, 1918 NUMBER 49

[Written for the *Sentinel*]

## The Shunammite

BEATRICE CLAYTON

"He sat on her knees till noon, and then died."—II Kings 4:20.

BRAVE mother of a distant age and clime,
Thy noble words, unperishing, resound
Down the long years to our own race and time,
In mother hearts to thee forever bound.

The little child that drooped upon thy knee,
And sank to sleep unheeding thy soft croon—
O darkest hour and bitterest agony!
Yet, Shunammite, within thy heart was noon,

Shadowless noon of faith; no futile tears
Bemoaned the lad whose passing seemed hope's knell.
They asked her how it fared with him; no fears
Spoke in the brief, brave answer, "It is well."

Calm—for her thought upon the All-power stayed—
She found the man of God and brought him there,
To that small chamber where her dead was laid,
The little child with forehead smooth and fair.

And in that ancient day as in this hour,
Unfaltering trust in God, in good supreme,
Uttered the healing word of Truth with power;
The child revived, awaked as from a dream.

The centuries roll, the nations come and go,
But still thy tale, O Shunammite, we tell;
And still the truth is Truth; 'tis ours to know
And prove, whate'er the seeming, all is well.

## Seed Sowing and Seed Protecting

JOHN RANDALL DUNN

LITTLE can be added to the many helpful things which have been written about the preparatory work, mental and otherwise, which should precede a Christian Science lecture. Throughout the field it is becoming more and more apparent how Christian Scientists realize that a lecture is only another name for seed sowing, and that their work, therefore, is the preparing of the soil for the sower. Seldom indeed in these days does a lecturer respond to the invitation of a church or society and find that the ground has not been well plowed and harrowed and made ready for the planting. Advertising has been faithfully attended to, invitations have been issued judiciously.

It might be well to state in this connection that in many of the smaller cities the most effective advertising of the lectures has been brought about not so much through newspaper publicity and placards in shops and elsewhere,—although a certain amount of such advertising is, of course, essential,—as through the personal touch, through verbal or written invitations to friends or acquaintances who might be interested. In some places the members of a church or society have taken their local telephone directories, made a careful examination thereof, and assigned to different persons the task of inviting, either by telephone or in person, those thought to be not antagonistic. This invitation is given possibly a week before the lecture, and is followed by a telephone call the day of the lecture, lovingly to remind the friend that the appointed day is at hand. One lady sent this cheery word over the telephone to the friends she had previously invited: "I just called to make sure you had not forgotten about the lecture to-night. We shall be so happy to see you, and believe that you will enjoy hearing what Christian Scientists really believe." In practically every instance she was heartily thanked for her thoughtfulness, several persons expressing particular gratitude for the reminder, as they had forgotten the exact date of the lecture.

Assuming then that the preliminary "mental farming" has been faithfully done, a sower comes and sows his seed—sends forth into the human consciousness the joyful message that a complete solution of earth's problems, mental, physical, social, and financial, is to be found in the revelation of scientific Christianity. Why is there not invariably a tremendous turning to Truth in a community at the close of every Christian Science lecture? Jesus answers this question with one of his incomparable parables. He says: "Behold, a sower went forth to sow; and when he sowed, some seeds fell by the way side, and the fowls came and devoured them up: some fell upon stony places, where they had not much earth: . . . and because they had no root, they withered away. And some fell among thorns; and the thorns sprung up, and choked them: but others fell into good ground, and brought forth fruit."

Now how many of us have been awake to the necessity of active mental work *after* a Christian Science lecture,—awake to the grave need of protecting the seedlings of Truth from the fowls, from the attacks of hate which would seek to snatch from hungering hearts these new-sown spiritual ideas? How many of us have realized that nothing short of consecrated protective work for days or even weeks after a lecture, gives the only possible assurance that the mesmerism of life in matter—the thorns—will not choke and hinder the activity of an awakened spiritual sense?

Truly is it our work to know that there is in reality none other than good soil; that the whole human creation is truly groaning, as Paul wrote, for deliverance, for sunshine, for the fruitage of healing; and that the seed dropped into the soil of hungering human consciousness cannot be plucked out, or withered by reversal. It might be interesting to hear of some results of this intensive mental farming, of this seed protecting and cultivating.

In a small town where the interest in Christian Science had apparently been lukewarm, the church membership was so alive to protective work in the days following their lecture, that their auditorium could scarcely hold the truth seekers that came to their next Sunday service. In another community a minister announced after a lecture that he would reply to the Christian Scientists on a certain date. The alert members of the Christian Science organization immediately stood guard mentally over the planted seedlings

Digitized by Google

of spiritual sense, knowing that nothing could root them up nor rob them of their rightful fruitage, and within a short time a notice appeared in the public press stating that the answer to the Christian Science lecture had been "indefinitely postponed."

Many more experiences might be related, but this one will suffice to indicate the tremendous amount of good we may expect from these seed sowings when there is, in the days following, alert, consecrated, and systematic seed protecting. With what is familiarly termed enthusiastic "teamwork," with the happy cooperation of sower and helpers, we should surely begin to see the desert of material sense "rejoice, and blossom as the rose," according to the prophecy of Isaiah, "It shall blossom abundantly, and rejoice even with joy and singing." Isaiah says again, uttering a message from the Lord, "As the rain cometh down, and the snow from heaven, and returneth not thither, but watereth the earth, and maketh it bring forth and bud, that it may give seed to the sower, and bread to the eater: so shall my word be that goeth forth out of my mouth: it shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it."

## "A covert from storm and from rain"

BERNICE W. CARTER

IT often happens that in taking up a new proposition in mathematics a student working faithfully to master and apply the rules laid down will find himself able to obtain the correct answer to the problems long before he really understands the basic law which the rules illustrate. He does his work mechanically, we may say, and seemingly expresses little real reasoning power; but there comes a day when, having, by strict adherence to rule, solved so many of his problems correctly, he suddenly, as if by revelation, finds the reason back of the rules, and so grasps the truth.

The analogy to this is found in the everyday life of the student of Christian Science. Convinced of the truth of the teaching—possibly through having witnessed seeming miracles as a result of it, through hearing testimonies of healing, or through reading the Christian Science literature, especially Mrs. Eddy's writings, or, as most frequently happens, through having been healed himself—he undertakes the real study of the textbook, "Science and Health with Key to the Scriptures." If honest with himself, he will apply what he learns as he learns it, and the immediate results will be to him like the golden glow of early morning, so colorful and soul-stirring as to remain in memory even after the sun has fully risen and perhaps been overcast with clouds.

One student recalls an experience which, although it occurred only a few months after she began the study of Christian Science, stands out even to-day as a milestone, a beacon —something to which she can revert in memory at any time and draw from it new lessons and fresh inspiration. From the very beginning of her study she realized that if Christian Science was to be anything at all to her it must be everything. If she was to give up her former concept of God,—which though limited and vague was still inexplicably near and dear to her,—it must be for a God who was indeed all-powerful, and available at all times and under all circumstances. She found in Science and Health the simplest of rules: "Stand porter at the door of thought. Admitting only such conclusions as you wish realized in bodily results, you will control yourself harmoniously" (p. 392); and, "When the illusion of sickness or sin tempts you, cling steadfastly to God and His idea" (p. 495). These she began to apply as best she could, taking a radical stand at each well-defined step of the way.

It happened that the equinoctial storms were exceptionally severe that year. The Biblical description, "The rain descended, and the floods came, and the winds blew, and beat upon that house," aptly pictures the weather conditions around the student's home. Moreover, a built-on portion of the house was not weatherproof; the rain, wind-driven, penetrated the joining and poured into the pantry in small torrents at so many different places that every available pail, pan, jardinière, and deep cooking utensil was pressed into service. The student was alone in the house and there was nothing she could do materially except to empty the vessels as rapidly as possible and mop up the floor betweenwhiles. In the old days she would have prayed to God to send some one to help her. Now she suddenly seemed bereft of her heavenly Father. How could one ask Principle to stop a leak? But as she worked, statements from the textbook kept recurring to her; the ninety-first psalm, also, fairly sang itself to the patter of the rain: "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty . . . He shall cover thee with his feathers, and under his wings shalt thou trust."

Gradually her depression began to lift; gradually, too, she began to experience a sense of protection. For, she reasoned, she had been conscientiously applying the rules of the Christ-teaching,—correcting every thought as soon as she became aware of drifting into wrong thinking; she had always loved purity, even before she recognized it as an attribute of God, and she had been living as close to God as her degree of understanding would allow; she had no other longing except to know Him—and her supreme desire might have been expressed in the psalmist's words: "Wash me, and I shall be whiter than snow." Why then could she not claim the shelter of ever present Love, and hide in the secret place even from the rain? Other Bible verses came like angel visitants to urge her to make the test. "Prove me now herewith, saith the Lord;" "If ye have faith as a grain of mustard seed, ye shall say unto this mountain, Remove hence to yonder place; and it shall remove; and nothing shall be impossible unto you." Entertaining these angels she caught a glimpse of heavenly reality and the wonderful harmony of God's creation. It was only a glimpse; but it carried her away out of self—out of the dismal house, into the consciousness of life in God. When she again began the emptying of pails and the mopping, there had come a lull in the storm outside. Almost no rain came in upon the floor while she was emptying the vessels. "Now," said her awakened spiritual sense, "if you are honest, if you really believe all you have been thinking, why are you putting the pails back there to catch more rain?" Then so-called common sense put in a plea, for the clouds were as black as ever and the rain had by no means ceased. But "Prove me now, herewith," urged the still, small voice.

She carefully dried each vessel and put it away in its usual place, and as carefully dried the floor, removing the rolls of cloth and matting which she had used to prevent the water from getting through under the doors to the adjoining rooms. Then she went upstairs to other duties. All this was done, not with the grim determination of faith expressed in the words of Job, "Though he slay me, yet will I trust in him," but in a manner that showed how completely she had put the problem away from her. She had done her part. It was a perfectly natural sequence that God would take care of the rest. The stormy weather continued not only all that day but for many days, yet not once again did the rain leak

Digitized by Google

through into the house. "The wind changed," said the skeptic to whom her joy-laden heart poured out the story, "or the shingles of the roof had become swollen and made the joining tight." Yes, the student admitted, the wind did change, and stayed changed; and perhaps the shingles did swell. She was not concerned with the material manifestation. She only knew that she had been lifted out of dreary discord into harmony, into that "place of refuge" which Isaiah describes as "a covert from storm and from rain"—where there were no beating winds, only freshness of spirit; no cloud-bursts or floods, only showers of blessing. She had proved that however slight her understanding of infinite Principle, by obedience and trust she could find the way to God.

Love for God surged through her consciousness, and gratitude to that brave heart, that sturdy pioneer, Mrs. Eddy, who, alone and with no help save the Bible, had discovered the rule and made the way so plain that "the wayfaring men, though fools, shall not err therein."

## Cooperation in Distribution

JAMES C. MC FEE

IN the sixteenth chapter of Mark we find the words, "Go ye into all the world, and preach the gospel to every creature." These words were addressed by Jesus to his disciples, who, it is noteworthy, were not urged or besought to do this, but commanded; it was a solemn duty to be performed, no choice being left to them if they were to be true disciples. Recognizing the God-given authority for the command, the disciples unquestioningly obeyed. It is then no cause for wonder that such preaching was always accompanied by the healing of the multitudes who heard it, of all their infirmities, want, and woe. Later the demonstration of Truth's power was lost sight of, the letter was preached without the spirit of this command being obeyed, and it remained thus until the Christ-healing was restored through the discovery of Christian Science by Mrs. Eddy.

Christian Science is to-day the gospel, in scientific form, that was preached by Jesus' disciples; and Christian Scientists are accordingly subject to the same command to preach the gospel, with "signs following;" they are messengers of Truth, or bearers of glad tidings. The glad tidings, the message of Truth to this age, is to be found in the inspired writings of our revered Leader, and in the periodical literature established by her. One of the ways and means of carrying this message to a sense weary and peace seeking world is through the distribution of the authorized Christian Science publications. That this literature has reached countless numbers of suffering human beings to whom it has brought better conditions in every conceivable way, must be admitted.

Distribution work cannot be done in a haphazard, thoughtless fashion, nor is it a hobby, or something to be done only when convenient. Experience has proved that it is not an unconcerted, individual undertaking, but that it properly belongs to and is an essential part of church activity. Distribution work to be most effective must be done through properly organized effort and executive administration. Christian Scientists learn through the study and application of Mrs. Eddy's teachings to avail themselves of the best and highest in everything, so there is reasonable ground for expecting distribution work to be conducted along the best possible lines. To fulfill its purpose, the organization must be well balanced in its inception; it should conduct its affairs according to the best business methods and most up-to-date practice, demand and enjoy the unqualified loyalty and support of its members, use prudence in the selection of these, and assign duties intelligently to them. The members of such an organization should be punctual in attending to their duties, ever interested in that which has been allotted them to do, and more than all else have the welfare of the organization rather than personal interests or self primarily at heart. In a word, the motive and objective of the whole structure must be "service." This word represents everything constructive and progressive entering into the life of an organization; without this kind of service an undertaking is doomed, and will sooner or later cease to exist.

Peculiarly applicable to distribution work and to this idea of service with its component factors, as well as a reference to its potent effects, are these words of Mrs. Eddy's, found on page 1 of Science and Health: "Prayer, watching, and working, combined with self-immolation, are God's gracious means for accomplishing whatever has been successfully done for the Christianization and health of mankind." One of the life-giving elements of service, and all that pertains thereto, is cooperation of the members of an organization,—not of a willing and energetic few, but of the entire membership. Cooperation could be described as "the concurrent action of a combination of units, which, in their respective places, produce a perfect cycle well fitted for its designed purpose, but any of which disconnected or missing, leave the cycle incomplete, impaired in efficiency, and limited in scope and action." Thus it signifies the harmonious working together of a body with singleness of purpose, in a common cause, toward a definite end.

This conception of cooperation requires each member to realize that in the proportion his own work in this branch of church activity is well done, will the success of the whole be assured, and in the same ratio will the whole be tendering and rendering loving service to mankind. Reasoning from this basis, it would seem that a quota of responsibility for the progress and growth of distribution work devolves upon each member.

The import of harmonizing mutual interests, so necessary to service, the keystone of success in distribution work, is clearly set forth on page 58 of Science and Health, where Mrs. Eddy says: "Unity of spirit gives new pinions to joy, or else joy's drooping wings trail in dust. Ill-arranged notes produce discord. Tones of the human mind may be different, but they should be concordant in order to blend properly. Unselfish ambition, noble life-motives, and purity,—these constituents of thought, mingling, constitute individually and collectively true happiness, strength, and permanence."

## Compassion and Healing

OTTILIE UEBERROTH

WHEN we listen to the promptings of spiritual sense we may learn great lessons from the little things which make up our everyday human life. My twelve-year-old son came in from school one day suffering from an injured ankle, which was badly swollen and very painful. I immediately began to treat him as we are taught to do in Christian Science, realizing the nothingness of this condition. Just then the ringing of the doorbell interrupted me. At the door stood an umbrella mender who asked for work in a very grüff and complaining manner, saying he had tramped all day and had found nothing to do. As I was otherwise engaged I told him there was nothing for him to do, and gently but firmly closed the door. Returning to the room I found my son in a sense of great pain and discomfort.

Taking up my work again, these words by Mrs. Eddy, on page 261 of "Science and Health with Key to the Scrip-

Digitized by Google

tures," came to me: "Look away from the body into Truth and Love, the Principle of all happiness, harmony, and immortality." I tried persistently to realize this, but the mental picture of the umbrella mender would constantly obstruct my vision of Truth and Love. Mortal mind tried to silence the thought of the brother in need, with the excuse that it must have been his own lack of love which brought him to this condition; but obviously this argument did not clear my spiritual vision. Knowing that there is no obstruction in Truth, I continued my treatment, and these words came: "If the Scientist has enough Christly affection to win his own pardon, . . . then he is Christian enough to practise scientifically and deal with his patients compassionately; and the result will correspond with the spiritual intent" (Science and Health, p. 365). I then tried to realize what love means, and saw clearly that divine Love is infinite and blesses all mankind, and that we all are the children of the one Father. I immediately felt a love for all mankind, including the umbrella mender, and desired to help him.

When my thought came back to the problem in hand, I could easily "look away from the body into Truth and Love," and on this mountain top I saw the nothingness of this mortal belief. When I glanced up at my son, his face, which had been drawn with pain, was radiant with happiness and love. His need had been almost instantly supplied; the pain was entirely gone, although the swelling did not disappear until the next day. Nor was the umbrella mender left out of this demonstration. On going out to get the letters left in the mail box, I saw the man at work a few doors away. When stepping back into the hall I noticed an umbrella which had been put back into the rack as unfit for use, and it was then taken to the man, who restored it to its former usefulness for a small sum. The clear vision of Truth and Love experienced that day has been helpful many times since.

## The Kingdom of Heaven

ESTELLE MORELAND HUNTER

THERE is no doubt that mankind is seeking the kingdom of heaven which Jesus declared was at hand. He said, "The kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you." Mrs. Eddy, the Discoverer and Founder of Christian Science, defines "heaven" in Science and Health (p. 590) as "the reign of harmony in divine Science; the realm of unerring, eternal, and omnipotent Mind; the atmosphere of Spirit, where Soul is supreme." We necessarily conclude that in order to enter into the kingdom of harmony, which is the realm of unerring Mind, one must be possessed of the understanding of what constitutes this state of consciousness, namely, freedom from all discord.

Jesus also declared, "Whosoever therefore shall humble himself as this little child, the same is greatest in the kingdom of heaven." In a following verse he continues, "In heaven their angels do always behold the face of my Father which is in heaven." In the scientific interpretation of "angels," as given in the textbook of Christian Science, "Science and Health with Key to the Scriptures" (p. 581), we find: "God's thoughts passing to man; spiritual intuitions, pure and perfect;" consequently we conclude that Jesus was pointing out that the child thought, which intuitively recognizes good in everything it is not wrongly warned against, is an illustration of the thought to be attained in order that we may enter the kingdom of heaven—harmony.

The infant sees the flower of the so-called poisonous plant, and with a little ejaculation of delight proceeds to pluck it, and often to put it into his mouth, utterly unconscious of any quality but good in it until the fear of parent or guardian, inculcated by false education of material life, so called, comes in excitedly to warn the little one of the impending danger. Many instances have been cited of utter fearlessness in the child consciousness. Children have often been found playing with animals considered dangerous, with no thought of anything but good and love; consequently no harm or discord, the opposite of harmony, could come in. The child thinks every one his friend, giving trust and confidence. A sister-in-law of the writer was once horrified to enter her kitchen and behold an exceptionally dirty tramp sitting at the table, being served with all that the baby hands of her little boy in blue pinafore could procure.

The child also manifests forgiveness. No matter how severely the little one has been punished by its mother, it has proved the invariable rule in the writer's experience that immediately little arms have been thrown around her neck, and declarations of love made that brought an answering wave of compassion and regret for having had to administer what she considered justice. Likewise do we find truthfulness, honesty, purity, lack of conceit, a full rendering unto others of the good which is theirs, thus disarming malpractice of any nature. We find, too, a natural willingness in the child to share with others its possessions—until taught by its elders that it must keep its things for itself. Who cannot remember the infant hand, extended to give the treasured toy which some one has been admiring in its hands? Or when asked playfully for a bite of the food which the child is enjoying, how promptly the morsel is placed at one's lips for sharing. There is surely in this consciousness no thought of limitation or of that selfishness which masquerades under the sham of self-preservation taught in a homely adage as "looking out for number one."

Since studying Christian Science and teaching in the Sunday school, the writer has found that much may be learned from the children, and that there are, in reality, no "little minds"—that, by the very reason of their ignorance of material conditions or conclusions, their thoughts are in close communion with the one Mind. When children who are still free from the taint of self-centeredness produced through wrong instruction, are asked to perform any task within range of their capability (the fact being that they will not admit incapability until repeatedly assured that they cannot do such and such a thing) there is immediate and joyful response to the trust reposed in them and no thought of questioning. On the other hand, as false education develops selfishness, there is often a tardy response, if not complaint, and a request that the task be given to another.

Here is room for application of a searching analysis of their thoughts by children of a larger growth. When an opportunity comes to us for service for our Father, do we accept it gladly, thanking Him for the trust reposed, or do we selfishly try to impose it on some older sister or brother? Perhaps one has come to us for help in Christian Science. This is surely an opportunity to work for God. Do we thank Him for intrusting to us a sacred mission, or do we through fear, self-depreciation, or indifference, send the troubled one to an older practitioner, who, we say, trying to salve our conscience, can do the work more efficiently? Is not this a tendency to shift responsibility to some one else, and is not our attitude to God the same as that of the self-centered child who says, complainingly, "Let brother go," or "Let sister do it"? We must remember that the older practitioner, or office-holder in church it may be, stood once just where we stand, and it was this unselfish motive and a firm

Digitized by Google

trust in God's will, in other words obedience, that caused him to attain to his present status and receive the reward of obedience. Failing to give, we should not complain over a failure to receive.

Is it any wonder that we, as Christian Scientists, are daily engaged in the work of purifying human consciousness of the false training and reasoning from a material basis, and striving to obey Jesus' command to become as a little child? This is no small task, when we consider that mortal mind is one vast bundle of mistakes; but we daily strive, thanking God for the life of one pure enough to discern spiritual truth in the midst of this maelstrom of error. Jesus' answer to Nicodemus is our answer to-day, and only as we truly are "born again" can we see the kingdom of heaven.

## Gratitude and Unfoldment

VIOLET WEBSTER DUNHAM

MRS. EDDY says in that wonderful chapter on Prayer (Science and Health, p. 3): "Are we really grateful for the good already received? Then we shall avail ourselves of the blessings we have, and thus be fitted to receive more." Are we really recognizing and availing ourselves of the power of the truth we have already seen and declared, and so becoming enabled to unfold more of good? The writer recalls an experience in which discouragement was overcome by gratitude, and this blessing resulted in perfect and instantaneous healing of a stubborn physical ailment.

The truth had been declared faithfully for many days, without any apparent change, and one morning she sat at the window with the textbook, discouragement seeming to weigh heavily upon her thought. Chancing to glance out of the window, she noticed on the street below some laborers at work breaking up concrete blocks. Faithfully they hammered away without any immediate results, but after many measured blows, the blocks would suddenly break apart. Then came the analogous thought: Those men are working at a problem, and they know the answer; hence they are not discouraged by the seeming slowness of their task. They do not need to know which blow is going to break the concrete; but they do know that each blow counts, and so they continue until the result is attained. It is not the first blow nor the last which does the work, but it is the steady, persistent effort, and each and every blow has been needed to bring about the breaking of the solid stone. Like a flash came the spiritual awakening which enabled her to declare, almost aloud, that every word of truth has power.

Many days had been devoted to solving this problem, seemingly without any change in the condition, yet every declaration of the reality of good and of man's right relation to God had done its work, and every declaration was needed. Then a deep sense of gratitude for the positive Principle revealed to suffering humanity by our beloved Leader, took the place of the discouraged thought, and with righteous desire for further unfoldment, study of the textbook was joyfully taken up. There was no sense of the passage of time, but within a very few moments absolute freedom was manifested, with not a vestige of weakness or convalescence, although it had not seemed possible to take solid food for almost two weeks. For the physical relief there was a great thankfulness, but this was not to be compared with the glorious spiritual uplift which had dispelled the depression of the moment before, nor with the joyous realization that this truth is available to all mankind, and that right now can be entered the holy of holies through the understanding of the kingdom of God.

# Selected Articles

["The Supreme Desire"—*The Christian Science Monitor*, Boston, U.S.A., Feb. 20, 1918]

The real story of a human life is the story of its supreme desire. It may furnish us with joy, or with sorrow, or even with amusement, but if the story is worth while it will also tell us of victory over self; the supreme desire must be proved to be greater than a mortal sense of self. The Bible is emphatically the book of the supreme desire and, of all others, it awakens us to the stern necessity of analyzing our desires, that is, it makes us think. Speaking for every one of us, it says: "Search me, O God, and know my heart: try me, and know my thoughts: and see if there be any wicked way in me, and lead me in the way everlasting."

It is perfectly plain, however, that no one ever succeeded in enthroning a righteous desire without doing some very active thinking, perhaps discovering for the first time that something was necessary to life and happiness that human sense could not supply. Thus we are led to reach out toward prayer, and this reaching out is always a desire for an understanding of God, of infinite Mind. It should culminate in a supreme desire to learn to think rightly. It is, therefore, peculiarly appropriate that Mrs. Eddy says in the Preface of Science and Health (p. vii): "The time for thinkers has come. Truth, independent of doctrines and time-honored systems, knocks at the portal of humanity." What, then, is it that thinks and what does it mean to be a thinker? If God, Spirit, is infinite Mind, it is easy to see that all true ideas are in and of Mind. Man's so-called thinking is, therefore, but the reflection of Mind. To make right understanding, then, the supreme desire is to follow the example of Christ Jesus, set forth in the great words, "Not my will, but thine, be done."

Thus it becomes clear why the reflection of Mind, or the right and true thought, always exterminates error, since in Him, Mind, there is no darkness, no evil, nor error, at all. Now reflecting Mind, as Mrs. Eddy has discovered for us, is to think according to the rules of Christian Science, the Science of Mind, and this will always enthrone righteousness as the supreme desire. As the desire for righteousness is made supreme through the application of Christian Science, our capacity for understanding God is enlarged. Thus Science proves itself to be "the Spirit of truth" that guideth into all truth even as Jesus exemplified when he "opened" the understanding of two of his disciples during the walk to Emmaus.

It should not be necessary to ask whether it is important to have the desire for righteousness supreme, for sound reasoning would immediately answer, "Yes;" but human opinion seems to answer, "No." The old saying, "Let us eat and drink; for to morrow we die," being essentially the expression of thoughtless desire, sums up human opinion in which there is not a single element of good. How, then, shall we attain the right desire that will lead us on to victory? How shall we receive the benefits of Christian Science? Mrs. Eddy answers these questions by saying, "For true happiness, man must harmonize with his Principle, divine Love; the Son must be in accord with the Father, in conformity with Christ" (Science and Health, p. 337). Mortal mind, or the carnal desires, seem to have succeeded in making humanity believe that it is impossible to conform to Principle or to have the desire supreme that Principle alone shall rule our lives. Let us remember, however, that such an attitude is only a proof that we have never really tried to make Principle supreme in our understanding. The deceitful carnal desires are especially fond of taking a halfway position in

Digitized by Google

this matter, doing as they please, but asking God to save them from suffering from the effects of their own false beliefs of sickness and sin. But Principle understood and made supreme through Christian Science is no mere rule of words; it becomes to us our entity, yea more than our very human sense of life.

To make Principle, therefore, supreme in our understanding is surely the sanest and most intelligent thing that anyone can do. Can there be anything worth having except it comes from God? or as James says, "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning." How miserably imperfect our reasoning is when we think of God as the actual source of all that is good, and then try to set aside Principle and satisfy ourselves with the husks that carnal belief claims to have for us in matter. Mrs. Eddy never made a clearer statement of truth than when she said, "Carnal beliefs defraud us" (Science and Health, p. 263). It does not matter in which direction we look, whether it be for life and health in a human body, or for substance in matter, the carnal or human mind has never given us anything else but fraud and delusion. What else, however, can one expect of it, since it is a liar, and never the truth of being?

Is it not easy to see, therefore, that when carnal desires are supreme, we have no Principle from which to reason, and are subject to the delusions of material sense—of sin, disease, and death? From all these Christian Science stands ready to deliver humanity by enthroning God, the divine Principle, Love, as supreme; for it is only by acknowledging God supreme, as understood in Christian Science, that the experiences of mortal sense can be overcome. "Christian Science," says Mrs. Eddy (Christian Healing, p. 15), "repudiates the evidences of the senses and rests upon the supremacy of God."

✧

[S. T. Downs in *Fort Wayne* (Ind.) *News*]

Had our medical critic taken an hour for careful investigation, he would not have made the attack on Christian Science in his address before the Lutheran Hospital graduating class of nurses that was reported in the *News*. He objected to the statement by Mrs. Eddy that the sick have been healed through reading the Christian Science textbook, "Science and Health with Key to the Scriptures," of which she was the author.

For over forty years, and in constantly increasing numbers, people of unquestioned integrity have given testimony of the healing of all manner of diseases through reading Science and Health. A student of that book knows that such healings have been accomplished by bringing into consciousness the truth that the great Master demonstrated, and that he said would set men free. The public statement of this fact by Mrs. Eddy and her followers, even though it meets with our critic's disapproval, is entirely consistent with Jesus' admonition in his Sermon on the Mount, "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven."

✧

[Robert G. Steel in *Northwestern Review*, Detroit, Mich.]

Christian Science makes the same distinction as does the Bible between the real man created by God in His image and spiritual likeness mentioned in the first chapter of Genesis, and the mortal or material formation of man by the Lord God (Jehovah) recorded in the second chapter. In the meeting with Nicodemus on the housetop at night, Jesus also makes this plain in these words: "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit." Paul, in his epistle to the Romans, also pointed this out, for he writes, "They which are the children of the flesh, these are not the children of God."

This distinction between the real man or spiritual man of God's creating and the mortal or material concept, revealed through the spiritual interpretation of the Scriptures, harmonizes many of the apparent inconsistencies of the Bible and illumines with the light of spiritual understanding those portions which, taken materially and literally, have heretofore seemed dark and obscure.

Christian Science makes the same distinction as did the Master himself between Jesus, the human man, and Christ, the divine idea. Of the former he said, "I can of mine own self do nothing," and of the latter, "Before Abraham was, I am," and "Lo, I am with you alway, even unto the end of the world." If this Christ is ever with us, then his second coming must surely be the apprehension of the divine manifestation of God which comes to us through spiritual understanding, casting out error and all inharmony.

Christian Scientists do not ignore sin, but knowing that God could not create sin or any phase of evil, they realize that such errors must be the product of a false, material sense—of that carnal mind which is enmity against God; that they are temporal and unreal, in the sense of not being God created, are mortal illusions only, and are destroyed in human consciousness by knowing the truth about them. On page 497 of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, are given the tenets of Christian Science, one of which reads as follows: "We acknowledge God's forgiveness of sin in the destruction of sin and the spiritual understanding that casts out evil as unreal. But the belief in sin is punished so long as the belief lasts."

Christian Scientists are constant, consistent, daily students of the Bible, and reading from the Scriptures forms a larger portion of their church services than is the case in other denominations. No religionists believe more in the efficacy of true prayer than do Christian Scientists,—not the wordy prayer of supplication and petition, asking God for everything one can think of, and which Jesus condemned so severely in his Sermon on the Mount, but the silent prayer of realization and affirmation which comes of the understanding of God as Spirit, and man in God's image and spiritual likeness, and the knowledge that God has already provided all good for His children. It is thus we have our just and holy desires gratified. On page 2 of Science and Health, in the chapter on Prayer, Mrs. Eddy writes, "The mere habit of pleading with the divine Mind, as one pleads with a human being, perpetuates the belief in God as humanly circumscribed,—an error which impedes spiritual growth." Had Mrs. Eddy never written another line but this chapter on Prayer her name would be handed down as one of the greatest benefactors of the race.

✧

[Judge Clifford P. Smith in *Jamaica* (B. W. I.) *Times*]

Christian Science is the religion, or interpretation of the Christian religion, discovered and founded by Mary Baker Eddy. Christian Scientists regard it as the restoration and divinely promised fulfillment of the religion practiced by Christ Jesus. It is defined by Mrs. Eddy on page 1 of "Rudimental Divine Science" as "the law of God, the law of good, interpreting and demonstrating the divine Principle and rule of universal harmony."

In answer to the question, What did Mrs. Eddy discover? it can be said that she discovered the law of God, the law of Life, Truth, and Love, as well as the rule, the sys-

Digitized by Google

tematic method of practice, for demonstrating the Principle of harmonious being. Besides this she added immeasurably to the world's knowledge of spiritual reality as distinguished from material belief. Anyone who would understand Christian Science "must begin," says Mrs. Eddy in "Science and Health with Key to the Scriptures" (p. 275), "by reckoning God as the divine Principle of all that really is." Whatever is the object or subject of thought, unless God made it, unless it expresses His being, is illusive, destructible, and unreal. This is the basis of Christian Science. On this basis the Christian Scientist works to purify human thought, to realize the truth of being.

On page 465 of Science and Health we find this definition of God: "Incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love." The word "Person" (spelled with a capital letter) is also used as a term for God, but Christian Science does not hold that He is like a human being. Of God it is said that "He is all-inclusive" (Science and Health, p. 331); which statement is to be regarded as consistent with the idea of imparted identity and individuality. Indeed, one of the leading points of Christian Science is that God is the Life, Mind, and Soul of man, yet that man, as the reflection of God, possesses perfect identity and individuality. As understood in Christian Science, God creates man and the universe; He governs the individuality and continuity of each creature, and maintains this infinite creation as the expression of His being.

Since Christian Science is based on the teaching and example of Jesus, it has a definite and emphatic view of him and his mission. To begin with, it distinguishes between Jesus and the Christ as between what is human and what is divine. In the authorized literature of Christian Science the word Jesus usually refers to the person whom Christian Scientists regard as Teacher and Way-shower. The word Christ may refer to him, to his spiritual selfhood, or to his office as the Messiah, Savior, or Christ. Usually, however, Christian Scientists use the word Christ in an entirely impersonal manner, as Paul sometimes used it. Thus Mrs. Eddy defines Christ as "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583). As for the mission of Jesus, Christian Science finds the index to it in his description of himself as the Teacher and the Way. His teaching and example showed the way of salvation for all men and made him the Way-shower as well as the Teacher or Master. Accordingly, the system which he taught was called the Way by the early Christians. This was the first name for Christianity or the Christian religion. This fact appears frequently in the historical book of Acts and in some of the epistles. Originally, therefore, Christianity was, to quote modern translations of Hebrews and II Peter, "the way which he [Jesus] dedicated for us, a new and living way," "the way of the truth."

Christian Science, then, utterly rejects the doctrine which was formulated by Irenæus in the third century, and which was orthodox for over eight centuries, that Jesus, by his death, paid a ransom to the devil and thus wrought the deliverance of those who believed on him. Christian Science likewise rejects the doctrine formulated by Anselm in the twelfth century, that the righteousness of mankind was lost through the fall, and that the death of Jesus was accepted by the Father as an equivalent of the punishment justly incurred by mankind, men being consequently released from punishment on condition of their acceptance through faith of his sacrifice. And of course Christian Science rejects the various refinements of these doctrines which have continued to the present day.

Christian Science finds the supremely efficacious service of Jesus in his life, including his overcoming of death; for he said, "Because I live, ye shall live also." The way which he showed or dedicated was new, as distinguished from the substitutional sacrifices of the Old Testament. It was also living, for he overcame death with the full proof of life and immortality. Furthermore, he dedicated it for us; hence it is available to us, even as it was to him. So the pertinent tenet of Christian Science found on page 497 of Science and Health reads, "We acknowledge Jesus' atonement as the evidence of divine, efficacious Love, unfolding man's unity with God through Christ Jesus the Way-shower; and we acknowledge that man is saved through Christ, through Truth, Life, and Love as demonstrated by the Galilean Prophet in healing the sick and overcoming sin and death."

## Extracts from Letters

"We, a group of men serving together on an American man-of-war, take this opportunity of expressing our loving loyalty to The Mother Church and The Christian Science Board of Directors. Never have we realized the priceless gift of Christian Science more than in these days of war, when in the silent watches of the night it has carried us through seeming danger of fog, mine, and submarine, and has been an ever present Comforter, assuring us of complete and certain safety.

"We wish to express our gratitude for the provision of literature and our vest pocket edition of 'Science and Health with Key to the Scriptures' by Mrs. Eddy, for the good things provided through the Comforts Forwarding committee and the Camp Welfare workers, also for the privilege of holding Christian Science services each Sunday on board our ship. It is a comfort for us to know that we have the loving thoughts and prayers of our friends, and Christian Scientists everywhere helping us in our work, whether it be in the trenches or on the sea. Almost every night those of us who are interested in Christian Science gather for the Lesson-Sermon, or to hear some good article from our publications. We are grateful for the opportunity we have of proving the Principle of Christian Science; and, striving each day to abide 'in the secret place of the most High,' we know that evil shall not come nigh our dwelling.

"The inclosed checks amounting to one hundred dollars are the contribution of the boys and officers on board our ship to the War Relief fund."

"The writer attended to-day a Christian Science service in camp ——— which service was made possible through the Christian Science Welfare committee. The room which was assigned for the meeting overlooked the green hills and dales of the Savannah River valley, and was filled with earnest young soldiers from various regiments of the camp. The hymns sung were all from the little hymnal provided for this purpose by The Christian Science Publishing Society, and were tunefully and lustily sung without any accompanying instrument. The sentiment of the meeting was well expressed by a line of one of the hymns,—

I'll drop my burdens at His feet
And bear a song away.

All were uplifted and helped by the service; this I could read in the faces of the men present, and I heard one young soldier say after service, 'I am not always able to be here on account of my duties, but I was so glad to be here to-day and join in this helpful service.'"

## Heavenly Aspiration

THE words of that universal friend and "mother in Israel," Mary Baker Eddy, remain to inspire every reader of them. She says (Miscellaneous Writings, p. 198): "When wholly governed by the one perfect Mind, man has no sinful thoughts and will have no desire to sin."

It is evident that the action of the wrongdoer gives only partial evidence of the wrong which he thinks. He does not act out every evil plan he devises, but his mind is engaged, if he is a sinner, with sinful thoughts which are of the nature of evil plans. This evil scheming the prophet Micah denounces, saying, "Woe to them that devise iniquity, and work evil upon their beds! when the morning is light, they practise it, because it is in the power of their hand."

There is a homely saying which is illustrative, "He that drinks beer thinks beer." Some men were once declaring their ambitions and desires, and one who might have been expected to have thoughts reaching upward to great things confessed to his sole desire to sit on an ale house bench all day long in a pleasant beery stupor. Working upon such latent desires in many men the brewers plan to subjugate whole nations, and for their own profit will not only stupefy and brutalize the adult manhood of the people, but will also lay traps for the youth of the land, for the very school children, to induce a taste for drink which will provide new patrons for the saloon or taproom. Not only that, they will by way of conspiracy against righteousness in the land proceed in entire disregard of such counsel as is given in Proverbs: "Devise not evil against thy neighbour, seeing he dwelleth securely by thee." It is becoming known that out of the immense profits made by selling for a price something inherently valueless large expenditures have been made through hired politicians and the venal press to pervert the views of citizens and befuddle their sense of loyalty. It is now with those who plot as it was when David complained of such wrongful dealing in his time, "They speak not peace: but they devise deceitful matters against them that are quiet in the land."

Anyone may see clearly enough that a man who has heavenly aspiration will keep himself free from the mental contamination of drug or dogma, beer or propaganda. He will sincerely avoid whatever will stupefy his senses or stultify his mind. He will be intuitively alert to the methods of whisperers injecting false beliefs and hatreds without cause, making the dulled victim accept these as his own thoughts. The true worker lets his thinking begin with Principle. He makes divine Mind his guide and his enlightenment. Therefore, for the sake of others, he takes firm ground against the propaganda intended to confuse citizens after they have had the preliminary stupefaction of the induced drink habit, just as he will protect his own self from the preliminary action of any sense intoxication. Mrs. Eddy says (Miscellaneous Writings, p. 288): "Whatever intoxicates a man, stultifies and causes him to degenerate physically and morally. Strong drink is unquestionably an evil, and evil cannot be used temperately: its slightest use is abuse; hence the only temperance is total abstinence. Drunkenness is sensuality let loose, in whatever form it is made manifest."

Earthly desires tend downward to degradation and punishment. There are statistics to show the suffering, sin, and sorrow connected with the appetite for drink, and they have been presented to the public in convincing form to the point of weariness. The fact is that too many parasitic enterprises thrive upon men when they are degraded, and sympathizers with these make great outcry over any real attempt to cut the taproot of the sin. Christian Science works directly and beneficially with the individual, convincing him of sin, letting him see clearly how to be free from the wrong way of thinking and its consequent suffering. No matter how degraded a man may seem to be, he has not yet destroyed his capacity for hope and faith and love. Faint hope will be stirred in a man when he learns about healing in the case of another. Then perchance he meets the redeemed man or hears of additional cases of healing and is gently led on to aroused faith, which in turn is strengthened by what he comes to know of the goodness of God. Then the mesmerism of sin and evil appetite and fear breaks like bonds parted by flame, and up out of the dark cell of stupor comes a man awakened, renewed, glad of heart, actually glowing with love to God, his Redeemer, and hence compassionate to all mankind.

Mrs. Eddy reminds us (Science and Health, p. 265) that "the aspiration after heavenly good comes even before we discover what belongs to wisdom and Love," and that "the pains of sense quickly inform us that the pleasures of sense are mortal and that joy is spiritual." Now seems to be the very hour for proving this. The whole world has changed. It is an uneasy time for the drug user desiring to remain untroubled in his dream and stupor by any clear view as to man's duty and destiny. The call to awake troubles the earth. The drinker finds that millions are famishing for food and in winter starve with cold, and that food for millions is destroyed to make the liquor with which he defiles and drugs himself—also that ships and trains are used to carry the evil thing from which some men are making seductive profits when food and fuel and raiment might better be carried for the needy. The profit takers will serve their god as long as they can, and they think they can control both the Government and the people's representatives in the interests of their traffic, just as Babylon trafficked in "slaves, and souls of men," but each one of them at some time will understand the message which came to that great city: "The fruits that thy soul lusted after are departed from thee, and all things which were dainty and goodly are departed from thee, and thou shalt find them no more at all."

The question now is, Why do not the men victimized by the great profit-taking machine wake up and deliver themselves from the bondage of that which first drugs and then robs them? The way of heavenward aspiration is open to all. With the very first steps one reaches a new joy. The onward way is gladness and the end is glory.

WILLIAM P. McKENZIE.

## The Lord Is at Hand

THE belief in a distant God lends color to skepticism. The scoffer may well say that he needs immediate help and cannot wait for a god who has to travel to his destination. When Elijah confounded the priests of Baal he taunted them with entertaining this very belief in a distant god. "Cry

Digitized by Google

aloud," he mocked, "for he is a god; either he is talking, or he is pursuing, or he is in a journey, or peradventure he sleepeth, and must be awaked." The sick and sorrowing cry out for a Lord who is at hand, but they cannot find Him in the theologies which claimed to rule before the present world war, and have now been weighed and found wanting. These outworn doctrines and dogmas attempted to circumscribe the infinite. The soldiers and sailors at the front and their families behind the lines have learned through suffering that no reliance can be placed upon a God limited by human attributes. In the hour of peril the superhuman and everywhere present power of the Supreme Being alone availeth; the one and only God explained by Christian Science.

If the theological theories of the past, the theo-sophistries which permitted the world war to brew and burst upon defenseless nations wish to perpetuate themselves, the burden of proof lies upon them to show cause why they should be permitted to live. The false concepts of God which they taught produced the inevitable fruits of error. They alienated the real thinker or terrorized the populace. They reversed Scriptural promises, turned rose gardens into deserts, robbed childhood of its trust in good, womanhood of its rights, and manhood of its courage. Then when the inevitable self-destruction of evil led to an explosion, these fatal misconceptions would have forced the world to face hypnotism and black art without God and without hope.

But Christian Science, which since 1866 had been present in human consciousness, had by the year 1914 become a living power circling the earth. It stayed the hand of this would-be world conquest, uncovered the hidden springs of occultism, corrected debased theology, and opened the way of salvation to the remnant of Israel. In the year 1918 the Lord is widely known to be at hand, not as the anthropomorphic person of an outlived theology, but as omnipresent, omnipotent, omniscient Mind, Spirit, Love. The distressed and disheartened are everywhere learning that God is never "in a journey" but here, instantly available to turn aside the shot, to render harmless the explosion, blow away the poison gas, break the shock, heal the wound, cleanse mind and body, fill the void of separation with the joy of present consciousness. This explanation of God responds to reason and logic, is understood by the receptive thought, feeds the hungering heart, satisfies the affections.

To *materia medica,* scholastic theology, necromancy, and other etceteras of material belief, Christian Science declares in the words of Paul to the Romans, "The night is far spent, the day is at hand: let us therefore cast off the works of darkness, and let us put on the armour of light." With the dawn of spiritual light comes peace with victory, not the result of compromise or condonation, but of scientific forgiveness, which Christian Science shows to be the destruction of evil. On page 121 of Miscellany we read, "This peace is spiritual; never selfish, stony, nor stormy, but generous, reliable, helpful, and always at hand."

The true Lord is always at hand. His kingdom is at hand, His grace, His love. The day of salvation is at hand, of resurrection and ascension. Health, happiness, heaven, are at hand. Therefore Christian Scientists raise their hymns of gratitude on high. In Daniel's vision he saw "one like the Son of man . . . And there was given him dominion, and glory, and a kingdom, that all people, nations, and languages, should serve him: his dominion is an everlasting dominion, which shall not pass away, and his kingdom that which shall not be destroyed." Mrs. Eddy writes on page 174 of Science and Health: "The footsteps of thought, rising above material standpoints, are slow, and portend a long night to the traveller; but the angels of His presence—the spiritual intuitions that tell us when 'the night is far spent, the day is at hand'—are our guardians in the gloom. Whoever opens the way in Christian Science is a pilgrim and stranger, marking out the path for generations yet unborn."

WILLIAM D. MCCRACKAN.

## "Beauty and bounty"

AT this time of the year, and this year of all times, thought turns gladly away from rumors of strife, carnage, and destruction, to the panorama spread over field and forest, reflecting what Mrs. Eddy calls "the beauty and bounty of Life everlasting" (Miscellany, p. 260). It would seem as if the desire to forget self in order to feed the hungry in other lands had opened wide the windows of heaven; and ripening grain, with fruit and flower, tells of the unmeasured provision of divine Love. Truly is God dealing bountifully with us, and this reminds us of the wise man's words, "He that hath a bountiful eye shall be blessed," which may be taken to mean that we on our part must see all good and be ready to share it with others.

We read in the Old Testament that the children of Israel were to have abundant harvests and freedom from destructive insects so long as they were obedient to divine law; indeed it is clear to the student of Christian Science that these pests but typify the errors of mortal mind, for nothing which is unlike the divine nature can be found in the kingdom of God. At this time when spiritual law is being so constantly declared and invoked by Christian Scientists the world over, we see its operations in the promise of a rich harvest, and recall the prophet Joel's words: "Fear not, O land; be glad and rejoice: for the Lord will do great things. . . . the tree beareth her fruit, the fig tree and the vine do yield their strength. . . . And ye shall eat in plenty, and be satisfied, and praise the name of the Lord your God."

This harmonious condition is at present marked in many localities by the disappearance of destructive pests; and as we observe this with thankfulness we begin to look more deeply into "the reign of law," which to the Christian Scientist means the reign of divine Principle and the law which heals the sick, reforms the sinful, and supplies all human need out of the unsearchable riches of divine Love. As we look upon the harvest fields we think upon that harvest of which Jesus spoke when he said to his disciples, "Say not ye, There are yet four months, and then cometh harvest? behold, I say unto you, Lift up your eyes, and look on the fields; for they are white already to harvest. And he that reapeth receiveth wages, and gathereth fruit unto life eternal: that both he that soweth and he that reapeth may rejoice together." This truly is the real cause for our rejoicing, which lifts thought high above the barns filled with plenty, and reminds us that on the world's great battle fields the word of Life is going forth through the literature of Christian Science, and is telling the men of all nations that the teachings of Christ Jesus are as truly for the present hour as they were when he healed the sick and suffering and raised the dead in Palestine.

The student of Christian Science has awakened to find that the fields are indeed white to this greater harvest, and that the fruit which is unto eternal life may be gathered by all who will lay aside pride and prejudice and accept the gift of the Comforter promised by Christ Jesus. We must not forget that the coming of this harvest time means the separation of the tares from the wheat and the consuming of the tares in the fire of divine Love. Were it otherwise, humanity

Digitized by Google

would merely continue to follow the beaten track of mortal belief, in statecraft, religion, and medicine, one generation succeeding another in bondage to sickness, sin, and death, for human wisdom has never been found sufficient to lift men above this bondage. Now, however, we have entered upon the larger hope which is fast unfolding into fruition; and we see unmistakable signs that, as the Master foretold, the angels of God will separate the tares from the wheat, and this in accordance with the law of Love and wisdom. Too long have mortals believed that the tares were as real as the wheat, and so there has been poverty and penury, when instead we should all enjoy the rich provisions of divine Love, and know that in Christ, Truth, all things are ours.

In Christian Science we learn unmistakably that there is no lack in the kingdom of God, and as we to-day look upon the flowers of the field which, our Master said, surpassed in their beauty all the glories of Solomon's court we may well "consider" their lesson if we are ever tempted to be anxious respecting food and clothing. The allness of God means no less than this, that everywhere God reigns. The so-called realm of nature belongs to Mind when spiritually understood, and thus we can echo the psalmist's words, "Thou crownest the year with thy goodness," and again, "Thou makest the outgoings of the morning and evening to rejoice."

ANNIE M. KNOTT.

## Notice

In order to be better prepared to give spiritual help in the Army and Navy through Christian Science literature and in other ways, it is desired to secure the names and present complete mail address of all officers and men in the military, naval, or aero service of the United States and of its allies, who are Christian Scientists or who have shown an interest in Christian Science. Such men, or members of their families, or friends, are requested to send this information to

Christian Science War Relief and Camp Welfare Committee,
236 Huntington Avenue, Back Bay, Boston, Mass.

## Notice

Experienced Christian Science men practitioners from 25 to 40 years of age, who are American citizens residing in the United States and who are available and qualified for service abroad, will please communicate promptly with the Clerk of The Mother Church.

✧ ✧ ✧

# Among the Churches

## Current Notes

BOSTON, MASS.—The First Church of Christ, Scientist. Services (during July and August): 10:45 a.m.; Sunday School, 10:45 a.m.; Wednesday, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

FORT DODGE, IOWA.—Commencing next Sunday [June 16] First Church of Christ, Scientist, will hold services in its new church edifice at the corner of Sixth Avenue North and Twelfth Street. The main part of the church is still unfinished, so the meetings will be in the Sunday school room in the basement until the construction has been completed.

*Fort Dodge Messenger.*

LOWELL, MASS.—Members of First Church of Christ, Scientist, yesterday [June 2] held services in a part of the edifice which is to be their place of worship when completed. The new building is at Andover and Nesmith Streets. Thus far work has progressed to the completion of the Sunday school, and in this space regular services will be held pending the erection of the auditorium, which is to swing out from the present building to Andover Street with a frontage architecturally attractive. The building is of the finest materials throughout, and when completed will add to the appearance of that locality. Until yesterday members of this church worshiped in Colonial Hall.

*Lowell Courier-Citizen.*

HIAWATHA, KAN.—Sunday, June 16, was an eventful day for the members of the Christian Science Society of Hiawatha. At eleven o'clock the new church was dedicated. It is a beautiful building, all the appointments being in perfect harmony.—*The Hiawatha World.*

✧ ✧ ✧

# The Lectures

NASHVILLE, TENN. (First Church).—Virgil O. Strickler, lecturer; introduced by Governor Tom Rye, who said in part:—

Many of us believe that the sun has forever set on the old world and that by force of circumstances we are facing toward new conditions; that another sun is struggling to dissipate the impenetrable gloom of a long black night of war that it may shine on a new world forever blessed by a lasting peace, hallowed and made sacred by the blood of our sons freely shed for the cause of humanity and world-wide democracy. Whether this be true or not, we all fully realize and appreciate the fact that this is indeed a time for liberal thought, research, and impartial investigation, that each and every one may fully understand his duty to his country, to himself, to humanity, and to his God; therefore we should be willing at all times to "sit at the feet of knowledge and learn wisdom."

No matter what individual ideas or opinions we may entertain with reference to the subject for discussion to-night, the fact remains that it has within a generation so impressed itself upon the minds and hearts of our people that you can scarcely find a locality where it is not championed and taught by faithful adherents, until there is marshaled about its standard to-day a vast army of consecrated men and women, marching under its flag to storm the citadel of doubt and unbelief, in an honest effort to bring to humanity the benefits and blessings which they insist their experiences have brought to them.

SANTA CRUZ, CAL. (First Church).—Dr. Walton Hubbard, lecturer; introduced by Noble White, who said in part:—

If there is one thing more than another which stands out boldly in the Old and New Testaments, it is the fact that God protects and provides for mankind. Look where we

Digitized by Google

may, there it is written down how God led those who put their trust in Him, fed those who called upon Him for sustenance, and healed those who cried unto Him out of their distresses.

Looking out upon the many discordant elements which seem to prevail in the world to-day, men and women are filled with an unsatisfied longing for something that seems lacking in the scheme of things, something that will lift them above their material surroundings and draw them nearer that unseen power which men call God, something that will enable them to feel that God is an ever present help, available for every need. Whether they consciously know it or not, they are seeking the truth about God and His relation to man and the universe.

Mrs. Eddy, in her book "Science and Health with Key to the Scriptures," sets forth that truth and proves its teachings in the way our Master, Christ Jesus, commanded his followers to do, by preaching the gospel and healing the sick and the sinner.—*Santa Cruz News.*

NORFOLK, VA. (First Church).—Charles I. Ohrenstein, lecturer; introduced by A. Howard Garrett, who said in part:—

It can properly be said of Christian Science that it is a religion which brings joy and happiness into the lives of its adherents. It banishes fear and brings confidence and peace. And it does this because it changes the conception of God and man, and therefore of existence, from a material to a spiritual basis; and because in place of beliefs it offers demonstrable certainties.

Another reason for this joy and peace may be found in the fact that while all other religious teachings uphold the reality of that triad of woes, sin, disease, and death, declaring that they are enjoined or permitted by God, are requisite and unescapable, Christian Science teaches, on the contrary, that they are not ordained by Deity, hence are unreal and temporal, and in the last analysis unnecessary; that the human belief in them is to be overcome through knowing that they have no part in God's creation. Jesus overcame them, and all other forms of limitation, and said, "Be of good cheer; I have overcome the world," and he also said that his followers should do the works that he did.—*Virginian Pilot.*

KENSINGTON, ENGLAND (Second Church).—John Sidney Braithwaite, lecturer; introduced by Charles W. J. Tennant, who said in part:—

We have arrived at the period in the world's history referred to in the epistle to the Hebrews, when earth and heaven will be shaken so that those things which cannot be shaken may remain. Truth alone is immutable, immortal, and eternal, and therefore cannot be shaken. The day approaches when all will comprehend and obey the saying of Zechariah, "Speak ye every man the truth to his neighbour," for the divine Principle of Jesus' teaching will be the standard for every thought, word, and deed of man. Christian Science, which is rapidly spreading throughout the civilized world, is accomplishing this.

*The Paddington, Kensington, and Bayswater Chronicle.*

NEW HAVEN, CONN. (First Church).—Ezra W. Palmer, lecturer; introduced by Prof. Ernest G. Lorenzen of the Yale Law School, who said in part:—

Our Pilgrim Fathers came to this country to establish a government upon the basis of political and religious liberty. In this New England atmosphere of freedom, there lived in our own days a woman whose life was so pure that she was able to rediscover the spiritual meaning of the Scriptures, and by this means to restore to the Christian religion its power to heal, which it possessed until the third century. This remarkable woman was Mary Baker Eddy, the Discoverer and Founder of Christian Science.

As in the days of our Master, the blind again receive their sight, the lame walk, and the deaf hear, through the application of this understanding of the Word of God. In the short space of fifty years this new-old religion has spread over the entire civilized world, carrying with it everywhere its message of healing and good cheer. Thousands upon thousands have been lifted from sin, sickness, and suffering, and from sorrow and despair to a realization of their glorious liberties as the sons and daughters of God.

SALIDA, COL. (First Church).—William W. Porter, lecturer; introduced by Mrs. Lizzie H. Koehler, who said in part:—

In Genesis it is written, "And God saw every thing that he had made, and, behold, it was very good;" and in Science and Health (p. 390) we read, "It is our ignorance of God, the divine Principle, which produces apparent discord, and the right understanding of Him restores harmony." We thus see that the great need of mankind to-day is a better understanding of God,—or, in other words, we need to know the truth about God, and about man's relation to Him who "is universal, eternal, divine Love, which changeth not and causeth no evil, disease, nor death," as our Leader says on page 140 of Science and Health.

LOCKPORT, N. Y. (Second Church).—Clarence W. Chadwick, lecturer; introduced by Miss Ethel A. Brewer, who said in part:—

It is a demonstrable religion which the world demands to-day as in the first century of the Christian era; and Christian Scientists everywhere are rejoicing that they are able to prove here and now that God, rightly understood, "is a very present help in trouble."

*Lockport Union-Sun and Journal.*

HOQUIAM, WASH. (First Church).—John Randall Dunn, lecturer; introduced by John H. Neef, who said in part:—

To-day Christian Science is proving to the world that Truth is indeed knocking "at the portal of humanity" (Science and Health, Pref. p. vii), and judging by the very rapid crumbling away of "contentment with the past and the cold conventionality of materialism," to use our Leader's words on the same page, humanity is rapidly and eagerly lending an attentive ear.

TORONTO, ONTARIO, CANADA (First Church).—William D. Kilpatrick, lecturer; introduced by William M. Hall, who said in part:—

Christian Science unfolds to the student the divine law of life, and this law or rule of living is so scientific, and yet so simple, that a wayfaring man need not err therein. It requires no great learning, no erudition. It requires only a sincere desire to know God, honestly exercised according to God's rule or law. As Christian Science is unfolded to the beginner, the problem of evil, which has confused the ages, is explained; and under the touch of the law of Truth, or Science, the desire to do evil diminishes and finally disappears from the human consciousness. Christian Science never leaves the student where it found him: it lifts him morally and spiritually to a higher plane of action; it cleanses his mentality of the dread and darkness of an unexplored existence; it assures him of the absolute certainty in the eternality of being, and man as the image and likeness of God.

Digitized by Google

would merely continue to follow the beaten track of mortal belief, in statecraft, religion, and medicine, one generation succeeding another in bondage to sickness, sin, and death, for human wisdom has never been found sufficient to lift men above this bondage. Now, however, we have entered upon the larger hope which is fast unfolding into fruition; and we see unmistakable signs that, as the Master foretold, the angels of God will separate the tares from the wheat, and this in accordance with the law of Love and wisdom. Too long have mortals believed that the tares were as real as the wheat, and so there has been poverty and penury, when instead we should all enjoy the rich provisions of divine Love, and know that in Christ, Truth, all things are ours.

In Christian Science we learn unmistakably that there is no lack in the kingdom of God, and as we to-day look upon the flowers of the field which, our Master said, surpassed in their beauty all the glories of Solomon's court we may well "consider" their lesson if we are ever tempted to be anxious respecting food and clothing. The allness of God means no less than this, that everywhere God reigns. The so-called realm of nature belongs to Mind when spiritually understood, and thus we can echo the psalmist's words, "Thou crownest the year with thy goodness," and again, "Thou makest the outgoings of the morning and evening to rejoice."

ANNIE M. KNOTT.

## Notice

In order to be better prepared to give spiritual help in the Army and Navy through Christian Science literature and in other ways, it is desired to secure the names and present complete mail address of all officers and men in the military, naval, or aero service of the United States and of its allies, who are Christian Scientists or who have shown an interest in Christian Science. Such men, or members of their families, or friends, are requested to send this information to

Christian Science War Relief and Camp Welfare Committee,
236 Huntington Avenue, Back Bay, Boston, Mass.

## Notice

Experienced Christian Science men practitioners from 25 to 40 years of age, who are American citizens residing in the United States and who are available and qualified for service abroad, will please communicate promptly with the Clerk of The Mother Church.

✧ ✧ ✧

# Among the Churches

## Current Notes

BOSTON, MASS.—The First Church of Christ, Scientist. Services (during July and August): 10:45 a.m.; Sunday School, 10:45 a.m.; Wednesday, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

FORT DODGE, IOWA.—Commencing next Sunday [June 16] First Church of Christ, Scientist, will hold services in its new church edifice at the corner of Sixth Avenue North and Twelfth Street. The main part of the church is still unfinished, so the meetings will be in the Sunday school room in the basement until the construction has been completed.

*Fort Dodge Messenger.*

LOWELL, MASS.—Members of First Church of Christ, Scientist, yesterday [June 2] held services in a part of the edifice which is to be their place of worship when completed. The new building is at Andover and Nesmith Streets. Thus far work has progressed to the completion of the Sunday school, and in this space regular services will be held pending the erection of the auditorium, which is to swing out from the present building to Andover Street with a frontage architecturally attractive. The building is of the finest materials throughout, and when completed will add to the appearance of that locality. Until yesterday members of this church worshiped in Colonial Hall.

*Lowell Courier-Citizen.*

HIAWATHA, KAN.—Sunday, June 16, was an eventful day for the members of the Christian Science Society of Hiawatha. At eleven o'clock the new church was dedicated. It is a beautiful building, all the appointments being in perfect harmony.—*The Hiawatha World.*

✧ ✧ ✧

# The Lectures

NASHVILLE, TENN. (First Church).—Virgil O. Strickler, lecturer; introduced by Governor Tom Rye, who said in part:—

Many of us believe that the sun has forever set on the old world and that by force of circumstances we are facing toward new conditions; that another sun is struggling to dissipate the impenetrable gloom of a long black night of war that it may shine on a new world forever blessed by a lasting peace, hallowed and made sacred by the blood of our sons freely shed for the cause of humanity and world-wide democracy. Whether this be true or not, we all fully realize and appreciate the fact that this is indeed a time for liberal thought, research, and impartial investigation, that each and every one may fully understand his duty to his country, to himself, to humanity, and to his God; therefore we should be willing at all times to "sit at the feet of knowledge and learn wisdom."

No matter what individual ideas or opinions we may entertain with reference to the subject for discussion to-night, the fact remains that it has within a generation so impressed itself upon the minds and hearts of our people that you can scarcely find a locality where it is not championed and taught by faithful adherents, until there is marshaled about its standard to-day a vast army of consecrated men and women, marching under its flag to storm the citadel of doubt and unbelief, in an honest effort to bring to humanity the benefits and blessings which they insist their experiences have brought to them.

SANTA CRUZ, CAL. (First Church).—Dr. Walton Hubbard, lecturer; introduced by Noble White, who said in part:—

If there is one thing more than another which stands out boldly in the Old and New Testaments, it is the fact that God protects and provides for mankind. Look where we

Digitized by Google

may, there it is written down how God led those who put their trust in Him, fed those who called upon Him for sustenance, and healed those who cried unto Him out of their distresses.

Looking out upon the many discordant elements which seem to prevail in the world to-day, men and women are filled with an unsatisfied longing for something that seems lacking in the scheme of things, something that will lift them above their material surroundings and draw them nearer that unseen power which men call God, something that will enable them to feel that God is an ever present help, available for every need. Whether they consciously know it or not, they are seeking the truth about God and His relation to man and the universe.

Mrs. Eddy, in her book "Science and Health with Key to the Scriptures," sets forth that truth and proves its teachings in the way our Master, Christ Jesus, commanded his followers to do, by preaching the gospel and healing the sick and the sinner.—*Santa Cruz News.*

NORFOLK, VA. (First Church).—Charles I. Ohrenstein, lecturer; introduced by A. Howard Garrett, who said in part:—

It can properly be said of Christian Science that it is a religion which brings joy and happiness into the lives of its adherents. It banishes fear and brings confidence and peace. And it does this because it changes the conception of God and man, and therefore of existence, from a material to a spiritual basis; and because in place of beliefs it offers demonstrable certainties.

Another reason for this joy and peace may be found in the fact that while all other religious teachings uphold the reality of that triad of woes, sin, disease, and death, declaring that they are enjoined or permitted by God, are requisite and unescapable, Christian Science teaches, on the contrary, that they are not ordained by Deity, hence are unreal and temporal, and in the last analysis unnecessary; that the human belief in them is to be overcome through knowing that they have no part in God's creation. Jesus overcame them, and all other forms of limitation, and said, "Be of good cheer; I have overcome the world," and he also said that his followers should do the works that he did.—*Virginian Pilot.*

KENSINGTON, ENGLAND (Second Church).—John Sidney Braithwaite, lecturer; introduced by Charles W. J. Tennant, who said in part:—

We have arrived at the period in the world's history referred to in the epistle to the Hebrews, when earth and heaven will be shaken so that those things which cannot be shaken may remain. Truth alone is immutable, immortal, and eternal, and therefore cannot be shaken. The day approaches when all will comprehend and obey the saying of Zechariah, "Speak ye every man the truth to his neighbour," for the divine Principle of Jesus' teaching will be the standard for every thought, word, and deed of man. Christian Science, which is rapidly spreading throughout the civilized world, is accomplishing this.

*The Paddington, Kensington, and Bayswater Chronicle.*

NEW HAVEN, CONN. (First Church).—Ezra W. Palmer, lecturer; introduced by Prof. Ernest G. Lorenzen of the Yale Law School, who said in part:—

Our Pilgrim Fathers came to this country to establish a government upon the basis of political and religious liberty. In this New England atmosphere of freedom, there lived in our own days a woman whose life was so pure that she was able to rediscover the spiritual meaning of the Scriptures, and by this means to restore to the Christian religion its power to heal, which it possessed until the third century. This remarkable woman was Mary Baker Eddy, the Discoverer and Founder of Christian Science.

As in the days of our Master, the blind again receive their sight, the lame walk, and the deaf hear, through the application of this understanding of the Word of God. In the short space of fifty years this new-old religion has spread over the entire civilized world, carrying with it everywhere its message of healing and good cheer. Thousands upon thousands have been lifted from sin, sickness, and suffering, and from sorrow and despair to a realization of their glorious liberties as the sons and daughters of God.

SALIDA, COL. (First Church).—William W. Porter, lecturer; introduced by Mrs. Lizzie H. Koehler, who said in part:—

In Genesis it is written, "And God saw every thing that he had made, and, behold, it was very good;" and in Science and Health (p. 390) we read, "It is our ignorance of God, the divine Principle, which produces apparent discord, and the right understanding of Him restores harmony." We thus see that the great need of mankind to-day is a better understanding of God,—or, in other words, we need to know the truth about God, and about man's relation to Him who "is universal, eternal, divine Love, which changeth not and causeth no evil, disease, nor death," as our Leader says on page 140 of Science and Health.

LOCKPORT, N. Y. (Second Church).—Clarence W. Chadwick, lecturer; introduced by Miss Ethel A. Brewer, who said in part:—

It is a demonstrable religion which the world demands to-day as in the first century of the Christian era; and Christian Scientists everywhere are rejoicing that they are able to prove here and now that God, rightly understood, "is a very present help in trouble."

*Lockport Union-Sun and Journal.*

HOQUIAM, WASH. (First Church).—John Randall Dunn, lecturer; introduced by John H. Neef, who said in part:—

To-day Christian Science is proving to the world that Truth is indeed knocking "at the portal of humanity" (Science and Health, Pref. p. vii), and judging by the very rapid crumbling away of "contentment with the past and the cold conventionality of materialism," to use our Leader's words on the same page, humanity is rapidly and eagerly lending an attentive ear.

TORONTO, ONTARIO, CANADA (First Church).—William D. Kilpatrick, lecturer; introduced by William M. Hall, who said in part:—

Christian Science unfolds to the student the divine law of life, and this law or rule of living is so scientific, and yet so simple, that a wayfaring man need not err therein. It requires no great learning, no erudition. It requires only a sincere desire to know God, honestly exercised according to God's rule or law. # Testimonies of Healing

I first heard of Christian Science through attending a lecture several years ago. At the time I made no effort to take up its study, but as the months went by I was getting more and more dissatisfied with my method of living, which corresponded with Paul's description in one of his epistles: "For the good that I would I do not: but the evil which I would not, that I do." At this juncture a friend who was a great physical sufferer secured a copy of the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and got relief from its study. Later we began attending the Wednesday evening meetings together, and from then on my interest in the subject grew. With consistent study and the application of its truth I have received many blessings and much comfort. Though never much of a sufferer from physical ailments, those that have cropped up have been successfully overcome. The mental harmony received from even a slight understanding of this beautiful truth and the falling away of bad habits have been the source of great joy to me. Christian Science has made me more loving, patient, and reliant, and by letting my light shine I hope that others will be encouraged to come and share the blessings that all who turn to it receive through its ministration.

Before closing I would like to say how wonderfully helpful the literature of the Publishing Society has been. Many a Bible point has been cleared up by reading the articles appearing therein. One rejoices in a keener sense of man's dominion and freedom over the whole earth (false thinking), and nothing sets this out so clearly as the teaching of Christian Science. I am most grateful that I was led to take up this study.—Cyril P. Bird, Melbourne, Australia.

✧

Christian Science has been a great blessing to me. I feel that I must acknowledge my indebtedness to God and to our Leader for the light of Truth which has cured me of many ills. I was a regular attendant at church, but though I did my best to worship God I never found any comfort in my religion and had to force myself to go to church. I had heard sermons preached against Christian Science and regarded it as deadly heresy, though I knew nothing whatever about it.

I had endured much suffering for years, and was constantly treated by doctors from whom I received much kindness, but my relief from pain was never more than temporary. For about six years I had suffered from "hives" and each year brought greater pain and discomfort. Our family doctor told me there was no cure for this trouble, and I would have to endure it for the rest of my life, so I looked with dread into the future. For three years I suffered constantly from catarrh. The back of my nose had been burned several times, and I used material means daily, but continued to suffer. Whenever the slightest bit tired I had intense pain in the right side, the result of an operation years before, which left the muscles weak. I spent many sleepless nights because of this, and the little sleep I did get was restless and unrefreshing. I suffered constantly from headache and backache. I was studying hard, attending lectures, and working in an art school, and the pain in my head day and night made the effort to think an agony. Our family doctor, other doctors, and many specialists were consulted, but none afforded me any relief. Of all these ailments I was cured by Christian Science.

In April, 1914, I attended a Christian Science lecture in Richmond, Surrey. I went in order to take two people who were very anxious to hear the lecture, but who did not know the way to the hall. In a spirit of hostile resentment I criticized all I heard. A fortnight later, however, I asked my mother to agree to my having Christian Science treatment, saying it could not do me any harm, and might do me good. My mother wrote to a Christian Science acquaintance and asked for the address of a practitioner. An appointment was made, and on the twentieth of April, 1914, I had my first treatment. A wonderful peace entered my consciousness, and the physical healing was soon complete. I began reading "Science and Health with Key to the Scriptures" and felt great joy when I read of a God who is Love. The practitioner who helped me did so very lovingly, and her definite assurance that God was with me lifted fear and worry from my life. Two boils, an abscess in the mouth, and several other minor complaints have also been overcome.

I thank God daily for the wonderful teaching which our beloved Leader, Mrs. Eddy, has given us, and for the joy it is to read the Bible. I had one for ten years but seldom read it, and knew nothing about the book. I find all the Christian Science periodicals a great help, and long to be able to help others to know God. The past year has brought many seeming trials, but I now feel stronger and have more trust in Truth. Christian Science means more to me every day, and I also feel more and more grateful for the knowledge of it.

(Miss) Dorothy M. T. Litster, Punjab, North India.

✧

I have been healed of several afflictions through the earnest study and application of Christian Science, and the aid of a kind practitioner,—organic and stomach trouble, rheumatism, and enlarged joints of my hands and feet. Soft corns, also, have disappeared.

A dear friend who heard I was suffering with stomach trouble brought me some literature, and told me she had been cured in one treatment of the same disease, and that her daughter was healed of a throat trouble in one absent treatment. She said she did not know much about Christian Science, but had begun its study and knew it would help me, if I would try it. I read some of the literature, but did not seem to get any understanding, so I went to a practitioner. The first treatment gave me instantaneous relief. She also guided me to the study of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I studied this book all the spare time I had, and knew that if I could put the teaching therein into practice, I would be healed. I went back to the practitioner the same week in order to express my gratitude for her work already done, and had another treatment with the result that I was greatly helped both mentally and physically. I continued the study of Science and Health, and at the end of three weeks was completely healed of stomach trouble of six years' standing. I felt so grateful for this healing that I asked for no other relief, but took up the study of the Lesson-Sermons, attended church regularly and with a sincere desire to gain a better understanding of this great truth which had healed me, and earnestly prayed for more light.

A desire came to me to give to others of what I had received both in spiritual and material ways. Channels opened. Wherever I saw need, in church and outside, I tried to do my best. I also learned that I must study where and when to cast my bread upon the waters. To say little and do more, always gave the best results.

No special notice was taken of time, until I found myself in perfect health. Looking back to the beginning of my

Digitized by Google

study, three months had passed. In the meantime I had smaller difficulties to overcome, such as colds, deafness, pleurisy, burns, all of which disappeared through my own work in Christian Science. When the symptoms appeared I held fast to Truth; no material remedy was used from the first. I find never to say I am sick, not even to myself, is a very great help to destroy discord of every kind. Fifteen months ago, however, with a cold came bronchitis, which I was not able to overcome, and I asked for help and was healed in one absent treatment. There has been no return of this trouble. My eyes are much stronger than in former years. I have also been greatly helped mentally and financially.

The church service gives much needed food, and the testimonies are a great help; I therefore give mine with the hope it may encourage others. Often I have applied to my own case the truth expressed in testimonies. One in particular I would like to mention as it gave me great help. It was given in our church by a gentleman who had been bothered with mice in his office. He quoted from the ninety-first psalm, "There shall no evil befall thee, neither shall any plague come nigh thy dwelling." Through the understanding of this Scripture gained through the light which Christian Science throws upon the Bible, the mice, or plague, disappeared. I applied this testimony to my own case, for there were gophers in our yard. Not one plant, flower, or vegetable has been destroyed since this demonstration took place about fifteen months ago, and it proved to me that God does give man dominion over all the earth.

These blessings are but a few of the many which have come to me through the study and application of Christian Science. I began this study in March, 1916. My heart is filled with thankfulness to God and to our Way-shower, Christ Jesus, also with gratitude to our beloved Leader, Mrs. Eddy, for her wonderful work to mankind. I am very grateful to the church, to the dear friends who helped me, and to those who first brought me the literature. My daily prayer is that I may grow in grace and get a better understanding of Christian Science, and do the will of our Father-Mother God.—(Mrs.) E. W. Miller, San Francisco, Cal.

✧

When I first heard of Christian Science I was in a very weak state of health, and had been so for a long time. I began immediately to study the literature, and during the first week I knew for a certainty that it was the truth, for I was instantaneously healed of severe pain.

At that time my hair was falling out and there were bald patches on my head, although two doctors had tried to help me. One morning I put aside the lotion and decided to try Christian Science. I began by wondering what the Bible had to say about one's hair. The only words I could recall were those from Matthew: "The very hairs of your head are all numbered." At first I thought there was not much to be learned from that, but such a sense of the infinitude of God, good, was gained from it that I did not need to seek farther. The demonstration seemed to be made from that moment. I went on with my studies of Christian Science, and gave up looking at the bald places.

A few weeks later I discovered a new growth of hair over each bald place. I felt overjoyed that I had gained another proof of the power of Truth; and after overcoming my fear of speaking in public I gave my testimony at a Wednesday evening meeting. When the meeting was over a gentleman said to me that he felt much interested in my testimony as he was formerly a medical practitioner—but was now studying Christian Science—and he knew the medical belief about it all. I replied that I did not know what it was, and he said that perhaps if I had known, the demonstration would not have been made. Then I took a wrong step, for I agreed with him; and unconsciously I retained that wrong thought for three years, gathering more so-called material knowledge all the while. Suddenly I became aware of another bald patch on my head, and my heart sank within me. Error whispered that perhaps I would not make the demonstration this time, as I knew so much more about the condition; but I remembered the counsel, "Agree with thine adversary quickly," and struck straight off at that lie. I very quickly saw that no amount of so-called material knowledge could ever hinder the activities of Truth. The result was that I soon lost all sense of fear, and my hair to-day has a normal growth.

I have written this testimony with a desire to help some one to understand the truth, also in thankfulness to God and gratitude to Mrs. Eddy for the many blessings which have come to me through Christian Science.

(Mrs.) Caroline G. Rowland, Sheffield, England.

✧

It is nearly ten years since I first came to Christian Science for healing. I was then a physical wreck and had been condemned to die by the physicians attending me. They pronounced the trouble Bright's disease and nervous breakdown. They also said I had serious stomach trouble. I had walked the floors and streets for three months with scarcely an hour's sleep, for I was suffering from sleeplessness. My friends had asked me many times why I did not try Christian Science, but I was stubborn and would not investigate.

One morning I went out into the woods and falling down on my knees prayed God to show me the way out of my agony; and as I was hungering and thirsting after righteousness, God did answer and in His own way. The next day the still, small voice of Truth led me to seek help in Christian Science. That same morning I went to a practitioner, and I shall never forget the peace and harmony that came over me after the first treatment. I continued the treatment for two weeks and at the end of that time felt like a new man. I went back to work a new man indeed, with God in my heart and thoughts continually. Many times I have called upon Him since, and when I have done my part the sweet peace has always come.

Christian Science has been everything in the world to me since my healing and without it I could never have accomplished what I have since gaining some understanding of the truth of being. It is indeed the "pearl of great price," which I would rather have than anything on earth. It has brought peace, happiness, a home, prosperity, health, joy, and above all the spiritual uplift which makes for heaven.

If those who are looking into Christian Science will only do their part, what a blessing is waiting for them! God is indeed All-in-all. I am writing this testimony to show my gratitude and appreciation in a small way for what Christian Science has done for me, in the hope that it will reach some weary traveler and brighten the road to Life and Love.

H. A. Cooley, Oklahoma City, Okla.

✧

It is truly with a heart filled with gratitude that I give my testimony. I am grateful not only for the physical healing, but for all the blessings that have come to me through the study of Christian Science, including the better understanding of God and of man's relation to Him. Twelve years

Digitized by Google

ago I had come to the place where my necessity was God's opportunity. I not only was a physical wreck but had lost all faith in the orthodox churches, and could no longer attend the services, since to do so seemed hypocritical.

In the fall of 1905 such a complication of diseases set in that the physician said I must go to the hospital and submit to an operation, which held out no hope of permanent healing, merely relief from the trouble that was causing the greatest suffering. He had taken me to several specialists, and they all agreed that my throat and lungs were in a bad state and that I had no reserve strength, making it hard to build me up sufficiently to fight the condition. I told the physician I could not go to the hospital; as a result the greater part of the winter was spent in bed, and by the next spring I was very much worse. One day the thought came to me that I had tried all doctors had to offer and they had failed to give me any permanent help, so that I should at least be willing to see what Christian Science was. I therefore asked for treatment from a practitioner, and I had not talked to her more than half an hour when I felt that Christian Science was just what I wanted.

My healing was slow, but from the first there was improvement, and I was happier and more contented. I had only asked to be treated for the condition that was said to necessitate an operation, as this seemed to be the thing that I feared the most; I was healed, however, not only of this condition but also of very severe sick headaches, stomach trouble, and a supposedly hereditary bowel disorder from which I had suffered since childhood. Later the doctor asked permission to examine me, and I gave my consent, knowing that he would find me well in every way. He gave me a thorough examination and then said that Christian Science had done for me what he tried to do and could not. I have always been very grateful for this just acknowledgment of my healing, coming as it did from a physician who knew the conditions. I have had better health in the last twelve years than ever before.

Christian Science is a daily help to me, and words cannot express my gratitude to our beloved Leader for giving us this blessed truth. My one desire is to be a true follower of her teachings.

(Mrs.) Della Fuller Lawry, Pittsburgh, Pa.

✧

The following experience is given as another proof of man's oneness with God. It was my duty recently to take a civil service examination for a position which I had held one term. I had had practical experience with the work, but when it came to taking a theoretical examination based on book knowledge, as I had been told most civil service examinations were, I began to think it was a pretty hard proposition I was up against; however, I went to work mentally to know that intelligence belongs to God and that man as His perfect idea is the expression of intelligence. When I entered the classroom I was as fearless as if I had been going to do any usual work, and the peace experienced was worth all the effort. I called up the practitioner whom I had asked to help me a couple of days before and told him that I was already successful, no matter what grade the examination paper had on it. In a few days I received a report which was excellent, being number one on the list for this district, and my joy when the appointment for duty was received, can be imagined. Surely it has been proved to me that, as our Leader says (Science and Health, Preface, p. vii), "to those leaning on the sustaining infinite, to-day is big with blessings."

I am so grateful for the protecting influence of Christian Science, and the knowledge that we can use the understanding we have in every time of trial has indeed been a source of much comfort to me. I hope this testimony will give encouragement to those who have been tried and tested as I have been.

When I was about twelve years of age I was healed through Christian Science of granulated eyelids, from which I had suffered intensely, and was able to lay aside glasses which I had worn for about three years. My mother some few years before had been healed of a disease which had been pronounced incurable by the best specialists that could be had at that time, but until my own healing I had not seemed to manifest much interest in Christian Science. For over eighteen years now, however, I have depended absolutely on it. I have a little son and daughter and they have been healed of many ailments, but for the most part have escaped the diseases that children seem heir to, through our application of the truth as given in the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

A year and a half ago my husband passed on, leaving me with a small business and the two children to care for. Many, many times I have been tempted with discouragement, but with sincere prayer for guidance I have been protected far beyond what I could then see, which shows me clearly that as we turn away from the evidence of the senses unreservedly to God, the giver of every perfect gift, "with whom is no variableness, neither shadow of turning," it will be proved to us that the answer to our problem is already in existence, and before we call, He will answer. In the eighth chapter of Romans we read, "For I reckon that the sufferings of this present time are not worthy to be compared with the glory which shall be revealed in us."

I am grateful for the physical healings, but far more so for the spiritual uplift received through the study of the Bible together with Science and Health. I am also grateful to Mrs. Eddy, through whom this new-old truth was again given to mankind to explain to them the truth about God and man's relation to Him. I pray that my life may attest my sincerity and gratitude for Christian Science.

(Mrs.) Gertrude Parham Pearson, San Pedro, Cal.

I wish to verify in every detail my daughter's testimony and to say, "The half was not told." Christian Science has indeed been our only help for many years. I also wish to express my own appreciation of Christian Science in word and deed.—(Mrs.) Lucy B. Parham.

✧

Last autumn, while I was riding home on a street car one day, a small particle flew into one of my eyes, almost blinding me. I became so full of fear it seemed as if I must go to an oculist. Then I remembered that my brother would soon be home and he could remove it for me. So the arguments went on.

There was no one at home when I arrived. I waited for some time, until I realized that something must be done. In other problems, either through reading Christian Science literature or through the aid of a practitioner, help had been received. I thought of this and Truth seemed to ask, "On whom are you depending, man or God?" A great sense of peace came to me, and I remembered that in working out a problem a few weeks before through the help of a practitioner, this same thought had been given me. I knew this was a chance to prove for myself the power of God. I went to my room, took my copy of the textbook, "Science and

Digitized by Google

Health with Key to the Scriptures" by Mrs. Eddy, and read, with some difficulty. At times I could read but a few words. In less than an hour all pain had disappeared and there was perfect freedom. There was not a trace of inflammation or pain left, and I felt very grateful for God's ever present help.

I am truly grateful for Christian Science and all the channels provided for spreading the truth.

(Miss) CLARA BAKER, Toledo, Ohio.

✧

In giving my testimony of healing I hope it may help others as others have helped me. Words fail me to express my gratitude for blessings that Truth has brought to me. It has been about twelve years since Christian Science was presented to me. I did not take up its study for physical healing, although I was in need of it; I came for the healing of sorrow. But I have been healed of stomach trouble of years' standing, which doctors told me I would never be free from. I have been healed of sick headache, colds, hives, ptomaine poisoning, neuralgia, and many minor ailments.

One healing I am most grateful for was that of hemorrhoids. I had been having them at intervals, and the last attack came the day before Thanksgiving, four years ago. I took my books and went to work; but the error did not seem to vanish as it should. Thanksgiving morning error tried to tell me I could not go to church, but I went. There was a sense of pain all the time I was going and all during the service and when I started home. When it left me, I do not know. The error was so completely obliterated from my consciousness that it never came to my mind again that I had ever had this trouble till over three years afterward when I heard a lady say she was having treatment for this same thing. Then it came to me that I at one time had suffered from the same trouble. I have also had some beautiful demonstrations over business problems.

On page 201 of Science and Health we read, "The best sermon ever preached is Truth practised." My prayer is that I may live this truth, that my light may shine and lead others to the right way. I am very grateful for the privilege of class instruction and for the blessed privilege of membership in The Mother Church and in one of its branch churches, and that the way has been provided so that we can through our own church help our brothers in need in France and Belgium.

I am thankful for our beloved Leader and the textbook she gave us, for our literature, and for every channel for good.—(Mrs.) DORA M. HENSLEY, Bowie, Texas.

✧

I wish to express my gratitude for what Christian Science has done for me, having been healed of a so-called incurable trouble, tubercular disease of the throat and lungs. I had gone to a number of institutions, and had been given up a number of times by prominent physicians. I had suffered for several years, hardly knowing what it was to feel well. I lost my speech for weeks at a time, getting it back only to lose it again, and had to give up my position, as I was hardly able to go out alone. A friend heard about my condition and asked me why I had never tried Christian Science. She told me that she thought if I went to a practitioner I would be healed. I promised to go, and did so the next day. From the first treatment I began to feel better, and that very evening I went back to work and have been working ever since. Mumps and colds have also been quickly overcome with the help of a practitioner. I am very thankful to God, and grateful to Mrs. Eddy for the blessings I have received.

(Mrs.) RUTH LA GRONE, New Orleans, La.

For ten months I was sick, very much distressed, melancholy, and crying every day; I would get hysterical crying spells, when no one could console me. My body was puffed out abnormally, and my condition puzzled the doctors; the medicines and pills were changed often—I wanted something else, something different. A friend finally urged me to call a Christian Science practitioner. I did so, and after talking with her I felt a great deal better, but still was uneasy about my physical condition. The second day I spoke to her of the fear I had that I might have to go to bed before my body would become normal. Right there and then was explained to me what God is, and man's relation to God, and I was healed in two days—stepped out of the dark into the light, never to doubt what God can do. I stepped over the threshold from sickness to health, or from fear to faith in God alone.

I can sincerely say that I am grateful to our beloved Leader, Mrs. Eddy, for giving to us this wonderful truth, for the textbook, "Science and Health with Key to the Scriptures," and for our daily prayer in the Church Manual (see Art. VIII, Sect. 4), which comes to my thought many times a day and is a great help to me and to my family.

(Mrs.) NELLIE LESETH, Chicago, Ill.

# From the Press

[*Northallerton* (Yorkshire, England) *News*]

The most urgent need of the hour, writes the Rev. Henry Sloane Coffin, D.D., is for seers who, believing in the necessity and the possibility of a new world based on and pervaded by love, can dream it into pictures, as John on Patmos beheld and portrayed the holy city coming down from God out of heaven. Visions fire men's imaginations, kindle their hopes, enlist their loyalties, and call out their resolves. Let fancy, prompted by Christian love, play upon all the situations and circumstances of life you confront. Dream what a household's ways, a school's studies, a factory's work, a farm's life, a community's pleasures, a nation's influence, a church's ministry, would be like were they controlled by such love as was divinely commended to us on Calvary. Count no time wasted spent in building such castles in the air. Suppose they are in the air; that is where they should be, aloft and conspicuous; and gradually the foundations of many generations can be raised up to give them solid and substantial substructure. Such gleaming air castles on the horizon are of more actual worth to humanity than all the skyscraping steel edifices that house its present business. Nothing is comparable in value to the ideal made concrete in vision. Men must see what may be before they determine that it is so good that they will venture their all to make it come true.

[*Suburban News and Herald*, Cleveland, Ohio]

The activities of the Christian Scientists in connection with the war have excited much interest. At the inception of the world clash the opinion was entertained in certain circles that because of their teachings the Scientists would be likely to class themselves with the Quakers and other sects with views adverse to war. But that idea was soon dispelled. Many of the faith abroad early rallied to the colors. Then so soon as the stories of suffering in the war zone were received from over the seas, the church authorities instituted a War Relief fund from which hundreds of thousands of dollars were sent to be used for the needy regardless of creed. When the United States became involved, the Directors

Digitized by Google

issued a statement explanatory of the attitude of the church and urging loyalty that should transmute itself in all manner of service, with the result that a large number of the adherents were promptly enrolled in the Army and Navy. To-day the church has recognition in the presence of Christian Scientists as chaplains in both branches of the service, while in the cantonments everywhere there are authorized representatives who are ministering to the soldiers without interference or friction. The church also maintains a very large and successful department to provide knitted goods and various comforts for the soldiers and for relief work in Belgium and France. At the time of the Halifax explosion the Scientists in Boston chartered the first train available to rush supplies to the unfortunate, and when the Red Cross and the doctors, finding it impossible to obtain a train, asked the privilege, cars were provided that they might also hasten to the stricken city. This was one of the first relief trains to reach Halifax. These and other similar incidents have contributed to afford many a new viewpoint from which to regard those of this way of thinking, and have silenced old antagonisms, shamed intolerance, and made for religious freedom that should be accorded to all creeds.

[*The Spectator*, London, England]

Mr. Asquith delivered the Romanes Lecture at Oxford, taking as his subject, "Some Aspects of the Victorian Age." The newspaper reports were necessarily brief, as the lecture is to be published in book form. But we gather that Mr. Asquith disregarded the modern tendency to jeer at the Victorian age, and that he did justice to some of the many great men of that time. A reaction in their favor is coming, and is indeed inevitable. In science and industry the Victorian age transformed the world even more completely than did the age of Columbus and the Renaissance.

[*Belmont* (Mass.) *Patriot*]

(Found on the body of an Australian soldier)

Ye that have faith to look with fearless eyes
  Beyond the tragedy of a world at strife,
And know that out of death and night shall rise
  The dawn of ampler life:
Rejoice, whatever anguish rend the heart,
  That God has given you the priceless dower
To live in these great times and have your part
  In Freedom's crowning hour,
That ye may tell your sons who see the light
  High in the heavens—their heritage to take—
"I saw the powers of darkness take their flight;
  I saw the morning break."

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlet

"Christian Science: A Religion that Heals through Spiritual Law," by Virgil O. Strickler, is now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# The Rendezvous of Good

**The earth is being torn by Armageddon, the great conflict between the positive forces of good and the negative forces of evil.**

It is not necessary for the moment for all progressive world citizens to agree in detail upon all subjects, in order to work together for the establishment of righteousness on earth.

The fields of grain must first be saved from the destroyer before there can be need of final winnowing of the grain.

In the crucial hour the world is coming to recognize the uplifted standard of THE CHRISTIAN SCIENCE MONITOR, international daily newspaper.

The Monitor is standing firmly with democracy against autocracy, with abstinence and sobriety against license and insobriety, with the cause of equality for the sexes against the forces which seek to perpetuate the disfranchisement of woman, and with the cause of medical and religious freedom against the reactionary elements of organized medicine and proscriptive religion.

The Christian Science Monitor, 3c a copy, is on general sale throughout the world at news stands, hotels, and Christian Science reading rooms. A monthly trial subscription by mail anywhere in the world for 75c. Single copy sent on receipt of 3c stamp.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
BOSTON U.S.A.

*Sole publishers of all authorized Christian Science literature*

# "Thinking in Hemispheres"

"Most men think in bailiwicks, many think in shires, occasionally one thinks in nations—only a few ever think in hemispheres," a great statesman is reputed to have said. The reader of

## The Christian Science Monitor

*An International Daily Newspaper*

is encouraged to think in hemispheres.

In news, in editorial attention, in advertising, Melbourne is the neighbor of New York, London is over the fence from Valparaiso.

From its own news bureaus and special correspondents all over the world the Monitor collects the news of the world, and circulates back the printed papers to every country on the globe.

It is indispensable to the man or woman of any creed or country who can read English, and who would make his view world-wide.

The Christian Science Monitor, 3c a copy, is on general sale throughout the world at news stands, hotels, and Christian Science reading rooms. A monthly trial subscription by mail anywhere in the world for 75c. Single copy sent on receipt of 3c stamp.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## The Christian Science Monitor

AN INTERNATIONAL DAILY NEWSPAPER

Founded, 1908, by Mary Baker Eddy.

Published daily, except Sundays and legal holidays. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions to the columns of the Monitor should be addressed: Editor, The Christian Science Monitor.

Subscription price, payable in advance, postpaid, to all countries: One year, $9.00; six months, $4.50; three months, $2.25; one month, 75 cents; single copy, 3 cents.

## The Christian Science Journal

Founded, 1883, by Mary Baker Eddy.

This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, list of Christian Science Practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 30 cents.

## Der Herold der Christian Science

Founded, 1903, by Mary Baker Eddy.

A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Founded, 1890, by Mary Baker Eddy.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size.

Subscription price, payable in advance, postpaid, to all countries: One year, $1.00; single copy, 25 cents.

## Pamphlets

**Price, Postpaid: Single copy, 5 cents**

**Christian Science: Applied Righteousness**—By Frank Bell.

**Christian Science: Its Religious Philosophy**—By Hon. Clarence A. Buskirk.

**Christian Science: "The Resurrection and the Life"**—By Clarence W. Chadwick.

**God is Good**—By George Shaw Cook.

**Causation: Viewed in the Light of Christian Science**—By Frederick Dixon. Also printed in Norwegian and Swedish.

**Christian Science Healing vs. Mental Suggestion**—By Frederick Dixon. Reprinted from the "Weekly Budget," London, England. Also printed in Norwegian.

**Christian Science: The Revelation of Christ**—By John W. Doorly.

**Christian Science: The True Christianity**—By Clarence C. Eaton.

**Christian Science: Pure Metaphysics**—By Dr. Francis J. Fluno.

**Christian Science: The Gospel of Freedom**—By Willis F. Gross.

**Christian Science: The Science of Salvation**—By Prof. Hermann S. Hering.

**Christian Science Healing: Spiritual and Scientific**—By Prof. Hermann S. Hering. Also printed in German.

**Answers to Questions Concerning Christian Science**—By Edward A. Kimball. Also printed in Dutch, German, and Norwegian.

**Christian Science: Its Advantage to Mankind**—By Edward A. Kimball. A London lecture. Also printed in French.

**Christian Science: Man's Dominion Over Evil**—By Edward A. Kimball. Also printed in French, modern Greek, Italian, Norwegian, and Russian.

**Christian Science: Its Divine Authority**—By Bliss Knapp.

**Christian Science: The Explanation of the Ideal Man**—By William D. McCrackan, M.A. Also printed in German.

**Christian Science: Its Discovery and Development**—By William D. McCrackan, M.A. Also printed in German and Norwegian.

**Christian Science: God's Lovingkindness Proved to Men**—By Rev. William P. McKenzie. Also printed in German.

**Christian Science: A Message Which Heals and Saves**—By Edward A. Merritt.

**Christian Science: Its Results**—By William R. Rathvon. Also printed in German.

**Christian Science Healing Not Medical Practice**—By Judge Clifford P. Smith.

**Christian Science: A Religion that Heals through Spiritual Law**—By Virgil O. Strickler.

**Christian Science: The New Birth**—By Bicknell Young. Also printed in German and Norwegian.

**Christian Science: Its Principle and Rule in Business.** Noonday lecture delivered by Bicknell Young.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01410x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50.

Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

VOLUME XX AUGUST 10, 1918 NUMBER 50

## Friendship in War Time

GUSTAVUS S. PAINE

IN spite of all that has been written sentimentally on the subject, the fact remains that true friendship is founded wholly on Principle. Principle is itself the one sure friend of man, because it is always present, always the same, and available for every need. To be alone with God, divine intelligence, is to be alone with all there really is. Principle is the "friend that sticketh closer than a brother." We can then rejoice evermore in the possession of unlimited, actual friendship, safe in the infinity of divine Love.

Those who have been able to see beyond the depressing incongruities of mortal experience to the unchanging harmony of Spirit must always be content with this one joyous friendship. Even human friendships are preserved properly in proportion as human beings recognize the spiritual relationship of Mind and its manifestation. The fact that two or more people know something of Principle is the only fact, in the last analysis, which can give them a common meeting ground. No matter how much this fact may seem to be obscured, it is eternal; for the understanding of divine metaphysics is one and indestructible with all concerned. Thus as Mrs. Eddy says on page 131 of "The First Church of Christ, Scientist, and Miscellany," "Where God is we can meet, and where God is we can never part."

No one saw more clearly than Mrs. Eddy the imminent fulfillment of prophecy through the unfoldment of Principle. When human thought struggles against the unfolding activity of divine intelligence, that which is called warfare, whether seemingly subjective or objective, takes place, and this conflict in the carnal mind continues just so long as the mortal mind seems to continue. Fortunately, however, the divine Mind is all the while the only real Mind, and is all that is really active. One sitting in the cab of an engine would see always ahead of him the rails converging in the distance, but even while this illusion appeared to the material senses, the very onrush of the engine along the ever equidistant rails would be proving irresistibly the nothingness of the sense evidence. So all who are familiar with the operation of divine Principle have realized the nothingness of any suppositional opposite, no matter what the appearance might be. Christ Jesus was therefore able to declare, "When ye shall hear of wars and commotions, be not terrified," and again, "Ye shall be betrayed both by parents, and brethren, and kinsfolks, and friends . . . but there shall not an hair of your head perish." To-day these things are coming to pass, and the very purpose of commotion in the supposititious mortal mind is to shake the material sense of things to the utmost. If meanwhile we but look up, and lift up our heads, we see clearly that divine intelligence is all that is producing alert activity.

Suppose, then, that the warfare of mortal mind does seem to disrupt human friendships. On page 266 of "Science and Health with Key to the Scriptures" is the question, "Would existence without personal friends be to you a blank?" Many a man or woman, clinging tenaciously to the mesmeric pleasantness of personal friendship, and confronted with this pointed question, has answered, Yes, in sadness at the prospect of losing what has been yearned for but never attained on the plane of mortal sense. For has the closest of merely human friendships ever completely satisfied? The one answering, Yes, might go on with feelings of mingled uncertainty and comfort to the rest of Mrs. Eddy's loving pronouncement: "Then the time will come when you will be solitary, left without sympathy; but this seeming vacuum is already filled with divine Love."

One who understands the ever presence of divine Principle, Love, could never answer, Yes, to Mrs. Eddy's question. To the Christian Scientist existence without personal friends could never be a blank, because he knows that divine Mind is ever present and includes whatever constitutes true friendship. So long as he has this realization, he experiences no void. This infinite presence is indestructible and eternal. Knowing this and answering a decided, No, to the question asked, he is entitled to prove, therefore, that under no circumstances could he be "solitary, left without sympathy." The friendship and sympathy of divine intelligence are his priceless possession. This one unchanging friend could not possibly betray. Thus the one who knows the truth is already exalted until he can perceive even human friendship in its proper perspective. Expecting neither too much nor too little from it, he is content to steer his course wholly by Principle, glad in knowing the one divine Friend.

In its very nature the human mind's warfare is disruptive. Man is not separated from God. Let us then look up, and lift up our heads, recognizing that Principle is still here, that intelligence is still inseparable from man. Let us rejoice, moreover, that the manifestation of intelligence could not possibly be disrupted. Just as God is one and indivisible, so His likeness is really one and indivisible. Obviously the human sense of men and nations does not reveal the true, indivisible creation of divine Mind. Even in the midst of the battle for Principle, one must turn his thought constantly to God and His eternally unified idea. Only in proportion as one has the clear vision of divine intelligence and its indivisible activity or manifestation, can he continue to "fight the good fight" with untiring vigor.

Since the aim of malicious evil is to disrupt, it would seek above all to separate irreconcilably those who, having caught some glimpses of Principle, should therewith cooperate with unremitting enthusiasm. It is easy enough for mortal mind to produce strife between nations or people who have been persistently looking in opposite directions. If mortal mind through subtle suggestion could, however, produce in the thought of one Christian Scientist distrust and condemnation of another who likewise has been reasoning in accordance with Principle, mortal mind would have nullified the very understanding which is for the annihilation of all error. Never is there more need for the preservation of true friendship than in time of war. Suppose that I, knowing that another has turned genuinely to God, do find him thinking or

acting in ways which annoy me? Shall I immediately rage like the heathen and condemn him? Shall I not rather turn with the more consecration to Principle, and rejoice that all the devotion to Principle there ever has been still is? Mutual love of Principle is all that can ever truly unite us to our fellow men, and could anything disrupt this love?

On we go in the engine cab of daily living, with illusion fleeing before us. Once my friend and I have recognized that Principle is taking us safely on, shall I jump in desperation from the cab window simply because the motion attendant upon our progress makes him talk or laugh too much? No; rather will I rejoice the more that we can keep on going, and meditate more gratefully on the Principle upon which we both depend, regardless of any and all personal details. In a letter to First Church of Christ, Scientist, of London, England, beginning on page 203 of Miscellany, Mrs. Eddy once summed up the whole matter, when she wrote: "It is only by looking heavenward that mutual friendships such as ours can begin and never end. Over sea and over land, Christian Science unites its true followers in one Principle, divine Love, that sacred *ave* and essence of Soul which makes them one in Christ."

## "Over the top"

LIEUT. MARTIN F. JACKSON

ISAIAH said: "And it shall come to pass in the last days, that the mountain of the Lord's house shall be established in the top of the mountains, and shall be exalted above the hills; and all nations shall flow unto it." This flowing unto the Lord's house is the spiritual going "over the top." The ark rested upon the top of the mountain, and Noah was safe. The beliefs of the flesh had been washed away. Consciousness had been purged. Ararat was the dry land appearing out of the darkness upon the face of the deep. Noah had gone over the top and become fruitful, replenishing the earth.

Abraham was led up to the top of the mountain where he could look northward and southward and eastward and westward. Here God said, "All the land which thou seest, to thee will I give it, and to thy seed for ever." All we perceive through demonstration is as dry land appearing. God always sustains us in our realization of truth. This is the rock Christ, upon which we stand, and it is as the top of the mountain. Moses, who led an army through the Red Sea on dry ground, climbed to the top of Sinai, and there received the spiritual law to govern Israel. One noted man of research, who has spent many years in the Holy Land, affirms Mount Sinai to have been a volcano whose eruption at one time destroyed Sodom. This may be only a supposition. One thing is true, however; we should all follow our Leader's injunction found in "Science and Health with Key to the Scriptures" on page 241: "Strive to reach the Horeb height where God is revealed; and the corner-stone of all spiritual building is purity." When we have once attained that purity, it will prove the stone cut from the mountain without hands, and it will fall upon and grind to powder the unfruitful works of darkness that gender to bondage. "Our God is a consuming fire."

Deborah at Ephraim sat upon the top of the mountain, and Israel came up to her for judgment. Later she went out with Barak at the head of the army of Israel and defeated the forces of heathenism at Megiddo. Megiddo of the Old Testament was a prototype of the Armageddon of the New Testament, where again woman takes the lead. "In this revolutionary period," says Mrs. Eddy (Science and Health, p. 268), "like the shepherd-boy with his sling, woman goes forth to battle with Goliath." Jesus, who walked over the wave with his "Peace, be still," went up on the mount of transfiguration and proved for all mankind that God is a God of the living, and that Moses never died. As we become willing to follow the Master, we too shall still the tempest and help to bring a just and righteous peace that shall never perish from the earth.

The Christian Science movement is the symbol pointing upward, which determines the line of demarcation between darkness and light, matter and Spirit, personal domination with its autocratic misrule and the freedom of divine guidance. In this final crusade *The Christian Science Monitor* brings true liberty of the press. Within its pages appear armies of right ideas carrying on a holy warfare in the extermination of all evil. We can keep this army well supplied only as we subscribe to, read, and circulate this messenger, thus helping to publish salvation upon the mountain tops.

On page 514 of Science and Health Mrs. Eddy says: "Mind, joyous in strength, dwells in the realm of Mind. Mind's infinite ideas run and disport themselves. In humility they climb the heights of holiness. Moral courage is 'the lion of the tribe of Juda,' the king of the mental realm. Free and fearless it roams in the forest. Undisturbed it lies in the open field, or rests in 'green pastures, . . . beside the still waters.'" Such freedom and such protection has the army of the Lord. Whoever goes "over sea" need have no fear of any under sea attack if he knows that "every good gift and every perfect gift," in fact, all he can ever receive, "is from above." In Christ is the overcoming. We are coming over from belief to understanding of the Christ-spirit, and the old world and the old sense of heaven pass away, and the spiritual sense reveals all things as new.

## The True Battle Ground

MARY E. BOVET

IN referring to the resistance of the Pharisees to Jesus' teaching, Mrs. Eddy defines briefly the battle ground of the past and of the present when she says (Unity of Good, p. 46): "The fight was an effort to enthrone evil. Jesus assumed the burden of disproof by destroying sin, sickness, and death, to sight and sense." Now Christ Jesus said that he was "the way, the truth, and the life;" therefore it is manifest that each one who wishes to follow the way he pointed out, practice the truth he taught, and live the life he lived, must also assume this "burden of disproof," remembering always that the Master declared his burden light.

Viewing the conflict as thus defined by Mrs. Eddy, we can readily see that no one can be exempt and no one can be noncombatant on this battle ground; for so long as evil seems to be enthroned anywhere at all, the good fight will not be over nor the battle won. Is this discouraging? Not at all! It is but a trumpet call of no uncertain sound; for it distinctly bids us to go forward, and at the same time clearly shows us without any possibility of mistake what the enemy is and what is his intention; namely, "to enthrone evil." Surely this eliminates any belief that the enemy we confront is a terrifying disease, an attractive sin, an overpowering habit, an engulfing appetite, a devastating circumstance, or a material law. We recognize that we are face to face with the attempt openly or insidiously to enthrone evil, and that, as Mrs. Eddy says (Unity of Good, p. 39), "as soldiers of the cross we must be brave, and let Science declare the immortal status of man."

Evil can never be enthroned, for the very good reason that God, good, is already enthroned, always has been en-

Digitized by Google

throned, and always will be. Add to this the fact that God, good, is omnipresent, and it is readily seen that there is no room for evil. Then, surely, if this is the fight, we have only to remain alive to its nature to be victors at all times. Can we fail to recognize that evil is powerless and without place in God's universe? Not unless we acknowledge first that there is some place where evil has managed to enthrone itself, or unless we call it by some other name and arm it with some supposed medical law, some mistaken theological belief, or some superstition of decadent occultism. With such admissions, we may be lulled into the hazy nightmare that there is something awful seeking to overcome us which needs some gigantic effort on our part if it is to be overthrown. Viewed in this way we may quail before it as something real; whereas had we left it as a vain attempt to enthrone evil, it would have been readily mastered.

Nothing can excuse us from a radical rooting out of evil in thought and action; on the contrary, it is of paramount importance that we let no error through our guard. From the moment that we detect an attempt to enthrone evil in any guise or form, we are without excuse if we turn from the fight and say: "All this is beyond me. I cannot deal with it; it is not my business. I cannot help it." If evil seeks to find entrance to the home, the office, the store, the farm, the camp, the ship, the mine, that is where we have to rout it. If we are there, it is our business. Mighty would be the victory if all were to stand to and see to it that *nowhere* shall evil be enthroned. Mighty the victory! And the means to realize it? Simple, direct, unswerving, consecrated adherence to good as the only power, the only reality, the unfailing substance to be demonstrated wherever we are, and whatever we have to do.

Daily, hourly we have to decide on which side we shall fight. It is not a decision that we can take and then sit back at ease; for insistently the demand will come, Which will we acknowledge and obey—reality or unreality, good or evil, activity or sloth? Nothing can save us from this question nor hide us from its demand. No condition, no circumstance, country, creed, or cause can give it pause. The glory of the hour is that all are called to arms, and from each one is demanded faithful service. There is no way of avoiding the issue, which daily becomes more clear-cut and defined; for no one can refuse the conflict. He either wages war on the side of good or enlists in the belief of evil, and no matter what his occupation, status, or locality, he can if he will, rise up and join the battle between Truth and error. Join it he must, be he man, woman, or child, whether considered "fit" or "unfit," but the result is in accordance with his faithfulness to good or subjection to evil.

Now is the time for those who have been content to let things slip or to face both ways, to shake off their torpor and go forward with rejoicing. No one need be uncertain, no one need hesitate. Mrs. Eddy has put clearly to us what it is we have to face, "an effort to enthrone evil," and in the Bible we read, "If therefore thine eye be single, thy whole body shall be full of light." This light leaves one in no doubt as to whether a thought, a deed, or an action is enthroning evil or good. So shall we be ready to discard all enslaving appetite and passion; we shall not enthrone drink, drug, or evil desire, neither shall we believe that the overcoming of these things has no particular bearing upon the fight that we are waging. We shall see that the call to arms is far more fundamental than a mere calling of men to the front. Our battle ground is wherever evil claims a foothold; our time for fighting, each moment as it comes; our battle cry, "Watch and pray, that ye enter not into temptation;" and our security, the omnipotent goodness of God. The words with which Mrs. Eddy closes the passage already quoted are these (Unity of Good, p. 47): "Nowhere in Scripture is evil connected with good, the being of God, and with every passing hour it is losing its false claim to existence or consciousness. All that can exist is God and His idea."

## Ever Present Protection

ELOISE BURFORD KNOWLES

"THOU wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee," we read in the twenty-sixth chapter of Isaiah. The full significance of this text was brought home to me very forcibly during the last winter, the sacred word being as a lamp unto my feet through a period of seeming tribulation. Early in August of 1917 I went into Alaska for the year; but at Christmas time my work seemed finished there and I, with a young woman companion, made plans to leave by means of dog team, the nearest open seaport being one hundred and twenty-five miles over a winter trail. A sense of fear and resentment seemed to influence a portion of the inhabitants, and thus to hinder our leaving. We were told all manner of wild tales, until it seemed as if the seven plagues of Revelation were to be gone through with before we left. I, however, clung steadfastly to this thought of trust in the one power, as we understand it in Christian Science, and through the steady application of the truth my young companion was led to study the Lesson-Sermon with me daily. Finally after three weeks of waiting we received money enough to leave. Three men were secured to drive us, but through reluctance on their part to start out, I had for nights felt obliged to do much studying, knowing that sleep was not so much needed as right thought, and through the work done in Christian Science we were perfectly well physically for the trip.

On the morning of January 15, 1918, at dawn we left the village. The trails were in good condition and the sun arose to cheer all concerned. The first cabin was twenty-nine miles distant and the men had some fear that we might not reach our destination before dark, but all afternoon I was able to declare in the Master's words, "Father, I thank thee that thou hast heard me." The second day the thought of the Israelites leaving Egyptian bondage behind them was very much with me. We made the second stop, twenty-three miles farther on, at a place situated at the head of a large lake, where we were welcomed by two trappers who treated us royally. The third day one of our men had great fear of a gorge where the river often overflowed, so before we reached the last bend we rested the dogs for a time. We held a pleasant conversation with the man, and I soon saw that his fear was gone. We thus passed many other so-called dangerous places—cracks in the ice, also water flowing over the sidehill trails, which froze into small glaciers. We, however, met with no snowstorms or freezing winds. Just as wonderfully as the Red Sea opened and the children of Israel passed through it dry shod, so we reached our seaport in four days and three nights, and the last day with the men and dogs we were able to cover fifty miles.

After an eight days' ocean voyage in midwinter we arrived safely at Seattle, our hearts full of gratitude for another demonstration of God's all-protecting care. As never before I realized what is the reward of close application and study of the truth, while listening for the still, small voice and shutting out all human opinion. On page 566 of

Digitized by Google

Science and Health our revered Leader beautifully describes the thought of the wilderness, and to my young companion this reference to Rebecca's faith meant much during our journey. She had just finished her first reading of "Ivanhoe" and often quoted the opening lines:—

When Israel, of the Lord beloved,
Out of the land of bondage came,
Her fathers' God before her moved,
An awful guide, in smoke and flame.

## Testimonies

REV. LEON G. MILES

IT might be said that a Christian Science demonstration is not complete until public acknowledgment has been made as a sign of gratitude. Be that as it may, the statement at least calls attention to the fact that testimonies are a means of grace not only to those who hear but to those who give them, and many have learned by experience that a clearer sense of emancipation from bondage has come through sharing their blessings with others. Surely Mrs. Eddy had a very definite purpose in view when in the program for the Wednesday evening meetings (Manual, p. 122) she provided a place for "experiences, testimonies, and remarks on Christian Science." She also says (Manual, Art. VIII, Sect. 24): "Testimony in regard to the healing of the sick is highly important. More than a mere rehearsal of blessings, it scales the pinnacle of praise and illustrates the demonstration of Christ, 'who healeth all thy diseases' (Psalm 103:3)."

Christian Scientists bear a reputation for quiet, fearless joyousness and a perpetual readiness to give "a reason of the hope" that is in them. The world expects them to live up to an unusually high standard of achievement, for the very good reason that they claim everything for their religion. Many non-Scientists gather their first definite impressions of Christian Science at these Wednesday evening meetings. Some of them are earnest investigators, some are but slightly interested, while still others have only an honest curiosity; but in any case the impressions which they carry away will be favorable or otherwise, largely according to the spirit of loving helpfulness and gratitude which is shown by those responsible for the spirit of the meeting. It is not unreasonable for these visitors to expect that those who claim so much for their religion will be eager to use every available minute in testifying to the power of God, as made available through the understanding of Christian Science, to help them under various circumstances.

Every one of us has been helped by hearing the testimonies of others who have faced problems similar to our own. Many of us have felt as though the healing power of Truth was set in motion for us by the words spoken by another, though the speaker did not realize that he was being used as a channel for a special blessing. Is not the demonstration immeasurably greater in value if it brings healing not only to him who makes it but possibly to a thousand, a hundred, or even one? To be the means of bearing such a blessing to a congregation is to give the cup of cold water which Jesus said should in no wise lose its reward. Certainly a blessing from God accepted gladly, yet hoarded, fails to bring its full fruitage.

The wise man of olden time said, "To every thing there is a season, and a time to every purpose under the heaven: . . . a time to keep silence, and a time to speak." The Wednesday evening meeting gives a place to silent prayer, when every material sense is hushed and the spirit of love broods over all; it is a time eloquent with praise and worship and blessings realized. But who can say that there is eloquence in the silence which sometimes falls when speech has been invited? Silence then is untimely, and like all untimely things is unbeautiful, giving no testimony to Principle.

The error which tries to condone such untimely silence will disappear when a full apprehension of the truth regarding the situation is gained. To excuse it by affirming that we enjoy silence and that we are thus afforded an opportunity for silent communion is to show that the purpose of the meeting has not been rightly understood. At such a time silent contemplation of Truth cannot take the place of the spoken word. Every thought should indeed be quiet and undisturbed even though a silence fall upon the congregation, but the silence should act as an instant spur, urging us to another demonstration of that wisdom which provides each moment with its proper fullness and each individual with a duty to perform.

The world is full of weary seekers after Truth. We always have with us in our meetings those who need to be healed of sickness, sin, fear, prejudice, doubt, anger, grief, and above all of ignorance. They want to hear men tell how they have been healed. They have reason to expect that they will hear an abundance of evidence in proof of Christian Science healing in each meeting. To disappoint them is to appear as "clouds . . . without water," to use the words of Jude. They will not make excuses for our silence, however much we may try to justify it to ourselves. When they ask for bread at our feast, shall we give them a stone?

Testimony giving, and therefore the success of our Wednesday evening meetings, is simply a matter of demonstration, and it is a demonstration which is very much worth while. Christian Science accepts no limitations of good. To consent to the sealing of the lips for months or years, because of fear or false humility, is to yield to error at a vital point. In Proverbs we read, "There is that withholdeth more than is meet, but it tendeth to poverty." The meetings which are crowded full of testimonies that show gratitude, joy, and an eagerness to help others to a knowledge of Truth are sure to feed the hungry and heal the sick.

## Lessons

HELEN M. KEELER

A FEW years ago the writer, a young girl who had just finished her college course, decided that Christian Science was the only course for her to pursue further. She had been healed of several physical ailments and had also been helped greatly in her school work by it. This was enough to prove to her that Christian Science was what she had been longing for all her life, and she wanted to know more of the truth whereby she might help and heal others.

At first, when she started out, all looked rosy and bright, but as she went on impatience at her seemingly slow progress crept in. She wanted to work as did the older workers whom she knew, and she wanted many patients to come to her without further waiting on her part. One day, as she was sitting thus wondering "why," her attention was drawn to some girls outside who were passing by on their way from school. Their steps were free and their faces aglow with hope and enthusiasm. This picture brought back to the young Scientist memories of her own school days,—the delight of working out problems, of being promoted and going higher all the time. She thought of her study of mathematics, of the joy of mastering the basic laws and applying them to all sorts of problems. "In school," she thought, "we never included in our work the slightest error and expected to bring

Digitized by Google

out good results, so why am I working with discouragement and sitting here wondering 'why'?" The absurdity of the waste of time flashed across her immediately, and with new resolution she turned to her books.

These words from Science and Health by Mrs. Eddy helped her at the start: "Self-denial, sincerity, Christianity, and persistence alone win the prize, as they usually do in every department of life." Also, "Love for God and man is the true incentive in both healing and teaching" (Science and Health, pp. 462, 454). She saw then that she must look to see if she was loving as she should; but how was this to be done? This verse from the Christian Science Hymnal (p. 135) helped her to see how simple it was,—

Is the heart a living power?
Self-entwined, its strength sinks low.
It can only live in loving,
And by serving love will grow.

Now instead of just reading and looking for patients, she decided to love, to embrace the whole world, as it were, serving her brothers daily, and so being "faithful over a few things." As the awakening to express more love came, she started forth right away to give. One day she plucked a bunch of her garden flowers for the reading room. Another time she carried a *Sentinel* along with a jar of jelly to an elderly lady. As her sense of Love led her, all along the way other opportunities to be helpful presented themselves until she saw that the kingdom of Love was indeed at hand!

As the Bible and the Christian Science textbook were studied faithfully, and as the first lessons of daily patience, kindness, and humility were learned, she was ready for the next lessons. The joy of advancing and being given higher work was beyond anything she had ever known, and Mrs. Eddy's words, "God will heal the sick through man, whenever man is governed by God" (Science and Health, p. 495), were proven true to her.

[Written for the *Sentinel*]

## Truth's Final Peace Offer

AGNES F. CHALMERS

AT night, on Mount of Olives, Jesus kept
A faithful vigil while earth's nations slept.
By day, within the temple's calm, he taught
The verities of being he had wrought
To gain on Olives' heights. Again, this hour,
The world receives the wondrous peace and pow'r
Of those blest nights of wakefulness and days
Of restful teaching. God's triumphant ways
Declare earth's peace,—the peace all nations keep
Forever. Mind's truths slumber not nor ever sleep.
The Master taught: Who would be great must be
The least of all, since Truth alone makes free;
Who would be first is servant still of all;
One chained by human pride is error's thrall.

Earth's tumults end; sin's strivings now shall cease;
The world accepts Truth's final gift of peace.
Yea, Mind's last offer of true peace is giv'n,
Proclaiming church and home and work and heav'n
As one. To watch upon Love's heights by night,
And teach by day the wondrous pow'r and might
Of God, the King of heav'n and earth, is still
The work of all mankind. To do God's will,—
To keep the pledge of Truth eternally,
Earth's nations shall forever watch and pray.
At night, on Mount of Olives, Jesus sought
To heal a sleeping world. By day, he taught
Truth's lasting peace of love and joy and good,—
One church, one heaven, and one brotherhood.

["The Fortress of Spirit"—*The Christian Science Monitor*, Boston, U. S. A., April 6, 1918]

Any person who will take the trouble to look up the ninety-first psalm in a modern commentary will make some quite immaterial discoveries. First, it will be learned that it was not written by David, which most people rather more than suspected; and, last, that verses four, eight, and ten are glosses—which does not seem to help much. It may be recorded in addition, that the word dwelling, in verse ten, should be tent, which, if the whole verse is a gloss, does not matter in the least, and, if it is not, is quite immaterial. On the whole, therefore, the contribution of modern theological scholarship to the world's interest in or understanding of the poem, does not appear excessive. Indeed, it is not an altogether far-fetched deduction that the King James translators did as much to assist humanity, in their ignorance, as the higher critics with all their scholarship.

Now the ninety-first psalm has been for centuries one of the great solaces of the English speaking world, but this has certainly not been for any of the reasons suggested by the latter-day commentators. Many and many a reader has found marvelous peace in the past, and many another will find the same marvelous peace in the future, over the offending verse, "There shall no evil befall thee, neither shall any plague come nigh thy dwelling." But for centuries, all the same, the text has been robbed of its real significance for mankind, because mankind has failed to realize that there was something more than a mere figurative interpretation to be applied to the words of the preceding verse, "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation." How can mankind make God its habitation? Mrs. Eddy has answered this question in showing that good is simply an attribute of God and of God's synonyms, Spirit, Principle, and Mind. Therefore the moment a man claims divine Mind as his habitation, he is, indeed, safe. "The exterminator of error," Mrs. Eddy wrote on page 469 of Science and Health, "is the great truth that God, good, is the *only* Mind, and that the supposititious opposite of infinite Mind—called *devil* or evil—is not Mind, is not Truth, but error, without intelligence or reality."

It is, of course, obvious, and it has never been questioned, that God is intelligence; otherwise there is an intelligence which God did not make,—and yet God made all that was made. This intelligence is, equally of course, divine Mind. And as Mind can only produce ideas, man is the idea of God, and lives, and moves, and has being in the Mind which gave birth to him. Consequently a man's safety lies not in any material precautions, but in his understanding of Truth, of God, for God is Truth as necessarily and inevitably as He is Mind. When, then, the individual makes Truth his habitation, when he realizes that he is an idea in divine Mind, no evil can possibly come nigh his dwelling, for divine Mind is his dwelling, and evil is unknown to God, who is infinite Truth, just as it is unknown to infinite Mind. The human mind vociferously insists that God must know evil, otherwise the divine Mind could not be infinite. But if God is infinite, and God is good, what room is there in infinite good for evil, and does it not follow that evil, being something devoid of Principle, must, for that very reason, be nothing more than a sense of the absence of good, and so, like darkness, a mere negation—an unreality? That, surely, was why Jesus the Christ said of it that it was a lie—for a lie is a mere negation, something disappearing into its own nothingness as soon as its untruth is exposed.

Digitized by Google

This, then, is the explanation of the psalmist's saying, "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling." The world, as Jesus the Christ taught, and as Christian Science teaches, is a world not of material phenomena but of ideas materially objectified, or mentally reflected in what seem to be independent material phenomena, but actually are ideas subject to Mind. The deceptiveness of these phenomena may be seen in such everyday instances as the apparent rising and setting of the sun, or the curious vagaries of sound and reflection. But these vagaries, every one knows, are the result of ignorance, and may be corrected by fuller knowledge. What every one does not know is that the human mind itself is only a counterfeit of the real or divine Mind, and that, as this is grasped, the truth which Jesus declared would free men from their ignorance is grasped also, with the result that what were once regarded as physical laws can be broken and put aside, as Jesus broke them and put them aside, in the miracles or proofs of the truth of his gospel or teaching.

This is why Christian Science as a religion is so intensely practical. It enables a man, whether in the counting house or in the trenches, whether in the midst of a cyclone of sensual temptation or of wind and lightning, to prove that no plague shall come nigh his dwelling. For his dwelling is divine Mind, and so long as he realizes this he is safe. This was why Mrs. Eddy, in seven pregnant words, on page 392 of Science and Health, wrote, "Stand porter at the door of thought." The man who does that, untiringly and sleeplessly, is safe. In a world of ideas every untoward physical manifestation must take shape in thought, and be molded in thought before it can materialize. A man controls his own thoughts, and therefore what he does is what he thinks, and what he thinks is what he is. If he fills his mind with thoughts of sensual pleasure, he cannot exclude sensual pain, for he has mentally admitted the power of matter to govern him, in riches or in poverty, in joy or in sorrow, in life or in death. If, then, he wishes to avoid pain and sorrow, he must deny the flesh and its lusts. But he can only deny these as he fills his mind with Truth instead of with error, and grasps the fact that Spirit is the only reality, and consequently that matter is harmonious or inharmonious in the exact proportion in which its subserviency to Principle, God, is demonstrated. "Good thoughts," wrote Mrs. Eddy on page 210 of "The First Church of Christ, Scientist, and Miscellany," "are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort." And so the psalmist wrote: "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling." This is the fortress of Spirit.

[Peter B. Biggins in *Calgary* (Alberta) *Canadian*]

Our critic has been spending a good deal of time in denouncing the wrongs in the social life of the present day. It should be cause for rejoicing that the large numbers who are turning to Christian Science are learning how to win freedom from these evils by making practical use of the teachings of Christ Jesus.

It is a fact well known to those who have observed the influence of Christian Science in the community, that it has reformed many drunkards, changed many infidels into God-fearing men and women, and restored many invalids to health and usefulness. Christian Science deals a most effective blow at every phase of immorality. The only possible influence of this teaching is to purify and elevate the character and life of those who study it. It is inconceivable that any other effect could follow from this teaching, which requires absolute obedience to the Ten Commandments and the Sermon on the Mount. Regarding marriage Mrs. Eddy writes in Science and Health (p. 56), "Marriage is the legal and moral provision for generation among human kind."

Turning from the abusive language the evangelist uses in reference to the venerable Leader of the Christian Science movement, it is pleasant to contrast this with the respect paid to Mrs. Eddy by those who knew her. Mrs. Eddy resided in Concord, New Hampshire, for many years, and the following extract from a resolution by the mayor and aldermen shows the esteem in which she was held by her fellow citizens: "Mrs. Eddy was distinguished by public spirit, deep generosity, wide charity, and tender and thoughtful helpfulness, and it seems fitting and appropriate that we, the mayor and the board of aldermen and the common council of the city of Concord, take some action in behalf of our citizens to express our appreciation of her residence among us and our esteem of her character."

✧

[Hector Wallace Smith in *Barnet Press*, London, England]

In a recent issue a letter appears containing some criticisms on the report of a lecture on Christian Science given in your paper. Your correspondent asks two definite questions. The first is, "Did not the lecturer rather conceal than explain the difficulties of Eddyism?" Let me say at once that such a term is quite erroneous, and is never used by Christian Scientists. These free public lectures are given in order to explain the practical teachings of Christian Science, which present no difficulties to unprejudiced listeners who are really candid in their search for truth.

The second question is, "If those difficulties are realized, would not people think gravely before embracing so perilous (intellectually) a philosophy?" The effects of Christian Science are not perilous, and the understanding of the subject is not intellectual, and no difficulties whatever are experienced by those people who have experienced the healing and saving power of Mrs. Eddy's teachings by demonstrating the truth for themselves and for others. On page 345 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "One who understands Christian Science can heal the sick on the divine Principle of Christian Science, and this practical proof is the only feasible evidence that one does understand this Science."

✧

[Willard J. Welch in *Creston* (Iowa) *Advertiser-Gazette*]

The sermon reported in a recent issue, considered as a whole, is a kindly and tolerant review, in brief, of church history. Both the plea for the original unity of and the protest against divisions in the church, expressed in denominationalism, are well taken. Every genuine Christian to-day deplores the divisions among Christian people as "needless and useless." The clergyman rightly attributes the cause for this to "humanism" or personality, whereas the true church rests upon Principle as opposed to personality, and has always done so.

Allow me, however, to take issue with the gentleman in his mention of Mrs. Eddy. In doing so he shows clearly that he misapprehends Christian Science and misunderstands its Discoverer and Founder. He says: "The basis of all claims to divine authority for denominationalism will give place to Joe Smith, Dowie, Mrs. Eddy, and every other person coming before the world with claims and pretensions."

Digitized by Google

The Christian Science church was not founded by Mrs. Eddy to exploit her personal opinions or to establish a personal following. It was founded to meet for the world a need not being met by other agencies in the church or out of it. On page 17 of the Manual of The Mother Church we read that the Christian Science church was organized as "a church designed to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing." Mrs. Eddy well knew that personality and man-made creeds had no part in the simplicity of the religion taught by Jesus, and in her Message to The Mother Church for 1902 she said (p. 4), "I again repeat, Follow your Leader, only so far as she follows Christ."

One could hardly make a greater mistake than to name Mrs. Eddy in the same sentence with Joseph Smith, the exponent of Mormonism, and with John Alexander Dowie. Christian Science and Mormonism are antipodal. In Principle and in practice Christian Science is the diametric opposite of Dowieism. Mrs. Eddy and her great discovery, Christian Science, stand before all mankind to-day with no claim or pretension other than can be justified by the proof of healing according to the teachings of the Master. Upon this rock—the corner stone of healing—rests the Christian Science church as an organization. This is its reason for being. Like the Master it proves its doctrines by demonstration. When John's disciples asked of Jesus, "Art thou he that should come, or do we look for another?" he called their attention away from himself or from his personality and directed it to his works, saying: "Go and shew John again those things which ye do hear and see: the blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them." In loving obedience to the command of this self-same Jesus, Christian Science is healing humanity of its woes. This healing proves its godlikeness.

On page 583 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, is found a definition of church which will doubtless clear away any mistaken belief as to the purpose for which the Christian Science church was founded: "The Church is that institution, which affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick."

The desire for unity on the basis of the Scriptures is a hopeful and inspiring sign of the times. Greater love among Christians not only for each other but for all mankind is the first step away from strife and division, expressed in many sects, toward that unity to which Paul alludes in these words: "One Lord, one faith, one baptism, one God and Father of all, who is above all, and through all, and in you all."

The purpose of the Christian Science church cannot be better or more briefly stated than in the words of the Church Manual (p. 19): "THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., is designed to be built on the Rock, Christ; even the understanding and demonstration of divine Truth, Life, and Love, healing and saving the world from sin and death; thus to reflect in some degree the Church Universal and Triumphant."

✧

[Albert F. Gilmore in *Brooklyn* (N. Y.) *Citizen*]

In a recent issue appeared an account of the malicious attack on Christian Science by an evangelist. This is not a new experience for him, as he has gone up and down the country for several years striving his utmost to destroy this particular form of religion, regardless of the fact that it has become a source of spiritual strength and the inspiration to a happier and holier life for a rapidly increasing army of earnest men and women.

It seems quite pertinent to note in passing that at Logansport, Indiana, the Committee on Public Safety recently forbade such an attack on Christian Science on the ground that it is against public welfare to incite strife and dissension, particularly at a time when the country so much needs harmony and unity of thought and action among its citizens.

The fact seems to have escaped the attention of many religionists, that the most effective, in fact, the only way to destroy Christian Science or any other religious denomination is to give to the world something better—a more practical, because a more direct, way to salvation—and to prove their faith by their works.

Whether Christian Science "denies every fundamental doctrine of the Christian faith," as is alleged, is best judged by its works. Christian Science inspires a full and abiding faith in God, infinite good, as an ever present help; it teaches its followers to pray constantly, it affirms the Holy Ghost as the Christ or Comforter, the divine idea, which will heal and save all mankind; and not only a second coming but a constant coming of Christ to the human consciousness ready to receive Truth. It teaches purity, chastity.

## Funds of The Mother Church

### War Relief and Camp Welfare

"Inclosed find draft for twenty-six dollars, a contribution to the War Relief fund. For some time I have wanted to contribute to this fund through my own effort, and divine Love opened the way. During the holidays I worked in the jewelry store of a friend and I gladly send you my check. Am grateful to have the opportunity to help."

"I am inclosing a check for fifteen dollars for the War Relief work, and would like to express my gratitude for the privilege of helping in the great amount of good being accomplished through our committee. When I read in the *Sentinel* of the good work being done, joy and gratitude fill my consciousness for the awakening to Truth of so many who were in darkness before, and of what this means to them, as well as the financial aid received, and I long to be able to help to a greater extent. I am glad that the inclosed small amount may do its 'bit.'"

### Real Estate

"Please find inclosed a check for thirty-eight dollars and fifty cents, a contribution to the Real Estate fund, and a slight expression of our gratitude for all the blessings that have come to us through the knowledge of Christian Science. We have recently moved to a larger hall, and it seemed fitting that one of the first collections taken in this place should be used to help forward the work of The Mother Church, from whose activities we derive so much benefit."

### The Christian Science Benevolent Association

"I am inclosing three five dollar bills to be added to The Christian Science Benevolent Association fund. I am very glad to have this opportunity of expressing my gratitude for Christian Science, and so begin to repay a little of the debt I owe it for giving me renewed health, hope, and courage. I will gladly send more in a few weeks."

## The Revelation of Christianity

LET us say that Galileo, as soon as he had certain knowledge regarding some astronomical fact, was at the same time certain that the revelation of this fact would come to every one. Paul likewise, when he came to understand that it pleased God to reveal His Son in him, looked forward even as Peter did to the grace which was to come to all "at the revelation of Jesus Christ." But the Christian world has unfortunately looked backward to the demonstration of the Christ in Jesus, the revelation of Christianity, and men have separated themselves carefully from that ideal by wrapping up the truth, like the unused talent, in a napkin, which they have labeled "miraculous." So long as the work of Jesus and his apostles and followers in the early days of Christianity can be thought of as supernatural and irregular, so long will men satisfy themselves with conduct which they consider natural and regular,—that is, conduct convenient to the unregenerate heart.

Now, what has happened since Christian Science came to the world is this: It has unfolded the law of God, and thereby given a lawful explanation of the work of Christ Jesus, showing it to be wonderful indeed, and yet not supernatural nor abnormal to men, but rather as the ideal suitable to be a model for all men. This is put with great clearness in "Retrospection and Introspection" by Mrs. Eddy, where (p. 26) she says: "Our great Way-shower, steadfast to the end in his obedience to God's laws, demonstrated for all time and peoples the supremacy of good over evil, and the superiority of Spirit over matter. The miracles recorded in the Bible, which had before seemed to me supernatural, grew divinely natural and apprehensible; though uninspired interpreters ignorantly pronounce Christ's healing miraculous, instead of seeing therein the operation of the divine law."

Opposition to this interpretation of divine law may be expected, because there are many usurpers of power enthroned through deception, and they have no intention of yielding to the arriving true heir to all power and glory. In the end, however, the kings of the earth shall yield up their kingdoms, glad if they themselves can be included in the kingdom of God, and for the first time they shall know real peace in the light and glory of the New Jerusalem, wherein God is known as the Mother of us all, where forever is unknown the evil belief which began with Cain, setting brother against brother.

Those who understand the portents of to-day recognize a last struggle of resistance to the Christ. Denial of humanity, jeering against decency, cruelty as a fine art, have appeared before; but cynical falsity, antichristian self-justification, the calling in of the resources of the beast and false prophets which "Science and Health with Key to the Scriptures" defines as "lust and hypocrisy" (p. 567), indicate the very infirmity and striving impotence of sin.

As a sort of last resort there is the subtle misuse of mental power masquerading under the term psychology. In brief, this method searches the mentality of those the operator intends to injure, to find a suitable avenue for administering the poison of false belief. What might have been in the world of ignorant helplessness had this evil belief, this mental diabolism, been unloosed before its destroyer had appeared, we need not waste time in guessing. The fact is that "now is come salvation, and strength, and the kingdom of our God, and the power of his Christ: for the accuser of our brethren is cast down, which accused them before our God day and night." Christ, Truth, has been revealed,—the antidote to all this poison, and the revealer of evil's infirmness and futility; and that is the power which "shall smite the earth with the rod of his mouth, and with the breath of his lips shall he slay the wicked."

Christian Scientists must be active at this hour. It is manifest that we cannot serve God and Antichrist; hence we must not even repeat arguments which infer another power than that which heals and saves. The prayer of the psalmist was: "Set a watch, O Lord, before my mouth; keep the door of my lips. Incline not my heart to any evil thing, to practise wicked works with men that work iniquity." Therefore it is necessary to watch not words only, but to set a watch over intentions and secret desires of the heart, and to hold guard against fears and anxieties which arise if any supposition of power in evil clouds the vision of God's perfection.

The world is being purged "so as by fire." The thief, the profiteer, the schemer for power over the fortunes of others, may in some cases be having his day; but it is only that he may disclose the disgusting undesirableness of the ideal of those "whose God is their belly, and whose glory is in their shame, who mind earthly things." But to the great mass of mankind is coming deep desire to know God. Their old foundations are being shaken. They cannot live in their old beliefs. The creed of *laissez faire* will not do for the hour. Men see the works of the devil being done, and they say, "What shall we do, that we might work the works of God?"

The eternal answer is that given by Christ Jesus himself, "This is the work of God, that ye believe on him whom he hath sent." Christian Science interprets the one sent of God, and unfolds the meaning of the eternal Christ. Even amid war some men may be planning for future war, looking upon treachery, inhumanity, and wholesale murder of the innocent as capital stock invested to produce a continuing income of dread, but to others is coming the revelation of Christianity. Above the fury of the storm the Christ of God is saying, "Peace, be still," and is delivering innumerable sufferers from their fear and pain, and regenerating the heart.

WILLIAM P. MCKENZIE.

## "Sacrifice and service"

PEOPLE in general entertain rather gloomy views of sacrifice, and this in itself implies an incorrect sense of its meaning. St. Paul has this to say in the second chapter of his epistle to the Philippians: "Yea, and if I be offered upon the sacrifice and service of your faith, I joy, and rejoice with you all. For the same cause also do ye joy, and rejoice with me." Material belief has practically made the words sacrifice and suffering mean the same thing, and so it has come about that the thing which has been feared by mortals has been continually experienced. Paul's words make it very clear that his ideal of sacrifice and service brought to him the joy which means life in its fullness, with an ever enlarging outlook upon man's infinite possibilities; and so it is

Digitized by Google

surely well worth our while to see more clearly what God has for us, and what we are called upon to give up.

Christian Science uncovers in its healing ministry the mistaken belief held by so many that their sufferings are the result of divine appointment, and that they must in consequence be submissively borne. Even so we find that mortals in general do their utmost to defeat this supposedly divine purpose when they resort to all the material means and measures within their reach. They usually fail to find anything but added suffering. The belief that human suffering is in any wise of divine appointment has been held throughout the centuries, as we find in the prophet's words respecting the ideal man. In the fifty-third chapter of Isaiah is this statement: "Surely he hath borne our griefs, and carried our sorrows: yet we did esteem him stricken, smitten of God, and afflicted."

In the eleventh chapter of John's gospel we find an echo of the thought presented by Isaiah when the priests and rulers were gathered together to see how they could best put a stop to the marvelous healing work being done by Christ Jesus, this conference being held immediately after the raising of Lazarus from the dead. The high priest here declared it to be expedient "that one man should die for the people, and that the whole nation perish not." Respecting this unjust decree of mortal mind which claimed to declare the will of God, Mrs. Eddy says in "Miscellaneous Writings" (p. 123), "The at-one-ment with Christ has appeared—not through vicarious suffering, whereby the just obtain a pardon for the unjust,—but through the eternal law of justice; wherein sinners suffer for their own sins, repent, forsake sin, love God, and keep His commandments, thence to receive the reward of righteousness: salvation from sin, not through the *death* of a man, but through a divine *Life*, which is our Redeemer."

That Christ Jesus himself ever had the true idea of sacrifice and service is very evident from the fact that in the most crucial hours of his earthly experience he continually held before his followers the joy which was his unceasing inspiration in all he did, and in the epistle to the Hebrews we read that it was because of the joy "set before him" that he endured the cross and reached the very heights of spiritual being. One instance in Jesus' ministry may be profitably recalled by us many times in our work. The Pharisees, as was their wont, criticized the Master for his friendliness toward "publicans and sinners." In answering their criticism Jesus said, "Go ye and learn what that meaneth, I will have mercy, and not sacrifice," quoting a passage in Hosea's prophecy. As we keep mercy ever before us, remembering that "blessed are the merciful," we shall attain to the Christ ideal of service and know that we are only called upon to give up that which is unlike God; and as we do this our burdens grow lighter at every step of the way, and we radiate the joy which proves our fellowship with God and His Christ.

ANNIE M. KNOTT.

## "Feed my sheep"

THE call comes to feed the hungry hearts with the vision of spiritual truth, with the bread of heaven, the reflection of divine Love; to transcend the narrow confines of human justice, and in noble imitation of the Father-Mother to let our light shine upon the just and the unjust. Spiritual understanding pierces the covering of secret evil. It shows the belief in matter to be baseless, and physical law to be subject to the law of God. The Word of God pursues evil under sea, both in the earth beneath and in the water under the earth. It flies into the air realm and directs the sentinels how to forestall the evil intent of the enemy, to frustrate the secret attack by taking from it its secrecy.

After his resurrection, after that memorable last joyous feast with his disciples, Jesus charged Peter with great impressiveness to feed his sheep. Three times he asked him, "Lovest thou me?" Love alone can provide a sufficient motive for the watching of the true shepherd and for the spiritual endurance with which to feed the sheep. Shepherds who rely upon dogma and doctrine or upon a mere sense of duty, who follow a ritualistic routine through fear or superstition, lose metaphysics and become wolves who instead of feeding the flocks feed upon them. Mrs. Eddy gave the following necessary rebuke: "Jesus taught and proved that what feeds a few feeds all. His life-work subordinated the material to the spiritual, and he left his legacy of truth to mankind" (Miscellany, p. 303). When Jesus fed the five thousand he fed the whole of human consciousness. To-day The Mother Church in feeding the five thousand of its seating capacity likewise feeds the world, though the world may know it not.

The cry of the world is for bread, but in reality this bread is not material. Question any supplicant long enough and deep enough and you will find the heart hunger underlying the cry. Mankind strives, competes, toils, fears, and agonizes seemingly for material possessions but really for mental ones, for happiness, peace, safety, harmony. Mrs. Eddy understood humanity's plea when on page 17 of "Science and Health with Key to the Scriptures" she interpreted spiritually the prayer "Give us this day our daily bread," as "Give us grace for to-day; feed the famished affections." Grace may seem to be a strange substitute for bread to the unenlightened, but whoever possesses grace possesses wealth. No good thing can be denied to those who have "the grace of our Lord Jesus Christ," the ability and authority to feed the sheep with Life, Truth, and Love. Those who feed are fed in return,—this is the law of God and is demonstrable in Christian Science. The affections cannot be famished when they are enriched by giving. Therefore to obey Jesus' injunction, "Feed my sheep," is to find the way to heavenly riches, and temporary necessities will not fail as long as human consciousness calls for them. This is the comfort of the Comforter, divine Science, that there can be no real failure of food, no financial stringency, no lack of labor, no paralysis of life or limb, no mental inertia in the kingdom of heaven, and that heaven is here and now for those who feed the sheep.

Nothing but good awaits those who respond to the call of Spirit. They need have no anxiety. Let them spend and expend of God's infinite bounty, not of their own, for every good thing is of the Father-Mother. As Mrs. Eddy has written on page 530 of Science and Health: "In divine Science, man is sustained by God, the divine Principle of being. The earth, at God's command, brings forth food for man's use. Knowing this, Jesus once said, 'Take no thought for your life, what ye shall eat, or what ye shall drink,'—presuming not on the prerogative of his creator, but recognizing God, the Father and Mother of all, as able to feed and clothe man as He doth the lilies."

WILLIAM D. MCCRACKAN.

## Notice

On account of the increase in the activities of the Christian Science Comforts Forwarding Committee, it has been obliged to move to new quarters, at 708 Beacon Street, where all goods and mail should be sent.

# Among the Churches

## Current Notes

SKAGWAY, ALASKA.—Next Sunday [May 5] the Christian Science Society will begin to hold services in their new home at the corner of Fourth Avenue and Main Street. This property, formerly the First Baptist Church, was bought by the Christian Science Society last fall. The building has been in the hands of carpenters, painters, paper hangers, and other artisans since that time. Such alterations were made as were required, and other necessary work was done, so that now the edifice is one of the most artistic, both inside and out, of any in Skagway.

This society was formed some six years ago, and services since that time have been held in the Alaskan Building. As the society grew, the need for a more appropriate building was recognized and the result was the purchase and remodeling of the above-mentioned property.—*The Alaskan.*

COVINA, CAL.—Opening services for the new church building of First Church of Christ, Scientist, were held Sunday [May 19]. The building has been erected at the corner of Third and West Center Streets, and is of colonial design. Although not large it has a stately and dignified appearance. The auditorium will seat two hundred and fifty people, and there are several small rooms.

First Church of Christ, Scientist, became a church in Covina in March, 1917, after a number of years as a society here. When the body was first forming it met as a group at the Mountainview Ranch from July, 1911, to February of 1912, and since that time has held regular meetings in the Woman's Clubhouse.—*Covina Argus.*

SALEM, ORE.—A special trainload of people came to Salem from Portland to attend the lecture on Christian Science which was given at the penitentiary Monday night, April 29. The Governor of the state sat on the platform with the lecturer, who was accompanied by a member of the state parole board, and by the chairman of the union extension committee, who is in charge of the monthly services of the Christian Scientists at the institution.

Townspeople joined the Portland folk as guests in the gallery. Over 75 per cent of the prisoners attended the lecture. All the men from the wood camp were brought in and also the men working on the farm. Warden Murphy introduced the lecturer.—*Lend A Hand.*

SPRINGFIELD, MASS.—Plans for the erection of the superstructure of First Church of Christ, Scientist, were filed with the building commissioner, and a permit was issued yesterday morning [April 1]. The plans call for merely the rough work. The cost of the work as estimated on the plans filed is seventy-five thousand dollars.—*The Republican.*

SHEBOYGAN, WIS.—A service flag with six stars, presented by the board of trustees of First Church of Christ, Scientist, was dedicated yesterday [May 30].

*Sheboygan Telegram.*

# The Lectures

BILOXI, MISS. (Society).—Paul Stark Seeley, lecturer; introduced by Victor Kutchin, M. D., who said in part:—

In view of the fact that I am a member of the medical profession and naturally enough more or less antagonistic to Christian Science, and the additional fact that I am not a Christian Scientist, I deem it no small honor to have been selected to introduce the distinguished speaker of the evening. Generally speaking, the old religions had much in common; namely, the fear of death, and the use of life—this present life—to prepare for a life beyond the grave. Speaking in a business way, they were all managed on a credit system, and for services rendered time checks were given that were to be cashed after the to-morrow of death. Now on the other hand Christian Science seems to be managed on a cash system—you get your pay here and now, and life in no sense is a preparation for death; for matter being a shadow and Love the one stupendous reality, death is vanquished, and happiness becomes the by-product of right thinking.

I would vision in a few sentences a thought I have on the future of Christian Science. I see yonder on the mountain top a great church, and in the chancel a revered and much loved woman who has done more than any other religious teacher, since the Master of Nazareth dwelt among men, to banish from life that blighting, grisly phantom known as fear; and I cannot imagine a time coming when the windows of that church shall be darkened and the great teacher no longer found visualizing and demonstrating for the children of men the existence of certain eternal verities amid a world of shadows.

NEW YORK, N. Y. (Fourth Church).—William D. Kilpatrick, lecturer; introduced by Mrs. William Belknap, who said in part:—

About fifty years ago a spiritually minded New England woman, after many years of delicate health and sharp experiences, lay hovering between life and death. Suddenly the spiritual sense of the words, "Because I live, ye shall live also," dawned upon her and she was healed. She rose and, like another Mary, "kept all these things, and pondered them in her heart," and ceased not to seek for the Principle she knew to be involved in her healing. She found this Principle to be God, demonstrable and provable. Because of this the world has given unnumbered millions of its hopeless, sick children to be glad followers of the Christ-principle that she discovered.

BERKELEY, CAL. (Society, University of California).—Dr. Walton Hubbard, lecturer; introduced by Henry Edward Ashmun, who said in part:—

Jesus said, "Blessed are they which do hunger and thirst after righteousness: for they shall be filled." Thank God for the fulfilling of that promise! To a world weary of vain opinions and blind material theories, and demanding proof and practice instead, Christian Science comes as the eternal truth of being. To none is it more welcome than to the college student, whose attitude perhaps typifies the present day demand for results. Thousands of thoughtful college men and women have proved to a certainty that Christian Science is demonstrable, that it meets every need of humanity, and that it is available to all.

ST. AUGUSTINE, FLA. (Society).—Paul Stark Seeley, lecturer; introduced by Arthur L. Slater, who said in part:—

One great longing fills the hearts of all mankind to-day, and that longing is for peace, not a patched up "peace at any price," but peace with victory, the only real, enduring, and God-given peace. Christ Jesus on the eve of the most tumultuous and stormy day of his earthly career was able to say to his disciples, "Peace I leave with you, my peace I give unto you;" and he could say this because he had "overcome the world,"—the world of selfishness, sensualism, sin, sickness, and death. There is a large and growing body of

Digitized by Google

people who, through their study of the Science which Christ Jesus demonstrated, are learning how to overcome these same evil tendencies in themselves; and in the measure that they are victorious they are experiencing, in the midst of the world-wide strife, that great peace which truly "passeth all understanding."—*St. Augustine Record.*

MILWAUKEE, WIS. (Second Church).—William W. Porter, lecturer; introduced by B. F. West, who said in part:—

What is called the Christian Science movement is simply the awakening to human consciousness of the great truth that has always existed; namely, the allness, presence, and power of divine Love. This truth has never been absent from the world, but there has been a belief in its absence. How is it to be made available to the needs of suffering humanity in a practical way? The Bible, spiritually understood, contains this truth, and the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, reveals it in so definite and systematic a manner as to constitute a demonstrable science, in the application of which our health, our lives, our morals, and our happiness are protected.

ALBERT LEA, MINN. (First Church).—Virgil O. Strickler, lecturer; introduced by V. B. Valleau, who said in part:—

Christian Science is neither an experiment nor a fad, but has taken its rightful place among the recognized religions of the world, and on account of its being so practical and so demonstrable in every walk of life, has brought joy and peace and health and contentment to thousands of thinking men and women throughout the world. In short, it is the religion of the lowly Nazarene, rediscovered and applied in modern times with all the simplicity of Bible days.

*The Tribune.*

BALTIMORE, MD. (First Church).—Charles I. Ohrenstein, lecturer; introduced by Walter S. Cross, who said in part:—

Christian Science is to-day attracting a world-wide interest, because it is bringing to the Christianity of this age the fulfillment of Jesus' words that healing signs should follow them that believe on him, or understand his teaching. We all know that the healing of the sick constituted a large part of the ministry of Christ Jesus, although this healing element of Christ's teaching had for centuries been lost to the Christian church until the coming of Christian Science. The Christian Scientist understands that the same healing works of primitive Christianity are a necessary counterpart of Christianity for all time.

BOISE, IDAHO (First Church).—Clarence W. Chadwick, lecturer; introduced by Arthur O. Maus, who said in part:—

The mission of Christian Science is to bring healing to mankind, and Christian Science healing means more than merely physical healing. It includes the mental and moral upbuilding as well; it reaches and heals every form of human inharmony or dis-ease, lack of ease.

MEDFORD, ORE. (First Church).—William W. Porter, lecturer; introduced by W. Y. Crowson, who said in part:—

Christian Science is consistent in that it denies the legitimacy of any and all forms of beliefs or practices which in their exact and final analysis do not point to God as the only cause and creator, and man in His image and likeness. In its simplicity and directness lies the secret of the wonderful power of Christian Science, a point that has been entirely overlooked by those who have mistaken popular education for wisdom.

INDIANAPOLIS, IND. (First Church).—George Shaw Cook, lecturer; introduced by Clare G. Cameron, who said in part:—

The purpose of a Christian Science lecture is to bless all mankind. Christian Science teaches the value of correct thinking, which must necessarily result in correct living. It is a practical religion, as is proved by all who will honestly seek and earnestly strive to bring their daily lives into obedience to divine Principle, whose healing and saving power is eternal and ever operative. This truth elevates and purifies the character, heals the sick, destroys sin, and reveals God to us as Love.

ALTOONA, PA. (First Church).—Frank Bell, lecturer; introduced by Mrs. J. P. McWilliams, who said in part:—

At a time like the present when there is so much distress in the world, it is a good thing to be reminded of God, who is Life, Truth, and Love, governing every manifestation of good. Any condition which seems to manifest evil, death, error, or discord of whatever nature, is the result of ignorance of God, rather than knowledge of Him. God being Spirit, Mind, can be approached only through spiritual understanding, which must supersede so-called material knowledge. The only possible way to rise above discordant conditions is to grow out of them through a conscious knowledge of God and spiritual law. This spiritual growth is attained solely through the realization of the paramount fact that God, good, and His manifestation alone are real and eternal.

NEWBERN, N. C. (First Church).—Charles I. Ohrenstein, lecturer; introduced by Mrs. Bayard Wootten, who said in part:—

I think it is universally conceded by the public that Christian Scientists have a truth that helps them to solve life's problems, and nearly every one wishes to know what it is that enables them to grow and multiply in the face of prejudice and ridicule. Christian Scientists would share this truth with the whole world, and to this end they provide authorized lecturers to present the subject to the public.

*The New-Bernian.*

BOSTON, U.S.A. (Second Church).—Dr. Walton Hubbard, lecturer; introduced by Nelson H. Armington, who said in part:—

In bringing Christian Science to the world Mrs. Eddy does not claim to have given it a new method of healing; for she states clearly in "Science and Health with Key to the Scriptures" (p. 406), "The Bible contains the recipe for all healing." She has simply rediscovered this recipe, or rule, of divine healing, which was taught and demonstrated by Jesus nearly two thousand years ago, and which to-day, when understood, heals both disease and sin.

## Lectures to be Delivered

**By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.**

CALIFORNIA—San Francisco (First Church): Church Edifice, California and Franklin Streets, 8 p.m., Aug. 17; Dreamland Rink, 3 p.m., Aug. 18.

NEW YORK—Richmond Hill, Long Island: Garden Theater, Jamaica Avenue, 3 p.m., Aug. 18.

VERMONT—Springfield: Universalist Church, 8:15 p.m., Aug. 20.

## Notice

Bliss Knapp, C.S.B., will not be available for lectures in America from October, 1918, to May, 1919, because of a lecture trip overseas.

Digitized by Google

# Testimonies of Healing

Our dear Leader has in every way helped us in our journey out of self into an understanding of infinite selfhood—God. Giving testimonies is one of these practical aids, and thankfully I give mine. When I was about five years old, on being brought home from Ceylon to live in Scotland, a tropical complaint seemed to attack me and nothing was found to cure it. About seven years ago I was in very poor health, and this disease had assumed what were called fatal symptoms. My sister kindly asked a Christian Science friend to go to see me and try to get me to read "Science and Health with Key to the Scriptures" by Mrs. Eddy. The lady came one morning. I do not remember anything she said, but I was so impressed by the kindliness of the visit that I accepted the loan of Science and Health and promised to read carefully this book of which I knew nothing. At the time I was heartily sick of trying any remedy for my complaint, I felt so hopeless about my condition.

When my visitor left I took up the book and commenced with that wonderful Preface. I was interested from the first sentence and read on full of joy with what I was reading. This must have gone on for an hour or so, when the children's dinner bell rang. Just then I was on a very spare diet and was staying in a warm room, but at the sound of the bell I put down the book, went to the dining room, took my place at the table, and enjoyed along with the others a very solid meal. The children were looking at me and, I thought, wondering what had come to me, so I said, "Children, don't be afraid; I am reading a book on Christian Science, and it shows plainly that God is Love and how to put this faith into practice." I never dieted after that. I found it very hard to give up medicines and material treatment, but they all had to go. I have been healed of chronic internal catarrh in its worst form, anæmia, sciatica, severe sick headaches, and many other things.

I am so glad I can show some of my gratitude by studying Mrs. Eddy's writings and our splendid Christian Science literature, learning how to watch and pray, and how to help those who are becoming interested in Christian Science, also those in trouble who are longing for help. I have had great help from church membership, also from class teaching, and from a Christian Science practitioner. I would like to add that the Christian Science Sunday school has been a great blessing to two of my children.

My son saw it his duty to offer his services to his country, and in that awful strife on the western front in France he passed on. The help that I got from Christian Science kept me brave, and willing not only to prove for myself but to help the whole world know something of the truth, that there is in reality no separation. I am learning to rejoice "in the communion of the saints," and live to know that we are the children of God, "joint-heirs with Christ," for God is our Life. I am more and more grateful every day as I realize the help Christian Science is to us in these very difficult times through which we are all passing just now, and rejoice in the fulfillment of the Master's words, "Look up, and lift up your heads; for your redemption draweth nigh."

(Mrs.) Mary A. Pargiter, London, England.

✧

One of the many things for which every Christian Scientist is grateful, is the help which Christian Science is in overcoming fears and doubts of daily experience. Before I became interested in this teaching, the winter was frequently for me a season of coughs, colds, and throat troubles, sometimes of a seemingly severe nature. I feared these conditions, yet expected them; and they were often in evidence.

Five years ago, when I was almost a physical and mental wreck, a friend who had himself been healed of sunstroke through the power of Truth, induced me to look into Christian Science. Without any faith in it, and knowing nothing as to what it taught, yet willing to test anything that promised relief from the fear and torment with which I was afflicted, a practitioner was called and treatment requested. My healing was slow and at times I became discouraged; but with the help of advanced students and the earnest study of the textbook, "Science and Health with Key to the Scriptures," and other writings by our Leader, together with a sincere desire to know and understand the truth, I have been gradually led out of the wilderness of many false beliefs and physical discords. Nervous prostration, the wearing of glasses, the tobacco habit in both its forms, a growth on the shoulder, and other minor conditions have slowly but surely succumbed to the light of Truth; and, best of all, a truer sense of love for God and my fellow man is being manifested.

In our home we have also had help for other members of my family, and Christian Science has never failed us when relied upon for relief. Many times before my healing was complete I anxiously listened in the Wednesday evening testimony meeting to hear some one tell of the overcoming of conditions similar to my own; and I feel sure that if every one who is trying to be a Christian Scientist could realize that his particular testimony may be the one which some one is waiting to hear, we would one and all resolve to overcome the error which tells us we have nothing to give at these meetings, and our Wednesday evening gathering would indeed be a feast of good things for both ourselves and the stranger within our gates.

I certainly am thankful to the Giver of all good for the blessings received, also grateful to Mrs. Eddy for her writings, and to all who have helped me to gain even a small measure of understanding of Christian Science.

S. A. Moore, St. Joseph, Mo.

✧

After twelve years of receiving many great blessings from Christian Science, I am glad to tell a little of what it has done for me. I was a nervous and physical wreck, and had been under a specialist's care for nine months without receiving any relief. When I asked why he could not help me, he gave me this answer: "If I could get control of your mind I could heal you in three weeks' time." As he was also a dear friend, he was told of a deep sorrow through which I was passing, and he used that as his excuse for not proving his skill as a specialist. I immediately asked for his bill and took every bottle and box of medicine I had and emptied them out on the ground. Within two weeks I was led to attend my first Christian Science service through a dear friend telling me she was going to take up Christian Science for herself and her family. From that day to this I have never tasted medicine.

My first healing came about through the reading of Science and Health: I was freed from the necessity of wearing two pairs of glasses. Then I went to a practitioner and was healed of chronic bowel disorder, supposed to have been inherited. Some members of the family had gone through severe operations for this trouble and I was getting ready to do the same when Christian Science came to my help. I had throat trouble in such a severe form that I would nearly choke while waiting for a doctor to give me relief. It took the form of croup, and one doctor said I need not be sur-

Digitized by Google

prised if I lost my voice after a hard attack. As my mother had passed out from throat and lung trouble, it filled me with fear. This ailment also was entirely overcome through Christian Science.

Ten years ago I was taken with influenza. I had been a great sufferer from this ailment every winter, and had been having it some six weeks. I tried osteopathic treatment for two weeks with no results; the doctor was only filling me with fear, as he said I must go to the mountains. I then went to a Christian Science practitioner for help, and in three or four treatments was completely healed. I have never had this trouble since; I have had slight colds, but have always been helped through Christian Science. A year ago an injury to my leg, resulting from a severe fall, was overcome in one treatment, and there were no after effects, as I at first feared. In the past few months I have had much joy over a business demonstration. In a business complication I was helped by a Christian Science practitioner, and a situation involving loss and discord covering a period of over six years was entirely straightened out.

I am very grateful for the many blessings received through the study of this wonderful truth; indeed, I have not words to tell of my thankfulness to God and my gratitude to our dear Leader, Mrs. Eddy. I am also grateful for the literature which comes to us daily and helps us in our every need. I know that all I have comes from the Father. My desire is to be a true Christian Scientist.

(Mrs.) DELIA C. BRIGHT, Hollywood, Cal.

✧

Our beloved Leader tells us in "Science and Health with Key to the Scriptures" (p. 66), "Trials are proofs of God's care." This has recently been made clear to me. About a year ago I removed from Detroit, Michigan, to Brooklyn, New York. As my son was attending Michigan University at that time it was thought wise to leave him behind. To mortal sense this was, in my case, exceedingly difficult to do on account of the seeming reality of the separation, and was the cause of a nervous breakdown. Christian Science treatment was asked for, and within three days the ailment was beautifully overcome; and now I can readily see what is meant by the above quotation. That trial was preparing me for a larger sense of separation; namely, that of giving up my son to take his rightful place in the present world struggle for humanity. I can honestly say I am happy and grateful that he is one of the many young men of our country who have taken a stand for Principle. I have no fear for him, knowing divine Love fills all space and will care for him.

I have had many healings in Christian Science; but especially for the one above mentioned am I most thankful to God and grateful to Mrs. Eddy.

(Mrs.) LOIS A. CALVIN, Brooklyn, N. Y.

✧

I have received untold blessings through the knowledge of Christian Science, having been helped spiritually, morally, and physically, and am deeply grateful. Most of the treatment I have received has been absent, very often by a practitioner a long way off, but I have always been helped, sometimes instantaneously. I have also been healed by reading Mrs. Eddy's book "Science and Health with Key to the Scriptures." One particular time I would like to tell about.

I was in the country away from any possibility of getting help from a practitioner and had one evening what appeared to be a fever. I was feeling very miserable, so went to my room to read and try to realize the truth as taught in Science and Health. When my sister asked me to go with her to a friend's house with a message from my mother, my first thought was that I could not possibly go out, as it was a very cold, stormy night; but I then remembered that I professed to believe in God as omnipotent, All, and if I really believed it, there was nothing to be afraid of, so I went. My friends remarked that I looked very flushed, but said no more. On getting home I was still feeling very bad, so went back to my room and began to read again. When I came to the place where Mrs. Eddy says (Science and Health, p. 376), "Destroy fear, and you end fever," I shut the book. I saw it was fear, not fever, from which I was suffering, and there was nothing to fear. I went downstairs and spent the evening as usual, and that was the end of the supposed fever; I was so completely healed I forgot all about it, and only remembered it again many months afterward.

I am very grateful for this experience, as it has proved for me how absolutely true are Mrs. Eddy's statements in Science and Health.

(Miss) GLADYS W. WILSON, Dublin, Ireland.

✧

For a number of years I earnestly prayed to know how to serve God, as the religion in which I had been educated to believe, proved futile in helping me to overcome temptation and discordant conditions. Christian Science came to me three years ago as if in answer to my prayer and has proved to be all I could hope for in every way; it has been my physician, my counselor, and my source of supply. Prior to taking up the study of Christian Science I suffered from chronic bowel disorder, hysterical nervousness, and physical weakness. My little daughter also had bowel trouble from her birth. We had a physician examine her when the condition had reached a critical stage and he said it would take some time to experiment, for they would have to find the proper food. I had met a Christian Science practitioner and she told me of some of the wonderful results Christian Science had wrought in others, so I asked my husband to allow her to treat the baby. The little one was in a very weak, feverish condition, and we did not think well of having the doctor experiment, so decided to dismiss him and try Christian Science. After the first treatment the fever left; and after the second, the child had the first normal movement of the bowels since birth. She was then eight months old. In a short time she was healthy and happy.

I then became so absorbed in searching for the truth that I did not think of my own physical condition until some time later, when I discovered that I was manifesting more strength and energy than I had ever known and that the bowel condition had been overcome. We have had many proofs of the healing efficacy of Christian Science since then. I am very grateful for what this demonstrable religion has done for my small family, and especially thankful to God for the spiritual regeneration which has taken place in my consciousness as my understanding of this wonderful truth has increased.—(Mrs.) ELIZABETH ROBINSON, Chicago, Ill.

✧

When I was a child, a sister was healed by Christian Science treatment. This healing seemed very wonderful to me, and I became interested; but although I was helped and many times experienced healings, I was never able to understand Christian Science, and as I grew older the study of it was dropped entirely.

About two years ago my eyes were in such a condition that I was unable to read or sew without intense pain and a greatly inflamed condition of the lids. Glasses were worn but did not help any, and other forms of material treatment

Digitized by Google

were tried without success. One day I came across my copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and started to read it. This time I knew everything I was reading to be the truth, and I could understand it. I continued reading every day, and before a week had passed my eyes were healed. I have been able to discard glasses, and have used my eyes almost constantly since. The trouble has returned several times, but each time at a greater interval and with less effect, and it has been quickly overcome with the knowledge of Christian Science. I have also been healed of influenza and colds. An internal trouble from which I had suffered eight months under medical treatment before recovering, was healed in three days under Christian Science treatment and has not returned.

Although grateful for the physical healings, I am far more grateful for the knowledge of God that has come to me through the study of Christian Science. This understanding has freed me from a lifelong terror of darkness, of the ocean, and of fire. It seems impossible fully to express my gratitude to Mrs. Eddy, whose loving consecration made it possible for us all to know the truth.

(Mrs.) Mildred Willcutt Roberts, North Scituate, Mass.

I certify that the facts of the above testimony by my wife are true.—F. H. Roberts, Lieut. Com., U.S.N.

✧

I wish to express my deep sense of gratitude for the many blessings that have come to me and mine through Christian Science. I was raised from a bed of illness, my trouble being inflammatory rheumatism and neuritis. I was unable to move or help myself in any way, and at times it seemed as if I were about to pass out; but through the understanding of divine Love as taught us by our beloved Leader, Mrs. Eddy, and with the help of loving practitioners and a Christian Science nurse I was healed; for I learned that I live, move, and have my being in God, and that there is nothing impossible with Him. For this understanding of the Christ, Truth, I am indeed grateful.

I have had many other proofs of the omnipotence of God, hemorrhages and other ills having been overcome through absolute reliance on Truth. My heart overflows with gratitude for this beautiful truth which heals all manner of inharmony. I am receiving blessings each day from the study of Christian Science.

(Mrs.) William F. Kell, Washington, D. C.

✧

With loving gratitude for blessings received I send this testimony, knowing that some one will be helped by it. After suffering mentally and physically for a long time I was led to Christian Science. I would not try it, however, until the doctor said I would never entirely recover from the physical ills, and the sense of sorrow became unbearable. The dear friend who urged me to give Christian Science a trial, assured me that the sorrow would leave if I had treatments. I thought I could bear the physical ills if the sorrow would only depart, so at last I went to a practitioner. When I informed her that the doctors said I had heart trouble, her spiritual insight told her the cause. After two weeks' treatment the mortal belief of cause and effect was entirely destroyed and I was free. Since that time I have been able to walk many miles a day, climb hills, play tennis, and do many other things requiring exertion, with no bad effects, although the doctor had said I should never be able to do them again.

A daily study of Christian Science literature brings with it healing from errors of every kind. This study is so emptying my consciousness of error and filling it with love, that I have been enabled to some extent to help others. For this truth I am very grateful to Christ Jesus, the Way-shower, also to Mrs. Eddy, who worked for us so unselfishly, and to those friends who helped me in the way.

(Miss) Marguerite E. Speck, Great Falls, Mont.

✧

It is with pleasure that I take the opportunity to give my testimony of healing. I turned to Christian Science for treatment through the advice of a friend. I had suffered for about eight years with what was termed a chronic gastric trouble, which aggravated organic heart disease and all the miserable attendant conditions, such as nervous exhaustion, melancholia, and bowel disorder. Treatment by doctors of different schools failed to give me any permanent relief, and I continually got worse, never better. My friend, in recommending Christian Science treatment, stated that "man's extremity is God's opportunity," and so it proved; for I was healed of the stomach trouble and attendant conditions in about six treatments. I have also been healed of having to wear glasses, after using them for about ten years. I had my first Christian Science treatment in June, 1914; since that time I have not taken medicine or had treatment of any other kind. I find that divine Love does meet every need of mankind, and I am now enjoying life, whereas before coming to Christian Science I eked out a miserable existence. I am indeed thankful to God, and grateful to Mrs. Eddy for this healing truth.

Emlen H. Fisher, Philadelphia, Pa.

✧

Not long ago a writer in the *Sentinel* spoke of a little bird which had taken refuge in a vacant room having two large windows, one of which was closed. In trying to leave the room the bird saw only the closed window, and after becoming exhausted by its efforts to gain freedom, was released by the writer of the article referred to. This seemed to me an exact picture of my own experience in trying to find God. I knew that God's universe existed, was perfect, and that God was, as the Bible states, available and "no respecter of persons." The barrier in my case was materiality, which always separated me from God, until I was liberated by Mrs. Eddy through her spiritual understanding of divine Principle and idea as expressed in "Science and Health with Key to the Scriptures."

When three of my acquaintances were healed of so-called incurable diseases by one who had been Mrs. Eddy's pupil, I said, "There is an understanding of God that I do not know anything about,"—and how I wished I had that understanding. I called upon this lady and asked her if she would teach me the understanding of God which heals the sick. I was told that it was the teaching which Christ Jesus brought to the world, and was again appearing in Christian Science. In the course of time I received class instruction and began to find freedom from material beliefs.

Before coming to Christian Science I had worn spectacles constantly for about fifteen years. My eyes were healed at a Christian Science lecture more than eight years ago, and I have had no need for spectacles since. I was healed of grief by attending the local church services and studying the Bible in connection with Science and Health and the *Quarterly*. I have been helped mentally, morally, physically, and financially by the teachings of Christian Science.

The spiritual liberation means everything to me, and I

Digitized by Google

am grateful for every avenue through which Christian Science by freeing the world is healing it. My desire is to live my gratitude for this truth.

(Mrs.) EDNA M. DILLA, Jackson, Mich.

✧

I wish to express my gratitude for what Christian Science has done for me. I had help in Christian Science a number of years before my marriage, and for a time kept up the study; but I finally seemed to drift away from it, and after my marriage used material remedies for everything for a year or two. Then came a period of suffering caused by the premature birth of a child, and for the relief of which I had to undergo an operation; but I did not experience the relief we had hoped for. Finally the doctor said another operation was necessary. This was very discouraging, and I persuaded my husband to let me take Christian Science treatment. He consented, upon the condition that if I was not much better in a month the operation should be performed. A practitioner lovingly took up treatment for me, and in a month I was healed and able to do my work again. This was about five years ago, and I have not had the old trouble since.

My husband has had a great deal of help in Christian Science since he saw how it benefited me, and our little boy was healed of a "snuffling," which many said was caused by nasal growths. Colds and other inharmonious conditions have also been overcome very readily, and there is a greater freedom from fear, which used to be constantly with me. Although I am not always able to overcome fear instantly, yet by holding to the truth about God, as taught in our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have been greatly helped.

We are not near any church, but we have the *Sentinel*, *Journal*, and *Quarterly*, and they are very helpful. I am thankful to God for His good gifts to us, and also feel deeply grateful to Mrs. Eddy for showing us the way to live better and happier lives.

(Mrs.) LELA E. PRICE, Markleeville, Cal.

✧

With a heart filled with love and gratitude, I send this testimony of the many blessings that have come to me and mine since I began the study of Christian Science. I had never been strong, and was told that I was anæmic. There were also other ailments which kept me under a doctor's care most of the time for many years. I finally heard of what Christian Science had done for a cousin who had been a great sufferer, and of other healings; but I never had any desire to investigate it for myself.

In February, 1916, I was taken with a severe cold, which after two weeks developed into acute lung trouble. I gradually grew worse, my lungs and heart being badly affected. After three weeks the doctor said he had done all in his power for me and there was nothing more to be done, so I dismissed him. At this point man's extremity proved to be God's opportunity, for the thought came to try Christian Science. As if God-sent, my cousin called on me that afternoon. I asked for help, which she lovingly assured me would be given. I was healed of this illness in three days, and the next Wednesday attended my first Christian Science service. About three weeks after this healing took place, I was able by reading and study to make my first demonstration over an ailment which had been troubling me for years. In the following November I had a cold again; I tried to help myself, but after two weeks found I was getting worse instead of better. A practitioner was asked to treat me, and I could see an improvement; but a trial was at hand, for one symptom after another manifested itself. I seemed to be injured internally from coughing so hard, and after a while an abscess formed on the right lung; also there was great pain in the head and shoulders. To mortal sense this abscess would have been a dangerous thing on account of the discharge, but no bad effects were experienced, and with the loving help and patience of the practitioner, I was again made whole.

Words fail to express my love to God and my gratitude to our beloved Leader. My earnest desire is for a better understanding of God, that I may be able to do His will by helping others who are seeking this blessed truth which makes free.

(Mrs.) CORNELIA P. FLETCHER, Lakewood, Ohio.

✧

I am thankful for Christian Science. We have had many blessings in our home, and love the Bible so much more since gaining the spiritual understanding of it. For sixteen years I had bowel trouble in the worst form; the bowels seemed to be paralyzed. I tried several good doctors, but the medicine given me brought only temporary relief. I was suffering also from terrible nervous trouble, backache, and rheumatism. All these have been overcome by the application of the teachings of Christian Science. I am more than thankful to God, and grateful to Mrs. Eddy for these demonstrations of the power of Truth to heal the sick in any age.

(Mrs.) STELLA G. DELFS, Omaha, Neb.

✧ ✧ ✧

# From the Press

[*The Brooklyn* (N. Y.) *Eagle*]

Even among the fighting men of Europe, the men who face showers of shell and bullets, the Christian Scientists are doing missionary work. How do the doctrines of Mary Baker Eddy appeal to the Poilus? In the midst of battle Christian Science must appear the height of folly or the only logical religion to embrace.

A while ago there arrived in the mails to the Paris bureau of the *Eagle* a copy of a French trench journal, *Echo des Gourbis* (*Gourbi* being French soldier slang for a bomb-proof). It was a very well written and well printed little sheet, and among the articles there was one headed "La Science Chrétienne," which naturally attracted attention. Ordinarily the trench papers do not refer to matters of religion; if the French soldiers have any religious sentiments they keep them to themselves. They neither write nor talk about them, and to men facing the scorching breath of death ordinary preaching must seem terribly futile. And of all doctrines, that of Christian Science, with its particular views of suffering, bodily injuries, and death would seem the most strange or the most consistent.

I have visited the reading room of the Christian Scientists at 194 rue de Rivoli and have learned that so far about three hundred and fifty thousand booklets, in French and English, have been sent out from Paris to the French soldiers at the front. The British are being served from London. Now the recently arrived American fighters are also being equipped with Christian Science booklets. Copies of *The Christian Science Monitor* are sent to all the camps.

"And what success have you had among the fighting Poilus?" I asked. "Very good," was the answer. "We have received nearly 1200 letters asking for more literature, and now that Science and Health has been published in French and English, we are receiving numerous demands. The let-

Digitized by Google

ters are most wonderful. Many of the soldiers say they have been helped by Science. One Poilu writes that he used to tremble with fear when a shell broke close to him, but now he knows no fear whatever. Like so many of his comrades he has learned to protect himself by Science. We also have letters from men in the submarines who say they have studied Science during the long night watches at sea. A commander of a gunboat at Gallipoli writes he went through the whole campaign unscathed. He had been able to protect not only himself but his crew and his boat by using Science. Only this morning we received a request from a Serbian officer at Cannes for a copy of Science and Health in French. Among the Americans who are preparing to fight we find that the study of Christian Science is growing fast. To the men at the front, surrounded as they are by misery, destruction, and death, Christian Science is a great consolation; it is one pure thing to which they can hold fast."

In addition to sending booklets the Christian Scientists have aided many of the war sufferers by more material means —money, clothing, and food. A new reading room will be opened soon at 6 avenue de l'Opera, a more central location than that of the present reading room, which has been open since 1898. There are also two Christian Science churches in Paris, in which services have been held continually since the war started.

[*The Living Church*]

Christian Scientists have made admirable provision for maintaining the religious loyalty of their men in the Army. Not only are Christian Science meetings held regularly, but also, according to a report of their Camp Welfare committee, whenever anyone in uniform is found who is interested in Christian Science he is offered a textbook, *Quarterly,* and song book in vest pocket size, and a subscription to *The Christian Science Monitor.* The *Monitor* is being placed daily in many of the Y. M. C. A. huts, in camp libraries, and in many of the barracks of the officers and men. About ten thousand copies [now nearly thirty thousand] are daily distributed in the camps, as stated in this report of the Camp Welfare committee of the Christian Science organization. And yet we wonder why Christian Science grows! Do we hear churchmen rise to offer funds for supplying *The Living Church* and other churchly literature to our men at the front?

[*Rutland* (Vt.) *Herald*]

If all the doctors go to war, there is still the refuge for those who remain at home of becoming Christian Scientists —a sect of people who, by the way, maintain remarkably good health.

✧ ✧ ✧

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal.*

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly.* Reading rooms may secure any desired quantity of either or both sizes.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlet

"Christian Science: A Religion that Heals through Spiritual Law," by Virgil O. Strickler, is now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal.* Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the War Relief and Camp Welfare Fund, the Real Estate Fund, and the Benevolent Association Fund should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

THE CHRISTIAN SCIENCE MONITOR

AN INTERNATIONAL DAILY NEWSPAPER

PRICE 3 CENTS | BOSTON, U.S.A., TUESDAY, JUNE 11, 1918—VOL. X, NO. 167 | INTERNATIONAL EDITION

RENEWED CALL FOR AID FOR PERSIANS IN NEED OF FOOD

AEROPLANE MAIL SERVICE RESUMED

MR. WILSON AND HIS MEXICAN POLICY

TWO MORE CHRISTIAN SCIENCE CHAPLAINS

BONE DRY LAW MAY BE PASSED BY THIS CONGRESS

NEW STAR VISIBLE IN EASTERN SKY

JUGO-SLAVS BEING RECRUITED WAR

Occasionally it has been said about THE CHRISTIAN SCIENCE MONITOR:

"Why is the name 'Christian Science' so prominently displayed in connection with THE CHRISTIAN SCIENCE MONITOR? Why not 'The Monitor'? It is such a wonderful newspaper that perhaps many people would take it more readily if the title placed less emphasis on Christian Science."

"The Monitor," with millions of circulation and a wealth of advertising and proud prestige, could not "spread undivided the Science that operates unspent" (The First Church of Christ, Scientist, and Miscellany, page 353) to the same extent as does the present circulation of "The Christian Science Monitor," the acceptance of whose title marks a step in healing.

The real newspaper mission of THE CHRISTIAN SCIENCE MONITOR is realized only in proportion as its power to heal is demonstrated. Hence Christian Scientists never hesitate to ask, not for "The Monitor" nor "The Boston Monitor," but for

"THE CHRISTIAN SCIENCE MONITOR."

---

Opportunity to send the messengers of Christian Science on their healing mission to the world is maintained through the plan of the Postmaster-General of the United States to send to soldiers and sailors destined to proceed overseas, at nominal postage, literature offered at post offices in the United States. A printed notice on the front of *The Christian Science Journal*, *Christian Science Sentinel*, and *Le Héraut de Christian Science*, signed by the Postmaster-General, explains the simple plan.

While the post office department has ruled that the above mentioned Christian Science periodicals are to be accepted by postmasters for use under this plan, the department order states that only "clean copies of current or comparatively recent issues" will be received.

Those desiring to send periodicals other than their own copies, or copies previously given for local distribution work, can doubtless make arrangements with any Christian Science reading room to mail these periodicals regularly as desired.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## The Christian Science Monitor

AN INTERNATIONAL DAILY NEWSPAPER

Founded, 1908, by Mary Baker Eddy.

Published daily, except Sundays and legal holidays. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions to the columns of the Monitor should be addressed: Editor, The Christian Science Monitor.

Subscription price, payable in advance, postpaid, to all countries: One year, $9.00; six months, $4.50; three months, $2.25; one month, 75 cents; single copy, 3 cents.

## The Christian Science Journal

Founded, 1883, by Mary Baker Eddy.

This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, list of Christian Science Practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 30 cents.

## Der Herold der Christian Science

Founded, 1903, by Mary Baker Eddy.

A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Founded, 1890, by Mary Baker Eddy.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size.

Subscription price, payable in advance, postpaid, to all countries: One year, $1.00; single copy, 25 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.00.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50.

Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

*"What I say unto you I say unto all, WATCH."* Jesus

VOLUME XX AUGUST 17, 1918 NUMBER 51

## "Hold your ground"

HAWLEY O. TAYLOR

THE thought that the affairs of the world may be conducted on a different basis when the air is again cleared at the close of the great war, is now being welcomed by those looking steadfastly to the signs of these times. Truth is not accepted by human beings without a struggle, but open hostilities are preceded by a season of stress. This may be likened to the stress which accumulates in the crust of the earth and which is finally relieved by the earthquake. As usually explained, the gradually cooling globe leaves the outer shell or crust a little too large and its weight gives rise to strains which increase until at the weakest point the resistance gives way and the crust settles, with the result known to us as an earthquake.

Human thought is in a continual state of change, but the methods along which activity proceeds remain more or less intact long after they have been outgrown. This is true in all stations of life, from the least matters of the home up to the great affairs of international government. The endeavor to fit constantly unfolding thought into methods of management which are constantly and necessarily receding into the archaic, gives rise to incongruity and friction in the conduct of affairs. Organization, or the machinery through which things were done, is the mentality which finds itself in the saddle when a recast of the methods in vogue is made imperative through the activity of progressive thought. He who has placed himself or has been placed in a position of authority and who seeks to obstruct progress in order that his selfish grasp on power may not be loosened, tends to become arrogant in his pretensions, ingenious in his inventions of hate, and diabolical in the methods employed to sustain his position. In proportion as he prefers power to progress, he will fight for the position from which he must be removed by the inevitable changes required in the readjustment of organization.

As long as these positions of authority are thus maintained, and the organization which has outlived its usefulness consequently remains as the channel of activity, society finds itself in an artificial state. It is run on the precedents of expediency and policy rather than on right, justice, and honesty. Under these circumstances capital and labor organize into hostile camps, there are rings in politics, cliques in society, and dynasties in governments; and prestige and power are maintained through force and compromise. This constitutes an extremely unstable and artificial condition of affairs, and is bound to result in social and political earthquakes which will relieve the mental strain, after which society will settle down into a more natural development of right and justice, and Principle, the law of Love, will be more clearly discerned as the governing power.

Christian Scientists are enlisted in a war against evil, and in the degree that they are vigilant and active will they make progress. The conflict is entirely a mental one, although it may seem to be decidedly physical at times. It must be remembered, however, that everything of which one seems to be conscious constitutes his mentality at the moment, even though it may be interpreted at this phase of enlightenment as transpiring in an outside world. The true apostle of progress uses the most effective means at his disposal to check the onslaughts of evil, for he knows that in all lines of activity progress is made by beginning where we now are and taking one step after another, rather than by a vain endeavor to take a flight far beyond one's power to achieve or to demonstrate.

In the present great war the conflict seems to be both physical and mental, with armies and with propaganda—and it is a question which of these is being pushed with the greater vigor. There may never be another war in which the conflict takes on a physical form, since activity is now being recognized more and more as essentially mental, and will finally be known to possess no material weapons; but whatever be the phase of man's enlightenment, devotion to Principle impels the Christian Scientist to throw his entire being on the side of right, no matter what becomes of his seeming physical self; for it is as true to-day as it was in Jesus' time that he who would save his life shall lose it, but he that loseth his life for Truth's sake shall find it.

The spectacle of the great war has aroused many a slumbering soldier in the Christian warfare to a true realization of his duty; for it is seen that a placid assent does not hold the line, and if we would conquer, we must, like the brave soldiers in France and elsewhere, "hold the line!" "Hold your ground," Mrs. Eddy says, "with the unshaken understanding of Truth and Love, and you will win" (Science and Health, p. 417). The enemy may come on in waves in the attempt to overwhelm us, and the line may twist and bend and yield in places, but when the battle is over the line will be found intact. In the face of a furious fire, in which all the machinations of evil are compounded, the positions should be held to the last man, and the foe, with appalling losses, can be prevented from reaching his objectives; thus to the allies of Truth the intended defeat becomes a glorious victory.

These tremendous struggles in which the line must be held against massed formations, while they may appear to be work for armies, are in reality the work of each individual consciousness. A false claim makes its appearance,—it may be some disease, pain, wound, or weakness,—but however substantial it may seem, it is merely a mental argument that there is reality in discord, and it must be vigorously met by the specific truth which neutralizes it; otherwise evil will reach its objective and consolidate its gains, and then it will require a mightier struggle to dislodge it. All the avenues of spiritual perception must be intelligently used to avoid a surprise attack. We must use every means to forestall the enemy's movements and we should tactically bring up our reserves, the supply of Truth which makes us free. Then, when our salient is attacked and the battle is being fiercely waged, we must hold the line against all the attacks of error, come what may. We must "rise in the strength of Spirit to resist all that

is unlike good," for "God has made man capable of this, and nothing can vitiate the ability and power divinely bestowed on man" (Science and Health, p. 393). When the battle is over, we shall behold the foe exhausted and disorganized, and the time for our counter attack will then have arrived.

Under the guidance of infinite intelligence we organize our forces, sending to the rear every semblance of weakness, and bringing to the front "unselfish ambition, noble life-motives, and purity" which, as Mrs. Eddy says on page 58 of Science and Health, "constitute individually and collectively true happiness, strength, and permanence." In calmness and confidence we await the word of command, and when it is given we joyfully go forward, meet the enemy on its own ground, and eject it from its seeming strongholds. The work of cleansing our consciousness must continue as long as there are strongholds to subdue, as long as we are cognizant of matter as substance. But as the line advances spiritward, man's dominion over evil becomes more marked, the reign of righteousness appears wherein expediency and policy give everlasting place to justice and honesty, and all stress and artificial conditions disappear in "the love of Christ, which passeth knowledge."

## Distribution Work

RUTH J. MORSE

THE distribution work of the Christian Science movement has been described as "joy-giving and health-bestowing," and its blessings have come in such large measure to the writer that she feels a deep desire to express gratitude for the privilege of participation in this activity by relating some experiences. When first asked to undertake that branch of the work which requires that the literature be left at certain designated addresses on a route, it seemed impossible to have courage to do so in some places, and very improbable that she could manifest enough wisdom to have the helpful conversations and experiences which other distributors were able to bring out.

This wrong state of thought was banished by the realization that "Love inspires, illumines, designates, and leads the way" (Science and Health, p. 454), and the prayer for guidance in this work has always been answered according to the need. The first shining step in understanding along this line was the realization that it is impossible to go to any place where Love is not present, that divine Love has always preceded us, and that as the manifestation of Love, Truth, and Life is in reality always present, it is our great privilege to accept the joy and protection of this angel thought.

The next step destroyed all sense of personal responsibility in this distribution work, for it was clearly seen that it is not the person but the literature which is the missionary. As we realize that there is one Giver, infinite Mind, and that the ideas of Mind are the receivers, we see the work in a truer light, and love it accordingly. No sense of weariness can come to one whose thought is filled with gratitude for thus being a messenger for the "streams of love,"—to quote from a familiar hymn,—and there is no thought of anxiety lest we say too much or too little. Being obedient like Paul to the heavenly vision, we can know that Love, Life, and Truth guide and care for every detail of the work, and will speak through us if necessary. We can thus go confidently, joyfully, and serenely on our way.

Human thought is reaching out for something better than it knows, and to this hungering consciousness the *Monitor* comes as the herald of a new day, which in due time is ushered in by the reading of the *Sentinel* and other authorized literature. This we know must sometime lead to the study of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. The Christian Science literature is the "Peace be unto you" of Christ, Truth, to this age, and as distributors of this literature we shall be led to those waiting hearts that are ready to be uplifted. A proof of Love's guidance came one day in a distinct leading to an unpromising side street which seemed to end in an open field. In turning a corner, however, a factory came into view and seemed the objective point. In the office was found a young woman, who gratefully accepted a copy of the *Monitor* and of the *Journal*, saying she was a stranger from a distant city and at that time was unable to buy the desired literature. The realization that it is the law of Truth to unfold its ideas, has disclosed opportunities for giving out the pamphlets published in foreign languages, and made it seem reasonable constantly to expect new places for distribution. This attitude of thought has greatly increased the demand, and made it necessary to be always ready with extra literature.

A great blessing comes as the reward of our effort to declare and know only the truth in regard to every erroneous condition which may be presented to our thought as we do this work. Distribution thus reflects the activity of divine Mind and is a fulfillment of the prophecy found in Deuteronomy: "My doctrine shall drop as the rain, my speech shall distil as the dew, as the small rain upon the tender herb, and as the showers upon the grass: because I will publish the name of the Lord."

## Unfoldment

WILLIAM ROY RONALD

THE statement that "Christian Science presents unfoldment, not accretion" (Science and Health, p. 68), acts as one of those wellsprings of helpful thought with which Mrs. Eddy's writings abound. Indeed, it comprehends much that is fundamental in Christian Science, showing that all existence is evolved by eternal, immutable law, and that nothing transpires as a result of a combination of mere circumstances.

The unfoldment of the flower is spiritually symbolic to all students of the Science of being. "Consider the lilies of the field, how they grow," is an invitation by the Way-shower that has appealed to Christians even when they did not understand its real significance. The lily, of course, is a manifestation of the operation of God's law. "By its own volition," says Mrs. Eddy, "not a blade of grass springs up, not a spray buds within the vale, not a leaf unfolds its fair outlines, not a flower starts from its cloistered cell" (Science and Health, p. 191). Mortal mind cannot account for a single blossom. Human ingenuity is not equal to the task of putting together so much as one flower. Every real object, flower, or man, is the scientifically and perfectly unfolded idea of God, Mind, Principle. The flower as we see it is the mental concept visualized; nothing that is true is the product of chance. Once we know the law about flower or man, we know flower or man.

Let us all, as bidden by Christ Jesus, "Consider the lilies of the field, how they grow," and learn from them inspiring truths of being. The lily is complete in the creative Mind when it is not apparent to the human senses. It is as perfect in embryo as in bloom. It is not alarmed lest it might lose something or come to harm by opening its blossoms unhesitatingly before the world. We cannot think of it as arguing over the order of its unfoldment, expecting the flower to pre-

Digitized by Google

cede the bud, or the seed to come before its time; neither would it wait for some one to come and pry it open. It would neither give itself over to haste nor prove a laggard along the way, its unfoldment being orderly and symmetrical. We cannot imagine its growth being delayed by doubt as to whether or not it will ever reach its full development. The blossom, indeed the whole plant, turns instinctively toward the light, as symbol of source and sustenance. It is sufficient unto itself, not as responsible for itself, but as governed always by God's law. The parent Mind provides for all its needs,—the summer rain, the warmth of the sun, the morning dew, the caress of the breeze,—and presently it appears decked in gorgeous array, the glorious consummation of the decree of its creator.

Now if all this is true of the flower of the field, how much more is it true of man, the highest idea of the heavenly Father! Should we not yield ourselves just as trustfully and harmoniously to the spiritual law of man's unfoldment? If we will but free ourselves from the false limitations and wrong processes suggested by mortal mind, we shall make more rapid progress in our spiritual growth. Is it reasonable to suppose that the law made manifest through the flower is any more sure in its operation than the law evolving man, the noblest work of God, or that a man need realize his true self any less completely?

If there is aught of blemish in the flower, that is not any part of the flower itself. On page 78 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "The decaying flower, the blighted bud, the gnarled oak, the ferocious beast,—like the discords of disease, sin, and death, —are unnatural." What sort of law is it which declares itself as a diseased condition? Is there a law of blemishes? If there were one, then there would not be the law of the perfect flower. Are we reasonable if we assign to man any defects, deformities, or malformations, when we freely acknowledge that they are no rightful part of the most humble plant or shrub? Being a process of unfoldment according to God's law, man's development must be absolutely and entirely perfect, never manifesting itself in any false growth of any sort, or in a single impairment or hindrance in reaching the full stature of his true being. This is true because the real man, like the real flower, is wholly spiritual.

It is beautifully significant that the flower usually heralds its full-blown perfection with a wealth of perfume. It is as if it were giving thanks for the goodness of the power which, through no virtue of the flower, has brought forth all its charm of color and form. The lily of the field gives fully and bountifully of its sweet odors without thought of reward. It is at the height of its unfoldment that the flower pours forth its fragrance most lavishly, thus signifying to us that gratitude both accompanies and proclaims unfoldment. In the course of his growth in the understanding of real being, one can no more shut his goodness and joy within himself than the flower can lock its fragrance within its heart. Like the delightful perfume of the lily or the rose, man's gratitude and gladness over spiritually found harmony and peace wander here and there along the highways or down the byways, into the presence of the invalid, or athwart the course of the sinner, and wherever they go leave more of happiness and less of ignorance, suffering, or sorrow.

Though mortal man cannot assemble a single flower or explain its existence upon any material basis, he can, nevertheless, improve upon the human manifestation of the flower. But how? Only by learning more of the law by which it is governed, and by utilizing that law to develop a more complete expression of itself. Could any botanist or florist produce a larger or more attractive lily by treating it as if it were a rose? Can we achieve man's promised dominion over the flesh and the world by proceeding upon the assumption that he is something he is not, or by entertaining the superstitious belief that life is in or of inanimate and nonintelligent matter?

Just as the flower is clearly the expression of a law working from the basis of a perfect model, so we should recognize and realize that the real man is the perfect and exact manifestation of the perfect Father-Mother God. As the flower seeds only after it has blossomed, so fruitage follows—but never precedes—unfoldment. If we would harvest the abundant riches of the knowledge of God and His spiritual idea, we must strive to attain complete unfoldment for ourselves by means of implicit obedience to the law of Principle operating always to that glorious end.

## The Angel

ANNIE DINSMORE MC CLURE

ON page 333 of Science and Health Mrs. Eddy writes: "Throughout all generations both before and after the Christian era, the Christ, as the spiritual idea,—the reflection of God,—has come with some measure of power and grace to all prepared to receive Christ, Truth." Several years before the writer began the study of Christian Science she was having a trying experience in a large city, where on the advice of some friends she had gone to make a start as a concert singer.

The time seemed to be ill chosen, and many weary weeks elapsed before any activity began in the musical life of the city. Meantime expenses were going on, and though a dear relative was sending a generous allowance, by the time the season really opened he had begun to feel that the limit had been reached. Efforts were then made to find employment in other lines of work, by which the writer might support herself and her little girl, but they failed. Hope flagged and anxiety preyed upon her, until a nervous condition resulted which unfitted her to take the test, when at length the opportunity presented itself, and she let it pass. Brooding on all this, and having constantly before her the luxurious and extravagant display of money so much in evidence in a great city, a distressing question began to reiterate itself in a mind always heretofore free from envy, "Why do all these people have too much, while I am not able even to find honorable employment by which to support myself and little girl?"

A stiff battle raged, for the sin of envy and covetousness was plainly seen and faithfully resisted. It seemed very dark and wretched for a long time, and then one day, after a particularly hard struggle, an angel whispered to the discouraged, weary one, "The foxes have holes, and the birds of the air have nests; but the Son of man hath not where to lay his head." A great sense of love and humility flooded her consciousness, and the condition was healed. Restlessness and envy departed, not to return. In a short time a very desirable position as teacher in a southern college was obtained.

This was a most sweet and beautiful experience, but it was only after finding "Science and Health with Key to the Scriptures" by Mrs. Eddy that a full understanding of the angel came. On page 581 of this book angels are defined as "God's thoughts passing to man; spiritual intuitions, pure and perfect." As to the message itself, at the time it seemed enough that it was so, without knowing why the Son of man, who could walk on water, raise the dead, and obtain money from a fish's mouth, should say that he had no place to lay his head. Years later, having learned through the study and

Digitized by Google

practice of the teachings of Christian Science to look beyond the superficial to find the metaphysical meaning of our Master's words, it came to be seen that he who had refused "the kingdoms of the world, and the glory of them," could find no place in materialism where he could rest.

Thus the "crown of pure gold," spiritual understanding, crowned the writer's demonstration, and showed why the angel's whisper healed and comforted the lamb that was "out on the hills away, far off from the gates of gold."

## Practical Repentance

MARY G. MALIN

THE message of John the Baptist when preaching in the wilderness of Judea was, "Repent ye: for the kingdom of heaven is at hand;" and every student of the Bible knows that all its teachings lay emphasis on the fact of repentance being necessary to salvation. In a dictionary definition of the word repentance we find, the "act of repenting, or state of being penitent; sorrow for what one has done or omitted to do;" and it is perfectly true that when the average human being has expressed any one of these sentiments, he usually considers he has done all that is required of him, and that there the matter ends.

But to the student of Christian Science, repentance should and, if he is in earnest, does mean much more than a mere expression of regret. On page 5 of "Science and Health with Key to the Scriptures," Mrs. Eddy says: "Sorrow for wrong-doing is but one step towards reform and the very easiest step. The next and great step required by wisdom is the test of our sincerity,—namely, reformation." Now it is well known that though some characters may find it by no means easy to express regret for a hasty deed or word, yet all will be ready to acknowledge that it requires a much greater effort—greater because continuous—really to set one's self to overcome those faults of character which in the past have been the immediate cause of all our difficulties, of our wrong sayings and doings, and consequent unhappiness and discontent.

On page 469 of Science and Health we find the following passage: "The exterminator of error is the great truth that God, good, is the *only* Mind, and that the supposititious opposite of infinite Mind—called *devil* or evil—is not Mind, is not Truth, but error, without intelligence or reality." From this it is perfectly clear that we can hope to overcome our faults only to the exact degree in which we realize the true meaning of being sons and daughters of God, the children of the one perfect Mind; for it necessarily follows that since the Mind which created us is perfect, we, the ideas of that Mind, must be perfect also, and can, therefore, have no desire to think, speak, or act in any way that is not in harmony with the teachings of the Mind that is God, good.

When we have reached this point in the understanding of our true being, we shall be starting to work out our salvation on a firm foundation; we shall have turned our feet in the right direction, and must thenceforth set ourselves to climb patiently the hill of endeavor, pressing ever onward and upward, treading underfoot each temptation to express ourselves hastily or angrily, alert to recognize that such temptations are but the suggestions of the false, so-called mortal mind, and have no more reality or power than we choose to give them. At times our path may seem rough and rugged, thickly strewn with the stones of self-will, so that we stumble frequently; but then is the time not to be discouraged, but to cling more steadfastly to God, infinite good, remembering that He is a very present help, and that by reason of His infinity His children can never be placed in any position where this help is not available.

If we are sincere in our endeavors, our purification is going on daily and hourly; for every time we refuse to listen to the whispers of mortal mind, every time we decline to allow any suggestion of failure or discouragement to gain a foothold, we are climbing a little higher in the scale of being —Love is purifying us. We must be constantly on the alert to see that the mesmerism of apathy does not cause us to linger in some seemingly pleasant valley of material sense; we must be always awake and active in our work of reformation, going ever forward, patiently treading underfoot the sharp stones of selfishness and irritability, for there is no easy way around; these sins must be overcome, crushed beneath the heel of Truth, or we never truly repent. It is this constant effort to reform, this never ceasing endeavor to silence the suggestions of error, which constitutes the "practical repentance" spoken of by Mrs. Eddy on page 19 of Science and Health, and this is the only real and lasting repentance; for it is founded on the understanding of man's true selfhood as the child of God.

## As We Journey

ROSS S. PILLSBURY

AS the student of Christian Science journeys along the way leading from material sense to Soul, through the wilderness of human belief and fear, doubt and discouragement, he comes at times to that "certain place," which it is written that Jacob "lighted upon . . . and tarried there all night, because the sun was set; and he took of the stones of that place, and put them for his pillows, and lay down in that place to sleep." How descriptive this is of some of the experiences of the young student who is just awakening from the dream of materialism to the great truth of being. How often has some problem which seemed so real and beyond our understanding brought us to this "certain place" where we have slept all night "because the sun was set." In other words, through a lack of sufficient faith in the omnipotence of God, good, and a resultant belief in sense testimony, we have allowed our understanding of Truth to be overshadowed; and as the material senses were allowed to temporarily gain the ascendancy, have not we, too, taken "of the stones of that place," and put them for our pillows, and lain down in that place to sleep? Have we not let discordant conditions, whether of anger, hatred, fear, sickness, sorrow, or pain, hide the light of ever present Love from us, thereby rendering us to that degree asleep to the truth of being?

We read, however, that even while he slept Jacob became conscious of the presence of God, of Life, Truth, Love. "And behold a ladder set up on the earth, and the top of it reached to heaven: and behold the angels of God ascending and descending on it." A ladder is that by which one ascends or descends, and its spiritual significance as here used represents Christian Science, "The law of God, the law of good, interpreting and demonstrating the divine Principle and rule of universal harmony" (Retrospection and Introspection, p. 1). The angels ascending and descending upon this ladder of understanding are most beautifully described by Mrs. Eddy on page 581 of Science and Health: "ANGELS. God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality."

As the understanding of the all-presence of divine Love dawned upon Jacob, we read that "Jacob awaked out of his

Digitized by Google

sleep, and he said, Surely the Lord is in this place; and I knew it not." What comfort, what a never failing source of strength to know that we can awake to the realization of the all-presence of our Father-Mother God no matter what the situation may be, or where we may be, and enter into man's birthright of dominion over the material senses. This ladder of understanding which was set upon the earth, the top of which reaches unto heaven, is always available; it is for us all, and whether we be at the bottom or higher, the angel of the Lord ever "encampeth round about" us. Thus are we enabled to rise "early in the morning" with the dawning of a truth-illumined consciousness and express gratitude and thanksgiving as did Jacob, for we now see clearly that all the discordant conditions which had seemed so real have but served as the needed steps whereby we are enabled to obey the promptings of that still, small voice of Love, ever bidding us, "Go up higher."

## Prayer in Church

ANNA J. HUDSON SMITH

IN a recent conversation with a beginner in Christian Science, as we were discussing the silent prayer in church, she said she was so happy when she learned to pray for spiritual understanding, rather than for material things. She said, "Was not that a big step?" I responded, "Yes, but do you remember what the Manual says about the silent prayer in church?" She answered, "No, I do not, although I have studied the Manual quite a good deal." We then opened the Manual, and she carefully read the by-law (Art. VIII, Sect. 5) entitled "Prayer in Church." It is as follows: "The prayers in Christian Science churches shall be offered for the congregations collectively and exclusively."

The dear student then took another step in her understanding of prayer. She was deeply impressed with this wonderful thought which our Leader has given us respecting those few sacred minutes in our church services, and said, "I wish I might tell this to so many. I know there must be others besides myself who have read the Manual and yet have failed to perceive the meaning of that by-law." Perhaps some of us who are quite familiar with this by-law have at times been tempted to declare the truth for ourselves or to try and help some one who seemed to be in need; but the thought of obedience must not be forgotten. Surely, our dear Leader knew what was most needed and what it would mean to us individually, as well as to the inspiration of the service, to have each and every one lifting his thought to God for the good of those assembled, rather than in prayer for his own particular needs. In an old *Journal* (Vol. XIII, p. 41) Mrs. Eddy says, "Make broader your bounds for blessing the people. . . . Learn to forget what you should not remember, viz., self, and live for the good you do."

The writer was reminded of the communion services which she attended when the extension of The Mother Church edifice was dedicated—especially the silent prayer. The impressiveness of those few moments will never be forgotten—five thousand persons at each service, each raising his thought to God, good, endeavoring to forget self in a prayer for the congregation, "collectively and exclusively." In this day of seeming strife and turmoil, when we are all learning to reach out to help and bless the whole world, our hearts are filled with gratitude to Mrs. Eddy for this larger concept she has given us, of prayer in church, and also for the heavenly benediction that she gives us in the daily prayer (Manual, Art. VIII, Sect. 4), "May Thy Word enrich the affections of all mankind, and govern them!"

# Selected Articles

["Education"—*The Christian Science Monitor*, Boston, U. S. A., April 10, 1918]

Education, in the true sense, as understood in Christian Science, is synonymous with spiritual enlightenment. It is the unfoldment of spiritual ideas. It is Mind's revelation of itself as consciousness, in right or true thoughts. Mind's unfoldment is ceaseless, limitless, eternal. It is not, then, an intellectual process. The activity of Mind, in right or true thinking, is not related to, nor does it depend upon, the size, quality, or condition of the human brain. True education does not require effort or exertion. Man's inherent and inalienable right as the likeness of Mind is to reflect spontaneously and abundantly the Truth that is God. "Spiritual sense," Mrs. Eddy says on page 209 of Science and Health, "is a conscious, constant capacity to understand God." Spiritual enlightenment, or true education, cannot, therefore, be limited by time or space.

Apprehension of the true facts about education through the study of Christian Science, begins immediately, in one's present human experience, to free one from the doubts and fears which invariably attend false views of education. The dawn of liberating truth begins at once to dispel the mental darkness in which lurk the phantoms of limited ability, limited capacity, and limited opportunity.

As spiritual enlightenment unfolds in our present experience the truth about business,—"the Father's business,"—we see what we call our business manifesting a greater sense of freedom, activity, honesty, abundance, and success. But the most harmonious and prosperous material business only typifies, humanly, man's real business, which is to know God, to reflect absolute good. Man's real business, therefore, as the son of God, the conscious reflection of divine Mind, is to express eternally and perfectly the activity, freedom, harmony, and abundance of his infinite Principle, Love. That is man's real business and it is a success. It cannot fail because it is sustained, protected, and directed by supreme intelligence. Knowledge of these facts constitutes real law and power. This divinely bestowed understanding is available to all through true education and may thus become to every man, here and now, the law which removes fear and limitation and rightly directs all his activities.

As right education brings clearer views of the divine facts underlying what we call church, home, family, we find our churches, homes, and families manifesting a better sense of unity, activity, supply, harmony, peace, and progress. But the best conducted churches, the most orderly and quiet homes, the most perfectly adjusted human relationships, only point toward the great spiritual fact of relationship comprised in the universal fatherhood of God and the universal brotherhood of man. Absolutely speaking, then, the only real relationship is that of Principle to its ideas, and of those ideas to their Principle and to each other. In this universal family of Mind's ideas there is no discord, jealousy, envy, nor inequality. Every idea is eternally in its right place, and one idea can never usurp the place or function of another. Neither can one idea of Mind be dependent upon another idea for existence, supply, happiness, or satisfaction. Each is an independent, individual idea forever held in perfect Mind, and depending upon Mind, divine Love, alone, for existence, supply, and immortal harmony. This truth about relationship is being daily proved to be the law of right and harmonious adjustment to present human relationships, the law which eliminates the worry, anxiety, and friction resulting from a false sense of dependence or responsibility.

As spiritual enlightenment reveals more distinctly the eternal truth about health, we see what we call the body expressing a better sense of health. But the most perfect physical health is only an improved belief. On this subject Mrs. Eddy has written as follows: "An improved belief is one step out of error, and aids in taking the next step and in understanding the situation in Christian Science" (Science and Health, p. 296). An improved belief, it must be understood, can only appear to human sense. Divine Mind does not believe, it knows. It is not, therefore, subject to an improvement of belief. It is already perfect and immutable. What happens, then, in this human sense of transition and improvement of belief through spiritual enlightenment, is that Truth appears as consciousness, and error disappears. When this seeming transformation is complete it will be fully understood that changeless Mind is the only real consciousness. Real health is spiritual wholeness or completeness. It is not found in matter, or mortal mind.

When, as the result of true education, the facts of being are more clearly and more generally understood, better forms of human government will be established. But the highest human sense of justice, law, and order is only an imperfect concept of the divine. Government by divine Principle is the only real government, and exactly in the ratio that this fact is recognized and each individual in all the nations gives up his belief in human will and personal domination and submits to divine Love as the only controlling power, will harmonious government be established among men. The Discoverer and Founder of Christian Science has pointed out that false and tyrannical forms of human government are due to false concepts of God. It is plain, therefore, that as spiritual enlightenment reveals to individuals and nations the truth about God,—that He, Spirit, Mind, is indeed "King of kings" and "Lord of lords,"—the more or less unsatisfactory human forms of government will be superseded by the goverment of absolute Principle.

Now, these changes, as has already been indicated, seem to require time because of the tendency of the human mind to resist Truth. Jesus, therefore, found his own people unready to receive his proclamation of man's eternal likeness to God. Because of the reluctance of mortals to accept even that which means their ultimate redemption, they frequently have to be convinced by sad experience of their need for salvation. Thus Jesus found that his saving mission was retarded by the human mind's resistance to the healing Christ, and it became necessary for him to demonstrate, step by step, the liberating power of Truth, "with signs following." It is, therefore, obvious that if Jesus had been translated as was Enoch, he could not have become the perfect Way-shower for mankind. In the steps he took between the Mount of Olives and Calvary his followers find the perfect example of how to work out their salvation from sin, disease, and death. In this resurrection and ascension, as they are explained in Christian Science, is seen the way to eternal Life. His words and works when interpreted by the Christian Science textbook constitute the modus operandi by means of which all may, and ultimately must, rise above the mists of matter and evil into the clear and unfailing light of spiritual Truth.

✧

[Albert F. Gilmore in *Lynbrook* (N. Y.) *New Era*]

Christian Scientists in general will be glad to note in the article "Mental Therapy Gaining," published in a recent issue, that intelligent discrimination is made between Christian Science healing and hypnotic suggestion as therapeutic agents. Too often has Christian Science been confused, by the uninformed, with hypnotism, mesmerism, and other so-called methods of mental therapy. Christian Science goes to the root of discord to destroy in human consciousness the false beliefs that are its occasion, externalized in the body as diseases of various types; and these false beliefs disappear through the understanding of God, and of man as His perfect creation. Thus it will be readily seen that this healing process depends not at all upon the exercise of human will or upon any hypnotic or mesmeric influence.

The intimation that Christian Science has been losing ground is quite contrary to the facts. At the Annual Meetings of The Mother Church in 1916 and 1917, there has been reported successively the greatest growth in the history of the movement. The demands for Christian Science literature have never been so great as they are at present. The United States Government has recently appointed Christian Science chaplains in both the Army and the Navy. The legislature of New York has unanimously enacted a law for the organization and government of Christian Science churches; and four new organizations of this denomination have recently been formed in this state. In brief, the movement was never so prosperous as it is at the present time. That the membership is no longer published is quite true; but for a very different reason than the one assigned. In the Manual of The Mother Church (Art. VIII, Sect. 28) Mrs. Eddy says: "Christian Scientists shall not report for publication the number of the members of The Mother Church, nor that of the branch churches. According to the Scripture they shall turn away from personality and numbering the people."

✧

[William C. Kaufman in *Miles City* (Mont.) *Star*]

I have read a correspondent's criticism of *The Christian Science Monitor* editorial entitled "The Medical Goosestep." His letter puts a different construction on this editorial than was intended. The editorial was written in criticism of a certain element in the medical profession who are using the war as a means of promoting a medical monopoly. Christian Scientists recognize the need of surgeons and physicians in the Army, but they also recognize that there is a nice distinction between doctoring a man and controlling him medically.

It is quite generally known that there are two classes of physicians, the one class are humanitarians and the other class are politicians. We are of the opinion that the doctor who has criticized the editorial in the *Monitor* belongs to the former class, because his criticism has the ring of sincerity, although we believe him to be mistaken in his deductions.

At this time undue advantage has been taken by a clique of medical men to force compulsory medication upon the people. The average citizen trusts the physician and regards him as his friend. But bad human nature is the same, no matter what may be the profession or occupation of the individual, and so at this time it is manifested through the political doctor. Few people have thought of monopoly in medicine. At this present period we are facing the greatest autocracy, which is personified by the central powers in Europe. Eventually every form of autocracy will be overcome with the same thoroughness with which we are meeting the central powers or Germany. The medical trust may be the last autocracy to be overcome.

Christian Science has given its followers an understanding of God which enables them to heal the sick as Jesus taught us to heal, and sufficient humanitarianism to enable them to carry a stretcher on the battle field, if it were necessary.

Digitized by Google

There is abundant proof that Christian Science practice has proved effective in the treatment of children. During the last session of the legislature a law was passed requiring children to undergo a compulsory physical examination. When the bill proposing the law came up in the committee for a hearing, Christian Scientists requested that their children be exempted from compulsory physical examination and medical treatment. At this hearing it was proved, to the satisfaction of this committee, that Christian Science treatment is effective in the cure of children and is a preventive. As a result of this hearing before the committee, the legislature exempted Christian Science children from compulsory physical examination and medical treatment by writing this exemption into the law.

✧

[Hettie Williams in *Stroud News and Gloucester Advertiser*, England]

On reading an interesting article entitled "Reconstruction by the Spirit," I notice that the author has, probably quite unwittingly, alluded to Christian Science in a way calculated to mislead the thought of your readers as to its true nature and teaching. The passage to which I refer reads: "On every side, not only in religion, materialistic views are giving way to spiritual. . . . we see it even in strange beliefs mixed with much that is false, such as Theosophy, Christian Science, and Spiritualism. But we see it far more clearly and hopefully in those great movements which are truly spiritual and Christian, though not connected with any particular branch of the Church of Christ."

In the first place, and in order to correct a very general misapprehension as to the comparison of Christian Science with theosophy and spiritualism, which are in no way similar or related to it, may I quote the words of Mary Baker Eddy, the author of "Science and Health with Key to the Scriptures," the textbook of Christian Science? On page 99 she says: "Those individuals, who adopt theosophy, spiritualism, or hypnotism, may possess natures above some others who eschew their false beliefs. Therefore my contest is not with the individual, but with the false system." It is an indisputable fact that, as a result of the understanding which Christian Science gives, "materialistic views are giving way to spiritual" in a more marked degree than under any other religious teaching.

Jesus taught, "It is the spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life." Christian Science teaches: "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). Being entirely in accord with the teachings of the Master, wherever understandingly applied, Christian Science does bring forth the signs which he said should "follow them that believe;" it can therefore hardly be classed with "strange beliefs," but would surely have been better described as a great movement which is "truly spiritual and Christian."

✧

[Henry Van Arsdale in *The California Eclectic Medical Journal*]

A writer in your April issue on the subject of "Religion and Psychiatry" ridicules the healing done by Christian Science, and assigns as a reason for his ridicule that Christian Science "brings about cures through the same mechanism" as was used by Jesus and other Bible characters. All such healing he classes as suggestive therapy, and in so doing he illustrates a sentence in a recent article by one of the editors of *Life* to the effect that "the funniest thing about psychology is its effect on psychologists." Mr. William James stated it a little differently in defining what he called the psychologist's fallacy: "The great snare of the psychologist is the confusion of his own standpoint with that of the mental fact about which he is making his report. I shall hereafter call this the 'psychologist's fallacy' par excellence."

Christian Science claims and is proving itself to be a restoration of primitive Christianity. When The Church of Christ, Scientist, was formed in 1879, on motion of Mrs. Eddy the following was adopted: "To organize a church designed to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Manual, p. 17). The individual who turns to a Christian Science practitioner for help is immediately made acquainted with the method of treatment, which does not include suggestion, but is what Paul referred to as transformation brought about by the renewing of the mind. The spiritual truths and teaching of the Bible, as explained in Mrs. Eddy's book "Science and Health with Key to the Scriptures," bring about the healing in Christian Science, which your contributor admits, but assigns to another cause.

Mrs. Eddy recognized the need of a true Science of psychology to dissipate the mysticisms of the subject as ordinarily presented, for she wrote, "The prophylactic and therapeutic (that is, the preventive and curative) arts belong emphatically to Christian Science, as would be readily seen, if psychology, or the Science of Spirit, God, was understood" (Science and Health, p. 369). When ontology, the science of true being, resumes its rightful place in human thinking as supreme in metaphysics, academic psychology will be seen to be unimportant, and Jesus' methods all-important. Christian Science emphasizes this.

## Extracts from Letters

"In my name and in the name of all our poor, accept our heartfelt thanks for your generous donation, and be so kind as to convey also to the War Relief and Camp Welfare committee of The Mother Church the expression of our warmest gratitude."

"Having had strong help in the most awful moments of my life, my husband and I offer grateful thanks to all the charitable people that unitedly have sent help from the distant United States of America to aid the poor of Florence."

"I have no words with which to thank you for having provided my rent, otherwise we should be without lodging. I pray God to give you much good for having been so good to me in a moment of great distress."

"I am charged by the soldier ———, whose family your committee has so very generously benefited, to thank you most sincerely. It would be difficult to tell you how very touched these unfortunate people have been by your kindness, and how genuine their appreciation really is. This case is perhaps more pitiful than the majority, although we all know there are so many."

"Captain ———, a good friend of mine, was so kind as to bring me some things to wear, intended for soldiers in the trenches. Allow me to send in the name also of the soldiers benefited by the kindness of your committee, and our warmest and affectionate thanks. With a smile on their lips and gratitude in their eyes they received the gifts which I personally went to offer them while they were scouting on the most advanced points of the high plain, rendering a most precious service of vigilance."

## Making Democracy Safe for the World

WHEN we speak of the world we have in view the inhabitants thereof, just as the prophet Jonah was made to understand that Nineveh was not an abstraction to be dealt with in a way to justify his prophesying, but was "that great city, wherein are more than sixscore thousand persons that cannot discern between their right hand and their left hand; and also much cattle." The animals suffer with men where wickedness prevails, so that all creation expectant of good "waiteth for the manifestation of the sons of God." When men willingly receive guidance from Christ, Truth, then no more will the curse devour the earth nor they that dwell therein be desolate; that is, the conditions will cease to be which Isaiah saw as the result of ill doing among the inhabitants of the earth, "because they have transgressed the laws, changed the ordinance, broken the everlasting covenant."

In our ears the word tyrant always implies the misuse of governmental power. When hereditary kingship was succeeded by free government in Greece men vaulted into the high seat of authority too often by fraud or force and such a king was named tyrant, indicating a despotic power acquired rather than the manner of using it. Experience, however, showed that in maintaining despotic power both law and humanity were too often disregarded. The tyranny became synonymous with oppressive taxation, cruel punishment, unjust demands. Citizens were made to endure hardships not required by patriotism but only by the ruler's caprice. Anyone now who misuses power in an oppressive or brutal way is sure to receive the name of tyrant.

In true government, however, there is no tyranny. The purpose of government is order, and good order gives opportunity for the happiness, growth, education, and useful service of all citizens. Under a good government a man will have the opportunity to do his best and will find encouragement to aspire to perfection. Jesus, speaking of the necessity for watching, asked, "Who then is a faithful and wise servant, whom his lord hath made ruler over his household, to give them meat in due season?" indicating that such a servant was blessed. He also spoke of the evil servant who in the absence of his lord "shall begin to smite his fellow-servants, and to eat and drink with the drunken." This is a good picture of the unprincipled man who does evil to gain transient pleasure, who necessarily has "his portion with the hypocrites." The doom of such a one is in the words, "Cast ye the unprofitable servant into outer darkness: there shall be weeping and gnashing of teeth."

Mrs. Eddy in discussing the illumination of Christian Science upon the problems of life admits no necessity for men being either evil or unprofitable servants. In "Unity of Good" (p. 11) she reminds us that "Jesus required neither cycles of time nor thought in order to mature fitness for perfection and its possibilities. He said that the kingdom of heaven is here, and is included in Mind; that while ye say, There are yet four months, and *then* cometh the harvest, I say, Look up, not down, for your fields are already white for the harvest; and gather the harvest by mental, not material processes." She sets up the standard for the world and the inhabitants thereof in saying, "Christian Science is absolute; it is neither behind the point of perfection nor advancing towards it; it is at this point and must be practised therefrom" (Miscellany, p. 242). Of course there is a loud outcry against perfection, and plenty of arguments can be set forth in the endeavor to establish the imperfection of mankind to-day and to proclaim the certainty of continuing imperfectness; but let us quietly consider the question and statement by the Discoverer and Founder of Christian Science found in "Miscellaneous Writings" (p. 233): "What think you of a scientist in mathematics who finds fault with the exactness of the rule because unwilling to work hard enough to practise it? The perfection of the rule of Christian Science is what constitutes its utility: having a true standard, if some fall short, others will approach it; and these are they only who adhere to that standard."

The fact is that the world's welfare depends exactly upon those who accept the true standard and adhere to it. The world has known despot-tyranny under one conqueror after another, and mob-tyranny in one revolution after another. Absolute power controlled by one mortal mind may have in its exercise as much caprice and destructive uncertainty as the explosive vagaries of the hydra-headed mob. No safety is found, no peace rests where any belief of mental power rules which denies the Christ and serves not the one God; whereas salvation begins wherever healing comes, and wherever the demonstration of healing is, the Father is glorified in the Son, because the works of God are made manifest.

Democracy infers popular sovereignty. What gain to dethrone a godless autocracy unless government is thereafter planned by a godly people. Of most vital importance is it at this hour of change for every man to turn from all unprincipled action and judgment of others to the real working out of his own repentance and purification. "Therefore thou art inexcusable, O man, whosoever thou art that judgest: for wherein thou judgest another, thou condemnest thyself; for thou that judgest doest the same things."

Democracy will be safe for the world in proportion as men accept righteousness for their standard and cease to view honesty as a policy; in proportion as they are interested in government of themselves by Principle rather than in control of others by party policy; in proportion as they accept Paul's charge that they be "not highminded, nor trust in uncertain riches, but in the living God, who giveth us richly all things to enjoy; that they do good, that they be rich in good works, ready to distribute, willing to communicate; laying up in store for themselves a good foundation against the time to come, that they may lay hold on eternal life."

WILLIAM P. MCKENZIE.

## "Comfort ye my people"

DIVINE SCIENCE is the Comforter. God's people are constantly comforting others, and should comfort each other. They are amply provided with divine ideas which produce this spiritual comforting. No others can understand as well as those enlightened by Christian Science that man in reality has every reason to rejoice now and to look forward to an uninterrupted reign of happiness in the future. God is the power of real happiness and is infinitely good. He is Mind, and this Mind operates through law, His own law, which means health and freedom to all His creatures. What can be more comforting than the scientific assurance

Digitized by Google

that evil has no power, no mind, no law, and no influence on health and freedom; that sense testimony is a mere seeming and nothing more, having no substantiality and no permanence? On page 30 of "No and Yes" Mrs. Eddy says, "God's law is in three words, 'I am All.'"

This gospel going forth into a world distraught stills the fears of mankind and neutralizes the hypnotic suggestions which would enslave the world. All is well within the radius of right thinking. Mental manipulations seek points of least resistance, but when the Comforter bars every door, the spoiler must remain outside. Christian Science is universal in its application. Its compassionate response is to all who are heavy-laden, who suffer through sin and sickness, who are disappointed by failure or stunned by the incredible outbreaks of evil to which the world war has given rise. Fear is discomfort, but the love of God is spiritual comfort. On page 127 of "The First Church of Christ, Scientist, and Miscellany" Mrs. Eddy writes, "The forts of Christian Science, garrisoned by God's chosen ones, can never surrender."

Never in times ancient or modern have extremes been as conspicuous as in this hour. Christian Science provides safety, the spiritual comforts of home, the beauty of holiness, the quietness of spiritual peace, and the tender care of the Good Shepherd; but outside its garrisons all is doubt and disaster, and subject to presentiments of worse conditions yet to come. At this very moment Christian Science, like Isaiah of old, cries, "Comfort ye, comfort ye my people, saith your God." This is the gospel to which Christ Jesus referred when he declared to his disciples, "I will not leave you comfortless: I will come to you;" it is the Christ, Truth, which Jesus taught would come to them in a greater measure than ever after he had left them, and would be their Comforter. Had Jesus' true teachings survived the three centuries after his ascension they might have come down to our own age unbroken by scholastic theology and would not have been frittered away by the sterile debates of schoolmen mistaking the letter and forgetting the spirit. A noble woman, Mary Baker Eddy, has rescued Jesus' teachings from oblivion, founded Christian Science upon the rock, carried forward the standard of Truth under which her faithful followers are finding comfort from the barbarities and extremes of present day evil.

It must not, however, be forgotten that ease in matter is not the comfort promised by Isaiah, Jesus, or Christian Science. A slovenly peace is not a spiritual feast. The Comforter of scientific Christianity calls for spiritual activity, alertness, and agility. The world has sought comfort through many inventions; it has expended much misplaced energy in trying to avoid the only true way of finding comfort through Spirit, by dabbling in matter and in trying to rest upon the outcroppings of the belief of mind in brain. Instead of following humbly the call of God to overcome evil with good, it has listened to the serpent's suggestion to overcome evil with subtler forms of evil. All through human history, therefore, we come upon systems of perpetrating secret evil by occult means, by hidden mental manipulation carefully guarded from general knowledge. There are many traces of such malpractice in medicine, theology, and science. These false arts are uncovered by Christian Science; for they do not spring from the Comforter, but constitute the poisonous essence of Antichrist. Mrs. Eddy writes in "Science and Health with Key to the Scriptures" (p. 101): "If animal magnetism seems to alleviate or to cure disease, this appearance is deceptive, since error cannot remove the effects of error. Discomfort under error is preferable to comfort. In no instance is the effect of animal magnetism, recently called hypnotism, other than the effect of illusion. Any seeming benefit derived from it is proportional to one's faith in esoteric magic."

The gospel of true comfort is the good news that the complete parent, Father-Mother God, is reflected by a complete man, possessing all the qualities of good; that the whole of creation is equivalent to the kingdom of God, and that in reality man can never be driven from this spiritual heaven but is everlastingly safe within its celestial precincts. Is not this real comfort and the coming of the Comforter?

WILLIAM D. MCCRACKAN.

## Individual Responsibility

IF there is one thing which is insisted upon in the Scriptures more than any other, it is our individual responsibility and freedom to choose between right and wrong. In the Genesis allegory we find Adam seeking to evade this demand of Principle by fixing upon Eve the blame for his disobedience to the divine command. His complaint was not disregarded, but the woman's answer to the challenge of Truth uncovered the error of sensuous animal magnetism and brought her deliverance, although her share of the "thorns" and "thistles" of mortal experience remained to be patiently weeded out. Here we find the prophecy that the seed of the woman should bruise the head of the serpent, respecting which Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 533): "Truth, cross-questioning man as to his knowledge of error, finds woman the first to confess her fault. . . . She has already learned that corporeal sense is the serpent. Hence she is first to abandon the belief in the material origin of man and to discern spiritual creation."

The psalmist says, "Unto thee, O Lord, belongeth mercy: for thou renderest to every man according to his work." From the Christian Science viewpoint we might add that every man will be judged not merely according to his work but according to his thought, which is back of every outward effort. It is true that we must take into account the human belief in duality expressed in one's character, which is explained by Mrs. Eddy in the Glossary to Science and Health, where we find the mortal concept but in contrast therewith the spiritual idea. We occasionally hear the statement made by students of Christian Science that the individual has really nothing to deal with but his own thought; and in a sense this is true, because the judgment of Truth finally deals with this alone, but we must not forget that one has a human mental environment to overcome, and thus to prove his spiritual strength.

It should never be forgotten that the most extreme difficulties and the seeming disabilities of mortal experience when rightly faced bring out the latent possibilities which otherwise might never be called into action, and so become splendid opportunities to reach real greatness. A poet writes:—

> Do battle with the leagued world,
> If worthy truly brave;
> And make each adverse circumstance
> A helper or a slave.

This is wonderfully illustrated in the story of Joseph, who might have remained like his brothers, a simple shepherd, if his seemingly tragic experiences had not called forth the deep spiritual lessons which had made his boyhood beautiful, and which when put into practice made his manhood truly heroic. It therefore rests with us to discover what there is in ourselves which hinders us from reaching perfect harmony in any or every direction. One thing may be the belief

Digitized by Google

that because we have attained success along certain lines, we should be exempt from the further test called for in overcoming other discordant conditions. We may say to ourselves that these are wholly or largely due to our surroundings, and that we are not to be blamed for them; but so long as we are content to accept this unscientific conclusion, no real progress can be made in the overcoming of the conditions which are admittedly undesirable.

Mrs. Eddy deals fearlessly with this subject in her article called "Obedience," in "Miscellaneous Writings." On page 118 she says: "Self-ignorance, self-will, self-righteousness, lust, covetousness, envy, revenge, are foes to grace, peace, and progress; they must be met manfully and overcome, or they will uproot all happiness." To this she adds, "Be of good cheer; the warfare with one's self is grand." We here find that she does not ignore the evil influences which may operate through others' beliefs, for she says (p. 119): "If malicious suggestions whisper evil through the mind's tympanum, this were no apology for acting evilly. We are responsible for our thoughts and acts; and instead of aiding other people's devices by obeying them,—and then whining over misfortune,—rise and overthrow both. . . . Each individual is responsible for himself." This may recall the Master's words, "The Son of man shall come in the glory of his Father with his angels; and then he shall reward every man according to his works."

The student of Christian Science may not be tempted to commit sin in the ordinary sense of the word, but he may be tempted to believe that there is another power than God, and the results of such belief can never be other than discordant. It is beyond all question that when we face fearlessly and with entire reliance upon divine Principle whatever presents itself as our greatest trial, we shall find that through the transforming power of Spirit the result will enable us to rejoice in the opportunity afforded us of proving what man's divinely bestowed strength really is. As soon as we actually begin "to discern spiritual creation," we shall make no delay about facing our foe, with full assurance as to the outcome. Whatever be our human problem, we may rest assured that if we work it out in accordance with the demands of enthroned Love and justice, each day's effort—nay, each hour's effort—will add to our strength and bring us closer to the reward. Paul says that God "will render to every man according to his deeds: to them who by patient continuance in well doing seek for glory and honour and immortality, eternal life."

ANNIE M. KNOTT.

# Among the Churches

## Current Notes

WATERBURY, CONN.—After wandering from place to place during the last few years, First Church of Christ, Scientist, has at last come to a place of rest in a permanent home on the corner of Holmes and Mitchell Avenues in the building on that corner which has been remodeled into a fine church, one which is in every way adapted to the needs of the steadily growing congregation. The entire lower floor is a handsome auditorium finished in white with mahogany furniture. The second floor is attractively partitioned off into a reading room, an office, a directors' room, and a general reception room. Since the church moved to the new site the congregation has been gradually increasing from an average attendance of thirty-five persons to nearly one hundred, and the directors and officers of the organization feel much encouraged.

Christian Scientists in Waterbury first met in private homes. In 1894 they began to meet in the old Bronson Library on West Main Street, and in 1898 were organized as a church. The church has moved several times since its organization. From the Bronson Library it moved to the I. O. O. F. Hall on North Main Street, thence to the Institute of Craft and Industry on Leavenworth Street, and later to the corner of West Main and Meadow Streets. The Christian Scientists after that met in the Jones and Morgan Building and still later in the Buckingham Building. Driven out by fire from their last meeting place, tentative plans for the new meeting place materialized and the church is at present successfully established in its new home.

*Waterbury Republican.*

JACKSONVILLE, ILL.—Sunday morning services [June 30] will mark the opening of the new quarters of First Church of Christ, Scientist, in the building recently purchased and remodeled in the 500 block on West State Street. The building was the former home of the late Alfred Hayden, and has now been remodeled so as to make a good auditorium and reading room on the first floor.

*Jacksonville Journal.*

LEXINGTON, MASS.—The new edifice of First Church of Christ, Scientist, was dedicated last Sunday [June 30]. The first service was held there on Sunday, March 17. The auditorium is capable of seating about two hundred people. The Sunday school room is about 30 by 40 feet in size, with a large primary classroom about 15 by 21 feet opening out of it.—*Arlington Advocate.*

KALISPELL, MONT.—The members of First Church of Christ, Scientist, voted to use their entire building fund for the purchase of either Liberty Bonds or War Savings Stamps, leaving the choice to the wisdom of the board of directors. The board instructed the treasurer to purchase eight one-hundred-dollar Liberty Bonds.

WATER VALLEY, MISS.—During May and June the Christian Science Society distributed 30 *Sentinels*, 5 *Journals*, 101 *Monitors*, 1 *Quarterly*, and 3 reprints.

✧ ✧ ✧

# The Lectures

WILKES-BARRE, PA. (First Church).—Virgil O. Strickler, lecturer; introduced by William F. Steinhauer, who said in part:—

I believe it will be generally conceded that in every human heart there is a desire to be better and to do better, and especially is there a desire to know more of God and to know better how to worship and to serve Him. This is what Christian Science is endeavoring to teach mankind; and I rejoice in saying that it is offering no mere theory in this respect, but a teaching that has been proved to be true and available in every human experience, a rule that has delivered thousands of persons from the burden of disease, from immoral habits, and indeed from discordant conditions of every name and nature. Christian Science has proved in many instances that the promises of the gospel are not contingent upon time, but wholly upon understanding.

RIVERSIDE, CAL. (First Church).—Dr. Walton Hubbard, lecturer; introduced by Samuel W. Tate, who said in part:—

If mortals could suddenly realize and understand the true relationship existing between the real man and his Maker, God, what a wonderful transformation we would behold. In a moment's time war would cease; all clamor and

Digitized by Google

strife would be silenced by the reign of harmony; sin, sickness, and all discordant conditions would disappear as darkness flees before the coming of light; the brotherhood of man and the fatherhood of God would be established—would become a visible actuality; the veil that hides from our view spiritual reality would be lifted; and the sunlight of divinity would be seen shining on the celestial heights. For ages mankind has been taught that this ideal condition is possible, but that it obtains only in a future life, a life beyond the grave. Truth, as revealed in Christian Science, proves the fallacy of this man-made doctrine, and establishes forever the great fact that this condition is a present possibility, a present reality, obtainable here and now, and that the understanding of it is practical.

INDIANAPOLIS, IND. (First Church).—George Shaw Cook, lecturer; introduced by Lulu Balz, who said in part:—

When Jesus came to establish the kingdom of God on earth, he upset many preconceived notions. Instead of being the political ruler expected as the Messiah, he was the spiritual Teacher, teaching that "the kingdom of God is within you;" that the breaking of the commandments is mental; that only his thought, or that which proceedeth out of his mouth, defileth a man. And because Jesus' teachings were so radically different, many refused to accept them.

When Mrs. Eddy gave to the world her book "Science and Health with Key to the Scriptures," it overthrew many false beliefs about God and man which had become established in the consciousness of humanity; but an earnest student will find that her book follows the teaching of Jesus the Christ, and therefore is Christian. It gives us a demonstrable knowledge of God, whereby we can prove His ever presence and man's relationship to Him; therefore it is scientific.

CRANFORD, N. J. (First Church).—Charles I. Ohrenstein, lecturer; introduced by Arthur J. Perrow, who said in part:—

The cry of old, "Is there no balm in Gilead?" is resounding throughout the land, and Christian Science is answering that cry for countless thousands who, through an understanding of God and man, perfect Mind and its spiritual idea, are being liberated from human bondage. Surely, "to those leaning on the sustaining infinite, to-day is big with blessings," as Mrs. Eddy says on page vii of the Preface to Science and Health. Jesus taught by word as well as by deed that God is Spirit, Life, Truth, and Love, and that Truth is omnipresent and omnipotent; that is, all-presence and all-power. He also demonstrated that in proportion as we know the truth—the absolute truth concerning God and His creation—will man be free, free to exercise his God-given dominion, as recorded in the first chapter of Genesis, over every mortal discord.

VICTORIA, B. C., CANADA (First Church).—William W. Porter, lecturer; introduced by H. A. Hostetter, who said in part:—

In this time of fear and doubt there is a longing for that intelligent understanding of prayer which will bring us into closer touch with God, who, the Scriptures teach us, is Love. Christian Science reveals to mankind that God is actually omnipresent, as infinite good, as responding to all righteous prayer, as healing all our sorrows and afflictions. The omnipotence and omnipresence of God are set forth in the Scriptures from Genesis to Revelation, and when we begin to realize this truth about God and our relation to Him, fear begins to disappear and the consciousness of His presence takes its place.

LODI, CAL. (First Church).—Paul Stark Seeley, lecturer; introduced by Earl G. Ryan, who said in part:—

Many questions and problems have come to every thinking individual which have remained unanswered and unsolved, but the fact remains that there is an answer to every question, a solution to every problem. Mary Baker Eddy knew this, and spent years in searching the Bible for the solution to the problem of being and in seeking and finding answers to questions about God and man. This search brought about the discovery of the Principle of metaphysical healing, and Mrs. Eddy named her discovery Christian Science. After proving the truth of every revelation which came to her, she sought ways of giving the results of her labors to a tired and suffering humanity, with no thought of personal gain and with her heart overflowing with gratitude that she had something to give which would help all mankind.

*Lodi Sentinel.*

MINNEAPOLIS, MINN. (joint lecture).—Clarence W. Chadwick, lecturer; introduced by Herbert M. George, who said in part:—

In the early sixties conflicting human opinions crystallized into what historians have called the War of the Rebellion. The result of this war banished a certain type of slavery from our United States. Immediately following this war, in 1866, Mrs. Eddy, a spiritually minded woman who resided in that section of the country whence sprang our Declaration of Independence, discovered Christian Science. For over fifty years it has stood the test, banishing another type of slavery from the lives of the citizens of the world; in other words, it has brought freedom from sin, sickness, and sorrow. We rejoice that to-day, during the most critical period in the history of the world, the need for a practical religion is being met by Christian Science. The truth taught and demonstrated by Jesus two thousand years ago is again bringing freedom and liberty to those who turn to it in the manner recommended by our Master.

CORSICANA, TEXAS (Society).—John Randall Dunn, lecturer; introduced by Miss Anne Patrick, who said in part:—

There are a vast number of people who are learning through the study of Christian Science that God, divine Love, is present, always was, and always will be. He is the same yesterday, to-day, and forever. He is the same God of Israel "who healeth all thy diseases." Christian Science is repeating to the world to-day Paul's question, "Why should it be thought a thing incredible with you, that God should raise the dead?" There is no mystery connected with Christian Science. It only seems so because its teachings are not understood.

## Lectures to be Delivered

**By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.**

CALIFORNIA—Oakland (Fourth Church): Municipal Auditorium, 3 p.m., Aug. 25.

COLORADO—Denver (First Church): Church Edifice, Fourteenth Avenue and Logan Street, 8 p.m., Aug. 22.
Glenwood Springs: Church Edifice, 931 Cooper Avenue, 8:15 p.m., Aug. 20.

ENGLAND—Brighton, Sussex: Hove Town Hall, 8 p.m., Sept. 20.
Croydon, Surrey: North End Hall, North End and Crown Hill, 7 p.m., Sept. 16.

MAINE—Kennebunk: Mousam Opera House, 3 p.m., Aug. 18.

MASSACHUSETTS—Buzzards Bay: Town Hall, Bourne, 8 p.m., Aug. 22.
Gloucester: Unitarian Church, Middle Street, 3 p.m., Aug. 25.

MICHIGAN—Charlevoix: Van Pelt Hall, 8 p.m., Aug. 23.

# Testimonies of Healing

I am happy to testify to what Christian Science has done for me during many years. I was healed of malarial fever, liver complaint, and quinsy, which recurred periodically, as well as of many other ills and faults of character. Since war was declared I have been in most of the places deemed dangerous: Rheims, Verdun, the Somme, the Maisonnette, and so forth. Everywhere divine protection, the effect of the knowledge of God, followed me, helped and sustained me. The ninety-first psalm became to me a living reality. I have been through many perils from bombardments, from machine guns, and have always come out without a scratch; therefore I can but thank God and express my gratitude to Mrs. Eddy, who has given us such a beautiful example of what true faith is.

CAPT. LEOPOLD DE ROULET, French Army.

✧

During the past few years it has been my privilege to experience such beautiful proofs of divine Love's protecting guidance and care in supplying all human needs, that I feel impelled to send a testimony to the *Sentinel* with the hope that it may help some worker who is sorely tempted to yield to discouragement.

In 1913 a great sorrow came to me. Although I had been a widow many years, supporting myself, and for several years a student of Christian Science, I seemed crushed and alone, and there being insufficient financial supply the outlook was not bright. I was living in the East but came to Seattle to be with a widowed sister who was a staunch Christian Scientist, and through faithful study the light of Truth soon shone clearer. We decided to establish a home together, but according to material reckoning our income was very limited. Both being past the age to obtain a business position, we decided to buy, if possible, a small ranch. Divine Love seemed to lead us right to one which had a cow, chickens, fruit, and so on, which we could buy on terms that we thought we could manage. On June 20, 1914, we moved into our humble little house, we two alone with God. We took up our work, daily striving to seek "first the kingdom of God, and his righteousness," trusting Jesus' promise that "all these things shall be added unto you." With our own hands we have so transformed the inside of our ranch house that it is a cozy and pleasing little home, flowers are on the lawn, and every day we thank God for our peaceful home. Although alone most of the time, we are never lonely. We are happy, prospered and protected by divine Love day by day, gaining daily a higher understanding of God. Headache, cold, cough, heart disease, acute lung trouble, severely injured foot, and other ills have been overcome by a realization of the perfection of God, and of man as God's reflection. A valuable cow was saved through my understanding of Christian Science.

On one occasion a timber fire, driven by a strong wind, came sweeping toward our home. My sister and I were striving to realize God's perfect protection while working with the aid of others to check its progress. It seemed that all must be lost, when there was a lull, the direction of the wind changed, and the danger was over. At a time when the need seemed very urgent and to mortal sense there was no supply to meet the demand, financial help came. We had been earnestly striving to realize the spiritual meaning of Mrs. Eddy's words on page 307 of "Miscellaneous Writings," "God gives you His spiritual ideas, and in turn, they give you daily supplies."

We do not have the privilege of attending church services, but are members of The Mother Church, are supplied with its literature and Mrs. Eddy's writings, have our daily study of the Lesson-Sermon, and read it together on Sunday. On Wednesday evening we read from the Bible and Science and Health, also read testimonies of healing, as no persons are present to give them. We distribute Christian Science literature in the homes of all within reach, and a basket in the waiting room at the railroad station is kept supplied with Christian Science reading matter. Much help has been received by studying Mrs. Eddy's definition of "Church" as given on page 583 of Science and Health. With God's help we are striving to build in consciousness the real church, which she states is "the structure of Truth and Love." The promise, "As thy days, so shall thy strength be," has been verified in strength for strenuous physical labor, and supply has been sufficient to meet every financial obligation. To a daily study of Christian Science and the application of its teachings, as far as we understand them, do we attribute all these blessings, and we are truly thankful to God from whom cometh every good and perfect gift.

(Mrs.) SUSAN E. ARMITAGE, Maltby, Wash.

✧

I accept the invitation of the editors of the *Sentinel* (June 15) who "invite the living witnesses to consider the opportunity of the hour." I am afraid I have been withholding the corn, and not receiving all the blessings which "shall be upon the head of him that selleth it." I am sending this testimony, knowing that it will reach the uttermost corners of the earth and bear fruit.

Twenty years ago I attended a testimony meeting at First Church of Christ, Scientist, of this city. I was in great need of physical and mental healing. Although I heard testimonies of healing of so-called incurable diseases, I said it was all humbug, that those people who testified had been hysterical and imagined they had these ailments, because if they had had them they never could have been healed.

Mrs. Eddy says in "Rudimental Divine Science" (p. 11), "Sickness is the schoolmaster, leading you to Christ." It was indeed my schoolmaster, for it was leading me for twenty years, until man's extremity became God's opportunity. Fifteen years ago I went to Europe in search of health. I visited four countries, consulted the best physicians, tried everything that *materia medica* had to offer in the way of medicine and treatments of all kinds, but gradually grew worse. I thought that if I ever could return to the United States I would try Christian Science. When in Lausanne, Switzerland, in July, 1914, I was told that there was a Christian Science practitioner there. I at once asked to have her come to see me, which she did. At that time I was scarcely able to stand or to walk across the room. The practitioner gave me a treatment, and told me to come to see her in two days, which I did, although I had to walk a block to the tram and ride for half an hour. The practitioner gave me the *Sentinel* to read, but after looking through it I said it was all like Greek to me, that I did not understand the articles. She lovingly replied, "Never mind about the articles just now; read the testimonies." I devoured those testimonies, and all the time I was reading them I realized that there was no reason why I should not be healed. And so, I have been healed of brain exhaustion; I could scarcely read or write. To show how complete has been my healing I will say that I have been doing translations and have worked from 8.45 a.m. to 5.15 p.m. every day without experiencing any sense of fatigue.

I have also been healed of inflammation of the spine and of intestinal indigestion. For a year before I had treatment in Christian Science I lived on oatmeal gruel, not being able to digest any other food. After the first treatment the practitioner told me to eat anything I wished, so I at once began to partake of food I had not dared to eat for twenty years, yet I suffered no ill effect. I was healed of recurrent acute attacks of intercostal neuralgia, for which I had resorted to morphine. Since coming into Christian Science I have had two attacks, but they have been overcome by holding to the truth in the twenty-third psalm, "I will fear no evil: for thou art with me." I have been healed of varicose veins, of weak arches, and of "a nervous heart," have been able to discard the supports which I wore in my shoes, and have been healed of sleeplessness. The pamphlet, "Awake, thou that sleepest," destroyed forever the fear of not sleeping. I found that when the fear of the results of insomnia was destroyed, and I realized that it did not matter whether I slept or not, I had dominion. I have been healed of fear, of ease in matter, of impatience, of resentment,—in fact, I have been newborn. Chronic sciatica has also been overcome. I could not walk without the aid of two canes. This healing did not take place all at once. It was the result of persevering and persistent study and application of the truth, as I understood it, to the daily problems. I find that with each overcoming the mist grows less and the light shines more brightly.

On the second of this month (June) when on my journey to Boston for the Annual Meeting of The Mother Church, we had a most wonderful demonstration of divine protection. I was reading the *Monitor,* and in the middle of an article I stopped reading and realized that divine intelligence was governing the engineer of the train. I then resumed my reading. It must have been about five minutes later that the train started to go at a terrific speed and then came to a sudden stop—it was so sudden that we were nearly thrown out of our seats. The rods on both sides of the engine, which move up and down as the wheels revolve, were broken and twisted. The engineer saw a cloud of dust and stones, and not knowing what had happened put on the brakes; when he saw what had happened, he could not understand why we had escaped a terrible wreck, because according to all material laws the engine, which was a large compound one, ought to have turned over. Everybody marveled at the wonderful escape, but to me it seemed perfectly natural that there should have been no serious accident. This proves the rule in the ninety-first psalm, "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty."

I could go on indefinitely telling of the wonderful healings that I have had in the last four years, during which my only physician and my only medicine have been Christian Science. Through my healing my son has also taken up the study of Christian Science. I praise God for all these blessings, and my gratitude is boundless to the loving woman who fought so valiantly in order to expose the nothingness of evil and demonstrate the allness of God. To the extent that we live and practice the rules set forth in "Science and Health with Key to the Scriptures" do we manifest our gratitude.—(Mrs.) Sara G. Hackes, New York, N. Y.

✧

As is recalled by many, the last line given to us by our dear Leader was, "God is my Life" (The Life of Mary Baker Eddy, p. 399). Several months after this line was given to us, I was suddenly overtaken with a fainting spell, and just before losing consciousness, as though clearly spoken by some one, came distinctly the words, "God is my Life." This was about midnight. Between two and three o'clock in the morning I again became conscious, and found that in fainting I had fallen against a highly heated radiator, and my face, neck, and hands had been terribly burned. It was learned the next morning that the engineer of the hotel where I lived had let the fire go down a short time before I came to. I am grateful to say that during or after the above experience, there was not a particle of pain, nor were any marks or scars left, though it was about five weeks before the healing was complete. No doubt had I not had this "life line," "God is my Life," to hold to, I should not have regained consciousness.

This experience proved to me that we are always the beneficiaries when obedient to the teachings of our revered Leader. I am most grateful for Christian Science.

George R. Happ, Chicago, Ill.

I wish to state that I saw my brother several hours after the accident. Although he was burned nearly beyond recognition, and was obliged to wear a mask for some weeks, he did not suffer any pain, nor use any applications whatsoever, and there were no scars left.—(Miss) Ida Happ.

✧

Words are inadequate to express my gratitude for all that Christian Science has done for me since I first heard of it, now some eight or nine years ago. I did not come to it for physical healing, but because it satisfied a deep longing for something better. From the moment I attended the first service I felt that Christian Science was the truth and had no wish to return to the church I had formerly attended. A couple of Sundays afterward my two little boys were placed in the Sunday school and I felt content; but I had to face some years of opposition from my family. I do not regret these experiences, but feel that they were most valuable to my spiritual growth, as through them I learned something of the allness of good and the consequent nothingness of evil.

I have been healed of colds, bloodshot eyes, and a goiter, for which I had been operated on some years before I knew of Christian Science. In one treatment the fear was overcome and a few days afterward the swelling disappeared. My two boys have also been greatly benefited by Christian Science, not only physically but in character. I cannot say how much the Sunday school did for them during the years they attended it. Parents cannot be too grateful for this loving provision for the children.

A family is never so densely material after one of its members has awakened to the spiritual reality of man in God's image. This I feel to be true in my own case; for ever since my sister and I heard of this beautiful truth and tried to put its teachings into practice, our home has become a different place: health has been better, characters have been changed, and its members are more united and loving; indeed, friends who have known us many years have remarked on the change and said what a feeling of peace they experience on coming into the house. If this is the case with one family, what will it be when "this angel visitant," as Mrs. Eddy calls Christian Science (Science and Health, p. 224), is accepted in every household?

About a year ago a dark shadow fell on our home by the passing on of a loved one. At the time we received the telegram from the War Office we were not aware that the worst that mortal mind could do had happened, so I asked a Chris-

A family is never so densely material after one of its members has awakened to the spiritual reality of man in God's image. This I feel to be true in my own case; for ever since my sister and I heard of this beautiful truth and tried to put its teachings into practice, our home has become a different place: health has been better, characters have been changed, and its members are more united and loving; indeed, friends who have known us many years have remarked on the change and said what a feeling of peace they experience on coming into the house. If this is the case with one family, what will it be when "this angel visitant," as Mrs. Eddy calls Christian Science (Science and Health, p. 224), is accepted in every household?

About a year ago a dark shadow fell on our home by the passing on of a loved one. At the time we received the telegram from the War Office we were not aware that the worst that mortal mind could do had happened, so I asked a Chris-

Digitized by Google

tian Science friend to help the lad and myself. I cannot express how her loving help supported me through those dark days. For three days the struggle seemed terrible, but it was succeeded by the most wondrous sense of calm and joy and peace, and what was to me so beautiful, was that this sense of peace and joy was not only experienced by the sister who is a student of Christian Science but by a sister who is not. It was a beautiful illustration that "whatever blesses one blesses all," as we are told on page 206 of Science and Health.

Here let me say how grateful I am for all the Christian Science literature, especially the *Monitor*, which has broadened my outlook and given me a larger interest in and a greater love for humanity. My one desire is to comfort others who "are in any trouble, by the comfort wherewith we ourselves are comforted of God."—(Mrs.) ANNIE FLORENCE DAWSON, Richmond, Surrey, England.

✧

The time has come when I can clearly see the great benefits I have received from Christian Science, and I now wish to let others know something of my experience. On the first occasion when this healing truth came to my help I was cured of a sharp attack of brain fever. At that time I knew practically nothing of this religion, having only attended a few of its Sunday morning services, but my sister knew something of it, and also saw that here was my only hope of recovery. She therefore called in the services of a practitioner and absent treatment was immediately given, with the result that the intense pain and distress were quickly alleviated and I was shortly on the way to complete recovery. After the practitioner's first visit to me the return to normal conditions was very marked and rapid. The visit took place on a Thursday, and I attended service at the Christian Science church here the following Sunday morning. I had suffered from a similar attack five years before, and after weeks in the care of doctors and nurses I had to recuperate for a long time at different coast places, while the opinion was that should I ever take this illness again, I need scarcely expect to live through it.

Scarcely a year after my first healing through the power of Truth came my second experience of Christian Science healing. This time I was laid up with an acute attack of rheumatism. The fever was high, I was indeed very ill, and again the help of a practitioner was requested. This time the cure, though not so quickly manifested, was also speedy and complete. The practitioner very patiently and carefully told me something of the requirements of Christian Science, and showed me that I had much more to do than just simply get well again. Since then I have gone on slowly acquiring more knowledge of Christian Science, and finding it useful in every phase of life. Through trying to put its teaching into practice, I am now able to help myself when anything seems to go amiss, as, for example, in annulling the effects of severe chills, scalding, accidents, and so forth. Better far than all these benefits, however, is the spiritual teaching of this Science, reviving as it does one's faith in God, strengthening the good, and uprooting the evil in one's consciousness, proving that God is, indeed, a very present help in time of trouble.

(Miss) MARY WALKER CLAASEN, Glasgow, Scotland.

✧

Before I had any conception or understanding of Spirit or Principle, as God is revealed to us in Christian Science, I was one of the most unhappy people in the world, for I was clinging to a belief in chronic stomach trouble, colds, headaches, skin diseases, nervousness, pains and aches of so many descriptions that I can recall only a small part of them; for at times it seemed that if I could pass from this world I would be all the better for it. Material remedies of many descriptions were tried; some gave temporary relief, but I seemed to get worse instead of better.

Since learning of Christian Science, which I have been studying since about the first of April, 1911, I have been growing slowly but steadily to be one of the most happy persons of this world, for now I have no pains; most of them left me as soon as I had finished reading the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. I had one treatment from a practitioner. Many evil habits have been overcome, such as profanity, occasional indulgence in liquor, hating, jealousy, envying, resentfulness, prejudice, fear, and the like. Before I took up the study of Christian Science I had left the church that I had formerly attended, because I was so discouraged with my lack of any understanding gained from its teachings about God and man. I was doubtful of there being a God at all; and I am happy to know that He is not a God such as I had sometimes pictured. Christian Science has proved to me that God is omnipotent, omnipresent, omniscient, and that He is our life and will answer all our prayers when we learn to pray intelligently.

For all these healings and the enlightenment gained, for all the Christian Science publications and literature, also for class instruction, I am indeed thankful to God, and grateful to our revered Leader. Words cannot express my gratitude, but I am trying to express it each day by becoming more worthy of being identified as a student of Christian Science.

CHARLES F. DIXON, San Francisco, Cal.

✧

In Isaiah we read, "The people that walked in darkness have seen a great light: they that dwell in the land of the shadow of death, upon them hath the light shined." Christian Science means this to me. I did not come to it for physical healing, but because I was not satisfied with an orthodox belief. Ever since beginning the study of this teaching, when rightly applied, it has met every need. I was healed of a great sorrow, and through it all there was no bitterness nor despair, but the peace which was promised us by the Master. An injured ankle was healed in twenty-four hours. It had always been considered weak, and about two years later it was sprained again; this time the healing was complete in one night, and since then the ankle has been as strong as the other. What seemed a severe attack of neuritis was overcome in a few hours.

This is only a small part of what Christian Science has done and is doing for me every day. I can truly say that it has met every need.

(Miss) HATTIE MERIWETHER, Dallas, Texas.

✧

When first I became interested in Christian Science, it was through the desire to encourage one who, I thought, felt the need of a religion. At that time I was a member of an orthodox church, but after attending the Christian Science services for a while I soon realized that this teaching was all that was good and beautiful, so continued in the study of it. For a number of years I had suffered much from an organic trouble and about a year later asked for treatment, as the condition had become much worse. In about ten days the demonstration was made, and I have been free from that trouble since, now about four years. At this time I also had pleurisy and at times was unable to move, either to lie down or to sit up. When the practitioner was called on the

Digitized by Google

telephone and help asked for, I would have almost instant relief and would be asleep in a very few minutes. My husband knew but little of this teaching and said I might have either Christian Science or a doctor, but if Science did not help me, I must have a doctor. Through my healing of this ailment he became a firm believer in Christian Science, and by reading Science and Health was healed of the tobacco habit and was enabled to give up wearing glasses. One morning about a year ago I found myself unable to stand or to walk any distance; everything would turn black before my eyes. I did not have help from a practitioner but treated myself, and by six o'clock that evening I was able to go to the dining room in the hotel where we were staying and have dinner. I have also been healed of a chronic throat affection.

I feel most grateful for the knowledge that God is an ever present help, that wherever we may be and under all circumstances we have at hand never failing counsel and guidance, and that there are no problems which divine Principle cannot solve. I am thankful to God and grateful to Mrs. Eddy for this healing truth.

(Mrs.) JEANNETTE S. WORDEN, Lakewood, Ohio.

✧

It has been proved to me that Christian Science is the very best thing that ever came into my life. It has brought me profound joy and true happiness and has made me feel that life is worth living. During the twenty years I have been studying Christian Science I have had many healings, some slow and some quick; but the slow healings I am also grateful for, because they meant more earnest study of the Bible in connection with our textbook, "Science and Health with Key to the Scriptures." When I was first led to Christian Science I was a sufferer from severe headaches, malaria, throat trouble, inactive bowels, and some other discordant conditions that have been healed through the realization of the truth. In 1913 a trip was taken to England and was free from seasickness, as was also a voyage to the South.

I can never be grateful enough to God and to our Leader, Mrs. Eddy, for Christian Science. I am grateful for class instruction and for membership in The Mother Church and our local church. I also wish to express thanks for the periodicals and for all of Mrs. Eddy's writings.

(Mrs.) SARAH WEAVER, Woodhaven, N. Y.

I wish to verify my mother's testimony. I know her healings have been perfect and permanent. She is now in the best of health, has a very good understanding of Christian Science, and is able to help us, her children, along our journey from sense to Soul.—(Miss) ALICE WEAVER.

✧

Christian Science came to me through the healing of my mother, for which I am deeply grateful; but it is for what this truth has done for me that I now wish to express my sincere gratitude. I am a music student, and at the time when I began the study of Christian Science I was very much discouraged about my studies and could not see my way ahead. I had got into a mental state of doubt and distrust of myself and my abilities, than which nothing is a greater hindrance to success, but Christian Science came like a broad beam of light, illuminating all the dark corners of my consciousness, exposing and destroying errors of disposition and belief, some of which were so cleverly concealed in the disguise of virtues that I had never before recognized them, and gave me instead such peace and trust as I had never known before.

Whenever I have turned away from the testimony of the material senses and given my entire thought and desire to the attainment of spiritual perfection, I have demonstrated over whatever the inharmonious condition was. With a practitioner's help many adverse conditions have been overcome for me and the way has been opened to advance in my chosen line of work; also one serious fault, extreme self-consciousness, has been overcome. It was not so apparent to others, but caused me much unhappiness.

With my small understanding of Christian Science I have been able to overcome discordant physical conditions both for myself and others. I cannot express in words what this teaching means to me; it has changed my whole thought and outlook. In place of doubt and fear it has given me courage and perfect trust, a purer sense of love, and knowledge of a Father that never fails me.

(Miss) ISABEL F. MACLEOD, San Diego, Cal.

✧ ✧ ✧

# From the Press

[Editorial in *Hollywood* (Cal.) *Inquirer*]

Considerable opposition has arisen in Hollywood over the occasion of a deputy in the office of the city board of health appearing before the pupils of Hollywood High School a few days ago and stating that the school had been exposed to smallpox, and that all those who had not been vaccinated must either be vaccinated or excluded from school for three weeks.

The health office advised this paper that a pupil of Hollywood High School lived in an apartment house down town in which a man was found with smallpox. The health officer could not state that the pupil had ever seen the suspected patient, or that he lived in any close proximity to him. As a matter of fact, the pupil had been at the camp at Arcadia for a week. Notwithstanding all these facts, the health department, conceiving this a good opportunity to force the antitoxin crusade, immediately started its campaign.

The advocates of vaccination are spreading a general propaganda throughout the country based upon nothing more or less than fear. Whenever the slightest opportunity occurs, without any hesitation, and with almost a brutal disregard of facts, the health authorities swoop in with the idea of securing as many vaccinations as possible before the truth becomes known. A campaign of fear is understood to be the best agency to compel universal vaccination.

Doctor Roth of the city health department was asked by this paper if it had been absolutely determined that the suspected smallpox patient had that disease. In response to this question he said: "Well, if he didn't have it then, he has it now, because we put him in the pest house with the rest of the smallpox patients."

There is no fair-minded person who will object to vaccination for the person who believes in its efficacy. At a time, however, when the medical profession is seriously divided over its value, when thousands of cases of disease and death have resulted from it, the public school should not be used as a wholesale culture bed for the advocates of vaccination, and compulsion, even though not strictly permitted by law, should not be used indirectly through the medium of deprivation of rights from those who may have their own opinions about the health of vaccination.

[Rabbi Emanuel Sternheim in *The Universalist Leader*]

The church has been a great disappointment to many, largely because it has not proved true to its basic truths. This has nothing to do with orthodoxy or unorthodoxy. In

Digitized by Google

both cases it is a formal thing, the church, from which the virtue has departed. The church has failed largely as a prophetic body. It has failed to read the signs of the times. As a modern thinker has very well said, "It is always coming in at the tail end of great struggles for freedom, education, and social reform." It borrows its systems of philosophy to express its faith just as they are getting outworn. For instance, there is much talk to-day of socialized religion as a solution of the unrest which at present besets the world. The church is commencing to talk of social service, when leaders of thought are commencing to set aside the term "social service" in favor of the term "human service." In other words, the church is just commencing to realize the philosophy when leadership is commencing to look away from it to something further. If religion is to have any effect, it must be carried out on the broader lines of fellowship, and the church of to-morrow will be the "human church," the church where fellowship dominates.

[John Oxenham in *London* (England) *Chronicle*]

Unless the nation's prayers for deliverance from peril come spontaneously from hearts earnestly desirous of aligning themselves with God, of cleansing themselves of the old concretions that have clogged them like the barnacles on a ship's bottom, of substituting new guiding lamps for the old, misleading will-o'-the-wisps, of casting aside the false gods we have followed and turning steadfastly to the true God—they are not likely to serve. It is no good asking God to fight on our side unless we first make our side fit for Him to fight on. As a nation we have a terrible amount of leeway to make up. Are we as a nation making any real effort thereto? Until we genuinely do so our tribulation may have to go on. We may—we all devoutly hope and believe we shall—hold the Germans, and so beat them. But we shall not have won what we set out to win in this war unless at the same time we, as a nation—and that means we as individuals—find our own souls again. Discipline by all means; but the greater includes all the less, and purely material discipline without the spiritual dynamic behind it will not carry us to our goal. It is many years past time that we, as individuals and as a nation, saw to it.

Our men—in that fiery hell across the water—are thinking, many of them, very deeply on these things. They cannot help it. In the face of death they are thinking as they never thought before in their lives. If we were in their places we also would think on them as we never did before—and more deeply than we are doing. We could not help it. The sooner we begin the better—for them, and for us, and for all the world.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlets in French

"Christian Science: Its Discovery and Development," by William D. McCrackan.

"Christian Science: A Religion of Love," by Virgil O. Strickler.

Both of these French translations are printed with alternate pages in English, and are now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the War Relief and Camp Welfare Fund, the Real Estate Fund, and the Benevolent Association Fund should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

Digitized by Google

# Opening the Way

Mrs. Eddy says in "Science and Health with Key to the Scriptures" (page 326): "Working and praying with true motives, your Father will open the way."

That the way to healing, happiness, and prosperity resulting from contact with Christian Science is being opened through advertising in THE CHRISTIAN SCIENCE MONITOR is indicated by the following extracts from a few of the many letters and reports which have reached us:

ACQUAINTANCE WITH MONITOR LED TO HEALING

"A few years ago, the advertising manager of ——— Dry Goods Company, ———, was called upon in order to present the question of advertising in The Christian Science Monitor. It was the first time that he had known that such a paper was published, and, almost immediately, to some extent, appreciated its efforts to help in establishing desirable advertising. Although the firm would not give permission to use space in the Monitor at that time, the advertising manager himself asked to have occasional copies of the paper sent to him.

"About two years later he went to Rochester and then to New York City, where leading specialists in both cities told him that he had a malignant growth and that it was too late for special treatment to help him and an operation would be too dangerous. On the way home he remembered The Christian Science Monitors that he had read, and decided that he owed it to his family to try Christian Science. He asked for treatment of an advertised practitioner and was very quickly healed."

FINDS COMFORT AND SUPPLY

"A lady in the country who had recently become a widow, in turning to The Christian Science Monitor for comfort, noticed an advertisement for some things which she had which were quite useless to her. She sent them, and received a nice letter and a large check which was for the exact amount she had sent to Boston for the Benevolent Association at considerable sacrifice. The comfort this brought to her was very great."

REALIZES INCREASED BUSINESS AND OPPORTUNITY

"A regular advertiser writes of 'the privilege to express something of our gratitude for the wonderful blessings we have experienced while advertising in The Christian Science Monitor—not only in increased business but in opportunities afforded for broadening one's views and for the many practical occasions for giving help to others.' "

HEALED THROUGH READING SCIENCE AND HEALTH

"When the advertising representative in this city called upon a local merchant to solicit his advertising for The Christian Science Monitor, the dealer asked about Christian Science literature even before asking about the advertising charges. The merchant was very glad to have his advertisement appear in the columns of the Monitor. He now owns his own Science and Health, and was healed recently of the effects of a bad fall simply through reading it earnestly. On every possible occasion he speaks very highly of Christian Science and The Christian Science Monitor."

INTERESTED WHILE CHECKING ADVERTISEMENTS

"One day a young lady whose work it was to clip her firm's advertisements in The Christian Science Monitor for their advertising book, asked the Monitor advertising representative if there was any other literature which she could get on the subject of Christian Science. She was given the Christian Science Sentinel and the address of a Christian Science Reading Room. Soon after, she applied to a practitioner for treatment with the result that she was healed of difficulties which had kept her frail and weak for years."

HEALED BY FOLLOWING ADVERTISER'S RECOMMENDATION

"Another advertiser . . . a shoe dealer . . . has been healed of a deep prejudice against Christian Science. A patron came to him one day who, while being served, told about his wife who was bedridden, and had been for a number of years. Physicians had just told him, after a consultation, that she could not be helped and had not long to live. The gentleman was thoroughly disheartened, and our advertiser told him what little he knew of Christian Science and its work, and advised him to try it. Some six months after this conversation the customer came to the store to tell the dealer that he and his wife had taken his advice and that she had been perfectly healed. . . . He had come in to thank the advertiser for his excellent advice."

---

Opportunity to send the messengers of Christian Science on their healing mission to the world is maintained through the plan of the Postmaster-General of the United States to send to soldiers and sailors destined to proceed overseas, at nominal postage, literature offered at post offices in the United States. A printed notice on the front of *The Christian Science Journal*, *Christian Science Sentinel*, and *Le Héraut de Christian Science*, signed by the Postmaster-General, explains the simple plan.

While the post office department has ruled that the above mentioned Christian Science periodicals are to be accepted by postmasters for use under this plan, the department order states that only "clean copies of current or comparatively recent issues" will be received.

Those desiring to send periodicals other than their own copies, or copies previously given for local distribution work, can doubtless make arrangements with any Christian Science reading room to mail these periodicals regularly as desired.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

## The Christian Science Monitor

AN INTERNATIONAL DAILY NEWSPAPER

Founded, 1908, by Mary Baker Eddy.

Published daily, except Sundays and legal holidays. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions to the columns of the Monitor should be addressed: Editor, The Christian Science Monitor.

Subscription price, payable in advance, postpaid, to all countries: One year, $9.00; six months, $4.50; three months, $2.25; one month, 75 cents; single copy, 3 cents.

## The Christian Science Journal

Founded, 1883, by Mary Baker Eddy.

This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, list of Christian Science Practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 30 cents.

## Der Herold der Christian Science

Founded, 1903, by Mary Baker Eddy.

A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing.

Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Founded, 1890, by Mary Baker Eddy.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size.

Subscription price, payable in advance, postpaid, to all countries: One year, $1.00; single copy, 25 cents.

## Pamphlets

**Price, Postpaid: Single copy, 5 cents**

**Christian Science: Applied Righteousness**—By Frank Bell.

**Christian Science: Its Religious Philosophy**—By Hon. Clarence A. Buskirk.

**Christian Science: "The Resurrection and the Life"**—By Clarence W. Chadwick.

**God is Good**—By George Shaw Cook.

**Causation: Viewed in the Light of Christian Science**—By Frederick Dixon. Also printed in Norwegian and Swedish.

**Christian Science Healing vs. Mental Suggestion**—By Frederick Dixon. Reprinted from the "Weekly Budget," London, England. Also printed in Norwegian.

**Christian Science: The Revelation of Christ**—By John W. Doorly.

**Christian Science: The True Christianity**—By Clarence C. Eaton.

**Christian Science: Pure Metaphysics**—By Dr. Francis J. Fluno.

**Christian Science: The Gospel of Freedom**—By Willis F. Gross.

**"Then the Full Grain in the Ear."** Printed in English only.

**Upward Footsteps.** Also printed in Dutch.

**"What Went Ye Out for to See?"** Printed in English only.

**OTHER TRANSLATED PAMPHLETS**

Not printed in English separately

**Faith and Generosity.** Printed in French.

**Man's Unity with God.** Printed in German only.

**"Peace on Earth."** Printed in German only.

**Prayer and Confidence.** Printed in German, Dutch, and Swedish.

**Mary Baker Eddy**—By Arthur Brisbane. Printed in German only.

**Mary Baker Eddy: Her Purpose and Accomplishment**—By Frederick Dixon. Printed in German and French.

**The Founder of Christian Science**—By B. O. Flower. Printed in German only.

**Christian Science: A Reasonable and Rational View of All Things**—By Francis J. Fluno, M.D. Printed in Dutch.

**Christian Science: Its Teachings, Methods, and Works**—By Judge Septimus J. Hanna. Printed in Swedish.

**Christian Science: Humanity's Helper**—By Prof. Hermann S. Hering. Printed in Dutch.

**Christian Science: The Comforter of Promise**—By Frank H. Leonard. Printed in French.

**Christian Science: Demonstrable Religion**—By Frank H. Leonard. Printed in Norwegian only.

**Christian Science: A Religion of Progress**—By William D. McCrackan, M.A. Printed in Swedish and French.

**Christian Science: The Christianity of Jesus**—By Mrs. Sue Harper Mims. Printed in Swedish.

**Christian Science: The Gospel of the Kingdom**—By Judge Clifford P. Smith. Printed in German and French.

**Christian Science: A Religion of Love**—By Virgil O. Strickler. Printed in French, German, and Norwegian.

**Christian Science: Its Principle and Method**—By Bicknell Young. Printed in Swedish and French.

**VEST POCKET PAMPHLETS**

**Price, Postpaid: single copy, 4 cents**

**Possession.** Printed in English only.

**Protection**—Printed in English only.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01183x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01140x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.65.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50.

Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $2.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

*"What I say unto you I say unto all, WATCH."* Jesus

VOLUME XX AUGUST 24, 1918 NUMBER 52

## Practitioner and Patient

EMMA C. SHIPMAN

IT may be said that a Christian Science practitioner occupies a similar relation to his patient that a clear window does to a room. A window lets in light; nevertheless it is neither the light nor the source of light. As the window does not engage one's thought when he is beholding the landscape, so the practitioner is entirely subordinate to that sublime outlook on God and His creation which the patient has a right to gain. No genuine Christian Scientist desires to call attention to himself or to his personal views. The best aid that can be given a patient is to help him to think rightly for himself. The sooner the patient learns to correct his own thoughts and acts, the sooner he will manifest harmony and become a useful member of society.

It is distinctly understood in Christian Science practice that one does not need to know the life history of a patient in order to heal him. The understanding of immutable, divine Principle, rather than the knowledge of false, human beliefs, enables one to heal and to be healed. One cannot afford to give out gossip, or to listen to it, under the guise of uncovering error. Error is uncovered when it is seen to be unreal. So long as error appears real, its mask has not been removed. There is, therefore, no excuse for ignoring evil, and one must steadfastly obey the Scriptural injunction, "Be not overcome of evil, but overcome evil with good."

Mrs. Eddy writes in "Science and Health with Key to the Scriptures" (p. 206): "The exercise of the sentiments—hope, faith, love—is the prayer of the righteous. This prayer, governed by Science instead of the senses, heals the sick." How lucidly it is set forth that this hope and faith are in God alone, and that this love is the love of good, supersensual rather than sentimental.

The efficient helper, instead of dictating the human steps a patient should take, will give enlightenment and hope, while counseling his patient to take all discordant problems to God in prayer, instead of running from them. God, who was with Moses at the Red Sea, with Daniel in the lions' den, with Jesus on the cross, is present now to save and to heal those who turn to Him. Our Father can surely be relied upon to direct His children in the right path, and one's patient can be trusted to His loving guidance. Although in the majority of cases a frequent change of practitioners may not be desirable, still the patient has every right to change whenever he so desires. The moment the patient requests that treatment be stopped, he is no longer a patient, and cannot be claimed as such by anyone.

The practitioner needs to watch that he be not diverted from the goal of healing. There are many progressive movements on foot to-day which are doubtless the result of the leaven of Truth working in the world, but howsoever helpful they may be, it should be remembered that they are the effect, not the primary cause, of human betterment. To devote attention to the propagation of these movements will not increase the practitioner's efficiency if they draw his attention from the supreme effort to attain the Mind which was in Christ Jesus. Mrs. Eddy's words in "The First Church of Christ, Scientist, and Miscellany" (p. 149) are applicable. She says, "Losing the comprehensive in the technical, the Principle in its accessories, cause in effect, and faith in sight, we lose the Science of Christianity."

The healing power is manifested through spirituality, therefore the practitioner's thought should dwell only in the realm of the spiritual, where divine Mind is found to be the sole remedy for all mortal troubles. This spiritual consciousness is the very opposite of dreamy absent-mindedness. It calls for the exercise of all the faculties of alertness, wisdom, and intelligence. It means "God with us,"—Life with us; Truth with us; Love with us,—heaven in our midst.

The following quotation from Phillips Brooks appeared in the *Christian Science Sentinel* of January 6, 1906: "God has not given us vast learning to solve all the problems, or unfailing wisdom to direct all the wanderings of our brothers' lives; but He has given to every one of us the power to be spiritual, and by our spirituality to lift and enlarge and enlighten the lives we touch." It is interesting to know that under this quotation Mrs. Eddy wrote in pencil, "The secret of my life is in the above."

May practitioner and patient so learn this secret that there shall be no hindrance to universal healing.

## "Be of good comfort"

LIDA S. STONE

WITH many others, brought up with loving care and solicitude for my spiritual welfare, I once believed that the healing effect which followed the act of the woman who pressed forward with eagerness to touch even the hem of the garment which Jesus wore, in order that she might be made whole of her malady, was due to the personal goodness of a man of flesh and blood, who in some supernatural way possessed healing power. I never doubted that this woman as well as others was freed from the discord, no matter what it might be; but it never occurred to me that God was the Principle of Jesus' works. I believed that drugs cured sickness and that God endowed them with healing efficacy, though in what way He manipulated them I never puzzled out,—a fair example of scholastic tangles. The body of sickness I believed to be my body, instead of the embodiment of my thought, and so I was like one in a wilderness, knowing no way out and yet making desperate efforts first in one direction and then in another.

The time came, however, in later years when a sister's child was restored, in six weeks, to health and vigor through Christian Science after the case had been pronounced incurable by the best physicians in the city, and at the same period another child was healed in three days from what was pronounced malignant scarlet fever. These works filled me with wonder, then with deepest interest, which resulted in my seeking Christian Science for myself. My need was sore. Physicians I had had in goodly number and of the best repu-

tation, but none gave me one healing or saving thought. The fears and suffering which accompanied the "anæmia," or wasting of the blood, were extreme, and the apprehension as to the outcome was not reassuring. The comfort and peace which came with Christian Science treatment was something which I had believed would never be mine, and while the complete eradication of the disease was not accomplished quickly, yet it came in due time by the goodness of Love's eternal law.

I have always been grateful that the desire for the bodily healing was not all-absorbing; hence the many proofs that the healing was being accomplished did not pass unnoticed, rather were they thankfully acknowledged. One such proof has always been very dear to me. At this particular time I was suffering intensely, so that it seemed as if no part of body or mind was free. I was in a home where Christian Science was not regarded with much favor, and added to the mental and physical suffering was my fear of the thought about me. I finally asked some one to read to me from one of the gospels,—anywhere, so long as I could hear the gentle Master's words!

As I listened, at first with great effort, it was as if a presence, refreshing and benign, had entered the room; the fever and racking pain were quieted, and then left me entirely free, and, more than that, I knew that "the ever-present Christ, the spiritual idea which from the summit of bliss surveys the vale of the flesh, to burst the bubbles of earth with a breath of heaven, and acquaint sensual mortals with the mystery of godliness,—unchanging, unquenchable Love" (Miscellaneous Writings, p. 328) was with me. How perfectly the veil was lifted from my thought, the veil that had placed the healing power in personality and materiality!

Now I could through this experience begin to press forward to touch the border of the Christly garment, and never again could I be satisfied with the old belief of healing. Surely, to touch "the hem of his garment" requires the lowliest attitude of mind that makes one eager, in spite of the press of mortal minds, to reach even the slightest realization, the border of love and mercy and faith and purity, which will stanch the false beliefs that man is mortal—filled with sin, disease, fear, and subject to death. When we have attained this attitude of mind, will not the ever present Christ recognize our need, and shall we not recall Jesus' words, "Who touched me?" If we, like the woman of old, who is the type of our need, declare "before all the people of what cause" we are Christian Scientists, whether individually in daily living, or publicly in our testimony meetings, shall not we hear the inward voice of the dear Christ, "Daughter, be of good comfort: thy faith hath made thee whole; go in peace,"—the peace which passeth human understanding. Mrs. Eddy's words in "Christ and Christmas" come to mind with a new meaning:—

Forever present, bounteous, free,
Christ comes in gloom;
And aye, with grace towards you and me,
For health makes room.

## The Fullness of Reflection

LEONARD ANN

ON page 301 of "Science and Health with Key to the Scriptures" Mrs. Eddy has written, "Few persons comprehend what Christian Science means by the word *reflection*." It is well, therefore, to ask ourselves what we understand by this word, the proper comprehension of which is shown to be of such primary importance, since, in fact, on a clear apprehension of its meaning depends the perception of our relationship to God and, therefore, our ability to demonstrate that relationship practically here and now. All words which form part of our daily vocabulary have by usage associated themselves with certain meanings and significations which have often been somewhat vague and incomplete; but until Christian Science with its more exact use of words has come to us, this is not always apparent. Taking as an example the word reflection, there comes at once the thought of the mirror with its reflected picture, and then again perhaps the sea or pool of water with the reflected light of the sun or moon. A moment's thought, however, will show how limited and imperfect is this idea of reflection, if regarded materially, for the mirrored picture of one's self is but a flat and superficial resemblance, lacking the living qualities of the original and retaining only the appearance perceptible to the sense of sight. Again, the sun's reflection in water, while retaining some appearance of light, fails to reflect to any extent the quality of heat.

Now, in Science and Health (p. 475) we learn that "man is spiritual and perfect; and . . . reflects spiritually all that belongs to his Maker." Here, it will be seen, reflection is more in the nature of expression; it signifies a sense of derived power and God-given ability to overcome all material conditions and claims to power. It is not a reflection of outward form, but an expression of qualities; the infinite power of the cause is expressed in the derived power of the effect, and this expression or reflection is entity, and is the substance of man. Mrs. Eddy has written in her work "Retrospection and Introspection" (p. 57): "Man shines by borrowed light. He reflects God as his Mind, and this reflection is substance,—the substance of good." If we turn to such sciences and arts as mathematics and music, we notice the inseparability of the cause and its effect, or expression, and how the latter is absolutely dependent on the former. Without numbers and notes both mathematics and music would be unexpressed,—and in Christian Science man as God's idea is equally necessary for the expression or reflection of God.

As we study this subject of reflection in Mrs. Eddy's writings we find that our Leader clearly shows the inseparable relationship of God and man as Principle and its reflection, and the substantiality and fullness of this reflection; we gain, too, a broader comprehension of what is meant in Christian Science by the word reflection. Paul's words in the third chapter of II Corinthians (Revised Version) show clearly the deep significance of this idea. The passage reads: "But we all, with unveiled face reflecting as a mirror the glory of the Lord, are transformed into the same image from glory to glory, even as from the Lord the Spirit." The marginal reading here is "beholding as in a mirror," which is linked very closely to the teachings of Christian Science.

## "Shall the dust praise thee?"

HORTENSE W. LEWIS

CHRISTIAN SCIENCE reveals to mankind the very nature of God as Spirit, and man as His spiritual likeness. Why then write about dust? Why think about it? Why, indeed? Why have daily dusting in house and office? Why use vacuum cleaner, brooms, and what not? The answer is, To remove the dust; to clean the house. Back of the use of the vacuum cleaner, underlying the use of the duster, is the recognition that to mortal sense there is something valueless, something which needs to be, and must and can be, removed.

In Christian Science we learn what it means to be God's image and likeness, what it means for man to be so like God, so to express the divine nature, that we can-

Digitized by Google

not think of God without thinking of man, cannot think of Mind without thinking of man, the expression or manifestation of Mind. Through Christian Science the glory, might, beauty, majesty, power, perfection, immutability, and allness of divine Principle are revealed; and as one studies and works, spiritual facts are understood; one's grasp of spiritual reality grows greater and greater; and along with this perception of the real and eternal there necessarily come the discernment and the detection of the false, material, and untrue. Could anyone detect an error in mathematics unless he knew mathematical facts? That two plus two equals five may seem true to one who knows nothing of mathematics; but the mathematician cannot be deceived by any such statement, for he knows that two plus two is invariably four. So in Christian Science, with the recognition that Life, substance, and intelligence are spiritual, comes the discovery that there can be no intelligence, substance, or life in, or because of, or as, matter; indeed, as the spiritual foundation of all things is understood, the belief of material foundation, cause, and structure appears as mental dust to be cast out of the house, cast out of human consciousness as worthless, valueless.

On page 584 of "Science and Health with Key to the Scriptures," Mrs. Eddy defines dust as "nothingness; the absence of substance, life, or intelligence;" and surely nothingness is not that which can satisfy or attract man, or which can frighten man as the reflection of intelligence, the expression of substance, and the evidence of Life. Dust is valueless to man, but in Genesis we read that God said to the serpent, "Because thou hast done this, thou art cursed above all cattle, and above every beast of the field; upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life." "And dust shall be the serpent's meat," is the statement made by Isaiah. It is only as we become conscious of the somethingness, indeed the allness of the spiritual, of Mind and its manifestation, that we detect the deception of that serpent, which is fully defined on page 594 of Science and Health for our enlightenment and protection.

Understanding the allness of Principle, the utter nothingness of every claim of matter, of every hypnotic suggestion, of everything tending to rob man of his right to think so clearly, intelligently, and correctly that he refuses to be beguiled and to eat of the lies of mortal mind, the truth of being becomes a demonstrable fact. Christian Science awakens mankind to the fact that all sin, all disease, and even death can and must be proved nothingness,—no cause, no effect, no law, no tendency, no power, no entity, no condition, no experience,—merely dust.

We are good housekeepers, keepers of good consciousness, in so far as we shut out the dust of sin, of selfishness, personal ambition, human pride, and so on, and sweep out the lawless beliefs of age, of limitation, of fatigue,—all that is finite, material, or mortal. Are we carefully watching our thinking, and reducing to nothingness the false claims of temperament and disposition which we had accepted as our own thinking, our very nature; or are we disturbed, annoyed, perchance frightened, by sin and disease in others? A parent may be anxious over some tendency a child is showing, or some one may be assailed with dark forebodings of danger and harm befalling son, brother, sweetheart, husband, in the trenches, on the ocean, or in the air. If so, there is just one thing to do,—so to maintain God's allness, omnipotence, and omnipresence, so to maintain Mind's ceaseless, incessant, perpetual government of man, that all suggestion to the contrary is shaken as dust from one's consciousness. Yes, shaken, in obedience to the command, "Shake thyself from the dust;" for it takes mental vigor, tireless, insistent, and persistent clinging to the supremacy of divine Principle; it takes prayer such as Jesus used, "whose humble prayers" Mrs. Eddy tells us (Science and Health, p. 12) "were deep and conscientious protests of Truth,—of man's likeness to God and of man's unity with Truth and Love."

The ignoring, fearing, loving, or excusing of evil will never prove its nothingness. Jesus gave a valuable rule to all his followers when he said: "And when ye come into an house, salute it. And if the house be worthy, let your peace come upon it: but if it be not worthy, let your peace return to you. And whosoever shall not receive you, nor hear your words, when ye depart out of that house or city, shake off the dust of your feet."

"Let your peace return to you;" "Shake off the dust"! These two commands being obeyed there is no chance there for resentment, for anger, malice, bitterness, grief, or sorrow. We cannot dignify the dust by talking about it, thinking about it, weeping about it, being hurt over it, and then realize that it is nothing. "Christian Scientists," writes Mrs. Eddy on page 114 of "Miscellaneous Writings," "cannot watch too sedulously, or bar their doors too closely, or pray to God too fervently, for deliverance from the claims of evil. . . . Rest assured that God in His wisdom will test all mankind on all questions; and then, if found faithful, He will deliver us from temptation and show us the powerlessness of evil,—even its utter nothingness." Truly might the psalmist ask, "Shall the dust praise thee?"

## "The everlasting arms"

HUGH STUART CAMPBELL

A CHILD who with her parents spends part of each summer at an inland lake, was unable to swim. Three seasons had passed, and all efforts to teach her in the usual way had proved unavailing. A seeming fear, out of all proportion to her longing for the water, hindered instruction. One morning the situation was considered metaphysically, and the truth as taught in Christian Science was applied to the problem. The child was told that she, being a spiritual idea of God, was the object of His loving care and lived constantly under divine guidance and protection; that God directed, supported, and sustained her wherever placed, whether in, over, or under the water; that Mind governs all action; that there is no fear. Partly convinced, the child said, "I'll try to swim, but you stay near." There was still a dependence on human aid. The effort was made, and with some difficulty the pier over deep water was reached.

The little girl was then told to rely solely on Truth's sustaining power, and not to depend upon any human sense of protection; that a child of God could not be harmed. The child pondered a moment and then exclaimed, "Now I'll swim back; but you keep away." Human dependence was gone, and the demonstration complete. Physical aid, which a moment before seemed indispensable, was rejected; confidence in God was assured. She proved that "underneath are the everlasting arms," and afterward she swam with contentment and joy many times over the deep places she formerly dreaded.

Now what had changed? The physical child, the water, the pier were the same. The law of specific gravity had not changed. There had been no instruction to improve the method of breathing or movement. What had produced the result so quickly? Simply this: the realization of Love's presence and protection had cast out fear. The erroneous mental state which governs the physical had been corrected

Digitized by Google

with truth. False beliefs about law were rendered obsolete. Fear gave way to the right idea of safety. Confidence in God's omnipotence banished from the child's consciousness unreal beliefs acquired by false education and suggestion, and she demonstrated the power of Mind over matter, thus proving once and for all time man's dominion over the physical senses. Vacation is over; and now, as she repeats Mrs. Eddy's verse, her "New Year Gift to the Little Children" (Poems, p. 69),—

Father-Mother God,
Loving me,—
Guard me when I sleep;
Guide my little feet
Up to Thee,

she better understands in work or at play how God, the all-loving Mind, does—by night and by day—truly guide the little feet up to Him.

This was an experience which taught the parents to express more gratitude to our Leader for giving mankind the practical rules whereby all may demonstrate with absolute certainty Mind's control over any seeming difficulty, through the power of divine Love. It has encouraged them to seek more diligently that freedom from error which ushers in a receptive state of thought whereby "a little child shall lead them."

## Practical Aid

JESSIE I. UPHAM

DOUBTLESS the dearest wish of all Christian Scientists is that every one in the world may understand Christian Science well enough to desire to live by it. To consider what it will mean when such a state of things shall prevail, is to long to do everything possible to hasten the day; and yet, in picturing this happy state, it is usually thought of as coming only in a remote future. This, of course, would tend to neutralize the daily prayer of members of The Mother Church, "May Thy Word enrich the affections of all mankind, and govern them!" (Manual, Art. VIII, Sect. 4.) It being both a human necessity and a divine requirement that mankind shall be so governed, this prayer is not a vague abstraction, but a very practical procedure; and the importance of it is evident in the present hour, when the widespread tumult among nations is making it clearer how little our individual interests can, in reality, be separated from those of the community, the nation, or even of the entire world.

All right-minded people to-day are aroused to a spirit of helpfulness, and are asking themselves what they can do to help, and to help in the most direct way. Many questions not immediately connected with the war are forcing themselves upon public attention and are threatening to become serious,—the issue between capital and labor, for instance. There are many plans constantly coming forward for the betterment of all untoward conditions, but Christian Scientists know that these problems can never be fully and finally settled except through the spiritual understanding and scientific application of divine law, as taught in the Scriptures, as perfectly demonstrated by Christ Jesus, and as elucidated in this age by Christian Science. There is a solution for every problem, whether of state, factory, or battle field; but in the end it must be reached through the demonstrable understanding of God's word. Since the right road is always the shortest, what work can there be which will give more direct aid to groping humanity than that which will increase this needed knowledge?

From cover to cover the Bible rings with the recognition and honor given to "the word of the Lord," "the word of God," by patriarch, prophet, apostle, and saint. Moses declared, "The word is very nigh unto thee, in thy mouth, and in thy heart, that thou mayest do it," and this was repeated in substance by Paul, in his epistle to the Romans. In Science and Health (p. 503) Mrs. Eddy has written, "Divine Science, the Word of God, saith to the darkness upon the face of error, 'God is All-in-all,' and the light of ever-present Love illumines the universe." This is not the record of an event in ancient history, but the statement of a present and eternal fact. The Word of God is always and everywhere speaking, and despite the obscurity of material sense it can be heard. There is no power that can interfere with this Christly influence, no law that can delay its enthronement in the hearts of men, or that can precipitate direful happenings in defiance of it; nor does the world have to go through long, slow stages of development, for in Psalms we read that "his word runneth very swiftly."

That "the affections of all mankind" might be truly enriched, our great Leader made careful and ample provision. The authorized Christian Science publications bear a message to every possible stage of unfoldment, conscious or unconscious,—meeting, feeding, and leading the beginner or the most advanced. That these silent messengers be given the widest opportunity to fulfill their mission would seem but an outward expression of the earnestness of our prayer, and a fitting complement to it. On page 45 of "No and Yes" Mrs. Eddy says: "Let the Word have free course and be glorified. The people clamor to leave cradle and swaddling-clothes. The spiritual status is urging its highest demands on mortals, and material history is drawing to a close."

## Sunday School Experiences

EILA FOSTER

IT has been the joy and privilege of the writer to teach for several years in a Christian Science Sunday school. During that time she has had many helpful and uplifting experiences, but among them stand out very clearly the following incidents as showing what possibilities may be attained in the near future as the outcome of this work established by our dear Leader.

I was one day teaching the infant class, in which were little ones four and five years of age. One little girl throughout the lesson had been very restless and inattentive, and when gently remonstrated with she replied defiantly: "Oh, but I am not a Christian Scientist! Mummy is, but I am not." "Don't you want to be?" she was asked. "No," was the decided answer. In striving to deal with this error there and then, I was led to ask the other children individually whether they wished to be Christian Scientists, and each in turn answered "Yes." "Now, then," I said, "perhaps you will each tell this little girl why you wish to be Christian Scientists," and turning to a small girl of five, I asked why she wanted to be a Christian Scientist. Quick and clear, without a moment's hesitation, came the response, "Because I want to heal." The other answers were also illuminating, one being because Christian Science makes one happy; another, because it took away one's pain, and so on; but the selflessness and purity of the first answer seemed to point to the fact that the time is not far distant when the prophetic words of Isaiah will be fulfilled, "And a little child shall lead them." On page 9 of "Pulpit and Press" Mrs. Eddy says, "Ah, children, you are the bulwarks of freedom, the cement of society, the hope of our race!"

Another realization which has always been very encouraging to me is that the work done in this connection is never

Digitized by Google

lost, even though one may not see visible results. One day when I was teaching a class of older children, a new pupil was brought into the class by one of the others. This girl knew nothing of Christian Science, and during the time allotted to the lesson for the day I tried to give her some helpful thought of this vast subject; but apparently she took no interest whatever, and as she did not come again I felt that in some way I had failed.

Several weeks later a message was brought me from this child, who was then at a boarding school in the place, asking if I would give her treatment. It seems that as the result of an accident while on a boating expedition, a kettle of boiling water had been upset over her back, inflammation had set in, and for three weeks she had been in bed, attended by a doctor. As there was no improvement, she asked one of the other girls, who she knew attended the Christian Science Sunday school, if she would send a message to the teacher who had taught her on that Sunday some weeks before. Needless to say, the child's desire to turn to Truth in her hour of need was rewarded, and the second day after receiving treatment found her up and dressed and attending to her lessons. This proved to me that if our mental work in preparing for the Sunday school has been faithfully and honestly done, we can leave the result in God's hands. If we but plant the seed, God will give the increase.

## Omnipresence

KATE HALL

THE writer has had to prove for herself the wonderful truths contained in the thought of God's omnipresence. She had been healed and had responded to the divine call, "Take up thy bed, and walk," and was daily rejoicing in restored health and vigor. Although life was new and joyous and she felt overflowing with love and gratitude, yet she had often to retrace her hasty steps and learn to walk, and to work out her own salvation. On page 494 of "Science and Health with Key to the Scriptures" our revered Leader says, "Divine Love always has met and always will meet every human need."

The writer had occasion to prove the truth of this statement. The time came when her husband passed on. Two sons and one daughter were serving their country in France and one child was in England, thus leaving her, to sense, alone. The bitterness of that word "alone" held her fast and did its worst to keep her down. She longed with a great desire to know more of the divine companionship. She read, "Thy Maker is thine husband," and she was reminded of our elder Brother, and of "our Father-Mother God, all-harmonious" (Science and Health, p. 16). Prayer was answered in an unexpected way: in the still, dark hours of the night she heard the divine voice, "Lo, I am with you alway." Like a flash the writer saw that to lean even upon a small child for protection and companionship during the night, would be owning another power apart from divine Love. Her way was made clear and "the rough places plain." Omnipresent Love was indeed her husband and friend, and during the seeming terrors of the darkness she felt the peace of God; for had not divine Love met her need?

This article is penned in a cottage far away from human habitations, on the lonely moors; yet the writer is not lonely, for joy has taken the place of fear, and fullness of joy has replaced timidity and terror. Our Leader says in Science and Health (p. 274), "Divine Science is absolute, and permits no half-way position in learning its Principle and rule—establishing it by demonstration."

# Selected Articles

["'Thy will be done'"—*The Christian Science Monitor*, Boston, U.S.A., Feb. 25, 1918]

Almost every conceivable wrong has, at one time or another, been attributed, in mortal belief, to the will of God. The common misconception of God's will has indeed been exceeded only by the false concept of God. Human beliefs concerning God's will naturally take their character from the beliefs that are entertained as to the nature of God. Thus the belief of God as a corporeal Deity, vests Him with an arbitrary will which may or may not set aside His laws at pleasure. As a false concept of God results in a false concept of man, so the mortal misconception of God's will finds expression in erring human will power, which is capable of all evil. It is impossible to convince a man that the will of God invariably decrees harmony for man, unless you can rid him of his belief in a corporeal, incomprehensible Deity; but if a man sees that God is divine Principle, then it becomes very clear that the unalterable will of God is the direct antithesis of arbitrary human will, just as Principle is opposite to anything which material sense conceives God to be.

The will of divine Principle is therefore never to be found operating through any suffering or wrong, but is witnessed wherever the might of omnipotent good is overcoming evil. The prayer that God's will may be done on earth as it is in heaven thus becomes, in Christian Science, an intelligent affirmation of the present supremacy of Spirit; and the understanding of this fact demonstrates the unreality of all that is unlike Principle. In the Glossary to Science and Health (p. 597) Mrs. Eddy defines will both as it is conceived by material sense and as it is in spiritual reality, in the words: "WILL. The motive-power of error; mortal belief; animal power. The might and wisdom of God." The operation of God's will, as understood and demonstrated by Jesus the Christ, wrought the destruction of all that opposed the spiritual idea which he presented. One great secret of Jesus' power was his perfect capacity to differentiate between the erring human will and the omnipotent will of God. He said, "I came down from heaven, not to do mine own will, but the will of him that sent me," and, referring to his practice, he declared, "I can of mine own self do nothing: as I hear, I judge: and my judgment is just; because I seek not mine own will, but the will of the Father which hath sent me."

It was because Jesus the Christ understood the Father to be divine Principle that he was able to reflect God's will in healing the sick, in direct opposition to every supposed material law. It was out of his understanding of the divine law that he declared, "It is not the will of your Father which is in heaven, that one of these little ones should perish." He knew that evil and suffering, which are totally contrary to Principle, could be, and must be, proved unreal, and destroyed through the understanding of God's will. He proved that, as Mrs. Eddy has said on page 208 of "Miscellaneous Writings," "This is the law of Truth to error, 'Thou shalt surely die.' This law is a divine energy. Mortals cannot prevent the fulfilment of this law; it covers all sin and its effects. God is All, and by virtue of this nature and allness He is cognizant only of good." The false human will seems to be constantly battling against the true activity of divine will. If, in this seemingly incessant struggle, a man leans to the dictates of human will, he is "beaten with many stripes," and the only benefit he may gain from his experience will be found in the proportion that he assimilates the lessons which the effect of yielding to human will teaches.

Digitized by Google

But if a man sincerely desires to be guided by the wisdom of God, the struggle between the false concepts and the spiritual idea becomes a winning one, and he will emerge from every battle against material will with a stronger confidence in the power of divine Principle to overrule and destroy every sense of wrong, sickness, and death.

No human being can escape the process of separation between the real and unreal in his own consciousness, and the evidence of the physical senses must eventually be repudiated and vanquished through the understanding of God. As a man lets God's will be done in his experience, he escapes from the seeming rule of evil, and comes into the conscious realization of the power of divine Principle to protect and deliver. It was because Jesus the Christ had so faithfully obeyed the will of divine Principle in each previous step, that he was able in Gethsemane's crucial decision to say with holy confidence, "Not my will, but thine, be done," knowing that obedience to God's will would mean, not submission to death, but the divinely derived power to prove the nothingness of death.

Jesus' obedience to God's will seemed to incur the hostility of the world, for the reason that the world, steeped in human will, felt the rebuke of his spiritual conformity to Principle, and was unwilling to follow his example sufficiently to surrender its own self-will. Every one who endeavors to obey the will of God will have to rise above the same evil beliefs of life and intelligence in matter that Jesus faced and destroyed. And in the proportion that a man succeeds in obliterating in consciousness whatever is unlike God, the divine will, and not the human, will be reflected in his actions; and as this reflection grows clearer, his experience will become more and more harmonious. "Mortals have only to submit to the law of God," Mrs. Eddy says on page 208 of "Miscellaneous Writings," "come into sympathy with it, and to let His will be done. This unbroken motion of the law of divine Love gives, to the weary and heavy-laden, rest."

✧

[Joe L. Penry in *Wichita Times*, Wichita Falls, Texas]

In his intense zeal I fear our critic does himself injustice when he insinuates that he is thoroughly conversant with the teachings of Christian Science. The greater number of Christian Scientists had, like him, a false concept of Christian Science at one time in their experience. It was only when human means of alleviation of pain, sorrow, and distress failed them that they were willing to listen to the still, small voice. It was through their healing that their eyes were opened. The writer stands as a living monument to this fact; hence our adoration for the compassionate Christ and our love for mankind.

To say, as did our critic, that Christian Scientists are engaged in "proselyting" and seeking members for their church, is to misunderstand the mission of Christian Science and the ministry of love. We are engaged in the destruction of sin, sickness, and death, and this is the only warfare authorized by the Word; hence it is true we do not "fight," except to resist evil by spiritual means, and in defense of human liberty and human righteousness by carnal means, as in the present world conflict. When will the world heed the admonition of the Master, when he insisted that "by their fruits ye shall know them"? Christian Science is willing to be judged by the fruits of its ministry. Can a stream send forth both sweet water and bitter? The fruit of Mrs. Eddy's life work is being disclosed in the lives of her followers, and she insisted that her students follow her only so far as she followed Christ (see Message for 1901, p. 34).

To those who love the Bible as the Word of Life, irrespective of the aspersions of this clergyman in his statement that Christian Scientists have advanced beyond the Bible and that they have a new Bible or an appendix to the Bible, let me say in all the candor of one who is devoted only to the cause of good for the human race, that these statements are absolutely untrue and unwarranted by anything said or done by Mrs. Eddy or any of her followers. The Bible of our fathers is taught and studied more intensely and reverently than ever before for the gaining of the understanding of the spiritual import of the Word. The textbook of Christian Science, "Science and Health with Key to the Scriptures" by Mrs. Eddy, has never been claimed to be other than what it is—a textbook. It is a commentary on the Bible, revealing to us the spiritual import of the Scriptures.

✧

[Judge Clifford P. Smith in *Jamaica* (British West Indies) *Times*]

Christian Science distinguishes completely between the real, ideal man and the human or mortal sense of man. For this purpose and for every purpose it distinguishes between ultimate or absolute reality and mere appearance, semblance, or illusion. Acknowledging God as the origin of all that really is, Christian Science does not find an origin for aught else, but consistently denies that anything which is not of God can have an origin or real existence. On page 300 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "The mirage, which makes trees and cities seem to be where they are not, illustrates the illusion of material man, who cannot be the image of God."

In this connection Christian Science points out that Christianity was originally based on the truth or reality of being. Its basic requirement was the knowledge of the truth concerning God and man, "the truth" denoting absolute reality as opposed to what is merely apparent, seeming, or false. Attention is drawn to sayings of the Master, such as the following: "For this cause came I into the world, that I should bear witness unto the truth." "I came that they may have life, and may have it abundantly." "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." "Ye shall know the truth, and the truth shall make you free." Such sayings, one of which is quoted from the Revised Version, imply that the human or mortal sense of life is false, and they imply that abundant and eternal life is to be gained by finding and realizing the truth of being.

The human situation was stated by John in these words: "Beloved, now are we the sons of God, and it doth not yet appear what we shall be." He did not mean that we shall ever be different from what we really are. He meant that we are the sons of God, though the reality of being doth not yet appear. He did not foresee a loss of identity; he discerned the realization of true identity. Mrs. Eddy has consistently said (Science and Health, p. 69): "The real, ideal man appears in proportion as the false and material disappears;" and (p. 476), "Mortals will disappear, and immortals, or the children of God, will appear as the only and eternal verities of man."

According to Christian Science, then, no form of evil possesses the nature of substance, but every phase of evil is only an aspect of error,—truth or the understanding of reality being the universal remedy. For instance, take its teaching in regard to sin. Sin is primarily wrong thinking; it is always punished by the loss of harmony or the suffering which it entails; it is forgiven as it ceases, for goodness always receives its reward. The impulse to sin is always ignorant or deceitful; at worst it is a false sense of pleasure

Digitized by Google

in sin. So Christian Science is spiritually educational: it makes much use of the truths that sin cannot confer genuine pleasure; that the consequences of conscious indulgence are cumulative; and that happiness must be sought and can be found in active goodness. This religion also emphasizes the power of goodness—the ability which goodness carries to detect sinful motives, to unmask sinful inducements, and to dispel sinful persuasions. In this manner the reformative work of Christian Science has been conspicuously successful.

The prevention and cure of disease is within the mission of Christian Science for the same reasons that it was within the mission of original Christianity. What are disease and health? In the last analysis not only disease and health, but mortality and immortality are opposite mental states, resulting from contrary modes of thought. On one hand is material sense, which has no principle—no cause or substance—and is simply an illusion, a dream of pain and pleasure in matter, that includes sin, disease, and death. On the other hand is spiritual sense, which is created and sustained by God, the divine Principle of all true being.

What Paul wrote to the Romans on this subject was both Christian and scientific: "To be carnally minded is death; but to be spiritually minded is life and peace." In these words he declared that life is a condition of mind or thought; he analyzed causation as wholly metaphysical. The mentality which sickens and dies is carnal,—that is to say, material; while the thought which lives and enjoys the perfect attributes of life is spiritual,—that is to say, emanating from Spirit or God. In other words, it is Spirit, the divine Mind, that gives life and health to man and gives it through mentality or thought.

Health, therefore, is primarily a mental and spiritual quality, and it is to be gained and preserved as such; that is, through the understanding of and obedience to the spiritual law which emanates from the divine Mind. Disease, on the other hand, even the most physical disorder, is a palpable evidence of false belief. It is a condition incident to the supposition that man is a material selfhood and governed by a law of suffering, disability, and death—governed by laws which divine Life, Truth, and Love could never make. Every case of illness, from beginning to end, is only a subjective condition of mortal thought; it is a particular result of the general supposition that life inhabits matter and is mortal.

Christian and scientific treatment of disease, then, depends on the distinction between absolute or real being and the human or mortal concept of man. Freedom from disease follows the absolute knowing of the truth concerning God and man. To cope successfully with disease it must be resolved into false belief and dealt with on a mental plane, in accordance with the divine law by which Truth destroys error. Healing comes to pass when the supposed law of disease and death is broken by the actual law of Life, and the unity of being is such that one individual can help another to obtain this victory.

In so far as hygiene and sanitation denote cleanliness and purity, Christian Science is in full accord; and it commends not only a clean body and clean surroundings, but a clean mentality; not only pure food, but pure thoughts. Jesus intimated to the Pharisees that for outward cleanness to be more than superficial it must be the result of inward cleanliness.

✧

[Duncan Sinclair in *Partick Gazette*, Glasgow, Scotland]

In a paragraph under "Notes and Notions" reference is made to the supposed attitude of Christian Science toward pain; and although the allusion takes the form of a mild joke, still the impression is conveyed that suffering is ignored in Christian Science practice. Now that is about as far from being correct as it possibly can be. In no single instance does healing take place through the aid of Christian Science by ignoring the conditions which sometimes appear very real to the sick person.

What the Christian Scientist does is to endeavor to realize, as clearly as he can, the truth about the harmony of God's spiritual creation, which creation he knows to be as perfect as God, the creator of it, Himself. He understands that every form of suffering results from the material senses of men, and that suffering is entirely unknown to spiritual sense or to the consciousness of spiritual reality. It is this spiritual understanding of God and of His spiritual creation, and not mere denial, which corrects erroneous material sense and destroys its effects. In the textbook of Christian Science, "Science and Health with Key to the Scriptures," Mrs. Eddy writes on page 214: "Spirit's senses are without pain, and they are forever at peace. Nothing can hide from them the harmony of all things and the might and permanence of Truth."

✧ ✧ ✧

## Extracts from Letters

"May I take this as an opportunity to write a word of appreciation and gratitude for the periodicals? They bring to me thoughts of cheer, of strength, and of encouragement. They point to a clearer understanding and to a deeper meaning of world events of to-day where otherwise there would probably be ignorance and confusion of thought. I am grateful for the privilege of being a subscriber."

"I will add that I do not know how I could get along without them [the periodicals]. For seven years now I have been here, and no Christian Scientists nearer than fifteen miles of me that I know of . . . and for the past year I have been all alone; but I have the daily mail, which means very much to me. While to human sense I feel very lonely, yet through the *Sentinel* and the *Quarterly* and all the good things they contain I know God has not forsaken me. I am giving my *Sentinels* to the soldiers; it seems but a small amount to do, but it is all I can see my way to do at the present.

It gives me much comfort to read the expressions of gratitude of those receiving help through the War Relief and Camp Welfare committee. My husband has been able to contribute some to that cause."

"I went to the Christian Science Society to find spiritual help, but I have found also material help of which I was deeply in need. Though an American myself, my husband is an Italian and has been for some time in military service. He was unexpectedly called to arms and sent to the front, thus having to leave his business from one day to the next, which was disastrous to us financially. I was beset with trouble on every side, and from a life of comparative luxury was suddenly found in urgent need. My husband's people were all refugees from the invaded countries. When help came to me from the Christian Science War Relief and Camp Welfare committee I had reached the point where I do not know how I could possibly have met my obligations.

"Words cannot express how very grateful I am to all the kind hearts that have contributed to this fund—for seeing, though so far away, and providing for the relief of the distress of the unfortunate. May God return them the blessings they have so generously bestowed on others."

## The Power in Agreement

WHEN upon the mind of the man who is a premier of a government or the head of a great business enterprise there dawns the vision of a right method for progress in solving many great problems, his unsolved and nearest problem is to secure the cooperation of his associates. We read of the actions of great men in the past, and the historical record of what they did is made to appear obviously right and the only thing that should have been done in the circumstances, but we also find that they were usually faced by detraction, hatred, and bitter opposition. Mortal mind though always a murderer seems to have especial vindictiveness against those who benefit the race, prolong life, and establish happiness and freedom. This, however, is really an evidence of the battle going on between the inevitable coming of the kingdom of heaven and the resistance of the powers and principalities of the world, the flesh, and the devil.

The good and great among men, prophets, apostles, and heroes, for whom the children of men build monuments, sometimes after they have slain them, seem to have had a faculty, however, for attracting into agreement with a right plan a sufficient number of workers to get the plan finally carried through. Again and again a country has been delivered, a business enterprise has been saved, by the concerted effort of a few who had clear vision and agreed together on essentials. Jesus thrillingly presents the possibilities brought out by agreement when he said: "If two of you shall agree on earth as touching any thing that they shall ask, it shall be done for them of my Father which is in heaven." To ask in the name of Christ Jesus means agreement with the nature of the Christ. When out of such a purified nature desire goes forth, it is really desire for agreement with Principle, and the appeal to Principle is the expression of desire for the demonstration of the Christ-spirit.

No more wonderful basis for agreement is to be found for Christian Scientists, as well as for all mankind, than the daily prayer which is given in the Manual of The Mother Church (Art. VIII, Sect. 4): "'Thy kingdom come;' let the reign of divine Truth, Life, and Love be established in me, and rule out of me all sin; and may Thy Word enrich the affections of all mankind, and govern them!" Who would disagree with this prayer who cherished a good purpose and had an honest mind? No one. Those who cater to sin naturally would object to a sinless race, for were men purified and blessed, and enjoying health and happiness, the occupation of the objector would be gone. Many are like the image makers at Ephesus. "By this craft we have our wealth," they said. Consequently they made riotous objection to the preaching of the gospel in their midst. The caterers to vice of the present day believe just as they did. Will you take away a man's living? they say, when reforms are proposed which would remove temptation from the pathway of children and youths. By tempting and debauching the young, by introducing hell into the lives of citizens, they think that they make gain, and so thinking cannot come into agreement with a good purpose.

Christian Scientists can always agree with Principle. They can always be as the young men to whom John wrote so lovingly, and maintain their strength to resist mesmerism. "I have written unto you, young men, because ye are strong," he said, "and the word of God abideth in you, and ye have overcome the wicked one." Differences among Christian Scientists are not usually about essentials, and it is only vanity that magnifies them. When one says emphatically, "I don't agree with you in that," note how often the disagreement is trivial. So we should all rest together on the bedrock of Principle, and let our edifices rise safe and secure on that basis. Then with growing assurance of agreement among brethren, there will come the sense of power.

It is worth while to remember the fable of the bundle of sticks, whereby the father wished to leave with his sons the thought of wisdom. The fagots were bound in a bundle and he bade one of his sons after another to break them, which not one of them could do. Then he had them untie the bundle and take the sticks one by one, when of course they were easily broken. If Christian Scientists become touched with pride of opinion and the vanity of being different, then that which is adverse to the progress of the kingdom of heaven will tempt and discourage them, separating them from the power of unity with the whole. But if they stand as one with a noble and self-denying effort for the coming of the kingdom of heaven to bless all mankind, their power in agreement will be impregnable, and that which they pray for will come swiftly.

WILLIAM P. McKENZIE.

## Discernment and Judgment

As students of Christian Science we rejoice in knowing the allness of God, good,—the ever presence and all-power of Truth and Love. This is really the rock of ages upon which we may rest secure; but it remains with us to prove this truth in all we think, and say, and do. On page 215 of "Miscellaneous Writings" Mrs. Eddy says: "My students are at the beginning of their demonstration; they have a long warfare with error in themselves and in others to finish, and they must at this stage use the sword of Spirit." In referring to Christ Jesus she adds: "If you would follow in his footsteps, you must not try to gather the harvest while the corn is in the blade, nor yet when it is in the ear; a wise spiritual discernment must be used in your application of his words and inference from his acts, to guide your own state of combat with error." At all stages of our progress, but perhaps especially at the present time, this wise spiritual discernment is needed, for without it we are apt to plead for a false sort of peace and to miss the application of the "righteous judgment" which the Master insisted upon.

Those outside of Christian Science sometimes mistakenly suppose that because the nothingness of error is insisted upon, there is therefore no particular moral standard to be observed, but nothing could be farther from the fact. It is, therefore, highly important that Christian Scientists not only express themselves clearly when speaking upon any human problem, but that they also give evidence in their lives of keen discernment of the demands of Truth and a righteous judgment which is satisfied with nothing less than absolute obedience to the requirements of Principle. When the Christian Scientist speaks charitably of anyone, he does not by any means imply that whatever the individual's conduct may be he is all right anyway; but he does know that man as expressing the divine idea obeys God's law because he

Digitized by Google

loves it and sees that anything short of this obedience can never bring harmony to the individual or to mankind.

In the third chapter of Malachi are some of the most important statements to be found in all of the Old Testament prophecy. The uncovering of sorcery, impurity, and injustice of every sort is declared in the strongest terms, and this is followed by the demand that we bring "all the tithes into the storehouse." Until this uncovering comes we none of us know how to render unto God, divine Principle, all that belongs to God, and so we miss the divine outpouring of blessing, which is so great "that there shall not be room enough to receive it." If we are ever tempted to doubt the immediateness of the divine judgment, we only need to turn to the statement in this third chapter of Malachi that God will be "a swift witness" against all evil doers; and then we are further told that He will "rebuke the devourer" to such an extent that even the fruits of the ground will be divinely protected. Here we must never forget to guard against the darkening effect of murmuring and complaining, for this is to blame God for the discords of mortal experience.

It is well at this point to note the requirement found in the last verse of this chapter,—"Then shall ye return, and discern between the righteous and the wicked, between him that serveth God and him that serveth him not." We must not, however, under any circumstances make this an occasion for the personal condemnation of anyone. If our spiritual discernment shows us that certain things are wrong, we must ourselves prove that we desire to be at any cost right ourselves; and it also rests with us to prove that because of the absolute justice of divine law, we can never suffer from another's mistakes or sins.

All this brings us to the question of judgment. Not so long ago people in general, including religious people, believed that judgment would be passed upon them at a future period, either at death or when the whole human race was arraigned before the bar of divine justice. In Christian Science, however, we come to see that the judgment of Truth upon error is a continuous process in which we are all partakers. On page 291 of "Science and Health with Key to the Scriptures" we read: "No final judgment awaits mortals, for the judgment-day of wisdom comes hourly and continually, even the judgment by which mortal man is divested of all material error. As for spiritual error there is none." This last statement brings us boundless comfort, for it shows us that when spirituality takes the place of material belief for us, error will have no place in our consciousness.

Meanwhile, our unceasing aim must be to judge righteous judgment in all the questions which confront us, whether individual, national, or international. In other words, we must strive to judge from the standpoint of divine wisdom, and know that our judgment is doing something to effect the final annihilation of all error. As the result of spiritual discernment and true judgment, we shall be ready to hear this sentence of omnipotent Love and wisdom: "Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world."

ANNIE M. KNOTT.

## "Thy holy hill"

ACCORDING to the psalmist, dwelling "in thy holy hill" is a spiritual state reserved for him "that walketh uprightly, and worketh righteousness, and speaketh the truth in his heart." Living on a material hill does not make one better, and unless individuals have the right idea they will get no lessons from the hills. Yet Scripture is constantly referring to hills and mountains, thus pointing to an important spiritual significance. Moses went up into the mount to receive the Ten Commandments, Jesus preached his immemorial Sermon on the Mount and was transfigured on a mount, and Paul addressed the Athenians about their unknown god and his own known God from Mars Hill. It is natural for the spiritually minded to exclaim with the psalmist, "I will lift up mine eyes unto the hills, from whence cometh my help." The Christian Scientist who has stood on Bow Hill and at Pleasant View is made glad to think that Mary Baker Eddy spent so much of her earthly life in high places graced by noble prospects and far visions.

When spiritually interpreted, hills have a tendency to turn thought upward, to produce mental elevation by symbolizing strength, exaltation, and endurance. In that wonderful analysis of creation which Mrs. Eddy has given us in the chapter entitled "Genesis" in her book "Science and Health with Key to the Scriptures," she states (p. 511), "Spiritually interpreted, rocks and mountains stand for solid and grand ideas." Such mountains are indeed hills of God, the high places of true worship, secret places of the Most High, rising above earth's mists into the pure air of God's kingdom. To be "poor in spirit," to be meek, to "hunger and thirst after righteousness," to be merciful and "pure in heart," and to be a peacemaker are all qualities which prepare one to rise into the hills of God and learn of His "solid and grand ideas."

Christian Science teaches the spiritual reality of God's everlasting hills. That God is good is one of these unshakable ideas founded upon the rock of ages. This idea, when it falls upon the erroneous belief that God can display transitory human qualities, grinds that belief into the powder of nothingness. That God's man is made in God's image and likeness and hence is wholly good is another solid and grand idea upon which one can lean in the hour of trial. The soldier at the front may pillow his head upon it and, like Jacob of old, have the vision of a ladder with the angels ascending and descending upon it. This imperishable idea can be a life-saver to those at sea attacked by hidden undersea foes. It comforts anxious parents, feeds the fatherless and widows, supplies shelter for the homeless, clothes the forlorn, rejoices receptive minds, stills the questionings of would-be philosophers, and makes the worldly-wise like unto little children.

That character is safe which is built upon the rock upon which Jesus said he would build his church, upon the spiritual understanding of man's real nature,—"and the gates of hell shall not prevail against it." To be spiritually in the heights permits the dust to return unto dust, vanquishes that which is "of the earth, earthy," and makes the clouds servants of the most high God. The vapors lie below, separating from the world those who are obeying the call to come out and be separate; or else the clouds wrap them about in a protecting mantle so that they may receive the spiritual import of the Ten Commandments and the Beatitudes, and rejoice in the beauty of mount Zion and the daughter of Zion. To be thus lifted up is to draw all men unto the Christ, Truth, to encourage humanity to brave the dangers, discouragements, and fatigues of the climb, to cheer the faint-hearted, to satisfy the thirsty ones, and to lengthen the vision so that it can never again be shortened.

In an exquisite allegory Mrs. Eddy has used the incidents of a mountain climb to illustrate spiritual progress. These are the opening words of this allegory (Miscellaneous Writings, p. 323): "Picture to yourself 'a city set upon a hill,' a celestial city above all clouds, in serene azure and unfathomable glory: having no temple therein, for God is

Digitized by Google

the temple thereof; nor need of the sun, neither of the moon, for God doth lighten it. Then from this sacred summit behold a Stranger wending his way downward, to where a few laborers in a valley at the foot of the mountain are working and watching for his coming."

The "Stranger," recognized as the Christ, Truth, leads the obedient and ready into the heights by an ascent which to human sense may seem at times to be rugged, but which leads, through heavenly aspirations and scientific demonstrations, to the spiritual New Jerusalem, "set upon a hill," established forever in fadeless beauty and harmony.

WILLIAM D. MCCRACKAN.

# Among the Churches

## Current Notes

SACRAMENTO, CAL.—The handsome new edifice of Second Church of Christ, Scientist, 2828 Thirty-third Street, Oak Park, is completed, and opening services will be held next Sunday [July 7]. The auditorium will seat four hundred and fifty, the balcony one hundred and sixty, and the reading and directors' rooms in the front of the church are constructed so as to open into the main auditorium, giving additional seating capacity of two hundred when needed. The total cost of the lot and structure is fifteen thousand dollars.

Second Church of Christ, Scientist, was organized in November, 1914, by a small band of faithful workers who were sent out from First Church in order to establish a church for the convenience of members in Curtis Oaks and Oak Park. Services were held in a residence remodeled for that purpose at Third and Center Streets. Later they were held in Muddox Hall, Oak Park, while for the past eighteen months Sunday and Wednesday evening services have been held in the Tuesday Clubhouse.—*The Union.*

GREELEY, COL.—First Church of Christ, Scientist, will hold services to-day [July 7] for the first time in its new church, which has just been completed. The building is of the bungalow style. The edifice and the ground upon which it stands are valued at nearly ten thousand dollars. Of this amount a large part has been paid, and it is expected that the church will be entirely free of debt within a month. The building occupies a spacious site at Eighth Avenue and Fourteenth Street across from the new high school.

*Rocky Mountain News.*

VENTURA, CAL.—First Church of Christ, Scientist, held its dedicatory service on Sunday morning, June 9.

✧ ✧ ✧

# The Lectures

NEW YORK, N. Y. (Society, Columbia University).—Ezra W. Palmer, lecturer; introduced by Mrs. Josephine M. Fabricant, who said in part:—

There is a verse in the fourth chapter of Proverbs which makes a strong appeal to a student: "Wisdom is the principal thing; therefore get wisdom: and with all thy getting get understanding." Most of us here know what it is to burn the midnight oil, to spend hours upon hours in the accumulation of knowledge from books, and we are very grateful indeed to the beloved institution within whose walls we are gathered to-night for the privileges accorded us of obtaining this knowledge. But there comes a time in the life of every one of us when human knowledge is found to be utterly insufficient to bear us through some great crisis, when we look upon all the treasures of mortal thought which we so patiently and laboriously gathered, and find that we have "nothing but leaves."

We do want to get wisdom; we do feel the need of understanding, an understanding of the realities of life so that we may rest "undisturbed amid the jarring testimony of the material senses" as our textbook, "Science and Health with Key to the Scriptures," so beautifully puts it on page 306. Never has the need for understanding been more imperative than it is at the present time, when the whole world seems to be passing through a maelstrom of strife and discord and hate and fear. It remained for a gentle woman, Mrs. Eddy, a student of that greatest of all books, the Bible, to discover and point out the way to the source of all true wisdom and understanding.

ALHAMBRA, CAL. (First Church).—Virgil O. Strickler, lecturer; introduced by J. C. Graves, who said in part:—

Mankind is rapidly being aroused from its mental lethargy to a realization of the fact that the results of right or wrong thinking are manifested in our health and business, our conduct toward our fellow men, and in fact our entire existence. With this awakening has come the conviction that there is something vitally wrong with the thinking which has produced the condition confronting the world to-day. There has been a world-wide reaching out for an explanation of and for relief from this condition, and those who have turned to Christian Science have been wonderfully enlightened and comforted. The Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, states (p. 83): "Science only can explain the incredible good and evil elements now coming to the surface. Mortals must find refuge in Truth in order to escape the error of these latter days."

ST. PETERSBURG, FLA. (First Church).—Paul Stark Seeley, lecturer; introduced by F. R. Francke, who said in part:—

The greatest need of the world to-day is for the expression of more love, not love as we ordinarily conceive it in its narrow, restricted sense, but the love which possesses the quality of embracing all mankind, the love which gives and gives and gives without a demand for return. It is the love which is conveyed by the words, "God is love." Since God is Love, then Love is God; consequently the world needs to know more about God and the relationship of man to Him. Christian Science is a religion of Love.

*St. Petersburg Times.*

WINNIPEG, MANITOBA, CANADA (First Church).—George Shaw Cook, lecturer; introduced by M. A. Muldrew, who said in part:—

Christian Science is the truth our Master taught and demonstrated nearly two thousand years ago, when he healed the sick, gave sight to the blind and hearing to the deaf, raised the dead, and walked on the water; and Christian Science is bringing into the lives of unnumbered thousands its healing influence, giving them a better understanding of man and of his relation to God, divine Principle. The Master said, "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free." He also commanded his disciples, "Go ye into all the world, and preach the gospel to every creature;" "Heal the sick." Christian Science is doing in some measure the work our Master did by healing the sick, binding up the brokenhearted, comforting the sorrowing; and there never was a

Digitized by Google

time in the world's history when this truth was needed more than it is to-day.

MARQUETTE, MICH. (First Church).—Dr. Walton Hubbard, lecturer; introduced by J. E. Lautner, who said in part:—

Did not the angels who announced the birth of Jesus proclaim, "On earth peace, good will toward men"? And did not Jesus sum up his teachings succinctly when he said: "Thou shall love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. . . . Thou shalt love thy neighbour as thyself"? Yet, to the testimony of the material senses, just the opposite of this teaching seems to be true in the world to-day. Christian Science offers an explanation for this seeming contradiction. By a truly scientific interpretation of the life and works of our Master, Christ Jesus, it shows how all evil, including sin, sickness, and death, will finally be destroyed. These evils are no part of God, and since man, according to Scripture, is made in the image and likeness of God, these evils cannot be a part of the real, spiritual, indestructible man.

DAYTON, OHIO (Second Church).—William W. Porter, lecturer; introduced by William C. Milloway, who said in part:—

Jesus startled the age in which he lived by the assertion that he knew God. It is recorded in the gospels that he said, "Ye have not known him; but I know him," and he gave proof of this knowing by the destruction of the works of evil,—sin, disease, and even death. Through Mrs. Eddy's marvelous discovery of the same spiritual law which Jesus demonstrated, the world has again been startled by the declaration that all may know God.

PITTSBURGH, PA. (First Church).—William D. Kilpatrick, lecturer; introduced by Wallace H. Burnett, who said in part:—

Inasmuch as most of you are presumably business people, this lecture is intended to be and should be of service to you through showing that Christian Science includes within its scope of healing the overcoming of inharmonious and discordant business conditions as well as the overcoming of sickness and sin, because it recognizes God as the one all-harmonious Mind, in which there are only the conditions of good.

KANSAS CITY, MO. (First Church).—John Randall Dunn, lecturer; introduced by Seth H. Leach, who said in part:—

To-day the whole world is torn and distressed by a great war that is the result of wrong thinking, and the only way to correct this is by spiritually scientific thinking, which first must be individual thinking. Christian Science is teaching mankind how to have that Mind "which was also in Christ Jesus;" and in the degree that we do possess this Mind we are able to demonstrate it by healing the sick and overcoming error and discords of every kind.

COLORADO SPRINGS, COL. (First Church).—Ezra W. Palmer, lecturer; introduced by Mrs. Effie Louisa Benjamin, who said in part:—

In John we read, "Search the scriptures; for in them ye think ye have eternal life: and they are they which testify of me." This is the message Christian Science is giving to an awakening world, a world indeed awakening to know that "one thing is needful,"—a better understanding of God. Many who never before read the Bible enjoy reading it after being spiritually awakened through some understanding of Christian Science. Those to whom the Bible promises have been precious find that these same promises have an enlarged and practical value in the now, the present moment, bringing healing to the sick and the sorrowing, as well as regeneration to the sinner.

RIPON, WIS. (Society).—Virgil O. Strickler, lecturer; introduced by Arthur E. Steinbring, who said in part:—

Christian Science is often called a religion of happiness, and it is teaching many by the wayside that God is Love, that He is "a very present help in trouble," and that "in him we live, and move, and have our being." The followers of this Science receive and maintain their happiness and health by striving daily to let this Mind be in them "which was also in Christ Jesus," for Jesus promised, "He that believeth on me, the works that I do shall he do also," and his works were the preaching of the gospel, the saving of the sinner, and the healing of the sick. We who have received benefits from Christian Science certainly find it good, and as we apply the teachings there is brought into our lives more happiness, peace, joy, health, and an increased ability to do good.

NEW BEDFORD, MASS. (First Church).—Paul Stark Seeley, lecturer; introduced by Walter R. Mitchell, who said in part:—

It has been the grand mission of Christian Science to interpret and to prove by its works among mankind in this our own age, which boasts of its vast scientific achievements, that the profoundest and most practical of all sciences is to be found in the teachings of Christ Jesus as given in the Bible; for these teachings alone enable us to grasp the understanding of the eternal laws of God, which, because they are themselves eternal truth, are just as operative to benefit and heal now as when Jesus and his disciples demonstrated their efficacy nineteen hundred years ago.—*New Bedford Times.*

BRANTFORD, ONTARIO, CANADA (First Church).—Charles I. Ohrenstein, lecturer; introduced by Mrs. S. N. Ewald, who said in part:—

Christ Jesus, our great Way-shower, once said, "Come unto me, all ye that labour and are heavy laden, and I will give you rest." To-day Christian Science says to those who are weary and heavy-laden, to those who are burdened with the cares, trials, and sorrows of this mortal life, Come unto a right understanding of God and of man's relation to God, and this understanding will give you rest.

## Lectures to be Delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

ARIZONA—Prescott: Elks Opera House, 3 p.m., Sept. 1.

CANADA—Toronto, Ontario (First Church): Massey Music Hall, Shuter and Victoria Streets, 3 p.m., Sept. 1.

COLORADO—Colorado Springs: Burns Theater, 3 p.m., Sept. 1.
Longmont: 3 p.m., Aug. 25.

ENGLAND—Eastbourne, Sussex: Gallery Kinema, 53c Terminus Road, 3:30 p.m., Sept. 22.
York, Yorkshire: Albany Hall, Goodramgate, 7:30 p.m., Sept. 30.

IDAHO—Grangeville: I. O. O. F. Hall, 8:30 p.m., Sept. 2.

MISSOURI—Webb City: High School Auditorium, 8 p.m., Aug. 30.

NEW MEXICO—Roswell: Masonic Temple, Fourth and Pennsylvania Avenue, 8 p.m., Sept. 3.

NEW YORK—East Aurora: Universalist Church, Main Street, corner Maple, 8:15 p.m., Aug. 30.
Niagara Falls: Y. W. C. A. Auditorium, Main and Fourth Streets, 8 p.m., Sept. 3.

PENNSYLVANIA—Johnstown: Cambria Theater, 337 Main Street, 3 p.m., Sept. 1.

RHODE ISLAND—Providence: Strand Theater, 4 p.m., Sept. 1.

Digitized by Google

# Testimonies of Healing

I have received so much help and encouragement from the testimonies in our periodicals that I feel I should try to express my gratitude for all the help Christian Science has been to me, especially during the past five years. I was a severe sufferer from rheumatism and also from a very bad stomach trouble which affected my head. I had been in two hospitals and under the care of three specialists but was given up. I was not expected to get better, and it was thought likely that I would lose my mind. Some travelers who came to our store were Christian Scientists, and several times they spoke to me about their religion. Finally I consented to have treatment, but it seemed to take me some time to grasp Christian Science, and after several months the practitioner said she could not help me any more, as there was something I was holding back. After six months' treatment I went back to the doctors, but got worse every day and found no relief, so decided to take up Science again. It was not long before I experienced great relief, and after a few treatments the practitioner said I did not need treatment any longer. I was then in a little doubt, but I clung to the truth as given in "Science and Health with Key to the Scriptures" by Mrs. Eddy, and am now pleased to testify that I have overcome all my sickness and doubts. I have not had any return of past ailments during the last five years. Christian Science has not only proved a great help physically but has been a great blessing spiritually, and all desire for smoking has been overcome. I therefore feel grateful for the noble work which our revered Leader, Mrs. Eddy, has done for me and for the whole world.

I also wish to say that I have found my understanding of this truth a great help since joining the Army over two years ago and especially since coming to France. There has been some very trying weather out here and if I had not had a demonstrable knowledge of God I would not have been able to continue in good health. I get wonderful help through the ninety-first psalm and in the singing of the hymns, "Shepherd, show me how to go," and "Blest Christmas Morn" by Mrs. Eddy. I receive great blessings also from the *Sentinel* and *Monitor* which are sent to me by First Church of Christ, Scientist, in Toronto. I trust that these few remarks may do some reader good. I would not give up Christian Science for all the world.

PRIVATE W. A. REDFERN, B. E. F., France.

✧

Some years ago while feeling very weak and depressed, with a sense of utter failure and inability to be happy for long at a time, or to live what I thought to be the life of a true Christian, I cried out to one in the home that I knew I could never be either happy or well until I could love God more. A short time after this a friend called upon me and told me something about Christian Science and of how it had helped her to overcome sorrow. While she was speaking I exclaimed, "Why, that is just what I want!" I at once took up the study of the Bible with the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and learned that the cry of my hungry heart had really been a prayer, and that it had been answered in this beautiful way through divine Love.

The first improvement I noticed was, that I began to think less about myself and a little more about the welfare of others; for I began to see that even my best efforts had previously been largely instigated and governed by selfishness. The earnest desire to be good, happy, and well obtained its reward; for selfishness and self-righteousness gradually yielded to the action of Truth, and physical healing in various ways followed. During the first year or so of study, with the occasional help of Christian Science friends, I found myself entirely freed from severe attacks of neuralgic headache from which I had suffered every few weeks for fifteen years. Later on I discovered that an internal disarrangement, which had been supposed to be the cause of the headaches, had yielded to the truth. A very hasty temper, jealousy, and false appetite have also been overcome, and I am humbly and truly grateful; but the greatest joy of all is the true knowledge of God which has come to me and which is presented for all to accept who will, through our beloved Leader's beautiful and clear spiritual understanding of the works and teachings of Christ Jesus and of the Scriptures.

I can honestly say that Christian Science has never failed me when faithfully practiced and lived; and the truth of the Scriptural promise, "Before they call, I will answer," has been proved to me many times. In Science and Health (p. 206) Mrs. Eddy says: "The exercise of the sentiments —hope, faith, love—is the prayer of the righteous. This prayer, governed by Science instead of the senses, heals the sick."—(Mrs.) SARAH ELIZABETH COX, Handsworth Wood, Birmingham, England.

✧

It is with the greatest pleasure that I testify to the saving power of Truth as demonstrated in Christian Science; truly, indeed, if we know the truth, the truth does make us free. One morning I awoke to find the whole side of my face paralyzed. Fear tried to get possession of me, but I knew that this discord was not in God's child. I could not eat properly and had to swallow my food without chewing, also in drinking I had to throw my head well back to get the liquid down my throat. A Christian Science friend treated me, but still the manifestation did not go. I received new courage, however, and went on treating myself. Just a fortnight afterward I awoke one morning early to find that I was free; and oh, the joy I felt, and the gratitude to God and to our dear Leader for a knowledge of the truth.

I wish to express my deepest thankfulness to God for many other demonstrations which I have had since coming into Christian Science; and with the psalmist I sing, "Bless the Lord, O my soul, and forget not all his benefits." How truly we all can as loyal students of Christian Science continually give thanks to our beloved Leader, Mrs. Eddy, for her untiring love and her work in mankind's behalf.

LAURENCE HAROLD FARLEY, Auckland, New Zealand.

✧

I wish to express my gratitude for my healing from the effects of an automobile accident. On turning a curve in the road the car skidded into a telephone pole, throwing me out into a ditch. I was unable to move, so friends called for an ambulance and I was taken to the hospital. X-ray pictures were taken to locate the injury. It was found that the socket of the thigh bone had been shattered and the bone forced through the pelvic bone, breaking it in four places. The hip was also broken.

To mortal sense it was a very severe accident. I was placed in a cast, and forty pounds of weight were attached to the injured leg. The next day I called a Christian Science practitioner, as the verdict of the doctors was that I would be crippled for life and probably never able to walk again.

Digitized by Google

Hypodermic injections were used to make me sleep, but after Christian Science treatment was begun these were not necessary. I suffered no pain, and there were no signs of inflammation. I ate and slept well, and was bright and cheerful during the six weeks I was in the hospital. The accident occurred on May 21, and the doctors told me I would not be able to be up until the first of the following January; but four months before that time I resumed my position as dental nurse and feel better than before the accident. I have suffered no ill effects, and walk perfectly. My recovery was nothing short of miraculous to every one who knew of my case.

I am thankful to know that the truth heals even though human knowledge affirms the case to be fatal. It is with a grateful heart that I send this testimony.

(Miss) FRANCES E. KIMMELL, Los Angeles, Cal.

The above testimony written by my daughter I can fully corroborate; it has been a wonderful help to us all and I hope it may be to others. Since I became interested in Christian Science I have had many convincing proofs of the healing power of Truth. I had only read Science and Health about three weeks when I was healed of neuralgia and bowel trouble of long standing. I did not understand much of what I was reading, so my healing proved our Leader's statement on page 152 of Science and Health, "Truth has a healing effect, even when not fully understood." Since then many instantaneous healings have been experienced. In one instance a so-called cystic tumor disappeared overnight after applying the truth as taught in Christian Science. I have also been healed of influenza and typhoid fever, the latter in one treatment from a practitioner. Many other ailments have been overcome through knowing the truth. My thankfulness is indeed great.—(Mrs.) GERTRUDE K. JOHNSON.

✧

When my progress in Christian Science seems slow, and the road to understanding long, I have only to remember the numberless blessings which have come to me and to mine, to realize that my dearest possession is the never failing Science of Life, Truth, and Love. This acknowledgment of my gratitude should have been made long ago.

One Saturday morning some years ago my sister swallowed a black pin two inches in length. We were quite new in Christian Science, but it did not even occur to us to seek other than divine help, although the pin lodged in the throat. As our own understanding of the truth did not seem sufficient to still all fear, my mother took her at once to a practitioner who has helped us over many rough places. As a result of this visit they returned home feeling much less fearful. The following day my sister attended Sunday school and church, and the next three days she went to school as usual. Although she coughed slightly and could feel the pin in her throat, she was able to eat and sleep, and she did not suffer in any way. On Wednesday night she attended the church service, and there talked with the practitioner. Again she returned home with all fear dismissed. The following morning, shortly after rising, she felt faint and threw herself face down across the bed. The pin slipped easily from her throat and out of her mouth. She suffered no further ill effect whatever. For this wonderful demonstration of the power of Truth we can never cease to be grateful.

Last winter, with the help of the practitioner, my mother was healed of acute lung trouble. She has also been completely healed of nervous prostration. Another sister has laid aside glasses, which she had worn since childhood. Among many other ills I have been healed of rheumatism in several of its most severe forms. My earliest recollections are those of suffering, and my fear of the almost yearly attacks was intense, but I have been entirely healed through Christian Science, and for almost six years there has been no return of the trouble. On moving a few months ago from my home in a high and dry western city to a damp eastern climate, I allowed a little of the old fear to creep in, but through the study of the Bible and "Science and Health with Key to the Scriptures" it was quickly overcome. In this overcrowded city where great difficulty is experienced in finding a place in which to live, divine Love has supplied our need.

For these and many other demonstrations of the healing power of Christian Science I give thanks to God, and feel deeply grateful to Mrs. Eddy. Above all else I am grateful for the peace and harmony which have come into my life and into the lives of those dearest to me.

(Mrs.) RUTH MENKE DOUDEN, Washington, D. C.

✧

Great and lasting benefits having come to me through the application of Christian Science, it is with much pleasure and gratitude that I add my testimony to its healing power. About seven years ago I was healed of lung trouble by Christian Science, and since that time my health has been better than it ever was before. Some ten years prior to my healing, a physician in this city after an examination said my right lung was beginning to decay, and a few years later a doctor told me I had tubercular glands and that I had better give up office work and get some kind of outdoor employment, or go into the country; but owing to financial conditions I could not leave my position. That was the darkest hour of my life. Now that I have good health, I say with all my heart, thank God for Christian Science.

I have also been healed of the liquor habit. The male members on both sides of my family were in bondage to this habit, and though I tried a number of times to quit drinking, it was no use until Christian Science healed me. These healings, and a wonderful spiritual and moral regeneration, are priceless blessings to me, and I am indeed thankful to God that I was led to this beautiful and healing truth. No one can have derived such great benefits as these without experiencing deep gratitude to and love for our revered Leader, Mrs. Eddy. My heart goes out in gratitude to her for her Christlike life. I also wish to express my gratitude for the consideration shown me by the Christian Scientists I have known. God bless them every one.

EDWARD F. VAUGHAN, Chicago, Ill.

✧

For some time I have wanted to express my gratitude for the blessings my family and I have received through Christian Science. During the eleven years of our growth in understanding of this wonderful truth about God and man's relation to Him, we have had many proofs of its protecting power. When first coming into Christian Science I was healed of the necessity of wearing glasses, after having worn them since childhood. This healing came through just reading part of the chapter on Prayer in our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. I am very grateful for another healing which occurred about a year ago. After childbirth there was a very pronounced case of what is called uræmic poisoning, so alarming that the attending physician gave little hope of recovery and wanted to inject a serum. This serum, he stated, would do no good, as I was beyond medical aid, but in case of death he would

# Testimonies of Healing

I have received so much help and encouragement from the testimonies in our periodicals that I feel I should try to express my gratitude for all the help Christian Science has been to me, especially during the past five years. I was a severe sufferer from rheumatism and also from a very bad stomach trouble which affected my head. I had been in two hospitals and under the care of three specialists but was given up. I was not expected to get better, and it was thought likely that I would lose my mind. Some travelers who came to our store were Christian Scientists, and several times they spoke to me about their religion. Finally I consented to have treatment, but it seemed to take me some time to grasp Christian Science, and after several months the practitioner said she could not help me any more, as there was something I was holding back. After six months' treatment I went back to the doctors, but got worse every day and found no relief, so decided to take up Science again. It was not long before I experienced great relief, and after a few treatments the practitioner said I did not need treatment any longer. I was then in a little doubt, but I clung to the truth as given in "Science and Health with Key to the Scriptures" by Mrs. Eddy, and am now pleased to testify that I have overcome all my sickness and doubts. I have not had any return of past ailments during the last five years. Christian Science has not only proved a great help physically but has been a great blessing spiritually, and all desire for smoking has been overcome. I therefore feel grateful for the noble work which our revered Leader, Mrs. Eddy, has done for me and for the whole world.

I also wish to say that I have found my understanding of this truth a great help since joining the Army over two years ago and especially since coming to France. There has been some very trying weather out here and if I had not had a demonstrable knowledge of God I would not have been able to continue in good health. I get wonderful help through the ninety-first psalm and in the singing of the hymns, "Shepherd, show me how to go," and "Blest Christmas Morn" by Mrs. Eddy. I receive great blessings also from the *Sentinel* and *Monitor* which are sent to me by First Church of Christ, Scientist, in Toronto. I trust that these few remarks may do some reader good. I would not give up Christian Science for all the world.

PRIVATE W. A. REDFERN, B. E. F., France.

✧

Some years ago while feeling very weak and depressed, with a sense of utter failure and inability to be happy for long at a time, or to live what I thought to be the life of a true Christian, I cried out to one in the home that I knew I could never be either happy or well until I could love God more. A short time after this a friend called upon me and told me something about Christian Science and of how it had helped her to overcome sorrow. While she was speaking I exclaimed, "Why, that is just what I want!" I at once took up the study of the Bible with the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and learned that the cry of my hungry heart had really been a prayer, and that it had been answered in this beautiful way through divine Love.

The first improvement I noticed was, that I began to think less about myself and a little more about the welfare of others; for I began to see that even my best efforts had previously been largely instigated and governed by selfishness. The earnest desire to be good, happy, and well obtained its reward; for selfishness and self-righteousness gradually yielded to the action of Truth, and physical healing in various ways followed. During the first year or so of study, with the occasional help of Christian Science friends, I found myself entirely freed from severe attacks of neuralgic headache from which I had suffered every few weeks for fifteen years. Later on I discovered that an internal disarrangement, which had been supposed to be the cause of the headaches, had yielded to the truth. A very hasty temper, jealousy, and false appetite have also been overcome, and I am humbly and truly grateful; but the greatest joy of all is the true knowledge of God which has come to me and which is presented for all to accept who will, through our beloved Leader's beautiful and clear spiritual understanding of the works and teachings of Christ Jesus and of the Scriptures.

I can honestly say that Christian Science has never failed me when faithfully practiced and lived; and the truth of the Scriptural promise, "Before they call, I will answer," has been proved to me many times. In Science and Health (p. 206) Mrs. Eddy says: "The exercise of the sentiments —hope, faith, love—is the prayer of the righteous. This prayer, governed by Science instead of the senses, heals the sick."—(Mrs.) SARAH ELIZABETH COX, Handsworth Wood, Birmingham, England.

✧

It is with the greatest pleasure that I testify to the saving power of Truth as demonstrated in Christian Science; truly, indeed, if we know the truth, the truth does make us free. One morning I awoke to find the whole side of my face paralyzed. Fear tried to get possession of me, but I knew that this discord was not in God's child. I could not eat properly and had to swallow my food without chewing; also in drinking I had to throw my head well back to get the liquid down my throat. A Christian Science friend treated me, but still the manifestation did not go. I received new courage, however, and went on treating myself. Just a fortnight afterward I awoke one morning early to find that I was free; and oh, the joy I felt, and the gratitude to God and to our dear Leader for a knowledge of the truth.

I wish to express my deepest thankfulness to God for many other demonstrations which I have had since coming into Christian Science; and with the psalmist I sing, "Bless the Lord, O my soul, and forget not all his benefits." How truly we all can as loyal students of Christian Science continually give thanks to our beloved Leader, Mrs. Eddy, for her untiring love and her work in mankind's behalf.

LAURENCE HAROLD FARLEY, Auckland, New Zealand.

✧

I wish to express my gratitude for my healing from the effects of an automobile accident. On turning a curve in the road the car skidded into a telephone pole, throwing me out into a ditch. I was unable to move, so friends called for an ambulance and I was taken to the hospital. X-ray pictures were taken to locate the injury. It was found that the socket of the thigh bone had been shattered and the bone forced through the pelvic bone, breaking it in four places. The hip was also broken.

To mortal sense it was a very severe accident. I was placed in a cast, and forty pounds of weight were attached to the injured leg. The next day I called a Christian Science practitioner, as the verdict of the doctors was that I would be crippled for life and probably never able to walk again.

Digitized by Google

Hypodermic injections were used to make me sleep, but after Christian Science treatment was begun these were not necessary. I suffered no pain, and there were no signs of inflammation. I ate and slept well, and was bright and cheerful during the six weeks I was in the hospital. The accident occurred on May 21, and the doctors told me I would not be able to be up until the first of the following January; but four months before that time I resumed my position as dental nurse and feel better than before the accident. I have suffered no ill effects, and walk perfectly. My recovery was nothing short of miraculous to every one who knew of my case.

I am thankful to know that the truth heals even though human knowledge affirms the case to be fatal. It is with a grateful heart that I send this testimony.

(Miss) FRANCES E. KIMMELL, Los Angeles, Cal.

The above testimony written by my daughter I can fully corroborate; it has been a wonderful help to us all and I hope it may be to others. Since I became interested in Christian Science I have had many convincing proofs of the healing power of Truth. I had only read Science and Health about three weeks when I was healed of neuralgia and bowel trouble of long standing. I did not understand much of what I was reading, so my healing proved our Leader's statement on page 152 of Science and Health, "Truth has a healing effect, even when not fully understood." Since then many instantaneous healings have been experienced. In one instance a so-called cystic tumor disappeared overnight after applying the truth as taught in Christian Science. I have also been healed of influenza and typhoid fever, the latter in one treatment from a practitioner. Many other ailments have been overcome through knowing the truth. My thankfulness is indeed great.—(Mrs.) GERTRUDE K. JOHNSON.

✧

When my progress in Christian Science seems slow, and the road to understanding long, I have only to remember the numberless blessings which have come to me and to mine, to realize that my dearest possession is the never failing Science of Life, Truth, and Love. This acknowledgment of my gratitude should have been made long ago.

One Saturday morning some years ago my sister swallowed a black pin two inches in length. We were quite new in Christian Science, but it did not even occur to us to seek other than divine help, although the pin lodged in the throat. As our own understanding of the truth did not seem sufficient to still all fear, my mother took her at once to a practitioner who has helped us over many rough places. As a result of this visit they returned home feeling much less fearful. The following day my sister attended Sunday school and church, and the next three days she went to school as usual. Although she coughed slightly and could feel the pin in her throat, she was able to eat and sleep, and she did not suffer in any way. On Wednesday night she attended the church service, and there talked with the practitioner. Again she returned home with all fear dismissed. The following morning, shortly after rising, she felt faint and threw herself face down across the bed. The pin slipped easily from her throat and out of her mouth. She suffered no further ill effect whatever. For this wonderful demonstration of the power of Truth we can never cease to be grateful.

Last winter, with the help of the practitioner, my mother was healed of acute lung trouble. She has also been completely healed of nervous prostration. Another sister has laid aside glasses, which she had worn since childhood. Among many other ills I have been healed of rheumatism in several of its most severe forms. My earliest recollections are those of suffering, and my fear of the almost yearly attacks was intense, but I have been entirely healed through Christian Science, and for almost six years there has been no return of the trouble. On moving a few months ago from my home in a high and dry western city to a damp eastern climate, I allowed a little of the old fear to creep in, but through the study of the Bible and "Science and Health with Key to the Scriptures" it was quickly overcome. In this overcrowded city where great difficulty is experienced in finding a place in which to live, divine Love has supplied our need.

For these and many other demonstrations of the healing power of Christian Science I give thanks to God, and feel deeply grateful to Mrs. Eddy. Above all else I am grateful for the peace and harmony which have come into my life and into the lives of those dearest to me.

(Mrs.) RUTH MENKE DOUDEN, Washington, D. C.

✧

Great and lasting benefits having come to me through the application of Christian Science, it is with much pleasure and gratitude that I add my testimony to its healing power. About seven years ago I was healed of lung trouble by Christian Science, and since that time my health has been better than it ever was before. Some ten years prior to my healing, a physician in this city after an examination said my right lung was beginning to decay, and a few years later a doctor told me I had tubercular glands and that I had better give up office work and get some kind of outdoor employment, or go into the country; but owing to financial conditions I could not leave my position. That was the darkest hour of my life. Now that I have good health, I say with all my heart, thank God for Christian Science.

I have also been healed of the liquor habit. The male members on both sides of my family were in bondage to this habit, and though I tried a number of times to quit drinking, it was no use until Christian Science healed me. These healings, and a wonderful spiritual and moral regeneration, are priceless blessings to me, and I am indeed thankful to God that I was led to this beautiful and healing truth. No one can have derived such great benefits as these without experiencing deep gratitude to and love for our revered Leader, Mrs. Eddy. My heart goes out in gratitude to her for her Christlike life. I also wish to express my gratitude for the consideration shown me by the Christian Scientists I have known. God bless them every one.

EDWARD F. VAUGHAN, Chicago, Ill.

✧

For some time I have wanted to express my gratitude for the blessings my family and I have received through Christian Science. During the eleven years of our growth in understanding of this wonderful truth about God and man's relation to Him, we have had many proofs of its protecting power. When first coming into Christian Science I was healed of the necessity of wearing glasses, after having worn them since childhood. This healing came through just reading part of the chapter on Prayer in our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. I am very grateful for another healing which occurred about a year ago. After childbirth there was a very pronounced case of what is called uræmic poisoning, so alarming that the attending physician gave little hope of recovery and wanted to inject a serum. This serum, he stated, would do no good, as I was beyond medical aid, but in case of death he would

Digitized by Google

be able to feel that he had done all he could. My husband and I objected to the use of the serum, so we turned to God, knowing, as we read in the forty-sixth chapter of Psalms, that "God is our refuge and strength, a very present help in trouble." Our faith was justified. The convulsions which the physician predicted did not appear, and in a few hours the terrible swelling had gone to its native nothingness. On the tenth day I was up and dressed.

I want to prove my gratitude to God for His protecting care, of which we are assured each day; and I know that by living this truth and applying my understanding of the divine Principle as taught in Christian Science my progress will be sure. I am happy that I have been considered worthy of being appointed teacher in the Sunday school, and am grateful to Mrs. Eddy, our revered Leader, who has made it possible for humanity to have this understanding of the truth.

(Mrs.) CATHERINE W. HUGHES, Detroit, Mich.

✧

Looking back over the years of suffering and distress due to physical ills, I rejoice in having been freed from bondage through the knowledge of God's goodness as learned by the study of Christian Science. It has been many years since I first heard of this religion, but, like many others, for some time I let it pass without much attention. A little over two years ago I was one of the most miserable and downhearted of women. I felt there was nothing to live for and life seemed all darkness to me, but when Christian Science was brought to me a new light came. I had severe attacks of acute stomach disorder, which finally developed into a chronic trouble. For many years I had to use the greatest care in my food and finally was restricted to a liquid diet. The physicians could do nothing to relieve my great distress, so at last I turned to God and was healed in two treatments through the power of Truth. Later I was healed of blood poisoning in my foot in one treatment. I have also been healed of a skin disease and of minor ills since I came into Christian Science.

Spiritual healings are coming to me every day through the understanding that God is All-in-all. It certainly gives me great happiness to write this testimony, for I know that others will read it and take heart from my experience. I want to be not only a hearer but a doer of the word, and I am daily striving to learn more of this wonderful truth and to live it.—(Mrs.) CARRIE LEMMERT, Bishop, Cal.

✧

In gratitude for Christian Science I submit the following testimony. The understanding of God as a "very present help in trouble" has enabled me to overcome much discord, and when rightly applied has never failed to bring about freedom from the bondage of sin and sickness. One experience which comes to thought is cause for deepest gratitude. While I was looking over a pile of heavy beams that had been the support of an old barn roof and trying to throw off a board from the top of the pile, one of the lower beams loosened and fell out, striking my foot and ankle. There was no thought of fear or accident, but just the knowing of God's power and protection as taught in Christian Science. When the beam had been lifted, I stood up and walked over to the house with no indication of what had happened, except a slight bruise where the beam had struck. Truly God's love for His children is constant and compassionate, and can be demonstrated by all who seek to know Him aright.

I had another proof of God's care some time ago while riding to school on my bicycle. The wheel had caught in a rut in the ground and on being forced out struck a near-by fence. The shock threw me against the fence, with the result that my leg was severely cut on the barbed wire. On my way home I realized the truth of the "scientific statement of being," as given by Mrs. Eddy on page 468 of Science and Health, and by the time I had reached the house much of the soreness and inflammation had disappeared, and I felt no pain. In a few days the leg was entirely normal. Other ailments, such as colds, headaches, and bilious attacks, have vanished into their native nothingness through the realization of God's infinite goodness and love.

More glorious than the physical overcoming is the constant knowing that divine Love provides all good for mankind. The true evidence of our gratitude for what Christian Science teaches is our endeavor to express each day more love for God and our brother man. The healing feast of Truth and Love is free to all who will partake of its bounty. The Scripture states, "Ho, every one that thirsteth, come ye to the waters;" and they who drink of this living water are satisfied and blessed indeed.

(Miss) FLORENCE L. BIHLMAIER, Woodcrest, N. J.

✧

I did not become interested in Christian Science because of any need of physical healing, but the spiritual side of it appealed to me. We have, however, had many demonstrations of the healing power of God.

Late in the autumn of 1916, our little son was stricken with typhoid fever. We tried to meet and overcome the trouble through our own understanding of Christian Science, but as we did not seem to succeed, there being too much fear in my consciousness, we asked a practitioner for help. I am happy to state that the boy was healed in a few days. For this healing and the many benefits we have received since we began to study Christian Science, I am very grateful, and my desire is to show my gratitude by living a pure and upright life.—(Mrs.) S. JONES, Quanah, Texas.

✧

Thanksgiving night I was awakened by an intolerable neuralgic pain in the side of my face. Instantly I began to rely upon healing statements of truth from "Science and Health with Key to the Scriptures" by Mrs. Eddy, as these "angels of His presence," to use the words of our Leader on page 174 of our textbook, came and ministered unto me. After considerable wrestling, thought finally shaped itself into words of thanksgiving to be offered in The Mother Church, where I expected to be the following Wednesday. This mental outpouring of gratitude brought almost immediate relief from pain, and that peace "which passeth all understanding." Many times I had been helped by others' offerings in The Mother Church, but this was the first time I had been prompted to contribute my mite of gratitude to the general fund there.

Formerly I never knew freedom from fear; neither did I know perfect health, nor understand the Bible—that is, in a way to apply its teachings to daily needs. Now God's word, spiritually revealed as it is in Christian Science, is becoming my sole dependence. It has delivered me from many distresses. All winter long colds, intestinal catarrh, chronic headaches,—all have slunk back into their native nothingness. And what do I find in their place? God, good.

The healing and corrective power of each right thought was illustrated for me when I was suddenly attacked with a blinding headache. I reached out for the books, the Bible, Science and Health, and the *Quarterly*, only to find that I could not read. Two thoughts, or longings, came to the rescue as I sank down on the couch: Oh, to love some one

Digitized by Google

more, and to do some holy work! As soon as possible I called on the telephone a girl who had passed through a great sorrow a few weeks before, but I had not known it at the time. My love message to her was a comfort to both of us. I did not feel equal to sitting at the table that night or taking any dinner, but at half past seven I deliberately turned my back on pain and set my face rejoicingly toward Jerusalem, so to speak, for it was Wednesday and I went to our regular testimony meeting, both seeking and finding such a feast as only Love divine knows how to provide. After that a business meeting, and after that a committee meeting, so filled my thoughts that I returned home at eleven, perfectly free. I laughed to think I had ever believed that such a thing as mortals call headache could be real. If it were one of the real and God-given things of life, it would last forever and could not be taken away. Through all the experiences of motherhood, Christian Science has been the only physician. It has protected the family and has overcome all our children's difficulties.

I rejoice in each glimpse of the loveliness, purity, and holiness of the real man, and feel unbounded gratitude to Jesus for pointing out the way for us; also to Mrs. Eddy for explaining it, and to all the faithful workers who are following it.—(Mrs.) LEILA CLOSE HARSCH, Toledo, Ohio.

✧

For many years I suffered from rheumatism and gradually grew worse until absolute helplessness seemed imminent; and as I was obliged to travel to earn my living, the ailment was aggravated. Three Christian Scientists traveled with me a week or two, and their words and works were a light upon my path. Knowing that God could heal and care for all He created, and believing that the Christian Science prayer would be heard immediately, I applied for treatment several months later, and purchased a copy of "Science and Health with Key to the Scriptures." Rheumatism, a throat trouble, and a bowel ailment which had not been mentioned when asking for help, were all overcome in a day or two, and spiritual healing, more precious than all else, also took place at this time. That was over five years ago. Since then there has been a daily growth and more proof of God's loving-kindness. I seemed to be always taking cold. My first year in Christian Science this belief disappeared, and last year I was healed of liver trouble in one treatment.

My debt to God is so great that no words can express how much He has done for me; His love has been always constant. I am grateful for a better understanding of the Bible, the right knowledge of Jesus' life work, also for Mrs. Eddy's wonderful discovery. Only as we take up the cross and follow Christ are we worthy to be called Christian Scientists, and so I am endeavoring to work out my own salvation.—(Mrs.) MARY ENOS BURKE, St. Joseph, Mo.

✧

Having so often been helped and encouraged by the testimonies in the *Sentinel* and *Journal,* I feel the time has come to express my deep gratitude to God for the wonderful truth revealed in Christian Science. For about fifteen years I was in very bad health, a depressed and well-nigh useless woman. All my time was spent in unsuccessfully seeking for health; I was constantly taking medicine and undergoing all sorts of treatments, every new one heard of being tried. Although during those years I consulted twenty-nine doctors, some of the cleverest in London, life continued a burden, from which I often prayed to be delivered.

I never can be grateful enough to the kind friend who took some trouble to bring me a *Sentinel,* and to tell me something of what Christian Science had done for her. I was ready and eager for anything that promised me better health, and although opposed by my family, its study with the help of a practitioner soon proved to be as real a blessing to me as it has been to thousands of other sufferers. It is now nearly eight years since I have used any medicine or material remedy. I am in my seventy-second year, and every organ in my body has been restored to its normal, healthy condition. Life has become a joy once more, and its duties a pleasure. A few months after I turned to Christian Science, friends were remarking on the great change that had taken place, and those who did not see me for two or three years could hardly believe I was the same woman.

This is indeed cause for unbounded gratitude, but far beyond it is the beautiful knowledge of God as all good, ever present divine Love. I am grateful every hour of my life for Mrs. Eddy's wonderful writings. Science and Health is truly a key to the Scriptures, which were precious before, but are doubly so now. I am deeply grateful to all who have lovingly taught me and helped me, and also for our literature especially the *Sentinel* and the *Journal,* which come so regularly to cheer, strengthen, and enlighten, for I have much yet to learn.—(Mrs.) E. A. BEDDOW, London, England.

✧ ✧ ✧

# From the Press

[Elmer Ellsworth Carey in *Chicago* (Ill.) *Record Herald*]

Birthdays convey suggestions of ill. What good suggestions do they convey? Suppose you did not know how old you were, would your usefulness in any way be impaired? Would any possible harm result? Suppose birthdays were abolished, what would be the result? The average strength of the human race would increase. Birthdays are responsible for the psychic dead-line of threescore and ten, which is more deadly than a machine gun. Thousands and tens of thousands die because they think they have reached the age limit. They die because they think they must, because it is customary. In nature there is no age limit. There is no inherent reason why one should die at the age of fifty or seventy-five or one hundred and fifty. A man at seventy should dress like a man of thirty-five, do the same work, think the same thoughts, and have no care for birthdays. Let us hasten the time when the shackles of the threescore and ten delusion shall fall away. All can do something to hasten the glad day by refusing to indulge in birthday worship.

[Secretary of War Newton D. Baker in *The New York* (N. Y.) *Times*]

History probably never repeats itself, but the motives of history are always the same. When Deborah sang her song she said, "The stars in their courses fought against Sisera." When the story of this war is written as a completed thing, the poet who sings that epic will repeat that phrase. The German Empire busily engaged itself for forty years in quenching every liberal impulse, in cementing the rule of a tyrannous and autocratic government upon the minds of its people in cunningly and lavishly accumulating force for the conquest of the world.

Everybody else seemed to be busy about the things of civilization and light and leading, and trying to make life more beautiful and more equable, more just, more happy; and it looked as though the world had left to Germany alone the task of thus brooding and preparing so terrific a blow. And yet, if one analyzes even with our present knowledge the things that were going on in the world, it will be found

Digitized by Google

that the stars, too, were busy preparing in their courses to fight against Germany.

When Cavour brought about the unification of Italy, it was not merely that Italy might be one, but it was that the forms of parliamentary government and true liberty might be established in that country, and when he was besought to yield something to Austrian aristocratic and autocratic pretensions, he said: "I cannot go back upon the principles by which I have always lived. If any veil is to be put upon the statue of liberty, my hand cannot put it there."

[*New York* (N. Y.) *Advertising Club News*]

A *News* reader went to a Christian Science lecture the other night, and tells us that he is beginning to understand why *The Christian Science Monitor* is such a producer for those who have discovered its advertising value. He said that in the crowd of thirty-five hundred that filled the hall he saw nobody who scowled, or who looked unhappy, or who appeared to want funds to take care of his needs. They seemed to have confidence in themselves, and were determined to get all the good they could out of what might happen next. Such people, he figured out, spend money wisely in what they believe is good value. The *News* passes this thought on as an interesting commentary on advertising, and adds this question: Why is it that no other denomination has published a daily newspaper for its followers like the *Monitor?*

[*The Methodist Times*]

Great ideals are in the air, and a new world is about to be born. Many of the old traditions are being swept away, so that the creation of new standards and aims is not only supremely necessary, but is becoming more practicable. What does all this mean? Surely that Christians are called by an urgent need once more to explore the purpose of God and the meaning of His gospel with the same courageous faith and transparent sincerity as actuated the apostles of the eighteenth century. New light is waiting to break out upon those who diligently look for it. The church in this great moment should become a holy club waiting upon God. If this be so, the level of possibility will once more be triumphantly raised.

[*The Christian Work*]

As followers of Jesus we need not be ashamed of deep feelings, but like him we should use up our best feelings in helpful activity, not only feeding the hungry, clothing the naked, and healing the sick, but also restoring the wandering minds of men to righteousness, their angry spirits to the sweetness of forgiveness, and their divided ranks to the reconciliation of the gospel of love.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal.*

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly.* Reading rooms may secure any desired quantity of either or both sizes.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlets in French

"Christian Science: Its Discovery and Development," by William D. McCrackan.

"Christian Science: A Religion of Love," by Virgil O. Strickler.

Both of these French translations are printed with alternate pages in English, and are now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal.* Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the War Relief and Camp Welfare Fund, the Real Estate Fund, and the Benevolent Association Fund should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# Government by Principle

Mrs. Eddy says in "Science and Health with Key to the Scriptures" (page 106): "God has endowed man with inalienable rights, among which are self-government, reason, and conscience. Man is properly self-governed only when he is guided rightly and governed by his Maker, divine Truth and Love."

Throughout what has seemed the slow processes of the ages, nations have gained and applied an increasing understanding of government by Principle and have called it democracy.

In it one individual has joined with others in governing his own community without outside interference, at the same time uniting with other self-governing communities in support of and obedience to a main policy which declares all men free and equal, and capable of self-government.

This is the policy in force in a progressing degree in the United States of America, in the British Empire, in France, and in Italy; it is the ideal for which these nations, with others, are now fighting in the greatest of all wars.

It is the pattern of government that is brought to a still higher degree of clarity and practicality in the Manual of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, designed by Mrs. Eddy for the guidance and government of The Mother Church and its branch churches and members throughout the world.

In addition the Manual brings out clearly the two essentials embraced in the quotations given above from the Christian Science textbook: (1) the necessity of individual self-government, (2) the accomplishment of this only through strict reliance on Principle.

Hence, Christian Scientists, by an ever closer study of the Church Manual and faithful adherence thereto, aid inestimably in making irresistible throughout the whole world the ideals of true democracy, or government by Principle.

The Manual of The Mother Church is obtainable at Christian Science reading rooms or by writing to The Christian Science Publishing Society, in Boston, Massachusetts.

---

Opportunity to send the messengers of Christian Science on their healing mission to the world is maintained through the plan of the Postmaster-General of the United States to send to soldiers and sailors destined to proceed overseas, at nominal postage, literature offered at post offices in the United States. A printed notice on the front of *The Christian Science Journal*, *Christian Science Sentinel*, and *Le Héraut de Christian Science*, signed by the Postmaster-General, explains the simple plan.

While the post office department has ruled that the above mentioned Christian Science periodicals are to be accepted by postmasters for use under this plan, the department order states that only "clean copies of current or comparatively recent issues" will be received.

Those desiring to send periodicals other than their own copies, or copies previously given for local distribution work, can doubtless make arrangements with any Christian Science reading room to mail these periodicals regularly as desired.

that the stars, too, were busy preparing in their courses to fight against Germany.

When Cavour brought about the unification of Italy, it was not merely that Italy might be one, but it was that the forms of parliamentary government and true liberty might be established in that country, and when he was besought to yield something to Austrian aristocratic and autocratic pretensions, he said: "I cannot go back upon the principles by which I have always lived. If any veil is to be put upon the statue of liberty, my hand cannot put it there."

[*New York* (N. Y.) *Advertising Club News*]

A *News* reader went to a Christian Science lecture the other night, and tells us that he is beginning to understand why *The Christian Science Monitor* is such a producer for those who have discovered its advertising value. He said that in the crowd of thirty-five hundred that filled the hall he saw nobody who scowled, or who looked unhappy, or who appeared to want funds to take care of his needs. They seemed to have confidence in themselves, and were determined to get all the good they could out of what might happen next. Such people, he figured out, spend money wisely in what they believe is good value. The *News* passes this thought on as an interesting commentary on advertising, and adds this question: Why is it that no other denomination has published a daily newspaper for its followers like the *Monitor?*

[*The Methodist Times*]

Great ideals are in the air, and a new world is about to be born. Many of the old traditions are being swept away, so that the creation of new standards and aims is not only supremely necessary, but is becoming more practicable. What does all this mean? Surely that Christians are called by an urgent need once more to explore the purpose of God and the meaning of His gospel with the same courageous faith and transparent sincerity as actuated the apostles of the eighteenth century. New light is waiting to break out upon those who diligently look for it. The church in this great moment should become a holy club waiting upon God. If this be so, the level of possibility will once more be triumphantly raised.

[*The Christian Work*]

As followers of Jesus we need not be ashamed of deep feelings, but like him we should use up our best feelings in helpful activity, not only feeding the hungry, clothing the naked, and healing the sick, but also restoring the wandering minds of men to righteousness, their angry spirits to the sweetness of forgiveness, and their divided ranks to the reconciliation of the gospel of love.

## Christian Science Sentinel

Subscriptions to the *Sentinel* will begin with the current issue unless otherwise specified. The delivery of the periodical will indicate that a remittance has been credited, and will be the acknowledgment of the subscription.

Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents.

Make all remittances payable to The Christian Science Publishing Society, Boston, U.S.A. Manuscripts submitted for publication and all correspondence relating thereto should be addressed, Editorial Department.

For prices of bound volumes, see current catalogue in *Journal*.

Owing to the instability of money values and the fluctuation of exchange rates, we are, for the present, not printing a table of money equivalents. This information can be obtained correctly from the bank or local post office at the time it is desired to send in money.

# Special Announcements

## Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

## Vest Pocket Folder

"What Our Leader Says," by Mary Baker Eddy, from "The First Church of Christ, Scientist, and Miscellany," has been reprinted on a card folder, vest pocket size, and is now on sale at five cents a copy.

## New Pamphlets in French

"Christian Science: Its Discovery and Development," by William D. McCrackan.

"Christian Science: A Religion of Love," by Virgil O. Strickler.

Both of these French translations are printed with alternate pages in English, and are now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Protection," a collection of three short articles: "Safety," "Divine Preservation," "Intrenchment."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the War Relief and Camp Welfare Fund, the Real Estate Fund, and the Benevolent Association Fund should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection.** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more. each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.

# Christian Science Literature

## Christian Science Sentinel

Founded, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 7 cents. Subscriptions will begin with current issue unless otherwise specified. The delivery of the periodical indicates that remittance has been credited and acknowledges the subscription.

For prices of bound volumes see current catalogue in Journal.

## The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, list of Christian Science Practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms. Subscription price, payable in advance, postpaid to all countries: One year, $3.00; six months, $1.50; three months, 75 cents; single copy, 30 cents.

## The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, $1.00; single copy, 25 cents.

## The Christian Science Monitor

AN INTERNATIONAL DAILY NEWSPAPER

Founded, 1908, by Mary Baker Eddy. Published daily, except Sundays and legal holidays. Adequate news service. The various departments of a modern newspaper. Unique Home Forum page. Entire page of editorials dealing with the vital topics of the day. Contributions to the columns of the Monitor should be addressed: Editor, The Christian Science Monitor. Subscription price, payable in advance, postpaid to all countries: One year, $9.00; six months, $4.50; three months, $2.25; one month, 75 cents; single copy, 3 cents.

## Der Herold der Christian Science

Founded, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, $2.00; six months, $1.00; three months, 50 cents; single copy, 20 cents.

## Pamphlets

**Price, Postpaid: Single copy, 5 cents**

**Christian Science: Applied Righteousness**—By Frank Bell.

**Christian Science: Its Religious Philosophy**—By Hon. Clarence A. Buskirk.

**Christian Science: "The Resurrection and the Life"**—By Clarence W. Chadwick.

**God is Good**—By George Shaw Cook.

**Causation: Viewed in the Light of Christian Science**—By Frederick Dixon. Also printed in Norwegian and Swedish.

**Christian Science Healing vs. Mental Suggestion**—By Frederick Dixon. Reprinted from the "Weekly Budget," London, England. Also printed in Norwegian.

**Christian Science: The Revelation of Christ**—By John W. Doorly.

**Christian Science: The True Christianity**—By Clarence C. Eaton.

**Christian Science: Pure Metaphysics**—By Dr. Francis J. Fluno.

**Christian Science: The Gospel of Freedom**—By Willis F. Gross.

**Christian Science: The Science of Salvation**—By Prof. Hermann S. Hering.

**Christian Science Healing: Spiritual and Scientific**—By Prof. Hermann S. Hering. Also printed in German.

**Answers to Questions Concerning Christian Science**—By Edward A. Kimball. Also printed in Dutch, German, and Norwegian.

**Christian Science: Its Advantage to Mankind**—By Edward A. Kimball. A London lecture. Also printed in French.

**Christian Science: Man's Dominion Over Evil**—By Edward A. Kimball. Also printed in French, modern Greek, Italian, Norwegian, and Russian.

**Christian Science: Its Divine Authority**—By Bliss Knapp.

**Christian Science: The Explanation of the Ideal Man**—By William D. McCrackan, M.A. Also printed in German.

**Christian Science: Its Discovery and Development**—By William D. McCrackan, M.A. Also printed in French, German, and Norwegian.

**Christian Science: God's Lovingkindness Proved to Men**—By Rev. William P. McKenzie. Also printed in German.

**Christian Science: A Message Which Heals and Saves**—By Edward A. Merritt.

**Christian Science: Its Results**—By William R. Rathvon. Also printed in German.

**Christian Science Healing Not Medical Practice**—By Judge Clifford P. Smith.

**Christian Science: A Religion that Heals through Spiritual Law**—By Virgil O. Strickler.

**Christian Science: The New Birth**—By Bicknell Young. Also printed in German and Norwegian.

**Christian Science: Its Principle and Rule in Business.** Noonday lecture delivered by Bicknell Young.

**"Awake Thou That Sleepest."** Printed in English only.

**Birthright and Dominion.** Printed in English only.

**Confidence and Supply.** Printed in English only.

**Environment and Opportunity.** Also printed in French.

**Fulfilling the Law.** Also printed in Danish.

**Law and Work.** Also printed in French.

**Prayer and Healing.** Also printed in French and German.

**Seeking and Finding.** Also printed in Dutch, German, and Swedish.

**The Divine Nature.** Also printed in Dutch and Norwegian.

**The Father's Business.** Also printed in German and Swedish.

**The Law of Kindness.** Printed in English only.

**The Providence of Good.** Also printed in French, Spanish, and Swedish.

**"Then the Full Grain in the Ear."** Printed in English only.

**Upward Footsteps.** Also printed in Dutch.

**"What Went Ye Out for to See?"** Printed in English only.

**OTHER TRANSLATED PAMPHLETS**
Not printed in English separately

**Faith and Generosity.** Printed in French.

**Man's Unity with God.** Printed in German only.

**"Peace on Earth."** Printed in German only.

**Prayer and Confidence.** Printed in German, Dutch, and Swedish.

**Mary Baker Eddy**—By Arthur Brisbane. Printed in German only.

**Mary Baker Eddy: Her Purpose and Accomplishment**—By Frederick Dixon. Printed in German and French.

**The Founder of Christian Science**—By B. O. Flower. Printed in German only.

**Christian Science: A Reasonable and Rational View of All Things**—By Francis J. Fluno, M.D. Printed in Dutch.

**Christian Science: Its Teachings, Methods, and Works**—By Judge Septimus J. Hanna. Printed in Swedish.

**Christian Science: Humanity's Helper**—By Prof. Hermann S. Hering. Printed in Dutch.

**Christian Science: The Comforter of Promise**—By Frank H. Leonard. Printed in French.

**Christian Science: Demonstrable Religion**—By Frank H. Leonard. Printed in Norwegian only.

**Christian Science: A Religion of Progress**—By William D. McCrackan, M.A. Printed in Swedish and French.

**Christian Science: The Christianity of Jesus**—By Mrs. Sue Harper Mims. Printed in Swedish.

**Christian Science: The Gospel of the Kingdom**—By Judge Clifford P. Smith. Printed in German and French.

**Christian Science: A Religion of Love**—By Virgil O. Strickler. Printed in French, German, and Norwegian.

**Christian Science: Its Principle and Method**—By Bicknell Young. Printed in Swedish and French.

**VEST POCKET PAMPHLETS**
**Price, Postpaid: Single copy, 4 cents**

**Possession**—Printed in English only.
**Protection**—Printed in English only.
**Courage**—Printed in English only.

## Miscellaneous

**The Life of Mary Baker Eddy**—By Sibyl Wilbur. Cloth, $2.50; edition de luxe, $5.00.

**Editorial Comments on the Life and Work of Mary Baker Eddy.** Paper, 15 cents; cloth, $1.00.

**Personal Contagion, also What Our Leader Says**—By Mary Baker Eddy. Special pamphlet, 10 cents.

**Reprints** (not printed in English). Two-page leaflets, 18 subjects in German, 14 in Swedish, 10 in French. Ten copies, 10 cents.

**The Mother Church**—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth. $1.50.

**Christian Science: Its Legal Status**—By Judge Clifford P. Smith. Paper, 15 cents.

**Sheet Music.** Poems written by Mary Baker Eddy and used by special permission, have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye My Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

**The Christian Science Hymnal.** Cloth, $1.15; half morocco, $1.40; full morocco, $4.50; levant, $5.50; pocket edition, size 4⅝x6⅝, $3.50.

**Photogravure of Mrs. Eddy,** printed in three sizes on India paper and mounted on heavy plate paper ready for framing. 8-inch (mount 12x16), $1; 12-inch (mount 15x20), $2; 16-inch (mount 21x29), $3.50.

**Picture of The First Church of Christ, Scientist, in Boston, Mass., and the Publishing House.** Artist's proof with remarque on Japanese vellum, size 18x24 inches, $5; on India paper without remarque, $3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, $1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

**BIBLES.** 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.90.

01410x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, $4.05.

01683x. Large type Bible, 10¾x8 inches, bound in Alaska seal. Specially adapted for use of second readers, $12.50.

Black morocco open case to hold pocket edition of Science and Health, QUARTERLY, and Bible, $1.50.

Two other sizes of open case listed in the current issue of the JOURNAL.

Black morocco closed case with handle and purse on outside, $4.00; without purse, $3.75.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents. Catalogue No. 24 of selected Bibles will be mailed free upon application.

**Quarterly Covers** in black morocco, $1.40; with purse, $1.60; with celluloid writing tablet, $1.50; with tablet and purse attached, $1.70.

**Price List of Bible Concordances and Dictionaries of the English Language** supplied on request.

Express charges collect on delivery.

Other items not specified on this page will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

*"What I say unto you I say unto all, WATCH."* Jesus

VOLUME XX AUGUST 31, 1918 NUMBER 53

## The Last Enemy

HUGH A. STUDDERT KENNEDY

NO one thing, perhaps, has stood between mortal man and his happiness and peace more effectively than his belief in and apprehension of death. The urgent need of the hour, possibly more urgent than ever before, is to gain some just sense of this matter; to learn something of the fact, which Jesus proved, that death may be overcome here and now; that it may be seen for what it is,—just as certainly an illusion as the meeting of the sea and sky on the distant horizon. Christ Jesus, as St. Paul said, has "abolished death" (let the words be noted), and has drawn aside the veil, bringing "life and immortality to light."

Now, no one ever came to the horizon, using the word in the sense of the meeting point of sea and sky, and no one ever crossed it. It is utterly an illusion. The voyager who seems to be sailing toward it never finds it. It is always before him and beyond him. To the people on shore, it is true, the ship he is on seems to be disappearing over the horizon, but those on board are conscious of no change, and the horizon is ever before them, until at last they realize that it has no real existence. To the mariner at sea the horizon is not a thing, or a place, or a destination, and he knows that for him the crossing of it can never be an experience. It only marks the limits of his vision, and he knows that if he could view the world from the immensity of space the horizon would be no more. The people on the shore lose sight of the people on the ship, but these people go on in good company with those who are on the ship with them, and if they go to a foreign country they meet friends and make friends of those who are there. There is no passing of the horizon, and, after the same fashion, there is no passing through death. Did not our Master say: "If a man keep my saying, he shall never see death"?

And yet for untold ages the world has bound itself by this belief, and freedom can alone come by attaining a truer, fuller sense of life; that is, by recognizing the great fact that just as the statement "twice two is four" knows no bounds and is affected by no change, so what we know of Truth, what we know of God, is here and now, not shall be, eternal life; and that as we live more and more in the consciousness of this life, so our likeness to the eternal will gradually grow to be such that only to the watcher on the shore of time will it appear that we cross the horizon. We shall have more and more to bring on into eternity, and less and less to leave behind, until, just as John did, we see a new heaven and a new earth, without having to cross the boundary line called death. Mrs. Eddy says (Science and Health, p. 598): "One moment of divine consciousness, or the spiritual understanding of Life and Love, is a foretaste of eternity. This exalted view, obtained and retained when the Science of being is understood, would bridge over with life discerned spiritually the interval of death, and man would be in the full consciousness of his immortality and eternal harmony, where sin, sickness, and death are unknown."

Christian Science explains mortal existence as a dream from which men need to be awakened. Now one of the most notable features about awakening from a dream is that the past and the present come together, the continuity is resumed, and in that continuity the dream finds no place. Mortal man, to his own satisfaction, "accounts for his time;" he recognizes that the dream was but a dream, and that the world as he knows it and the world as it knows him, has gone on whilst he was asleep. And so mortal man, thus trained to regard it, dismisses it all lightly as "a dream," and goes on adding another whole day to the tale of his earthly years.

Just here we are reminded that Mrs. Eddy very pertinently asks what difference there is between the sleeping dream and the waking dream, and reaches the only just conclusion, namely, that there is none. If this is so,—and it is, of course,—then the awakening from this dream will be accompanied, just as in the case of awakening from the sleeping dream, with a consciousness of awakening to reality, to an existence recognized as blessedly familiar, and of leaving a dream behind. There is no need to tell the man awakened from the sleeping dream that he is awake and that what he has awaked from is a dream. He knows it without being told. And so it is in the awakening from the mortal dream. This awakening, however, is not as a rule a sudden change but a continuous process. It is a steady putting away of every belief unlike God, accompanied by a growing recognition of the great facts of Christian Science, until the unreality, the nonexistence of death is seen, and one catches first of all just a glimpse, but later ever stronger and stronger views of the fact that man has no "beginning of days, nor end of life." And then, just when human consciousness is bewildered at the thought of untold ages of being, one realizes that time is an absurdity amidst such vastness, and that there is nothing but the "eternal now." Past and present come together in the recognition of the one infinite Principle, God, "the same yesterday, and to day, and for ever," and man as His image and likeness. In this recognition death and hell are cast out.

On page 428 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "Man's privilege at this supreme moment is to prove the words of our Master: 'If a man keep my saying, he shall never see death.'" Again, on page 426 she says, "If the belief in death were obliterated, and the understanding obtained that there is no death, this would be a 'tree of life,' known by its fruits." There is very urgent need at this hour to break away from the false belief that death is inevitable. The only death there is or can be is the death of a mortal sense of things, and of that kind of death he who is learning to understand God as revealed in Christian Science can say with Paul, "I die daily." This daily dying will, ultimately, in every individual consciousness "abolish death" by bringing "life and immortality to light." The central dread of death to the human consciousness is the dread of the unknown, and it is just this dread that Christian Science at once begins to abolish. As one pro-

gresses in his study of this Science he is able to say of the true thoughts which every day fill a larger place in his consciousness, These are mine forever; into these thoughts I can enter forever and abide; this is very truth and very God and eternal life. So these thoughts will grow in volume until no other thoughts can find a place, and the student will recognize, at last, that he is conscious of nothing but what is eternal, safe from discord and decay. Thus will he find that he has passed the possibility of death, that only infinite Life stretches out beyond and behind him, and that he is able to understand what Christ Jesus meant in saying, "Before Abraham was, I am," and "I and my Father are one."

## Cause and Effect

BLISS KNAPP

SOME time ago my attention was arrested by an unusual episode in connection with the burning of a boat called the "General Slocum." The boat had been chartered to convey upwards of a thousand Sunday school children and teachers on an excursion, and before leaving the dock one of the teachers had such a strong premonition of a catastrophe that she expressed it to a gentleman friend, who, in turn, was so impressed that he took his family and this friend from the boat before it left the wharf. What impressed me in this occurrence was the fact that the accident was detected as a condition in human thought before it had a physical expression, and that a period of time intervened between the mental disturbance and its physical manifestation. When naturally conformed to the teachings of Christian Science, we should resolve "things into thoughts" as Mrs. Eddy tells us on page 269 of "Science and Health with Key to the Scriptures," and remove the disturbing cause; whereupon there could be no inharmonious physical effect.

I was required to prove the truth of that fact some time later. I was in a neighboring state and desired to return home, but at a junction point where I had to await a train connection I was touched by the fear of accident. Knowing that the fear of anything, on the one hand, and the consciousness of God's presence, on the other, can no more abide together than fire and frost, I proceeded as best I could to gain a realization of God's ever presence and the protective power of Truth. To the degree that this realization came to me, the fear of accident disappeared. When in the course of half an hour my train came in, I felt justified in securing accommodation on the sleeping car, and woke next morning at my destination two hours late. Then I learned the reason for that delay, for the story of it occupied the front column of a newspaper.

The newspaper report indicated that at four o'clock in the morning the engineer was impelled by some power not his own, and a power he could not resist, to stop his train and make an examination of the engine. That examination revealed a defect which required the substitution of another engine; this took about two hours and accounted for our delay. Here we may recall Mrs. Eddy's words on page 84 of Science and Health: "If this Science has been thoroughly learned and properly digested, we can know the truth more accurately than the astronomer can read the stars or calculate an eclipse." Again was I convinced that in ordinary human experience a period of time intervenes between mental cause and physical effect.

As the leader of an orchestra, by virtue of his long training in harmony, can detect instantly the slightest discord and locate it, so one attuned by experience and demonstration to the harmonious activity of the divine Mind may note with equal keenness the mental disturbance in thought. To be forewarned is to be forearmed, and he thus gains the preventive healing, that is, deliverance from evil through what our Leader defines (Miscellaneous Writings, p. 207) as "practical, operative Christian Science."

## A Lesson from the Clouds

CARRIE A. MCLEOD

ONE morning, from the topmost window of a city apartment, looking out into the open sky, I could see but two clouds—one small, luminous, and golden, radiant with the beauty of the morning; the other, dark, heavy, and unattractively spread out. How strange, I thought, that these two clouds should be in such close proximity, and yet bear no resemblance to each other. How like an individual basking in the warm sunshine of Life and Love was the little cloud! How like a darkened mortal, absorbed in his own self-interest, seemed the huge cloud, unillumined! I soon discovered, however, why the smaller cloud was fast blazing into splendor and exceeding brightness: the morning sun was just rising, and was shining directly on the cloud, which evidently was in the right place to reflect the sunshine. With no inherent beauty, it beamed all the glory of reflection upon everything around it. It lost all its own dullness in becoming a reflector for something outside of itself.

What a lesson to us all! Mrs. Eddy says in her textbook, "Science and Health with Key to the Scriptures" (p. 510), "The sun is a metaphorical representation of Soul outside the body, giving existence and intelligence to the universe." Looking at the little cloud, which was becoming more and more glorious as it yielded itself to illumination by the great orb of day, this text from the Bible came to my thought: "Whosoever shall lose his life for my sake . . . shall save it." Here, I thought, is the symbol of true identity. When we relinquish our faith in mortal selfhood and its delusion of believing that we possess an existence apart from God, at that moment we are situated where the darkness can be replaced by light, where the somber tints of shadowy earth beliefs can be transformed by the hues of spiritual reality. The little cloud had been transformed by reflection, and thereby gained a greater glory. In Science and Health (p. 265) we read: "This scientific sense of being, forsaking matter for Spirit, by no means suggests man's absorption into Deity and the loss of his identity, but confers upon man enlarged individuality, a wider sphere of thought and action, a more expansive love, a higher and more permanent peace."

When I looked at the sky again, the large cloud was taking upon itself here and there luminous points—wonderfully prophetic. No longer was it dull and uninteresting. I watched until both clouds were clothed in light, and instantly the lesson gained recalled an experience in Christian Science which came under my notice,—an experience where the recognition of the goodness of God displaced error, and by reflection illustrated the light and glory of God's government.

For some time a young man attending school had been promised by his teacher remunerative work, but when a position offered, it was assigned to another student. The young man came home greatly disturbed. Gloomy shadows of hatred, envy, and selfishness seemed to envelop his entire thought. Miserably unhappy, he confessed to hatred so extreme as to forbid his riding in the same elevator with the fellow student who had gained the position. At once, in accordance with the young man's desire, we turned from corporeal sense to Soul, God, and placed ourselves in the sunlight of Christian Science. We knew that Mrs. Eddy had

Digitized by Google

given specific directions in regard to handling both sickness and sin. Consequently, we turned to Science and Health, and saw very clearly the need to uncover sin and then destroy it. In Proverbs we also read: "Whoso confesseth and forsaketh them [his sins] shall have mercy." Here was a definite outline for progress. The sin had been detected, exposed, confessed, and now the last scientific step remained to be taken—the forsaking of it. The belief that man can be affected by what God does not know or express, comes to human consciousness for acceptance through the philosophy of the talking serpent, and claims to open the eyes; but the contrary happens; for this serpent of material sense is the deception of sin, which carries with it all the mists of earth and its shadows.

In the light of divine Science ideas of good as representatives of Soul are revealed. We can never lose sight of the truth that man forever reflects the nature and likeness of his heavenly Father, and therefore is indissolubly linked by the law of love to divine Mind and its ideas. No attempt of sin can hide, harm, overshadow, or destroy the spiritual likeness of God, nor disrupt the true brotherhood of man. In this realization we drop feuds and find our true identity in good; for man can have no satisfaction in anything outside of God, the source of his being. All else is myth according to Christian Science; for divine Love and its ideas constitute the whole of God's perfect spiritual creation. In the bright sunshine of God's allness there is nothing to hate, for all of God's ideas are good, supported, governed, and characterized eternally by Spirit, by Life, Truth, and Love. This becomes obvious whenever and wherever the Science of being is understood and applied.

The young man, seeking to establish himself in this scientific process of relinquishing error, was directed to the Bible and to our Leader's writings, and as a result a great change took place. Words were not needed. The illuminating truths of Christian Science had dispelled the darkness. Love was reflected in brotherliness. The love of God and the brotherhood of man had been demonstrated. With a face beaming kindness, the young man said: "I now love my teacher, my classmates,—in fact, all things better than ever before. I now see that the position offered at school was rightly given to the one who most needed it." A little later a more advantageous opening than the former one presented itself to the young man, and with radiant reliance on Principle and its transforming process, he remarked that he valued this experience highly; for through it he had received an inward peace and joy such as he had not known before. Thus a human consciousness, darkened and made miserable by error, had yielded as naturally to the enlightenment of Christian Science as the morning clouds to the sunshine. What a wonderful process is transformation through spiritual reflection!

## True Unity

RICHARD HAWORTH

THE demonstration of unity rests upon the recognition of one Mind governing the universe in absolute harmony, law, and order; in according to God all that belongs to Him who is able to maintain it in "beauty, grandeur, order," to quote the poet's words. Mortal mind would counterfeit this true unity by a spurious type of unity. It would first of all outline the process, method, ways, and means, which would lull it into the belief of unity,—an outward "Peace, peace; when there is no peace,"—thereby reversing the true course of procedure expressed by the Master when he said, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you."

The mere fact of acting together, shouting together, coming together, is not necessarily a proof of unity; for if the outward manifestation be other than the outcome of an inward realization of unity, it is worthless. So-called unity may be based on fear, cowardice, or dishonesty. It may be the result of mental suggestion, or mesmerism, which finds an easy victim unless it is detected and destroyed by the recognition of the all-inclusive, all-embracing activity of Mind, God. Let us remember Jesus' words, "Ye cannot serve God and mammon," and then we shall willingly and humbly do our work in obedience to Principle, and so allow God to do His. Obviously the final result will be satisfactory if we heed the words on page 261 of Science and Health: "Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts."

A Christian Science practitioner would not attempt a physical diagnosis of disease and deduce therefrom the prospects as to the possibility of healing the patient; nor would the true Christian Scientist be led astray by what seemed a discordant condition of personal or church relations. The remedy in both cases is a denial of sense evidence and an affirmation of the truth—the spiritual fact. Unity is because God is, and any endeavor to evolve a form of unity apart from Principle would be equal to an attempt to heal without the underlying recognition of the perfection and harmony of God's creation. On page 207 of "Science and Health with Key to the Scriptures" Mrs. Eddy says: "The spiritual reality is the scientific fact in all things. The spiritual fact, repeated in the action of man and the whole universe, is harmonious and is the ideal of Truth."

## Pictures

ADA BRUEGGERHOFF

THERE is a great diversity of opinion as to what may be considered idolatry. For many centuries people of civilized countries believed that they had outgrown the practice of idolatry, but within the past fifty years a prophet has appeared and has explained to the world that belief in the power of matter is idolatry. This explanation has aroused much discussion, but people are slowly awakening to its truth. In studying the journeyings of the Israelites from Egypt through the wilderness to the land of Canaan, the promised land, we are impressed with the command given to them to keep their thoughts free from idolatrous pictures. As the inhabitants of the promised land were idol worshipers, it is claimed that every object which they wrought had on it the stamp of matter worship; therefore it was necessary for the Israelites to use every precaution to keep their minds free from these false images.

Through the teachings of Christian Science we learn that the long journey of the Israelites through the wilderness into the land of promise symbolizes the journey from sense to Soul, and that the wilderness is the wilderness of human sense and doubt. The Israelites were guided to a realization of the ever presence of God, and of the fact that He alone was the source of their supply, protection, and guidance. They had to learn that there was no other dependence. No material reliance was visible; therefore they had either to trust God to sustain them or else to starve. If they relied on God they had ample protection, supply, and guidance, as was shown by their escape from the Egyptians through the Red Sea, by the manna which came down from

Digitized by Google

heaven, by the water which flowed from the rock, by the pillar of cloud by day and of fire by night, and by many other evidences of God's care. The Israelites, however, did not always rely on God, and as a result of lack of trust in Him they were attacked at times by many strong enemies, such as doubt and distrust of God's power, and were put to many tests that they might prove His all-power and substance.

Forty years were spent in their journeying,—their spiritual preparation,—until many of the older generation had passed away and the younger generation had learned to rely more fully on God. Then they were allowed to enter the promised land. They learned that in order to possess this land they must comply with numerous requirements; that since the people were idolatrous, all their pictures and images must be destroyed; that although the land was fertile it had to be cultivated according to the understanding of spiritual law and obedience thereto, for the Israelites had learned that God alone gives the increase. To-day human sense is stubborn, as it was with the Israelites of old, and a long night of suffering seems to be required that there may be a turning from trust in materiality to reliance on God. On page 240 of "Science and Health with Key to the Scriptures," Mrs. Eddy gives this caution: "Remember that mankind must sooner or later, either by suffering or by Science, be convinced of the error that is to be overcome." We must know that we are just as strongly enjoined to keep our minds free from idolatrous concepts as were the Israelites. We must also realize that God alone supplies every human need and sustains us; that though we may be in the wilderness of doubt we can enter the promised land when we give up for Truth all belief in matter and keep before us only the ideal of spiritual perfection.

## "Our light affliction"

GERALDINE VIEILLE

AT a time when our Government is making what are undeniably just demands upon its citizens in the way of curtailing and revising their daily expenditures, especially in the way of food, it might be well for us to determine the spiritual significance of these demands and their relation to individual growth. To the one who has learned to look upon every human problem as an opportunity to overcome some false sense of being and to gain more understanding of man's true selfhood, this testing time should be what Mrs. Eddy speaks of as "a feast of Soul and a famine of sense" (The First Church of Christ, Scientist, and Miscellany, p. 263); but to the one who is in bondage to what he calls the necessary demands and legitimate cravings of appetite, the obligation of setting aside self-indulgence in order to demonstrate brotherly love may seem a burden and a stumblingblock.

On page 260 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we read, "Selfishness and sensualism are educated in mortal mind by the thoughts ever recurring to one's self, by conversation about the body, and by the expectation of perpetual pleasure or pain from it; and this education is at the expense of spiritual growth." What is it, indeed, but this false education which continually limits us with the arguments that because we have always partaken of a certain article of food, and have cultivated certain tastes and aversions, we cannot face about and make an effort to reform? It was Shakespeare who wrote, "There is nothing either good or bad, but thinking makes it so." Must we forever be held to the routine of last year, or even last month? It was this same stubborn, unwilling temperament which prompted the children of Israel to long for the fleshpots of Egypt—the very fleshpots in which lurks the serpent of bondage to matter. Had they but realized that their every need was being supplied by the loving Father-Mother God, although they were in what seemed a veritable wilderness, their eyes would have been opened to behold the wonderful simplicity and sufficiency of their daily manna.

Let us consider for a moment what it is that makes the fleshpots seem so attractive. Is it not the false belief that pleasure is obtained through the physical senses, the senses which deny the truth that "joy is spiritual," as Mrs. Eddy tells us on page 265 of Science and Health, rather than by radical obedience to the First Commandment, "Thou shalt have no other gods before me." Inasmuch, therefore, as sensualism is inherent in the false claim of mortal mind, the tendency to eat in order to gratify the senses acknowledges the temporary triumph of self-indulgence over reason, virtually enlisting on the side of evil in its attempt to weaken man's God-given dominion over the material senses. We do well to observe the Master's admonition: "Take no thought for your life, what ye shall eat, or what ye shall drink; nor yet for your body, what ye shall put on."

There can be no justification in an endeavor to make things appear attractive as mere matter. There is, however, laid upon each one of us the inflexible obligation to keep our surroundings and all of those things which pertain to our daily life in such exquisite order, wholesomeness, and fitness as will make them a reflection of Mind's perfect ideas. Let us also be guided in this service by that spirit of brotherly love which "thinketh no evil," but which finds its greatest joy in intelligent and loving consideration for all mankind.

The duty which lies before us, therefore, as citizens of the world, is not primarily the conservation of food, but rather the overcoming of selfish desires in the form of greed, hatred, and indifference, which are directly responsible for the apparent lack of necessities. In the prophecy of Isaiah, Truth asks, "Is not this the fast that I have chosen? to loose the bands of wickedness, to undo the heavy burdens, and to let the oppressed go free, and that ye break every yoke?" In the light which Christian Science throws on our path, legitimate duties become golden opportunities, even though they come hand in hand with hardships, self-denials, and fiery trials, and we shall see, as did Paul, that "our light affliction, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory; while we look not at the things which are seen, but at the things which are not seen: for the things which are seen are temporal; but the things which are not seen are eternal."

## Nature's Lessons

MAUDE LOUISE NIRDLINGER

THE great truth of the Biblical declaration, "Day unto day uttereth speech, and night unto night sheweth knowledge," was brought vividly home to me on two recent occasions. The first was while riding through a deep forest late in the autumn. High on the hills and deep in the valley the exquisite blending of myriad hues of brown, gold, red, green, and yellow against the brilliant blue of a clear sky made the world a wondrous picture. For hours we traveled, until the short twilight darkened into darker night. As the light faded the colors were dimmed and dulled and then disappeared. Gaunt outlines of towering trees alone remained specterlike in the gloom. Where then, I mused, is

Digitized by Google

the beauty of the day? Every twig and leaf was undisturbed, but where was the beauty of it? It is hidden by the darkness, for the light which revealed it is gone, reason answered.

And is it ever so with the beauty of holiness, of God's infinite goodness? we may ask. Around us it lies, but the sunlight of Truth must reveal it; and not through material vision but through spiritualized thought must the stark, gaunt delusions of mortal sense, which would incite doubt and fear, be dispelled. We must know the truth so clearly stated by Mrs. Eddy on page 306 of Science and Health: "Undisturbed amid the jarring testimony of the material senses, Science, still enthroned, is unfolding to mortals the immutable, harmonious, divine Principle,—is unfolding Life and the universe, ever present and eternal."

The second occasion illustrating nature's lesson was on the shore of Lake Michigan. Clouds and rain ruled the day; yet it was not dreary. The lake lay almost quiet, and as I watched that great, gray, glassy body a mighty truth dawned on me. Of itself the lake does not move; it is governed by the wind. Yet we never see the wind; we only see its effects. If the sky is dark and sullen and the wind tempestuous and wild, we have a tempest-tossed lake leaping high, angry, and dangerous, illustrating mortal mind and its discords, made manifest as sin, disease, and death; but let the heavens be clear and the bright light of day spread across the silent waters, and we have a peaceful lake, reflecting beauty in wondrous shades, illustrating immortal Mind and its holiness, harmony, and immortality.

As the lake but expresses a force outside of itself, so all material things can but express or reflect the thought outside of themselves, even when from appearances they seem to possess power of their own. Ships may go down in the lake,—not through any power it possesses over them, but because of mortal ignorance of man's God-given dominion over it. Jesus proved this by walking over the waves and by quieting with a word its storm. "Of him, and through him, and to him, are all things," Paul declares in Romans. The power, might, and majesty of God are everywhere expressed; but it is through spiritual discernment, not through material vision that we can perceive the unfoldment of infinite, eternal harmony,—of God's omnipotence.

[Written for the *Sentinel*]

## Christ's Ever Presence

LAURA GERAHTY

I AM the Way! E'en though thy path
With countless dangers seem beset,
Lo, in the midst of all I stand
Unmoved, all-knowing, with a hand
Outstretched to thee. Oh, understand
That I am with thee, with thee yet.

I am the Truth! No counterfeit
Of sin can hinder or delay.
Peaceful amid life's storm thou'lt sleep,
Deaf to the tempest, for the deep
To me no terror holds: I keep
A waking watch o'er thee alway.

I am the Life! Though death's cold hand
Should seem to snatch thy best from thee,
Joy that in God he lives, should prove
'Twas more than flesh that gained thy love.
Such life no finite being knows;
It springs from Life divine and flows
To him and thee eternally.

# Selected Articles

["The Mediator"—*The Christian Science Monitor*, Boston, U.S.A., Feb. 26, 1918]

What is the greatest lesson each and every one of us shall learn? It is this, that nothing can separate us from God nor come between us and Spirit, nor keep us from finding the Father, if we but turn to Him. The life of Christ Jesus has been interpreted to mean a great many things of more or less value to humanity, but the one thing that it means and shows forth supremely, so that the gospels are full of it, even as it were to overflowing, is that God and the real man coexist eternally, and that at no time was there anything between God and man, nor was God at any time hidden from men when they in sincerity and truth turned to Him. In countless ways, however, solely because men believe in a so-called human mind as a distinct entity, they express the belief that there is a separation between God and man and that for some inscrutable reason they cannot face God,—cannot turn directly to divine Love, but must have a mediator to act for them. Thus we forget that "there is no respect of persons with God," and that the Bible, from the law of Moses to the teachings of our Master himself, condemns having respect of persons.

Now the great fact, the helpful ray of light, that every one should remember is that the spiritual greatness of any worthy Biblical character, be it king, prophet, or apostle, is in the exact proportion in which he proved that he was in direct communion with God, that he was facing God, without any personality to mediate between him and Spirit. "The Soul-inspired patriarchs heard the voice of Truth, and talked with God as consciously as man talks with man," says Mrs. Eddy on page 308 of Science and Health. Did Abraham, for instance, need some one to work out his salvation or personally to mediate between him and God? Was not Abraham found faithful because he allowed no element of person, nor even of human affection, to come between him and God? It is not just a mere chance nor a mark of favoritism that all true Christians are to be accounted as of the spiritual seed of Abraham, for the characteristic of the true follower of Christ is that, through Truth, he finds the way straight to God and needs no other mediator than this same Christ, or Truth, that Jesus the Way-shower taught and demonstrated. If Abraham, then, communed with God, and was found faithful, are we not to do the same? Now what has been said of Abraham may also be said of Moses, of Hannah, of Mary, and of Christ Jesus himself, as well as of all other worthy men and women recorded in the Bible, whose very strength of spiritual understanding came from turning directly to God, having no need for an intermediary between them and Spirit.

Now, Christian Science clearly indicates that the veil of the temple is forever rent from top to bottom, that every man can enter the holy of holies here and now and be accounted a king and priest before God. "Like the archpriests of yore," we read in Science and Health (p. 481), "man is free 'to enter into the holiest,'—the realm of God." Christian Science, therefore, does exactly what the Christ that Jesus demonstrated, eternally does; it points the way to God and enables you to prove that you have communed with God, that you are at one with Spirit,—the at-one-ment that the carnal desires deny but cannot destroy, yea, that the human mind seeks to set aside by declaring that in order to come into the presence of God a personal intermediary is a prerequisite. Proving our oneness with God, therefore, is an absolute necessity in Christian Science, in which mere be-

Digitized by Google

lief without understanding counts for naught. On page 37 of Science and Health Mrs. Eddy tells us, "It is possible,—yea, it is the duty and privilege of every child, man, and woman,—to follow in some degree the example of the Master by the demonstration of Truth and Life, of health and holiness."

What, then, is the office of a mediator? Is it not, for instance, just to show people who misunderstand one another how to get together in the right way and proceed harmoniously? Is this not exactly what Christ Jesus did? He showed us that the sense of separation between God and mankind was entirely of human or carnal origin. Separation from good, then, is not of God, neither is it real, but is an illusion of mortal sense, that is, of spiritual ignorance. But Jesus proved by demonstration that the way of the Christ, which is the Christian Science way, overcame spiritual ignorance and was therefore the right way to God. He did not work out any person's salvation other than his own, but in working out his own salvation perfectly Jesus did the greatest good to humanity that could possibly have been done, for he showed us by actual proof that the testimony of the human senses is false and can be overcome by Truth. Speaking of this phase of Jesus' work, Mrs. Eddy says (Science and Health, p. 18): "He did life's work aright not only in justice to himself, but in mercy to mortals,—to show them how to do theirs, but not to do it for them nor to relieve them of a single responsibility."

Now Jesus both promised and insisted that every one who would follow the Christ, as he did, would be able by "signs following" to prove that he was facing Godward and not contemplating matter as a reality. When the prodigal son turned right about and faced homeward, realizing that nothing could keep him from the Father's house, the Father met him more than halfway. Just so it will be when we turn to God in truth; we shall find God. We, however, do not reach our journey's end in an instant, but we can turn and face in the right direction. We can begin at once to subject ourselves to the rules of Christian Science and refuse to submit to or obey the errors of mortal sense. Is it not worth while to face God, divine Love, and be your own king and priest before Spirit, through the revelation and application of Christian Science? "Draw nigh to God," says James, the apostle, "and he will draw nigh to you."

[Peter V. Ross in *The Star*, San Francisco, Cal.]

The June issue of *The Star* refers to the indorsement of compulsory health insurance by the New York State Federation of Labor. In this connection it is worthy of note that the New York legislature has recently adjourned without putting this type of insurance into operation in that state. A bill proposing such a measure was introduced into the legislature, but it received so little attention and support that it could not so much as get out of the committee to which it was referred.

Massachusetts and Maryland, as well as the United States Government, had already rejected compulsory health insurance before New York thus turned it down. Opposition to the measure, so the Massachusetts commission found, developed among those labor leaders who had given it most study, and among those classes generally who would be most vitally affected by it. The physicians in both Massachusetts and New York declined to indorse the insurance, presumably because it would lower medical efficiency and would not improve health conditions.

Altogether, then, the compulsory health insurance movement in the East may be said to be on the decline. In California it is still at its height, although opposition is becoming so strong from those who have given the plan an unbiased investigation, that it is already more than doubtful whether the constitutional amendment authorizing the legislature to adopt the system can be carried at the November election. The first practical objection to the proposition is that it will not reach those people who most need help. The sick, the unemployed, and even the irregularly employed and shifting population will not come under the insurance at all. There is the danger, also, that all employees may be subjected to medical examination, just as are applicants for life insurance, which will result in many of them being rejected and denied employment.

The cost of the enterprise is also a matter for serious consideration. The Social Insurance Commission, making a most conservative estimate, has declared that the annual expense of the scheme in California will be not less than $27,500,000. In view of the fact that the cost of government in California has almost doubled within the last few years, taxpayers are naturally reluctant to take on further millions of expense in order to experiment in an insurance which has proved of doubtful value in European countries where tried.

Then there is the imperative necessity of devoting all available money, energy, and attention to winning the war. Any departure into such costly experiments as state health insurance must weaken our financial ability and our man power to a tremendous extent, for not only will millions of money be required but also hundreds of additional paid officials will be necessary to put and keep this undertaking in operation. Along with this is the dissension and controversy among the people, which is perhaps more weakening than any other influence such as revolutionary measures of this sort always engender. These times of national peril are peculiarly fitting for avoiding doubtful disputations.

[Judge Clifford P. Smith in *Boston* (Mass.) *Herald*]

Now that the *Boston Herald and Journal* has reviewed a book containing an attempt by a doctor of divinity to discredit Christian Science healing, I wish to offer a brief comment and a pertinent quotation from a clergyman whose attitude toward Christian Science is more intelligent.

The New Testament shows beyond question that the practice of the Christian religion includes healing the sick. Such commands as Matt. 10:5–10, compared with Matt. 28:16–20, Mark 16:14–18, John 14:12, are conclusive on this point. The explanations for not complying with the command, "Heal the sick," offered since Christian healing ceased to be usually practiced by Christian ministers, have been palpable excuses. They do not tally with the Master's words or works.

The discovery and development of Christian Science presented an additional difficulty for the traditional excuses. Many different ministers have faced the new situation in many different ways. The author of the book in question has chosen to make a number of hateful remarks about Mrs. Eddy and to deny Christian Science healing entirely. But the reverend gentleman will not escape from his difficulty by that course. Incontestable proofs of Christian Science healing will accumulate against him day by day. Other people will accept these proofs whether he does or not. Quite possibly he himself will turn to Christian Science in an hour of great or extreme need. If so, he will find himself among a goodly company of grateful men who formerly

Digitized by Google

spoke evil of Christian Science, but who now regard it as the divinely promised restoration and fulfillment of original Christianity.

The quotation I would offer is part of a sermon by the Rev. Cyril Hepher, canon of Winchester, reported in the *Church Times* (London) of March 1, 1918. This dignitary of the Church of England said: "Christian Science has now its disciples all over the country and in every class. To answer that we must look to the needs to which they minister. To an age emerging from the materialism of the nineteenth century Christian Science brings the kindling conviction of the supremacy of Spirit over matter. To a psychological generation like our own it offers an education in healthy thinking. To a nervous and high-strung folk it brings health by ridding them of a hundred fears and fancies. Christ was a healer of men's bodies. He bade his disciples pray, anoint, and heal. St. James stands witness against us for our neglect to claim the healing grace of Christ, the Christ whom we believe to be present in his church. We have had faith enough to believe that he was present to absolve, but we have lacked faith to put his power and presence to the visible test of bodily healing. The whole structure of Christian Science, I would almost venture to say, rests upon this gap in our own faith and practice, this imperfection in our catholicity. Let us bring back the sacrament of holy anointing from the oblivion to which we have banished it. It is a poor corrective of a misuse, which has turned a sacrament of life into a preparation for death, entirely to ignore the spiritual ministries of healing which Christ has left to his church."

✧

[Albert F. Gilmore in *Christian Herald*, New York, N. Y.]

In a recent issue a clergyman, who discussed "The End of the Age and How to Meet It," makes reference to Christian Science and forms of theosophy and Buddhism, with the same lack of warrant that is found in the implication that Christian Science has gained its hold in the world through "woman's susceptibility." In classifying Christian Science with theosophy and Buddhism he has fallen into the error of grouping religious beliefs which have nothing whatsoever in common.

Christian Science is the religion of love, the teaching and practice of Jesus reproduced in the twentieth century, and demonstrated as the way to present day salvation. Whether or not its hold is due to woman's susceptibility may be judged from attending the Sunday services and Wednesday evening meetings, or public lectures, where will be found as large a percentage of men as in any other religious denomination, and among them a goodly sprinkling of business and professional men, who find in this teaching the religion of the Master exemplified and made plain.

## Extracts from Letters

[We are privileged to quote from a letter received from Capt. C. H. Lightoller, of London, England. An account of this writer's experience in the sinking of the "Titanic," while a Lieutenant in the British Navy, may be read in *The Christian Science Journal* for October, 1912, page 414.—Ed.]

My old ship has gone down, sunk by collision in the North Sea. This happened on a pretty dirty night and we were cut nearly in two—in fact within an hour of the collision the fore part broke off and floated away. I got everybody away into ships standing by, and with my first lieutenant and a gunner stuck by the remaining two thirds till that also sank five hours later. During that five hours—which I may say was more like five days—one had time to think, but sitting in a chair writing about it is not exactly the same as slowly sinking out in the open sea, with mighty little material help at hand. In fact it just seemed as if every material help would be deliberately withdrawn. My companion destroyer had to leave, our trawler fouled her propeller and drifted away helplessly, and of the remaining trawler, when we sank, all that was visible in the distance was her stern light. One boat was destroyed by the collision, and the remaining boat I had had to send away as the crew were played out. A Carley float (life raft) we had been towing astern had broken adrift and gone. My whaler that had been towing astern of the trawler which was supposed to be standing by us, had also broken adrift and gone. Early in the proceedings a man came to me with a life belt, but just somehow I did not want it.

One or two points stand out very clearly, points I made particular note of. One, I had no inclination to work,—mentally I mean of course,—in fact a distinct disinclination. The feeling, if I can express it, was one of saying to myself, "If I have done my work honestly, earnestly, and wholeheartedly in the past and up to the present, then I can and will stand pat and know it is done." That feeling came repeatedly,—in fact was dominant,—a kind of chin-up-in-the-air knowledge that I had worked conscientiously in the past and had the right to expect to see it through now. The feeling was quite clear, and to me quite understandable, though perhaps I express it badly; however, it was a big point to me.

Finally the ship, or what remained, sank and the three of us were deposited in the sea. Both lieutenant and gunner had patent life-saving coats on that you blow up. I had on a heavy rough overcoat, clothes, boots, etcetera, and my need was immediate and immediately met; for from all quarters came life buoys simply crowding toward me, and furthermore a cork fender, which is a large kind of grass bag stuffed with cork and capable of floating a number of men, used for putting between ships to prevent bumping. I was so crowded that my gunner swimming up cheerily hailed me and asked if I had a raft. I might here mention that he has been studying Science and Health for the past nine months. After about half an hour's swim we were picked up at quarter past two in the morning.

Now, another point, I was not cold in the water. After the three of us joined up and shared the life buoys, the first lieutenant complained bitterly of the cold—the gunner also complained. I was not cold and purposely mentioned it whilst swimming. This is a point with me because it was some twelve months after the "Titanic" foundering that I clearly realized I was not cold in the water on that occasion either—not after the first immersion, and not until picked up by the boats next morning when every one suggested how cold I must be, and of course was. The same thing happened on this occasion after I was hauled out, but not to the same extent and I quickly overcame the suggestion.

The gunner was on watch at the time of the accident, yet the finding of the court martial into the loss of the ——— exonerated me as commanding officer and him as officer of the watch, adding a rider warmly complimenting us both. This to the officer of watch is the greatest demonstration of all. Throughout I encouraged him to await results, and finally pointed out the results, and his last words to me were that he was going direct to the Christian Science reading rooms to obtain another copy of Science and Health. He knows just as well as I know that we both have to thank our understanding of Christian Science.

## Prayer, Silent and Effective

THE First Reader of a Christian Science church was invited to "give the invocation" at a public meeting of citizens. He began to explain to the chairman that our method of prayer differed from the usual form, but was assured that he could do as he thought best. The audience was assembled in a large church, and when he was called upon, he said: "In that sacred book, the Holy Bible, in the sixth chapter of Matthew we read that our dear Lord and Master, Christ Jesus, was teaching his disciples how to pray. He said, 'When thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly.' Then he gave that wonderful prayer which Christianity has come to know as the Lord's Prayer. Let us now have a few moments of silent prayer, after which let us all join in repeating the Lord's Prayer audibly."

A prominent business man of the city, prominent in religious circles also, who was present at this meeting, made no delay in seeking out a reading room in order to procure a copy of "Science and Health with Key to the Scriptures." He explained that he had experienced a great sense of peace during that silent prayer, and wanted to learn how to pray aright. Others sought for healing, explaining to the practitioners that they were moved thereto by the impression they received during the silent prayer at the public meeting.

The world is not unfamiliar with prayer in public on great occasions when an orator is engaged to make the prayer. We used to be told of the famous description that slipped into print regarding one such prayer as being "the most eloquent prayer that was ever addressed to a Boston audience." Assuming that the audience in such a case listened as critics of the performance, their hearts could not be effectually united to God by the prayer. Curiously enough, one who engaged much in public audible prayer and denounced Mrs. Eddy as "prayerless," was present at the session of the Christian Scientists during the World's Parliament of Religions in 1893, and joined with them in silent prayer, the form of prayer she had used since 1866.

It is interesting to learn the attitude which Mrs. Eddy commends in the individual while engaged in prayer. In an address to the Concord church she pictures a placid lake wherein is peacefully reflected the expanse of sky and the mild glory of the moon. She notes how this will stir the heart, and says (Miscellany, p. 150): "Then, in speechless prayer, ask God to enable you to reflect God, to become His own image and likeness, even the calm, clear, radiant reflection of Christ's glory, healing the sick, bringing the sinner to repentance, and raising the spiritually dead in trespasses and sins to life in God."

The Leader of the Christian Science movement did not deal in precepts merely, but was in all points an example. Peter's exhortation to the elders about not overruling God's heritage, "but being ensamples to the flock," and Paul's guidance to Timothy when he said, "Study to shew thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth;" and his exhortation that this young disciple should be "an example of the believers, in word, in conversation, in charity, in spirit, in faith, in purity," were fully understood and exemplified by Mrs. Eddy. Consequently it is of great moment to-day to know her way of prayer and the thoughts she gained in communion with divine Mind. She writes (Miscellany, p. 220) regarding this: "Each day I pray for the pacification of all national difficulties, for the brotherhood of man, for the end of idolatry and infidelity, and for the growth and establishment of Christian religion—Christ's Christianity. I also have faith that my prayer availeth, and that He who is overturning will overturn until He whose right it is shall reign." These words appear as if written for our help in this very hour of the world's need.

We are not, then, without resource if we wish to help ourselves and others. A child's hands may be weak, but a child can pray. Wherever there is love there may also be prayer. Joy and strength are awaiting all mankind and they can find the solution of all their problems in the way indicated by Christian Science. Mrs. Eddy states this in "No and Yes" (p. 39): "True prayer is not asking God for love; it is learning to love, and to include all mankind in one affection. Prayer is the utilization of the love wherewith He loves us. Prayer begets an awakened desire to be and do good. It makes new and scientific discoveries of God, of His goodness and power. It shows us more clearly than we saw before, what we already have and are; and most of all, it shows us what God is. Advancing in this light, we reflect it; and this light reveals the pure Mind-pictures, in silent prayer, even as photography grasps the solar light to portray the face of pleasant thought."

WILLIAM P. MCKENZIE.

## Labor of Love

IN the language of affairs the word labor has acquired a restricted sense which does an injustice to the word itself and to those associated therewith. In this sense labor is defined as meaning, "Those who labor; the laboring class collectively." In the United States a special holiday has been set apart under the designation of Labor Day. In order that the meaning of this day may be raised from matter into mind, it must be recognized that all labor is primarily mental, and that all who think productively belong to the classification of "those who labor." In this manner Labor Day acquires a meaning transcending class and condition. One step further in our metaphysical definition brings us to the recognition that the highest type of labor is the labor of love,—and wherein can human beings most assuredly perform this labor of love for their fellow men? The scientifically Christian answer indicates that the highest service to others is to ascend one's self out of the valley of mist into the radiant heights of Truth, thereby drawing others unto the light.

Man as the exact image and likeness of God thinks invariably in accord with perfect Mind; indeed cannot think otherwise, for there is nothing imperfect in the divine Mind. The unreflecting human may argue that these statements are academic and superfine, hence of no practical value. But at this point divine Science becomes Christian Science through its application to human needs, for human footsteps must be taken in Christian Science. Here then is the answer to the cry of the sick and wounded, the shocked, the be-

Digitized by Google

trayed, the sinning, and the hopeless. Here is the supreme labor of love. Behold, the truth can be realized here and now and thereby failing strength can be restored, blurred vision cleared, hate replaced by love, and sorrow wiped away by joy.

The reward of labor corresponds to the quality of labor. If the sowing of the seed has been a labor of love, the harvest will satisfy abundantly. If the builder communes with God when he lays the foundations of the house, his labor of love will withstand the attempts of hate or jealousy to undermine it. As the psalmist sang: "Except the Lord build the house, they labour in vain that build it: except the Lord keep the city, the watchman waketh but in vain." The sentinel who does not love the army of truth and liberty may go to sleep at his post; the merchant who dislikes or mistakes his vocation fails to serve his customers properly; the housekeeper who cannot make of her occupation a labor of love cannot make a happy home for others. So the child who cannot be interested in school work wishes to play truant in order to find something he can enjoy. The fruit tree yields "fruit after his kind, whose seed is in itself." In human experience seeds of fear, envy, self-pity, revenge, produce bitter fruit and sour grapes; but in the absolute Science of real being the seed is of good quality only and the fruit good. In "Science and Health with Key to the Scriptures" (p. 507) Mrs. Eddy has written: "Creation is ever appearing, and must ever continue to appear from the nature of its inexhaustible source. Mortal sense inverts this appearing and calls ideas material. Thus misinterpreted, the divine idea seems to fall to the level of a human or material belief, called mortal man. But the seed is in itself, only as the divine Mind is All and reproduces all—as Mind is the multiplier, and Mind's infinite idea, man and the universe, is the product."

In Christian Science the approach to the solution of the problems of mankind is through the realization of Truth. Therefore the work of healing and regenerating becomes a labor of love. Those who sit in darkness are sufficiently punished by that darkness. The light brings them deliverance; their prayerful desire is answered; they themselves become laborers in God's vineyard and the cycle of good, in the unity of good, continues "yielding fruit after his kind, whose seed is in itself." These "are they, which in an honest and good heart, having heard the word, keep it, and bring forth fruit with patience."

To lift the concept of labor out of matter into joyous mental activity will answer pending questions of church and state, school and factory. Much contention arises to-day from the mistaken concept that labor must be drudgery, must be ill requited and forced upon unwilling masses. But behold the labors of those who seek distraction, the endless pains people will give themselves to pursue what they crave, the hardships faced by the explorers, by those who love nature enough to wrest its secrets from it, by students of recondite subjects! Think of the mothers of children, whose work is never done; the nurses watching beside the sick; the generals in the field, and especially the reformers working to save the world, while the world knows them not!

God is on the side of honest labor. His law sustains it, gladdens it, makes it fruitful. His reward is sure. Mrs. Eddy writes on page 384 of Science and Health: "Let us reassure ourselves with the law of Love. God never punishes man for doing right, for honest labor, or for deeds of kindness, though they expose him to fatigue, cold, heat, contagion. If man seems to incur the penalty through matter, this is but a belief of mortal mind, not an enactment of wisdom, and man has only to enter his protest against this belief in order to annul it."

Let this then be the preeminent labor of love to-day, to ease the burden of those "that labour and are heavy laden" by cheerfully rising through demonstration into the heights. Thus will Labor Day and every day be a veritable day of love for all mankind.

WILLIAM D. MCCRACKAN.

## Jacob's Ladder

IN the twenty-eighth chapter of Genesis we read the story of Jacob's departure from his home, when he went out into an unknown world, as so many must to-day, in order to work out his human problems and to learn man's possibilities as a child of God. He was leaving behind him the tender love and watchful care of an earthly father and mother, but happily for him they had not neglected to teach him that in the divine fatherhood and motherhood he could find the verity of that of which human affection at its best is but a reflection. All Bible students have read of Jacob's lying down to sleep, far from any human abode, with stones for his pillows, and also of his dream in which he beheld "a ladder set up on the earth, and the top of it reached to heaven: and behold the angels of God ascending and descending on it." This was truly a wonderful vision, and it is in no wise strange that when morning came Jacob was moved to say, "This is none other but the house of God, and this is the gate of heaven."

Throughout all the years spiritually minded people have been gathering lessons from this story of Jacob's ladder; and many have seen that because it may at any time come into their own experience, the thing for them to do is to be ready always to receive the angelic message. Too many have taken the lessons of the ladder in an easy sort of way, and felt that a temporary uplifting was a grand thing, and so it truly is, but the experiences of the uplifted hour remain to be put into practice even in the very lowliest ways on the plane of daily duty. Strictly speaking, Jacob had not begun to climb when the vision came to him; but when the vision of Truth comes to us we must either follow its leadings or fail utterly in all that we attempt on the human plane. It matters not how humble to human sense any duty may be, it will not do to argue that it is material and that therefore we can pass it by. If we bravely take up any task which comes to us, we may make it a sort of slate and pencil with which to work out the great problem of being, namely, to show that inasmuch as perfection is a perpetual demand of divine law we can obey it, since man as God's idea has unlimited possibilities and capabilities.

Mrs. Eddy has a wonderful lesson for us on page 85 of "Retrospection and Introspection," where she speaks of the methods which are necessary for the advance of humanity at this period. After speaking with commendation of the present need for students' associations and church organizations, as well as "any other organic operative method that may commend itself as useful to the Cause and beneficial to mankind," she adds, "Of this also rest assured, that books and teaching are but a ladder let down from the heaven of Truth and Love, upon which angelic thoughts ascend and descend, bearing on their pinions of light the Christ-spirit."

Students of Christian Science have proved for themselves in multitudinous ways the value of what is here presented, but perhaps we do not often enough make use of the ladder "let down from the heaven of Truth and Love" and apply the angelic messages to all that we undertake. Strictly speaking, we cannot ourselves begin to ascend the ladder

Digitized by Google

until after we have applied the truth in many ways, and proved to ourselves as well as to others our entire sincerity and the diligence which is inseparable from all true effort. If Jacob had merely spent the following years in telling others of his wonderful vision, his problems would have been waiting indefinitely, and little would have been accomplished. We read that he went among people who had not risen above idolatry, who had their household gods even as so many have to-day who yet claim to be Christian people; but because Jacob was not disobedient to the heavenly vision another and greater one came to him at Peniel, when mortal sense struggled against the spiritual ideal, and its powerlessness was shown. This later experience brought such a spiritual transformation that he was able to declare he had "seen God face to face." Immediately after this he was reconciled to his brother, and fraternal love took the place of long-time hate and jealousy.

We must not forget that through the years which intervened between Jacob's first vision and that of Peniel he had toiled diligently among the flocks and herds until he had acquired great wealth; but it is clear that he never forgot the vision of the ladder, or failed to apply it to the best of his understanding in the working out of all his human problems. As we gain the spiritual sense of the Scriptures, we see how limitless are the blessings which follow obedience to the truth spiritually understood; and while Jacob's sons as a whole caught only a small measure of their father's spiritual understanding, yet in the case of Joseph there was the princely nature which came with Jacob's own transformation at Peniel, and through which Joseph was never subject to sensuality or the tyranny of evil, but quickly rose to victory over it at every step of the way. We cannot too often remember that the demand rests upon us to make practical all the divine messages which come down the ladder "from the heaven of Truth and Love;" for, as a poet has said,—

We mount for vision, but below
The paths of daily duty go;
And nobler life herein shall own
The pattern on the mountain shown.

ANNIE M. KNOTT.

# Among the Churches

## Current Notes

BROOKLYN, N. Y.—Bay Ridge Christian Scientists have a beautiful new edifice on Sixty-seventh Street adjoining the Bay Ridge High School. It is Second Church of Christ, Scientist, formerly located at Eighty-sixth Street and Fort Hamilton Parkway. The new structure cost forty thousand dollars. The plot consists of four lots facing Bay Ridge Park.—*Brooklyn Eagle.*

DAWSON, YUKON TERRITORY, CANADA.—A reading room has been opened by the Christian Science Society in the building on the northwest corner of King Street and Third Avenue, opposite the post office. The place is neatly arranged, and will have papers and other literature there all the time. It will be heated when necessary, and will be open daily to every one from 11 a.m. to 5 p.m.

*Dawson News.*

RACINE, WIS.—The S. C. Buchanan homestead at the northwest corner of College Avenue and Ninth Street has been purchased by First Church of Christ, Scientist, and will be used for church purposes. Since that congregation sold the old church home at Seventh and Main Streets it has been holding services in the quarters of the Woman's Club in the Buffham Block on Main Street. Now that a site for a new home has been secured, it is expected that a handsome edifice will adorn the Buchanan corner in time. The corner is one of the finest in the city, being located in a beautiful residential district and opposite West Park.—*Racine Journal.*

# The Lectures

OTTAWA, ONTARIO, CANADA (First Church).—Frank Bell, lecturer; introduced by Capt. W. S. Lawson, who said in part:—

It has been said that the failure of Christianity to meet the needs of the human race is apparent to-day, but such a statement must include the assumption that Christianity in its history of nineteen centuries has received a fair and adequate trial. There are innumerable opinions as to what the term Christianity implies, as is shown by the numerous sects into which Christendom has become divided, a condition mainly brought about by the introduction of various doctrines, ritualism, and the literal interpretation of some of the Biblical allegories, which have beclouded the teachings of the master Christian to such a degree that quite one half of his statements have been rejected as being applicable only to the period in which he himself lived and not for all time.

The true or full meaning of Jesus' teaching has in consequence been lost for centuries, and the world had ceased to demand the practical proof, or signs, which he said would "follow them that believe." The demand for this proof, however, is being revived, and is becoming more insistent. This demand is being met by Christian Science, whose mission is capable of proof by demonstration, and is demonstrable in proportion to our understanding of its teachings. Accepting the inspired Word of the Bible, it reveals the possibility of attaining happiness and heaven, not in some future state beyond the grave only, but here and now.

*Ottawa Citizen.*

CALDWELL, IDAHO (Society).—Paul Stark Seeley, lecturer; introduced by Mrs. Daisy F. Vinson, who said in part:—

This is the doctrine of Christian Science,—this new-old religion,—that God is an ever present help, a God at hand, and not afar off, who, according to the psalmist, "forgiveth all thine iniquities; who healeth all thy diseases." Thousands all over the world are rejoicing in this better understanding of God and making practical use of it in their homes, in their offices, and in every environment and walk of life. Needless to say, never before has there been a greater need of this right apprehension of God and man's relationship to Him than there is now, and Christian Science has come to meet this need.—*The Caldwell Tribune.*

SARATOGA SPRINGS, N. Y. (Society).—Frank Bell, lecturer; introduced by Arthur H. Richardson, who said in part:—

The master Christian said, "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free." It is because Christian Science is the truth that, in the fifty years since the discovery by Mrs. Eddy of its divine Principle and spiritual law of healing, this new-old religion has encircled the earth. It is because of this same truth that, in the troubled times of to-day, men are turning to Christian Science in such increasing numbers to find the healing of all manner of disease and surcease of sorrow and distress.

Digitized by Google

HERMOSA BEACH, CAL. (First Church).—Dr. Walton Hubbard, lecturer; introduced by Mrs. Artie M. Waggoner, who said in part:—

Christian Science is attracting unusual attention to-day throughout the world, and this may well be attributed to the fact that there has never been a time in the history of mankind when heart-sickened and suffering humanity has felt so much the need of something more substantial upon which to lean than mere creeds, doctrines, and human hypotheses. In the words of Job people are crying out, "Oh that I knew where I might find him! that I might come even to his seat!" Jesus said, "If ye continue in my word, . . . ye shall know the truth, and the truth shall make you free." Christian Science comes with a comforting message for all mankind, teaching us where and how we may find God, what this truth is, and how it makes us free.

LONDON, ENGLAND (First Church).—John Sidney Braithwaite, lecturer; introduced by the Hon. Mrs. Mabel Rowley, who said in part:—

Christian Scientists are often accused of giving their thanks to Mrs. Eddy too profusely. I thought so myself at one time. Now suppose that a man was dying of thirst in a weary land and that a stranger came to him bearing a pitcher of pure water and gave him to drink of that water and thereby saved his life. Would not that man feel the most unbounded gratitude to the kind stranger? True, it was the water which quenched his thirst and revived him, but that would not lessen his sense of thankfulness to the bearer of it. Further, supposing this friend showed the man where the well was to be found from which the water was drawn and encouraged him to draw the water for himself and thirst no more, would not that bring a still greater sense of gratitude? Now this is just what Mrs. Eddy has done for you and for me and for all mankind. She has led us to the wellspring of living water, which is to be found in the Bible, and she has marked out the pathway so clearly that none need miss it.

CHARLESTON, W. VA. (First Church).—Charles I. Ohrenstein, lecturer; introduced by C. C. Wiley, who said in part:—

Mankind is becoming more and more aroused to the importance of a fuller understanding of God. It is seeking a stronger staff than worldly knowledge and human conjecture. Like the prodigal son, mankind is becoming dissatisfied with the husks of materiality, and is making ready to arise and go unto the Father. The infinite One, the God of the Scriptures, the ever present, all-powerful God, Love, "the same yesterday, and to day, and for ever," is the God of Christian Science, who "forgiveth all thine iniquities; who healeth all thy diseases."—*The Charleston Leader.*

YORK, NEB. (Society).—Clarence W. Chadwick, lecturer; introduced by J. G. Alden, who said in part:—

The world needs to-day the transforming touch of a teaching and practice which will not only reveal an all-powerful, ever present God who is Truth and Love, but the ability through the recognition of that Truth to purify human experience and banish sin and discord. Christian Science claims to be such a teaching, and it proves its teaching by the beneficent moral and physical results it accomplishes.

CHICAGO, ILL. (Fourteenth Church).—William W. Porter, lecturer; introduced by Miss Edith V. Watson, who said in part:—

All down the ages, since ever the world began, mortal man has been looking for a way out of pain and tears, and now more than ever, he seeks relief from what Mrs. Eddy so aptly terms "the jarring testimony of the material senses" (Science and Health, p. 306). Can the world be freed from bondage and torture? Christ Jesus said it could, and Mrs. Eddy, taught of God, interprets for us the "law of the Spirit of life in Christ Jesus," which Paul said made him "free from the law of sin and death." "God is no respecter of persons." His law is available to all, and Christian Scientists are learning to apply this law, learning to think as God thinks, and so to live in Him.

NEWPORT, KENTUCKY (First Church).—Virgil O. Strickler, lecturer; introduced by Richard E. Lincoln, who said in part:—

In the fifth chapter of Matthew we read that Jesus said: "Think not that I am come to destroy the law, or the prophets: I am not come to destroy, but to fulfil,"—by demonstrating the power of God, or good, by preaching the gospel to every creature, and by healing the sick. About fifty years ago this law which Jesus was fulfilling, was revealed to Mary Baker Eddy, who after years of searching the Scriptures found the key which she knew would open the Bible for all sincere seekers of this truth, and which she has given to us in "Science and Health with Key to the Scriptures."

PITTSBURG, KAN. (First Church).—Ezra W. Palmer, lecturer; introduced by S. E. Seymour, who said in part:—

All through the Bible are promises of health, strength, happiness, and peace. Christian Science is proving that we are able to bring these promises into our individual experience in proportion to our right understanding of God.

## Lectures to be Delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

CALIFORNIA—Long Beach: Municipal Auditorium, 3 p.m., Sept. 8.
Los Angeles (Second Church): Church Edifice, 948 West Adams Street, 8 p.m., Sept. 13.
Los Angeles (Third Church): Church Edifice, 734 South Hope Street, 8 p.m., Sept. 6.
Santa Ana: Grand Opera House, Fourth and Bush, 8 p.m., Sept. 12.
Santa Monica: Santa Monica Bay Woman's Club, 8 p.m., Sept. 10.

CANADA—Hamilton, Ontario: Temple Theater, 3 p.m., Sept. 8.
Saskatoon, Saskatchewan: Old Daylight Theater, 8:30 p.m., Sept. 13.

ENGLAND—London (First Church): Church Edifice, Sloane Terrace, S. W. 1, 3 p.m., Sept. 15.
London (Second Church): Metropolitan Music Hall, Edgeware Road, 3:30 p.m., Sept. 29.
London (Sixth Church): Hippodrome, Putney, 3 p.m., Oct. 13.

ILLINOIS—Chicago (Seventh Church): Church Edifice, 5318 Kenmore Avenue, 8 p.m., Sept. 5 and 6.

MAINE—Auburn and Lewiston: Empire Theater, Lewiston, 3 p.m., Sept. 8.
Bath: Universalist Church, 8 p.m., Sept. 5.
Rockland: Church Edifice, Cedar Street, 8 p.m., Sept. 6.

NEBRASKA—Norfolk (First Church): Library Hall, Public Library, Main and Eighth Streets, 2:30 p.m., Sept. 8.

NEW HAMPSHIRE—Milford: Town Hall, 8 p.m., Sept. 13.

NEW JERSEY—Ridgewood: Play House, 3:30 p.m., Sept. 8.

NEW YORK—Elmira: Colonial Theater, 3 p.m., Sept. 8.

OREGON—Portland (Sixth Church): Masonic Temple, 388 Yamhill Street, 8 p.m., Sept. 12 and 13.

RHODE ISLAND—Newport: Masonic Hall, School Street, 8 p.m., Sept. 9.

WASHINGTON—Aberdeen: Grand Theater, 506-8 East Market Street, 8 p.m., Sept. 6.
Olympia: Ray Theater, 8 p.m., Sept. 5.
Snohomish: Eagles Hall, 3 p.m., Sept. 8.

# Testimonies of Healing

I am sending this testimony of my thankfulness for God's loving-kindness, His ever present protection and guidance, in the hope that some who read it may be helped thereby. I have had many very helpful physical healings, having been healed of lung trouble, heart disease, and a number of minor ailments.

Since entering the British Army my experiences have one and all been unceasing manifestations of the power of divine Love. I have had my own service in full every Sunday both in camp in England and in camp and trenches alike in France, also during the time I have been in hospital in England, when unable to attend a Christian Science church. I have been very much helped during my stay in hospital by the knowledge I have gained of Christian Science, in overcoming trench fever, for my condition at one time was looked on as very critical. I held on to the truth, and although I could get no Christian Science practitioner I knew that God was just as much an ever present help to me then as He had been all the time I had known Him as divine Principle, Love; and I worked mentally as well as I could, with the result that in four days I was considered well enough to be sent to England. For that demonstration I am very grateful indeed.

When in the trenches in France I had some very interesting and helpful experiences. At one time we were engaged nights in making a new front line of trenches and communication trenches. Before going on any working parties, in fact every day, whether in the line or out, I used to read the twenty-fifth, twenty-seventh, ninety-first, and one hundred and seventh psalms, to repeat the daily prayer from the Manual, and the section "Alertness to Duty" (Art. VIII, Sects. 4, 6), also a verse from Mrs. Eddy's beautiful poem "The New Century" (Poems, p. 22), which was indeed a greater help than I can ever find words to express:—

'Tis writ on earth, on leaf and flower:
Love hath one race, one realm, one power.
Dear God! how great, how good Thou art
To heal humanity's sore heart;
To probe the wound, then pour the balm—
A life perfected, strong and calm.
The dark domain of pain and sin
Surrenders—Love doth enter in,
And peace is won, and lost is vice:
Right reigns, and blood was not its price.

One night I went on a working party, and I, along with a friend, was talking about the ninety-first psalm all the way down from our support lines to the new lines, and about God's care and protection for His children. All the time we were talking I was working mentally to deny the error seeming to clamor so loud around us, for the enemy were bombarding rather heavily, and especially where we were destined to work, as we found when we arrived there. The words of Mrs. Eddy's poem already referred to, and the psalms and citations from the Manual, were with me all the time we were working, and the result of the prayer thus offered up as an affirmation of and to God, good, was splendid. During the previous four hours the working party then on duty had suffered eleven casualties, and during the four hours we were there not a single casualty was sustained, though the bombardment did not slacken at all. My friend and I were put on a piece of ground that had not been started at all, and as it happened to be a road and frozen we did not get much below the surface during the time on duty, but I am very glad to say that neither of us felt the least fear, although to be "on the top" for four hours is not reckoned very safe during a bombardment; but I know that the truth realized allayed our fears, and no doubt our previous talk on the ninety-first psalm was a great help. My friend was not a Christian Scientist, but he used to talk a good deal with me, and after that incident he read my Bible and Science and Health and also some of the hymns occasionally.

There was another incident which happened previous to this, where I had to work more against fear than at any other time in the line. It was while moving up into the front line in a large wood, and of course it is very difficult to see in a wood at night, given good conditions, even when some of the trees have been shot down. We had been in the wood on the way to the front line some little time when the enemy commenced a barrage including a large percentage of gas shells. We had, of course, to put on our gas masks and stand, sit, or lie down where we were. Just at first fear started to crop up, saying how unsafe it was to be "on the top" in a barrage, having to stay there unable to see one's way about, even to find a shell hole for cover, and many more similar suggestions. I think it must have been the thought that I could not see which started the fear. I just set to work to contradict all these suggestions, and I realized that God, being divine Mind, knew all, and being good, knew nothing else, and as man reflects God he too can know nothing else but good. I knew that "God is light, and in him is no darkness at all." I began to realize that I did not need to see materially, but that I did need to "see"—understand—spiritually, that God was our dwelling place, that "he that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty." When I realized this the fear vanished and the sweet peace of overcoming remained, that peace "which passeth all understanding." When we were able to take off our gas masks some time later we found we were only fifty to one hundred yards from the front line, and we had been there all that time without a single man out of the battalion being injured. This was to me a very great help. It proved to me that the real battle we have to fight is mental and that the victory is ours if we will only rely upon God, good; and, as the poem says, "blood was not its price." During the time I was with my platoon we did not suffer a single casualty, and we were in reserve, support, and front line at three different sectors of the British front.

For these manifestations of God's love I can but try to show my gratitude by striving to live what I know of the truth at all times, by striving to realize as much in England as in France the healing and saving power of the truth as taught in Christian Science. If there is one thing that army life has shown me more than anything else it is the universality of Love, and the consequent "claim" of error to be universal also, I saw to be false. It is, however, as necessary for each individual Christian Scientist to work hard mentally to destroy this erroneous belief in his own "front line," his own consciousness, as it is for the soldier to overcome the testimony of the material senses in the firing line. Surely if this is done the world will be better by the attainment of a secure, righteous, and lasting peace.

DONALD M. SOUTHWART, Halifax, Yorkshire, England.

✧

I turned to Christian Science for comfort and help when my heart was filled with grief, resentment, and bitterness. Christian Science gave me the Comforter, revealed to me the mother heart of God, and has made known to me the truth which enters into each and every problem of our daily life; for Love rightfully understood meets every need of humanity,—this inexhaustible Love, which blesses all. I am thankful that through the study of Christian Science I have come to understand the unreality of those things which

Digitized by Google

held me in bondage. With the consciousness of this great and beautiful truth, we can never for an instant lose sight of our divine inheritance; thus our longings are satisfied and the hungry heart is filled with goodness.

Another reason why I am a Christian Scientist is that each step of the way can be demonstrated. Mrs. Eddy tells us: "Hold perpetually this thought,—that it is the spiritual idea, the Holy Ghost and Christ, which enables you to demonstrate, with scientific certainty, the rule of healing, based upon its divine Principle, Love, underlying, overlying, and encompassing all true being" (Science and Health, p. 496). If we demonstrate each step, we know we are doing the work which Jesus commanded us to do. It may take some time to make the demonstration of the healing, which we so much desire; there may be much false sense to overcome; we may need to learn the lesson of patience, as well as many other lessons, but the promise is that when we search for the truth with our whole heart, we shall find it. If we are searching for the love which never fails, we shall recognize God's law, and the unreality of man-made laws when they come before us to be destroyed.

I will speak of a healing, in the hope that by so doing others will be blessed as I have been. From childhood I had been in bondage to waves of grief which would come over me and make me most unhappy. I could not seem to account for this condition, for the spells would come on at any time, even in the midst of great joy and happiness; sometimes they were of short duration, sometimes longer. I had nothing to be sad about that I could help; it did not seem to be despondency, but grief. It seemed as if nothing could help this condition; therefore through all the years I never spoke of it to anyone, but blamed only myself. Many times I thought it due to lack of gratitude. Some time ago a few words of Christian Science were spoken to me which opened the door of my thought, and at once I saw the unreality of this bondage, the unreality of man-made laws, of prenatal laws, of laws of heredity. I saw that it was my thought which gave these so-called laws power; that grief, sorrow, and sadness were not of God, for there is no sorrow in divine Mind. Being God's child, then, I could express only joy and love. This was the real, and the unreal vanished. I found myself no longer in bondage to the unreal. Christian Science was the Comforter, and divine Love the healer. No human tongue can tell what this healing means to me. I rejoice and am "exceeding glad." I thank God for His gentle leading, tenderness, and watchful care, and for Christian Science, which never fails.

(Mrs.) Blanche G. Norris, Newton Centre, Mass.

✧

As the testimonies have been a great encouragement to me and have often been the means of helping me work out my problems, I should like to express a measure of my appreciation in giving a few of our many healings in Christian Science.

Four years ago my grandmother, who was then eighty-one years of age, was healed of paralysis. For three days she had the loving help of a practitioner and each day some discordant condition yielded. On the third day, with the knowledge that "underneath are the everlasting arms," she walked. One day she caught her heel in a torn stair carpet, and fell, striking her head on a register and losing consciousness. She asked for help in Christian Science and in about an hour even the lameness was gone. She was healed of acute lung trouble in four days. When moving into a strange house she fell down the basement stairs and the teeth of her comb were forced into her scalp. A practitioner was called at once and an hour and a half later my grandmother was able to enjoy her dinner and move about, free from pain. Time and time again she has found that Christian Science is an ever present help.

The children have been saved the experiences of many contagious diseases, all symptoms disappearing, sometimes before being identified. For a number of years the second child had been hard of hearing and suffered great pain in the ear, accompanied by an unpleasant discharge. This was overcome by Christian Science, and she now hears perfectly. The eldest child had trouble about retaining food at times and was doctored for worms and the usual causes, but this difficulty disappeared during our first year in Christian Science and her condition has been perfectly normal since.

My own healing makes me express deep gratitude for the *Monitor*. Like the woman in the Bible, I had had "an issue of blood," though not for so many years. My attention was called to the change wrought in some relatives through the study of Christian Science and I decided to investigate its teachings. An article in the *Monitor* was the source of a complete, instantaneous healing. Hardly a *Monitor* article has been missed since that time, and I am deeply grateful for all the literature, especially for the new English-French *Herald* which will be such a help to our soldiers at the front.

(Mrs.) Fay Wells, Detroit, Mich.

✧

As a student of Christian Science it is my joy and privilege to express heartfelt gratitude for the many blessings that have come into my life through the faithful study and practical application of this beautiful truth. The first sentence in the Preface of Science and Health, "To those leaning on the sustaining infinite, to-day is big with blessings," is a truth of which I make daily use.

I came to Christian Science four years ago in gratitude for the wonderful healing of my baby daughter, who was then two years and a half old. To mortal sense this little one had been dangerously ill for days, suffering from whooping cough and a complication of diseases caused by this malady. She was having the best of medical care and attention, but steadily and continually grew worse day by day; and when at last these most excellent physicians informed us that they had exhausted their skill and could do no more for her, my husband and I were in the depths of sorrow and despair, as we watched by the side of this little one, who was then in "the valley of the shadow of death." But God sent His angel and delivered us. At that time we had one among our friends who had been healed through the ministrations of Christian Science, and she recommended it to us and urged us to try it. At first we thought we could not trust our baby to it; but realizing that she was beyond all human aid, reluctantly and as a last and only resort we decided to do so, having, as we believed, much faith in God but none in Christian Science, for prior to this time we had never heard of this glorious teaching except to hear it ridiculed.

Quickly my husband telephoned to a practitioner, and in a very few moments after she commenced treatment a beautiful change took place. It seemed to me as if the Master had said, Baby, I say unto thee, Arise; for the pale little face grew pink, she noticed us, and wanted something to eat. From that moment her recovery was rapid and permanent, to the astonishment of all who knew her. This same child is now a happy, merry little girl of six years and a half, and has had the privilege of attending the Christian Science Sunday school since she was old enough. She is herself a loyal

Digitized by Google

little student, having a demonstrable understanding of this healing truth. Her beautiful healing was a milestone that marked a complete turning about, in which all things became new to us.

Gratefully and lovingly and humbly we immediately began the investigation and study of Christian Science, and since then it has been our only physician and has abundantly met our every need. Every day there are many proofs of the loving-kindness, care, and protection of our Father-Mother God. We have also had many other beautiful demonstrations in our home, and I have had the opportunity of proving what I understood of Truth by doing healing work not only for myself but for others, for which I am most grateful. Christian Science is a religion of love, consecration, and service, yet full of peace and joy, bringing sunshine and gladness into the home and peace and comfort to the weary and heavy-laden. To me it is the "pearl of great price." The way grows brighter and brighter, and I know that it will continue to grow brighter "unto the perfect day."

I am deeply thankful to God and grateful to our revered Leader, Mrs. Eddy, who has so lovingly shown us the way to Christ, Truth. I am very grateful for the knowledge that each testimony of healing is so thoroughly investigated, and deeply appreciate the faithful, loving, and unselfish labors of all those at headquarters.

(Mrs.) Alva Floyd Miller, San Francisco, Cal.

✧

In Proverbs we read, "In all thy ways acknowledge him, and he shall direct thy paths," while on page 372 of "Science and Health with Key to the Scriptures" by Mrs. Eddy, we find the following correlative statement: "In Christian Science, a denial of Truth is fatal, while a just acknowledgment of Truth and of what it has done for us is an effectual help." My prayer is that my life may express the depth of gratitude I experience as I recall the innumerable reasons I have for rejoicing over the advent of Christian Science into my life. Eight years ago, when I became interested in this inexhaustible subject, I was far from realizing "the glorious liberty of the children of God." I seldom went inside a church, although I had been carefully reared by a loving Christian mother, and was for several years active in the work of an orthodox church. As I grew to young manhood my interest in matters religious waned appreciably, for I found little to attract me in the promise of a salvation afar off.

At this stage, when worldly pursuits and material joys were predominant, the healing by Christian Science of one near and dear caused me to take up the study of this new-old religion. In it I found peace, inspiration, and a new understanding of the loving care of God, who had always before seemed a being far removed from daily experience. In the years that have followed I have been privileged to be the recipient of many healings of a so-called physical nature. Glasses, which I had worn for several years and which an experienced oculist had told me never to remove except on retiring, were taken off one night and never put on again; colds, to which I had been subject since childhood, have been overcome in short order; a stiff neck, so painful as to cause intense suffering with every movement, was healed almost without my knowledge; while headaches and a seeming disposition to stomach trouble have also left me. Physically, mentally, and spiritually I have been elevated to a condition far more nearly approaching that at-one-ment with God we are all seeking than was ever the case before I became a student of Christian Science.

I am grateful for these manifestations of the abundance of good and also for others too numerous to record; grateful for the Christian Science literature, which now constitutes practically my entire reading, although formerly I was a devotee of novels and the daily newspapers; grateful to the one who first brought Christian Science to my attention; grateful for the inestimable privilege of class instruction, for the fact that I am now enabled to give my time to the loving task of offering spiritual food to others in need, and most of all for the pure, exalted life of our revered Leader, which enabled her, as she says on page 171 of Science and Health, to "reopen with the key of divine Science the gates of Paradise which human beliefs have closed."

Roy L. Harvey, Washington, D. C.

✧

I became fully convinced as to the demonstrable healing power of Christian Science after the complete healing of an ingrowing nail on my foot which had troubled me very much for about three years. Shortly before making this first demonstration I had been gradually coming to a point where I doubted not only the Bible but the existence of God Himself. This I believe was caused by the fact that I was practically interested in nothing but the study of natural science, and therefore was learning to doubt all statements which could not be proved to be demonstrable facts dependent upon fixed laws. For this reason the most beautiful sermon excited only hope for the time being and then was forgotten entirely. Although claiming to be a student of physical science, the thought never occured to me that Christianity could be scientific or that the Bible was based on a scientific fact; namely, a divine Principle which rules all science. I feel deeply grateful to Mrs. Eddy for showing me how my love for scientific studies can be applied to the subject of religion, and for the spirit of enlightenment which this has made possible.—Fred A. Gritzner, Rochester, N. Y.

✧

What have I to be grateful for in Christian Science? I have but to ask myself the question and immediately an abundance of blessings spring up in thought, and because of my gratitude I wish to tell of a few.

I am finding Christian Science to be indeed, as the psalmist sang, "more to be desired . . . than gold, yea, than much fine gold." My foremost blessing, that for which I am most grateful, is the spiritual uplift, the peace and security gained through the understanding which comes from the daily study of the Lesson-Sermons and other Christian Science literature. Christian Science meets our every need in the home and in business alike. It is always a very present help. I have been healed many times in the past ten years, and our three sons know no other than the one great Physician.

I would like to tell of an experience the oldest boy had in his school. It was reported by the physicians that there was an epidemic of smallpox in the schools and they decided to have every child in the public schools vaccinated or expelled from school. This was not supported by statute law, and as we had some knowledge of Christian Science and knew that it is able to prevent disease as well as to cure it, we applied for treatment and continued to send the child to school without complying with the demands of the physicians. One day when all the children but four or five had been vaccinated, the teacher stated that the physicians would be there the following morning to vaccinate the rest. The next morning our son, who was but eight years of age, cried and said he did not want to go to school, fearing they

Digitized by Google

would compel him to receive their treatment. He was assured that they could do nothing more than send him home and that his safety could be proved as in the case of Daniel, who had seemed to come under a man-made law when he was cast into the den of lions but had come out unscratched. Also we told him how the three Hebrew children were cast into the fiery furnace but came out unharmed. We then called up the practitioner and asked for help and soon the little fellow went off happily. Instead of receiving vaccination, being expelled from school, or taking the disease, he was delivered entirely from the law of superstition, for nothing further was ever said to him about it, and in a short time he was promoted to the upper class. The demands of the physicians were repealed, and Christian Science children throughout the city were permitted to continue in school without further annoyance.

This same child at an earlier date was stricken with what appeared to be very severe throat trouble accompanied by a high fever. We called a practitioner that evening and she said that Christian Scientists were law-abiding citizens, and unless the ailment was overcome that evening it would have to be reported to the board of health the following morning. Both my husband and I joined in declaring the truth as best we knew how and the next morning the child was up and dressed with the rest of the family. That morning he went about two blocks to the office of the practitioner for a treatment and soon afterward I saw him coming down the street bouncing a rubber ball—healed and happy. This indeed seemed wonderful to me, as there had been such a remarkable change in a short time.

I could recount a number of beautiful healings in the family, but will mention just one more. I was healed of what is known as blood poisoning at childbirth, when the condition was what doctors consider incurable. I was speedily brought out of it, and when the fear subsided I arose immediately and walked about through the house, filled with rejoicing and praise.

Christian Science has helped my husband to succeed in business, has given us a happy home, and is supplying our every need. Christian Scientists are ever most grateful to God for giving to this age that noble woman, Mrs. Eddy, who was so loving and unselfish and pure as to become the Discoverer of this healing truth.

(Mrs.) ELZIE E. HAMMETT, Kansas City, Mo.

✧

I am very thankful to God and grateful to Mrs. Eddy for all the blessings I have received in Christian Science. In 1913 I took up this study. I had stomach and bowel disorder of long standing, also kidney and bladder trouble. My feet and legs were swelling and there was great fear of diabetes. It seemed as if I had every kind of ailment that a poor mortal could have. I was a trained nurse, and the doctors did all they could for me. All I was taking was an opiate, and I had taken so much of this and other drugs that I had formed the habit. I used to think that if I could get rid of this bondage I would be willing to stand all the rest of the suffering.

At the darkest hour a lady handed me a copy of the *Journal* and explained the living truth to me the best she could. My healing seemed slow; I had treatment for a year before I was entirely healed. Since then I have laid aside my glasses after wearing them for over eight years. Thanks be to God for this understanding of Truth that sets us free. More than all I am grateful that this practical religion shows us how to live, love, and be at peace.

(Mrs.) DELIA POPE, Beardstown, Ill.

It is with a sense of gratitude for Christian Science that I send these few words, trusting they may be of some help to others who read them. About four years ago I was stricken very suddenly with severe hemorrhages from the lungs, and for many weeks I was unable to leave my bed or help myself. I was sent to a sanitarium, but came home after some months very little improved, if at all. Finally a friend talked to me of Christian Science and its wonderful healing power, and lent me "Science and Health with Key to the Scriptures" by Mrs. Eddy. I began to read the book and with his help was able to understand more fully its teachings. To-day I can truly say that Christian Science has changed me from a very ill woman to practically a well one, for I am able to go about my household duties and do what four years (or before I came into Christian Science) I could never have done. My earnest desire is that I may be more worthy to receive every blessing which I know is ours.

(Mrs.) MAUDE PAQUETT, North Edgecomb, Maine.

# From the Press

[William T. Ellis in *The Illustrated Buffalo* (N. Y.) *Express*]

Here in France among the soldiers a new and elemental conception of religion has developed. It has little creed, and certainly no sectarianism; ecclesiastics back home might be startled into something like awakeness could they but realize how little the things that bulk so large in their life mean to the soldier. These soldiers care nothing for the differences that divide Episcopalians and Methodists and Presbyterians and Baptists. They are interested in God, and whether or not He answers prayers, and the relation between Him and the great considerations of righteousness for which the Allies stand. As for the shop talk of the churches, over here they confess that they never were in the habit of paying any attention to that.

Three words characterize the religion of the American soldier—simplicity, brotherhood, and service. Faith is stripped to the buff in the trenches. Nobody cares for any elaborate expression of belief. These men believe they are doing their bit for God when they help break the grip of the Hun upon the earth. They are convinced that the essential righteousness of our cause makes it God's cause. If we have much at stake in this war, God has more. Therefore they are serving Him when they go ahead in uncomplaining loyalty to do their part in winning the war. Fidelity to the task is the first expression of worship.

[*The Ottawa* (Ontario) *Citizen*]

A few weeks ago a local clergyman of one of the strongest religious denominations in the capital undertook to criticize from his pulpit his misapprehension of the interpretation which one of the smallest denominations in the city places on the teachings of the Founder of Christianity. In doing this, of course, the accredited follower of him who said, "Judge not, that ye be not judged," was quite within his rights, whatever may be thought of the ethics of his course. The *Citizen*, however, was made to be an unconscious party to this criticism in that it accepted an advertisement announcing the sermon in which the attack was made, said advertisement setting forth that the subject of the sermon would be, "What We May Learn from Christian Science." Readers would naturally assume, and as a matter of fact some readers did assume, that this announcement meant to imply that an explication of Christian Science, not an attack on it and its Discoverer and Founder, would be

Digitized by Google

essayed in the sermon referred to. In order therefore to make some amends to those readers who were deceived, the *Citizen* desires to bring to their attention the announcements elsewhere in this issue in which the local Christian Scientists invite all who are interested in hearing an authoritative explanation of Christian Science to a free lecture to be given this evening in their church edifice in Metcalfe Street, corner of Gilmour.

[*Bolton* (England) *News*]

Interesting observations on the future of industrialism were made by Lord Leverhulme at the annual meeting of the Bolton Infirmary. Some people seemed to think, he said, that unless men were kept at work as many hours as they could keep awake, the old adage that "Satan finds some mischief still for idle hands to do," would become an accomplished fact. When it was proposed to reduce the hours of work from sixteen to fourteen, and later to twelve, it was held up as a bogey that the increased leisure would be badly spent in public houses, but it did not happen so. People made better use of their time working eight hours a day, because they took a wider interest in life, a broader outlook, generally an inspiring outlook, and one that promised well for the future.

Men to-day were studying questions they never dreamed of before, and the man who had to work, if he had leisure and opportunity and inspiration given him, could reach so high that he would be very little lower than the angels. This was a splendid vista for the future. He was convinced that each succeeding year we should have less necessity for arduous toil; men would be replaced by machines, and the machines would do the work more efficiently with fewer mistakes.

[*Brooklyn* (N. Y.) *Eagle*]

Everywhere emphasis is being put upon the church's work, rather than upon forms of worship; upon the spirit of the Christian religion, rather than upon the organization through which that spirit shall be preached. That the movement will reach to uniformity in forms of worship is unlikely; such uniformity would be undesirable because there are wide divergencies in thought and taste among church members. But never again can the emphasis of the churches be put upon such differences rather than upon the common spirit and the common work. The union of Jew and Gentile, Catholic and Protestant, chaplains in the camps and the trenches; the union of the followers of all those chaplains in the same great works of mercy at home, have made us see that now, as of old, life is more than meat, the body more than raiment, and the spirit more than the body.

[*The Living Church*]

The problem of democracy is twofold: on the outer side it demands a social system of justice and equality, and on the inner side it demands a people who will govern themselves according to the law of God and so will govern other people justly. Without these two factors in its favor a democracy cannot succeed. On the social side we must be missionaries of a better social order; on the religious side, missionaries of a true religion. Neither can we distinguish between the social and the religious side, for in essence they are one. A philosophy that neglects either of these two principles is too incomplete to solve the problem of democracy. Most current reform philosophies are. The problem is one of Christian statesmanship. A people thus constituted will create a composite kingship which will make democracy succeed.

# Special Announcements

## From The Christian Science Publishing Society

VEST POCKET EDITION OF THE TEXTBOOK.—Announcement is made of the publication of a new, Vest Pocket Edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This volume, 3 1-16 x 4 5-16 inches in size, has been provided to meet the demand for an edition of the Christian Science textbook which can be conveniently carried in the small pocket of a soldier's or sailor's uniform, occupy the minimum space, and be of the least possible weight.

The price of the new edition is $3.00 for a single copy. When included in lots of twelve or more copies of Science and Health in any or all of the different bindings, the price is $2.75 each.

Orders for this edition for general sale are now being filled promptly.

## Vest Pocket Edition of the Quarterly

Commencing with the July number, and continuing thereafter, a special vest pocket edition of *The Christian Science Quarterly* will be issued, conforming in size to the vest pocket edition of "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

The price will be the same as for the regular edition of the *Quarterly*. Reading rooms may secure any desired quantity of either or both sizes.

## New Pamphlets in French

"Christian Science: Its Discovery and Development," by William D. McCrackan.

"Christian Science: A Religion of Love," by Virgil O. Strickler.

Both of these French translations are printed with alternate pages in English, and are now on sale at five cents a copy.

## New Vest Pocket Pamphlet

"Courage," a collection of three short articles: "The Soldier," "The Effect of Courage," "Truth's Sustaining Power."

This pamphlet is now on sale at four cents a copy.

## Bible Catalogue

Bible Catalogue No. 24 is now ready for delivery. Advance copies have been mailed to all churches and societies advertised in *The Christian Science Journal*. Additional copies will be supplied on request.

Attention is called to the changed prices of some of the Bibles, including 01440x and 01483x, notice of which appears on the inside of the front cover of this periodical.

Orders for, and correspondence relating to, the publications announced above should be addressed to The Christian Science Publishing Society, Boston, U.S.A.

## From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

## From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the War Relief and Camp Welfare Fund, the Real Estate Fund, and the Benevolent Association Fund should be sent to WILLIAM R. RATHVON, Treasurer, 236 Huntington Avenue, Back Bay, Boston, Massachusetts.

# WORKS ON CHRISTIAN SCIENCE

## Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

**Science and Health with Key to the Scriptures.** In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each $3.00; twelve or more, each $2.75. Ooze leather, vest pocket size, single copy $3.00; twelve or more, each $2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy $4.00; twelve or more, each $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $5.00; twelve or more, each $4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy $6.00; twelve or more, each $5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10¾ inches. Single copy $7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

VEST POCKET EDITION. A convenient size for a small pocket. Printed on Bible paper, bound in khaki colored leather with overlapping edges, stamped in gold. Single copy $3.00; twelve or more, each $2.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each $5.50; six or more, each $5.25. Orders for the German translation in lots of six or more may include both bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each $3.50; six or more, each $3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, $5.50; six or more, each $5.25. Orders for the French translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, German, and French editions, and different styles of binding.

**Miscellaneous Writings.** A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy $2.25; twelve or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; twelve or more, each $3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy $5.00; twelve or more, each $4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

**The First Church of Christ, Scientist, and Miscellany.** A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy $2.25; six or more, each $2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy $4.00; six or more, each $3.75. Orders for six or more may include the two styles of binding.

**Concordance to Science and Health.** This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy $5.00; six or more, each $4.50.

**Concordance to Mrs. Eddy's Published Writings Other Than Science and Health.** It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy, $6.00; six or more, each $5.50.

**Christ and Christmas.** An illustrated poem. Single copy $3.00; six or more, each $2.50.

**Unity of Good and Other Writings.** One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Christian Healing and Other Writings.** One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy $3.50; six or more, each $3.25.

**Church Manual.** Containing the By-laws of The Mother Church. Cloth, single copy $1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy $2.00; six or more, each $1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy $1.00; six or more, each 75 cents.

**Retrospection and Introspection** A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy $1.00; six or more, each 75 cents.

**Unity of Good.** This book lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy $1.00; six or more, each 75 cents.

**Pulpit and Press.** A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy, $1.00; six or more, each 75 cents.

**Rudimental Divine Science.** A brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point and American Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

**No and Yes.** A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy, 55 cents; six or more, each 45 cents.

**Messages to The Mother Church.** Including in one volume, 94 pages, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy $1.50; six or more, each $1.15.

**Christian Science *versus* Pantheism.** The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1900.** Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

**Message to The Mother Church, June, 1901.** Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

**Message to The Mother Church, June, 1902.** Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

**Christian Healing, and The People's Idea of God.** Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

**Christian Healing.** A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

**The People's Idea of God.** A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

**Poems.** This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy $1.50; six or more, each $1.25.

**Feed My Sheep.** Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign.
