## THE JOURNAL OF BORDERLAND RESEARCH

BSRF No. 1 Published by Borderland Sciences Research Foundation,  
PO Box 549, Vista, California 92083 USA. Edited by  
the Director, Riley Hansard Crabb, MsD.

The Journal is published six issues a year with the assistance of the Associates, at the Director's home, 1103 Bobolink Drive, Vista. It is printed, 36 pages an issue. The Foundation is incorporated under California law, May 21, 1951, #254263, and has been in continuous existence since then. Correspondence is addressed to the PO Box. The Journal is included in the Foundation membership of \$12.00 a year, domestic. Foreign membership/subscriptions are now \$15.00. Single copies and back issues of the Journal are \$2.50. A donation of \$12 domestic or \$16 foreign will also bring the Journal to those who don't care to join BSRF. The Director's wife, Mrs. Judith Crabb, is office manager and Secretary-Treasurer.

**PURPOSES OF BSRF:** This is a non-profit organization of people who take an active interest in unusual happenings along the borderland between the visible and invisible worlds. In the words of the late Meade Layne, founder and director of BSRF from 1946 to 1959: "BSRA publications are scientific in approach but employ few technical expressions. They deal with significant phenomena which orthodox science cannot or will not investigate. For example: The Fortean falls of objects from the sky. Teleportation, Radiesthesia, PK Effects, Underground Races, Mysterious Disappearances, Occult and Psychic Phenomena, Photography of the Invisible, Nature of the Ethers and the problem of the Aeroforms (Flying Saucers). In 1946 BSRA obtained an interpretation of the phenomena which has come to be known as the Etheric or 4-D interpretation; it has not been radically altered since that time. This continues to be the only explanation of the UFOs which makes good science, sound metaphysics and common sense."

The chief present concern of the Foundation is to make this kind of unusual information available as a public service at reasonable cost. Headquarters acts as a receiving, coordinating and distributing center. An important part of the Director's work is to give recognition, understanding and encouragement to people who are having unusual experiences of the borderland type and/or are conducting research in any of the above fields. For consultation on borderland problems or for Spiritual healing through prayer, write or phone 714-724-2043 for help or for an appointment. Donations and bequests toward Foundation research programs and expenses are welcome.

The 35-page list of BSRF publications is available from Headquarters for \$2.00 in money, check or stamps. This includes brochures on borderland subjects, tape recordings of Crabb's lectures and of members of the Inner Circle, talking through trance-medium Mark Probert. Write to BSRF, PO Box 549, Vista, California 92083 USA.

THE MEANING OF CHRISTMAS, CHRIST-NESS,  
CLARITY OF MIND

By The Yada di Shi'ite

I say to you, no one, nobody can save another. Great Masters have come down through the ages, not to save man but to enlighten him! So that he can save himself. So that he can find his own Path in the Light.

In your Christian Bible there is a statement made where the man, Jesus, is on the cross between two thieves. One of these thieves turns to him and says -- this is not verbatim.

"Oh, great Master, what is to become of me? I am afraid to die. I'm afraid to lose my life. What is going to happen to me?"

And it is said the great Master turned and said: "Fear not, for I say unto you this day you shall be in paradise with me."

Is nice promise, my friends, wonderful; but this is not what he said. Listen carefully, please, to what was said: "I say unto you this day, you shall be in paradise with me." Not, "I say unto you, this day you shall be in paradise with me."

Let me put -- what is called in English -- the comma where it belongs. I say unto you this day, comma, you shall be in paradise with me. This gives the thief a chance to earn his Christ-ness. This means the Master did not say, "I am going to pick you up by the hair of the head and take you to paradise whether you like it or not!"

He made no promise that this man Jesus was greater than the thief. The man Jesus did not recognize the thief in this man. He simply recognized that this man had lived in a state of ignorance, of darkness, of not knowing -- but that in time he would know, and rise above the thief-mind, and attain the Christ-mind which is clarity of understanding. You have Christ, Christ-ed, Christos, Christmas. They all mean the same, clarity of mind, crystal clear in understanding; and when you find that, you have found your freedom from the Wheel of material life.

This does not mean that you cannot experience material life again; but now, in your experiences in the material world, you will know what it is. This means that you will not have to die the ordinary death, the death of ignorance that makes man die. You will

rise about that because you have wisdom, not because you are holy.

### WISDOM WILL GET YOU EVERYTHING

Holiness will get you nothing. Wisdom will get you everything because it is finding your Christ-ness. This makes you a true, conscious Master of existence. Then you can come back. You can appear. You do not have to be born to woman again. You do not have to take the painful, biological path; for the moment you come into the world (through physical birth) that creates a great trauma. Yes, birth is the first pain, both to the mother and to the entity coming into the matter world.

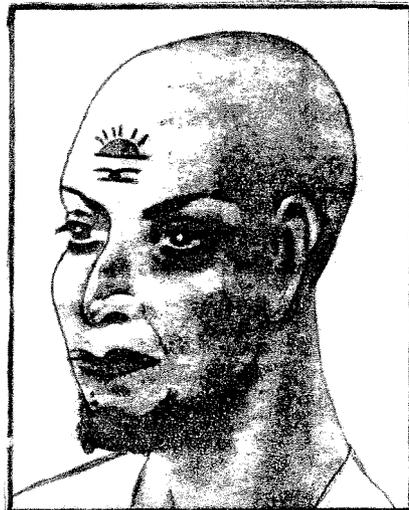

Now you will be able to instantaneously create a form, a real human -- ha ha, nice isn't it -- human form. Human form is very interesting and we are afraid to lose it; but were you afraid to get it when you came here? Did you ask to come here? Some of you will say, "No, God made me. I had no choice."

That is pushing the responsibility of your being upon a being other than yourself. **Take responsibility!** Come alive! Come conscious! And then you will not have mysteries to deal with.

You asked to come here. In some respects you are a materialization. Truthfully, you are in essence a space being. The earth is a space ship. But you made it. You, consciously made, created, brought into being the Matter World; and until you -- and that means me -- accept responsibility for it, you cannot escape it until you, yourself, individually honor it. You start out by loving yourself. Only then can you truly love another.

What do I mean by loving yourself? Understanding yourself, not putting your arms around yourself. **Understanding.** My friends, the world is filled with misunderstanding. What good are these beings coming to your earth, to save you? I have listened, and through this man's eyes (Mark Probert) I have read many stories of peoples that are coming from outer space here, and these peoples that have written these books have said, they come, some a short 28,000,000 miles from Venus, 35 from Mars -- and that is when they are in conjunction with your earth. Others have come from great, distant Galactic systems. What for, to give you more law? To give you more ethics? Are you not up to your here, right here, with ethics? More laws, right now?

But who is living them? We talk about them while we murder one another. Is sweet, nice, unh? No, the space brothers have not come to save man. Please notice that only in rare cases do they show themselves in direct contact, and have direct contact with

THE YADA DI SHI'ITE

peoples of the earth. It is rare. Is it not so, my friends? It is rare. Why? Because they know that the majority of human-kind is not ready; and that we, the human beings, will either try to kill them or, bottoms up to them. (Laughter from the audience as they are reminded of the "bottoms up" religions of the world, the Muslims, the Tibetan Buddhists, etc.)

#### THE CURSE OF THE PRIESTLY SYSTEMS

We have been born, not in sin, but in fear! In fear, my friends. The priestly system has led man to believe that he was born in sin. Ha. My friends, you are living, and to live means to experience. How you going to have an experience without having a mistake? Because you have come into a condition that you do not understand. So this means you have to have experiences so you can understand the world into which you have come, and have to live with it more intelligently. You are not sinning. You are experiencing.

And if we learn, at least learn to love life. Our fears will leave us and we will learn great things, great things.

My friends, it is not only the phenomena of Space Beings coming here -- what you call Saucers. That is only a small phenomena to the vaster one. Let me ask you, please. Some of you perhaps have heard of the variety of things falling on your earth. Is it not so? From the skies have come rains of blood, rains of soot, rains of meat, with hair on it. Large pieces of meat have come from the sky.

#### CHARLES FORT REVISITED, WITH HUMOR

There have been rains of all manner of the most odd substances, and yet much of this stuff -- stuff? -- what you call stuff? (He looks questioningly to George Van Tassel, standing nearby on the lecture platform at Giant Rock, and Van agrees, "Stuff". The audience laughs.)

That means anything (more laughter) has been dumped -- and I say dumped -- is good word -- on your earth. From where? Can you believe that the Space peoples coming from Venus, perhaps they having some old pieces of meat. They do not know what to do with it. (More laughter) In your world you -- each peoples in the homes -- what you call houses -- they have what you call little buckets they putting the garbage in. They do not have garbage buckets; so they making little packages and they coming 28 million miles to dumping it here. (More laughter) Is nice, unh? Is intelligent.

Also, on Mars, they have houses with chimneys with much soot in them. Dont know what to do with it. Let us take it to earth. (More laughter) Those people on the earth, they are sinners. Nobody cares -- the whole vast universe cares nothing about them. Let us dump it on them. (More laughter) It appears also that the Being, that the Christian calls God

has a little something He wants to get rid of, too. It is known as the man Satan; but He wasn't Satan then, He was Lucifer, the great angel of Light. But He gotting to cutting off in heaven. The Gods did not like this. Acting too smart. It is said that God got jealous of His popularity among the angels.

#### LET US REASON TOGETHER

This is frightening. It sounds sacrilegious, but my friends, I am not being sacrilegious. I am trying to make plain to you, by using little stories, what is going on! And our reasoning with what is going on.

Man is a reasoning being -- or so it is said. That is what makes us -- I'm a human being -- it's what makes us different than the animals or anything else. We are thinking beings. Let us try it for a little while, unh?

So He packaged Lucifer and threw him down -- what you call the chute? Chute? Yes, the chute, (Laughter) to the earth; and foolish man, he saw this package. It is known as Pandora's Box. Ha ha. (Laughter) He opened it and out stepped the Boy in the Red Suit. (More laughter from the audience) And He said, "From now on, you're in for it!"

But life is a kind of two-edged sword. The more Satan made it difficult for humans, the more humans made it difficult for Satan. So even Satan cannot get out of hell. (Laughter) You want to get Lucifer back into heaven? Then forget Him. The best way to get rid of anything is to forget it. Think of that, my friends. Let us go to the man he called Hitler. If everybody had ignored him there couldn't have been any war. But no, they advertised him. Oh yes! Hitler did this! Hitler's doing that! Hitler's doing everything! And man is inclined to follow anyone that will look like he will be a leader, and the more advertisement that one gets, the more followers he gets.

If you have someone you do not like, do not keep them in your consciousness with your hate. Do not immortalize them with your feelings of animosity. Forget 'em! And they will go 'way! They will die of lack of sunshine from you. You keep them in the limelight with your thoughts, the limelight of your own consciousness.

How can you best forget your enemy? By loving him. Simple, isn't it? Love him and he cannot hurt you. I do not think. I do not really believe, that you need a spook to come and tell you these things. I think you know them, but, you like to hear them again. That is all. You know them. . .

(Transcribed from the tape of the Yada's talk at George Van Tassel's Space Convention at Giant Rock, California, May 30, 1959. Two-hour talk available on Cassettes from Hdq, \$7.00 plus 50¢ postage. Reel-to-Reel, \$10.00.

COMPATIBILITY WITH BROTHERS  
OF THE INTERPLANETARY ORDER

From Ashtar

"We have not withdrawn our Forces. Methods of approach have undergone a change as we have moved our Fields of influence into a closer relationship with those we have been assigned to guard on earth. This has curtailed some aspects of communication and externalization as lines of contact must be kept open from spacecraft to planetary contacts.

"These lines are in the form of energies to bring a greater affinity between planetary contacts and Space Focus Points of Contact. These rapports are necessary to assure planetary connection sufficient to bring earth contactees into alignment for future joint activity. An Energy-shield, which is now being densified, establishes a rapport level between higher-frequency-forms and lower-frequency-forms.

"With thought levels brought into greatest possible stability these Energy-shields make rapport possible to an ever increasing extent, wherein it shall be possible for earth-beings to co-exist with the Space Brothers, both being comfortable in relationships of proximity. This relationship shall only be possible where fields of planetary individuals are akin to vibrational harmonies of approaching Brothers of Interplanetary Order.

"Our craft, designed for your aid in those days of need which rapidly approach, are modulated to be of an energy-level affording the greatest possible harmony with the cell structures of earth-man's physical form. This likewise necessitates adapting our cell forms into a lower energy field, in order to continue to function without undue stress upon our fields of individual frequency. This entire operation could be graphically called Operation Compatibility.

"That factor which most greatly delays these hook-ups is the inability of you planetary beings to maintain a semblance of emotional stability or balance as the Shields intensify. To do so assures rapid success. To fail to do so delays and threatens possible failure of compatibility sufficient for co-existence, which is the determining factor when it is time for lift-off.

"No earth form can withstand the shock of frequency factors involved in boarding a spacecraft unless these preparatory measures have been taken and complied with. Your feeling level dare not drop below specific rates for your contact to be maintained. Keep your human reactions to all circumstances to a peaceful level, re-

minding yourselves constantly of your True Being, ever present. Permit no fear, suspicion, self-pity, remorse or anxiety to lower your Field

"Regardless of the method of your deliverance from chaotic happenings on your earth, these moods of depression can alter the fulfilling of that deliverance for you. Higher energies can only destroy that which fails to harmonize with them. Knowing these things, then surely your mood must be in Christ, as this Mind of Christ is your salvation.

"Standing together as the Spirit commands in Christ. . .

Ashtar - Space Command

### BE AN OBSERVER, NOT A PARTICIPANT, IN WORLD CHAOS

The above message from outer space 12 years ago is even more important as a guide to conduct than it was when White Star first published it. Here's an update from that same Source:

"You have been instructed not to become emotionally involved in the traumas and turmoils of the world scene. The ability to see and know righteous judgment is yours -- given of the Spirit Self -- only when your senses are not permitted to incite you to emotional side-taking. Reserving all judgments to the Father, you can be an instrument of Balance for His use.

"One who allows himself to be carried away emotionally into side-taking quickly loses all sense of balance and right action, thus becoming a part of mob-consciousness -- and carried away with feelings of agitation, self-righteousness, and ultimate violence. If not outwardly violent, then inwardly, creating inner agitations upon one's physical cell structure. If expressed outwardly, a destructive force upon the world scene. Mob violence is not constructive inwardly nor outwardly. Agitation is friction and friction is violence which inflames and ultimately destroys.

"The negative forces that play upon the world stage seeking supremacy, are cool and calm as they promote violence in others. Leaders seeking to rule, stir the pot of violence, and those who are ignorant followers are the ones who suffer for the cause, not the promoters, as they are behind the scene of world carnage.

"Be an observer and partake not of the final throes of World Chaos. Partake only of the stability of Inner Power that is yours to claim, and stand fearless and calm as you observe, knowing well that in so doing, you have laid a carpet of calm that can be used by Beings of the Higher Light, as they are brought forth in the midst to wield the Sword of Truth, and establish Divine Justice in the world. This is the army God calls to arms!

"If you are moved upon by the agitations of a dying world consciousness, you will die with it. But if you move upon the agitations of a dying world consciousness with an Inner Peace calling always for Divine Justice and Right Action, you will be

a moving force to bring about a peaceful wave of Higher Light into world consciousness, and thereby an instrument in bringing about a New World Consciousness.

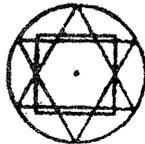

"Those who have been given in-sight can see that the forces seeking to dominate humanity are attacking and eating away at all lower levels of human communication, creating upheavals in methods of transportation (President Reagan busting the Air Controllers Union), postal systems (the Canadian Postal strike and the 70% increase in 3rd Class Printed Matter rates in the United States; so now our Journal goes at the First Class rate, 69¢ a single copy. Dozens of little borderland publications have had to fold as a result of this.), telephone systems, all audio and visual systems, as well as costs, scarcities, strikes, etc. Plus well planned fear campaigns. All are a part of the underlying motives of those who seek to rule by their own might, with total disregard for the welfare of the masses.

"Leaders incite self-righteous feelings in individuals under their control, and brother slays brother, in one way or another with total disregard of the Golden Rule. These blind followers after power-drunk demi-gods are not evil. They are enveloped in instigated self-righteousness and are blind to sanity.

"As the ways of the world worsen, stand apart and smile, for the Christ will come and heal all wounds, even as Christ has come to those who believe, really believe!

"God grant you the Wisdom of Universal Truth.

PEACE.....LOVE.....HARMONY.....

*White Star*

"We are especially instructed to read Psalms 37 as a special message for now!" White Star's Space Age messages and teachings, especially from Ashtar, can be obtained by writing to her at PO Box 307, Joshua Tree, California 92252.

LA JUSTICE

7

"THEIR SWORD SHALL ENTER INTO THEIR OWN HEART"

Psalms 37 should strike a note with the students of the Western Mystery Tradition, especially its key verse, Number 15: "Their sword shall enter into their own heart and their bows shall be broken." This is one of the most important mantras in the defensive arsenal of the Student under attack by the Forces of Darkness. It is not surprising that Ashtar should inspire White Star to urge her students to study and make use of Psalm 37:15.

An evil one, depicted by Walt Disney's artists.

MacGregor Mathers learned this when he was a Student of the Mysteries in the late 1880s, in the British Museum, translating ancient and honorable manuscripts, such as Addison 10,862, Sloane 1307 and 3091, Harleian 3981, etc., from Latin, Italian and Hebrew into his English edition of "The Key of Solomon". He found Psalm 37:15 in the section on Mars, God of Justice and of Fear, in the Sixth Pentacle. So no doubt, like occult Lodges of Egypt, Chaldea, Palestine, the Knights Templars and others of the Middle Ages in Europe, protective, defensive rituals based on the Verse 15 were used many, many times by Mathers' Golden Dawn Lodge in London.

It is a cry for justice that the arms, the weapons of the wicked shall be broken, and their own evil returned unto them. The symbol for that Justice is Tarot Trump No. 8, reproduced on the preceding page. Why should the dispenser of Justice be a Queen on the throne? In the topography of the Universe, of our Western Tradition, Mars is on the feminine side of the Tree of Life as we've shown many times in these Journals.

In her magnum opus, "The Mystical Qabalah", Dion Fortune reminds us that "One of the least understood things in Christian philosophy is the problem of evil; and one of the things least adequately dealt with in the Christian ethic is the problem of force, or severity, as contrasted with mercy and mildness. Consequently Geburah (Mars), the Fifth Sephirah, which has for additional titles Din (Justice) and Pachad (Fear), is one of the least understood of all the Sephiroth, and is therefore one of the most important. Were it not that the Qabalistic doctrine explicitly lays it down that all the Ten Sephiroth are holy, there are many who would be inclined to look upon Geburah as the evil aspect of the Tree of Life. Indeed, the planet Mars, whose sphere is the Mundane Chakra of Geburah, is called in astrology an infortune.

"Those, however, who are instructed beyond the crude pretty-pretty of a wish-fulfilling philosophy know that Geburah is by no means the Enemy or Adversary described in Scripture, but the king in his chariot going forth to war, whose strong right arm protects

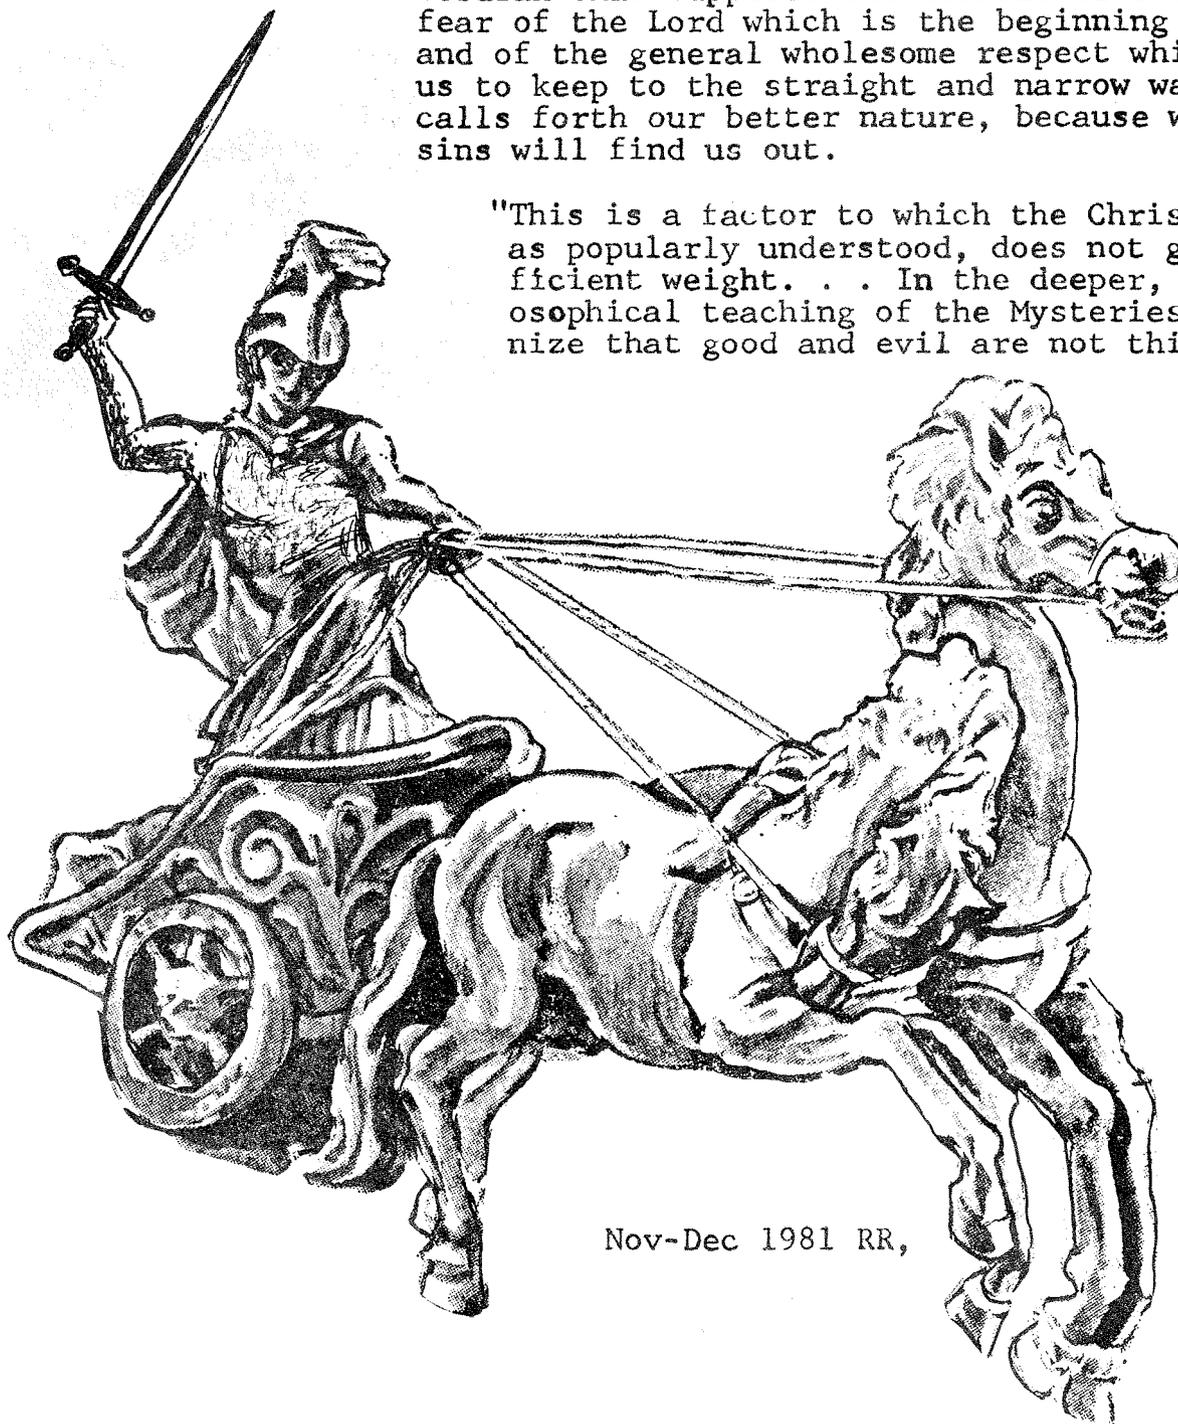

his people with the sword of righteousness and ensures that justice shall be done. Chesed, the king on his throne, the father of his people in times of peace, may win our love; but it is Geburah, the king in his chariot going forth to war, who commands our respect.

#### THE SATISFACTION OF AWE AND RESPECT

"Sufficient justice has not been done to the part played by sentiment of respect in the emotion of love. We have a kind of love for the person who can put the fear of God into us, should occasion arise, which is of quite a different quality, is far more steadfast and permanent and, curiously enough, far more emotionally satisfying, than the love with which no tinge of awe is mingled. It is

Geburah that supplies the element of awe, of the fear of the Lord which is the beginning of wisdom, and of the general wholesome respect which helps us to keep to the straight and narrow way and calls forth our better nature, because we know our sins will find us out.

"This is a factor to which the Christian ethic, as popularly understood, does not give sufficient weight. . . In the deeper, more philosophical teaching of the Mysteries we recognize that good and evil are not things in

themselves, but conditions. Evil is simply misplaced force; misplaced in time, if it is out of date, or so far ahead of its time as to be impracticable. Misplaced in space, it if turns up in the wrong place, like the burning coal on the hearth-rug or the bath-water through the drawing room ceiling. Misplaced in proportion, if an excess of love makes us silly and sentimental, or a lack of love makes us cruel and destructive. It is in such things as these that evil lies, not in a personal Devil who acts as an Adversary.

#### THE KNIGHT IN SHINING ARMOR

"Geburah, the Destroyer, the Lord of Fear and Severity, is therefore as necessary to the equilibrium of the Tree as Chesed, the Lord of Love, and Netzach, the Lady of Beauty (Jupiter and Venus). Geburah his the Celestial Surgeon; he is the knight in shining armor, the dragon-slayer; beautiful as a bridegroom in his strength to a maiden in distress, though, no doubt, the dragon might have preferred a little more love.

"The initiations of the infortunes, Saturn, Mars and the deceptive lunar Yesod, are just as necessary to the evolution and balanced development of the soul as are the Mysteries of the Crucifixion assigned to Tiphareth. It is the one-sidedness of Christianity which is its bane, and is responsible for so much that is unsound and pathological in both our national and our private lives.

"But, equally, we must not forget that Christianity came as a corrective to a pagan world that was sick unto death with its own toxins. We need what Christianity has to give; but also, unfortunately, we cannot do without that which it lacks. . . the astringent, corrective influence of Geburah.

"Dynamic energy is as necessary to the welfare of society as meekness, charity and patience. . . Too much charity is the handiwork of a fool; too much patience is the hallmark of a coward. What we need is a just and wise balance which makes for health, happiness, and sanity all around, and the frank realisation that sacrifices are necessary to obtain it. . .

"Geburah is the sacrificial priest of the Mysteries. . . It means the deliberate and open-eyed choice of a greater good in preference to a lesser good, as the athlete prefers the fatigue of exercise to the ease of sloth that puts him out of condition. . . Sacrifice is really the transmutation of force. The latent energy in coal offered up on the sacrificial altar of the furnace is transmuted into the dynamic energy of steam. . . "

DION FORTUNE

AMERICANS UNITED FOR SEPARATION OF CHURCH AND STATE  
ALWAYS IN THE MIDDLE!

By R.G. Puckett  
Editor, "Church and State"

(Back on page 6 of this issue, Ashtar urges upon us the Golden Mean of the Christ, the balance of the Middle Way to keep from becoming involved in emotional side-taking of either the Radical Right or the Radical Left in the Battle of Armageddon as it rages on, the "agitations of a dying world". Puckett's editorial in the July-August issue of "Church and State" illustrates the principle perfectly.)

"Channel 9, CBS affiliate in the nation's capital, called to invite the executive director of Americans United to share in a panel of three persons on an hour TV talk show. The other two panelists? None other than Mrs. Madalyn Murray O'Hair and the Reverend Dan Fore. Mrs. O'Hair is the nation's best known Atheist and Reverend Fore is head of (Jerry Falwell's) Moral Majority in New York.

"The Americans United director was invited to be on the panel as a middle point between the two extremes. They even placed me between the others on the platform for visual conformity to the philosophical position I was embracing.

"The show was an unforgettable experience, not necessarily pleasant but one to be savored because of its symbolism. I wouldn't have missed the opportunity for anything else on the agenda that week because it was a firsthand evaluation of persons involved in the issues of our times.

"Strange as it may sound, Dan Fore and Madalyn Murray O'Hair are exactly alike. They just come at an issue from opposite ends of the spectrum. Both are arrogant, hostile and highly opinionated. Even those who viewed the program on television could not grasp the hate, name-calling and inhumane treatment these two persons heaped upon each other because the exchange never stopped, even during commercial and station breaks when the panelists were off camera.

"Some examples. O'Hair claims an I.Q. of 180 and she told Fore he I.Q. was 40. Fore called O'Hair a liar and her response was that his low class background prompted him to call persons liars. O'Hair later called me a liar, so what does she say about herself?

## EVANGELICAL FUNDAMENTALISM HAS A BAD NAME

"On and on it went, insult for insult, charge for charge and hostility matching hostility. A friend of this writer later commented, 'Madalyn Murray O'Hair is the kind of person who gives Atheism a bad name.' The same can be said about Dan Fore. If these two persons are the best representatives those two causes have, the causes are down the tube!

"You can guess what happened. Before the show was ended, they both turned on the guy in the middle -- me. The only thing they could agree on was how unacceptable I was. Nothing else could be expected.

"In closing, some applications of the above.

"My primary purpose in being on the television show was to project a sane, reasonable and accurate representation of the great American principle of religious liberty and its corollary, separation of church and state, as guaranteed by the First Amendment to the United States Constitution. Dan Fore called the doctrine of church and state separation a 'foolish philosophy' and Madalyn Murray O'Hair wants to drive the last vestige of religion from American life. Both are extreme positions; both are wrong, dangerous and radical.

"The person in the middle will always be shot at from both extremes. That is to be expected and endured. Actually, an attack from both extremes is a genuine affirmation of the wisdom of the middle position which protects and benefits the greatest interests of the most persons.

"Some argue that extremism is essential to the birth and forward thrust of any movement designed to correct an ill or change the course of society. To a degree that may be true, but extremism is also threatening, harmful and destructive if it goes unchecked. The very thing designed to correct a wrong, something so highly motivated in the pursuit of a goal, can become an evil equal to the wrong it seeks to correct.

"The pendulum usually swings from one extreme to the other. It passes through the middle only briefly and does not pause. That is an irony of life to be recognized and accepted.

"Americans United will always be in the middle. We will always defend the right of persons to believe, or not to believe, as they wish. But we will fight to the bitter end to stop the imposition of any religious belief upon all Americans through law or by elected officials. That means we will always be shot at by the Fores, the O'Hairs and their kind.

"We welcome the shots."

("Church and State" is a publication of American United for Separation of Church and State, 8120 Fenton St., Silver Spring, Maryland 20910, \$10 a year. \$11 foreign. Students \$5.)

SHOT AT FROM ONE EXTREME, OR THE OTHER!

THE MIDDLE WAY CAN BE DANGEROUS

By Dial Torgerson  
From the LA "Times", Aug. 19, 1981

San Salvador -- Rosa Judith Cisneros had never married. She lived for her causes, the rights of women and the poor. Tuesday, apparently, because of this a gang of men killed her.

The 42-year-old attorney was perhaps El Salvador's best - known woman. In a country where most women of her class stay at home and take care of their children, she worked on behalf of her country's **campesinos** -- the poor peasant farmers -- and promoted family planning.

She was leaving her house in a northern suburb of San Salvador on Tuesday morning when a carload of men halted her car and dragged her out. An eyewitness saw her trying to talk to them, perhaps to reason with them. Then he saw them make her lean against the car, lay her hands on it and heard a burst of submachinegun fire.

She fell to the ground, wounded, and they started to leave. But she struggled to rise, and one turned back and fired three shots point-blank into her face. Then they drove away. She was still alive when her father and mother ran from the family home, but by the time they got her to a hospital she was dead.

The eyewitness said one of the men was carrying what is known here as a "papaya", a homemade bomb popular with the left-wing guerillas, gangs of which hide on the slopes of a 6,000-foot-high volcano that rises northeast of the city. But the men did not identify themselves, nor did any group take responsibility for the killing.

"She could have been killed by either side," said a friend, a woman who had shared the podium with Cisneros at meetings of women's groups. "What she was doing was unpopular with both the Left and the Right."

Cisneros was legal adviser to the Salvadoran Communal Union, an organization of campesinos. Rodolfo Viera, a leader of the union, was murdered here in January along with the two U.S. labor advisers. Two wealthy, right-wingers have been accused of plotting the killings.

Cisneros was also director of the Salvadoran Demographic Association, which emphasises family planning and work for women's rights. Although it was not publicized, the United States, through its aid program to El Salvador, provides most of the association's financing.

Rightist gunmen may have killed Cisneros because of her campesino connections, one security expert said of her, adding on the other hand that the gunmen may have been leftists opposed to U.S. support programs.

#### THE RIGHT TO PRACTICE BIRTH CONTROL

"The birthrate here has recently dropped below 3%," said the friend of the slain woman, "and a lot of it was probably due to her work. She emphasized basic education and birth control, and told women that they had rights and should stand up for them."

(The hierarchy of the Church has always kept women in an inferior position. Pope John Paul II emphasized this during his recent visit to the United States. The false Christ, Looeamong, wants hordes of young religious fanatics (like the Green Berets, for instance) to fight his holy wars against heretics in general and Communists in particular. It is likely that Cisneros, in a previous life in Europe as a monk, nun or Church official was a zealous advocate of oppressive Church policy. Thus in this life she meets the old self face to face, in the form of the Radical Right zealots who gunned her down.)

Cisneros -- matronly and well dressed -- liked to tell audiences a story of a visit to a campesino family where, in answer to a question, the farmer told her, "My wife doesn't work, I work." Further questioning brought out that the wife rose two hours earlier than he did, to gather firewood, and went to sleep two hours later, after scouring the cooking pots.

"But she does not work?" Cisneros said she asked. "No, I told you," the farmer insisted. "I work. She doesn't."

Such stories may have earned her enemies with the chauvinist right wing, some sources said here. But the left wing has been also known to kill those attempting to improve the status of the poor, for which it wishes to be the sole benefactor.

She was one of 18 persons killed in urban violence in El Salvador in a 24-hour period. As with most of the others, the persons responsible will probably never be known. Said a diplomat based here who had known her:

"It is one's ultimate personal statement -- to die -- and how ironic that no one should know the reason for which Rosa Cisneros had to die."

(That's a neat diplomatic coverup, by a professional liar whose job it is to maintain a respectable facade for the beastly policies of whatever MIRO sent him to El Salvador. But Mary knows, and just as She and her angel helpers are present at every birth, so is She present at every martyrdom in the holy cause of the upliftment of womankind. The imperishable record of that sacrifice to Mars has undoubtedly placed Rosa Cisneros' feet on the Path which leads to freedom from the Wheel of Rebirth.)

## THE NEW AGE BATTERY WHICH RECAPTURES THE SOLAR FORCE

Technical Bulletins From Outer Space  
Part II, By Berne Through Beti King

As you experiment, of course you will try different forms and shapes of your battery for more efficient service, but I believe this is the most efficient way to prove the theory (described and drawn in the Sept-Oct Journal).

Nov. 7, 1975

Output 250 watts, 1000 cycles per second. Do not be misled; the cps are different from your measurements (60 cps for our standard house current) but can be utilized with your light bulbs and other ac equipment. The current flows in a circular motion since it utilizes the light, color and magnetic rays. This method will not burn out any equipment for there is no overload possible. It flows off. The manganese and the Fe203 both have magnetic properties. By exciting these two chemicals through the terminals a force is set up that is almost perpetual motion. The energy is measured in Watts is directly related to the surface area of the BiSe which absorbs the invisible light energy and the area of the terminals connected to the chemicals in each layer. See drawings. Back later.

Sept. 21, 1976. Berne speaking from the Ex-1 Space Ship:

First of all, I wish to clear up a very important point to all UFO fans and groups everywhere on your planet. We are here. We are from planets out of your system. We will make a mass landing only if we need to, to prevent your planet from interfering with other systems. There is no intelligent life in your system as you know it on Earth, other than on your earth planet at this time. (We suppose he means 3-D life as we know it; for there certainly is plenty of intelligent life at other levels of consciousness on other planets in our solar system!)

The other planets have been harmed in the past by nuclear holocausts; however, as stated before, many of your planets are being rehabilitated and they have life in some form. We are working on earth with restoring your oceans and other highly dangerous areas. All the nuclear activity going on here at this time is extremely dangerous to all life on your planet, even though your scientists have no means at this time for measuring the ultra high radiation. In the event this gets so far out of your atmosphere that it is a danger to other systems, or in the event a nuclear war should break out here, we will land. Make no mistake about it.

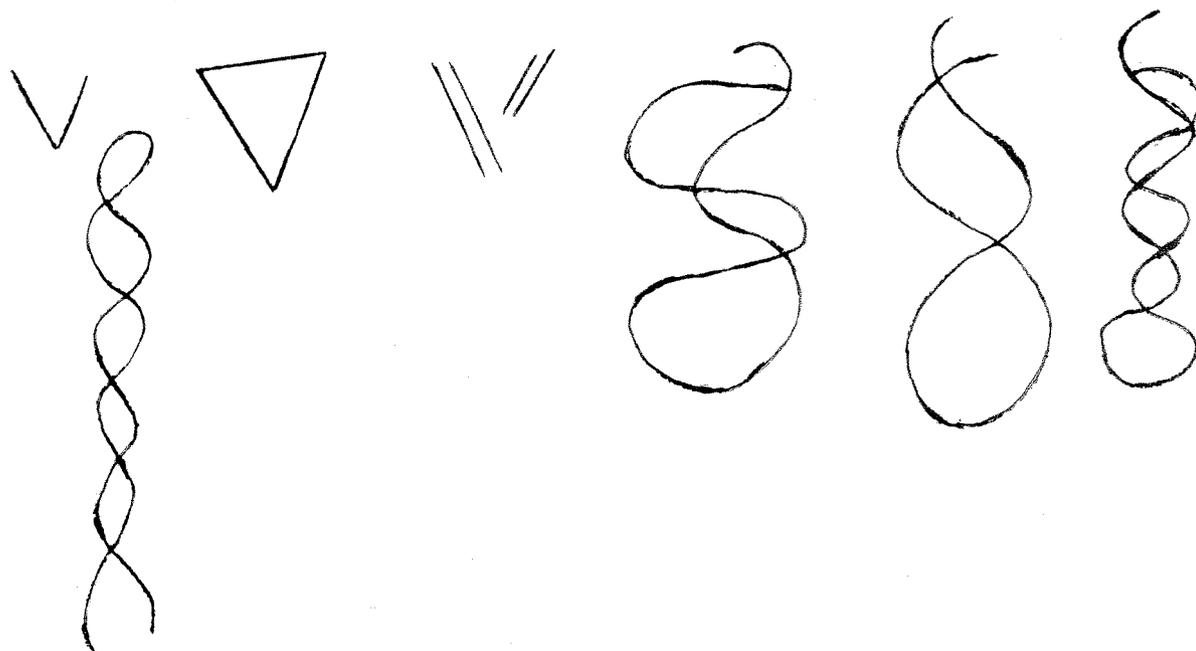

We (or I should say they -- as I was on earth at that time)

did not land in 1943 because the bombs were endangering no one but the planet Earth and this, of course, is personal choice. Enough of that. Let us proceed with our technical data. First, let us make one correction as follows for the original cell in Bulletin #1.

The Bismuth Selenium compound as listed in the bulletin is correct but incomplete. It is to be mixed in equal parts by weight with phosphor to form the needed compound. The phosphor neutralizes the Selenium as fas explosive qualities and separated and increases the light and magnetic receiving abilities. Bismuth Phosphor is now used by some highly advanced electronics firms as a paint applied coating for some sophisticated boards. Available in those areas but hard to obtain. Simply mix the BiSe2 compound with plaint phosphor (gray powder form).

NOTE: The following information came through in May, 1976 but I did not keep going at that time because of personal reasons, which I regret. However, Berne has requested that I publish this now even though it is incomplete, because those with some technical knowledge will know what he means and can begin work. As more comes though, I will isse as fast as possible because, as we all know, non-nuclear energy is one of our most important problems on Earth. Remember, this came through in May, the markings before he began speaking. I dont know what they mean, but he said to leave every-thing in that comss through.

#### MAGNETICS, COLOR AND ENERGY

This is Berne again speaking from the Ex-1 Space Ship, which is residing in your atmosphere now. We are attempting to send you infor-

mation once more regarding energy for your planet. We are here rehabilitating the bad nuclear areas as rapidly as possible, but the nuclear testings and use for power must be stopped. You are really endangering the planet with a possible chain reaction. Your people cannot measure this. Once again, there are people in the (atomic) laboratories who are afraid of this, but they have no "proof" and so are ignored.

At any rate, let us get to the technical data.

Let me repeat: Your planet functions on light, magnetics and gravity, as you know. However, your gravity is the result of the motion set up between light, which is a separate function, and magnetics, which is a separate function. When I say light, I include all the available electronics force, and also include color, invisible as well as visible.

The color particles are broken down into lines of force through the use of electricity. The beginning is the laser, but it is not being tested yet in this area of electronics. The use of the laser in the photographic field is the beginning. The laser is breaking into the field of color electronics. You see, in this method of transmitting light, the actual separate color particles of each electron are being separated. These each emit a complete rotating field back to itself that has not been measured yet for it is not recognized to be associated with magnetics; however, this is the case.

#### ASTONISHING PROGRESS COULD BE MADE

If the laser people will get together with the magnetic and optic groups, they will make rapid and astonishing progress. Each of these three fields have made breakthroughs, but do not connect with each other. I quite realize that this effort must be accomplished by the technically advanced, and we are trying to reach them.

However, I am going to give you a simple experiment to show the principal and the connection of color, magnetics and energy that you can make as individuals. We will use a silica base. This has all the colors in the spectrum.

Each grain of silica is a complete prism and it is this quality we will use to utilize the light for energy. We will call this a solar cell also, for this is common terminology for this energy, even though we will use color and magnetics. We are getting back into Direct Current, which is not properly used there on earth. You will again need a small transformer or magnet to act as a starter. Also needed are pieces of wire, silver, copper and aluminum. Silve coated wire is okay if properly coated. It is not necessary to build the transformer as in Bulletin #1, but of course good if available. That generates more power than we need for this experiment.

Einstein was right as far as he went, but there is no infinity. Everything comes back to itself in a spiral motion. Thus DC is

not direct at all, but only unmeasurable there (on earth) as yet. This current is available everywhere on the planet (the Neutrino Sea in which the earth floats?) and we will break it down for use with common materials. A magnet is needed, a small magnet 63 decibels or transformer to be used as a magnetic source, magnet and silica in strong acetic acid with ferrous sulphate added. More later. Berne.

(After he was finished, this came as an afterthought.) Graphite may be used instead of ferrite rod. Graphite in tube with copper, silver and aluminum terminals.

\* \* \*

At this time we have no more information on this, nor do we know if R&D has proved out Berne's design for a Free Energy device. Try Desert Specialties Co., PO Box 787, Mojave, California 93501 or Rev. V.E. Vandertuin's New Age World Services and Books, PO Box 3086, Huntington Park, California 90255, for later communications.

The director of BSRF is no chemist but below are what we believe to be the appropriate listings of the "common materials" Berne called for. These are from the 1972 catalog of the Atlas Chemical Co., 2929 Commercial St., San Diego, California 92112, phone 714-232-7391, representing MCB Manufacturing Chemists, who probably have reps in all large cities. In Los Angeles, PO Box 7203, zip 90022, phone 213-685-5280.

## "NUCLEAR WITNESSES: INSIDERS SPEAK OUT"

Book by Leslie J. Freeman, Review by Grover Sales

"Nuclear Witnesses" may be the most important general interest scientific book since Rachel Carson alerted the public to hazards of DDT; it is certainly the most frightening. Leslie J. Freeman interviewed 24 people who have worked with or around nuclear materials: medical researchers, pipe fitters, physicists, carpenters, engineers and the widows of uranium miners. Their testimony does not make soothing bedtime reading.

From this catalogue of horrors, recounted by the nuclear witnesses and presented by the author (whose bibliography consumes 20 pages of very fine print), several recurrent themes emerge. Freeman and company insist that nuclear energy is unsafe to the point of irreversible catastrophe, and that containment of radioactivity "lies outside the realm of human prospects". Medical physicist John W. Goffman, who worked closely with Glenn Seaborg, the discoverer of plutonium, forwards this chilling view: "Plutonium is so hazardous that if you had a fully enclosed nuclear economy with breeder reactors fueled with plutonium and you managed to contain the plutonium 99.99% perfectly, it would still cause somewhere between 140,000 and 500,000 lung-cancer fatalities each year!"

These nuclear witnesses testify that nuclear power plants and breeder reactors the world over are riddled with shoddy workmanship and haphazard construction that invite repetitions of Three Mile Island, and worse.

Physicist Ernest J. Sternglass, a Westinghouse veteran, blames these conditions on a cover-up by the military-industrial complex, the government and the unions. (Why leave out the Church, Sternglass, with its huge investment portfolio of stocks and bonds in the munitions, nuclear power, oil and other industries?) "After World War II, the military figured that the way to get their weapons program funded was to make the bomb look 'peaceful' and 'happy'. The 'peaceful atom' was a cover for the continued proliferation of weapons development. It was an elaborate lie."

Researching the effect of atomic fallout from 1958 to 1966, Sternglass concluded that "the closer you get to nuclear reactors, the more babies were dying. . . of respiratory failures of a sort normally associated with prematurity."

In the West Valley plant near Buffalo, claims Freeman, 600,000 gallons of radioactive waste were buried in containers with an admitted life span of 50 years, although plutonium stays radio-

active for 24,000 years. This waste, says Freeman, leaked into Lake Erie, the source of Buffalo's drinking water. In July 1979 says Freeman, 100 million gallons of radioactive water and 1,100 tons of uranium tailings from Church Rock, New Mexico spilled into the Puerco River, which supplies local drinking water, and was carried 80 miles downriver into Arizona. Although this is termed by Freeman "the worst radiation accident in history. . . the New York Times did not report it until 12 days later."

#### ASTRONOMICAL QUANTITIES OF RADIOACTIVITY

"Nuclear Witness" is certain to unloose controversy. Among a wealth of provocative statements in John Govman's assertion that "the issue of nuclear power is simple and straightforward. One, why do you want nuclear power? So you can boil water. That's all it does, boil water. Two, it creates astronomical quantities of radioactivity that cant be contained. The entire nuclear program is based on a fraud -- that there is a 'safe' amount of nuclear radiation."

The tone of "Nuclear Witnesses" is unabashedly alarmist throughout, since author Freeman feels we have much to be alarmed about. If only 10% of what she and her witnesses claim is true in this exhaustively documented "J'accuse", the public had best take a hard look at nuclear energy as a safe alternative to coal, geothermal and solar power, to say nothing of the obsessive stockpiling of plutonium warheads, which need not be exploded to threaten the future of mankind. (LA "Times", Sept. 13, 1981)

\* \* \*

What or who is the sacred driving force behind the untouchable, unstoppable atomic energy program? Why, Satan, of course! He hopes to do for the Earth what he did for Maldek a million years ago, blow it up, and mankind along with it. His "fall" to earth is dramatically illustrated at left by the great French artist, Gustav Dore, for John Milton's "Paradise Lost". Earth will be a Paradise Lost, too, if Satan succeeds in precipitating a planetary climax, an all-out atomic war before the coming Polar Flip. The two climaxes in quick succession should be enough to break Earth up into a band of asteroids circling the Sun between Venus and Mars. But there are greater Forces for Good who have determined that it wont happen again, not in this Solar System at least!

# CLIPS, QUOTES & COMMENTS —

## SATAN'S PHYSICAL PLANE AGENTS AT WORK, IN AMERICA

"I think you should know that we are now launching the crucially important second phase of the Silkwood case. We urgently need your help and the help of all the other concerned people who made the first case such an historic victory.

"As you know, we won a major victory in the first Silkwood case. In 1979, an Oklahoma jury found Kerr McGee guilty of willful, wanton and reckless conduct in causing Karen Silkwood's radioactive contamination and the jury leveled a \$10.5 million dollar judgment against them, of which \$10 million were punitive damages.

"This is the largest standing personal injury judgment in the history of U.S. courts. But we have not seen a penny of the money for Karen's three children because Kerr McGee is appealing to a higher court to avoid paying this fine. If we win this appeal, we will have established the historic legal precedent that the nuclear industry will have to pay for any radioactive damage to people and property.

"It may take two years or more before we win this battle. In the meantime, however, we urgently need your help on what may be the most important part of this historic case -- the phase that may not only stop a serious attack on our civil liberties-- but also finally reveal just who killed Karen Silkwood. The second Silkwood case is even more important than the first!

"In the second case Karen's family is charging that she and her co-union organizers were victims of a criminal anti-civil rights conspiracy by Kerr McGee officers and aided by four FBI operatives. This conspiracy included a coverup of the facts surrounding her contamination and death; wiretapping of her telephones; illegal electronic surveillance of her home and the homes of associates; and physical harassment of Karen on the public highways -- where she was killed by a hit-and-run assailant while on her way to deliver documents to a New York Times reporter and a union official from the Oil, Chemical and Atomic Workers International Union.

"We know that these documents would have conclusively proven Kerr McGee's terrible violations. We know that Karen had these documents with her. They were seen by the Oklahoma police in the wreckage of her Volkswagen, and then removed from her car. In the second case we know we will be able to prove who actually removed those documents. . .

"We know that Karen Silkwood had discovered and documented that over 40 pounds of bomb-grade plutonium were missing from the Kerr McGee facility. Silkwood investigators have uncovered

evidence showing that bomb-grade nuclear materials were being removed from domestic nuclear facilities with the apparent knowledge of the Central Intelligence Agency and officials of the Executive Department. These materials are being transported, in violations of international non-proliferation treaties, to rightwing governments abroad. This evidence further suggests why Karen Silkwood was killed, and why her documents disappeared from her car on the night of her death. . . . What is at stake in Phase II of the Silkwood case is that all citizen groups are protected under the Civil Rights Act against a private, anti-civil right conspiracy.

"The conspiracies in question are designed to deprive citizens of their constitutional rights to organize, to speak out against social wrongs, and to communicate freely with the press. Private industry and Reagan's Justice Department insist that only the Negro race, or other racial minority groups, are protected as a class against such private, anti-civil rights conspiracies. Six Circuit Courts of Appeal, however, have ruled that Free Speech groups other than racial groups are also protected. The Karen Silkwood case hopes to extend this critical protection to the public at large. . . .

"What a shame it would be if the lack of money now kept us from uncovering the whole truth about Karen Silkwood's murder. Your help was crucial in making possible the discoveries of the first trial. Please help us now, for never was there so much at stake. . . ."

In pursuit of the truth,

*Sara Nelson*

Sara Nelson, Fund Administrator  
The Youth Project, Box 22068  
Washington DC 20002

KAREN

Pictures of the back of Mrs. Silkwood's car show a deep dent at the left end of the rear bumper. This indicates the car was deliberately rammed on the left side to drive off the right side of the road at high speed and, in this case, head-on into a concrete bridge abutment. A violent martyrdom but mercifully swift. This daughter of Isis laid down her life that her children and others might live, free of the Satanic poison distilled from atomic fission. Mary has taken her into Her bosom.

## BOMB MATERIAL TO RIGHT-WING GOVERNMENTS?

The Karen Silkwood case poses the problem of the 40 pounds of "bomb-grade nuclear material" that disappeared from the Kerr-McGee plant. Suppose it went to Iraq and Saddam Hussein's Osirak nuclear reactor at Bagdad? Whatever the price, Hussein had plenty of oil money to pay for it. It is well known that Dictator Hussein's atomic engineers were shopping for weapons-grade uranium, and Israel's "CIA" must have learned that such a sale was made. Hussein had also threatened to use atomic weapons against the Israelis if he ever obtained them; so, Prime Minister Begin of Israel had little choice but to order the Osirak facility at Bagdad destroyed before it went into production; and so it was, in the daring raid Sunday, June 14th. Thus Satan's attempt to get atomic bombs into the hands of unprincipled military maniacs was foiled, for the time being. He will keep prodding his physical plane agents, of course.

The governments of the world publicly scolded Israel for daring to perpetrate such an offensive defensive measure, but privately there was a collective sigh of relief. The atomic weapons with the potential of starting World War III had been defused even before they were built! And the munitions manufacturers and dealers in America are happy. They got their money, and Hussein wouldn't get a refund even if he asked for it.

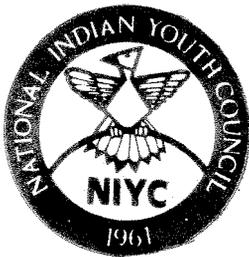

## RADIATION DANGER STARTS IN THE URANIUM MINES

"I'm sure recent headlines of nuclear protests and nuclear accidents have made you more aware of the dangers connected with nuclear power. But what the headlines are not telling you is that those dangers start long before the power plants. They begin in the uranium mines!

"The deplorable conditions in those mines have already killed 100 Indians. And the exposed radioactive wastes from the abandoned mines and mills now threaten the lives and well-being of tens of thousands of more Indians. Why the Indian people? Why are we more threatened than others by this first stage of the nuclear fuel cycle?

"Because it is on land owned by the Indian people that more than half this nation's uranium supply lies. In New Mexico alone 14 energy companies have holdings on Indian land for uranium exploration and development. The Exxon Corporation is exploring for uranium on 400,000 acres of the Navajo Nation in Four Corners. Gulf Oil is sinking the world's deepest mine shaft into Mount Taylor -- one of the four sacred mountains of the Navajo people.

"Because it is Indian people who have been used to work in the dangerous uranium mines. The uranium mines in the Navajo Nation are owned by Kerr McGee, the same company found guilty in the infamous Karen Silkwood case and ordered by a federal grand jury to pay \$10½ million in damages to Ms. Silkwood's family for radia-

tion contamination she received while working in their plutonium plant. 'Those early mines,' observed the director of the Public Health Service in Shiprock, New Mexico, 'had 100 times the levels of radioactivity allowed today. . . Inside, the mines were like radiation chambers giving off unmeasured and unregulated amounts of radon, radioactive gas. It was a get-rich scheme that took advantage of Navajo miners who didn't know what radioactivity was or anything about its hazards.'

"Because it is the Indian people who live near the abandoned uranium mills where millions of tons of radioactive uranium wastes have been left unshielded. . . In the late 1940s America's nuclear industry began to flourish. They needed uranium, and they discovered Navajo, Pueblo and other Indian tribes owned the land where most of the country's uranium was to be found. . . Land that non-Indians considered barren and worthless two generations ago suddenly took on great new value. The Indian people, unaware of any of the dangers and never advised about them, were persuaded by the Bureau of Indian Affairs to lease their land for uranium mining. Despite the fact that the BIA was created to protect the interests of Indian peoples, that government agency was once again acting more out of concern for the interests and profits of other involved than for the well-being of Indians.

#### POISONED LAND FOR THOUSANDS OF YEARS

"Much of the land where our people have lived for thousands of years is now poisoned by radioactivity -- and will remain poisoned for many thousands of years until the radioactivity of the uranium is dissipated; so death, sickness and deteriorated living conditions have resulted from this brutal exploitation of Indian people. We know that the water many Indians drink on their reservations and even the air they breathe is contaminated with radioactivity. We've discovered that even many of the homes Indian people live in have been built out of materials that are radioactive. The company that supplied the materials never warned that such materials were dangerous to health.

"How would you feel if that were happening to you? Scared? The Indians are. Angry? The Indians are. In need of help? The Indians are, and there is a group dedicated to providing that help. It is the National Indian Youth Council. . . now focusing a great deal of its energies in righting the wrongs inflicted on Indian people by the nuclear energy corporations; for Navajo, Pueblo and other tribes are still being pressured to allow the companies to explore and mine for uranium on their land. NIYC is involved in many actions to put an end to this uranium mining responsible for the deaths and harm of so many Indian people and is the source of invisible radiation potentially threatening the lives and health of millions of other Americans. . .

"NIYC is providing Indian people with the knowledge and training they need to understand the energy issues more thoroughly, and

is making them aware of the important role they can play in helping to develop and apply safe alternate energy systems. . . through environmental resource training sessions and seminars . . . through an environmental resource library. . . through a solar demonstration project for heating greenhouses and homes. . .

"If these programs are to continue to grow, it is vital that the National Indian Youth Council get help, help from people like you. That is why we ask you to lend your support by becoming an NIYC Member today."

Sincerely,

Gerald Wilkinson, Cherokee  
Executive Director, NIYC

### 5,000 NEIGHBORS PROTEST AT DIABLO CANYON

LA "Times", Sept. 21, 1981, Avila Beach, California: "A massive demonstration against the Diablo Canyon nuclear power plant took place Sunday, but it was unrelated to the much-ballyhooed effort to blockade the plant that so far has drawn far smaller numbers.

"Several thousand people, many pushing baby strollers or tugging at dog leashes, paraded past the plant's main gate here in a show of opposition to the \$2.3 billion facility, which is expected to get the nod today from federal regulators to begin low-power testing.

"The 6-day-old blockade attempt, planned for nearly three years by the anti-nuclear Alliance, has resulted in nearly 1,100 arrests and several visually interesting confrontations for television cameras. But it has done little to deter plant operations and has attracted only about 1,500 blockaders, far short of the thousands that Alliance leaders had predicted would participate.

"By contrast, Sunday's action was an almost spontaneous gathering of nearly 5,000 people, most of them residents of nearby San Luis Obispo community who have a distaste for the controversial power plant. It was arranged only two days ago by a local anti-Diablo organization, unaffiliated with the Alliance. . . "

Like us here in Vista, the inhabitants of San Luis Obispo are downwind from a nuclear power plant, only they are closer, about five miles, while we are 25 miles from the San Onofre plant. So, in event of a serious nuclear accident, they won't have much time to evacuate their homes and city, never to return. The San Luis Obispanians have also learned that it is going to cost one billion dollars to clean up the lethal radioactivity at the Three Mile Island nuclear power plant in Pennsylvania. Who is going to pay for the billion-dollar cleanup? Why the customers of the power company, of course! If not directly in greatly increased electric bills,

then indirectly as taxpayers; with the Federal government paying the cost of the cleanup." Citizen protesters can expect no sympathy from the President. He has enthusiastically committed himself to public support of the nuclear weapons and energy programs. The sacred production of five atomic weapons a day will continue, sacred to Satan, that is; and anyone who dares to try to stop it will find themselves -- like Karen Silkwood -- the victim of extreme prejudice.

#### SELECTIVE LAW ENFORCEMENT, REAGAN-STYLE

President Reagan made a conspicuous example of law enforcement when he fired 12,000 air controllers for breaking the law in striking for higher pay and better working conditions. But he missed a similar opportunity to fire the Nuclear Regulatory Commission in September for refusing to open its budget meetings to the public. The NRC's annual \$3 billion budget, cancelled, would go a long way to help the President balance his own budget.

"A federal judge held the five members of the Nuclear Regulatory Commission in contempt for violating his order that the agency open its budget meetings to the public. . . The NRC has claimed that the disclosure of its budget meetings would be 'likely to significantly frustrate' the budget process', (LA "Times", Sept. 10, 1981)

Also, in September, President Reagan missed an opportunity to fire his election campaign committee for breaking the law. In fact he did just the opposite by ordering his committee to cover up details of its campaign spending.

"Washington (UPI) - The Federal Elections Commission said Tuesday a preliminary staff audit has determined President Reagan's 1980 campaign may have misspent \$1.5 million in federal campaign funds. But Chairman John McGary said the FEC has made no decision yet on the audit report and has not determined whether the Reagan campaign should be ordered to repay the funds to the U.S. Treasury. Such an order would be the biggest leveled by the FEC since it was created in the wake of the Watergate scandal. The disclosure came in legal papers filed by the FEC in U.S. District Court in response to a suit brought by the Reagan campaign, seeking a temporary injunction blocking public release of the preliminary audit. The FEC was prepared to release its audit last month but was blocked by the Reagan suit." (LA "Times", Sept 9, 1981)

Back in April he encouraged government law-breaking by pardoning former FBI officials W. Mark Felt and Edward S. Miller for authorizing illegal robberies of private homes. "The record indicates," said Reagan, "that they acted not with criminal intent but in the belief that they had grants of authority reaching the highest levels of government." The "highest level of government" at the time the FBI felonies were committed was former President Nixon! Who, of course, has been pardoned for any and all crimes committed while in office. Reagan didn't have his facts straight, for the jury

"had specifically found that the two men acted without the approval of higher officials and in the full knowledge that the break-ins violated the constitutional guarantees against 'unreasonable searches'. 'We tried exactly that issue before the jury for eight weeks,' complained federal prosecutor John W. Nields, Jr." (Newsweek, April 27, 1981)

The Washington "Post" cartoonist, Herblock, contrasted Reagan's pardoning of Felt and Miller, with former President Nixon, who refused to use the vast pardoning powers of the president to pardon his henchmen, 25 of them, who all went to prison for committing crimes in his name.

#### SPEAKING OF FORMER PRESIDENT NIXON -- THE HEADLINES

##### "Nixon's Papers The Worst-Selling Of Any President's"

"Washington (UPI) - Richard M. Nixon's official papers for his final seven months in the White House - Jan. 1 to Aug. 9, 1974 - are the worst-selling volume of any President since the compilation and publication of presidential papers began. . . The government printing office's Stanley Fields said Nixon's 1974 volume has sold only 374 copies. John F. Kennedy's volumes are the best-sellers -- 18,532 copies for 1961, his first year in office, and a total of 23,632 copies for his 35 months in office." (Aug. 19, 1981)

##### "Nixon - No Monuments, No Souvenirs"

"San Clemente, California, LA 'Times', Aug. 21, 1981 - Former President Richard M. Nixon's personal imprint, like footsteps on a beach at high tide, has all but disappeared from the small seaside town of San Clemente, once known grandly as the home of the Western White House. Nixon's presence at the 25.4-acre La Casa Pacifica estate from 1969 to 1980 gave worldwide recognition to the community, but the community has not seen fit to reciprocate. There are no marble monuments to Nixon here. No 'Nixon Slept Here' billboards on the outskirts of town. No souvenir shops crammed with ashtrays and spoons bearing his face. . . "

##### "Nixon Stirs Flood Of Duke Memories"

"Washington (UPI) - A group of Duke alumni Saturday protested the selection of their campus as the final resting place of Richard M. Nixon's presidential papers by sending their beer mugs and T-shirts back to their alma mater. Gathering by the Watergate apartment complex -- site of the 1972 break-in that ended in the Duke law school graduate's resignation as President two years later -- the alumni stacked a pile of school mementos to be carted back to the Durham, North Carolina campus.

"'The prospect of Richard Nixon's artifacts finding a home at Duke University leaves us deeply embarrassed,' said Kirk Johnson, Duke '77, reading a letter addressed to university President Terry Sanford. 'Accompanying this is a box of assorted Duke memorabilia -- T-shirts, bumper stickers, graduation programs. Once

a source of pride, we now have little use for them.'

"The letter was signed by 62 Washington-area alumni opposed to locating the library at Duke. Some alumni wore 'Impeach the Nixon Library' T-shirts. Lawrence Goodwyn, Duke historian, said, 'housing the papers themselves constitutes a monument' to a disgraced President. He said the building planned to shelter 36 million Nixon Administration documents would be the second-largest structure on the campus, eclipsed only by the Duke chapel. 'This is more than just a stand on principle. It's another step in our celebration of democracy,' Goodwyn said."

#### THE FIVE RITES, THE URGE TO PURGE

"Thank you for sending the copy of the Five Rites of Rejuvenation. Enclosed is a check for \$12 for a BSRF membership and \$2 for a copy of the latest catalog. We have been doing the Rites since about July 1, 1981, and enjoy them; however, we've been experiencing mucous problems with our throats and much coughing. Feel better now and at age 66 feel there is a way to go."

B.W.H., Potrero, California

#### THEY MAKE GOOD CHRISTMAS PRESENTS

"I have been doing the Rites for over a year now with very good results. I want copies of the book to give to my friends. Send a catalog of your other products and as many books that \$25 will pay for."

M.T., Leucadia, California

Glad to have your order, Mike, and let us hope your friends have as good results healthwise with the Rites as you have; and, if you are into meditation and contemplation, you will find a considerable increase in mental and spiritual power as your endocrine system purges itself and comes into better balance. BSRF No. 30, "The Five Rites of Rejuvenation", \$3.00 postpaid.

#### WHAT CAN I DO FOR PEACE THIS CHRISTMAS?

"Hundreds of individual volunteers will be needed in California starting this December to help gather enough valid signatures to qualify the Nuclear Arms Freeze Proposal as an initiative measure on the November 1982 California statewide ballot. You and your friends can help get the drive off to a good start by hosting a signature gathering party in your neighborhood in early December. The final wording that will appear on the ballot has yet to be determined, but it will carry essentially this message:

"To improve national and international security, the United States and the Soviet Union should stop the nuclear arms race. Specifically they should adopt a mutual freeze on the testing, production and deployment of nuclear weapons and of missiles and new aircraft design ed primarily to deliver nuclear weapons. This is an essential, verifieable first step toward lessening the risk of

nuclear war and reducing the nuclear arsenals.

"The wording should also include instructions for the Governor of California to communicate this message to the United States Government. (The Fall, 1981 "Spotlight", American Friends Service Committee, 980 Fair Oaks Ave., Pasadena, California 91103.

#### WORLD PEACE MARCH, "THE TIME HAS COME"

"The Nipponzan Myohoji Buddhists from Japan are currently walking in various parts of the world in a witness for peace and global disarmament. They will arrive in New York City in May of 1982 to be present for the United Nations Special Session on Disarmament II. . . One branch of the Peace March will be leaving Los Angeles on October 24, 1981 and the walkers will travel on foot through parts of California, Arizona and New Mexico on their way to New York. There are many ways that you can help. . . " For more details write to the editors of "Spotlight" at the above address.

#### CALIFORNIA IS MOVING! UP AND DOWN, THAT IS

LA "Times", Oct. 2, 1981 - "A strong earthquake in the Eastern Sierra shook Hot Creek fish hatchery near Mammoth Lakes so hard that 200,000 fingerling rainbow trout were dumped from troughs and killed, authorities said. Wednesday morning temblor measured 5.8 on the Richter scale and lasted 20 seconds. It was the most powerful of 320 quakes that have hit Central California since last May, seismologists said. The quake and aftershocks broke windows and damaged walls at a shopping center under construction Mammoth Lakes and set off rockslides in Convict Canyon."

#### "THOU SHALT NOT COMMIT ADULTERY"

The higher, occult interpretation of this Commandment is that a student should not adulterate his allegiance to one metaphysical teacher or School by seeking help or support from another, once a dedication has been made. The other day we received a distress call from a young man whose southern accent indicated that he had indeed come across the country to Los Angeles to try to save his brother's life. Both were monks in the Hare Krishna movement, he said, but the brother was slowly dying from lack of energy, a rather obvious case of obsession and vampirism. I asked the young monk if he and his brother had sought help from their spiritual leaders in Hare Krishna. Yes, but their leaders refused to do anything about it. Their major concern was making money for the Order, not solving the karmic problems of the mendicants. When I questioned the wisdom of belonging to an Order which made high-sounding spiritual claims but had no power to back them up, he was resentful, and obviously not open to the idea that the vampirism might be coming from within the Order itself! Nevertheless, I offered to try to help in the case if he could send some kind of "witness" for contact, a photograph or written request from the brother. There has been no further contact in this case.

## "I WANT TO MATERIALIZE THINGS INSTANTLY"

"Thanks for my life -- for helping save it! Please send the BSRF publication list. Enclosed is a dollar (now \$2.00 postpaid). Please subscribe me to the Bulletin. Enclosed is \$10 (now \$12.00). I want to learn and teach how to materialize things instantly, like Coutinho (Brazilian psychic, 'National Enquirer', Oct. 16, 1979) as a way to lessen world need and greed. Any ideas? Any leads?"

"I want to understand what Keely is talking about, what he understands. I near go hypoglycemic every time I read 'Keely and His Discoveries' by Clara Bloomfield Moore. Please help find the keys. Once you sent me the Bulletin with the Phoenix Radioclast in it. I gave it to the Gerson Cancer Clinic in Tijuana, Mexico; so I need another one. Enclosed is a dollar.

"Can a person living in a converted schoolbus visit a BSRF library anywhere and just read?"

Ms C.L., Santa Rosa, California

Yes, we would all like to materialize things instantly but, mercifully, that power is withheld from the vast majority of mankind because it would be used selfishly, destructively; and there is already too much destructive power in the world! H.P. Blavatsky makes that point in her discussion of John Worrall Keely and his psychic powers in "The Secret Doctrine". At the time Keely was running his machinery with his own sex force at the Philadelphia Centennial in 1876, Blavatsky and Col. Olcott were founding the Theosophical Society in New York City.

"If the question is asked why Mr. Keely was not allowed to pass a certain limit, the answer is easy," wrote H.P.B. "It was because that which he has unconsciously discovered is the terrible sidereal Force, known to, and named by the Atlanteans MASH-MAK, and by the Aryan Rishis in their 'Astra Vidya' by a name that we do not like to give. It is the Vril of Bulwer Lytton's 'Coming Race', and of the coming Races of our mankind. The name Vril may be fictitious; the Force itself is a fact, as little doubted in India as is the existence of the Rishis, since it is mentioned in all the secret books. . . ."

We can help you lay the groundwork for developing such power, and controlling it! -- with our series of lessons on the Cabala. You'll find them listed in the Catalog of our publications. We will send you a reprint of our article on Keely in the March-April 1973 Journal, and the one on the Phoenix Radioclast. The address for info on the Gerson Clinic is PO Box 430, Bonita, Cal. 92002. Offset prints of Mrs. Moore's 1893 book on Keely can be obtained from Gray Barker, PO Box 2228, Clarksburg, West Virginia 26302.

We dont have reading rooms in our BSRF headquarters. Visitors are welcome to come for a chat and an exchange of ideas over coffee on weekday afternoons from two to four. The other time we need for administrative work. Call before hand to make sure we're home.

## "ERA WALKS RAISE \$1 MILLION"

"National NOW Times", September 1981 - "Coast to coast on August 22 the nation echoed with the songs and chants of ERA supporters in the LAST Walk for ERA, one of the largest fund-raising efforts to be held on behalf of the Equal Rights Amendment for women. The walkathons in this final year of the ratification campaign raised close to a million dollars, more than tripling the proceeds from ERA Walks in any of the previous four years the events have been held.

"The extraordinary success of the final ERA Walk is just one more sign that the people of this nation understand the urgency of the need for the Equal Rights Amendment," commented NOW president Ellie Smeal. 'We have seen the increased support in the public opinion polls, in our rapidly increasing membership, in the volunteers who flock to our doors, wanting to do whatever they can to help ERA pass.'

"TULSA WORLD: In Oklahoma to kick off the last 11 months of the National ERA Countdown Campaign... Smeal addressed standing room only crowds Wednesday in Oklahoma City and Thursday in Stillwater... She speaks about ERA with testimonial fervor that borders on being emotional... she always has her statistics which she calls 'misery in sterile form' at hand, however.

"MIAMI HERALD: If it takes talk, NOW head can get the ERA passed... She (Smeal) speaks about politics and about women with the speed of an auctioneer and the intensity of an evangelist, spilling out statistics and anecdotes and surveys with disarming ease.

"Smeal's speaking and organizing tour covered some 5,000 miles from Dallas and Oklahoma City through St. Louis and Springfield to Miami, Tallahassee, Birmingham and Atlanta. . ."

Ironically, Eleanor Smeal is a devout Roman Catholic, the church that has encouraged the recognition and worship of the feminine aspect of Creation in Mary, the mother of Jesus, yet she has found that the strongest opposition to the passage of the Equal Rights Amendment comes from her Church and the National Conference of Bishops, headquartered in Washington DC for the convenience of its lobbying efforts.

## "REMOVE MY NAME FROM YOUR HEALING LIST"

"I went into the hospital on Tuesday morning and for two days went through one test after another and they could not find anything wrong with me -- the cyst was gone -- and this with all the latest equipment. This morning the Dr. came into my room and asked if I wanted to go home. It took me by surprise, but I was so very sick in the two week period before. Now nothing is wrong so you can remove my name from the healing list.

"My daughter, who lives in Wyoming, and is 36 yrs. old acquired Multiple Sclerosis through the birth of her daughter 6

years ago. Could you add her name? \_\_\_\_\_ . Her father had MS and was in a wheel chair for three years. His death came as a result of fire-smoke in the lungs, March, 1973. So she thinks she has inherited the disease. Thank you so much for everything."

Mrs. V.B.W., Tampa, Florida

And thank members of the Inner Circle, Jehoshua (Jeshu, Jesus) and other Spirit Forces, human and angelic, who work with us in our healing ministry, especially Raphael and his hosts of angel helpers. They do the work. All I do is turn the switch. But in the case of your daughter more than a name will be needed, most likely, for a good, strong "witness" contact -- hair clipping, photograph, signature in pencil -- if she can write; for this looks like a case of obsession by the earthbound father, an "unclean spirit" which must be "cast out" -- to use the words attributed to Jeshu-Jesus in the New Testament.

It will take considerable force to dislodge him from her aura after all these years -- especially if she has come to accept the condition -- which may be karmic, going back a long, long way -- and if other members of the family have accepted it and made their adjustments accordingly in six years of living with a multiple sclerotic. The inertia, the resistance of physical matter is a force to be reckoned with. A direct request for help from the daughter and/or her husband would be welcome, and would be a strong indication that a change for the better is desired by both of them.

#### "WHAT WILL THE DOLLAR BUY?"

"Once again we are in some anxiety as to what the dollar will buy as I send in my subscription renewal. We are hearing of multinational corporations and cartels, state socialism and the attendant concentration camps for dissidents. Most of my visiting friends say the USA is Fascist anyway. Guess we in New Zealand head the same way.

"We had a New Age Festival here in Wellington last weekend. It included religions and cults and movements. Somehow the vibrations were good -- due to a preponderance of Spiritualists? It was under the auspices of the Theosophical Society. An overworked woman president received a message of encouragement from Madame Blavatsky. Her co-founder, Colonel Olcott came through with an attendant message that an international conference of Theosophy next year would diversify and extend the three basic principles of the Society.

"Also a woman leader of Green Peace received a message from the Spirit of Whales thanking her and approving of the gentle tactics employed in the Save-the-Whales movement. She was warned that a male ego would come into the organization seeking publicity by aggressive means that would not help the cause. With several hundred people present a meditation-healing was completely

understood and very powerful. We are getting somewhere -- on the ascendant?"

M.S., Wellington, New Zealand

Of course we are getting somewhere! But New Age principles cant be built on the rotting timbers of the old; so the surface of the planet will have to be cleared of Piscean Age junk; and so the clearing is bound to be disruptive, even painful, for most of us. Anyhow, in the twilight of their heyday, the Old Gods are not going to give up their power and privilege without a fight. It is encouraging and not surprising that the founders of the Theosophical Society are guiding their organization from the Inner Planes. And the elemental God of the whales coming through a medium with a message of encouragement to a human friend is evidence that the Veil between the two worlds is thinning. The Brotherhood of Angels and of Men, little more than a concept now, will be a fact of life in the Aquarian Age when such phrases as Mary, Queen of the Angels, will be given more than lip service by religious devotees.

### SYNCHRONICITY

My once-a-week, six-mile walk to the Vista post office and back includes a half-mile stretch along the Santa Fe railroad right-of-way. It's an enjoyable alternative to paved streets and automobile traffic. On a recent Saturday morning I could hear the warning bell at a street-crossing and see the signal light swinging back and forth -- a malfunction because there was no train anywhere in either direction along the single track. Yup, Vista is a one-track town, a bedroom community, no capital industry. Walking along the right-of-way I approached the crossing. A car pulled up and stopped. The driver looked each way. I was the only "train" in sight. He roared with laughter. I shrugged my shoulders "dont blame me!" He waved, shifted to a low gear and took off, leaving a trail of burned rubber behind him.

### RECENT AND VERY READABLE

"Magnetic Therapy" by Abbot George Burke, St. George Press, 3500 Coltrane Road, Oklahoma City, Oklahoma 73121, 1980, \$4.95. Burke is the Abbot of the Holy Protection Monastery in Oklahoma City. This is the Voice of Experience in a field of Christian service all too often negelected by the orthodox minister, Spiritual Healing, and Abbot Burke backs it up with understanding and recognition of the electro-magnetic forces at work in the human organism. He also honors our borderland research with descriptions and drawings of our Eeman Screens and the Vitic device for restoring polarity. Subjects covered in this 86-page paperback: What is Magnetism, What is Magnetic Therapy, Historical uses of Magnetism, How Your Body is a Magnet, How to do Magnetic Therapy, How to Check YOur Magnetic Energy Level, The Five Methods of Magnetic Therapy, How to Turn Your Hands into Magnetic Scanners, Specific Therapy Routines for Various Ailments, How

to Dissolve Kidney Stones and Gallstones, How to Treat Sciatica, Constipation, Headaches and other Ills, How To Treat Others at a Distance, Cancer and Its Magnetic Treatment, Mental Illness as a Magnetic Problem, Methods to Increase Your Magnetism, How To Stay Well and Magnetically Fit, Etc."

"The Janos People - A Close Encounter of the Fourth Kind" By Frank Johnson, Neville Spearman, England, 1980. This story of an English family taken aboard a Space ship, June 19, 1978 for examination and education is notable for the Invaders' frank admission of why they are here. Let the ship captain, Anouxia, tell it in his own words:

"We are travellers; we have been travelling for a very, very long time, and we have come a very, very long way. We have been watching you for a long time; we are looking at you; we are studying you to see if we can stay here. We cannot go back."

These Janosians claim their planet was made uninhabitable by a rain of rocks, the break-up of the too close approach of one of their moons. Trouble was compounded by the unexpected blowing up of their nuclear power stations, making the whole Janos (pronounced Jane-oss) surface unlivable. Johnson's book gives reasons for some of the invasions lacking in such other Close Encounters as those of Barney and Betty Hill, for instance. Here are a few more reasons from one of the ship's pilots, Uxiaulia:

"You are our people, because you are the same as us; we could learn from each other. (Sound familiar? It should. It's an echo of what the Yada di Shi'ite said through Mark Probert 20 years ago: 'You could learn much from the space people.') You can help us by giving us a home, friendship, a chance to live again. We must have somewhere to live; we cannot float around in space forever. Together we can conquer all space. Other planets are inhabited; not all are friendly -- too far to do much harm at the moment. Some of our people have been destroyed by inhabitants of other planets. We cannot allow this to happen anymore; so we come in peace, if all agree. There must be no war; we do not want to cause any trouble. We have suffered too much sadness and sorrow; we cannot fight more wars. We would rather die in space."

This Christmas of 1981 we could sure use some help in trying to get along with each other. Otherwise, a nuclear holocaust would make this planet uninhabitable too; and our kindergarten space program has yet to develop the passenger carrying spaceships which could salvage a few million inhabitants if our collision course with Russia comes to term. If, on the other hand, the Janosians effectively participate in preventing a nuclear holocaust, thus saving the planet as a livable schoolroom, they will have earned the right to living space here themselves. There will be plenty of that after the planetary housecleaning is over and millions of backward, immature souls have been moved off to a more primitive environment, furnishing the strife necessary to their evolutionary needs.

## THE FIRST INTERNATIONAL SYMPOSIUM ON FREE ENERGY

We were invited to publicize and to attend this first symposium on Non-Conventional Energy Technology, Oct. 23-24, 1981 at the University of Toronto. It was sponsored by Prof. Charles Manly of the University and by Prof. Michrowski's Planetary Association for Clean Energy, of Ottawa, Canada, but we couldn't make it. The speakers included researchers familiar to us from Prof. Michrowski's Newsletter and from the U.S. Psychotronics Congresses. It is possible cassette tapes of the talks will be offered to the public. For more information write to Prof. Manly, 85 Alcorn Ave., Toronto, Ontario M4V 1E5, Canada. Phone 416-923-8586.

We have a new Associate in the Los Angeles area who makes his living, part of it, evaluating exotic electronic devices and circuits, at \$20 an hour. He tells us he has constructed and tried out dozens of such devices over the years and not one has delivered free energy on the claims made by their inventors. His latest is the construction and operation of "The Transistorized Coil", a novel, closed circuit amplifier developed by Shinichi Seike to put out more energy than it takes in. Technical description and drawings of the Coil are in English in Prof. Michrowski's Newsletter for June 1981. Membership in the Planetary Association is \$30 a year. It includes a subscription to the Newsletter. 100 Bronson Ave., Suite 1001, Ottawa, Ontario K1R 6G8, Canada. The reason for the continued failure of Free Energy devices to live up to expectations may be Occult!

### NO PLANETARY BLOWUP IS TO BE ALLOWED!

We have this relevant observation from an entity identifying himself as Nikola Tesla: "This evening I will approach it (the Free Energy subject) in a little different manner. . . in answer to a question which has entered the mind of practically every individual who is working for the uplift of mankind in every category. Why is it that these so-called inventions -- which we have placed on the Drawing Board in this Dimension and are ready to be lowered into the physical -- are not being implemented or expressed in the physical?"

"The answer to that is a very, very simple one which we have iterated time and again. You, the Earth and all on it, are not yet ready for these innovations and miracles to be manifested even in the pilot stage. The Forces of Darkness are still in the ascendancy upon the planet Earth and even at the present moment the planet is on the edge of a precipice as regards the manipulations of the military forces in almost every nation in the world. We could not afford for one moment to produce a source of Cosmic Energy of any nature which could be and would be immediately confiscated by the Military and used almost immediately to blow your planet to smithereens. . .

"You must be patient just a little while longer until our dear beloved Brothers and Sisters from the so-called outer space

come to your rescue. And I may state with authority that if the Military buildup continues as it is now progressing without compromise or reduction, their visits to your Earth will not be long in coming. . . " (July 1981 "Voice of Universarius", \$10 per year, 3620 SE 84th Ave., Portland, Oregon 97266. Meetings every Sunday)

# YOWEE

AUSTRALIAN ABORIGINAL  
HEALING WORKSHOP

In 1978 the late Cyril Havecker, blood brother of the Warramunga Tribe, gave a series of seven Workshops on Aboriginal Healing at the Ngudarley Aboriginal Cultural Center in Sydney, Australia.

We were fortunate enough to obtain a copy of his texts through an Australian Associate and have reproduced them for the benefit of those BSRAssociates interested in the Healing Arts, as practiced by pagan magicians much closer to, and aware of, the powerful earth forces which move matter. Yowee is the Aboriginal name for the soul or Higher Self. Workshop No. 1, Aboriginal Healing, When Did It Begin; 2. Creation and Healing Energy; 3. Review, Auto Suggestion; 4. The Medicine Man, Bringing Energy Into the Body; 5. Correspondences: Physical, Spiritual, Octaves, Colours, Zones; 6. The Three Basic Drives: Self-Preservation, Reproduction and the Social Instinct; 7. Plant Foods, Vitamins and the Balanced Diet. Well illustrated, and with pictures of the Aboriginal artists who recently toured the United States as part of cultural exchange. 40 pages, 8½ by 11, postpaid. . . . . \$5.50
