# COLOR HEALING

BY

*Doreal*

(Part Four)

You understand why color can have an effect on the human body. We have to resolve it back to its primal source. The light that we receive on this earth comes from the sun and the sun is but a window through which the forces flow through the Cosmos into the World and it also brings in spiritual energies that are invisible and intangible and cannot be measured. All light, even electrical light, derives its energy from the same source that the sun derives its nature. Electricity is the energy which flows from the sun on a different wave-length of vibration from the tangible or visible light that we see.

I was just reading an article today that postulated that science was entirely wrong in their theory that space was cold. It said, at White Sands a rocket

had been thrown into the air 250 miles high and it never did come back to earth. Some said, perhaps it disintegrated and they said perhaps, all hope of flying to the moon, the space-ships and other things would have to be abandoned. We know that what lies between the planets and earth and sun is not space but other dimensions. We can understand why after it passed through the Heaviside Layer it disappeared and became invisible.

The reason I mentioned that was simply this: along certain wave-lengths visible light comes to earth; along other wave-lengths invisible energies and forces come to earth and it is those energies that are primarily responsible for the life, health and shall we say, the length of years we live on earth. The occultist has known for a long time that the sun itself sends forth energizing and life-giving rays but few know also that certain of those rays in passing become changed and they have a definite detrimental effect upon the human body and those rays which are invisible and intangible are responsible for the deterioration of the cells and tissues and if they were not present it would be possible for a person to live for ten thousand years.

We know too, that in the world of man, color plays a very important part. We might even say that color had a different psychological effect upon different races of people as well as different individuals. It is very hard to lay down a hard and fixed rule and say this particular thing will have a certain effect upon an individual. We know in the Western World that white is a sign of joy and happiness, and generally white is looked upon as a pure color and the color of life, whereas in China, white is the color of death. They wear white for mourning in China and they cannot understand our wearing white at some joyous occasion because white to them has a depressing effect, whereas it has the opposite effect to us; that is, a mental effect, because of habit and custom. Some people say black is always a depressing color and that is not necessarily so. Yet, it is a custom that we have. We know that any color combinations may be added to those, that actually white is a cold color when it is alone by itself but white is toned down and used with red, orange, and yellow, or even blue, because all those things have a definite reaction upon an individual.

Haven't you ever gone into a room,

and without being aware of why, you would feel very much depressed? You might not even be consciously aware of why, yet, it would be because there was an unbalance combination of color or they did not react favorably on you. Another person who is vibrationally attuned might feel exhilarated.

We know that man himself is basically of a color harmony. By that I mean this, that every individual, psychically, occultly, and physically reacts to one major color. The color a person reacts to is because the seven rays or the seven lights that flow forth from the Great Central Spiritual Sun are divided into seven spiritual lights and essences and each person vibrates to a different basic color harmony. We have all heard that a certain master works on a certain ray. Every person vibrates to one basic and individual color. To one person it may be blue, another yellow, another green. That may be the basic color of one person. The way that can be and has been determined is for the person to seat themselves or lie down quietly relaxed and center all their attention just between the eyes at what we call the pituitary center. # The Brotherhood Newsletter

Dear Students and Friends,

We are having our very wonderful, warm summer weather. However, anyone planning a trip to the mountains should be prepared for cool evenings.

A great amount of work has been done on the New Temple and it will be so very nice to once again resume our lectures and Church Services there in the near future.

This past week marked the end of another phase in the life of one of our co-workers, Sandy Humbert, who will be moving on to new endeavors and experiences. We will all miss her, but we wish her the best in all she undertakes. We are living in the times of changes, growth and progress. Also, at this time, we want to welcome Norma Shwed to our staff. Norma has been a student for many years and we are very fortunate to have her with us, and extend our welcome to her.

The Shamballa Volunteer Fire Department had the benefit drawing this past Sunday for the new G. E. Color Television. Congratulations are extended to Mr. K. S. Norquist who was the fortunate winner of

this beautiful color T. V. The Shamballa Fire Department wishes to thank everyone for their help and for the generous contributions of time, effort and money. Their goal was accomplished and efforts were rewarding.

Happy Birthday wishes are in order for several of our fellow members, Ella Andrews, Arthur Budinko and LaVera Knowles. This month you will have added another year to your experience. May you add many more years to your growth and development and let only the good from the past year remain with you.

The monthly Fellowship of the Avatar was conducted by Dr. Winnie Whitby. She stated that mankind was faced with meeting the causes of the effects that have been set up many years ago, and that the patterns follow the same trend throughout many lifetimes. It behooves every individual to study and reconstruct his life so these set patterns can be overcome. In the final analysis, we must learn to go within to find the answer, both mental and spiritual.

# MAN ON THE PATH

By

Hank Vernava

The world's revolved for years and years  
Needless to say, with joy and tears.  
Who understands this sphere so great?  
Most people try, but all too late.  
It turns and turns, and baffles the best,  
Man won't stop trying, for he, can't rest.  
Is, this thing, so hard to see,  
Perhaps because, its simple, and free?  
Or is it as difficult as we think  
Must we, labor forever, dare not shrink?  
Do our trials and efforts really count  
Will, we finally, reach the mount?  
How many years, will it finally take  
Before we fully, become awake?  
Questions, questions, do prevail  
A glorious story, we shall tell.  
Let's strive and work, with efforts and more,  
For destiny's end, has wonders in store.

to Illumination and Oneness with the Divine Spirit.

ARTICLE 8: We believe that each of us is a child, or Sun of God, the Divine Light. For did not Jesus say, "I am in the Father, the Father in me, and ye in me."

ARTICLE 9: We believe that the physical body is the temple of God, and will endeavor to make it a perfect channel for the illuminated soul to manifest through.

ARTICLE 10: We believe in the three-fold development of body, mind, and soul, each balancing the other in perfect harmony.

## ASTRO-CHEMICAL ANALYSIS

This very scientific book gives the Astro-Chemical Analysis of the twelve different chemical types according to their Astrological signs. Through chemical and spectroscopic analysis, twenty-two elements are distinguishable in the human body. One hundred persons born under each sign of the Zodiac were examined in the formulation of this analysis. The Astro-Chemical Analysis is combined with a knowledge of bio-chemistry and endocrinology and definite analysis of the type.
