ORION TO HIS READERS.

With becoming pride and confidence, "ORION" can assert that the sale of this work annually increases; it may now be seen in the libraries of the most learned, as well as in the cottages of the most humble; it was noticed last year for the accuracy of its predictions by several of the metropolitan and provincial papers: and the only boon the ASTROLOGER craves of his *readers* is, the recommending this little book to their friends.

POST OFFICE REGULATIONS.

RATES OF POSTAGE ON INLAND LETTERS.

The rate of postage on inland letters and parcels of all sorts, closed or open, making no distinction between them, is as follows: *If paid in advance*—Not exceeding 1 oz. 1d.; above 1 oz. but not exceeding 2 oz., 1½d.; above 2 oz. but not exceeding 4 oz., 2d.; above 4 oz. but not exceeding 6 oz., 2½d.; above 6 oz. but not exceeding 8 oz., 3d.; above 8 oz. but not exceeding 10 oz., 3½d.; above 10 oz. but not exceeding 12 oz., 4d. Twelve oz. to be the limit of weight for letters.

REGISTRATION OF LETTERS, &c.

By the prepayment of a fee of 2d. any Letter, Newspaper, Book, or other Packet on which the postage has been prepaid in Stamps, may be "Registered" to any place in the United Kingdom, the British Colonies, the United States of America, Italy, Switzerland, (via Belgium) or Germany. A letter intended to be *registered* must not be dropped into a Letter Box, but must be given to an agent of the Post Office to be registered. If dropped into the Letter Box, they will, as heretofore, be re-registered by the Post Office, and charged on delivery with a Registration fee of 8d.

For the convenience of persons living in Country places, where no Post Office is near, Letters will be Registered by Rural Post Messengers, who will receive Letters for Registration on their outward and on their inward walks, whenever it is practicable for them to do so.

THE VOICE AND PEN.

Oh ! the Orator's voice is a mighty power,
 As it echoes from shore to shore.
 And the fearless pen has more sway o'er men,
 Than the murderous cannon's roar !
 What bursts the chain far over the main,
 And brightens the captive's den ?
 'Tis the fearless pen and the voice of power,
 Hurrah ! for the Voice and Pen :—Hurrah !
 Hurrah ! for the Voice and the Pen !

The tyrant knaves who deny Man's rights,
 And the cowards who blanch with fear,
 Exclaim with glee—"No arms have ye,
 Nor cannon, nor sword, nor spear !
 Your hills are ours, with our forts and towers
 We are masters of mount and glen !"
 Tyrants beware ! for arms we bear
 Are the Voice and the fearless Pen !—Hurrah !
 Hurrah ! for the voice and the pen !

Though your horsemen stand with their bridles in hand,
 And your sentinels walk around !
 Though your matches flare in the midnight air,
 And your brazen trumpets sound !
 Oh ! the orator's tongue shall be heard among
 These listening warrior men :
 And they'll quickly say—"Why should we slay
 Our friends of the Voice and Pen ?"—Hurrah !
 Hurrah ! for the Voice and Pen !

When the Lord created the earth and sea,
 The stars and the glorious sun,
 The Godhead spoke, and the universe woke !
 And the mighty work was done !
 Let a word be flung from the orator's tongue,
 Or a drop from the fearless pen,
 And the chains accursed asunder burst
 That fettered the minds of men !—Hurrah !
 Hurrah ! for the voice and pen !

Oh ! these are the swords with which we fight,
 The arms in which we trust,
 Which no tyrant hand will dare to brand
 Which time cannot dim nor rust !
 When these we bore we triumphed before,
 With these we'll triumph again !
 And the world will say no more power can stay
 The Voice and the fearless Pen !—Hurrah !
 Hurrah ! for the voice and the pen !

ORION'S SOLAR PILLS.

(FOR EITHER SEX.)

These Pills claim a pre-eminence over most other medicine which comes before the public, as forming a mild laxative tonic remedy, and they are a never-failing cure for indigestion, bile, loss of appetite, windy stomach, dizziness, spasms, liver complaints, heartburn, languidness, and nervous affections. They give *regularity* to the bowels, *strength* to the nerves, *freshness* to the countenance, and *vigour* to the whole frame!

ORION'S LUNAR PILLS.

(FOR THE FEMALE SEX.)

The salutary effect exercised by these Lunar Pills, over all kinds of Female indisposition is astonishing. Their peculiar qualities well fit them for a domestic medicine for Females of all ages and periods of life. They quickly eject all impurities from the system, and regulate the secretions, dispelling lowness of spirits, and by their stimulant action brace and strengthen the nervous system in a most extraordinary manner.

ORION'S PULMONIC PILLS.

(FOR EITHER SEX.)

For coughs, colds, asthma, tightness in the chest, a difficulty in breathing. It is impossible to describe the good effects these Pills have produced; they allay the irritation which provokes coughing; and many who with difficulty could breathe at all in a recumbent position, have by taking one dose of them, been able to enjoy that sweet repose so requisite to human nature.

*By temperature of air we find  
Changed is the body and the mind.*

For the month we consult the Figure for the Sun's entrance into Capricorn. We find Saturn ruling the 6th house, and the Moon conjoined with Mars, which denote coughs, consumption, asthma, bronchitis, rheumatism, small-pox, fevers, &c. Pains in the reins and loins, the knees and legs; and lameness in the feet, &c.

## Birthday Information.

*Applicable to persons, in all Parts of the World.*

Aged gents. who were born on the 9th, may sue the fair for favours. Most persons born on the 11th of this month must beware of frauds on their property. The 12th and 14th, as birthdays, are rather good for surgeons, dentists, cutlers, and military men. The 18th of this month is good for persons who were born on that day, especially farmers, builders, and those who deal in the products of the soil. They will also be benefited by persons some years their seniors. The 23rd and 24th are good for wedlock; and the fair sex, who were born on those days, experience benefits and many happy events. The 26th and 27th, rather unfortunate.

Come sit around the winter fire  
And tell the household story  
Of battles stern, on land or sea,  
That swell old England's glory.  
What once was done on field or main,  
Come need, shall all be done again.

The ☉ enters ♈ 20th day at 12h. p.m.

There is a tear that through the soul  
Causes compassion's tides to roll

In full but placid flow ;

That shows the holy maxim true,

How man is born his guilt to rue—

It is the tear of woe.

 Oh ! brightness of the op'ning Spring,  
 On lake and mountain beaming,  
 We hail thy ever length'ning ray,  
 With hope and promise gleaming.  
 In all the woods the primrose blows,  
 And 'neath the bank the violet grows.

Life is a sea—how fair its face—  
How smooih its dimpling waters pace,  
Its canopy, how pure!  
But rocks below, and tempest sweep  
Insidious o'er the glossy deep,  
Nor leave an hour secure.

| 111  | 2  | 15 | 21 | 2  | 36 | On account of the variability of temperature this month, many persons will be afflicted with affections of the brain and nervous system. Apoplexy generally occurs in this month; purgatives should be taken. There are strong testimonies of violent headaches, bilious attacks, and other disorders, brought about by corrupt blood; and Mars' position will cause many to complain of lameness in the feet; tired legs, &c. |

| 1424 | 12 | 30 | 28 | 3 | 27 | Those persons who were born on the 1st of this month, in any year, will experience many troublesome events, and must be cautious to avoid mishaps. Much uncertainty and discomfort to persons who were born on or near the 20th of February or the 23rd of August in any year. Rather beneficial for those persons who were born on the 10th of this month, especially if their occupation is governed by the planet Mars. The 18th and 21st as birthdays, are generally unfortunate. The 22nd is rather fortunate for females who were born on that day. The 24th is not good for courtship or marriage. The 30th, evil and accidental. |

The grass is high in field and mead,

The birds lift high their voices,

And Nature deck'd in vesture new

On ev'ry hill rejoices.

The mower comes with lusty stride,

And soon the hay is scatter'd wide.

| 1        | 11 | 25 | 21 | 22 | 4 38              | This month finds both Saturn and Mars in Aries, signifying the diseases likely to prevail during this month. Flatulent colic, stomach diseases among the rising generation; and serious attacks of headaches. Mars in Aries indicates attacks of apoplexy, and sudden deaths prevalent in the British Isles. Mercury in Cancer, and Venus in Leo, will cause many delicate females to suffer from affections of the heart.                                                                                                                                                                                                                        |

| 13       | 22 | 3  | 5  | 15 | 5 26              | <b>Birthday Information.</b><br>Rather unfortunate for professional men born on the 2nd, they must avoid hazardous speculation. The 4th of this month is good for farmers, builders, and those who deal in the products of the soil: they will also be benefited by persons some years their seniors. Those born on the 7th, 19th, or 11th of this month will have a mixture of griefs and joys. Those persons who were born on the 13th will be subject to losses and domestic affliction. Those born on the 18th of this month will have a year of changes. 22nd, rather fortunate. 30th, evil and accidental; beware of blows on the head, &c. |

*The ☉ enters ♍ 23rd day at 7h. a.m.*  
 Oh, Phœbus ! down the western sky,  
 Thy light to distant worlds supply ;  
 Come, gentle eve, the friend of ease,  
 Come, Cynthia, lovely queen of night,  
 Refresh me with a cooling breeze,  
 And cheer me with a lambent light.

At the commencement of the Summer Quarter, Mercury was ruler of the house of sickness, and in the sign Cancer, which denotes asthma, Cancer, and impurities in the blood; and both Saturn and Mars in Aries, indicate violent headaches, inflammation of the eyes, fevers, affections of the brain, &c. Venus in Virgo, in opposition to Saturn, portends bowel complaints of a choleric character.

## Birthday Information.

Individuals who were born on or near the 3rd of March, in any year, will find many pecuniary benefits now occur, but they should guard against a corrupt state of the blood, which Jupiter, being now on the Sun's place at that date produces. Those born on the 5th of this month, in any year, will derive benefits from the trine of the Sun and Jupiter on that day. Those born on the 7th will experience domestic affliction, and suffer personally. 8th, good for money matters, but evil for wedlock. The 19th and 21st, slanderous and deceptive. Those born on the 22nd must guard against accidents, &c. Unfortunate for those born about the 5th of April, in any year.

*The ☉ enters ♍ 23rd day at 1h. p.m.*  
 What though no real voice or sound  
 Amid this radiant orb be found :  
 In reason's ear they all rejoice,  
 And utter forth a glorious voice ;  
 For ever singing as they shine  
 "The Hand that made us is divine."

From the position of Mars in Taurus chronic distempers about the neck will be felt; scurvy, hoarseness, and lowness of spirit; fevers, and inflammatory complaints, frenzy, and endemic fevers. Uranus and Mercury conjoined in the sign Virgo indicate bowel complaints very prevalent during this month—hence diarrhoea of an obstinate character.

## Birthday Information.

Those born on the 4th of this month may look for pecuniary benefits; but will experience many annoyances from enemies in the guise of friends. The 8th is good for persons who were born on that day, especially farmers, builders, and those who deal in the products of the soil. The 10th is rather beneficial for military men. The 16th is slightly good for single females who were born on that day; they will be generally successful in their engagements. Persons born on the 20th or 21st of this month will experience much uncertainty and discomfort during the next twelve months. The 23rd, 24th, 29 and 28th are unfortunate birthday anniversaries. The 31st, rather evil for professional men.

The ☉ enters ♈ 23rd day at 10h. a.m.

The sons of summer, by whose toil,  
 We are the lords of wine and oil,  
 By whose tough labours, and rough hands,  
 We first rip up, then reap our lands,  
 Crown'd with the ears of corn, now come,  
 And to the pipe, sing "harvest home."

| 1  | r | 5 | 13 | rises | 15 | The chief feature of this month is Mars in Taurus; and the eyes of the world will be drawn to Ireland, where tumults and accidents abound. Poland, Persia, Asia Minor, the Archipelago, and those parts of the globe subject to Taurus, are under the influence of evil rays. We shall hear of tumults and disease, and also physical phenomena of a destructive nature. Switzerland is in a feverish condition, and in Turkey fires, insurrections, and much sickness break forth. The middle of this month will witness storms, earthquakes, and other physical concussions; shipwrecks, &c. During this month the planet Jupiter is opposed by both Mercury and Uranus; let those connected with the Church beware: the press teems with sarcasm, and clerical matters are the general features of the month. Men of great ability and powerful talents are under evil rays. To lawyers and churchmen, I say beware! let them look well to their deeds at this time. The influences are good for wedlock, and many marriages of distinction occur. |

Uranus indicates this month's complaints. He is moving on in the sign Virgo, and portends bowel complaints more than usual, almost tending to a choleric character; liver affections and lungs disordered. Avoid exposure to damp or chills when warm. Measles among children, and fever may be looked for, in low plains and marshy grounds.

## Birthday Information.

Those persons who were born on the 3rd of this month, in any year, will experience many annoyances and disappointments. The influences are rather beneficial for those persons who were born on the 5th. Those persons who were born from the 14th to the 17th, are likely to be annoyed by disputes, controversies, and disappointments, according to their sphere of life. The 19th, as a birthday, is good for surgeons, cutlers, dentists, and military men. The 23rd, 24th, and 25th are good for wedding, and nuptial ceremonies. Females born on any of the foregoing days, will be fortunate in their engagements. The 27th, rather good for money matters, but accidental.

In contemplations sober cell,  
By day how much I love to dwell ;  
But when the window's shut and barr'd,  
Night compliments me with a card,  
To read her starry treatise o'er,  
And Wisdom's mighty works explore.

# OCTOBER, 1879.

## Planetary Influences.

On the 2, 7, 16, 29, generally fortunate in most undertakings.  
On the 2, 7, 16, 20, rather good for agitating any new affair.  
On the 4, 11, 17, 24, the stars prophecy of accidents; be cautious.  
On the 9, 16, 21, 29, with circumspection you may succeed well.  
On the 16, 20, 25, 29, consult lawyers; trade, travel, or speculate.  
On the 17, 18, 23, 31, rather evil days for agitating any new affair.

The old tree hath an older look,  
The lonesome place is yet more dreary,  
They go not now, the young and old,  
Slow wandering on by wood and wold,  
The air is damp, the winds are cold,  
And summer paths are wet and weary.

Aloud the driving tempest roars,  
 Congealed impetuous showers descend ;  
 Haste close the windows, bar the doors,  
 Fate leaves me Stella, and a friend.  
 In nature's aid, let art supply,  
 Rouse, rouse the fire, and pile it high.

| 1  | r | 7 | 45 | 5af.57 | 17 | The violent Mars is retrograde in<br>in Taurus, still fanning the fires of<br>Ireland's discontent; tumults and<br>accidents abound of a very serious<br>nature; also treasonable acts. The<br>God of Love seems busy in the<br>Metropolis, but in a manner which<br>may excite much scandal; yet Venus<br>will bring forward marriages of note.<br>In this country, as well as on the<br>Continent, numerous accidents occur<br>by falls from roofs, &c., also acci-<br>dents by steam, fire-damp, water,<br>&c., will be fearfully frequent and<br>fatal; and the furious element fire<br>does unusual mischief. From the<br>sextile of the Sun and Jupiter we<br>judge that some eminent divine<br>receives marks of Royal favour.<br>This aspect is good for the clergy of<br>the Established Church generally.<br>Hymen too is busy, and many mar-<br>riages of distinction occur. The<br>celestial harbingers, as the year<br>waned, are dreary and gloomy in<br>the extreme. No bright ray appears<br>to illumine their dark bodings; the<br>atmosphere will be turbulent; storms<br>and shipwrecks prove greatly disas-<br>trous; and abroad, underground<br>shocks, called earthquakes. |

EXAMPLE.—To know the number of days from March 23 to July 23 following. Find March in the first column, and then in a line with that under July, is 122 days. If from March 23 to July 30 it would be 7 days more, 129 days; but if from March 23 to July 13, it would be 10 days less, or 112 days. In Leap Year, if the last day of February comes between, add one day to the number given in the Table.

## NATURE OF THE ASPECTS, &c:

---

*Aspects* from *aspicio*, to behold, the being placed at a certain distance from a planet, these are either *good* or *evil* aspects. As the *conjunction* (♌) or being in the same sign or degree of the zodiac, good with the good planets ; as *Jupiter*, *Venus*, the *Sun*, the *Moon*. Any planet is *afflicted* when in *conjunction* (♌) of *Saturn*, *Mars*, or *Uranus*. *Semisextile* (S.✱), *Sextile* (✱), and *Trine* (Δ), are good aspects, with *all* the planets ; and those days are said to be *lucky* when the *Moon* forms any of these aspects. See the "Lunar Aspects," commencing at page 8. The *Semisquare* (S.□), 45 degrees ; the *Square* (□), 90 degrees ; the *Sesquisquare* (SS,□), 135 degrees ; and the *Opposition* (♌), 180 degrees ; are *ill* aspects with *any* of the planets, therefore unfavourable to mankind in any honourable undertaking. *Parallel*, or *P*, signifies an equal distance from the Equator, or being in the same degree of *Declination* ; whether of the same name, *North* or *South*, is of no consequence. The effect of this position is exactly the same as that of a conjunction (♌), being good with good planets, as *Jupiter* (♃), *Venus* (♀), the *Sun* (☉), the *Moon* (☾) ; and *evil* with the planets *Saturn* (♄), *Mars* (♂), and *Uranus* (♅). Vide the "Mutual Aspects," commencing with Jan., page 8.

ANOTHER EXAMPLE: To know upon what *day* of the *week* the PRINCE OF WALES was born, look for the Year 1841, and under the Month of *November* you will find the figure 1, which directs you to column 1, & shows the 9th (Nov., 1841) was on a *Tuesday*.

# A DIVINING MENTOR,

OR THE ORACLE OF THE RING AND CUP.

*How to divine the Initials of a future Wife or Husband, and also to answer several curious Questions ; being an amusing method of passing a Winter's Evening.*

Take a wedding ring that has been worn a year and a day, or more, and suspend it by means of a hair from the head of a virgin, then hold it, the hair, between the finger and thumb, and let the ring hang about six or seven inches from the fingers in the centre of a silver goblet or drinking glass. When the ring is perfectly steady, let the holder ask the initial letter of the *christian* name of his or her future wife or husband. The ring will begin to oscillate, and soon strike against the side of the goblet, &c. Then repeat very carefully, at each stroke, the letters of the alphabet, A, B, C, D, &c., till the ring cease to strike : and the last letter named will be the one quesited. Thus, if the ring strike 5 times, the initial letter will be E ; and if 10 times, J, &c. The initial letters of the *surname* may be learned in the same way ; and if the question be the number of years the party is old, or the number of years before the asker's marriage, &c., the number of strokes the ring makes will be the answer. In the same way the hour of the day and the minute even of the hour may be learned, by asking, "how many hours is it since noon?" and then, "how many minutes since that hour ? Many curious questions may be put by asking them, "yea or nay ?" and then, if the ring strike 14, the number of the letter N, take that to imply "No ;" and if it strike 25, let that signify "Yes."

One thing must be particularly attended to in this operation, which is that there can be only *one demand* made for *one thing*, and that the *first* response must be accepted as the true one ; for, if the quesited be varied, so as to try to get another answer, in any case, THAT IS ERROR. Faith and seriousness are essential.

This operation is found to fail very rarely indeed. It is perfectly inexplicable ; and the fact of the ring oscillating and striking against the goblet, after being held perfectly steady, without any apparent *cause*, remains a mystery, which modern philosophy can by no means explain : nor can we see why it will at times strike only once or twice, and at other times go on rapidly striking the goblet forty or fifty times.

To Set a Clock or Watch by this Table—Example, Jan. 1st. It will be found by looking into the Table, that a Clock to be right must be 3 minutes 45 seconds faster than a sun-dial; therefore set it so much faster accordingly, and so of the rest. Correct the Watch when the Dial marks just an hour, 9, 10, 11, 2, 3, or 4 o'clock. Noon is not the best time for this purpose, nor near sun-rise or sun-set.

# THE ECLIPSES, &c., IN 1879.

In the year 1879, there will be *two* Eclipses of the *Sun* and *one* of the *Moon*.

## I.—AN ANNULAR ECLIPSE OF THE SUN,

January 22nd, *invisible* to England.

*Begins* on the Earth generally January 22nd, 8h. 59m. 30s. a.m., in Longitude 51° 3' W. of Greenwich, and Latitude 24° 0' S.

*Central Eclipse* at *Noon* January 22nd, 11h. 45m. 54s. a.m., in Longitude 6° 28' E. of Greenwich, and Latitude 31° 0' S.

*Ends* on the Earth generally January 22nd, 2h. 46m. 12s. p.m., in Longitude 47° 18' E. of Greenwich, and Latitude 11° 20' N.

The central line of this Eclipse leaves the South American Continent between Monte Video and Rio Grande; it then dashes across the South Atlantic Ocean, and strikes the African Continent near the mouth of the great Orange River in South Africa; still passing with great rapidity in a North-easterly direction over a large section of South Africa, it finally leaves that Continent near Melinda in Zanguebar; enters the Indian Ocean, where it finally disappears at Sunset. This Eclipse will be *visible* to the Eastern Coast of South America, the South Atlantic Ocean, South and Central Africa, and also to the Coasts and Islands adjacent. This Eclipse will doubtless cause the Government of England much anxiety in connection with South African affairs generally, and I fear that the settlers will again experience the ireful risings in the savages' breasts.

## II.—AN ANNULAR ECLIPSE OF THE SUN,

July 19th, *invisible* to England.

*Begins* on the Earth generally July 19th, 6h. 10m. 42s., a.m., in Longitude 5° 13' W. of Greenwich, and Latitude 10° 32' N.

*Central Eclipse* at Noon, July 19th, 9h. 9m. 12s., a.m., in Longitude 44° 13' E. of Greenwich, and Latitude 12° 18' N.

*Ends* on the Earth generally July 19th, 11h. 58m. 0s., a.m., in Longitude 83° 50' E. of Greenwich, and Latitude 20° 31' S.

The Central Track of this Eclipse will enter upon the Western Coast of Africa to the North of Sierra Leone; then passing over Teembo, the Niger country, Lake Tchad, the upper Tributaries of the River Nile, the Red Sea, near the Straits of Babelmandel, and the Indian Ocean. This phenomenon will be visible to North and Central Africa, the Indian Ocean, the Red Sea, Arabian Sea, and to the Coasts and Islands adjacent. We observe the violent planet Mars in square to the luminaries, which prognosticates much mischief and destruction. In Central and Western Africa the most savage deeds will be perpetrated.

## OF ECLIPSES,

### THE PRODIGIES OF HEAVEN.

Eclipses, especially of the Sun, have been always considered as events of the most remarkable kind. *Isaiah*, and others of the sacred writers, speak of them as indicative of the wrath of the Almighty. *Homer*, *Pindar*, *Pliny*, and many of the ancients, also make mention of them in a similar way; and it used to be noticed, more particularly by Astronomers, that an Eclipse was often accompanied by a national calamity, or an occurrence of a very striking nature. An Eclipse of the Sun presents a spectacle of a most awful nature, and it cannot be deemed irrelevant to describe the phenomena that have attended one or two of the most remarkable. Clavius observes, that at the Total Eclipse of the Sun of 1560, the darkness at Coimbra was greater, or at least more striking than that of the night, and that the birds fell to the earth through terror. The grand Total Eclipse of the Sun on the 22nd of April, 1715, presented a most interesting phenomenon; and from its having been the only Total Eclipse of the Sun visible at London since the year 1140, its approach was awaited with no small degree of anxiety, especially among the scientific. *Dr. Halley*, who observed this Eclipse at London, says, "both planets and fixed stars were seen, the birds went to roost in terror, the bats came out of their holes, and the fishes swam wildly about, a sensation of cold was experienced, and the dew fell upon the grass, upon the extinction of the Sun, since ourselves could not behold it without some sense of horror."

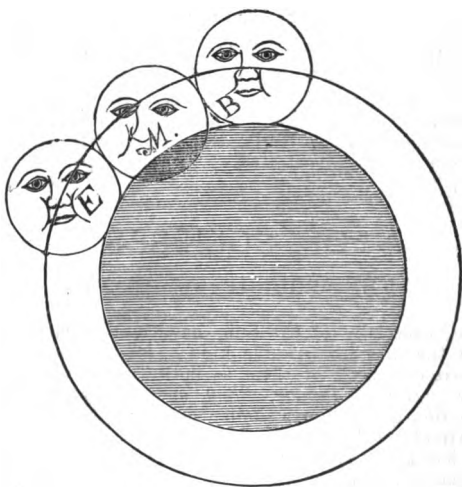

### III.—A PARTIAL ECLIPSE OF THE MOON,

December 28th, *visible to England.*

Magnitude of the Eclipse (Moon's Diameter = 1)  $0.167 = 2^{\circ} 0' 14''$

At the Middle of the Eclipse the Moon will be vertical, or directly overhead, in Longitude  $114^{\circ} 4'$  East of Greenwich, and Latitude  $24^{\circ} 14'$  North, which place falls near *Canton* in China.

**B** denotes the *Beginning* ; **M** the *Middle* ; and **E** the *End*.

At Greenwich the Moon will rise at 3h. 46m. p.m., just immersed in the Earth's Dark Shadow.

This Eclipse will be visible to Japan, China, India, Arabia, Persia, Turkey, Europe, Eastern, Central, and Southern Africa, and to the Seas and Islands adjacent. The Moon will be Eclipsed in the 7th degree of *Cancer*, and forthwith will its evil effects be felt by those countries ruled by that sign, which are all Africa, Constantinople, Algeria, Amsterdam, Cadiz, &c. The Eastern nations will suffer from fires, tumults, and evils of a physical nature.

## THE WINTER QUARTER;

*Or the Sun's Transit through Capricorn, Aquarius, and Pegasus.*

Winter attacks us now in front and rear :  
 Without some fence, her weapons who can bear ?  
 Strong Beer, good Fires, warm Garments will oppose,  
 And ward the Darts of nitrous Frost and snows :  
 But for the Poor, how wretched are they now !  
 More wretched those, who nothing them allow.

In an Astronomical point of view, this gloomy season of the year is considered to begin in northern latitudes, when the Sun in its annual course arrives at the first point of Capricorn; and which, in the present instance, will be on *Saturday*, December the 21st, 1878, at 10h. 41m., p.m., when I find the 16th degree of Virgo on the ascendant, and the 12th degree of Gemini Meridional. The most important aspects, &c., at this Ingress are the conjunction of the Sun and Venus, and that of the Moon and Mars. Uranus ascending in the 12th house, and the ponderous orb of Saturn descending in the Western angle. The Moon separating from a conjunction of Mars in the third "house" threatens some sad catastrophe on railways, especially on or near the 21st, 23rd, 28th, or 30th of December; unless great caution be used. Venus ruling the 9th house in square to Saturn brings to light some licentious and immoral practices perpetrated under the cloak of religion. Internal discord, or hostilities with foreign countries, threaten to disturb the peace of England. Daring robberies and acts of violence occur in London, where we also hear of extensive cases of swindling, and important trials. Fires are numerous and extensive. Rash speculations ruin numbers. Uranus in the 12th house indicates disease and mortality amongst cattle. In Paris the full effects of this position of Uranus will be felt. Turkey will also participate in the full influence of Uranus. Pestilence and tumults will reign in the land of the Crescent. The influences are evil for the eastern Kingdoms and Nations generally; and we hear of the ill effects in the shape of typhoons, famine, and destructive shocks of earthquake. Saturn, ruler of the 6th house, and descending in the west indicates a very sickly season, *consumption* and *bronchitis* being more than usually prevalent and fatal; both the old and the young succumb.

## THE SPRING QUARTER;

*Or the Sun's Transit through Aries, Taurus, and Gemini.*

Now rise, and haste to yonder woodbine bow'rs,  
A soft retreat from sudden vernal show'rs;  
The turf with rural dainties shall be crown'd,  
While op'ning blooms diffuse their sweets around.  
For see! the gath'ring flocks to shelter tend,  
And from the Pleiads fruitful show'rs descend.

According to the Sun's apparent motion in the Ecliptic, I find that this Quarter will begin on *Thursday*, March the 20th, at 11h. 18m., p.m.; when the 24th degree of Scorpio cuts the eastern Horoscope, and the 15th degree of Virgo the southern Angle. At the same time Mars occupies the 2nd "house," Jupiter and the Moon the 3rd, and the Sun and Saturn the 4th. It does not appear that there is any thing at this Ingress that is likely to put England into an hostile attitude. Look, however, at the aspects at the Summer quarter. Burdened with a heavy debt and taxes, we are not exactly in a condition for War. By our keeping on friendly terms with France, Belgium, and the Netherlands are preserved, and some check put to the ambitious views of Russia, Prussia, and Austria, at least in that part of Europe. But Ursa Major still shakes his paw over Turkey, while he glances a scowl at Persia, and even beyond, towards India. Ah! Czar, be moderate! Is not your own extensive Empire enough? The fate of ambition in all ages is the fate of ambition still. Humble thyself, and call to mind in time the declaration of Him who hath said, "*All the trees of the field shall know that I the Lord have brought down the high tree, have exalted the low tree, have dried up the green tree, and have made the dry tree to flourish.*" Jupiter still benefits nations under the dominion of Aquarius, but as Mars is passing into that sign, he will for a time stir up discord and violence in Russia, Prussia, Turkey, France, Germany, Ireland, Sicily, Asia Minor, and other places under the dominion of Taurus, Leo, and Aquarius. This Quarter will not pass by without one or more *remarkable deaths* being placed upon its records. "Who may resist thy power, Oh King of Terrors." Atmospheric phenomena will prevail this Quarter, and very probably convulsions of the earth, in some parts: shipwrecks are likely round the coasts. There will be railway mishaps and coal-pit accidents in various ways.

## THE SUMMER QUARTER;

*Or the Sun's Transit through Cancer, Leo, and Virgo.*

Jove and Mavors cloud the spangled sky,  
 Hermes and Chronos raise the winds and showers,  
 Many a storm and tempest from on high,  
 Help'd on by Mars and Saturn's blustering powers,  
 The Electric Charge rends the clouds asunder,  
 With storms of Rain, Lightning, and claps of Thunder.

This Tropical Ingress takes place on *Saturday*, June the 21st, at 7h. 43m., p.m., when the culminating point cuts the 28th degree of Libra, and the Eastern angle the 23rd degree or Sagittarius. Jupiter is ruler of the Ascendant, and posted in the 2nd "house," in sextile to Neptune; the Sun is in conjunction with Mercury, and in sextile to Uranus. These rays do not appear to be of an unfriendly disposition: but we have in this Quarter an inimical conjunction of Saturn and Mars, which position has always been considered of deadly import by the oldest Astrologers, which it is to be hoped, the benign rays will in a great measure avert. Still I judge some great cause of death will be operating, and probably numbers swept off the scene of life by accident this quarter. Let the workers in iron and mines beware of accidents, as some fearful explosions and other casualties may be apprehended. Saturn and Mars in the 3rd house denote depression amongst engineers, with extensive railway accidents. Also accidents or annoyances to pleasure parties. The Mahometan countries, from Egypt to "the city of the Sultan," will suffer under the prevailing aspects. Jupiter moving forward in the sign Pegasus will benefit places ruled by that sign; these are chiefly Portugal, Calabria, Normandy, Calicia in Spain, Cilicia, Alexandria, Ratisbon, Seville, Farnham (Surrey), and Tiverton. The chief feature during this quarter will be Mars in Taurus, and its effects will be visible for many months to come. It will be a means of opening a new era to many places under the dominion of the sign Taurus: these are Ireland, Great Poland, part of Russia, Germany, Holland, Turkey, Persia, Asia Minor, the Archipelago, Suez, Loraine, &c. These parts of the world will be fearfully affected, pestilence, famine, and war, as well as storms and earthquakes of a destructive nature, will be fearfully visible.

## THE AUTUMN QUARTER;

*Or the Sun's Transit through Libra, Scorpio, and Sagittarius.*

How great is thy beneficence, O Lord !

Which flows from mercy's vast unbounded sea ;

Thy hands innumerable gifts afford,

Seed-time and harvest answer to thy word ;

Worthy thou art to be by all adored,

Author of goodness and felicity.

In the present year, I find that this Quarter will commence on *Tuesday*, the 23rd of September, at 10h. 9m. a.m., at which time the 16th degree of Scorpio is on the Ascendant, and the 3rd degree of Virgo on the Midheaven; all the planets, with the exception of Uranus, are below our horizon. The planets Mercury and Mars must be considered the most powerful at this Ingress, being both angular; the former also being dignified by sign, and conjoin with Uranus; Mars moreover, is lord of the Ascendant, and in the 7th house of the Autumnal figure, and in semi-square to Saturn. From the effects of these momentous circumstances, we must naturally expect this will be a quarter of much bustle and activity in many parts of the world; deep consultations, superlative transactions, most remarkable changes, wherein the greatest monarchs and persons in the world are concerned. The effects here signified will be more or less felt in Europe, America, and India. The countries most concerned in this quarter of the Globe, are England, Ireland, France, Germany, Holland, &c. The potent position of Mars in Taurus will not fail to spread a feeling of dissatisfaction among the various tribes that form a portion of the Russian empire, which will only be changed for the note of war. The feeling of revenge which has so long slept in the breast of the Polander will now burst forth with all its fury, but I fear, only to place themselves more fully within the tyrant's grasp. The number of deaths registered during the Autumn Quarter will be much above the average; consumption, bronchitis, fevers, and disorders arising from colds and obstructions will prove very destructive, sweeping away both youth and age. Saturn in the 5th house, foreshows much trouble to theatres, schools, and places of amusement; and shall scarcely escape a terrible accident or fire. Children will suffer from inflammatory attacks.

\* King of Prussia, Jan. 2, 1861.

# Horticultural, Botanical, and Herbal Guide,

For 1879.

**JANUARY.**—In open and dry weather sow in mild exposure for a succession a few early frame peas common beans, short-topped radishes, lettuces, carrots, onions, spinach, and curled parsley, protecting them from the frost by mats or straw. Plant, prune, and train fruit trees and bushes. Form new flower gardens, and shelter from frost tender evergreens, tulips, &c. Plant snowdrops, crocuses, &c. *Herbs* to be gathered are groundsel, chickweed, archangel, and others which are in flower.

**FEBRUARY.**—Make ready all the ground intended for early crops; and when the weather is favourable, continue to sow every fortnight peas, beans, onions, spinach, savoys, lettuce, celery, cauliflowers, carrots, parsnips, and radishes. Cut early kidney potatoes for seed, and put them in a stove or hot-bed in order to start them for planting out. Plant out evergreens and shrubs of all kinds, particularly roses, &c. Prune vine and fruit trees. *Herbs* to be gathered: foalfoot, lingwort, pilewort, speedwell, chickweed, shepherd's purse, and broom.

**MARCH.**—The principal crops of vegetables should be put into the ground this month. Sow asparagus, celery, cauliflowers, broccoli, spinach, onions, carrots, peas, beans, savoys, parsnips, radishes, &c. Plant red cabbage and sea-kale: sow cucumbers and melons in hot beds. Finish pruning, dress borders and strawberry beds. This is the best time for grafting fruit trees, perpetual and moss roses, &c. Pot dahlias and cuttings. Plant pinks, polyanthuses, carnations, &c. *Herbs* to be gathered for medicinal purposes: coltsfoot, fumitory, pilewort, ladyfrock, lesser celandine, violet and comfry roots, and all kinds of herbal bark.

**APRIL.**—Continue to sow and plant rhubarb, artichokes, asparagus, sea-kale, Dutch turnips, German greens, and small salading. Earth up peas, tie up lettuce, and in very dry weather water seedling beds. Finish the grafting of fruit trees, and train and clean walks and edgings. Sow annuals, biennials, and perennials. Plant evergreens and propagate by cutting, jasmine, lavender, sage, rosemary, rue, &c. Sow early Dutch turnips. *Herbs* to be gathered: ground ivy, dandelions, avens, buttercups, and others which are in flower, as well as all kinds of bark.

**MAY.**—Sow peas, cucumber, red beet for pickling, and a full crop for kidney beans. Transplant cabbages, winter greens, cauliflowers, and celery. Hoe and stake peas, water newly-planted crops, and propagate aromatic plants by slips or cuttings. Plant dahlias, if there be no appearance of frost, and protect from wind and rain choice tulips, &c. Propagate herbaceous plants by dividing the roots. *Herbs* to be cut: celandine, milkwort, moonwort, wood sorrel, and adder's tongue.

**JUNE.**—Top beans and peas to assist the filling of the pods. Set kidney beans, and transplant cabbage, savoys, broccoli, and sow turnips. Thin out onions, leeks, carrots, parsnips, and early turnips. Gather and preserve kitchen herbs. Shade and air melon plants, &c. Bulbous roots that have done flowering should now be taken up, and the off-sets separated. *Herbs* to be cut: avens, brooklime, centuary, cumfry, woodbine, valerian, eyebright, pimpernel, speedwell, and elecampane.

# Horticultural, Botanical, and Verbal Guide,

For 1879.

**JULY.**—In this month prepare all unoccupied plots of ground for autumn and winter crops. Sow turnips, radishes, &c. Plant out broccoli, cauliflowers, savoys, leeks, and winter cabbages, and earth up celery. Lift full grown winter onions, and prepare mushroom spawn. In fine weather, gather medicinal flowers and sweet herbs, when in bloom, dressing them first in the sun, and then in the shade for winter use. *Herbs* to be cut are all that are in flower, as lavender, tansey, vervain, bed-straw, agrimony, cinquefoil mountain flax, foxglove, and meadow sweet.

**AUGUST.**—Sow early cabbages and parsley for the succeeding year; also spinach, broccoli, and cauliflowers to stand the winter; earth celery; hoe and thin turnips; transplant broccoli, savoys, and cauliflowers, and the principal crop of celery into the trenches for blanching. Make mushroom beds: propagate kitchen herbs by slips, and take up all onions, garlic and shallots that are withered in the stem. Sow the seed of bulbous flowers in pots. *Herbs* to be cut: all mints and sage, golden rod, pond weed, yellow gentian, tansey, mugwort, and loosestrife.

**SEPTEMBER.**—Plant savoys, broccoli, cauliflowers, leeks, celery & perennial aromatic and pot herbs. Hoe winter spinach and turnips, earth up celery and cardoons, prick out cabbage plants, gather ripe seed, &c. Pull onions if the tops appear dying. Plant cuttings of gooseberries, currants, raspberries, and strawberries, taking out the old stools which have twice produced fruit. *Herbs* to be gathered; angelica, field gentian, valerian, feverfew, southernwood, briony, and wild berries.

**OCTOBER.**—Plant home radishes, early cabbages, and other greens neglected last month, in sheltered situations; also cauliflowers, mint, and tarragon, in frames for winter use. Earth up savoys and cabbages as high as the leaves. Take up carrots and parsnips, cut off their tops and bury them in dry sand. Crop the tops of parsley, to make fresh leaves for winter. Transplant fruit trees and shrubs after the 10th day. Gather tree seeds: and sow for stocks. *Herbs* to be gathered: ivy, yarrow, wall rue, shepherd's purse, broom, rape, wall cress, and wild berries.

**NOVEMBER.**—Dig the ground where the crops are carried off, and which is not intended to plant again till spring: manure and prune fruit trees. Shallots are readily propagated by offsets. A stiffish soil and open aspect should be preferred. These offsets, or "claws," should have their bases only pressed into the ground, without being covered. Tulips and hyacinth roots may be planted. *Herbs*: not many to be gathered this month for medicinal uses, except rose moss, rock fern, and polypody.

**DECEMBER.**—In this month forward the business of manuring, digging, or trenching vacant ground. Set all sorts of stones, kernels, &c. Complete tree planting, and forward all winter pruning. Continue planting various hardy roots, bulbs and shrubs. If frosty weather, be particular to protect all tender plants, trees, &c. Earth up celery. Sow small salad in warm borders, covered with mats. *Herbs* to be gathered: rose moss, rock fern, polypody, evergreens, and the mistletoe.

## CLIMACTERICAL YEARS.

ASTROLOGICAL OBSERVATION HAS ESTABLISHED THE FOLLOWING TRUTHS :—As the Moon comes to an aspect good or bad with the point of the ecliptic ascending at birth, corresponding impressions upon health or circumstances assuredly take effect. The periodical revolution of the Moon is performed in 27 days, 7 hours, 43 minutes ; hence about every seventh day she is Moon to her place in the radiacal figure ; and thus, some time in the course of her seventh year, she becomes *quartile* to her own place, and causes a *quartile climateric*, which unless its effects be restrained by counter aspects of the benefice stars, is an unfortunate transit. Again, some time in the course of each ninth year, the Moon occupies a place *trine* to the aspect of her place in the nativity, which is favourable, unless greatly molested by counteracting rays. Hence, it will be understood that a seventh, fourteenth, twenty-first, twenty-eighth, &c., year is a *quartile*, or an evil climateric ; and the ninth, eighteenth, twenty-seventh, thirty-sixth, &c., are *trine* climaterics, and promise good. The forty-ninth and sixty-third are termed grand climaterics, the former being the square of that term which constitutes the quartile, as seven times seven are forty-nine ; and the latter being the time multiplied into the quartile, as seven-times nine are sixty-three ; which are both periods of a person's life commonly productive of constitutional or other change.

## LUNAR INFLUENCE ON VEGETABLES.

It is a maxim among gardeners, that cabbages and lettuces which are desired to shoot forth early, flowers which are to be double, trees which it is desired should produce early ripe fruit, should severally be sown, planted, and pruned during the decrease of the Moon, and that on the contrary, trees which are expected to grow with vigour should be sown, planted, grafted, and pruned during the increase of the Moon. The increase or decrease of the Moon has appreciable influence on the phenomena of vegetation ; and the observations and experiments of several French agriculturalists, have clearly established this.

## THE STAR OF OUR SAVIOUR.

"Haste ! ye Magi ! come and worship !  
 See the orient star before !  
 Bring your presents, gold, and spices, —  
 Blest be Arabia's balmy store."—*Christmas Hymn.*

A correspondent, writing from Lismore, Ireland, has very kindly forwarded to us the result of a lengthened investigation of his, identifying the "star" which appeared in 1572 as the same which appeared at the birth of Jesus Christ. Its period is, as near as can be calculated, 315 years, and our correspondent anticipates its re-appearance in the course of the summer or autumn of 1887. The same star, according to popular chronology, appeared in 943, and again in 1264; but these dates require rectification, the first should be 942, and the other 1257. Our correspondent also states that "the aspects of the planets, and the eclipses in the year 1887, particularly the great eclipse of the 19th August, indicate events of very startling importance."

## THE SATELLITES OF MARS.

The two Moons of the planet Mars were discovered in August, 1877. The outer satellite was first observed by Professor Asaph Hall, at Washington Observatory, on the night of August 11th, though cloudy weather prevented the recognition of its true character at that time. It was again observed on the 16th, and its motion was established by observation extending over two hours. The inner satellite was first remarked by the same astronomer on August 17th. From observations to August 20th, Professor Newcomb calculated approximate circular elements. The period of revolution of the outer satellite was found to be 30 hours 14 minutes, and the major axis of its orbit subtends an angle of 32 seconds, at the mean distance of the earth from the Sun. The second satellite appeared to revolve round the primary in the extraordinary short period of 7 hours, 38 minutes, the major axis of its orbit, similarly referred, being 13 seconds. The true orbit of the first satellite is inclined to the ecliptic 25 degrees, the longitude of the ascending node being 83 degrees.

When Galileo announced the discovery of the Jovian satellites, Kepler, after congratulating him, said, "I please myself with the thought that you will discover two moons attending on Mars, and many attending on Saturn."—*Times.*

## Quarter Sessions in Counties.

These Sessions are to be held in the first whole weeks respectively after March 31, June 24, Oct. 11, and Dec. 28, the magistrates determining the day of the week on which the Sessions shall commence at each place. But the Easter Sessions may be altered to any time between March 7 and April 22, so as to prevent interference with the Spring Assizes.

## NOTES ON TEMPERATURE.

The mean temperature of the whole earth is  $50^{\circ}$ ; at the equator it is  $84^{\circ}$ ; at latitude  $30^{\circ}$  it is  $71^{\circ}$ ; at latitude  $80^{\circ}$  it is  $34^{\circ}$ . The annual mean of the coldest hour in Europe is 5 a.m., and the warmest 2 or 3 o'clock in the afternoon. The greatest daily range of temperature in Europe is in July and the least in December. Water seldom freezes till the meridian altitude of the sun is less than  $45^{\circ}$ . In latitude  $46^{\circ}$  to  $48^{\circ}$  the heat at sun setting is the mean of the day.

While the air above snow is  $40^{\circ}$  below Zero, the temperature of the ground under the snow is only  $32^{\circ}$ .

The temperature sometimes varies in South Carolina  $50^{\circ}$  in 24 hours, and ranges about  $85^{\circ}$  in the year; the rainfall is about 50 inches. In China and Africa the temperature is frequently  $110^{\circ}$  to  $113^{\circ}$  in the shade, and sometimes even higher: whilst in Hudson's Bay it sometimes falls to  $50^{\circ}$  or  $60^{\circ}$  below Zero.

There is constant snow on the mountains near the equator, at 15,600 feet high, at latitude  $20^{\circ}$ , 15,000 feet; at latitude  $45^{\circ}$ , 8,300 feet, and at latitude  $60^{\circ}$ , 4,900 feet.

The solar heat in the year is sufficient to melt a coating of ice spread over the globe 46 feet thick.

At London the mean annual temperature is  $50^{\circ}$ , at Dublin  $49^{\circ}$ , and at Edinburgh,  $47^{\circ}$ . Devonshire and Cornwall are about  $4^{\circ}$  warmer than London.

The 14th of January on an average is the coldest day in the year. America is  $14^{\circ}$  colder in the latitude of London than Europe.

In New South Wales the coldest months average  $54^{\circ}$ , and the hottest  $75^{\circ}$ . It rains 100 days in the year.

The thermometer in Italy ranges in summer from  $75^{\circ}$  to  $96^{\circ}$ , and in winter it is seldom under  $40^{\circ}$ .

At sea the thermometer never rises above  $85^{\circ}$ .

The temperature is lower in the southern than the northern hemisphere, and ice extends 400 or 500 miles farther from the South Pole than the North; and Sandwich Land in the latitude of Scotland is covered with snow all the year. The mean temperature at the North Pole is estimated at  $4^{\circ}$ ; some take a mean of  $1^{\circ}$ .

At Bear Lake Captain Franklin found the thermometer  $58^{\circ}$  below Zero, and for two days it had been  $57\frac{1}{2}^{\circ}$ . In Siberia and Hudson's Bay mercury becomes solid, and spirits become thick and spongy.

Spring is the most rapid in the Arctic Zone, the snow disappears, and within a few days the trees burst into foliage, the ground is covered with flowers, and spiders, frogs, fish, &c., frozen as brittle as ice, revive with the thaw.

The German Ocean is about  $3^{\circ}$  colder in winter, and  $5^{\circ}$  warmer in summer than the Atlantic. Variation does not usually take place in water below 120 feet deep.

The mean temperature of the whole year at St Petersburg is  $38^{\circ}$ ; at Quebec,  $42^{\circ}$ ; at Vienna,  $50^{\circ}$ ; at Paris,  $51^{\circ}$ ; New York,  $53^{\circ}$ ; Rome,  $60^{\circ}$ ; and Cairo,  $72^{\circ}$ .

## ANALOGY OF THE LIFE OF MAN, *To the Course of the Sun through the Zodiacal Signs.*

We may liken the Divine spark, yet faintly illuminating the newborn infant, but expanding with its growth, to the material source of light, which, with the advancing year, acquires strength and brilliancy, causing the mutations of seasons, and the beauty and fertility of the earth. Flowers and fruits are the attendants of its onward course; but the fulness of harvest marks the period of decline, and the rapid retrocession, the establishment of winter—locking in an icy embrace the embryos of future loveliness.

Our similitude will be borne out, if in the following manner we assume the *septennial* periods, which in man's constitution and career have always been indicative of change; thus, from *one to seven* years, or while the great luminary is in CAPRICORN, the child, like the young year, is weak and tender; like the sprouting of goat's horts, showing few signs of the business of life, except those caused by transient pains or joys.

From *seven to fourteen*, in February, or AQUARIUS, every trifling cause draws tears of fretfulness, like the inconstant weather of that month.

From *fourteen to twenty-one*, March, or PISCES; when the youth has acquired strength of body, and the faculties of the mind are developed, like the zodiacal type, he is active and restless.

From *twenty-one to twenty-eight*, April and May, ARIES and TAURUS. During this period, all the personal and mental powers are established, and he has become, for good or evil the STRONG MAN; his plans being conceived and carried forward with the vigour and strength of the Ram and the Bull.

From *twenty-eight to thirty-five*, June, or GEMINI (or the Twins); a sign indicative of plenty. This is the season of life most favourable to man's exertions; he pursues with steadiness his plans of life, and generally enjoys in plenty the fruits of his toil.

From *thirty-five to forty-two*, July, or CANCER; though yet in the enjoyment of his strength of body, he finds that like the Crab, his movements are somewhat sideling, and that his physical attributes do not improve.

From *forty-two to forty-nine*, August, or LEO; the period of firmness of purpose, and persevering enterprise, which he, like the Lion, courageously pursues.

From *forty-nine to fifty-six*, September, or VIRGO; calmness and discretion, the attributes of this sign, usually succeed the active, but less cautious periods of his passing career.

From *fifty-six to sixty-three*. October, or SCORPIO; the grand climacteric having arrived the infirmities of age creep on; the pains of chronic diseases first threaten, and then like the sting of the Scorpion, assails the frail tenement which contains the eternal spark.

After *seventy*—"The keepers of the house shall tremble, and the strong men shall bow themselves, and the grinders shall cease because they are but few, and those that look out of the windows shall be darkened." Finally we shall see SAGITTARIUS level his unerring dart, and the body return to the dust of which it was, and may the Spirit return to GOD who gave it.

## THE WORLD OF SPIRITS.

### THE APPARITION OF A SHIP IN THE AIR.

*[In a Letter from the Rev. James Pierpoint.]*

REV. AND DEAR SIR,—In compliance with your desires, I now give you the relation of that apparition of a ship in the air, which I have received from the most credible, judicious, and curious surviving observers of it.

In the year 1647, besides much other lading, a rich treasure of passengers, five or six of whom were persons of chief note in Newhaven, put themselves on board a new ship, built at Rhode Island, of about 150 tons, but so faulty that the master (Lamberton) often said she would prove their grave. In the month of January, cutting their way through much ice, on which they were accompanied by the Rev. Mr. Davenport with many other friends, with many fears as well as prayers and tears, they set sail. The Spring following no tidings of these friends arrived with the ships from England, Newhaven's heart began to fail her. This put the godly people on much prayer, both public and private, that the Lord would, if it was his pleasure, let them hear what He had done with their dear friends, and prepare them with a suitable submission to his will. In June ensuing a great thunder-storm arose out of the north, after which the hemisphere being serene, about an hour before sun-set, a ship of like dimensions with aforesaid, with her canvas and colours abroad, though the wind was northerly, appeared in the air, coming up from our harbour's mouth, which lies southward from the town, seemingly with her sails filled under a fresh gale, holding her course north, and continuing under observation, sailing against the wind for the space of half-an-hour. Many were drawn to behold this great work of God, yea, the very children cried out "There's a brave ship!" At length crowding up as far as there is usually water sufficient for such a vessel, and so near some of the spectators that they imagined a man might hurl a stone on board her, her maintop seemed to be blown off, but left hanging in the shrouds; then her mizentop, then all her masting seemed blown away by the board. Soon after the hull brought into a careen, she overset, and so vanished into a smoky cloud, which in some time dissipated, leaving, as everywhere else, a clear air. The admiring spectators could distinguish the several colours of each part, the principal rigging, and such proportions as not only caused the generality of persons to say "This was the mould of their ship, and this was her tragic end," but also led Mr. Davenport in public to declare that God had condescended, for the quieting of their afflicted spirits, this extraordinary account of His sovereign disposal of those for whom so many fervant prayers were made continually.—Thus I am, Sir, your humble Servant,

JAMES PIERPOINT.

## METEOROLOGICAL OBSERVATIONS,

DRAWN FROM PLANTS, ANIMALS, &c.

The sensitive indications afforded us by many plants first claim attention, and will be found amply to repay the time that may be bestowed upon the singular properties inherent in many. The common chickweed possesses this property in an eminent degree. "The flowers are upright, and open from nine in the morning until noon; but if it rains, they remain closed. After rain they become pendant, but in the course of a few days they again rise.

What more certain harbinger of Summer have we than the May shrub, opening its elegant flowers amid all changes, and blossoming as freely in the poor man's garden as in the rich man's domain?

Wet summers, it has been found, are generally attended with an unusual quantity of seed in the hawthorn, their unusual fruitfulness being a sure sign of a hard winter. The seeds of the dog-rose prognosticate the coming severity of the winter in a like manner. The corollas of the Germander Speedwell are all securely closed at the approach of rain, and they as surely open again when the storm is overpast.

"Not for thy azure tint, though bright,  
Nor form so elegantly light,  
I single thee, thou lovely flower,  
From others of the sylvan bower,—  
Thy *name* alone is like a spell,  
And whispers Love in "Speed thee Well."

**HORSES.**—When Horses stretch forth their necks, snuffing the air with distended nostrils, assembling in the corner of a field with their heads to leeward, rain may be expected. The following anecdote was communicated by an eye witness of the fact:—"About the period of the first American War, the horses of a heavy dragoon regiment, which was turned out to grass at Havercroft, a village between Barnsley and Pontefract, where observed at the commencement of a very heavy thunder-storm to collect in a body and form a line with as much exactitude and precision as on a field day, continuing their position steadily as long as the storm lasted."

**BIRDS.**—Before rain, ducks and geese, and other fowls, wash and dive in the water more than usual. When pigeons return slowly to the dove-house, it is also said to indicate rain. The early appearance of woodcocks, snipes, fieldfares, &c., are prognostics of severe winters. When owls hoot and screech during bad weather, it is a sign of coming fine weather. The mistletoe thrush frequently sings particularly loud and long before rain, and sometimes during severe storms; hence it is termed the "storm cock."

### LANCASHIRE ANARCHY.

"In the northern parts of England tumults, fires, accidents, and deeds of violence reign."—*Prophetic Observations for May in ORION'S ALMANAC.*

What a sad thing it is, both for contemplation and effect, that thousands of persons in a northern country should combine to burn and otherwise destroy valuable property in a fit of unreasonable revenge! And still more saddening is the anomaly that in the very districts where education has been most promoted and intelligence of a certain sort has been most observable riot and disorder should have taken place to such an extent as to call for extraordinary measures to be taken by the police and military authorities. If we can reconcile ourselves to such a calamity with a perfectly calm demeanour it must be by the assurance of the above-cited author, that "All cannot be happy at once," and that "there is a revolution and a vicissitude in the motion of that wheel which is moved by the hand of God."

### DEATH MEMORIALS.

This month, the tide of mortality sweeps unrelentingly over many; three of 'busy note and known to fame' are among the number."—*Orion's Prophetic Observations for May.*

The last week of May—to say nothing of the entire month—was prolific in the annals of death, and the last day of the month was the one of all others on which the grim king held his most potential sway. In that one week the tide of mortality did in real earnest "sweep over many of busy note," and at least "three who are known to fame" were of that number. The deaths of that short period included those of the Duchess of Argyll, the Dowager Lady Williams, the Baroness Gray, the Countess of Buckinghamshire, the Countess of Newburgh, Dr. Carruthers (a literary veteran of repute), the Rt. Honorable Russell Gurney, and—last but not least—the venerable Earl Russell. But the gloom which pervaded the air of many a noted household during the principal portion of that week was greatly intensified by Death's holocaust on the last day. Totally unlooked-for in a calm sea and the brightest of weather was that terrible disaster to the *Grosser Kurfurst* which sent the giant iron-clad to the bottom of the English Channel, and at one fell swoop found a watery grave for some 290 of her officers and crew. The telegraphic wires were active all that day in flashing the sad intelligence to the Emperor at Berlin, to the Crown Prince of Prussia at Buckingham Palace, to hundreds of families on the Continent, and to all whom it might concern throughout the length and breadth of the British Isles.

**August Meteors.**—The passage of the August Meteors in 1879, will take place on *Monday*, the 11th of August, shortly before 6h. in the afternoon, at which time the Meteors will be obscured in consequence of the superior light of the Sun. For the earth generally, they will this year be most favourably seen in the East Indian Islands.

### GERMANIC TROUBLES.

"From May to September the ponderous orb of Saturn will be hanging about the Sun's place in the horoscope of the Emperor of Germany, and he will experience national and family troubles of a serious nature."—*Orion's Almanac, 1878.*

If the seer's astrologic deductions are to be realised, we may consider that both the family and national troubles of the aged Kaiser have already commenced. He had but just escaped the blow intended for him by a would-be assassin when his Government were beaten by an immense majority on the Bill which they endeavoured to pass, authorizing summary proceedings against meetings and publications having Socialistic aims and tendencies. Since then, while some loyal Germans residing in London were presenting to the Crown Prince a congratulatory address on his father's escape from assassination, a numerous body of German Socialists forced their way into the Embassy, and on being ejected by the police and other officials, hissed the deputaion, sang the "Marseillaise," shouted "Down with the Prince," and attempted personal violence to the loyalists. Then followed on the heels of this public exhibition of animosity a trouble of a more national character in the loss of a great war-ship and two-thirds of its crew. This is truly a great calamity for Germany, apart from the injury to a second ship which will put it out of commission for six months. At best the German navy is but a comparatively small one, and as even before the present troublous times in connection with Eastern affairs the Emperor William was credited with wishing to make Germany a considerable naval as well as a great military Power, he cannot but feel such a serious loss of men and material as a great blow to his cherished ambition. Already the Emperor's misfortunes have followed thickly and quickly. Within three days of the heavy loss of German lives in English waters, which had a depressing effect on the Emperor, his own life was again placed in peril by the act of a would-be assassin. He was wounded, it is said, from two discharges of firearms in the face, neck, arms, and back, and although the wounds were found to be less serious than at first they were imagined to be, there is no surety that to a man of four-score, the shock will not have a serious, if not fatal, result. The dastardly deed had the effect of abruptly terminating the visit to England of the Crown Prince and Princess; and whether it be traced to Socialism, to religious fanaticism, to antagonism to the Russian proclivities of the Court, or to simple luancy, it adds one more to the number of "national and family troubles of a serious nature."

**November Meteors.**—I calculate that the November Meteors will pass the Earth on *Friday*, November the 14th, at about 1h. in the afternoon, when of course the meteors must be totally obscured by sun-light. For the Earth generally, they will this year be seen to the best advantage in Australia.

## PREDICTION.

### THE QUEEN OF ENGLAND'S NATIVITY.

"At this Ingress the great Jove is passing the culminating point in the Horoscope of QUEEN VICTORIA, and in trine to her Sun and Moon at her birth. Well it is for Old England that such a glorious influence rules her destinies, for the ensuing Quarter,—increasing her trade, upholding her dignity, and presaging victory over her enemies."—*Almanac*, 1878, p. 86.

## FULFILMENT.

The successful Treaty of Berlin, and the Terms of Peace, &c., to which the CZAR had to submit, chiefly through *British Rule*, responds in a most striking manner to the foregoing Prediction, which is "CONFIRMATION STRONG" of the accuracy of ORION'S PROPHEPIC ALMANAC, and of the data from which his calculations are made.

## THE FULFILMENT OF THE HIEROGLYPHIC FOR 1878.

The *first* compartment of the Hieroglyphic represents fires, tumults, and riots by the people, which have been sadly witnessed during the current year in many towns in the United Kingdom; and Death holding the American Flag, depicts the fearful accidents, and horrid deeds, committed in that land—the Fenian threats, and the Raids of the Indians have been fearful.

The *second* or middle compartment depicts the Czar of Russia in an attitude of excitement and despair with his arm around Turkey—but, observe the *double-headed eagle* "falling headlong from on high," which was intended to foreshew, that the Czar's ambitious views and designs would be frustrated. The rampant position of Mars and Bellona in their War Chariot, denoted the fearful slaughter in which the War would be carried on by both Russians and Turks.

The *third* or bottom compartment represents serious naval disasters; these have been too truly verified by many shipping accidents, both abroad and at home—I may name the loss of the "Eurydice," near the Isle of Wight, and 300 of her crew—also the loss of the fine German Iron-Clad, the "Grosser Kurfurst," off Folkestone, with 284 of her crew, officers, and men. The prostrate position of the Dead and Dying, with the Angel of Death preparing to strike, are Typical of the great mortality of the human race through the famine in China, Persia, Asia Minor, and Morocco—thousands dying daily.

## ORION'S PARTING ADDRESS.

COURTEOUS READER,—No lover of truth can deny that we have proved the truth of Astral influences; and we insist that daring men (they are mostly the impudent Mar's men), who deny the truth of Astrology, ought to be scouted from society; for he who disregards the HOLY TRUTH does his best to destroy the present and eternal welfare of his fellows. To you my friends and correspondents, I address the parting word—farewell!—ORION.
