CLIPPINGS FROM CONTEMPORARIES.

ENGLAND.

"Horror on horror's head accumulates. Scarcely have the public recovered from the shock of the railway accident, than news comes of a vastly more appalling calamity."—*Hastings Independent*.—"The directors of railway lines should use every precaution to prevent mischief, for the celestial monitors portend frightful accidents."—*Orion's Almanac*.

"It appears from an official statement that 258 lives have been lost by the explosion in the Abercairn pit. Of the dead, 131 have left widows and 363 children."—*Standard*.—"The equilibrium of the atmosphere will be disturbed, and storms, earthquakes, and explosions in mines will be the result."—*Orion's Almanac*.

"The air is burdened with daily reports of calamity and grief. Never has London been more startled than by the catastrophe on the Thames. The details of the disaster are heart-rending, and every day's discoveries of the dead (over 700 in all), render more shocking the desolation over which the nation laments."—*Christian Signal*.—"The positions present a remarkable appearance, even where all is mystery. The lunar orb meets many baleful aspects this month [September], and many will be the sorrows those aspects shall engender."—*Orion's Almanac*.

GERMANY.

"National greatness brings its anxieties as well as its triumphs, and Germany is beginning to learn the lesson in more ways than one!"—*Times*.—"It apparently lies beyond Prince Bismarck's power to do anything to allay popular discontent. The Army and blood-tax are crushing the life out of the nation."—*Telegraph*.—"Germany is in an excited state; the seeds of tumult are thickly scattered throughout the land."—*Orion's Almanac*.

AMERICA.

"Yet while we weep for the slain at home, there comes a wild cry of anguish from over the Atlantic, bitter enough to command and absorb our commiseration. Along the whole valley of the Mississippi the yellow fever is spreading, and hundreds of victims are perishing daily. In New Orleans alone 90,000 persons are suddenly left without employment, and the cry of desolate misery rolls over depopulated scenes."—*Christian Signal*.—"The United States, &c., will feel the dire influence; great mortality will follow."—*Orion's Almanac*.

REMARKABLE PREDICTION BY ORION.

*Calculated from the Great Eclipse of the Sun, on January 22nd, 1879,
visible to South Africa !*

(THE MILITARY DISASTER IN AFRICA.)

"At the New Moon Mars will be on the cusp of the 8th house, and this foretells many sudden and violent deaths." The massacre of 900 British soldiers within a few hours is certainly numerous enough and sudden enough ; and occurring as it did on the very day of the eclipse, is also striking enough.

Orion's Prophetic Almanac says :—"This eclipse will doubtless cause the Government of England much anxiety in connection with South-African affairs generally, and I fear that the settlers will again experience the ireful risings in the savages' breasts." The same Almanac contains a hieroglyphic in which the arrow of death (the assegai) is seen striking down upon a column of soldiers. The Almanac in question was published on the 1st of October preceding—three months before the period referred to in the *Times*, which assures its readers that the war certainly could not have been foreseen at the close of last year. If then, newspapers, which by-the-by are always prophesying but rarely realizing, could not foresee this great trouble, the *Pall-Mall Gazette* and the *Standard* should be a little more fair and a little less funny in their treatment of those who *did* foresee the event. If those politicians who cannot find words too strong with which to abuse a Government when national troubles come upon us, would but reflect that the destiny of worlds and of nations is in the hands of a mightier power than that of premiers, parliaments, or peoples, they would, we think, be less conceited in their views of man's free-agency, and less profuse in their partizan maledictions.

PHYSICAL CALAMITIES.

It may not be given to man to know the full purpose of the Divine Will, yet it may be possible to obtain glimpses of the same by the machinery of the heavens which that Will has created and continues to direct in all its manifold mutations. It may be just as true now as it was of old, that not only "the firmament sheweth His handiwork," but also that the configurations of the heavens are "for signs and for seasons," and "their influence is divided unto all nations."

POST OFFICE REGULATIONS.

TO CORRESPONDENTS.

POST OFFICE LETTERS.—Advertisers should understand that, according to a resolution of the Post Office authorities, letters to be called for, addressed with initials only, are not delivered from local offices, but go to the Dead Letter Office.

RATES OF POSTAGE ON INLAND LETTERS.

The rate of postage on inland letters and parcels of all sorts, closed or open, making no distinction between them, is as follows : *If paid in advance*—Not exceeding 1 oz., 1d.; above 1 oz., but not exceeding 2 oz., 1½d.; above 2 oz., but not exceeding 4 oz., 2d.; above 4 oz., but not exceeding 6 oz., 2½d.; above 6 oz., but not exceeding 8 oz., 3d.; above 8 oz., but not exceeding 10 oz., 3½d.; above 10 oz., but not exceeding 12 oz., 4d. Twelve oz. to be the limit of weight for letters.

REGISTRATION OF LETTERS, &c.

By the prepayment of a fee of 2d. any Letter, Newspaper, Book, or other Packet on which the postage has been prepaid in Stamps, may be "Registered" to any place in the United Kingdom, the British Colonies, the United States of America, Italy, Switzerland, (via Belgium) or Germany. A letter intended to be *registered* must not be dropped into a Letter Box, but must be given to an agent of the Post Office to be registered. If dropped into the Letter Box, they will, as heretofore, be re-registered by the Post Office, and charged on delivery with a Registration fee of 8d.

For the convenience of persons living in Country places, where no Post Office is near, Letters will be Registered by Rural Post Messengers, who will receive Letters for Registration on their outward and on their inwards walks, whenever it is practicable for them to do so.

*By temperature of air we find
Changed is the body and the mind.*

Colds, catarrhs, and all inflammatory diseases of the lungs, are proverbially prevalent this month, but proper care and caution will render them less liable to attack the adult. The position of Mars in the sign Taurus indicates that the various forms of throat diseases and bronchitis will be more than usually prevalent; pains in the head and face, &c.

Birthday Information.

Applicable to persons in all Parts of the World.

Those single females who were born on the 1st, 12th, or 15th of January must beware of their engagements with the opposite sex. The 6th, as a birthday, is rather good for surgeons, dentists, cutlers, and military men. The 16th is rather beneficial for literary characters and gentlemen of the press. But those persons who were born on the 17th must beware of frauds on their property. The 19th is good for scientific and literary persons. Persons who were born on the 20th will experience beneficial changes in their business, &c. The 31st is fortunate for landlords, farmers, &c.

The Moon's changes portend this month to be of a sickly character, producing coughs and pulmonary affections, which will afflict those who are weak in the chest, and prove fatal in very many cases. Inflammatory complaints are still prevalent in London and elsewhere. Those much exposed to cold must prepare against chilblains, and eruptions on the skin.

Birthday Information.

Surgeons, cutlers, and military men, who were born on the 2nd of March, may sue the fair for favours. Those born on the 3rd, in any year, experience strange annoyances. But the influence will tend to promote the marriage of widows and spinsters born on the 7th or 8th of March. The 8th and 11th denote some prosperous events. Persons born on or near the 15th of this month will feel the potent influence of Jupiter, in the shape of favours from superiors, and an improved state of affairs, &c. The 20th and 24th of this month are rather untoward for females who were born on those days; they must beware of their engagements with the opposite sex. Those born on the 28th will experience many changes, &c.

PROPHETIC OBSERVATIONS.

1	r	4	33	1m.21	22	At the opening of this month the malific influence of Saturn, conjoined with Venus, produces an evil period for females generally. Death or scandal threatens some of England's fairest daughters, and marriages contracted or solemnized at this period have untoward results. The public attention is directed towards particular acts of violence or cruelty. Probably a notorious poisoning case; and suicides more than usual. Our Gazettes contain long lists of bankruptcies; forgeries are prevalent, and one eminent in the legal or literary profession is threatened with serious evil. Let the uninitiated beware of bubble companies and speculation. Mars in Cancer excites the peaceful Scots; religious and party feeling is rife amongst our northern brethren. Holland and the Netherlands are afflicted. Insubordination, fires, and other evils occur in Manchester, York, Constantinople, New York, and several American Cities, also Amsterdam. This month will witness some severe storms, earthquakes, explosion in mines, &c. The 6th, 14th, 22nd, and 31st, are evil.

On account of the changeableness of the weather this month, many will be afflicted with affections of the brain and nervous system. Affections of the heart, and sudden death prevalent, as Mars progresses through the sign Leo. Saturn potent in Aries denotes many will be afflicted in the liver; palpitation of the heart, fevers, and violent headaches.

Birthday Information.

Most persons who were born on the 2nd of this month, in any year, will derive benefits from the conjunction of the Moon and Jupiter on that day. Those born on the 3rd will be benefitted by superiors. The 5th is evil for the fair sex generally. Persons born on the 11th must avoid quarrels, and beware of accidents, &c. The 14th is good for pleasure and wedlock. The 17th is good for farmers, builders, old persons, &c. Rather beneficial for natives born on the 21st. Aged gents., who were born on the 23rd, may sue the fair for favours. Those born on the 25th may expect slander and troubles in various ways. The 27th is good for public bodies, and eccentric men.

PROPHETIC OBSERVATIONS.

1	r 5 15	1m.32	26	Disturbing news will arrive from the Continent of Europe, and some mischief may arise in our own country. N. Public discussion will become heated, and the great questions at issue will be vigorously debated. Explosions, and many serious underground accidents will occur in mines, pits, &c. The Parisians will be under disturbing influences all the month, and will manifest their opinion of public affairs in a most decided manner. The great towns of France will throb with excitement, and the Republican and other parties will be a source of great anxiety to the peaceful portion of the population. Turkey will have trouble with her Asiatic provinces. The people, poverty stricken, and consequently disaffected, will be additionally afflicted by the bitterness of religious feuds. From the afflicted position of the planet Venus, I judge that women will be liable to deception and violence. The God of Love seems busy in London and in Paris, but in a manner which may excite much scandal and suicidal tendencies.

The nights of this month will be obnoxious through impurities which will be distilled in the shape of dew and vapour. Measles among children and low fevers may be looked for on account of the air being possessed with its maximum of carbonic acid; rheumatism in low plains and marshy grounds. Bowel complaints, attended with cramp, &c.

Birthday Information:

A very untoward position for persons who were born on or near the 1st of this month, in any year; strange losses and troubles of a conjugal nature. Those born on the 3rd, may gain by science or writings. The 5th and 7th, as birthdays, are rather evil for females; they must beware of intrigues of the opposite sex. Those persons who were born on the 9th may expect vexations by eccentric characters. Persons born on the 15th of this month, in any year, will be benefitted by the "Lunar Aspects." The 24th, as a birthday, is rather unfortunate for single females. Those born on the 28th must guard against thieves and swindlers. 29th, evil for the fair sex.

Planetary Influences.

On the 4, 11, 18, 26, the stars prophecy of accidents; be cautious.
 On the 4, 5, 12, 19, days for fraud in seemingly fair dealings.
 On the 8, 13, 17, 21, good in some affairs, but beware of disputes.
 On the 10, 13, 23, 31, ask favours by letter; address the fair sex.
 On the 13, 17, 23, 30, good days for new connexions and friends.
 On the 15, 18, 25, 26, strange occurrences and unexpected evils.

1	r 6	56	5m.30	28		The rapid transit of Venus through Sagittarius, where she forms a trine of Jupiter, square of Uranus, and trine of Saturn, points to important doings in Spain; the government there appears to be resolved on war; the entrance of Venus, however, will give a milder tone to their deliberations. The furious Mars rushing through Scorpio, the house of his greatest fortitude; giving rise to strife and excitement in Syria, Judea, Barbary, Morocco, Norway, Bavaria, Catalonia, and Valencia; in fact all places under the dominion of that sign. Let the Liverpool people beware of accidents to the docks, &c., by violence, and let mob law be deprecated in that town, for it is threatened with much evil this month. I fear it suffers by tumult and numerous fires. Jupiter retrograding in Aries, denotes pressure in the monetary circles. Tradesmen and Merchants begin to feel the consequence of speculation; discussions in the Bank parlour during the <i>last</i> and present month, tend to raise the interest demanded on loans and discounts.

4	s	3	50	6	46	2	Jupiter. Hence a military or naval
5	r	7	52	8	6	3	man will be advanced to honor, dis-
6	s	3	50	9	29	4	tinction, and power; and probably
7	r	7	54	10	49	5	many promotions will take place
8	s	3	49	morn.		6	both in the Church and State. The
9	r	7	57	0	7	7	Sun squared by Uranus, and Venus

EXAMPLE.—To know the number of days from March 23 to July 23 following. Find March in the first column, and then in a line with that under July, is 122 days. If from March 23 to July 30 it would be 7 days more, 129 days; but if from March 23 to July 13, it would be 10 days less, or 112 days. In Leap Year, if the last day of February comes between, add one day to the number given in the Table.

NATURE OF THE ASPECTS, &c.

Aspects from *aspicio*, to behold, the being placed at a certain distance from a planet, these are either *good* or *evil* aspects. As the *conjunction* (♌) or being in the same sign or degree of the zodiac, good with the good planets ; as *Jupiter*, *Venus*, the *Sun*, the *Moon*. Any planet is afflicted when in *conjunction* (♌) of *Saturn*, *Mars*, or *Uranus*. *Semisextile* (S. ✕), *Sextile* (✕), and *Trine* (△), are good aspects, with all the planets ; and those days are said to be *lucky* when the *Moon* forms any of these aspects. See the "Lunar Aspects," commencing at page 8. The *Semisquare* (S. □), 45 degrees ; the *Square* (□), 90 degrees ; the *Sesquisquare* (SS. □), 135 degrees ; and the *Opposition* (♌), 180 degrees ; are *ill aspects* with any of the planets, therefore unfavourable to mankind in any honourable undertaking. *Parallel*, or *P*, signifies an equal distance from the Equator, or being in the same degree of *Declination* ; whether of the same name, *North* or *South*, is of no consequence. The effect of this position is exactly the same as that of a *conjunction* (♌), being good with good planets, as *Jupiter* (♃), *Venus* (♀), the *Sun* (☉), the *Moon* (☾) ; and *evil* with the planets *Saturn* (♄), *Mars* (♂), and *Uranus* (♅). Vide the "Mutual Aspects," commencing with Jan., page 8.

LEAP YEARS.

1804	1832	1860	1888
1808	1836	1864	1892
1812	1840	1868	1896

1820	1848	1876
1824	1852	1880
1828	1856	1884

All the years in the top line begin their respective months with the same days of the week. These days are indicated in the same line, in the right-hand columns, under the name of each month. The same simple rule applies to all the other lines. From this, the day of the week, on which *any* day of this century falls, can be easily reckoned.

To Set a Clock or Watch by this Table—Example, Jan. 1st. It will be found by looking into the Table, that a Clock to be right must be 3 minutes 38 seconds faster than a sun-dial; therefore set it so much faster accordingly, and so of the rest. Correct the Watch when the dial marks just an hour, 9, 10, 11, 2, 3, or 4 o'clock. Noon is not the best time for this purpose, nor near sun-rise or sun-set.

REVIEW.

THE TEXT-BOOK OF ASTROLOGY, By ALFRED J. PEARCE, author of the "Weather Guide-Book," etc. Vol. I, "Genethliology." London, Cousins & Co., 3, York Street, Covent Garden. Price 10/6.

This volume is a complete treatise on the calculation of Nativities, and the branches of Judicial Astrology connected therewith; it contains more than forty pages of tables, and many facts in evidence of the truth of the science. The illustrations and examples are numerous, interesting, and instructive. The Nativities of Goethe, Napoleon the Great, the late Prince Consort, and the Princess Louise (Marchioness of Lorne), are fully drawn up. The time of birth, and the fatal "arcs of direction" in the Nativity of the late Princess Alice (Grand Duchess of Hesse), are also given. We cordially recommend this work to our readers and also to sceptics. We regret that want of space forbids our making any extracts from Mr. Pearce's book beyond the concluding paragraph of his preface:—"No study can be more interesting nor more fascinating than this, and few can be more useful. As Sir David Brewster said, the planets and constellations "are truly the only objects in the universe which all nations have witnessed, and all peoples admired. They presided at the Horoscope of our birth, and they will throw their pale radiance over the green mounds beneath which we are destined to lie."

THE ECLIPSES, &c., IN 1880.

In the year 1880, there will be *four* Eclipses of the *Sun* and *two* of the *Moon*.

I.—A TOTAL ECLIPSE OF THE SUN,

January 11—12, *invisible* to England.

Begins on the Earth generally January 11th, 8h. 0m. 30s. p.m., in Longitude $153^{\circ} 44'$ E. of Greenwich, and Latitude $10^{\circ} 24'$ N.

Central Eclipse at Noon, January 11th, 10h. 48m. 12s. p.m., in Longitude $160^{\circ} 0'$ W. of Greenwich, and Latitude $10^{\circ} 24'$ N.

Ends on the Earth generally January 12th, 1h. 7m. 48s. a.m., in Longitude $118^{\circ} 56'$ W. of Greenwich, and Latitude $31^{\circ} 27'$ N.

Mean Time at Greenwich.

From the above and other data it is evident that this Eclipse will be chiefly confined to the waters of the North Pacific Ocean.

This Eclipse will prove an interesting phenomenon to the lonely Mariner, who may be cruising at the time in this distant part of the globe!

II.—A TOTAL ECLIPSE OF THE MOON,

June 22nd, *invisible* to England.

Eclipse begins	June 22nd, 0h. 14m. 48s. a.m.	} Mean Time at Greenwich.
Middle of the Eclipse ...	„ 22nd, 1h. 50m. 6s. a.m.	
Eclipse ends	„ 22nd, 3h. 25m. 24s. a.m.	

At these times respectively the Moon will be in the Zenith at the places whose positions are :—

Longitude ... $175^{\circ} 46'$ E. }	} of Greenwich {	Latitude ... $24^{\circ} 9'$ S.
„ ... $152^{\circ} 59'$ E. }		„ ... $24^{\circ} 3'$ S.
„ ... $130^{\circ} 11'$ E. }		„ ... $23^{\circ} 56'$ S.

Magnitude of the Eclipse (Moon's diameter = 1) 1.063.

This Eclipse will be visible in Asia, and the Asiatic Archipelago, Australia, New Zealand; and on the South Pacific, Indian, and Southern Oceans. This Eclipse bodes little good to our Eastern possessions; seditions, famine, and sickness, as well as cyclones and earthquakes will be witnessed in the East generally!

III.—AN ANNULAR ECLIPSE OF THE SUN,

July 7th, *invisible* to England.

Begins on the Earth generally July 7th, 10h. 43m. 0s. a.m., in Longitude $59^{\circ} 37'$ W. of Greenwich, and Latitude $22^{\circ} 47'$ S.

Central Eclipse at Noon, July 7th, 1h. 34m. 36s. p.m., in Longitude $22^{\circ} 28'$ W. of Greenwich, and Latitude $52^{\circ} 30'$ S.

Ends on the Earth generally July 7th, 3h. 37m. 24s. p.m., in Longitude $12^{\circ} 44'$ E. of Greenwich, and Latitude $44^{\circ} 43'$ S.

Mean Time at Greenwich.

At the CAPE OF GOOD HOPE a Partial Eclipse is visible.

Magnitude (Sun's diameter = 1) 0.236.

Begins	July 7th, 2h. 53m. 24s. p.m.	} Mean Time at the Cape.
Greatest Phase ...	„ 7th, 3h. 50m. 0s. p.m.	
Ends	„ 7th, 4h. 41m. 6s. p.m.	

Angle, from { First contact, 164° towards the East } For direct
Vertex of { Last contact, 35° towards the East } image.

This Eclipse will be visible to South America, the South Atlantic Ocean; South Africa, and the Coasts and Islands adjacent.

The Sun will be Centrally Eclipsed at Noon, in Longitude $22^{\circ} 28'$ W. of Greenwich, and Latitude $52^{\circ} 30'$ S., which place falls in the South Atlantic Ocean. In both South America and South Africa the effects of this Eclipse will engender quarrels, dissensions, and discord; much fighting, and the most savage deeds will be perpetrated.

IV.—A PARTIAL ECLIPSE OF THE SUN,

December 2nd, *invisible* to England.

Begins on the Earth generally December 2nd, 2h. 44m. 42s. a.m., in Longitude $13^{\circ} 17'$ W. of Greenwich, and Latitude $65^{\circ} 1'$ S.

Greatest Eclipse, December 2nd, 3h. 11m. 6s. a.m. (Sun's diameter = 1) 0.040, in Longitude $42^{\circ} 43'$ W. of Greenwich, and Latitude $67^{\circ} 56'$ S.

Ends on the Earth generally December 2nd, 3h. 37m. 36s. a.m., in Longitude $74^{\circ} 18'$ W. of Greenwich, and Latitude $67^{\circ} 10'$ S.

Mean Time at Greenwich.

This Eclipse (which will be only a small defect on the Sun's disc) will be visible to Patagonia, Cape Horne; and the Coasts and Islands adjacent.

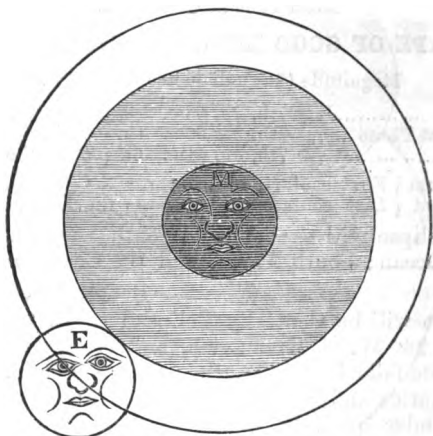

V.—A TOTAL ECLIPSE OF THE MOON,

December 16th, *partly visible* to England.

Eclipse begins	Dec. 16th, 1h. 44m. 30s., p.m.	} Mean Time at Greenwich.
Middle of the Eclipse	„ 16th, 3h. 38m. 48s., p.m.	
Eclipse ends	„ 16th, 5h. 33m. 6s., p.m.	

Magnitude of the Eclipse (Moon's diameter = 1) 1.390.

The following Type, which represents the Eclipse for London and Greenwich, will practically serve for the whole of Great Britain.

The letter **M** denotes the *Middle*; and **E** the *End*.

At Greenwich the Moon will rise at 3h. 46m., p.m.

At the Middle of the Eclipse, the Moon will be vertical, or directly overhead, in Longitude 124° 22' East of Greenwich, and Latitude 23° 42' North, which place falls to the East of the Island of Formosa, in the North Pacific Ocean.

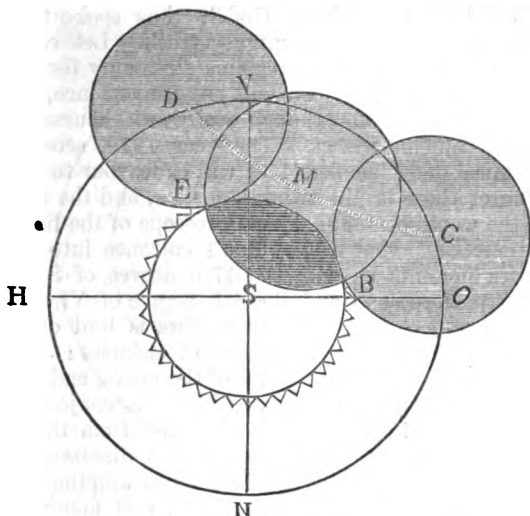

This Eclipse will be *partly visible* to the inhabitants of Great Britain; the Moon rising with us whilst she is totally eclipsed.

This will prove an interesting Eclipse in those parts of the Glóbe where the Moon has considerable elevation, and is visible during the whole time of the phenomenon. This Eclipse will be visible in Asia, Australia, New Zealand, Europe, Africa, and on the Pacific and Eastern Oceans.

VI.—A PARTIAL ECLIPSE OF THE SUN,

December 31st, *visible in England !*

The following Type represents the Eclipse at Greenwich ; here we have **VN** a vertical, and **HO** an horizontal line, passing through **S**, the Sun's centre ; **CMD** the curve described by the Moon's centre ; **B** the point where the dark body of the Moon makes the first visible impression on the Sun's periphery, where the Eclipse *begins*, and **E** the same where it *ends* ; the former is 84° , and the latter 5° from the Sun's vertex.

The above Type, which represents the Eclipse for London and Greenwich, will practically serve for the whole of Great Britain.

Eclipse begins	Dec. 31st, 1h. 39m. 42s., p.m.	} Mean Time at Greenwich.
Middle of the Eclipse ...	„ 31st, 2h. 35m. 24s., p.m.	
Eclipse ends ...	„ 31st, 3h. 28m. 12s., p.m.	

In the Midland Counties it will be visible as a partial Eclipse of about 5 degrees, on the Sun's upper limb. This phenomenon will bring trouble, if not loss, to persons who were born on or near the day of Eclipse. The Eclipse will be visible to the Eastern Coast of North America ; to a large Section of the North Atlantic Ocean ; the Western parts of Europe ; the United Kingdom, and to the Coasts and Islands adjacent. The chief effects of this Eclipse will be violent storms in the Atlantic for the next three months.

THE WINTER QUARTER;

Or the Sun's Transit through Capricorn, Aquarius, and Pegasus.

“Let day improve on day, and year on year,
Without a pain, a trouble, or a fear ;
Till death unfelt, that tender frame destroy,
In some soft dream or ecstasy of joy ;
Peaceful, sleep out the Sabbath of the tomb,
And wake to rapture in a life to come.”

“All things are full of God”; thus spoke the great CICEERO. We reiterate the mighty truth. Let each of us adopt it as a motto. Time remains stationary for no man, nor lags behind his period to suit any convenience, but pursues his apparently slow though really swift course, regardless of all human wishes. The year 1879, according to astronomical data, has fled!! I will endeavour to shew the meaning of those bright twinkling stars, and the mysteries yet in the womb of 1880. The Horoscope of the firmament at the precise period of the Sun's entrance into the sign Capricorn presents us with the 17th degree of Scorpio on the eastern Horoscope, and the 4th degree of Virgo on the southern angle. At this Ingress Mars is lord of the ascendant, and falling into the house of sickness; Jupiter is on the cusp of the 4th, the house of the grave, and in direct opposition to Uranus; and the Moon is conjoined with Saturn in Aries! What may we judge from these fatal positions but numerous and most fearful diseases—a truly mortal period—coughs, bronchitis, and consumptions, lingering agues, violent pains in the head, and many sudden deaths in old England. And one cause of this melancholy evil will be cold, stormy, and tempestuous weather during the Winter; and, as *Ramsey* declared to us, “an infectious air.” The planet Jupiter, in the 4th house, denotes the death or downfall of some man in power during the ensuing Quarter; and I apprehend the Ministry will not be very firm in their places. Mars in Taurus still excites violence and warlike feelings in parts of Africa; our territories at the Cape still demand attention; the expense of the Zulu war creates much discussion. Those holding the reins of power in India will find much that will give alarm and mistrust. A Royal Personage must succumb to the influence of Mars.

THE SPRING QUARTER;

Or the Sun's Transit through Aries, Taurus and Gemini.

“Who with a tongue profane will dare deny,
That Nature doth employ the orbs on high,
Pests, vigour, famine, bounty to dispense
From world to world?—Mysterious influence!
Light, heat, air, vapour, life, death, peace and wars—
What are they all?—The traffic of the stars.”

The Sun was, with propriety, called by the Ancients the Heart of Heaven. To this glorious luminary, the exhaustless fountain of universal Light and Life, we are indebted for the variations of the Seasons. He now begins to display his genial influence; for on *Saturday*, March the 20th, at 5h. 13m. a.m., he enters the first scruple of the Ram. In the Horoscope before us we find both Jupiter and Venus ascending; hence we judge that the condition of the populace appears to be thriving. Companies are formed, and works of an extensive nature appear to be carried on. Churches or public buildings will be begun or repaired. The Moon is ruler of the Sixth House, and squared by Saturn; at best, this testimony is evil: we may expect much mortality and illness; there are signs of opthalmic diseases, fevers, and inflammatory complaints; earthquakes and other terrestrial scourges will be heard of. May England be free from the bane of these peculiar planetary influences! but we are fearful that the extent of them will be great. The monied interest appears under a momentary shade. India, Turkey, and many of the European Countries become agitated. Cupid seems to aim his darts rather spitefully this Quarter; the wanderings of the blind god will cause work for many a blue-bagged lawyer. The most afflicting feature is the position of Mars on the cusp of the 4th, which foreshows an evil time both for the landed interests and occupiers of the soil; and serious accidents and commotions in the mining districts. The ranging of Mars through Gemini will, it is to be feared, afflict London with fires and alarms; cruelty, murders, and violence to the female sex will be rife. America, Egypt, Lombardy, Sardinia, and the West of England will have a taste of this martial mischief. Certain indications point to the sudden demise of an exalted personage.

THE SUMMER QUARTER;

Or the Sun's Transit through Cancer, Leo, and Virgo.

"Is there some vast, some hidden magazine,
Where the gross darkness flames of fire supplies ;
Some phosphorous fabric, which the mountains screen,
Whose clouds of light above those mountains rise ;
Where the winds rattle loud around the foaming sea,
And lift the waves to heaven in thundering revelry ?"

The refulgency of the Summer may be said to have its astronomical commencement on *Monday*, the 21st of June, at 1h. 31m. a.m. The Sun then enters the constellation Cancer, and the celestial limits of his diurnal arc are extended to their greatest length. The theme of heaven has the 17th degree of Taurus on the ascendant, and the 20th degree of Capricorn on the culminating point. Venus claims dominion over the ascendant ; she is located in the 2nd house, in the sign Gemini, and in sextile to Saturn, ruler of the 10th and 11th houses. These configurations will excite much speculation in London and the United States of America. The most important feature for comment is the happy position of the Moon in trine to Saturn and Mars. This brings many advantages to this country ; honours, improving trade, &c., and a desire with those who have power "to do justice and love mercy." Great changes are pending throughout Europe ; the combined efforts of despotism and duplicity must give way to the cause of civilization and enlightenment. The cruel chains of bondage shall be struck off. The current of progress sets in, and although time is necessary for the increase of its power, the cause of freedom must prevail. Some serious trouble and much expense will be witnessed in connection with the naval affairs of the land. Mars on the cusp of the 5th house denotes many troubles in schools, theatres, and places of amusement, some of which will fall to the ground ; or great trouble therein by fire, crowds, death, &c. This position of Mars will cause much trouble to women, miscarriages, and loss of children : this condition will be remarkably prevalent this year. Great excitement prevails in France and Italy, where the ruling powers are troubled and disordered. Uranus in Virgo is stirring up turmoil in Turkey, and the city of Paris will also come in for its share of the evil influence.

THE AUTUMN QUARTER;

Or the Sun's Transit through Libra, Scorpio, and Sagittarius.

" 'Tis from high life high characters are drawn ;
 A saint in crape is twice a saint in lawn ;
 A judge is just, a chanc'llor juster still ;
 A gownsman learned ; a bishop what you will :
 Wise if a minister ; but if a king
 More wise, more learn'd, more just, more ev'rything."

The Sun this year crosses the equatorial line and enters Libra on the 22nd of September, at 4h. 30m., in the afternoon. The figure of the expanse for this period of time exhibits the 16th degree of Aquarius on the ascendant, and the 11th degree of Sagittarius on the Mid-heaven. Both Jupiter and Saturn rule the Scheme, and those orbs will be found in conjunction in the 2nd house ; this is very ominous, and indicates a very untoward monetary, as also worse evils, for being opposed by Mars in Libra, signifies knaves, impostors, and thieves ; hence I look for a great increase of criminality during the Autumn. Much fraud and commercial delinquency will exist—forgery and swindling will be carried out to a great extent, and no doubt many fires will occur, causing great destruction to property ; let Fire Insurance Companies look thereto. The influences are bad for nearly all classes, particularly dealers in money, brokers, and clerical persons : some glaring acts of fraud or deceit will be brought to light in those circles. I also opine we shall lose an eminent lawyer or divine. Venus in the 8th house, conjoined with Mars and opposed by Jove, is of peculiar import, as Jupiter rules the 10th, the house of Royalty and Aristocracy. Some unexpected occurrences in reference to the highest circles, and some disclosures made which will seriously affect the fame of the fairer sex. The aspects of the Ingress are unfortunate for females ; cruelty and violence to the sex will be rife. Venus in the house of Death ! symbolically declares the demise of females of note ! Scanning the Continent, and the leading men of the age, we find them suffering from evil influences, which are calculated to mislead their judgment. Mars in Libra induces the Chinese to war, the Austrians to rebel ; the Spaniards very discontented—they are still pugnacious and riotous.

THINGS TO BE BORNE IN MIND.

JANUARY 1st (New Year's Day), Stock Exchange closed on this day unless otherwise specially ordered. 7th, Dividends due on the 5th are payable on this day. 11th, *Hilary Law Sittings* begin.

FEBRUARY 2nd (Candlemas), Scotch Quarter Day. 14th, Valentine's Day. 24th (St. Matthias), this day is kept as a Holiday at many Public Offices. 29th, "Leap Day."

MARCH 4th, Municipal Assessors appointed. 24th, *Hilary Law Sittings* end. 25th (Lady Day), Highway Surveyors and Overseers appointed; this is one of the Quarter Days on which rents and other dues are payable. 29th (Easter Monday, Bank Holiday).

APRIL 5th, Quarter Sessions in this week. 6th, *Easter Law Sittings* begin. 7th, Dividends payable. 9th, Fire Insurance expires.

MAY 1st, a Holiday at the Stock Offices, Bank of England. 14th, *Easter Law Sittings* end. 17th (Bank Holiday). 25th, *Trinity Law Sittings* begin.

RULE.—In judging from the above aphorisms, when Spring is nearly over, take the effects of Spring and Summer, and make a judicious commixture ; and so of the rest of the seasons.

Directions.—To prove the utility of the preceding Table, let the Reader look at the Aspects in the Calender pages for each month ; for the existing Aspects for any day, then look what those Aspects produce.

This will be a pleasing recreation, as well as to prove the truth, or otherwise, of the Science of Astro-Meteorology.

USEFUL HINTS.—LEGAL & COMMERCIAL.

I. O. U's. are received in evidence as acknowledgments of debts.

The penalty attaches only to a person giving a receipt on *unstamped paper*.

A *copyright* extends to 42 years.

The *Statute of Limitations* does not avail a debtor living beyond the seas part of the time.

Waste Land by the side of the road belongs to the adjoining freehold or the Lord of the Manor.

Copper coin is not a *legal tender* beyond 1s., or silver beyond 20s., but gold may be tendered to any amount.

A person giving a *false character* with a servant, renders himself liable to an action.

Payment of *interest* on a debt takes it out of the operation of the Statute of Limitations.

Wearing apparel and tools are protected from seizure under an *execution* from the County Court.

The *Bank of England* does not allow interest on money deposited for security.

A *guarantee* for payment of a debt must be in writing.

Tradesmen cannot be compelled to sell their goods at the prices marked in the windows.

Goods *pledged* to a pawnbroker are considered forfeited after the lapse of a year and a day.

Legatees under a will should not be witnesses to its execution as the legacy is thereby rendered void.

One half of the personal property of an *intestate*, dying without children, goes to his widow.

A verbal *death-bed gift* of property is of no avail.

Persons may be married at any time within three months after the publication of *banns*.

Card-playing is not allowed in public houses.

An action may be sustained in the County Court for *defamation* of character.

The rules of a *Loan Society* must be submitted for certificate to Mr. J. M. Ludlow.

Persons acting as *jurors* in criminal cases are not paid anything for so doing.

County Court *witnesses* who reside within a certain distance are allowed mileage.

Publicans cannot recover for beer, &c., consumed upon the premises.

An *Income Tax Collector* is bound to demand the money only once.

Money won at *billiards* cannot be recovered.

The deposit of *Title Deeds*, with a letter or memorandum of the object, will operate as a mortgage.

Persons exposing *fireworks* for sale without a licence, are liable to a penalty of £5.

A *promise of marriage* need not be in writing to sustain an action for a breach of it.

A master is not bound to pay his apprentice *wages* during illness or absence.

The death of a *legatee* during the lifetime of a testator renders the legacy void.

A *funeral* procession passing over land does not constitute a right of way.

No master can require more than reasonable *hours of servitude* from an apprentice.

An *entail* can be cut off by the present possessor and next heir.

Horticultural, Botanical, and Herbal Guide, FOR 1880.

JANUARY.—In open and dry weather sow in mild exposure for a succession a few early frame peas, common beans, short-topped radishes, lettuces, carrots, onions, spinach, and curled parsley, protecting them from the frost by mats or straw. Plant, prune, and train fruit trees and bushes. Form new flower gardens, and shelter from frost tender evergreens, tulips, &c. Plant snowdrops, crocuses, &c. *Herbs* to be gathered are groundsel, chickweed, archangel, and others which are in flower.

FEBRUARY.—Make ready all the ground intended for early crops; and when the weather is favourable, continue to sow every fortnight peas, beans, onions, spinach, 'savoy's, lettuce, celery, cauliflowers, carrots, parsnips, and radishes. Cut early kidney potatoes for seed, and put them in a stove or hot-bed in order to start them for planting out. Plant out evergreens and shrubs of all kinds, particularly roses, &c. Prune vine and fruit trees. *Herbs* to be gathered : foalfoot, lingwort, pilewort, speedwell, chickweed, shepherd's purse, and broom.

MARCH.—The principal crops of vegetables should be put into the ground this month. Sow asparagus, celery, cauliflowers, broccoli, spinach, onions, carrots, peas, beans, savoy's, parsnips, radishes, &c. Plant red cabbage and sea-kale : sow cucumbers and melons in hot beds. Finish pruning, dress borders and strawberry beds. This is the best time for grafting fruit trees, perpetual and moss roses, &c. Pot dahlias and cuttings. Plant pinks, polyanthuses, carnations, &c. *Herbs* to be gathered for medicinal purposes : coltsfoot, fumitory, pilewort, ladyfrock, lesser celandine, violet and comfry roots, and all kinds of herbal bark.

APRIL.—Continue to sow and plant rhubarb, artichokes, asparagus, sea-kale, Dutch turnips, German greens, and small salading. Earth up peas, tie up lettuce, and in very dry weather water seedling beds. Finish the grafting of fruit trees, and train and clean walks and edgings. Sow annuals, biennials, and perennials. Plant evergreens and propagate by cutting, jasmine, lavender, sage, rosemary, rue, &c. Sow early Dutch turnips. *Herbs* to be gathered : ground ivy, dandelions, avens, buttercups, and others which are in flower, as well as all kinds of bark.

MAY.—Sow peas, cucumber, red beet for pickling, and a full crop for kidney beans. Transplant cabbages, winter greens, cauliflowers, and celery. Hoe and stake peas, water newly-planted crops, and propagate aromatic plants by slips or cuttings. Plant dahlias, if their be no appearance of frost, and protect from wind and rain choice tulips, &c. Propagate herbaceous plants by dividing the roots. *Herbs* to be cut : celandine, milkwort, moonwort, wood sorrel, and adder's tongue.

JUNE.—Top beans and peas to assist the filling of the pods. Set kidney beans, and transplant cabbage, savoy's, broccoli, and sow turnips. Thin out onions, leeks, carrots, parsnips, and early turnips. Gather and preserve kitchen herbs. Shade and air melon plants, &c. Bulbous roots that have done flowering should now be taken up, and the off-sets separated. *Herbs* to be cut : avens, brooklime, centuary, comfry, woodbine, valerian, eyebright, pimpernel, speedwell, and elecampane.

Horticultural, Botanical, and Herbal Guide, FOR 1880.

JULY.—In this month prepare all unoccupied plots of ground for autumn and winter crops. Sow turnips, radishes, &c. Plant out broccoli, cauliflowers, savoys, leeks, and winter cabbages, and earth up celery. Lift full grown winter onions, and prepare mushroom spawn. In fine weather, gather medicinal flowers and sweet herbs, when in bloom, dressing them first in the sun, & then in the shade for winter use. *Herbs* to be cut are all that are in flower, as lavender, tansey, vervain, bed-straw, agrimony, cinquefoil, mountain flax, foxglove, and meadow sweet.

AUGUST.—Sow early cabbages and parsley for the succeeding year; also spinach, broccoli, and cauliflowers to stand the winter; earth celery; hoe and thin turnips; transplant broccoli, savoys, and cauliflowers, and the principal crop of celery into the trenches for blanching. Make mushroom beds: propagate kitchen herbs by slips, and take up all onions, garlic and shallots that are withered in the stem. Sow the seed of bulbous flowers in pots. *Herbs* to be cut: all mints and sage, golden rod, pond weed, yellow gentian, tansey, mugwort, and loosestrife.

SEPTEMBER.—Plant savoys, broccoli, cauliflowers, leeks, celery, and perennial aromatic and pot herbs. Hoe winter spinach and turnips, earth up celery and cardoons, prick out cabbage plants, gather ripe seed, &c. Pull onions if the tops appear dying. Plant cuttings of gooseberries, currants, raspberries, and strawberries, taking out the old stools which have twice produced fruit. *Herbs* to be gathered; angelica, field gentian, valerian, feverfew, southernwood, briony, and wild berries.

OCTOBER.—Plant home radishes, early cabbages, and other greens neglected last month, in sheltered situations; also cauliflowers, mint, and tarragon, in frames for winter use. Earth up savoys and cabbages as high as the leaves. Take up carrots and parsnips, cut off their tops and bury them in dry sand. Crop the tops of parsley, to make fresh leaves for winter. Transplant fruit trees and shrubs after the 10th day. Gather tree seeds: and sow for stocks. *Herbs* to be gathered: ivy, yarrow, wall rue, shepherd's purse, broom, rape, wall cress, and wild berries.

NOVEMBER.—Dig the ground where the crops are carried off, and which is not intended to plant again till spring: manure and prune fruit trees. Shallots are readily propagated by off-sets. A stiffish soil and open aspect should be preferred. These off-sets, or "claws," should have their bases only pressed into the ground, without being covered. Tulips and hyacinth roots may be planted. *Herbs*: not many to be gathered this month for medicinal uses, except rose moss, rock fern, and polypody.

DECEMBER.—In this month forward the business of manuring, digging, or trenching vacant ground. Set all sorts of stones, kernels, &c. Complete tree planting, and forward all winter pruning. Continue planting various hardy roots, bulb and shrubs. If frosty weather, be particular to protect all tender plants, trees, &c. Earth up celery. Sow small salad in warm borders, covered with mats. *Herbs* to be gathered: rose moss, rock fern, polypody, evergreens, and the mistletoe.

NEW PARADOX.

Christians the week's first day the Sabbath hold,
The *Jews* the seventh (as they did of old),
The *Turks* the sixth (as I've oft been told).

Now, good sir, pray tell to me
How is it possible this thing can be
That a Christian, Jew, and Turk, these three,
Being altogether in one place, may,
In and upon one and the self same day,
Have each his own true Sabbath, tell I pray?

PARADOXICAL PLANETS.

The Sun gives Venus very much less light
Than Mercury, yet she shines as much more bright.
Why does the darker Planet look the lighter;
The less illumined shine by far the brighter?
The reason is, Astronomers declare,
Her atmosphere is dense, and his is rare.
He hath no clouds, and probably no water.
Both has the bright Orb named from Ocean's Daughter.
Vapour, indeed, the face of Venus shrouds;
But there's a silver lining to her clouds,
The side of them that's turned towards the Sun.
Of course as silver shines, so shines that one.
To Womankind it is an old objection
That they are man's inferiors in reflection.
But Venus a superior power displays
To Mercury's, of reflecting solar rays.
There's reason—din it into men's dull ears
In proof of Women's wit, Strong-Minded Dears.—*Punch.*

ORIGIN OF THE DAYS OF THE WEEK.

1st day,	<i>Dies Dominica</i> , the day of the Lord	Sun ☉
2nd day,	<i>Dies Lunæ</i> , the day of the Moon	☾
3rd day,	<i>Dies Martis</i> , the day of Mars	♂
4th day,	<i>Dies Mercurii</i> , the day of Mercury	☿
5th day,	<i>Dies Jovis</i> , the day of Jupiter	♃
6th day,	<i>Dies Veneris</i> , the day of Venus	♀
7th day,	<i>Dies Saturni</i> , the day of Saturn	♄

It is a fact that of the seven days of the week being devoted to the seven planets was known at the first foundation of the Hebrew language.

ON TEMPERAMENT.

Nature and Character of the Twelve Zodiacal Signs.

- ♈ *Aries* ; hot and dry, *bilious*, attractive, and rather barren.
 ♉ *Taurus* ; cold and dry, *nervous*, retentive, and barren.
 ♊ *Gemini* ; hot and moist, *sanguine*, digestive, and rather fruitful.
 ♋ *Cancer* ; cold and moist, *lymphatic*, expulsive, and fruitful.
 ♌ *Leo* ; hot and dry, *bilious*, attractive, and rather barren.
 ♍ *Virgo* ; cold and dry, *nervous*, retentive, and barren.
 ♎ *Libra* ; hot and moist, *sanguine*, digestive, and rather fruitful.
 ♏ *Scorpio* ; cold and moist, *lymphatic*, expulsive, and fruitful.
 ♐ *Sagittarius* ; hot and dry, *bilious*, attractive, and rather barren.
 ♑ *Capricorn* ; cold and dry, *nervous*, retentive, and barren.
 ♒ *Aquarius* ; hot and moist, *sanguine*, digestive, and rather fruitful.
 ♓ *Pegasus* ; cold and moist, *lymphatic*, expulsive, and fruitful.

TEMPERAMENT OF THE PLANETS.

- ☉ *Sun* ; hot and *bilious*, and rather barren.
 ☾ *Moon* ; cold and moist, *lymphatic*, and rather fruitful.
 ☿ *Mercury* ; cold and moist, *nervous*, and rather barren.
 ♀ *Venus* ; warm and moist, *sanguine*, and fruitful.
 ♂ *Mars* ; hot and dry, *bilious*, hasty, and barren.
 ♃ *Jupiter* ; hot and moist, *sanguine*, temperate, and fruitful.
 ♄ *Saturn* ; cold and dry, *nervous*, reserved, and barren.
 ♅ *Uranus* ; cold and dry, *nervous*, eccentric, and barren.

HOW TO TAKE THE TEMPERAMENT.

Take the nature of the sign ascending at the *hour* of birth, the nature of the Sun and Moon with regard to the signs they possess, and the true nature of any planet which may be found in the ascendant, or in conjunction of the Sun or Moon, without any regard to the signs they occupy.

When *heat* and *moisture* predominate, the native is **SANGUINE**; when *cold* and *dryness* predominate, **NERVOUS**; when *cold* and *moisture* predominate, **LYMPHATIC**; when *hot* and *dry* predominate, **BILIOUS**.

When the Sun, Moon, and Ascendant, are in signs of the same nature, and in conjunction of Planets of a similar nature to the signs they occupy, the temperament will be extreme, and prove detrimental to health.

ASPECTS AND THEIR CHARACTERS.

♌ *Conjunction* is good with Jupiter, Venus, and the Moon; but is evil with the Moon to Mars, Saturn, or Uranus; with others moderate. ✱ *Sextile*, and Δ *Trine*, are good configurations with all. S. □ *Semisquare*, and SS. □ *Sesquisquare*, and 8 *Opposition*, are bad aspects with all the planetary bodies.

UNMIXED TEMPERAMENT.

The Sanguine Temperament.

The *Sanguine* person has a *clear, florid, blooming, and pleasant complexion*, what is usually termed *fair complexion*, and has an animated air of the countenance. The more florid the complexion the more sanguine, as far as this singularity is concerned. The sanguine temperament is further indicated by *light or chestnut coloured hair, blue eyes, and sparkling*; by the easy and voluble motions of the body, the *muscles hard and firm*; combining grace and variety; *body rather plump and fleshy*. With this temperament, of which the physical circumstances I have stated are the indications combined—*spirits lively and boisterous*; but the feelings are singularly evanescent, and liable to be easily displaced, and succeeded by new impressions.

THE BILIOUS TEMPERAMENT.

The *Bilious* or *Choleric* Temperament is more noble than the *Sanguine*. Is indicated by a darker swarthy complexion, of a ruddy character, dark brown, black, or red bushy hair; harsh skin, the eyes brown or hazel, vigorous, ardent, and piercing; strong and well defined muscular features. They are less than in the *Sanguine*, but harder, and of a fiery confident aspect. Bilious persons have in everything a character of vigour and intensity; their susceptibilities, though as easily excited, are more vivid than in the *Sanguine*, and are more under the dominion of real feeling.

THE NERVOUS TEMPERAMENT.

The *Nervous* or *Melancholic* Temperament evinces itself by a dry spare constitution; by a pale sallow complexion, by a sunken eye; by the cold, soft, heavy, languid outline; by its long features; by the delicate feminine form; by the fine black or brown hair; by the smooth skin, with small muscles; and by its unvarying character of permanent emotion. The Bilious and Nervous man possesses great energy and strong passions, overstepping the low, grovelling law of necessity, by which the bulk of mankind are urged to crawl their little rounds. The Nervous Temperament, when mixed with the bilious, its sensibilities are refined, which are essential to genius. To these mixed, almost all the great men may be traced, the leaders of mankind, who guide and govern in the arduous struggle of contending interests and passions.

THE LYMPHATIC TEMPERAMENT.

The *Lymphatic* or *Phlegmatic* Temperament is the least excitable of all the temperaments; it seems to be the morbid condition of the sanguine; it is characterised by a clear, soft, doughy skin, with full fleshy body, light hair, light grey eyes, pale complexion; the countenance is soft undefined outline, heavy, indolent, and unmeaning; abounds with watery, tenacious mucilage; the slimy blood languid. This temperament was very large in the persons of *Daniel Lambert*. The Sanguine Phlegmatic is a good combination, producing mild and estimable, if not highly energetic and commanding characters.

OBSERVATIONS ON THE CLIMATE OF THE BRITISH ISLES.

JANUARY.—This is generally our coldest month ; but in our variable climate, it, like other months, has no decided character. There is usually some change of weather near the 6th or 7th of this month, as it is the closing day of the Quarterly Storm period. When colder than usual, the extreme of frost generally occurs between the 13th and 26th days. Strong westerly winds usually prevail in mild winters, near the close of the month. But in variable seasons after mild weather it becomes severe at the end, and goes on for another fit of winterly weather.

FEBRUARY.—In this month we have frequently frost and snow, and more generally chilling rains and sleet, which are yet more uncomfortable than the direct severities of January ; yet occasionally a few days present a singular contrast of brilliancy and clearness. Many severe winters break about the 9th or 24th of this month, either for a time, or entirely.

MARCH.—This month is the opening period of vernal vicissitudes, and violent gales now often occur from any point, but more generally about the 20th, from S.W. If rain and wind prevail much between the 17th and 21st, from S.W., expect a showery summer ; but if N.E. winds prevail, look for a drier summer than usual. Whenever very calm and soft sunny weather comes hastily in March, we may be certain that it will only bring back some of the horrors of winter as suddenly.

APRIL.—This month is the time for the greatest vicissitudes, especially in the temperature. So great are the changes, and often so sudden, that the heat of summer, and the cold of ordinary winter, may make frequent alterations in less than a fortnight, so that at no other period is it so needful as now for the delicate, to guard themselves to meet it. About the 23rd, there is usually a change of weather to very warm, if it has been long previously cold. Sometimes real summer heat comes all at once, between the 23rd and 27th, attended by thunder.

MAY.—This month is almost as changeable as the preceding, and much N.E. wind usually prevails. A strong breeze from the East on or near the 20th, may in some years prevail, and in such case it foreshows a dry and barren time. A marked change to warmer air about the 10th and 15th, and even when the East wind continues late in the month, its chilling effect becomes very much softened, so that we often have hot weather at the close of May, attended by thunder and hail.

JUNE.—A marked difference in the weather is manifest about the 12th day of this month ; summer often fully opens then, and often suddenly, after previous cold and gloom. Severe thunder and hail at times prevail in June, especially during Midsummer week. Whenever the clover crop is forward enough to be cut by the 12th, it generally proves to be the best period to secure it ; from that day to the 20th, rather than afterwards.

OBSERVATIONS ON THE CLIMATE OF THE BRITISH ISLES.

JULY.—During this month the winds usually blow from S.W. and S.E. In showery seasons the former are predominant, and many heavy thunder storms prevail from the 6th to the 8th day, which time must be watched for travelling, pleasure, or haymaking. The aforesaid days, and the 15th, 23rd, and 29th, are generally found to be attended with thunder storms, or some atmospheric disturbance. The hot breezes from the E. and S.E., threaten us with thunder from S.W., which is sure to come if a sudden fall of the barometer occurs during intervals of bright hot weather.

AUGUST.—This month is another important period, both for the farmer and the nation generally, and the barometer must be consulted, and the point of wind regarded. It is usually a month of great heat, owing to the radiation now produced by the heated Earth. The prevalent wind now is S.W., with intervals of E. and N.E.; and when a breeze at E. or S.E., and much heat prevails at the time we anticipate sudden thunder storms from S.W.

SEPTEMBER.—This month, in some years, we have great heat, like to summer, for the heat of the soil counteracts the shortening of the solar power from above, and cause strong radiation. The weather of this month is mostly opposite to that of May in the same year. We often experience storms and much atmospheric disturbance during the last week of this month, produced by the equinoctial crises, which is the *fourth* period noted for storms, when we should be cautious how we venture on a pleasure trip; watch the barometer, and avoid the sea.

OCTOBER.—Some atmospheric disturbance usually obtains up to the 7th or 8th of this month, attended with strong winds, thunder, or violent rains. In a few instances we have this month dry and summer like; but it is more generally a time of great rain than otherwise; yet bright sunshine and great warmth may intervene. Towards the end the emblems of the dying year present themselves in rapid and melancholy succession, by the fall of the foliage, and the moaning gale heralding the icy car of winter.

NOVEMBER.—The shortened days, and the frequent cold rains and fogs, fully justify the title which has been given to this month, viz.,—"The gloomy month of November"—yet in some seasons, we have known many fine and bright days in this month. Near the end we often have some frosty and keen nights, or violent gales, which completes the fall of the foliage.

DECEMBER.—It is noticeable that the 6th, 22nd, and 31st of this month, if mild weather, generally produces violent winds. The last Quarterly Magnetic Storm Period commences on or about the 21st of this month; and this is one crisis of some great change or fresh establishment of weather. Mild Autumns now give place to cold weather, or cold seasons for a time give up to mildness and storm.

THE AUTUMNAL METEORS IN 1880.

August Meteors.—The passage of the August Meteors in 1880 will take place on *Tuesday*, the 10th of August, at about 30 minutes after midnight. The Meteors may therefore be expected to be favourably observed during the night, as there will be a total absence of Moonlight during the display.

November Meteors.—The near approach of our Earth to the stream of the November Meteors will this year take place on *Saturday*, the 13th of November, at about 8h. in the afternoon, and the Meteors may therefore be expected to be visible during the evening, but many of the *small* Meteors will be obscured by Moonlight.

OBSERVATIONS ON THE SUN.

PROFESSOR RUDOLPH, in a lengthy paper on the Sun, says : "It is a molten or white hot mass, equalling in bulk 1,260,000 worlds like our own, having a surrounding gas on fire 50,000 miles deep, tongues of flame darting up more than 50,000 miles, volcanic forces that hurl into the solar atmosphere luminous matter to the height of 160,000 miles, drawing to itself all the worlds belonging to our family of planets, and holding them all in their proper places; attracting with such superior force the millions of solid stray masses that are wandering in the fathomless abyss, that they rush helplessly towards him, and fall into his fiery embrace ! and thus he continues his sublime and restless march through his mighty orbit, having a period of more than 18,000,000 years !"

OBSERVATIONS ON THE MOON.

"SIR W. HERSCHEL has spoken of the lunar seasons as though they resembled our own, but in reality they are very different. Thus day lasts more than a fortnight, and is followed by a night of equal length. Nor is this all. There is neither air nor moisture to produce such effects as are produced by our air and the moisture it contains in mitigating the heat of day and the cold of night. Under the Sun's rays the Moon's surface becomes hotter and hotter as the long lunar day proceeds, until at last its heat exceeds that of boiling water ; but soon as the Sun has set, the heat thus received is rapidly radiated away into space (no screen of moisture-laden air checking its escape), and long before lunar midnight a cold exists, compared with which the bitterest weather ever experienced by Arctic voyagers would be oppressively hot. The range of change certainly amounts to about 500°, and in whatever way we distribute it, we must admit, first, that no such life as we are familiar with could possibly exist on the Moon ; and secondly, that the Moon's crust must possess a life of its own, so to speak, expanding and contracting unceasingly and energetically."

SHIPWRECKS.

"Shipwrecks are likely to be numerous around the coast."—*Orion* (winter quarter).—"There were 41 wrecks last week, making the total for the present year 228, or an increase of 62 over last year's corresponding period."—*Standard*, Jan. 31.

AFFLICTIONS OF THE CZAR.

"The Czar of Russia is also afflicted; much turmoil throughout the land. His family are ill at ease," &c.—*Orion*, April, 1879.

"Intelligence of the attempt on the life of the Emperor Alexander has caused great emotion at Berlin. In political circles a hope is expressed that the Russian Government will take energetic steps against the cowardly and rascally conspirators."—*Daily Telegraph*, April 15.

RUSSIAN INTRIGUES.

"Diplomacy is active, but the wily schemes of Russia and her secret supporters can only be counteracted by a bold and straight forward course of conduct."—*Orion's Almanac*.

After describing at great length the Russian intrigues at Cairo, and a secret treaty between the Czar and Khedive; and, as a result the latter's *coup d'etat* against the financial representatives of England and France, the Correspondent of the *Daily Telegraph* writes—Only by one means can the Viceroy's schemes be paralysed, and that is by an absolute and perfect concord between France and England."

MORE RUSSIAN SCHEMING.

"But *Ursa Major* shakes his paw over Turkey, while he glances a scowl at Persia, and even beyond, towards India."—*Orion*, for the spring quarter.—"The Russian Circular has disturbed the temporary sense of security on the everlasting Eastern Question like the explosion of a bomb shell. The revision of the Treaty of Berlin is requested in what is held to be its most vital provision. The Czar declares that when his troops are withdrawn the Bulgarians will resist to the death the erection of the proposed Turkish fortresses along the range of the Balkans. It is impossible to escape the uneasy suspicions that Russian intrigue is at the bottom of this, and that the Zulu war has something to do with the Latitudinarian view which the Russians are inclined to take of the treaty of Berlin."—*St. Leonard's Gazette*. "A telegram from St. Petersburg states the exploring party to Merv will consist of from 2,000 to 3,000 men. Who ever heard of an exploring party of such magnitude? Rather is it a military 'scowl towards Persia, and even beyond towards India.' *Orion* may well ejaculate "Ah! Czar, be moderate! The old fate of ambition is the fate of ambition still."—*St. Leonard's Gazette*.

The Prince Imperial's Nativity.

I will just point out the following remarks in the Nativity of this lamented young Prince. *Observe*.—On the very day (June 1st) that the Prince was slain by the Zulu Savages, the violent and cruel planet *Mars* was on the identical place of his *Sun* at birth, and the evil *Saturn* was in opposition to the place of *Mars*: a most unfortunate time for warlike manoeuvres!

FRENCH DISQUIETUDE.

"France suffers disquiet; attempts are made to inflame the public mind."—*Orion*, for February.

At this time, in addition to the overwhelming defeat of the Legitimists and Imperialists in the French capital, there were riots at Lyons which assumed a peculiarly anti-religious aspect. A crowd, estimated at 25,000, paraded the streets with sticks and lanterns, and bawled revolutionary cries and songs.—*St. Leonard's Gazette*.

MORE TROUBLES FOR OLD ENGLAND.

"On the 6th day [February] Saturn again enters the ruling sign of old England. Sad will be the period of his stay in that sign, which will endure till the beginning of April, 1881; and speedily will the evil effects show themselves."—*Orion*. "The transits for this month do not vary much from those of last. Saturn still works his way into Aries, troubling our country with sundry evils and misfortunes."—*Raphael*, for March.

Troubles and disasters are again coming thickly upon us. Fifty fine fellows of a squadron of Hussars have been carried away by the current while crossing the Cabul River, and another disaster has happened to the British Army at the Cape in the storming of a convoy of waggons by Zulus, and the killing of 60 men, including Captain Moriarty and Surgeon Cobbin. The Egyptian Khedive has also revolted against the British and French financiers, and the French have disquieted us by their seizure of the Island of Matacong. Thus one trouble after another comes to the front, and soon in turn makes way for the next.—*St. Leonard's Gazette*.

STORMS IN FEBRUARY.

"Violent storms in Spain, Portugal, Hungary, Alexandria," &c. "From the 21st to 23rd, cold, dark, and burly atmosphere, with sleet and restless winds."—*Orion's Almanac*.

Winter seems to have returned again in full force over a considerable portion of Western Europe. An extraordinary storm, which in two or three hours on February 21st, covered London and the surrounding counties with a coating of snow, was only the northern skirt of a tempest, or series of tempests, which spent their chief fury over Spain, France and Switzerland. . . . At Bordeaux the storm was spoken of as a repetition of the terrible cyclone of Aug., 1877. It swept the whole country from the Pyrenees to the Alps, and from the Atlantic to the Mediterranean.—*The Week's News*.

Another heavy snowstorm in Madrid. The tempest has lasted over four days, and has caused much damage and loss of life.—*St. Leonard's Gazette*.

Predictions and their Fulfilments.

PREDICTION.—"Fires, explosions, & railway accidents are to be feared. Persons connected with *Mines* cannot be too cautious."—*July*, p. 31.

FULFILMENT.—"A terrible accident occurred on Tuesday last, at Cwmavon, resulting in the death of six men." Another terrible explosion occurred at six this morning, in High Blantyre Pit, near Glasgow, by which 27 men were killed."—*London Papers*, July, 1879.

PREDICTIONS AND THEIR FULFILMENTS.

Prediction.—"Much electricity exists and fearful storms, which may prove inimical to the coming harvest."—*July, 1879, p. 31.*

Fulfilment.—Mr. T. C. SCOTT, writing on the 24th ult. (June), says: "It was hoped a month ago that the bad weather had done its worst, but its continuance is still further militating against the farmers' prospects."

"Gales of wind, destructive thunder storms, and drenching rains have been sadly prevalent since the commencement of the Summer Quarter."
London Papers, July 12th, 1879.

EXPLANATION OF THE HIEROGLYPHIC FOR 1879.

At the top of the Hieroglyphic will be observed the stern Figure Death with Coroneted Brow, the Lords in Waiting at the Foot of the Throne, which are emblematic of the recent occasions which have rendered it necessary for our Court to go into mourning; we need only mention the death of the PRINCESS of HESSE, the PRINCE of ORANGE, and the PRINCE IMPERIAL!

Below this the arrow of death (the assegai) is seen striking down upon a column of soldiers. This scene alludes to the Military Disaster in Africa, the massacre of 900 British soldiers within a few hours!

On the left hand side we have a figure of Britannia, and a Dove with an olive branch hovering over her, and an emblem of Peace. This pictorial illustration has been fulfilled by a Treaty of Peace with Afghanistan.

On the right hand will be observed the Gallic Cock grasped by a Warrior, and is dying from exhaustion, thus forshadowing the Death of the Imperial power in France.

The Bear chained down and prostrate is typical of the distressing condition and antagonism existing in Russia!

ORION'S PARTING ADDRESS.

COURTEOUS READER,

After having completed my annual labour, I again resume my pen to bid the adieu. I have endeavoured by the light of Astrology to unveil the Events pending over the various nations of the Earth for the year 1880. The space of twelve months has elapsed since I last had this pleasing task; another year has been added to our existence: some under the favour of *benefic influences* have glided through that period surrounded with happiness and prosperity, whilst others have been racked with pain, penury, and sorrow: to the first the Astrologer offers his best wishes for a continuation of their blessing; to the second he would proffer a desire for speedy relief, or if otherwise ordained by the all-wise Ruler of Events, that they may rest their hopes on Him for a future life of bliss. With these and all other friendly feelings, I bid thee *farewell!*  ORION.
