THE MAGAZINE WITH THE WIDE HORIZON
FOR STUDENTS AND RESEARCH GROUPS OF THE U.F.O. AND CO-RELATED SUBJECTS.

EDITORIAL . *****

The amount of material flowing in for this magazine since we began this year, from students and groups is more than proving the need for material which can be discussed and pondered upon , all of which is directly or indirectly connected with the U.F.O. Subject .
From all over Australia and especially the U.S.A. has come a steady inflow of letters and small comments on the articles which to date we have featured and a real keenness is shown in the desire to exchange views with each other in some cases we have put small groups in touch with others with material and their ideas have been reciprocated with each other .
So that the readers will not lose the material or lest it become a little stale before the next edition we are curtailing the Editorial leader and devoting as many pages as possible to the subjects and the replies from readers. We have many more coming up and if only time and space plus money would allow we would be able to print a fortnightly journal with the material on hand. however having ventured upon the plan of providing this magazine in conjunction with the A.S.R. we feel we are doing a job . and will try to improve what we have in hand before venturing farther.
The Editor will appreciate any comments not only on the subject matter but any constructive advise re the magazine. Thank you Everybody for your wonderful support and co-operation, it is indeed very encouraging and spurs one on to continue.THE EDITOR..

PLEASE NOTE ... THERE IS STILL A LITTLE CONFUSION RE ADDRESSING OF MAIL TO THIS MAGAZINE. ALL CORRESPONDENCE MUST BE ADDRESSED TO THE ABOVE ADDRESS. EITHER TO THE EDITOR OR THE MAGAZINE CONCERNED.
DO NOT ADDRESS ANY MAIL WHATEVER MEANT FOR THE EDITOR AS TO THE AUSTRALIAN FLYING SAUCER RESEARCH SOCIETY. THE EDITOR IS NO LONGER PRESIDENT . ANY MAIL ADDRESSED TO THAT SOCIETY WILL IN ALL PROBABILITY BE RECEIVED BY THEM AT THEIR PRIVATE BOX NUMBER . HENCE NO RESPONSIBILITY CAN BE TAKEN BY THE EDITOR FOR ANY MONEY OR MAIL SENT TO THE ABOVE SOCIETY . YOU MUST ADDRESS ALL MAIL FOR HIM TO THE ABOVE ADDRESS DO NOT USE THE TITLE OF THE SOCIETY .

" THE GLENN FORREST TEMPLE .W.A."

In our last edition the Editor spoke of a Temple just outside Perth. which is believed to have connections with Ancient Lemuria. in that underneath a small Memorial temple lies an ancient Temple . one of our readers sends in these facts concerning adjacent property and the strange events which occurred to her and her brother . there.

Dear Editor,

I was interested in your article on the Temple at Glenn Forrest being connected with the ancient Lemurians, and as my brother owns the property across from the Doctor who owns the site. I will relate some very interesting incidents of my experiences as we have a little holiday week-end cottage there, where for many years we used to go week-ending among the vibrating hills with their wonderful memories of dark skinned denizens of the bush . and those wonderful Rocks of Glenn Forrest .

Some twenty years ago , on one of my trips to the cottage in this quiet retreat in the ranges, my brother and I went searching for a spot to sink a well . He was possessed of a natural gift of ' water divining ' and we took our forked green twig down in the valley towards the lower end of our 25 acre property , where we expected water would be easily found. Having selected a spot we began digging our well , but the ' gravel ' gave no water yield .

That night after we had discussed our efforts with the rest of the family members they said " Why worry about a well, the tanks are full of water ? ." However we turned in. but the bright moonlit night. seemed to be full of stirring restlessness . Magpies warbling in the trees kept my brother awake. and he told me at breakfast next day, " I had a funny half waking dream last night. I was strongly impressed to dig the well nearer the house towards the top of the hill . "

So we picked our spot and started next day to dig. It took us 2 week-ends to reach 25 ft. and when we came to that level we struck a large smooth granite rock , and though we dug North , South, East and West we could not come to its side.

There we were 25 feet underground standing on a granite flooring! quite level and exactly like a floor. and at this stage we decided it was too risky to stay underground without firm timbers to support, so I began to climb the ladder, when I suddenly felt I was not underground, but in a place of huge buildings ! My brother was still down at the base.

On reaching the surface Leon my brother said he could have sworn " a lady came behind him moving swiftly by, and walked past him, and paused at the top of the well " . " She seemed to be dressed in a black nunlike robe. "

As this granite ' floor ' seemed to extend to such a large area , we abandoned the idea of using dynamite or going on with the well, which later proved to be the right idea, as we in a later experience proved to be true. for by some strange line of occult connection, my brother and I were not on this ' hallowed ground ' merely by chance , but because of a ' tie-in ' from the Lemurian times.

It was on this property that I found great delight and wrote some semi-

fiction articles in a relationship to the 'contact work' of the U.F.O. people , not the ships, as they came closely to our mountains at certain times of the moon phases. when its 'astral' body and that of the earth ' astral ' blend in one During full moon .

The spot where we dug down , is looking towards the site you mention as a " Temple site " and where a natural spring flows through the orchard of the present owner. and from our front steps we overlook the rocks of the temple area.

The Editor would add that this site is covered in huge granite boulders. and a portion was let out to Italians some years ago who dynamited huge sides of the rocks away . but for some unknown reason they suddenly ceased operation. enquiring about this,I was told the Government had closed on the lease and refused to relet it. to anyone.

We thank our reader for the contribution.

*

STRANGE UNUSUAL. PHOTOGRAPHIC EXPERIMENTS ETC.

Photographic experiments with various forms of infra-red ray film etc. have been explained to us and shown how they reveal most unusual life in our ether . and atmosphere. by Trevor James. in his book " They Live in the Sky" but also there have been from time to time those unexplainable photographs that bob up in ordinary shots etc. taken by unsuspecting amateurs. We instanced a case in our last edition of the figures which appeared in the snaps taken at the " Temple " in West Aust. mentioned above.

Some few years back a remarkable photo was taken by a clergyman in one of the Northern territory beauty spots for tourists. In this case the figure showed up was that of a Knight in medieval armour. and was widely publicised in one of the Australian leading pictorials.

Also some time ago the Editor. was shown and given a copy of a most unusual photo taken by a leading citizen of Sydney , in which it revealed the figure of her departed brother standing by other living members of her family. The lady explained that the snap had been taken at her country home. and was that of her father and two sisters who are clearly seen in the snap. but when the negative was developed, to the great surprise of all the figure of her deceased brother is clearly shown standing behind one of the sisters , and although it was daytime and the others were dressed in ordinary clothes. the brother is seen in an evening dress. The Editor has a copy in his possession of this and the figure is so clear it cannot be denied. yet the brother had been dead a number of years when the shot was taken .

It was while discussing this subject with a subscriber that the following information was given and is passed on to our readers to evaluate and perhaps endeavour to experiment with the same. We accept the statement of the subscriber knowing his veracity and also the valuable help he has given in the past.

(Continued on page ELEVEN)

BOY HURTLES TO DEATH IN A CLOUD.

In our last edition we gave our readers some facts about the most remarkable Monolith called Ayers Rock in Central Australia. This Rock is a well tourist attraction and large parties of senior as well as school students visit it each year. The account below is the report of a tragedy which occurred there under most unusual circumstances. The "Cloud" and its appearance is still clothed in a great deal of mystery. Now read on.

ADVERTISER 29/5/ 62.

Melbourne May 28th. A thick cloud which mysteriously " came and went in the desert in 10 minutes" brought death to a schoolboy at Ayers Rock in Central Australia on Sat. (26th May)

The boy. Brian Strieff, 16, of Malvern. Vic. plunged 150 ft. to his death when enshrouded by the cloud while descending the 1,143 ft. rock .

Another boy, Paul Jackman , 16, narrowly escaped the same fate.

He fell but landed on a ledge about 12 ft. below escaping injury .

" The cloud was almost unbelievable as it covered the Rock" Mr J. Allan, the boys schoolmaster said today from Alice Springs.

" It was a clear day and the cloud simply seemed to come from nowhere" reducing the visibility to about 10 to 15 yards.

" People here say such an occurrence is practically unheard of. The incident must be one of the strangest quirks of fate on record "

Brian and Paul were in a party of 32 boys from Carey Baptist Grammar School , who had climbed the rock with Mr Allan , another master and a guide.

Mr Allan said the sky was perfectly clear when the party began climbing the rock about 9. a.m.

" Our party reached the top of the rock about 10 a.m. and began the descent soon after . There was no skylarking and every boy behaved perfectly. "

" At about 900 ft. on the way down . this cloud seemed to come from nowhere It was hard to believe it was even happening . "

" A group of boys were leading the descent down and Brian Strieff, Paul Jackman and another boy were in a group between them and the guides behind. "

" Their group somehow got off the main descent path, and went in the direction of the precipitous parts" "Later we heard Jackman or someone calling... Then we saw that they had fallen .

" Brian Streiff had gone down 150 ft. in a sheer drop and landed on a ledge about 500 ft up the rock . " A Sydney Doctor had to use ladders and ropes to get up the rock and across the ledge to Brian .

" It took eight men eight hours to get Brian's body and take it down the rock on a stretcher . ".

Thus ends a report of one of the most tragic yet fantastic occurrences known to local residents in this part . We would direct our readers attention to our previous article and the mysterious qualities of this outstanding monolith of the world. . What that cloud was no one it seems will ever know. but the evidence seems to indicate that it was not an ordinary one. or how it appeared suddenly from nowhere and as suddenly disappeared. we leave it to our readers to form whatever conclusions they may make of their own .

AN INTERESTING LETTER FROM A R.C. PRIEST .

Dear Mr Stone.

In your personal letter to me you make me feel very good when you say that after you had studied the Vision of Fatima in Portugal 1917 carefully. y you became convinced that it was indeed true... The essential thing is that God has spoken to man . "

Now as you see there occurred there many extraordinary even miraculous phenomena in connection with those apparitions, Did the UFOs have anything to do with these ?. Possibly, for the simple reason that the word "UFO" is still very broad in the minds of the average ufologist and often includes even the miraculous, for. these too are unidentified.

As every Christian knows , when God has an important , timely message and He wants to make sure no one will find a legitimate excuse for discarding it, He will accompany it with phenomena which HE ALONE can accomplish. ALL circumstances duly considered .

But, Scholars in that field of research generally agree that God doesn't multiply miracles. So, instead of creating out of nothing a new being and making it behave miraculously, He will use one already which exists. For instance at Fatima . Portugal. Oct. 13. 1917 at noontime , when 70,000 people including many atheistic scientists. witnessed and absolutely extraordinary behaviour of the sun . we do not have to postulate that He produced out of nothing (created) a new sun and made it whirl etc. It is very possible that he just inspired or commanded a crew of ufonauts to come down and gyrate one way and then anotherwhile plunging toward the crowd and changing colours on the meantime.

It being that the lady who appeared to the three children had announced this big miracle months ahead of time, with the exact time and place, it was announced in the news media, with ridicule of course, As a result 70,000 gathered for the occasion and among them there were many atheistic scientists, who had come there with cameras and other devices in order to catch the Church in the act of rigging a miracle. But when the miracle did take place, they too thought it was the end of the world, and so like the rest of them they went down on their knees , trembling and begging God's mercy .

Regardless of the interpretation as to what it was that behaved somewhat like the sun, an open-minded person facing squarely this miracle, cannot help but accept at least the substance of the lady's message to the whole world through these three children . especially Lucia. Among other things , the message contained many prophecies, a number of which have already been fulfilled; and many others are being fulfilled before our very eyes. Briefly. she predicted that if people did not do penance . there would be another war . worse than World War 1. and that Lucia, who would still be alive then would know it's about to take place when she sees a strange light in the skies. (emphasis ours) that if this were not enough occasion for people to do penance and amend their ways , RUSSIA would spread it's errors all over the world. persecuting the faithful. causing riots, revolutions and famines; that after Russia will be converted and the whole world will have peace for sometime.

If one studies this message carefully and open- mindedly, I think he is bound to conclude;

1. That there is not going to be a third world war in the near future (just small wars, riots and revolutions.)

2. There wont be peace in the world until Russia is converted.
3. There will be peace in the whole world for a time.

The Rev Guy J. Cyr. S.M.
Sacred Heart Rectory.

We are indeed greatly indebted to the Rev. Cyr. for his permission to publish the contents of his letter to the Editor. and are very pleased to see the open minded approach he has to the possibilities of UFO being associated with the wonderful phenomenon.

Whilst as always allowing him to have his views of the results of the Vision we feel that we cannot entirely agree with him in his final findings in that there will NOT be another third world war . and as the others are due to this view he has, they too will have an effect according to this matter. of another world war .

The Editor is inclined to think the answer lies in the statement of Lucia he quotes ie. That if the people DO NOT REPENT. there WOULD BE another world war . in fact the message which continued clearly shows the actual state of affairstoday in regard to Russia spreading its errors all over the world persecuting the faithful. causing riots. revolutions and famines . International events over the last decade have amply proved the prophecies of this humble peasant girl. to be more than true. and can one honestly say that the world has really REPENTED. here and there have been small sections but as a world we are FARINDEED from the state of repentance. when man inhumanity to man is fully considered . starving millions. wars , riots. revolutions are a natural thing today and juvenile delinquency (or should we say parental) is rife . divorce. rape, robbery are all on the increase. as any statistics prove. These all point to the picture so aptly described by Lucia as an UNREPENATNT world. despite the great efforts of many religious bodies large and small to call the world to God and His ways.

Herein we feel we must face the facts. but the Editor feels that the point of the hour of repentance to save us from the third war is PAST and the point of no return has long ago been reached and we a re NOW ahead of us to face the results of NOT HEEDING the message she and others have given. and must soon have to face the Harvest of our ways. and that Lucia's message of what would take place if we went unheeding is at the very door. of our world's history. in fact we are Now at the Midnight hour. of the days prophecied by her . Only therefor in the outcome do we differ with this man of God. at the moment may be we are wrong . if so time will prove it and we shall be honour able enough to admit we were . WE HOPE FOR THE WORLD'S SAKE WE ARE .

One point however is the fact of her seeing a strange light in the skies as a sign that this was to take place. We have not heard if this has been so it could have been and not been revealed to the world as was her last message which was read by the Pope and his prelates last year. and still remains unrevealed. Is it because the contents were too startling to be made known?. Is it true as has been said. in close circles that the reason of the visit of Queen Elizabeth and. The Archbishop of England. and the Moderator of the Church of Scotland. and the Head of the Greek Church all within a year of this letter being opened , was that its contents had to be made known to them before it could be revealed to the world ingneraf, who would

most likely panic. even if it were fully made known.

It is very likely we will never fully know. but a wise man will surely conclude that no matter what either way . there is but one hope of getting through the events so revealed and that is to put ones life as much as possible in his power into a RIGHT STATE with the DIVINE and to make sure his own way is such as to help his fellow man and not cause others to be hurt by his actions .

Sacred writings are full of warnings for these days , yet are full of hope for those who heed the warnings and obey their better part. God has never failed to send his servants of all classes to warn in any great crisis of the world; the fault has always been man's unwillingness to heed His messengers. It all up to us if we bring retribution on our selves . and refuse to take the advice and warnings given us. We hope the above has proved of help and thats its expressed thoughts may help others to see what lies ahead and their duty to fit themselves for what is to come. .

THE MONSTER.

Another reader writes in reply to our request for comments of the articles in our last edition. re the Monster . in particular .
Dear Fred.

I agree with you and express my great appreciation of your magazines especially your new one PANORAMA. this indeed is full of subject matter meaty for discussion. The Monster I feel is a form of Beche -de-Mer, but mutated so much by radiation that it has grown to the huge size it was found in. the smaller ones could be its offspring a point which I am now going to dig into is the time factor of the great Atomic blasts at Christmas Island. and Monte Bello. (also referred to in your mag). these msysterious sea animals could have been thrust up from the depths in those mad scientific experiments. your article states they were there two years before they were brought before the notice of the public , how much before is not known . but my bet is that whether forced up from the depths by these blasts or not they will prove to be mutated forms of sea life. and NOT the normal size they would normally be known to man . hence the inability of the " wise boys " to identify them according to their text books which in any case will all be out of date soon .

Yours. A.S.

We had hardly finished this article in typing when the mail brought us a further letter from the Rev . Cyr. dealing with the Monster i we feel it is very informative and so publish it along with others.

Typing of the Rev. Cyr's letter on the M nster was completed , and the afternoon mail brings us a letter and paper clippings from Mrs Perkins of a strange 'jellyfish ' found at Fremantle W.A. This with Mrs Perkins comments is given following the article of the Rev. Cyr. in the pages following .

CATHOLIC PRIESTS VIEWS ON U.F.O. ETC.

Dear Editor,

You will find in the following paragraphs the mention of a few recent developments, discoveries and consequent suggestions. which, I humbly believe , will push forward the science of ufology .

As is well known by now, cryobiologists are able to take living red corpuscles at room temperature, plunge them into a medium at 345 degrees below zero Fahrenheit and then resuscitate them, provided they thaw them out as fast . They have run similarly successful experiments with spermatozoa and even fertilized rabbit-ova. They are progressively succeeding with more and more complicated organisms in lower and lower temperatures.

These truly scientific developments. plus the recent discovery of live monsters, which expert taxonomers cannot fit into the animal kingdom of this geological era, lead me to believe that God, through His laws of Nature, has deep frozen eons ago many and varied organisms, which, given the proper circumstances, thaw out and revive.

To corroborate this view, let me give a few recent examples: The Associated Press reported that at the beginning of March 1962, a 20 ft. monster , 7 ton , was washed up on one of the beaches of Tasmania. . The Australian Scientists were , and perhaps still are, baffled as to its origin, relationship and identity . I don't think I am guessing too wildly when I say that NORMALLY there should be others like that, at least in that area: brothers, sisters, cousins, in-laws and other relatives. Now , if there were or there are others in the expected numbers. it seems to me they would have been seen . Considering the huge size of this animal; the increasingly number of humans plowing on, under or above the oceanic surface, or living working and playing on or near the beaches, I feel that someone, somewhere, sometime or other would have come in contact with this beast's relatives through his eyes, or nose, camera, binoculars etc.

I submit that none as far as we know were contacted, because there weren't anymore. at least not many of them. How do I explain this solitary specimen?. He and many others like him , thousands, perhaps millions of years ago, suddenly deep-froze in a cake of ice because of some cataclysmic change like for instance a sudden change of direction of the earth's axis. This prehistoric animal supposedly remained there for ages entombed in ice which recently detached itself and floated away as an ice-berg. The 'accidentally' it drifted right over a sub-oceanic volcanic eruption, which had enough heat to thaw out almost instantaneously 'casket' and ' cadaver', melting away the one and resuscitating the other .

Another recent and fantastic riparian event in the same general area may help to explain this one or vice-versa. A few days before and up to Dec. 21st. 1961, along a 200 mile Australian Coast line, " millions of fish " of many kinds . some weighing up to 20 pounds. swam with their heads above the water and hurled themselves on the beach. The experts , one of them with 40 years experience in that field. said they had never seen anything like that and that they had no satisfactory explanations

I suggest that one or perhaps a school of these recently de-iced prince of the oceans, charged at them with a prehistoric weapon, say an electro-magnetic ray, against which modern fish have no defence, having survived in their evolutionary struggle against enemies with different weapons. Probably this 'beam' although not lethal in itself, disrupted the fishes' 'radar system' and caused them to panic.

Further support for my hypothesis that prehistoric animals, having been in suspended animation for ages, are now actively living again, will be found soon, I hope and pray, by polar explorers, who will apply the above mentioned principles of cryobiology when they thaw out frozen organisms. Every ufologist knows now that around 1954 scientists in Paris ate mammoth steak from an animal which had been encased in ice for thousands of years. Since the epidermis were tropical and since the fodder found in their mouths and stomachs was yet unaffected by the digestive enzymes, it is logically assumed that some very SUDDEN cataclysmic upheaval froze them there on the spot with lightning speed while entombing them in the frozen water. I suggest that this cold was so fast, so all embracing and so intense that it didn't remove life, but just arrested it; and that careful cryobiologists would have resuscitated them by applying very intense and all-covering heat such as would be found in a bath of water saturated with various dissolved minerals and boiling under fabulous pressure, such, as I presume, is found naturally between a tall column of ocean water and the gurgitating 'mouth' of a violently active suboceanic volcano.. The resultant turbulence, caused by the great disequilibrium of the various forces at work, would be just the thing required for the proper application and distribution of the heat.

Not only a quick freeze thaw, but also dehydration, implantation of certain chemicals will cause varying degrees of successful dormancy-resuscitation phenomenon.

Therefore, I expect some day, perhaps when the Egyptian Pyramids are dismantled prior to the planned flooding of the area, the scientists will resuscitate (which is not resurrect) prehistorically 'embalmed' or 'fossilised' human corpses, who will continue to live, and after learning one of our languages, will tell us about 'the good old days' and perhaps something out of this world'. God grant it.

Some of us believe that since monsters do not seem to fit into our animal kingdom, that they must have been brought here from other worlds by the ufonauts. I, for one, am changing somewhat my flexible views on that in favor of the above theory, which, I believe accounts for at least some of the monsters. Along that line, I expect that someone will run across the corpse of a huge and unidentified TERRESTRIAL animal floating in the ocean or washed up on a beach. Maybe the 7 ton beast mentioned above is one of them, for, Australian scientist, Bruce Mollison who couldn't identify it said it was "neither FISH nor fowl". (Emphasis mine).

Chances are he (the monster) is not an aquatic animal. The how did it get there?. He floated in an iceberg, I suppose; then thawed out. But he was too far from shore. So he drowned.

Yours Truly. Rev. Guy. J. Cyr. S.M.

We are indeed indebted to the Rev. Guy. J. Cyr for his very learned views and welcome them indeed for our discussion groups. The Editor would like to add that the letter was received before the Rev. F. Father . knew of the second and third smaller replicas of the large monster being found one nearby the large one on the Tasmanian coast. and the other in West Aust . strangely although the world papers covered the large one in huge headlines . no reference was made to the smaller ones. and thus many people like the priest did not know of such. we however covered the accounts of the two smaller ones in our last edition of PANORAMA and in the meantime before he received his copy his letter was sent . to the Editor. . We have received many views sent in . from various quarters. some taking the view of the above writer and others considering that the " thing" was a gross mutation caused by the radioactive waste cast into the sea. by various nations. and increasing as time goes by . Whatever the cause, this animal. certainly has the scientists guessing especially those who live in the rut of their textbooks. and find it hard to meet the unusual. and shy from making a comment which may endanger their position or pocket .

STRANGE JELLYFISH IN WEST AUST.

LATE PRESS NEWS.

" THE WEST AUSTRALIAN " . JUNE 6th 1962

(Courtesy of B. Perkins)

A strange jellyfish which whipped its three- cornered tail towards any object that touched its head , was caught by a Harbour Trust driver at Fremantle yesterday . He said he had never seen anything like it in his life before although he had been connected with the Harbour. for 17 years.

While doing maintenance work on the wharf he noticed the jellyfish swimming in about 3 fathoms of water. He said it was travelling about three times as fast than a normal jellyfish . He manoeuvred it to the surface with a piece of wood and caught it in a bucket .

The head of the jellyfish is about 3 in. wide and blue grey in colour. . It has a distinct cross marking on its head? (Emphasis ours) unlike the circles on a man-o-war or clear jellyfish found in those parts.

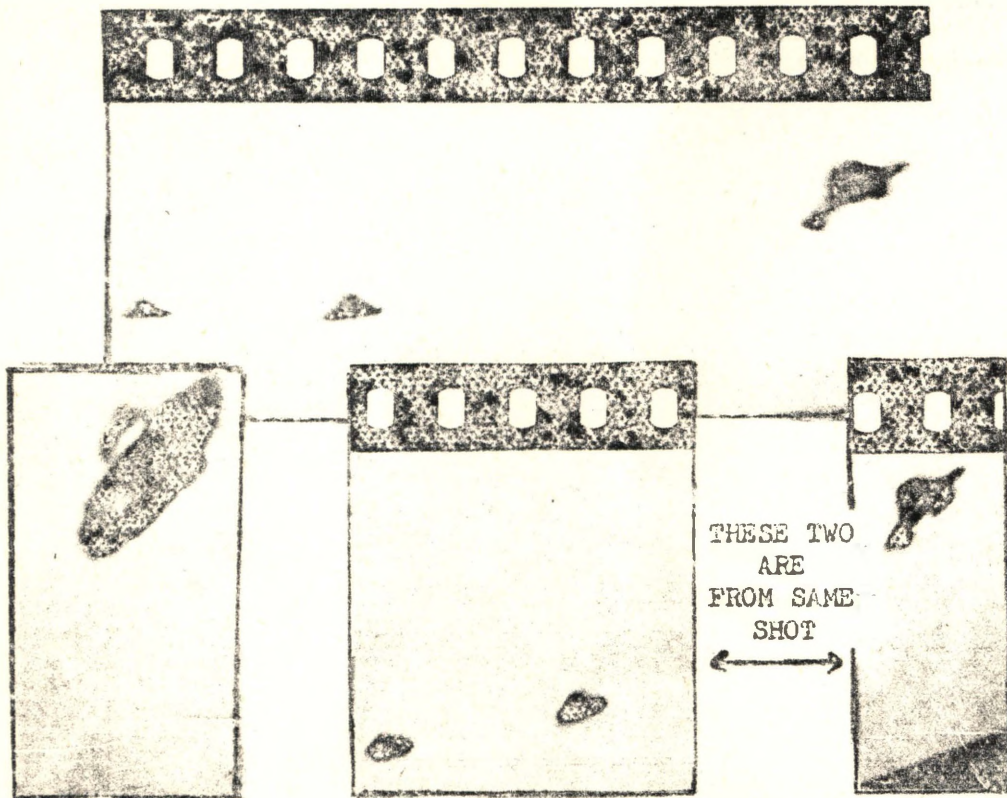

The three cornered tail is about 8 in. long and blue -grey in colour, turning to mottled brown at the end.

Later Press report. says.

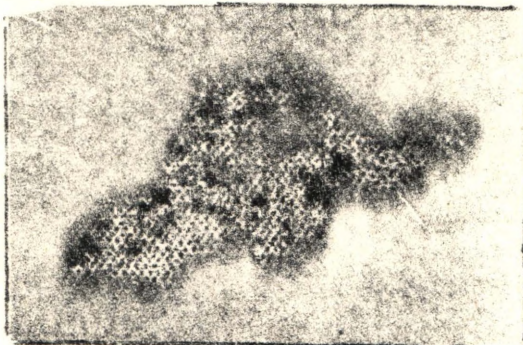

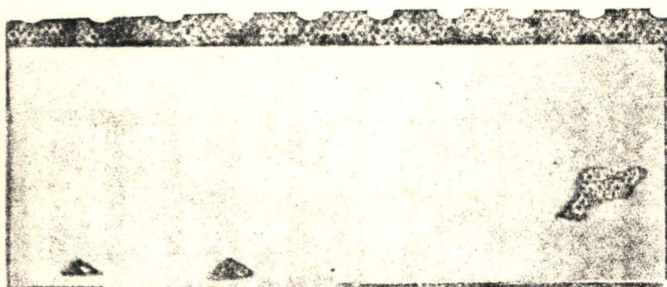

It is believed to have been driven South from tropical waters by storms. Curator at the W.A. Museum. Dr. Ray George. said he could not make a positive identification . but thought it was from the same family as the brown jellyfish found in the Swan River . It most likely lived mainly in tropical waters. and like birds. sea snakes. turtles etc had been brought down to our coasts from the North by storms.

It was indeed very opportune that we should get this news item just after typing out the comments of the Rev. Cyr. and certainly adds a portion of interest to his subject . . Mrs Perkins in her letter accompanying the cutting says...." In referring to the jellyfish I want to draw attention to the "cross" skull. report found on the Hoptoun monster found on our coasts just after the Tasmanian one. , and again the overall shape. of the jellyfish , which

" PANORAMA "

is circular and with tail like the Tasmanian Monster . Could it have been the 'spawn' of a new species of sea creature in the Harbour , or a ' baby monster ' " .

Note. Mrs Perkins in giving these comments has not read the Rev. Cyr's letter even yet. her newsitem coming only a few hours after the typing of his letter Now reread his letter in the light of her comments. .

.....

Readers may feel we have devoted too much space to this subject but if so we apologise only in that we desire to give all our readers the opportunity to view their ideas . etc. and in this way the approach to the new Age will be easier to see what may lie ahead in the many avenues which it will lead us. one thing is certain ALL LIFE is going to be affected from the tiniest form of amoeba to giant. creatures like the elephant . and they all have their connecting relationship to mankind in life on earth . hence nothing is too small to pass un-noticed in the way ahead . for they are all signs pointing to the New Age. Editor.

"STRANGE PHOTOS " CONTINUED. FROM PAGE THREE.

The gentleman says that many such unusual photographs also can be obtained by using a small spider web in front of the lense of the camera. The exact distance from the lens would have to be assessed by experiment and of course would be gauged by the size of each .

It has been found that snaps taken per this medium of filter have when taken of some ordinary scene etc. shown strange and remarkable other objects which were definitely not visible to the naked eye at the time of the snap.

It must be remembered that this is all at present in the stage of experiment and no set formula is set down, as much will have to be worked out according to the light and shadow of the actual snap. and much of the finer things properly assessed by professional photographers. (This has not been done to date.) In further discussion it was taken into consideration that the shape and texture of the web may have something to do with this. in that the web is shaped similar to that of radar and it could be that the web is picking up some vibrational "wave " which is not possible in the ordinary way and thus transmitting them to the photographic sensitive negative.

We would appreciate if any of our readers who may attempt such experiments. would let us have the results of same. for discussion and analysis.

The gentleman obtains his "webs" by going out early in the dewy morn, when such fine webs are covered and easily discernable. The web is then most carefully " collected" and placed in a box so that the actual threads are not damaged as much as possible. and keeping the strung out effect of the web as intact and as near to that when collected. This can be done only with delicate tweezers. and utmost care by the collector.

We hope to be able to publish some of the results of these experiments later but again bid our readers remember that all is in the stage of experiment and no definite claims are being made until such processes have been fully explored. Now then Readers how about you trying some with your snapshot cameras. ?. And let us have the results . We will welcome the Bravos and the boos. that you send.

FLYING SAUCERS OVER ITALY.

We are indebted to our co-worker Eugene Siragusa. of Catania. for sending us the paper articles and letter re these sightings. and for local Italians for translations.

APRIL 1962.

A 28 year old tailor from Florence. became the second in two days to report a sighting of a strange Flying machine. One report from Mario Zuccalla said he " saw men " but the other observer said to the police that he was driving along the road with his fiance on Wed. night, when he saw a strange flying machine. He stopped the car to watch , and saw another couple do the same. He added that it moved noiselessly . ' It came down again, almost grazing us. and turning its headlights on us. Then it landed on the road some distance away from us and drove towards Saronno. We saw that it has three smaller tail lights with a violet gleam " They decided not to talk about it for fear of ridicule. but after reading that Zuccalla reported a similar incident they gave the police the details.

F.S. OVER MILAN.

Translated from " Domenica del Corriere " Italy April 15. 1962

Gaspar de Lama . a young painter from Milan . said " his cherished dreams came true. which often happens under the most unusual circumstances, I have been interested in reports of ' flying saucers ' for about four years, but had given up hope of ever seeing one. then unexpectedly I saw t two. twice in succession . Perhaps thats strange to you"?.

He said, " He stopped his car at the bottom of a main road , about 500 metres from the San Siro Stadium . . He had been told of the strange sightings by a friend and so as a result he succeeded in contacting the person concerned. The reporter said the artist invited him to see the spot where the sighting took place . adding I would understand his explanation better .

The Artist said " On the 1st Dec. 1961, I came out here with my wife and mother to enjoy the sun. and with the purpose of of studying some modern paintings. The day was cold so I decided to take some photographs of the spot and work in my studio on them . "

" It was about the 14th Dec. when I was travelling slowly in a car, when my wife suddenly, who was looking east of San Siro noticed that a strange circular disc-shaped object was flying over the area. I turned round and was astounded to see a flying disc was oscillating directly over the Stadium . All three of us stared at the strange object which moved noiselessly through the sky, and we were speechless for several seconds. At first sight it appeared to have a diameter of 100 m. and was lead-coloured.. and observed that the surface was not self-luminous or did it reflect the sunlight . "

My mother shouted " Quick, take some photographs' . " "What are you waiting for?. " I was so stupified that I forgot the camera I had with me. but hurriedly took some shots without paying much attention to exposure etc.

TO get some better shots I jumped over into a field. The saucer moved in a rather strange fashion, sometimes it stood motionless for a few seconds, then shot off to a few 100 metres on. but at the same time it rose and fell regularly in the same way as a water-boatman- (pond insect). "

It was about 50 to 90 metres above the stadium . but this would have to be assessed by the size of the disc. which was difficult to estimate accurately. Asked if he could see any details he replied. " It wasn't easy. considering the staccato movements. and yet I did notice that at moments it seemed to be clearly outlined, but other moments it appeared semi-transparent. a cloudlike form . Yet I did see the general details . It was perfectly round , and it revealed a lens shape. . The top was surmounted by a cupola in the centre, the same colour as the super-structure. "

Was there a noise?. .."No.it was perfectly silent. This fact impressed me most of all, It gave me a feeling of a machine from another world .".

What was the duration of the observation ?. . " The total time was about two minutes. and it rose up and shot off like a rocket " ,

" We were not the only ones to see it. . Other people going along the road stopped also to watch it. had I been a reporter I would have asked for their names. "

The reporter was shown the photographs and the negatives. which he examined very closely , and stated that to him faking was out of the question and this opinion was corroborated by professional photographers a few days later . They all were of the opinion the photographs were entirely genuine and that there were one or two things about them that ruled out any faking .

"Look at these" said de Lama , " I took them from my terrace on Feb 12th. On this occasion I had gone up to take some shots for my work/ It was 4-30 p.m. when I happened to see a black point in the viewfinder. which I followed for a few seconds, and then fortunately for me , it assumed proportions and gave a performance which left me in no doubt that it was another flying disc. So I took a number of photographs. this was made easy by the steady movement of the disc . When I had regained my composure I succeeded in taking a whole reel of film . I was just in time, for it turned back and vanished in the direction it had come. "

How high was it?. . " I think it varied from between 200 to 300 m. The disc did not seem very large to me say about 7m. but the central cupola was very prominent and had the same leaden colour. and although I heard no sound the noise in the street below could have blotted it out."

Did it have much in common with the one at San Siro?. " I have not enough data to say defiantly. But it seemed. that this disc. was at moments surrounded by a halo of light mist which hid its contours. When I developed the prints, I realised that this impression was correct In some of them the halo around the disc is quite prominent .

You have no doubts about the Flying Saucers?.... " To have doubts today, after these discs have been seen for 15 years or more over the world's skies would be absurd, as it would be equally absurd to say they were all meteorites or weather balloons. I would really like to see a meteorite

or weather balloon behave like the ones my family saw, or the ones I photographed from my terrace. "

" We have a lot of evidence which proves these objects are real machines and not the result of mass-halucinations. Not to mention the authority of all the types of people from the pilots to astronauts; scientists to radar operators who have described their behaviour in this way . "

To insist that the discs do not exist would be entirely ignorant of the present world affairs".

Could they not be constructed by man ? " " by Man, but not terrestrial Man. To date , our science has not been able to build such machines; nor is it possible to believe that these discs are the secret weapons of some political power. If some nation possessed them. then space research experiments now in use would be out of date and meaningless. because the enormous amount of money spent on such research would be entirely wasted. and such discs would permit the astronauts to fly at speeds around 30,000 k.p.h. as several radar observers have confirmed , to remain stationary in flight and to move silently. such capabilities are not in reach of present space research power. One might think they were secret weapons, but in the case as this the hypothesis is invalid. They have been seen now for 15 years, and no secret weapon of any country has ever remained such a mystery .

Judging then by standards of today, one must say that nations boast about their secret weapons before having constructed and tested them . There remains only one conclusion- the discs come from other planets. Basically, this should not be difficult to admit, especially since our scientists recognise that life abounds in the universe around us, and common sense does not recoil at thought that other beings , more evolved than us. can exist on other planets. and are therefore in a position to construct space ships for interplanetary flight . " Bruno Ghibaudi.

U.F.O. OVER ARGENTINA.

Buenos Aires Mon.4th June 1962.

"West Australian" June 5th .

A group of Unidentified Flying Objects, either cigar shaped, or saucer shaped have been reported over Argentina in the early morning.

They were sighted almost simultaneously from places more than 1,000 miles apart .

QUEENSLAND SIGHTINGS

ADVERTISER 19/6/62. MORE FLYING OBJECTS REPORTED.

Brisbane. June 18. Two U.F.O. were sighted over Sth. -E. Queens. tonight one over a Brisbane suburb and the other sighted over the North Coast hinterland. The sightings brought the number of reports of such to seven since Friday . Noel Martin 19. said " We first noticed a green glow on the ground about 30 ft . wide. We looked up and saw a green ball with a big red tail travelling from the N-W to S-e. We watched it for about 15 secs. until it disappeared

behind a hill.. It seemed to be coming down to earth."

Mr H.R. Morrison, farmer, said that about 6.31 p.m. he saw a " greenish flash or streak of fire" falling from the west-north west as he drove down a mountain. " It appeared to break into three pieces, trailing a definite greenish light. "

This is the report todate 20/6/62 and no official statement has been made the Editor has written away for further details from local people and as soon as these come to hand they will be given either in this or the next edition of " PANORAMA ". So far most think it to be a satellite breaking up.

BALL OF FIRE SIGHTED.

NEWS. 20/6/62.

PORT AUGUSTA STH. AUST .

Today. Mr Kevin Ash. of Stirling North, the guard on a Commonwealth Railways Mixed train travelling from Marree to Port Augusta, said today that at about 1.35 a.m. on Monday he saw a green light or object in the eastern sky.

Mr Ash said that at the time the train was passing through Farina. The object looked like a large green ball of fire. and clearly illuminated the whole sky.

It appeared to come down to earth , but as there are hills in the vicinity Mr Ash believes it is quite possible that the object disappeared behind these . Reports from astern States indicate that a similar object was seen by a number of people about the same time.

.....
The distance between these sightings would be approx 1000 miles. Editor.
.....

Miss AdeloWare of North Carolina writes.

" Re The Remarkable Dream 2 which you wrote Vol. 8. No.1. of the A.S.R. I think it is very strong evidence that you are getting the highest guidance" as this very message of the coming results was also published in a much later booklet named Universarium .

"At the end of the article you ask.' Waht was th strange planet that seemed to be approaching the earth ?.' " It looked like a planet, but it is the old Comet Ragnorak. This Ragnorak is the comet through whose tail the earth passed at the time of the Exodus of the Children of Israel from Egypt .

It seems that the outer edge of this comet's tail consists of fine, ferruginous (iron dust) soluble pigment which colours the water as red as blood. The various phenomenon described in Exodus , beginning with the Chapt. 7. 21-24 and continueing for 8 to ten chapters and is described again in Revelations. Ex. 7: 20. " All the waters were turned to blood " Rev. 8:8 " and the third part of the sea became blood" References to Hail. Ex. 9:18 , Rev. 11:19 and also 16: 21.. Earthquakes. Ex. 12: 29. Rev . 16: 18. We are going through the tail of this comet. It is this comet which Arthur Conan Doyle's Prophecy perceived as a force which would come against the axis of the earth and push it over . and which Mr Fred Jones saw in his dream . "and called it a planet. The Editor would add that repeatedly he has had the message given that the present times are to be likened to the Exodus of Israel. in fulfillment again. The above seems to confirm this. Also reports have come from the USA of the largest shower of meteors known for some time.

.....
The object looked like a large green ball of fire. and clearly illuminated the whole sky.

It appeared to come down to earth , but as there are hills in the vicinity

ASTRONOMICAL DELAY? CERTAINLY NOT.

BY. MRS. B. PERKINS
WEST AUSTR.

We welcome again comments from the Editors very able ally in the West and thank her for her great encouragement . all along the way .

Many people felt dismayed that no "mighty" phenomenon occurred on Feb. 5th 1962. to shock the world into belief of forecasts and pre-statements. but if we consider that it takes 250 years for light to reach us from a near star outside our solar system. although it travels at 186,000 miles per second. we must not expect a planetary conjunction to have 'immediate' effect .

Let us search the 'text book of the ages ' and see what it reveals to us, for Jesus said " Search the scriptures " .

In Mathew. 24. we read that " unless those days be shortened, there shall be no flesh saved " .

Let us now look at the last term of the conjunction . in the heavens.

We find that before the ' flood ' of Noah, there was a similar 'gathering ' the estimated, to be about 2,345 B.C.

Again let us note that 4 years later came the Great Deluge. 2341 B.C.

and observe that over a period of years certain hours of time are 'lost' so that at this conjunction stage we could have 3 years instead of 4. elapse, before we experience another effect of such a conjunction , as which before brought about the Deluge . Hence it is necessary that the days MUST be "shortened for the elects sake. "

A time of "great events" to come again into ~~it~~ ition .

Mrs Perkins adds these encouraging words. re PANORAMA .

Your "PANORAMA" work is very interesting and helpful, for we who are genuine seekers after information. I and many others here wish you to hold on and continue your great work, The encouragement you get from all directions is proof you are on the right path and your work is a beacon on the hill top. for other wayfarers. B.PERKINS.

Thank you Good Friend. such comment indeed give new life especially when criticism comes from those once thought sincere friends.

ANOTHER READER SAYS.

Dont fail to keep sending the mags. I find them most interesting they give my wife and I a great deal of pleasure to read. Keep up the good work .

UNEXPLAINABLE BRIGHT ORANGE FLASH.

CANBERRA. (The News" 21/6/62.)

The cause of the bright orange flash which lit Canberra sky last night is still a mystery . Hundreds reported the flash about 6.15 in the north-east, believing it to be an Island high altitude nuclear test. However this did not begin til 6.45 and the faulty rocket was destroyed.
