## EDITORIAL.

.....

Due to the lengthy comments made by the editor on the article of C.A. Honey, George Adamski's spokesman, entitled Astral and Psychic Fraud in the U.F.O. Field Revealed. (part I) as published in a NZ. Magazine. and which we were requested to give comments upon. The Editor has considered it unnecessary for the usual Editorial and thus allow space for material of value to the readers. He would however bid his readers remember they are his opinions based on many years of research work in the religious, psychic, and of the last decade in the UFO field.

It is not his desire to be dogmatic, and certainly does not expect that all his readers may agree with him. His main desire is to see that the two sides of the position are placed before you so that a more correct evaluation of the subject will be reached.

He has no enmity toward Mr Honey and especially none to George Adamski. but on the other hand refuses to concede that either of them are the final voice in these matters. Their opinion is respected and considered in the light that they are just human folk the same as us all. and therefore not to be considered as the final judge as to what is right and wrong.

If what he says offends. it is not meant to. and all he asks is that you concede him his birthright to have his own opinion as he also concedes you that right even if no agreement is reached.

.....

IT IS A GREAT THING TO GAIN PEOPLES  
ADMIRATION.  
BUT IT IS A GREATER THING  
TO WIN THEIR LOVE.

GRACIAN .

## George Adamskis Honey Is Not So Sweet.

Several of our readers have received the latest issue of the N.Z. Scientific Space Research magazine edited by Henk and Bredna Hinfelaar. in which George adamskis appointed mouth peice C.A. Honey has now revealed some secret information hitherto held from the public by G.A. We feel it is very informative in general. and as our readers have asked for my personal commenst on same I have taken the liberty to reprint it from this journal in its entirety, as to abridge it would not be fair to Honey or to my readers in my comments of the same. We still cannot understand why G.A. has to have such a mouthpiece there are several reasons which come to our mind. however taking the general view of George and his attitude for some time past . and also the tenor of the statements made below . it is not difficult to understand. it is simple one word alone explains it EGO.

I strongly advise my readers to ponder over these statements made by Honey on behalf of his "boss" ??? and especially urge them to give earnest consideration to my evaluation . not only of the statements but their own and others attitude to George's dogmatic attitude. to this subject and others.

.....  
ASTRAL AND PSYCHIC FRAUD IN THE UFO FIELD REVEALED ( PART I )  
By/ C.A. Honey

The following article is interperlated with comments by the Editor. as requested by some of his readers. in brackets.

r H. The time has now arrived to reveal some of the information kept secret from the public by Mr Adamski and myself . Unitl now I felt it was premature to release this information . Several things have occurred that caused me to change my mind . The book by Bender " telling all" was one reason . Another was people coming to me for help who were involved in similar circumstances as Bender tells about in his book .

Ed ( Now this first para. If Honey and Note that he uses I more often than what G.A. told him to say . had known all this was so vital and by his own admission in what follows knew that all this was effecting the lives of sincere people. Why didn't he come out with it sooner and thus saved the lives or mind of these poor folk he is so concerned about now. instead of waiting until they fell " victims " as he says to all this. Is this not a case of curing the disease after it has attacked the victim when all the time the knowledge of how to avoid the disease was in the hands of the doctor and could have been admitted before and saved the suffering .

Surely behind all this so called concern for the victims must lie some deeper reason why Honey has taken the initiative to give away the hitherto hidden and secret formula he claims to have. )

MrH Some people coming to me for helpwere being dragged into a nightmare of phsy chic and astral phenomena that, if allowed to continue, would have led to their complete mental breakdown . People all over the world are undergoing similar experiences , and it is time to clarify once and for all why exactly such experiences are occuring and why these things will probably increase in frequency and occurrence as months go by .

( Ed. I do not deny that such has occurred, in fact Mr Honey is not the only one who has been concerned about the trend of affairs and has been asked to help folk who have been entangled in these matters. My attitude however is different from his " sweet " concern . Inlectures , and writings. and personal contact I have been telling folk this for years what he now reveals as secret withheld information. My book written in 1954 contains a great deal of cases similar to which he quotes. this was read by Adamski in 1955 when he wanted to publish it if I let him have full control of it. He wanted me to leave the psychic stuff out of it. NOW his stooge wants to pose as the benefactor of the UFO field and Save the lost . Pity he took so long )

MrH Mr Adamski has stated very plainly in both his wrtings and lectures that the space people he contacted do not engage in astral or psychic ( mental ) contacts. From psychic publications we read that the leaders of the pu. cults are saying that Mr Adamski actually made his trips astrally but was unaware of it and thought is was physical. This is pure bunk.

Ed ( Now Mr Honey even if his journeys were of a physical or psychic nature not even you and the cults can prove beyond doubt either assertion. Time alone proves such, its a case if whether one belives G.A. or not. No one can prove it. except facts which appear as time progresses to prove he is either telling the truth or fahreacating a hoax. )

MrH Why is it that the space people do not engage in psychic or mental contacts? Impressions recived telepathically are not mental contacts.

Ed ( Now let us examine this profound utterance. firstly who said they did not. G.A. says above those he contacted, but what about others have contacted. herein lies the whole nigger in the wood pile. it is this audacious assumpt of G.A. and his stooge. that He alone has the full know how and all of what the space people do and how they do it that shows just what is really behi all this . I leave it to the last comment to extend on this. Now for the rather strange remark. that Telepathic receptions are not mental. then just what are they Mr. Honey? navel experiences? chest. or some other vital part of the body? If telepathy is not an experience in the mind ( mental ) do please explain to a poor individual like me and stop your double talk.

It is true there is a vital difference between telepathic communication received in the mind and that of a medium under control , but really after all the word psychic is the mind. or soulas some call it. so that for a self styled teacher of mankind. to cause confusion by referring to the psyche of man and say it is not mental is very lacking of true definition The main coniusion is caused by not giving a clear explanation of the difference between the telepathic experinces and those of the spirit controlled trance medium. each of which are functioned in the mental faculties of a person. but equally different from the other . In Vol 7 No 4 of the ASUTRALIAN SAUCER RECORD we covered this ina two page article )

MrH The answer. is very simple - because the human mind colours and distorts the information coming to it according to the preconcieved ideas and beliefs of the individual . This is one of the resons why some of the so called messages printed as coming from the space people are nothing but a bunch of childish nonsense. Space people do not use trance mediums.

Ed ( I have no axe to grind for trance mediums. but I would not dare to say how or whom God will use per his messengers. I do not practice trance mediumship myself nor do I encourage it. But I asert that we cannot limit God. for His ways are past fidning out. better to judge the tree by the fruit it produces than to condemn a whole lot of poeple because soem have erred by the way . )

MrH Mr Adamski has said that many times he would get strong impressions to go to the desert , or some other location , each time feeling sure it was an impression from the space people. Many times when he arrived nothing happened. It was trick of his own wishful thinking, but it was very real to him. Even those of the space people who are advanced far enough to use telepathy regularly seek confirmation to verify that the impressions are correct . The many UFO publications containing ream sof writing supposedly dictated by a being from a higher plane or world are promoting error. Sapve people are not involved . Most of material comes from the medium's own en'conscious in contactwith such ideas and thoughts generated by the confused minds of the earth .

This is not saying that all the psychic and astral phenoemna is a fraud. Much is real enough, but it is usually interpreted wrongly . Many astral and psychic experiences occur just as described by many of the contactees, with one important difference - the space people are not involved . But a diabolical group is involved in most of the contacts and use the susceptibility or gullibility of the individual against him .

Mr Adamski has warned many times that people should beware of those who claim to be space people and were actually impersonators attempting to decieve individuals for various reasons. One woamn was so deceived by these false impressions that she thought space people had instructed her to fast for many days . She died as a result of it in an eastern hospital. People would have to be absolutely blinded to believe that space people would advocate such a thing. Too many people are being harmed for me to sit idle any longer. I'm decalring war on the sincere but fooled people who are no doubt really believing they are contactees with space people. I think most are not aware they are fooling the people . Here is what is going on.

Ed ( Look out folks Honey has declared WAR. not so honey tongued after all eh?)

MrH Recently a man here in California was approached by three men in black suits who informed him very confidentially that they were sent from Mars to protect him from a wicked Martian space man by the name of Monka. ---Sounds familiar this name is used a lot in the psychic camp-- Monka so they said , was trying to kill him and they were interpalnetary policemen sent to stop him . One of the things he noticed about the man in black who appeared to be the leader was that his eyes had such a strange look . They seemed to emit almost rays of light, and he felt they were looking right through him . They were accomplished hypnotists and completely dominated him until he was helpless to oppose their will . As seon as he was completely dominated mentally through hypnosis they changed their stories and terrified him with threats against both himself and his w fe. They said if he didn't do exactly as he was told they would take he and his wife to a lower planet , and maroon them without any opportunity of return . In his confused mental state he believed that they were what they claimed to ebe and was completely terrified . When he came home and found his wife had been taken away by one of these men he was shaken loose mentally to a point where he came to me for help. He finally realised that the space people were not involved in his troubles. A motive has to exist for all these experiences , and in this case it was money . My friend had two patents covering epectro- static devices that the emen tried to swindle away . Counter forces were brought to bear against the " three men

and the swindle stopped dead in its tracks . It was this incident that started me thinking that the time was about right to openly attack these individuals who are tools of the " Silence Group".

Ed ( Well Bravo Henry . but you did not state where this man gained his belief from of such a possibility of a visit. You have not mentioned any group to which he belonged. and who brought him to such a state of gullibility. I have a similar case on my own files. but in this case the man began to believe that men from space are on earth and contacting humans. and that someday he could possibly meet them. not by belonging to a psychic group BUT BY READING GEORGE ADAMSKI'S BOOKS. His whole belief stemmed from the experiences of George and his claims made in his books regarding space men being now on earth. He too was a wishful thinker . unfortunately for him . he spent a few months in a mental institution. and strangely enough it was a small psychic group that gave him the most aid when he got out. and put him on his feet . )

MrH Other motives beside money exist . When a person evolves to a point where he is becoming a threat to the continued existence of these fraudulent groups he is worked upon in several ways . Also if someone is getting too close to the truth about saucers or is beginning to convince too many people of their existence and why they are here, the " Silence Group" will attempt to silence him to stop operations . The phenomenon mentioned by Bender is typical of the tactics involved.

Ed. ( I heartedly endorse all this. except to say that in Benders case his previous life and interests in the macabre left him an open go for such experiments and can hardly be used as a standard case for there have been many who have "been got at" who have never indulged in any such black magic practices. in fact are the reverse. Let us not use Bender as an example/ actually much of his experiences were self induced. and left the way open for worse to follow. The Group in Seattle . where I got started into UFO investigation, had some experiences along this line. One friend of mine came home from work late in the evening and very tired. AS he entered his living room he felt a " cold terror" such as he had never felt before. He couldn't shake the feeling so he went outside to walk around. When he entered the room again he felt someone lay a hand on his shoulder. No one was in the room . He sat down in an easy chair and suddenly he saw a human figure start to appear in the middle of the room . Then the image faded out and disappeared.

Ed ( Well many can testify to such experiences Read "FATE" magazine. but not all of these were ever associated with UFO or knew too much etc. )

MrH Others have had different experiences . In some cases someone would sit down beside them on the bed, and although the bed was depressed , no one was there Others see footprints depressing a rug as if someone was walking over it . yet the eyes see no one. Others feel the presence of someone in the room . hear them breathing. or smell very bad odours in connection with such invisible visitations .

Ed ( My personal files contain not a few of such cases. some very well known UFO identities , others just ordinary folk. another an engineer. another a highly skilled medical surgeon . these cases I wrote into one chapter of my book mentioned above. and are those which Adamski asked to leave out. WHY. ??? People who have read my manuscript over the past 8 years can testify that they are mentioned in this book . as is also the remedy which I gave for such experiences. For I was one of them . among others. some took my advice and used the power I advised to overcome these dark and demonic forces , those who did

are still with us in the field of UFO. investigation . those who didnt sad to say are among the pages of books and magazines of past workers.)

MrH In Bender's case he saw manifestationsof various kinds , and had apparent contact in the physical with impostors claiming to be space people. Nothing new happened that has not occurred many times to many others . Some people less fortunate than Bender have been driven to suicide hearing voices and seeing no one. Others went off the deep end and landed in mental institutions or were driven to the verge of insanity . Many people hearing voices are victims of these people and not off balance at all. In one case a lady kept hearing voices telling her to burn Mr Adamskis books and my Newsletters. She did so. then when the voices continued she sought my help. When I explained partially what was happening and how to fight it, she improved immediately and is getting along sucessfully at the present time. ( Bravo Honey )

The opposition is very strong against Mr Adamski's books and writings influencing the beliefs of people . They are putting up an all our battle for the control of the minds of the masses , all in a mighty effort to keep them from finding out the thruth. Only by keeping people in ignorance as to their true nature can they control them .

Ed ( And you have aided them by your own withhilding of the truth Mr H<sup>o</sup>ney on your own admission. )

MRH They have been behind many false contacts and many books in efforts to keep the confusion going . People who devoutly belive in the supernatural and spirits , and think that psychic phenomena is evidence of this , are ready victims since any manifestation supposedly proves their ideas.

The supernatural , as belived by most people , doesn't really exist.

Ed. ( I have been telling folk this Mr Honey for years. your statement is nothing new. My get phrase has been THE SUPERNATURAL IS ONLY A LAW OF GOD IN OPERATIC<sup>o</sup>NALLY FUNCTIONING. THAT WE HAVE AS YET NOT UNDERSTOOD. )

The term ESP is a misnomer since what occurs is not outside the range of the sensory system of human beings. Its nature is simply misunderstood. I am not trying to tear down beliefs in t is subject for fun of it. If you learn the facts. then t e knowledge acquired will enable you to fight back succesfully if similar circumstances come your way . Once the answer is known we have no reason for fear .

If a person hears voices . sees apparitions . smells bad odours, feel bodily sensations . wrestle invisble entities etc. and are not mentally unbalanced what is the answer? Is it delusions or fact?. Is it real or unreal ?

What causes it. . I will answer these questions next month in a follow up article . ( We await that with more than deep interest Mr Honey )

ED. Now to sum up my comments. Firslt let it be clearly understood. I AM NOT ANTI GEORGE ADAMSKI. IS STILL ACCEPT HIS DESERT EXPERIENCE AS VERY REAL. His flights into space and contacts etc which followed in the main I accept. but I cannot ~~divorce~~ the fact from the truth that his books all have been ghost written and his last in particular. and I feel that quite ofetn many things have been coloured by his Ghost writers. to make it a good book .

I contend most strongly that the fault lies with George in that he has set himself up as an infallable teacher knowing only too well that many hang on his words and the fact that he says so is gospel to them . when one analyses hisstatements nd claims there is always the trend to assert that only he is right. I AM THE MAN WHO HAS BEEN CONTACTED BY SPACE PEOPLE . I MUST BE RIGHT Hence comes the insinuation that no one else is right. The Great George

ADAMSKI has spoken, and because he says the space people who contact him say this or that, the other fellow MUST be wrong. such an attitude is pure egotistic arrogance, and certainly lacks greatly the humble dememeanour of the Master Jesus, who he says is the Ruling factor behind the space people. The danger is that so many have now placed G.A. on such a high pedestal that they can see no wrong, forgetting he is "just and ordinary man" with like passions and weaknesses they same as you and I, and therefore prone to make mistakes and human ambitions and ego too.

Actually much of late that has been said and taken as from George when correctly evaluated is from Honey this whole letter for instance is not Georges although he quotes George, but the ideas are totally Honey's, and this is where many folk I have found are getting involved in that so much the read from Honey is taken as from George. If so George should put his signature to it to endorse it and thus at least let the folk know he is behind all that Honey says. As to these attacks of the psychic field (mental not trance) I would bid Mr Honey to reread the good old book which is full of such psychic experiences of men who visited earth, prophets, seers, and martyrs, all had many such experiences, even in our later times in St Joan, and Lucia of Fatima but that did not make them an infallible guide and to be almost worshipped neither did these servants claim to be the only men who had been so visited or given a message for the world. A close study of the Bible and the great lives of the last two thousand years will prove Mr Honey well off the beam in being able to define psychic experiences, as all trance medium stuff. Further his outcries against the "Silence Group" is nothing new or his knowledge of it. It was well known to me over thirty years ago, evidently George and he have only begin to taste its power. It will be most interesting to hear your remedy for all this in the next epistle of the George Adamski, Honey divine utterances, meanwhile we keep our fingers crossed, and hope that either George will come out of his holy place and give an outright answer to these comments or as of usual of late pass the buck onto Honey for some more sweet talk, for the poor deluded souls who they have left so late to warn, when they had it in their hands this knowledge for so long. . . . . EDITOR.

.....

The pages of this magazine are devoted to any who desire to comment on the above, and we will print any answer from G.A. of Honey, or any other person even if it condemns us and "sends us up", we can take it. For one thing is sure we do not claim to be more than human, we are not infallible, if we make mistakes or misjudge we have the decency to admit it and not cover up, if we have been proved wrong, we cannot believe that any man on earth has all the answers or that God would place into any one person the authority and knowledge to dispense it out, to mankind. The messengers of God from space and on earth are legion.

.....

A STAR THAT WASN'T.

I SAW IT HE SAYS. THE OBSERVER.

Narranderra "Daily Advertiser" Credit Mr H.R.W. McClure.

A Wagga man saw a star that wasn't a star on Sunday Night.

This man who would not give his name, rang us up yesterday to say he saw a moving light at Forrest Hill about 9.15 p.m. on Sunday.

The light was orange and about 3 times as large as a star. The man said

first saw the light over the aerodrome of Forrest Hill R.A.A.F. Base it was flickering .  
 It moved slowly and when it reached a point above the gates of the base , it stopped.  
 As the light stopped , it threw a ghostly beam back to the spot where the man first sighted it.  
 Suddenly the light rose and kept rising. then it changed its course again. The man last saw its ~~lowly drifting towards Oura~~ where it disappeared. The light was in sight for 10 minutes.

### HUMAN RADIATIONS.

Because we feel that the following article reprinted from that excellent magazine " PENDULUM " and published by Markham House Press Ltd. 31 Kings Row London S.W. 3. Price 2/6 or 40 cents post free. will have much to help us explain how often a human life can be affected by the radiations, and the great power these radiations from the human body can play when the knowledge how to affect them or the body they belong to by even another person who has in his possession a portion of the human body containing these radiations , and the likelihood that many secret groups use such a means to bring ill or otherwise to the person by exerting certain powers. on these particles which emanate these powerful radiations. we print this for your consideration .  
 Space will not permit us to print the whole of the article in this issue. and we therefor intend to print in two sections this intriguing thesis on this subject. The Copy this is taken from is Vol.13 No I Dec. 1962.  
 To all students who are interested in Psionics etc. Radiesthesia etc we strongly recommend this most excellent magazine devoted to such subjects.

.....

Human Radiations  
 By. Dr. Leonello Boni, 1953

I should like to here give a short synthesis of the rather unknown but exceptional and important results of the research, studies and experience through many years of the engineer Cesare Bardeloni, General of the Italian Army's E Engineering Corps. The object of this research was the general radiation from minerals, plants and , especially, the electromagnetic radiation from animals and human beings.

When Mr Bardeloni made his studies of electromagnetic waves, the idea came to him that there must exist a universal radiation , i.e. that all minerals, plants and animals - from the simplest to the most complicated - have a radiation of their own .

This consequently also goes for man, who, at the pinnacle of evolution of nature's kingdom , is the most perfect and complicated vibrator in continuous activity , sending and receiving to and from the cosmos.

There do not exist two human beings who are physically and psychologically equal . Each and everyone is a being of his own , a little world individualized and differentiated. Thus every man must have his own specific and absolutely personal radiation, which characterizes his "ego " .

## Human Radiation Cont (2)

This theory is not new. Scientists and experimenters have contributed new elements in support of this inciting hypothesis. However, physiology, biophysics and experimental psychology have only given a vague and superficial knowledge of the inner being of the marvellous and complicated phenomenon which ~~the~~ man is. In fact only the physique of man has been studied, while the psyche and above all - the spirit of man has not been yet researched. The discovery of human radiation opens a promising road for this research.

This discovery immediately raises a question: What correlation is there between man's radiation and his physical and spiritual reactions? - And between the waves radiated by man and his personality? Here, briefly, are the surprising results achieved by Bardeloni.:

He measured the emanations of waves from ink. After having made experiments with this liquid in containers, he repeated the tests with it on paper. First he spread ink in stains on a piece of paper and then he put it in handwriting. And then - in the latter case - the instrument showed also a second, and different, vibration dominating in intensity and with wave length distinctly its own. Here a flash of intuition led him into further research and experimentation, which proved to him that: "...man's handwriting makes it possible to distinguish one individual from another by means of a personal wave, which can be measured in each individual case."

By another method than that of graphology, Bardeloni thus confirmed that handwriting <sup>is</sup> actually characteristic of the personality of the writer. However, according to Bardeloni's experiments, the handwriting should not be looked upon as a graphic sign and examined graphologically, but used only as a means of collecting and registering electromagnetic vibration radiating from a person's handwriting, which thus can be measured without looking at the written matter, and even when that is sealed in an envelope.

The act of writing is simply the work of an individual energy center which - by movements of the hand - guides the thoughtwave and carries it out graphically into phonetically undressed words, i.e. written words.

While we are writing, there emanates from our brain and from our "ego" so much energy and so much of ourselves, that it penetrates and stays indissolubly bound to our handwriting, just as a thing, which you like very much and always carry with you, absorbs "something" of your personality, which can be registered by sensitive persons.

If one considers the question a little more closely, one easily perceives, the movement of the hand and the language are of the same origin. Broca's, Wernicke's and Deyerin's centres, which are found in the zone of the brain at the right temple if the person is left handed, and at the left temple if the person is normal, are centres respectively for the images originating verbal movements, phonetic images, visual images: by co-ordinating these centres we dress our ideas in verbal symbols by means of the spoken words, or in graphic symbols by means of writing.

We can thus presume that the thought-waves enter into writing and remain bound to it as an integral part of it not only by direct emanations from the brain. As the hand through its five fingertips transmits "something" via internal

" Human Radiation " Cont 3.

nerve- connections to the brain and creates language in the nerve centres , so a thought energy can reciprocally be transmitted from the brain to the hand and transformed into writing. A piece of writing , which in its turn becomes the permanent seat of this specific energy .

These studies and researches which I have had the fortune to follow in 1926 and during several succeeding years, have later been confirmed by results obtained by other experimenters. Among these is Prof. Cazzamalli of Rome University, who- by a comprehensive complex of systematical research- has shown that the tele-psychical phenoemna connected with the physical- organic reflexes , have their main seat in the brain, which is a real generator of influxes . These influxes, or electric impulses , originate in the cortex, especially in the psycho- sensorial centres, and they spread themselves along the ganglia sympatica, on which the wavelength depends, and thus originate electro- magnetic radiation phenomena.

Like the nerve - bundles just mentioned , the optical way leading from the bottom of the eye to the occipital lobe cortex, the line that connects the solar plexus - brain and many other nerve-bundles of the human body , which go out from the brain , form a vast net of interbrain conductors of nerve energy, originating impulses ( transmitter) or detecting vibrations ( receiver). This net can be brought into vibrations when stimulated by impulses from the brain or in resonance to some of the countless vibrations of the cosmos.

In both cases phenoemna are originated which are more or less detectable according to the functional intensity of the psychical - and brain phenoemna. As a matter of fact the electric study of the brain function is a part of the most modern brain pathology.

In 1953 a paper on this subject was read at a medical congress in Chicago by the Spanish scientist Jose Delago . He has introduced very thin electrodes ( 1/1mm diameter ) into the cortex of a monkey , having first perforated the skull of the animal under an anaesthetic.

After having made convenient external connections between the electrodes in a little box fixed to the neck of the monkey, he has not only been able to register an electric activity in the brain, but also to change the behaviour of the monkey substantially through sending a very slight electrical current into the cortex by means of the electrodes. Thus he has made the monkey yawn, snatch non-existent insects, scratch itself, become hungry, change mood from fierce to tame, mild affectionate and vice versa. In this way he has localised the various centres originating such stimulations.

Already in 1870 and 1871, Fritsch and Hitsig had superficially used an electric current for a study of the brain's physiology, thereby confirming the hypothesis of Jackson( English) and Broca( French ) on such localizations of those mentioned above. Jackson actually found that the part of the brain hemisphere behind Rolando's fissure has a sensibility function, and the one in front of the fissure has a motor function, i.e. directs the muscular movements.

It is thus ascertained that our brain is divided into areas or zones of specific functions , and that it directs the movements of hundreds of muscles of our organism . Some of the mentioned zones have already been localized. Some of them transmit motor stimulations to the muscles and others receive the sensations

## " Human Radiation" Cont. 4

collected by the sensorial organs.

(1) The areas of so called sensorial projections are more extensive if the periferic regions, from which they depend, are more important in life of the subject. The importance of such areas devolves upon the fact that they provide interpretation of nerve impulses originated in a periferic sensorial organ.

(2) Besides the areas of sensorial projections, association areas have been found, where the sensations are interpreted and, thereafter, co-ordinated with transmitted motor impulses. More particularly the sensations are identified, recognised, registered and classified so they can be of use to our consciousness of the external world and to our behaviour.

Some persons for instance, whose optical association area does not function even though their entire optical sensorial organ is perfect, can as a matter of fact suffer from mental blindness. They are thus not able to identify or interpret received sensations which for them are new, unknown.

This corresponds to a case where some disease attacks the optical projection area and causes central blindness although the eye and the optical nerve are intact.

(3) There are other areas in the cortex, which do not react at all to electric stimulations; they constitute the so called silent area of the brain.

Summing up- electrical experiments have shown that in the cortex there are three different categories of areas, namely :-

- i ) Sensorial projection areas, which receive sensations and send forth motor impulses. They are intermediate between the external environment ( with which they are connected by means of the periferic nerve system ) and the centres of memory and intelligence.
- ii) Association areas. They are in direct contact with the first-mentioned, and they interpret sensations and ensure perfect co-ordination between motor impulses.
- iii) Silent areas: ( frontal lobes ), seat of all superior intellectual activities.

Between the different areas circulate innumerable nerve messages, transmitted as series of impulses, which can be measured as variations in electrical potential.

The intense electrical activity found in the brain, as well as in all the live cells, can now be found, localized and registered in encephalograms and electrocorticograms by means of electrodes applied to the surface of the cortex, which is reached through very fine openings made in the skull. This is due to the modern electronic technique, e.g. electronic amplifiers and cathode oscillographs. The encephalograms and the electrocorticograms have revealed the existence of three categories of encephalic waves.

Alpha waves. with very regular rhythm and amplitude; correspond to the electrical activity of the brain at rest.

Betta waves. Very irregular, caused by the activity of brain cells.

Delta waves. manifest themselves during sleep or even around a silent area, for example where a tumour has developed.

## "Human Radiations " Cont.5.

After this brief digression in the field of knowledge of the official accepted science of brain pathology, we now go back to to the experiences and studies of Bardeloni, which can be summarized in the following striking achievements.

- 1) A piece of writing, or even a particle of the human body ( a hair, nail, tooth, garment worn for a long time ) radiates vibrations with a frequency equal to that of the person to which it belongs. It is, therefore, possible instrumentally to measure the wave of the individual from one of the objects.
- 2) Analogous herewith, by syntony, one can determine the direction in which one can find the person who wrote, ( or to whom the hair, nail, etc belongs ) By measuring the angles from two or more points whose mutual distance is known. it is possible - as in radiogoniometry- to determine the point where the object i.e. the centre of radiation, can be found. Exactly as one localizes the topographic position of a transmitting radio station.
- 3) If one will carry out the experiment with some writing done by a person now dead or with an organic particle of his body, not one but two radiations centres will be discovered. The one of these corresponds to the place where his dead body is found( burial place ) The second radiation- which is usually localized somewhere in the direction of outer space - originates from a "QUID" which, surviving the body, continues radiation of the same wave length as that of the same person while he was alive.

This second centre radiates without seasonal variations, however , in accordance with the following timetable.

During the day interval ( from 10 a.m. to 18 p.m. ) it is localized by goniometer as a single and constant centre .

During the night period ( between 18.p.m. and 10 a.m. ) also other polarization centres that the above-mentioned manifest themselves in the direction of the dead persons close relatives, as if the "QUID" , during the night hours, wishes to be near to those relatives or to persons, who have been attached to the deceased by strong feelings.

- 4) In case of inert matter, one can - to the contrary- only register the vibration all the time the matter itself lasts.
- 5) Animals and plants stop emanating vibrations , or at least the radiations are not appreciable, after the death of the object .

Mr. Bardeloni had a cat. When it died all the research he did with the fur of the animal was fruitless. no electromagnetic wave came from space! It is thus only man who has the prerogative of a QUID, which survives and manifests itself in a point of space after death of the physical body .

- 6) Fundamentally characteristic of man is thus that he sends out two kinds of waves: (a) an invariable vibration ( the personal wave, which we for distinction call the "psychical wave" ) which, from the moment of conception, can be goniometrically localized as coming from a radiation centre in space. After birth it follows the subject all his life, and after his death it returns to some spot in space. (b) a variable vibration ( which we call the " biological wave " ) which is radiated by the mortal parts of the subject. The frequency and wave length of this varies with the age and the state of health of the person .

## " Human Radiations " Cont 6

If the proportion ( between these two waves ( quotient between the biological wave and the Psychological wave ) is worked out, one obtains a co-efficient which expresses the physical, functional, and pathological conditions of the person to whom the wavelength belongs. As the person grows older his waves tend to differentiate from each other according to a rule which can be illustrated graphically by observing the statistics of many cases .

The course of such a graph or curve shows that the individual who has arrived at the end of his life, has a biological wave, which is half of his physical wave.

A curve with the years of age as abscissa and the mentioned proportion between the two waves as ordinate, has an almost parabolic course. This parabola grows only very little from birth ( when the proportion between the two waves is equal to 1 ) until an age of fifty years.

It then starts to grow rapidly towards a final value 2 at around the age of 70 ( average life span ) where the biological wave has become half of the psychological and the subject dies.

However, the biological wave is variable not only in relation to age because of the normal organic deterioration. It can even within the same day vary with exterior causes , i.e. in relation to the health and psychological conditions of the person . In this connection I remember cases of people who seemed to be in perfect condition of health, but where the ratio between the two waves gave a high coefficient. After medical examination they were found to be sick. A boy who had been suffering from hemophilia since he was born showed a ratio between the two waves as if he had been of a very high age. The researches of Bardeloni, with the discovery of the two waves, has a great prognostic importance for the treatment of illnesses. Here is one example. Two sisters, not twins, both very young, had their respective writings examined for the establishment of a " curative oscillatory circuit " ( as will be explained below ). One of the sisters was very weak generally, because she had gone through a serious operation . The other sister - to the contrary - was well developed and healthy looking. From the measurements of the writings Bardeloni was able to say that the latter was in much worse condition than the former. At that time it seemed absurd, but after two years the healthy looking sister died of a lung disease. From this , one can understand how important the measurements of the two waves and their ratios can be for a diagnosis.

7) From the day of conception the writings of a pregnant woman radiate the coming baby's vibration as well as that of the mother. The vibrations of the embryo, revealed through the mother's writing, are actually of a higher intensity than those of the mother .

8) From the way in which the vibrations of the embryo manifest themselves one can determine the sex!

END OF PART 1. TO BE CONCLUDED IN THE NEXT EDITION OF PANORAMA .  
\*\*\*\*\*

I have purposely printed this absorbing article, because I consider that even both lately and those to come will show the wisdom of doing so. the advent of the present turn of events in UFO study has taken a turn to

the meta-physical due to the recent release of the " Bender Story" and of other various psychical approaches. with groups taking sides for and against. A question which has arisen in many minds is, How do these threemen and their organisation operate. ?. How can the Silence Group affect people who they never meet or are miles away from . A keen study of this subject above and its vital implications will leave the reader in no doubt as to not only the possibility of such being used, but that it HAS been done. as is instanced by the various leaders of the UFO world who have been the victims of this very method of " putting the pressure on" them ,

The above actual facts are not a mere theory , they have been practiced by native races for centuries, and the white man is just finding out through Science what has been known to them as natural law.

Such powers can be used either way for good or ill.

The above also opens up a great field for helping to reach a better view of that greatly discussed question of Life after Death. for it is quite clear from the above that although life has gone physically from the body. there is still " something" which registers as being vitally active in space here termed as the QUID and is still an integral part of the deceased. Who knows what this field will yield to us in the future to confirm many beliefs in the existance of soul of man after he departs this physical life?

 \*\*\*\*\*

RUSSIA'S LATEST EXPERIMENTS IN SPACE FLIGHT PREDICTED BY  
 AN ARTICLE IN THE A.S.R. EIGHTEEN MONTHS AGO.

\*\*\*\*\*

According to the latest newspaper reports Russian scientists have announced that they are now experirnting with the idea of sending astronauts into space and making it possible for them to cover lbeavast amount of space and time hitherto thought impossible , by a process of " freezing" the astronaut and slowly bringing him back to life. prior to his landing at his destination. In doing so they thus assume they can overcome the intense body stresses a food supplies etc and all the other hazards which accompany such a venture. This very thesis was proposed by one of ourwriters in the Australian Saucer Record. Vol7 No2. of June 1961 almost two years ago.

In this article Don Alfredo Calef sets forth his views some of which are identical with those now proposed by the Russian Scientists.

Because of its new value in the light of present events we are now reprinting it in this volume for our readers. many of whom are new to our magazines We present it in the next three pages. for your consideration and comparison with the views expressed by the Russians in world reports of recent weeks.

 FOR YOUR TAPE- RECORDER.

The EDITOR WISHES TO ANNOUNCE THAT HE HAS FOR SALE A NUMBER OF 7 Inch TAPES IN FIRST CLASS ORDER. THESE TAPES HAVE ONLY BEEN USED ONCE AND HAVE BEEN SOLD ALREADY TO A NUMBER OF PEOPLE WHO HAVE BEEN HIGHLY SATISFIED WITH THEIR QUALITY. 1200 ft. SARKES TARZIAN. FOR 25/- Plus Postage. SEND NOW.

===== FLIGHT INTO SPACE =====

BY. Don Alfredo Calef.  
.....

Much has been written on space flight and our greatest aeronautical scientists today are madly concentrating on the ultimate achievement of the manned flight into space programme.

One of the things which has caused them the greatest concern in the utmost of efforts is the problem how to keep a man alive in a space vehicle and combat all the known and UNKNOWN terrors and rigors of the way which may either make him completely unable to complete his task as an intelligent being .

It seems to me that one great possible factor of investigation could have been overlooked and that is a form of suspended animation , for actually their whole purpose is to in some way make a human physical body so "conditioned" as to be able to pass through and come out all in one piece and still mentally able to function .

The movies have give us some ideas in certain " space" pictures, mainly and regretably the horror type, in which a man has been given drugs or placed in some super duper glass machine and so conditioned to make his physical body inanimate until a certain stage is reached which then he is " brought back " to the Norm.

Yet actually we do not have to go far from nature itself to find that certain forms of such conditioning or suspended animation takes place , and has been going on in the kingdom of the " birds and the bees" etc. all their lives. and even in the human field we find such cases.

The yogis have demonstrated for centuries that such a complete suspension of normal life can be accomplished , and to return to the lower forms we find that the bees " hibernate" , the woodchuck is said to " sleep" six months of the year ,he seals himself in, rolls himself up into a ball, slows his breathing down , and his heart beat almost stops, his body temperature drops to between 40 to 57 deg. and he becomes insensible to sound or touch, he has conditioned himself to resist all normal conditions.

Ground squirrels ,bats, badgers, snakes , crayfish,all employ and so complete this death like sleep that even a limb is amputated .they are completely immune to pain and they do not bleed. . yet they are alive. and can return to normal at the set time for such .

The return journey of course takes time and varies some taking quite a process with most of them as it would with a human being .

Man has found in recent medical history that he can suspend animation of life for quite a while by freezing a body and thus enabling operations and surgical treatment to be made that otherwise sometimes is impossible.

I have even heard of a village which put their aged to "sleep" in this way for six months of a year during a famine and brought them all back safely , I regret that this case was not fully authenticated , but whilst highly improbable in the light of medical knowledge today possible.

## " FLIGHT INTO SPACE CONT. "

This brings us back to the possibility of some form of anaesthesia to humans as to in a similar way make them immune to the process which they have to pass through , and then be able to awaken them back to normal at a later period when nearing their destination .

Personally I do not feel that man will ever reach his goal of planetary conquest, and that a peaceful one, until he has more highly developed his spiritual qualities, and his main purpose is nobly than his chief aim today which is , undeniably to gain supremacy in "beating the other fellow to it" and the achievement of power for military and aggressive purposes.

But this does not stop us in speculating the means of how to get him there. " in one piece" so to speak and not demented as some have already been made in the attempt, and that in merely getting out of the earth's atmosphere. which conditions are merely child's play to what lies ahead, for not a few already have paid this great price and who know how many more before even the moon is reached and if the greater spaces still are to be ever passed through en route, then, the price of lives can be untold. for the power to sustain life and limb and mind requires a great deal of investigation yet and will require much experimentation .

Could it be then that these laws of the natural kingdom and the spirit can teach us lessons and have been overlooked because of their apparent simplicity . or could it be that when he does rise to a higher level of, spiritual attainment he will find the answer along those lines.

In this regard the Flying Saucer theorists have offered many ideas and it would be well to examine some of them for comparison . for we have the following theories. , some of which are quite opposed to the other in thought. in their claim to what the structure of the spacemen are who are coming here .

Some claim that they are NOT human as we. i.e they are pure spirit forms, or ethereal beings. others say they are spirit forms which change into human forms. others that they are human in form in their natural element but by a process dematerialise and then materialise at will on the way this is commonly known as the mat and demt . whilst others say that they are human in form and remain so merely conditioning themselves by some means on the way . as would have to be with a man from earth .

Actually no one knows the true answer. but it is certain that if they are the angels of the Bible as some claim and which to me is the most feasible of any so far . then they would be quite able to take form at will actually using some perfectly natural law of God which we have lost along the way . for Jesus himself demonstrated this before and after his death quite often and if such people live in a state of complete unity with the Divine in their native state or planet whatever it is. then such feats would be common place.

Possibly it would be only a matter of raising the body to a higher state of vibration. and science today is in the infancy of the laws of this , in their study of sonic sound and vibration. and it is conceived that levitation at least can be accomplished by this means. and has been already accomplished in some degree. but to cause immunity to stress and strain to a human body for such a long journey . could be another matter

Another theory is that "they" are completely human in form and merely by manipulations of scientific instruments inside their craft, make it quite possible for them remain immune to any outer form of harm or destruction. their ships actually performing all the work of immunity whilst they merely control the instruments activating it.

The fourth is that they purely physical but condition themselves as per the movies or some other form of machine.

Now whatever way it is they accomplish this feat it must be admitted that they are at least some little way ahead of Earth in its strivings or as some consider MUCH further ahead than we imagine for after all we must admit that we have NOT got very far into space yet with humans. and the tests have YET to come . i.e. if we do get that far. or to put it plainer IF WE ARE ALLOWED TO.

So far ams attempts have been confined to fitting the physical form to meet the conditions expected by a suit made to make him immune to the expected conditions of their very meagre knowledge and theories. plus the inner chamber of the container being fitted with innumerable instruments to help him perform this and many other tasks.

I cannot imagine with these limited forms of him being able to go much further than the moon. the road ahead of that is so completely theoretical that it is only to be expected that some form of putting him to "sleep" to awaken at a later stage of the journey will have to be devised apart from the time factor. the utter psychological effect on him in so limited a space for such a long period. would alone cause mental derangement. considering the effect on the Russian Col. Ilyushin, who was only a few days out of the atmosphere of the earth. and which was enough to send him raving mad. and despite the U.S.S.R denials to the contrary he is not to be located. an interesting point here in this regard is that they claim he has been sick and confined to bed from June 1960 until the end of Jan 1961, and was still recuperating in Hangchow, China. yet a photo of him appeared very well and happy in the company of other astronauts at a New Year Eve gathering on Jan. 1st. 1961 and published in their paper "Krasnaya Zvezda" the Russian Defence Ministry official Newspaper. yet inside reports confirm his is a raving lunatic. this of course refutes all the claims that Major Gagarin was the first up. in fact various Flying Saucer journals have given us plenty of evidence that there have been quite a few who have gone up previously and lost their lives. true Gagarin was the first to come back whole and of sound mind and possibly Ilyushin was the first to come back alive but out of his mind through the conditions he met.

The story has it that with the col. the means to bring him back on schedule failed and he was in orbit three days. before they could get him back. ponder only three days and he went mad what would happen to one weeks months or even years. ?

This brings us to the question of the time factor of course, and the theory that once we pass the speed of light time does not exist. this is too lengthy a subject for this little treatise. and will have to be left till another time. meanwhile, our scientists predict we will be well on the way to accomplish all these things within the next 5 to 10 years.

Well it not so long to wait to see, and TIME WILL TELL.

NEWS ITEMS.  
\*\*\*\*\*

We have received a rather most interesting report concerning the Great Pyramid of Egypt. from a friend who has recently passed through that way. He tells us that great activity is going on at this site. and that the Pyramid itself is now surrounded by heavy barb-wired entanglements to keep folk away.

He was given to understand that excavations which were apparent to him were being made under the Pyramid. and that they expected to find a Temple there. This if course would be no surprise to many students, many of whom have believed that such existed there.

However there is a UFO angle to this which should be of great interest to us, in that there is one contactee who claims that he was told and SHOWN a UFO which was buried beneath the Great Pyramid.

Of course we cannot say whether his information is correct. time will eventually tell. but here's hoping we will be told what is discovered there.

However your Editor thinks that it could be possible that we may not be told too much of the real facts, or even what REALLY is discovered there.

Much depends on the people who are heading these excavations and the real purpose behind it. It could be genuine scientific investigation to discover the actuality of a Temple there. On the other hand maybe they think there is something of greater value there. to help swell Nasser's "coffers" Forgive the pun. Taking into account the Nasser Govt. and the great friendliness to the Reds. and the great control these invited guests of Egypt have gained over affairs, it could well be that they are behind all this.

In any case it is anybody's guess as to what they will find, but it seems that such a great effort and expense would hardly be undertaken unless the instigators had some real evidence to support their claims and expectations. The Great Pyramid has been such a world wide accepted edifice of more than scientific value. , its religious, historic and general value is without calculation of worth. for in a sense it belongs to the world. rather than to any one country to which it is fixed.

It is therefore to be hoped that those in authority will let the world know the whole truth and nothing but the truth of their findings when this great feat of excavation is completed.

Pyramidologists. Egyptologists. and Historians . will no doubt be agog at this turn of events. and with them we now await with our fingers crossed for some official announcement of this outstanding event of history in our day .

The thing that has puzzled us is why we have not heard any newspaper announcements of such excavations going on. and it appears from such silence that much of it must be very secret. and if it were not for the great reliability of our informant we would be prone to think the whole thing a complete hoax. However if we can find out there will be others and sooner or later more confirmation of this event will be given from some source or another .

In the meantime. all we can do is GUESS what the results will be.
