THE THINGS THAT HINDER.

Ever since the UFO brought itself into the public eye and its cause brought about the various attempts to investigate them either individually or in groups etc. a number of frustrating forces have had to be overcome or met by the sincere investigator in his endeavour to make a presentable case to justify his work and his claims.

These frustrating forces have come from without and from within .
Let us take a look at some of the most significant of them.

Firstly from without , from whence most of the blame is attached at getting nowhere, although as will be seen this is hardly altogether to blame. In this regard we have those who blame Official Silence. and great attempts have been made to break this with little or no effect to date. despite the sterling attempts of Major Keyhoe and his capable staff of earnest workers, who has led this field of attempts to break the "silence" to date had had very little significant effect. All honour to his work however.

Official silence however is only one of the number of causes. Following along with this the next to get the blame are the papers , press, radio. T.V. etc. and it is very true that only about 10 p.c. of the information received by these avenues of public information ever get a mention. for we have it on good authority that most of it reaches the waste paper bin. In this your Editor is in favour of placing a great deal of blame. for the following reasons.

(a) If reports of sightings and observations are not published they not only deprive the public of information but also hinder those who collect this form of data, in their attempts of assessments. and therefore no true evaluation could possibly be made unless the WHOLE facts of such sightings are in the possession of the investigators. and here too often distorted versions of the few sightings printed or reported cause even more confusion.

(b) Those reporting these sightings and finding that they have got no consideration from the avenue of reporting. feel that it was either "Nothing worth while" or that they have been made fools of. Hence in future occasions they just don't bother to send in any sighting or report .
or forget about the whole thing no matter how real it was to them at the time.

(c) The lack of the publication of these reports not only causes the public to think there have not been any. judging by the data given . but also members of groups and even earnest leaders at times fall for the effect caused by the sparcity of information. Forgetting that unless the true number of reports are known then no one can say just how and what the true number of visiting craft have really been around. and it surely can be safely said that if 90 p.c. never reaches publicity. or the knowledge of those collecting the data at least one could say that another 45. pc. of sightings have been made of craft and added to those known ones. this being only 50 p.c. of those not reported. Hence this lack of information is the Editor feels mostly to blame from those causes without, that hinder.

The third cause from without belongs to the public field itself. Firstly in the general apathy shown to the subject. but this could be offset we feel if the WHOLE and TRUE facts were known. such apathy would grow into keen interest. this is felt by many to be the reason why Official silence from authorities and the above avenues of news deliberately withhold the information . On the other hand the public too often are reticent to make known some of their sightings or experiences, for fear of public ridicule. or a general dislike of publicity of any kind. added to this is the experience of some who have had some sad cases of being thus mistreated and made fools of. this not only causing them to refrain from any future report but to any of their friends and acquaintances who know about the "raw deal so and so got" this truly frightens them away and their information is lost to all and sundry.

This we feel covers the main lack of information and the discouraging effect on the investigators. from the outside sources of information . but lets be honest and not throw stones for from within we too often are ourselves very guilty of hindering the work of getting information across. These too can be classified into several groups.

1. Opposition of views . interests and approaches.

Here even some of the best known leaders are not without blame. for we could name some of the most notable who quite openly disdain to give consideration to views expressed by others or groups of workers. One has only to consider the number of those who are at variance on the contact-stories. some for and against. some violently opposed to accepting the other. Then the expression so often used derogatively: "belonging to the lunatic fringe" This self superiority complex. which is the old better than thou attitude, so quickly does damage by this attitude more than the lunatic fringe could ever do. by any wild claims they may make. for it is a certain law of nature that a house divided against itself cannot stand. hence by any unwillingness on our part to allow the other fellow his right to his opinion, is in itself creating a force of opposition which is quickly picked up by the outside opposition as a weakness in our defence. for until we arrive at some happy ground of unity in diversity . this will ever be an opening chink in our armour.

The second cause from within is the egos that rear their heads among leaders and individuals. and from every class of the various approaches these can be seen. and one has only to read many of the various denunciations of some other fellow worker. to have no doubt that which is wisdom and knowledge and that which is personal ego attempting to gain control . Again we repeat a phrase we have so often used. "By their fruits ye shall know them " is very true of estimating what is the driving force behind alas too many of those who would

claim to lead us or pose as teachers.

Self aggrandisement can only bring its own reward. No cause however good can truly thrive on a leadership who is out for all he or they can get for themselves, especially if it is at the hurt of others. and I call to mind an appeal I made many years ago for a greater sense of humility amongst us if we were ever to gain a real foothold on public opinion. for the public who come along to hear us or see what kind of folk we are are not slow in picking up the fact whether we are using this thing for place getting or position seeking and this could be said most certainly of the press whose astute reporters are trained to quickly size up not only a situation but the individuals concerned in it. The shame is that often in the presence of such, some so called leaders have openly insulted others and without out any sense of shame so openly displayed the attitude of treading the other fellow down in order to rise above him to gain their point .Is it any wonder the press too often just treat us as a lot of school children fighting over some trivial thing.

This self seeking of the egotists among us. has led to the final hinderance among us which is but the outcome of the above. namely that of open enmity. I have heard of such from other workers and leaders in other countries but feel I have no right to condemn them when it exists in my own . and thus feel I must only speak of that which is known to me personally lest I unwittingly misjudge others.

In Australia we have groups operating in every state except Tasmania i.e as societies in active work . Again and again attempts have been made to unify the whole but alas even when this seemed almost accomplished by the three larger groups this soon proved to be not so workable as they expected. the root cause the above cited factors.

Several of these individual state groups have become split into at least two sections. each very opposed to the other and scarcely ever finding a common ground of working together .

From this has grown in many cases open hostility to the others. and in my own case despite many friendly overtures to " just work together" allowing each other their independant views. letters and overtures have been just completely ignored and no attempt made to even have the common courtesy of reply being given to share in those things in which we had a common interest .

How can one get along with such inside hindrances . for if we who claim to be working for the Saucer cause fight so much and do not give even common courteous consideration for each other. what can we expect the outsiders to think of our cause as one which effects humanity in general?.

This more than ever applies to such groups who believe in the " teachings" of the space visitors, who in general appeal to us to make a more friendly world in accordance with what they claim their own planet is like. etc etc.

Any group claiming to believe such teaching and acting in open hostility to another group are nothing more in my opinion out right hypocrites. who mouth Peace and Goodwill but breathe out hate and discord in every action and breath. Especially is this so if such leaders claim to be or hold some office in a church or Christian organisation. How they can reconcile such is beyond the Editors comprehension . and seeing such makes him feel how necessary it is that he should become very humble lest he fall into the same pit.

These are the things which hinder. which are you affected by most ? those from without? Or those from within? Or are you one of those who yourself hinder in some of the things outlined. If the Editor has been a hindrance to you. then

(continued on page 4)

lets get together and talk it over and see if we cannot place our hands in each others and over come the hindrance we may have caused each other. Many have felt that the above splits among ourseleves is fostered by those whose aim is a deliberate attempt to keep us at each others throat. for whilst wedo so they do not have to worry about us. but if we ever do get together and form a united front of opinion , even on the basic issues. then it would make them rcally get worried. Just imagine what power NICAP would have if ALL the groups in the USA alone were behind him in his demands onCongress. Instead we have opposition groups each trying to get the most power and influence each following his own line.and neither party getting together as a whole and putting the case as a union of saucer groups. And no one getting anywhere. This reminds me of a recent attempt in Australia. to get our own government to open its files and making a special work of investigation possible. One prominent worker " hoped he would get a good job out of it as an investigator officially for the government ". showing only too well where his interests lay The whole project fell very flat as was to be expted. although overtures were made through an honest and reliable Senator. , for as one official put it to me when I asked did he think the government would co-operate. he rep'ialy saying. " Well if they did. who would be the society to get the power and the files and the data. None of your groups trust each other, so if they did open up anything to you. the first thing you know you would all be fighting one another to have possession of the files etc etc. No man," He said! You haven't got a hope. " Frankly I felt a little ashamed and had to admit he was right. If this was so in Australia How true is this of other countries. ?. and how true is generally all over the world among the UFO yorkers.

IS THE HINDRANCE GREATER FROM WITHIN THAN OUTSIDE ?

You best can answer each for yourself. I certainly cannot pose as your judge in the face of the above conditions in Australia. and also I perhaps am not altogether guiltless myself in some ways. but at least I hope I have the courage to take stock of myself and do what I can to put right whatever I can to remove any hindrance on my own part. THE EDITOR.

OLD CONTACT STORY OF 1947 IN BRAZIL

We do not get many stories of contacts as far back as this and it is with interest that we read it and pass it on to our readers for their own evaluation. We are indebted to our associate Elidio Hernandes of Brazil for this account which was printed in his Journal C.D.A.S.

Mr. Jose C. Higgins reported the following:

On July 23 1947, I was near the small village of Goio-Bang, northwest of Pitanga and southwest of Camp Mourao, all in the state of Parana. I was doing some topographic work, when on crossing one of the few clearings of the region I heard a deep hissing sound which made my hair rise on my head.

A strange spaceship of circular shape and looking like a medicine capsule was coming down from the sky. My men, all simple country people, ran away in fear at the sight of the strange object. I still do not know why I decided to stay and see what was to hap en . The space ship circled the clearing and landed softly about 50 meters from where I was.. It was an amazing thing . It had about 30 meters of diameter plus a border of some 1.5 meters

high.

NEWS ITEMS FROM HERE AND THERE

A strange story is told by the two miners who were trapped in the mine disaster in Penn. USA. for two weeks. in Aug 1963.

They claim they saw unusual phenomena, which fortified their faith in their rescue. They say they saw a bright BLUE LIGHT, in which appeared two men The LIGHT was around the door at which the men appeared who opened it.

On the other side was a beautiful marble stairway. "We-saw what we saw, " they said; " these things happened" ! They claimed there was much more(" too deep to talk about " ..

=====

L.L.P quotes... WHO'S TURNING'EM BACK.? . Four USA satellites have posed a bizarre mystery. First they went dead-- one by one --. The after a period of time and with no apparent explanation , they came back to life and began sending out signals again . Satellite ANNA, the blinking signal light. worked well for two months -- was OUT for 7 months-- then somehow turned itself on again in Aug . The same trick was staged by TELSTAR-2...The answer?.

It would be a minor miracle for the sun's heat to have soldered the broken wires together again correctly- and to have this happen in all 4 cases is out of the question . The scientists on these projects admit their stumped.

GEORGE ADAMSKI AND HONEY FALL OUT...

The Planetary Centre of Baltimore USA reports the following...

Received a " To Whom it May Concern" bulletin from George Adamski. In it Mr. Adamski says that C.A. Honey is not running things the way that Mr Adamski and , or the brothers (whom G.A. calls the Visitors) would like to see them run . So, it looks like Mr. Adamski and Mr Honey are coming to the parting of the ways. It could be that each of them wants the whole show.

Mr Adamski says he did not make the statement that he was going into the field of teaching and C.A. Honey would be his representative in the U.S.

But that he never made the statement that he would leave the space programme In fact he says he is more active in that now than ever before. (The following are Mr adamski's quotes)... " So naturally to have him work with me in the beginning, I turned over my files to him. But after he had these and settled down to where things were moving well, he began to change. I said nothing but observed his actions and statements closely. (end of quote)

Mr Adamski feels that C.A. Honey is consciously or unconsciously working for or with the Silence Group(a group not yet clearly identified , but trying to prevent saucer information from being made public)We have been getting Honey's Newsletters since it started almost two years ago. Something has changed from the first few issues. They are not quite so interesting now, and it does give the surface impression that Mr. Adamski is being cased out. however Mr Honey himself, may not relaise this and when he does. things may change. We will have to wait and see.

Your Editors comments on the above.

The above gives much food for thought and also confirmation of what your Editor has insisted on for some time.

Firstly. Adamski said he was told by the Brothers to place this work and confidence into Honey's hands. by their instructions. Now if this was so then

either G.A. was being "misguided" by the Brothers, which would indicate that they are not so reliable as G.A. claims them to be (i.e, those whom G.A. says are the ones who contact him) or that the whole thing was done by G.A. himself and thus he placed his affairs into Honey's hand on his own initiative. Or could it be that he was pushed into doing this?. what ever it was it has proved that all has not turned out so well as he hoped. again proving that the G.A. whom so many place their confidence in, is what we have insisted him to be, a very human and fallible creature indeed . and with an ego that too is akin to many. It is true that many of Honey's statements have made others made by G.A. to appear contradictory . and true as we pointed out too often the statements made were clearly those of Honey and not G.A. May be G.A. has not clearly defined who the Silence Group is. but too many have been so well acquainted with this for many years , long before the advent of the modern trend of " saucers " that to them it does not need any definition . WE KNOW WHO THEY ARE AND WHAT THEIR ULTIMATE AIM AND PLAN IS. So this undefined-reference to them by G.A. repeatedly does not leave us in any state of dilemma. Actually your Editor feels that the answer to this little tiff between these two men is plainly put in the above words. in that " It could be that each of them wants the whole show. " Again we have the ego rearing its head.

One point is , Why did G.A. leave it so long before giving warning to the readers of Honey's epistles given in G.A.'s name if he as he says things were not going too well and he had his misgivings of Honey?. Did G.A. realise that he had made a boo-boo and was afraid of losing face? In any case he has had at last to face up to the issues. and it seems it will not be long before there will be an open severance of the relationship of the two.

Those of you who read the letter by R/ Ogden in the last issue of this magazine will have noted that G.A. is not always dealing as judiciously in his affairs as one would expect from one who claims to be in constant close touch with the space brothers. and from whom one would expect him to receive helpful guidance from time to time. More and more the saucer world of investigators are being made to realise that G.A. is not by any means the man he claims to be , and that the adulation and adoration given to him by so many silly sentimental fans and old women who flock around him, is certainly not well founded or worthy of any serious minded person .

News which has reached us as we go to make these stencils indicates that G.A.'s prestige in England and on the European Continent is not as bright as it could be , and when the facts of this information come to us officially we will have more to say about this. as further proof that our forecast of G.A. and his affairs are not those of a heaven sent being to lead the world into PEACE by his philosophys. but that he is a very human man to whom a task was entrusted and who was swept off his feet by the outcome of that task, and who took unto himself more than his original assignment meant for him . We too like the Panetary Centre await further news of this matter with great interest .

::::::::::::::::::

RED FLARES AND ERUPTIONS ON THE MOON.

News items have carried information that eruptions have been seen on the moon and the latest ones were observed immediately after a LASAR RAY BEAM was ~~px~~ pointed at projected at the moon.

This follows a report from the Lowell Observatory by Dr. John Hall the direct-

or . and announced on Oct. 31st, that 3 apparent eruptions, which were possibly volcanic in nature. were observed that week on the moon's surface. he added that this item "would probably create quite a stir in the scientific community !" This is not surprising in that these know alls have said for a long time that the moon is DEAD.

The disturbances were all in the vicinity of the crater Aristarchus, located in the moon's N.W. quadrant. They were all light, red ruby in color, and each of the three were approximately 2 miles in diameter . They formed an oblique triangle with two of them about 16 miles apart and the third some 40 miles away on what would be the apex of the triangle and near to the rim of the Aristarchus crater itself.

The disturbance attracted the observers by their distinctive reddish color on the moon's usually colorless surface. .

We have wondered since the latter information has reached us if there was any connection of the LASAR probe and the one reported by Dr Hall.

Could it be that the observations reported by Dr. Hall were also LASAR probes but not reported as such due to them being " top secret" at the time ?.

The above case does however bring to the fore the age old dispute on the question " Does life exist on the moon ?".

Whilst most UFO investigators do not claim actual life such as Homo Sapien exists in natural form on the lunar satellite, yet there has been sufficient evidence to assume that some form of human activity does exist there , but more so that the moon is not "dead" as the astronomers have insisted for so long . for it must be remembered that long before LASAR probes were invented indications of activity was being observed by a number of observers some of whom were accredited astronomers. and although human life was not believed to exist there. that the moon itself had at least some form of inner activity could not be denied by those observations. For if a thing is "dead" this does not allow for activity in the form of strange eruptions. dome like structures which appear and disappear. and even a bridge which has all the indications of being not made by natural forces. Some of these things appearing of recent years during the last two decades. or more. and which have been testified to by reliable witnesses and " Not being there before " .at some former observation . At best it does indicate that there is a possibility that the inner core of the moon may not be as dead as thought and that these eruptions if not by any other means are the result of some disturbance from this inner core. What has caused this sudden re-activity to take place is of course another question. and to sum this all up it does resolve itself into the assumption that. these strange and unaccountable activities and observed phenomenon. are the result of either the moon's own reactions to some force from within or without . or that they are being brought about by some force directed either on the moon , or near to it. or to it.

If only our modern scientists were not so hide bound by dogma or tight lipped because of "officialdom" we may very soon have the answer to all this.

But it appears that like most of these discoverys. they will end up in the " top secret" basket rubber stamped. not for publication . WHY? is another question. so many of us would like answered.

::::::::::

JACKIE GLEASON REAFFIRMS HIS BELIEF IN THE U.F.O.

The Noted Stage, Screen, Radio, and T.V. who is a world famed comedian and appreciated by audiences of both young and old. has again repeated his belief in the U.F.O. as extraterrestrial objects.

As far back as 1960 we received an article in which Jackie. clearly stated his beliefs in the UFO and of a keen interest in Psychic Phenomena. and in an article in " Exploring the Unknown " Published by Health Knowledge of N.Y. He expressed himself very openly in their favour. we here quote from this.

" It was a rainy Saturday afternoon in the New York City when some people who still have to do things wonder what to do with that " I should have stayed in bed" feeling. At the Shubert Theatre they were getting ready fo a matinee of " Take Me Along , " Backstage, in a red- rugged covered dressing room with light pink walls, on a small green upholstered chair. a big man sat in a blue robe. Mr. Jackie Gleason , one of the generation's most popular comedians, has quiet blue eyes. The kind of eyes that could if the occasion warranted it. become very hard. At this momemnt. however, in a few minutes before curtain time. he quietly discourses on his hobby; the study of psychic phenomena.

His interest began at the age of thirteen, stimulated by readings of the Lives of the Saints and the Catholic Encyclopedia. " Could other people beside the saints, " wondered Mr Gleason , " experience some of the phenomena they did?" And so began a process of research and study that has led to a library of about 4,000 books and some conclusions. " Telepathy is an absolute fact," states Mr Gleason. " Rhine is most absolute and scientific. It's a monotonous work and slow, but documented and can be proven scientifically !

He is sure it's going to be one of the big excitements when someone finds the key to these psychic happenings and can control them with a sort of regularity. Mr Gleason doesn't say so but he may be working toward just such a contribution with his activity in hypnosis, For he is a hypnotist, but practices it only in the presence of medical supervision. In Boston, in the presence of a priest a doctor, and a dentist, a young girl proved to be a remarkable subject in displaying telepathic ability under hypnosis. Mr . Gleason hopes she can come to New York so the work may be continued.

Although he once did see an aura, Mr. Gleason has not been involved in what he could claim as a psychic experience. However he feels his success is based on a precognitive ability over which he has no control. He knows that when something has to be corrected at a rehearsal he rises from his seat with nothing in mind; he starts toward the stage and - gets there with the solution. As for anything that could be considered psychic influencing the course of his life in any way, he is skeptical . The big problem , he feels , is distinguishing between what is genuinely psychic and what is hallucinatory. Keeping this in mind he reads " for" and " against" on the subject in order to

JACKIE GLEASON CONT. (2)

Following through with the same attitude, he believes investigation should be personal, otherwise there is coloration by a group. Some day he thinks, man will achieve the ability he possessed in his primitive stage before he developed speech ; the ability to communicate normally through the ~~ultra~~supersensory Perception. When that day comes, of course, there will be then those who develop ESP " jamming" ability" and then ", he smiles " we will be back where we started." The ability that people have to act out of impressions should be developed . " The deaf and dumb from birth especially have a need for such experimentation, " declares Jackie Gleason .

Asked if he considered the flying saucer phenomenon as hallucinatory or psychic manifestation, Mr Gleason smiles knowingly. " If Flying Saucers exist only in the imagination, the countries like Canada and the United States are making saucers in the shape of peoples imagination." The existence of an organisation like NICAP, headed by Major Keyhoe, with its membership of intelligent and prominent men , the fact of the continuing government investigation plus the thought of the vastness of the cosmos and the numerous chances for life to exist on other planets substantiates the " Flying Saucer" phenomena to Mr Gleason as visitations from other planets.

The contact stories, however , are another thing. He thinks they are so fantastic that it is hard to give them credibility . The people who tell them are very vague and have no evidence. Mr. Gleason feels that if he were so fortunate as to make contact with some extra terrestrial vehicle the first thing he would ask the occupants would be for proof he could show of the contact- " or else I would keep my mouth shut " ."

Later he adds. that he does think it is getting pretty ridiculous when, in the presence of a phenomenon such as witnessed at Seafood, Long Island, investigators , otherwise at a loss, have to reach out to the firing of rockets at Cape Canaveral for an explanation . (end of quote)

NICAP REPORTS MR. GLEASON'S RE-AFFIRMATION OF THE ABOVE.

In a discussion reported by Bob Considine in his August 8th column, Jackie Gleason firmly repeated his conviction that UFOs are interplanetary machines.

" This planet," he told Considine, " is under almost perpetual observation by vehicles and people from outer space."

" Little green men from Venus"?

" I don't know what colour they are or how big they are or whether they resemble us in any way," said Gleason , " All I know is that they are there and have killed at least one pilot who tried to investigate them --- a boy flying an F-51-- and have landed in several places. " .

Jackie Gleason is one of the strongest believers in the interplanetary answer and he has never hesitated to make his convictions public .

As a member of NICAP he has expressed the hope that we will get Congressional hearings, .

We greatly appreciate his support and his interest in our investigations.

=====

SNATCHED INTO SPACE
=====

BY M. K. JESSUP.
.....

This is the first of a series of five articles written by the late M.K. Jessup. for an Australian Paper. and printed some long time ago.

=====

An enquiry started some years ago into the mysterious disappearance of 25 people from the south sea island steamer Joyita. Here is the first of a startling series of articles by the noted American astronomer, archeologist and explorer M.K. Jessup. which may provide a solution to the tragedy. Were they, and the amazing number of other people who have "disappeared in to space " whisked away by flying saucers?.

Fantastic? Mr. Jessup demands that we " let our imaginations fly", and be prepared to be shaken to the foundation of our beings.

He carefully traces the first reported sightings of flying saucers 3,000 years ago, has investigated dozens of mysteries, such as the Marie Celeste. He takes us aboard eerily silent ships, apparently deserted by their crews in mid-ocean, in some cases without sending out distress signals.

He claims the huge volume of saucer sightings disposes of the explanation that they are natural phenomena, or "optical illusions". He claims that, in fact, many of us over the centuries, have been,

SNATCHED INTO SPACE.

It was on June 24, 1947, that many people still imagine flying saucers were born.

A business man of Boise, Idaho, Mr Kenneth Arnold was on his way from Chehalis to Yakim. Washington. Flying his private plane he saw a bright flash on his wing.. Looking in the direction of Mt. Rainier he was astonished to see nine glimmering discs, each approximately the size of a C-54. They were clearly outlined against the snow on the mount.

As he later told the story; " It was as if they were linked together. They flew close to the top of the mountain in a diagonal, chainlike line".

He estimated their speed to be around 1,200 m.p.h. and he thought they must have been about 20 to 25 miles from his plane.

" I watched them about 3 min. " he said, " They were swerving in and out around the high mountain peaks. They were flat, like a pie pan, and so shiny they reflected the sun like a mirror. I never saw anything so fast !"

Since that memorable day thousands of other sightings have been reported and verified, and still the question must be asked, "What are they ?"

More important, where do they come from, what is their purpose here, and if they can do it why can't we ?

Several well-documented volumes have been devoted to listings of sightings, to reports by everyone from Boy Scouts and families on picnics to astronomers and a man who claims he had a conversation with a saucer passenger from Venus. I have long been interested in the study of the unexplainable areas of human existence, and as an astronomer with special interest in the moon, the early reports of the flying saucers caught my attention.

I began to ask myself questions... and I began to see a shape, a form, take

" Snatched into Space " 2

place in the entire field of observable phenomena which had remained obscure and previously unrelated.

Some of my contemporaries have attempted to prove that all of these phenomena are, in some way or other, illusory, and that they in any case do not involve flight, wingless or otherwise, mechanical propulsion or intelligent direction.

I consider their negative case unproven because there is an overwhelming mass of authentic evidence which can be cited.

In the sphere of indirect evidence there is one form of mysterious events which has never been explained, these things would be easy to explain were we first to admit the limitations of our own knowledge, and then the possibility of "intelligence" elsewhere in the universe.

It is "intelligence" operating space ships- and quite possibly more of one kind of "intelligence" and more than one kind of space ship!

I believe that intelligence has been operating not since 1947, but an infinitely longer time ago.

Reliable people have been seeing the phenomena known as flying saucers for a thousand years and more. There are as good reports as far 1500 B.C. and before. Thousands of people have seen some kind of navigable contraption in the sky, and some have sworn it under oath.

I cannot agree with any astronomer who insists that all these things are mirages planets, clouds or illusions.

The majority of people are articulate enough to tell their stories, and sincere enough to make depositions before notaries public.

I see nothing particularly odd in strange descriptions of phenomena the like of which has no earthly counterpart or for which we have no frame of reference. For centuries the earth was believed to be flat, there was no America, no heliocentric system of earth and planets, no fossil dinosaurs. It has only been a matter of time before their existence was established.

But make no mistake, a serious approach to the question of what in America are officially termed Unidentified Flying Objects, or UFOs demands, first of all that we face a fundamental change in concept as regard the world of our environment.

We must loosen our thinking, let our imaginations fly with the winds, and, above all, we must WANT to think!

No human being with a closed mind need read farther, for he will be asked to think as he has never done before- to admit to possibilities which will shake the very foundations of his being ..

TELEPATHIC DIRECTION TO A SAUCER SIGHTING
=====

On Wednesday Jan 8th 1964, the Editor had a visit from an old friend and associate, a retired Civil Servant who had previously been one of the directors in a Govt. Public Institution of learning .

He brought with him a friend whom he introduced, and said that his friend wanted to ask some questions on the Flying Saucers. He himself had often before quite openly expressed his belief in such phenomena.

After preliminary questions suddenly the visitor asked. " Do you believe it is possible that one could get telepathic communication from these Space ships, and if so be told the actual day and time of a visit or sighting ? . "

Having had a personal experience of such a possibility I could not do more than answer in the very affirmative, sensing that this man had some unusual experience which he wanted to confirm the logic of the event .

I briefly outlined to him the actual personal telepathic message received by me and the subsequent visit and sighting of the space ship witnessed by four other people and myself. This case was tape recorded and is known to many as the Bolivar sighting . named after the place where the sighting was made 3 days after the telepathic message was given of the event to come.

Briefly he outlined an almost similar occurrence in which he and two others received such a similar message purely telepathic and NOT in any psychic medium trance, telling them that a saucer would appear on the following Sunday evening and be visible to them from his home in a suburb of Adelaide.

Keenly watching for the craft on this Sunday evening, they were almost about to give up, when it appeared over the horizon and after travelling some distance it suddenly faded out momentarily and then re-appeared and continued in another direction . finally disappearing into the Southern sky .

They were elated ? (who wouldn't be) at the strong confirmation of the message received, but what made it more convincing was that a relative who was returning from a country town some 60 miles away from Adelaide also had observed this craft. and in relating its appearance it tallied completely in size colour etc and time with that of the Adelaide observers.

This relative had no knowledge of the message they had received , nor was he looking for such a craft or even anticipated anything like that to happen . This was such strong confirmation of the message received that they had no doubts that their contact whoever it had been at least had kept his word and was to be relied upon.

Not knowing of any such events being recorded anywhere . none of the party having read much saucer literature, they felt they would like to talk it over to at least see if such things DID happen , although their experience had been quite sufficient for them to convince them of its reality .

The description of the "saucer" was the conventional round circular type half the size of the moon , and of yellowish whitish colour. moving at great speed and pulsating slightly .

He said " We knew it was not a satellite. they do not change direction in the

Telepathic Sighting cont. 2

sky ,nor was it any conventional craft." The whole of the party are well educated men and are well acquainted with the general run of aircraft . Continuing he said " The size alone ruled any question of it being any normal craft out of the possibility of any such claim " . Further discussions led to the fact that this man had been well acquainted with much metaphysical knowledge. and had been a member of several groups studying such . but had not had such a telepathic direct message before of this nature. The names of all individuals has been withheld on their request in accordance with the policy of this magazine who respects any such confidence especially when it comes from men of such a type of character as these.

=====

FURTHER SIGHTING FOLLOWS THE ABOVE.

On Wednesday the 15th of Jan 1964, exactly a week after the above. another man , a member of UFOPIA who lives in a Western suburb . reported he had seen a very similar object coming in over the hills at about 9.30. p.m. but a little smaller in size but colouring the same. again this too changed its direction when half way across the sky moving from east to west. and thus turning south in its course. This man had no knowledge of the experience of the othermen nor was it related to him in any way even after he told his own observations. Of course it is not claimed that it was the same craft, although the similarity of time and dates may be conjectured to confirm such a view. However it made clear that at least in one week for the beginning of the year we had had at least two sightings which could not be classed as conventional. At first the man felt it may have been a plane coming in as they do to land in the airport. but he is adamant that there were no distinguishing lights either red or green or whitish such as would be shown by such a plane. " Anyhow" he said " the size ruled out such a possibility " note the same conclusion as the previous witnesses. Well at least we on to a good start for the year in sightings lets hope they keep up the tempo.

=====

MYSTERY LIGHT REPORTED IN W.A.

MINGENEY . (The West Australian) 9/1/64

A mysterious light which moved across the sky erratically was reported here tonight by Mrs K Saggars, a local resident. She described it as " a blurred mass of moving light" which appeared over the town at 9.50 p.m. She and her daughter Mrs Shirley Looke, were sitting on a front verandah when the light appeared from the North West . " It darted up and down , zig-zagging, then turned and shot forward at tremendous speed to the east," Mrs Saggars said. The light, which did not appear to be very high, was visible for about a minute, she said .

" WHY I CHASE ' FLYING SAUCERS' AS A HOBBY "

BY GEORGE D. FANCETT MASS. USA.

During the past almost 17 years I have chased ' flying saucers' as a hobby while going to college, serving in the Armed Forces, raising a family and working full time in my Y.M.C.A. profession. The 'flying saucers' were always present to be pursued no matter where I lived in Nth. Carolina, Virginia Wisconsin, Sth. Carolina, New Jersey, Panama Canal Zone, Rhode Island, Massachusetts, and Pennsylvania.

Often I've been asked " WHY do you chase ' flying saucers' as a hobby? ". but this is the first time that I've ever seriously considered this complex question. I've found there are many answers.

Having participated in saucer skywatch parties in 1947 and sputnik skywatch parties in 1957 I found myself faced with this question, "Which came first the chicken or the egg?", Did the earlier saucer sightings give mankind the inspiration to travel into space himself or were both achievements related?

Much of my spare time, money and energy were spent in the pursuit of answers to this very complex and fascinating mystery- the riddle of UFOs, officially named " Unidentified Flying Objects" and commonly called 'flying saucers '.

The by-products of my search for truth into the world of the unknown have been many and worthwhile. Because of these results I would highly recommend this hobby to other young people and adults as an interesting, educational, scientific, creative leisure time avocation .

This intensive chase of the ' flying saucers' has given me a chance to increase my education in such subjects as . science, history, physics, aeronautics, religion , astronomy, space travel, meteorology, optics, aviation, anthropology, archeology, psychology, human nature, meteoritics, and photography , just to name a few.

Opportunities to travel and to meet people from all walks of life, and from every conceivable background have resulted from my pursuit of ' flying saucers. Chances to develop creative talent in public speaking, human relations, writings concerning ' flying saucers' have occurred time and time again both stateside and overseas. Correspondence, phone calls, radio and T.V. invitations, lecture appearances have been but a part of the total UFO chase.

Perhaps one of the greatest thrills that has come to me as a result of my investigations and research, are the opportunities to share this information and knowledge gained with others, whether they be individuals or groups. I receive many requests for help on term papers, exhibits and displays, science fair projects and many other diversified UFO programme from youth and adults alike.

IN this age of conformity it is a good feeling to be among a large number of ' space age' pioneers in a new science called ' Ufology', which is becoming increasingly important at a time when safety and security of the whole world depends a great deal upon the rapid identification of all airborne objects being photographed. tracked and chased in worldwide skies.

UFOs asa Hobby 2/

Such advance studies of 'flying saucers' should help to answer the Question " Friend or Foe?". and help ward off a possible Accidental World War III caused by mistaken identification of various unconventional and coventional aerial objects. A serious study into the propulsion of these objects would possibly reveal the key to space travel both coming and going from our planet.

There are many handicaps to truth in the case of the 'flying saucers' some of them being ridicule, crackpots, public and press apathy, conformity, censorship and secrecy just to mention a few. There is a growing demand in the world today for people who are willing to explore the unknown in order to bring about truth and understanding to the ' flying saucer ' mystery and the confusion that results from it. Such persons must be able to keep their feet on the ground, even if their heads are in the skies.

These people must ne prepared for name calling which always occurs to sincere UFO researchers. It is not uncommon to be called a 'Crackpot', 'F.B.I. Investigator', "Communist Spy". " Man from Mars ", this I can tell you you from personal experience . The advantages however far outweigh the disadvantages in this pursuit of truth . I have sought not fame, nor fortune, but have found facts and friendships instead . Such a chase for the past 17 years has resulted for me with an open mind' and not an empty head' philosophy of life.

Most important in my study of this subject and the relationship to God and His Universe , has been the realization that we are not alone. And if the heavens declare God's handiwork, then the UFOs, so called ' flying saucers' are related to God the Creator and have a definite meaning for all of us, perhaps even the key to the conflicts between science and religion. Life is not unique to this Earth and the ' Flying Saucers' are real. I strongly believe there is a relationship between these two factors. That is " WHY I CHASE FLYING SAUCERS AS A HOBBY! " at present and in the future, even as in the past .

=====

ANOTHER UFO STUDENT EXPRESSES HIS VIEWS.

" The Newsletters in these coming difficult times seem to me to be very appropriate and the Coming of the Master to Earth is most significant. Everyone should work together to set a purpose either helping in (The Universal link " or in UFO societies, but here I must speak my mind sir, I've given up the UFO Club and theone also. "Why, ?" you ask, I believe they are now influenced like Gray Barker of the USA, by government pressure , take one instance , the absolute concentration on scientific principles as divorced from Religion . thus ignoring first God His Son the Master and all spiritual values.

This will bring only one outcome I think in that those Ufo Clubs will eventually bring upon themselves , that of entirely officialdoms domination by scientific advisers. thus stiling their own individual efforts. This of course is my own assumption . God's laws need no primitive mans proof from their scientific egos, they

show immediately in the disturbed natural laws , first slowly by degrees. Humanity follows nature by the decline of morals , the abusive disregard of Divine law. mocking not only his fellow man but by supression of truth accompanied by atrocities , arrogant and materialistic , giving money value a higher pr stige than Divine law or their fellowmans considration . Have just read Orfeo Angelucci's book . There are those in the Ufo field who laugh and scoff at such experiences. telepathy to them is one of the fringe lunatic classes.

One thing however our space brothers have in common in their information in that they warnof impending cataclysm . UNLESS. man ceases form his insane scientific bid for power. .

The Future then of the UFO research is obviously should be then one of high moral obligations which in themselves are only basically found in those which spring from the Spiritual qualities of man, hence to me any attempt at real reseacrh must include a comprehensive one which not only has a scientific basis but also that of the spiritual The belnding os Science and religion the true key to all the msyteries of Life, Man and his God. Is it any wonder then thatI have turned away from those who refuse to take this 'comprehensive outlook?and base only their attempts to find the solution in the avchues of the material concepts alone.

=====

Ed. Comment. . The views expressed by the two writers one in the USA and the other in England. show us how and what our fellow workers in UFO feel and think, and is very indicative of the process which is going on am mongst us. we can only hope that somehow there will come the merger of thought so that we may not become partisans and take sides one against the other. but it appears that such a merger is not possible unless some real breakthrough is made. This we can only hope for in the near future. ..

 1947 Contact Story Cont. from page 4.

It had pipes crossing it in several directions from six of which came the hissing sound, but no smoke whatever. The part that touched the ground had bent leg-like supports which bent even more when the ship landed . It seemed to be made of white-gret metal which was not silver. While takingan overall look at it , I noticed a wall on which there was a window made of glass or something like it. I saw t en two people looking at me with curiosity. They were very strange looking . After a while one of them turned to the inside of the ship and appeared to be talking to someone . Presently I heard a noise and a door opened from under the border. Three people came out. They were dressed in a kind of transparent overalls which wrapped them completely , including their heads and which were inflated like an outomobile pneumatic. At the back they carried a kind of metallic sack which seemed to be part of their outfit. Through the transparent overalls I could see perfectly well that they were wearing undershirts , trunls and sandals made not of cloth material but of something that looked like aluminum paper. I also noticed that their strange appearance was mainly due to their big round eyes with no eyebrowsbut long eye lashes and because they were almost completely baldheaded .

1947 contact story cont.

They had no beard and their heads were big and rounded, and their legs were longer in the proportions as we know them. Their height was about 30 cm taller than I, and I am 1.80 m tall. The most interesting of all is that each looked like the twin brother of the others, both the ones who wore the overalls and the ones who did not and who were at the window inside the space ship. One of them carried a small metal tube and was pointing it at me. I noticed that they were talking to each other. I could hear them perfectly, but could not understand nothing. They spoke a language I had never heard and it sounded nice and pleasant to my ears. In spite of their great size, they moved with great swiftness and formed a triangle around me. The one who held the tube-like metal piece in his hand motioned at me to get into the space ship. I approached the door and all I could see inside was a small den in which appeared another door and the end of a pipe that came from inside. I also noticed several rounded planks on the base and on the border. I started to talk, asking them where they were taking me, using a lot of mimics. They understood me, and the one who seemed to be the leader drew a circle on the ground showing the sun in space surrounded by seven other circles. He pointed to the seventh circle and then to the ship, and repeated this several times. I was dumbfounded. Leave the Earth alive? No, that was not for me! I thought over the situation for a while. I could not fight them and that was obvious. They were much stronger and there were a lot of them. Then I had an idea. I had noticed that they avoided the sunlight. I went over to the shade and took my wallet from my pocket showing them my wife's picture explaining by mimic that I would like to go and fetch her. They did not stop me, I left and giving thanks to God went into the bushes from where I watched them. They played like children, jumping around and flinging stones of great size to long distances. After half an hour, more or less, having looked round the neighbourhood carefully, they went inside the ship which took off with the same peculiar noise, and headed north until it disappeared into the clouds. I will never know if they were men or women, but I can say with certainty that they were good looking and appeared to have wonderful health. On the other hand, I find it difficult to express their language in writing. I do remember though two words — ALAMO which designated the sun, and ORQUE designating the seventh circle.

The above was published originally in the "Diario da Tarde" of July 27 1947 and upon request again on July 29th 1947.

=====
 Comments. The above account has some strange and very interesting features about it. Firstly it seems that Mr Higgins unaccountably had an inward fear that these contacts were sinister. Also the fact that they did not like to either be in the sun or its rays for he says "they avoided it". Yet they made no effort to restrain him which does not appear that they intended to take him against his will. Had they been sinister with their outnumbers, they could have easily done so. It seems therefore that it was an open invitation, that was left to him to accept or not. The fact that he used a subterfuge to outwit them, is a little weak in that it could well be that they had ascertained his thoughts and guessed at his reactions of not wanting to go with them, hence the fact that they made no effort either within the craft or out of it to again repeat their offer.

ANOTHER BRAZILIAN LANDING ... JAN. 1958

The following is transcribed from SBEDV No. 15 Bulletin, this case happened in the State of Ro Grande de Sul at a place called Itapoia and was recorded in the Newspaper "O Diario" of the city of Belo Horizonte (Minas Gerasis) of Nov. 30 1958. Professor Garrion, teacher of Geography at the University of Rio Grande de Sul , tells of the experience of 6 reliable persons who witnessed the following :

" In January of 1958 something was seen coming down from the starry sky at an enormous velocity and landing, or better stopping 2 meters above the ground at the margin of the deserted and dark Balck Lagoon.

These people reported that the object was of a circular shape , and emitted an orange - red light and had a diameter of about 10 meters and a height of about 3 meters . Floating in the air. , they saw two people of strong complexion about 2 meters tall and wearing white overalls with darkish collars and white belts.

Three other people appeared but these had a child-like body complexion and were wearing brown overalls and brown belts. They were white and had long black hair reaching to their shoulders .

They looked like ordinary men except for their very fast goose-loke gait in walking , which gave the impression that they had stiff legs, although they moved back and forth with great ease.

One of the witnesses said that he had the impression that their feet did not touch the ground , and that they appeared to be propelled by something like the incoming tide . Nevertheless footprints left by them were later discovered. These strange beings did not seem to show any interest for the things around them and they were always moving incessantly .

The quieter ones were the smaller ones who stuck together all the time. They moved toward a house about 500 meters away but retreated again as to a flash of light which came from the ship .

They stopped twice half way to the house, both times when the lady of the house opened th front door to call her husband who was outside .

The steady flash of light made the house orange and red.

On the place of landing the only visible signs were the footprints made by them -- smooth heels and soles that left star-like imprints on the ground.

There were also prints of bare feet with protuding heels and very long toes which could not at all be taken for footprints of ordinary people.

The animals around did not show any agitation. The three dogs which guarded the house and which were very aggressive, did not make a sound, nor even moved from the place where they were lying :

=====

Comments. It appears very strange that the husband of the house did not see these people or make any particular notice of the orange - red glow which according to the witnesses lit up his house, further a ship as large as this surely would have noescaped anyones notice out of doors as it came in. especially by the light it gave .

No comment is made by the observers of any attempt by them or the visitors to contact each other. which indicates that the observers were not noticed by the visitors or if they were they were ignored, and humanly speaking of course the observers may have been too scared. which is understandable.
