SURVEYORS OR SAVIOURS. WHICH?.

One of the things which is very apparent in and among saucer research workers is the difference of opinion as to Why? or What is the purpose of the visitation to Earth at this period of time by these people who we believe in general amongst us come from outer space. or at least are extra terrestrial if one wants to be highly technical.

In a recent broadcast here in Adelaide , a member of a flying saucer organisation , in an interview said he did not believe these people were coming here to help us in any way . but more as on an surveying mission.

This despite that on other occasions he has totally contradicted this statement. as he did also in the broadcast at a later stage when he spoke of George Adamski.

Now he is , as is every one else , entitled to his views, although we much prefer he would be consistant in his public statements from time to time. Your Editor has not failed to insist and present his views on this question but at the same time he does not overlook the fact that their mission is one which entails that of surveying as well. but does not by that very term imply that there is a plan behind all this.

I have insisted that they are working to a GREAT PLAN and that one is of a Divine Origin and that the ULTIMATE of the Plan will be to assist those who are in that Universal Plan of Law and PURPOSE to overcome those powers which are now setting up the fronts for world conquest , having deluded mankind into believing that they under the guise of Peace are for the betterment of the world and mankind in general, feeding them on the sops of brotherly love, without reason being given to the true qualifications which go to make such a possibility.

Now to bring about such a stage of developement for the setting up of the Divine Plan. there must of necessity be a stage of PREPARATION which we are now going through . and that preparation requires if one might term it so, a surveying of conditions. for no man knows the hour. No, not even the angels(messengers) from heaven , (outer space) Thus they stand at the ready, as would any other Army, KEEPING AN EYE ON THINGS till the command goes forth for the next stage of the Plan . This then IS SURVEYING .

Let us return to the statement made in the broadcast.

Does not the very fact that he admits they are here to survey in itself imply that to accomplish such one must work to a Plan. whatever it may be.?

When our own men of earth set out to survey a territory, or even a project Do they not first of all have a Master Plan in mind? of what they desire to accomplish by this survey?

How can they set about a survey without first a formation of purpose before them?. and an ULTIMATE OBJECT IN MIND MUST IMPLY A PLAN .

Here then , is as I see it. that the brothers from space ARE working as surveyors. this despite some ridicule recently from a religious friend of mine who goes about preaching a doctrine which I myself feel is the TRUTH. but his Bull dozing methods would never convince me. nor am I afraid will it help to convince others. hence he agrees in the possibilities of the angels messengers . but not the machines or the need to survey. I could quote quite a lot to prove this but prefer to return to the main theme.

There is no lack of proof that they ARE surveying certain areas. For although they have appeared in some of the stragetical places they seem to have done no more than to have kept a watchful eye on things.

To name a few. Rocket launching places. Atomic or nuclear fission stations aerodromes. and most of all for numerical records. the fault lines of the earth where geological weaknesses lie. especially over volcanic or extinct volcanic areas and places where earthquakes are occurring or most likely to occur. Here in our own State of South Australia. one of the places which has had a great deal of occurrences of sightings and events is the very place where there are 7 extinct volcanoes. Like wise in Melbourne, around the outer limits. the same things. also the maps supplied to me personally by the University of Adelaide. which depict the geological fault lines of Australia and especially our own State, when compared with the sightings of saucers when pinpointed onto other maps almost coincide 95 per cent with those very fault lines. Surely this is not just coincidence. as others around the world have found the same pattern exists in their countries in relation to the same fault lines. Surely under such evidence we cannot deny that some sort of surveying is going on . Is it not comforting to those who BELIEVE in God and His protective care, that HE through His messengers is keeping a watchful eye on HIS PEOPLE. and that through the watchful eye can give the order to GO FORTH and DELIVER when the time is ripe.

Is it not therefor more logical to assume or believe that these people are not merely surveying earth without some definite plan.(for such would mean they are just sight seeing. such an allusion is an insult to them). but that they are doing so with a definite and that very much so, plan which they are about to fulfill.

Now once we admit that such is the case then we must also admit the necessity of endeavouring to find out what that plan is. and if there is any such blue print outlined for us to consider it to fit into such a visit from space of messengers. (angels) at such a time as this. I have sort to find such a plan and I can only find it amongst those written in the Sacred Volume of Law The Universal Law. not any man made one. and once one begins to study and compare these two events together the exactness in which they fit is staggering to the imagination. for it causes wonderment and awe as one sees the Plan for this Earths complete redemption being fulfilled before ones very eyes. Surveyors and Saviours. YES BOTH. We challenge you to study and prove it for yourself. It will not only amaze you but thrill you to know it is so.

Now this does not mean that as your Editor I concentrate on this phase of saucer research, despite the fact that there are those to suit their own advantage claim this to discredit me and UFOPIA.

This is totally false. speaking now for us all as a society and myself. we openly declare we are vowed openminded researchers in that we do not refuse as others do to face the issues of the concepts which this subject produces on the religious or psychic metaphysical sides. rather we enjoy delving into ANY phase which may produce some of the clues, so many of which are missing to make up the complete picture.

After all we are dealing literally with things not belonging to this world and hence we should expect to find some of the things related to them as not fitting into our own limited concepts. We do not believe that they can be properly termed supernatural. for such really does not exist. THE SUPERNATURAL IS ONLY A DIVINE LAW OF THE FATHER WE AS YET DO NOT UNDERSTAND OR HAVE LOST THE KNOWLEDGE IN OUR DOWNWARD TRENDS.

These brothers from space live in a closeness to the Law of God which we at one time also enjoyed. Hence they are LIVING in the law and have all the benefits the law produces. this then endows them with abilities which seem to be to us in our kindergarten state. to be beyond our comprehension. hence to find some way of expressing it we call it suocer natural because it is not natural law to us in action. but is IS natural law of science. excatly the same as the radio was and the T.V. It was a natural law of scientific electronics. but our forefathers did not understand it. or know of it. and had they observed such the would have been brabded as a lunatic or heretic, or even in some cases been burned at a stake. but we FOUND out the law and now know how it operates so what was supernatural is now wcommonplace.

The abilities of the space people and their craft are just the same, they are using a scientific law or laws which produce the abulities to do the things they do with their craft and themselves.

Now back to our common place surveying work. YES we dig, we scramble among the reports etc etc. perhaps more efficiently than those who so loudly claim to be purely OBJECTIVE. Being aware that this game is filled up with all sorts of people we are also wary, and prefer not to be gullible, and get excited and wave our hands around and exclaim "Oh its wonderful" "it's fantastic" and get all emotionally overbalanced and rush into print and into statements which only go to show how liek asilly teenage girl would be.

Flying saucer research is more than tabulating the sightings and taking recordings of peoples experiences, it means discussions, exchange of opinions and we are proud to say our meetings are planned in such a way that such discussions take place amongst all present.

A sighting is not merely taped and played, or read out, and excited comments made on it. or a garbled number thrown together, but each is taken and evaluated for its worth. This now only makes for the variety of opinions to pass their opnions on, and they are many considering the varied membership. but we have found it is an excellent training ground for the newcomers to gain and gather knowledge to fit them to become themselves investigators. so that it is not a case of a one man dictatorship, or a Booh-Bar carrying

SURVEYORS OR SAVIOURS (4)

all the offices and the rest dragging behind and bleating like a lot of sheep Investigation if it is to be called such must and can never be the work of one mind there MUST BE the sorting out and classifying by a team of individuals who have trained themselves for such research .

Hence we as a society believe in the surveyors as an object of study not merely because we see them fitting into a great plan , but also that the very sightings themselves and the reports require a great deal of careful study which prove more than interesting. but we DO keep our feet on the ground. even if we do believe our brothers from space are of a higher order than us mere mortals.

Hence we too like so many others keep the records and tabulate, and find some intriguing answers. In a way we too are surveyors for we survey the works and manifestations of the various forms of craft. their movements. their speeds their strange habits of turning up at certain times or places. all this goes to making one a good surveyor of the subject which has become of such interest to us. Finding the answers is not easy. so that we have to of necessity dig deep. into subjects and taboos at times which the objectivist would be scared to lest he soil his fans opinions of him. it calls for humility to be a surveyor. for the deeper you go the more you are conscious how little man knows and how much he still has to learn of the vastness of the great Plan .

Maybe in a way too, we hope to be Saviours, in a very human humble way. For no Saviour yet was born who did not experience sacrifice. for others. Maybe our little efforts to bring the knowledge to our fellow men. insignificant as grains of sand on a mighty shore. but nevertheless a part of it. We are but atoms in the whole working for a final end with them these aids from space. toward the New Age. The Great Day. The Golden Age. so many names so many approaches but all seeing the light ahead. and knowing that there IS a new dispensation about to take place and that to attain it first there must be swept away the dregs of earth. that have hindered for so long this Plan These forces. not only ethereal. but human forms here on earth. spawned -from the rebellion of the planetary leader who fell and who was cast to earth. his seed, and who have and are now very much at work in the vast plan to overthrow those who come from Space to put back in order that which became chaos Yes we survey them too, and know of them and are not ignorant of their power for he who underestimates his enemy is lost before he starts his war . Yes we dig and dig. and find that this Earth is a wonderful place, for we know who it rightfully belongs to. and these space craft. are making their presence felt e'er the last act takes place of the grandest drama of all. So we too with them are not only surveyors. but in as much as we devote ourselves to this end . we too shall help to become Saviours to our fellow men.

.....

AN EX- AIR FORCE PILOT TELLS HIS STORY .

In the report of the Space Convention held at Giant Rock George Van Tassell relates the following in his latest " PROCEEDINGS" Vol 8 No 1.

A man who introduced himself as Mel Noel, addressed the 6000 people on both days of the Convention . He stated he was an ex-Air force pilot, having left the Air Force under a medical discharge in 1957. He said that there is a 10 year statute of limitations imposed on Air Force personel, that does not permit them to talk publicly on any event they are involved in while in the Air Force .

What he disclosed occurred in 1954, and he said " he had to live with it stuck in his craw for 10 years, and now he just had to tell it to the people all about it.

Ex- Lieutenant Noel said they were flying North toward Canada over the state of Idaho, in a formation of F-86 jet aircraft. This formation was flying at 38,000 feet altitude, at dusk, when suddenly 16 disk-shaped objects came from above and flew in front of them in a "V" formation . The four F-86 pilots continued in their flight following the 16 "saucers", while they took pictures with their gun cameras, at the instructions of the Colonel who was in command of the squadron .

Mel reported that the "saucers" in formation flew at times from five to six times faster than their F-86 speed, which was 680 knots per hour. The jets increased their speed above Mach 1. which is the speed of sound, or 750 miles per hour at sea level. He said the saucers flew circles around them. He felt like he was flying an old Wright biplane instead of a super - sonicjet . This continued for 12 minutes. Mel said that the saucers at one time flew close to about 1000 feet away from them . He said they would speed up, stop, and reverse directions, and perform manoeuvres impossible to do with conventional aircraft. Mel said when they landed all the film was removed from their gun cameras and sent to Washington.D.C..

A week and a half later whilst flying in the same area on another assignment , Mel says they were again accompanied by the saucers . Suddenly the Colonel instructed them to switch to another radio channel . Mel says he heard the man in charge of the saucers speaking in slow English to the Colonel.

When they landed after this flight, the pilots were instructed to fill out forms telling exactly ^{what} they had seen, but nothing about what they had heard over their radios.

Mel said that later the Colonel told him of an arrangement made by the people in the saucers to meet the Colonel in a given room in a particular motel in Phoenix , Arizona - when he was flying out of Luke Air Force Base.

The Colonel said he was furnished an Air Force Staff car by his superiors to drive to the motel. The Colonel went to the motel early, and soon two men came to the door and ^{he} admitted them . They said names were not important, and the Colonel could call them " Bill" and " Joe" . They invited the Colonel to go with them , and they drove beyond the outskirts of Phoenix into the desert, where a large saucer was parked. The Colonel said the lights on the car went out as they drove up near the saucer, without the light switch being turned off.

"Ex- Air Force Pilot's Story " (2)

As the Colonel and the two men approached the saucer on foot, one of them handed him a disc and told him to hold it between his two hands. Then they went aboard the saucer, where he found there were both men and women on board the ship.

The Colonel was embarrassed when two gorgeous women came into the room, because he was doing what he called " progressive thinking" about the women- when he discovered they could read his thoughts. He thought the women looked very young and was startled when the saucer commander informed him one of them was 78 years old and the other 146.

The commander, whom the Colonel described as a super- intelligence compared to humans, told him the craft he was aboard was taken into a mother-craft for inter-planetary travel. They told him there was once an atomic war between people who occupied the Moon and the people on the Earth . at the time.

(This probably explains Sodom and Gomorrah of the Bible). The commander told him that reincarnation was a scientific fact to them.

He said one only re- embodies on the Earth when they have failed to make the grade here in their last life-time.

The Colonel returned to his flying with the Air Force a much changed man, according to Mel. The Colonel later disappeared, in a jet while in a flight over the Atlantic Ocean , and was never found.

Mel stated flatly that the Air Force knows where the saucers are from; they know they are here, and that he believes the Air Force should reveal the facts to the public.

Mel Noel is married. His wife was with him at the Convention and they have four children.

He is now trying to locate other Air Force pilots who have had experiences with saucers, and who are now beyond the 10 year statute of limitations.

.....
 COMMENTS ON THE ABOVE.

We accept the story as it is given , many details are closely related to incidents which have occurred and happened to other people. so we have no qualms there. However it must be noted that at least in the account Mel gives no proof of his credentials , perhaps Van Tasell can confirm this for us. Secondly he does not provide the name of the Colonel . for this could be a very good lead to confirm his story and the fact of the Colonel's disappearance would give much further proof to his account if he had done so.

However we have great faith in our associate Geo. Van Tassel, whom we believe would hardly print such a story without some investigation as to this sudden unknown speaker who offers his story at the Convention.

We await some more further details of this remarkable account, for we feel it is another of the strong cases which go to prove our case if all the facts can be verified.

One point however we feel we did not entirely agree on was the statement of the war between the Moon and the Earth at the time stated i.e. Sodom and Gomorrah. we feel that this could have been much early in a pre Adamic period. and it must be understood the commander of the saucer did not say when it occurred.

APRIL SIGHTINGS....

ADELAIDE. 30/3/66.

A woman who gave her name but does not want it published reported the following to your Editor. it was later at the week end published in the paper the "MAIL "

On Wednesday evening at 6.30 p.m. whilst working at a well known cafe which faces the city she said she saw a large object about 9 ft. in dia. hovering for a few minutes over one of the higher buildings on the outer terraces of the city. The building mentioned is about 10 story high. She insisted it was just above the buildings and not higher. at top level with them. It was silver grey according to her, and had around it a rim of what looked like electric globes. the weather was warm and the day reasonably clear. visibility at this time of the day would be fairly good.

This building is on a large terrace which fronts Government House from which the Queen Mother had been residing a few days before. and had left .

It had a thick-dark outline, like one sees in the film of a film negative.

She had called to the other girls working in the cafe but when they had come to the window out of which she had seen it. it had gone.

" I was very excited. I had not believed in anything like this, but now I have seen it"

We present a drawing below of what she had seen .

There are some very puzzling features about the sighting which could be well cleared up if only some others would come forward and state they had seen it at this time.

Firstly .. This terrace is a very busy one . especially at that time of day. Leading into the terrace is the Main St. of Adelaide. King William St. probably the busiest one in the city . at 6.30 p.m. this would be crowded with buses, cars , and people all passing within 20 yards of the building over which the saucer was seen.

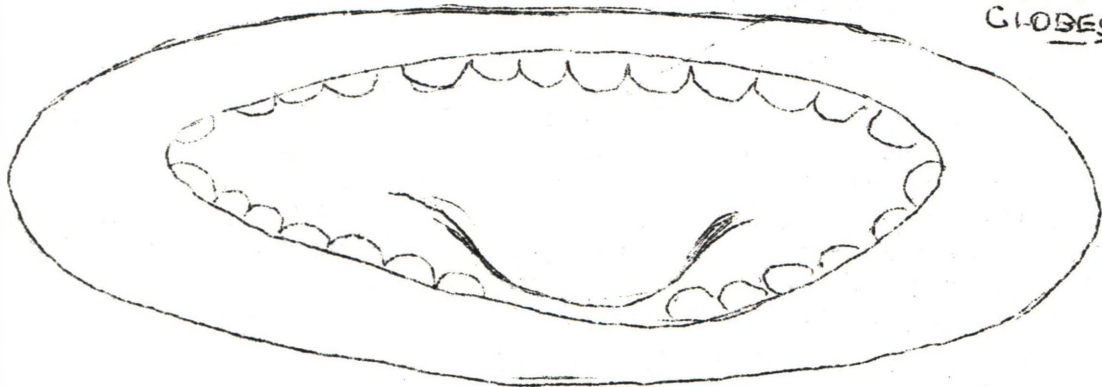

People or traffic moving up toward the terrace as it is on a hill from the northern areas could hardly not notice it. as at the low level near the river it would be in their line of vision. this applies to also to those approaching the building from a westerly direction along North Terrace.

Surrounding the building are many tall buildings of about the same height but it must be admitted that most office workers would not be in the buildings at that time and thus it could be claimed that such would not be a point from which other witnesses might come forward . Also it must be remembered that these same high buildings could also act as a blind shutting out the sighting from many. The amazing part is that at the low river level from which the object was seen . there must have been hundreds either approaching from west, east, or north who could have observed this object at this time. For the building is open to the vision from these points. but on the south hidden as stated by tall buildings.

The lady appears to be very sincere , and coupled with the fact that other saucers were seen around Adelaide within a few days after this. we are very inclined to accept her story although we admit the disappointing lack of supporting witnesses. (See next page for drawing of saucer)

SIMILAR OBJECT SIGHTED OVER PARLIAMENT HOUSE. ON 3/4/66

We regret at this moment that we cannot give more than brief details but a similar object was reported over Parliament House on North Terrace and due to the fact that the above buildings are in close proximity we feel that a small sketch below may be helpful. seeing it is claimed they happened within a few days of one another.

SAUCER SIGHTINGS CONTINUED. FOR APRIL .

MORE REPORTS OF FLYING OBJECTS.

SUNDAY MAIL 3/4/66.

A number of people rang the Sunday Mail tonight reporting they had seen a flying object travelling fast over Adelaide from east to west, disappearing over the horizon. High school students Brian Thompson, and Trevor Millford said it was like a shooting star, but they were sure it was not one. It was three times as bright and had a tail seven times longer.

.....
 A CHRISTMAS INCIDENT. REPORT . (J . Vanderheaven .)

My wife , my daughter and myself went for a fishing trip along the River Murray on the 27th Decembbrr (1965) and were camping outside in the bush the next day on the opposite side , or east side of the River from Blanchetown , jusy on the north side of the new bridge. It had been a hot day and after a couple of attempts to catch fish at sundown which failed , we went back to the spot where we were camping . After tea it began to get dark , and it cooled off slightly but still warm. Our car was facing the south and we had the river at the right hand side. The tent was standing at the back of the car, the opening of it facing the east and the three of us were sitting in between the tent and the rear of the car, facing south and sitting in a sort of semi -circle listening to our daughter play her mandolin and enjoying some cool drinks I suddenly had the urge to look up and turn my head to the left and look into the eastern sky , and there it was, shining just between the tree tops . Look! I cried to my wife and daughter , there is something strange. My first thought was that it was a shooting star , but then at the same time all three of us realised that it wasn't , but a UFO. bec_ use falling stars as they are called never move along like this object did.

Then I looked at my watch . almost instantly , its hands showed the time to be 8.20 p.m. The sighting was fo be correct as follows.

The urge to look up in that particular direction , Say, "look"
 The both looked up and all three of us saw what seemed to be a very bright star moving in the eastern sky, from exactly north in a straight line to the south , much slower than a shooting star, much faster than an airplane , and not high enough for a satellite ~~or~~ ^{and} faster in speed.

The sighting lasted for about a minute and a half , then it changed from a bright silvery shining object to a blueish color, and then disappeared behind some small clouds just at the end of the space between some trees . I would not like to guess its altitude , but it must have been at least 20 miles up , as to the velocity I would not be able to estimate.

After discussing the matter amongst ourselves we were all of the opinion that by its behaviour and the general circumstances it could not have been anything else but a UFO, as we all have seen the normal natural things both in Europe and Australia and other places.

Then while we were wondering about this strange marvel, right in front of us in the southern sky we saw two indicating lights move across the sky from the east to the west , very low and moving very slow, and when it came nearere we could also hear the sound of the engines of a passing airoplane . The time now by my watch was 8.40. p.m. and because of the time between the two events we were now convinced that the first object was not a known one but a UFO.

FURTHER APRIL SIGHTINGS IN AUSTRALIA.

TRACKED BY TWO FLYING SAUCERS.

THE NEWS 6.4.66.

Melbourne Today . A Flying Saucer seems to have taken an interest in a foundry worker, Mr. Albert Strong. 30 of Elphinstone, near Castlemaine.

Mr. Strong said that driving home after shift work about 3.45. a.m. two months ago, he noticed a bright light hovering over him .

As he drove the saucer-like object followed right to his house before it disappeared.

His wife Lynette , told him to say nothing about it , " Because they'll all think your nuts. "

But at the same time yesterday Mr Strong, saw the object hovering over his car again .

It followed him at an altitude of about 2,000 ft and slowed down when he did and accelerated as he did.

He stopped the car three times, turned out the lights and listened, but he could hear no noise.

The object was like a brightly lit top, spinning as it hovered, he said.

MORE SAUCER NESTS.

At Culcairn, N.S.W. near Albury, a number of circular flying saucer "nests" have been found.

They were first seen by Alan Boswell, near a stock route.

One is 12 ft. in diameter and half a dozen are between 5 ft. to 6. ft. across.

.....

DEATH SCENE... MYSTERY LIGHT PUZZLE.

MELBOURNE APRIL 11th 1966 vide ADVERTISER 12/4/66

Mr Ron Sullivan, 38 of Maryborough, businessman , has revealed that he saw a mysterious column of light early last week at the spot on the road about 120 miles n.th. west. of Melbourne where a youth was killed in a car crash on Thursday night .

He fears that his strange experience maybe connected with the death of Gary Taylor of Carnegie, whose car unaccountably left the road and crashed into a tree at the same spot.

Mr. Sullivan said today he was driving from his home to the town of Wycheproof last Monday night when his car lights suddenly turned sharply to the right without any cause.

" Instead of lighting the road they lit up the fence as though they were being dragged by a great magnet hidden somewhere in the paddock" he said.

" I braked hard as I could and as I did glanced over to the right .

"In the middle of the paddock was a great column of light about 25 Ft. high and shaped like an ice-cream cone. It would have been about 3 ft. wide at the bottom and 10 ft. wide at the top.

" The bottom seemed to rest on the ground and it was a brilliant colour.

" For the rest of the way to the top it looked like a rainbow-- there was every color of the spectrum ."

Mr Sullivan said that as he watched, the column rose from the ground without a sound but with tremendous speed. and as the column rose Mr Sullivans headlights returned to normal and focused again on the road. The next day he tested the headlights and found them perfect .

LIGHT PUZZLE (2)

About 10 p.m. on Thursday Gary Taylor was driving along the empty road whee suddenly and unaccountably he swerved sharply left at the spot and crashed head-on into a tree.

A motorist travelling about half-a-mile behind told the policelater that there were no other cars around and he had noriced no reason for Taylor to have swerved on the stright road.

A small dustyimpression in a ploughed paddock is one clue left behind by the puzzling " column of lights" mystery .

The s-ucer-shaped depression is about 3 ft. in diameter and 2 in. to 5 in. deep. It is 50 yards from the accident spot.

.....

SIGHTING OVER ADELAIDE.

SPECIAL REPORT APRIL 5th 1966

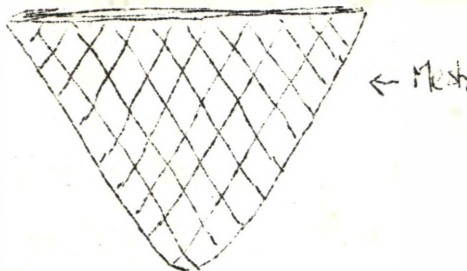

Time 4.30. p.m. The object was observed by four government workers from their departmental office in a high building in the city .

The weather was fine but overcast .

The object appeared as a gre- coloured, dull, approx 10 feet long and 8 ft deepat maximum, width not discernable . from landmarks in the distance and the elevation of the sighting of the observers position , the object appeared to be from 2 to four miles away at a height of approximately 500ft.

The object flew from East to West in approximately 6 second cycles. and at times rapidly changed elevation giving a swooping effect.

Its shape was like an inverted top with streaks around like a mesh (see sketch)

Editorial Comment . We would like to draw the attention of the readers to the great similarity of this description above to that of that on the previous page observed by a man at 3.45. a.m. in Victoria some 400 to 500 miles away the ext day with a difference of about 12 hours in between .

Coupled to this the strange case of the above LIGHT also in Victoria on the following day. This differed in snape being described as a column . but with what we know of the variableness and ability of the UFO to change shape this does not rule out the possibility that this could have been the same object we mention it as a possibilty and certainly of consideration .

LATEST SIGHTING NEWS AS WE GO TO PRINT.

FAMILY SEES 14 SAUCERS. "SUN=HERALD" SYDNEY APRIL 3.

A King's Cross pianist last Sunday sa what he believes were 14 " flying saucers" The pianist Mr Paul Botvos, of King's Cross Rd. Took time exposure pictures of the " saucers" as they hovered over Burwood for about 15 minutes.

The pictures produced showed a streak of light formation zig-zagging across the sky during the 15 min. exposure .

He said last night " My Brother-in - law, Paul Mellicher, had just got out of my car when he said " Those stars seem to be moving."

" Then I looked , I could see the objects zig-zagging towards the north.

" They were silver circles with a darker tinge in the centre. " I grabbed my camera and took the shots on time exposure with the camera held against me as I steadied myself against a pole. All seven members of my family who were present at the time saw the objects.

They disappeared over the horizon to the north . " .

Sightings are pouring in and investigations are being made of these and these will be covered in the next edition of the magazine. also watch for a most enlightening Editorial which appeared in The Bulletin , Australias most conservative papere this week. We will print it in the next edition .
