## EDITORIAL .

"JAMES=== 1966-1967 ?!"

In ancient mythology the God Janus, was a tow headed being looking in opposite directions. ... to the past , and to the future. Hence the Editor felt very much like this mentally, as he commenced the New Year work for the Magazine and the Society it serves . U.F.O.P.I.A.

Looking back over 1966 in its events, proved indeed a very splendid one in many ways, sightings , plenty of reports . an increase; but the greatest of the work accomplished by the Society , was the great openings for its usefulness to public bodies.

T.V. and Radio interviews sparked off much interest . this finally led up to the great opportunity of putting on a public display for a week in one of the great shopping centres as the outcome of one radio talk, and at the request of the management of the Centre. The Results...well it gave us a shock, the public response was amazing. the free literature ( Over 5,000 copies) were most avidly accepted and in the interviews and chats the number of people who believed in the UFO was amazing , and the scoffers, or just not interested, so few , ( about 3 p.c.) being negligible.

Lectures to High Schools . Clubs of all kinds, and Church Groups continued, and as we enter the New Year already there are new opportunities being made to us to fill similar appointments.

Hence we look forward on the other side to the New Years opportunities, and feel more than happy, due to the fact of the organisation growing slowly but surely and with the influx of new and young members the weight of responsibilities made easier on those who have carried the burden rather heavily for some long time. The appointment of the new committee at the elections for the year give great heart to your Editor, and he feels much more time can be spent on things we have had to be regretably only half done, because of lack of workers. Now that these have taken their positions we should have no difficulty in making good progress for the year ahead.

We are pleased to announce the new incoming Officers for 1967 for the work of U.F.O.P.I.A.

PRESIDENT. MR FRED STONE

VICE PRESIDENTS. MR V. GODIC

Mr. R. CHESTER.

SIGHTING REPORTS FILES. MR A. BRAN

LIBRARIAN TO BE APPOINTED.

.....

VISIT BY DR. JOSEPH AND MRS. HANSELL.

The society was privileged indeed to be fortunate enough to secure some of the very valuable time of the well versed Doctor in the subject of UFO, Metaphysics and Philosophy.

Despite an arduous programme he most graciously and willingly gave 3 hours of his time to talk to a number of our members , who had been rallied together at very short notice.

The sad part was that although other supposedly friendly groups knew of the Doctors coming and had arranged meetings for and with him. not one word was given to us so that we too could let him share in our warm hearted welcome to him and his good wife. But We are not without many good friends, even if we do suffer with those who seek to keep all the plums to themselves , and we Praise God that we were not left out. in that we had been alerted thus not officially, but by warm hearted friends who are on our side.

The Doctor, endeavoured to cover as much ground as possible on a wide vista of UFO phases. and it was all too short when he finally came to an end and after answering a few questions had to go to another appointment.

We wish to thank the Doctor, for his graciousness and his time, and especially for the very warm hearted compliments he paid us. coming from such a man we felt humble indeed. It is indeed encouraging to know that there are those who recognise the higher goals of our society, and appreciate them by warm response such as the Doctor gave us. Thank you Sir.

One thing it brought to light was the great activity of UFO down in the South Americas as well as the intense interest there of the people of the countries most of which the Doctor and his wife visited and toured extensively .

Possibly the best way to express our good wishes and feeling is to say GOD BLESS YOU: COME AGAIN, AND IF NOT. THEN LET OUR TIES BECOME STRONGER BY COMMUNICATION. AS WE APPROACH THE NEW DAY . SO SOON AHEAD.

.....  
 TO THOSE MEMBERS WHO WERE UNABLE TO BE CONTACTED AT THE SHORT NOTICE: OR UNABLE TO ATTEND DUE TO EMPLOYMENT OR OTHER DUTIES? WE WISH TO ADVISE THAT A TAPE OF THE DOCTORS LECTURE IS AVAILABLE : AND COPIES IF DESIRED CAN BE SECURED FROM H.Q. RING THE PRESIDENT FOR INFORMATION .

SPECIAL SUPPLEMENT TO THIS EDITION  
 ( Continued from Vol 5. No6)

- " CONSTELLATION ORION"
- PARTS TWO AND THREE.
- " THE RETURN OF JORHM"
- " THE HOUSE OF JORHM "

.....

.....

The above supplement is issued separate so that the previous Part one can be added and bound together by those desiring to do so.

.....

HOW FAR HAVE WE PROGRESSED? WHICH WAY ARE

WE HEADING ??

In the same theme of the Janus comments. it does good to check one's position from time to time, and no better time than the beginning of a new series of endeavours.

Actually, looking back over the years of the "Saucer work" now getting well into the 16th of the Editor; one is compelled to make a survey of all that has been accomplished, and in this we speak on a general scale.

From a mere few clubs or groups dotted sparsely around the globe, has arisen the thousands of Societies, groups etc. which now claim to have their object in the study of the UFO, and they in themselves are as varied as the countries they exist in or the types of reports one receives of these intriguing objects, which have fascinated those who have made a close study of them.

We certainly could not be called all in unity of purpose, nor of methods in which we apply the study of them. For from one extreme to the other the secessities have now become just as varied as the many sects of Christianity.

Generally on a whole however we can claim to have a unified purpose and that is, to understand the why and wherefor of these craft and of the people who have been observed to be seen in them, and at least 90 per cent of the students, agree that they are extraterrestrial.

This then is the only basic foundation of unity. from this we verge into the extreme scientific, (so called) investigators, the objectivists, and in this class alone there is the division of whether you believe in the contact stories or not. Some even refuse to give any consideration to such.

One wonders how much good evidence has been lost along the path by these nose in the air investigators. a few recent cases of contact claims of some long standing have proved that the evidence given to some of the earlier founded groups which were discarded as unworthy of their self opmonated consideration, now brought to light again have shown that there was more in the story than was thought. but the sad part is that much of the original evidence was lost because of the ego of the leaders of these particular groups.

At this goes to prove what our own particular group have urged for again and again. the open minded approach of giving ALL a hearing and from it all sifting the chaff, and NEVER throwing anything aside, no matter how fantastic merely because we do not see eye to eye in the details given. better to pigeon-hole the evidence for some future time than throw it in the waste paper basket.

This then leads to the type of group mentioned. who, trying to be as objective as possible and comparing the evidence to known scientific data. still do not refuse to receive and analyse it even if it does not fit the general prescribed pattern. for they even at times have been proved to be wrong.

The strides made in the last two decades have proved in the aeronautical science and its co-related one of astronomy, that theories have had to be vastly changed. and it is whispered that even the great Einstein could have been wrong in his theory of the relativity of light. but a great deal about this will prove if this is so.

From this we verge to the metaphysical students. and herein there is a division. Some taking a purely "spiritist" approach of messages from so called

highly evolved beings. , whose messages regretably so often disagree from what one channel has said , to that of another. conflict of direction and opinions proving that they could hardly be from such highly placed beings or if so , then they certainly do not all belong to the same source of life and belong to the universe which is applicable to ours. To an already confused world such as ours. one feels that such confusion of thought and claims could not bring about any great amount of help.

However here again we dare not throw away the evidence. but sift the wheat from the chaff. There are those of such messages that DO concur with each other , and as your Editor has stated so often . " By their fruits , ye shall know them " . and watching the product of these groups. especially the performance of some of the people closely associated with them. the RESULTS of their work and claims , soon show from what source their message is coming from . If they be of LIGHT they will produce the fruit of LIGHT , if of darkness , the opposite. lies deception , confusion have long ago been the hall mark of the negative forces and their founder, the Father of LIES.

The other type of Metaphysicians do not deny the reception of messages. but seek to have proof of their claims. in witnesses. not only of the reception , but of what they claim is supposed to be made. about , and this does not mean vague messages of some event which could happen anywhere, or to generalisation , but actual specified data, which can be tested to be false or not.

It cannot be admitted that there are those who have become fanatics. and have done great harm to the cause. I feel that such cannot be avoided in such a wide open subject and the vast variety of people interested in it. This would apply to any such similar subject. so we cannot be blamed if this happens in our midst. practically the best attitude to take in such is to listen to what they have to say and then watch for the results. if they are on the right track, it won't be long before you will be convinced they are not. Their behaviour will probably be your best guide.

Whilst talking of the fanatics. one doesn't have to go far from some well organised groups. to find some within even those aspiring to be so very objective. One can be a fanatical objectivist . and what about those who belong to the so called upper class of saucer groups. How many are in it for the spot light, the public eye. the self glorification . ????

Watch how some stop at nothing to get press comment or T.V. appearance etc, and the main theme of the result of such is What THEY have done , what THEY believe, ask them to share their findings with others, and you find them hugging such to themselves. even not willing to share public meetings with one another. Not even having the grace nor courtesy to let others know of some visitors coming. lest they do not get the plums. and the visitor finding to his disgust .their conniving and intrigues have marred his visit and restricted his objects in mind. because of these silly childish petty personal jealousies.

Looking over the picture, are n't altogether a pretty lot are we. ?  
None of us can claim that we are really unified.

Let us take a brief look at the results of our work. How much further have we progressed from that of 15 years ago. ?

How much more do we know and can prove? Very little if we are honest with ourselves. . We still gather the reports of sightings and a few tabulate them . and an extreme few share them . We read the books of those who write

on the subject and become well versed in the opinions of others. but how much of the subject can we prove.? For instance.

Can we prove where they come from . ?. or How they are motivated?  
 How are the saucer occupants. ? Are they all the same. or are some goodies and others baddies,,. Of course you can elaborate theories of all these things but actually CAN YOU PROVE THOSE THEORIES?

By now my readers will think I have a complete sad and negative opinion of our work. on the contrary. I have a very hopeful outlook. for I feel that there is a reason why we have not found the answers so easily to those set out above. One is that we are not worthy or such, or cannot be trusted with such knowledge. and the other is that like all things the Great Creator does, or His emissaries. they are never in a hurry and work to plan. when the correct time for that plan to be revealed or to be put into action it will be done. If, as most of us believe that the people from space are here with a purpose. then let us remember that we cannot dictate our terms of when and how such will be made known.

On the other hand , it is most highly probable and your Editor believes that it is so, that there ARE those who have found the answer to some of the above queries. but for many reasons it has been found wise indeed and a cautious trained person. does not cast pearls before those who could not understand what pearls are or for what they are used. I believe as even as of old that to humble people around our globe some of this knowledge has been made known for the wisdom of the Ancient of Days was never revealed to the high and mighty. and the records show that the greatest men and women who shared in such knowledge and wisdom. were of the lowest calling or had been BROUGHT LOW to fit them to receive the wisdom and to bring about the purpose of its intention. The reason why I feel we have not found the answers in a public fashion is that we are not intended to do so. and those who so feverishly struggle to find them will never do so either , until they seek in a lowly frame of mind. My suggestion is COME DOWN FROM YOUR IVORY CASTLES OF SELF OPINION , and become MEEK AND LOWLY OF HEART. Then and then only will you begin to see LIGHT and understand its purpose and how YOU fit into the plan.

What then ? Shall we give up struggling. No indeed, GO on , find your place in the plan . but if you are out for your own self glory. you then are wasting your time. and will be left playing with the marbles, you thought were so alluring and pretty. You will not lose what you have found. , but you will Never know the real meaning or purpose behind it all, unless you alter your approach to the subject.

We began with an examination of the accomplishments , and of the results of the work of the groups, and have ended up with an urge to EXAMINE OURSELVES INSTEAD. some how I feel if we start afresh there in this New Year we may really get somewhere. or be left behind. It's all up to us.

.....

BOOKS WANTED.

The following books are wanted by our readers or for our library. Should any having same or knowing of same please send all details to the Editor with price and condition of same.

" THE BRITISH BATTLE FLEET"  
 VOL 11. ( 1915)  
 By FRED. T. JANE.  
 THE LIBRARY PRESS LONDON .

## RELIGION AND THE FLYING SAUCERS.

## A NOTABLE CLERIC SPEAKS OUT.

TORONTO DAILY STAR . SAT Sept 10 1966.

Reprinted from " SAUCERS SPACE AND SCIENCE. No 45. ( Gene Duplantier )

DO FLYING SAUCER HERALD, CHRIST'S SECOND COMING ?

Lord Soper believes in UFO.

" There is some kind of reality behind the stories if U.F.O. " Britain's outspoken clergyman - Peer . , said this week in Toronto. Canada.

He allowed that many UFO reports may originate with hysterical, semi-psychotic , and otherwise unreliable observers, but added : " As a philosopher, I've always believed it fallacious to rule out 100 per cent of any subject because you can prove that 90 or even 99 per cent is erroneous."

Lord Soper— or, Dr. The Rev. Donald Lord Soper. ---

said that, when he speaks in the open air at London's Hyde Park and Tower Hill, " More and more of the questions have to do with new concepts of time and space. Are there extraterrestrial beings? Is it possible that they have contacted or will contact us? What significance does this have for Christian theology?".

The Methodist peer said he considers these questions enormously important .

" I am impressed by certain pieces of evidence for the existence of UFOs," he allowed.

" For instance, my daughter , who is married to a Cambridge professor, and is not the kind of person given to seeing things, observed a UFO.

" I am impressed by the fact that photographs taken of various UFOs, sighted in such disparate places as Australia and California have been identical."

Lord Soper said the possible reality of the UFOs " is taken more seriously in Britain , perhaps than in North America because we are more sophisticated."

If there are beings from space, what are they like ? "

" Well , lets hope they're friendly," Lord Soper quipped. " I hardly believe they could be retarded as we are . "

He speculated that space beings could exist in forms totally alien to our concepts of living organisms.

" It is possible that sentient beings could exist in this vast universe who have none of the physical senses that we have. Conceivably , they could exist as a mass of radio waves, or something equally as strange to us who are so used to thinking in anthropomorphic terms."

If beings from space do exist, and ever visit earth, what impact would this have on Christianity? What about the concept of Christ as the unique expression of God. ?.

" If there is intelligent life on a star like Epsilon Eridani, or on the planets circling it, these beings must have their own incarnation of God," Said Lord Soper.

This fact would not invalidate at all the picture we have of God in Jesus Christ. Christ is the human photograph of God, but beings on other worlds must have their own appropriate photographs of the Eternal Spirit. "

One thing , for Lord Soper, is virtually certain—" beings from other planets

"Lord Soper speaks out"(2)

will share our fundamental moral concepts.

It is inconceivable to me that, for instance, any civilization could regard as a good thing, or make virtue of violence as an ultimate virtue."

And at a recent symposium on extra terrestrial life, Rev John Lynch, a Catholic theologian and astronomer at Fordham University; said that beings from space may be morally superior to us because they have escaped a "fall" such as man experienced in Adam .

" Our extraterrestrial neighbours who, like ourselves, had fallen we would expect to be much like ourselves," added Father Lynch .

Dr. Geddes Mac Gregor , a Presbyterian minister on the staff of the University of California's graduate school of religion , said recently; " There is but one Christ, our Lord. But this does not exclude the possibility that there are millions of other divine incarnations throughout the innumerable galaxies."

Even Protestant fundamentalists are speculating about UFOs in terms of Bible prophecies.

Lester Dolphin Jr. research physicist at California's Stanford Research Institute, said; " The mounting evidence leads me to believe the UFOs are extraterrestrial in origin , piloted by intelligent beings . Their appearance in recent years is probably associated in some way with the imminent second coming of Jesus Christ ."

There are ministers and priests who report seeing UFOs, One of these is Rev. Dean Johnson, Rector of St. Peter's Episcopal ( Anglican) Church Sycamore. Illinois U.S.A.

Father Johnson told the " Star" that on May 19, 1963, he and his wife saw an enormous circular craft which descended to almost tree top level, " and seemed to be watching us ."

The incident occurred on the shore of Lake Michigan near Chicago. There were two rows of windows in the craft, one row lighted and the other dark. The vehicle emitted no sound whatsoever. The Johnsons had it in view for 20 min.

Others also saw it and local newspapers and radio stations were swamped with calls.

" What we saw in daylight, definitely was a craft, but it definitely was NOT of this earth , " said Father Johnson.

" The only natural conclusion is that it came from space..'

The Priest said that he regards a public landing by a UFO " as probably inevitable. "

What about the theological implications of visitors from space?.

" I have thought about this long and hard," Father Johnson said.

" I believe that it is possible that just as Christ was the incarnation- or embodiment- of God on Earth, incarnations have appeared to other civilizations in space. But these incarnations could be different, conceivably in form of a woman , or even a series of incarnations.

For me the reality of UFOs simply make me realize that our relationship to God , and to the universe is much wider than we have thought."

Inevitably, the crackpot groups have adopted " space theology."

In Texas , there is a cult whose members call themselves not Christians but , "Jesusites" or " jesuians" . They say that Christ was adopted

" Lord Soper speaks out ( 3)  
being from another planet, called Heaven , who returned home in a flying saucer but promised to come back to earth at some future date.

To the Jesusites, modern Christianity is a mythologized version of these straightforward events.

Some astronomers, notable Russians, have speculated that Old Testament stories of angels may actually be ancient reports of UFO landings.

Some scientists have speculated that " tektites"— mysterious glass-like stones which contain radioactive isotopes of aluminum and beryllium- might be remains of experiments conducted by space visitors.

Also strange art, especially drawings showing " roundhead" figures in the French Sahara, could be images of spacemen .

Rev . Helmut. Wipprecht of the United Church of Canada, in Cobalt, says that biblical description of angels fits " intelligent beings from space The star of Bethlehem probably was a space ship, because stars do not stand still and hover over one place."

.....

The Editor is pleased to add the above expressions to the long list of noted people who have courageously come forward and had their say about the UFO.

The convictions of men such as above added to those of the scientific and academic world , as well as those of the aeronautical witnesses, and the ordinary man in the street. make further proof of the great impact that the UFO have made and will make on this world of today and the near future.

.....

RATS FROM SPACE.

" SYDNEY SUNDAY TELEGRAPH " Jan 15 1967

Could these strange " creatures" people say they see coming out of flying saucers be extraterrestrial rats ?.

Or perhaps robots in the shape of be-winged , be-clawed, one-eyed, two-legged nearly human beings.

Following reports that people have observed what they described as " humanoids" emerging from ghostly spaceships in various parts of the world, we had a call from Dr. Miran Lindtner.

He is President of the U.F.O. Investigation Centre. N.S.W. Group.

He is also a veterinary research scientist with the Dept. of Agriculture

Dr . Lindtner said the oft-mentioned " humanoids" could well be experimental animals sent from other civilizations- just as earth's space authorities have used animals in research.

Why shouldn't other beings, the same as humans, be sending their own trained animals or robots on advance missions to gather data about Earth?"

Naturally, he added , the superior beings would follow later .

.....

Whilst Dr. Lindtner has a right to his views. we are somewhat surprised , or are we?, that he has grossly overlooked the great amount of evidence which has now been "dug up" from past records which indicate that the visit of space people is no new phenomena. and hence any experimental stage they MAY have been inclined to follow of sending such animal forms would be long ago accomplished, i.e is they ever needed to do so to find out about us.

## OTHER ARTICLES FROM HANS LAURITZEN AND ELLIOTT MAGNETISM .

" UFO'S AND THE STABLE HYDRO MAGNETIC FIELDS FROM THE  
MAGNETOSPHERE. "

.....

A small part of the universal potential is transformed in the particles of matter into magnetism and other forms of energy thus providing the particles of matter with their rotation . Therefore within the same field of universal potential all stable particles of matter possess the same angular movements. (= mass x velocity x radius).

Therefore the angular momentum of a solar system with planets is nearly the same as of a solar system without planets. The elementary particles consist of a great many vortices of a fixed geometrical structure. When electric vortices of plasma with the same geometrical structure are created , it is possible to draw enormous amounts of energy off the unlimited universal potential. This procedure is used in the magnetohydrodynamic plasma motors propelling the more advanced types of flying saucers.

In the magnetosphere of the Earth, interactions are taking place between the geometric fields and radiations from the sun ( and the planets) creating propagating hydromagnetic shocks waves ( streaming quasimagnetism ) as well as independent stable fields of quasimagnetism of very varying forms and dimensions . This is due to the free ions and free electrons ( many radiated from the sun ) , which by the geomagnetic field lines are made to move in traces with such a geometrical form that those previously unknown kinds of magnetism are created. The usually circular stable fields of quasimagnetism are often combined into more complex shapes but certain shapes are more stable than other shapes. Very great fields are often cylindrical, smaller fields can be oblong, and quite small globular fields are seen . They are moving along the magnetic field lines , but turbulences in the magnetosphere can cause them to move nearer to the surface of the Earth) atomic explosions , ray-cannons, outbursts from the sun often corresponding to certain positions of planets and other things). During the latest 20 years the magnetic field of the Earth has decreased , and during the latest years the decrease has been about 5% per year. This means that the observations of such moving stable quasimagnetic fields will increase in future, as further decrease of the strength of the magnetic fields of Earth has been predicted. When the quasimagnetic fields consist of pure quasimagnetism, they are relatively harmless. But when the quasimagnetic fields are locking up static electric fields of high charge they are very dangerous and can cause death when being touched. Such luminous quasimagnetic fields have of course been observed many times during the ages, and numerous written reports on them have been found. Unfortunately all these things have been kept secret because of the military importance of the use of quasimagnetism .

The phenomena taking place in the magnetosphere are being explored under the Orbiting Geophysical Observer ( OGO) programmes. In the OGO-B Experiments under magnetic Fields Experiments the Goddard Space Flight Centre is examining and measuring the interaction of the solar and geomagnetic field, ( magnetopause, shock wave), local field sources such as ring currents, thus providing an opportunity to study field fluctuations. Rubidium-Vapor and Flux = Gate magnetometers are used. Data from the experiment will be vital in interpreting and understanding particle measurements obtained by other experiments.

In the OGO-B Experiments under Magnetic Fields Experiments by means of Tri-axial Search Coil Magnetometer the Jet Propulsion Laboratory and University of

Lauritzen Article ( 2 )

California in Los Angeles are studying the nature of extremely low frequency variations in the terrestrial geomagnetic field, in the interplanetary field, and in the vicinity of the magnetosphere, in order to determine the relationship between fluctuations in these regions of space and the simultaneous variations at the Earth's surface. These studies are important to an understanding of the propagation of hydromagnetic waves and the possible particles of acceleration mechanisms.

In the OGO-B Experiments under the Ionospheric Experiments by means of Spherical Ion and Electron Trap the Environmental Science Service Administration are undertaking experiments to provide data on low particle densities in the transition region between the ionosphere and interplanetary space. Information is also provided on ion masses, fluxes, direction of particle beams, and polarity and magnitude of the space craft potential .

Under Project Magat the Canadian Government Scientist , The late. Wilbert B. Smith ( known to many saucer people ) studied the effects of the hydromagnetic shock waves at the Earth's surface. He used sensitive , magnetic instruments placed in planes in order to find what was called " places with reduced magnetic bindings", because quasimagnetism can cause " black-outs", stop motors thus causing many plane crashes. But it is horrible that this very important information is being kept secret from civilian people. This is not worthy of an intelligent civilization .

It is well known that the American Air Force has several services occupied with the official research on flying saucers as for instance the Wright Patterson Air Force Base in Dayton Ohio, and the Holloman Air Force Base in New Mexico. So it is not surprising that several services of the American Air Force making research and use of quasimagnetism for air and spacecrafts are also found there. Let me mention just a few services making use of magneto-hydrodynamic plasma.

- 1. " Air Force Missile Development Centre. Holloman AFB. N Mex.
  - 2. Aerospace Technical Intelligence Centre. Wright Patterson A.F. B. OHIO
  - 3. Foreign Technical Division , A.F. Systems Command As above.
- and numerous others.

It is of the highest importance that all good forces are used to put this secret keeping to a stop as soon as possible. so that the truth can be made public.. The Truth must spread to the people , who have certain scientific education abilities to handle the same , and a certain intelligence, as only thus can the responsible authorities be helped out of the disastrous situation in which they have placed themselves due to the long too close kept secret data. Only in this way can the problem be solved.

HANS LAURITZEN .

.....  
 ARE WE WORTHY OF BEING CONTACTED ?.  
 BY HANS LAURITZEN .

If you tell a man , that Earth is constantly visted by crafts from highly evolved civilizations in the universe , you will often meet the question....  
" Then why don't they contact us ? "

"Are we worthy of being contacted, " (2)

Then you explain that many people have been contacted. You Tell a little about it. And the next question will follow: " But why does it apparently happen accidentally at deserted places?". If space crafts come to Earth from other planets , it would be natural if they landed at central places. contacting the leaders of Earth. If they did so, I would believe you".

And there you are. Yes after all, why don't they land in order to contact our governments ? . You should think that they could well do that too. But, on the other hand- why should they actually do so?'

They hardly need our help. But they could help us. They could give us some scientific news, which would make quite a revolution in our society. And they could give us good advice in political cases, help us solving all our complex problems.

But would we listen to what they had to say, and do as they recommend? Couldn't it be thought that people would look at the spacemen as suppressors? And that we would plan a war against them in order to usurp their values? The people of Earth are so marked by egoism, that they will want to get as much profit as possible for themselves.

Try once to remark how humans are against themselves. See what schisms exist among humans. Everybody is fighting against everybody. All you have to do is emphasize yourself as much as possible at the expense of others. Only what can bring advantage and prestige is worthy of interest. This is impressing everything from the daily life of the individual to the relationship among nations.

Many people are choosing their friends according to their social position and prestige. And then only give expression of opinions which can give popularity and bring advantage.

Countless of conflicts and discussions occur daily . In the family, many situations may arise. where egoism causes abating and hurting words. And you can always find causes for quarreling with the neighbours.

In trade and industry , you clearly see everybody's fight against everybody . It is the clearing way of all rivals to the higher position that matters. Backbiting and plots thrive. You don't have to help the others, you give no information or advice. You wait until you can boast about it yourself.

You talk abating and unfriendly about those who are not present-- not at least at the parties. or conferences etc .

Among the Ufologists we are not at all innocent of the above remarks for we find many conflicts and hostility to each other .

The papers are filled with reports of violence, assault, murder, terror, and other crimes.

If the flying saucers would land on a military base of any great power, how could we make sure it wouldn't be seized at once in order to make the military of the land in question , have a lead in the military race for power and conquest . If the leaders of the Earth were contacted by the spacemen, wouldn't it be likely that such an event would be kept as a secret, because it would be political and military advantage.

( The Editor adds. .. Maybe political suicide to admit such publicly. hence the dread silence lest it harm the party or the ego of the personage)

" Are we worthy of being contacted ?"(3)

You will find a particular violent fight for power in the political life. Here all tricks are used in order to hurt the others as much as possible. It is the politicians who are the leaders of the nations on planet Earth. The result is conflicts and wars.

(ED. I feel that the central reason of the above goes much deeper than just the puppets on the surface, many of the unwittingly pawns in a greater plan of conquest . )

Just think of the terrible war in Viet -Nam, where so many nations are now involved. The horrors are indescribable. Hundreds of thousands of children are parentless. Many of them are mutilated or burned to cripples. Hundreds of thousands of foreign soldiers are in the country. Young men who after finishing education could look forward to use their knowledge in the service of humanity, now they are mutilated or killed in the war, or suffer a painful death in the horrible jungle traps.

Would that that day comes soon when the egotism of human beings disappears. When wars, conflicts and hostility will cease. When everybody is only thinking and talking the best of each other. And then we will be worthy of being contacted by highly evolved civilizations in the universe.

In order to accomplish that, it's necessary that we all make the greatest efforts. No effort is so small that it ought not to be done. And no effort is too great if we have to reach the goal before it is too late. And what about yourself?. What have you done for humanity-- your brothers and sisters in the Cosmos. ?.

.....  
 Thank you again Hans. . . Thank God such a condition is not only promised but very soon to emerge. but to do this the cancer has to be removed by the Great Surgeon and the Body of the World and its Peoples CLEANSED. This is something we cannot avoid. The birth pangs of the New Age are upon us. There are those who will come through the purging and others will of necessity be removed.

.....  
**THERE IS A GREAT TOMORROW.**

There is a Great Tomorrow, and its coming very fast, when all the world will lift its voice and declare itself at last.  
 To be rid of force, yoked on its peoples lands , Time holds that Great Tomorrow in its bright alluring hands.

There is a Great Tomorrow. When right once more will reign. When the ghastly march of wars will be hurled on defeated terrain  
 When treachery and barbarous creeds, must fall, like death-spun dust  
 Then will that Great Tomorrow shine as all men know it must .

There is a Great Tomorrow, and its coming to us all. though our lives may reek with tragedy,  
 But behind the hellish walls of Fears and sufferings, There lies a healing Peace  
 Peace that we have striven for , that our FAITH shall never cease.

There is a Great Tomorrow. so don't lose heart my friends, The grandest things of all , are found round your lifes darkest bend.  
 The evil hours will run their course, and our broken hearts and fears.  
 Will all be gone. FOR GOD HIMSELF , SHALL WIPE AWAY OUR TEARS.

LOCAL SIGHTING REPORTS NEAR ADELAIDE.  
BY OUR REPORTS INVESTIGATOR.  
TONY BRAN. REPORTS DEPT.

Jan 7th. Mrs Carmel Croft ,33. a Glenelg Housewife , was in her garden at approx. 6.57 p.m. on this evening , when glancing upwards she noted a bright silvery object sharply outlined against a cloudless blue sky. The object moved swiftly from directly over head , in a N.W. direction , rising sharply and fading from view.

Mrs. Croft. said that the object was disc shaped and seemed to be " about the size of a 9 " bread and butter plate ".

Mr. Croft who was inside the house, raced outside on hearing his wives call but was too late to see the craft .

The whole sighting took approx 5 seconds.

.....

Jan 25th . Two sightings on this date ; one on the afternoon and another at night .

Two Adelaide Lads , David Goulden ,12, of Trinity Gardens, and his cousin Rees Hughes,11, of Rostrevor, who was visiting him , sighted a craft at 3.55 p.m. The afternoon was bright and clear and sunny

The ufo appeared disc shaped , but with three protuberances , like either an undercarriage or perhaps wings . See Sketch given below by boys.

The outer rim shape shone with a bright silvery light, while the centre portion was coloured deep orange. No portholes or cockpit was observed by the boys.

The size of the craft appeared to be about the size of a 10 cent piece, held at arms length and it moved about the sky in a series of sharp turns and climbs at a fantastic speed, eventually moving off in a N.e. direction, passing from sight behind some tall trees. Length of sighting 30 secs.

.....

Jan 25th that evening .

Mrs. L. marks 45, of Windsor Gardens , and several others. observed a fast moving object in the eastern sky, moving from N to S.

The craft seemed to change its size every few seconds, from a pin head to a pea and back again . It was also surrounded by an extremely bright light which flashed with the brilliance of an "arc welders flash "

The sighting lasted for 30 to 60 seconds.

Mrs Marks, who appears to be a very keen observer , also reports an earlier sighting on the 19th Jan.

Between 8.30 and 9.30 p.m. on this particular evening , Mrs Marks and 5 of her friends including Miss Audie's Vandaland of Magill , observed 4 bright star-like objects within the space of one hour.

Local Sighting Reports Cont. ( 2)

One in the Western sky moved n. to s. Two others overhead moving West to East. and one in the Eastern sky moving S. to N.

Mrs Marks reports that their speeds seemed to vary, and that one in particular was very much faster than the others .

.....

Writers Comment . It would appear that the latter report could possibly concern the predominance of satellites in the Adelaide skys at this time.

However, the fact that the speed of the objects varied somewhat from each other , would indicate that one or more of the craft could have been something " a little more sophisticated ", than the man made "heaps of scrap-iron" junketing around our skies at the present moment .

A.E. BRAN .

SIGHTINGS AND NEWS FROM HERE AND THERE  
\*\*\*\*\*

NEWCASTLE (AUST) SEE U.F.O.  
WITH RED LIGHTS.

"SYDNEY MORNING HERALD" JAN 14 1967.

Two Newcastle policemen early this morning saw an unidentified flying object with red flashing lights at Windale , 10 miles south of Newcastle.

Sergeant A Bell. and Constable F. Tracy were in James St. Windale . about 3 a.m. when they saw an object with two flashing lights , bright red, at an altitude of between 400 to 600 feet.

" At intervals the lights dimmed and a brighter white light appeared in a beam in the direction of the travel," Sergeant Bell said.

"It came from the direction of the sea and was travelling at between five and ten miles anhour.

" It did not appear to be large and it made no sound.

" The last we saw of it was when it disappeared over hills near Warners Bay, on Lake Macquarie. "
