THE MAGAZINE WITH THE OPEN MIND FOR U.F.O. GROUPS AND STUDENTS OF U.F.O. PHENOLIXA

## EDITORIAL:

### THE APOLLO 13s FORCED RETURN TO EARTH."

Owing to a statement made by another investigator in the A.F.S.R.S. in the local papers concerning the above unfortunate event, which recieved considerable publicity not only in the press of Australia but also the T.V. and Radio Channels.

Many people wrote or phoned this Society and its Editor. concerning the same asto whether we agreed with the statement made.

To put the matter Clearly we will quote the statement as given in the "Advertiser. "

" The Apollo 13 spacecraft was attacked by " aliens" the spokesman for the Australian Flying Saucer Research Society ( Mr. C. Norris) claimed yesterday .

" people are stupidly naive when they will not accept the overwhelming facts of flying saucers ," he said.

" It is obvious from sightings that aliens object to man's interference in outer space in the same way as we object to them visiting the earth.

" It is very possible that the previous Apollo moon missions could have caused some interference to the occupants of the UFO's and that they have retaliated with an attack on the Apollo 13 space craft.

" this attack does not mean that the aliens are hostile.

" They are based on the moon in the craters, observing activities on earth and they are distur bed by what they see.

" Future missions will undoubtedly encounter similar attacks,"

There is much in Mr. Norris' theory we can agree with . but the sad thing is that one does not go so far as to say the cause of the return of the Apollo 13 was through an attack by UFO's. particularly without any solid proof to back up such a wide statement.

The above result was that Mr. W.E. Moser of U.F.O.I.C. of Sydney was called on to make a statement after the Sydney press had reprinted it. He was given a very good opportunity to do so by appearing on the T.V. that night and his words. speak for themselves what his society and he thought of it. In a letter to me he says.

"When they interviewed me I used the words a former Royal Astronomer used some years back. He said " Utter bilge " etc I emphasized that even more. Great pity . that someone makes through such an utterance all our work harder "

Some days or so after The " Australian" printed an interview with Mr , Peter Norris or the Victorian Flying Saucer Research Society he was quite adamant about his views and the statement, for he frankly stated his society disassociated itself from it completely , and also that that his Society was not associated with that

of the A.F.S.R.S. Mr. Colin Norri's Society .

Up to this we had refrained from entering into the debate publicly , but as the leader of U.F.O.P.I.A. I stated that we did not consider the Apollo 13 was " attacked" by UFOs . Our views were as follows.

Such a thing whilst not impossible considering the great scientific ability of the UFOs. yet we considered it most HIGHLY AND EXTREMELY IMPROBABLE."

Before we are prepared to put the blame on the UFOs we would require a great deal of evidence as proof , and such certainly was not forthcoming.

However we heard later that Mr. C. Norris denied he made the statement to the press , as quoted and also that the press had grossly misquoted him. In fairness to him we do not disallow the press are not beyond doing that if they want to. but it appears strange that a week later he reiterated his statement in almost the same words in an interview to the " Sunday Mail".

A pointed question we would like to ask is. If he was so badly misquoted by the " Advertiser" why did he not make doubly sure that the same thing did not happen in the " Sunday Mail"write up . ???

In our last edition we printed an article from one of the members of the Perth UFO Group. who took the view that the reason the astronauts were returned was that they had equipment aboard which was highly dangerous to the moon and the stability of both it and our Earth .

Regretably there was no proof to say if this was so. However a small line or two issued in the statements made by NASA indicated that aboard the spacecraft they had a plutonium capsule which they said was to be used to activate certain equipment which was to be left on the moon. They admitted it was highly radio active. and later when it had to be jettisoned near New Zealand , strong warnings were given to that Government to watch out for it and of its potential danger . Since then nothing was heard of since.

It did appear strange however to some why the capsule could not be brought back to Houston. if it was to be left on the moon why not back in USA to be used again ?????.

This then raised the point that if the Apollo 13 was carrying instruments or things likely to be dangerous to the moon . the theory, and we repeat that it is only a theory. that the UFO's refused to let it be landed on the moon and sent the spacecraft back from whence it came. and whilst they certainly the astronauts had a bad time at least their lives were not taken in that return.

Well theres the theories. but alas so little proof. to support it all. and surely it does behove us all who are trying to place before the public an honest and objective viewpoint on the UFO's that we refrain from making wild statements especially when we claim to be so very scientific and despise some of the other avenues of UFO research who deal in more metaphysical lines.

It seems that some people will go to any lengths to get publicity . events contradict their own policy of having nothing to do with the religious or metaphysical side of UFOs. For the only ones who it appears were giving evidence of such an attack being made on the spacecraft, were just those who belonged to that set . In fact from New Zealand a warning had been given BEFORE the space craft left by such a group/ that such an attack would be made because of what the craft carried aboard it. as dangerous to the moon.

But then we couldn't quote that, it was not objective or scientific. so we left it to those who scoff at such to do just that for us. The statement did not end with just the Apollo 13 for it said " Future missions will encounter similar attacks" Well we shall wait and see. for now our publicity seeking friend has

entered into the role of a prophet. and may I remind him that such folk do not generally receive a very warm welcome. and according to history mostly receive a lot of kicks. We shall have to wait and see whether his predictions are as reliable as those he has publicly scorned and belittled so often, claiming to be so very scientific in his approach.

For myself I have always demanded an open minded approach and a listening ear to all viewpoints. true many I could not find agreement with, and often felt they appeared so far off the mark, but this did not allow me to say that the other fellow was not entitled to his opinion. and so in this case we too must, whilst not agreeing with Mr. C. Norris is his statement, at least allow him the right to his ideas. However hoping that in future he will remember that statements such as that affect not only his own Society, but all groups, working on similar lines. Hence it is no wonder that the Eastern States retorted in reply as they did.

Meanwhile for the sake of the young lives of our astronauts we hope sincerely that such an event will never occur again. and also add that whatever NASA or any other astronomical body plan for the future that they make sure they do not go beyond the bounds of pure scientific exploration with peaceful intentions. and completely avoid any missiles of any kind which may be harmful to the moon and in turn ourselves.

Those who did land on the moon in previous Apollo missions claimed they "came in peace ". it is to be hoped that this intention if followed out fully to the utmost letter of the law.

Finally we bid all men take thought of the words quoted by the leader of the Apollo 11 mission. when he touched down on the lunar surface as "man from earth for the first " In the beginning GOD created the heavens and the earth etc " Gen Chap.1.1. being a frank admittance that CREATION of the earth and the Moon and all the Universe is not mans property. to meddle with with wrong intentions which may be in contra to He who created it all. Law on earth must be obeyed or we have anarchy. this we are learning so truly and sadly in our own very days. How much more Laws of the Universe which have been instuted and which so far man knows so little about.

## DID NASA PROBE THE MOONS OF MARS .. ???.

Armand Leprade .

Reprinted from U.F.O. Report. Vol. 1. No. 1. 489 Krug St. Kitchener. Ontario  
CANADA.

Could it be that our much debated aspects and ideas regarding the planet Mars and its two satellites, be due to our having a too "Earth-minded" approach to it. Do we tend to try to FIT each factor into a narrow biological mould, which we assume to be Universal ?. Do we place too much emphasis on the other planets as having the wrong environment to sustain life? If so, what about the amazing discoveries made by the bathyscaphe Trieste? Of crustaceans, worms, and other forms of life found 7.5 miles deep, under crushing water pressure, in absolute pitch blackness; where no trace of free oxygen could possibly exist? How, does that FIT into our "so-called" proper environment? But then again, maybe scientists are not telling all they know; or all that is discovered on our Moon? Did Nasa tell us everything regarding the Mariner IV Mars probe...?

In 1959 Russias leading planetary Physicist, I.S. Shkolsky, published the result of observations about Mars. He arrived at the conclusion that Phobos, largest of the two moonlets( Smaller one named Demos ) circling Mars, is an artificial satellite; probably of aluminum . Scientists were aghast at such a statement and even refused to consider it a minor possibility. Then in 1963, Dr. Fred Hoyle, ( Physicist) and S. Fred Singer ( astronomer ) caused a minor furore in the scientific field by declaring that they agreed with Shklovsky's thesis. Another voice was heard from, shortly after, stating that " Space probes are NOW being prepared to determine if Phobos is actually a huge orbiting space base." That man was, R.E. Wilson Chief of Applied Mathematics For NASA.

Well now, the fat was in the fire, so to speak. Newspapers asked more and more questions regarding this raging controversy . Some of the published answers were expected and one was quite staggering, " In the next eighteen months the United States Government is going to spend over FIFTY-FIVE MILLION DOLLARS in order to determine if the satellite Phobos is an artificially created platform " Many scientists would not voice an opinion . Some said , " if Phobos does reflect light exactly the way aluminum does , it may well prove that it is a platform, not a natural moon ," Many others rejected and scoffed, uttering such cries as " sheer nonsense" and " utterly ridiculous ". And a few others " perhaps life existed on Mars eons ago; but NOT TODAY ! "

Wiley Ley, pioneer in rocket research, brought out some interesting points regarding this controversy in 1961, he stated that Professor D'Arrest had made an unsuccessful search for Martian moons in 1864. Shortly after the discovery of two moons by Asaph Hall in 1877, Prof. Simon Newcomb wondered if the two moonlets might be asteroids which had been captured by Mars. He investigated the fact then wrote a letter to the British Journal Observatory in which he explained the circumstances. There had been a favorable opposition of the planets Mars and Earth in 1862 but only two telescopes powerful enough , at that time. to detect any such phenomenon were not used to make such a special search . The opposition of 1864, when D'Arrest tried was not good enough. In 1875 it was good, but the distance short, and Mars was low on the horizon for the northern hemisphere( there were no big telescopes in the Southern Hemisphere). When Asaph Hall found the moonlets, the opposition in 1877 was short, and Mars was high above the horizon .

Dr. H.M. Sinton, astronomer at Yerkes Observatory said, in a statement before the U.S. National Academy of Sciences, " Phobos may be a huge orbiting city

## NASA and Mars (2)

filled with men and women, and children; the other moon, Deimos, might be one too." Whereas Clyde W. Tombaugh, who was an astronomer and an associate professor at the Research Centre at New Mexico University in Las Cruces said;

"The two moons are assigned the same albedo as Mars; 15%. Since the Martian atmosphere would tend to reflect more light, the airless moons may well have a low albedo; about 7%. This value, in proportion to the known brightness of the moons would increase their diameters: 15 miles for Phobos; 7.5 for Deimos.

Such bulk would increase their weight, even if artificially constructed of thin metallic or plasticized materials, to so many millions of tons that it is almost inconceivable for an alleged Martian space programme to have possessed the giant boosters necessary to orbit them; whether in part, or as a whole. The idea of existing civilizations on Mars must slowly fade away before this lack of evidence." Dr. E.C. Slipher, director emeritus of the Lowell Observatory near Flagstaff Ariz., also agreed that it would be physically impossible to orbit such a huge satellite! Prof. Tombaugh's statement, in 1961, regarding his finding it inconceivable to orbit millions of tons artificially, makes me wonder, due to an article which appeared in various newspapers during the early months of 1960, "Dr. Freeman J. Dyson, noted theoretical physicist, has proposed that astronomers search the heavens for darkened stars that might be obscured by gigantic shells of planetary substance that were constructed around them by advanced civilizations. This shell he states, "could be made quite comfortable and habitable and could contain all the machinery for exploiting the solar radiation falling onto it from the inside," Calculations, worked out by him, which appeared in the magazine "Science", indicate that the possibility of a society's exploiting a mass equivalent to Jupiter's and an amount of energy equal to the sun's may not be as far fetched as it may sound at first; that sort of undertaking would doubtless take some considerable time. Nevertheless, Dr. Dyson wrote, "One should expect that within a few thousand years of its entering the stage of industrial development, any intelligent species should be found occupying an artificial biosphere, which completely surrounds its parent star."

Scientists have assumed that these stars are invisible simply because they are too dim to be seen or they are surrounded by dust clouds that obscure their light. Dr. Dyson extends this reasoning one jump further, by suggesting that "such a material shield might well be artificial; put together in space by intelligent beings using solar energy. The first step toward finding out if this were so, would be to determine whether invisible stars were shielded by matter of some sort, instead of being just too dim to be observed! This could be done Dr. Dyson suggested, "by seeing if these invisible stars are sources of infra-red radiation in a wavelength range that would be expected to RESULT from the heating of the material shell by the star within." A report by the scientists of the Palomar Observatory told of the detection and analysis of infra-red radiation in that range; from Mars and Venus. This led, Dr. Dyson to the possibility that this kind of search might be undertaken. "Finding such emanations would not mean that the star possessed inhabited bio-spheres; other measurements would have to be made to determine if the shells were artificial," he said. "If they are beings like us (he speculated) they might live on small planet-like objects a mile or so in diameter and enclosed in a skin to hold an atmosphere. The solar shell would then consist of a gigantic spherical swarm of such bodies." (Scientists are making a comprehensive study of these possibilities TODAY ..)

NASA and Mars ( 3 )

IF the above speculations prove to be true, could these be the places where flying saucers come from ? . Atwixt Mars, Venus, and possibly our own Moon ? How far is far? How close is close? Distance standard time; will that eventually replace Universal Time ? What is Time? What is distance ? Distance is measured by time . but what is time? Time has always been a measuring stick . so to speak but has altered with each new scientific discovery ... Dandridge Cole , who holds degrees in physics, chemistry, astronomy. mathematics, medicine etc.. goes even further and traces the effect of scietific advances on the evolution of society... Mr. Cole extrapolates from present trends and knowledge , to project a picture of the ULTIMATE SOCIETY? which he calls MACRO-LIFE! ( for complete details see Space World , Vol L Nos 10& 11 -1961) Bert Groth. Science Editor , related the following episodes regarding the planet Mars in 1964:

" A desert section called Edom Promontorium, in the equatorial region of Mars was being observed from Japan ( person, place and time of event not disclosed in the article) Jan. 1, 1954; Suddenly , it ( alight) began to brighten rapidly it went from light-yellow to a bright-white , in three seconds ( did someone have a stopwatch ?) and then, down back to normal in five ( what is normal ?) seconds more (more?). ( The injections in parenthesis are my own : A.A.L. ) This flare like light could be interpreted as the actula take-off of a rocket from Mars . How utterly midevil ) The rapid brightenings and dimming of the light suggests such a possibilty , " ( hmmm. ) " A slightly different interpretation may be applied to the activity observed on the SAME SPOT, six months later ( by whom ) on July 23. 1954. This time ( timed again ) the brightness increased for thirty seconds. After fifty-eightseconds( time on my hands ) of gradually dimming , it completely disappeared . If this flare is from a rocket launching then the longe r length of time . of brillaince may indicate a much more power ful rocket. Another possibility is that , ( here it comes ) atomic energy experiments might be going on ." ( or something ! ) " But, one of the most startling of recent observations was that of an unidentified object which appeared in space near the planet Mars on Sept. 8. 1956," ( Very interesting .!) " As the red coloured planet was being observed, by an anstronomer in New Mexico( what astronomer ?Who is he? ) A faint point of light passed through the field of the telescope, in the opposite direction of the apparent drift of Mars and slightly below the planet. The telescope was moved away from Mars, to follow the object . The msyterious light took about ten seconds to pass across the field of the telescope ; an arc of about five minutes! This may have been the FIRST observation of a possible rocket travelling in the Martian stratosphere. " There is something in the skies of our Earth and the space which surroundsthe inner planets of the solar system that is not of natural origin ; these craft may belong to intelligent beings from Mars, other stars, from within , or far-away - places! ( Herb Groth is no longer editor of Science... I wonder why? Maybe he wandered too far... ?)

Interesting pints which Mr Groth may have overlobked or did not credit to,( did he credit anyone?) was F. Zigel, noted Russain astronomer, who called our attention to the curious dazzling points which flash on Mars' surface from time to time ; followed by tiny clouds which closely resemble what happens during a terrific detonation on Earth. These phenomena have been observed on Mars ( coming from ) in 1937, 1951, 1954 and quite recently! Moreover , they lasted a few minutes at times. " would atomic tests on Earth look like that from space,? he asks? Also, he points out that , " Deimos and Phobos have near circular orbits close to the planet; therefor the Martian satellites could not have been captured from outer space, ( sateliites, astreoids ) since their orbits would

NASA AND MARS ( 4)

lie in different planes and would be strongly elliptical ! " Furthermore notes Zigel , " if they are metallic ( satellites of Mars) with a polished mirror-like surface , their diameters should be much less than indicated earlier by no more than one or two kilometers ( a mile or more I guess ..)

In view of all the theories, possibilities, speculations, pros and cons; including the statement made by Raymond E. Wilson , on Jan. 23, 1963 , that, " " Space probes are now being prepared to determine if Phobos is actually a huge orbiting space base"... and even Mariners IV's controversial photographs ; CERTAINLY Mariner IV must have had some type of sensor to detect something about the moons of Mars '. Yet, in 1969, two more probes have surveyed that mysterious planet. There has been no mention of exploiting the even more enigmatic controversial phenomena of its two satellites. Deimos and Phobos. WHY?. Did NASA already probe the moons of Mars? if not , why the disinterest? and is so, what are they ? NASA, Zigel, Wilson, Etc, remain silent; particularly the two latter which practically demand an answer! Well, maybe they have received an answer via Mariner IV, or OTHER, but the mystery remains; or does it?

What prompted a group of scientists , in Feb . of 1966, to suggest the possibility that sizeable and UNIMAGINABLY STRANGE CREATURES dwell on Mars?

The group advised the National Aeronautical and Space Administration (NASA) to equip the first unmanned craft scheduled to land on Mars in 1973, ( still unscheduled ) with cameras capable of sending back photographic evidence of such BEINGS ! This recommendation was made in a report by the Space Science Board of the National Academy of Science! the report titled. Space research = Direction for the Future , stemmed from a study meeting held at Woods Hole ( Cape Cod Area ) in Massachusetts, in the summer of 1968! Do flying saucers come from Mars, Venus, Jupiter, Earth, Fourth Dimension, other galaxies, etc and are they intelligent? WHAT IS INTELLIGENCE.?

.....

We are greatly indebted to Armand Leprade and look forward to more of such though provoking items from him. for he packs his article with official facts which cannot be denied and which arouses some of the most exciting queries on the subject we have heard for some considerable time. Thank you. The Editor.

\*  
\*  
\*

It is with the deepest of regret and sorrow the Editor announced the passing of Fletcher B. JAMES. who was the Treasurer of U.F.O.P.I.A. and one of its initial Founders. No words can express the loss that he will be to not only the Society but personally to the Editor whose deep friendship and fellowship was so well founded . His assistance in so many things. not merely as a Treasurer, but in many other works of help in the organisation. so many behind the scenes which so few knew about with his devoted wife. His personal kindness and help to the Editor in so many ways and so often proved beyond all doubt , he was the Christian he professed to be. Brother James as he was so fondly termed among us was one who had a firm belief in the Bible and it was his faith that the UFOs were connected with these beliefs caused him to take interest in the subject . There are some people who pass on whose memory is soon forgotten , but the name of Fletcher James will live long with us all. Our Sympathy goes to his Loved ones.

GREAT EARTH CHANGES PREDICTED BY MANY.

\*\*\*\*\*

Among the many Ufo Enthusiasts are those who study the many side issues of the subject. and among these are those who believe that the advent of these craft to earth at this time are closely tied up with great geological changes which they the Ufo are interested in. Be that as it may it cannot be denied that from many sources has come various predictions of such a vast change to take place or that it has already begun .

To those of us who study the dawn of the Aquarian Age, such would be most likely as it appears that at every change of such astrological Age and time changes do take place but especially when they coincide with the 25,000. (approx) year cycle of such ages. of which this is one.

Early in the magazine known as the Aust. Saucer Record which preceded Panorama we gave such a forecast given by the then late Sir Arthur Conan Doyle. this was repeated later in the earlier numbers of Panorama at readers request.

Now we have been asked by many new readers to reprint it again the THIRD time and we do so below. adding that when we first printed this article we had never heard of the great seer Dr. Edgar Cayce. whose great predictions and prophecies of world events have so literally been proven true again and again .

We therefore suggest that our readers study the following forecast of Sir A Conan Doyle in comparison to what Dr. Cayce has written for they will see a remarkable confirmation one for the other.

There are many books written of Dr. Cayces readings but for this purpose we would refer our readers to the one " Edgar Cayce on Prophecy" By Mar Ellen Carter and Edited by Dr. Cayce's son Hugh Lynn Cayce . our copy is a Paperback Library edition. USA .

If just these two men alone were those warning the world of such impending changes one could perhaps feel that they could overlook them ,i.e. if they were not inclined to believe other evidence of scientific nature which is apparent around them. but they are NOT alone for from many quarters indeed have come these warnings and the evidence now is becoming so factual before our eyes and ears in our newspapers and items. such predictions can no longer be cast aside as the ravings of two men who made wild predictions. Your Editor feels it is his duty at least to place the evidence before you and let you work it out for yourselves. Read what Sir Conan Doyle said below long before the first atom bomb went off. and then read Cayce's book. before you spurn the evidence.

Two years before his death in 1930 ,Sir Arthur Conan Doyle sent a message to all his friends by letter, which he said was based on mystic revelations. received by his wife in 1923. ( Note the date)

The revelation , a prophecy, foretold the coming rise of the Nazi power of Germany , the coming bombing of Britain and the incendiary fires of London and the attempted invasion, but said they were but the prelude to more tremendous happenings which " Noman can control" , and foretold that soon a great disaster would follow , which would be followed by Armageddon. It would happen very SUDDENLY and without warning, and the upheaval would cause appalling disaster to the general civilised life.

The catastrophe, a series of three , which would last three years, during which a number of countries ( five in the Mediterranean basin) would be swallowed up in the convulsions of earth and sea. The bed of the Atlantic would rise, and

EARTH CHANGES ( 2)

and a tremendous tidal wave would surge onto the American, British, and Irish low lying coasts.

The disaster would be brought about by " SOME COSMIC BODY OR FORCE IN COLLISION WITH THE EARTH'S AXIS , CAUSING IT TO TILT VIOLENTLY "

\*\*\*\*\*

To students of the occult the above of cause is no surprise , and even many scientific minds agree that such a tilt is possible apart from the cause mentioned above and from mere earth causes alone. i.e earthquakes. ice shift and the poles. To others who claim to have received messages from space folk. such predictions are corroborated in such messages. many of which have stated similar sad state of affairs ahead. Even Kraspedon in his book . is not without such forecast of a second sun coming into or orbit. and we do not have to be told what such an event as that would mean in cosmic disturbance. Astrological Scientists, and I do not mean the quack moeny racketeers of astrologers. who tell fortunes. have also given a clear outline of such an event of cosmic nature ahead.

Now where does this all lead us. ? Do we fly into a state of fear and terror and run away to hide in the safe area. we THINK maybe safe. ? Do we start a panic or worse some silly cult and get away from it all and forget the world and await the event?/ If you do you are more than likely to run right into danger , for nothing will be more likely to cause you to be in a place of danger than a state of fear.

No. above all **KEEP YOUR HEAD KEEP CALM. PLACE YOUR TRUST IN HIM WHO RULES ALL COSMIC FORCES. REMEMBER THE WORDS OF THE PSALMIST " He that dwelleth in the secret place of the MOST HIGH, shall abide under the shadow of the Almighty"** The secret place is the secret place within your own self consciousness of being in tune with the Infinite. A child does not fear a raging storm without if by its side the FATHER holds its hand. and soothes and instructs it "

Long ago messages were given from space brothers that when such a time arrives those who are to be delivered OUT of the holocaust will be . some long before it even occurs. They will go and be lead unknowingly to other lands. other places , other parts of the country. before it occurs. so that they will not be there at the time. Others if necessary will be lifted out to places of refuge Maybe even on the very day they will have a keen desire to go AWAY from their dwelling or their city to some other place or business will call them away how or what matters not. the point is they will not be at the danger zone when it occurs. Can you believe that . Ask some of the servicemen of the wars. of the strange ways they were shifted out or away from a spot before a shell burst right where they had been standing a moment before. Thousands will tell you such incidents. and this is but a small story of how many en masse if necessary will be moved out and away. it has already begun in fact in some cases over fifty years ago or more the evacuation of large masses of people from the very areas mentioned above began to take place and has stepped up over the last 20 years or so.

I would like to make it clear that I do not believe any one place on earth will be entirely safe. for all will suffer some effect. if not directly , then repercussions of the greater ones. but it is certain that some countries will be safer than others. and to these which ever they are the people will be lead or TAKEN. years before. prior. or just prior to the above events.

The great question naturally then would be would all be rescued. Frankly I feel I would be beyond my authority or domain in answering such. Looking at it in a pure light of logic. I can't see how they could be. nor do I see that such has

## EARTH CHANGES ( 3 )

been promised. No one can tell who will be selected. . Maybe those who think they will be may be the last , and those who think they haven' a chance could be the first. Certainly some of those in high places who claim to be earth elect appear to ME to be the most likely to be left behind. One thing I'm pretty sure of as sure as you hear someone say " We are the only ones. " or "We are God's chosen" then as far as I am concerned their very lack of humility and their self appointed ego of selection makes them disqualified. For One thing the new Auaris Age will require above all is people of humble minds who can get on with each other and not think another lesser than themselves.

The Kingdom of GOD ON EARTH. is a real thing and not some ethereal thing in the sky with a pie in the sky for those who or the goodies. it will be a CLEANSED EARTH with a CLEANSED NATION and with CLEANSED people in plural . Meanwhile we do not take the attitude of pessimism and gloom at what is portended for our days. The prophets of old spoke of them to come and the modern ones are merely re iterating their words in a closer aspect of time.

Do not look at the clouds ahead or above but at the suns RAYS which shine behind them They speak of a new day and a new era rid of those who now have sought to bring the world under their desotic control. and who it may appear have now so completely gained the day that they are completely in control and ready to play their last final card. But like all despots they have forgotten one thing. The forces of Light and Right. and that history has a strange way of repeating itself. No need to illustrate the many times when this have been proven when at the last, when evil seems to have almost gained complete dominion then there has arisen a power or force to overthrow such .

The only thing that appears to be uncertain is the matter of whether the change is SUDDEN or a gradual one. I am inclined to think it is a sudden one and the cleaning up of the result of it is gradual. Yet the process of the preparation of peoples seems to have begun long ago. and the many forces of earth change which have been building up around us. have been a gradual one of speeding up toward a finality. However if the prime effect is to be brought about as Doyle has suggested and a few others. with him. by a cosmic force coming into our solar system then this would be sudden and almost without warning . and reminds one of the prophecy which says. " It shall come upon them suddenly ".

Whatever the manner of its coming does not alter the actual resulting effect on the great change on the face of the earth which fulfills the prophetic words which have so often been sung and so little understood by many great Tenors. in the opening of that great work of Handel " The Messiah"

" Every valley. shall be exalted , and every mountain and hill made low. The crooked straight, and the rough places plain"

Having now given this prediction by request a third time. I can only hope the words I have added may help some to understand more than ever. why it is possible we could well need the assistance of space people at such a time as this"

.....

News has reached us of another event similar to that of the Fatima incident this time in Spain at a place called Garabandal. The case has been fully established by the local press and other people who have taken actual photographs of the miracles occurring there. Despite this the Church has endeavored to hush the case up and little has come forth from that quarter . we hope to have in our possession soon actual slides of the films taken by witnesses. and also permission to repeat the story . It appears there was no evidence of UFO , but strong warnings given of a great dire event to take place on the world.

2 ARE WE FOOLING OURSELVES. ????. "

FROM OUR MAILBAG . By "AMOYA "

\*\*\*\*\*

The following thoughts were expressed on a letter sent to the Editor and although quite in contra. to what most of us believe in our policiy of being open minded we print it. adding that we have been acquainted with these facts for some long time as well as the claims of the suacers being now made at some base in the Sth. Americas by teams of German scientists who escaped to their after the last War . We will be most interested to hear what our readers think of the following ideas either for or against. Here's your chance to say yea or nay .

THE GERMAN SAUCERS. They were ready for mass-production in 1945, when Russia m marched in and took over the whole works. Russia has been mass -producing those things ever since !!!. No, they are not jet planes, they are the real thing Now, why does no one ever btreathe a word about these UFOs.?. Becuase we don' want to upset the Russians? " Don't rock the boat!!!"  
Meanwhile all the nice little Saucer clubsplay hide and seek with imaginary Venus ians, conventinately forgetting all the Russians Saucers, and by now the Reds must have thousands of these things flying all over the world and spying out whatever they want to know, causing a few Black-outs here and there to show off their power and thus keeping the rest of the world dancing to their music.

.....

Well there you have it. but somehow I just can't believe that Prof. Herman Oberth who was whisked away to the USA for s Sapce rprogramme would not be aware of such a likelihood and if so why is he now so anxious to confi4m his own statement made that he believes they are extraterrestrial , and have been coming to the earth for centuries. also now when retired to his own beloved Germany is following thhs quest so eagerly by tectruing throughout Europe on the subject of them. Hardly feasible if he KNEW they were earth made by the Russians.  
Added to this the vast amount of research now which has been made on the historifal saide of the UFOs in the past which show they are not a mere contemporary phenom- enon. but as Oberth says have been with us for centuries.  
For myself I still back up that extraterrestrial case. but admit that they the Russians. Germans or the USA as well may well be feverishly trying to COPY the real thing which ahs been the cause of so may of us to become so intensely interested in UFOs. and where they come from .  
What have you to say dear reader . ???

\*\*\*\*\*

CHRIST HERE BY THE END OF THE CENTURY .

The " NEWS" 5/5/70

WELLAND. Ontario Canada.

The second coming of Christ could occur before the end of the century, self styled prophet Jeanne Dixon said last night.

The syndicated newspaper columnist told an audience of 3,000 mostly teenage grils and older women , at Notre Dame College, that the second coming would be preceded by three days of light and three days of darkness.

She said some of the signs heralding the event were now visible .

.....

The accuracy of this remarkable womans predictions cannot be likely overlooked judgeing by those of past events. and it is therefor interesting to note how her predcitons fits in with may of those given by poeple who claim to have similar messages from space people.

Taken from U.F.O. CHRONOLOG - Jan - Feb, 1970.

"A Dissertation on Historical UFO Research" by the Editor.

Historical UFO research may be assigned the dubious distinction of being, in the researcher's point of view, the epitome of both the joys of successes and the red, overwrought, and strained eyes of unrewarding and mostly-nocurnal reading.

Of the many and varied aspects of pre-1947 ufology, certainly the most frustrating is the search for a beginning when one is endeavoring to aggregate entirely new and original material.

"Flying Saucers" were officially non-existent before June of 1947. Non-existent, perhaps, but far from scarce; under the pseudonyms of such pretentious nonenclature as "foo-fighters" and "ghost bombs," and under the more flagrantly false titles such as "meteors" and "fireballs," the proto UFO's flourished.

What can be attested to (from bitter experience) as a tiresome chore - the extraction of fresh, unknown historical data - can be made exceptionally easier if one had some sort of guide from which to attack the problem. Basically, historical research is not rewarded by "pot-luck" random examination, but by a deliberate process commencing with the general and approaching the specific. This is the subject of this discussion.

Original data involves original research, or extended cross-referential research from already existing volumes of this literature. So, for example, truly original research into pre-Christian and Biblical ufology is from a practical standpoint impossible for most, if not all, contemporary UFO fanciers. Here it would be best to examine various present volumes such as Anatomy of a Phenomenon (by Jacques Vallee; Henry Regnery or Act), and The Flying Saucer Vision (John Mitchell; Ace Books). There are several other works relevant to the Biblical scene; however, in this instance, and in the other subdivisions of historical ufology which will be discussed, only 2 or 3 "starting point" reference sources will be mentioned.

Basically, this pre-Christian and Biblical material will be in the form of legends; archaeological conundrums, anomalies, and drawings; various Greek and Roman texts; and, of course, the Bible. This era has seen the emergence (?) of the phenomenon under the guise of flaming spears, flying shields, flying chariots, gods, demons, dragons, monsters, devils, angels, and (for aquatic sightings) sea serpents. Actually, these names for what might have been references to our flying saucers remained in effect until the emergence of the Renaissance, about 1500 A.D. and then some.

From the period ca. 1500 to 1776 A.D. references to strange aerial phenomena may be cloaked under the headings meteor, meteorite, bradyte, bolide, fireball, comet, star, planet, and vision. These items would perhaps be preceded by adjectives such as "wondrous," "wonderful," or "remarkable." A good beginning for researchers doing work in cross-referentiation are Charles Fort's book. Leslie and Adamski's Flying Saucers Have Landed has a particularly helpful chronology. Other references are the various astronomical and scientific publications of the era.

From ca. 1777 to 1895 much more data is available. In addition to the aforementioned sources for the 1500-1776 period, newspaper accounts are

"A Dissertation on Historical UFO Research", Contd.

now more frequently available to the researcher. References to strange phenomena might also be found under the mythical planet "Vulcan", an entity that existed for brief moments at irregular intervals and in several different orbits about the sun, nearer to it than even Mercury. Vulcan does not exist, it has been determined, but the contributive phenomena must have. Astronomical publications might also have interesting general ufological material under the headings of stray balloons, aerolites, "Curious Celestial Phenomena," "Singular Occurrence," or "Extraordinary Meteor," the latter three denominations notable in Great Britain around and about 1840-1860.

The 1896-97 Airship flap may extend its influence in the field of UFO nomenclature to about 1910, which begins a new division in the history of ufology. From 1896 to 1909, the various non-UFO titles previously noted would still be in effect. Additionally, airships could be listed under "Aerial Wonder," "Ship of the Sky," or related phrases. Book references for this would include Mysteries of the Skies - UFOs in Perspective (Lore & Deneault; Prentice Hall), and to a lesser degree numerous other contemporary UFO books. For those researchers particularly interested in this historical facet of ufology, researcher Lucius Farish would be interested in helping you organize your efforts in exchange for copies of your findings or notes on additional references you might unearth. (Mr. Lucius Farish, Route One, Plumerville, Arkansas 72127, U.S.A.) Lou is also interested in the general historic situation, although his prime interest is the 1897 airship phenomenon. (See "Ufological Profiles #1," UFO CHRONOLOG, Vol. 1, #3, p. 10.)

Two minor flaps, one in Great Britain in the Autumn of 1905 and another in New England in 1908 (the latter referred to as "meteors"), also took place.

From 1910 to 1945 various specific and a few general items of denomination have been used to name UFO's. The 1910-1911 New England flap would be worth investigating, perhaps, under "airships," "mystery phenomenon," or similar euphemisms. Specific sightings range within the period December 1910 to January of 1911.

In December of 1933, lasting until March of 1934, a pre-1946 Skandinavian flap commenced behind the fogging attributions of "ghost fliers" and "mystery planes". These latter two designations would be useful in checking generally any of the 1910-1945 period.

This era climaxed with the emergence of the "foo-fighter" or "kraut fireball". Numerous references to these can be found in saucer literature; here only cross-referential checks can unearth more data.

1946 brought with it one of the most fascinating pre-Arnold phenomena ever unearthed. Aime Michel was possibly the initial re-discoverer of this flap, once again centered in Skandinavia. References in American newspapers would head the particulars under ghost rockets, ghost bombs, rocket bombs, Sweded, V-weapons, Peenemuende, Generals Doolittle and Sarnoff, British Radar Sets, or Stolmuende. The regulars, i.e., stars, meteors, etc., would also be present. Much political influence in the investigation of the "violation of Swedish airspace" theme is evident. References are to be found in Vallee's Anatomy (q.v.), and in the local and national press. The

"Dissertation on Historical UFO Research", Contd.

dates to look up; July to about September, with earliest references around May, 24 of 1946.

New historical research is seldom simple and most often dishearteningly discouraging. The best method for arriving at original data is to follow up known sightings by checking time periods immediately preceding or following the item of interest. If the periodical in which you are doing research is indexed (a rarity in itself), then your task is simply to apply the aforementioned different references with respect to the era involved.

The first time you go out to do original research, do not be afraid to come back empty-handed and bleary-eyed from straining at faded printing or glaring microfilm projectors. Most often your first visit to a library or newspaper morgue will tell you what not to look for. Your next visit, then, will very likely meet with some success.

Historical research and its respectability per se, no matter what the subject matter involved, is always a good public-opinion builder. Its nonsubjective, unprejudiced, and stately removed (by time) demeanor makes this data simple to see in an objective, analytical approach which could help set a trend in sensibility today.

These are but two of several reasons why historical research is important to modern ufology. The measures of victory gained in successful enterprise, however, may be justifiably as great in keeping the interest of researchers strong in trying times such as these.

-----  
 UFOLOGY AND THEOSOPHY.

BY  
 HOWARD SLOANE.

Living as we do in a technical age most researchers into UFOs approach the subject armed with scientific knowledge and attempt to apply this to the objects. It is soon found that this just will not do, as they do not comply with our concepts of momentum, gravity, and stability of matter, and that we are confronted with something that mankind through the ages has brushed aside as too mysterious to be understood, and thus beyond comprehension. This is just not good enough. In this age of advancement and an understanding of the UFO phenomenon is our greatest challenge.

To move along any new path of thought we have to put our minds into a state of peace and perfect tranquility, free of all beliefs and concepts of the past which may be error. The ufologist should start with shedding all conceits and have his mind at rest, free of conflict or confusion, and as taught by Krishnamurti. With his mind "perfectly clear" and ready to approach any problem.

In this state let us look at the subject of the Flying Saucers, realizing that they are a part of universal creation of which we too are a part. Everything is interwoven to form a beautiful whole, and there should be no division of life or form. We thus consider the objects as part of ourselves, and like everything else not to be feared, but understood. Charles Fort stressed the oneness of everything, and he tried to place the most bizarre occurrences into the scheme of things.

## UFOLOGY AND THEOSOPHY (2)

Should there be apparent flaws in this scheme, these are always mirrored by corrections which lead to the ultimate perfection.

In any contemplation, theory, or knowledge, gained by ourselves and others is called into use, and the data of our subject is now reviewed, and the acceptable things selected. It appears that the UFOs. come into our range of vision from the ultra-violet, and that spectrum was witnessed at Ballarat at 8.32.p.m. on 29.8.67. by a man who felt a premonition of the appearance of the large UFO which was seen from many places in Tasmania, S.A. and Victoria. He went into his garden and looked into the sky at the right place. The UFO appeared like a bright electric light being turned on in the clear sky, at 20 deg. in the S.W. It pulsed for a few seconds, a blue color mixed with an unusual purple. It then moved in an easterly direction changing to a glowing white object a  $\frac{1}{4}$  size of the moon, giving off sparks intermittently. It disappeared at high speed in the N.E. From Warnambool this UFO appeared as an illuminated train in the sky. It was watched through filed glasses at Colac, 40 miles S. of Ballarat. From there it was seen to be 9 bright starlike lights in rows of three. It was above the clouds and travelling faster than a satellite at an angle of 40 deg. on the south. This would be an altitude of 94,000 ft., and 65 miles from Ballarat. Could this have been a space ship passing our planet and changing from the infra-red whilst near the Earth, and enveloped in a huge magnetic field which drew our attention?

We find UFOs to be in a sphere of what is termed the "supernatural", a branch of science, or human enquiry, concerned with the nature of life, and it is inseparable from all the other sciences. The breaking of the atom opened our minds to contemplation of the ultimate fusion of matter and life, and this is where the various researchers meet.

There have been countless workers in the field of the "supernatural", and they have left us libraries of thoughts. These researchers have been termed theosophists, and dedicated people have extended their vision beyond the normal into the realms behind the veil of death. There has been a two way traffic of human soul into and from the unseen which has created man's religions.

The findings of these investigators are as scientific as those of other fields. To name a few. Helena Blavatsky, Anna Besant, Synnot, Leadbeater and Jinarajadasa and now that we have the UFOs in such numbers, thousands also have joined their ranks.

What did these people learn from the World wide investigation and peeps into the existence of the unseen by the ordinary person? Three Truths were found to be absolute.

1. The soul of man is immortal and its future is the future of something whose growth has no limit.
2. The principle which gives life dwells in us and without us, is undying and eternally beneficent, and is perceived by the man who desires perception.
3. Each man is his absolute lawgiver, the dispenser of glory, or gloom for himself the decreer of his life, his reward, his punishment. These truths which are as great as is life itself are simple as the simplest mind of mind. The law - is Eternal "as a man sows, so shall he reap".

Theosophy shows that we are living souls occupying material bodies. The soul also uses finer bodies in which it survives before birth and after death. Like material existence, it is evolving and seeking perfection through experience.

Thoughts of the material brain create impulses which are registered in our finer bodies, which are interwoven through the physical one. When we complete our material existence we then live in the finer bodies we have moulded here on Earth.

## UFOLOGY AND THEOSOPHY (3)

Next to the material body is our astral one which records , and is affected by emotion . After death we occupy this vehicle and then later transfer to our mental body . The time spent in the astral plane, is dependant on interest in self while full enjoyment of higher existance derives from charity, or love of the Creator, through creation .

Above and beyond this existance lie the intuitional and more glorious planes leading to the ultimate Cosmic Consciousness which permeates the Universe, and from which all life pulsates and returns.

While the Astral plane is confined to within and near the Earth, the Mental and higher existances extend out into the boundless Space . It is said that in the Mental plane it is possible for us to create ibjects with the power of thought. It may be from this existance that the UFO comeas they are . the ultimate in t transport . They would travel the Universe and time in their plane of existance and come through to our material plane occassionally. It should be born in mind that ours in not the only evolution and that all forms of life may be manifest in finer vibrations of visible or invisible matter. This might explain some of the strange reports we recieve .

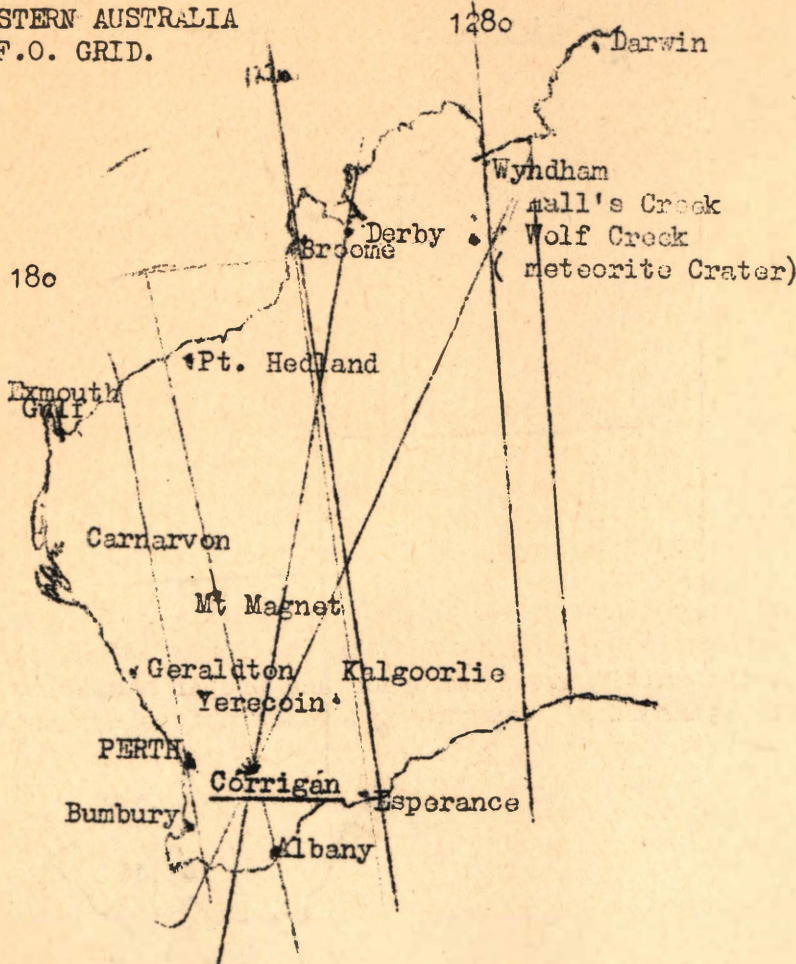

Theosophists tell us that there are some invis ble planets in these higher planes of existance , and that life elsewhere is mostly at these levels. In its evolution our soul transfers from planet to planet according to its developmant, moving out into matter and then returning into the finer " siritual" state more in tune with the Divine Cosmic Consciousness. mankind on Earth being on the upward path .

They do not encourage attempts to contact space people by scenace, or the use of drugs , as these methods are emotional and only reach the lower astral planes It is far better to await the the initiative from Space and prepare ourselves for possible conatc by raising the standard of thought, and reducing the emphasis on self . In this way we can come into communion . telepath, with creation around us. Cl ve Backster in the USA. has demosntrated that plants are aware of our presence , and that they react to our thoughts of them even at a distance. It is thus possible for us to be in communication with all forms of life without us realising the affinity.

It is possible that some of our visitors from Space coem from other planets in our material plane, bit it is probale that others are our own people living in their finer bodies. The oldest civilization on Earth is the Chinese , and there is evidence of its contact with Space 12,000 years ago. Their evolution would be ahead and reports of "eatern" tyoe beings and Chinese writings from the UFO is understandable. Chinese art is based on theosophical concepts as it depicts life and soul, not as individualised as in man , but in every form in the landscape,- in the crystalline rock, vegetation , insects , birds and animals. The eastern mentality also complies with the Krishnamurti teaching of composure. More study should be given to the contact claims. and people should be encouraged to tell of their experiences . One of the many reports from Brazil describes how in the early hours of Aug. 27th. 1968. ?aria Cintra, a night receptionist at a hospital near Sao Paulo , heard a whistling sound , and thinking it was a new patient , went to the door. There she found a foriegn looking woman in light c coloured clothes and a head drss that left only the facr bare. She obviously w wished for water as she held a beautifully engraved glass bottle and mug. The receptionist was more interested in the bottle than the woman , and admitted her into the hall , and gave her water. The strangres feet left pointed footprints with no heel marks on the polshed floor , and she was very interested in cars parhed near the door. As the recpetionist was showing her out, she noticed a Flying Saucer hovering 25 metres away and one metre off the ground. Although she had felt no fear of the woman , she now watched on terror as a man helped the

UFOLOGY AND THEOSOPHY Continued from Page 16

visitor into the ship, and it sped away into the sky . This fear was similar to that experienced by motorcyclist who fled from the two spacemen who beckoned him to come to their hovering saucer near Wodonga, Vic on 27.8.67. and it is common reaction with close sightings. The purpose of this visit in Brazil may have been consolation, as the space woman played a hand on Maria Cintra's head and blessed her. Geo. Adamski was correct in saying that spacemen are exactly like us although intensely interesting in their construction and motive power . are very secondary to the study of their controllers. From these strange beings , living in their rarified plane of existence , we may gain wonderful knowledge and wisdom We are at a time in human history when we must endeavour to raise ourselves above the material, and realise that the invisible is also with us. The tangible object appearing on Earth are a minor portion of the UFO phenomenon Behind these are the intelligence manifesting as light, or not at all, Just what they are doing is hard to say, but it would appear to be involved in man's

AN AUSTRALIAN SIGHTINGS POOL.

At the recent UFO Convention held in Adelaide at Easter. a motion was moved by those present and adopted as follows.

" That this Conference recommends that all the representatives of the various Societies present be asked to refer to their respective committees to formulate the grouping of supplies of UFO Sighting Information for interchange with all relative phenomena.

That the Societies send information of such sightings etc to a central body for circularising . around Australia and any other country which desires such Information "

.....

Mr. W. Templeton was appointed as convener for replies from interstate bodies in relation to the above .

His address.

Mr W. Templeton

6 Southan St.

Smithfield Plains. 5114 S.A.

Mr/ Templeton is the President of the Gawler Branch of U.F.O.P.I.A.

.....

Since then we have recieved from several bodies reports of sightings recieved in their areas. and we are now seeking to ellicit the help of all other bodies to join in by sending a brief analysis of such sightings as occur from time to time these will then be printed for the time being in the pages of Panorama as it is issued Bi-monthly. This however is done only to get the thing started and the Editor will be very happy if any other body is willing to take over this work and circularise the data as it comes to hand.

It is not intenddd that the whole of the information will be sent for listing but a brief analysis comprising of the place , date time and type of observation. the map supplied with each issue then will follow the excellent pattern set by U.F.O.I.C. of Sydney in its Review with numbers and a list of data corelating the numbers to the sightings etc. Those desiring a complete account of such listings will then contact the body concerned for same.

The Societies who have consented to assist in this way are as follows and we will publish the information sent by them as recieved until such further arrangements can be made .

U.F.O.I.C. ( Sydney ). C.U.F.O. S. ( Canberra. U.F.O.P.I.A. ( Adelaide ). Ballarat T.F.S.O.A. ( Stonehenge Tas. ) T.U.F.O.B.(Hobart. Tas. ) P.U.F.O.R.G.( Perth.)

Those who have not signified there willingness to co-operate to date are

Q.F.S.B. ( Brisbane ) V.F.S.R.S. ( Melbourne) and A.F.S.R.S. ( Adleaide.

It is expected that at least one ff these will not supply information. This we can only deeply regret as a sign of complete lack of unity and willingness to communicate. We can only hope that by the time the next issue appears we will be able to announce that most of the Societies operating in Australia are combining forces to present at least some tangible display of recorded information to enable everyone not only in Australia but around the world some easy plan of assessing what is going on down here.

Remember the information given is merely a synopsis and the complete data can be given from the Societies listed.

Hoping that in someway this will at least start the ball rolling until some better plan is devised. PANORAMA offers you its services hoping that all will coop erate freely in the spirit of unity so badly needed among us.

The Following is a sighting of objects observed by tow members of this Society and others whilst travelling in a train . near Grafton on NSW .

Date.. 22nd May 1970 . Time 10.30. p.m. E.S.T.

Near Córinda. NSW . Soth of Grafton .

At first two small bights were observed by the partymoving very high and with high velocity in the same direction as the train which was moving south. suddenly they passed the train moving from faster by far. Unable to estimate the actual distance from train could have been 4 miles.

The Velocity.of objects. They moved from a stationary position at high acceleazation towards the south. They were definately not stars as they moved at odd velocity : in relation to all the other stars around them .

Description.. Two small fluttering white- yellow lights .

The above report was written down immediately after the sighting within two minutes of the event . and the witnesses were John Telfer , Peter Mandell , and Stephen Fuller the latter two being members of UFOPIA.

When interviewed later by the Editor on their return to Adelaide they were both adamant that the lights were NOT a figment of their imagination , were ot reflections of any kind and were in fact lights in the sky. That visibility that night was excellent . and the Editor knows them to be level headed young men.

#### SECOND SIGHTING THE SAME EVENING .

This time again two l ights appeared white-orange , larger than the previous ones and these appeared about 3. min after the previous sighting.

These lights however appeared to stop and start with no apparent high acceleration rate .

They were visible and always in sight either in front or at the side in relation to the train . they appeared to hover for 2 minutes on the horizon and to nearby stars and moved up and down slowly. Thensuddenly moved in front of the train to the south then back to the north to side of the train and appeared to come closer as the brightening increased towards the end of the sighting the shape of the object to be dimly oval on end.

One observer reported that to him it appeared that there was a light within the oval formation .

All the obervers took bearings of the stars as roughly as could be done in the train , and above the suspected UFO. to ascertain if it was moving and its movement in relation to these stars suggested a movement unique from that of the stars around it / The distance it moved away from these boty backwards and forwards rproved that it could not have possibly been a star or such like added to this the stopping and starting .

. The whole party who observed the objects were as follows

The Report was finished at 11.05 p.m. after all the party had fully discussed the incident and concluded that it was what they claimed it to be as stated above.

John Telfer .  
Wesley Chambers  
rever Mantell.  
Stephen fuller

Les Fuller.

#### UFOLOGY AND THEOSOPHY Cont. from P. 17

occupation of this planet. We are now obliged to THINK COMPLEXLY and elve into the forces that are within us and which permeate the globe. Thought is a trenchdous power and we must learn to control this and our emotions individually as we are inseparable parts of a cosmic unity.
