SPIRITUALITY.

of Progress.

Corresponding with every other function in nature, spirituality is made up of an infinite number of degrees, each degree being superior to its predecessor in perfection of manifestation and intensity of action.

Spirituality does not signify a long face, nor sickly sentimentality, nor ultra credulous veneration, nor Sunday morning pew worship, nor superstitious

prayerfulness, nor any other expression of weak-mindedness. Spirituality is a distinct function, or rather 'a combination of functions in note in the great majority of men and women it is especially conspicuous for its absence. It is frequently thought to be synony-

mous with benevolence, kindness, sympathy and brotherly love.

True, a spiritual person always has these precious virtues; and still he may be richly endowed with these and yet not be spiritual. Spirituality signifies the power to employ every human faculty according to its true nature, and in its full capacity.

To be true to self. A very extensive function, indeed. In order to employ every human fac-

ulty according to its true nature, the individual must necessarily have an immense storehouse of practical wisdom concerning the human entity.

We have written large libraries upon the physical body, supposing it to be the most important principle in the human

being, holding all the essential functions in human nature in its grasp. We now know we are sadly mistaken; | later. because a comprehensive study of the whole man reveals the indisputable fact

that the physical body is but a small part of man, and most probably the least important part.

Realizing how negligent we have been in the study, of man's higher nature, we should now proceed with undaunted perseverance, after having procured at our command all the necessary data with which to establish its truths.

Thousands are overanxious to witness the marvelous phenomena issuing through the higher principles in man, yet how few have made any substantial effort to study these higher principles

we ever expect to master the forces of ] our higher nature.

our higher nature. We cannot build the second story until the bricks of the first one are laid. He who would reach the lofty heights of spiritual freedom, divine wisdom and heavenly joy must be master over him-self. To attain this he must begin by He who would reach the lofty heights of spiritual freedom, divine wisdom and heavenly joy must be master over him-self. To attain this he must begin by conquering the lower self.

I do not mean that a single function Every faculty should be cultivated, but its use should be under the absolute control of one's higher nature.

There is no excuse for anyone ever becoming angry, nor holding malice, nor worrying, nor submitting to gloom and despair. We can rise above these petty human nature; though it is very sad to | things. Why are we slaves to them? By nature we are their masters, then let us be natural and assume our rights. As long as you permit your lower nature to control you, your higher nature will lie dormant.

Gain mastership over the lower self and you ascend in the scale, By extensive culture and perseverance in this direction, you shall eventually rule over all the functions of your being. Then, and not till then, can you be true to self. And he who is true to self cannot be false to anyone. Then can you be truly spiritual-a master mind.

To such a person, life is an endless day of celestial ecstasy; the book of wisdom lies open before him; and the key to divine power is in his hand.

This is the great goal for which every soul is eternally yearning. Spirituality is the path to this coveted goal. To enter this path, first become master over the lower self.

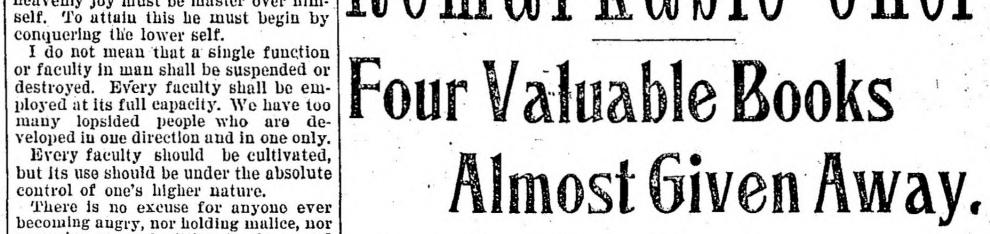

Concerning the methods employed in this great achievement, we shall speak , DR. C. D. LARSON. Cincinnati, Ohio.

Physiology is a noble science. But where does psychology stand? Let us make psychology as perfect a science as physiology, and we shall know something about ourselves. To arrive at this precious goal, every function, faculty, power or force in man must be studied through purely scientific methods; and every careful investigator of man's higher nature must inevitably come to the conclusion that we have at hand sufficient facts to establish psychology as one of the greatest sciences to-day. In fact it must essentially become the greatest science in the scientific category, dealing as it does with the higher nature of man. Man can never become spiritual until

psychology becomes a science. Every individual who has sufficiently studied one or more of the soul powers so as to grasp their meaning and relationship to human nature as a whole, can to a limited degree become spiritual, because spirituality, like everything else, has degrees of completeness. From our research we must inevitably conclude that the greater one's knowledge of self, the greater one's capacity to attain spirituality.

Therefore the knowledge of man's entire nature is what we desire, especially their use and abuse. Concerning the use and abuse of the functions of the physical body, most people are fairly well informed. But such a knowledge is sadly wanting in the realm of the objective mind, and still more so in the higher principles. We know that whenever a function is abused, force is wasted and the individual is retarded in his progress. As everybody wishes to reach out into better conditions of life, and all are daily striving in that direction, it be-

comes a subject of paramount importance to know how to so use our faculties that no energy is wasted, that no their early return. efforts are directed in barren channels.

takes, but there lives not a soul who could not decrease his mistakes considerably from time to time, providing he took the proper methods of procedure towards that end. The functions of the objective mind are daily abused by the multitudes, and sadly so. Concerning the abuse of the higher principles we cannot speak now. Upon the objective plane the greatest

mistake of man is to permit the passions and emotions to rule him. It is a sin for any person to permit any of his functions to control him. A spiritual person will never become angry; cannot hate a living creature, nor hold malice towards a single soul.

tended the auditors to be by invitation, and so it was the first night. But we held the meeting in a popular place (Hall's Academy) and the press report ers "got onto it," as we were informed by one of them; hence, the next day we had a public notice and thus the remaining meetings were more eagerly attended. The interest manifested far surpassed the most sanguine expectation. We could count only a few Spiritualists but we soon found we did not know our own friends. The lectures were profound and logical, giving us much needed information. The spirit greetings and descriptions given by Mis. Kates were par excellence. She is invariably clear, concise and correct. She brought consolation and conviction

to many, both in public and private. At the close of the Sunday evening meeting a call was made for those interested to remain and discuss the feasibility of organizing a local society. Quite a number remained and a motion to organize made at once, was carried without dissent. This spontaneity augurs well-for us. About twenty persons gave their names, and their mul-

tiple are ready to join. The Minnesota State Association's printed plan of organization was adopted with a few necessary changes. Thus quick work can be done when an equipped organizer is sent into the field. In less than an hour we adopted articles of Association and elected officers. The name selected, "The Alpha Society of Spiritualists of North Dakota," is to identify the first Spiritual society organized in our state. We trust it is the promise of many more. We selected the following officers: A. W. Dennis, president; F. E. Tiffany, vice-president; Miss M. E. Blodgett, secretary; O. Young, treasurer.

THE GOD IDEA

OF THE ANCIENTS.

This fine volume might well have been entitled Spiritualism Demonstrated by Science. It is written in that peculiar interesting style in which French writers excel when they would popularize scientific subjects in adaptation to the needs of the general reader. The author is not a Spiritualist-he even mentions Spiritualists as "devotees of a new super-stition," etc., etc., in which he manifests the usual animus of the "scientific class," yet he says again: "There is a true and respectable idea in Spiritualism," and regards as proved "the fact of communication between superhumans and the inhabitants of Earth;" and he goes on to relate instances of fact in evidence. There is, to a Spiritualist, a manifest discrepancy in the authors's ideas, but the well-read mind will readily select and arrange the pros and cons, and out of the whole will find not only good mental culture, but much valuable information. The author holds the theory of reincarnation. Price 1.52. For eale at this omice. Or Sex in Religion. "Schopenhauer is one of tue few philosophers who can be generally understood without a commentary. All his theories claim to be drawn direct from facts, to be suggested by observation, and to interpret the world as it is; and whatever view he takes, he is constant in his appeal to the experience of common life. This characteristic endows his style with a freshness and vigor which would be difficult to match in the philosophical writing of any country, and impossible in that of Germany."-Translato". of his plan. It is no longer thought a miracle when certain matter yields to the influence of the human mind to the degree of changing its formation - and characteristics. Anyone possessing the power of thought concentration to any degree may exert a corresponding degree of influence over certain kinds of matter. Perhaps the late Dr. Charcot. of Paris, was the greatest living demonstrator of this fact. But there are many metaphysicians now demonstrating their power to heal a lesion or produce\_an excrescence on a human body by mere suggestion. Or in other words, the mental picture materializes by strong thought concentration. Wonderful as this seems, the result is often a disappointment to the operator; the mental picture becomes a tangible

object but is not as perfect as the thought. As the man spirit corresponds with the God spirit, so must the human mentality compare with God's mentality and the works of man correspond with God's works. The "willin' to be forgiven" phase is about all they can manage, and that generally includes the understanding that no fuss is to be made over the thing they have done, and that they are thought leads to God; that the sun is to be treated rather a little better after it than before.

"God must be a woman," said a famous American poetess, "he is expected to forgive so much," daintily intimating thereby that her brothers are the especial adepts in the gracious art of "willin' to be forgiven." And certainly no one who has a close acquaintance with them can honestly deny that it is the only act or part in the pardon act that they can exactly adorn. The preliminary process of convincing them that they have done anything to need forgiveness sets them in such a whirling ferment of excitement and rebellion that you might as well try to catch

forked lightning and resolve it to a "sweet sunbeam" as reduce their minds to any sane action in the matter. Sometimes, left to themselves, they do indeed come round and submit to your most tender and overflowing lavishness of pardon. But woe to all your chances if you attempt to run a word of blame or admonition into the nice work. And that is the funny part of this forgiveness business with signers of all descriptions. They want to be forgiven like glorious saints, who really haven't done anything worth speaking of, miserable sinners who are hardly worth forgiveness at the best. Can Cure Those Who Are Insane HALLUCINATIONS RELIEVED,

Mas 17, 1900.

Prof. James H. Hyslop, of Columbia University, said lately to a New York Herald reporter, that it is quite probable that the insane asylums could be relieved of a great portion of their patients if a thorough and scientific investigation is made of the phenomena of hallucination. The Professor thinks many persons adjudged to be insane are

merely the victims of the sort of hallucination known as automatism, apparition or coincidence.

It is for the purpose of making such scientific investigation, by experienced observers and experimenters, that he has suggested the raising af a fund of \$50,000 a year to be expended in the examination of cases of automatism and apparition.

"The insane asylums are full of this sort of thing," said he. "If we could carry out a systematic study of hallucination, as was carried out in France by Pierre Janet, we probably should be able to discover a cure for all forms of

insanity based upon hallucination. "Of course it would not be expected that our investigations would enable us to deal curatively with acute mania, with melancholia or with epileptic insanity. These forms have a far different origin. But we could probably find the cause of the trouble in cases of mental insanity, which is generally based upon hallucinations.

"We could expend \$50,000 a year to the great benefit of science and practical medicine, I believe. We should have trained investigators, with a central organization. It will be necessary to investigate all forms of hallucination. apparition, automatism and coincidences. Many of the so-called insane are merely the victims of one of these forms of hallucination. To help them would be one of the practical results of the investigations we propose. There are also scientific results that would be of equal value in throwing light upon many operations of the mind and nervous organism.

varied severity, proportioned so far as possible to the enormity of the offence Personal injuries where life or mind is involved receive the severest penalties. There is one class of offenders who are permitted to wreck the mind, fill insane asylums with victims, hasten their destruction, and impoverish familles, which have escaped the attention of law-makers. We refer to that itinerant class who wander from place to place, most active in the winter months, who make heavy drafts on superstition, and portray with frenzied rhetoric the miseries of the damned in another state of being, arousing apprehensions which have no existence in fact, producing such a state of fear and anxiety as to hurl reason from its throne.

The robber who frightens his victim and takes his purse is not half as culpable as he who is filling the insane asylums with the young, the timid, and the irresolute. Here is an account of the latest case coming under our observation, but they are daily occurrences:

"Carmi, Ill., Feb. 20.-William Garner, aged 55, a prosperous farmer, has just been taken to the insane asylum at Anna. In August, Garner professed religion in a meeting conducted by a Kentucky evangelist. He gradually let religion absorb his whole attention and became a fanatic. When brought to this city he was a raving maniac. In his deliriums he said he could see Christ, and warned men to prepare for the end of the world, which he clauned was near. His brother is a millionaire." If restrictive legislation is ever needed it is in like cases to the above.

New Field for Missionaries.

The London papers publish an account given by one E. S. Grogan, who claims to have just reached England after having made a complete tour of Africa from Cape Colony to Cairo, a distance of 6,500 miles, having spent two years in the trip. He had eight porters in his service. After leaving Lake Tanganyika he entered a region of active volcanoes, where he encountered a veritable sea of burning lava 40x60 miles in extent, and probably 100 feet deep. He represents the surrounding country as occupied by denly,' the tale goes, 'I heard a noise of early Christianity, if we are to place about 5,000 Balekas, ferocious cannibals, who live by man-hunting and of the sea. That is the region of all regions for the missionary, in which he can be of more real service to humanity, without endangering national complications, than probably anywhere else in the wide world. He can teach the natives his hell-fire creed; and there is the lake he can exhibit in confirmation of his statement, just as Catholic priests in Nicaragua were wont to take their communicants to the summit of Mount Masaya, point to the boiling, surging, molten flame far below, and assure them, "That is hell, and that is the eternal home of those who reject the Lord Jesus, or disregard the instructions of his successors." Failing in his mission he will have the satisfaction of "feeding the hungry," and demonstrating the value of missionary cutlet.

The same story with slight modifications is ascribed to different individuals.

A curious incident is found on an 4:10. earthen slab brought from Babylon, now on file in the British Museum, wherein it appears the adventures of the infant Moses, preserved by an ark of bulrushes on the Nile, was a record 4:13. the mighty Sargon, king of Accad, made of himself 3,760 years ago, near half a sake. thousand years before Moses was born. long ago. For many years, under auspices of the church, explorations have been made in Palestine, and in the valley of the Nile, to find ancient traces of the Jews, hoping to gain something to corroborate what they term "sacred history." Every little while some wonderful "find" is reported, over which the whole Christian world rejoices. Soon after an investigation is made and it is proved a fraud. The fake was devised to stimulate contributions to aid the explorations, the agitators all the time, like the unsuccessful gambler, hoping the to Joseph Smith, the founder of the next deal will be a success. Thus far of the innumerable confirmatory finds not one has borne the test of honest and impartial criticism. Prof. P. E. More, of Harvard Uni-

versity, has lately published a magazine article entitled "The Golden Age of Literature," wherein he mentions the 'Egyptian Tales," prepared by M. Strengthening Their Outposts, It is stated the several factions of Mormons scattered over the United States have settled their differences, and hereafter will work together in harmony. Their division grew out of the polygamy question. With that settled there is no reason why they should not labor together as one church. Aside from the pretended special revelation sect, there is little between them and

the Baptists. The Mormons came prominently into being in the '30s, when Miller was promulgating his advent theories; and as Smith accepted Miller's teachings they entered largely into the Mormon faith, and still continue a portion of it. They accept the Bible as the

Word of God, and Jesus as his Son and their Redeemer. The "Book of Mormon" is a side issue; its evident object was to make more clear portions of the Holy Scriptures. Polygamy discarded, Jo. Smith, and his special revelations relegated to their true place in history. and the vices of the early members of the church, partly induced by their persecutions discarded, and we see no good reason why they should not take their

place with the evangelical churches. Their past was not one-half as offensive as were many of the heretical sects of credit in church historians.

All this grows out of a law of nature and psychology in the case, which man himself has no power to help or hinder, and that is that forgiveness is an act which has its direct effect upon the soul forgiving and not upon the soul forgiven, so that the fact of that forgiveness can in no way alter the character of a man's deed or his friend's estimate of it. Herein, of course, lies the weakness of the whole effort, as well as the pathetic mockery of it. "Even the gods cannot undo the thing that is done," said the ancient sage, and it is not that

#### Two New Saints.

In this Jubilee year the head of the Catholic church has decided to do a thing quite an every-day occurrence in the past, but recently unusual; it is going to make two spick and span new saints! Now when the material of the old saints is considered, that their principal merit was ignorance and dirty linen-speaking figuratively, for they had no real linen-some putting in a claim for sainthood on account of their vermin, it would be the conclusion of ordinary reason that some present-day man or woman who had blessed the world would be canonized. Edison, or Darwin, Huxley, Florence Nightingale or Clara Barton are most deserving. Why not canonize them? Why? Because they are not Catholics-the saints are all Catholics. NOTE.-The Questions and Answers have called forth such a host of respondents, that to give all equal hearing compels the answers to be made in the most condensed form, and often out. clearness is perhaps sacrificed to this forced brevity. Proofs have to be omitted, and the style becomes thereby assertive, which of all things is to be deprecated. Correspondents often weary with waiting for the appearance of their questions and write letters of inquiry. The supply of matter is always several weeks ahead of the space given, and hence there is unavoidable delay. Every one has to wait his time and place, and all are treated with equal favor.

A Masterly Review and a Note of Earnest Warning to Its Cure Pointed Out by Dr. Harrison, a Prominent Physician,

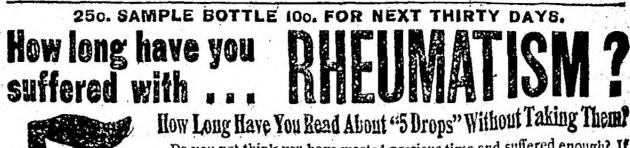

PNEUMONIA.

[We have been receiving of late many prescriptions for the cure of pneumonia, but have not published them, as The Progressive Thinker is not a medical paper. We however, select this one as of special importance, and give it to our readers.-Editor.]

To the Editor:-I have been reading in The Progressive Thinker of late a good deal about pneumonia and its treatment. As you know and many of your readers know, there are, to me, but two diseases; either positive or negative; as I believe in the electric law of life. These diseases can be divided and subdivided into hundreds of names and variations for the purpose of giving their location or where manifested and its individual intensity, but still the disease is either positive or negative in its its influence, and it will take either a positive or a negative remedy to cure. Now pneumonia is always a positive disease, and as two positives repel one another, it will require a positive remedy to cure pneumonia.

What I wish is to so instruct the reader that he can positively cure pneumonia and never make a failure. I assume that the ordinary family, especially in the country, has not the electrically positive medicine to meet the case, so we must cure our patient without it, and we can. If I were writing to show a physician how to succeed in curing his pneumonia patient, there would be some changes in the procedure, but the result would be the same. I wish to say that I graduated in medicine in 1868 in one school, and in 1874 in another, and that I have from my early boyhood been actively engaged in the profession of healing the sick, therefore speak from experience. It was in the seventies when I came to the belief of positive and negative remedies, and also at this time came to the knowledge that all mankind was more or less electric, and that it was the dis-

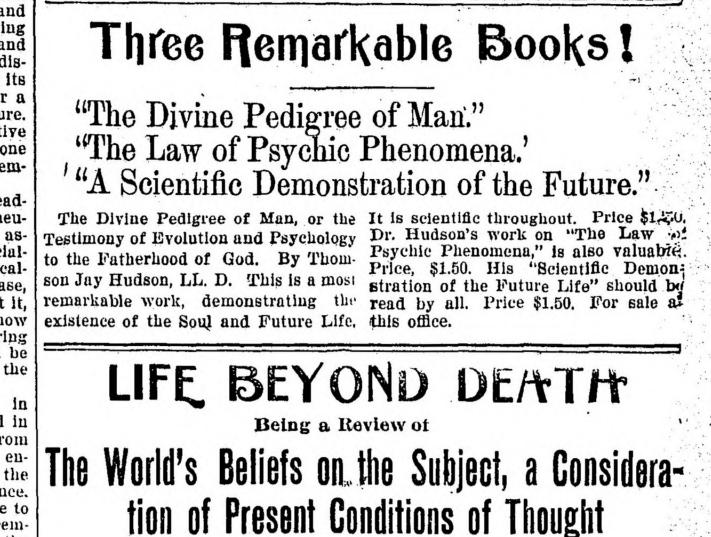

turbance of this electric influence that this electric disturbance restores health. I shall not go into the cause that leads

The remedy is to take a glass of water, set it in the left hand and stir with a teaspoon. Now this electrifies the water with your own healthy, positive electric force, and it should be done by the healthiest and most positive person in the house. When magnetizing the water keep your eyes fastened on it, with the positive thought that this will cure the patient.

Hahnemann when preparing his medicines in this manner, called it dynamization, and a very good name, for it makes the water dynamic.

DREAM

**Given in Answer to Prayer.** 

I retired to rest feeling unusually depressed in spirit, and prayed as I never prayed before, that my angel friends would come to my relief (if only in a dream) - especially my own dear mother, who passed on several years since.

Well, she came, and this is the way I saw her: I stood in a strange place, somewhere I have never seen, conversing with a company of young people who were strangers to me, and all at

once I cast my eyes upward, just off a little distance in front of where we were standing, and there she was, gracefully gliding along from east to west, neither turning to the right or left-not walking, but rather floating in the air. She was many feet above us, and when I say her I broke away from the company, running nearer to the place, and called out in a loud voice,

A Railway Engineer's Experience.

To the Editor:-In the year 1885." I was on the Kansas City, Springfield & Memphis Rallway as a locomotive enwalking on the track ahead, but when he did not get off I was in for doing all I could to stop the train, but on we dashed right into the man. Just as we struck him, or nearly so, he vanished before the engine. The fireman also saw him. Well, I kept a very sharp lookout for an accident, as I have had many of these warnings, and knew what they meant. We did not have the accident that trip, but the impression came to run slow over a certain piece of track, which I did, and avoided an accident; but on the return trip when we reached this place, I did not run over 8 miles per hour. When I thought we were beyond the dangerous part of the track, I reached for the throttle with my left hand, but my hand was pulled. back again. Again I reached for the throttle, but my hand was pulled back. I reached the third time, but this time I very plainly felt my left wrist within the grip of a powerful hand, and could not reach the throttle. Within three seconds the train stopped suddenly with a jar. We went back to see what was the cause of sudden stop, and the third car from the locomotive was without wheels under the forward end. The wheels had jumped the track and fell in a cattle guard, and the back wheels came against the wrecked wheels, and stopped the train. As we were not running fast, it did not ditch the train. have often thought that if I had reached the throttle to increase the speed of the train. I would have been in spirit land A. L.
