Religio-Philosophical Journal

JOHN C. BUNDY, Editor. GEORGE D. STRONG, Associate Editors.

Terms of Subscription in Advance. One copy one year, \$3.50. One copy six months, \$2.00.

Clubs of five, yearly subscribers, one cent in advance, \$10.00.

Clubs of Ten, Yearly Subscribers, sent in one time and an extra copy to the publisher of the Club, \$20.00.

As the price has been raised by the publisher, we have heretofore charged fifty cents per year extra therefor. Hereafter we shall make no charge to the subscriber for postage.

Remittances should be made by Money Order, Registered Letter or Draft on New York. Do not in any case send checks on local banks.

All letters and communications should be addressed, with all remittances made payable to, JOHN C. BUNDY, Chicago, Ill.

Entered at the postoffice at Chicago, Ill., as second class matter. LOCATION: 24 and 26 LaSalle Street, corner of LaSalle and Washington Sts.

CHICAGO, Ill., October 29, 1881. NOTICE TO SUBSCRIBERS. Subscriptions not paid in advance are charged at the old price of \$3.15 per year.

Telegraphic Photography—"The Protean Dance of the Elements."

An eminent English scientist describes the constant transformations and transmutations, and the appearances and disappearances of forms and of visible matter, as the "Protean dance of the elements."

The comparison is a happy one, yet his scientific methods fall to the wayside, and he loses sight of the fact that visible and invisible are co-existent motions.

Proteus, in the old story, could become visible or invisible, could assume any form at pleasure and escape from any clasp with but the spirit of Proteus betrayed and dissolved these forms.

In "The Protean Dance of the Elements," the inductive scientist recognizes no controlling spirit "in all and through all," but only force and law, blind and relentless—most lame and impotent conclusion!

Yet it is full of interest to see how the last and best investigations of science carry us back to the subtle and impalpable, and recognize the easy and frequent transmutations to and fro, between visible and invisible.

We remember, a year ago, witnessing some beautiful popular experiments of a scientific lecturer. The skilled operator brought out his bag and contents of invisible gases, poured out the invisible streams of their intangible contents into one invisible current, touched it with a blissing paper, and at once a fine-mist of water fell through the air.

Then he set fire to a coil of the white heat of the oxy-hydrogen blow pipe, took up a light bar of iron, held it in that stream of fire, and it flew into red sparks, dissolved into dim smoke, and melted away in the vapor and beyond the purview of our dim senses.

How the audience were held in suspense! How delighted and surprised at these results!

The lecturer was building better than he thought. He was playing a trick, and his transmutations into hands that begin to see how to hold and use it.

He was illustrating spirit-materialization and the disappearance of spirit-forms. Everything tends that way, and we may thank science for that, while we regret and criticize the spiritual blindness of some of its votaries.

A French experimenter tests of matter far more delicate and far lighter than hydrogen and all the rest of the elements, finding that out of this invisible region spring subtle powers that control and subdue all visible things.

The locomotive and steamship show how a delicate vapor, propelled by the shaft of a piston, can produce a power more subtle and swifter than steam. Telephone and photograph, marvels yesterday, but familiar facts today, had the same story.

Skilled inventors have been able to transform a mere electric current into a power more subtle and swifter than steam. Telephone and photograph, marvels yesterday, but familiar facts today, had the same story.

Skilled inventors have been able to transform a mere electric current into a power more subtle and swifter than steam. Telephone and photograph, marvels yesterday, but familiar facts today, had the same story.

A great deal of interest has been excited lately by the proposals which have been made to transform a mere electric current into a power more subtle and swifter than steam.

telegraph. At a recent meeting of the Physical Society, two pieces of apparatus were shown by Mr. H. Rowland, a very elementary one was actually sent along a short length of wire and reproduced at its opposite end. These two were called distinct in idea and construction: one was by Mr. Rowland himself and the other by Mr. H. Rowland and Mr. H. Rowland and Mr. H. Rowland.

The power which an electric current possesses of decomposing certain chemical compounds has been made familiar to us by various telegraphic instruments, notably in the case of the telegraph and in the case of the telegraph.

In previous telegraphic instruments, various devices were employed for controlling the electric current at the sending station, and it occurred to Mr. Rowland that this might be done by the action of light itself on selenium, the curious metal, the properties of which have been made familiar to the public by Prof. B. H. Pictet's photophone.

Selenium, it will be remembered, under certain conditions, is electrically a poor conductor, but more freely in the light than in the dark. A properly constructed selenium cell, will vary the strength of the current passing through it in direct proportion to the light falling on it.

If, now, we imagine a photographic image focused on a selenium cell, the selenium will be made to act as a receiver of the light and shadows of it in succession, it will consequently regulate an electric current during any amount of time that above described, provided, of course, that the selenium is not exhausted.

Mr. Rowland has made a piece of apparatus by which he can transmit rough outlines of very simple figures—square or diamond shapes, for instance, or in pieces of zinc.

The apparatus for the same purpose by Messrs. Ayrton and Perry consists of a "magnet" of selenium cells, each cell in telegraphic communication with a corresponding number of devices, by which a small light is adjusted to the motion of the selenium cell.

They thus have produced a pattern in light and shade corresponding to the image of the selenium cell, and the selenium cell is thrown on them from a magnifying lens or other optical arrangement, so that the light and shade of the object from which it is taken.

This, it is, indeed, a very bold outline of the selenium cell, but it may suffice to give a notion of its principles.

Further, they are trying to avail themselves of the properties of the Japanese "magic mirror" by using a metal plate and selenium cell, so that the light which it might be possible thus to act upon its surface sufficiently to affect the selenium cell, and the selenium cell is thrown on them from a magnifying lens or other optical arrangement, so that the light and shade of the object from which it is taken.

This, it is, indeed, a very bold outline of the selenium cell, but it may suffice to give a notion of its principles.

Mediumship—Give our Mediums Time to Rest.

In order that one may become a medium, or the organism be so attuned or adjusted that its forces and impulses respond to the will of the controlling influence, great care, patience and perseverance is required by those higher intelligences which have matters in charge. It is not the work of a day, but requires for its ultimate growth and perfection years of unremitting attention.

The manifestations of a single rap in the hand, or a great and important unfolding. The appearance of a prophecy about the clairvoyant vision is a flood of a realization of the sight of self-sold spirit form.

At a night by a spirit hand may be taken that materializations of your loved ones will follow at no distant day. Preliminary indications a latent mediumship which may be developed eventually into grand proportions.

Commanding on the lowest plane, the very highest phase of mediumship attainable, may with proper care and honest aspirations finally be realized. Just in that proportion that mediumship is developed in different cases, they become more sensitive, and greater care is necessary in order to protect themselves from the deleterious influences which will occasionally assail them.

When a medium is in a state of high nervous atmosphere, or night is exceedingly dangerous and poisonous to the consumptive person—of like destructive nature many times, are the immediate surroundings, and an appropriate and judiciously chosen and themselves the recipients of forces that befog their vision, deaden their clairvoyant powers, and render their perceptions obtuse and health poor, and they have no word in explanation.

Perhaps it was necessary for some one to be sacrificed to dispel this sad superstition, and Garfield has in this manner accomplished more than he could by living the remaining years of his life. The two advances by means of bloody baptisms.

The science of medicines has suffered quite as much as the belief in prayer. The best medical service was secured; the attending surgeon was acknowledged as the head of the profession, and surgery is notably more accurate and advanced than medicine, yet the autopsy shows that they were utterly mistaken, and so far as any remedy rendered by the medical cleaning the track of the ball, they might as well not have been in attendance. If quackery means ignorance, there never was then more ardent quackery.

Their bodies were washed day by day and hour by hour, on which the people built their hopes, now make entertaining reading. The "healthy granulation" and "healthy pus" constantly observed from the time it occurred, is a fact that is not to be passed through the liver, as it was said to have done at first, now strangely sound like the smartness of the quack. From the first, to the last, these halts were false, misapprehensions, and holding out erroneous grounds for hope.

How readily would a clairvoyant have pointed out the position of the ball, and with how much more certainty than the doctor's diagnosis. And yet, what contentment would this proposition have received!

A New Spiritual Paper in Germany—Der Sprechsaal. The first number of the new paper we recently announced as soon to appear, has been received. It is published by the well-known publisher, Wm. Besser, at Leipzig, and is edited by Dr. B. Oryx.

It is every way creditable to all concerned, and arrangements are completed so that German spiritualists in the United States will have a most able exponent of their views, which they can readily obtain. As already alluded to in these columns, Dr. Oryx went to Germany by invitation, rather as impelled by his spirit, rather than by any years of arduous instruction. They educated him in a certain direction for a certain purpose, and when the time came he was compelled to return to the Fatherland.

From the beginning, the way has been opened, and success has awaited him. He soon saw that an organ to present the spirit of Spiritualism, was of prime necessity, and soon these forces organized themselves into a project, and October first saw the first number published. Dr. Oryx is every way qualified for his task. His whole being is in the work; unselfish and self-sacrificing; to the extent of giving for his good, and his own, he is ready to give of his life, even his life to the task. To this we must add, an honesty that never turns a hair's breadth from the path of duty; and still more, he has the depth of the German metaphysics, the breadth of views bestowed by Spiritualism.

An introduction is followed by an article defining the terms, "Spiritualism" and "Mediumship." These are followed by numerous articles on "What is Spiritualism?" "Harmony," "The Position of Woman," "Mediumship," etc., with lengthy communications from the well known German American, Dr. G. H. Wood, Frederick Munch, and J. A. Heinemann. The paper will become a power in Germany, and we wish it unbanded success.

A few years ago the whole Presbyterian body was shocked because an eminent Brooklyn divine allowed Sarah Simley, a Quaker evangelist, to preach in his pulpit. Indeed, we believe that the very last of his clerical robes on account of it, only relating his position by pledging himself not to repeat the offense. Last Sunday Dr. A. B. Stoneham of Chicago, received and accepted from the Presbyterian minister of Cadillac, Michigan, an invitation to give a radical discourse upon the "Relation of Food to Intemperance." No one imagines for a moment that the minister in charge will suffer on account of the impropriety of the Doctor does not meddle with religious dogmas, but both in her conversations upon health and in her temperance work, she is able often to give ideas that set people to thinking, and to the "disease of the mind" that we do not listen to, though if they knew it was such. She will return to Chicago in a few days and will organize herself in the city in various sections.

Though we have no gold or silver mine in Colorado we have a "prospect" at Boulder, which we will sell cheap and hope the buyers will make it pan out better than we have been able to. We suppose we might offer the plant under the title of the Consolidated Boulder Mine. It consists of the unpaid accounts for subscriptions to the JOURNAL extending over the last few years. The names and amounts are as follows:

- Wm. Besser, \$12 43
R. D. McLeary, 14 29
Joseph Wolf, 10 76
F. P. Paine, 21 75
J. H. Decker, 18 71
A. Wright, 14 97

The above accounts we offer for sale, either in a lump or separately, to the highest bidder. If these go off well we have more of the same quality to offer, but we don't want to overstock the market.

Rev. Clark Braden who seems never to be really happy unless he has some heretic roasting over his fire, is now engaged in inventing Ingersoll. Braden proposes to deliver the initial warbler by publishing a book entitled "The History of the 'Ingersoll' and 'Ingersoll Unmasked.'" Those whose credit only can be gratified by sending ten cents to the address of Rev. J. C. Holmes, Boston, Mass., or New York City.

The Prayer Test and the Science of Medicine.

The prayers of 50,000,000 Christians, sent up to the throne of grace, has been unavailing. If ever prayer was offered by sincere hearts, with unselfish singleness of purpose, it has been during the last three months for the recovery of President Garfield. The result should open the eyes of those who believe in the efficacy of prayer, and will unless they are hopelessly blinded by the unchangeable and unchangeable, and the prayers of a million saints cannot change them. The whole scheme has fallen flat, in pitiable failure, and so thoroughly committed are the clergy that they have no word in explanation.

Perhaps it was necessary for some one to be sacrificed to dispel this sad superstition, and Garfield has in this manner accomplished more than he could by living the remaining years of his life. The two advances by means of bloody baptisms.

The science of medicines has suffered quite as much as the belief in prayer. Green Bay and Vicinity—Spiritual Revival Among the French.

Mr. L. A. R. Duchateau, of Green Bay, Wisconsin, spent an hour with us last week, and gave most interesting information from that region. In Green Bay and vicinity are a good many French people, mostly from Canada, Duchateau being one of their number. A remarkable abundance of mediumship, and an interest in Spiritualism, has sprung up among them. At Green Bay, a half forty-five by thirty-two feet, in a hall, Duchateau being one of their number. A remarkable abundance of mediumship, and an interest in Spiritualism, has sprung up among them.

At Green Bay, a half forty-five by thirty-two feet, in a hall, Duchateau being one of their number. A remarkable abundance of mediumship, and an interest in Spiritualism, has sprung up among them. Voices from the People. AND INFORMATION ON VARIOUS SUBJECTS PERTAINING TO THE HARMONIOUS PHILOSOPHY.

The Mother's Recollections.

By MARY ANNA BISHOP. I had no tears upon my grave. I had no tears upon my grave. I had no tears upon my grave. I had no tears upon my grave.

The Value of Medical Science.

We are glad to see an able editor in the Two Worlds under the above title, and to welcome the aid of the great medical science in the hands of the doctors over the sick bed of President Grant, and endeavoring to save his life.

A Brace of Ghost Stories from Scotland.

Mr. George Sinclair, possessor of the Royal Philomathesian Society, has translated the following into English from the "Scottish Folk-Lore," published in 1860, by the Rev. James H. Wilson, Minister of St. Andrew's, in Scotland.

Concerning Professor Pash's recent article on the Calvinistic theory of preaching.

Prof. Pash says, with confidence, where are signs that the Calvinistic faith is not meeting the new conditions of life? but he has only to visit the streets of New York to be convinced that the Calvinistic faith is not meeting the new conditions of life.

A Plea for the Revival of Spiritualism.

Under this head Mr. James Hastings Brown writes to the English spiritualists, announcing his intention of publishing a book on the subject.

An Extraordinary Medium.

To the Editor of the Religio-Philosophical Journal: I have the honor to acknowledge the receipt of your issue of the 15th inst., and to be glad to see that you are still publishing the "Voices from the People."

The Morning.

By J. J. MURPHY CASE. To the Editor of the Religio-Philosophical Journal: I have been silent for a long time, not on reading Rev. O. C. Carr's splendid article on "Christianity and the Revival of Spiritualism."

A Commencement to the Spiritualists of Kansas.

To the Editor of the Religio-Philosophical Journal: We wish to say to the Spiritualists of Kansas, that at the third Annual Meeting of the Liberalists held at Ottawa, Kan., on the 15th of August, 1881, the following resolutions were adopted.

Report of Spiritualist Meetings.

To the Editor of the Religio-Philosophical Journal: The Spiritualists of Georgetown, Madison Co., N. Y., held their annual meeting on the 15th of September, 1881, at the residence of Mr. J. D. Cook, Jr., President, and Mrs. E. A. Hall, Secretary.

Theology of Charles II.

"Theology of Charles II. says: 'The clergyman of Geneva, III. says to disagree regarding the subject of prayer.'"

Mr. H. H. Moffitt's Outline of my subscription to the Journal.

Mr. H. H. Moffitt writes: 'Outline my subscription to the Journal as I cannot afford to do without it.'"

Sherman Kake (N. Y.) Camp Meeting.

The second annual camp meeting of Sherman Kake (N. Y.) Camp Meeting, held at Sherman Kake, N. Y., on the 15th of August, 1881, was a most successful one.

Mr. J. Reed Wadsworth, Bethel, and Dr. Blaine (New York).

Mr. J. Reed Wadsworth, Bethel, and Dr. Blaine (New York) were present at the camp meeting, and their presence was a great help to the cause.

Charles Sullivan's character-entertainment.

Charles Sullivan's character-entertainment, given at the camp meeting, was a most successful one, and was well received by all present.

The following are the names of the assistants.

The following are the names of the assistants: President, Dr. H. H. Moffitt; Secretary, Mr. J. D. Cook, Jr.; Treasurer, Mr. J. D. Cook, Jr.; and so on.

Science is very "naturally" clearing up long-vested notions.

Science is very "naturally" clearing up long-vested notions, and is doing so in a most successful manner, and to the benefit of all.

The natural disposition of childhood is suitable for a spiritual foundation being laid.

The natural disposition of childhood is suitable for a spiritual foundation being laid, and it is our duty to take advantage of this fact.

Where the heart goes before, like a lamp, and illumines the pathway.

Where the heart goes before, like a lamp, and illumines the pathway, and leads us to the light of truth, and to the life of heaven.

Some one has said, "The hand that rocks the cradle is the hand that rules the world."

Some one has said, "The hand that rocks the cradle is the hand that rules the world," and it is true, for the influence of the mother is a most powerful one.

Swedenborg declared more than a hundred years ago that the material world is as his spiritual world.

Swedenborg declared more than a hundred years ago that the material world is as his spiritual world, and that the two are one, and that the material world is a shadow of the spiritual world.

Success can never be attained in the development of spiritual life until the real workers in our case are the children of the Father.

Success can never be attained in the development of spiritual life until the real workers in our case are the children of the Father, and it is our duty to take advantage of this fact.
