## BRIGHT METEOR IS SPOTTED

New Brunswickers were treated to a sky show last night as a bright bluish-white meteor travelled across the province in a northern direction.

Several persons in the city reported seeing the display which after seeming to explode in mid-air fell with a disappearing tail of white-fire.

People in the outlying districts where the display was not dimmed by city lights reported that it lit up the countryside. (The Daily Gleaner, Apr. 5, 1962, Fredericton, New Brunswick.)

## STRANGE 'FLAMING' OBJECT SEEN IN N.E. STILL A MYSTERY

By R.A. Ferguson.

A mysterious "flaming" object seen recently in New Brunswick skies seems to be more of a mystery than ever, following a report that a truck driver came close to being struck by it--- whatever 'it' was.

Hubert Howe of Fredericton, a truck driver employed by the Willard Mc Fayden sawmill of the Miramichi Lumber Company Limited, about 11 miles from Boiestown, reported his vehicle being struck by "a piece of fire" Wednesday night. He was in the cab at the time.

Mr. Howe and three fellow workers all agreed that the object seemed like "A big blue ball of fire". They described the light given off by it as similar in color and brightness to that of an electric arc welder.

While moving the truck slowly along a muddy road near the mill with a load of lumber, Mr. Howe said the

first thing he noticed was a bright glare coming from under both sides of the truck "like something was burning underneath it.

"I got out of the cab and here was this piece of fire stuck between the rear of the cab and the front of the body." He then threw mud at the fire in an effort to extinguish it. As soon as the mud hit it, the flaming material "fell off in blobs, almost like it was jelly."

As soon as it hit the wet muddy ground, Mr. Howe said, the fire went out. He did not have any impression of great heat coming from it. "Although I remember it being warm."

A Daily Gleaner reporter and photographer visited the scene Friday afternoon and were unable to find any traces of the object. Earlier reports reaching Boiestown had indicated the truck had been set afire. However, the truck was unmarked and showed no signs of having been hit by anything, ---flaming or otherwise.

Robert Palmer of Boiestown who was working in the millyard with his brothers, Murray and Benny Munn, also of Boiestown, reported seeing the object moving at what he thought to be about tree-top level.

"The three of us were watching an airplane fly over to the northeast and that was how we were looking at the sky at the time," said Mr. Palmer.

"Just after the plane had passed we saw a blue flaming object pass over in the same direction. It seemed to break up over the trees near us and fall to the ground, giving off a bluish glare like

a welding torch."

Mr. Howe thought that "someone was playing a trick" on him. After I got the fire out, I didn't think much more about it and went on and finished my shift." Later when he finished work that night he found out that the three other men had seen it, and some time later, heard of the sightings in other parts of New Brunswick.

Dr. D.J.C. Laning, of the University of New Brunswick's geology department, commenting on the occurrence, was unable to give any ready explanation for the object. "From the description I have heard, I think we can discount two things. It certainly wasn't a meteor and it certainly was not dropped from an aircraft." Dr. Laning said that had it been a meteor it would have been solid and probably would have demolished the truck.

"No meteor appears as a jelly-like substance," he said. "Also it would have been extremely hot and the heat would have been far more noticeable than it was."

The geologist said that the only possible explanation he could offer was that the object was something off a rocket. He cautioned that it was only speculation, but some of the ways it behaved might be similar to some of the "Sophisticated alloys" being used in this field.

"The glare it gave off seems similar to some magnesium alloys," he said. The fact that no trace was found after it burned would also seem to point to magnesium "as it burns to a white ash, and this would be very hard to find in the thick mud."

"That's just a thought I had, but I'm quite likely wrong," said Dr. Laning. RCAF Station Chatham commanding officer Group Captain A.F. Banville, said radar had not picked up any trace of the object in the area.

(The Daily Gleaner, Fredericton, N.E. April 7, 1962.)

#### "BALL OF FIRE" SPOTTED AGAIN

Port Arthur, Ontario. (CP)

The appearance of a mysterious "ball of fire" was reported over the lakehead by Mark Sauerbrei, Ontario department of lands and forests supervisor.

Mr. Sauerbrei said he saw a "bright

falling light" in the southwest sky at 10:30 p.m., Thursday night. He described the object as larger than a falling star meteorite, with a bright, intense yellow glare.

"It increased in intensity, coming down until it got within 35 degrees above the horizon, then the light started to waver," said Mr. Sauerbrei, "By that time the light had reached its climax, and it disappeared."

The appearance lasted only a few seconds, but its intensity was sufficient to create "quite an apparent light." (The Sarnia Observer, April 7, 1962)

#### METEOR FALL SPARKLES SKY IN SOUTHLAND

A meteor fall was seen in the northern sky early Saturday. Dr. Clarence Clemminshaw, director of the Griffith Park Planetarium, said the fall is not among the 25 major meteor "showers" listed in astronomy records.

Weather Bureau officials said about 15 meteors were seen in an hour beginning just before midnight. More than this are usually observed in the true meteor shower, which would last much longer, Dr. Clemminshaw said. (The Los Angeles Times, March 4, 1962. Credit: Mrs. G. Fusaro, Huntington, L.I., N.Y.)

#### METEORITES FALL ON NEW MEXICO

Albuquerque, N.M. (AP) A scientist and state police are searching for fragments of a meteorite shower that startled north-central New Mexico residents. Dr. Lincoln LaPaz, head of the New Mexico University Meteoritics Institute said the Saturday night fall ranks among the 10 or 12 biggest in the 20th century. He said reports indicated the body was a stony meteorite as distinguished from a nickel-iron or nickel-stony meteorite.

Witnesses said it exploded and showered blue and orange-red fragments. LaPaz said the fragments probably scattered over sparsely populated mountain country northwest of Los Alamos. (Long Island Press, April 2, 1962. Credit: Mrs. Gladys Fusaro, L.I., N.Y.)

#### HUMOR -- By HO-MAR the Martian

Russia's Cruise-chef is always cooking up a stew for the heads of governments, trying to make them swallow things that give them A-tonic ache!

## SAUCERS OVER CUBA

(Correspondent Henry R. Gallart sends us his experiences with the saucers as noted below.)

The first UFO I saw over Cuba was from the vicinity of the town of Caney in Oriente province sometime in January 1960. It was near the base of the Sierra Maestra mountain range. At 7:45 p.m. I was talking to the soldiers encamped on our property. Suddenly, moving in an east to west direction and over the nearby mountains (2500 ft. in elevation) there appeared what seemed to be a great ball of fire silently crossing right in front of us. There was no noise whatsoever. The visibility was excellent on this dark starlit night. A clear trail of multi-colored sparks was left behind by the object. Our own altitude would have been about 500 to 600 feet above sea level. The second sighting occurred over the former Texaco petroleum refinery at Santiago de Cuba's bay one morning at 10:45 in May, 1961.

I had taken a friend over to the plant to deal in the matter of painting the company's cars. He and others had seen an object (he related to me) come from a northwest direction very slowly till it was right on top of the plant. I was then called. To my knowledge it was hovering, and rocking to and fro in a falling leaf manner. From my angle of view it looked roughly like a metallic football, although I don't guarantee it. No height was available to check the altitude.

It was seen during fifteen minutes, after which time I returned to work. I was later informed by the same friend that the object had picked up speed and disappeared in a flash. It was seen by the entire office group.

## ADAMSKI FIRST...GLENN SECOND?

In the first moments of dawn, on Feb. 20, 1962, Astronaut John Glenn saw a fantastic sight. His first thought was that his capsule had tilted so that he was looking into a new star field. He soon found out it wasn't so. He saw thousands of small particles outside the window. They were all a bright yellowish-green, much the same size and brilliance of a firefly on a real dark night. He saw them as far as he could

look to either side. He quickly discounted the theories that they were snowflakes formed by the cooling off of water vapor from the jet nozzles, or the tiny copper needles from a former Air Force project last October. When Glenn later gave a description of the particles to Project Mercury psychiatrist, George Rapp, he said in a deadpan fashion, "What did they say, John?" The implication being of course, that Glenn didn't see what he said he saw and that he was "space-happy".

In the book, "Inside the Space Ships" by George Adamski, published in 1955, he tells us what he saw in the Chapter "My First Look at Outer Space." All this happened in a flying saucer while 50,000 miles from the Earth.

Adamski says, "I was amazed to see that the background of space is totally dark. Yet there were manifestations taking place all around us, as though billions upon billions of fireflies were flickering everywhere, moving in all directions as fireflies do. However, these were of many colors, a gigantic celestial fireworks display that was beautiful to the point of being awesome."

It's amazing how Glenn and Adamski used the same description of outerspace. This just makes one more confirmation of an Adamski claim, seven years later. In an editorial written by Adamski in "Cosmic Science Newsletter" (see elsewhere in this issue for details on this bulletin) of April, 1962, he discusses the question "What kept these objects and particles from striking the sides of the capsule?" He replies: "The capsule was flying in a semi-vacuum, for anything moving through space at that speed will create its own atmosphere (around itself). This occurs even in so-called airless space. A vacuum is automatically produced between the body of the capsule and the layer of atmosphere around it. This acts as a protective layer or "force field" keeping the particles from striking the capsule body." "The larger objects Glenn saw were scanning discs launched from a mother ship and operating by remote control. These discs monitored every part of Glenn's flight. Even if he recognized the discs he wouldn't be allowed to talk about the being subject to secrecy regulations."

# HEADLINERS

A Canadian satellite being built at Shirley Bay will be launched this year by the U.S. .... A volcano in the South Sandwich Island group is active in the South Atlantic ocean near the Antarctic Circle .... A satellite plotter developed by the Canadian Defence Research Board tells you the orbit of any satellite and its arrival time .... U.S. may test a "death ray" neutron bomb any time now .... 24-carat gold suits may soon be the uniform of the space-age workman .... The mini-track station at St. John's, Newfoundland, can tell scientists in ten minutes if a launched satellite has attained orbit .... American and European scientists discover tiny particles of matter known as anti-minus II ..... Six offspring (Cosmopups) of spacedog Strelka are in training for cosmic flights .... British Columbia has launched a "space-age" secondary school program costing millions of dollars .... Sweden is to build a small scale Cape Canaveral near the town of Kiruna above the Arctic circle .... A 'particularly active' sunspot which was having a powerful effect on the Earth "upset its magnetic equilibrium and caused outbursts of fire and violent meteorological upsets" was suspected to be indirectly responsible for the explosion at Heessen, Germany, killing 29 miners .... British anthropologist, Dr. Louis S.B. Leakey, announced the discovery of 14,000,000 year-old creature in Kenya, Africa. .... Prof. Auguste Piccard, first to soar into the stratosphere and first to plumb the ocean depths, died on Sunday, March 25, 1962.....the cause was a heart attack. He was 78..... Special Canadian developed equipment mounted on a satellite, called Topside Sounder, will be orbited in September which will study mysterious forms of energy which bombard the earth's atmosphere.....The U.S. has erected one of the world's most powerful radar fences on a remote South Pacific island to identify nuclear-loaded intercontinental missiles and decoys.....A doughnut-shaped space station, roomy as 3 ordinary houses is undergoing development

at Langley Research Center..... A new free-piston engine which will run on any fuel, is being developed in Ingersoll, Ontario.....Prof. Bernard Lovell of Jodrell Bank, says the Russians plan space shots towards Venus next August.....A death-ray gun and a magic eye that can see around corners were demonstrated recently in Vancouver, B.C. ....Dr. Sidney W. Fox, a Florida State University scientist said he created substances in a test tube which imitate living matter as it existed on Earth billions of years ago..... Canada is manning a massive underground nuclear war center for the defence of North America in the town of Carp, 22 miles from Ottawa, Ont. An electronic computer, described as "advanced electronic display system" will plot air, ground, and nuclear detonation activity on a large screen.....Russian architect, Viktor Mikhailov has designed a tower a mile & a quarter high, resembling a rocket.....Three Ottawa, Ont., students from Carleton University are putting together a hovercraft which will do 25-30 mph. ...Soviet architects have designed a glass-encased resort town for the Arctic in which residents would enjoy a sub-tropical climate.... A Canadian, James A. Chamberlain, is entrusted by the U.S. with direction of a \$500 million dollar Gemini project to orbit 2 men in space.....Data from high altitude rockets have shown a newly-found sphere of gaseous matter, composed primarily of helium ions surrounding the earth, designated as "heliosphere"..... It snowed pink in the little northern city of Cueneo, Italy on Tuesday, April 17, 1962..... Yellow rain fell on Saturday, Mar. 24, in Cherkessk in the northern Caucasus, Russia.....Pinkish-yellow snow fell in the Genza region of Russia also on Mar. 24th, 1962.....Astronauts instant food, just add water and serve, will be on supermarket shelves in two years.... Skeleton of a stone-age man, 300,000 years old was found on Japan's southernmost island of Kyushu.....Snails invaded the town of Oneglia, Italy, by the hundreds, escaping from the freighter Ponente.....American space researcher Dr. Ernst Stuehlinger says men might be able to make return trips to Mars in ion-propelled spacecraft by 1980-1985.

THE MAN WHO 'VISITED MARS' (Concluded from previous issue.) As you remember, our friend just arrived on Mars and said, "I looked out over the land and it looked like paradise."

As we went down I looked out over the land and on one side there were red fields. On the other side there were what looked like gray-green fields. Some places in the fields there were what looked like big chimneys rising from the ground. It was bright daylight and the sun was shining with no clouds in the sky.

#### Rivers Running Straight

We were approaching the red fields and I could see rivers with blue water in them. The rivers ran straight and at intervals there were bridges built across them and I could see roads. The bridges were just like our bridges.

From up high I could see no sign of life. Then we glided up to a field that was filled with the saucers like I was in. There appeared to be hundreds of them. They were of different colors, gray, gold and silver. But there were no black or red ones.

The driver stopped the ship about a quarter of a mile above them by just pulling the lever. Then we went straight down until we were about 20 or 30 feet from the ground and he parked the ship on a high platform.

As we went down I could see that the same kind of people were in them like my driver.

When we got stopped on the platform the driver pulled a lever and the glass slid back, and he went outside. He put the pencil-like thing to his chest and slowly dropped to the ground like a falling leaf. He then started to walk very fast along to the third or fourth saucer. He pointed the pencil at his chest again and sort of jumped up inside the ship. He was inside that ship for about 10 minutes. I could see that the thing in the other ship was smaller than the driver of the ship I was on.

#### Saw Other Earth People

While he was inside the ship I looked around at the other saucers and I could see the same type of people. Suddenly, quite a ways away I saw two

ships that had people from earth in. One ship was sort of dirty looking and there was one man, one woman and two kids in it. In another saucer that was kind of golden I saw one man and one woman. I was going to wave at them, but I felt scared. I was waiting for them to wave but they didn't wave. After I saw them I thought that I would have to stay here with them now. Way off in the distance by the river I could see things moving. They were dark but I couldn't tell what they were. Maybe they looked like a herd of beef, but I couldn't tell for sure. Down on the ground I could see big red flowers growing. They looked something like our sunflowers. There were some green patches between them, but there were the flowers as far as the eye could see. The earth could be seen in patches too and it was just the same as our earth. I got to thinking that I must be on Mars. I remembered what I had learned in school about it being red with canals and it seemed to me that this must be Mars, although I wasn't 100% sure because I kind of lost location of things when we had left the moon.

#### Took Off the Same Way.

Then the driver of the ship came back from the other ship. He got back inside and closed the door again. Then we took off the same we had come. We went up and up into the darkness and then I could see a moon that looked like a tin ball. We came quite close to it and I could see that it was smooth and silvery without any signs of craters on it.

I didn't know where we were going then. I thought we might be going farther yet.

After about another 10 minutes I could see what looked like half our moon and I realized that we were approaching the sunny side of earth.

I was very glad to see that it was the earth. But we came at it with such a terrible speed that I thought for sure we would crash.

The driver stopped the ship again when it seemed to hit the atmosphere and he glided down towards earth. I seemed to know he was going to take me back

to where he found me, but I had the impression that he was going to kill me because he would want to keep it secret.

We came into the darkness and then went down to the ground and I knew we were back at the same place he picked me up.

### Afraid He Would Kill Me

I was really afraid that he would kill me. He opened the door. He took the pencil-thing and pulled me out the door the way he brought me in. He guided me right back to the road.

At that time I could walk, but I was very light and he was just pulling me. He took the pencil from my chest and pointed it at my head. At that moment a dog started to bark at us from about a quarter of a mile up the road and it seemed to have startled him because the pencil-thing clicked and nothing happened to me.

I knew from the first experience I should be paralyzed, so I just pretended I was so that he wouldn't know. He took the plate off my chest and went back to the ship.

I stayed the way I was until I saw the outline of the saucer going off into the distance. Then I ran home.

My wife was still up and she saw me all excited. She asked what had happened and I told her "Nothing. I'm just sick."

I couldn't tell her about the experience because she would have thought I was completely crazy.

I noticed the time when I got home and it was 12:20 a.m. The whole trip had taken about an hour.

I think when the thing pointed the pencil at my head it was to make me forget what had happened or else to kill me, I don't know which.

### Never Told Anyone Before

I have never told anyone else about this for two reasons. First...no one would believe me and would probably want to lock me up as a crazy man; and second...I am sure that those people on Mars know everything that is happening here and if I had told people about it before they would have taken me away again or killed me. I'm telling this now in order to help people to know what is going on in

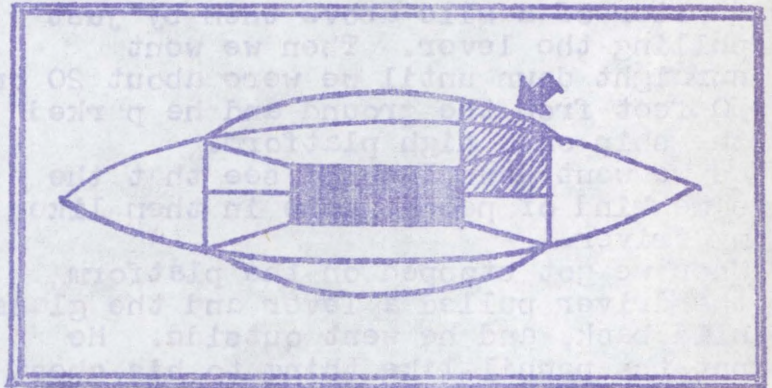

space. My heart is bothering me now and I feel I won't be living too much longer so I have nothing to fear from those people.

From this experience I have had I feel those people's culture and scientific knowledge is much ahead of ours. They don't need satellites to launch their spaceships and they have conquered many of the problems of space that we are still trying to conquer. They seem to power their ships with rays, maybe light rays, but it's not with motors like ours.

My experience and seeing those other earth people on that planet show me those creatures have a great knowledge of the people here and are much ahead of us. This creature treated me only as an animal.

After that incident I couldn't stay in that country and in October of that year I came out to Canada. I have finally felt I want to make this story public.

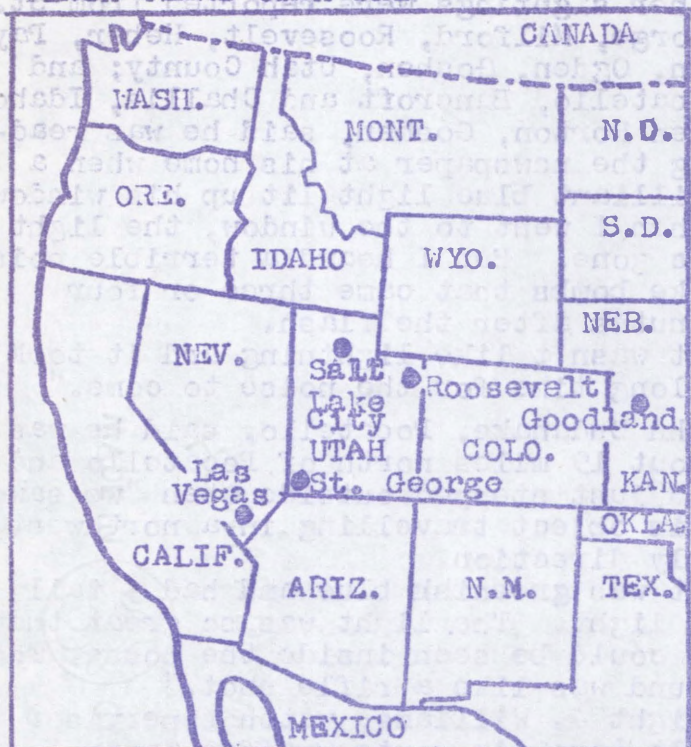

With two satellites up circling the globe now maybe a few people will believe my story. Anyway I have told you it just as I remember it happening... and it is just as clear as yesterday.

This is a rough sketch of the flying saucer made by the man who claimed he was taken to a planet he thought was Mars. It is a cutaway view showing a square black plate in the centre of the floor with beams running from its corners. The arrow points to the glass or plastic room the man was in during the trip.

"There can be little reasonable doubt that we will ultimately come into contact with races more intelligent than our own." Wilbur C. Clarke.

FLASH SEARS UTAH SKY

Light Seen By Pilot in Kansas

A brilliant object flashed across the western skies Wednesday about 8:15 pm. Federal Aviation Agency officials said it was apparently a meteor--but the thing touched off alarm in Utah, Idaho, Arizona and other sections of the West.

Some residents in Eureka, Juab County, some 75 miles south of Salt Lake City were convinced the object, whatever it was, crashed in the nearby mountains.

They cited a "blue flash and a rumbling off in the distance."

Eureka Police Chief Joseph Bernini said the crash was "very close" to the community.

Law enforcement agencies and The Salt Lake Tribune were swamped with calls from citizens reporting or inquiring about the object.

Those who witnessed the phenomenon said the object flashed across the night sky from east to west and was visible for about two to four seconds.

After the flash of brilliant light came explosions which one Nephi resident said shook her house. Other reports said the object left a smoke or vapor trail.

Pilots from as far east as Goodland,

Kansas, and in Utah, Nevada and Arizona, reported spotting the flash.

The light was so brilliant it caused the street lamps in downtown Eureka to go off momentarily.

Chief Bernini explained that the street lights were on a photo-electric hookup and when it gets light enough early in the morning, they go off.

The fireball caused enough light to darken the street lamps.

(And early Thursday, Associated Press added a report of a "flash" in the skies over Ocean Beach, Calif., Wednesday about 8:55 pm, PST (9:55 pm MST).

The California fireball "seemed to move west over the Pacific toward a spot some 30 miles off San Francisco," the report said.

Dr. Robert R. Kadesch, associate professor of physics, University of Utah, and a science writer for the The Salt Lake Tribune, said the object probably was a bolide, or an exploding meteor which is not uncommon, he noted.

"It probably exploded 50 to 60 miles in the atmosphere or perhaps a little lower," Dr. Kadesch said.

Another report came from Richard Young, 1973 St. Mary's Dr. (1450 South), who was piloting an airplane toward Milford from the south when the flash occurred.

He said he and his passengers saw the flash and said it appeared fragments were breaking away from it, decelerating and falling behind the main fireball.

Dr. Kadesch said he would estimate--without going into exact calculations--that the meteor burned out about half way between Salt Lake City and northern Arizona, a supposition in which spokesmen for FAA closely concurred. They said it seemed to be centered between Salt Lake City and Las Vegas.

Sightings were reported as far east as Nebraska, north to Montana, south to Arizona and west into Nevada.

Sgt. E.C. Sherwood, Nephi, Utah Highway Patrol, said he and another officer saw the object as it streaked across the sky leaving a trail. When it exploded, it sounded like a jet's sonic boom, said Sgt. Sherwood.

A Bountiful resident said the meteor sped from east to west prior to the explosion. (Continued on Page 8, second column.)

# BOOK REVIEW

By the  
Editor

## THE GREAT FLYING SAUCER HOAX

By Coral E. Lorenzen

The book starts excitingly with the attack by a flying saucer on the fort of Itaipu in South America and leads into the author's first UFO sighting in Barron, Wisconsin in the summer of 1934.

The standard cases of Mantell, Chiles & Whitted, Nash and Kenneth Arnold are reviewed briefly to give a basis for the rest of the story. The Sturgeon Bay saucer as witnessed by the author is gone into at some length with many witnesses backing her with their observations.

Europe and South America are thoroughly covered with many accounts of landings and contacts when humans caught the aliens taking rocks, plants and soil samples. Mrs. Lorenzen envisions huge laboratories somewhere in space involving the adaptability of other types of plant life to Earth soil. This could mean the visitors intend to bring their own agriculture with them if they intend to establish a base on Earth.

In succeeding chapters, Mrs. Lorenzen gives the readers what she believes is ample proof of the hostility of the saucers and that they represent a threat to the future of the human race.

The price of this book is \$4.45 and may be purchased from A.P.R.O., 4145 East Desert Place, Tucson, Arizona. Publishers are The William-Frederick Press, 55 East 86th Street, N.Y. 23, N.Y.

## "VISITING SPACEMEN"

By Columba

Incredible (but true) adventures of the author. Unlike any other 'contactee' story, for a new view of the Spacemen's miraculous powers, (some also witnessed by others!)

Two beautiful full-page illustrations by the author. \$2.00 for autographed copy. Order from Columba Krebs, c/o General Delivery, Williams, Arizona, U.S.A.

## FLASH SEARS UTAH SKY --Cont. from P.7.

Other sightings were reported from St. George, Milford, Roosevelt, Heber, Payson, Ogden, Goshen, Utah County; and Pocatello, Bancroft and Challis, Idaho. Owen Horton, Goshen, said he was reading the newspaper at his home when a brilliant blue light lit up his window. "When I went to the window, the light was gone. But I heard a terrible noise like bombs that came three or four minutes after the flash.

"It wasn't like lightning and it took a long time for the noise to come."

John Dudanake, Pocatello, said he was about 19 miles north of Pocatello and had just stepped outside when "we saw this object travelling in a northwesterly direction.

"It was greenish blue and had a tail of light. The light was so great that it could be seen inside the house. The sound was like a rifle shot."

Dwight J. Williams, watch supervisor at Salt Lake Air Route Traffic Control Center, said the office had received several reports indicating the object had landed.

Some reports said it had landed northeast of Delta and one pilot reported it appeared to him the object had gone down about 30 miles northeast of Provo.

Mr. Williams said a tower operator at Salt Lake Airport saw the object as it flashed across the darkness and he placed the time at 8:16 (MST). The tower operator, according to Mr. Williams, described the object as descending in a 30-degree arch in an east to west trajectory.

Mr. Williams said reports of sightings by aircraft came from as far north as northern Montana, and from such points as Los Angeles, the Mexican border and eastern Oregon.

(The Salt Lake Tribune, April 19, 1962. Credit: Mr. James D. Wardle, Salt Lake City, Utah.)

USES ROCKETRY TO PULL TOOTH--Norfolk, VA. Ronald Hackney, 12, hit upon a space-age way of pulling baby teeth. He tied one end of a string to a toy plastic rocket, the other end to the tooth, pumped the water-filled booster engine about 20 times to build compression, pulled the trigger, and the tooth went into orbit. (Sarnia Observer, March 28, 1962)

# SIGHTING REPORTS

Kirk's Ferry, Quebec.--At about 10 p.m. Feb. 7th, 1962, a neighbor (Mrs. Rose Luman) phoned to say she could see a strange large star in the north-east which was giving off colored light quite discernible to the naked eye. We, my daughter and I, (Mrs. Margaret Clark) got the binoculars and watched this object for at least fifteen minutes. It seemed to remain stationary during that time. This object looked to be circular with a bright light at the top. The remainder of this solid looking circle gave off a red, green and bluish light. These colors seemed to shimmer, not at all like the decided green and red flashers of an aircraft. It then seemed to get smaller and on checking later it had completely disappeared. (The Ottawa Flying Saucer Club.)

Iroquois Falls, Ontario.--On Feb. 7, 1962 an orange colored UFO, round in shape, was sighted by Arnold Beaton. He stated that he came home from work at 12 midnight, to see a bright light near the back of his home. He stated, "I thought the garage was on fire, but when I investigated, I found a huge round 'ball' over the garage." Beaton called his wife and a neighbor, and they all saw the object. About five minutes later the object moved away slowly to the north. (C.I.R.A.P.)

City View, Ontario.--Upon entering the laneway to the house, Keith Rodie glanced across the street into my neighbor's backyard. In doing so, he noticed about a hundred yards away a small object, with a shimmery pale yellow halo about its circumference. It appeared to be about a foot in diameter and appeared against a background of a garage and then a house. It climbed rather slowly, from an angle of about 15 degrees and disappeared from view behind a house. When Keith went to investigate the object, it was gone. The night was extremely still and quiet. The object emitted no sound whatsoever. The sky was crystal clear, so if the object had attained a higher altitude it could have been seen quite plainly. It was seen from 5 to 10 secs, on March 4, 1962, at 2:30 am. (The Ottawa Flying Saucer Club.)

Cincinnati, Ohio.--Correspondent Miss Dorothy Lefler sends us this personal sighting. On the evening of April 24, 1962, at 8:56-7 p.m. Miss Lefler noticed what seemed to be a variable star that appeared to be "wandering" about. She got its position by means of telephone wires, trees and a telephone pole. Calling her mother to witness this star, and explaining to her how such an illusion is caused by atmospheric conditions realized it was really moving because it had crossed the phone wires. First seen in the WNW and it travelled straight across the northern sky, heading NNE. Both persons observed it for about 5 minutes. It seemed to bob slightly, but no doubt this was due to atmospheric conditions & refraction. It travelled approx. 160 degrees of arc during this time. At 60 degrees alt. Seemed it was very high but no way of estimating size or distance. No sound or tail. Same size as average star. Binoculars did not resolve the object.

Kitchener, Ontario.-- On Monday April 23, 1962, Homer Schaefer sighted and photographed a UFO. While in his backyard watching several meteors, he decided to get his polaroid camera which had a 3000-speed film, so that he could get a shot of a meteor. While waiting, he noticed a dark object cross the sky very slowly. He recognized it as a UFO (flying saucer) the same type he'd seen on previous occasions, that is, on July 14th and July 31, 1959. It made a close approach to the city, at rooftop height, hover over a street and then headed in a southerly direction. This craft was approximately 50 feet in size, about 200 feet above the street and several hundred yards away from where he stood. It glided silently past at a speed of 30 or 40 miles per hour. The photo that Mr. Schaefer took of it did not turn out very satisfactory and decided to watch again hoping to get another picture. At 10:30 p.m. as he stood facing West, the direction the UFO had taken, he was suddenly startled to see the sky above light up. Glancing up he saw a huge UFO directly above him and managed to get another picture just as it passed over him.

It was a much larger craft than the first one, with numerous lights around

SIGHTINGS, Con't. from Page 9  
it and shaped like a crescent. It's quite possible it could have been the carrier craft (mother-ship) for several of the smaller crafts. The photograph shows a smaller craft on its right wing. It was a good 200 feet in width and travelling in the same direction as the first one. Cleator, Arizona.-- Mr. & Mrs. Al Hubbard of Cleator, saw two rings of color like glowing embers, A tubular light of cobalt blue was suspended between the rings. Behind it was a cascade of pulsating flames. The thing threw light over the entire countryside. Time was 11:30 pm. It was very close to the ground. Then there were two big blasts, one for each ring of color, and disappeared. (Phoenix Gazette, Feb. 6, 1962) This happened prior to the Feb. 4th weekend.
