FIRST MILWAUKEE WISCONSIN PLANET

(HOTEL WISCONSIN, MILWAUKEE, WISCONSIN)

Meeting Of Thursday, July 7, 1938

Successful Use Of Spectro-Chrome In:—Persistent Disorders, Epilepsy, Fractured Collar Bone, Skin Rash, Constipation, Tachycardia, Heart Disorder.

They Pet Their Spectro-Chrome Daily!

Reported By:—CAROLINE ZIMMERLING, Recorder

Deputy Frank S. Burns was in the chair. He spoke first of the book "Man Visible and Invisible" by Charles Leadbeater, which Kurt B. lent him at the previous meeting. He then read Chapters 54, 55 and 56 of the Spectro-Chrome Encyclopaedia, on "Fever By Medical Conception", "Spectro-Chrome In Fevers" and "Rubor, Calor, Tumor, Dolor."

During the time of the reading of these chapters, a telegram arrived, which the Deputy read to the Affiliates. It stated that Colonel Dinshah gained a point in the Federal Court in Wilmington, Delaware, against the Delaware State Medical Society, in Injunction suit.

The Deputy talked at some length on what Spectro-Chrome means to us or should mean to us and also on the credit Colonel Dinshah gave to the great scientists who came before him in contributing to the sciences which lead him to Spectro-Chrome. He also gave a dissertation on Spectroscopy and how it works.

Theodore M. volunteered to read Chapter 57 of the Spectro-Chrome Metry Encyclopaedia at the next meeting.

The Deputy welcomed the new Affiliates to the fold and encouraged them to bring their problems for discussion.

Walter W., from Juneau, Wisconsin, has been a user of Spectro-Chrome about 3 years. He had very good success. He had been under medical care all his life for general complications. He had operations, but nothing helped until Spectro-Chrome came along. He is all right now and his whole family is using the Equipment.

Emily M. reported that her husband had gone along now for 70 days without having an epileptic spell. Their Spectro-Chrome is in every day use and they are very much sold on it. She says they pet their machine every day! It is just a year ago they started using it.

Otto H. L. gave the following case reports:—

(1) P. K., 2½ years, broken collar bone. Turquoise given first

Tonation and she slept all night. Lemon Systemic given and was well in 2 weeks.

(2) M. K., 44, condition of Phlegm. Lemon Systemic front and back and expelled a cup of Phlegm each day. Her husband became alarmed, thinking Spectro-Chrome was causing this and made her stop using it!

(3) L. L., 37, Skin Rash. Turquoise and Blue Systemic for one week, 2 each day. Itch entirely disappeared.

(4) A. B., 54, constipated for 25 years. After second Tonation, ordered own Equipment.

(5) M. L., 63, Kardoscil 130, Spiroscil 37. Used Turquoise Systemic and Purple on Area 4. After fourth Tonation, Kardoscil went down to 100 and Spiroscil to 30. Orange used on Area 17 and Kardoscil went to 78 and Spiroscil to 17. Now using Lemon Systemic and Magenta on Areas 4 and 18. Had been taking Digitalis before using Spectro-Chrome.

(6) A. S., 57, Heart Disorder. Heart was so fast and jumpy that it could scarcely be counted. Had been taking drugs for 2 years. Had to sit up during the night for several hours to find relief. After taking Spectro-Chrome, Magenta on Area 4 and Green Systemic, had only 2 minor attacks.

Following Otto L.'s reports a discussion on Heart Disorders followed and the Attuned Color Waves used were discussed, with the reasons for using Purple and the like.

Another discussion followed on Inflammations and Whooping Cough. Kurt B. suggested that for Whooping Cough, Lemon Systemic and Lemon Local on Areas 3, 4, and 5 should be used. He also stressed the point of checking on the Kardoscil and Spiroscil.

Anna V. said she used Green, Lemon and Turquoise for a Cough, but did not get the results she thought she would have had, although she did prevent Whooping Cough.

A long discussion took place on the effects of Arc Welding Sparks and Flashes on the eyes and whether or not they were Hot or Cold Burns. It was finally decided that a good way to tell whether they were Hot or Cold Burns was in the length of time it required to feel the effects. If it were a Hot Burn, the effects would be noticeable immediately and if it were a Cold Burn, the effects would not be felt until some time later and should be tonated accordingly.

During the Meeting, a question was raised about Used Equipments. Some felt that if they purchased a Used Equipment they should also be granted Free Guidance. Explanation was made as to why this was not possible. Spectro-Chrome Institute and Colonel Dinshah hav-

ing so much correspondence to handle already, that if they were to grant such privilege, soon they would be giving Free Guidance to the entire United States, even though they had not sold Equipments to everyone receiving the Free Guidance. We believe the matter was cleared in the minds of those who thought otherwise.

The Meeting was attended quite well in view of the fact that many people were out of the city on vacation. The discussions were especially interesting and instructive and we feel, very beneficial.

EDITORIAL

REMARKS

All Affiliates would be materially benefited by attending the monthly Meetings of the Planet. The knowledge gained by them would amply repay for the time spent.

The loosening of the Phlegm in case of M. K. (Number 2), was a sign of recovery. It was what was needed.

Cough needs Lemon as an Expectorant. Where a Systemic Atcowa is used and the same is needed for Local Areas, one may dispense with the Local Tonation as being included in the Systemic.

Turquoise used by Anna V. was wrong. Lemon and Turquoise are not irradiated together; they are Affinity Waves.

Arc Lamps or Welders, give both Heat and Cold or Infra-Red and Ultra-Violet Rays. The former give the Heat, the latter the Cold. Follow our methods for either. The explanation given at the Planet Meeting was good; the Ultra-Violet effects may come days later. Avoid exposure of the head to Sunlight also; which is full of both these Rays. Wear a cap; it will maintain the Cerebral Circulation at an even Temperature. Therein lies the principle of not going bareheaded.

The question of giving Free Guidance on Used Equipments is important. On a \$90.00 Spectro-Chrome, there is a very small profit after paying \$15.00 as Commission to an independent Field Solicitor. Our overhead expenses are very heavy and may not be met until we have volume production. The service given is extended solely to the original Registered Purchaser and each Free Guidance averages 25 cents worth of expense in stationery, postage and stenographic charges. Should we grant a similar privilege to Assignees, we should be tied down eternally for Free Guidance and under the Laws governing business; that would mean bankruptcy. With the present system even, some Registered Purchasers become positively obnoxious, by sending incomplete General Advice Charts, not following our Free Guidance, using Free Guidance for non-Purchasers and the like. We are the only Healing Firm

giving this unique free service and we expect that it shall be used for its legitimate purposes.

One Registered Purchaser asked for Free Guidance for herself first. Then, a week later, sent for Free Guidance for a "Cousin". Some time later, she asked for "Cousin once removed". We answered all, but, when she sent for "Cousin twice removed", we drew the line and removed her from the privilege.

The original Purchaser is bound by certain Understandings with us. The Used Equipment Purchaser might legally claim third party immunity and have loopholes for trouble-making. Therefore, for the protection of all concerned, we drew the line at giving Free Guidance to the Registered Purchaser only and even that applies to him (or her) and family members by birth or marriage. We mean the **immediate family** and not people living in separate homes.

There is another source of danger to our integrity which arises through the rental of their Equipments by Provisional Members, as a matter of income. While the commercial law is on their side, such persons are liable to violate our Constitution And Rules, because they as Provisional Members have no authority to serve the public. Any Affiliate doing so, risks Investigation and if found out of order, risks censure or perhaps Expulsion, if the conduct of the Violator would so justify. Please, stay within the bounds.

IN PRAISE OF THE VINAG

10 Cents A Meal For 3 Persons!

Dinshah's Automatic Cooking System

By:—LUCILLE E. GREENHAM, Detroit, Michigan

For many years, the Rational Food Of Man has been used in our home and for many years I tried to eat split peas and rice (Dal and Chaval), but honestly, I never enjoyed them.

Although my mother is an excellent cook, yet one day they would be passable and the next day one could not touch them.

Not until I visited the Spectro-Chrome Institute at Malaga, I truthfully say, I enjoyed the Rational Food Of Man; I could hardly wait for dinner time to roll around each day.

On Colonel Dinshah's last visit to Detroit, Michigan, we purchased the **Vinag**. He had it on display and I was anxiously waiting to test the Vinag to see if the food would taste the same to me as when I was in Malaga.

On Monday, we had our split peas and rice and I thoroughly enjoyed the meal, as did my mother and father.

The seasoning is just enough to make it tasty and one package of rice and peas is ample for three people; in fact a little left over, but which was not wasted I can assure you.

The one thing that pleased me most was the fact that every day it is just the same, not one day too much seasoning and the next day not enough.

I strongly urge everyone to purchase a Vinag; your meal is prepared without any trouble and everyone will relish the split peas and rice when you start using the Vinag. It is delicious and nutritive and fills the bill at 10 cents a meal for 3 persons! What next?

* * * * *

By:—CHARLES H. STIERMANN, St. Louis, Missouri

Fairness prompts me to write this note and bear testimony to **Vinag** and its excellent performance in preparation of the "Dime-A-Meal". Having used Yellow split peas and rice over a period of three years and enjoyed its tastefulness, our household felt no better perfection in preparation could be attained. This was entirely disproved after eating a meal prepared in a Vinag. We found greater palatability and tastefulness and a flavor—to use superlatives—extremely exquisite. I am glad I made the purchase, having no regrets and the madam finds it a great source of convenience, simplifying the cooking of the meal and saving time for other activities.

You may use this or put it in discard. I just wanted you to know of my attitude toward the **Vinag**.

EDITORIAL

REMARKS

We thank you cordially. Those who do not have a **Vinag**, may never realize what it means to possess one. Vinag solved the problem of home economy as nothing else did before.

Every home should have a Vinag. Its price of \$15.00 places it within the reach of all. Just think! A minute to fill, a second to turn the Automatic Time Switch and an hour later there is a meal ready for three persons, costing 10 cents for the meal! Talk of domestic economy! And what a meal!

However, be sure that your Electric Current is "ON" in the wall socket, as otherwise you may think the meal is cooking and at the end of the hour when you feel like eating, you will have raw grain! This actually happened to one user!

FIRST DETROIT MICHIGAN PLANET

(HOTEL TULLER, DETROIT, MICHIGAN)

Meeting Of Thursday, July 7, 1938

Successful Use Of Spectro-Chrome In:—Tumor, Hay Fever, Acne, Sore Throat, Hoarseness, Valvular Regurgitation, Athlete's Foot, Sunburn, Headache, Glaucoma, Dysmenorrhoea.

Reported By:—GLADYS CLARK, Recorder.

Deputy L. Roy Dodman was in the chair.

The Deputy commented on the good crowd which attended Colonel Dinshah's lectures while in Detroit on June 24th, 25th and 26th. Case Reports were as follows:

Madeline W. had a growth on her breast and was to be operated, when she was advised to try Spectro-Chrome, which she did for one month with amazing results. She then bought an Equipment and is much better now. Lemon Systemic and Indigo Local were used. She also had a Sore Throat; after the first Tonation of Turquoise she was much better.

Peter D. reported as follows:

(1) Woman, 38, Hay Fever, had Injections for it without results. Kardoscil 96, Spiroscil 22; after 6 days of Turquoise Systemic she was well.

(2) Girl of 22, suffering for 2 years with Acne (Pimples on the face). Kardoscil 82, Spiroscil 20; after 10 weeks of Spectro-Chrome, she is well. Green Systemic, Orange on face until pimples became "weeping", then Yellow, Lemon and Turquoise were irradiated.

(3) Woman 32, Sore Throat and Hoarseness. Three Tonations of Turquoise and her Throat Disorder was gone.

(4) Man, 52, Regurgitation in the Heart Valves, had Magenta 2 days and was all right.

Esther LaB. found Atcowa Lemon good for Pimples on the face.

Otto T. suffering from Athlete's Foot found that one Yellow and 4 Tonations of Lemon cleared the Disorder.

Elizabeth G. reported two cases of bad Sunburn. One Tonation of Turquoise was all that was necessary; they had no pain.

Louis S's. wife had severe Headache and was unable to talk; Kardoscil was 50, Spiroscil 12. One Tonation of Magenta and not at Favor Time was all that was necessary.

The Recorder reported as follows:—

(a) Henry S. is improving gradually. Last week he was able to stand on his feet twice for a short time, which is the first time in 3 years.

(b) A woman of 32, suffering from what the Medical Doctors pronounced as Glaucoma, (Hardening Of Eyeballs) had total blindness in one eye and the other started to be affected. She was getting a loan to have the one eye removed and later perhaps the other would have to be taken out. Eye was very red and painful. After the second Tonation, there was little or no redness or pain and the vision came at times. After 3 weeks of Turquoise, Lemon Local and Systemic, she has almost full vision, no pain and is very much improved in health.

(c) Woman, 22, suffering from Painful Menstruation, so severe that she went into Convulsions. Only one Tonation of Scarlet and she had no more trouble.

Question:—Please advise if it is proper to use an electric fan in the room while giving Tonations.

Albert G. appealed to the Affiliates to invest in a Vinag and Dinshah Dime-A-Meal. There is plenty in one meal to serve 3 people. The seasoning is correctly proportioned and the meal is very easily prepared.

Grace A. D. read from Volume 3, of Spectro-Chrome Metry Encyclopaedia, on the Yellow Wave.

The Deputy spoke of a new book which said that fish have a regular feeding time.

EDITORIAL

REMARKS

There is nothing detrimental in having an Electric Fan in the Tonation Chamber for ventilation, provided the draft does not pass over the exposed Body of the Sufferer. The warmth of the room encourages Dermelim (Perspiration) and if judiciously utilized is beneficial.

Henry S. should put in mental effort to overcome his handicap. Let him exercise and start standing up with help, later discarding assistance and using crutches, finally throwing away the crutches.

If we stop eating stinking fish, our brains too may act more clearly and Skin Disorders may disappear.

**If A Private Individual Will Do What Our Government Is Doing,
He Will Go To Prison Or Bankruptcy Court—Dinshah**

DINSHAH SEES THROUGH THE ORIGINAL EYEPIECES OF JOSEPH FRAUNHOFER

Visit To Deutsches Museum, Muenchen, Bavaria

The night of Saturday, May 14, 1938, there was a Total Eclipse of the Moon. I moved around during the balance of the day, rested during the night as much as my active thoughts permitted and early morning of Sunday the 15th, after my customary prayers, took the train for Munich, Bavaria, via Stuttgart and Ulm. As before, I had plenty of "official" company, with whom I passed an enjoyable time, getting information about the Anschluss, (Annexation) and its probable effects on the country, its people and economical aspects. We talked about family life, men, women and babies and when I incidentally stated that I was married to a girl whose parents were of German descent, they were much interested. They thought I was living upto German tradition, having 7 sons at my age of 64! That brought the questions of food, medicine, virility, habits, sickness, health, study, science and finally Spectro-Chrome. We chatted pleasantly on the subject, until at 4:30 P. M., the train entered the Hauptbahnhof of Munich, Bavaria and I ran to the Hotel Metropol, close to the station.

I had information that the Deutsches Museum closed at 6 P. M. on Sundays. No time was to be lost, because, in 5 days more I had to perform numerous errands and be on the Steamship Washington, in Southampton, England. Therefore, when I say "ran", it was an actuality, because, I had to leave Germany for Italy, at 10:20 A. M. next day. A speedy trolley landed me at the Museum by 5. What a museum! In size, grandeur, beauty and arrangements, it seemed to me to surpass even the British Museum, in London, England.

The Deutsches Museum of Masterpieces of Natural Science and Technology, was founded in 1905, through the initiative of Dr. Oskar von Miller and was opened on May 7, 1925. It houses over 70,000 objects and embraces nearly 9 miles to walk through! What could I do in 1 hour, where it would take ordinarily 9 hours to go through? But, I had a single fixed object in mind. I had no desire to view the floors full of exhibits in Geology, Mining, Metallurgy, Power, Transportation, Roadwork, Railroading, Tunneling, Bridgework, Shipbuilding, Aeronautics, Meteorology, Automobiling, Chronometry, Mathematics, Mechanics, Heat, Electricity, Telegraphy, Telephony, Photography, Television, Acoustics, Music, Magnetism, Chemistry, Pharmacy, Engineering, Lighting, Heating, Hydraulics, Gas, Surveying, Brewing, Distilling, Printing, Engraving, Bookbinding, Physi-

ology and the like. I was familiar with such exhibits in one way or another. My mind yearned solely to see the original apparati of Joseph Fraunhofer, the chief exponent of the Fraunhofer Lines in the Spectrum and the instruments used by Robert Bunsen and his associates in developing Spectroscopy. It was a "life dream" and I was after having it fulfilled.

At 5 P. M., I arrived and rushed to the gate. I paid the entrance fee of 50 pfennigs (about 12 cents) and inquired for Fraunhofer, Bunsen and Kirchhoff. I was promptly directed to the Halls of Fame, in Rooms 156 and 157 where I saw oil paintings of those celebrities. Thence, I was told to go to Room 180, where an extremely courteous attendant greeted me. I handed him my Magenta-colored card:—

COLONEL DINSHAH P. GHADIALI, M. S-C.
(HONORARY) M. D., M. E., D. C., Ph. D., LL. D., N. D., D. Opt.,
D. F. S., D. H. T., D. M. T., D. S. T., Etc.

Metaphysician And Psychologist

Ex-Commander, New York Police Reserve Air Service

PRESIDENT, SPECTRO-CHROME INSTITUTE,
MALAGA, NEW JERSEY,
United States Of America.

Fellow And Ex-Vice-President, Allied Medical Associations Of America; Member, American Association Of Orificial Surgeons; Member, American Association For Medico-Physical Research; Member And Ex-Vice-President, National Association Of Drugless Practitioners; Academician And Life Member, Maryland Academy Of Sciences; Fellow, Theosophical Society; Life-Member, American Anti-Vivisection Society; Member, Anti-Vaccination League; Member, Supreme Lodge, International Order Of Good Templars; Member, Independent Order Of Rechabites; President, Scientific Order Of Spectro-Chrome Metrists.

He scanned it. It truly impressed him with the importance of showing me all he could in his charge. The Germans like science. The card showed him my thirst for science. On learning my mission, he promptly went to an inner room and fetched a bunch of keys. A glass cage was opened. He pointed with glowing pride to the shelves of optical apparati therein—there were the ORIGINAL prisms and similar instruments made and used by Joseph Fraunhofer! I touched them with reverence, looked through some of them and replaced them. A moment later, I requested again for a sight of the ORIGINAL apparati of Kirchhoff and Bunsen. He closed the cage and took me to the opposite side. Another cage stood there against the wall. There were buttons on it to see the Spectra of different Elements in actual disintegration. I saw a few; they were all very familiar to me like intimate friends. The attendant spoke three words "die originale Spektroskopie" which fairly galvanized me. He handed a cheap-looking thing in my hand. That apparatus was the original instrument which founded Spectrum Analysis, in 1859, whose culmination in 1920 was

Spectro-Chrome Metry! My "dream" was realized. I was as it were rooted to the spot. Psychometric perception gave me the unforgettable thrill, of having handled and seen through that apparatus which in the last century started in a humble house in Heidelberg, the minds of Kirchhoff and Bunsen toward the unfathomed mysteries of the Solar Universe! It was a moment I shall never forget. The World was dead to me. So **that** was what originated Spectro-Chrome Metry! May the memory of those noble researchers be blessed!

Reverently, I handed that precious relic to the attendant with voluminous thanks and rushed to the Central Observatory, at his suggestion. It was in Rooms 297-298. There! It had the original refracting telescope of Joseph Fraunhofer and the observer was marking the disturbances in the Sunspots.

Going down, I saw the original telescope of Sir Isaac Newton in a corner. That reminded me of England and the British. Newton's telescope in the German Museum! What would Newton think should he reincarnate?

Six struck. I left the Deutsches Museum. I had no eyes for the other beauties of that country. Fraunhofer, Kirchhoff, Bunsen, filled my consciousness. Some day, that Deutsches Museum will have the original apparati which produced Spectro-Chrome Metry, unless either the Franklin Institute, Smithsonian Institution or the Greenwich Village authorities of Detroit, Michigan, accept them in priority.

IN THE NEXT ISSUE

The European Crisis And America Through The Eyes Of Dinshah

SOME SPECTRO-CHROME MARVELS

Doggone It! What Next?

By:—FRANK J. CASSANO, Farmingdale, New York

Marvelous results are being obtained with my Spectro-Chrome. I tonated several cases of Burns in the eyes, caused by Hydrated Lime. One Tonation normalated two cases and three Blue Local the other. A boy's fingers crushed in a car door, responded in 1 Tonation of Turquoise. My brother's and sister-in-law's dogs are frequent visitors of the Spectro-Chrome. Our "Cocker Spaniel" runs in to his Tonating Cage, when I say "Tonation" to him and cannot remove him until tonated!

Many of the past "Doubting Thomases" are beginning to believe, because their sight is registering the Truth. "Long live Spectro-Chrome!"

FIRST ST. LOUIS MISSOURI PLANET

(HOTEL MELBOURNE, ST. LOUIS, MISSOURI)

Meeting Of Thursday, July 7, 1938

Successful Use Of Spectro-Chrome In:—Sunburn, Dog Diarrhoea, Stomach Disorder, Limp, Radium Burn, Heel Pain, Gastritis, Ringworm, Cardiac Disorder.

Reported By:—CHARLES H. STIERMANN, Recorder

Deputy Clemens M. P. Neumann was in the chair.

Telegram from Colonel Dinshah was read giving the information that he won a point in a decision in the Federal District Court against the Delaware State Medical Society.

Harry O. had Sunburn that was normalated by one Tonation of Blue, all Heat and Fever leaving.

Rosa H. also effected Normalation of Sunburn with one Tonation of Blue.

Harry O.'s dog had Diarrhoea. Tonated with Turquoise and dog was restored to normal condition.

The Deputy reported several cases:—

(1) Man 53 years old. Disorder in Area 8 and spent 10 years drifting from Medical Doctor to Medical Doctor, spending a fortune without results. Atcowa Green Systemic, Lemon Systemic, Orange on Areas 8, 9 and Magenta on Areas 4, 18 six weeks tonating and Disorder was corrected. Persuaded him to buy a Spectro-Chrome Equipment but he was hesitant, being a bachelor; he liked to reduce his possessions to a minimum.

(2) Woman, 60 years old, Growth on instep; it was removed and Radium was used, injuring the foot. Took seven Tonations of Spectro-Chrome, results proving so satisfactory that she bought a Spectro-Chrome. Now walks without limping and never felt so well during her life time. This party was itisized and tonated accordingly.

(3) Person with pain in heel; Disorder 6 years old. Continued pain with pounding and thumping similar to the thumping when a Boil is coming to a head; pain was keeping her from sleeping. One and one half weeks of tonating with Atcowas Green and Yellow Systemic and Yellow Local on heel and Magenta on Areas 4, 18. Nine Tonations corrected this Disorder.

(4) Called to a home at 12:30 A. M. Woman had eaten a portion of Chili con carne with disastrous results. She was very sick, doubled with pain and unconscious. One Orange on Areas 8, 9,

and 10 and she became quiet and fell asleep. Next day, when the Deputy called she did not know that he was there the night before!

Mildred K. inquired what further action to take for Defective Hearing, after pursuing the course as outlined in the Spectro-Chrome Home Guide. As several of our members have defective Hearing, they were also eager for more information for though receiving some benefit, they were not entirely satisfied with the results thus far gained. The Deputy advised how to proceed, some Tonations to be used locally and there would be better results obtained.

Nicholaus B. said he had some teeth that gave him pain. He used Indigo to no avail. Finally went to Dentist and had the teeth pulled.

Ida G. had Ringworm in armpit. Claimed one Tonation of Yellow corrected the Disorder. It was the size of a half dollar and the Medical Doctors could not effect a remedy. As this seemed highly unusual speed to effect a Normalation, brought out the fact that she had been using Yellow, Lemon and Orange Systemically for quite a period and the Yellow Local had given the final kick in disposal of the Ringworm.

Mary K. had been using Green and Lemon and finds she gets cramps in the Stomach which she can not endure. Advised to resort to Orange on Areas 8 and 9 when such a condition arises, because something must have lodged and did not want to be on its way. She is a new Affiliate and with diligence will learn the technique of Spectro-Chrome along with the "Rational Food Of Man".

Marie G. asked what to do in Sunstroke and Heat Stroke.

This was a timely inquiry and she was advised as to what course to pursue.

Eugene N. Case of woman with broken arm and well advanced in years (70). Arm was stretched and set and put in splints. He used Orange. Advised to use Yellow instead of Orange, Turquoise Local and Yellow Systemic and not to forget Areas 4, 18 using Magenta at least once a week.

The Deputy brought a book on "Eugenics" to the meeting to show that occasionally a medical man has no fear of his contemporaries and will speak the Truth. An article was read from the book in which he decries the value of Tobacco and tells of all the deleterious effects it has on the user. Also he tells about the folly of eating Meat, Fish, Eggs and ordinary Cheeses and the destructive effects of Coffee, Tea and Alcoholic Beverages. This is in accordance with our teachings, exactly, but that learned gentleman very likely will occupy the scorner's seat, too, because the powers that be do not look favor-

ably upon such information being dispensed and especially do the manufacturers of above products and sales agencies frown with vehemence on such attitude.

In closing, the Deputy reported a case of a man who a year ago bought a Spectro-Chrome. He had a bad Heart Disorder and was unable to work. He had taken his quota of Digitalis and Strophanthus and various Heart Stimulants with the usual success which was nil, their ravages being left upon the Body and still unable to perform any of the duties pertaining to his business. Used Spectro-Chrome and is again back at work and yet he says "Spectro-Chrome did not do anything"! Such declaration reminds one of the phrase used by Colonel Dinshah quoting an envious purchaser who had wonderful results, "It is a fake, but the damned thing works!" That is gratitude.

Oh yes! Many of our Affiliates hearing the call of the woods had a good dose of Chiggers and ask if Spectro-Chrome can help them.

EDITORIAL

REMARKS

Mary K. should send her Général Advice Chart.

Defective hearing may be owing to different causes. Refer to the Spectro-Chrome Metry Encyclopaedia, Volume 2, Chapter 62, on Disorders Of Audition. Why not take advantage of our Free Guidance and follow it than fumbling around? Many do not follow our Free Guidance but stick to their pet views.

Books on "Eugenics" do not reckon the emotional and mental divisions, as well as the physical fits of the Areas of the mates. Their conclusions do not tally with occult findings. You may read and study them at home, but, reason their logic before accepting their one-sided doctrines. Without a thorough knowledge of Karma, Reincarnation and the Occult Laws governing them, Eugenics has not much value.

Chigger, Chigo, Chigre or Jigger is the name given to the Sarcopsylla (Dermatophilus Tunga) penetrans, a sand flea of the tropics. It burrows often in the hands and feet, causing much distress, sometimes even death. The same name is applied to a harvest mite, Leptus (Trombicula) irritans, of the southern United States of America, which often becomes a troublesome parasite. Tonation should be by Atcowa Green Systemic, followed by Ultra-Green if the affected Area shows much Redness; otherwise Turquoise Systemic should reach the cause. The same Tonation method applies to bites of other insects also. Wear proper stockings when going in the woods. In Skin Disorders, use no soap on the affected Areas.

ST. LOUIS AND DETROIT VISITED

A Strange Occurrence After An Utterance!

Our President Dinshah visited two Planets by special invitation last month and delivered discourses on the Science of Spectro-Chrome Metry. The lectures were all very well attended and created much interest.

The first series was delivered June 17, 18, 19, 1938, Hotel Melbourne, in the Colonial Room, St. Louis, Missouri. Numerous case reports were submitted at the end of the discourses, all tending to show the value of Spectro-Chrome.

The second series was delivered June 24, 25, 26, 1938, Hotel Tuller, in the Arabian Room, Detroit, Michigan. Many among the audience went on the platform voluntarily and testified about the benefits they derived from the use of Spectro-Chrome. The new Spectro-Chrome Equipment and the Vinag were exhibited and created much interest.

At the end of the third day, a unanimous request was made for the next Annual Convention to be held there. The President promised to consider the request.

All the discourses were as usual illustrated with the aid of the Stereopticon and profusely demonstrated with scientific experiments.

The meetings were all harmonious, except one disturbance in St. Louis, Missouri, where during a caustic criticism of the wrong food eaten by the American people, producing illness thereby, a man walked out shouting "Boloney"! The lecturer took it with his usual humor, but it produced mirth in the audience.

Another striking incident happened in the same city. An Affiliate having asked about the Medical Laws, Dinshah stated that they all fought against the Truth. He showed to the audience the hidden devilry in the new so-called Food And Drug Law, wherein a "Health Device" was also included in the definition of "Drug"! Furthermore, the same Law, propounded by the U. S. Senator Royal S. Copeland, stated that any advertisement claiming the remedy for "Bright's Disease, Cancer, Tuberculosis, Infantile Paralysis, Venereal Diseases, Heart or Vascular Diseases" was a "False Advertisement" and was prohibited. That being what SpectroChrome Metry HAS ACTUALLY BEEN DOING for the past 18 years, was a distinct blow aimed at us. The lecturer said, "They may fight Spectro-Chrome, but, the man who fought against the Truth and happily lived through it was not born, because Spectro-Chrome was based on the powers

of Truth." Four hours later, the evening newspapers came out with the headlines "U. S. Senator Royal S. Copeland Suddenly Died!" The man who was instrumental in having the Law enacted, died of the same Disorders whose remedy he had declared as "False Advertisement"! Spectro-Chrome could assuredly have saved him.

DONKEY SMOKER!

From Surat, India, comes a story of a jackass accustomed to the use of cigarettes. There is nothing surprising in this news. We have been accustomed to give that matter serious consideration since years and believe sincerely, that one must be a donkey to poison self and others by the pernicious fumes of the stinkweed of tobacco, the curse of the civilized World.

DELAWARE INJUNCTION SUIT TOOK A STEP FORWARD

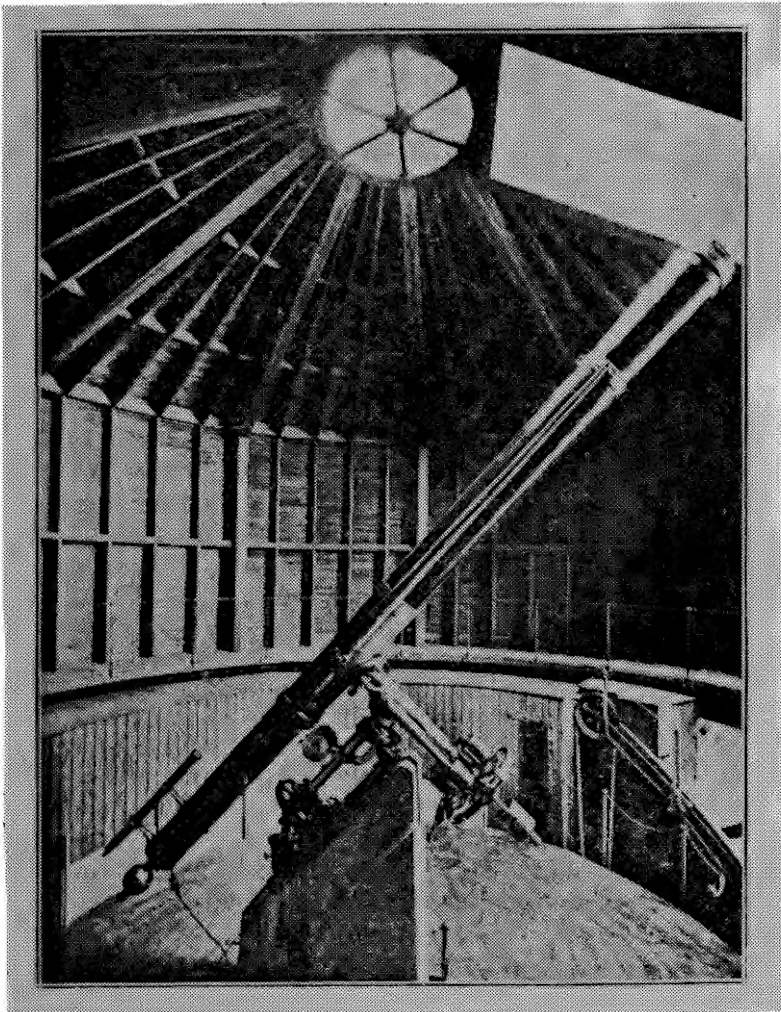

The suit for Injunction against the Delaware State Medical Society, State Of Delaware and the Wilmington Delaware Police Department, instituted over 5 years ago by Dinshah P. Ghadiali, was heard in the District Court of the United States of America, on Thursday, July 7, 1938, by Honorable John P. Nields, Federal District Judge. A Motion for Dismissal was argued by E. Ennalls Berle, for the Respondents to which the Complainant Dinshah replied, appearing as usual for himself. The Respondents contested that the Court had no jurisdiction. The Complainant contested that as a Court Of Equity, because of the violation of his Constitutional Rights of Free Speech, that was the only Court where he could ask redress. The point having been successfully urged by the Complainant, the Court issued an Order to file a new Bill Of Complaint within 30 days, because some of the original Respondents were deceased or changed.
