FIRST MILWAUKEE WISCONSIN PLANET
(HOTEL WISCONSIN, MILWAUKEE, WISCONSIN)

Meeting Of Thursday, June 4, 1942

**Successful Use Of Spectro-Chrome In:—Accident, Pain, Skin Disorder,
Piles, Sinusitis, Exhaustion, Backache, Varicose Veins, Rupture.**

Reported By:—EMMA SCHROEDER, Recorder

Deputy Frank Burns was in the chair.

As usual, the communication from the Secretary of the Institute to the Planet Commission was read by the Deputy, who emphasized each paragraph, explaining the Lecture Series and the Course, on Occultism, both of which are to be conducted in Milwaukee in July, as well as the change in plans by the Council Of Trustees, which decided to conduct the Resident Experimental Course also in Milwaukee.

Questioning by the Deputy Burns disclosed that over ninety percent of the Affiliates present at this Meeting, did not receive the May issue of Spectro-Chrome, to date.

The two paragraphs in the Editorial Remarks in reply to the First St. Louis Missouri Planet, which appeared in the May 1942 Issue of "Spectro-Chrome," relative to the Chemical Elements and Atcowa Green, were read by the Deputy and the merits of this Atcowa were praised.

By-Laws 82 to 95, inclusive, were read by Emil Egide and the Deputy defined and explained the various By-Laws. Particular mention was given By-Law 92, "Radium And X-Rays." Their dangers were explained.

"Is X-Ray photography, as is used when purchasing a pair of shoes, harmful?" was the question raised by Ethel Schott. In the opinion of the Deputy, that is not meant by "X-Ray Irradiation."

Theodore Mohrhussen stated that By-Law 87 answered his question on "First Aid" satisfactorily.

Margaret L. was in doubt as to whether, upon entering a Hospital for training, it is necessary to notify the Institute and whether it conflicted with the By-Laws.

"Liability, Guarantee or Warranty," "Spectro-Chrome for Disorders," "Spectro-Chrome Tonation System" the culmination of Dinshah's Laborious Researches and "Definitions Of The Spectro-Chrome Tonation System" were read by Leocadia Merwitz.

The Deputy spoke on the Attributes of the various Atcowas in Spectro-Chrome, saying that this Chart is the work of a lifetime and not one of us present would be able to produce a Chart of this kind as Colonel Dinshah did. Affiliates were advised to spend all possible time in studying it, as much information can be obtained from it. "Too few of us refer to the Home Guide when an injury occurs or in a Disorder and that 'book' is certainly worth the study of anyone" is the Deputy's opinion. "Too many of us see only the surface," continued Deputy Burns. We see only the top of Spectro-Chrome and should study more of it.

In response to the Deputy's request for Case Reports, Emil E. reported the following case:—

A. S., age 68, Female: accident; fell and severely injured Areas 1 and 18. In medical terms this would be termed "Concussion." Was discovered 15 or 20 minutes later in an unconscious condition. Badly bruised. Apparently, this Sufferer did not know she was going to fall for arms

were not extended to balance or protect herself. Kardoscil 76, Spiroscil 24. Very much excited and could not talk coherently. Commenced Irradiation with Atcowas Green, Indigo and Magenta. Was able to leave the bed after the second day. That does not mean she was normalated. Normalation required about three weeks. Completed with Atcowas Lemon and Yellow, to accelerate motion, for she was quite stiff. Prior to this injury, the Sufferer's life was practically saved at another time for she was completely burned with Ultra-Violet Rays. For the second time, she is very grateful for Spectro-Chrome. This Sufferer's mental condition was such, that she fancied she possessed all the Disorders which the magazines mention in their advertisements: Halitosis, B.O., Athlete's Foot, et cetera." (Deputy Burns added: "Use Camels,—they give you a lift!") Applause.

Another Case Report was given by Emma Schroeder as follows:—

One week before Colonel Dinshah's last visit here in April, 1942, Emma's mother, Otilie K., (an Educational Student), in a spirit of helpfulness went at the electric wringer and mangled her finger. It was in such torn condition that the sight of it nauseated her. After the finger was caught, she pulled it out without releasing the pressure. Emma was tempted to call a Medical Doctor who lives only two doors away—thought it required stitching. However, on second thought, she decided "Spectro-Chrome must show what it can do." Kardoscil rose, due to shock, so Atcowas Purple was irradiated on Area 4 immediately to decrease sensitivity to pain. Then, two Tonations of Orange Local were given followed by four weeks of Indigo Local, one Tonation a day. The finger is mended completely, WITHOUT STITCHING OR TAPING. Indigo, which contains one-quarter Green, arrested the Pus condition completely. A relative who saw this finger at its worst, said to Emma, "How calm your mother is with a finger like that!" One of our Normalators, who also saw it, said, "And you are smiling with a finger like that?" She voluntarily replied: "Why shouldn't I? This finger hasn't caused me an hour's Pain or cost me an hour's sleep." Circulation is not completely re-established in the injured member yet, but this Sufferer is seventy-seven years of age and is still hopeful of restoring that, for she has been on the Rational Food Of Man for over six years (June 1, 1936.) There is indication of the nail coming off, but the new nail is already forming. This finger bled for days; at first blood, then serum, exuded and Emma believes that that is what prevented undue Swelling. Laurels again go to Spectro-Chrome!!! (Applause.)

Anita E. confirmed what Emma reported, for she saw the Sufferer's finger since it is mended and in her opinion, it was "a masterpiece in healing which Spectro-Chrome performed."

Otto Lutz, Past Deputy of the Milwaukee Planet, reported the following cases:—

1. A. F., age 58, Male. Skin Disorder of long standing. Tried many other methods first, for a long time, without results. Then tried Spectro-Chrome, which set him right in four months, three Tonations a week. Atcowas used were Yellow, 6, 7, 8, 9, 10 and 18 and Lemon Systemic.

2. R. H., age 33, Male. Case of "Piles" of long standing. Operation was advised, but Sufferer refused. Then used Spectro-Chrome for two months with success. Yellow on Areas 6, 7, 8, 9 and 10 and Orange and Indigo Local were irradiated.

3. L. S., age 30, Female. Sinus Disorder with much Pain. After using Spectro-Chrome three weeks, felt like herself again. Lemon and Yellow Systemic were the Atcowas used.

4. M. D., age 72, Female. Run down condition. No "pep," no appetite and could not sleep well. Tried other methods first without results. After the second week of Spectro-Chrome, appetite returned, could sleep fairly well and started to do housework. She remarked, "I now know I will be well again, but I want to continue with Spectro-Chrome for a while longer." Green Systemic, Front and Back were given.

5. S. Y. R., age 18, Female. Pains all over her Body. A recent case. Atcowa used was Turquoise (five Systemic); all pain left and she was well again.

Discussion proceeded on the Case Reports: With reference to Case number "3," Theodore M. stated that he suffered with Sinus Disorder so severely that he would strike his head against the wall. He normalated the Disorder in five Turquoise Tonations. With each Tonation, the period of Pain lessened in duration. Theodore could not understand how Lemon could normalate Sinus Disorder whereas his case was corrected with Ultra-Green, Turquoise. Said he had perfect results.

The Deputy held the opinion that Green, three-quarters of which exists in both Lemon as well as Turquoise, obtained the results.

Discussion on Sinus Disorder continued:

Leocadia M. said she knew of a case a few years ago in which a man had Sinus Disorder for thirty years. Was required to remain away from his work for three months. Was completely normalated with Lemon and Magenta.

Otto L. agreed with the Recorder that Sinus Disorder and Bronchial Disorder are closely allied and Atcowa Lemon was suggested.

With reference to case Number "5," Otto reported that this Sufferer was completely bent over with Pain. Two Turquoise Tonations brought Ovelim and all Pain left.

Skin Disorders were discussed and the Deputy remarked that, usually, many other methods are used in Skin Disorders before Spectro-Chrome is sought.

Case Number "1" also used Cocoanut Oil. Otto finds that people do not drink sufficient water; many cannot remember the last time they partook of a swallow of water!

"Piles" were also discussed.

The Deputy reminded that seventy-five or more per cent. of Disorders of the Human Body result from "Constipation." That is why we are to abstain from certain foods. Yellow is the proper Atcowa for faulty Elimination.

Norma F. is desirous of having the Affiliates know that her mother has become a Spectro-Chrome enthusiast, whereas, formerly, she had a hundred excuses for its non-use. She did not like the idea of using the Favorscope. Said, the neighbor never used it, but takes her Tonations during her noonday siesta. Norma pointed out that this was not the proper way to do. At last, Norma's mother's joints became so painful, Kardoscil was low, Spiroscil was high, that she finally resorted to regular Spectro-Chrome Tonations. They proved beneficial but still Spectro-Chrome did not receive the proper credit. A year and a half ago, she wrenched her back. The proper Atcowas were advised, but, strangely, the Disorder grew worse. Her mother has an "odd way" of "placing"

the slides, so, while the latter was under Tonation, Norma decided to enter the room and investigate. It was discovered that she used the combination forming Scarlet instead of Orange, but did not have a Backache again for months. Later used it for a Fall. Went over it in a hurry. Then had Varicose Veins. Went over them also. Was accustomed to chest attacks so severe, that she moaned with Pain. Just lived in dread of them. Suffered with many other Disorders and accompanying all of them was a Rupture which was forgotten and which, with all this Tonation, improved. Norma's mother is now so enthusiastic about Spectro-Chrome that the subject need only be broached and she will eagerly point to its merits. (Applause.)

Alice B. told of a case of Gall Bladder Disorder which existed for thirty-five years. This Sufferer did not tonate with head to the North and Favorscope hours were not followed. Upon questioning as to how he felt, the reply was "It is going away. Formerly I had the Doctor every three weeks."

"It is not the proper way to use Spectro-Chrome," said the Deputy. Some find the best time to use it is at eleven o'clock at night. Some permit the Atcowas to shine on the wall instead of the Body. Most people like to do things their own way and dislike to follow instructions. When we issue instructions, we must be sure they are properly given and properly understood. His wife once used three slides instead of two! ! !

EDITORIAL

REMARKS

Keep away from Irradiation with X-Rays. Read my article on page 5 in June 1922 Spectro-Chrome.

Hospital "training" is not against our By-Laws, but, the use of such "training" in conjunction with our Science is likely to prove Violation. Spectro-Chrome is NOT permitted to enter into a Hospital or used with other methods, except through the approval of the Council Of Trustees. Study By-Law 78. Always consult the Council, before changing vocation or status, as certain vocations are barred from affiliating with the Organization. Study By-Law 62.

Lemon and Turquoise have $\frac{3}{4}$ Green Polarity, the only difference being that the Lemon is on the Hydrogen Section and the Turquoise is on the Oxygen Section. The former is indicated in Persistent cases, while the latter is indicated for Acute cases. It is easy to determine, because the Acute cases are Febrile, while the Persistent ones need the introduction of warmth. Follow the K. and S. Ratio. The Deputy was right.

People not minding instructions or Free Guidance and not using the full Technique are hurting themselves. Our Science is perfect in its conception and application, but, we have no way to "compel" obedience or honesty and we have less desire to interfere. When we learn of non-compliance, we drop them out of Free Guidance privileges or at the end of year deny them Continuation Of Affiliation. Such recalcitrant persons are not desirable as our Affiliates. Let them stay out and save their cash for our opponents.

FIRST PORTLAND OREGON PLANET
(MASONIC TEMPLE, PORTLAND, OREGON)

Meeting Of Thursday, June 4, 1942

**Successful Use Of Spectro-Chrome In:—Fever, Irritation, Sunburn,
Inflammation, Burns, Hiccoughs.**

Reported By:—LOUIS BISCHOFF, Recorder

Deputy Stanley Burroughs was in the chair.

The Atcowa for discussion for the evening was Blue.

The Deputy asked the Affiliates to tell of their experiences in various instances where they used the Blue.

Virginia G. said she used the Blue very successfully in a number of instances of Fever and Irritations. Another mentioned that successful results were obtained in using it for Sunburn. Others used the Blue successfully in various degrees of Burns. The Deputy stated that if Spectro-Chrome be only good for Burns alone, it would be worth while having, as it seems like nearly every member of a modern family is getting burned at one time or another! Nothing works so rapidly in healing a Burn as Spectro-Chrome. It was noted by some that Blue caused perspiration. Blue is refreshing and cooling. Evaporation of the Sweat drops, from the Body, results in a lowering of the Body Temperature. Many noticed that when using the Blue after a hard day's work, it very definitely relieved fatigue and took the tired feeling away. Thus Blue is a great Vitality Builder. It supplies the Oxygen to the Blood and helps readily to burn the Toxins out of the Blood and Tissues. Blue also takes off some of the load from the Heart as the result. Blue also stimulates and strengthens the Pineal Gland. Further discussion on various uses of the Blue followed.

The Deputy then read the Chapter 93 on Blue from Spectro-Chrome Metry Encyclopaedia.

Virginia G. said that a number of cases of bad infected and inflamed Eyes was reported in her neighborhood and all over the city. It seems that the trouble comes from the shipyards. Her little girl had a similar trouble with her Eyes and Blue cleared it overnight. Other cases reported, without the use of Spectro-Chrome, were almost impossible to clear. She also mentioned that soon after the last Meeting, she had an attack of Hiccough, which would not go away no matter what she tried and then she remembered that in the Meeting Orange was discussed and the Deputy mentioned that Orange would relieve them. She used Orange immediately and within half a minute the Hiccoughs were gone and did not return.

The question was asked as to how they could explain how the various Atcowas worked to produce the results that are achieved. The Deputy explained.

The question was asked if it be all right to have a Radio going while taking Tonation and the Deputy replied that it did no harm, but as a rule one could not relax as easily as if they did not have any interference of any kind.

The question was asked if Colonel Dinshah would visit Portland this year and the Deputy thought it best to let Colonel Dinshah answer that one.

An Affiliate mentioned that Spectro-Chrome would not take her Headaches away and would generally last three or four days. She wanted to know what to do. The Deputy replied that a Headache of that kind indicated that something might be wrong and changes were taking place. Stay with Spectro-Chrome and the Rational Food and the necessary changes would finally take place and the cause of the Headache removed. Any condition brought on by abuse of the Body over a period of years cannot be corrected in a few days or a few weeks. The Body must have time to make use of the Atcowas. Nature can do only so much at one time.

The question of what part Germs played in the course of any Disorder, was brought. The Deputy stated that Germs were the results of the Disorder and not the cause. Germs aid in destroying rotting material in the Body and thus doing us a good turn instead of harming us as is generally thought.

The question was asked, what causes a Headache when one goes without eating? The Deputy replied that if our Digestive System does not have to work to digest food, then our energies go to work eliminating the Poisons circulating in the Blood before they are eliminated from the Body, which causes the Headaches and other Pains. Eat correctly and live correctly and we shall not have any congested Poisons in any part of our Body.

The question was asked if it were all right to drink liquids while eating a meal. The Deputy replied that it was all right to drink as wanted, if no food be in the mouth at the time. He believed that drinking with a meal helped to eliminate Constipation, as a great deal of the liquid was carried with the food through the intestines thus keeping the food soft and more easily handled by the Digestive System.

The question was asked, since the only way that Oxygen can enter the system is through the Lungs, how is it that Spectro-Chrome Blue gives the Oxygen? The Deputy answered that the Blue enabled the Blood to pick it from the Lungs and utilize it. The Attuned Color Waves of Spectro-Chrome enable our Bodies to utilize the Chemicals we take in through food and air and water. Attuned Color Waves produce a change in the Aura and thus a chemical change in the Body.

EDITORIAL

REMARKS

It was a good discussion on Blue. Virginia G. seems to have much interest in the Science.

The "cases" from the Shipyards may be traced to the Welding Operations, wherein large quantities of Ultra-Violet Rays and also Infra-Red Rays are disengaged. The Invisible Energies of Nature have more potency than the Visible Energies so-called and carelessness in using the former may result in terrific Disorders. In general, the workmen using the Energies are more to blame for their own negligence.

All should study Spectro-Chrome Metry Encyclopaedia and most of the constant questioning would disappear. None would be called a good Christian, without a study of their Scriptures. Study that set and also what is in Spectro-Chrome Home Guide.

No Radio, no talk, no fooling during Tonation. Concentrate your mental faculties on regaining Health.

Dinshah will visit you again only when Students are in sight. The last trip of 7,000 miles was enough for showing his good-will, but, a Non-Profit Corporation MUST have internal financial encouragement, to continue educational tours. Then, again, Dinshah does not relish the idea of being stranded in the deserts of Utah, with worn tires and no gas. He will come when they will make Synthetic Inflammable Water and Soap Bubble India Rubber. However, get the Students ready anyhow and he will be tempted to drive on Rope Tires and Whiskey!

Drink fluids while eating, but, *not* while the food is in the mouth.

The results are produced by the Sufferer's internal Energies, the Attuned Color Waves being the channel or Catalyst. Dead folks, therefore, can not jump out of their wooden overcoats by any Spectro-Chrome Atcowa. There is the Line drawn for our activities.

Old Ambition Returned!

By:—MARY S., San Antonio, Texas

I can truly say that I feel very much improved in health, I am eating according to your instructions and I enjoy my meals. I feel strong, my old ambition has returned. I can not express my gratitude for your valuable advice. If I could convince my friends of the benefits they could obtain from the use of Spectro-Chrome I would be much pleased. I hope some day.

FIRST MERRILL WISCONSIN PLANET

(HOTEL BADGER, MERRILL, WISCONSIN)

Meeting Of Thursday, June 4, 1942

**Successful Use Of Spectro-Chrome In:—Injury, Swelling,
Pain, Rheumatism, Fever, Vomiting, Whooping Cough.**

Reported By:—ESTHER KRIEWALD, Recorder pro tem.

Deputy Walter Briese was in the chair.

The Deputy read the By-Laws Number 84 thru 98.

A letter from the Principal Office at Malaga, New Jersey, was read by the Deputy regarding the Spectro-Chrome Meetings which will be held in Milwaukee in July, 1942. It was explained that a bulletin giving dates and further information will be mailed to all Wisconsin Affiliates.

Those Affiliates who did not receive their May 1942 issue of the Spectro-Chrome magazine were told to write direct.

Chapters on "Disorders Of Vision" and "Disorders Of Olfaction And Gustation" from Spectro-Chrome Metry Encyclopaedia were read by Lydia D.. She explained these Chapters thoroughly for the benefit of those present. She referred to Spectro-Chrome Home Guide on the "Sensory

Nervous System" and the Deputy read page 69. Lydia D. reported the following cases:—

1. Emil S. Male. Injury of the Knee. There was much Swelling and Pain present. He could hardly walk or climb the stairs. Lemon Systemic and Magenta on Areas 4 and 18 cleared the condition in 2½ weeks.

2. Emanuel E., Male. 14 years old today. His case was diagnosed by Physician as Inflammatory Rheumatism. Medical Doctors had been on the case for two weeks and the condition of the Sufferer became worse. He lost 35 pounds in two weeks, while in their care. Lydia was called in and found the Sufferer in much Pain. His body was very swollen. Temperature 104 Degrees, Ratio 1 to 5. Blue and Turquoise Systemic and Yellow Local normalated the condition beautifully. He is now up and the Temperature is normal too. He sings and is happy and grateful to what Spectro-Chrome did for him. His Aunt who watched the progress of her Nephew is now using Spectro-Chrome too.

Successful use of Spectro-Chrome was reported in cases of Vomiting and Whooping Cough.

Anna V. of Shawano, Wisconsin, reported she has been a user of Spectro-Chrome for nine years. She was asked to report on some of the results she obtained by Spectro-Chrome. She said she would not know where to begin or end, for it did her much good. After many years of doctoring with medical men without results, she used Spectro-Chrome and now finds living a joy. She does not tire so easily and can do all her own work, thanks to Spectro-Chrome.

Chris G. from Shawano, Wisconsin reported that he lost his sense of Sight suddenly one day, while going to the mail-box for his mail. After searching for some time, he found an Optometrist who fitted him with glasses whereby he can see fairly well. He is using Spectro-Chrome, but has only had his Equipment for about a week so could not give much of a report. He was advised by Lydia D. to continue using the Free Guidance and he would get results.

FIRST DETROIT MICHIGAN PLANET

(HOTEL TULLER, DETROIT, MICHIGAN)

Meeting Of Thursday, June 4, 1942

**Successful Use Of Spectro-Chrome In:—Fatigue, Collapse,
Nervousness, Swelling, Pain.**

Reported By:—SOFIE HALL, Sub-Deputy.

Deputy Jessie E. Ness was in the chair.

Communication from the Central Office was read.

The Deputy asked Otilie C. to read from "The Advantages Of Healing With Light, An Outline Of The Science Of Spectro-Chrome." She read there are Seven Colors in Sunlight and they are separable through a Prism. We were also informed as to what was good to eat and what not to eat. Sleep with your head North and feet South. It was very good and the Affiliates applauded.

The Deputy said Spectro-Chrome is trying to help you to help your-

self. Sunlight is the basic source of all Life and Energy upon our Earth

Johanna R. asked if it would be possible to print 1 or 2 of Dinshah's recipes that are not in Spectro-Chrome Home Guide; she hears so many people talk of the delicious and tempting dishes that are served in Malaga. She stated that she realized the expense of publishing a separate book and asked if this other plan were possible? She made a motion we write and ask about it and Catherine J. seconded it. All the Affiliates were very enthused with this suggestion.

The Deputy stated as a man eateth so is he and as a man thinketh so is he. Albert G. asked if he understood correctly when Otilie C. read from "The Advantages Of Healing" that Condiments were forbidden to be used. He stated that Colonel Dinshah says if they are used in cooking it would be all right; such as Salt. Salt in cookery is permissible, but salt after cookery is not advocated. He asked if this were written by Colonel Dinshah himself. Lenore G. stated Spectro-Chrome Home Guide also permits boiled Potatoes and then stuffed into peppers. She was told mashed Potatoes that were steamed and not boiled were alright.

The Deputy then stated people are too tired to stay patiently with anything that is good for them. If they are not better with 2 Tonations they give up, yet they do not expect to become better with 2 Pills. We should clean our outside as well as our inside.

Charles R. said the biggest offenders are the Affiliates themselves. We do not obey the Laws of Nature.

He stated Michigan is lacking, because people do not go out and work. He preached Spectro-Chrome away before he took the Course. Other people are always watching us to see if there really is something to this way of living and in the end they will all come and say we are right. Another fault of the Michigan Planet is the poor showing of Affiliates at our Meetings; no wonder Dinshah becomes disgusted.

The Deputy then called on Albert G. He stated 6 elements constitute 99½ per cent. of the Body. He further explained the minute we are born we start to die. He drew a triangle on the blackboard and explained the Pituitary gland, Liver and Spleen. Hate destroys. If the Aorta is damaged there is no possible chance of living; bleed to death. We should always have constructive thoughts, like day by day I am getting better. For example, someone that is very fond of Music and has a severe Headache or Toothache happens to hear a band coming down the street, he forgets about the Ache and becomes all enthused and when the last note dies away the Ache is back again. "What fools we Mortals be!"

Case Reports followed—

Johanna R. reported that 1 Tonation enrolled another Spectro-Chrome Affiliate. Her husband had been working very hard and for a long time. He became ill at work and had to be taken home and a couple of the fellows at the shop made a \$5.00 bet he would be sick for a little time and would not be able to work right away. His Kardoscil was 54, Spirosil 16. Tonated with Scarlet and he fell asleep; 3½ hours later, he got up and went to work, Kardoscil 76, Spirosil 17.

Sara C. has had Spectro-Chrome 7 years and has had no Medical Doctors. Her mother passed away. She broke down with a "nervous condition." She had Gas Pains and her Leg swelled. Was in bed for 4 months. Thanks to Spectro-Chrome she is feeling fine. Last week she went to a dance.

Thaddeus K. told us he was in Malaga and Dinshah sent his Greetings to the Affiliates. The Greetings were heartily accepted.

The 3 enclosed Charts were discussed.

Antonio L. reported he has been taking Spectro-Chrome since November, 1941. He has Indigestion and has been taking Yellow, Orange and Lemon, but he did not get any results.

He was asked how long he had the illness before he started tonating and he said 4 or 5 years. He was told to be patient and he would get results.

EDITORIAL

REMARKS

We have been carefully watching your recent Reports. Somewhere, there is lack of activity. What is the use of talking all the time on "Delicious dishes and foods?" Read the Editorial Remarks on the activities of other Planets on Food Questions. We *refuse* to print monthly Recipes, because, such procedure will *have* to be eventually taken in regard to printing a complete Cook Book. Such book IS ready in India and we are preparing another here. Please, therefore, stop this food discussion and follow what is in the Spectro-Chrome Home Guide, leaving objectionables aside. It is very easy to talk, but, as we are a Non-Profit, unendowed Corporation, we find it difficult to make even the two ends meet. The expenses are more than the receipts and the backing of our Affiliates is lacking. Let each one contribute to a Spectro-Chrome Metry Encyclopaedia and STUDY. That will benefit more than wishing for just "Delicious dishes"—thanks though for the compliment.

Antonio L. has himself to blame. He never sent his Inspection Certificate or asked for Free Guidance.

Your Recorder Lucille Greenham resigned. Kindly recommend a willing and capable volunteer.

Great Work Spectro-Chrome

By:—HENRY S., *Lake Forest, Illinois*

We are both, I and my wife, happy to say, what a grateful Science Spectro-Chrome Metry is and what it has done for us already in the short time we got it. We again are both thankful to you and your whole family, for the great work you have done and are doing for all Sufferers, to have the happiness of using Spectro-Chrome Metry.

New Discovery In Delaware!

Wilmington, Delaware Scientists are reported to have made an important discovery. They say the Lemons have plenty of Vitamin C, hence they are wonderful to prevent Heat Prostration. Must be true. We found many wonderful Lemons in that city and one of them is still hanging on the tree 10 years.

FIRST ST. LOUIS MISSOURI PLANET
(HOTEL MELBOURNE, ST. LOUIS, MISSOURI)

Meeting Of Thursday, June 4, 1942

**Successful Use Of Spectro-Chrome In:—Coma, Swelling, Inflammation
Asthma, Vomitting, Appendicitis, Fatigue, Dysuria, Insomnia,
Cold, Pain, Boils, Itch, Piles, Fever, Deafness, Paralysis.**

Reported By:—VIOLA C. JEUDE, Recorder

Sub-Deputy Nathalee Britton was in the chair.

Communication from the Central Office was read. The Affiliates were advised to enroll by Monday, June 8th, if they wanted Colonel Dinshah to give the Course on Occultism.

Sub-Deputy said according to communication, Affiliates complained about "too much theory." She was very sorry to hear about this complaint; she realized that the First Volume of Spectro-Chrome Metry Encyclopaedia deals with nothing but Theory and Fundamentals of Spectro-Chrome Metry so she was letting it entirely up to the Affiliates if we should continue with the First Volume or not. No one voiced their opinion. She then asked Charles S. what he thought. He said one had to have a foundation and he thought it was necessary to study the First Volume. She then asked the Affiliates if they wanted to continue the study of the First Volume. There was no response; she then asked them if she could take their silence as consent and asked them to raise their hands if it were agreeable. *All Hands Went Up!*

Sub-Deputy said "I wonder how many of you look forward to the First Thursday of each month. We come here with a common interest, to become better acquainted with the Science of Spectro-Chrome Metry. This should be a Meeting of vital, personal interest to each of you. 'No man yet hateth his own flesh,' but truly we are vitally interested in our Bodies. Many of you went to other 'health lectures' attracted by the Salesman touch of a blowing diet. At least you are awakened from a rut of some years of sin against the Laws of Nature and here you are under Spectro-Chrome. Did you particularly notice the stanza on the monthly magazine cover?

In course of life you reach a time,
When Doctor, Lawyer, Priest alike,
Does fail to give the sought relief,
To troubled mind or burdened heart—
Then come to me;
I help you to help yourself.

I like that last line." She then asked Clemens N. to start with By-Law 87 and continue with as many as time would permit.

He complied by reading By-Laws 87-92 inclusive. In regards to Section 1, By-Law 87, he said any one may be in an Accident and may be taken to Hospital as one may be unconscious due to fractured skull; under these conditions one may be in the Hospital for several weeks. It would not be advisable to move Sufferer with fractured skull. This would not be a Violation.

Question—Would it be advisable to use Spectro-Chrome on Fractured Skull if it were possible?

Answer—By all means, it would certainly help conditions.

Clemens N. said he knew of a Boy who had Fractured Skull; the Bone protruded into the Brain; had to wait 2 weeks to determine before they operated. An operation of this sort is permissible; it is Constructive Surgery.

He said in regards to By-Law 88 to have a Tooth or Teeth extracted would not be a Violation, if the methods employed be freezing the Gums or blocking the Nerves; it would be advisable to tonate with Green and Magenta 4-18, as these methods are bound to affect Areas 6, 7, 8, 9 and 10.

Question—What to do after Teeth are extracted for Soreness?

Answer—Soreness can be stopped by Turquoise or Indigo.

Question—How about Abscessed Teeth?

Answer—Swelling or Boil next to a Tooth does not always indicate an Abscessed Tooth. It depends if the Swelling should successively occur, then it is not always advisable to have Tooth extracted.

Charles S. said X-Rays of Abscessed Teeth did not always prove successful, as they did not show the Abscess.

Clemens N. said this was true; some times they just cast a shadow.

Charles S. said his wife has had Pyorrhoea for years and the Doctor can not understand how her Teeth are holding out! They said they attribute this to Spectro-Chrome. Of course the Dentist does not know about this.

Question—Was he not right in assuming that she used Indigo on Area 1 for some time?

Answer—Yes.

Clemens N. said in regard to By-Law 89, that if one has an Ingrown Toe Nail, to have it taken care by Chiroprapist; this would be permissible and is not Violation.

He said he read an article on "How to Keep Well" in the Saturday Evening Post. It suggested to use a 2 x 4, round the edges, walk on it and in this way the arches can be raised, he said it was a wonderful suggestion on how to help ourselves the most natural way.

Charles S. said a Rolling Pin could be used instead.

Question—Would not Orange Local be beneficial also?

Answer—Yes.

Question—Would Orange be beneficial on enlarged painful Joint?

Answer—For inflamed Joint, use Indigo, walk and wear proper foot wear.

In regards to By-Law 90, he said it has been his experience that after a short time after using Spectro-Chrome, the Eyes go through a change; he said he usually advises to wait a while before having glasses changed, because it has been his experience that one did not need as strong Lenses.

Question—The usual procedure in going to an Optometrist was they invariably use Eye Drops; was this permissible?

Answer—Drops in the Eyes paralyze the Eye Muscles.

Charles S. said when his wife was under the guidance of the Institute, they advised against the use of Drops in the Eyes.

Question—Is it permissible to use Boric Acid to bathe the Eyes?

Answer—One could use a Salt solution just as well. Why did she want to use Boric Acid? Was it just because some one said it was good?

Answer—Yes. He said it was not necessary with Spectro-Chrome.

Question—What Color do you use on the Eyes?

Answer—According to the condition, either the Infra-Green or the Ultra-Green.

Rosannah B. said several years ago she had 2 Styes; they were inward Styes and she had to have them removed.

It was suggested if she should ever be pothered with them to let them ripen and not have them removed by force. She said the Tear Glands were affected.

Question—Was Stye due to Glandular Disorders and whenever there is Inflammation in some other part of the Body, for example Rhinitis, is there not also an accompanying affection elsewhere in Body, for example Sexual Organs?

Answer—Cannot answer, as he did not know.

In regards to By-Law 91. A woman came for Tonation; her Vertebrae were always out of place and she had to go constantly to a Chiropractor. One day after having been to the Chiropractor, she came for Tonation and used Spectro-Chrome. Some time after this Tonation, the Vertebrae again became displaced; he suggested to have them replaced and that was the last time she had to go and that was 3 years ago.

He said that he also knew of a young man who has been using Spectro-Chrome and his Back seemed out of place. Just recently while sitting at a table there was a twitching in his Back and everything is in place. The father is more than pleased; he said if he had not seen this with his own eyes he could hardly believe it.

Some one said they experienced this with a Knee that was always out of Joint, but with Spectro-Chrome it stays there.

In regards to By-Law 92 he said later he would make a report about an X-Ray Burn.

Question—Is Skin discolored by the Ultra-Violet Ray?

Answer—Only under X-Ray. X-Ray will kill growth; if you want to desex yourself and not have children X-Rays will take care of that. It destroys Life.

She said with hot weather approaching, it was a timely subject to talk about Sun Burn.

Clemens N. said with summer coming on one will hear about Sun Stroke.

The Recorder said she would like to make a suggestion. She read in the First volume of Spectro-Chrome Magazine, that Dinshah said Magenta could be used very successfully on Area 4, that regardless of the condition that Magenta being $\frac{1}{2}$ Red and $\frac{1}{2}$ Violet, the pulse would select the $\frac{1}{2}$ that was needed and the other $\frac{1}{2}$ would be thrown into the Aura.

Clemens N. said this was right. If one be in doubt as to what to do use Magenta on Area 4.

He said, several years ago a woman had a Boil on Area 5 and she used Magenta Local and normalated. He asked her why she used Magenta and she said she thought that if Magenta was good for Area 4, it would also be good for Area 5. He asked her how long it took to normalate; she said about 5 weeks. He said if she had used the usual procedure for Boils, she would have normalated in less than half the time.

He said he divides Light in 3 ways, the Infra-Red, White and the Ultra-Violet. He said it is funny a Negro would pay money to become White and the White People want to become Brown, go South and pay exorbitant prices for Hotel accommodations. A Sun Tan is nothing more than Burnt Skin, so to say.

Question—If one received a severe Sun Burn will Spectro-Chrome prevent Blisters?

Answer—Depends on the time exposed to Sun, how long you waited before you used Spectro-Chrome; if you waited very long it would not prevent Blisters.

In a severe case of Sun Burn the new Skin is very tender; in some cases it has taken 6 to 8 months before it blended in with the rest of the Skin.

Henrietta L. wanted to know how one could strike the happy medium; in Winter there is not enough Sun and in Summer there is too much Sun? Discussion followed.

Case Reports followed:—

A case was reported for Frances S. by Clemens N. Her mother became very sick; for 2 days was in coma; used Orange 8, 9 and 10 and Turquoise; then two days later her father became very ill; the same Atcows were used on him and he was normalatad.

Johanna S. reported her sister E. B. had a swollen Hand; used Turquoise Atcowa, did not look good; a Red line began to appear; she called Clemens N., then used Orange Atcowa Magenta 4-18. Stripe was $\frac{1}{2}$ inch wide; tried to pick with a needle; is much better now. Clemens N. said with Spectro-Chrome never pick any sore. It will leave a scar; use Orange Atcowa or follow Spectro-Chrome Instructions for Boils.

Mamie C. reported sister picked finger and it became inflamed. On Monday gave 4 Tonations; on Tuesday gave 4 Tonations; used Turquoise, Blue and Indigo and the next morning it burst open; followed directions according to Spectro-Chrome Home Guide.

Case Reports by Clemens N.:—

1. Rosa F., age 46. Ratio 106-28. Asthma, confined to bed, could not eat, vomited, was ready to give up. Orange Systemic, Magenta 4-18 later Lemon Systemic; results astonishing. Enrolled and has own Equipment. Robert F. her son was present and he added his mother had a hard time breathing; he said he knows when you can not breathe you just feel like you want to die; was given up by Medical Doctors. An Aunt suggested Spectro-Chrome, so they rented one; he admits he was skeptical when it was brought in, but he changed his mind. His mother made wonderful progress in 2 weeks.

2. William K., age 27. Ratio 78-18. Appendix attack; doctor recommended Operation. Turquoise Systemic, Magenta 4-18; after 10 days, went back to work.

3. Katherine K., age 59. Ratio 76-13. Frontelim painful and often, general Fatigue. Turquoise Systemic. Orange on 17, Magenta on 18, later Orange Systemic; very well pleased with Frontelim Disorder gone. She enrolled.

4. Adele W., age 54. Ratio 69-15. Could not sleep at all, Hand so swollen that Fingers could not move at all. Green and Turquoise Systemic, Magenta 4-18. Can now sleep all night and Hand so well now helps relative in childbirth!

5. Thomas H., age 57. Chest Cold. Turquoise Systemic one Tonation, feels fine.

6. Carl K., age 47. Cold with severe Pains in Area 17 and Shoulder. Orange Systemic Back one Tonation, went back to work.

7. Charles V., age 61. Unbearable Pains in Area 5, especially when

coughing. Ratio 90-12. Turquoise Area 4-5, Magenta 4-18, later Lemon Systemic; went back to work within one week. Enrolled.

8. Marjorie D., age 26. Boils on different parts of the Body. Green, Lemon, Yellow and Orange Systemic, Magenta 4-18. Boils appeared again and again, but normalised in 5 weeks. A prospective Benefit Student.

9. Ralph S., age 39. An Itch so severe he went almost mad. Could not work, also had Piles. Turquoise Systemic, Magenta 4-18, Indigo between Areas 11 and 19. Was normal in 2 weeks. Well pleased.

10. Lorenz W., age 84. Fever followed by extreme coldness, Body color Blue, Abdomen very hard and bloated, knife-like Pains. A very sudden attack. Orange 6, 7, 8, 9 and 10, produced vomiting and a terrific blast of Backelium. Green and Magenta 4-18; was normal within a few days.

11. Jessie D., age 57. Pains in Back and loss of Hearing. Orange Systemic Back and Front, Magenta on 18. Pains left and Hearing restored within 3 weeks.

12. Mary A., age 9. Ratio 72-11. Right Arm and Hand paralyzed; when walking throwing her body a certain way; could not use right Hand to write or use Hand; very awkward. Yellow Areas 6, 7, 8, 9 and 10, Scarlet on 4 and 18. Appetite improved, is able to use Hand in a normal way. Ratio now 1 to 4; used their own Equipment.

EDITORIAL

REMARKS

By-Laws and Theory are useful, but, should be within bounds. Teach the *practical* side of Spectro-Chrome Metry. Affiliates are shy to talk; draw their speeches.

The Constructive Potency of Spectro-Chrome is amazing, if one knows how to utilize it.

If women will wear proper shoes, Chiropodists will seldom be necessary. The American shoe styles, copied from the Europeans are a blot on common sense and are a disgrace to so-called civilization. Many women have their little Toes amputated to push the foot in a tiny shoe!

Most Eye Drops have Atropine or Belladonna, which dilates the pupil. Do not permit it. Wash the Eyes with plain warm water.

Stye is an Inflammation of one or more of the Sebaceous Glands of the Eyelids. Refer to Inflammation 31, Chapter 56, page 539, Spectro-Chrome Metry Encyclopaedia.

Area 11 becomes inflamed in certain Disorders like Mumps.

Spectro-Chrome Metry and other Systems of Healing can not go together. Do not mix them without the approval of your Council being asked.

Request the Affiliates to secure a Set each of Spectro-Chrome Metry Encyclopaedia and study. Sunstroke is fully covered therein. They want their intellectual banquet ready digested and will not tax their own faculties!

When in doubt, irradiate Magenta. Soon you will learn to differentiate Purple, Magenta and Scarlet.

Sun Tan is a silly custom made into a racket. All in India get it free, but, they are not all healthy. We were not intended to look like boiled lobsters!

The attitude of the American housewife towards the Sun is nothing short of idiotic. In the Winter, when there is less Sun, she goes out in undress and freezes and in Summer she pulls down the house shades, so her carpets and floor rugs (rags) may not fade; never mind if the cheeks of her children fade! Then she goes out and buys her beauty from a Drug Store and smells like a muskrat and eats Vitamins from A to Z and back to restore losing health. I say to you all openly, follow the principles of Spectro-Chrome. Lead a natural life and think, speak, act and live clean.

Four Tonations a day are foolish waste of Electricity. Do not try to force Nature's periodic schedules.

Well, although your Enrollment was insufficient, I am coming to meet you anyhow. It will prove to you once for all the reason, why I go elsewhere than to your city!

An Organization must have constant Enrollment to live and flourish and the Enrollees should stay put.

Expulsion Of An Affiliate

Vera McInnes, of Chickasaw, Alabama, sent her Check for payment of 1942 Dues. When the Favorscope and Affiliation Card were mailed, she refused to receive the registered package and stopped payment on the Check. Notwithstanding requests, she refused to honor the obligation. She was charged with Violation of By-Law 84, Section 4 and expelled finally under By-Law 59.

All service in Spectro-Chrome Metry is denied to her.

FIRST CHICAGO ILLINOIS PLANET (HOTEL ATLANTIC, CHICAGO, ILLINOIS) Meeting Of Thursday, June 4, 1942

Successful Use Of Spectro-Chrome In:—Low Blood Pressure Constipation, Rheumatism, Dog Disorder.

Reported By:—ELSIE BEYER, Recorder

Deputy Wilhelm Weissenbacher was in the chair. Sub-Deputy Elizabeth Zavadiil was unable to be present.

The communication from the Principal Office was read by Oscar K. who also read the By-Laws from 61 to 64.

The Recorder read from Spectro-Chrome Home Guide, on "Rational Food Of Man." Henry S. said he is feeling much stronger since he is eating according to the Rational Food Of Man.

Chapter 39, from Spectro-Chrome Metry Encyclopaedia, on "Hokum Of Medicine," was read by Oscar K. The Deputy showed the illustrations of Anna Schoener, the child paralyzed from birth and Grace Shirlow, the burnt girl. Spectro-Chrome restored both of those cases pronounced hopeless to normalcy. The Affiliates examined the 3 Volumes.

The Deputy asked each Affiliate to enroll another. He read a news-

paper article in which a Professor wrote that Human Beings could live 150 years, if they ate the proper food.

Some Affiliates are confused about the Favorscope Time, whether they should add 1 Hour or not.

Case Reports followed:—

1. Wife of Henry S. was under medical care for years. Medical Doctors thought she might have a Tumor or Cancer. A year ago, she was operated on the Gall Bladder; was always troubled with Constipation and was in the Hospital 10 days. Became worse, Stomach swelled, Pus developed inside, so had to operate on her again. Was fed through the Veins and was in severe Pain. Was in the Hospital another 4 weeks. When she came, had Injections, but, nothing seemed to help her for Constipation. One day, she fainted; had Low Blood Pressure and was taken back to Hospital, but, did not improve. Heard of Spectro-Chrome through our Deputy and Henry S. enrolled as Benefit Student. After using Spectro-Chrome 3 or 4 times, the results were miraculous. For the first time, Bowels moved regularly and she felt fine. The wife is very thankful he had a Spectro-Chrome for his Rheumatism. He could not raise his Arm properly. Now it is well.

3. The Dog of Henry S. had a bad Bite. He irradiated Turquoise and Yellow with good results.

4. Alysia F. took Atcowa Yellow and Lemon for Imbackelim with good results. Since using Spectro-Chrome, she has had no more Colds or Coughs.

EDITORIAL

REMARKS

As your Planet is now active, Affiliates are requested to take the opportunity of attending the Meetings and gradually building it to greater efficiency. We are right with you to do whatever you may wish or need in our line of activity. Add 1 Hour to the Favorscope Time.

Championship Of Spectro-Chrome Metry.

By:—ETHEL SCHOTT (16), Educational Student, Milwaukee, Wisconsin

Dinshah Spectro-Chrome Institute
Malaga, New Jersey

Dear Sirs,

With great appreciation I wish to thank Colonel Dinshah again for the honor he bestowed upon me at the Twenty-second Annual Convention, at the Milwaukee Auditorium, by offering me the scholarship of a Normalator course and also presenting me with a set of "Spectro-Chrome Metry Encyclopaedia."

In the following paragraphs I am telling the high lights of what transpired in my former school, pertaining to the introduction of Spectro-

Chrome by way of my Career Book.

Before I was to graduate from Junior High School, I had to make a Career Book for my citizenship teacher, as all citizenship students were required to do. I chose my career as a Spectro-Chrome Normalator, though before this time I had thought of being a nurse, because when I was a little girl I always wanted to help those I thought were sick or injured in some way.

In March 1938, my father obtained a Spectro-Chrome Equipment because of a cataract forming in his left eye. The result, after using Spectro-Chrome, was that the cataract was arrested from further growth, thus making an operation unnecessary. In addition, Spectro-Chrome normalated burns, sprained ankle, heart disorder, ear disorder, grippe, sore throat, head and chest colds, severe injury to hand, and minor injuries in our family of five. This gave me sufficient proof of the value of Spectro-Chrome and also convinced me that this method of healing is far superior to that of the medical profession. It is far more pleasing to lie on a bed in a warm room, relaxed while taking a tonation for one hour per day, than to take medicines and injections or to be taken to a Hospital to be operated on, which are all very unpleasant and even dangerous. In comparison with other methods of healing, Spectro-Chrome is so remarkably simple and agreeable, when proper technique is followed as directed in the "Home Guide," that one who has not yet experienced or witnessed its work, can hardly believe it. That is why I decided to make my career a Spectro-Chrome Normalator.

After our books were corrected by the teacher he questioned me as to what the duties of a Spectro-Chrome Normalator were. I explained this to the class and also that only 600 hours of intensive study would be required on a set of three volumes of the Spectro-Chrome Encyclopaedia before the Final Examination. He also said he would keep my folder for the present for further investigation, because Spectro-Chrome has been practically unheard of in this school. He had never heard of it before and he considered it a worthwhile topic to discuss and for the benefit of the class, as well as for himself, he asked more questions and also let the other students discuss it in general. In one question I was asked, "In what way can Spectro-Chrome benefit a sick person?" In answer to this I said it would restore the person to normal when the proper Attuned Color Waves and prescribed food (Dinshah's Rational Food Of Man) were used as directed in the "Home Guide" and that this will re-establish the proper chemical balance in the body. I mentioned that an Itisometer could be used to indicate chemicals lacking in the body. Each color is capable of producing a number of chemical effects. I also told the importance of taking the tonations on time, in a warm, darkened room, according to the "Favorscope," as this science works in conjunction with the Solar System. I said, in construction of the Slides, that certain kind of glass, imported from Europe, was mathematically graded and then used. At this point I was interrupted by a student, the daughter of a medical doctor, who said that she was going to find out about the originator. Some time before this I had given her my Career Book in which I had an old introductory pamphlet which had the name of the former Distributor on it. I covered this name with a piece of adhesive tape but when the book was returned to me I noticed that it was torn off and was replaced. I knew her father had done it. I also had given her the leaflet bearing the testimonies given in the New York State Supreme Court,

which were published in the newspapers of Buffalo, New York. I told her to write to the New York State Supreme Court, but instead she wrote to the American Medical Association. In answer to her letter she received a circular letter that she read to the class. This turned a number of the class against Spectro-Chrome and its originator, because when summed up it stated somewhat the following: His picture which shows him in an army uniform, and his title of Colonel were to give people a good impression. It also stated that he associated with a very dishonest man, and was in prison many times. There was a number of other things mentioned to discredit Dinshah and Spectro-Chrome Metry.

Four more such periods of discussion followed. In one of these a boy in the class got up, when I asked him and repeated the same thing he told me outside of class. He said that his aunt's condition of asthma of long standing, was normalated by her Spectro-Chrome equipment.

The next day the medical doctor's daughter approached me in the hall, again denouncing Spectro-Chrome. In answer to her remarks I said that Dinshah's Spectro-Chrome Institute has innumerable cases of testimonies from the affiliates and others who benefited by the use of Spectro-Chrome. To this she replied that the testimonies were bought just like people who are paid for saying they like a certain soap because it is better for some reason. I then said this was not true and for further information she could obtain copies of Dinshah's trials from the New York State Supreme Court in Buffalo, New York. She said she was satisfied with the information she received from the A. M. A.

After these discussions in the class, my book was returned to me with a mark of 95. He suggested that I leave my book with him so that he could give it to the school librarian for further reference, as they have no information whatsoever on the science of Spectro-Chrome. I said I wanted to keep it because I did not want it lost or destroyed after I had put so much work into it. The librarian was also very much interested in it. She asked me to tell her about it. I did and I also gave her other information besides my Career Book. She told the vice-principal of the school about it and I presume several others.

Sincerely yours,

ETHEL SCHOTT

P.S. Colonel Dinshah:—This is in regard to your offer of coming to Milwaukee for an educational lecture on Spectro-Chrome to a group of twenty teachers, or possibly the entire school. I shall meet my former citizenship teacher and principal this week to try to make arrangements for a meeting in the school auditorium if permission is granted so that sometime in the near future I shall be able to tell you of its possibilities, number of people expected to attend, et cetera. Will you kindly give me a letter of introduction stating what you would speak on and the amount of time required? Your kind offer is very much appreciated and I shall endeavor to work at my top most ability to fulfill my promise to help introduce Spectro-Chrome.

Sincerely yours,

ETHEL SCHOTT
