DINSHAH P. GHADIALI, Editor and Publisher

**FIRST CLEVELAND OHIO PLANET**

(CARNEGIE HALL, 1220 HURON ROAD)

**Meeting Of Thursday, February 3, 1944****Successful Use Of Spectro-Chrome In:—Fatigue, Knee Disorder, Sore Throat, Tumor, Cough***Reported By:—EDITH REES, Recorder pro tem.*

Deputy George J. Brown was in the chair; 16 Affiliates were present. The Meeting opened by the reading of the Affirmation by the Deputy.

A letter from the Principal Office was read. One copy of "Key To Radiant Health" was handed by the Deputy to each Affiliate. He read the article on "Rationality In Dietetics" beginning on page 510 of Volume 1 of the bound magazines. Man is not carnivorous.

Question was asked how to find the correct time for Tonations in this territory. John Winchester gave the instructions.

The Deputy explained the reason for the Correction. Henry Scheidel asked if there were any benefit if the Tonation be started late. Discussion followed. The opinion was that one may get some benefit, but not as much or accurate as though the Tonation had begun on time.

Inquiry was made if Dinshah would circulate a list of former active Graduates and Affiliates so the Planet may try to make them active again.

Carl Schmid reported that he had used Spectro-Chrome for two years. Before using it, he was tired every day when he went home.

Fred Osborne asked how to tonate water on the Knee. Hedwig Klauss told of her experience with her husband. Turquoise was used first for the Swelling and then Orange Local and Lemon Systemic.

Norma Schmid told of her experience with a bad Sore Throat. Used Turquoise and before the first Tonation was over her Throat was better. Another Turquoise Tonation cleared it.

Joseph Tarantino related the experiences of his two brothers, one with a broken Cartilage and Disorder in Knee and the other with a Tumor on the side of a Knee. Spectro-Chrome helped both and they still have the use of their Legs. Amputation was not necessary.

The Deputy reported how Spectro-Chrome removed his bad Cough after Bronchial Pneumonia. Yellow Local and Lemon Systemic were used.

It was a small Meeting but a very enthusiastic one. The Affiliates stated they enjoyed the Meeting and by unanimous vote it was decided to begin the study of Volume 1 of Spectro-Chrome Metry Encyclopaedia at the next Meeting, the aim being to maintain the Educational Program on matters of Spectro-Chrome Metry as a Healing Science.

EDITORIAL

REMARKS

The correct Favor Time for any Locality may be found by adding 1 Hour for War time to the Favorscope Time and adding or subtracting the Minutes indicated for the particular month for one's State. For Ohio, there are two distinct Corrections, because, some parts keep Eastern Standard Time and others Central Standard Time. The Favorscope is all built on the Eastern Standard Time. A little study will amply repay.

Spectro-Chrome Metry, as the Science Of Automatic Precision, does not aim merely at hit-or-miss flukes, but, goes straight to 100 per cent. efficiency. Of course, *some benefit* may be realized or otherwise, but, to use the Science thus haphazard would eventually degrade it and reduce it to the level of Medical Empirics. The Originator placed at your service all that is the best in Healing Science and he can not *dictate* what you MUST or MUST NOT do. The results will depend on one's fulfilling the Technique and the instructions.

Lists of Affiliates can not be collected by anybody. Refer to By-Law 101, "Tattlers." The Council Of Trustees attends to such matters as suggested by you.

Instead of talking of Disorders by names, let Affiliates bring in complete Charts for discussion. We have no special "Vaccines and Serums" for special names.

Wish you all progress and success.

---

## FIRST CHICAGO ILLINOIS PLANET

(HOTEL ATLANTIC, 316 SOUTH CLARK STREET)

Meeting Of Thursday, February 3, 1944

Successful Use Of Spectro-Chrome In:—Scratch, Rash

*Reported By:—ELSIE BEYER, Recorder pro tem.*

Deputy Wilhelm Weissenbacher was in the chair; 22 Affiliates were present.

Henry Schilpp appointed as Sub-Deputy was affirmed under By-Law 6. Communication from the Principal Office was read.

Three new Affiliates were introduced. From Spectro-Chrome Home Guide, a "Message From Dinshah To You" was read by the Recorder and the Chapter of "Fundamental Principles." Carl A. Rall read from Spectro-Chrome Metry Encyclopaedia, Chapter 4, "Tests Of Truth."

Discussions followed.

Joseph Janik asked if one can take 30 minutes Front Tonation and 30 minutes Back Tonation.

The Deputy said one full hour must be taken for 1 Tonation on either side as indicated. That Affiliate also asked if a person can take a Tonation right after a meal. The Deputy suggested to wait about 2 hours before taking a Tonation and also to wait at least a half hour before going in the Sunlight. He reminded the Affiliates to start their Tonations on the correct Favor time, as it is very important.

Kathe Hoch asked how to apply the Attuned Color Waves and how far to set the Spectro-Chrome away for Tonation. It was explained by the Deputy and also that the room should be darkened.

Pauline Schilpp was in doubt if one can take Tonations on the High and Low Critical Days. The Deputy said by all means; only during an Eclipse one should not take any Tonation or eat.

Henry Schilpp had a Scratch on Arm in the woods. Began to swell, itch and a Rash appeared. He thinks it is Poison Ivy or Poison Oak. Did not apply Spectro-Chrome immediately. Began to hurt him and then after 5 days he started with Spectro-Chrome Lemon Wave, then Tur-

quise and the Itch declined and now he is getting good benefit out of the use of Attuned Color Wave. He is well satisfied so far.

EDITORIAL

REMARKS

Do not split Tonations; each is 1 Hour.

Do not tonate right after a meal; only in Disorders of Area 8, for certain cases Tonation after a meal may be advisable. In most cases however, such procedure is not advocated.

All Affiliates will profit by carefully studying Spectro-Chrome Home Guide. The Tonation Chamber need not be photographically dark, but, as much dark as would be by pulling the window blinds and no other Light should be shining directly on the Areas under Irradiation.

Tonations have no relation with the High and Low Critical Periods. They are only the New Moon (Conjunction) and Full Moon (Opposition) positions, when the Crisis of a Disorder is likely to appear. As the Water Tides are produced by the Solar, Lunar, Terrestrial, Radiant, Gravitational Influence, our Blood Tides exhibit similar Rises and Falls, as are easily demonstrable by means of Dinshah's Sympathometer. During Eclipse Period, there is always a Sympathetic Disturbance, because of the Occultation of Radiant Energy, hence, Tonations to restore the activities of the Vital Processes are contra-indicated. Spectro-Chrome Metry has more and deeper Science within it, than all the medical tomes in the libraries. At the proper time, Spectro-Chrome will receive its merited recognition.

## FIRST PORTLAND OREGON PLANET

(MASONIC TEMPLE, 1119 SOUTH WEST PARK AVENUE)

Meeting Of Thursday, February 3, 1944

*Reported By:*—LEWIS BISCHOFF, *Recorder*

Deputy Stanley Burroughs was in the chair; 8 Affiliates were present.

A letter from the Principal Office was read. Everyone is hoping that the Fraud Order be soon revoked.

An article was read from a recent issue of a periodical. It told how Urine and filth of all sorts had been used and is still used in so-called Medical Science. The basis of Vaccination and inoculation is filth from the living and dead bodies of animals and Human Beings. It is truly outrageous the criminal things that the Law not only allows the medics to do, but even attempts to force the people to allow done to them in the name of modern Science. The public is educated that the medical profession can do no wrong and that one should do exactly as told to do and believe everything they are told, no matter whether it sounds right or not. The public is not supposed to think as far as Health and sickness is concerned. The Medical Doctors are supposed to do the thinking for everyone.

The best advice on Health that anyone can offer is to stay away from

the Doctors. The Deputy told of a recent case. He was asked to come to see a Sufferer. The Sufferer had been treated for Arthritis and Diabetes and had had an Operation for Goiter. She had been given the works by the medics. They had tried everything on her that only Satan could have devised. The result was that she kept becoming worse and worse until in desperation she finally called on Spectro-Chrome. The only thing that had done her any good so far was lying out in the Sun every day for about 2 months. The Deputy decided to have her go on the Rational Food Of Man for a week. The Diet cleaned her out and then Tonations were started. She is improving.

The rest of the evening was taken up with further lessons on how to keep in perfect health by keeping the mind and body clean at all times.

EDITORIAL

REMARKS

It is respectfully suggested that the Educational Program be restricted to our own text books and Science and less on outside periodicals. It is well known to our Affiliates that we are opposed to the orthodox Healing Systems; our aim is centered in Spectro-Chrome and you will do genuine service if you follow our text books and discuss from them various points for enlightenment.

---

### FIRST MERRILL WISCONSIN PLANET

(HOTEL BADGER, MERRILL, WISCONSIN)

Meeting Of Thursday, February 3, 1944

**Successful Use Of Spectro-Chrome In:—Cold, Sores, Acne, Blackheads,  
Skin Disorder, Boils, Abscesses**

*Reported By:—DOROTHY DENNE NELSON, Recorder*

Deputy Walter Briese was in the chair; 20 Affiliates were present.

Communication from Principal Office was read. Leaflet on "Rational Food Of Man" was passed around among the Affiliates for their inspection. They decided to order 100 of these and pass them around among their friends.

The Deputy read the list of books now available.

Emil Erben said of the "Family Health Protector," "I believe it is a very fine book; it is really a complete education on Health, if anyone wants to know the true facts. It is easy reading and does not take long to read it. I do not believe anybody could find fault with it. Nobody has been able to deny the facts that Colonel Dinshah sets forth." The Deputy said, "My wife read an article about the Sun that was quite astonishing."

The remaining pages of the Fraud Order Brief were read by the Recorder, at the request of a majority of the Affiliates.

The Educational Program followed and the Deputy read the Chap-

ter "Spectro-Chrome In Skin Disorders" from Spectro-Chrome Metry Encyclopaedia. Discussion followed.

Question was raised by an Affiliate about the Favorscope.

Edward Katke said when he takes the Green Color Wave and it strikes the top of Area 1, it seems like something is pressing down on his Head, and he gets a severe Headache. He tried it a couple of times and the results were the same each time. Can you give us an explanation?

Gertrude Parshall said she was asked to come into a home and explain about Spectro-Chrome. Man was suffering with Sciatic Rheumatism and had been taking treatments from a Chiropractor. He asked, "If I go to Lydia Danner will it 'cure' me?" She said, "I can say, 'yes and no' to you. So many things have to be taken into consideration. If you are willing to stop using any Intoxicating Liquor, Tobacco, abstain from Meat, then may you get relief. You may get a little relief without doing these things, but you will never be normalated unless you do. Now, I think he is taking Tonations."

The Deputy introduced Spectro-Chrome in a relative's home in another city in Wisconsin and they think there is nothing like it. "I came to my brother-in-law's home in the same city. They know Spectro-Chrome is good, because there are 3 or 4 in our relation. My brother-in-law was smoking a cigarette. I said when he was talking of using Spectro-Chrome, 'What are you going to do about that (cigarette)? That and Spectro-Chrome do not mix; as long as you use that do not think of using Spectro-Chrome.' He has not come to the point in life yet, when he will give up cigarettes for Spectro-Chrome."

The Deputy read Chapter 97, on "Boil, Abscess, Furuncle, Carbuncle."

Emil Erben read from Family Health Protector, on "Medical Humbug Of Common Cold." Everyone enjoyed hearing this enlightening article.

Case Reports followed:—

Edward Katke suffered with a Cold. "I felt tough in the daytime, but in the evening I was miserable. Used Turquoise and finished with Lemon and Magenta. Slept like 'nobody's business' that night."

Gertrude P. spoke about her daughter. She had Sores, Acne, Blackheads on Area 1. Picked on them. Green and Lemon Systemic used. Feels much better.

Albert H. Will said: "I am getting along fine."

Anna S. spoke about her daughter D. "Several years ago, D. had a Skin Disorder. All the new babies in the Hospital had it too. Her face was all Sores. Used the Green and Turquoise and she was successfully normalated."

B. spoke of his daughter B. "Whenever she would have a Cold, she would get Boils, but, after we started using Spectro-Chrome she never had any Boils."

Dorothy N. said, "I was subject to Boils and nearly every Winter would have Boils and Abscesses in and around my Ears. X-Ray treatments were given for about nine days and then was taken to the Hospital where the Surgeons opened them, after administering gas as an anesthetic. After Emil B. and his wife finally induced us to use Spectro-Chrome, I went to Lydia D. with a very inflamed Ear. After a few Orange Tonations, followed by Lemon Systemic, the Ear was normalated, without the severe suffering I had when I went to the Hospital for X-Ray treatments. From that time on we were sold on Spectro-Chrome."

EDITORIAL

REMARKS

There is no "collective contributing" permitted in a Planet, as under By-Law 39, Section 4, "Planets shall NOT collect, handle or receive any money for any purpose." Any Affiliate may contribute DIRECT to the Institute and get the distributive literature, but, it must be distributed FREE AND WITHOUT ANY CHARGE. Any SALE is a Serious Violation. Your Recorder has those leaflets, but, they are subject to the stated Rule. There can be no deviation. Thank you.

The question about the Favorscope can not be explained openly in short. It is a study in itself and will be explained at the Annual Convention if you attend.

Edward Katke never sent for any Free Guidance. That is what he should have. Headache on top has no meaning in our Science. It is probable he needs Yellow on Areas 6-7-8-9-10 prior to taking Green or the Ratio needs correction.

Let Smokers and Boozers alone. No use trying to argue with people of set views. Those who are ready for the Message will come to us; we do not have to go begging for patronage or support. We are able to hold our ground permanently against any and all.

Boils and their kin are exits to the inside lava; Medical Doctors can never overcome them, because they have nothing to alter Blood Chemistry.

### FIRST DETROIT MICHIGAN PLANET

(HOTEL TULLER, PARK, BAGLEY AND ADAMS)

Meeting Of Thursday, February 3, 1944

**Successful Use Of Spectro-Chrome In:—Sore Throat, Influenza, Fever, Injury, Swelling, Cold, Prostate Disorder**

*Reported By:—CARMELA FORZANO, Recorder*

Deputy Charles J. Renn was in the chair; 83 Affiliates were present. Communication from the Principal Office was read; also the leaflet "Rational Food Of Man."

Case Reports followed:—

1. Rosetta B.—I suffered from a Sore Throat for the past 17 years. My family Doctor told me it was a Stereptococcus Throat and that a time would come when I would choke to death from it. However, with three Local Tonations of Spectro-Chrome on Area 2, first Yellow, second Magenta and the third Yellow, I certainly feel I was normalat as it has been 10 months since I had a Sore Throat. Many thanks to Spectro-Chrome.

2. Ursula P. reported they all had Influenza. Daughter had a very high Fever, but, with 4 Tonations, Temperature went down to normal and Cough reduced. Used Blue, Turquoise and Lemon. She reported using Green and Lemon on a Chest Injury.

3. Carl W.—Bumped his Knee while at work. Used Turquoise several times and Swelling went down.

4. Frank O. reported a Cold. Took Turquoise and Lemon Atcowa for 3 days and was normal.

5. Leta B. reported her young daughter becomes worse during Critical Periods. Has a Kardoscil of 152, Spiroscil 68 and gets panting for breath—has used Indigo and then Yellow.

6. Grace S. said her husband suffered through a previous Eclipse so now watches for Eclipse and does not eat during that time. The question was asked if an Eclipse would have any effect if a Tonation were taken during that period.

7. Sylvia G. said she took Turquoise Systemic and then one Magenta and then checked her Kardoscil and Spiroscil and it was 76 and 14. She would like to know if she should have taken Lemon. Since all other questions in a chart should be considered, it was difficult to say whether or not she should have taken Lemon.

8. Walter H. reported he had a Disorder in Prostate Gland region (around November 4, 1943), which almost completely paralyzed the right side. Used Lemon Atcowa and within 2 weeks could get up and down very well; also used Blue on back and Magenta on Area 4 and Lemon systemic. Is able to move around very well now.

The Deputy read By-Law 71 on "Duplicates" and 72 on "Exercises." Norma Fiedler was then asked to explain and demonstrate how to take Kardoscil and Spiroscil.

The Deputy explained about Ratio and the Breathing.

Jessie E. Ness spoke on the Breathing. She said it is the key to what is going on in the Human Body. Nervousness plays an important part in the Body, also thinking. If we think beneficial thoughts our body will be attuned to them; 2/3 depends on our mental attitude. She did not think our Organization would trouble with a Chart if it were not of value. She promised to read a poem her late husband wrote about the "Dog Box." She said these Equipments work because of their therapeutic value and not because of the shape of the box. Men and women today have a choice gift given to them in Spectro-Chrome. Said she: "God bless you all and may you use it as it should be used."

The Deputy requested each and every one to learn more about Spectro-Chrome, "Learn what Spectro-Chrome will do for you and to be honest with self."

Questions were asked about the Bulb in the Equipment and answered.

The Deputy read "Tobacco Smoking An Unmitigated Curse," from Dinshah's "Family Health Protector." Leta Berkau said her mother used to recite:—

Tobacco is an evil weed  
And from the Devil doth proceed,  
It soils the mouth and stains  
The clothes and makes a monkey  
Out of the nose.

**FIRST NEW YORK NEW YORK PLANET**  
(HOTEL McALPIN, BROADWAY AT 34TH STREET)

**Meeting Of Thursday, February 3, 1944**

**Successful Use Of Spectro-Chrome In:—Burn, Pain, Swelling, Bump, Numb-  
ness, Sprain, Female Disorder, Dog Disorder, Hemorrhage, Headache,  
Dizziness, Gastritis, Ovelim Disorder, Accident, Nose Disorder,  
Throat Disorder, Wound, Bleeding, Balance Disturbance,  
Pneumonia, Arthritis, Blood Disorder, Neck Crick,  
Bradycardia, Ear Disorder**

*Reported By:—ANNA LONG, Recorder*

Deputy Lina Fischer was in the chair; 79 Affiliates were present. She expressed her thoughts with these words:—

“I thank you most sincerely  
For the honor bestowed on me,  
And hope to come up to your expectation  
To be the Deputy you want me to be.”

It was delightful to see such a large attendance. Three persons were denied admission, because they had no 1944 Cards. One stranger wanted “to buy a ticket” and was told that it was a closed meeting for Affiliates only.

A “Good Thought” for February 3rd titled “Grace” was read by the Deputy.

**GRACE**

Where can be found a being, so selfless  
And sweet, so lovely and loving, full of Grace?  
Where can be found another Grace, so charming  
And cheerful, so thoughtful and thirsty  
For the hungers of my heart? Where can be  
Found a soul, so clean and conscientious, so high  
And humble, sacrificial, spirited, so pretty  
And potent, as the Grace I have as mine?  
He who has  
Grace for his mate,  
Has to thank  
His supreme Karmic fate.

Lina remarked that it was dedicated by Dinshah to his beloved wife Irene Grace who so efficiently works with him. The poem was absorbed with keen attention by the audience and a round of applause followed for our Secretary Irene Grace Dinshah.

The communication from our President Dinshah was then read by the Deputy who explained as she proceeded.

Many seemed to have trouble with their Railway Express Offices. The Deputy offered to help any who had trouble in that respect. She again stressed how to send Charts and the like by the Railway Express Agency and showed a sample of the envelope form 6034. To make everyone remember the number she requested the affiliates to repeat the number 6034 twice. Students were again reminded not to be impatient, but to co-operate fully with the Institute especially during this critical period.

Case Reports were called and Frank Cassano a Spectro-Chrome Normalator for 8 years came to the platform. He reported the first five cases.

(1) Daughter, age 7, was celebrating the 4th of July, when she was burnt in eye by a firecracker. Eye puffed out, became swollen, Blister formed. Child writhed with Pain. Party of about 20-30 people cried "call a Doctor! Call a Doctor!" She was put under Spectro-Chrome. Frank Cassano being then new in the Science of Spectro-Chrome, was really frightened. He kept hearing the whispers, "Get a Doctor." Atcowa Blue was used. In 15 minutes, Swelling disappeared; in 30 minutes Blister disappeared. After 1 hour, the child came out and saw the rest of the fireworks. Frank Cassano stressed that when any Disorder is caught right away, Spectro-Chrome will help immediately, like a miracle.

(2) John O., male, age 51, had weak Heart, Bronchitis, Stomach Ulcers. Kardoscil 66, Spiroskil 14. Backelim 1 a day, Frontelim 7 a day. Atcowa Lemon Systemic was used for 1 week. Kardoscil 80, Spiroskil 18. Backelim twice a day, Frontelim 7. Healed Heart in 2 months. Lemon Systemic Front and Back, Magenta Areas 4 and 18 was used for two weeks. Then Orange Systemic Front and Back. Kardoscil 88, Spiroskil 18. Bronchitis improved, Ulcers disappeared.

(3) Tony S., boy, age 4. Mother was canning tomatoes when he fell into the hot water; 1/5 of body was burned. He was more dead than alive. Could not sleep for 3 days. Atcowa Blue was given. After 1 hour, the little fellow said, "Mister, don't take that moving picture machine away!" Blue was continued; later, Turquoise Systemic and Magenta on Areas 4 and 18. Normalated in 5 weeks with the Skin actually "breathing" again.

(4) Geon M., boy, age 12, Skated on pond. Came home with Bump on Head and right Foot was clubbed under and benumbed. Kardoscil 90, Spiroskil 20. Backelim 1 a day, Frontelim 5. Turquoise Systemic and Magenta Area 4 was used for 2 days. Later Lemon Systemic and Magenta Area 4. After 1 week went back to school. Foot was normalated after first Tonation. Parents had feared it was Infantile Paralysis.

(5) John S., male, age 29, 75% blind. Could only read when holding book right to face. Kardoscil 72, Spiroskil 18. Backelim 3 times in 1 week. Frontelim 5 a day. First Frank Cassano had to see that Bowels moved correctly, then the Heart and Lungs. He remarked that those terms were not used in the Science of Spectro-Chrome. He just used them here so that the new students would understand better. He stressed that the Ratio must be 5 to 1 or 4 to 1 before any further Normalation can be expected. Yellow Systemic was used for 2 weeks. Boy began to improve and could read at a distance. Tonations were given for 2 months. Sufferer thought it was too much trouble and gave up although the services were given free. He was too busy, his mind was only on the girl friend.

Frank Cassano concluded that he was very much frightened upon coming up to speak, but said the next time he would not be that way. The Deputy added that she herself was nervous at first, as this was her first time she presided at any Meeting. With that the tension in the audience also relaxed and there was an enthusiastic applause.

(6) Lina Fischer reported her own case of Sprained Ankle going down stairs. Blood rushed to injured area internally. Started to swell immediately. Had to be carried home. Atcowa Indigo local was applied. After 20 minutes everything was receding. After 1 hour the Pain disappeared. Three days later, she was able to go to work again.

(7) Leonina De M. reported her own case. Shook wax and turpentine together which caused explosion. (?) Arm was burnt, kitchen was on fire. Did not lose presence of mind but extinguished fire. Flames were out and so was Leonina. Unfortunately, she was taken to the Hospital where Tannic Acid was applied to the burnt Area 14. It was a third degree Burn. Left the Hospital and used Atcowa Blue, then Turquoise. Later Lemon to throw off the thick crust. Only cocoanut oil and tissue paper were used as a dressing. She was soon normal.

Minchen Rossig stated cocoanut oil was not available. Discussion followed. Some stated that pure vegetable or olive oil could be used. An appropriate offering was made by Alfred Meschke. He would try to get several pounds which he would bring to the next Meeting. The Deputy warned however, that it was *not to be sold* during the Meeting.

(8) Louise U. stated her own case. Female Disorder. Had 3 Operations and was to have another. Doctor could not help. Spectro-Chrome was called in. Indigo and Magenta on Area 4 and Yellow were used. Fine now. She also remarked she used Spectro-Chrome on her dog, who was in Pain when passing Frontelim. Atcowa Indigo was used. Dog made a "funny face" and passed 7 stones. (Much laughter.) She then exhibited those stones amidst more laughter. The Deputy explained that Human Beings have had similar good results.

(9) Lina Fischer then reported a case. Female Disorder. Hemorrhage, Headache, Dizziness. Medical Doctor had said an Operation was necessary. She thought if Louise U. was helped after 3 Operations, it would surely help her. Went 100% on the Rational Food Of Man. Indigo, Yellow, Orange and Magenta on Area 4 were used. Menstruated regularly. After 3 months, had Hemorrhage again and large lumps passed. Sleeps well now; never cranky anymore. Was helped 100%.

(10) Frida F. had Gastritis. Could not eat. Medical Doctor could not help. Went down to 90 pounds. After using Spectro-Chrome 5 months, got relief. After 2 years gained 25 pounds and felt fine. Her husband never believed in Spectro-Chrome. One day, he had terrific Stomach Pains. Kept crying, "Give me an Alkasselzer" (laughter). She told him to try Spectro-Chrome. After 10 minutes of Orange, he was asleep and did not awake until the next morning. No more Pain. The Deputy added that more husbands should get Stomach Aches. (Much laughter.)

(11) Lina Fischer reported the case of Mildred G., woman, age 20. Had Ovelim irregularity after birth of baby. 2 weeks ago, she started to bleed profusely. Medical Doctor said Operation was urgent; a Cyst was the cause. Spectro-Chrome was placed in the home. Atcowa Indigo stopped Bleeding after 3 Tonations. Feels fine. Cancellation of Operation was telephoned to the Doctor who could not understand how the Hemorrhage had stopped.

(12) Augusta K. reported her own case. Her Legs were ruined by a Specialist. After he had her money, he told her she was "cured." That was when her trouble really started; could hardly stand the Pain and was almost forced to give up her work. Thankful to the Lord for letting her meet Colonel Dinshah and his Spectro-Chrome. It is her strong conviction that when trouble is worst, God's help is nearest. Heard about Spectro-Chrome and received a few Tonations from a Spectro-Chrome Normalator and then became a Benefit Student. Told family some of things

Spectro-Chrome can do and brother-in-law called it a "Zauberkasten" (Magic box). Her Legs became better and she felt better and people thought her just a little crazier. She told them, "If being 'nuts' makes me happy, then I am glad of it." She caught a Finger in an electric-mixer. Called the Institute for Free Guidance. When Irene Dinshah in her gentle voice asked what was wrong, she was told "The meat was all chopped up!" Employer called Medical Doctor to set Finger (this assistance came under Constructive Surgery). The Doctor was told about Spectro-Chrome. He smiled and said "Go ahead with it, but come to see me tomorrow." He had to promise first he would only look at it. He was surprised the next day. The Nurse said Finger would remain stiff and cause her trouble for some time. Finger normalated remarkably well. It is as good as new. The Doctor who is a man who gives credit where due, said to her, "What-cha-ma-cal-it is wonderful." Her baby had trouble with Nose and Throat. The Doctor advised minor Operation, but Spectro-Chrome normalated it and improved her general condition. Her baby fell against a hot oil stove with her bare back. Burned off about 3 inch square of Skin. After 20 minutes under Blue, the baby was telling her a story. Normalated perfectly. Magenta Area 4, Indigo and Turquoise did it. The baby fell on the bath tub. Gaping wound the size of the mouth. Blue and Magenta Area 4 were used. Put 2 strips of plaster at each end of wound to hold it together. Then put cocoanut oil and tissuepaper over wound itself. Later Indigo and Turquoise normalated it. Very little scar. Her niece fell with head against exhaust pipe in an automobile accident. Blood was streaming down. People suggested removal to Hospital. Spectro-Chrome normalated the case. Father who at first was skeptical about Spectro-Chrome was convinced. Child lost balance often. Green Systemic normalated it. Recently children were ill. The Ratio dangerously low. Brother-in-law called in Doctor for his child. Diagnosed it as Pneumonia. Left prescription which was not filled. Spectro-Chrome was used. Doctor came next day although not expected. He said girl was doing wonderfully! Was asked whether he was coming again. Doctor mumbled and said, "No." Augusta Kech said, "There is nothing else like Spectro-Chrome. Some day there will be one in every home. How happy our Dinshah will be then." She concluded:

"Dear Lord, we thank Thee for Spectro-Chrome  
And Dinshah who labors forever at home;  
Let Thy blessings be on him forevermore  
And please:—Give us a Heart as honest  
And grateful just like his!" (Applause.)

(13) Hermine B. stated her case of Arthritis of 8 years standing. The Deputy remarked how fast and perfectly she walked to the platform and asked if she would demonstrate how she walked before the use of Spectro-Chrome. She did by limping heavily. Kardoscil 63, Spirosil 14. Atcowa Yellow Systemic and Magenta on Area 4 were given. Kardoscil now as high as 87. She stated it took Lina Fischer 3 months to convince her. The Deputy added: "It was a hard nut to crack!" (Laughter.)

(14) Anna L. stated her case. She was a very sick girl a few years ago, with Blood Disorder. No Doctor could help. In bed 5 months. Spectro-Chrome put her on her feet. Turquoise and Lemon Systemic were used and Orange and Magenta on Areas 4 and 18. Dinshah advised marriage. The Deputy remarked that Anna is now happily married. Anna

reported case of her mother, Margarete F., age 48. Crick in Neck. Suffered terrific Pain. Atcowa Orange Systemic was used. Normalated in 10 days.

(15) Martha K. stated her case. Always weak with low Kardoscil and Spiroscil. Finally installed Spectro-Chrome. After 2 months, Kardoscil 72 and Spiroscil 16. Magenta on Area 4 and Lemon Systemic with Yellow on Areas 6, 7, 8, 9 and 10 were used. Feels fine.

(16) Martha L. has her Equipment for 5 years. Son had Abscess in Ear which was running and malodorous. Used Spectro-Chrome a month and running of Ear stopped. Orange Systemic and Lemon on Ear were used. Boy also had dislocated Hip. Went to a Chiropractor. He had a Spectro-Chrome and used it himself. Boy said it was the same they had at home. Chiropractor said, "You have something wonderful at home."

Deputy—Is your family on the Rational Food Of Man?

Martha L.—We started last week. (Much laughter.)

Deputy—I appreciate your honesty.

Martha L.—It is the hardest thing to go on the Rational Food Of Man.

Deputy—It is not hard at all. Just make up your mind and do it. Who wants to make a graveyard out of one's stomach?

As Martha L. was returning to her seat, she mumbled something about "that good cup of Coffee!" The Deputy then stressed the importance of the Rational Food Of Man System. She asked if everyone knew what 7 things to avoid. The audience answered in chorus:—Meat, Fish, Eggs, Tea and Coffee and Tobacco and Alcohol. The Deputy added that one should not forget to omit the "hidden egg" in cakes.

The Deputy asked how many Students made out Affidavits. Only 2 hands went up. She asked how many were normalated and helped with Spectro-Chrome. All hands went up. She remarked that it was just where we are failing Dinshah. It is important to send in Affidavits. We were all helped by Spectro-Chrome, so let us help Colonel Dinshah to win the fight. He needs our support just as we need the support of the Institute. Dinshah and his family work for us day and night. She added that only that day she explained the reading of the Free Guidance Chart to a new Affiliate and discovered that the Chronos (typing time) was 1:48 A. M.

The Deputy then asked for questions. It should come up during the Meeting not afterwards, so all may benefit and learn by it.

Augusta Kech wanted to know in the case of Measles which Atcowa is more beneficial, Orange or Turquoise. Deputy: With Childhood Disorders Fever is present and Turquoise should be used; the Blue takes the Fever down and the Green acts as the Cleanser.

Hildegard Meschke and Muriel Hartman confirmed the uniform results in Measles obtained with Turquoise.

Question—Where could one obtain Raw milk?

Deputy—I am fortunate to get it from the farm.

Martha Keppner—Raw milk could be obtained from the "State Dairies" of New Jersey.

Question—When tired after work what Tonation is advised?

Deputy—Stay within the Infra-Green division.

Question—Could an Educational Student obtain Spectro-Chrome Metry Encyclopaedia?

Deputy—Yes. Everybody should own the Encyclopaedia and eventually complete their Dinshah Spectro-Chrome Library. She added that

the Family Health Protector was the latest addition to the Library. It is an interesting and educational book and is obtainable for the nominal Contribution of 2 Dollars in American Express Money Order.

Frida Feil—I loaned my Spectro-Chrome Home Guide out and now it is lost. How can one obtain another?

Deputy—Never under any circumstances loan that book to anyone. It is only replaced by returning the old one complete, soiled, torn or damaged. Otherwise another Home Guide would cost \$75. You may as well send in enrollment for a new Benefit Studentship.

The Deputy reminded the Affiliates that when introducing Spectro-Chrome one should inform the aspirant of the pending Fraud Order and the willingness to accept the non-metallic War Model. A letter to that effect should accompany every Enrollment. That avoids all false expectations. The War Model does not look nice, but it is not the shell that counts. The Slides give the same effect and results. There may be a possible exchange for the Aluminum Equipment after the War is over.

Someone stated that it was hard to convince people about Spectro-Chrome, especially on the Rational Food problem. The Deputy promised to get the Rational Food Of Man pamphlets for distribution at the next Meeting. She said she spoke to someone the other day from 9 P. M. to 1:30 in the morning. It is up to us to spread the work.

Mary Muller said she was one of those hard cases to convince. Her baby, age 2, was born with Paralysis of Upper Eyelids. They were  $\frac{3}{4}$  closed. Baby had to tilt head to look at mother and father. Yellow on Areas 6, 7, 8, 9, and 10 was used. See improvement. Eye is beginning to open further. Deputy asked that when Normalation is complete, would Mary Muller bring the baby to the Meeting? She promised to do so.

Muriel Hartman—How can one clean the condensers?

Deputy—Unscrew the screws on the Slide-carrier, but do not tamper with the seals.

Someone asked what Scarlet is.

Deputy—Look for it in Spectro-Chrome Home Guide on page 12. When not knowing what Atcowa to use consult the Home Guide. It is your best friend.

Albertine Zimmerman—Is dry cereal considered Rational Food Of Man?

Deputy—Yes.

Martha Keppner—Always hungry in the morning. Asked what to eat.

Deputy—Eat potatoes in any form with your breakfast. They give heat and energy. Do not drink citrus fruit juices with milk.

Linus Schreck explained how to cook potatoes and vegetables that have moisture within themselves. No water was needed if cooked in heavy aluminum pot. He emphasized most people throw away the water and the sink gets the best part of it. He then gave his own case report. Burnt Hand. Skin coming off. Could not sleep. Wife told him to use Spectro-Chrome. Healed after 3 Tonations. He gave a case report (no name of Sufferer was mentioned for personal reason that Sufferer was present although the Deputy asked for the name twice.) Man was in Tuberculosis Hospital. Asked to get out as his fellow inmates were dying. Linus Schreck spoke with mother about Spectro-Chrome. Somehow they got the man out of the Hospital and Spectro-Chrome was used. Orange, Yellow, and Green were irradiated. Is fine now.

Question—Is it necessary to look into the “Light” while Tonation is given? Sometimes one falls asleep.

Deputy—It is good to concentrate and look into the Atcowa, but one should not force oneself to stay awake.

An Affiliate requested name and address of a Spectro-Chrome Normalator when one wants a few Tonations only.

Deputy—I decline to give such information. Some Affiliates may not understand why. I leave this matter upto Colonel Dinshah.

At this time, a request was made by the standing room audience to ask Dinshah for a larger and cooler room for the future Meetings. The Deputy asked if everyone would come to fill a larger room. This was answered with a loud “YES”; The Affiliates were informed that the next Meeting will be held March 2nd and to inquire at the desk in the lobby in which room the Planet will meet.

In general there was an abundant enthusiasm and the Meeting was a success.

For a beginning, your Deputy Lina Fischer and the Planet Commissioners Dea De Martin and Anna Long deserve credit for the efficient manner in which the Meeting was conducted. The Council Of Trustees thanks you for its admirable management.

Any sale of Cocomanut Oil or anything else involving money, is not permitted at any Planet Meeting under our By-Laws. Read By-Law 39, Sections 4 and 5. Any Affiliate having any such thing to offer, may do it outside of the Meeting, at own place of business.

Send those 7 Stones with a story to the Editor.

Our Institute, under its present By-Laws, will not affiliate anyone using any modality outside of Spectro-Chrome Metry.

Coffee is a rank Poison, but of course, one may use a Poison even like Food by force of habit. There are people in Australia who eat Arsenic in quantities to make their Skin white.

Affidavits are voluntary offerings.

About having babies in a Planet Meeting, kindly refer to By-Law 48, Section 9. A baby, as a Sufferer, may be admitted as an “Exhibit,” but, shall not be permitted to stay in during the conduct of the Meeting.

Dinshah Spectro-Chrome Institute does not divulge lists of Spectro-Chrome Normalators, as otherwise complications of partiality and favor are likely to arise.

The Council already secured a larger accommodation for you, The Trustees are glad and ever willing to serve you.

---

### SPECTRO-CHROME SMILES

Viewpoint—Mr. James Watt condensed the steam engine.

Smile—Ja! There was no milk then.

Viewpoint—She had no solid foot for 3 days.

Smile—Because her Blood was liquid.

**FIRST MILWAUKEE WISCONSIN PLANET**

(MILWAUKEE AUDITORIUM, WEST KILBOURNE AND FIFTH)

**Meeting Of Thursday, February 3, 1944****Successful Use Of Spectro-Chrome In:—Pneumonia, Pain, Rectal Abscess, Bronchitis, Skin Disorder, Injury, Rheumatism, Itch, Boils, Accident***Reported By:—EMMA SCHROEDER, Recorder.*

Sub-Deputy Theodore J. Mohrhussen was in charge of registration with Emil Egide assisting. Deputy Frank S. Burns in the chair; 150 Affiliates were present.

The communication from Dinshah was read by the Deputy and questions were called. Ann Mayo who stated last month that she had applied for her Affiliation Card in time, but had not received the Card in time for the January Meeting, reported that it arrived one week after the Meeting and was in a very soiled condition. She believes that it was at the Express Office. Was advised by the Deputy to inquire when it was released from the Principal Office.

Upon request the paragraph on the Rational Food Of Man was again read from the correspondence and several Affiliates were interested in obtaining a few copies (less than 100) of the leaflet. In connection herewith much amusement was caused when Herbert F. Bahr of Madison, Wisconsin, raised his hand for recognition and mentioned his name.

Deputy—I knew a number of Bahrs when I went to school.

Herbert—I knew many after I was out of school. (Much laughter.)

Deputy—That was a different kind of Bahr. I mean family in the neighborhood. (More laughter.) One is now a fireman.

Herbert—And one is now at Waupun. (Still more laughter as Waupun is where the Wisconsin State Prison is located.) Herbert continued: "He is Deputy Warden." (The Recorder thought she detected a sigh of relief.)

Upon questioning by the Deputy none present acknowledged committing any of the errors mentioned in the communication.

Deputy—I am glad to announce that Sub-Deputy Mohrhussen is with us again. (Applause.)

The Sub-Deputy stepped to the platform, as requested and said: "I understand I was well discussed at the last session."

Deputy—Perhaps we overlooked something.

Theodore—I have no after-effects. I am again able to work full time.

Deputy—Tell us, did the Doctor say you would be dead if you were not taken to the Hospital?

Theodore—Words to that effect, yes! Said they could reduce the Fever with Sulfa drugs in 36 hours. If I did not go to the Hospital, he could not say what would happen and he did not say one word against Spectro-Chrome. I did not go into any details about our Science. I told him I believed in the use of "Colored Light" for any Human Disorder. I did not tell him how it worked. He walked up to the Equipment and copied all the information contained on the plate. I did not see him since. He never introduced himself when he entered. He must have gotten a good wet trouser leg, for he upset a glass of water as he left.

Deputy—Did you notice when the change took place?

Theodore—Definitely! The time to use Spectro-Chrome is before the Medical Doctor is called. I did not want to let all you folks down. My

wife is a strong backer of Spectro-Chrome and in fact, she had influenced me to use it. I owe all to my wife and to Kurt Bader for the help I received. To have a man of his size and vitality call! When he walked into the room and took my hand, there was a feeling that here was a true friend and one who was going to help me. The advice he gave me was exactly as taught by Colonel Dinshah, otherwise one might jump from Color to Color. Fever was 105 Degrees. Blue Systemic and Magenta on Area 4 broke the Fever. The advice was to call the Institute and let them take over from that time on. Kurt Bader wanted to be sure that we were receiving the best of help. The Institute advised Yellow and Lemon Systemic, two Tonations a day, because I had no Backelim for four days. Fever was sub-normal after Backelim. At the Low Critical Period, I had a Ratio of two-to-one and had thus plenty of reason to worry. From that time on there was improvement. I lost about 18 pounds within ten days. I regained that in a short time. When I went out for the first time after my illness I visited a farm. The woman invited me to sit down. On a table was a bowlful of Eggs and some bottles of Beer. She knew I had been sick and offered me Beer with raw Eggs to drink. I thanked her saying I had to go. After I was able to move about the house four of my children were stricken with Intestinal Catarrh and had it approximately four or five days. At the time Kurt Bader loaned us one of his Equipments and we had two Equipments going every Tonation hour during the day for myself and children; nothing at night. Now they are tearing around the house; I wish Summer were here so they could be outdoors.

Deputy—Very bad the Doctor was not there.

Theodore—At the shop, I had occasion to take an injured man into the office. "They" smiled, but not a word was mentioned. "They" will not ask me anything about how I became well.

Deputy—I understand a Nurse called at the house?

Theodore—That is right! She called after I had been absent from work a few days. She said: "That man must have medical attention!" I was told I was needed and must become well and that the company will stand all expense. I could not convince them that I could get well *without* medical attention. After that nothing more was said except that the Nurse called occasionally. Spectro-Chrome got a boost. Everybody knows that I did not have a Doctor. They said I was bull-headed. Some called my recovery "Fate" or "Luck." I conversed with Dinshah after I was up and wrote him after that Spectro-Chrome will normalate any Disorder provided the Higher Powers do not deem otherwise. Thank you for your attention! (Applause.)

Deputy—It is another example of an individual having confidence and it is a boost and encouragement for Spectro-Chrome.

Leo Bieneman—About two years ago, I happened to have an experience similar to that of Mohrhussen and had to call Kurt Bader. I felt the same way about Bader as he entered the house. Theodore's remarks about Kurt Bader were borne out in my case throughout. I can certainly vouch for everything he said. (Applause.)

Past Sub-Deputy Kurt W. Bader—I do not deserve all this credit. His wife did not lose her faith or her head. I gave a little advice. I cannot accept all this credit. I had the cooperation of his wife and daughter.

Deputy Burns—You are very modest! I believe your advice and deportment are beneficial in a Disorder. We are glad to find that everyone feels that way about it.

The Deputy read a newspaper obituary from an eastern newspaper containing a biographical sketch of the life of Federal Judge John Boyd Avis who passed away recently. The Deputy expressed the opinion that Judge Avis might have extended his span of life had he used Spectro-Chrome.

A Free Guidance Request which the Deputy found on his table was read and discussed: "Male, age 52, name 'Persistent Smoker,' address: 'Skepticism Avenue'; state: 'Matrimony'; complained of trouble in Area 19. Full History: Questioning disclosed that Sufferer had an Ulcer. Hemorrhoids and Papillae in that Area removed electrically and a Tumor by Surgery ten years ago. In 1928 had a neckful of Carbuncles; two months later, Pleurisy; a month after that Pleural Pneumonia. Albumin present in Frontelim at various times for twenty-five years; first discovered in 1918. Now a Lump developed in Area 19 near orifice. Member of family is Graduate. When in 'Health,' this Sufferer believes he will never have occasion to use Spectro-Chrome. However, when this trouble occurred, after being informed that Tobacco Smoke and Spectro-Chrome do not agree, he refrained from smoking for one day, being alarmed about his condition and on the second day requested Tonation. One Green Front Systemic, one Green Back Systemic, Indigo Local with Magenta on Area 4 were irradiated on two consecutive days and another Green Systemic a few days later and in a total of five Tonations the disorder was completely normalated. One Green and one Indigo Tonation opened the Lump. This condition may not remain normalated as the Sufferer has not reached the stage where he is able to abstain from Flesh Food, Eggs, Tobacco and an occasional bottle of Beer. Drinks no hard Liquor. Spiroskil was very high in commencement. Ratio was  $3\frac{1}{4}$ , Kardoskil 69, Spiroskil 22. Spiroskil improved and Ratio rose to  $4\frac{1}{2}$  while not smoking. Took much Nephritine. Frontelim 7 to 8 daily, Backelim 3 times in one day. Does not live on Rational Food Of Man."

Emil Egide spoke—Inasmuch as Spectro-Chrome helped after he abstained from some of his habits, proves promising but the fact that he had a Tumor also proves that his Body was filled with poison, that his system was not cared for in the right way. Albumin proves he was a heavy Meat-eater. When Kidneys once stop functioning there is not much one can do. He better take it upon himself to eliminate Meat-eating and Smoking entirely.

Deputy—That is something that we recommend to everybody. The Chart shows that the Kidneys are eliminating.

Emil—Yes, but this Sufferer used 'it' only as a temporary measure. The Kidneys are eliminating water, but not the poison. They are overburdened.

Deputy—Yes, there are Toxins in the Elimination.

Emil—Tumor is Nature's effort to cleanse the Body.

Deputy—Has anyone else anything to say in this matter?

Kurt Bader—It is the characteristic build of the average American today—Smoking, Meat-eating and a bottle of Beer. The Sufferer reacted very well under Green. If Green were irradiated for a while, he might dislike Smoking. Tobacco would then taste to him like a "burning sock."

Deputy—Again you are very modest. Dinshah says they are "stinkers."

Kurt Bader—Three movements a day are very good. The Ratio may

be accelerated temporarily, but may become depressed again. Plenty of Green and Lemon may kill the desire for Smoke and Drink. Regarding the leaflets, when I have a new Sufferer I give one. Most of them do not know what Lentils are. They know Peas and Beans but not Lentils.

Emil Egide—About Albumin. Several years ago I had an experience. This man had Albumin and was turned down by the Armed Forces. I knew what he had been eating; too much fried food. I advised him to stop that and eat more citrus fruits. In ten days, he went back for an examination and there was no Albumin.

Robert Schott—Are not vegetables fried in butter O.K.?

Deputy—I believe Egide means foods fried very hard and fried Meats and Eggs or fried in Lard. I like fried foods that come under the Rational Food Of Man very much.

Robert Schott—There is not anything to take the place of butter. Everything else is only secondary.

Deputy—Albumin! I recently got an insurance policy. The examining Doctor was surprised at finding no Albumin present. Said the average man has a trace of it at my age. I got the policy; that is all I was interested in getting!

Past Deputy Otto Lutz—What strikes me is that with an obstruction in Area 19 he should have three Backelims a day. It is a rare co-incident.

Deputy—Reminds me of a case of an acquaintance of mine several years ago. Became sick at work. Was compelled to absent himself from work and was just about ready to "give up the ghost." Was in extreme agony. I suggested Spectro-Chrome. He and the family were willing to do most anything to relieve him. I moved my Equipment over to his house. I tonated him on a Friday morning. I do not recall what Tonations were given. The man was in such extreme Pain and suffering that I used Indigo and Purple. I left the Equipment there with instructions. On Saturday morning, I called back just as the Sufferer was taking a Tonation on Area 19. In his opinion he had a Fistula. There was a mass present and while he was under the Tonation, it opened and he got such relief that he was just like being born over again. Like a new man. But the odor was so terrific, one could not remain in the room. He was also a habitual Smoker. Always had a cigar in his mouth.

Here the Deputy told of another acquaintance who dined at the same table with him. He had no teeth, but was able to finish a thick steak before Burns finished his salad.

Otto Lutz—(Humorously.) That is the way Meat should be eaten—in chunks. Hamburger is no good because it slides through the stomach.

Deputy—The case I mention is a typical replica of the one under discussion. The man went back to his old habits the same as before.

Hydro-Carbons were discussed.

The humor of the audience was aroused when Deputy Burns told of an Irishman who invoked blessings for his wife: "God bless my wife; God bless women—*sometimes*. (Laughter.) It is a good thing to laugh sometimes."

Theodore Mohrhusen—It is the best belly exercise there is.

Chapter 18 of the First Volume of Spectro-Chrome Metry Encyclopaedia, "Pickle Bottles As Medicine" was read by the Deputy.

Relative to paragraph 2 of the Chapter read the Deputy informed the audience, that the use of Spectro-Chrome costs even less than the

consultation fee for a physician in India! Re paragraph 6, Deputy Burns said: "Medicine is purely a hit-or-miss proportion. The opinion of one physician may be the exact opposite from what another may decide.

How utterly disregarding our Affiliates are of Radio Drug and Medicine advertisements was demonstrated when the Deputy endeavored to recall the name of "8-in-1" tablets, "15c," as advertised over the radio. He asked the audience but none remembered the name.

Re: paragraph 11, the Deputy inquired if all knew where this place mentioned is where there is plenty of Sulphur and no Winter. The audience was again pleasantly amused as Kurt Bader replied: "Spain and Italy."

Deputy—Why, in Spain and Italy the American soldiers are fighting up to their necks in mud.

Kurt Bader—But they never have a Winter in the sense of ours.

Deputy—They never had a Winter like we are having right now. Dinshah means Hades—Hell.

Kurt Bader—Well, I saw the picture "Heaven Can Wait" and Hell cannot be such a bad place judging from that. The walls were of marble—just like the lobbies of the big hotels. And now they even have Sulphur down there. (Laughter.)

Deputy—That reminds me of a Scandinavian story. Of course, present company is always excepted. My youngest son told me this one. A Scandinavian took to the bottle and well-nigh made a physical wreck of himself. The family thought he was hopeless and held a consultation. One said: "I have an idea and I believe we can cure Hans of that habit of drinking. I shall dress like the Devil—red suit and horns and at night I shall hide behind a tombstone. When Hans passes through the cemetery on his way home from work, I will jump out and say: 'I am the Devil. Stop drink or I will take you down to Hades with me.' Events transpired as planned. As Hans passed, the "Devil" jumped from behind the tombstone to frighten him. Hans, however, did not recognize the Devil and inquired "Who did you say you are?" "I am the Devil. Stop drinking or I shall take you with me," was the reply. Hans had a difficult time placing the Devil and finally said: "Oh! Now I know who you are. I am glad to meet you. I believe I married one of your sisters." (Laughter.)

Attention again reverted to discussion and all questions at the end of the Chapter were reviewed.

An Affiliate was anxious to know about Croton Oil. Emma S. replied that it is about the most powerful Cathartic as only a drop or so is given at a time but the Affiliate was interested in whether it is a vegetable or a mineral oil. The Deputy promised to obtain the information by the next Meeting.

Theodore Mohrhussen—Does everyone understand the meaning of pickle bottles? I shall guess. They are either Green or possibly of a color on the Ultra side of the Spectrum. The liquid will absorb the Colored Light Waves and if drunk will take the place of a Tonation.

The last fifteen minutes were devoted to Case Reports:

Emil Egide gave the following: "Members of my own family. The early part of December my wife came home from the office. The Company Doctor told her she had Bronchitis. The following morning she was unable to talk. Tonated for that. At the same time, an aunt who lives with us developed Influenza. We also had two Equipments going and what alarmed me was that the Fever in both cases was over 102 Degrees. I used a Thermometer. Would Colonel Dinshah object? Both cases re-

covered in about four days. I was very well pleased with the results. I was very busy getting my breakfast and taking the dog for a walk. The thing that is important is that after the seventh day my wife went back to work. According to the Company policy, a release must be issued before one can come back to work. The Doctor called her upstairs and wanted to know how she got along. "You got over that in a hurry. What did you do?" he asked. It was nothing new to him, as there is a number of Spectro-Chrome Equipments in the Company. Said he: "I will give you this release only because you came to me before you stayed home; nor would you be paid for the time off if you had not come to me." (Applause.)

Emil finds the use of an Equipment costs about three cents an hour. Atcowa used were Green, Turquoise and Purple. Purple on Areas 4 & 18 was used for the aunt who is 69 years old and subject to Hyper-tension. Emil is 100% for Purple; he says it will lessen Pain, reduce Fever and produce rest.

Sarah Erdmann reported the case of her son and found Spectro-Chrome very beneficial. Son awoke "yesterday" morning with 103 Degree Fever and was vomiting; also had Pain in Stomach. Used Turquoise. Continued vomiting. Tonated for an hour and fifteen minutes. Local Tonation on Area 8. Blue Systemic Back caused Perspiration. By evening, Temperature was normal. Intends to tonate Areas 4 and 18. Other similar attacks required a week for recovery. Obtained her Equipment a year ago last July. Uses it daily for Heart Disorder. People wonder how she is able to do the work she does. Son had a bad Throat a year ago. She said "Never again. Hereafter I shall use Spectro-Chrome instead of a Doctor." (Applause.)

Regina Schroeder inquired whether it was necessary to remove the Tonsils. Leo Bieneman suggested Lemon Systemic as the condition is Persistent. Regina's daughter is troubled with the Disorder and is 22 years of age.

Otto Lutz reminded that names be given in Case Reports or they will not be printed and submitted the following reports:

1. Hans Y., aged 52, Male. Skin Disorder on Hands and Arms, Area 14. Front and Back and a few spots on Body. This man thought there was no help for him, because of all the different kinds of methods he used for over two years without results. A friend advised the use of Spectro-Chrome, as he said he was at the end of his rope. Yellow, Orange and Lemon Systemic, Front and Back, normalated his condition.

2. Ruth K., age 8, female. Mother, Erna, brought her in. Mother is aged 47. This girl was kicked on Area 13, left Leg, on school grounds, while playing. Was operated on Area 13 and also deep X-Ray treatments were used, without results. Was advised to have the Leg amputated. Parents were not satisfied with that advice and came for Spectro-Chrome. Attuned Colors were Lemon and Green Systemic, beginning at Area 13 normalated her condition. Is again back at school WITH BOTH LEGS. The parents marvel at the results of Spectro-Chrome.

3. Alfred K., age 33, male. This man went up North deer hunting and when he returned he brought back with him Rheumatism with a terrible Itch. Had been given Sulfa Drug Injections. Was not satisfied; then he thought he would "try" Spectro-Chrome. In a few days, the Itch stopped as well as the Pain and in a few more days he went back to work, normalated. Atcows used were Indigo Systemic, Front and Back.

4. Carl J., age 49, male. Case of Boils; they would disappear and always come back in another Area. Had been taking Injections for about two years; then one day, one started to appear on the tip of his Nose. That was the end of the Injections. He came for Spectro-Chrome. At-tuned Color Wave Yellow Systemic was applied and that was the end of his Boils. Even the one on the tip of the Nose failed to suppurate; it just dried. His wife is now a Benefit Student.

5. William H., age 42, male. Auto mechanic. While working at his trade, he jacked up a car while under it, the jack slipped and the car struck his Back, Area 18. The injury was very painful. Was rushed to a Hospital where he was taped and after a few days was brought home. No Bones were broken. Spectro-Chrome Lemon and Yellow Front and Back removed all discoloration and eased the Pain considerably; then Turquoise was irradiated. Returned to work in two weeks.

Applause followed Otto's report.

It was a pleasure to find so many of our practising Normalators in attendance at this meeting.

EDITORIAL

REMARKS

No matter who gets the credit, we are concerned only in the Normalation of our beloved Affiliate Theodore Mohrhusen. His wife Hilda, Kurt W. Bader and all others, will be thankful to the Higher Powers, Whose Benign Effulgence is the Guardian of Spectro-Chrome.

Radio—at one time, a purveyor of truthful information, is now nothing but a money-making racket. Someday, after the War is over (?), when Dinshah Educational Broadcasting Service is in operation, you will have a unique Station carrying absolutely no advertisements or propaganda, but, delivering genuine public service. Let us have \$100,000.00 and we shall commence the service for the benefit of mankind. All facilities for it are already here. Even General Advice Charts will be answered by Radio and if so convenient, even Atcowas will be transmitted through the Ether. The man who originated Spectro-Chrome Metry, can also perform such service—if let alone to his inventions.

The "Pickle Bottles" stated, were actually Yellow, Green and Indigo bottles of English pickles, which were the media in my first experiments.

Croton Oil is called in the pharmacopoeial bombast Oleum Tiglii. It is a fixed Oil, expressed from the Seeds of Croton Tiglium Linne (Family Euphorbiaceae). It is sensitive to Light and should be kept in well-stoppered vials. Dose I Minim. It is a pale yellow, viscid, slightly fluorescent liquid and great caution must be used in tasting it as it causes a pustular Eruption when applied to the Skin. It is a Drastic Cathartic and even the Medical Doctors have to use it with great caution, because of its irritant attributes.

The use of an Equipment for 1 Tonation, costs in all 10 cents for the hour, including the Electrical Current and the Bulb deterioration. It is a safe, general estimate.

The Dinshah Itisometer is essentially an Electric Thermometer. Whether the Fever be 99 or 107 Degrees, our Science has no different modality. The higher the Temperature, the higher the Kardoscil and that is our guiding beacon.

**FIRST ST. LOUIS MISSOURI PLANET**  
(HOTEL MELBOURNE, GRAND AVENUE AT LINDELL BOULEVARD)  
**Meeting Of February 3, 1944**

**Successful Use Of Spectro-Chrome In:—Cold, Pain, Lumbago**

*Reported By:—VIOLA C. JEUDE, Recorder*

Deputy Clemens M. P. Neumann was in the chair; 45 Affiliates were present.

Communication from the Principal Office was read and explained in detail. He asked if there were any questions in regards to the communication? There was none. He said the educational program tonight dealt with Common Cold, Cough, etc. He read what the Medical Books say about them.

The Deputy said that before the evening was over, the Affiliates would realize the importance of the Kardoscil and Spiroskil, how Spectro-Chrome works and why it works. He asked the Sub-Deputy to read Article 41, "Medical Humbug Of Common Cold," page 78, from "Family Health Protector." This was done.

Robert Boschert said he would like to know the difference between Scarlet and Magenta. It was explained.

The Deputy then illustrated Spectro-Chrome Mathematics.

Konrad Frey said he would like to state that in one thimbleful of dirt it was tested that there are 44 Million known Germs in carpets in homes of rich and poor alike.

Some one suggested the Slogan for the year should be: "I am what I eat."

The Deputy said he wanted to report that he was investigated by a Medical Doctor last week. A man called and said he had heard that he was prescribing Medicine without a License.

He said he told the man there must be some mistake, as they did not believe in Medicine; he called the man's attention to the Sign on his office door "Spectro-Chrome Normalator Not A Doctor."

The man asked how long he was there? He said 5 or 6 years. He then asked for his Business Card. He gave him one. The man shook his head and said he could not understand; wrote on back of Card, "Has Sign On Door Is Not A Doctor." As he was leaving he asked if that was not a Jewish Star on one of the Spectro-Chromes. He said he told him it was not, it was just an emblem.

Case Reports followed:—

1—Katherine S. said her husband had bad Cold; used Scarlet 4-18, Red Systemic and Orange 6-7-8-9-10. 3 Tonations each day for 2 days and he recovered.

2—Robert B. said he ached so he could not move; Spectro-Chrome set him right. He also said he had an attack of Lumbago; has had these attacks for 22 years. They always lasted from 2 to 3 weeks; this one occurred Sunday morning and after 3 Tonations in 24 hours was entirely gone. Orange Systemic was irradiated.

3—Robert B. also reported of girl about 5 years old. The only way she could sleep was by sitting up; after 30 days of Turquoise Systemic and Magenta on Areas 4-18 she now lies in Bed.

The Sub-Deputy said she had an interesting article about Vaccinations. Some may be familiar with it as it is being carried on at present time in the schools. She then read excerpts. "Diagnosis Of Syphilis

Often The Result Of Vaccination" by Cash Asher, page 335 of September 1943 NATURE'S PATH.

"In its slow and painful climb up the high hills of exploration, the medical profession occasionally stumbles upon the truth.

"Confirmation of anti-vaccination statements made years ago by a few medical scientists and influential lay individuals, has been made by the medical corps of the U. S. War Department. A Bulletin sent to all medical officers of the army declares:

**"IT HAS BEEN CLEARLY ESTABLISHED THAT THE USUAL SEROLOGIC TESTS FOR SYPHILIS MAY BE TEMPORARILY POSITIVE AS A RESULT OF VACCINATION FOR SMALLPOX."**

The War Department Bulletin was issued under date of April 30, 1943 and signed by John A. Rogers, Colonel, Medical Corps, Executive Officer.

Interesting information on this subject is also found in a Bulletin issued by the United States Public Health Service in June, 1943. Both of these publications are appended to this story.

In "The Doctor Could Be Wrong," published in 1939, Dr. David H. Reeder, of LaPorte, Indiana made the following statement:

"More than 90 per cent of persons who have been vaccinated will give a syphilitic reaction, even twenty-five years after the vaccine ulcer has healed. For a hundred and twenty-five years we have been inoculating human beings with vaccinal syphilis and I am convinced that much of the tremendous increase in the deaths from cancer may be traced directly to this disease inoculation."

In "The Doctor Could Be Wrong," I quoted Dr. Carter as follows:

"A large proportion of the cases of apparent syphilis, are in reality vaccinal."

Following is the copy of the U. S. War Department's release to all medical officers:

**"WAR DEPARTMENT  
Office of The Surgeon General  
Washington.**

April 30, 1943

**CIRCULAR LETTER NO. 93**

**Subject: False positive serologic reactions due to nonsyphilitic diseases.**

1. It has been clearly established that the usual serologic tests for syphilis may be temporarily positive as a result of diseases other than syphilis. Reports have indicated that false positive reactions among soldiers, though relatively infrequent, are of sufficient importance to warrant consideration in order that the unjustified diagnosis of syphilis may be avoided.

2. Accumulated evidence indicates that most biological false positive reactions will be encountered under the following circumstances:

- a. Vaccination for smallpox within the three preceding months, especially with "take," Etc.

EDITORIAL

REMARKS

**It is strongly recommended that in conducting the Educational Pro-**

gram, time be not spent in reading from medical books and outside publications. It were much better to instil in the minds of the Affiliates knowledge of our Theories, Principles and Practices. Refer them to outside publications, but, let the Planet time be devoted to Spectro-Chrome Metry. In Spectro-Chrome Home Guide, Spectro-Chrome Metry Encyclopaedia and Family Mealth Protector, there is enough to keep one busy for years in discussion and explanation.

Give no haphazard advice to anybody without a complete Sufferer Chart; furthermore, deny such advice where the Sufferer is under the direct Free Guidance of the Institute, otherwise there will be a likelihood of more harm than good. Refer to By-Law 79.

Three Tonations are not needed in one day. Do not try to force issues with Nature. Be patient; let the Auric Vehicle have time to reverse its Emanative Equilibrium.

44 Millions is a small number. That may apply to "known Germs"; the unknown extend to Eternity. Carpets and rugs are prime causes of numerous Disorders. They are Dirt Collectors at best.

Why next year's Slogan? "I am what I eat" should be in the mind of all for all time.

That "visitor" came from the racket known as the "Better Business Bureau." I have full experience of their tactics and it will not be long before they will suffer a complete exposure. Have your audience ready. I have proofs positive of that burrow being a henchman of the Medical Octopus. St. Louis will certainly enjoy seeing the proofs and so will the Affiliates.

---

### DINSHAH LECTURED IN NEW YORK

On Sunday, March 26, 1944 and the two following nights, Dinshah P. Ghadiali addressed crowded audiences in the Hotel McAlpin, in New York, New York. The first two lectures were in the Ball Room, because of the admission of visitors, the last in the Green Room being open solely to our Affiliates. He began each night at 8 P. M. and the enthusiasm invoked in the Science of Spectro-Chrome was such, that the listeners would not leave the Room even after 11 P. M. The Ball Room Lectures were illustrated with the Stereopticon and the approbation of the audience was expressed by frequent rounds of applause and mirth.

### PINK PILLS FOR 18 YEARS

#### Spectro-Chrome Gave Prompt Relief

*By:—Federal Accountant, Detroit, Michigan*

Have been constipated for 18 years, taking Pink Pills. Now condition improved due to Spectro-Chrome. My bowels are beginning to move twice daily, with more ease. To persons who have had no such troubles, this might seem of small consequence, but to me who have taken Pink Pills daily for eighteen years, it is a miracle. I shall remain for ever grateful.

—G. A. C.

The Universe Through The Eyes Of Dinshah

**"I Fear No One; Only God Above And Conscience Below And From Them I Have Nothing To Fear."**—Platform since 1891.

## MR. 'TAIN'TE ON LONG DISTANCE TELEPHONE

Dinshah's Photokinephone and Spectro-Chrome

How the World pilloried pioneers and genuine progressives, is a known story to us. Even after 24 years of incontestible practical, clinical proofs of the value and merits of Spectro-Chrome Metry as an original Science, we are being subjected to derision and ridicule, by persons who never cared to investigate. Of course, such attitude does not in the least affect our heart or temper and the more opposition we receive, the more power does flow toward us from Those Whom we serve. Why not? We are in good company. Look at the tribulations of Alexander Graham Bell! Since he exhibited his Electro-Magnetic Telephone in 1876, many just dreamt of talking to their dear ones at a long distance. Yet, when such a project was proposed, a newspaper in 1885, printed in part the following marvel of scientific logic:—

"Granting that the long-distance telephone will be forthcoming," the article says in part, "it will require an absolutely perfect condition of the elements along the route over which the wires must run; there must be no rain, no fog, no sleet or mist; no moisture in the atmosphere, no electrical storms, and, besides, there must be invented a more perfect system of insulation of the wires where they come in contact with the poles. After all these difficulties have been overcome, there will still remain many reasons why it will not become a success . . . no sir, the coming long-distance telephone will be a plaything, nothing more. Put a mark on the assertion."

What will that newspaper say today, when the World depends on it for its business efficiency? Without Long Distance Telephony, even the Armies of belligerents would be at a stand still.

When The New York Times printed in its issue of Monday, January 18, 1915, the following article, was I razzed about it by others who knew nothing about me or my activities and background!

### **"PATENTS 'TALKING MOVIES'**

**New Invention Dispenses With Use  
Of The Phonograph**

*Special To The New York Times*

HACKENSACK, N. J., Jan. 17—Moving pictures that talk without the aid of a phonograph are the latest device perfected by Dr. Dinshah P. Ghadiali, an inventor, of Hillsdale. All other movie-talkie schemes have relied upon the phonograph, but Dr. Ghadiali claims to have invented a way to do without the talking machine. Eleven of his claims for the invention have been allowed by the Government Patent Office.

The Dinshah Photokinephone Company has filed papers of incorporation here with County Clerk Thompson. It has a capital of \$150,000 and intends to put the new device on the market. Headquarters have been established at Hillsdale and a manufacturing plant is to be built

there. Dr. Ghadiali is a physician and a native of Bombay, India. He has done considerable writing and has several inventions to his credit."

Five months after this, Dinshah was admitted to United States Citizenship and five years later, Spectro-Chrome was born. The Homeopathic Medical Doctors gave it a good ovation as evidenced by the following:—

### SPECTRO-CHROME THERAPY\*

The latest addition to Drugless Methods of Healing is that of the Spectro-Chrome Therapy, the system of diagnosis and treatment of diseases and derangements demonstrated by Dr. Dinshah P. Ghadiali, which, after long study and scientific investigation on his part, has resulted in an almost unbelievable perfection. The results to be obtained through this method makes it of incalculable value to the profession of Drugless Healing, and its employment will add greatly to the reputation and success of those practicing it.

Dr. Dinshah is a Parsee—a Zoroastrian, and a scientist of the widest experience. He was born at Bombay, India, and in earliest childhood exhibited a passion for chemical and electrical research. He was a professor in chemistry at the Wilson College at Bombay when very young, and delivered his first public lecture on electric light when but seventeen years of age. He is an expert in almost every field of scientific research. His activities are too various to enumerate, but while the passion of his life has been scientific research, he possesses the rare faculty among imaginative minds of practical and constructive accomplishments.

His crowning achievement, involving the labors and research of over thirty years, in light, heat, electricity and magnetism, is the Attuned Color Wave Therapy, known now as Spectro-Chrome Therapy.

While working with light waves Dr. Dinshah found through spectroscopical and chemical experiments and mathematical calculations that all drugs and chemicals actually act in the human system through disengagement of the color waves. He further found that every element in the world exhibits a preponderance of one or more of these colors, namely: red, orange, yellow, green, blue, indigo and violet, and that the potency of an element depends on the potency of its color waves.

Foods and medicines are composed of specific elements, and act in conformity with such color wave potencies.

Food builds our body and all vegetable and animal growth is dependent on sunlight, so light is as much a necessity of life—as food—as solids, liquids and gases.

And as it is the sun which is the source of all life and energy, imparted to the world by waves of light—which light is white and is composed of seven colors—red, orange, yellow, green, blue, indigo and violet—it is therefore plain that ultimately our bodies are also built of these elements—colors.

Light contains about 9.1 per cent hydrogen, 13.4 per cent carbon, 2.5 per cent nitrogen, and 78 per cent oxygen.

The preponderating color waves of the four main elements are red, yellow, green and blue, respectively.

Thus 97 per cent of our body is built of the above four elements, and is therefore responsive to the said four color wave potencies.

These facts are definitely proved by spectroscopy and the latest conclusions of metaphysical research.

In health the bodily elements (colors) are proportionately balanced.

Disturbance of this element (color) balance produces disease.

Establishment of the element (color) balance in the system by administering the lacking elements (colors) or reducing the super-normal ones restores health.

This is the rational system employed in Spectrochrome Therapy. It is carefully attuned in accordance with color wave potencies and perfected to meet every condition of ill-health, including those diseases resulting from the disturbance of the balance of even the 3 per cent of the less dominant elements (colors) and it is applicable to every case of a non-surgical character.

The theory of Sir David Brewster, that the three primary colors are red, yellow and blue, has been rejected by Dr. Dinshah, he having proved beyond any doubt spectroscopically, chemically, mathematically and geometrically, that the three primary colors are red, green and violet, as only from these three colors it is possible to produce white light by the addition of one color to another, or complete blockades of light by the reverse process, that is, by subtraction.

Thus the attuned color wave system, when represented by a chart as follows: presents all of the seven colors of white light (red to violet) and also five other colors not contained in the solar spectrum—the two upper colors (lemon and turquoise) and the three lower colors (scarlet, purple and magenta), completing the tuning of the system just like a musical instrument into 7 major and 5 minor keys.

Red and orange are stimulants, yellow and lemon are serives or nutrients, green and turquoise are the germicides, blue and indigo are sedatives and narcotic, violet and purple are depressants and magenta and scarlet are the emotionals.

And now? Friends, where Truth is, eventual success **MUST** come and the harder the knock, the greater the boost.

**SPECTRO-CHROME — IN EVERY HOME**

It is upto you Affiliates to make our Slogan a reality.

### NO WONDER CONSUMPTIVES DIE!

Our Affiliate Rose Holder, from Detroit, Michigan sent me a newspaper clipping, in which a question was asked and reply was given in the syndicated column of Dr. Logan Clendening.

'Question—Is it harmful for a tuberculosis patient to smoke?

Answer—I do not believe so, in moderation."

And what is the implication? That in moderation, Smoking is not harmful in Tuberculosis, according to his "belief." Who cares for his belief? Give a definite reply scientifically and conscientiously endorsed; why hedge around to retain the goodwill of stink-weed advertisers? The answer is nothing short of asinine, because, we can not afford to lose Health on the beliefs of Medical Duffers.
