**FIRST ST. LOUIS MISSOURI PLANET**  
(HOTEL MELBOURNE, GRAND AVENUE & LINDELL BOULEVARD)

**Meeting of Thursday, October 3, 1946**

**Successful Use Of Spectro-Chrome In:—Cough, Itch, Poison Ivy, Swelling,  
Fever, Pain**

*Reported By:—VIOLA C. JEUDE, Recorder*

Deputy Clemens M. P. Neumann was in the chair; 73 Affiliates were present. Communication from the Principal Office was read and explained. The Deputy made the following remarks about the Post Office Fraud Order Injunction Suit against the Post Master General, in Washington, D. C.:—"If the Affiliates would consider how many times they felt ill and if it were not for Spectro-Chrome, how many times they would have gone to a Medical Doctor, plus the cost of the medicine, so if they felt in their hearts that they are being benefited by Spectro-Chrome, let the generosity of the heart flow into their hands and help Dinshah in this trying time, as Dinshah surely could use it."

The Sub-Deputy asked for permission to add a few remarks: "The Law Of Compensation says we receive the way we give. The Bible says 'Bread cast upon the Waters will be returned.'"

He said he did not know the status of any of the Affiliates, but as the communication relates the Funds are exhausted and to all indications they are urgently needed, if you could spare, send 1, 2, 5 or even \$10.00. No doubt Spectro-Chrome gives results and saved many dollars which would have been spent with Medical Doctors and Chiropractors. I should like to make a request, give what you can. He also suggested that the Community Fund Drive will start next month; split what you may give them and help the Spectro-Chrome Cause. He said it was merely a suggestion, it need not be adopted.

Deputy said some time ago there were certain Affiliates willing to go to the defense of Spectro-Chrome if necessary, were those same Affiliates still willing to go?

Rose Freund, Agnes Hoenschmeyer and Arthur Behnen said they are still willing to go to Camden, New Jersey in defense of Spectro-Chrome.

Case Reports followed:—

R. F. reported her son returned from Oklahoma on vacation and had Congestion in Areas 4 and 5. Ratio 100 to 12; gave Lemon Systemic, Magenta Area 4 alternately; could not sleep for the first 2 nights; the Ratio then was 68 to 12, coughed quite some Phlegm and for scratchy sensation in Throat used Turquoise. Came home Thursday and went to work Monday.

Discussion as to Atcowas followed. B. E. reported 14 year old girl had Itch all over Body for 2 weeks; gave Yellow and she seemed to itch more.

Question—What was the Kardoscil and Spirosdil?

Answer—Do not know.

Asked about the Rational Food Of Man, she said: "Mostly Vegetables, Meat is hard to get."

Discussion followed in regards to Skin Disorders due to wrong Chemistry of Body.

Further discussion followed as to Eliminations and Atcowas.

The Deputy reported the following Cases:—

1. R. K., female, age 50, Ratio 72-20. About twenty years ago she suffered from Poison Ivy. Twelve days ago, she went vacationing in the country and three days later her Face and Neck swelled and blistered. She went to the Medical Doctor who gave her Salve which would dry the Blisters and wanted her to come back to give Injections. She then came to Spectro-Chrome. Her left side of the Face also Arm were still swollen and there was Fever in the Arm. Atcowas used, Turquoise Local, Green Systemic, Magenta Area 4. Complete Normalation within one week. She will soon join us as a Benefit Student.

2. J. R., female, age 63, Ratio 69-21. For the past four years she was suffering with Pains in her Knees and lately also in her Thighs. She went to her Medical Doctor and he prescribed Capsules and a rubbing Medicine. However, it gradually became worse and she was forced to stay in bed for a week or so, because, she was unable to walk and had a hard time to get out of bed. The Pains after walking were becoming worse, so she was willing to use Spectro-Chrome, Yellow on Areas 6-7-8-9-10, Orange and Lemon Systemic, Magenta on Area 4 were used. Now walks and has normal use of Legs and Knees, feels fine, lost some excess weight and regrets not to have come sooner to Spectro-Chrome.

Sub-Deputy Read Chapter 10, "Velocity, Time, Space" with explanations and object lessons, from Spectro-Chrome Metry Encyclopaedia and the Deputy started Chapter 48, "Spleen As Gateway."

Deputy asked the Affiliates if they were satisfied with the Educational Program and if they could or would make any suggestion, that we as Commissioners would gladly co:operate. Someone voiced there should be more, that they would be able better to understand Spectro-Chrome.

The Recorder stated she received a letter from an Affiliate stating another Affiliate said "It has become so uninteresting to her, that she does not care to go." Too much Educational Program!

The First Volume of Spectro-Chrome Metry Encyclopaedia may appear very dry and uninteresting, because, it is just Theory, but to understand Spectro-Chrome it is absolutely necessary. If Chapter 9, be thoroughly understood, even then it would be just scratching the surface of the Science.

Sub-Deputy said that we as Commissioners are in duty bound to conduct the Educational Program.

The Deputy asked for a vote; those that were satisfied with the present Program to raise their hand and give their opinion. Practically all hands went up and they chorused they were satisfied with the Educational Program as it has been conducted. Deputy asked those Affiliates to raise their hands who disapproved. None was raised.

Please Dinshah what would you suggest?

EDITORIAL

REMARKS

Spectro-Chrome Metry is a new Science and Education is the only way to spread it. Continue your Program by all means and let the uninterested Affiliates drop out of sight. We do not want selfish, clubhouse scoundmongers.

**FIRST MERRILL WISCONSIN PLANET**

(HOTEL BADGER, MERRILL, WISCONSIN)

**Meeting of Thursday, October 3, 1946****Successful Use Of Spectro-Chrome In:—Cold, Swelling, Skin Disorder, Asthma.***Reported By:—EMIL ERBEN, Deputy*

Deputy Emil Erben was in the chair; 16 Affiliates were present. Communications from Principal Office were read, including a Telegram about the Post Office Injunction Suit, in Washington, D. C. The Deputy reported he received 38 pounds of Coconut Oil from an Affiliate in New York. He asked for permission to distribute some among the Affiliates.

M. L. spoke about a Sty in an Eye. She was told about it being toned in the same way as any other Inflammation.

A. W. said he had trouble in controlling his Frontelim. A Sufferer Chart was asked.

E. K. had Cold in Nose which was normalated by irradiating Yellow Systemic and Magenta on Area 4, Turquoise and Indigo on Area 1.

K. M. had a Swelling on Foot. Turquoise Local for 10 days corrected it.

E. M.'s daughter N., age 17, has a Skin Disorder. She irradiated Green, Lemon, Turquoise and Indigo, but her condition is worse. She was told to bring Sufferer Chart for opinion.

J. M.'s daughter P., age 15, had Skin Disorder. Atcowa Lemon and a few Turquoise brought good results.

E. E. had Asthma for 10 days and could barely come to the Meeting. He had a Ratio of 6 to 1, with Kardoscil of 120, which was corrected by Purple on Areas 4 and 18.

The value of Free Guidance was stressed.

EDITORIAL

REMARKS

E. M. should send for Free Guidance. The initial one asked for Report in 30 days after irradiating Yellow on 6-7-8-9-10 Areas. To date, no General Advice Chart came.

**FIRST PORTLAND OREGON PLANET**

(MASONIC TEMPLE, 1119 SOUTH WEST PARK AVENUE)

**Meeting of Thursday, October 3, 1946****Successful Use Of Spectro-Chrome In:—Mucus, Stroke***Reported By:—LEWIS BISCHOFF, Recorder*

Deputy Stanley Burroughs was in the chair; 22 Affiliates were present.

A letter and a telegram were read from Dinshah. We could not

quite comprehend what the Trial was all about and why Dinshah was not given a Hearing in Washington, D. C. in the Post Office Injunction Suit. Was he supposed to be at some former Hearing and did not appear? What seemed to be the big trouble? As far as any money is concerned we are sure that we shall not be able to help much in that line out here. We are going to have all that we can do for our own case coming up on Appeal and a large sum of money will be needed to fight it. The Deputy said that he would like to go back there and help Dinshah, but he could not leave his job now and could not stand the expense. It is too far across the Country and would take too much time off. He said that he does not know how much good he could do anyway, even if he could go. Under the circumstances, it looks as if we are going to stand all our own Trial expenses out here. Any way, we all hope for the best and are looking forward to a quick victory for Dinshah.

Case report of J. S., 77 years old; all clogged with Mucus and almost too weak to remove it by coughing. He had a Stroke about a year ago and was very shaky and run down in general. Two weeks of Green, Lemon and Magenta made a very big change for the better. The quantity of Mucus increased in eliminating and then gradually decreased. He did not like the Rational Food Of Man, but, was sticking to it anyway. He was quite pleased with the results so far.

The conditions of Acute and Chronic Disorders were stated by the Deputy. He explained how Lemon corrected the Persistent conditions and Turquoise altered the Recent conditions. Nearly always Turquoise can stop one from coughing, due to Colds, while Lemon and Green are used to break them up.

EDITORIAL

REMARKS

Thank you for your sympathy. You mind your Appeal matter and we shall mind our Trials. No money is asked.

—○—

**FIRST NEW YORK NEW YORK PLANET**  
(CARNEGIE HALL, 7TH AVENUE & 57TH STREET)

**Meeting of Thursday, October 3, 1946**

**Successful Use Of Spectro-Chrome In:—Asthma, Burns, Tuberculosis,  
Gingivitis, Arthritis, Pain, Neuritis, Mosquito Bites**

*Reported By:—EMMA C. HAITZ, Recorder*

Deputy Lina Fischer was in the chair; 163 Affiliates were present.

Attention was again called to the fact that many Affiliates did not receive their Spectro-Chrome, because, they did not attend the Meetings very often. All were urged to try to come whenever possible.

Communication from the Principal Office, also a Telegram which was received from Colonel Dinshah, were read.

Deputy—Before I came over to New York tonight, I telephoned Dinshah. He appeared in Camden, New Jersey today and gave me the news that the Trial was postponed. It will not start next Tuesday, but, Din-

shah will have to appear there to set the date when it will start. We do not beg, but you know what it means if these cases are lost. There are absolutely no funds and it costs a tremendous amount of money. As we supported the Institute at the time of the Fire, we should support it now. This time it is just as crucial, if not more. What will you do without your Equipment? How many of you have avoided an Operation through Spectro-Chrome? (A number of hands went up.)

Affiliates who wanted to testify at the coming Trial in Camden were asked to sign their name and address at the door when leaving. Once again Affiliates were advised to be careful and fill all Enrollments and other papers sent to the Institute in a correct manner.

Turning again to the Magazines, the Deputy stated that this job was really upto the Affiliates. Affiliate Margaret Wolschendorf travels to Malaga every month to get the Magazines for the Planet Meeting.

F. P. reported the case of an Affiliate who has her Equipment for seven weeks. This Affiliate suffered with Asthma for the past 15 years. After six weeks of tonating, this woman could do all her work, whereas previously she could do nothing. Has had no Asthma in the past four weeks. Before coming to Spectro-Chrome, had spent over \$3000.00 on Drugs and Medical Doctors. Tonations of Yellow and Magenta were given.

Seven new Affiliates were introduced and greeted with applause.

F. P. suggested that the \$15.00 which is given to an Affiliate for introducing a new person be returned to the Institute for the Spectro-Chromarium Fund and in this way we can each do our share.

M. W. reported the case of her sister-in-law, who had Asthma for ten years. During this past year, was under the care of a Chiropractor. Spent \$600.00 and the attacks came on just the same. Tonated with Magenta and Lemon and within one week was much better. (Applause.)

M. W.—I was with Colonel Dinshah in Washington, D. C. Court. There were 34 cases ahead of ours. As usual, the Colonel did not get a chance to say anything. I think that if Dinshah's spirit is undefeated, we should do all we can to help too. He serves God and through him we got our Spectro-Chrome.

Deputy—I think we should give a round of applause to F. W. (All vigorously applauded.)

Deputy—In the near future, we shall have several Normalators. M. W., W. D. and F. R. finished their three Volumes and F. P. is now studying the Third Volume.

Affiliate B. Le F. again showed her Arm to the Affiliates. Last month, she severely burned it. Today, there is not a trace of a Burn on her Arm, thanks to Spectro-Chrome.

M. K.—I have been an Affiliate a year last month. Two Medical Doctors claimed that I had Tuberculosis. They wanted me to go to a rest home. I disregarded their advice and followed the Tonations which Dinshah recommended and I feel wonderful today. Spectro-Chrome also helped me with my Teeth. The Dentist told me my Gums were filled with Pus and I would have to have my Teeth pulled. I wrote to the Institute, followed Dinshah's directions and today I still have my Teeth. My husband was in the Aleutians for three years. He suffered from Arthritis in the Arms and Legs. I made him use Spectro-Chrome and he does not have a Pain any more and besides, I am able to help myself with every day illnesses. (Applause.)

Deputy—I am very proud of your case and that I kept you away

from that rest home. There was already a remarkable improvement in one week.

An Affiliate inquired what Tonations were given and received the answer: Lemon and Yellow and then Yellow and Magenta.

Deputy—Your husband smoked and liked Meat and a Beer once in a while and now he is 100% on the Rational Food Of Man. When you give 100%, you will receive 100%.

E. D.—I had very bad Neuritis. After using Spectro-Chrome for only one week. I could walk across the room. Tonated with Lemon Systematic and Magenta on Area 4.

I. S.—Are baked Beans a substitute for Peas?

Deputy—Yes.

I. S.—My son had Mosquito or Flea Bites on a Foot for about 4 or 5 weeks. I put drawing Salve on it. (Here the Deputy interrupted and told Affiliates that in introducing someone, they should also give them the feeling that they may always come back for Guidance). The Bite traveled. My husband took the boy to the Medical Doctor. The Doctor gave him some Salve. I wrote in to the Institute asking advice and they told me that I should keep going to the Medical Doctor! The boy had a Fever ranging about 102 to 104, for about two weeks. Tonated with Turquoise and Fever went down. Our minister was to the house and he said we should take the boy to the Doctor, but I am not going to. I am going to stick with Spectro-Chrome and I am sure that next month I shall be able to give a much better report. I am also going to write to the Institute and apologize for my actions in this particular incident.

M. K. inquired as to what she should feed her baby now. The Deputy advised giving her the same vegetables and other food as the rest of the family eats and also some Limbupani.

M. K.—A Sufferer I know wants to go to Malaga for a few weeks, but, she is not an Affiliate.

Deputy—The best thing is for her to get an Equipment. When we were at the Class, we stayed at the Hotel. Try to get this Sufferer to get own Equipment and use it at home. Incidentally, they started to build the first Cottage at Malaga today. When the Cottages are ready and if they have enough help, they will take Sufferers again.

A. R. stated he has a brother-in-law who is sick and whom the Medical Doctors want to put in a Mental Institute. He stated that he would like to have him go to Malaga to speak with Dinshah. The Deputy advised that when he goes to Malaga to pick up the Equipment to take his brother-in-law with him, at which time he may speak with Dinshah.

M. W. stated that many people were advised to take Yellow on Areas 6, 7, 8, 9, 10 by the Institute and asked that the Deputy explain the Attributes of Yellow for the Affiliates.

Before complying with this request, however, the Deputy called on Affiliate F. R. to tell how he enjoyed his two weeks stay in Malaga.

F. R.—We all learned plenty and had plenty of fun. I shall go down any time for another two weeks. This Course was the most Educational Class I ever attended.

The Deputy then read Chapter 80 on Yellow. Discussion followed.

F. P.—I know an Affiliate who is constipated for 15 years. He has been taking Tonations, but has had no Back Elimination in four days.

The Deputy advised that he either continue tonating with Yellow or use Orange on Area 19. Affiliate W. D. demonstrated the exercises which they learned at the Institute.

Deputy advised Affiliates to have their pictures taken as Affiliations would have to be renewed next month. All look forward to the next Meeting and hope that Dinshah will be present.

EDITORIAL

REMARKS

No presence in Planet Meetings, no Spectro-Chrome magazine. This will continue until the conditions change.

It takes more trouble to introduce a person to Spectro-Chrome, than can be compensated by the \$15 Auxiliary Benefit.

F. W. deserves credit for his co:operation and M. W. deserves our thanks for her trouble in easing our labors. In the Camden Court, she was called the "New York Omnibus," because, daily she brought over our witnesses! A dozen times the U. S. Attorney spoke about her and pointed at her, calling her "Gretchen"! He seemed very fond of teasing her thus, but, she took his taunts with a smile each time.

At present, we are not in a position to receive Suffering Affiliates. We shall let you know when our Electric Heating Plant is in operation. I may visit your Planet after the Trial is over.

**FIRST CLEVELAND OHIO PLANET**  
(CARNEGIE HALL, 1220 HURON ROAD)

**Meeting of Thursday, October 3, 1946**

**Successful Use Of Spectro-Chrome In:—Cold, Pain, Headache, Hay Fever, Menopause**

*Recorded By:—BARBARA B. BROWN, pro tem.*

*Reported By:—EDITH REES, Recorder*

Deputy George J. Brown was in the chair; 23 Affiliates were present. First the meeting was opened to new Affiliates for questions. There were two new Affiliates present. Communication from the Principal Office was read by the Deputy and also a Telegram received from Dinshah earlier that evening. The Deputy emphasized the fact that funds were low at a time when there were Law Suits to fight and requested anyone present that was able to contribute, to do so. Several envelopes were handed out by the Sub-Deputy for free contributions. It was requested of anyone present who had previously made Affidavit as to their condition qualifying them to testify at the trial at Camden, New Jersey, to notify Dinshah so as to be a witness at the Trial, at their own expense. He will notify all when needed.

Case Reports followed:—

1. J. B. used Indigo on his father's Legs for Varicose Veins which started swelling and pained terribly. It was suggested that Yurquoise be used to remove the Swelling and Inflammation.

2. E. R. reported she used Indigo for a Cold last Sunday. It started about 2 o'clock at night, and she had three Spells and nearly fainted. She tonated with Indigo and dozed off and when she awoke her Pain was gone and she got up Monday morning and did all her work as usual.

3. E. M. used to have many Headaches. She was advised to use first Green and then Turquoise. The Turquoise helped her and she feels much better. Her Headache is gone and she is pleased.

4. E. P. used Blue for Hay Fever and got a Headache. It was suggested that in such a case one should switch around to Green. She used Turquoise and it helped. She claims she used Magenta for Change Of Life and it helped wonderfully.

The Deputy asked those present if any Federal Agents had been around. He stated that they were now going after Spectro-Chrome Normalators and were out to scalp the head of the Organization—Dinshah.

The Deputy stated that in any Enrollment it is requested that you do not simply mark "Retired." Mark clearly what the occupation was before retiring. Request was made not to send in the Time Switches or similar parts for repairs, because, of lack of facilities at present. Replacements may be made.

The Educational Program covered Chapters 35 to 41 inclusive from Volume I of our Encyclopaedia.

### FIRST MILWAUKEE WISCONSIN PLANET

(MILWAUKEE AUDITORIUM, WEST KILBOURNE AND NORTH FIFTH)

**Successful Use Of Spectro-Chrome In:—Stomach Disorder, Tumor, Bruise, Fester, Swelling, Burn, Blister, Wound.**

*Reported By:—EMMA SCHROEDER, Recorder.*

Sub-Deputy Evert Dahlke was in the chair; 150 Affiliates were present.

For the benefit of those who did not receive the magazines at this Meeting, the Sub-Deputy read, again, the letter to Planet Commissioners (August 30th, 1946) which states in part:—"Those who will not receive the Spectro-Chrome in the Planet Meeting by constant attendance, may receive them at the end of the current year, provided they renew their Affiliation in time. This move was actually forced on me and the negligence of the non-attending Affiliates is to be blamed for it. Without co-operation of the Affiliates, the Institute cannot function efficiently."

Sub-Deputy—If you are attending every Meeting, you will receive your magazines. If NOT, you may receive them at the end of the year. The Continuation Request will, most likely, be sent by mail.

After the reading of this month's communication by the Sub-Deputy, the Recorder read the Telegram promised in the letter, which said that the Washington Fraud Order Petition was thrown out by Summary Judgment against us. "Judge abruptly stopped Dinshah oral argument and refused to listen to citations saying we had notice of hearing but did not appear before Solicitor. Now go on appeal. Treatment during case worse than Brooklyn. Voluminous funds will be needed."

The Recorder brought with her to the Meeting a copy of the Post Office Fraud Order Suit (refiled) Action in Equity No. Civil 31408 which contains the complete text of the Bill Of Complaint and Petition For Restraint Order And Injunction. Page 8 of this pamphlet tells how "(FF) Suddenly on August 21st, 1942 a single envelope addressed to all the 17 Entities. came by Registered Mail, from the Post Office Department to Malaga Post Office. It was received by Irene Grace Dinshah and was

found to have a Memorandum of Charges in it. It charged the 17 Entities that they 'are engaged in conducting a scheme or device for obtaining money through the mails by means of false or fraudulent pretenses, representations or promises, in violation of Section 3928 and 4041 of the Revised Statutes, as amended, (Secs. 259 and 732 of Title 39 U. S. Code) a copy of which is also enclosed. These Statutes authorize the Postmaster General to forbid the delivery of mail and the payment of money orders to any person or company found to be operating a scheme or device in violation thereof.' An ANSWER to the said Charges was to be made by the 17 Entities, by Monday, September 14th, 1942 and it stated that **IT MAY BE FORWARDED BY MAIL OR PRESENTED IN PERSON OR BY COUNSEL.** The communication was signed by Vincent M. Miles, Solicitor. The date for the 'Hearing' was changed subsequently by the Solicitor without the *request* of the 17 Entities, to Monday, September 21st, 1942.

"(GG) In pursuance of the wording of the Solicitor's letter, Dinshah P. Ghadiali, acting pro se et al, MAILED an appropriate ANSWER with 27 exhibits, denying charges, etc. . . . .

"(HH) It appeared from the 'Transcript of Proceedings' . . . . . that a 'Hearing' was held in the Solicitor's Office before an Assistant, Daniel J. Kelly, on Monday, September 21st, 1942, at which a Post Office Inspector Karl M. Foust on oath produced in Evidence a Spectro-Chrome Apparatus, which he obtained by signing a False Declaration to Dinshah Spectro-Chrome Institute and posing as a sick woman 'Mrs. Amelia Regina Wylie, of Ridgeway, Missouri.' That Inspector made numerous false statements on oath to incriminate the Complainant and one Physician and two Medical Doctors, all linked with the American Medical Association testified that the Apparatus was a 'fake' and the claims made for its efficiency were 'fictitious'."

It is suggested that all Affiliates refresh their minds on this case by referring to the Post Office Fraud Order Suit. As stated, Dinshah answered by MAIL. Now the Judge abruptly stops Dinshah's oral argument and refuses to listen to Citations saying we "had notice of hearing but did not appear."

C. D. requested that the Telegram be re:read and then asked "What does that mean? Does that mean that he lost the case?"

Sub-Deputy—It means that he will have to appeal the case. Dinshah had his choice of three different things. He obeyed the original Order. This seems to be a very dark hour for Spectro-Chrome. However, if we abide by the Rules and follow the Guidance of the Originator, we shall eventually win! By Co:operation! Dinshah needs Witnesses. They will have to pay their own expenses for he is short of funds. How many will volunteer?

(Helen Schott, Robert Schott, Norma Fiedler and Evert Dahlke agreed to go.)

Five new Affiliates were greeted with hearty applause.

Sub-Deputy—We have new Affiliates every month regardless of the opposition.

*He expressed surprise at so few Witnesses volunteering in comparison to the many who received satisfactory results from the use of Spectro-Chrome. At the request of the Recorder, he sought the reasons therefore. A. R. said he could not see his way clear at this time.*

Sub-Deputy—Is anyone able to go with a car and take others so expenses may be kept at a minimum? (No reply.)

G. W. said she had already made two trips East this year. A. M. is unable to see his way clear this year. M. L. is leaving the city next week.

Sub-Deputy—I don't know like what the Case is going to be. If it is like Brooklyn, you will not be able to say much, but Dinshah expects this Case to be quite different.

G. W.—We can still send money if we wish.

Regarding witnesses, conversation with some of the Affiliates revealed that some of the Witnesses who appeared in Brooklyn harbor the thought that they were not very good Witnesses and did not do Spectro-Chrome very much good in view of the Verdict which was rendered by the Jury. Witnesses there were not permitted to speak freely.

Before continuing with Case Reports and the Educational Program, the Recorder was requested to read an Article which she clipped from the Milwaukee Sentinel of Tuesday, October 1, 1946: "New Source of Light Promises End To Night" was the caption. The article told how Professor Etienne Vassy, 37, expert on Atmospheric Physics at the Sorbonne University, Paris, made a sensational discovery which may turn night into day by means of radio transmission of optical waves directed at *luminous Strata* in the sky. This Professor refers to "the luminous zone which I had discovered 50 miles from the earth . . . . Strata D."

In regard to the Professor's assertion, the Recorder said:—"THAT was in the Milwaukee Sentinel on October 1st, 1946. I shall now read to you from the First Volume of Spectro-Chrome Metry Encyclopaedia, by Dinshah, copyright 1933, page 393, paragraph 3, line 9:—"the Sun actually sheds NO LIGHT, but, the Energy sent forward is convertible into Light when it passes through impediments like the Atmosphere . . . ." I leave it to you Affiliates to judge for yourselves who was the first discoverer of these Strata."

Sub-Deputy—Colonel Dinshah has made many discoveries with which he is not credited.

Recorder—I have another clipping. We are not the only ones to incur the wrath of the Medical Profession. In the Milwaukee Sentinel of Wednesday, October 2d, 1946, E. V. Durling writes in his column:—"SIDELIGHTS— . . . . My occasional references to the cruelties of vivisionists appear to have made some members of the medical profession lose their tempers to the extent of breaking out with very nasty and insulting epistles addressed to this department. The truth hurts."

The Sub-Deputy added an article from the Milwaukee Journal (which also appeared in the Milwaukee Sentinel announcing a "new technique" for childbirth:—"Entirely Painless Childbirth—Doctor has a new technique." It must have been a "sweet" bundle from heaven for "the mother ate a piece of cake and drank a glass of milk as she comfortably gave birth to a 6 lb. 14 oz. girl last Wednesday." This article evoked smiles from the listeners. The mother is said to have walked a few hours after birth. The Sub-Deputy said:—"That is entirely opposite to the teachings of Spectro-Chrome. Dinshah refers us to Biblical passages in this connection. Injecting anything into the Spine is very dangerous. Then they wonder why they have so many Female Disorders later in life. In the last five years these Disorders have been more prevalent than ever. They often take Injections because they have not the patience to let Nature work.

Relative to the article read, Norma Fiedler told of a case where a Milwaukee Doctor encountered a Confinement Case just as he was about

to go on a vacation. In addition, the Doctor is said to have been in need of money. In his hurry to get away, he forced the birth. Mother and baby both died. The only punishment the Doctor received was that he was "kicked out of the hospital," but he is still practising.

The birth of a baby under Spectro-Chrome methods was told by E. B., who said everything "went fine." The baby weighed six pounds. "But it was hard work; I was sweating," she said. The parent said: "I believe we shall have to make the baby a cap so it looks like Dinshah!" (Laughter.) The birth required about three hours. The midwife in attendance was surprised at the "clean" baby and thought it must be from the Food.

Someone stated that it is *compulsory* that a Medical Doctor be present, but the Sub-Deputy reminded that sometimes the Doctor does not arrive in time. A registered midwife is permitted.

E. S. wondered about dropping Silver Nitrate in the Eyes. E. B. said none was administered. E. S. thought it was compulsory under Medical Law.

E. B.—There is nothing like "have to"!

Sub-Deputy—In my family, we commenced using our Spectro-Chrome at about four o'clock in the afternoon and the baby arrived around six o'clock. There was no Pain until the actual Delivery.

E. B.—This woman had Pain.

W. H.—I am a fairly new Affiliate. I have been here for three Meetings. I had Hay Fever for 10 or 15 years. I am 31 years old now. Last month I had what you would call the "Stomach Flu." I came here expecting to learn something and I did. I used Indigo on Areas 6, 7, 8, 9 and 10 and had relief in two hours. Had several Back Eliminations. Went to work the next day. The following two nights I tonated with Indigo. Could I have used another Color? I am here to learn.

Sub-Deputy—What about your Hay Fever?

W. H.—It is about the same as usual. Some years it is better, some years worse. I suppose if I started early in the Spring it would be better. I have not had time enough really to clear up that condition.

A. R.—It says in this issue of Spectro-Chrome that you should really start in the Spring with Tonations.

W. H.—I am using Magenta on Areas 4 and 18 under the Institute direction.

J. M.—I became Benefit Student in April. I have been feeling sick and I thought I should visit a Medical Doctor. He told me I had a Tumor and that it must come out. I used Yellow and I feel just perfect. I never went back to the Doctor, but Saturday, they rushed me to the Emergency Hospital. I fell. When I returned home, Atcowa Blue was irradiated. The Doctor advised me to remain in bed.

Sub-Deputy—Orange would have increased the Circulation.

J. M.—Then I should use Orange on the Shoulder, as it is still quite painful. That is why I decided to come here today. It is still discolored, but not as painful as it was. We used Blue because the Doctor told us to use ice packs (Ultra-Green Division).

Sub-Deputy—How many had experiences with Spectro-Chrome as far as Falls and Bruises are concerned?

L. R.—I fell while going to the Drug Store for ice cream one evening. I stumbled. I used Turquoise. It festered. After one Tonation of Turquoise it dried and was all right in a few Tonations. (Applause.)

A. B. reported a case of Swelling which was corrected in two Tonnations.

B. D.—I just had something smart happen to me. I burned my Arm. Used Blue. I accidentally rubbed the Skin off although the Blister was already gone.

B. D. raised her Arm and showed it to the audience. There was very little trace of a Burn left. Applause was given to her report.

Sub-Deputy—One Sunday, an Affiliate stopped at my house with a cut Finger. She used Indigo and Turquoise and had no Stitches. Accidentally, she bumped it and the Wound opened. Scar Tissue was present. She used no tape or bandage on it. Possibly a tape would have helped, in this case, to keep it from opening.

G. W.—I forgot to report the most important thing last time about the Portable Itisometer. If A. H. were here he might explain it. The down payment will be \$150.00, the total cost depending upon materials. No money will be refunded as was the case last time. New York already has a number of Orders placed. They are going to bring the money to the Meeting so Dinshah will have a considerable amount at one time to make progress.

E. B. reported a case which could not be heard on the platform. Affiliates sitting on the side of the Platform can not be heard plainly.

Discussion returned to the Portable Itisometer:

Sub-Deputy—The Recorder tells me that the word is a combination of the words "IT IS SO." He showed the picture of the Main Dial illustrated in Volume 3 of our Encyclopaedia and said that E. B. and K. B. are among the Normalators who use Itisometers. E. B. contributed to the elucidation of the instrument.

Question arose as to the Contribution. G. W. repeated it. It will be at least \$150.00 to start with and he would like to know how many are interested.

F. K.—The Itisometer is an instrument which touches the Areas of the Body and records the degree of Imbalance. It is a wonderful instrument and if you had it in your home you would agree that it is truly one of the wonders of the World and should be classed as such.

D. S. made inquiry about the Portable Spectro-Chrome Equipment. I. P. and E. S. also expressed interest in a Portable Spectro-Chrome.

Sub-Deputy—The Itisometer eliminates all doubt. Spectro-Chrome may be used without the Itisometer, but with the use of it, it must be quite helpful.

I. P. is always puzzled as to what Atcowa to use when a Cold commences. The Sub-Deputy suggested Turquoise and Magenta; if it persists. Lemon and Magenta.

E. M. who was unable to attend last month's Meeting until later, was called upon to give her impressions of the recent Class in Malaga which she attended. She said—The class was very wonderful. It certainly was an education!

Question by Sub-Deputy to Evelyn Murphy (who came in late):—"Would you be in a position to go to the Camden, New Jersey Trial as a Witness?"

E. M.—No! I cannot get away from work!

Sub-Deputy—I did not want to miss asking you, as you came in late.

Chapters 45 and 46 of the Spectro-Chrome Metry Encyclopaedia were read by the Sub-Deputy. Discussion followed on X-Rays and on

the Circulatory Colors. An Affiliate raised the question:—"Where is the Spleen?" The Sub-Deputy pointed out the Area 6 on the Chart.

E. S. gave an interesting story about the Spleen: A friend's son fell from a tree and was taken to the Hospital. An Incision was made as there were internal injuries and it was discovered that there was a split Spleen. This organ was removed, but, the parents were told not to worry. They say that the boy is as active as ever, but I am wondering what effect the removal of the Spleen has upon the Higher Vehicles as I remember what Dinshah teaches us about that Area being the seat of the Auric Vehicle and that Light enters the Body through the Spleen Area. (Applause.) The Sub-Deputy read the Chapter "Spleen as Gateway" and reminded that there are Ancillary Spleens also. It was brought out that the Spleen also manufactures the Violet Corpuscles.

A Sufferer Chart was presented for discussion by L. K. Her husband had a Growth on the Bladder. An Operation did not give the desired results. He is able to walk now, but, since the Operation, developed "Arthritis" and "Lumbago." His condition improved considerably since using Spectro-Chrome. Yellow was suggested as there is faulty Back Elimination. The Chart was returned to her for signature and for the insertion of the present condition. She promised to send it to the Institute in the near future.

E. H. whose set of Encyclopaedia was seized with her Equipment just prior to Dinshah's last visit to Milwaukee, reported to the Recorder that she did not receive another to date.

### IMPORTANT

Just as this record was being transcribed, the Recorder received a Telephone call (from E. L.) saying that E. H. had a Telephone call on the morning following the Meeting from one Hayes notifying her that she may be subpoenaed to appear at the Camden Trial around the 21st "to identify her Equipment." He stated that others, also, would be called.

Before the typing of these Minutes was concluded, F. K. called the Recorder to notify that a man with a portfolio "crashed the gate" at the last Meeting. F. S. was busy taking registrations and this man walked straightway by the crowd. F. K. asked him for his Affiliation Card and upon producing none led him to the door. We should have another guard at the door.

It was a splendid Meeting with a fine attendance, an interested, alert and responsive audience and lively discussion.

EDITORIAL

REMARKS

The co-operation of our Affiliates is the main spring of our existence. Planet Meetings are held for that purpose to ensure education in our Science.

Let the Affiliates not worry about me.

Worry touches me not,  
Worry not thou for me,  
For the protection of the Divine

Is on His Spectro-Chrome!  
At each Breath take His name!!!

Form your opinions about my humble labors, after you read "One Thousand Years Ahead." It will take time.

The Portable Itisometer was already completed and demonstrated in prior years, but *all* the Models were destroyed in the Fire. Now, with the costs of materials and labor going up, I have to grope my way through the maize; but, it will be recreated.

Painless Childbirth by Narcosis is not advocated by us. Our views are well known.

Medical Doctors are protected by their Group Insurance Policies; it is very difficult to get a Medical Doctor to testify against another for Malpractice.

Never allow any Chemical Compound of Silver—Silver Nitrate, Argyrol or any other—to be dropped into the Eyes. Such materials decompose under the action of Light and make a black film like a photographic plate. Here is the latest report of one such case printed in The Evening Bulletin of Philadelphia, Pennsylvania, December 21, 1946:—

#### **Girl, 14, Sees Yule Tree Decorations First Time**

"Artesian, S. D., Dec. 21—(AP)—The smile of 14-year-old Betty Goudy was brighter today as she crouched beside her Christmas tree.

Because of recent eye surgery, she was able to see the colorful Yule decorations for the first time.

As far as Bette is concerned, however, the holiday season dawned three months ago in Chicago when Dr. Richard A. Perritt transplanted the corona from a stillborn baby into her right eye and her vision improved.

Her best gift, she said, is the promise of her parents, Mr. and Mrs. Ed Goudy of further improved eyesight. Before the operation Bette could see only dimly the outlines of large objects through scars her parents said were left at birth when she was blinded by silver nitrate."

The Medical Doctors have had their day. Keep Spectro-Chrome torch burning with the fire of Truth and they will soon realize the folly of their base tactics against this Science which came to STAY, no matter what the happenings.

W. H. should remember the time he has been suffering from the Hay Fever. He should be patient. He sent only 2 General Advice Charts.

The word ITISOMETER is derived from ITIS meaning the termination denoting Inflammation of the part to the name of which it is attached. It is some meter really!

E. H. was sent a complimentary Set of Spectro-Chrome Metry Encyclopaedia for further study.

Look out for gate crashers. Let no friendship or favor interfere in the performance of your DUTY.

**FIRST CHICAGO ILLINOIS PLANET**  
(MIDLAND HOTEL, 172 WEST ADAMS STREET)

**Meeting of Thursday, October 3, 1946**

**Successful Use Of Spectro-Chrome In:—Sprain, Pain, Burn.**

*Reported By:—HERMINE KUEMMEL, Recorder*

Deputy Kurt W. Bader was in the chair, 22 Affiliates were present. Deputy read the Communication from the Principal Office, followed by a discussion. He explained that there is no guaranty on Time-Switches and showed how they are to be turned on; most people turn them on slowly and burn the contacts; they should be turned on snappily just as an Electric Light is turned on.

A new Affiliate M. K. was greeted.

Also the Affiliates were reminded that there is no better Cause than Spectro-Chrome in aiding Suffering Mankind and to send voluntary Contributions to the Spectro-Chromarium Fund.

On the Educational Program, the Deputy read Article 41 Medical Humbug Of Common Cold from "Family Health Protector" and a lively discussion followed. He also read from our Encyclopaedia, Volume 2, Chapter 53, Infra-Green And Ultra-Green, and explained, how important it is to watch the Signs and to decide if Tonation should be given on the Infra or Ultra Division.

P. P.—I like to know what Atcowa I should use for a Cold. I had a Cold and tonated with Indigo, but it did not do much good.

Deputy—First always take Kardoscil and Spiroscil to decide if to tonate with the Infra or Ultra Division of the Spectrum. If there is Fever or Heat, you choose Ultra side, but do not go quite as far down as the Indigo. You may take Turquoise or if you are not sure yourself use Green Systemic and Magenta on Area 4. A Cold is usually a lowering of Body and Blood Temperature, caused very often by improper dressing especially with the women. They do not dress warm enough. For this reason, silk stockings should be discarded. In order to bring about the necessary Circulation, tonate with Orange, which is  $\frac{3}{4}$  Red and  $\frac{1}{4}$  Green; the Red supplies the Heat and the Green cleanses. Cold and warmth have a great influence on the Tissues; with a Cold your Nostrils will close or choke on one side. You also will notice that Frontelim lessens and too much fluid stays in the System.

A. P.—Last Saturday morning I turned my Ankle and sprained it; it was very painful and returning home, I tonated with Indigo. In the evening, I tonated again with Indigo; the Pain subsided entirely and the Ankle appeared normal, so I was able to go to work.

Deputy—You used the right Atcowa. I could not have done any better; for Pain Relieving and rebuilding the torn Tissues, Indigo is the best.

J. B.—Friday night, I canned Tomatoes: the crock broke and the boiling Tomatoes splashed all over my Face, Neck and Chest. It burned terribly. Immediately I tonated with Blue and in a half hour the Pain subsided and did not return any more. I keep on tonating every day and it is healing wonderfully without any trouble.

Deputy—My friends, if Spectro-Chrome did not do anything else, than normalate the Burns, which in so many cases are fatal, it would be worth its value a thousand fold, but look at all the many other Attributes Spectro-Chrome has: there is really no end to it. Accidents are

all Acute Disorders and are normalated by the Ultra-Green Division of the Spectrum. Once I was called to a case, which looked almost hopeless. The Priest was present administering the last sacrament. Kardoscil 54, Spiroscil 25; one to two is a hopeless case. The man had such a Chill he could not even get his clothes off; a hot bath and later a Tonation with Turquoise normalated him. He was up and around the next day. You have to introduce the Heat in the Body again.

A lively discussion followed.

F. J.—If a Cold too is very Persistent, do I have to go on the Ultra side?

Deputy—Always watch the Signals.

E. B.—My husband had some Teeth pulled; tonated with Indigo, but Pain did not subside, in fact it became worse. Next time he tonated with Orange and it drew out plenty of putrid matter.

Deputy—If there is an Abscess you use Orange; as a rule, there is not enough Circulation in the Gums.

R. M.—I had a severe Pain in Areas 6-7-8; could not breathe or speak, could not lie down on Back or side. I thought this was the end; my Head felt cool and was alone tonated with Blue and after 35-40 minutes felt better. After the hour was over, I could walk again and went to my shop, but felt that I was not quite right. The next morning I had the attack again, I took a hot bath and coming out of the bathtub, had another attack, but I dressed and went out. In the evening, after coming home, I used Indigo and wondered if I used the right Color.

Deputy—There seems to be a Functional Disorder; you should always take the Ratio; probably Orange would have released the Spasm and stimulated the underactivity in the Body. Please, fill out a Sufferer Chart and bring it with you at the next Meeting; then we can advise you.

## FIRST ALLENTOWN PENNSYLVANIA PLANET

(HOTEL AMERICUS, SIXTH AND HAMILTON)

**Meeting Of Thursday, October 3, 1946**

**Successful Use Of Spectro-Chrome In:—Pain, Stiffness, Injury, Lump, Burn, Swelling, Soreness, Fester, Nervousness, Eye Disorder, Bruise, Cold.**

*Reported By:—MAE BURNSIDE, Recorder*

Deputy Edwin D. Moyer was in the chair; 41 Affiliates were present. Communication from the Principal Office was read. The Sub-Deputy spoke about her visit to Malaga, New Jersey and about a woman who was agonizingly burnt by the X-Rays. She then read from "Family Health Protector" how Spectro-Chrome is asked to repair human wrecks, the results of medical and surgical butchery.

She then spoke of a woman whose Breast was removed; also of a young woman with painful Knee and stiff Toes. Orange Local moved them in 1½ hour.

M. P. reported she hurt her Foot, having had a bad fall last May. Her husband fell and bruised his Elbow. Thought it would go away, but, it developed a Lump which grew to the size of an egg. Tonated with Turquoise and Indigo Local; did not help, so filled a General Advice Chart and received Free Guidance, to irradiate Orange and Indigo Local. The Lump disappeared and the Elbow moved.

H. L. who was burnt badly on the Leg by Gasoline, then showed the improved healing to the Affiliates. He was in bed 3 weeks. Used Green and Indigo Local.

F. R. testified to having Persistent Colitis with Spasms. Was in the Hospital 9 times. Has been using Spectro-Chrome since last August and takes no more Pills and has normal Eliminations.

P. M. had an experience with her Foot. While harvesting, something pierced the Foot and by evening it started to swell and feel sore. It festered. Orange and Indigo Local normalated it.

C. N. spoke of her ever increasing gratitude to Spectro-Chrome and what it means to the Body.

C. K. told of her husband having been in a highly nervous and fearful state. The Medical Doctor had told him he would have to take a Pill a day as long as he lived. His walking was formerly unbalanced and the Eyes had a Stare. He does everything for himself now and returned to work.

E. M. fell and bruised his Shin. Had severe Pain. Took 2 Tonations of Turquoise and became normal.

G. W. had a bad Cold accompanied by Stiffness in the Neck and Congestion in the Chest. She is now normalated by Spectro-Chrome.

**FIRST DETROIT MICHIGAN PLANET**  
(CONCORDIA HALL, 62 EAST COLUMBIA)

**Meeting Of Thursday, October 3, 1946**

**Successful Use Of Spectro-Chrome In:—Wound, Infection, Gash, Pain, Fever, Sore Throat, Cold, Tooth Extraction, Rheumatism, Measles, Earache.**

*Reported By:—ELIZABETH ROEMMING, Recorder*

Communication from Principal Office was read and discussed.

Deputy—I received this Night Letter from the Institute that the Post Office Injunction Suit was thrown out of Court.

The Affiliates were shocked to hear such news.

Deputy—What has happened to our Country? Are not we supposed to be a Democracy? No hearing granted! How can you convict anyone when you will not let him tell his side of the Case. Did the Dictators do worse than that? What a crime against Humanity!

He then asked how many would like to attend the new Class in our Science. Six hands were raised.

Deputy—Dinshah will not come here for six people. Here is an opportunity to learn from Dinshah himself—think it over carefully.

B. N.—Before the Case Reports are given, I like to make a special request to the Institute regarding the Spectro-Chrome Magazine. I feel some Affiliates are being penalized because of the negligent Affiliates. For instance, some of our people are too ill to attend these Meetings, yet are using their Equipments faithfully. They would enjoy reading what is going on among the different Planets throughout the Country, but are denied that privilege. Would the Institute consider written explanatory requests?

Case Reports followed:—

J. R. reported husband hurt while working at a Machine. One Finger had to be amputated and the Finger next to it was broken.

Suffered severe Pain. One week later, Hospital Surgeon said there was a very bad Infection. Sufferer complained of Pain under Arm. Called the Deputy advised to stop the Medical Doctors and use Spectro-Chrome solely. Two days later, Pain stopped and Pus started oozing from the Wound. Now, the Pus has drained and the Hand is healing nicely.

M. H. said her husband had a bad Gash on top of his Hand requiring 18 Stitches at the Hospital. Taken home and started using Spectro-Chrome. Within 2 weeks, Hand almost healed and there was very little Pain during that time.

V. C. reported Pain in right Hand and could not raise his arm. His wife insisted on using a certain salve (This Salve is highly advertised on the Radio to relieve Muscular Strain). He was not satisfied, tonated with Yellow that evening and during the night took another Tonation. In the morning the Pain was gone.

Deputy—Let me ask you a question; why did you use your Spectro-Chrome last?

Affiliate—I guess I just didn't feel sick enough. (Laughter)

Deputy—Forget your Salves and Pills; go to your Spectro-Chrome immediately regardless of what the Disorder may be. You will always get results.

M. R. reported Fever; tonated with Turquoise. Fever subsided.

G. S. reported young daughter sick and had a Fever on Sunday. Tonated with Turquoise and Magenta. Condition cleared and child attended school on Monday.

K. R. reported coming home from work one evening with a Sore Throat; Kardoscil 69, Spiroskil 13. Tonated with Orange. Went to work the next day but in the afternoon began to feel quite sick. In the evening, Kardoscil 118 and Spiroskil 16. Unable to believe Kardoscil registered so much he took the Ratio several times, but the answer always remained the same. 118 to 16. Tonated with Purple; Kardoscil became 96, Spiroskil 16. Next tonated with Orange, Kardoscil 86 and Spiroskil 18. Two Tonations of Green made no change in the Ratio. His wife called B. N. the second day and she advised to use Yellow. Did so and the Kardoscil was 80 and the Spiroskil 18. As sick and as miserable as he felt, he lost only two days work.

E. R.—I like to say a few words. I do not believe my husband really knows how sick he was. The heat from the Body was terrific and his Breath was hot. He had difficulty raising his Arms and to cross his Legs was quite painful. His Eyes had a very peculiar glassy look about them. When B. N. suggested Yellow, I said the Eliminations seemed to be about normal. He never lost his appetite, but he did eat lightly and then it was mostly Fruit and Fruit Juices. I said he was intending to use Lemon, but she said use the Yellow instead. He did and in no time at all the Ratio was normal. He was quite sick the first day, but, the second day all Pain was gone from his Body. I wanted him to stay home from work the remainder of the week, but he insisted he felt fine. We both thought it was remarkable the way the Body responded to Spectro-Chrome and we are grateful we have Spectro-Chrome in our home.

M. W. told how she had been sick for many years. When she received her Spectro-Chrome, Dinshah told her it would take a long time. She has tonated faithfully and the last six (6) months has felt so much better. She went on a vacation for three weeks. During that time, she

had no Tonations and felt fine. When she returned home, she resumed tonating again, as nothing helped her like Spectro-Chrome.

C. G. reported Colds, among the members of his family; successfully normalatad.

C. W. reported Tooth pulled. Afterwards, tonated with Turquoise and had no discomfort.

H. R. reported husband ill with Rheumatism. Had been dosed so much with Vitamin B, that Hand was swollen. Unable to get relief. After tonating with Spectro-Chrome able to go to work. Found Blue very beneficial; was able to sleep under it. Son had the Measles and also a very painful Ear that constantly drained. Medical Doctor gave him one of the Sulfa Drugs, but child remained sick. Finally, called J. N. who advised her to stop doctoring and use Spectro-Chrome. She did that. At times she doubted it and even called J. N. during the night, but eventually the Ear healed. The Tonsils were not removed. Very well pleased with results.

J. N.—As I was reading the Magazine before the Meeting started, I noticed my name listed on page No. 4744 as a Member of a Committee. I may state at this moment that R. C. is now deceased. I should also like to have it recorded in the Minutes that I have never had any papers to sign or acted in any capacity whatsoever.

Albert Greenham spoke briefly about his Investigation. To date he received very little support. Many of the Affiliates are not willing to co-operate with him. He did find out from reliable sources that from \$1,070.00 to \$1,170.00 were donated. If anyone wishes to contact him would they do so as soon as possible, as he intends to wind up his Investigation within a few days. He read a letter which he received from the Institute.

Albert Greenham conducted the Educational Program and it was held as a symposium, three Affiliates participating with him. J. R., C. W. and W. K. Last month, he asked these Affiliates if they would like to join him in a discussion and they agreed to do so. The subject matter was the Pituitary Gland and its relation to the Spleen and the Liver. As the Affiliates mounted the Platform each carried volume No. 3 of our Encyclopædia. They put their books on the table. Albert Greenham then asked them questions pertaining to the Pituitary Gland and its functions. All questions were answered without any hesitancy. It was obvious that they had studied and knew all the answers. During the discussion Albert asked the Affiliates if they found this type of program interesting. The answer was yes, we certainly do want to continue. The Affinity waves were discussed, also the Glands and where they are located within the Body and the particular Color of each Gland. The new Affiliates were advised to use Green when in doubt. The symposium closed with a brief talk on the Pineal Gland.

Albert Greenham thanked those taking part (applause). Said he "What you heard tonight is all printed in our Encyclopædia. What these Affiliates have done all of you can do. If you want to introduce Spectro-Chrome to your friends, you must know about what you are talking. I like to see everyone of the Affiliates taking part in discussions such as these.

The question then arose about what to discuss next month.

Albert Greenham—Suppose you were tonating Yellow; did you ever wonder what happens to the other Colors?

R. G.—The others are *filtered out*.

Albert Greenham—Suppose we wait and see next month.

He called upon three other Affiliates to take part.

J. N.—I certainly enjoyed this discussion. The Human Body is a wonderful Machine. The study of Spectro-Chrome Metry answers completely puzzling questions that arise.

The Deputy thanked those who took part in the Educational Program and said we shall be looking forward to the symposium next month.

EDITORIAL

REMARKS

Most cases come to Spectro-Chrome, when given over by other methods. Even our Affiliates do not care to continue their Affiliation once their Disorder is normalated. Our By-Laws need more severity to keep them in line.

There is no Charge against J. N. Her name was in the list specified and appeared as a Signatory. Albert Greenham did a creditable job and you know the result. Now, let it be a lesson to all of us and start a new slate to preserve our Organization as an exemplary, graftless, Service For Suffering Humanity. Out with favoritism and face worship!

The Symposium idea of conducting the Educational Program is deserving of encouragement. Affiliates will feel its advantage and inspiration.

—○—

**DINSHAH P. GHADIALI**

**AND**

**DINSHAH SPECTRO-CHROME INSTITUTE**

**DECLARED "GUILTY" ON ALL COUNTS**

**BY FEDERAL JURY**

The Indictment 3423C, against Dinshah P. Ghadiali, the Originator of the Science of Spectro-Chrome Metry and President of Dinshah Spectro-Chrome Institute, was brought to Trial, in the United States District Court, Camden, New Jersey, on Monday, October 21, 1946, before the Honorable District Judge Phillip Forman, after he denied a prior Motion To Quash The Indictment. For the Government (Food And Drug Administration) Honorable Assistant United States Attorney Grover Cleveland Richman appeared as Prosecutor. Joseph McGuire, Attorney from the F. and D. Administration in Washington, D. C. assisted him; Dinshah, as usual, appeared in his own Defense and that of his Corporation.

It was the longest Trial in the history of the Court, lasting 42 days. The Charge was that the Defendants transported in Interstate Commerce 12 Spectro-Chrome Devices, with "Labels and Literature having False or Misleading Statements." Jury rendered Verdict of "Both Guilty On All Counts." Motions for "Judgment Of Acquittal" or "Order For New Trial" are pending.

Some details will be in the next issue.
