FLYING SAUCER MOVEMENT — WHERE HEADED AND HOW?

(The following is an extract of a talk given by your Editor at the Northern California Spacecraft Convention, Sunday, September 6, 1959.)

ON every hand one reads and hears of the huge and seemingly irresolvable problems which are now facing the people of the world and which seem to be drawing them closer and closer to the brink of total and complete annihilation by means of one type of catastrophe or another.

IF the accidental or intentional detonation of a nuclear bomb over one of the cities of a major power on earth does not set off the final war to once again destroy earth's civilizations, scientific indications and many current prophecys tell of possible polar tilts or flips which could possibly end all earthly life. If this were not destruction enough, ever and ever higher taxes, poverty, want, crimes of all sorts and descriptions, and disease and suffering on every hand continue to bring destruction, fear, and insecurity into the lives of all our people.

Is there no alternative, one might ask, to these destructive conditions, or to being blasted to a fiery non-existence via the fire and brimstone method by nuclear bombs? Can't something be done to prevent it and the almost certain world wide holocaust towards which the world seems headed today?

To these and other previously unanswered questions, the Flying Saucer Movement now rises to the challenge to provide the answers and the solutions to mankind's problems. This is why we have come into existence as a movement, to show mankind the or a way out. To offer Earthman an alternative or choice, a passport to either Paradise or Oblivion. The wrong choice leading to complete annihilation, or the right choice leading to ever higher and more advanced states of existence, and to help prevent, if at all possible, the wrong choice from being made. This we can now do, since as fantastic and unbelievable as it may seem, we now are aware of the solutions to the problems which face mankind of earth. But it is not enough for a handful of people to be so aware, as the solution to man's problems depends upon each man's actions. What the nature of his right actions should be, must be communicated to him and the reasons for the necessity of these actions explained.

Our job as a movement then, is primarily one of mass public education to correct man's folly through ignorance. The statement made nearly 2,000 years ago that "My people are destroyed by their ignorance", could never be more appropriate than today.

Our job is as simple as making our people realize the nature of the dangers facing them, and of the solutions to their problems. Then, since the law of self preservation is one of the strongest human emotions, they will take the necessary action to solve the problem they face.

Men for ages have worked for and dreamed about Heaven or a Utopian like existence upon the earth, but it has only been since recent times that mass production and modern technology have made it possible to produce an abundance for everyone on the earth.

A brief outline of Prior Choice Economics, which makes it possible to eliminate the bottleneck of a money system, and to distribute that abundance, is printed in Issue No. 6 of our former AFSCA publication, THY KINGDOM COME, now changed to AFSCA WORLD REPORT.

If you haven't studied this fantastic solution to thousands of problems with one simple formula, I sincerely urge that you do so, since it is upon the adequate understanding and application of this new social and economic structure that the fulfillment of the important non-destructive prophesies and promises made long ago depends.

Some of the additional and more specific and seemingly fantastic advantages that Prior Choice Economics makes possible are listed in the AFSCA or Amalgamated Flying Saucer Clubs of America First National Convention Souvenir program and are also reprinted in this issue of AFSCA WORLD REPORT on page 9.

Yes, with the help of the Space People and all of you, our own planet can very soon solve most of the major problems now confronting our people. In order to do this, several steps must first be taken to accomplish our goals.

AFSCA MOBILE UNIT AT THE GOLDEN GATE

The AFSCA Mobile Unit traveled to the Bay Area during the Labor Day weekend for the purpose of being at the 2nd Annual Space Craft Convention at Pleasanton, California. Among those aboard were Gabriel Green, President of AFSCA; Miss Helen Sibert, Vice-President of AFSCA; Richard T. Miller, Executive Vice-President of AFSCA and Mrs. Miller. After the successful convention, the Mobile Unit toured the Bay Area. As usual, many heads turned to gain a second look.

George King, leader of The Aetherius Society of London, England, is now entering the fourth month of his stay in California.

The psychic, metaphysical and flying saucer expert has affectionately become known in Southern California as "King George". In short he has won an admiring following here, while drawing large audiences at all of his appearances.

King, on a U.S. tour, arrived in Los Angeles during the week preceding the first national convention of the Amalgamated Flying Saucer Clubs of America, July 11 and 12 at the Statler-Hilton Hotel in Los Angeles.

He made his West Coast debut at the Convention with three speeches, including a Transmission from Mars Sector 6, the Martian for whom he is a channel. The halls were jammed as he spoke.

The convention was quickly followed up by appearances in private homes. On these occasions, King spoke to between 30 and 40 persons each time, permitting a more intimate gathering.

Early in August, King made a side trip to San Diego and then north to Santa Barbara. Returning to Los Angeles, he participated in several public lectures. On August 14, King spoke on "Life on the Planets", before 350 people, at the Park Manor, 607 S Western Avenue in Los Angeles. The following evening he delivered a talk on "How YOU Can Cooperate With the Flying Saucers" for a capacity audience of 100 at the Science of Mind Church in Pasadena. The following week he made a return appearance at the Park Manor where around 550 enthusiastic spectators witnessed another transmission.

The trail then led north to the San Francisco Bay Area where King repeated his pattern of lectures for several of the flying saucer clubs in that area. He also delivered two talks at the Northern California Spacecraft Convention, a two-day affair held at the Alameda County Fairgrounds outside of Pleasanton, California, a few miles east of Oakland and San Francisco.

King's lectures have followed several basic themes. He has on some occasions spoken of life on other planets closest to Earth including Venus, Mars, and Jupiter. Another basic lecture has been on the practice of yoga breathing exercises, another an introduction of himself and the Aetherius Society, and, of course, the Transmissions.

Perhaps most significant, however, have been his talks on how individuals may help "The Great Plan". Immediate actions advocated by King center about prayer and meditation. Recommended are the practice of meditation during certain periods of the day and visits to areas specially charged by the Space People through King to send off powerful vibrations, beneficial to the planet.

George King

These "Holy Places" were described by King as mountains which have been "charged". Nine mountains in the British Isles have already received this treatment, he stated.

The first American mountain was charged through King on August 9th 1959. This was Mt. Baldy, a 10,080 foot peak north of Upland, California, which in turn is east of Los Angeles. King led a pilgrimage to this "Holy Place" on Sunday, August 16th, heading a group of more

PART II

(Editor's note: This is the Second Part of the Dick Miller Story. The true incidents as they happened to this remarkable young man.)

September 15, 1954, 10:30 P.M. Voice. 11 Meters.

"I am pleased that you came. From your expressions I can see that you doubt; that is good, you will be hard to convince. We do not believe it is necessary to resort to the sensational, to foster in intelligent human minds the consciousness of reality beyond the physical realm. What silly subterfuges you use to shield your thoughts. Know you not that your minds are open to us. Prepare yourselves, from the West one approaches who is not as stated. Fear not, for yourselves, one of us shall be present when this occurs. Our time for leaving nightly draws nearer; soon we leave to return again. Forgive our abruptness, but this method of communication is tiring. Continue to observe us, we will speak again."

Again, as we were to find out in following messages, the signal was enormously powerful. It had a tendency to cause the receiver to howl and shriek. Several interesting points were brought out in this message which truly astonished us at the time. Their reference of being able to see our expressions caused a rather embarrassing few moments. Evidently, by means unknown to us they had the ability to look at us whenever they wanted to. Also, as it was stated, they must have enjoyed telepathic ability and could actually read our thoughts whenever they desired. This too caused some embarrassment. The first sensation of so revealing a fact was to try and keep your mind a complete blank. However, as you can well imagine, this is not within the realm of possibility, so I decided that from then on it would be necessary for me to completely control my thoughts; a lesson that all of us must learn sooner or later. Another interesting comment was their warning regarding someone coming from the West.

As can be quite clearly seen, there was a pattern in the use of an odd method of their sentence structure. From their choice of words it was becoming increasingly apparent that they had learned our language from monitoring our radio broadcasts (later confirmed by them) and were not too familiar with its use. Most of the messages we were to receive in the future were in voice and in each case perfectly spoken English was used. Several weeks later an amateur radio operator in the vicinity, who had heard the message on his receiver and had made a tape recording of it, got in touch with me and gave me the tape recording. My first reaction to his contact was that here was the answer to our short-wave broadcasts. His explanation was quite simple. His equipment was not capable of transmitting on 11 Meters.

It was shortly after this message was received that Pete decided to drop out of our group as his work was taking up a greater amount of his time, and also his friends were making him the brunt of many jokes concerning his interest in flying saucers. Jim, who was an auto mechanic, and who was studying radio as a hobby, remained with our group until after we received the second radio message a few days later. Reluctantly, he explained to me that all of this business of picking up radio messages from space ships was a little frightening for him and he also expressed certain religious objections to such a thing as life on other planets, space ships, etc. He asked his name not be used as a reference, as did Pete, because of their fear of adverse publicity being brought upon them. I promised I would not state their names and therefore I am refraining from identifying them fully. Since they were not present upon any further contacts, their dropping out at this time had no lasting effect upon the authenticity of this account, as the people who replaced them in our group have not objected to having their names used as witnesses to the messages that were to follow over the next several months. This left Don and I, and we were convinced that we were on the trail of something that would not only be revealing to us, but also something that would benefit the entire world.

LOS ANGELES, Sept 14 -- Information received from outer space at 10:15 A.M. this morning disclosed that the Russian Moon Rocket did NOT reach the Moon, as it was deliberately destroyed when 190,000 miles from Earth by intelligent beings manning spacecraft from other planets. The reason for the destruction of this rocket was that the nose cone contained active disease and virus bacteria intentionally placed there by the Russians.

The purpose of this move on the part of the Russians was to contaminate the Moon with deadly diseases. This was to discourage future U.S. activity on the Moon, by exposing future United States Moon crews to mutated disease germs, in order to prevent the U.S. from any future use of the Moon as a military base.

According to the information received, Russia has no intention of ever landing on the Moon, as they are actively developing a radically new magnetic conversion spaceship propulsion drive, as a result of the loss of their first cosmic rocket, allegedly in orbit around the Sun. This Russian deception is calculated to divert the attention of the United States and the free world away from the Russian magnetic research, with which they intend to pass by the Moon and land on the planet Mars.

The Space People have pointed out that the Russians are not concentrating heavily in the field of rocket propulsion but rather in the field of electronics and magnetics. This information is verified by the findings of a recent U.S. team of scientists which inspected Russian technical progress recently. The Russians want us to keep thinking that their current research is still in the field of rocket propulsion.

The Space People have also stated that this information can be verified by information contained in the files of the U.S. Central Intelligence Agency.

The Russian intention is to keep misleading us as long as possible so that we will not be able to catch up with their advanced lead in the field of magnetic propulsion, which is one of the most practical means of accomplishing interplanetary travel and is the propulsion system used by spacecraft from other worlds.

The Space People have indicated that they cannot allow any vehicle of a destructive nature to contaminate outer space or the surfaces of any other planetary bodies.

WORLD ROUNDUP OF FLYING SAUCER NEWS

PARIS, Sept 23 -- Crew members of a Pan American World Airways flight from N.Y. to Paris reported sighting a mysterious luminous object that appeared to be a high altitude rocket.

REDMOND, Ore., Sept 25 -- An unidentified flying object was sighted over this central Oregon city by a policeman and an employe of the Federal Aviation Agency. Both men said the object glowed in hues of pale green, bright yellow and crimson and at times shot long blue bursts of flame. It hovered over the area for at least an hour, they said. Jet interceptors were dispatched from Portland air base but the object vanished in clouds at about 14,000 feet.

RUSSIANS SEE MEETINGS WITH PLANET BEINGS -- LONDON -- A Soviet scientist today predicted that space-probing earthlings eventually will meet up with beings from other worlds.

THIRD BELT OF RADIATION DISCOVERED -- WASHINGTON -- A third belt of intense radiation around the earth has been discovered by America's paddle wheel satellite. The new belt is closer to the earth than the two previously discovered Van Allen belts and it is not as thick. It starts 1,000 miles above the earth and is 310 miles thick.

SOVIETS HINT 'HIGHER LIFE' MAY EXIST ON PLANETS -- Soviet Astronomer Felix Segal suggested today that inhabitants more intelligent than man may exist on planets and that they already may be making flights into space. It is the contention of the Soviet scientist that one inhabited planetary system must exist for each million stars and consequently there must be about 150,000 planetary systems in our galaxy.

"UNDERSTANDING" OPENS FLYING SAUCER READING ROOM

A reading room for flying saucer and metaphysical books, magazines and tape recordings has been established by UNDERSTANDING at its International Headquarters recently opened to the public at 313 E Orange Grove Avenue in Pasadena.

All persons interested in flying saucers are invited to come and investigate the works of leaders in this field for themselves. Hours of the office are 10 A.M. to 4 P.M. on Monday through Saturday and Tuesday and Friday evenings from 7:30 to 9:30 P.M.

UNDERSTANDING is an organization devoted to bettering understanding between people of this earth and those not of this earth. It was founded in 1955 by Daniel W. Fry, leading saucer contactee from West Covina, California and an honorary officer of AFSCA.

UNDERSTANDING now has 23 Units in El Monte, Vista, Pomona, Orange, Long Beach, Pasadena, Inglewood, Riverside, Banning, Palm Springs, San Fernando, San Mateo, Oakland, Santa Cruz, San Francisco, Chico, Berkeley, Santa Rosa and Garberville, California; Grants Pass and Medford, Oregon; Baltimore, Maryland; and Brooklyn, New York.

All correspondence should be addressed to: UNDERSTANDING, Box 22 - Station C, Pasadena, California.

PLEASANTON SPACE CRAFT CONVENTION PERSONALITIES

Among the many speakers featured at the Northern California Space Craft Convention were, from left, Orfeo Angelucci, Otis T. Carr, Gloria Lee, and Reinhold O. Schmidt.

SPACE PEOPLE REPORTED AT AFSCA CONVENTION

(Ed. note: The following was received in a letter from Elana Lane and Leo E. Wagner of the Edifice of Creative Mind, 10804 Luitwieler Ave., Whittier, Calif.)

"Leo had an experience Saturday at the convention. While he was in the hall where our book table was, he saw a man standing alone with his head bowed. Leo thought little of this at first and looked away just for a brief moment. In this twinkling of an eye the man disappeared."

"On Sunday at the convention, while searching for water for the pitcher, among a multitude of people, suddenly a figure in silvery white appeared in front of us. As we wove through the crowd, this figure moved either to the right or left, whichever way we would move. She was ahead of us going the same direction as we were. And yet, when we came to the broad mirror and glanced in the mirror, there was no form of her. We looked around the corner and then after a brief moment we saw her again. She followed us until we reached the powder room and then seemed to vanish within the door."

Many further reports came to us at AFSCA Headquarters. Some reported that they were miraculously healed of severe ailments. This was not a healing convention, yet it seems that the space people must have known where they were needed and without any fanfare, supplications, etc., they performed their duties unnoticed.

Should any reader of this issue of AFSCA WORLD REPORT doubt that the above reports are true, he need only to search the literature of the past and he will find that through the ages many strange things have occurred. There has been no iron curtain dropped upon the people of the world to keep out the seemingly miraculous events that have persisted through the centuries. Only the mind of the individual prevents him from receiving the good that is rightfully his.

THE FLYING SAUCER MOVEMENT CONTINUED

First, we need better dissemination of the information and evidence that has already been accumulated by over a decade of research and investigation of flying saucers and related subjects by groups and individual researchers.

This we can accomplish by more and better conventions and by becoming more effective in our influence with the general public through more intelligent public relations and a better planned and organized campaign of public education.

Through the spectacular nature of the Flying Saucer subject, when we as a movement have gotten ourselves into position to take advantage of it through better organization and cooperative effort; we'll be able to command the attention and the eyes and the ears of the world upon our cause, because it is the people's cause, because it has the welfare of all the people's of the earth at heart, and because it is the Divine Plan for the evolution of our planet.

Then through making use of the vote, new age people with the interest of their fellow man at heart can be supported for political office, in order to pass legislation which will cause mankind's problems to cease and the destruction in his life to end through the transition of his society into a social system that coincides with Universal Law.

The modern day Flying Saucer Movement began to take shape nearly 12 years ago when spacecraft were first called to our attention by appearing in our skies to expand the consciousness and to stimulate the thinking of men of earth, to consider and to think about the possibility of life on other planets.

As a movement, we have made the evolution in consciousness from at first considering and questioning as to whether flying saucers were indeed real or not and did they actually exist. After overwhelming evidence of the existence of these craft was established through collection of data and intensive research, the question gradually evolved into "Where are these craft from?" Then, after another period of evolution, to "Why are they here?", and finally at long last, the general consciousness is rapidly expanding so that more and more people in the

ADVANTAGES OF PRIOR CHOICE ECONOMICS

1. Automatic retirement from work without any reduction in living standard.
2. Fair wages for all. Just reward for service rendered.
3. Free permanent insurance on everything.
4. No more taxes of any kind.
5. Guaranteed profits on all sales.
6. Increased production. Abundance created.
7. 100% distribution to the people of the abundance produced.
8. No decrease in purchasing power when sick or out of work.
9. Poverty and starvation ended.
10. Free medical and dental care for everyone, without the disadvantages of socialized medicine.
11. Major motives for crimes eliminated.
12. Free college education for all who want it.
13. Cradle to grave economic security without slavery or dictatorship.
14. Retains American system of free enterprise and individual initiative and prevents Communism and Socialism.
15. Trade between "have" and "have not" nations now possible.
16. Emancipation of women through economic independence.
17. Four-day weekends. Shorter work hours. More leisure time to enjoy life.
18. Personal and national debt problems solved.
19. Unlimited financing for everything such as highways, schools, civic improvements, scientific research and development, etc.
20. Permits application of free energy and the fantastically advanced technology of the Space People without economic collapse.
21. Moral and spiritual development accelerated.
22. The Universal Brotherhood of All Mankind established.
23. World Peace in our time.
24. Restoration of membership and representation in the Universal Confederation of Planets.
25. The Kingdom of Heaven, Nirvana, Paradise, Utopia, or a non-destructive state of existence established on the earth at last.

OUTSTANDING PERSONALITIES—GEORGE KING CONTINUED

than 100 persons. A ski lift provided a boost up part of the mountain, but the group climbed at least the final 2,000 feet. Several weekends later a second assemblage climbed the peak while King was in Northern California. Still a third pilgrimage was planned for October 11th, following King's return to Southern California in late September for two more talks at the Park Manor.

As King describes his experience, he was first contacted by Space People in May 1954. Previous to that contact he had not heard of flying saucers except for occasional reports appearing in the English press. He had been an active student of yoga for some years and had considered that his life work lay in his abilities to heal the sick by application of his advanced metaphysical knowledge.

But in a few moments that Saturday morning in May, his entire life was changed. In the contact he was told to make certain preparations to become a "Voice of Interplanetary Parliament. Soon after the initial contact, King was approached physically and given fuller directions. He fulfilled these instructions and a few months later found himself able to gain telepathic rapport with the being Aetherius of Venus. Since that time King has received over 500 speeches from the space intelligences, many of them in front of public audiences.

King founded the Aetherius Society in London to propagate the great wisdom of these highly evolved beings from other planets. He published his magazine "Cosmic Voice" periodically and is the author of "The Twelve Blessings", which he terms a "New Age Bible".

THE BOOK CORNER

"WHY WE ARE HERE" by Gloria Lee

The question "Why we are here?" has been asked down through the ages by almost every human being upon the planet Earth. This book gives many startling revelations concerning the answer to this question. Unique among the many publications dealing with Space Personages, "Why We Are Here!" was dictated to Gloria Lee by a Being known only as J. W.

The autobiography of Gloria Lee would be fascinating in itself as she has enjoyed many and varied experiences not afforded everyone. She learned to fly before she could drive an automobile. As an airline stewardess, she flew over three-fourths of the world for five years. She became actively engaged in psychic research and began the study of esoteric science. Her initial contact with the Being from Jupiter was made in September of 1953 at the Los Angeles International Airport.

The actual writing of the book did not take place until after a 'conditioning' period, during which time she did not see her contact. Also unique among the many books that have been written over the ages, the Authoress confesses that she has read and studied the contents of this book as avidly as if she had picked it up for the first time.

"Why We Are Here!" will reveal to the reader: What is wrong with our planet and what we can do about it. Why our scientists will not be allowed to fly to the moon or to any other planet. About God and the universe. What the future holds for all of us. And many more topics of extreme interest.

This book has been carefully reviewed by the staff of AFSCA WORLD REPORT and has received its stamp of approval for 'MUST' reading.

Gloria Lee

FURTHER CONFIRMATION OF ROCKET DESTRUCTION

Sept 17, 1959, 10:55 P.M. - Machino speaks through Channel Elana Lane: The message previously sent forth to officials in high places, of dignitaries and of space craft enthusiasts - recipients of interplanetary communications - concerning the Russian objective of hitting the moon with their space missile - is hereby confirmed through this channel.

Because of the bacilli housed within the nose cone of the missile, this flight was intercepted and destroyed by those of interplanetary direction in order that the damaging material be not dispersed upon the moon or in any way contaminate the atmosphere of the moon.

This being verified before, is but another confirmation and should be given as such to those in high office concerned with space craft activity, peace on Earth and a more evolved state of existence. Peace to all our Earth brothers and sisters in love and watchful protection.

THE FLYING SAUCER MOVEMENT CONTINUED

Flying Saucer Movement today are asking "What can I do to help clean up this earthly mess and not only help myself, but all of mankind in the process?"

There are many ways in which all people, regardless of their present circumstances, financial or otherwise can help this movement now.

The Flying Saucer Movement must be put on a sound and practical business-like basis the same as in any other business activity designed to render service to individual people, community, nation, or the world. In order to grow and continue to render more effective service, we need to have more of you capable people able to devote full time to this vital activity. However, unless adequate financial support is available, normally you cannot. So you see we are all still victims of the money system, and until we are able to put Prior Choice Economics into operation, we'll have to work with the monetary laws.

AFSCA is definitely trying to realize adequate financial support to finance its many planned projects to better serve other independent research groups and to better carry out its role of fostering cooperative and constructive action in the Flying Saucer Movement as well as promoting more public interest for the benefit of all groups.

Because of the cooperative effort of the Space People in timing a most effective sighting by five different airliners on the day of our AFSCA First National Convention at the Statler Hilton Hotel in Los Angeles in July, to fulfill their promise of aerial support of the convention, and because of the fine cooperation of the many convention speakers, world wide dissemination of Flying Saucer news was achieved and much new interest and general public acceptance and receptivity was created. According to some, AFSCA achieved the impossible of breaking the press barrier, at least temporarily. If this can be done through large numbers of people working and cooperating together as we did at the convention, just think what impossible accomplishments might be achieved if we continue to work and cooperate even more closely?

Right now, you can help in some way, no matter what your position or talent. Tell your friends about the space people and about AFSCA and about the brand new AFSCA WORLD REPORT magazine. Get them to support flying saucer group activities with their time, talent, money, and influence.

One of AFSCA's many ambitious projects now being worked on is to help each independent research group become more effective in their public contact by means of an especially prepared promotional kit designed to aid and make recommendations to clubs, through experience gained by those clubs which have found the most effective public relations approaches, by a trial and error process, or from valued experience.

More and more cooperative effort among groups and contactees is needed, with less criticism of others in the field whose experience or range of knowledge is different from one's own. After all, all things appear ridiculous or impossible until one's awareness is expanded sufficiently to cause understanding.

More organizations and better organization of them is also needed in order to be prepared to take every possible advantage of the support of the Space People when it is offered to us. And I can assure you that just as fast as the right saucer groups are ready to take advantage of it, the help will be there from the Space People.

Whatever your present group or affiliation, we urge you to join AFSCA as an individual member and to urge your group to become an AFSCA affiliate, which subtracts nothing from its own independent status or original make up, but merely enables AFSCA to more effectively serve each group and the best interest of the whole Flying Saucer Movement. We need your help. When received, we can help you and your group in return.

Join AFSCA to add the more effective influence and news value that larger numbers of people interested in an activity can attract; to be better informed on the latest news in the movement through receipt of the now monthly issued AFSCA WORLD REPORT Magazine; and to help support this activity which can continue to exist and accomplish its goals only with adequate financial support. Join and support your local clubs not only by subscribing to their publica-

Continued on page 12.

THE FLYING SAUCER MOVEMENT CONTINUED

tions, but by attending their meetings and by giving your volunteer time to help them in their activities. My friends, this movement is what your actions make it. The Space People will not save you if you are too lazy or selfish to make a few sacrifices to help save yourselves.

You may sit on your soft padded day dreams and escapist philosophy, ignoring your problems and their solutions, hoping for the best and inviting the worst, as long as you want, or until destruction knocks at your door and jars you to a painful awakening. But, as for me, I am now ready to work with all those who are not too lazy and disinterested in the welfare of themselves and their fellow man to work to save this planet and its peoples.

The big, all important, question of today, my friends, is not whether Space People or Flying Saucers do exist or not, or what life and conditions are like on some other planet. But the really important question of the moment is a question of survival. The question of survival of advanced life on earth should be commanding the undivided attention of every man, woman, and child on the earth because it affects them all. Their lives depend upon it. Will mankind of earth manage to survive and fulfill their rightful destiny among the cosmos?

I don't ask you to accept or believe one thing that I say to you here today. How could you unless you already knew within your own heart and soul that what I am saying is true. But I'll tell you this for the record, and to once again sound the call to action of the elect among you. I now know how to achieve those idealistic conditions which I have related to you are accomplished by a Prior Choice system of economics.

Working together in cooperation with those people who are sincere enough and honest enough with themselves and others, and intelligent enough to recognize the need and then be willing to make the necessary personal sacrifices required of those who would render maximum service to their fellow man, we can accomplish the seemingly impossible, to fulfill a task started long ago.

Why should it seem impossible when the predominant religion supposedly accepted here in America has long told you these things would one day occur and be fulfilled, and then told you how to recognize "The Time of the End" of the old world and order of things when this would happen?

My friends, ancient prophecies are being fulfilled before your very eyes. In our skies the Angels abound. The signs in the sky indicate that "The Time of the End" is at hand. Nature on a rampage in various places throughout the world indicates that we are in "The Latter Days". More and more contacts with Spacemen indicate that the Heavenly Host is standing by to help, to assist, to help fulfill that which was promised.

• The Flying Saucer Movement needs your active participation, help and support. AFSCA needs your participating help and support. And the Space People need your right action if they are to more effectively help us to help mankind.

If you will do your part, I guarantee to you, that working together, with a combination like this, we will not fail, we cannot fail to achieve our goals.

The world tomorrow, my friends, is in your hands and others like yourselves who have had the advantage of specialized information and knowledge. What will you make it? A Heaven or Hell? Your actions will make your choice for you.

'COULD BE' DEPARTMENT

Soviet scientists claimed recently they have proved that a Martian space ship crashed in Siberia 51 years ago. Moscow radio said the crash came when the space ship braked too hard as it came in to land near Yenesel on June 30, 1908. The explosion which followed devastated acres of forest land.

Professor Fred Hoyle, of Cambridge, said, "I doubt this space ship story very much on the evidence, and it is just about impossible for a Western scientist to go to Russia and check on it for himself." (Quoted from Orbit, August 1959)

THE DICK MILLER STORY CONTINUED

As truth is always stranger than fiction, the next episode of extreme importance that occurred to me was something that convinced me our group was actually dealing with an intelligence far beyond ours. Upon arriving home one day I found a set of plans for an electronic apparatus deposited in my mail box. My knowledge of electronics at the time enabled me to determine exactly what the equipment was supposed to represent, but to further convince myself, I had these plans checked by several engineers in Detroit. They, naturally, were quite interested in them and wanted to know where I obtained the plans and if I would attempt to build the equipment. Of course I did not inform any of them where I had obtained the plans and what I intended to do.

The set of plans had been prepared on ordinary note paper that could have been purchased at any store, therefore tracing the source of the paper was out of the question. There was one thing included in the drawings which led us to believe that they came to us from the Space People. On the last page on the bottom right corner was the single word "MASAR" (later confirmed). I remembered that in Mr. Williamson's account of Space communication the word Masar, supposedly meant the planet Mars in an ancient language called the Solex Mal. After a careful study of the plans it was noticed that certain engineering concepts were alien to our present technology. However, it was my intention to build the equipment using whatever I could to provide me with, to the best of my knowledge, the only light beam transmitter and receiver in existence on this earth. It turned out that several modifications were necessary, because of electronic parts listed that were not available anyplace in our world. A considerable amount of time was spent in building and testing the apparatus. Before I had the chance to actually try communication with it, I received another message on the radio.

MONKA AND MURKU SPEAK

(Note: The two Space Beings who speak in this lecture are MURKU, a Venusian scientist (who describes a therapeutic device the Space People are going to make available to Earth's people), and MONKA, a Martian of high position, who answers more questions concerning the visits to our planet.)

Greetings, my Brothers. I am MURKU. My purpose in speaking is to relay this information. We of the Confederation do have a purpose in speaking to you in this manner. I have before me a device which is capable of adjusting the forces of unbalance which exist in the human body. The effects of this device are most helpful in polarizing the electronic cell nature of the body, thereby creating a new force and a general betterment in the condition of health. It can and will alleviate the suffering of a great many. In this device we utilize a source of actinic light which is dispersed through a system of primary light filters. The emanations of this light follow in the spectrum of visible and betatone, the invisible spectrum. Second order energies which these emanations consist of are what is responsible for the polarization of the electrical charges existing in all cellular life. This condition of balance that is brought about will certainly result in a new feeling of health and well being. Since this device is shortly to make its appearance, it is desirable that we mention the fact that there is no danger of over exposure to these second order energies. Therefore, it is entirely safe in use. The human body can accept only so much of this radiation - the remainder is thrown off. Be aware, my Brothers. Soon the detailed plans will be in your possession, Men of Earth. And now I step aside to let another speak with you. One moment, please.

Greetings my friends. I am MONKA. It is my purpose to answer several questions more than my brother had time for. You have asked why have we not contacted those in a position to inform your people. I will state with the utmost sincerity that, for example, your President has spoken with our representatives and so have certain of your scientists. But, beyond this, we have spoken to all your world leaders. Some chose to listen to our statements and believe; others, unfortunately, chose to circumvent our offers by not informing their peoples of these contacts. Mankind and your planet is eager to know the truth. It is a pity that a few should decide that the majority should remain ignorant. My friends, power is the holy entity worshipped mostly by the Earth's people. The way to this power is contained in a monetary system. Currency on your planet can buy justice and equality. Those corrupt interests which control your planet's finances also control your people,

By obtaining interests in your newspapers, radio and television stations, and all your news disseminating services, knowledge is quite easily withheld from the people.

Money, however, is only a stepping stone, so to speak, to the major interests of power. By this I mean, electric power, atomic power. Power and energy control all of the nations upon your surface. Could it be that if visitations from space and visitors from space, in opening negotiations with your world governments, had offered power and energy from a source that was universal, and could not be charged for; do you my friends believe that this could be the reason verification of our presence has been withheld from your people?

Again, could it be conceived of that certain power interests in hearing of this and foreseeing their opportunity to make a profit on the earth's greatest commodity, would see it fast disappearing? And seeing also a collapse of an already shaky monetary system, again, could it be that these powerful individuals and interests would not care to have this happen? For if my friends, your people were informed that unlimited power was available to them free of charge, it would immediately shake your economic system to the core. A huge financial loss to some. Would you rest easier, my friends, if I positively stated that we of the Confederation had made such offers in the field of science to your leaders? Would it be of interest upon your planet to know several of our craft are in the possession of your Government? That in examination of these craft they know we have such power and control, and use it. Does it seem plausible to you that in order to further conceal the truth that today aircraft resembling our craft are being

MONKA AND MURKU SPEAK CONTINUED

manufactured so that the people can be convinced that they are only seeing experimental crafts of these governments?

Do these governments, knowing of our power, think that they can use it for destruction or to power their own craft or to make a profit from it? Do they dare assume that we would let anyone misuse a power of the Creator? Might this not explain why there is such an interest and race to establish artificial satellites equipped with television to see what the space people are going to do, and how many of their ships surround your planet?

Do you think that we would engage in such a childish action as spanking your governments for not cooperating, by being hostile to the Earth's peoples? We, my Brothers, are here to aid and to help you, therefore, we contact now the people of Earth in preference to world leaders, who are pawns to factions, parties, and interests.

The enlightenment of Earth's peoples and the presentation of the truth is what we desire. I trust I have been of service in this little talk. I ask you not to believe what I have stated, but to be sincere and believe in truth and love. Let your intelligence convince you if what has been stated is truth. I shall return and speak again to your people and you, my Brothers. It has been my privilege to speak. I am MONKA. Vasu, my Brothers.

(These messages were received by Richard T. Miller.)

PROPHECY OR FALLACY

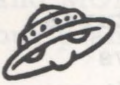

(Editor's note: The following prophesy was received nine years ago by a person known as Avicula de Monte Abnoba.)

"Due to a disastrous earthquake, the coastal land between Santa Monica and Redondo Beach and also in the harbor area will sink into the Ocean. This quake will come in three distinct shocks: the first will be bad, the second worse, and the third will bring on the cataclysm. Los Angeles will get a new harbor."

It is interesting to note that the cliffs in the Santa Monica area are very unstable. It is also interesting to note how much difficulty is being experienced around the Long Beach area. Is this prediction true? Time will tell.

**UNIVERSAL FELLOWSHIP ORDER
(UFO)**

PRESENTS

INTERPLANETARY CONVENTION at DES MOINES, IOWA - OCTOBER 30, 31 and NOVEMBER 1, 1959 . . . Three BIG convention days . . . **WORLD SHAKING ANNOUNCEMENT** from out of THIS world . . . The NEWS you've been waiting for . . . Visits to other planets disclosed . . .

Mail Address: - Box #150, Des Moines, Iowa. - - - Auditorium at 2600 S.E. 14th & Creston
Program Directors: Dr. Roy Parsons & Dr. Wallace Halsey

GLORIA LEE, Author of "Why We Are Here!" in a series of lectures:

- Sat., Oct. 17, 1959 8:00 P.M. Understanding Unit #1
517 Stewart St., El Monte, Calif.
- Sun., Oct. 18, 1959 2:00 to 4:00 P.M. Inglewood Discussion Club
320 Lime St., Inglewood, Calif.
- Sat., Oct. 24, 1959 Severan's Hall, 8:00 P.M.
940 S. Figueroa (Fourth Floor)
Los Angeles, Calif.

Inglewood Understanding Unit #15 Meetings at Darby Park Auditorium, 3400 Arbor Vitae, Inglewood, California. Information: Lee A. Yates AX 3-4743

- Sat., Oct. 31, 1959 Ralph R. Huffman, "7 Keys to Space"
- Sat., Nov. 28, 1959 Daniel W. Fry, "The 3 Sciences"
(Also 1st Anniversary of Inglewood Understanding)
