FREQUENCIES OF UFO ATTRIBUTES

Shape of Object/s Reported By Witnesses for 1991

The following is self explanatory and shows the overall shape mostly recorded for 1991 was spherical, obviously unspecified has a high rating because witnesses were unable to describe precisely the shape they had seen to categorise it - we have not categorised "light/s" which represent a large proportion of sightings.

Sphere	16	Cylinder	2
Disc	5	Saturn	1
Multi-sided	2	Triangle	1
Dumb Bell	1	Oval	3
Square/Rectangle	2	Rocket	1
Domed Saucer	1	Diamond	1
Spoked Wheel	1	Irregular	2
Unspecified	20		

Features

This section deals with additional information seen either on/or surrounding the actual sighting.

Huge size 4	Antennae 1	Lights(Row/s) 7	Lights(single) 3	Lights(two) 2	Bright/Glowing 19	Finn/s 1
Windows- 7						

Colours in association with a UFO sighting recorded for 1991

There are on occasion colour/s witnesses describe connected with the sighting - either the object/s are coloured or the object/s changes colour.

White 8	Red 3	Blue 1	Orange 5	Green 1
Brown 1	Grey 2	Metallic 1	White/Rd 2	Red/Gr/White 1
White/Blue 1	Red/Blue 2	Or/Met/Grn 1	Red/Orange 2	Grn/Brown 1
Rd/Gr/Blu/Yell 1	White/Sil 1	Wh/Sil/Red/Met 1	Blue/Yell 1	Og/Grn/Bl 1

Actions/Movements attributed to the sighting

A sighting is noted because of its unusual habit not attributed to normal flying conditions the following table shows just how unusual the movements are when

seeing UFOs. It should also be noted that these are all as the witnesses described in their original statements.

Hovered	11	Stationary/High Up	5	Oscillated	2
Flashed	3	Rotated	1	Spiralling	1
Materialised/Dematerialised	6	Level Flight	9	Descended	2
Zigzagged	4	Manoeuvred	5	Fast	7
Slow	3	Superfast	3	Crashed	1
Pursued	1	Landed	1		

Witnesses

Male	43	Female	28	Children	5
Groups	14				

Quantities/Groups of UFOs

Single sighting = 52	Groups of 2 = 4	Groups of 3 = 1	Groups 10 or more = 2
-------------------------	--------------------	--------------------	--------------------------

Duration

Seconds	1-5 = 2	6-10 = 1	10-20 = 1		
Minutes	1-2 = 7	3-5 = 5	6-10 = 2	10-15 = 1	30-59 = 2

Weather Conditions

Hot/Warm 6	Mild 2	Cold 4	Dry 6
Patchy Cloud 3	Clear visibility 12	Poor visibility 1	Still 4

Human/Animal Reaction

Human	Terrified	1	Paralysed	1	
Animal	Terrified	1			

The following table denotes noises or sounds heard during the sighting of the UFO, again this is as the witness described on the forms submitted to Contact.

Sounds heard in conjunction with sighting

No Sound	23	Throbbing	1	Humming	1	Buzzing	1	
----------	----	-----------	---	---------	---	---------	---	--

Emissions noted at time of sighting

Flames	11	Sparks	1	Smoke	1	Gas/Vapour	1	Ray/Beams	6
Lights	32	Flashes	7	Explosion	1	Deposit	1	Ray	1

Effects noted on Terrestrial Machinery and Rural Area

Engine Failure	1	Power Failure	1	Crop Circle	1	Ground Marks	2	Recorded on Video	1

A small Synopsis of Sightings presented to Contact from witnesses for 1991

At 10pm on 1st June 1991 the object appeared as a very bright light in the southwesterly position and was stationary whilst I watched it. Then it moved in a northerly direction at quite a speed to the rear of the house. It was at this point we sighted the other object which was stationary but not so bright, indicating to be further away. There was no noise to be heard. This was sighted from Stert Road, in Charlbury, Oxon.

On 29th May 1991 my friend and I were coming back from Southsea on our motorbikes, when I saw an object in front of me along the road but up in the air. It was a long way off. I stopped and pointed it out to my friend who could see it very clearly as we watched it suddenly took speed and literally disappeared in seconds.

June/July 1991 we were walking through the cricket pitch-which is off Weekly Glebe Road, Kettering when my friend noticed a star moving around. My attention was drawn when my friend exclaimed to look and I saw this object. It was very close, hovering and moving slowly. It was metallic looking with one white light coming from it then it stopped. I ran up to it and more or less underneath it I noticed a hole

with a red light going round then it moved away. I know it was not a 'plane or helicopter or anything recognisable.

28th July 1991 Around 10.30pm on Sunday 28th July I was sitting on the patio with my wife and sister in law looking at the sky at approx. 60° elevation to the north, I saw what appeared to be a moving star. Immediately I mentioned this to my two companions and we all watched the "star" pass immediately overhead and continue directly behind us. A flash of light caught the object and it immediately disappeared. The object seemed just like a star as it was similar in colour, size and height. We watched it travel from north to south at a speed similar to that of an aircraft. Whilst still at a fairly steep elevation from the horizon there was a flash as though a shaft of moonlight had suddenly struck the object and it then disappeared. I should note it was a very clear moonlight night with no clouds.

17th August 1991. On Saturday the 17th August 1991 I was at Rudloe Park Hotel for an evening wedding reception. At about 11.35pm I went into the garden where there were about ten other people standing around. As I was due to drive home later I had not been drinking alcohol so my faculties were intact. As meteorologist records will show it was a fine clear evening with no wind; the stars were visible even the Milky Way. I am fairly well acquainted with observing the night skies as I have an astronomical telescope. I am used to seeing planets, aircraft, meteors and satellites all of which are frequently mistaken for UFOs by those not acquainted with the night sky.

The group I was standing with suddenly became aware of an object travelling in a south-westerly direction directly above us. Co-incidentally we also saw fireworks in the sky over Corsham a couple of miles to the west. At first we thought the object was part of the display that had drifted our way but as it took more than two minutes to traverse our field of view and maintained its height it clearly was not a firework.

The object was spherical with flames around the edge. The centre was not bright but illuminated like an orange glass globe lit from within. It was similar to glass globes seen in science museums which discharge when you put a hand on the glass, but these discharges were uniform all over.

It was not a hot air balloon, it was travelling at a steady speed and there was no basket underneath. The size could have been 40-50 feet in diameter but was at an altitude that seemed very high - it was difficult to judge. We all watched it as it progressed to a point where the nearby trees obscured it as it headed for the horizon. Twenty minutes later we all witnessed a similar object flying over exactly the same height and speed was it the same object or there were two identical objects in the night sky.

I have never seen anything like this before.

August 1991. I was sat in my boyfriends house in the kitchen looking out of the window the time was 9.15pm. My boyfriend was talking to a friend of his about cars so my eyes strayed over to the window looking out. As I was idly looking a large

white circular object with flames streaking from the rear sped over just above the level of the house. The object was very bright white and measured an estimated 15-20 feet in diameter. There was no sound which I found surprising as the object was travelling very fast. I jumped up as it passed over the house watched it pass to the hills in the distance. Unfortunately the two other people saw nothing I did go outside to see if it had landed but it had not and stayed up for most of the night with no result.

2nd September 1991. I was travelling back from a friend's house on my motorbike and decided to stop in a lay-by next to a field to look at the stars and have a cigarette. After about 5 minutes I noticed a bright object moving across the sky about 1,500 – 2,000 feet high. It looked like a very bright star and it moved in a zig-zag motion and was totally silent. It passed directly overhead and then disappeared into some low cloud I watched the object for nearly two minutes.

I have seen satellites pass over before but this was too low and bright to have been a satellite and it couldn't have been an aircraft as there was no sound.

1991 My wife and I were travelling in our car and we were positioned at the very top of King Standing Hill in Cholsey Oxfordshire. We both saw above us (approx. 30 feet) a pear shaped object. It was glowing a pure white light but it also was translucent. We could both see the inside of it and the light source emitted from the centre of it. It moved very slowly and deliberately and as we watched it headed towards the south. The time was around 8.30pm. The size of the object was about 50 feet long and seemed about 30feet high but did not appear solid. It made no sound and just went at a slow speed. We had a clear view as the surrounding area was rural with fields all around us and there were no lights to obscure the view, we were completely over awed by the experience.

18th October 1991 A female witness being a light sleeper due to pain she endures was often getting up during and night and sitting in her lounge looking over the sea and sky towards the "Little Orme in N. Wales. Around 3.30am on the 18th October she saw what she described as a very large bright light to the right of the Little Orme. She watched for nearly an hour and was very puzzled at this strange sight. She then decided to wake her husband who could bear witness to what she was seeing and he looked at the light through binoculars to get a better view.

What they saw they both described as an egg shaped craft with the top taken straight off and there were indented bays cut into the surface all over it. There was some activity underneath the object, with smaller objects with lights moving around it. It was very visible and quite sharply defined.

After watching it for some time they finally they went back to bed not wanting to stay up any longer so they did not see it go away.

FREQUENCIES OF UFO ATTRIBUTES

Shape of Object/s Reported By Witnesses for 1992

The following is fairly self explanatory and shows the overall shape mostly recorded for 1992 was spherical, obviously unspecified has a high rating because witnesses were unable to describe precisely the shape they had seen to categorise it - we have not categorised "light/s" which represent a large proportion of sightings.

Sphere	16	Elliptical	1
Disc	2	Delta Wing	1
Mushroom	1	Triangle	6
Saucer	4	Oval	6
Spoked Wheel	1	Boomerang	1
Cigar	2	Cylinder	4
Irregular	2	Flat Disc	2
Unspecified	14

Small selection of sightings for 1992

6th February 1992: At approximately 5.15pm my friend was driving her car with me as passenger beside her from Sonning towards A4 roundabout at Charvil. A quarter of a mile short of joining with the A4 we saw directly in front of us but distant in the sky through the windscreen a large space craft showing its under belly. Many lights under it but couldn't see any beams of light it also had a domed shaped top. My friend stopped the car in rather a narrow road, there was open country to the left hand side. She jumped out with her camera in hand and took many photos. We proceeded to Charvil as we were blocking the road. Along the Charvil Road we saw it again well behind the houses and other buildings on the right hand side, it was in the distance but low trajectory and then it dipped right down as if to land on our right hand side. We then drove through to Twyford turned right at the traffic lights towards Waltham Chase Estate where there is a mini roundabout. We again spotted the craft behind the vineyard at a distance. My friend again stopped the car off the road to get a clearer view peering through a hedge and taking more photographs. It then dipped

behind the hill and we did not see it again. It was large with many lights, especially underneath, there was no noise. (witness 1)

6th February 1992: On Thursday I was driving away from the direction of Sonning, Berkshire having been to a development meeting for mediumship. Feeling very relaxed I was chatting away to my companion when I suddenly saw this image in the sky. Commenting to my friend who could also see it I jumped out of the car and took photos. (It was just a Canon Sureshot so I was not hopeful of anything coming out) We spent some time there and then crossed the A4 towards Charvil/Twyford. We saw the object off to our right and then I couldn't stop the vehicle because of the volume of traffic. We drove into Twyford crossroads and turned right towards Waltham Chase. I could see it again at Waltham Chase it was then on our left by this time it was quite dark and the roads were extremely busy. No one stopped their vehicle or got out to view as we had. The craft hovered for some time and then cruised off to our left. It seemed to drop gently down and slow down. There was no noise at any time from the craft and no sense of fear we were very calm. I had no idea who to report this to but then managed to find you on the telephone. (witness 2)

19th February 1992: It was approximately 8.40pm and I was driving home in Edgware to my Mothers house in East Finchley to return my young sister home. My son aged 2½ was also with us as I hoped the car journey would send him to sleep. As we approached our destination I saw a bright object moving in the sky, I said to my sister "What is that" and like me she didn't know so I pulled over into a Bus lay-by and opened the window to observe it. I felt no fear and neither did the children. It was very quiet. It seemed to be moving back and forth, to and fro over the region of the nearby M1, moving slowly. It was bright and silvery with a domed top and wide fanned shape bottom with one visible red light in the centre at the bottom, this light was flashing intermittently. It moved behind the trees so I drove about 200 yards to the next lay-by to get a clearer view. My sister aged 8 was quite happy to say it was a UFO, I certainly did not recognise it as any regular aircraft, although I couldn't rule out it could have been some kind of airship playing tricks in the moonlight (but it would take some convincing) After 10 minutes it moved off at a faster speed towards central London it went from approx. 45° to 90° before it left, again there was no audible noise.

27th February 1992: I was in my bedroom when out of the window I spotted a large white light in the sky it was smaller than the moon and blinking every few seconds whilst hovering in the sky. Suddenly two more lights appeared and the first light stopped blinking. One of the two lights moved across in front of the larger white light and then all three moved off in the same direction. I telephoned the local airport to ask if there were any planes flying and was told that no aeroplanes were out and that I was probably looking at helicopters. The sky was very dark as it was 2.40am, and at that time everything was still. I was also told that they could have been warning flares/lights drifting about. I have excellent eyesight and although I don't have any experience in observing objects especially in the night sky - I know what I saw.

3rd March 1992: At 18.45hrs a bright light appeared in front of dark rain clouds on the west horizon 15 degrees above horizon: estimated brightness magnitude -5. The object was coming directly towards the observers unusually slowly, almost hovering. Through binoculars one could distinguish three lights - one central bright one and two

subsidiary and smaller ones. The object was at no more than 2000 feet up. No Noise whatsoever could be heard. The evening was very calm and still and one could hear cars up to half a mile away. The object got to within less than 1000 yards where it seemed to stop, as though it had noticed the observers. The object shimmered, became nebulous and then invisible. After 5 seconds, the object was tracked with binoculars travelling very fast (faster than a military jet) in the same easterly direction noiselessly, without vapour trails. The object appeared at this time as a diffuse elliptical glow with lights flashing intermittently and regularly in the middle but towards the rear of the craft.

9th March 1992 Two women had an observation which was both unusual and frightening. The women were on their way home, it was around 10 00pm when they heard a noise the frequency was such that it was not only heard but felt. They described it as something between a train and a car ticking over, the sound was deep and vibrating. Suddenly they saw a brilliant white light and the contours of an object within the light. It was blinding and made their eyes smart yet they could not help looking at this strange object which stood 2-3 metres above the ground and about 10-15 metres in front of them in the road. The object was triangular at the bottom and had a dome of transparent glass (or other material) and in spite of the light they could see three lights on the outside at each point. Then, the tone of the light went down – like someone turning a switch. The women thought the object had gone but all at once it was there again. They could clearly see two persons inside the object and that they moved jerkily. The women moved towards the object and could see one of the people inside had a steering wheel like thing in front of him and looked as though he had large dark eyes. The object suddenly disappeared they could not describe whether it actually moved off or vanished. Later when they were home, the same noise was heard outside the bedroom window, the noise increased and they thought it was coming into the room so they crouched down to hide for safety, they described it as an “earthquake” feeling through the body. They were very frightened. A week later one of the ladies had a sight disorder, both had slight deafness and nose bleeds at the same time. A month later they both felt completely drained of energy. Their separate sightings were very similar in context except one lady could not describe details relating to the person/s inside the object she only saw arms moving and outlines.

5th July 1992 It was 10.00am on Sunday when I was looking out of my window in my living room. All my neighbour's curtains were open. I saw an object coming from the behind the house opposite. I thought at first it must be a helicopter although I was immediately aware there was something very different about it. It was travelling very fast (faster than concord) which travels regularly from east to west past my house, towards me as I was looking out and after a few seconds it was right overhead. As it approached it appeared to change its shape (like deflating as a balloon) then suddenly regain its shape which was a mushroom shape and coloured black. When it went overhead I stared up and underneath the mushroom shape were 4 legs coming down, the sky was cloudy but I could see this object clearly. It was something I have never seen before and I rushed upstairs to see if I could get a better view with my binoculars but by then the object had gone. I could not say in which direction it went but I would assume it was due West. It made absolutely no sound which was odd.
