THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

"COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

VISIBLE SPECTRUM RESEARCHER

A Monthly Magazine
Devoted To The Service Of Mankind.

Editor
DINSHAH P. GHADIALI

Official Organ Of
Visible Spectrum Research Institute
Non-Stock, Non-Profit, Scientific, Fraternal Corporation,
Chartered Under The Laws Of The State Of New Jersey.

Principal Office And Research Laboratory,
Malaga, New Jersey, United States Of America.

Annual Subscription (included in Membership Fee) \$3.00 — Single Copy 25 cents.

Entered as Second Class Matter under Act of March 3, 1879 and Amendments,
at the Post Office in Malaga, New Jersey, on December 30, 1954.

NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is **graft**. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

THAT IS A GOOD ANSWER By: INDIVIDUAL EXPERIMENTERS

CARBUNCLE REPORT BY L. R. S.

My husband has Carbuncle on back of Neck; it is draining, but, very painful and steady. Have used the Lemon Systemic and Orange Local. The Doctor examined him before he returned to work and said that he was in good health and the Neck was healing fine; the Nurse said: "Wonderful! No plastic surgery needed. Another triumph for Visible Spectrum" Again our thanks and God's blessing be upon you!

* * *

LUMP IN BREAST REPORT BY E. B.

I shall give you a report of my mother, who is 77 years old. Last Spring, mother had a Lump in her Left Breast, the size of an Egg. I gave her Green Systemic one day, Indigo Local the next day and within 3 weeks, the Lump was gone. We were very pleased with the results. Thanks to the Visible Spectrum. You may print this.

* * *

BACK AND LEG PAINS REPORT BY J. B.

After suffering for 6 years, with terrible Pains in my Lower Back and Right Leg, for which I had taken all kinds of treatments, medical and many others, without any results. Then, one blessed day, I heard of the Visible Spectrum. From the first Tonation, I felt better. All Pains went away in a short time and never returned. Blessed be it always!

OUR STUDIO ACTIVITIES

EXPERIMENTER FINDINGS AND QUERIES MEETINGS OF THURSDAY, SEPTEMBER 1, 1955

First Allentown Pennsylvania Studio

C. K. — I had a letter from a Member in Milwaukee, but, I shall not read anything that does not come from our President.

J. F. — I had a Stiff Knee with Pain. Used Orange Local; it is fine. I feel very well.

B. W. — My daughter had Poison Ivy. Used Turquoise Local, no results. Then, used Turquoise Systemic and Magenta on Arca 18.

M. P. — Poison Ivy or any kind?

B. W. — Blue is for Itch.

M. B. — Takes Inflammation out.

M. P. — I had Mosquito Bites. Took Blue Systemic; relieved that. Went back to other Tonations.

E. L. — My grandson had Ear Infection; it was what they call Red Ear.

M. B. — What would you use for it?

E. L. — Green Local.

M. B. — Then go to Systemic. I hope you notice the rule; any case which is under care of Dinshah, should have no interference.

C. K. — That is what I said last time. Any such case should not be discussed.

M. B. — I am advising you as to truth and wisdom; every case is different.

E. M. — If you use the right Color, you can tell by the reaction.

M. B. — Look into the characterization; you always have your four Signals. I have a man T.V. program, "Make Connection." He had Hiccoughs for years. Doctored for years; no help. Said he used "Lights." Commentator asked where he got it and who made it. The man said he was not at liberty to say. Commentator said he would like to see him after the program.

B. W. — When my daughter takes Back Systemic, she never lies still; I can get her only from Hips up; is that all right?

M. B. — You should tonate the whole Body; move the Light as the child moves the Body.

B. W. — But she will not stay the way I put it; she says she is uncomfortable.

M. B. — You must discipline your children. We shall now continue with our educational program with the Orange Wave. It is a vitally important Wave. We shall study the Chapter 75 on "Tuberculosis By Medical Conception."

Any letter pertaining to our activities may be read and discussed in a Studio, whether it comes from the President or otherwise. We must keep an open mind. Many T.V. programs are found to discuss Light and the like. Years ago, I used to speak on the Royal Oak Radio Station, but, after a few broadcasts, part of my contract money was refunded with the remark that if they continued the Station might lose its License! Time will tell.

* * *

First Cleveland Ohio Studio

F. B. was welcomed after nearly a year's absence from our Meetings.

L. F. — I have a Cold; what Color shall I use?

A. M. — I suggest you irradiate Green.

L. F. — I had a small Cyst on the back of my Ear. I tonated with Violet Local and Magenta on Area 4. After two Tonations of each Color, Pus popped out healed nicely, leaving no Scar.

A. M. — I ask you all if you read the Visible Spectrum Researcher. I shall read to you the article on Fluoridation And Mass Medication in the September 1955 issue.

F. B. — I have several questions to ask.

A. M. — Fill a complete Chart and it will be sent to the Institute.

Many wrote that they do not have to attend any Studio Meetings, because, what happens is reported in the monthly. I should like to know whether it is their view that I should discontinue the one or the other! The Chart of F. B. shows high Kardoscil and his food habits need to be changed.

* * *

First Detroit Michigan Studio

E. R. — M. P. reports that she did not receive her magazines for this year. She did receive three, but, no more. Although now living in Rochester, New York, she made arrangements to have her mail still delivered at her Detroit address which is

A. S. — My boy has Hay Fever again. Tonated with Turquoise for 5 days and Lemon for 2 days. Always went to sleep under the Lemon. The Nose is running. Backelim 2 in a day, Frontelim quite often. Last year the Turquoise seemed to do more for him than this year.

A. G. — That season is with us again and many people are afflicted. The Turquoise will benefit with a Fever, but, it is definitely a Chronic Disorder and that will come always under the Lemon. Watching the Food intake will bring good results, but, it really needs the Lemon. Tonate to **prevent**, rather than to **correct**.

W. G. — I dropped a weight on my Foot and hurt it badly. I bandaged it in the form of a tourniquet, until I could go to the Indigo. Tonated for 2 days and then went over to the Lemon. I was not sure how much the Bone was affected. Within 8 days, the condition was completely cleared. It was badly swollen for three days.

A. G. — You could have also used the Orange.

W. G. — My family wanted to call in a Doctor, but, I refused. They certainly were surprised at how quickly it healed.

W. K. — I tonated 3 times this month for Cough; Turquoise followed by Orange. Very good results. I am sure most of you read about the Salk Vaccine used in Canada and how successful they were. Well, I heard a dif-

ferent story from a Naturopathic Practitioner, who said the story was not accurate and that they do have a few cases, which are not reported in the newspapers. So far, in our school, there is no report of Polio.

A. G. — We have a guest K. W. with us this evening from Port Huron, Michigan, who is an old Student and has been a Member since 1938. (Applause.)

K. W. — I should not be without my Color Projector. It helped me many times. Speaking about Tonsils, calls to my mind years ago, the Doctor wanted to remove my son's, but, I refused. Years later, during an examination, the Doctor remarked that there was Scar Tissue, but, he still had and has his Tonsils. That is one thing in which I do not believe.

W. K. — I heard a famous Plastic and Oral Surgeon state, that he could not go along with the American Medical Association, on this removal of the Tonsils. He had performed many Operations on Cleft Palate, Hare Lip, Disunited Jaws and so on and had come to the conclusion that it was a wanton destruction of tissue and that the Tonsils were our first and second line of defense against Infection.

A. G. — Many Doctors are not wholly in accord with the A. M. A. Early in the evening, I was talking with K. W. and she mentioned that she read an article on Color by Dr. W. McN. He was one of our first professional Graduates around 1928 or 1929 and I was among the first laymen to graduate in 1930 in Detroit. At that time, one could only rent an Equipment. Many changes have happened since those days and the Visible Spectrum is still here and will always be here. The difference between the Medical Doctors and us is really quite simple — they are interested in sickness and we are interested in health. Our method is to use the Visible Spectrum; we work with Nature. Below the Red and beyond the Violet lie the Infra and Ultra portions of the Spectrum. Dinshah tells us Nature uses those divisions for destructive purposes and it is not for us to tamper with them. In the early days of our Science, one could not own a Projector and had to go to someone for help, which took time to go there. The Tonation schedules were not like what we have at present. Now, all the calculations are made for us at the Institute, including the Respiratory Rhythm. All we do now, is to retire to our room, check the Ratio and decide what Colors to use. All is very simple, but, it was not like that in the beginning. We have much for which to thank. There is a question that keeps coming up regularly; it refers to just how dark the room should be. Well! I was in Malaga last month and I brought the subject upto Dinshah. The room does not have to be **absolutely** dark to take Tonations. Many stated it is impossible to have a completely dark room during the daytime. Dinshah pulled a shade and said it was all right to tonate thus, only be careful that any Light entering the room from the side of the window, does not cross the beam of Light tonating the Sufferer. The hotel in Milwaukee where the Convention will be held, is now owned by The Journal Company, owners of the newspaper The Milwaukee Journal.

Member — What about the Temperature of the room for tonating purposes? If the Body becomes chilled, you lose more than you gain.

A. G. — Heat the room prior to tonating. What about a portable Heater?

W. K. — We always use a portable Heater when the weather is cold, but, we turn it away from the Light of the Equipment.

A. G. — You must watch that the Sufferer is not chilled. Another matter is that many Members try different Colors in a very short time. That is not constructive thinking. Stay on the selected Color for a reasonable period, to give Nature time to heal. Relief is one idea, Normalation is another. Indigo is more or less an emergency Color. It is excellent to stop Bleeding. I remember one time, my grandson ate something and upset his Stomach. He kept on Vomiting until he was exhausted. Finally, when all he brought up was froth, I promptly went over to the Indigo and it worked like a charm. Sick as he was, he missed only one day at school. W. G. tells us he bandaged his Foot until he went to the Indigo; he must have damaged a Vein, when the Blood was flowing so freely. Had it been an Artery, it would have squirted.

Member — Why should we use Indigo for Varicose Veins?

A. G. — That condition is brought about by a breakdown in the Capillary System. The Blood is too thick to pass freely through the tiny thread-like Canals and while one may use Indigo for just relief, Lemon should be used Systemic, for the Condition is Chronic.

Member — Why are they only on the Legs?

A. G. — Possibly because, the Legs are furthest from the Heart.

Member — Each time my daughter is pregnant, she suffers terribly and yet after the birth of the child, they seem to go away, although they seem to show.

A. G. — Nature does strange things. It was noticed that a woman may have a certain condition in her Body, but, during pregnancy it seems to be restricted. Perhaps that is Nature's way of protecting the progeny.

W. G. — I have a Heart condition. I believe it was brought on by a tuberculous condition of the Bones, in 1946. It was the Left Leg.

A. G. — Under medical principles, they will treat the Heart, but, later some other organ in the Body will start to break down. With a Heart ailment, if you will follow the few rules listed in our Text Books, you may have fresh hope. In our Science, we have 12 Colors with which to work. Scarlet, Magenta and Purple work directly on the Circulation of the Blood. It took Dinshah years of study and Research to discover these Colors and if he says they are important, you may be sure they are. Two of our Members took the Kardoscil of W. G. and stated that his Heart skips as many as four times in a minute. I advise you to stop Smoking or put your Color Projector in a closet and forget it! We all know that soon or late we die, be-

cause, the Body does not last for ever. If we could lie down some night and just go off, that would be one way all right, but, to be confined in bed in suffering with great Pain, is another point. We are all creatures of Habit; recognize a bad Habit when you note it and avoid it. It is never too late to begin a reform. If you smoke, do not tonate; if you tonate, do not smoke. It is that simple. Start now. When you break a Law, you must pay the penalty some time. Read Ecclesiastes, Chapter 12.

A. G. and G. W. were then appointed Delegate and Alternate Delegate to represent the Studio at the Second Annual Convention.

A. G. — Since we shall be representing you at the Convention, what requests do you want us to present?

C. W. — That each Studio shall have the authority to fill the Application Blanks and send them to the Institute; that will ease some of the load now carried by the Institute, at the end of the year.

A. G. — I like to see our fiscal year start around March, instead of January. If we can not have our Members to attend, why not look for a cheaper hall? Let us see if we can cut expenses.

W. K. — I know where we can have a hall, not far from here, for around \$50.00 a year.

Member — Why not open more centers? Could we not meet in some of our homes?

W. K. — What about Members who wish to become Graduate Researchers? What do they have to do? Where do they take their Final Examination?

J. J. — I was very disappointed that my Itisometer could not be fixed at the Institute. There is nothing broken, yet I was told it can not be repaired.

W. G. — I have an old Equipment, but, the Gears are worn; can that be repaired?

A. G. — We talk about getting our Members to the Meetings; we meet only once a month and we need their presence.

The magazines of M. P. go regularly to her Detroit address by Second Class Mail. If she left instructions there, she should inquire there of that person, as under the Postal Regulations, Second Class Mail is not forwarded to another address and if NOT delivered, it is sent back to us and we have to pay return postage penalty. Hay Fever is mostly the result of mechanical irritation of the nasal membrane by the pollen flying in the air from certain weeds and flowers. Dr. Salk now states he is improving his Vaccine! I wrote enough about it. Newspapers will NOT print my articles, because, we do not

advertise. We are not against Medical Doctors or the American Medical Association. We are fighting solely Medical Monopoly, which arrogates to itself the supreme power to heal. The purpose of the Tonsils is according to medical view — NOTHING; same opinion as about the Appendix! The management of The New Republican Hotel has constantly given us very satisfactory services and we offer our cordial thanks to the Manager Mrs. L. M. Horel and The Journal Company, Proprietors. During pregnancy, new human life coming into existence, Nature places numerous guards for its welfare. Study our Text Books under Childhood Disorders, Chapter 101 for full and clear explanation. W. G. did not send to the Institute any request for Personal Research Information, about his Heart condition. A. G. is right; the Benign Master Jesus stated the biggest philosophy in just a few words:— “As ye sow, so shall ye reap.” To what Application Blanks does C. W. refer? Does he mean the Continuation Of Membership? That fiscal year question was well studied by me long ago. As it is now, Members pretend about the Christmas Expenses; if we shift to March, Income Tax Expenses will be presented; if in June, Vacation Time will pop in; if in September, Mother-in-law’s Visit Expenses might lift their head; no brother, we stay as we are, otherwise instead of one Respiratory Rhythm Guide, we shall have to give them two and so on! The hall you are in, you recommended yourself; so why shift? When you have a cheaper hall in mind, send the address. As far as meeting in people’s homes, dinner parties and boozing and smoking sprees will tumble in — so nix for that. This Institute wants to be utterly independent, impartial and ideally permanent, so make the best of the present and let Dr. T-I-M-E do the work in the future. For Graduation, refer to our Constitution And By-Laws, under Grades Of Membership, By-Law 51. When my broken resources are restored, finances of the Institute permit and I find the proper assistants to carry on the burdensome activities, I shall not be found wanting in providing all the needed facilities and requirements. Even at 82, I am carrying the full burden, all alone, working without any relaxation or vacation from 5 A. M. to hours past Sunset. What more can a human being bear?

* * *

First Merrill Wisconsin Studio

W. B. — I had a high Fever. Used Blue twice. Kardoscil 100, Spiroscil 10. Purple did not bring that down until Green Systemic was used; then, Kardoscil became normal.

A. I. — I had perspiring Feet. Used Indigo twice and the Soreness left.

Discussion began on Turquoise as Skin Builder.

F. K. — My Pulse changes from 100 to 40 per minute. I have good Back Elimination. I have good results with my children. Son F. had Ear-ache; used Blue twice and was normal.

E. B. — I use Green, Magenta and Orange and I feel well.

EDITORIAL

REMARKS

Seems to me that in the absence of the Studio Reporter, the Acting Reporter missed some points. The Spiroscil of 10 for W. B. does not seem correct. The same about F. K. Kardoscil changing to 40. They should send their Charts. The Institute is at your service as usual.

* * *

First Milwaukee Wisconsin Studio

The Fluoridation of the water supply of Milwaukee was discussed. The Wisconsin Anti-Fluoridation League, Inc. has a resolution drawn to the effect that it is unanimously in favor of the discontinuance of the present compulsory method of city water Fluoridation. Residents of the city were asked to contact their Alderman and express themselves in favor of that resolution.

F. S. — When does Dinshah approve of an Operation?

K. B. — Submit the case to him with a complete Chart. He never advised Surgical Operations but only Constructive Surgery as removal of a bad Tooth, setting broken Bones or the removal of a fatty Tumor or Wart where no Circulation exists. Remove the CAUSE of Tumors which is wrong living and fear and tonate with the Visible Spectrum. A woman recently came to me asking for advice about some trouble with her young son and when questioned how she became interested, spoke about her experience years ago, about removing a Tumor by using Green and Magenta.

E. B. — I developed Spotting in pregnancy, child being due in January. I got off my feet, but, no results. I went to an Obstetrician, who advised rest in bed, but, work prevented, so, the Doctor gave a prescription. I feared greatly to take the Medicine, lest it might affect the child. I then acquired a Color Projector and took one Green Tonation and three Indigo and the Spotting stopped. Also, I want to report that my three year old baby had Cold and Fever of 103°. I tonated with Yellow one day, then Turquoise and all subsided.

K. B. — The ancient Greek philosophy on pregnancy was so different from what is practised now. The women of that time were surrounded with beauty and kept quiet during that time. In the case mentioned, I should have advised Scarlet and Green to strengthen female organs. During pregnancy, an occasional Green or Yellow is beneficial.

R. S. — Dr. Van Dalen, writing in the Chicago Tribune discourages the use of Vitamine Pills and the like.

(Discussion followed pointing out that our Rational Food Of Man system contains all the necessary Vitamines and Minerals needed.)

F. K. — Eat the fresh fruits and whole grains. I was asked to bring a loaf of White Bread for a neighbor. I brought it and asked her why she wanted it, because, "the whiter the bread the sooner you are dead"! She said: "Bring Dark Bread the next time."

K. B. — I shall explain the dangers of X-Rays and Gamma Globulin. (Short discussion followed.)

K. B. — When Polio symptoms appear, use the Green. Then, if the Muscles be affected, irradiate with Yellow and Magenta.

R. S. — I saw a Visible Spectrum Color Projector displayed in the Wisconsin State Fair. I talked to the fellow in charge of it and found he knew nothing of its merits.

K. B. — It is useless trying to try to inform the Medical Doctors who obviously will not and can not accept our Science. Under the circumstances, people must find their own way.

A. E. — Most of the people follow the opinion of the majority. I knew a woman who had severe Arthritis and got Shots from the Doctor with no results; still, she would not listen to me.

K. B. — People have no time to study and learn about this Science, so the Law of Cause and Effect takes over.

S. E. — The hot weather has been very hard on some people. I use Magenta on Area 4 during high humidity to strengthen the Heart.

K. B. — Use a little Salt and Lemonade also. More Salt is necessary in hot weather, because we perspire so much. Cook it in the Food, rather than sprinkling later. Study our Rational Food Of Man system. Eat less Food.

EDITORIAL  **REMARKS**

What can the people do? The U. S. Supreme Court decided that "the right of an individual to treat one's own health, must yield to the common good where a State enacts a public health measure necessary for the promoting of the health of a substantial segment of its population"; therefore, unless the State Legislature reverses its views, there is no hope for clean water in your city. Refer to our By-Law 72 for Constructive Surgery. E. B. acted sensibly for her Spotting. Scarlet is not advisable. In all matters of health, the Master Druggers have the upper hand, making a monopoly in healing. That is one great defect and deficiency in the First Amendment of the American Constitution — our Bill of Rights. The Doctors will NEVER accept our Science wholesale, as it will extinguish their lamps of living and squelch their high position. Stay independent of ties.

First New York New York Studio

In the absence of the Chairman, the Vice-Chairman conducted the Meeting.

H. M. — Please help me to make the Meeting interesting, as it is my first experience. Are there any case reports?

L. S. — My husband had a terrible time Carbuncle on the Neck. He had a 102° Temperature and was in such Pain that I did not know what to do; so, I telephoned Dinshah and he told me to use Orange, Lemon and Magenta. It was a serious case. The Light worked wonderfully. There is not a mark left, thanks to the Visible Spectrum.

M. S. — We had a case of Carbuncle in our family. We used Orange with wonderful results. That Pus just came out and it would not close till everything was out, just as it said in the book. The Doctor told us it was a Hospital case, but, we just kept using our Light.

G. d'A. — I had Fever; my Kardoscil was over 100, Spiroscil 16. I had to see the company Doctor in order to get paid. He said I had a Virus in the Intestine and trouble with the Gall Bladder. He also said I have Low Blood Pressure. What puzzles me is how I can have Low Blood Pressure when my Pulse is over 100. I asked Dinshah for advice and was told to use Scarlet. Since I used that, I have much more pep.

M. S. — If you have over 100 Kardoscil, that does not mean you have High Blood Pressure. The High Kardoscil was a sign there was something wrong in your System.

J. Z. — My daughter had a deep Gash in her Foot. I gave her Turquoise, but, it would not heal. She had to go to the Doctor, who gave her a powder to bathe her Foot.

H. M. — If there were an Infection, you should have used Orange and gotten the dirt out. If you had not used the powder, it would have healed quicker.

D. R. — I was very sick at the Stomach, must have eaten spoiled food. I tonated with the Orange and vomited 3 times.

J. Z. — My husband had the same experience with Yellow. It made him empty his Stomach too.

H. M. — Did any of the new Members use the Light?

A. F. — I have no Projector as yet.

H. M. — When I joined this Organization, I had a Carbuncle. I used Green and Orange on it. It started to look very bad. My husband wanted me to go to the Doctor, but, when he saw how the Pus came out, he was convinced. Ever since, he is using the Light.

M. W. — My Kitten was hit in the Eye by a door. The Eye was red and there was a big Swelling above the Eye. I tonated it with Turquoise. Before the hour was up, the Swelling went down somewhat and the next day, one could not notice anything. They had a Doctor from Chicago on the Home Hour on Television showing our Color Projector. He said there is no-

thing but an Electric Bulb and Color Glasses and people are told they can be healed by that. That man was stopped for taking advantage of the people.

H. M. — I am going to read to you from our Text Book, Chapter 97, on "Boil, Abscess, Furuncle, Carbuncle."

L. S. — My husband suffered so much with the Carbuncle; it had all the aspects as it says in the book.

H. M. — Do not lance a Boil; let the Light break it open.

J. Z. — My daughter has bad Fingers; she seems to be allergic to Soap.

H. M. — Does she live upto the Rational Food Of Man?

J. Z. — No; she also smokes.

H. M. — Unless she changes her life habits, there is not much we can do for her.

S. P. — What do you eat?

H. M. — Dinshah eats many sweets, made with Brown Sugar. I ate with him and his family in Malaga. They had Rice and Yellow Split Peas or Lentils daily, with Salad and two cooked Vegetables. For dessert, they had Whole Wheat Cake with Nuts or Ice Cream. With the meal, we had Limbupani (Lemonade) with Brown Sugar. One need not eat big portions; just a medium helping of each was sufficient. We never had any store Bread.

A. F. — I have not eaten Meat for 15 months. I eat everything raw, but through the Juicer. I eat Nuts and Dates. I am a new Member.

H. M. — You should eat cooked food also. I shall now read to you from our Text Book, Chapter 92, on "Diabetes Mellitus."

M. S. — My mother was a Diabetic. They become very easily constipated. When we got the Projector, she stopped the Insulin and ate the Rational Food Of Man. Prior to that, she had 9 Operations and was blind. She was always constipated. When she took the Light, she had no more trouble.

H. M. — If you stay on the Rational Food Of Man, you do not have to worry about that.

O. D. — I suffer so much with Hay Fever; it is especially bad today. I use Lemon.

H. M. — Continue using the Light. You will not suffer so much after a while. I had Poison Ivy every year from March till September, from Head to Toes. I had Shots in the Spring, but, I got it just the same. Only the Light finally helped me.

A. M. — I had Poison Ivy. My Face was so swollen, I could not look out with my Eyes. As soon as I used the Color, it improved.

H. M. — I suffered so much with it; now, if I get it, I am rid of it right away. By living upto the Rational Food Of Man, one normalates very quickly.

EDITORIAL
REMARKS

For the first experience as the Vice-Chairman, H. M. conducted the Meeting admirably. It is like being married for the first time. We know not like what it would be and then? When the noose is on the neck, we get the real feeling or fun. J. Z. can not receive our service and can not utilize her own service for her daughter if the said daughter be a married woman. That event makes it a separate family. Refer to our By-Law 63. A. F. has his own Color Projector now as an Experimenter. He has an intelligent wife E. who should be made a Student Researcher. His worthy uncle F. P. introduced them both to me personally at the Institute. The more they attack our activities on Radio and Television, the more our Membership will increase. The American public digs always to find the Truth — and we have it 100 per cent! Is it not strange how “Dinshah eats so many sweets,” yet, talks with bitterness? How much worse would he be, if he should avoid all sweets? Perhaps that is why all “hate” him so much! It was in a Meeting in your city many years ago, that a learned German was in the audience. After the lecture he stood up and shouted: “Ladhies andh Zentlemen: tis Dhimshaw isz a hombog; his Loit isz a dhem hombog — bot, the dhem ting worksh!”

* * *

First St. Louis Missouri Studio

C. N. — I recommend you all to continue the reading of our By-Laws and the monthly Visible Spectrum Researcher.

(C. S. started a discussion about the article against Honey, which appeared in our September 1955 issue. He did not see how the same objection may not be applied to Milk. C. N. explained that Honey is not a controlled chemical food. The lovely but poisonous Fox Glove flower and plant are destroyed wherever cattle graze, as they are deadly poisonous. Bees can not be so restricted and the poison may mix with the Honey.)

P. L. — I want to report that the Colors you suggested for my husband gave good results. Now, I should like to know what I should use to help his Legs. They are still so stiff and he has trouble going up and down the stairs.

(C. N. recapitulated the case briefly. The Sufferer had Dizziness, Poor Circulation, Hardening of the Arteries and Prostate Gland Disorder. The Dizziness had disappeared and there was some control of the Frontelim. The Colors used were Lemon Systemic Front and Back, Yellow on Areas 6 to 10, Scarlet on Area 18 and Magenta on Area 4.)

C. N. — What would the Members recommend for the Legs?

L. S. — Orange Systemic for the Circulation.

Members — We agree with that.

J. H. — I should give Red as it is more potent.

C. S. — What is the Pulse and Respiration?

P. L. — I do not know.

C. S. — That is very important. I should suggest Yellow as a Motor Stimulant.

C. N. — Yellow is also a Nerve Builder, which I think this man needs. Therefore, change from Lemon Systemic to Yellow Systemic. If you give Orange or Red, it will do no harm, but, would be like starting a car and going immediately into high gear, without going through the first and second. Do not try to go fast in healing.

C. S. — I suggest that the Pulse and Respiration be checked daily, as that is important in judging the improvement.

P. L. — I do not know how to do it.

C. N., W. B., A. B. — I shall teach you how to do it.

A. D. — Will you please explain my father's case to me? He is 78. He has Pains in the right side around the Groin. He eats very little and has to be forced to eat. He has trouble with Backlim and has difficulty in walking. When he first came to use the Light, he had an Ulcer; he was helped at that time.

C. N. — I think his Pains are mostly gas. The Itisometer showed that Areas 8 to 10 were not as active as they should be. I recommend Green Systemic, Turquoise Local Front and Back and Scarlet on Areas 4 and 18. My first concern was to take away the Pain. Therefore, I gave Turquoise. That will not affect his Digestion. In about 2 weeks, I shall probably change the Colors, as the Pulse and Breathing show change by then.

M. N. — You said he had trouble with the Elimination; why did you not give Yellow?

C. N. — The Pains were my primary concern; he had them a long time and I wanted first to give him ease; also, the Itisometer indicated Turquoise was needed. Whenever I am in doubt myself, I never question the Itisometer.

A. D. — Today is the first he felt better.

E. N. — This is a case of long standing and to give Turquoise in such a situation seems to be going against one of the principles of the Visible Spectrum.

C. N. — That IS true, but, the Itisometer can not lie. In Pain, give immediate relief if possible. In this case, in two weeks, he will have only about four Turquoise and at the end of that, there will be a change.

C. S. — From the information you gave, it would seem there could be an Inflammation in the Colon.

W. B. — Therefore, anything with Green would be indicated.

C. N. — When in doubt, use Green first. Green is the Cleanser Wave and is used to make any of the combinations of Colors, but, it is not in the Red or the Violet. Green is excellent in cases of Bite, but, if there be any Inflammation and you have proof of it, that is, if that Area be touched and feels warmer than normal, use Turquoise. In recent Disorders, give Turquoise and if the condition does not respond soon, go to the Infra-Green side.

A. Z. — I got a little relief for my Sore Legs from using Turquoise. However, my other condition is about the same. I still have Pains in the Stomach and between the Shoulder Blades, just like a Toothache. I belch a little and have 2 or 3 Backlim daily. I do my own house work. I do not sleep soundly, just doze and roll around. I always have a full feeling, as if I were swollen inside. I do not use the Light now.

C. N. — What should she take to eliminate the Pain in Areas 6 to 10 and in the Back?

P. L. — What about Lemon for Cleanser?

A. K. — Turquoise would relieve the Pain in the Back, but, Lemon Systemic would be very good and also Magenta on Areas 4 and 18.

A. D. — Turquoise is best for the Pain.

C. N. — What is your Ratio, A. Z.?

A. Z. — I do not know.

(E. N. took it and reported as 80 and 28.)

C. N. — That is a 3 to 1 Ratio. What should be given?

E. F. — How about Turquoise on Area 7? It would reduce the Breathing and possibly decrease an Inflammation.

C. N. — The Respiration is very high, which may indicate she needs more Oxygen. She is a stout person and may have to breathe faster.

A. Z. — I am losing weight now, but, I do perspire a great deal.

C. N. — The fast breathing may be due to this hot weather and she perspires heavily, which is Nature's cooling system. Therefore, I should be inclined to ignore the 28 breathing.

E. F. — Yellow would help to eliminate the Acids, which seem to be more general than local.

A. K. — Orange on Area 17 might help to correct both the Pulse and Breathing.

L. S. — Purple on Area 4 might bring the Breathing down.

C. N. — Purple tends to increase the size of the Blood Vessels and the Heart will beat slower.

O. S. — Turquoise on Area 2 might control the Breathing.

C. N. — I do not want to do anything to the Breathing. If you take care of the other things, the Breathing will take care of itself.

A. K. — It would be advisable to ask if she takes Pills.

A. Z. — I do, as the Doctor who operated on me for Hernia, gave me Pills for a Gall Bladder condition.

C. N. — Do you have a bitter taste in your mouth?

A. Z. — No; just a full feeling. I do not want to eat.

C. N. — Eliminate the Pills. If you do not feel like eating, do not eat except a little fruit. What do you eat now?

A. Z. — A little Oatmeal and Postum with Brown Sugar in the morning and during the day, a little Beef Soup or a little Chicken.

C. N. — Do not eat any Meat, Fish or Eggs. You are a good cook; prepare something. Even if you take a little of those things, it will gradually become harmful. Let me give you an example. If you take a clean bottle, — fill it with clear, fresh water and every day put into it just one drop of black ink, before long you will notice that the water is not clear will soon become dark and polluted. Your Pains are not coming from your Stomach or Gall Bladder, but, from what you are eating.

(She was then given brief instructions concerning the proper food.)

F. B. — I had still Gall Bladder trouble, when I started with the Light. I took Orange mainly and in 6 months, the condition cleared: I can eat now anything. A short time ago, I had a Urine Analysis made and there was evidence of Sugar. Two days later, I had another Analysis made and there was no Sugar. I had taken Lemon Tonation before going for the second test.

C. N. — To establish the definite presence of Sugar in the Urine, it has to be tested consistently for years. Some times, we eat more Sugar than at other times. The Tissues will take just so much Sugar and eliminate the rest. Be not concerned about it.

(C. S. then nominated C. N. as the Delegate to the Annual Convention and it was seconded by E. F. Then, M. P. nominated C. S. as the Alternate Delegate and it was seconded by W. B. On vote both were unanimously approved with loud applause.)

M. N. — I like to make a suggestion that the Members try to interest their sons and daughters to join our Organization and have them come to the Meetings.

(C. N. and C. S. both spoke briefly on this suggestion and gave it every support and encouragement. C. N. also explained the system of irradiating water, its purpose and uses.)

C. H. — I tried it several times, but, felt I got no results.

C. N. — Results from it are slow in coming, therefore, I do not stress it very much. It is only a make-shift or substitute.

C. S. — You must remember that the Light works directly on the Aura, which picks up the Radiation and utilizes it to the best advantage, whereas, the water taken internally is limited as to where it will go.

F. W. — My husband was in the Hospital and was to have the Phlegm eliminated from his Lungs. We took him Irradiated Water and the next morning the Phlegm was eliminated by itself. The Doctor and Nurses were quite surprised.

A. I. — Can one irradiate the water at the same time as one is taking a Tonation?

C. N. — That is hardly possible, as if the water be placed within 18 inches of the Body, the Aura will vitiate any effects of the Light on the water and if the Rays be focused to include the water, placed outside of the 18 inches from the Body, the Rays will be too much dispersed. The water can be irradiated any time of the day for an hour and should be consumed shortly thereafter.

The main objection against Honey is not only that it is the Vomit of the Bee, but, also that it is composed of the Chemicals of the various Pollens from which it is gathered and is thus of unstable composition. We drink milk from our mother's breast, but, we do not drink her Vomit when she throws up by Indigestion. P. L. did not send her husband's Chart to us. She is an old time Member and her ignorance of the counting of the simple matter of the Ratio surprises me. What did she do all these years? A. D. also never sent her father's Chart. M. N. tackled the problems very sensibly. She is the worthy daughter of a worthy father and mother. The report of the Meeting made by M. P. was very fine and interesting. A. Z. did not consult the Institute. It seems what is given free is not well appreciated for its value! We need no Urine and other Laboratory Analyses in our Science; our methods are totally different, simple and perfectly practical. I marketed the Irradiator many years ago, but, the original patterns are gone and it will be some time before the scientific instrument will be in your hands. It is NOT a "make-shift" or a "substitute," but, is an AUXILIARY in our Science.

OUR SECOND ANNUAL CONVENTION Milwaukee, Wisconsin.

**Concise Report Of The Six Sessions Of September 10, 11, 12, 1955.
All Resolutions Unanimously Passed.**

Our Second Annual Convention was held in the Guild Hall, of the New Republican Hotel, North Third Street and West Kilbourn Avenue, Milwaukee 3, Wisconsin, as duly announced in our prior issues. The First Session opened at 2 P. M., on Saturday, September 10, 1955, President Dinshah P. Ghadiali in the Chair.

C. N. and C. S. presented their credentials as the Delegate and Alternate Delegate of the First St. Louis Missouri Studio; A. G. and G. W. represented the First Detroit Michigan Studio. Their credentials were accepted.

Dinshah — My beloved friends, we have numerous new Members, who are not aware of the history of our Organization and for their information, I shall speak in short about how our Science was evolved and how our present Institute came into existence.

(He then described his early childhood, his experimental researches and the opposition from those who were adversely affected by our Science and persecuted the Originator without investigation. He spoke about the Rights Of All Human Beings, stating that each person as an individual has four Birth Rights, being Liberty, Property, Security and Contract and that no legitimate Law or Power can deprive any Human Being of any of those Rights. Expatiation on this important theme closed the First Session. Most of his Experiments and similar matters are fully discussed in our Text Books.)

The Second Session was opened at 8 P. M. on the same date. The President read the much discussed letter of M. B., whom he had requested to be present and who was there.

Dinshah — M. B., to whom did you speak?

M. B. — I spoke to several friends.

Dinshah — You want the Members to make different companies to work with the Studios. You heard a strange voice that told you about the Powerhouse. You want a big building called "Universal Salvation Institute." It was to operate like a hotel with free Tonation with Color Projectors. Did you stop to think that we have the building in Malaga, but, our resources are not enough to operate many other separate Corporations? I admire you for your zeal, but, you do not seem to realize the pecuniary and other difficulties in the way. You talk about raising the money for such purposes, but, many people who subscribed as Donations before to save the Cause, now insist on getting the money **back**, because they assert they only **loaned** it! Last year in the Convention, the same question came up for discussion and it was **unanimously** resolved that the money donated was NOT as a loan, but, was contributed to protect the Cause. I am opposed to gifts and contributions and if I had the money, I would tell the people to send a copy of their receipt, get the money and stop the bickering. Instead, we are loaded with liabilities. F. K., you are one of the Trustees of this Institute; did you see our Principal Office?

F. K. — Yes.

Dinshah — How much is it worth?

(F. K. declared his views about the Office Building, the value of the Land and Experimental Apparati and also spoke about the Assets and Liabilities.)

F. K. — I make a Motion that the Visible Spectrum Research Institute take over the Real as well as Personal Property of Dinshah P. Ghadiali, as in our By-Law 17.

K. B. — I second the Motion.

C. N. — By what means will it be paid?

Dinshah — I am turning it over without any payment.

C. N. — I was wondering if any money was involved, but, you state there is not any involved.

Dinshah — All the Assets and Liabilities will be turned over to the Institute. Let us take the Vote.

(On Vote, the Resolution was unanimously passed.)

Dinshah — There is no Power in the World that will be able to touch our Research work. Opponents say "Light and Color have no Therapeutic Power"; we claim nothing, but, are working to prove it to our satisfaction. Truth will eventually come out. I shall soon start to make Portable Itisometers.

M. B. — What I would like to have cleared is, have you a President? I would like to have you stay with us for ever! Will the new President be like you?

Dinshah — I knew what was coming! Leave it to me; I shall find the Successor. I shall train my Successor; you all stick to our Constitution and By-Laws. Now, my dear friends, what is your opinion about M. B.'s ideas?

C. S. — I think her ideas are wonderful, but, to put them into effect would be very costly. I really think, our Dues should be raised. Everyone has the privilege of coming into the monthly Meetings.

Dinshah — The ideas of M. B. are impractical. I do not agree with the view about raising the Dues. As it is, many Members who are actually Diploma Holders as Graduates of the prior Institute, enrolled as Experimenters and saved 50 cents a month! How do you think I like such tactics? Leave it to the Council Of Trustees. I shall be glad to have M. B. ventilate her views tomorrow before you. Of one matter you may be certain, that from past experience I shall not advocate asking for any Gifts or Contributions, which many endeavor to call "Loans," to be repaid.

The Third Session was opened at 2 P. M., on Sunday, September 11, 1955. Dinshah was in the Chair. He related the story of a young woman who was declared by the Doctors as sterile and through the use of our Science, she became a mother. The case was printed in our magazine of June 1955.

Dinshah — We are not opposed to any practitioners of any system; all I desire is to remove Healing Monopoly before I leave the Physical Plane. K. B., I am told you want a larger hall; you will have it when the attendance warrants it. A. G., do you remember Father Coughlin used to speak on the Royal Oak Radio Station, in Detroit, Michigan?

A. G. — Yes, I remember.

Dinshah — Well, every time I visited Detroit, I used to broadcast from that Station about our activities. After a few addresses, they returned the balance of my contract money with the remark that permitting me to

speak, might lose them their License! Such is the Healing Monopoly! I aim to restore that valuable freedom. C. N., are we not an Organization for the promotion of Health?

C. N. — Yes.

Dinshah — Then, why should we be restricted from such service and freedom?

C. S. — You spoke about Portable Itisometers for home use; I wondered if you will ask how many wanted one and get the money?

Dinshah — No; I do not want the money in advance. Because of past bitter experience, I shall market the instrument when ready, by letting you know through our periodical. I saw so much of life, that even if you will not want me as your President, I shall willingly accept \$5,000.00 from you and step out, leaving this country for ever. As it is, I shall not relinquish my duties, until I find and install my Successor.

G. W. — I like to know about the R and L in our Respiratory Rhythm Guide. It is different in regard to time and has so many changes.

Dinshah — That is the Occult Operation Of The Vital Vehicle, explained in Chapter 113 of our Text Book Set. It is the Variant Breath Pre-nomenon, not known to or recognized by the Occidental Scientists. Its operation is through the Great Sympathetic Nervous System. I shall gladly explain its mysterious action.

(The stated action was then clearly explained.)

R. S. — I like to have you explain why people have Hay Fever at this time.

Dinshah — It is the result of the mechanical irritation produced by the various Pollens of Flowers flying through the air.

A. G. — Now, tell us why everybody does not get it.

Dinshah — The Pollen has also the chemical properties of the Flower and those whose vitality can resist and combat the annoying chemistry, escape the Disorder.

The Fourth Session was opened at 8 P. M. the same day. Dinshah was in the Chair.

He spoke about the Plain Talk Magazine of Morris A. Bealle and his book "Medical Mussolini," showering deserved praises on the author. He still has a few copies for those who desire to study the persecution of the various Healers. The original price was \$3.00, but, our Members may have it for only \$1.00 per copy. The question of Rational Food coming up for discussion, discarding the eating of Beef was given consideration.

A. G. — In this, we have one obstacle to overcome. Why do you wear shoes? A cow had to be killed to make the leather.

Dinshah — You are right in that about America, but, in India, it is different. We have there a fund wherein so much is placed for the milk sold. The cow is not killed. When she ceases to give milk, she is sent to certain pastures until she dies naturally. Then only the hide is used.

G. W. — Why do you insist on a new Member not getting a Color Projector without submitting a complete Chart first?

Dinshah — There is a cogent reason for it. It prevents a person from purchasing a Color Projector and later using for a purpose for which our Science is not recommended. Is N. T. present?

N. T. — Here I am.

Dinshah — Did you sell a Projector to E. S.?

N. T. — I bought it for a man who had Eczema. He then backed out, so, I sold it to E. S.

Dinshah — Yes and she had already placed an Order with the Institute for a Projector, which she cancelled and took the one you had for a lower price. That is no business policy. I also request you not to gift Color Projectors to religious organizations, because, they never send their detail description Charts and having no proper directions for the use of the Equipment are liable to become knockers instead of boosters. Their activities are based on "Donations," our activities are based on "Tonations!"

R. S. — I know a man who travels and he said he saw colored lights on toilet seats. He believes those kinds of lights are good, but, has no faith in our Lights. Two weeks ago, a man told me his wife was going to have a baby, by Caesarian Section; now, the Doctor says she will have all children that way. Is that right?

Dinshah — Not necessarily. There are cases, where such an Operation is the only way, but, in numerous other cases, the cash involved is the main factor. I sincerely wish we have our own Hospital. A man has a daughter of around 4½ years and she had Leaky Ear. He wanted to use Indigo, but, I told him to use Orange until the Mastoid Tumor bursts. I warned him about his wife, who was pregnant at the time. The Doctor examined the little one at birth and declared it a "Blue Baby" and that it had Heart Disorder and would need an Operation.

A. G. — May I say a few words? At night, this man traveled about 4 hours to get Raw Milk and you would be surprised if you would know what such milk did for that baby. Everyone is acting on scares. That man knows in his Color Projector he has something. I have used this Science for 30 years; if you use it as instructed, you will have success.

The fifth session was opened at 2 P. M. on Monday, September 12, 1955. Dinshah was in the Chair. He read an article from The Milwaukee Journal on "Court Upholds The Medical Law."

C. N. — You know those Prepaid Student forms you now have are all right.

Dinshah — A Graduate Researcher sent me one recently, without his signature! Here is our First Champion E. S. B. Greetings to her.

C. N. — My son O. gave a speech in the college, on Color. The Nurses, Professors and Doctors were there and they told him after the lecture: "Why don't you become a lawyer, then you can fight for it?"

C. S. — A point comes to my mind. If a person comes to the Graduate and is not sick, how will that person get a Projector without being sick?

Dinshah — That is for the Institute to determine; the Chart will indicate.

C. N. — Suppose someone purchases at our suggestion.

Dinshah — The person must have read the Family Health Protector. It is now 4 copies for only One Dollar. In a few weeks, I shall have excerpts on specific subjects from it like: "Food Chemistry Proves Inferiority Of Slaughter Food," "Poisonous Drinks: The Bane Of Tea," "Poisonous Drinks: The Bane of Coffee," "Poisonous Drinks: The Bane of Alcohol," "Tobacco Smoking An Unmitigated Curse" and the like in leaflet form, 100 for One Dollar. Send your Orders, then.

O. L. — I think you gave us good information to have us go straight.

Dinshah — We are researching to find the Powers and Effects of Light and Color on the Human Body.

C. N. — I have a request. Anyone sending a Chart to the Institute, gets a reply and the Institute has a duplicate. My request would be that the Institute should take several hundred Cases, make it into a course and send it to us. It would save traveling, if we could have the knowledge of all those cases and we may give that at the Studio.

Dinshah — I do not intend if possible, to bring the Classes in our Science to different cities, but, intend to conduct them right at the Institute. The information in the Charts is strictly and professionally confidential. As soon as I have someone trained for the work, I may go to Europe, where I have calls from Germany, Austria and Italy. I may also go to Sweden, to conduct Classes before Scientific Academies.

C. S. — Two questions have been disturbing me. I think I am right when I quote you, that "If a bucket of water is full, it will take no more." Why would it be injurious to that baby to take the Blue? Why would it be hazardous?

Dinshah — It is not a question of "injurious" or "hazardous." The blue condition indicates want of proper Circulation and you well know what to do for it. At this time, I wish to draw your attention to the pamphlet entitled "The Decline Of The Medical Profession In Public Esteem," which is a reprint of 25 articles published by the Milwaukee Labor Press. It is 50 cents a copy, but, to save individual Members writing for it separately would be burdensome. What is your opinion?

C. S. — I move that the Institute should purchase them wholesale and mail to our Members, who may send 25 cents per copy.

G. W. — I second the motion.

C. S. — A Member was heard saying that if we could give it to outsiders even, it would be a service to our Cause. We should be careful to whom we give it.

A. E. — Would there not be objection to it?

Dinshah — I do not think so; it is then your property; do what you like.

On Vote, the resolution was unanimously passed.

E. B. — A Member went to a Doctor, as her children wanted her to be examined. She was asked: "When did you have your last examination?" She said: "About 25 years ago." The Doctor said: "What! I shall have to report you."

(A discussion ensued about Vaccination.)

G. W. — What shall we do with all those unemployed people?

Dinshah — They will build Color Projectors!

M. N. — I should like to know how much food one needs to exist. My father always says: "It is not what you eat, but, what you digest that counts." How much shall I eat?

Dinshah — Your father is perfectly right. Nature has her ways. Chew thoroughly whatever you eat. You have a beautiful body.

(A question was asked about suspended animation. Dinshah showed how he has developed control of Respiration and can voluntarily breathe with only one Lung, shutting off the other!)

Dinshah — Now, before we close this session, I should be pleased if M. B. would bring out her views in short form. The platform is open for her.

M. B. — I am not a good speaker. I can not talk at the moment. Tomorrow, I shall write down my points and bring them.

The sixth and last session was opened at 8 P. M. the same evening. Dinshah was in the Chair.

Dinshah — I have a notice from the management of this Hotel, that because of the Guild Hall being needed for the State Teachers Convention, on November 3, 1955, that our Studio's monthly Meeting be postponed to November 10, 1955.

R. S. — I make a motion that the change be accepted.

A. E. — I second it.

(On Vote, the resolution was unanimously passed.)

Dinshah — I am also informed that the name of the Guild Hall is now changed to the "A" Room.

F. K. — I make a motion, that the Contract for 1956, for the Studio Meetings be accepted and the amount be paid in advance for the A Room.

C. S. — I second the motion.

(On Vote, the resolution was unanimously passed.)

F. K. — I make a motion, that a letter of thanks be written to the manager Mrs. L. M. Horel and the proprietors of the New Republican Hotel, for their courtesies in the past.

C. S. — I second the motion.

(On Vote, the resolution was unanimously passed. Some discussion then ensued about the case of Lucille Miller, Aspirin and the Slideless Color Projector.)

Dinshah — I had two models of the Slideless Color Projector, but, they burnt in the disastrous Fire of 1945. I have also designed a Projector with only the three Primary Color Slides. Just give me time. E. S., here is your refund check for \$125.00 in full for the Order you cancelled. I did not forget to bring it; my memory is still good! Hereafter, there will be no cancellations. It is a stipulation on the Order Blank.

A. E. — My question is insignificant. My husband has trouble reading a paper; it feels like something sharp in his Eye. What should he do for it? Do you recommend an Eyewash?

Dinshah — Send him to an Optometrist and send me the report on his Eyes.

R. S. — This Summer, I noticed something strange. People I thought were healthy, were Sunburnt. A man with whom I work is an Indian; he has Blotches and now they are white.

Dinshah — I am against burning the Skin by the Sun and going out without a Headcover.

G. W. — In case of a Radio-Active Burn, what should I do?

Dinshah — Go on the Infra-Green Division.

C. N. — In case of an Atomic Attack, do you not think it would be on the Infra Side and because of that, it should be tonated on the Ultra Side?

Dinshah — His question was different. Atomic Bombing produces both Rays. In the Explosion, Heat of a tremendous Temperature is generated; that needs the Ultra-Green Division, while the Fallout of charged material Particles, is on the Ultra-Green and will need the Infra-Green to heal.

(Some discussion came up about pleading of the Fifth Amendment to the Constitution of the United States Of America.)

Dinshah — That Amendment is wrongly interpreted, even by Judges and Lawyers. It says in simple language:— “No person shall be held to answer for a Capital or other infamous crime unless on a presentment or indictment of a grand jury except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb, nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.” You will note that in congressional and other investigations, the person questioned is not actually **involved in a criminal case** and what may be happening in the future, should not be presupposed. My view is that the idea of holding one for “contempt of the Court” is ridiculous, because often the Court itself acts in a contemptible manner. I hold that a person has the **absolute right to express or withhold his views and opinions or experiences**, otherwise, it would be a mere dictatorship. From what the person says or does not say, the Court or Jury is at full

liberty to formulate its own opinion, favorable, adverse or otherwise. The entire Constitution and the Amendments need overhauling, to suit modern ideas and inventions. They were good for their time, but, the progress of Science and Civilization has changed many aspects. Why do you not send me to the United States Senate? I can give them a filibuster such as they never had; in New York over 30 years ago, I spoke in a Medical Association for 14 hours at a stretch, without leaving the platform and when I left at midnight, most of the Doctors in the audience were — asleep!

R. S. — You should have been in the Senate all the time.

Dinshah — Thank you; anyhow, wait till I write the book, "Cracks In The Constitution And Blunders In The Bill Of Rights." Now, we have only a short time left and I promised to give a few minutes to M. B.

M. B. — The letter I sent to the Studios, was a vision I was given from Colonel Dinshah. I never had any schooling. If the fellow Members want me to read it, I will. I want to give my honest opinion.

(At this, M. B. brought out a bundle of papers to read.)

Dinshah — We have very little time left. You hand me the papers and I shall return them to you, after scanning the contents.

C. S. — You asked her to write, so she may read.

Dinshah — True, but, not a whole bundle. We have no time here for Dreams and Visions and Powerhouses. She may have her papers; I request the Studios to pay no attention to M. B. hereafter. She admits having "never had any schooling."

(Some discussion was then made about Cancer, not sleeping with a mate in the same bed and the like. Dinshah demonstrated by "sleeping" in different postures and "slapping" the mate!)

A. E. — I propose a Rising Vote for our President Dinshah and that he may have safe journey home.

(All rose and our Second Annual Convention was gaveled closed.)

DINSHAH ADDRESSED CHICAGO MEETINGS

The Joint Convention of the American Naturopathic Association of which our President Dinshah P. Ghadiali is a Member and the American Association For Medico-Physical Research of which he is a Fellow, was held at the Hotel La Salle, in Chicago, Illinois, from Saturday, September 3, 1955, to Thursday, September 8, 1955, both inclusive. On Sunday, September 4, 1955, Dinshah addressed the Convention on "Sound, Heat, Light, Electricity, Magnetism." Chart of "Energies Of The Physical Plane, 64 Octaves Of Oscillatory Frequency," as computed by him was distributed to the audience. On two subsequent days, because of the unavoidable absence of the speakers on the program, he was requested to address, which he willingly did on "Rational Food Of Man" and "Chromo Therapy," in his extempore manner.

SPECIAL WARNING ABOUT MILWAUKEE STUDIO

The monthly Meeting of Thursday, November 3, 1955, of the First Milwaukee Wisconsin Studio, will be held on Thursday, November 10, 1955. Members will please note.

WE GET SPECTRAL SMILES

Viewpoint — I have Verigoose Veins.

Smile — Will be good for Thanksgiving.

Viewpoint — I fell and got 7 pumps on body.

Smile — Use some for water and some for oil.

Viewpoint — The Studio Heating was good.

Smile — They are preparing for medical Winter.

NO WARRANTY, NO GUARANTY, NO LIABILITY

OPEN DECLARATION FROM THE EDITOR DINSHAH P. GHADIALI

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
