## THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

### "COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

## NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is **graft**. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

## THAT IS A GOOD ANSWER By:-INDIVIDUAL EXPERIMENTERS

### SUBACUTE ENDOCARDITIS REPORT BY P. B.

I have used the Color Projector since 1942 and found it very beneficial. In the Spring of 1942, Dr. N. of \_\_\_\_\_, said there was no use to treat me, as there was no help for me. I was suffering with Subacute Endocarditis. At that same time, Dr. S. from \_\_\_\_\_, who is now in the Army, treated me also. He said that my Heart was very irregular and that I could hold out a very short time. It was then that I began Color treatments, under the supervision of a very efficient Graduate. Within three days, my Pulse was regular and my improvement was steady from then on. Within three weeks, I was able to wait on myself. I have been using the Color Projector steadily since 1942. I opened a bicycle repair shop and am working every day. I have had this shop since 1943 and I feel well and weigh 195 pounds.

\* \* \*

### ASTHMA, EAR ABSCESS, MISCARRIAGE, HEMORRHAGE, SLOW PULSE, CONSTIPATION, FEVER, BURNS, BACK INJURY, ATHLETE'S FOOT, INSECT BITES REPORT BY E. E.

My personal experiences about the merits of the Visible Spectrum are as follows:— I suffered from attacks of Asthma for over twenty years and brought this terrible Disorder under control in less than three years. My son of five years had Asthma attacks since he was 11 months of age and was normalatated in less than one year. My daughter of three years had Abscess in both Ears and was normalatated in less than 6 weeks. The Color Projector was used by me successfully in our family in such Disorders as Miscarriage, Hemorrhage, Slow Pulse, Constipation, Fever, Burns, Back Injury, Athlete's Foot and Insect Bites.

\* \* \*

### CONSTIPATION, NERVOUSNESS, FISSURES, BURNS, ARTHRITIS REPORT BY E. M.

I am the possessor of a Dinshah Color Projector and do want to state of my own free will that I am completely satisfied with the results obtained by it. It has normalatated me from, Constipation, Fissures, Nervousness, Burns and Arthritis. I am very grateful for having heard about it, as I can not say enough in praise of it.

All the above Reports are from Affidavits sworn before Notaries Public.

## OUR STUDIO ACTIVITIES

### EXPERIMENTER FINDINGS AND QUERIES

### MEETINGS OF THURSDAY, OCTOBER 6, 1955

#### First Allentown Pennsylvania Studio

B. W. — I had Cold; used Green Local, Lemon Local, Lemon Systemic.

J. F. — I had Head Cold; used Turquoise on Area 15, Green Systemic, Lemon on Areas 4 and 5.

B. W. — You could use Turquoise on Areas 2, 3, 4, 5.

M. B. — I can say I am getting better. I have some sore spots in Areas 4, 5, 6, 7, 8. My Breathing is easier. Have great Fatigue. Used Green Systemic Front, Orange on 6, 7, 8, 9, 10. I have no lasting energy yet, it will come in time. A woman called and said she thinks she has a Tumor. Sensitivity tremendous when urinating. Something hanging low. It was dropped Organs. Used Green on 9, 10, 11, Lemon Systemic and some Magenta.

B. W. — How long did it take for the things to go back?

M. B. — About four weeks. Is not anyone curious about that M. B. letter?

M. P. — Seems to me like another party wanted to manufacture their own Equipments. I believe that as long as Dinshah is living and the people listen, he will put them on the right track. Some say he is wrong, but, they are wrong; he is right.

E. M. — Sounded to me as though that person did not know about what she was talking.

M. B. — She was not practical. I do not think anyone can beat Dinshah on matters of Organization. He is well conversant with the Law and knows what is right or otherwise. I may say to you all that whatever you experiment, please, give it out at our Meeting. Maybe you will help someone else. Do not withhold. You should go to Meetings, to give as well as receive. Tonight, we shall finish the study of the Chapter on the Orange Wave, on Tuberculosis. (After reading) What is the remedy for Tuberculosis?

B. W. — Orange on 4, 5 and 17.

M. B. — During the Febrile Period or when there is Fever present, irradiate with the Turquoise, otherwise go on the Infra-Green.

B. W. — How does the Calcium in the Orange Wave compare?

M. B. — There is no comparison.

(She then went over the Attributes of the Orange Wave.)

Please, note that the worthy M. B. of Allentown is not the M. B. of Milwaukee who created that uproar. Let the letter incident be an event of the past. M. P., thank you for your confidence in and kind thoughts about my humble entity. Let the public say or think what they believe; when challenged about the Originator or his Science just tell them: "You say he is not right, but, we know he is never wrong."

\* \* \*

### First Cleveland Ohio Studio

A. M. — We have a new Member L. T., we welcome her to our Studio.

L. T. — I thank you. I was to the Institute in Malaga and met Dinshah there. It was an interesting and pleasant visit.

E. L. — I was spending a few days in Detroit with my family, when my 14 year old daughter became ill, had a high Fever and kept asking to have her Legs massaged. We thought she was coming down with Polio, so, started back for Cleveland and promptly tonated her with Turquoise; as the Fever subsided, we switched over to Orange Systemic. After a few Tonations she felt better.

G. H. — I had a complete stoppage of Frontelim and Backelim. After a time, I went to a Doctor; he suggested Surgery, but I decided against it. I went home and tonated with Lemon, Green and then Yellow. After a time, I passed something which was about 12 inches long; I could not break or tear it. It had edge on both sides, a small hole on one end and a large hole at the opposite end, with three black spots. I had no Pain; both the Kidneys and the Bowels began to function. I flushed that long object down the toilet bowl. I also fell and hurt my Knees; tonated with Orange and am getting better.

A. M. — I suggest that you do not forget to tonate Areas 4 and 18 with Magenta.

(The leaflet "The Therapeutic Value Of Light And Color," an abstract of a paper presented at the clinical meeting of the Section on Eye, Ear, Nose and Throat Diseases of the Medical Society of the State of Pennsylvania, held at the Medico-Chirurgical Hospital, Philadelphia, October 12, 1926 and reprinted from the Atlantic Medical Journal, April 1927, by Kate W. Baldwin, M.D., F.A.C.S., former Senior Surgeon of the Woman's Hospital, in Philadelphia, was then read by T. S., who received it from the Institute. The said leaflet was printed in full in the February 1955 issue of the Visible Spectrum Researcher.)

The Chart of G. H. just came into the Institute and will have our usual, careful study. That "long object" must be a dried impacted mass of Backelim, which might have been mistaken for a Tumor. We shall look into her case to relieve her. The Dr. Baldwin leaflet may be had for \$10.00 per thousand with the name and address of any of our Members, who desire to distribute it for interested friends in our Science. She was one of my most learned and worthy Graduates and for many years my Vice-President. Because of the delivery of that paper, she was forced to resign her post from the Hospital and died and was buried in Lawrenceville, Pennsylvania in 1937. Blessings and Glory on her devoted Soul!!!

\* \* \*

### First Detroit Michigan Studio

A. G. — Our chairman asked me to take charge of the Meeting tonight, as he was unable to be with us, due to some of his family arriving in town.

E. R. — I had a bad Head Cold; it seemed to have come quite suddenly. Tonated with Orange, followed by Magenta. Next day, one Tonation of Turquoise to relieve the tenderness around the Nose; afterwards, Lemon and Magenta. I still have traces of it and shall continue with the Lemon until normalated.

A. G. — This is the "Cold" season that is coming up in more ways than one, so your best plan is to prevent rather than normalate. Do not let yourself be overtired, for, when your Resistance is low, you can not ward off those pesky Colds as quickly as you would like; so, I repeat, tonate to prevent and should it get a "hold" of you, then, by all means, tonate to normalate, always remembering to check the Ratio first. As you all know, G. W. and myself went over to our Convention held in Milwaukee. We certainly enjoyed every minute of it. As our Conventions go, it was not as large in attendance as Conventions in the past, but, it was nice to see old friends again. Of course, Dinshah looks the same as ever and had much to say which will be printed in the Convention issue of our magazine. I understand the American Federation Of Labor has printed an expose of the American Medical Association, which is considered excellent and if we are interested, we may be able to purchase them through the Institute. He mentioned he still did not receive the complete books of the previous Organization and when all is fully returned to him he intends turning everything over to the Institute. He spoke of the plans of the Institute for the future. He also wants to build new buildings at Malaga and resume the Class work he had there at one time. His talk was most encouraging. He is 82 years old and busy every minute of the day. He would scoff at any talk of retirement. Most men, when they are around 60 years old, begin to think of taking it easy, but not he. He has so much work to do, so many plans to draw, so much to which to look forward. A day as it is, is all too short for him. He does not look his age; I doubt if he ever will! He is, I guess, just too busy

to grow old! He spoke of the M. B. letter and was convinced that it was not the answer to our needs. You will read the complete report in our magazine. I had a nice talk with K. B. in Milwaukee and he told me that the Studio had quite a set back because of the former Law Suits. Many stay away and are afraid to come out in the open, but, lately he noticed some of them beginning to return and he was convinced that we had gone over the "hump" and many former Members will be joining us again. I, myself, feel very strongly about that. Always remember this, that it has been Dinshah who has been hounded and persecuted unmercifully, but, the Science itself has NEVER been challenged. Take just one Disorder alone — where will you find anything to compare with the Visible Spectrum and how it works on Heart Disorders? Every year, the statistics on Heart Disorders show an alarming increase and remember that is only one Disorder about which I am talking; there are many more right behind it, yet, they will not use Dinshah's method; why? If it has no merit, as they claim, no harm will be done; still they refuse to try it! How blind can they be?

C. W. — It will not be long before we shall be receiving our Request Forms for Continuation of Membership for 1956. I was wondering if we could have extra blanks, so we could give them to Inactive Members whom we know. I am sure, we could bring back quite a number of the former Members. Occasionally, I run into someone, who is very surprised to hear that we still hold our Meetings and did not miss one. So, I am in favor of extra Applications sent here to the Studio, so we can pass them to persons we know who did not join the Institute.

A. G. — Yes, I know we have many Members in Detroit alone, who should be here this evening. By the way, we have an old time Member here with us this evening. What is your name, please and the year you joined?

M. B. — M. B. and the year was 1930.

A. G. — It is very good to see you here and I hope you will be able to be with us every month. I sincerely hope more Members will attend our Meetings. Do you realize this is the only place in Detroit where you can learn and study together the Dinshah Theory of Light and Color? We should make the most of it. After all, it is we who shall profit the most by the study of the Visible Spectrum. Think of the sickness in the World today. Our Hospitals are full; as soon as new Hospitals are built, they are filled to capacity. Millions of dollars are spent every year for medical aid and look at the hours that are lost in the business world through illness! Is it the purpose of life that as we grow old we die of one Disorder or another? We are sure of one event that we shall pass out of this life soon or late, but, does it have to be so painful and in many cases so tragic? I suggest that you study the Text Books Set of Dinshah. It is a marker pointing the way to a much fuller life, but, remember this, that it is a marker, no more no less; the rest is upto you, whether you act on it or prefer to stay in the comfortable rut in which you happen to be. The choice is yours and yours alone.

(A. G. then read from the third volume of the Text Books Set, Chapter 88, captioned "Governor Green.")

A. G. — I already told you about the marvelous functions of the Pituitary Gland and how it can assist other Glands when they break down through illness or through some other cause. I draw your attention to the Lemon and the Turquoise and advise you to study diligently the Affinity Color Waves. In working with Infections and Skin Disorders, there is nothing to equal the Lemon, Green and Turquoise, but, you must know exactly what it is you are doing, otherwise, valuable time would be lost. Our greatest helper is Mother Nature, if we only give her the chance, but, do we? We all admit the Human Body is the finest machine known to man; we pride ourselves that this is the Machine Age and boast of the progress man has made in the past century. All very true. Most of us try to keep our automobiles and electrical appliances in good condition, for, we well know if we do not, they simply will not work as the manufacturer intended they should. What then about the Human Machine? The abuse it can stand is unbelievable, but, soon or late the day of reckoning appears and then what? Put into the Body what Nature intended to go into the Body. Correct Food, Cleanliness and the formation of Good Habits of living. It is all actually very simple, but, we are the ones who complicate matters. It is just as easy to cultivate Good Habits as to form bad ones. Try to watch yourself and see if I am not right. Every day, we hear of someone suffering from a Heart Attack; remember the Scarlet, Magenta and Purple. Study these three Colors, as you should all the others as well; then, you will know exactly what to do should an emergency arise in your home. Life is sweet and beautiful, but, when Health is absent, most of its lustre is gone. From time to time, the old argument comes up — how dark must a room be for daytime Tonation? Well, I asked Dinshah himself to give us the answer, to see if we can end it once and for all. He said: "Pull down the shades and continue tonating, making sure no beam of Light from the outside crosses the beam of Light from the Color Projector, as it covers the Body of the Sufferer." There it is and you may suit yourself. Of course, a totally dark room is preferable, especially if you are using the Ultra-Green side. Another suggestion is, not to have doubts in your mind about the effect of the Color with which you irradiate your Body, as the Mind has great power over the Body. You may not have results fast enough, but, do not forget that it takes time to equilibrate the Body which is disturbed. You know you are working with Mother Nature and she will reward your efforts, no matter how puny they may seem. Study the Text Books when you have to tonate and know just what that Color will do and its Affinity Waves will do and dismiss all negative thoughts; when you flip over the switch of the Color Projector, just remember the words spoken thousands of years ago by a great sage, that "Man is made in the Image of God."

I am working on securing the copies of the booklet published by the Milwaukee Labor Press. My view about "retirement" is that when a person retires, his tires give way and he needs new tires. Benjamin Franklin said: "If time be of all things the most precious, wasting time is the greatest prodigality, as Poor Richard says." Life is for action, as there will be sleeping enough beyond the grave. My Science as a SCIENCE went through the most acid test in the New York Supreme Court, wherein I was charged with Grand Larceny for selling an alleged worthless Color Projector to a Graduate in Buffalo and fighting the case as usual as my own attorney, I was acquitted by a Jury after colorful trial of four days. It was in that case that the Subordinate Courts were closed for that period, because, many Lawyers pleaded with the Judges for postponement, so they may see and hear a "layman" fighting a criminal case, wherein the Prosecution brought against the accused, head Professors from the University, who admitted the truth of Dinshah's Science. That entire case is printed in a volume of nearly 350 pages with my comments and a few copies are still available at \$5.00 a copy. Its name is "Triumph." The World may persecute me, but, the person who will conquer the Science of the Visible Spectrum, will never be born of a mother's womb! As suggested by C. W., 1956 forms for Membership were mailed to the Studio Commissioners. Go after the Inactive Members; we need them as they need us. The M. B. who spoke in Detroit is an old time male Experimenter and is not that woman M. B. of Milwaukee. The elucidation given by A. G. in the Studio does great credit to him. He unraveled many dubious points and I feel honored by his faithfulness and his interesting remarks. As regards the "Duties Of Studio Officers," I have to draw the attention of your Studio Commission to our By-Law 35.

\* \* \*

### First Merrill Wisconsin Studio

Some Editorial Remarks from October 1955 were read by W. B., with a few cases of the Detroit Studio. Then Chapter 92 on Diabetes Mellitus was read from our Text Volume 3 and discussed.

A report was sent by the parents of F. K., that he was in an automobile accident and was taken to the Hospital, from the scene of the accident, by the authorities. He had a Rubber Bandage on the Leg. After he came home, he used Color with the Bandage still on and three days later, the Doctor examined the Leg. He said it looked 100 per cent better. After that Orange Systemic was irradiated and Green Local on the Leg. He thought of going to the Turquoise, to heal the Skin.

Member — Would it help to tonate with the Bandage on the Limb?

W. B. — Yes, the Aura would take it over partially where needed. If Lemon or Orange Systemic be taken, it would help the Circulation and keep the rest of the Body in condition. Green is also a good Cleanser.

F. K. — I had a Toothache. I used the Blue and in 15 minutes it was all right.

W. B. — If you do not get results from one side of the Spectrum, use the other.

A. G. — My wife had a severe Pain in the Back. Used Orange, but, it did not help much. Then, took Turquoise and in about 15 minutes, the Pain left. I like to know if it were a Ruptured Appendix, would it be healed by now?

W. B. — No.

E. K. — It might be just Gas and I suggest Scarlet or Magenta on Area 4.

Member — Do Green and Lemon take care of a Goitre?

(W. B. read about that from Text Volume 2, Chapter 69.)

F. K. — When my baby is sick, the Light helps right away. I have a Heart Disorder, but, some think it is just Nervousness. What shall I use?

W. B. — Use Yellow.

The matter of the report from the parents is somewhat hazy to me. Who got the report? The Member himself was present and he sent no Chart to the Institute since the beginning of 1954. It will be appreciated if a short text of discussions on various items be duly reported, so I may assist from this angle. You have an intelligent Reporter.

\* \* \*

**First Milwaukee Wisconsin Studio**

K. B. — Does anyone have any case reports?

(There being no response, he continued.)

K. B. — How many received their magazine?

(About 2/3 of the Members present said they received their copy.)

K. B. — I shall read tonight from the third volume of our Text Book Set, Chapter 91 about Cancer.

(After the reading was over, some discussion followed.)

A. S. — What causes a Blood Clot? I understand it develops after an Operation, but, when there is no Operation, then what? Is Magenta the Color to use?

K. B. — Lemon Systemic.

A. S. — About three weeks ago, I fell; used S..... Liniment. At first I did not think much of it, but, now it came back.

K. B. — Healing goes on through the Blood; Blood Clot will appear if the Blood be not healthy.

F. K. — I wonder if Coagulated Blood will create a Stroke.

K. B. — It will not create a Stroke.

A. S. — Is use of Electric Pad harmful?

K. B. — I do not think much of it; I think moist Heat is better.

A. S. — Do you get any benefit, if you use it at any time?

V. T. — I know a man who uses it at any time and he gets results.

R. S. knows him.

K. B. — R. S. would you recommend taking Tonations like that?

R. S. — I would not recommend it.

K. B. — When you burn yourself, you may take it immediately; there is no Disorder. When your Body is trying to eliminate waste you should not try to put into the System anything at that time.

V. T. — Would you derive anything, if you take the last half hour? Do not misunderstand me; I do not do it.

L. K. — Suppose something happens during the Sunset; the son of S. was hit with a stone; she called me; I told her to wait 15 minutes.

K. B. — Sunset takes around 9 minutes. Do not take a Tonation at Sunset; you might spoil all you might have done. Do not eat at Sunrise or Sunset. Avoid it for about 9 or 10 minutes. The same about Eclipse; it affects living things.

E. T. — If you start tonating 15 minutes after the start of the Favor Time, would you take it 15 minutes longer?

A. E. — K. B., in other words, if you get under 15 minutes late, you do not have to stay under longer?

F. K. — Coming back to the Favorable Time; even in the Bible, everything has a Favorable Time to start.

The magazine is dispatched the same day to all Members; the delivery depends on the postal routes, distances and the like. A specific disturbance in the Body Chemistry, might produce a difference in the Circulation of the Blood in the narrow Vessels and should there be any obstruction, a Clot might form by precipitation from the Serum. Such plugging or Coagulation, might cause a Paralysis or Numbness in an affected area. An Electric Pad, as a mere generator of Heat by Electricity has no harm. I think what was in the mind of the questioning Member, was the point of adherence to the Respiratory Rhythm Guide. I was 18 years old when I learnt about certain actions not to be performed during certain periods. The instructor was my worthy Sanskrit teacher, Ratnashanker Udesanker Bhatt. He taught me that:—

“Sayankale tuhe rajan,  
 Karma chatvari varjayet;  
 Aharam, Maithunam, Nidra,  
 Vidyachintan nakarayet.”  
 “At Sundown O King,  
 Actions four must be avoided;  
 Eating, Sex Indulgence, Sleep,  
 Scientific Study should not be done.”

It started me on that study to know why such a rule was laid down by the Masters Of Occult Science and finally after years of other research, I reached the goal in the formulation of what you are now given in the Respiratory Rhythm Guide, to prepare which every year, takes between 2 and 3 weeks of my life. The explanation of that alleged “theory” is simple. I exemplified it in all my Classes to the Students, that our Breathing Process follows a definite RHYTHM and whatever Rhythm one’s nostrils are following at a given time, at Sunrise and Sunset or an Eclipse, a reversal is occasioned. I request you all to study carefully the Chapters 113 and 114, from the Third Volume of the Text Books Set. As regards the questions of V. T., L. K., A. E., I may state that if they begin late, it will do no harm, but, going beyond the hour indicated, will be Electricity wasted. Our Science is the Science Of Automatic Precision and while the wrong Time or the wrong Color will do no harm, it will do no good, because, being built on the definite Laws of Mother Nature, disobedience to them will not be of benefit. Follow the Respiratory Rhythm Guide. The Sun being about 92½ million miles away from the Earth on an average according to the Season and the Oscillatory Waves of Light traveling 186,324 miles in 1 Second, it takes approximately 8½ minutes for that Energy to reach us, Yes, friends, our Body built as the “Image Of God” deserves better treatment than what is generally extended to it in this quasi-civilized life. Behave sensibly!

\* \* \*

#### First New York New York Studio

R. D. — I see we have some new Members here; are there any questions?

C. A. — My wife suffers with Acne for years; what Light is she to use?

R. D. — Fill a Chart and send it to the Institute. Has any one here a pink Personal Research Information Chart, so I may show him how to read it?

(A Chart was handed and explained.)

R. D. — Until you get your advice from the Institute, tonate her with Green Systemic and if she be constipated use Yellow on Area 8.

R. K. — Is it important to use organically grown Vegetables and where can I get them?

M. W. — I do not think you will get them in New York. I get my organically grown Citrus Fruit from Florida. I get Raisins, Prunes, Figs, Dates and Nuts from California. From New Jersey, I get Whole Wheat Flour. There are more places where one can get organically grown Fruits. I hope Dinshah will not mind my giving names and addresses of the dealers. I am asked so often about it and if it will be printed, our Members may profit by it.

R. D. — Organically grown, unsprayed food is far superior to what we may buy in the stores.

(He then read from "Industrial Medical Economics," by J. J. Rodale, Editor of "Prevention," wherein he spoke about the evil that arises from modern industrialisation, which is threatening our destruction. Business has been built up in the field of Medicine and Food Processing Industries, that are turning out products harmful to our Health. Because such companies sell products which furnish employment and contribute to our financial prosperity, they come under the benevolent protection of our Government. This trend goes so far, that it protects property at the expense of Human Health. Every day, more and more dangerous Chemical Products are being developed, which go into the Body of people, through their Foods. At the Delaney Congressional Committee Hearings to investigate the use of Chemicals in Food Products, held in 1950, the subject under discussion was whether Fluorides should be placed in our Drinking Waters. Dr. Miller, of the Department Of Agriculture made some examinations of Brood Sows. It was recommended to the farmers that Fluorine should NOT be added to the water or feed of Brood Sows, because, it did something wrong to the unborn Pigs.)

R. K. — Are Herbs considered medication?

R. D. — Yes, many Medicines are made from Herbs. In our Science, we have no need for them.

C. A. — Where is the Water Level in the Bottle in the Projector and must one use Distilled Water?

R. D. — It is important to have the Thermocept filled upto its neck, to prevent cracking of the Slides by the Heat. One does not have to use Distilled Water; you may use Water from the faucet, but, change for each Tonation. If you use Distilled Water, you only need to add to the Water.

P. R. — What is the difference between Yellow Split Peas and Green Split Peas?

R. D. — The Green Split Peas are not ripened; that is why we are told to use the Yellow Split Peas.

S. G. — I have Inflamed Veins. I am having Massages for years. I want to get a Color Projector; how do I go about it?

R. D. — Have your son sign for it. How are your readings?

S. G. — 84 to 18.

R. D. — I suggest you wear low heel shoes and no girdle, so you may not have pressure on the Veins.

P. Z. — I had five Teeth pulled. I used Indigo to stop Bleeding.

R. D. — When you have Teeth pulled, be sure to take Green first so you do not seal anything in.

A. S. — I had a bad case of Poison Ivy. I tonated with Lemon for 3 days and it spread all over. I did not know what to do anymore. L. F. told me to use Turquoise. That was not enough; it itched so terribly. Then, I took Green and Blue; I was all swollen and Red; it took me 2 weeks to be rid of it.

A. M. — You were fortunate to be rid of it in 2 weeks; you had a very bad case. All the Colors you used for the Poison Ivy, were right.

S. G. — I have to tell you what happened to me. When we heard of the Color Projector, we did not believe in it. My husband had a Cold; in no time, he was very sick. He even did not know where he was. My son told me the Blue Light is very good. I did not know what to do; it was in the middle of the night. I just put the Blue Light on his Head. He felt so much better from it, that it convinced us about the Projector.

R. D. — You just gave your husband the Blue Light by chance. Luckily, it was the right Color. Do not make it a hit-and-miss theory. Study the books; then, you will know what to do. Fill a Chart and send it to Malaga.

F. P. — Is it necessary to wear something on the Head at all times?

R. D. — It is advisable; it protects the Brain.

O. D. — I like to get a Color Projector; what kind can be had at present?

R. D. — Only the Blue Aluminum model is available. I read an article in the Daily News that two Doctors use Sound Waves to break Stones in the Kidneys. Doctor H. Lamport of the Yale School Of Medicine and Doctor H. Newman of the Gouverneur Hospital of New York are conducting the tests. They said they used High Frequency Sound to drill through Urinary Stones to disrupt them. They said that it offers a possibility, that Surgery will be eliminated for such conditions. Sound Waves of 25,000 Vibrations per Second were used to break the blockage.

O. Z. — Can our Light break the Kidney Stones?

R. D. — Yes, we had cases where Kidney Stones were dissolved.

R. K. — Where can we read on Yogic Food and Occultism?

R. D. — We all hope that some day Dinshah will give us lectures on Occultism. He has a small book of 25 cents a copy, "Essentials Of Occultism."

(He then read from the October 1955 issue of "Changing Times," an article styled "Don't Be Fooled By Medical Quacks And Fakers. They Will Take Your Money And Maybe Your Life." It tells of all kinds of gadgets

which are used by fakers to cure any disease of mankind. It says: "It is not easy to put such operators out of business permanently. Dinshah P. Ghadiali, an 80 year old Asiatic Indian, is one of the most persistent. He was fined \$20,000.00, given a 3 year Suspended Sentence and put on Probation for 5 years in connection with his Spectro-Chrome machine, a cabinet containing a 1,000 Watt Lamp and Colored Glasses. Tonations from the machine were recommended for all sorts of ailments. In 1953, when his Probation ended, Ghadiali bragged to his faithful at a meeting in Milwaukee, that he would put his machine back on the market. We may have to call it a 'dog,' but it will be the same old 'cat.'" Then it says:—"How will you protect yourself? Contact the Post Office Department, the Federal Trade Commission, the Food And Drug Administration, State Public Health Department and such groups as the American Cancer Society, the American Diabetes Association, the American Medical Association and the Better Business Bureaus."

**EDITORIAL**

**REMARKS**

I have no objection to M. W. telling Members where to obtain what they desire. All I have to watch is not to PRINT herein the names and addresses of the dealers, because, outside of our own activities, we carry no advertisements, paid or otherwise. Large quantities of various Herbs are used in medical work. In the Thermocept, the use of Distilled Water is important, as any water from any faucet has in it in Solution various Salts, which as the evaporation from the Bulb Heat progresses, give a partially opaque, whitish or brownish coating to the Glass, impairing the efficiency of the tonating Color. Always fill the Thermocept, therefore, with Distilled Water upto its neck. The son E. of S. G. is the owner of a Color Projector; S. G. is still a Student Researcher. There are many weeds which have the same effect as has Poison Ivy. If High Frequency Sound of so many thousand per Second can break the Stone, what about the trillions per Second of Light and Color? They are slowly coming to the end of their wits and are learning slowly what I have been teaching for over six decades! We have numerous reports of Kidney Stones, published by me in my volume of 1939. The originals were burnt in the Fire of 1945. The Rational Food Of Man, as published in my Cook Book of \$2.00 a copy, is all that is needed for changing your Food Habits. "Changing Times" did not publish anything new! All that it is writing now about me is for over two years on all Color Projectors and Books!!! Below is the text of our Label on the Color Projector; more in our January 1956 issue.

## VISIBLE SPECTRUM COLOR PROJECTOR

(NOT for the Emission of Infra-Red, Ultra-Violet or X-Rays)

Has 110-120 Volt Floodlight Bulb, for 60 Cycle A. C.; with Glass Water Container for Cooling and Five Color Slides to match in Commercial Production of Twelve Colors as specified in U. S. Patent Number 1,544,973 of July 7, 1925 and U. S. Patent Number 2,038,784 of April 28, 1936, of Dinshah P. Ghadiali.

### A WARNING TO PURCHASER ABOUT NO WARRANTY, NO GUARANTY, NO LIABILITY

Since the grant of the stated Patent in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8 and the marketing of the Projector, a disastrous fire of unknown origin, destroyed the Main Office Building and ALL the original records of the Case Reports and similar personal matters, with a property loss of over \$250,000. This happened on Tuesday, January 2, 1945.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science and because of the inability of the Inventor and his controlling Corporation to produce the original documents as proof of various contested matters, verdicts were rendered against the Defendants to the effect that the literature pertaining to the use of the Projector was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which the Defendants received heavy Sentences and Penalties, the Inventor being dubbed a "quack" and a "faker"!

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that such a Projector has absolutely NO HEALING or CURATIVE VALUE.

For that reason, the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Purchaser or User, that the said INSTITUTE sells this Projector to the Purchaser WITHOUT ANY WARRANTY, GUARANTY OR LIABILITY.

The Purchaser or User who uses it for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.

Friday, June 19, 1953.

### NO THERAPEUTIC CLAIMS ARE MADE FOR THIS PROJECTOR

### A GEM OF FECAL WISDOM

Consumers Union of United States, Inc. publishes monthly at Mount Vernon, New York, "Consumers Reports" for the guidance of buyers of various products. It is a Non-Profit Corporation, alleging to have "no connection of any kind with any commercial interest" and deals with numerous subjects in its "buying guide." Among other material, with which our publication is not concerned, I found in its December 1954 issue, under "Health And Medicine" an article on the vital subject of Constipation the following "information" to the seeker of knowledge and of course "guide" to the truth:— "Almost everyone has an occasional change in the frequency of defecation as a result of emotional strain, change in diet, or the effects of drugs. Such temporary difficulties usually disappear without special treatment and without ill effect. The belief that a regular daily bowel movement is necessary for good health is unconfirmed by experimental or clinical evidence. Many persons in excellent health have movements not oftener than once in two days, once in three days, or even once a week. Only when bowel movements become less frequent or more difficult, and the usual rhythm or ease of bowel movement is not re-established after a week or so, is there true constipation. Lack of 'regularity' does not result in the retention of toxic materials in the bowel. The headaches and the loginess sometimes associated with constipation do not come from poisons dammed up in the colon. These symptoms may sometimes be the result of distention of the rectum by feces." True Solomonic wisdom indeed! I had always an idea that in any mechanical engine, the introduction of one stroke of Ignition, needed one stroke of Exhaust. According to the advice given by the Consumers Union, one may eat three times a day for seven days and after twenty-one Admission Strokes, there may be one Exhaust Stroke and that may not be called Constipation. I do not know which Cerebral Branbox originated this colonic philosophy, but, instead of opining on its views, prefer to leave it to the readers to make their own conclusive movements on it.

## SOUND WAVES FOR HEALTH

At the end of the last century, the famous scientist Pierre Curie whose wife Marie was the co-discoverer of the Element Radium, in working with an Alternating Current, found that a fragment of crystalline Quartz introduced in such electrical field began to produce Vibrations. Later, experiments produced Sound Waves beyond the range of the Human Ear and the Science of Supersonics was born. Such high pitch Sound Waves are now utilized by Medical Doctors and even Dentists use Drills vibrating 30,000 times in a Second. They will finally be **compelled** to recognize the power of Light and Color with Oscillatory Frequency of over 500 trillion times in One Second. The opponents are using those Sound Waves for the treatment of Arthritis, Bursitis, Sprains, Gout and the like, while our Science proved its value in 35 years of all non-surgical Disorders.

\* \* \*

## WHO TOPS THE LIST?

It is a well known fact, that of all the bigwigs of this country, the Medical Doctors and Lawyers head high for respect. The latest Martindale-Hubbel survey discloses 241,000 Licensed Lawyers, while the Medical Doctors number 221,000 according to the last report of the American Medical Association. The enrollment of Law Students also exceeds that of the Medical Students. There are about 40,000 Law Students in all of the nation's Law Schools, while around 35,000 in the other category. What a fine demonstration for a peaceful, healthy nation! Now, dear Members, what have we to show against this brilliant array?

\* \* \*

## LAW SUIT BY A MEDICAL DOCTOR

Dr. Sylvan Tatkin, of Los Angeles, California, filed a suit claiming \$2,500,000.00 damages, from the Los Angeles County Medical Association (an affiliate of the American Medical Association), charging "restraint of trade," because, he was refused membership in that organization, for the reason that he was very aggressive and charged only \$3.00 for an office visit. This is the first case of its kind, where such an accusation is made by a physician in practice.

\* \* \*

## NOTICE TO MEMBERS

This being the last month of the current year, the attention of all Members is drawn to our By-Law 54, regarding Annual Fees And Dues. Under its Section 6, if they are not received at the Institute's Principal Office by the First Day of January, the Member shall be deemed to have resigned. **OUR RULES HAVE NO EXCEPTIONS.**

## OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a **Membership Meeting**, at 8 P. M., in each of our following Studios, for reporting the results and findings of **Personal Experiences** in the use of the **Visible Spectrum of Light and Color**:—

**First Allentown Pennsylvania Studio**—Hotel Americus, Fifth and Hamilton Streets, Allentown, Pennsylvania. Catherine Knebel, Chairman, 234 E. Hamilton St., Allentown, Pennsylvania. Pearl M. Diehl, Vice-Chairman, 642 N. West Street, Allentown, Pennsylvania. Nellie Etta Spaar, Reporter, Route 4, Box 93, Quakertown, Pennsylvania.

**First Cleveland Ohio Studio**—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Louis Friedl, Vice-Chairman, 14220 Birchwood Avenue, Cleveland 11, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

**First Detroit Michigan Studio**—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Charles J. Renn, Chairman, 24225 W. Nine Mile Road, Detroit 19, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elizabeth Roemming, Reporter, 11693 Terry Avenue, Detroit 27, Michigan.

**First Merrill Wisconsin Studio**—New Badger Hotel, 310 West Main Street, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1814 West Main Street, Merrill, Wisconsin.

**First Milwaukee Wisconsin Studio**—The New Republican Hotel, Guild Hall, corner North Third and West Kilbourn, Milwaukee 3, Wisconsin. Kurt W. Bader, Chairman, 314 E. Burleigh Street, Milwaukee 12, Wisconsin. Fredrick Kneppreth, Vice-Chairman, 1813 South 75th Street, West Allis 14, Wisconsin. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

**First New York New York Studio**—Hotel Diplomat, Governor Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Die-drichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgfield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

**First St. Louis Missouri Studio**—Albrechts Hall, 3549 Arsenal Street, St. Louis 18, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Marie J. Parison, Reporter, 7525 Comfort Avenue, Maplewood 17, Missouri.

## NO WARRANTY, NO GUARANTY, NO LIABILITY

### OPEN DECLARATION FROM THE EDITOR DINSHAH P. GHADIALI

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
