THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

"COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is graft. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

THAT IS A GOOD ANSWER

By: INDIVIDUAL EXPERIMENTERS

WRONG DIAGNOSIS REPORT BY J. H.

My baby daughter became ill with severe Abdominal Pain and paralyzed within a few hours. She was confined in the Hospital for 28 days. She was diagnosed as Polio and was given Hot Packs twice a day and Physical Therapy three times a week. She was examined by an Orthopedic Doctor, who prescribed full length Braces for her. After nine months and no progress, we changed Doctors and were told she never had Polio! They wanted to place her in the Hospital and do Spinal Puncture and other Tests. She is now 3½ years of age.

DOOMED TO CHILDLESS LIFE BECAME MOTHER

REPORT BY V. Z.

For the past ten years, my family and I have on many occasions used the Visible Spectrum with great success. However, this past year, I feel that I have fully experienced the great powers of the Visible Spectrum. My husband and I, as all young married people, looked forward to the day, when our home would be blessed with the birth of a baby. This blessing, we were told, could never take place in our home. A Doctor's examination and diagnosis proved that I had a serious Disorder of the Reproductive Organs, which no surgical or medical treatments could improve. Should I become pregnant, Miscarriage would be inevitable before the third month of pregnancy. I turned to Visible Spectrum for help. Six weeks after the first Tonation, I became pregnant. My pregnancy was a wonderful experience. There were no difficulties or complications. Today, we have a beautiful and perfect little daughter, two months old. More power and success to our dear Inventor and Visible Spectrum!

* * *

LOW BLOOD PRESSURE, CONSTIPATION REPORT BY J. J.

My health began failing in 1916, when I had Typhoid Fever. Several years later, in 1930, I was told that I had Low Blood Pressure and from then on for 10 years I was constipated. Since using the Visible Spectrum, I feel much better. My Kardoscil is 72, Spiroscil 18, Frontelim 12 times a day and Bakelim 2 times a day.

OUR STUDIO ACTIVITIES

EXPERIMENTER FINDINGS AND QUERIES

MEETINGS OF THURSDAY, APRIL 7, 1955

First Allentown Pennsylvania Studio

M. B. — Did anyone see the program "You Asked For It," where they showed our Equipment along with some others? They called it "Quack Medicine."

Several Members — We saw it on Television.

A. M. — I had a Swollen Gland in Area 3; used Turquoise. Then, felt it in center part of Body. Gland on other side started to draw. Had to balance it, in order to work.

E. M. — I had a closed Nose and Throat. Took Turquoise Local.

A. G. — I had a Cold — Area 1. A few Turquoise cleared Head; Lemon on 1, 2, 3; Green on 15, 16.

A. M. — If one Turquoise does not help, may we take another?

M. B. — Yes, if you see it helps.

E. M. — I had Cold with Fever; used Turquoise Systemic.

N. S. — I find that Lemon on Areas 1, 2, 3 works better in beginning of Cold, as it cleans out the Mucus; then, follow with Green on 15, 16.

A. G. — I had a Head condition from childhood. Started to have Lumps on the Head from Pus condition. Using the Light, one Lump drained for five months. Lemon Front Systemic enlarged them. Occasionally, I use Orange and Lemon on the Face.

A. G. — Did you have Pain?

A. G. — Yes, at times I had Pain going through Lumps.

A. G. — Are they what we call Cheese Tumors?

A. G. — Yes, they are and they opened.

A. G. — Did have to use long before it started to work?

A. G. — Yes, about a year. I tonated every day.

A. G. — If people will take Systemic, I think it does more good than

Local.

E. M. — Would you use Purple to tone down the Heart?

M. B. — Purple is for fast Heart.

E. M. — Is High Blood Pressure an Imbalance?

M. B. — High or Low is an Imbalance of Body. Remember when I had P. D.'s case, her Blood Pressure was about to "explode"? Started right away with Yellow on 6, 7, 8, 9, 10. We shall now study the Orange Wave. What does "Attuned" mean?

A. M. — Blends together Colors that comprise the Orange.

M. B. — What makes Orange?

A. M. — Red and Yellow.

M. B. — We shall study its Attributes. What Areas does Orange stimulate in Breathing?

N. S. and A. M. — Areas 17, 4 and 5.

M. B. — Where is the Thyroid?

N. S. — Area 3.

M. B. — Medulla Oblongata — Where it is?

E. M. — At the top of the Spine.

M. B. — Of course, you will understand, we do not have "cure-all"; some cases can not be helped.

A. M. — I have been using Orange; it helped to cut Wisdom Tooth; used it Systemically.

M. B. — Where is the Windpipe?

N. S. — Area 2.

A. G. — Orange diminishes the function of the Parathyroid; energizes the Thyroid.

E. M. — If we use our Lights, we should be able to keep Cancer away.

M. B. — Decidedly.

E. M. — Orange on 6, 7, 8, 9, 10 or 18; would that get rid of waste? Also Systemic?

M. B. — It depends on where the block is; work Systemically.

That program was on the WFIL-TV-Channel 6, on the A. B. C. Dumont Radio, in Philadelphia, Pennsylvania, on Sunday, March 13, 1955, on Art Baker's time in the evening and many besides you saw and heard the unprovoked assault on my Invention. I wrote to them the following Sunday thus:—

"1. I received information that last Sunday, the 13th current, on your Art Baker's Program, 'You Asked For It,' you exhibited with derogation, one of my Inventions, on Television.

2. As a highly respected Radio Chain, it were better if you had investigated the value of the Device, instead of propagating a one-sided view.

3. I am close to you here and your representative will be welcome by appointment, to see for himself the thousands of my records on this particular theme.

4. The enclosed might serve to give you some **facts**; if interested in giving justice where due, a line from you will bring a book of over 100 pages showing the Truth behind the show."

The letter had enclosed the leaflet "The Therapeutic Value Of Light And Color," by Surgeon Kate W. Baldwin, M. D., F. A. C. S., my former worthy Vice-President and "What The Generous Press Spoke Of Dinshah Since 1896."

As usual, no reply was received to this challenge.

Always go after the whole Body instead of tinkering with parts, until the root of the trouble is established. Study the Text Books; there is a wealth of knowledge in those three volumes. Pressure of the Blood Stream increases or decreases according to the requirements of the organic condition. The Heart is performing its **duty** honestly, if in tonating it, you will comprehend what it wants to do at that particular time. We have no "cure-all" and none else has or will have; we have to leave the Physical Body some day, but, we can manage Life so that we do not go out of it, except by the normal deterioration of the Human Engine.

First Cleveland Ohio Studio

All Members present commented on the pleasure at once again receiving reports from the various Studios through the monthly periodical Visible Spectrum Researcher.

A. M. — I make an announcement that the Dinshah Cook Book is available at \$2.00 per copy. The Reporter will take your Orders. I shall read to you from our Text Book Volume 3, on our Colors Lemon and Turquoise. I had a Cold and Upset Stomach. Used Lemon and am having very good results. I find Lemon gives me the quickest results. For a Sore Throat, I use Green on Back of Neck and gargle with Salt Water.

H. K. — I had a Cold and Cough. Used two Turquoise Tonations and am better.

A. M. — Blue is very beneficial for Coughs, if Tonation be given on Back.

A. K. — I suggest that Colors be chosen to remove the Cause of a Condition.

The Dinshah Cook Book is again off the Press and is promptly available.

* * *

First Detroit Michigan Studio

H. E. — I had Itisometer Test from C. R. about two weeks ago. Tonate regularly and feel better; however, there is still Sugar in the Urine.

C. R. — What about your Food? What about Insulin?

H. E. — I am watching my Food as close as I can; I am not taking any Insulin. I lost about 4 pounds already. I realize I still have quite a way to go yet. I shall continue tonating.

C. R. — Just watch your Tonations and your Food and forget the Urine Test; you will be all right if you faithfully follow the teachings of this Science.

F. L. — I am still tonating on the Infra side. Feel really well. I am 61 years old and am working all the time.

C. R. — Many of our Members would feel much better, if they would take their Tonations and forget the Television programs. Most of the T-V shows are not worth watching.

E. H. — Several weeks ago, I had a Cold with Fever; Ratio was 92-16. Tonated with Orange and Turquoise, later took Lemon alternating with the Magenta.

Member — I too had a bad Cold. The Pulse was between 70 and 80 and the Respiration was low. The Kardoseil is now 90 plus. Tonated with Orange, Turquoise, Magenta and Yellow. I was all right after that.

C. R. — A Cold can be a treacherous ailment, so be careful when you are tonating. See what the statistics say about the "Common Cold," that more man-hours are lost due to it. After the Fever is down continue tonating; far too many people stop tonating at that time. Two Tonations are not enough to rid the Body of it.

I. B. — I was out working in the yard the other day and by the evening I had a very Sore Back. Tonated with the Yellow and that was all that was to it.

Member — I tonate daily and feel fine.

H. S. — I have had a difficult time lately. Quite an amount of Pain and my Face was bleeding. My Nose seems to be healing on the outside, but, inside is a different story. My Face bleeds at different times. I never know just when it is going to start.

C. R. — Did you ever use the Indigo for the Bleeding?

H. S. — No; I did not use the Indigo for about two months. I have been following instructions from the Institute and Lemon was suggested once a day and I do not miss it. The night before last, I simply could not sleep with the Pain; I walked the floor.

C. R. — When you are in such Pain, you certainly could use the Indigo and I believe locally. It also would go to stop the Bleeding. Understand, you follow the instructions from Malaga, but, I am sure if Colonel Dinshah were here, he would recommend the Indigo. We shall watch for his answer in our magazine.

J. G. — I still take my one Tonation daily and it has been eight years since I had my last Heart Attack. It was a condition of Coronary Thrombosis. I have not taken Medicine for 4 years. I work every day and feel well.

C. R. — You heard me say many times and I shall continue to say, that Magenta will give you a new lease on life, where Heart Disorders are present. When Magenta fails to move the Ratio one way or another, you may begin to make other plans. It is so very important that we learn to take the Ratio, we should practise taking it until there is no doubt in our mind. So many Members tell me they are not sure they are getting the right count, but, that is where practice will convince you. Never take a single Tonation without first checking the Ratio. It is our guide-post.

M. J. — I have no report to make this evening, but, I like to mention that last week-end two of my Slides broke. We had some company and the little four year old got into the bedroom closet, where I put my Projector for safe keeping and before I could go to him, two Slides were broken — the Red and the Violet.

C. R. — If I were you, I should not hesitate to send in the Slide-Carrier with the broken pieces to the Institute. Those are two more important Slides; better have it done soon.

F. W. — I tonate 3 or 4 times a week; usually Lemon and Magenta.

C. R. — When you consider the pace that we all travel, I am safe in saying that most of us should tonate more than we do. I believe Dinshah is the only one who does not need to tonate, because, he lives the right way. If we live as he does, we too could put our Projector in the closet and forget about it, but, we do not and so we are subject to the stress and strain of this modern day living. What about Headaches? I am sure, everyone here tonight has had them at one time or another, so take your Tonations to prevent rather than to normalate. Forget your Radio and T-V. Programs and concentrate on yourselves. Never listen to the Radio or watch the T-V. when you are tonating. Let nothing distract you, but, concentrate on the Color you are using.

R. S. — You say not to let any noise distract you whether it is the Radio or the T-V.; what about the noise of the Fan or the Motor?

C. R. — Dinshah himself says there should be no distractions of any kind; I am not quite sure just what it is, but, it has something to do with Wave Lengths.

C. O. — Three weeks ago, I had an attack of Indigestion; there was a great deal of Pain. I took a Tonation of Yellow and within twenty minutes I was much relieved.

Member — What about the Orange?

C. R. — The Orange is wonderful at relieving Gas. Look what the Yellow did in this case!

Member — I feel when food is in the Stomach very long, the Yellow is better than the Orange. It certainly worked in my case.

C. R. — A good many people die of Indigestion. Many listed as Heart Attacks, are actually brought about by improper Digestion. It all depends on the condition of the Stomach Juices. Watch what you eat; it is so important to your health. Should you happen to eat something which does not agree with you, I suggest you drink tepid water and tonate with the Orange.

C. O. — I blame the attack on a Banana that I ate; it looked ripe to me.

C. R. — Practically all of us eat very fast. Chew the food thoroughly. Digestion begins in the Mouth; the Stomach is actually just a mixing bowl. Each mouthful must be thoroughly integrated with the Saliva. After the Solids are eaten, there is the right time for the Liquids.

M. G. — I had an attack of Laryngitis just before Christmas. Tonated with Orange and it helped, but, gradually seemed to go more into the Head. I continued with the Orange and was all right. It took quite a while.

C. R. — Irradiations have nothing in common with the Shots that are nowadays given. There are times when you will get quick results irradiating and at others you might not. Remember, we are not getting younger and eating as we do and living as we do, it is a wonder we get the results we do get. I suggest you continue tonating for some time.

H. E. — Before I got my Color Projector, I was pothered with Rheumatic Pains in my Shoulders. Since using Colors, I have not had any trouble in seven years. Recently, I had such a "hitch" in the Left Shoulder and although I did not have a Tonation in several days, I wondered if one Tonation would help. I soon found out. One Tonation with Turquoise and the Pain was gone! I feel it was one hour well spent! Went to sleep under the Tonation. I never had any Medicine or Pills since 1920.

C. R. — That is quite a record! I wonder just how many can equal it! Several Members raised their hands.

F. W. — For Headaches, I find one Tonation of Lemon effective and that is all.

C. R. — Ninety nine per cent of Headaches are traced to the Stomach; improper Digestion and Constipation; watch those two evils.

W. K. — Earlier, someone spoke about eating a ripe Banana; you will not find such a thing in Detroit at any time. The fruit comes into this city as green as grass and then is treated by gas. I know, because, at one time I carried many a bunch into the chamber. In our home, we use the Projector when needed, but, usually try to live the right way, so we prevent rather than otherwise.

A. N. — My wife was sick before Christmas and a girl friend who was with her at the time, called in a Doctor. He stated it could be a Gall Bladder trouble or an attack of Appendicitis, Recommended Penicillin. I suggested to my wife to take a Tonation of Yellow. Pain still present. With myself it is one thing, with my wife, she is entitled to her own opinion; this time, she wanted to call in another Doctor, which we did. He said it could be Appendix trouble. To satisfy my wife, I called in a third Doctor, who recommended an Operation. I got my wife to take three Tonations, but, finally, she asked to be taken to the Doctor's office. He almost convinced her to go to the Hospital, but, I was able to take her home. I did not want her to be operated. The Doctor and I had quite a discussion. He stated the Gall Bladder is not a Gland, but a Sac; delay in some cases may be fatal. I was just as convinced as ever that given a chance the Color would do the trick, so I stayed home from work two weeks to take care of her myself. Not much relief until about the third night, when she fell asleep for a little while. I took out to C. R. and he gave her an Itisation and suggested Red, Yellow and Green. The first Tonation of Red and she fell asleep and stayed so for about eight hours. On Sunday, she was able to come downstairs. She tonated for about ten days and felt well; has taken no Tonation since. She feels well, but, it is impossible to have her eat the right food. I still think Color is the right way, but, just try and tell the In-Laws that! I had to battle them all the way. About a week later, the Doctor called me and wanted to know what Color treatment I was giving my wife! Her girl friend had told him about the Equipment.

C. R. — That is quite a problem; your wife will not eat the right foods plus the antagonism of the family and relatives.

R. S. — As I mentioned last month, we have a new Member who is still unable to be with us this evening. Before the introduction of Color, no Doctor had been able to do anything for her. They were baffled by her condition. Under the Green, she felt well; using the Yellow, she became bloated and the Eliminations were very poor. Orange helped her much more than the Green. Prior to Color, a Chiropractor who had helped her the most, suggested a Saliva Test, which was taken just recently. The result of that Test was Undulant Fever. She does have a Fever that fluctuates. Would you suggest when Fever is present to go to the Turquoise and then return to the Orange? I went out to see her one day accompanied by E. R. who took the Ratio. It was low and definitely showed Orange was required.

E. R. — I have known this lady for several years, but, have been out of touch with her for some time. She is very much interested in Color. In talking with her, she disclosed that one Lung is down or almost so. There is an Arthritic condition of the Shoulder and a Heart and Kidney condition. While there, I took the Ratio, explaining the reason for doing it. It was low. Although the Kardoscil was low, there was an even Rhythm to it; the Breathing was haphazard. She said the Doctors never could determine the Heart Beat, because it kept changing all the time. Although confined to her home, she is pothered greatly by a weakness which seems to overwhelm her; she is in fine spirits and is optimistic. However, she is self-supporting and would like to regain her health sufficiently to permit her to return to her work.

C. R. — Undulant Fever is handled just like any other Fever. The name means nothing in our work. When Fever is present, by all means use the Turquoise, but, remember this condition is Chronic, so, soon or late she will have to go to the Lemon. No Medical Doctor will work with us, as anything he does is different from our way of thinking. He relies on the Miracle Drugs, Shots and the Knife. As for Diet? He prescribes Soft Poached Eggs, Soft Boiled Eggs, Beef Broths and so on and on. You will never build the Body with wrong foods. Let our Rational Food Of Man be your guide. Look at Dinshah! He never takes a Tonation, because, he eats the right way, lives a simple life and we can do the same if we put our mind to it.

Member — Are Lemons subjected to the same treatment as the Bananas?

C. R. — I understand they too are treated.

W. R. — We have our Lemons sent direct from Florida; they are not sprayed.

C. R. — Before beginning our educational program, I like to read the article from our April magazine "How To Help The Cause." Even if each one of us will bring in a new or a former Member, think of the difference it will make. I understand we have a prior Member with us this evening — a twenty year old Member at that — let us bring more of them back.

Member — Why can we not have an Open Meeting at least twice a year for the public? I mean friends who are interested in this work. It would help to publicize the Science. We close it to ourselves.

I. B. — I agree with that suggestion. That is how my husband and I became interested in Color. We attended an open Meeting at the Tuller Hotel and that is how we joined.

C. R. — It would be interesting, if we could invite our friends to come and listen to us, but, I doubt very much if the Institute would permit it. They can still come in as Student Researchers; of course there is a fee for that. There is much to consider; we shall see what Dinshah says.

I. B. — I like to have some information. I have a Projector which takes 35 mm. Slides. I was wondering if I could use our Slides with this Projector. The Bulb is 300 Watts and the Filament goes up and down. There is a Reflector and a Fan.

C. R. — Now, I do not know about your Equipment, but, years ago when we were in Canada, I had along with me a home-made Equipment, with Slides I had taken from one of our Projectors. It was not much to look, but, it surely came in handy when I was burnt badly. I shall never forget it; within forty five minutes, the Pain was gone. The Reflector would have to be blanked out. We shall see what Dinshah has to say about it.

Member — I just wondered if it could be used. It is a Telescopic Projector.

M. J. — Has anyone heard anything about the little girl who was so ill with the Ear condition?

C. R. — No; no one heard anything lately. I understand the family intervened and he decided to call in a Doctor; whether he did or not, I did not hear.

R. S. read from Volume 3 of our Text Books, Chapters 81 and 82, about Paralyzes and Motor Disorders. Most Members had the Volume with them; others said, next month they would bring it for the Educational Program. Then discussion followed pertaining to the various Vaccines in use.

W. K. — I am on the School Board in our town and there is no Law that can compel your child to be vaccinated. You must send the child to school; that is required by Law or you get into difficulty with the Truancy Law; other than that, it is your child. I thought that may be interesting to some of the mothers here tonight.

C. R. — We have to be constantly on our guard. The way our food is tampered, there is practically no value left in it. Look at the Milk that we buy! It is a joke all right; nothing but blue water! No wonder it has to be doctored, before giving it to small babies. Now they want to add more chemicals to our drinking water! What next?

We need no Urine and such other Tests in our Science. When irradiating, keep your mind on your own case. The Institute gives the Instructions, but, most of the time Sufferers skip some of them to suit their whims or family's views. Dinshah stays physically well, but his mind is disturbed much by the dishonesty of his own Members, who although former "Graduates" try to save \$6.00, by marking themselves as "Experimenters" in their Request For Membership! They will soon be weeded out, if they will not realize their wrong ways and reform. When irradiating, there should be no noise from any source. Listening to the Radio and watching T-V. Programs detracts vitally the Color effect. The whirr of the Fan or Motor is in the very low Octaves of Oscillatory Frequency, but, the T-V. Waves go beyond even our 45th Octave of Color and hence they should not be mixed by watching their Screen. Sound travels about a mile in 5 Seconds, while the speed of Light (hence Color) is 186,324 miles in one second. Keep your mind and thoughts on regaining your Health while under Irradiation. Let the Radio and T-V. wait. 1920 was the year when our Science was first presented to the public; my Color Projectors were evolved and sold later, to make the Science practical. I am against the chemical processing of eatables. We are not against the Medical Doctors, but, solely against the making of a MONOPOLY of the Healing Art. Yes, get new Members each month. There is nothing to prevent Visitors coming in. Let them sign as Student Researchers and pay just \$3.00 fee each for the current year. We are, by our Charter, a strictly FRATERNAL Organization and deal SOLELY with our Members. I. B. is registered with us only as a Student Researcher, so, we are surprised at her question about the 35 mm. Projector. We shall be enabled to answer after our investigation of this matter ends. When a Member speaks, the name should be spoken by the Member, so the Reporter is enabled to know. The case of that child with the serious Ear condition stayed in our hands exclusively. Thé father J. B. was told by others to act differently, but, he followed instructions from the Institute, the baby recovered and the entire family went to Wisconsin to visit grandparents. J. B. is now back and as promised, we expect him to report in full to your Studio. I congratulate you on the smooth manner in which your Meeting was conducted. Continue the good work.

* * *

First Merrill Wisconsin Studio

Because of the Thursday being a religious holiday for some of the Members, the attendance was not large.

A. I. — I had stiff neck; used Orange several times, with good results.

E. O. — I am using Yellow and Lemon; shows some progress with the Back Elimination, although I am not satisfied as yet.

W. B. — Continue for a while and if no better results are obtained, send a complete Chart to the Originator.

H. H. — I am using Lemon and Magenta to keep fit; I have had no Cold all this Winter.

E. O. is a new Experimenter Researcher and never sent any Chart to the Institute. We shall be glad to serve her, as we serve all our Members who experiment.

* * *

First Milwaukee Wisconsin Studio

K. B. — Has anyone any Case Reports?

L. S. — My eleven year old boy felt sick and had a Sore Throat. I tonated him with Green and Magenta; he broke out like Prickly Heat. Then, I used Turquoise and he felt better. His Kardoscil was 98 and his Spiroscil was 24. I thought I should use Orange and that increased his Fever. I used Blue and that took his Fever down. Used Yellow, because, his Bowels did not move; it seemed everything was wrong. My girl was sick and her Palate was swollen. I tonated her with Turquoise, Orange and Turquoise; by the second day it cleared.

K. B. — Let us look at it from a different point. I shall try to explain. With children, where they have a Disorder, you have to watch with Infra-Green Colors; a Rash may appear on the Skin. You did well in using Turquoise. In cases like this, use fresh Orange Juice.

N. T. — The lady who had Eczema is all right again, but, she gets her Menstrual Period every two weeks and is very sick.

K. B. — In cases like that, use Indigo; that is the only time you may tonate during Menstruation.

L. L. — I injured my Foot and Leg about three weeks ago; used Lemon, Orange and Indigo.

K. B. — What Color should we use? If you used Lemon Systemic, Orange Local and Magenta, they would be correct Colors. Most of you think as soon as you use the Light, it should be O. K.! Just be patient.

O. L. — Was that Leg injured before?

L. L. — No.

K. B. — Keep the Leg warm and use Lemon Systemic.

S. E. — We buy Spring Water and one day, the bottle of Water fell on my foot. I waited till the next day before tonating my Foot; used two Orange Tonations and it was all right.

K. B. — You are lucky!

O. L. — So far, everybody knows it works.

K. B. — You have to use your own judgment; all things work under certain Laws.

E. T. — I had a terrible Cold in January. I coughed and coughed. Used Turquoise, Lemon and Orange and Magenta in between.

K. B. — In my work, if you are a keen observer, you will know that I use an Itisometer. If it shows Yellow and if the person has improved, it will go to Green and swing into Turquoise and finally into Green. Colonel Dinshah wanted to make an Itisometer to sell for \$150.00. As long as Inflammation is there, it needs Lemon and Orange. I had a letter from Europe; where I use Turquoise, they use Red. They use Infra-Green Colors to stimulate and bring it out.

Member — I have been pothered with Rheumatism; have been using Lemon and Magenta; had it all Winter. It is normal; may I shift to Orange?

K. B. — What is the Kardoscil and Spiroscil? Is everything all right? How is the Backelim and Frontelim? Did you eat any Pork in the past?

O. L. — Don't you think she could help it along by drinking Lemonade?

Member — I do that.

E. T. — I wonder if Turquoise would help her. I had that when I got my Projector; I used Turquoise Systemic and it helped me. Don't you think some people lack this or that? Everyone is different.

K. B. — Stick to Green and Magenta. That is what you call guessing. That is what I said before. Everybody may not have an Itisometer. The Instruction Book is written for those without an Itisometer or our Text Books. Compare. If you have Pain then you need the Ultra Colors. If the Kidneys be stimulated, then, the Heart is stimulated. The Truth is always simple.

E. T. — If the Heart be bad, would you still advise Purple?

K. B. — If the Heart be clear. If there be an Incompetence, tonate with Magenta. If someone has a bad Cold, you may use Scarlet. If he shivers and throws it off, Green.

S. E. — I found when I use Green, it even helps my Heart.

K. B. — Green is the Governing Color. In Religion, we have the Trinity; we have it right here in our diagram. Your Body is built along the same lines. Lie under the Light and release your Resistance and see how quickly you will be helped. The real trouble maker is the Mind; Doubt sets up Resistance; Fear does the same.

S. E. — I think it is important to use Magenta and not other Colors too much.

K. B. — You may alternate. If a butcher wants to find if the chicken has a healthy Heart, he looks at the Color. Why is it that when a girl is jilted, she loses her Color? Where is her Color gone? There is more misery in the World. Today, you need a License to remedy it.

S. E. — Some times some Members give Reports and do not mention the Magenta; that is why I mentioned it.

O. L. — I think this woman has to be made clear about what you mean by Signals are clear.

L. S. — My Breathing is between 10 and 12 and Kardoscil is 80. I have to use so many Colors, I do not know which to use first.

K. B. — Use Orange on Back. Eat more Starchy Food; that is necessary for Heat. Have patience.

O. L. — If she wants to use the Color you mentioned, she may alternate with Yellow.

L. S. — I use Yellow and at night I have Sinus Disorder and I can not breathe.

O. L. — Is it worse today?

L. S. — Yes.

K. B. — It is Full Moon that is why.

E. T. — When you use Magenta on the Heart, will you use it on Areas 4 and 18?

K. B. — Yes, it always works in pairs.

M. B. — Will you talk a little about the Solution for Shock that is in our April magazine? How much one should use?

K. B. — Once a Sea Captain said that he just gave Sea Water.

M. B. — Colonel Dinshah told a woman to take one teaspoonful in a glass of water, one hour before tonating and that acts like a Blood Transfusion; that is why I asked.

K. B. — I know of a woman who was tapped 120 times. It has been less now; it is once in 4 months. I see her only about once in 4 months.

S. E. — What Color would she use?

K. B. — Two weeks Lemon, a few weeks Yellow, a few weeks Orange and a few weeks Red and every second Tonation Magenta. She does not stick to the Rational Food Of Man.

H. K. — My sister and I were in an automobile accident. She was struck on her Leg and her Head was injured. Her Leg was discolored about nine inches. We went home and I put her under the Light, using Orange. The following morning, Green and today, she had a Sore Throat and Pain. I put her under the Turquoise and here she is! What Color would you use for her Leg?

K. B. — Magenta for the Shock, Turquoise for the Injury or Internal Bleeding and Orange Local for the Leg.

O. L. — Violet may be used for Internal Bleeding.

L. K. — For a Stroke you use Violet; what would you use after that?

K. B. — Purple. Never get the idea that for certain things you use certain Colors; you have to watch ALL the Symptoms. When the Stroke happens, Violet may be changed to Red. Turquoise is very good for people working in an office.

F. K. — Coming back to Sea Salt, I think it would be a very good idea, if Colonel Dinshah would explain how if you use Sea Salt, in 24 hours you could have all fresh Blood.

K. B. — First of all, where does the water go? Into the Stomach, gets into the Circulation and if it is too much, it has to go out through the Kidneys. In the Summer, it will go out through the Skin. Too much water is also taxing the Body. We mostly eat and drink too much. Drink when thirsty; you will enjoy it more.

O. L. — The easiest thing to do in our life, is to eat.

C. S. — Is the Juice you buy as good as the fresh?

K. B. — If you can not get the fresh, then you may buy it ready made; it is better to stay away from processed foods. Now we may finish Chapter 96 from Volume 3, about Skin Disorders. "A woman took Tonations for a long time; she used Turquoise and did not get results. She forgot entirely the Skin Disorder was deep-seated and had to be treated accordingly." If you use Yellow on Areas 6, 7, 8, 9, 10 and Magenta on Areas 4 and 18, the Skin Disorder is helped. Should it return, use Lemon.

R. S. — As Colonel Dinshah says "Use Yellow and get it out through the Bowels." The other day, a fellow said to me, "Everytime I do something, I get a Pain in the Stomach. My grandfather is 78 years and he works like a horse; I can not do it."

O. L. — Remember when Colonel Dinshah showed a picture of Adele? They ate the same food, but, one was fat, the other was thin. I know twins, one had Skin Disorder when he was born; it is not the mother that selects the Soul, it is the Soul that selects the mother.

F. K. — That is interesting. Is it one takes on from the mother and the other from the father? Colonel Dinshah said:— "In one case, the mother lived one way and disobeyed Nature's Laws?"

K. B. — That is traced out of the Law of Karma or Retributive Justice.

L. L. — What about when you dream? Last night I dreamt someone was in my room.

After some discussion the Meeting was dissolved.

No Tonations for any Disorder should be given in the Menstrual Period, except for Disorders pertaining to it. I had made two models of Portable Itisometer, but, the 1945 Fire burnt them. Then, the Law Suits intervened and now I have to reorganize all at great expense. Please, be patient with me. I work all alone yet. Trinity simply means Construction, Protection and Destruction as the three Powers of the Universe. All Uni-

verse obeys it. L. S. never sent any Chart; her Spiroscoil of 10 appears erroneous, as if it were so, with Kardoscoil of 80, she would not be in your Meeting. The Blood as a Circulatory Fluid is always alkaline. What I meant to F. K. was that if people would stop using processed Salt, but, use just Sea Salt, they would have clean Blood in no time. In prior years, I used to supply All-Salt-Sea-Salt; in time to come, as we become duly established, we may have the facility to supply not only that, but, also Dime-A-Meal. The Law of Karma or Retributive Justice is fully discussed in my "Essentials Of Occultism" 25 cents a copy inclusive of postage. Dreams are discussed fully in some of my numerous publications, which are at present out of print. They will be reprinted at a later time. Meanwhile study the 44th Chapter in Volume 2, of our Text Books, captioned "Sevenfold Human Constitution"; also the "Seven Principles Of Man," in the "Essentials Of Occultism." The large volume "Master Of Occultism" is out of print for the present.

* * *

First New York New York Studio

As the Chairman Ralph Diedrichs opened the Meeting, our President Dinshah was seen entering the room and exhibiting his Membership Card registering.

R. D. — I did not think I was going to come tonight, but, I shall not waste any time, in turning the Meeting over to our beloved teacher.

Dinshah — I did not come specially to attend this Meeting. I had certain business in the city, so I availed myself of the opportunity. I am glad to be with you. You have a fine Chairman. How much time have I to speak?

R. D. — You may speak the whole evening.

Dinshah — Is that all? One hour and fifty five minutes? That is not enough; I spoke once 14 hours at a stretch, without leaving the platform, when professionals made a crack that vegetarians have no stamina! At midnight one of them shouted:— "Say, when will you finish?" Said I:— "Finish what? I am just warming up; I did not start yet!"

Our President then gave a resume of some of the memorable events in the development of the Visible Spectrum of Light and Color.

M. K. — Is the Instruction Book for the Color Projector available?

Dinshah — Yes, we have some copies. Members may have that book for \$2.00 a copy, which includes postage.

M. W. — There is so much talk about Blood Transfusions. You spoke about Common Salt and Distilled Water. Should it be taken by the Mouth?

Dinshah — Yes or by Injection.

M. W. — If a husband has a Color Projector in his name and he dies, can the wife have it transferred to herself?

Dinshah — Yes; she may write to the Institute and state the case.

C. V. — Please, speak on the effect of the X-Rays on the Human Body.

Dinshah — Our whole Science is based on the Visible Spectrum of Light and Color, which exists on the 49th Octave of Oscillatory Frequency; the X-Rays are on the 57th to the 60th Octave and are extremely destructive in their burning character. I spoke about the X-Rays in this city first in the year 1896 and the audience could hardly think it possible to be able to see with the naked eye through a block of solid wood. Today, it has become a racket; for everything they use X-Rays! It was then that I had the honor of meeting the great American Inventors like Thomas Alva Edison, Nikola Tesla, Michael Pupin and the like and Edison at the time I visited his laboratory in West Orange, New Jersey by invitation, talked to me about his marvelous experiments, for 3½ hours and presented me with a Fluorescent Screen for X-Ray work. I warn you not to allow X-Rays to be thrown on your Body, especially on the Areas 9, 10 and 11, as there is danger of producing permanent Sterility. It is being used for destroying Fertility in Sex Criminals.

D. R. — Is there any Disorder as Rabies?

Dinshah — That is a Disorder of certain animals, like Dogs and Wolves, which by biting Human Beings, are liable to introduce into their Bodies poisoned chemical sputum.

M. W. — What is one to do when bitten by a poisonous Snake?

Dinshah — What do they do?

M. W. — Well, they give Injections; I do not want to have those.

Dinshah — You are sensible. Just suck the poison out of the wound and irradiate Green Systemic. There are over 50,000 Patent Medicines; how does the Pill know where to go in our Body which has only around 19 main Chemical Elements? It is the Circulation of the Blood that does the real job.

Question — Do the Atomic Tests affect the Human Being and the Weather?

Dinshah — The "scientists" will not admit it, but, as those Tests scatter the Air Currents, they are bound to disturb their normalcy. As far as our Body is concerned, the Radio-Active Fall-Out is certain to cause deleterious effects.

R. D. — I read an article that such Bombs do have those effects.

Dinshah — In conclusion, I may request that any Checks coming to you from the Institute, should be promptly cashed, so our records remain straight. Always address all correspondence to the Visible Spectrum Research Institute and **not** to me or any individual name. It really was a great pleasure to be with you once again. May the blessings of the Cosmic Powers be on you! Good night!

M. W. — It certainly was an extreme pleasure to have you visiting our Studio. Your lectures enlightening and inspirational. (Applause)

K. G. — I suggest you bring your class work here.

I feel always happy to visit New York, because, some of the better years of my young life were spent there. It was there that I was commissioned as Surgeon Captain on June 24, 1918, by the New York City Police Department and on July 4, 1918, had the unique distinction of heading the Loyalty Parade, with my beloved daughter Kashmira, in which 75,000 Foreign-Born Citizens of a multitude of nationalities, marched. For around three months I served as Detective Captain and was appointed Governor of the Police Aviation School and trained about 200 Cadets in flying. In April 1919, I inaugurated the first Police Air Mail, was commissioned as Major and after some other stunt flights, was finally promoted to the full rank of Colonel, through the graciousness of the Honorable Special Deputy Police Commissioner Rodman Wanamaker, with a Bronze Medal awarded by Mayor John F. Hylan for meritorious services. That is the one I still wear, all others having burnt in the Fire of 1945, which caused a loss of around \$250,000.00. Right after leaving the Police Reserve, on April 26, 1920 I presented to the public, the result of 30 years of my scientific researches on the Visible Spectrum of Light and Color, which are printed in numerous of my books. I served the City of New York for about 2 years at a salary of \$000,000.00 a year and I am proud to serve now at LESS THAN THAT!!! As regards the Class Number 102, I shall give the matter consideration, if those who desire it will please express it in writing to the Institute. It is a laborious and expensive job.

First St. Louis Missouri Studio

To the time of going to the Press, no Report of the Studio Meeting of April 7, 1955 was received.

DINSHAH IMPARTIAL

(The Universe Through The Eyes Of Dinshah)

POLIOMYELITIS VANQUISHED!!!!???

It appears April has important inventive aspects. Our Science of the Visible Spectrum was first publicized in April and in the April of this year, after an investigation (?) and certification by over 500 Scientists in Michigan, the deathblow was given to Infantile Paralysis by the perfection (?) of the special Vaccine by Dr. Jonas Salk of Pittsburgh, Pennsylvania. My views about Vaccines and Serums are well known and openly printed in my volumes. It is no secret that I was associated with The National Anti-Vaccination League in London, England in 1909, being a Life Member and also as Life Member of The American Anti-Vivisection Society since 1925. Thus,

when the newspapers printed and the radios blared hour by hour about the marvels of the Salk Vaccine for Polio, I did not have very much to think about its future. However, as my students pounded me for explanations, I am bound to give them the true opinion by giving in short the process of manufacture of the new Vaccine, leaving it to the students to make their own conclusions. It is made from Monkeys. Rhesus Monkeys costing about \$42.00 each are imported from Hindustan. The three types of Virus known as Brunhilde, Lansing and Leon are grown artificially on the Kidneys of these animals. Then, the Kidneys are minced and mixed in a synthetic nutrient to create maximum growth of the Tissue Culture. After numerous Contamination and Tests, the live Polio Virus is chemically killed and poured into bottles. Next, with the neutralizing agent inactivated, the Vaccine is tested by Tissue Culture to rule out the remnant Live Virus. After further processing, the Vaccine is packed in 1 cubic centimeter vials for Injection. The most marvelous part of this proposition is that the opinion of the scientists was to be published on Tuesday, April 12, 1955 and as it takes about 3 months to prepare the Vaccine, the day after the publication, several manufacturing laboratories had the perfected Vaccine right on the market!!! The public, as usual, went promptly to have their families immunized! It was the same for the Insulin era 3 decades ago; they declared then, one Shot of Insulin and Diabetes Mellitus was cured for life; now, many deluded ones are taking 2 or 3 Shots daily! Now, after being highly honored (perhaps with the Nobel Prize in sight) the learned Dr. Jonas Salk is again working on the Vaccine to perfect it!! Meanwhile, it is reported that several babies who were injected with the Salk Vaccine manufactured by the Cutter Laboratory in Berkeley, California, became paralyzed and some died; so, a temporary stop is recommended until more investigation(?) is made. Well, I do not handle Vaccines and Serums, so I am not responsible for anything, but, shall close this short article by requesting the most learned professionals to let the scientific Truth-Seekers know the truthful, tested replies to the few questions stated below:—

Why does Starch become converted into Sugar in the Mouth?

What is the purpose of Hydro-Chloric Acid in the Stomach?

Why is it that people eat Honey, but, do not take Carbolic Acid (C_6H_5OH), if the chemical composition of both is similar?

If the Universe is composed of only 98 so-called Elements, what manufactures the trillions of Compounds and how?

Why do the Pupils become narrow in Light?

Why are there different Colors in a beam of White Light?

How does a Surgeon guard in his Operations from Anastomoses of the Nerves?

Why are there two Chains of Nerves in the Great Sympathetic Nervous System?

How does a mass of Nervous Material called the Brain make Thoughts, different for different individuals?

Why has the Portal Vein between the Spleen and the Liver, no Valve like the Valves in other Veins?

The Sun is many million miles nearer the Earth in our Winter than in our Summer; why is there less Heat in Winter?

Why is the Spleen placed on the Left of the Body and the Liver on the Right?

How does the Pill know where to go?

What is the purpose of the Appendix?

What function has the Spleen?

Does the Heart motion the Lungs or the Lungs motion the Heart and what motions either?

Why do we need two Nostrils to breathe?

Why is the Membrane of the Nostril composed of Erectile Tissue?

What makes Hunger?

What makes Thirst?

Why are the Human Blood Corpuscles round and those of Animals ovoid in shape?

Why have we two Ears?

What is there in Man that makes him "the Image of God"?

Why do the two Nostrils blow air with different pressures at different times?

Why does one generally sneeze by pulling off a hair from a Nostril?

Through what organic structure does Light affect the Body?

Why is it that the Hepatic Vein from the Liver, has no Valve like the Valves in other Veins?

What is the difference between a Living Human Being and a Dead Human Being?

Scientists are pondering over the Brain of the great deceased Professor Albert Einstein; why does not that Organ produce now a theory of Irrelativity?

Astronomers admit the influence of the Gravitational Power of the Sun and the Moon in the pulling of millions of tons of Ocean Water; on what basis is the same influence on the few pounds of Blood in the Human Body denied?

The Virus that they proclaimed produces Poliomyelitis, is according to their measurement about 10 to 30 millionth part of a millimeter and is invisible even with the best Electron Microscope; as a millimeter is about 1/25th of 1 inch, with what Super-extra-ultra-Vision Micrometer was it measured?

OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a Membership Meeting, at 8 P. M., in each of our following Studios, for reporting the results and findings of Personal Experiences in the use of the Visible Spectrum of Light and Color:—

First Allentown Pennsylvania Studio—Hotel Americus, Fifth and Hamilton Streets, Allentown, Pennsylvania. Alice M. Greenawalt, Chairman, Route 3, Kutztown, Pennsylvania. Pearl M. Diehl, Vice-Chairman, 642 N. West Street, Allentown, Pennsylvania. Nellie Etta Spaar, Reporter, Route 4, Box 93, Quakertown, Pennsylvania.

First Cleveland Ohio Studio—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Louis Friedl, Vice-Chairman, 14220 Birchwood Avenue, Cleveland 11, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

First Detroit Michigan Studio—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Charles J. Renn, Chairman, 24225 W. Nine Mile Road, Detroit 19, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elizabeth Roemming, Reporter, 11693 Terry Avenue, Detroit 27, Michigan.

First Merrill Wisconsin Studio—New Badger Hotel, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1504 River Street, Merrill, Wisconsin.

First Milwaukee Wisconsin Studio—The New Republican Hotel, Guild Hall, corner North Third and West Kilbourn, Milwaukee, Wisconsin. Kurt W. Bader, Chairman, 314 E. Burleigh Street, Milwaukee 12, Wisconsin. Fredrick Kneppreth, Vice-Chairman, 1813 South 75th Street, West Allis 14, Wisconsin. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

First New York New York Studio—Hotel Diplomat, Governor Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Die-drichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgfield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

First St. Louis Missouri Studio—Albrechts Hall, St. Louis, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Marie J. Parison, Reporter, 7525 Comfort Avenue, Maplewood 17, Missouri.

DECLARATION FROM THE EDITOR-PUBLISHER DINSHAH P. GHADIALI

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Volume copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.

VISIBLE SPECTRUM RESEARCH INSTITUTE
