THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

"COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is graft. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

THAT IS A GOOD ANSWER
By:-INDIVIDUAL EXPERIMENTERS
LEAKAGE OF HEART, PAINFUL MENSTRUATION REPORT
BY L. K.

I have had my Color Projector for eight years and have never been sorry, it has helped my husband and me so much. My Disorder was Leakage of the Heart and very painful Menstruation; both have been normalated since I used the Color. We are very grateful.

* * *

CHRONIC CONSTIPATION, DIFFICULT URINE FLOW
REPORT BY E. S.

I have been using the Color Projector ten months. I had Chronic Constipation many years; it was normalated in four months. I also had difficult Urine Flow; even in the night time, I had to run every two hours. It is now much improved. I can now sleep 4 to 6 hours restfully. I also had Rheumatic Ailments occasionally; they have now disappeared. I am a Carpenter by trade; 69 years old.

* * *

RHEUMATISM, MEASLES, SCARLET FEVER, COLDS, BURNS,
SUNBURNS, CUTS, BRUISES, STOMACH DISORDERS,
SKIN DISORDERS REPORT BY E. K.

I have had my Color Projector for about 3½ years and have had such marvelous results with it, that I never want to part with it as long as I live. During these years, I never had to call a Doctor or use Medicine of any kind, because the Projector took care of all the Disorders that occurred to my husband, my three children and myself. My husband had a very bad case of Rheumatism and was in a very rundown condition. He was normalated by the Color Projector. The children had various illnesses and ailments, such as Measles, Scarlet Fever, Colds, Burns, Sunburns, Cuts, Bruises, Stomach Disorders, Skin Disorders, etc. All were normalated by the Colors. I was especially amazed at the recent Scarlet Fever cases of my girls. The children kept healthy Appetites and the Elimination was about normal during the illness, while, when the boy had Scarlet Fever (before I purchased the Color Projector) I had so much trouble with him, had to call the Doctor twice, give the boy Pills, Medicine, Nose and Throat Spray and give him an Enema each day, because, there was no Elimination and very poor Appetite. The Disorder lasted so much longer than the ones where the Colors were used. In all instances, I found the Color Projector far superior to any other Healing System and I can truly say I am very thankful for the Visible Spectrum and the teachings that go with it and very grateful to its originator Dinshah. I will be glad to testify any time for the Color Projector.

OUR STUDIO ACTIVITIES

EXPERIMENTER FINDINGS AND QUERIES

MEETINGS OF THURSDAY, MAY 5, 1955

First Allentown Pennsylvania Studio

P. H. — I like to say that I sent a Dollar to the Colonel, for 3 Family Health Protector, a while already and did not have it yet.

C. K. — I also want to say that I sent in my change of address, but, to date the old one is used.

M. P. — I fell. Had Pain from Area 19 down to Toe. Got Information from the Institute; Turquoise Systemic for 9 days, then Local Indigo 10 days. Big Toe was numb and no Circulation; also used Yellow 6, 7, 8, 9, 10. Now Toe is troubling.

N. S. — My son had badly bruised Toe. Had Fever and was sick in Area 8. Used Green Systemic, Orange Local on Toe, which broke it open. Continued with Orange to drain Pus after it opened and cleared, then, used Turquoise Local on Toe to heal. Used also some Yellow on 6, 7, 8, 9, 10.

E. M. — Son had Boils when young; used Orange.

M. B. — I want to express my thanks at this time to the Colonel for his praiseworthy mention of my work. I try hard to follow his Rules. I try hard to hold you down to what he wants. I certainly want to thank him.

B. W. — My husband had Inflammatory Rheumatism in the Back; used Green Systemic.

M. B. — On Sunday afternoon, I was feeling fine. Had sufficient food at noon, so in the evening, all I ate was a ripe red Banana. During the night, I woke, having great difficulty in Breathing. I went to the window for Air. The more Air I breathed, the worse it became. It was not a Stroke, but, I could not talk. I sat on the edge of the bed. I could not help myself; Blood in Body was like fire. Brother moved Light in front of me. Mind came to my rescue. The first 30 minutes of Tonation were terrific. By the time the hour was up, I was like a dish rag! I was all exhausted. Brother put Cold Compresses on my Wrists for two hours.

E. M. — What did you use?

M. B. — I want you to think of what I used.

The Members mentioned every Color except what M. B. used; none had the right answer, according to that.

M. B. — I needed Exhalation; I used Red on Areas 4 and 5. After about three days, everything was normal. I thank God and Dinshah for these God-given Laws that man can use. We shall continue study of the Orange Wave.

Discussion followed on the Thyroid Gland.

B. W. — My daughter 10 years old, seems to have poor Vision. May I use Green?

M. B. — Are the Eyes crossed?

B. W. — No.

M. B. — Green is to strengthen the Muscles; Orange for blurred Vision.

Under our By-Law 65, Currency sent by mail is at the risk of the Sender. Please send all Remittances and Correspondence addressed to Visible Spectrum Research Institute and NOT to me or to the name of any individual. We now have begun to send all books and the like by Insured Post, so, we have a mailing receipt and claim for loss. Costs more, but, it is better. The 3 copies were thus dispatched. The change of address never reached the Institute. All such changes should be sent by separate letter. C. K. marked even in the May 1955 Meeting, her OLD address and then marked her new one by scratching the old. In the Attendance Sheet, E. M. signed with Mrs. her husband's name. Female Members MUST sign their own first name. All signatures should coincide with their Membership Card and should be in INK; no pencil. N. S. used good judgment in the Tonation of her son. M. B. need not thank me for the "praiseworthy mention." Truth is not flattery. I say what I feel is true. She is deserving. Bananas are now ripened by treatment with certain gaseous chemicals and not allowed to ripen as before on the trees. So, be careful of the Spray Poisons. B. W. should have the daughter's Eyes examined by a competent Optometrist and send the written report to the Institute with a complete Personal Research Information Chart.

* * *

First Cleveland Ohio Studio

Several of the articles in the Visible Spectrum Researcher were read. From Volume 3 of our Text Books, the Attributes of Blue were read.

A. M. — I tonated with Yellow to help me stop Smoking. It occupied my time and soon I lost the craving for the weed.

E. R. — I tonate with Violet for Sleeplessness; it quiets my Nerves.

T. S. — I tonated with Scarlet for Pain in my Chest.

A. M. — I like Blue especially as it gives me Energy and increases my Appetite, which is ideal for me as I need to add weight.

It is commendable to continue study of our Science. A. M. took the step in the right direction. Smoking is one of the three main causes of sickness in this so-called Land Of Plenty. The three Bs are:— Bacco, Booze and Beef. Discard these three from your homes and most of the Clinics will click shut.

First Detroit Michigan Studio

J. B. — Last month, my daughter was strong enough to travel and we were able to take a trip home to attend a family reunion, the first one where the entire family was present, in a good many years. She is still under the care of the Institute and I checked with it before we left. Her condition is improving right along although the Fever still reappears. Her Ratio, for several Charts, was always around 5 to 1. No comments from Malaga on that score; however, when the Colors were changed to Green and Purple, the Ratio became 4 to 1. When she is completely recovered, I shall bring in a report of her illness. She was a very sick little girl for a good many weeks.

J. B. — Still tonating daily.

A. H. — No report tonight.

Member — I had an attack of Indigestion and tonated with Orange with good results. My Ear is getting along just fine; now, a Wax is forming; no Pain of any kind. I have another problem; I have a Blister on my Arm or maybe I should call it a Pimple. I have had it for 2 weeks and I can not make it heal. It itches once in a while.

C. R. — Blue is excellent for the Itch. What type of work do you do?

Member — I work in a T. V. Radio repair shop and at times it is very dusty.

C. R. — That could be the root of your problem. I suggest you tonate with Green for several Tonations, using the Blue when it itches and then, go over to the Turquoise. Let us know next month how you get along.

K. N. — I am getting along just fine; feel really well.

J. M. — I tonate regularly every day; however, about 2 weeks ago, when I had company present, after dinner was served, I began to feel ill; my Stomach ached. I just excused myself and went and took a Tonation of Orange. I vomited twice and felt much better. I repeated the Tonation in the evening.

C. R. — Nothing will clear the Stomach faster than the Orange, if conditions are just right. Should you at any time be doubtful about something you just ate and are able to use your Projector, drink plenty of water and tonate with the Orange. You will have a cleared Stomach within 20 minutes, if not sooner.

T. C. — I hurt my Leg on an omnibus and it was bruised from the Knee to the Ankle. I used the Green and the Turquoise, but, it is not healed completely.

C. R. — I suggest you go over to the Lemon now. There is no Swelling and the Lemon will help to heal the Tissues.

H. S. — My Face hurts badly and bleeds at the most unexpected moments. I am still in touch with the Institute. At times I become so discouraged.

C. R. — Understand, this healing Science is very different from other methods. What you are attempting to do is to build from the **inside** out, whereas most or many others try to heal from **without**. Your Face will not heal on the **outside**, until the **inside** is in order. Your condition was caused by Radium treatment. Dinshah says Radium is a destroyer of Tissues. It may take a long time; a Chronic Condition will never be normalatated overnight. Be sure to tell the Institute everything about your Face when you report.

J. S. — I have a sister-in-law in Pennsylvania and at one time there was no hope for her, but, today she is back on her feet and feels just fine. We never thought she would pull through.

J. S. — My daughter is 10½ years old. The Ratio is 105 to 31. Last month, she developed a severe Blinking of one Eye; it seems like Twitching. I have been tonating her with Yellow and Magenta; is that right?

C. R. — Referring to children, whenever the Ratio is in line with the age of the child and one of the Lenses seems to be affected, I always consider the Red; it is the Sensory Stimulant. In your case, I suggest 2 weeks of Red, followed by 2 weeks of Yellow or Orange.

C. R. — I find Yellow excellent for a child, especially for a Cold; one Tonation of Yellow knocks it right out. As I see it, the Turquoise prolongs it.

C. R. — No, the Turquoise will not prolong it, if you do your part and carefully analyze your case. Where you find the Yellow giving the best results, remember, the Eliminations must be in order first, before you will get results. So many children are sent to the Bathroom and that is that. You must watch your child's Eliminations carefully as to what is being eliminated. Teach the child as it grows older, just what is expected. Remember, 90 per cent. of the Headaches, including Migraine, are caused by faulty Eliminations. Your kitchen sink will not function duly, if the drain be choked; your car will not run right, if the engine be unclean. You too, are nothing but a Chemical Engine and similar rules apply. Teach your children the importance of proper Eliminations and what the Yellow does.

Member — Is it possible to purchase a Portable Color Projector?

C. R. — Yes, I believe there are a few available. Vacation time is just around the corner and a Portable Projector is very easy to take along with you. With the Summer just ahead, some of you might have Sunburn; that hurts. We know better, but, in having our fun, we make mistakes.

E. K. — That is what happened to me. I fell asleep in the open Sunlight. My Face was fiery red. One Tonation of the Blue and there was no more Burn; it all cleared.

(R. S. read Chapter 83, Page 882 from the Third Volume of our Text Book Set, about the use of the Visible Spectrum in Melancholia, to begin the Educational Program.)

J. B. — We do not hear much about the Spleen; do you remember specific cases where the Violet was recommended? We speak about the Affinity Waves and most of us use Yellow much, but, what about the Violet?

(Discussion followed. There was some confusion about Leukemia and Anemia. For the latter the remedy lies in the Red; for the former, does the remedy lie in the Violet? An explanation from the Institute is requested.)

C. R. — In all cases that came before me and I itisized, I recall only one where Violet was called. I find in the adults, the remedy is on the Infra-Green. Every day we become older, we are going downhill. We tear down quicker than we build; most people will be between the Red and the Green. You well know how much we stress the importance of Magenta, which is $\frac{1}{2}$ Red and $\frac{1}{2}$ Violet. Thus, although you may not be told to use the Violet, when you tonate with Magenta, you are introducing the Violet, as the Aura will pick it. We have *within* us that "something" that knows more about us than we realize. We may select the Color, but, it is the Auric Vehicle that has the final "say-so." Just recently, I had a case of a girl from Michigan State, with a bad Skin Disorder. It was on her Face and Hands and bled badly. Nothing had helped her. She was itisized and told what to do. I heard from them from time to time. The other night, her grandmother called me and said she was all healed. She used the Color for 4 months. The girl is 11 years of age. It will work every time, if you do your part.

K. N. — If one is troubled with Allergy, is there a particular Color to tonate the Stomach?

C. R. — It shows wrong with the Digestive Tract. Watch what you eat, omitting what disturbs you. Orange is the Color to correct it.

Member — Will you tonate Local?

C. R. — Practically, all our Tonations are Systemic, with the exception of Magenta, Purple and Scarlet, which are always Local. There are times when we use a Local for Burn or Bleeding.

W. K. — I think it would help if we had an Anatomical Chart, so the Members may see how close the Vital Organs are to one another.

J. B. — During my daughter's illness, I noticed how she responded to the Yellow. It seemed to be her Color definitely. The other Colors used were good, but, the Yellow seemed to bring a quicker response. It is her Color all right.

C. R. — Proving also that an amount of cleansing has still to be done. Several Members complain because Dinshah keeps them on Yellow for weeks at a time; he does so, because, there is a reason for it. Unless the foundation is good and clean, the structure may not last. Do not plant where there are weeds, if you expect a good harvest.

A. N. — I remember when my two girls had an Ear Trouble. Yellow was used and after the third Tonation, the Ears started to drain and kept on draining for about a month.

C. R. — An Earache is nothing with which to fool. It can become very serious as one of our Members can well testify. If there is an Inflammation of a bony structure, Fever may indicate and if there is something to drain out, Yellow will do it, but, if a child has inserted something in the Ear, it must be **removed**, and all the Yellow can do nothing. If you have a Sliver in a Finger, the Sliver must be **removed first**, before the Inflammation may be arrested. Now, let us continue with the next Chapter 84, Page 891, on Indigestion. We have been talking so much about the Yellow, let us know exactly to what use you may put it.

Member 1 — It is a Lymphatic Activator.

Member 2 — It is a Splenic Depressant.

Member 3 — It will correct a Worm Disorder.

Member 4 — It cleans the Body.

Member 5 — It can be used for Mental Cases.

Member 6 — It aids the Digestion.

Member 7 — It is used for tonating Paralysis.

Member 8 — It will counteract Constipation.

C. R. — That is good; you have now the right idea. Speaking about Paralysis, how many of you parents permitted your children to be vaccinated with the new Salk Vaccine?

All Members — None.

J. B. — Will Yellow prevent Polio?

C. R. — Your best preventive medicine is yourself. Take care of the Body as Nature intends you to do. When you overtax the Body, the Energy and the Vitality are low and you become susceptible to illness. A healthy plant is not attacked by insects.

Member — Yes, but, what would you do?

C. R. — The proper food and sufficient rest. The food is the fuel of the Body. What you eat determines the type of Body with which you have to deal. Therefore, put into your Body the finest fuel you can get and not the devitalized, processed, demineralized, doctored food sold in most of the stores today. Eat the Natural Foods grown without the aid (?) of Chemical Fertilizers. What is put into the food from the soil, must be put into the soil again.

Member — What about fasting? That also rests the Body.

C. R. — True enough, but, it depends on how long the Fast lasts. Most of us eat too much, so an occasional Fast is not harmful, but, those Fasts that last for days, I am not quite sure of them. Take the 20 day Fast, using only Distilled Water; I like to get Dinshah's comment on that.

Dust may act as a Mechanical Irritant or a Chemical Poison according to what its constituents are. H. S. sent either incomplete or incorrect Charts. She reported in answering item 19 in the Personal Research Information that she is Unmarried? No. Married? No. Divorced? No. Widow? No. Separated? No. I am still thinking what her status is! The Institute has a few new Portable Color Projectors in stock; price complete with 500 Watt Bulb, Slide-Carrier, Instruction Book and current year's Experimenter Membership \$60.00 inclusive of Parcel Postage and Insurance. Automatic Time Switch \$10.00 extra. We do not talk by medical names of Disorders. Anemia simply means a state in which the Blood is deficient, either in quality or quantity. The licensed professions enumerate over 100 different types of Anemia! The same with Leukemia, which means a fatal disorder of the Blood forming Organs, with a marked increase in the number of the White Corpuscles, with enlargement of the Lymphoid Tissue of the Spleen, our Area 6. About 30 different ones are recognized by learned professions, with bombastic names. In our Science it means a big 0. The only recognition we have to give is to the Spleen and the Liver, our Areas 6 and 7, joined in the Portal Circulation and the various differences and characteristics are easy to comprehend, as they appear as symptoms. It is either a Disorder is on Infra-Green or Ultra-Green of the Visible Spectrum and the Remedies are right there for you to irradiate. The learned, licensed professionals have no knowledge at all of the true Human Constitution beyond the Physical Material Body and as far as Aura is concerned, the less said about them is better. Follow our Rational Food Of Man System and you will have no Allergy. You may get an Atlas Of Human Anatomy, written by Medical Doctors of famous Universities for only \$1.75, with explanatory text and over 25 colored charts. The Institute has a few on hand for sale. Every Member should have one to realize the wonderful gift of Nature in making the Human Engine. Most of the Earaches are generally through Impacted Wax or Inflammation of the Mastoid, which is a process of the Temporal Bone behind the Ear. The latter is very painful and must be very patiently and carefully attended, otherwise it might burst and drain inside into the Brain, causing numerous complications. About Poliomyelitis, I wrote in the June 1955 issue. Study that. Why have Vegetables and Fruits deteriorated in America? Because, we destroy by hunting birds which formerly lived on the insects which were harming the agriculture. O for a voice to save America! American newspapers and radios will not use my articles or broadcast my views, even with payment as advertisement! In Michigan,

I used to broadcast on my Science, in former years, but, soon after signing the contract, the Radio Station returned the balance of the money, stating they were warned if they permitted me on the air, their License would be revoked!!! I am not in favor of long fasts. It disturbs the established rhythm of the normal functioning of the Vital Organs and when the Fast is completed, strength has to be used to bring all in equilibrium. Water in itself is a food. Follow Rational Food Of Man System.

* * *

First Merrill Wisconsin Studio

H. U. — I get Headaches while sleeping.

W. B. — Headaches are indications of something being wrong in the Body. You should get good results with the Yellow.

E. B. — I have poor Circulation. I am getting some results with Scarlet on Area 18.

W. B. — Send your Chart to the Institute.

M. S. — I had Backache; used Orange and Green with good results

E. O. — I am getting better results with Lemon, Yellow and Orange.

A. S. — I am feeling fine; I do not have to use the Projector often now.

W. B. — I recall when she had many Disorders and it is gratifying to hear of such good results. It encourages our new Affiliates. I shall now explain to you how the Lungs of a Smoker fill with Carbon particles; the picture of such Lung is on Page 790, in the Second Volume of our Text Book Set.

Member — What about Blood Clots?

W. B. — Lemon will dissolve Blood Clots.

You are going along well. Train the Members to go to the Cause, when looking for the Remedy to create the Effect.

* * *

First Milwaukee Wisconsin Studio

K. B. — I should like to discuss something that was in our magazine. Many people are confused if they can not get the Kardoscil down; they think it is the end. Try it yourself. I watched myself; if I force mine up, I do not feel normal. O. L., have you anything to say?

O. L. — I know someone with 54 Heart Beat.

K. B. — Do we have any case reports?

H. S. — Yes, I have one. My granddaughter five years old, came to stay with me over the Easter school vacation. She became ill with Measles. For three days, she had a high Fever, also Vomiting and a running Nose. Kardoscil 150 and more, Spiroscil 40. I tonated her with Turquoise and Magenta; when the Fever was high, I gave her Blue. The fourth day, while under the Turquoise, she began to itch, so, I patted Coconut Oil on her Legs and Arms. One night, I washed her with Baking Soda in the Water, to stop the Itch. I remember from my former experience with children, when they had it. It helped at the time we had no Projector. She rested well that night. During these four days, all she would drink was Orange Juice and Spring Water. As soon as the redness was gone, I tonated her with Lemon Systemic. The fifth day, she began to eat solid food. She was with me ten days and went back to Kindergarten.

K. B. — Usually, children respond quickly. Watch the Backelim and Frontelim. Have we any other reports? That is what we like to have in our magazine.

S. E. — S., one of our Members, wanted to come this evening, but, could not. Her son had an Abscessed Tooth; the Dentist found the Nerve dead. The boy is twelve years old.

K. B. — Use Indigo if the Tooth is out already. I bit a Black Fig and a Tooth broke; the Root had to be chiseled out. I used Indigo and when I ate, I could just go way up. I know he went after the Nerve in two holes. If there are Cavities, you may use Lemon or Orange or even Indigo; you have to try it. I had the habit of biting Almonds with my Front Teeth; suddenly, my Front Teeth became loose. I had a Nerve removed when I was 18 years old and I still have the Tooth. We think we are going to die, but, we do not! You have to know the Symptoms and act accordingly. The Pulse and Respiration must be watched.

A. E. — I have two cases to report. I was not here last month, because, I had Turpentine Poisoning on both Hands. I used Indigo so it would not go further. Finally, my Face began to swell, I think from scratching. I went to see K. B. I had about 76 to 82 Kardoscil and 14 to 17 Spiroscil. He suggested Magenta Local and Green Front and Back Systemic. People said I had Eczema. My husband awoke one morning, with a Stiff Neck; he said: "I am going to use Orange." Then, he got out a Liniment; I could not apply it to his Neck, because of my Hands. I believed I had Stiff Neck the night before; so, he said he would rub Liniment on my Neck and put on the Hot Pad. Then, I had little Pimples from the Liniment. He said: "You do not look very good." I said: "I do not feel very well." He felt awfully, because, he applied the Liniment. I took a Green Tonation, but, my Neck did not want to loosen. Used Green and Magenta; it looks like having a bad Sunburn. I can not get rid of those Pimples. What should I use?

K. B. — A. E., you know about Rubor, Calor, Tumor, Dolor. Use the Green to cleanse the Body. Lie under the Color for one hour and let Nature

help with the Chemicals. Watch also the Front and Back Eliminations.

A. E. — I took several Turquoise. What about the Neck? Will the Dark Redness go away? I took Yellow on 6, 7, 8, 9, 10 and drank plenty of water.

K. B. — I told you the right thing. The Itisometer said Green.

A. E. — I always thought we live as close as possible to Nature and can not understand why we get those troubles. I always think people will say: "Look at them!" Years ago, we used the Liniment, before we had the Projector and never had anything like it. I want to get that Color off my Neck.

K. B. — That Liniment has Turpentine and Mustard Oil in it; you should not have used it.

A. E. — I know.

(Long discussion followed.)

Member — K. B., I think she is confused.

K. B. — May I ask a question? Do you sleep in the same bed?

A. E. — Sometimes.

K. B. — Sometimes you suffer Sympathetic Disorder. That is why the Institute asks send the Charts of both.

A. E. — Do you think that is how I got it?

K. B. — I do not **think** so; I **know**.

R. S. — Is it not a fact you apply Orange in the morning and do not feel the effects in the evening, but, the next morning you use Orange again and you first feel it.

(More discussion followed.)

L. D. — My Spiroscil is low; should I use Magenta? Do not we use Orange for Growths?

K. B. — We do not have fast rules. You people have in mind that we use a certain Color for a certain Disorder. We do not use X-Rays and we do not have names for Disorders.

L. D. — In other words, it is Lemon Systemic and Magenta?

K. B. — Colonel Dinshah has Sixth Sense; he can act on certain things and we can not. He has the advantage over us.

(More discussion followed.)

G. F. — I want to ask something about my sister. Her children want her to go to a Doctor for a check up. She had High Blood Pressure; it came down. Her Kardoscil is 80, Spiroscil is 20. She has Sinus Disorder and Migraine Headaches. She has taken Turquoise and Magenta. She took Turquoise to relax. She is 64 years old. Her Blood Pressure was 202 and now is down to 180. She is not worried about it.

K. B. — As we grow older, the Tissues harden and the Capillaries clog. Children do not like to have anyone tell them anything. You all have been coming here long; why do you not study the Instruction Book? Use Purple Local and Lemon Systemic.

G. F. — Her Elimination is good.

K. B. — What does she mean by "good"?

F. K. — K. B., you made a good statement. When we sit next to anyone, we draw from them certain effects. When you talk Health, you attract health-minded people. It would be well if we discuss Fundamental Principles of our Science. For those of your friends or of the family who want to learn, they can become Students by enrolling at \$3.00 for the year. They will thank you later for the knowledge gained.

K. B. — Where are the new Members?

(Three rose and were given an applause.)

H. S. — I like to have this young man report.

J. R. — Two weeks ago, I was in an Airplane crash. I had Brain Concussion, my Face was injured and cut and I lost much Blood. They put me in a hearse and took me only to the entrance of the Hospital. They claimed I had Blood Clots, my Eyes were swollen and the Doctor wanted to operate on my Head to relieve the Brain. The Undertaker was at the entrance of the Hospital and said: "Am I going to receive him?" The Doctor said: "We can not do any more for him." I regained Consciousness for a while and was gone again. I did tell them: "If you think I am dying, you are an idiot." By the Supreme Being I was saved. The fifth day, I got out of bed after I regained Consciousness. They did not do anything for me in the Hospital, but, after they noticed I was recuperating, they wanted to start to inject. I did not let them. It is more or less a miracle. I am a little weak, which is to be expected, but, I am becoming better. The Doctor checked Depth and Reflexes and said: "Both Eyes would not be equal, if there be any more Blood Clots. The Airplane froze at 180 an hour. When I recovered, the Doctor who said: "We can not do any more for him," was not around. I wanted to see him, but, they told me he was on vacation. I did not see him face to face.

R. S. — He has to be examined by four Doctors to determine if he is in good condition to return to work.

A. E. — May I ask this young man if he knew about the Visible Spectrum before the accident?

J. R. — Not too much; I heard about it. I would gain Consciousness for a second and be gone. I would regain Consciousness and be gone again. I was told I would push him away and then four Doctors would hold me. Another Doctor came and he took over.

H. S. — I gave him Orange the first night, because, he was in Pain; then I gave him Magenta. He did not come for two days. When he came, I told him he should go home.

J. R. — This happened about two and one half weeks ago and everyone is surprised my Face is all healed.

Member — I have a Skin Disorder for about a year. Both Legs are bandaged.

K. B. — I shall show you a picture. This man was born with a Skin Disorder and the parents spent almost all their money for him. At the age of 28, he used the Color Projector for one year. It returned about six months later, but, cleared again. Now he has three children and they are perfect. They did not want to give him a Marriage License; I told him to go to a State where they did not need one. Now, they want the Vaccination to be a Federal Act. Doctors admit the Wassermann Test is not accurate. Eat right and do not overeat and you will be helped to health.

It is not only the Ratio, but, the age, sex and other details in life habits that determine the correctness of the Ratio, should be considered. Mere random talk will lead nowhere. H. S. did a sensible job for her granddaughter. A. E. never sent her Chart or that of her husband. She is a fine, intelligent woman, but, always has the psychological tendency to have the last word! L. D. also never consulted the Institute. My "Sixth Sense" is nothing but the development of intuition or logical perception of facts, by studying both sides of a question. The valuable characteristic is right printed in my books and you may easily acquire it. G. F. should study our By-Law 63 regarding Immediate Family. Congratulations to H. S. for her admirable service to J. R. I request that the Member looking after the Attendance Sheet compare the signature with the name on the Membership Card. Female Members MUST sign by their own first name and not as Mrs. -----.

* * *

First New York New York Studio

R. D. — Dinshah is sending his regards. I am sorry J. S. is not here today. I do not like to talk behind his Back, but, he did not send in his report for 65 days. He does not follow the Rules. Then, he complains. He will not have results that way. I do not think he has much co:operation at home.

M. F. — I think he has not enough faith.

R. D. — Fear can change the chemistry of the Body. Are there any questions in filling out Charts? Does anyone know what Dinshah thinks about Sun Glasses? My Eyes trouble me in strong Sunlight.

J. B. — I get good results with Lemon for my Eyes and Sinus Disorder.

R. D. — I am talking of Inflamed Eyes. I use Turquoise for that.

C. P. — My Dog was very sick; he was like paralyzed; he could not stand on his Legs. I gave him three Tonations of Turquoise; he is all right again.

R. D. — Give him a Yellow for that. It is discouraging to see attendance keeping on dropping. Do you know how much this room costs? We should have better response.

V. D. — Could a reminder be sent a few days before the Meeting?

R. D. — The Institute can not at present afford a Secretary for that. It has a part time worker to address envelopes.

D. S. — The Dues should be raised to afford a Secretary.

F. H. — There should be a reminder in our magazine.

R. D. — Some times it comes weeks before the Meeting. I notice in other Studio Meetings they make a study of our Text Books. We should do that too. Before we go in for reading, are there any Case Reports?

E. H. — I use Yellow for the Pain in my Legs.

R. D. — You should really fill out a Chart and do what the Institute may tell you to do.

T. K. — The wife of one of our Members has a Cactus Thorn stuck in her Throat. She pricked her Finger with it and sucked it.

R. D. — If there is a Swelling, I think that Orange will throw it out.

T. K. — She goes to the Doctor, but, the Thorn is still in her Throat.

M. K. — My husband had Quinsy. We used the Light on it until it came to a head. The Doctor just lanced it.

R. D. — Orange and Yellow would take care of that. My boy had Sore Throat. The Institute put him on Green Systemic Front and Back for 30 days. We had very good results. He eats better and is more relaxed. I had a bad Throat like that too. I had 10 or 12 Frontelims a day; also had Fever. I used Turquoise; that broke it.

E. G. — I tonated my girl for Constipation. No more trouble. We have been eating Meat all along.

R. D. — You will have to tonate with Yellow all the time, if you do not change the eating habits. Read your Family Health Protector.

E. G. — What do you use against Hay Fever?

A. K. — Use Green and Turquoise before it starts.

R. D. — I know a Member who used Lemon. If you wait till you have Hay Fever, you will have to use Turquoise. It is a Respiratory Disorder. Fill your Chart; you will have to change your living habits.

V. D. — You have to be careful when eating Asparagus; I became very sick by it.

R. D. — There was a Member who had an article from a German newspaper, saying they use Color Projectors for healing.

E. G. — My mother had a German book in which Colonel Dinshah was mentioned.

R. D. — One hears so much about Polio Vaccination; people are becoming afraid. There is another Doctor who also has a Serum, but, he wants to put in Live Virus. Dr. Salk uses Dead Virus.

F. R. — I spoke to a Medical Doctor; he said against it. He has 3 children, but he would never inject them. If the children are fed right, there would be no such trouble. Countries which have no Chemical Fertilizers, do not have such Disorders. No family using our Color Projector need be afraid of Polio.

S. K. — All Ice Creams have Chemicals and Gelatine.

R. D. — Dinshah says certain Ice Creams do not have that.

F. R. — White Sugar interferes with Potassium.

Member — What Color has Potassium?

F. R. — Magenta.

R. D. — I shall read to you from the Family Health Protector on "Abolition Of Drugs And Medicine," Article 31. You have the Mogen David Reaction by the Affinity in Chemicals. Keep the System clean. Now, remind your friends to attend the Studio Meetings.

R. D. has every reason to congratulate himself on the choice of his mate. I had the honor of meeting her and their children, all forming an attractive family managed by an intelligent, beautiful woman. I wish them all happiness in life! Fear is a destroyer of the Emotional as well as the Physical Vehicle. Our opponents rule by that power of Fear. We are told that the Visible Spectrum has no real power; it shows its effect solely by Faith! We shall be obliged if C. P. will kindly inform us to what Religion his Sufferer belongs, what Church he attends, who is his Minister and who initiated him into that Faith!!! The room costs plenty and you should have more attendance. However, there is no sense in spending more money on mailing monthly Notices. It is uniformly known that ALL Studios have their Meetings on the First Thursday of each month. The whole fault is this monthly magazine. "Why should we go there? We shall have the printed Reports sitting at home!" Well, if this negligent attitude continues, we **have** the remedy. We shall send the parcel of Visible Spectrum Researcher monthly to the Studio Commission; those who will attend will get it. The Dues are now fixed in our By-Laws, a copy of which is going to each Member this month. Study them carefully AND follow them. While the Thorn is in the Throat, nothing will relieve; that mechanical nuisance **MUST** be removed. Quinsy is a Suppurative Disorder of the Tonsils. It can be tonated like any other Inflammation. Food is the main builder of the Body, so until one follows our Rational System, Tonations will have no value. Hay Fever is caused by the mechanical and chemical irritation caused by Pollen which is the Male Fertilizing Element of Flowering Plants. Just as Bananas

are artificially chemically ripened, Asparagus and numerous other Vegetables and Fruits are sprayed with various Insecticides. No wonder V. D. became sick. My views about Vaccines and Serums are well known and more were printed in the Dinshah Impartial, last month. There are certain Ice Creams which have no Chemicals and no Gelatine. Write to the makers and they will inform you.

MEETING OF THURSDAY, APRIL 7, 1955

First St. Louis Missouri Studio

Because of it being a week of religious services, less than the usual number of Members was present. An article by Hubbard Cobb on "Notes on Colors," published in the St. Louis Post-Dispatch of Thursday, March 3, 1955, was read. It stated:— "Seems there was this family and they had a living room with red walls and every evening the family would gather in the living room and fight like cats and dogs. Well, one day the old man got sick of those red walls and he painted them all yellow and now the family hasn't had a fight in months.

"Seems that there is a good reason for this sort of thing because we are all affected by colors. Red, for example, not only makes a room feel warm but it steps up the blood pressure and increases the muscular tension. After a time this gets a little irritating and so you should be darn careful of where you use red and how much.

"Yellow, on the other hand, is a very cheerful sort of color. Of course, you can overdo it just like anything else but if you are ever sick, try being sick in a yellow room and see how much more cheerful you feel. And let me know if it really works.

"Green is another nice restful color and the reason is obvious. It's nature's own particular color and while we may live in cities where there isn't a stick of green growing for miles around, we still find rest in the color just as we would if we were sitting by the side of a nice brook on soft green grass looking at nice green trees and not doing one darn thing. About the only bad thing we can say about green is that it doesn't do much for the looks when placed too near a mirror.

"Orange, it seems is a sort of mood color. If you are in a good mood, orange will make you feel even better but if you are feeling nasty, orange will make you nastier. Blue is a very restful color but we'd avoid using it in a hard-to-heat room because it will make the room feel even colder than it is."

The article started a discussion on the effect of the Color of Walls or rooms on people.

W. W. — I want to report my wife's experience in wearing closed and open Toe Shoes. At home, she wears Open Toe Wedge Heel Shoes, but,

in going down town, she wears Closed Toe Shoes. She wore such Shoes going out about two weeks ago and has been complaining since then, about Pains in the Toes. Now, her big Toes are Black.

Discussion followed about the size of Shoes, Cold Feet and the Ratio.

C. S. — There is not enough stress laid on the importance of taking the Ratio. Recently, my wife did not feel well; she had a Ratio of 6 to 1 that is 81 to 13. I suggested Orange and it was very helpful to her.

C. N. — You are so right. This is the key to Health, which no other Science has. The Ratio is the proper Oxidation of the Blood Stream. A 6 to 1 Ratio is almost as bad as a 3 to 1. The latter indicates approach of Dissolution and the former wear on the Heart.

C. S. — My wife complained of Weakness; however, she eats well, her Front and Back Eliminations are good.

C. N. — Weakness is a Symptom. It is nothing about which to be alarmed. See that the person gets plenty of Rest and Warmth.

C. S. — She used Yellow on Areas 6 to 10. Turquoise gave good results for her Cold and Orange and Lemon Systemic were also helpful.

A. W. — I used Yellow Systemic for my weakness in the Legs. It takes time to build strength.

C. S. — Our age does not help the situation. When we were young, we could regain strength rapidly.

C. H. — How can I increase shallow Breathing?

C. N. — That is a matter of practice; I do not think I should encourage anyone to do it.

C. H. — At night, I breathe so softly, that my wife can hardly hear me and she becomes frightened.

C. N. — There is nothing to worry about that. It is normal. However, what Color would the Affiliates suggest?

W. W. — Orange helps to increase Breathing.

C. N. — That is right, but, I do not think I should suggest that to this man, as he is using enough Orange. More of it might disturb the Ratio. We have a safeguard in our Body, which will normalize itself. Drugs will increase the Breathing, but, the Body will be penalized. Tonate as needed, if the Body be out of balance.

Discussion followed on Food, Vegetables, Animals and Human Beings.

C. H. — Why does Lemon and Orange Juice cause me to have Sour Stomach?

C. N. — The fruit itself does not cause it. It is the combination of the Foods and the fact that the Body is not at par.

Member — How shall we make the Lemonade?

C. N. — You did not taste real Lemonade, until you make it according to Dinshah's Limbupani recipe in our Instruction Book. He prefers the

sweet drink to a tart or sour one. It is an Energy giving Food. If you be tired, take a teaspoonful of Raw Brown Sugar and note how quickly the Energy is restored.

R. B. — Granulated Sugar does not have this quality. Purifying and processing of Sugar takes many Chemicals.

A. W. — What about the Chemicals they spray on the fruits and vegetables during the growing stages?

C. N. — Scrub them.

C. S. and A. W. — The Chemicals are put on while the fruits grow; they are IN the Food and can not be washed.

C. N. — Does not the Body have the ability to throw off Poisons?

A. W. — If it is in Health.

C. N. — The Sunlight and Air also are great cleansers.

Discussion followed on the Wave Lengths of Colors, from Figure 52, Page 383, Volume 1 of our Text Book Set and the selection of the various Colors common to the Elements by the Organs of the Body.

Our views on Colors and their potencies are slowly permeating in the world of science, although we have been ridiculed for decades. Here is the most recent article which appeared in the Times-Journal, of Vineland, New Jersey, on Saturday, May 28, 1955, under the section "For Better Health," written by a Medical Doctor C. A. Dean, with the caption "Color's Effect On Personality":— "MEDITORIAL: Few people realize the amazing ways in which color can affect us. Color can affect our appetite, our ability to rest, and our capacity to think.

"In general, reddish colors are warm and stimulating and blue-green colors are cool and relaxing.

"Blue can be an emotional sedative. Surgical patients recover more rapidly in blue rooms. Blue rooms have been used to help quiet violent patients in mental hospitals.

"Yellow can produce a sensation of sunlight and warmth. In one school the grades of the children rose noticeably when the study rooms were done in yellow. But some shades of yellow may produce nausea, so airlines have abandoned yellow decorations.

"Dark colored objects are usually adjudged heavier than light-colored objects even when they are actually the same weight. Most people will think the temperature of a blue room is lower than it actually is and at the same time overestimate the temperature of a red room.

“Color affects digestion and appetite because the color of the light or the room may change the appearance of the food. Tempting foods may become repulsive and produce nausea under certain lighting conditions.

“Color psychology is used very effectively in all good sales work, as every good salesman knows.”

The trouble with general American life is the changing and following of the curse of Fashions. Shoes that are ill-fitting are the main cause of Foot Troubles. Shallow Breathing may be benefited by walking in the open air. C. H. should sleep in a separate bed and preferably in a separate room. That rule applies to ALL married people. Chemical sprays are the bane of present agriculture. Introducing Poisons in the Body and awaiting their discard by the Body, is a worthless taxation on the Vitality. Avoid wrong CAUSES, so you do not have to worry about wrong EFFECTS.

DINSHAH IMPARTIAL

(The Universe Through The Eyes Of Dinshah)

STILL ON THE SAME PATH ON SMOKING-CANCER

When learned professionals declared their opinion that the smoking of Cigarettes produced Lung Cancer, very naturally those interested in the manufacture began to combat such opinion. Promptly a Tobacco Industry Research Committee was organized, with Dr. Clarence Cook Little, of 350 Fifth Avenue, New York, N. Y. as the Scientific Director. To make the investigation thorough, a small grant of \$1,000,000.00 was made and after the first year, Dr. Little reached no concrete achievements, but, iterated that: “It is important to note that scientific evidence still offers no proof that Smoking, Air Pollution or any other single factor is the cause of Lung Cancer. The problem of Cancer is one that is as broad as the whole field of Medicine itself. I would be surprised if we ever find a single causative agent for the Cancer.” He is quite right. With a million dollar grant for Research, to find a “single” cause, would be against the laws regulating finance. So, to bring more aid to the Committee, I am making a grant of 50 Billion Grains of Sand, through the Last Bankruptcy Bank of Crazytown, Hello-mania, for further, sincere “Research.”

* * *

OUR ENTRY AS SECOND CLASS MATTER

After correspondence about our periodical being entered as Second Class Matter since its inception, the Post Office Department gave us numerous directions as to how to attain it and how our Membership Form should be printed for that purpose. Thus, we now have that privilege and hereby offer our cordial thanks to Assistant Postmaster General Norman R. Abrams, in charge of the Bureau Of Post Office Operations, Washington 25, D. C.

FOREIGN AMERICAN LANGUAGE

I receive Orders for various of our books and the like from our patrons, but, from some of them who are of foreign education, we get letters which no grammarian can decipher. Here is a sample:— "I likes to hab a hell lamb. Hoo moch? I most pay to ged one? The old one number BS don exist any more. He was gading auld, licky, de elektrik war out, so I destruc him and thro him in de junk yard. I tot I did not nead him any more. but I sure do. Im still dizzi."

* * *

USELESS SURGICAL OPERATIONS

In Milwaukee, Wisconsin is published a weekly newspaper called "Milwaukee Labor Press," under the auspices of the American Federation Of Labor. That newspaper did a great public service by relentlessly exposing the tactics of the medical monopoly known as the American Medical Association. Through the kind courtesy of a beloved friend, I received several copies of the attacks on the A. M. A. by the Milwaukee Labor Press and in its issue of Thursday, May 12, 1955, I found this article on "Knife-Happy Surgeons In Wisconsin Are Warned:" Without any comment, I offer it for the knowledge of our Members, some of whom believe I am very hard on our opponents. The article says:— "What patients have long suspected — that doctors are ever eager to perform operations for the cash involved, rather than need — was confirmed in Milwaukee last week in an address by Dr. Richard TeLinde, professor of gynecology at Johns Hopkins university school of medicine. TeLinde spoke before the Wisconsin state medical society convention at the Milwaukee auditorium. He said the medical profession should clean its own house by taking steps to prevent unnecessary pelvic operations on women and indicated there was no question that too many pelvic operations were being done. He cited a survey in five non-teaching hospitals in Virginia, Kentucky and Tennessee that showed 28% of 906 pelvic operations were unjustified and another 32% were only partially justified or undetermined . . ." Such Operations are called "Rape On The Pelvis." They pay well. One lady we know personally, paid \$1,000.00, in a Hospital, for a short stay.

* * *

HOSPITAL EXPLOSIONS

Notwithstanding the constant brag of Medicine and Surgery about the wonderful efficiency of its various operations, about 100 "accidents" a year occur in the American Hospitals. In Brooklyn, New York, a woman in childbirth was killed by a blast in the delivery room and recently in Evanston, Illinois, a Roman Catholic priest died by an explosion in the surgery, while under operation for Ulcers in the Stomach. We should like to know why the Doctors were not arrested for negligence in permitting Static Electricity to fire gaseous mixtures as Cyclopropane, Ether, Nitrous Oxide and the like. Are they all "accidents"? No carelessness?

* * *

VALUES IN A STEER

To those who do not possess conceptions of food values, the commercial side of a 1,000 pound steer may be of some service. Out of the slaughter of one such animal, the following results:—

- 80 pounds Round Steaks.
- 50 pounds Sirloin Steaks.
- 40 pounds Porterhouse, Club and T-Bone Steaks.
- 70 pounds Rib and Rump Roasts.
- 100 pounds Chuck.
- 40 pounds Shop Fats.
- 160 pounds Hamburger and Stew Meat.
- 460 pounds Hides, Hoofs and Inedibles.

The actual nutritive value of the best piece of such animal, is less than 40 per cent., compared to 85 per cent. in Legumes. Compare prices and reckon the economic waste yourself. The table was published by the News-week, August 3, 1953.

* * *

SMOKING TOBACCO RUINS HEALTH

It is seldom that newspapers print anything downright against the filthy habit of smoking, because it might ruin their advertising income. I was therefore surprised to read an article by Dr. George C. Crane openly denouncing smoking, in the Vineland Times-Journal of June 30, 1953. Said he:— “Last year the average cigarette smoker burned up \$90.56 on the ends of his cigarettes, . . . it tends to kill people in the 40’s and 50’s by heart attacks. It also predisposes to high blood pressure, apoplexy, Buerger’s disease of the arteries, plus cancer of the mouth, throat and lungs.”

The Editor and Publisher deserve credit for telling the truth.

* * *

MILKING MICE

Becoming tired of milking the sick public, Scientists are now having milk in New York from mice! Cost? Around \$10,000.00 per quart! Who drinks it? Do not know.

* * *

PERFECT COINCIDENCE

Reporting on the value of different articles good for humans to eat, Mrs. Jane C. Mixner, Cumberland County Home Agent, stated that: “Liver supplies more nutritive value per serving than almost any other food. It has generous amounts of Protein, Iron, Vitamin A, Riboflavin, Niacin and Thiamin — a real bargain in good eating.” I have no doubt about it, because, the lady’s assertion is emphatically corroborated by certain African Cannibals, who, above anything else, prefer to eat Christian Missionaries and resent being stopped from that practice! Further, Jane stated that: “The Liver of Beef, Veal, Lamb, Pork and Poultry have about the same food value.” She should include the value of her own Liver and Gall.

* * *

WASTE OF CASH

Recently the University Of Texas Hospital For Cancer Research had a 10 ton 22,000,000 Volt Betatron installed for finding new inroads on Cancer. They already had another big X-Ray machine, but, the new one costing \$150,000.00 is expected to act on deeper tissues and — ? More Burns? More Destruction? Tomfoolery and waste of time, labor and money, when they do not go to the comprehension of the causes leading to the production of what they style "Cancer." Is there any millionaire who will for once make such an endowment on our service Institute?

* * *

TURNING TURTLE

The learned professionals have the habit of recommending and using the X-Rays for most occasions, whether needed or otherwise. Now appears in the issue of April 1955 of "today's health," published by the American Medical Association, a long article under the caption "New Light On X-Rays," written by a lady, Muriel Davis Longini, whose qualifications for such an abstruse theme were not mentioned. However, being the first man in America to lecture on the Roentgen Rays, in 1896, my interest to read the article was aroused and here are some of the extracts for consideration of our Members, relating to the warnings I give them constantly against those dangerous Rays:— "One reason why usually conservative doctors have dusted off the superlatives for the image intensifier is that cancer can result from too much exposure to X-rays. Any X-ray technician is in danger, for it is the gradual piling up of radiation that may induce cancer; he can never wipe from the slate any past radiation to which he has been exposed . . . Dr. Percy Emerson Brown, pioneer radiologist and himself a victim of cancer, induced by X-ray . . . Dr. Brown would have been spared the writing of his book of tragic case histories, 'American Martyrs to Science Through the Roentgen Rays.'" We tender our respectful compliments to that Editor, for openly acknowledging a hitherto denied effect on the Human Body.

* * *

COMING TO OUR VIEWS

It is well known that we are emphatically against smoking tobacco in every form. Now comes Dr. Alton Ochsner, Surgeon at Tulane University School of Medicine openly with the report that Lung Cancer is increasing as fast as Cigarette smoking. He further states that it is unquestionably owing to the carcinogenic effect of the cigarette smoking. In this opinion, he has the support of other researchers and it is interesting to note, that since 1945, the American Cancer Society allocated about \$25,000,000 to this research. It is to be regretted that beautiful women are now addicting to this vicious habit and also that the man who has been hammering against Tobacco Smoking since many decades and has other views on Cancer is not backed by any "Society" with generous allocation of cash collected from the public!

* * *

SMOKY RULING

On December 29, 1952, the Federal Trade Commission gave an important Ruling, to the effect that the claims made by Philip Morris & Co. Ltd. about their cigarettes being non-irritating to the upper respiratory tract were false and that the result of experiments made on animals proved nothing. The strange part of the business of advertising is that as you turn on the Radio, Philip Morris cigarettes are the best and half hour later the same station blares the wonders of "Camels" and still later "Chesterfield" proclaims its marvels. Why does the Federal Trade Commission turn deaf ears to the others and picks only on Philip Morris? They are one and all similar anyhow and Tobacco Smoke contains not only Nicotine, but also Pyridine, Furfural, Sulphuretted Hydrogen, Collidine, Picoline, Sulphurous Acid, Sulphuric Acid, Carbon Dioxide, Carbon Monoxide and Prussic Acid . . . eleven most potent, virulent poisons. No wonder Cancer of the Lungs and Tuberculosis are on the upgrade. The F. T. C. in 1946 appropriated \$2,130,269; for 1954, through the long sight of Harry S. Truman, the F. T. C. was slated for \$5,335,000, to accomplish its soulful watch for honesty in business. Oho!

* * *

WHERE IS AMERICAN LIBERTY AND LAW?

An alien, Ignatz Mesei, who lived in the United States of America from 1923 to 1948, was abroad behind the Iron Curtain for 19 months. Then, he got an Immigration Visa from an American Consulate, but, was thrown here into Ellis Island — without any hearing or charge! His attempt to go to some other country failed. Finally, after 21 months of detention, he obtained a Writ of Habeas Corpus when the U. S. Government refused to divulge even in the U. S. Court Of Appeals in New York, the evidence against him. Ground? Public Interest! The Appeals Court granted the Writ, but the U. S. Supreme Court reversed the man's release on conditional parole on bail! Result? Mesei will have to stay in Ellis Island for life — without a charge, without a hearing — without due process of Law! No wonder people of Russia hold us to ridicule; this case is good propaganda for our opponents. This in spite of Dissenting Opinions, by Honorable Justices Hugo S. Black, William C. Douglas, Robert H. Jackson and Felix Frankfurter! Where are we headed?

* * *

CURE OR CURSE?

Says Dr. Alton Ochsner, of Tulane University Medical School in "today's health" published by the American Medical Association, dated December 1953, that "If you are over 40 and a heavy smoker who gets chest discomfort have an X-ray every three months. It can be insurance against death from Lung Cancer. Detected early enough, the Lung Cancers can be cured by taking out all or part of the Lung. Smoking may be a cause of Lung Cancer, now the leading Cancer killer among men." Some cure, all right.

* * *

OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a Membership Meeting, at 8 P. M., in each of our following Studios, for reporting the results and findings of Personal Experiences in the use of the Visible Spectrum of Light and Color:—

First Allentown Pennsylvania Studio—Hotel Americus, Fifth and Hamilton Streets, Allentown, Pennsylvania. Catherine Knebel, Chairman, 2346 E. Hamilton St., Allentown, Pennsylvania. Pearl M. Diehl, Vice-Chairman, 642 N. West Street, Allentown, Pennsylvania. Nellie Etta Spaar, Reporter, Route 4, Box 93, Quakertown, Pennsylvania.

First Cleveland Ohio Studio—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Louis Friedl, Vice-Chairman, 14220 Birchwood Avenue, Cleveland 11, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

First Detroit Michigan Studio—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Charles J. Renn, Chairman, 24225 W. Nine Mile Road, Detroit 19, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elizabeth Roemming, Reporter, 11693 Terry Avenue, Detroit 27, Michigan.

First Merrill Wisconsin Studio—New Badger Hotel, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1504 River Street, Merrill, Wisconsin.

First Milwaukee Wisconsin Studio—The New Republican Hotel, Guild Hall, corner North Third and West Kilbourn, Milwaukee, Wisconsin. Kurt W. Bader, Chairman, 314 E. Burleigh Street, Milwaukee 12, Wisconsin. Fredrick Kneppreth, Vice-Chairman, 1813 South 75th Street, West Allis 14, Wisconsin. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

First New York New York Studio—Hotel Diplomat, Governor Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Die-drichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgefield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

First St. Louis Missouri Studio—Albrechts Hall, St. Louis, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Marie J. Parison, Reporter, 7525 Comfort Avenue, Maplewood 17, Missouri.

OPEN DECLARATION FROM THE EDITOR

DINSHAH P. GHADIALI

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
