### THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

#### "COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

## NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is graft. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

## THAT IS A GOOD ANSWER By: -INDIVIDUAL EXPERIMENTERS

### DIPLOPIA, DIZZINESS REPORT BY A. F.

In April 1955, I began to see everything double. I could not see with my eyeglasses or without them. I had also Dizzy Spells. Since using the Colors, since the past six weeks, I have no trouble with the Eyes or the Dizziness anymore.

\* \* \*

### STOMACH ULCERS REPORT BY D. T.

I have the Color Projector since 1937 and used it with very beneficial results. Prior to that, I never enjoyed good health and it was after using the Color only I really began to live. For years, I was under the care of numerous Doctors for Stomach Ulcers, who tried various diets and medications, but, I received no relief. After using the Projector, the Stomach Disorders disappeared and now I enjoy my food, also am in the best of health.

\* \* \*

### FEVER, COLD REPORT BY C. G.

In December of 1943, I came home from work, having a Fever of 103½ Degrees. After tonating with the Blue Wave for one hour, my Fever returned to normal and the accompanying Cold was normalated by the tonating with the Color Waves of Orange, Turquoise and Magenta.

\* \* \*

### CANCEROUS DISORDER REPORT BY L. W.

Since June 1944, I have the Color Projector in my home, for my personal use and for the healing of a Cancerous Disorder of my husband. I can state that it improved my health wonderfully and brought my husband's condition under control. I am very thankful to have the Projector and do not want to miss it anymore.

## OUR STUDIO ACTIVITIES EXPERIMENTER FINDINGS AND QUERIES

### MEETINGS OF THURSDAY, JULY 7, 1955

#### First Allentown Pennsylvania Studio

The new Chairman was installed by the Vice-Chairman.

N. S. — My daughter had Cold in Areas 3, 4, 5. Loosened it with three Lemon Local on 3, 4, 5 and Lemon Systemic Front and Back. Used several Orange on 17, Magenta on 4, Yellow on 6, 7, 8, 9, 10. After it seemed settled, used Magenta on 18 and Yellow Systemic.

C. K. — I had a bad Fall. Twisted Areas 7 and 18. Used Orange Local; Turquoise Local; Lemon Systemic; Magenta on 4 and 18; Orange on Bruised Knees. Terrific Pain in Areas 7 and 18 after the Orange. I was afraid of Shock to the system, but, the Systemic and Circulation Waves helped. I was not quite sure of the Waves I used if they were correct, so, I called M. B. and she said what to do. It helped me quickly.

B. W. — I read that Dinshah says not to take Tonations unless necessary.

C. K. — But, I did need the Light.

J. F. — I was soaking wet. Took Turquoise Systemic, so I did not become sick.

E. M. — I could not eat; had no appetite. Used Yellow on 6, 7, 8, 9, 10 and Orange; Magenta on 18.

B. W. — My Eyes itched. Used Green Systemic, Blue Local, but, did not help.

C. K. — Try Magenta on 18; the trouble may be in the Kidneys. I always use Blue on 1, 2, 3, for Headache.

B. W. — I took my little girl to the Optometrist, as suggested in the July Visible Spectrum Researcher; then sent the report to the Institute. I told the Doctor I was going to use the Light for a while and he said that Red was wonderful for the Eyes. He wanted me to give the name of the person to whom I wrote, but, I did not. Until I hear from the Institute, I am using Green Systemic.

E. M. — I am experimenting on a Cyst on my Ankle; am using Yellow Systemic and Red Local.

R. B. — I guess being a new person coming to the Studio, you people must be wondering what my case is. Well, in 1953 Christmas Eve, my Nerves became very bad. They had been in bad shape for some time. Things were going roughly with me; I was degraded in my work; I shook like a leaf. The Doctor said it was all in my mind; kept me doped. I became tired of it. Then, E. M. jr. recommended me to the Light. F. W. put me on Yellow on 6, 7, 8, 9, 10, Magenta on 4. In about two weeks, I passed Worms. Then, F. W. left and I did not know about M. B. so I went to an Osteopath for my Back and a Doctor for bad Cold. He talked me into Penicillin Shots. I became so sick, lost a whole week's work. Then, I was told about M. B. and went to her. I also stopped Smoking. Used Turquoise on Areas 1, 2, 3, Lemon on 3, 4, 5, Magenta on 4 and 18, Orange on 17, Red on 7. Black stuff came out of my Lungs. It is wonderful the way it works.

N. S. — Why did you not experiment with the Light yourself or get help, before you went to the Doctor?

R. B. — I do not know why!

(Discussion started on Cigarette Smoking and several Members expressed their views about how their health improved since they stopped the habit.)

Study the Family Health Protector, our Instruction Book for the Color Projector and the three volume set Text Books properly and use the knowledge imparted therein and you will all have a healthy, happy life. The daughter of B. W. will improve by following the directions given in the Chart. Most Members do not pay enough attention to the Rational Food Of Man System. I sent to B. W.'s Optometrist a copy of the Family Health Protector. R. B. never sent for Personal Research Information to the Institute. Perhaps what is given FREE may not be so much appreciated!!!

\* \* \*

### First Cleveland Ohio Studio

A. M. — What Color will you use for a Stroke?

Members — One should tonate with Violet first, followed by Yellow.

E. R. — Tonate with Red on Area 7 for Anemia.

A. M. — I tonate with Green and feel very refreshed after working outdoors in the heat all day.

L. F. — I tonate with Violet and Magenta and feel very well with these Colors. The other day, I passed a small Kidney Stone.

A. M. — I suggest you tonate with Systemic Lemon, starting before any serious condition arises.

L. F. — What Color should be used for a Mental Case?  
(Members expressed different opinions.)

Impress upon all Members the need of considering together all factors involved in the creation of Health or Disorder, as marked clearly on our Personal Research Information Chart. Merely naming one or two Signals will not enhance their true knowledge of our Science. Each Member should study thoroughly our Family Health Protector at least.

\* \* \*

### First Detroit Michigan Studio

C. R. — I want to draw your special attention regarding the new rule for the purchase of a Color Projector by a new person. The said person will have to sign not only the Order Blank with a Member in good standing as the Introducer, but, to meet with the Post Office Regulations must fill a

Request For Membership and also submit a complete Personal Research Information Chart, so the Institute may determine from it whether the said case is amenable to our Science. The Institute has only a few Black Steel Color Projectors in Detroit Area available; all other Orders will be filled with the Standard Blue Aluminum Color Projectors.

C. K. — Can Varicose Veins be helped with Indigo and how is the Color used?

C. R. — C. K. is a new Member; I shall introduce her to you. Indigo may be used on the Veins.

Member — My little boy has something on the back of his Neck and I like to know what Light to use. I used Indigo, Green and Yellow. The Lump is inside of his Neck and when touched seems small, but, if felt around feels big.

C. R. — Most of such Lumps are Cysts.

Member — What should I use?

A. G. — Do not worry about it.

C. R. — I think it can be normalated. Being a chronic condition, Lemon is indicated.

A. G. — If you have been using Green one day and Lemon the next, it is not right.

C. R. — I should say he should use Lemon three months. Do not squeeze the Lump or bruise it; it takes time.

Member — I use the Light on my Heart and Kidneys two or three times a week. Used Blue on my daughter for Sunburn; next day, gave her Turquoise and everything was all right.

A. G. — I have no report to make.

W. K. — We used the Light on the baby last week, because of a bad Cough. Started giving three Green, then, Orange. Coming along pretty well, though she still coughs a little.

J. J. — It is pretty warm to use the Light. I gave my daughter one Tonation of Blue for Sunburn. The Skin was badly burnt, but, it does not hurt any more. Did not realize she was so burnt.

Member — My boy had a Rash on his Neck. Was not sure what it was. I gave him Yellow and he broke out with little Pimples. Shall I continue?

C. R. — It might be Heat Rash. Use Orange and make it weep, then, after awhile, use Turquoise. If Heat Rash, would indicate more cleaning of the Blood. About three weeks ago, I got a Pain in my Side that came and went. I took Turquoise, thinking I might have a little touch of Hernia. The more I took the Turquoise, the worse it became. We were out driving and when we came to Bad Axe, I had to stop. I could not drive more, as I was sore on both Sides. When we came home, I took another Turquoise, but, it seemed to feel worse. Took the Kardoscil and Spirosil and thought I might

have a little Gas or it might be the Appendix. Went to Yellow and from that time on the Pain gradually went away. The Yellow seemed to do the work, with of course the Magenta. Once in a while, when I turn just right, I get a little Ache or Pain, but, will stay with the Yellow for some time. It might be Chronic Appendicitis, but, whatever it is, it is disappearing.

A. G. — If you did not have your Light, you would not have your Appendix!

Member — If a girl's Leg were cut twice for Cancer, what would you think should have been done?

C. R. — If you have a Light and use it properly, you will never be faced with that problem.

Member — If it be advanced, then?

C. R. — Purple for the Pain and Indigo Local. As long as there is life, there is hope, unless the Ratio becomes two to one. Perhaps Dinshah will suggest what should be done.

R. S. — I shall now read the chapter on Worms and Parasites, which will conclude our study of the Yellow Wave.

(Discussion followed and the chapter on the Pituitary Gland was partly read. Then, A. G. illustrated on the blackboard the Peristaltic Motion of the Colonic Tract, showing how superior our work with the Yellow is to the action of Medicine. He then commented on the Appendix, the Members being highly pleased with his explanatory remarks.)

The Purchase Rules were as it were forced to be established, because, some unscrupulous buyers used the Color Projector for benefit, then pretended they were not normalated and were compelled to go to Doctors, demanding money back. We openly stated time after time, that we give no Warranty or Guaranty and incur no Liability of any kind, the Experimenter Purchaser shoulders the SOLE RESPONSIBILITY. Our Institute is solely for the object of RESEARCH, the other purposes being incidental to that object. Teach all Members to use our Area Terminology and discard all differentiating names. Follow our Text Books. Also, when a Member speaks, let him or her say first their own first and last name, so the Reporter may identify. That way confusion is avoided in the Report. As regards Cancer, there are numerous Medical Clinics and all use Internal Remedies of various kinds. We do not go after that. You will find what I did about the normalation of Cancer, by referring to page 2694, in the August 1939 monthly publication of the prior Institute. All I can say to all in short form is that if the World would live on the Rational Food Of Man

System, the dreadful Disorder called Cancer will not be in existence. Vegetarian Animals do not have such Disorder, until Medical Experimenters introduce into their clean bodies filthy concoctions of Vaccines and Serums.

\* \* \*

**First Merrill Wisconsin Studio**

I. K. — I had a Cold. Used Turquoise and it did wonders. The next day, I used Yellow and the third day I was entirely well. (She is a woman in her eighties and was highly enthused about the wonders of her experiments.) My Nose had been running just like water running out of a faucet! That was really wonderful!

E. M. — My grandson living with me suffered from an Ingrown Toenail. Turquoise took away the Inflammation, in just 4 or 5 Experiments.

W. B. — Did you all read the By-Laws? I suggest that everyone should familiarize themselves with the By-Laws. We should like to know how those Affiliates who were not in our Organization for the past year or more may be reinstated. Is there a special Form for them?

Member — What should be used for an Abscessed Tooth?

W. B. — Lemon would be advisable. One of our local school teachers from Iowa stated that they used poison for the Corn Borer on the corn and the birds are dying from the poison, hundreds of birds thus lying everywhere on the ground.

(Because of the intensely hot weather, the Meeting was smaller than usual.)

I. K. deserves much credit for her faith and persistence. Your Editor is nearly her age, but, is as ever on the job. Age means nothing. Preserve your youth and you will never be old. The By-Laws should be studied for due comprehension and should be implicitly followed by all concerned. We have the same Form standardized for New, Old or Continuation Membership. A number was mailed to your Chairman. The Agriculture of America is in bad condition, for solely one reason — Hunting Of Birds. The Bugs and Insects which are dangerous to the proper growth of Agriculture, are the natural food of those birds and when those birds are shot down and destroyed by the Hunters, the poison is sprayed on the Agriculture to kill the Bugs and Insects. Then, the real final victim is the one who eats that Agriculture and becomes poisoned oneself. **STOP HUNTING BY STRONG LEGISLATION, MORE STRONGLY ENFORCED.** Nature will do the rest.

\* \* \*

### First Milwaukee Wisconsin Studio

K. B. — Last time I explained about "The Theory Of Light." I shall try to explain what Color can do.

(He drew a diagram on the blackboard, showing all the Colors we use in our Science and listed all the Elements found in our Body as well as in what Colors they are found in the Spectrum. Reading Chapter 33 on "Attuned Color Waves," from Volume 1, of our Text Books Set, he showed a book printed in Germany about 100 years ago, "Boscoe Spectral Analyse," describing the Colors of the Spectrum.)

K. B. — Any case reports?

F. K. — Before we go into case reports, I wish to read a letter received from our Institute President:— "I thank you for the letter of the 19th current, explaining how non-members attended certain Meetings. As the new By-Laws are now in full force, **none can enter a Studio Meeting without the Membership Card, duly signed and even then must register on the Attendance Sheet.** While I commend you, I must say that I regret such incidents. Those are the matters I have to watch very strictly, to avoid Law-Suits. Please inform **all the Officers and Members** that until a duly signed Membership Card is presented, no admission should be given to any person. Graduates can sign up the Student Forms for their Tonation, but, that does **not qualify them for admission to our Meetings**, until the Principal Office issues the Membership Cards. I am NOT looking for quantity; I want quality. Now, because of certain other incidents, because of the requirements of the Post Office Department, with each Membership Request and Order Blank for Projector, there must be a Complete Chart, to show me to what use the Projector will be put, so, I may determine whether that case is amenable to our Science. There are NO EXCEPTIONS. Please, give the herein information to all at the next Meeting."

(All expressed willingness to cooperate about the non-admission of non-affiliates, so as to have no repetition of such incidents. Many Members said they were not even aware anything like that did happen.)

A. E. — We have been Members many years and even we would not be admitted without our Cards. I do not understand how anybody could get in.

(F. K. explained how it happened in a prior Meeting, by permitting persons who were going to affiliate.)

F. K. — K. B. showed on the blackboard Colors and the like and stated that coloring is permitted in certain foods, although it is dangerous. A friend of mine sent me a paper from Florida, which stated that "Oranges are being colored with Arsenic." The Law found that the man's arrest was unconstitutional.

K. B. — Stick to the Rational Food Of Man.

F. K. — The best way is to buy Dinshah's Cook Book and follow it.

L. K. — At a certain time of the year, we can buy Oranges from Florida, that are not colored. The Pineapple, Cocomnut, Banana, Millet, Sesame Seed and the Sunflower Seed are not sprayed. I have a book "How To Live In A Poisoned World."

K. B. — How much Gas is consumed by the Banana, I do not know.

A. E. — How do we know when Food has been poisoned?

Member — Fruit is marked "Colored."

E. G. — We had our grandchild with us; he was too much in the Sun. His Head and Arms were hot. He had Sunstroke. I put him under the Blue Light and with the one Tonation he was all right.

K. B. — Use Ultra Colors for such and Magenta. In most cases we get, people have suffered for many years and then expect to be helped with one Tonation.

R. S. — K. B., will you please give us a demonstration about Poison Ivy?

F. K. — In the case of the boy with the Sunstroke, it would be a good idea to go to the Turquoise.

E. B. — When K. worked in the field, he had Poison Ivy. Where he worked, they had Insurance; they wanted him to sign and to have 11 Shots, but, he refused. He took Tonations and was all right.

R. S. — If you pet a Dog and he were near Poison Ivy, you can get it.

K. B. — When one perspires, it is easy to get it.

L. K. — I have a mother 80 years old. She has trouble with Bloating. I called E. B. and she told me to give her the Orange after eating and it helped. She is all right. I have to tonate her right after she eats. I always said: "She could digest anything, even better than I!"

H. S. — Our uncle is 87 years and he looks better every morning.

L. K. — How much effect does Butter have on Vegetables? They say, if you drink a Highball, you should eat Butter before you drink it and it will not affect you.

K. B. — If you use Butter in moderation, it will be better. Use all Food in moderation. Better to be on the lean side. Sometimes, it is good to use Yellow in the middle of the Back. We can never lay down a precise rule, if we do not have a complete Chart. The Bible says: "Who does not work, should not eat." I took a number of beatings in the past 20 years. Do you know that the Germans drink less Beer than any nation? How much Wine do the French soldiers get? One Quart. Why be hypocrites? First, they do not permit a toy soldier. We can never get a Rose, if we plant a Potato. Did you ever see a Robin marry a sparrow? Does a Crow mate with a Pigeon? Did you see a Horse mate with an Ass? If we do that, we get a Mule. Does a Mule breed an offspring? No. All these Food and Drink matters are political. Inquire for yourself which Churchmen are the Stockholders of Breweries.

E. E. — As long as you talk about Beer, let me tell you that I am a Brew Master. You have a Brewery here and the Chemist wanted to put in a substance like Yeast; they wanted to put in Bromide, as they put in C.-C. Do you know there are Chemists in the United States today, who can make anything out of the people they want to make?

K. B. — Everybody wants to do everything for the kiddies; now, what do we have? Munich had the best drinking water; now, they are requested to put something in the water.

H. S. — The Alderman told the people in a certain section of the city of Milwaukee, which was annexed recently, that has wells, that they do not have to close them; if we are hit by an Atom Bomb, then, we shall have some good water!

Yes, several non-member names were found by me, signed on the Attendance Sheets. F. K. is one of the three Trustees of the Institute and I drew his attention to the discrepancy to receive the proper explanation, as I always found him very loyal and faithful in the performance of his official duties, for the welfare of the Organization. Such an incident is a Serious Violation and the Studio Commission will be held responsible for it. Please, therefore, oblige me by adhering strictly to our By-Laws. By the first line of our New Jersey State Charter, we are a strictly FRATERNAL Corporation, whose doors are open SOLELY to the Members. I thank you all for your promise of due co:operation. Buy NO Colored or Sprayed Food, knowingly. Follow our Rational Food Of Man System. E. B.'s son K. deserves credit for adhering to principles and refusing those Shots. He has gumption and was a Champion of the prior Institute, for such character. A Highball is a drink made with Whiskey, which is an Intoxicant liquor containing 37 to 47½ per cent. of Alcohol. It has no business in our Science, all Intoxicating Liquors being foreign to us. The Bible says **many** wise rules, but, who follows? Study the "Gems In The Bible" by Dinshah, in 5 small Volumes, price \$4.00 for the Set. The highest religious dignitaries of the Church, you will find violating the "Gems" at every step in life. K. B. was right in speaking about "hypocrites." The World is full of them. E. E. gave you something about which to think. H. S. wisely alluded to the Atom Bomb. When the time is ripe, all that is needed to destroy America, is to blow off just Milwaukee, Detroit, St. Louis, Philadelphia and New York and our enemies would have accomplished their nefarious aims! While we are blabbing in Geneva, Switzerland, they are going over the ground here! American Politics? Pooh!

### First New York New York Studio

R. D. — G. Z. suggested about changing the Light Bulb in our Color Projector and instead of throwing the Light up, focus it toward the Reflector. I know what Dinshah will say: "Who is going to do it? I am all alone."

G. Z. — There is not much to do; just change the Light Socket. A 150 Watt Spot Light Bulb will give as much Light as the 1,000 Watt Bulb.

E. H. — I hurt my Thumb at work. I had to go to the Compensation Doctor. After a few days, I used the Light.

R. D. — When you have something like that, use the Light right away. Tonate with Lemon and Green. I had an Ingrown Toenail; Orange and Yellow took out the Pus.

A. H. — I had a piece of a crocheting Needle in my Finger. I had the Finger X-Rayed, but, the Doctor could not find anything.

F. P. — I called Dinshah about my wife's Knees. He said her trouble was due to Chronic Constipation. She is to tonate with Yellow twice a day. I should like to know what is Sea Salt?

R. D. — You get that in a Health Food store.

F. P. — Where I work, there is cement flooring. I bought Shoes with Neolite Soles. Lately, my Feet burn me. I wonder if those Soles are harmful.

R. D. — If those Soles do not let the Air go through, they might be harmful.

M. R. — What are Shingles? I work for a Doctor; he has them.

R. D. — Shingles are an Inflammation of the Posterior Nerve Roots. My mother suffered from it; she took Lemon for a long time; it took over 6 months to clear it completely.

G. R. — I had it all around my Waist; it cleared in 4 weeks.

O. D. — My husband has trouble with his Eyes; there is an Inflammation.

R. D. — Tonate with Turquoise. Does he live upto the Rational Food Of Man?

O. D. — Most of the time.

R. D. — Dinshah told me: "Supposing one only eats Meat once, that ruins three years of work our System has done."

G. d'A. — A friend of mine had Heart Disorder. The Doctor told him to quit Smoking. He did it for six months; then, he started again. Three days later, he was dead.

F. P. — What does Dinshah think of Potatoes? I put through a Fruit Juicer; the bulk I do not eat. I eat all my Vegetables that way. If you cook the Vegetables, you kill the best of it.

R. D. — The way we cook our food, we use very little water; nothing is wasted.

F. P. — Does Dinshah recommend Aluminum Pots?

R. D. — He is not against it. What I like to point out to you, as you eat all your food raw, is that you need some cooked whole Grain, such as Brown Rice and Yellow Split Peas. Outside of that, I see nothing wrong the way you eat.

F. P. — We eat Rice and Legumes once in a while. Lentils and Peas give me gas.

A. M. — I do not think Dinshah is against raw food.

F. P. — We do not use any Sugar of any kind; we get our sweet out of Raisins and Dates.

M. K. — My husband had a nasty cut on his Finger. Indigo healed it in no time.

R. D. — One has to be careful that the wound is clean, before using Indigo.

M. K. — The Dentist told me to rinse my Mouth with Epsom Salt. My Gums bleed very easily.

R. D. — Rinse with Salt and Warm Water and tonate with Orange.

H. M. — I read that Skin can be grafted from a dead body.

F. P. — My brother has Stomach Disorder; I like him to get a Color Projector, but, he does not eat the way we do.

R. D. — Wait till he is sick enough and is willing to live upto it.

(R. D. then read an article from the Theosophical Magazine wherein the writer spoke of an article in the Coronet magazine of November 1954, captioned "Penicillin Turns Killer," by Lawrence Galton. He writes about the indiscriminate use of Penicillin and that it is killing more people than curing them and that it is turning into a menace. As a result, that "Wonder Drug" is becoming a "Blunder Drug," often causing sudden, unexpected Collapse and probable Death in a few minutes.)

R. D. — I think that is a straight forward article on the harm of Penicillin.

(Owing to the excessive heat, the attendance was smaller than usual.)

G. Z. is on the wrong track. All those experiments were performed by me decades ago, before building the present models. There is a purpose in placing the Light Socket where it is. In the Projector, there is a space BEHIND that Socket, where the five slided Irradiator is intended to be inserted for charging Water. Furthermore, the Spot Light Bulb has a con-

centrated Filament and its Focus is liable in certain models to crack the main Color Slides. Let "Hands Off" be the wise policy. G. Z. stated in his Membership Continuation Request that he HAS an Irradiator; however, the Projector he has does not have any such auxiliary. F. P. is a new Member, but, has a good brain and intelligence. He sent a single Chart for his wife, followed the directions and she is in perfect condition already. She is a woman who should be enlisted as a Student Researcher and admitted to our Studio Meetings. Both will benefit thereby. She is a woman of pleasing disposition and her presence will enliven all. I have something to warn you about so-called "Health Food Stores." While I am willing to admit that all are not included in my black list, I am bound to state emphatically that the junk sold as "foods" by many of them, is totally contrary to the principles established in our Science. Here is one advertising as "Natural Sales Company" established for the sole purpose of selling what the name indicates. Among other materials, it sells "Halibut Liver Capsules, Bone Meal, Desiccated Liver" and other similar dainties, hence my warning to watch your purchases. When we are better organized, this Institute will sell even the grocery for your benefit. The medical term for Shingles is Herpes Zoster and that will respond to Tonation the same as any Acute Inflammation. Going out of line with the Rational Food Of Man and expecting recovery of health, is like eating plenty of poison and expecting no adverse effects. F. P. should leave aside his ideas of food and adhere strictly to the Rational Food Of Man. In our cooking methods, we keep all IN and nothing is thrown down the drain after cooking. Aluminum pots are harmless, unless you cook acids in them that would dissolve the metal. There is about 15 grains of Aluminum in the chemistry of an average Human Being. The reason people get "gas" by eating Lentils, Peas and the like is that they do not chew properly and eat very fast. The Stomach has no Teeth, so the undigested material potentially ferments, evolving foul gases. Epsom Salt is Magnesium Sulphate. Just use common Table Salt; we need no medicine Cabinets. If one will not follow our Food and other principles do not send for our Color Projector. We prefer quality to quantity in our Membership. Whether Penicillin itself is dangerous more than any other Medicine or Drug, I can not emphasize, but, I have acknowledgements of reputable Physicians, that in certain cases, that so-called "Wonder Drug" has definitely toxic effects. It is the **uncertain** effects of Chemicals, Drugs and Medicines on different Human Organisms that prodded me into throwing the entire mess into the discard pile, which finally resulted in my present Science of the Visible Spectrum. May it serve you!

\* \* \*

Until the time of going to the press, the Report of the First St. Louis Missouri Studio was not received.

## DINSHAH ADDRESSED KIWANIS CLUB

On Thursday, July 14, 1955, Dinshah addressed by invitation the members of the Kiwanis Club of Swedesboro, New Jersey, as the guest speaker, on "The Powers And Effects Of Light And Color On Living Organisms." The meeting was well attended and the discourse was listened to with obvious interest.

\* \* \*

## URGENT REQUEST TO MEMBERS

While we have no doubt our Members have real interest in our work and do appreciate our endeavors for the betterment of the Organization, there is one point where they are found lax or careless in their attitude. That point is change of address. They move away from their permanent location without intimating us and the letters, magazines and the like are returned to us. While the letters under First Class Mail regulations, may be directed to their new address by their Post Office, the magazines under Second Class Rules are returned to us and we have to bear the postage charges. Then again, in many cases, no forwarding directions for the changed address being marked on the envelope, we have to withhold sending all mail to the Member involved. Then, complaints pour in kicking us about negligence! Without patting our back we may state that we are not at fault and are very careful as well as punctual in the discharge of our official duties. Please, therefore, if you change your location or go on vacation locking your home, inform us, so we may retain the back numbers for you. You are entitled to them. The above remarks apply to Special Delivery also; there is none here. There is no Rural Delivery here.

## DINSHAH IMPARTIAL

(The Universe Through The Eyes Of Dinshah)

LABOR PRESS AND THE A. M. A.

In Milwaukee, Wisconsin, there is printed "The Milwaukee Labor Press," a weekly newspaper, under the auspices of the American Federation Of Labor, which is strongly antagonistic to the policies of the American Medical Association. It printed recently 25 articles in various issues and compiled them into a separate booklet entitled "The Decline Of The Medical Profession In Public Esteem," a copy of which one of our Members sent me for review. Here are its contents:— "Introduction. What is the AMA? Sources of AMA Power. How the AMA Has Taken Over the Political Authority of the State. Political Lobbying of the AMA. AMA Control of Medical Schools. AMA Attitude Toward Foreign-Trained Doctors. AMA Opposition to Medical Centers. The Shortage of Doctors and the AMA. AMA Policy on Medical School Enrollment. Medical School Statistics. AMA Attitude Toward Health Plans. AMA Opposition to Health Insurance Plan

of N. Y. AMA Opposition to Public Health Programs. AMA Opposition to National Health Insurance. Fee-splitting and Kick-backs. Fake Operations and Ghost Surgery. The "Shot" and X-ray Rackets. Malpractice and Night Calls. Summary and Conclusion." As our views in these regards are well known to our Members, we do not have to expatiate further than stating that it would be worth while getting a copy of the booklet from the Labor Press, 536 Juneau Avenue, Milwaukee, Wisconsin and spending a day studying it. The price is 50 cents.

### HONEY — THE FILTH OF THE BEE

New Members, not being aware of my habit of styling a Spade a Spade, fall into the belief that many of my utterances are just personal views unsupported by other evidence. They can not comprehend what advantage would it gain to me, by antagonizing those who desire to join their force with my efforts for human service. I always stated openly about Honey that it is the Vomit Of The Bee. Here is from Animal Biology, a volume sold by the well-known firm of Harper Brothers, written by Michael G. Guyer. I quote a few paragraphs:— "The nectar of Flowers is sucked up by the workers and swallowed into the crop (Bee Stomach), where it becomes honey by undergoing certain chemical changes, the exact nature of which is unknown . . . The honey remains in the crop until the bee returns to the hive, when it is regurgitated into the cells. It still contains too much water, so the cells are left uncapped until the currents of air in the hive evaporate the excess. A minute drop of poison which helps to preserve the honey is added by means of the sting." Yet, with all this, a man calls his darling "Honey" and she gloats with affection at the title! The great danger in the use of the Honey is, that being gathered from different flowers, we know not what chemical characteristics a particular brand might have on our own chemical build. That is why I discarded Honey from our Science.

### MEDICAL KNOWLEDGE LIMIT

Writing in his customary column in the New York Journal-American, of Saturday, July 16, 1955, under the caption "If You Fear Appendicitis, Don't Take Any Chances," Herman N. Bundesen, M. D., a Health Officer himself, among other views writes:— "The Appendix is a small tube-like structure about three to five inches long attached to the beginning of the large intestine. As far as we know, the appendix is **useless.**" Clip this please and mail this view to the Grand Architect Of The Universe and save Him some labor in the manufacture of human beings! They say the same way about the Thymus:— "Exact function has never been determined . . . it may be removed without causing any special change in body functions." What a creative waste!!!

\* \* \*

### ASININE ADVICE

There are times when advice given by practitioners of other Healing Systems to the public may be ignored as being their viewpoint, but, here are two recent examples I can not gulp, because, their stupidity is choking in the extreme. The first is from a local daily of the fifth of July, 1955, captioned "For Better Health." Says the learned one: "In general, excessive coffee drinking is not harmful to healthy people — even 20 to 30 cups a day. The stimulant in coffee is Caffeine. An excessive amount of it may produce nervousness, tremor, insomnia; headache and rapid pulse. In healthy people these effects disappear promptly when drinking coffee is stopped . . . Another effect . . . is excessive urination. There is no evidence that this is harmful in itself." The second splash of wisdom was printed in the New York Journal-American, of July 6, 1955, captioned "Alcohol Has Its Merits." Says that learned one: "A moderate amount of alcohol is an excellent drink for elderly persons. If you are in good health, it does no harm and it generally stimulates you and gives you a feeling of well-being." Both those writers are Medical Doctors; the latter also is a Health Officer of a big city.

\* \* \*

### FLUORIDATION AND MASS MEDICATION

The United States Supreme Court dismissed the Appeal of de Aryan vs. Butler as in the case of Kraus in Cleveland, Ohio and McFarland in Baltimore, Maryland, where the Petitioners argued that the introduction of Fluoride Salts in drinking water was like compelling one to take Medicine against one's will. The ruling given is:— "The right of an individual to treat one's own health, must yield to the common good, where a State enacts a public health measure necessary for the promotion of the health of a substantial segment of its population." Well, such is American "Liberty." What next?

---

### PROGRAM OF OUR SECOND ANNUAL CONVENTION

Our Second Annual Convention will open in the Guild Hall, The New Republican Hotel, Corner of North Third and West Kilbourn, MILWAUKEE 3, WISCONSIN, on Saturday, September 10, 1955, at 2 P. M., continuing the next two days.

#### Registration And Admission

All Student Researchers, Experimenter Researchers and Graduate Researchers in good standing for the year 1955, are eligible for admission, by presentation of their Membership Card (which must have the handwritten signature of the Member) and signing in own hand-writing in ink the Attendance Record, at Each Session of the Convention. Visitors will not

be admitted and no Requests for joining as new Members will be entertained during the Convention. Delegates of Studios must present their Credentials to gain recognition.

### Convention Sessions

Saturday, September 10, 1955, Afternoon Session, 2 P. M. to 5 P. M.

Address by our President Dinshah P. Ghadiali, on

“Our Services To Humanity.”

Comments and Suggestions from the Members.

Evening Session, 8 P. M. to 10 P. M.

“The Visible Spectrum;” topic to be voted by the Members. Discussion.

Sunday, September 11, 1955, Afternoon Session, 2 P. M. to 5 P. M.

“The Visible Spectrum;” topic to be voted by the Members. Discussion.

Evening Session, 8 P. M. to 10 P. M.

Case Reports by the Members. Discussion.

Monday, September 12, 1955, Afternoon Session, 2 P. M. to 5 P. M.

“The Visible Spectrum;” topic to be voted by the Members. Discussion.

Evening Session, 8 P. M. to 10 P. M.

Case Reports by the Members. Discussion.

### Findings Of Experimenters

Those who received benefit from Irradiation by any of our Visible Spectrum Light and Color Projectors, are requested to write a short article duly signed about their cases and hand them to the Secretary at her desk. At an appropriate occasion, they will be read before the Convention, without divulging their full identity and will be printed later in our Visible Spectrum Researcher.

### Special Notice

Positively NO WRITING OR TAKING NOTES OR PHOTOGRAMS WILL BE PERMITTED during any Convention Session and NO SMOKING. Violators will be promptly ejected.

Send no mail to the Principal Office from September 1, 1955 to September 14, 1955.

### Final Request

At all Sessions please bring for reference our Constitution and By-Laws.

OUR AIM:— Happiness In Every Home.

Either you work WITH ME

Or I work WITHOUT YOU.

DINSHAH.

### WE GET SPECTRAL SMILES

Viewpoint — I have 35 years of Conertopation.

Smile — It might well be used for musical Syncopation.

Viewpoint — I have Accute Intergestion.

Smile — Gladly mark it with an Interjection!

## OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a Membership Meeting, at 8 P. M., in each of our following Studios, for reporting the results and findings of Personal Experiences in the use of the Visible Spectrum of Light and Color:—

**First Allentown Pennsylvania Studio**—Hotel Americus, Fifth and Hamilton Streets, Allentown, Pennsylvania. Catherine Knebel, Chairman, 234 E. Hamilton St., Allentown, Pennsylvania. Pearl M. Diehl, Vice-Chairman, 642 N. West Street, Allentown, Pennsylvania. Nellie Etta Spaar, Reporter, Route 4, Box 93, Quakertown, Pennsylvania.

**First Cleveland Ohio Studio**—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Louis Friedl, Vice-Chairman, 14220 Birchwood Avenue, Cleveland 11, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

**First Detroit Michigan Studio**—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Charles J. Renn, Chairman, 24225 W. Nine Mile Road, Detroit 19, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elizabeth Roemming, Reporter, 11693 Terry Avenue, Detroit 27, Michigan.

**First Merrill Wisconsin Studio**—New Badger Hotel, 310 West Main Street, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1814 West Main Street, Merrill, Wisconsin.

**First Milwaukee Wisconsin Studio**—The New Republican Hotel, Guild Hall, corner North Third and West Kilbourn, Milwaukee 3, Wisconsin. Kurt W. Bader, Chairman, 314 E. Burleigh Street, Milwaukee 12, Wisconsin. Fredrick Kneppreth, Vice-Chairman, 1813 South 75th Street, West Allis 14, Wisconsin. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

**First New York New York Studio**—Hotel Diplomat, Governor Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Die-drichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgfield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

**First St. Louis Missouri Studio**—Albrechts Hall, 3549 Arsenal Street, St. Louis 18, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Marie J. Parison, Reporter, 7525 Comfort Avenue, Maplewood 17, Missouri.

## OPEN DECLARATION FROM THE EDITOR DINSHAH P. GHADIALI

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
