## THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

### "COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

## NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is graft. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

## THAT IS A GOOD ANSWER By:-INDIVIDUAL EXPERIMENTERS

### HEART PALPITATION REPORT BY F. H.

I am sorry to have disturbed you last night at such a late hour, but, I was very upset and did not know what to do. After talking to you and taking my Tonation, I felt much better. When I get these Palpitations, I think it must come from my Stomach, because, before I get them, my Stomach gets upset and then I always have to burp until it goes away. Thank you very much for helping me. I am sure the Projector will help me again as it has before. Thank you and God bless you.

\* \* \*

### SINUS DISORDER REPORT BY M. E. S.

I have had my Equipment over two years and during this time I have not used any Drugs or had medical care of any kind. Before I became acquainted with the Visible Spectrum, I had severe Sinus trouble, but, in the last two years, I have had only one touch, which was brought on by myself by not eating and doing the things I know I should do with my Equipment. I have maintained good health with no serious ailments and especially have not had even a very hard Cold. (Signed and Affirmed before I. E. B., Notary Public.)

\* \* \*

### KIDNEY DISORDER, COLDS, ABDOMINAL PAINS REPORT BY R. H.

My boy F. M., age 16, was very sick and he went to the Medical Doctor who said that he had Kidney trouble. He used the Doctor's medicine for about one month, but, he did not get better. I then heard about the Color Projector. I secured one and my boy F. used it for about two months and feels fine and this to our greatest surprise. My whole family used it for Colds and after one or two Tonations, we had very good results. I myself had very severe Pains in my Abdomen in the region of the Appendix. I was unable even to move my Legs; the Pains were unbearable. My husband used the Projector on me and within an hour's time, I was sound asleep and slept through until morning. My Pains left me entirely and I felt fine and did my regular housework as usually. If any person would offer me Five Thousand Dollars for my Color Equipment and I could not secure another Color Equipment, I would refuse this offer or any amount of money, because, it has given me help to maintain health and we have it in our home and it is there day and night to help us, because, we can help ourselves. Many thanks to Dinshah and his Institute.

## OUR STUDIO ACTIVITIES

### EXPERIMENTER FINDINGS AND QUERIES

#### MEETINGS OF THURSDAY, AUGUST 2, 1956

#### First Allentown Pennsylvania Studio

A letter from the Institute was read by N. S.

B. W. — My daughter came home from camp with Cold and Sore Eye like M. B. had at last Meeting. I used Turquoise on 1 and Lemon on 4 and 5. I like to know what M. B. used on her Eye.

N. S. — Your daughter may not have the same thing, but, M. B. used Turquoise without results, then went to Blue Local and Lemon Systemic.

B. W. — It itches her much and waters.

P. D. — Blue will help the Itch.

A. B. — I had Pain from Area 22 to 9. Used Lemon and Green Systemic, Orange Local.

B. W. — I discovered that Yellow from 19 to 15 gives better results for Nervousness than Yellow on 6, 7, 8, 9, 10; also have better Elimination.

E. L. — Lemon on 18 and 19 gives better results in our family for Eliminations.

C. K. — It shows that everyone is different.

\* \* \*

#### First Cleveland Ohio Studio

The Chairman read articles sent by the Institute, which appeared in the Vineland Times Journal and the Franklin Township Sentinel. They will be read again when there is a larger attendance.

J. D. — I am happy to report that I am very pleased with the results I am getting with the Tonations I am taking with the Color Projector every day.

A. M. — I had a Sore Throat and a Swollen Gland in the Neck. I tonated with Green; felt relieved from this with about 3 Tonations, but, soon after had trouble in Left Ear. I tonated again with Green Local and Scarlet Systemic; had some relief, but, still am not feeling upto par.

Al. M. — I felt weak and could not seem to get going. I tonated with Scarlet and seemed to feel stronger after four Tonations. I feel it gave me the lift I needed.

Green Local and Scarlet Systemic for A. M. does not sound logical. Was it an error of A. M. or that of the Reporter?

\* \* \*

### First Detroit Michigan Studio

G. W. — Our Chairman is not able to be here tonight to conduct the Meeting, so, I hope you will cooperate to make this Meeting an interesting one. I have a communication from the Institute, a clipping from the Frank-  
linville Township Sentinel; I shall read it to you:—

#### Malaga Resident Earns Scores of Diplomas Educating Self By Mail

“Sarosh D. Ghadiali, a former Corporal in the United States Marines, has a story that might interest any readers who feel handicapped through lack of a diploma:

“Sarosh, along with his six brothers and 1 sister was completely home trained by his parents: Colonel and Mrs. Dinshah P. Ghadiali, of Malaga, upto the time when they started working for a living. Sarosh worked for several Vineland firms, but never seemed to find a job that appealed to him. Not through lack of willingness to work, but rather that none of the jobs ever offered a challenge to his latent abilities. He started studying the American School High School courses.

“In 1952, he left his parental home, getting a job in Philadelphia as Credit Manager for the Singer Sewing Machine Company. By August 1952 he had finished  $\frac{3}{4}$  of his high school course!!

“September 1952 he enlisted in the United States Marine Corps. They listed his education as 11th grade. (He, as yet, had not completed the course, tho he HAD finished 14 units work) (16 units equal 4 high school years.)

“He finished boot-camp uneventfully, and was sent to Jacksonville, Fla. to the Naval Air Technical Training Center for Aviation Training.

“In nine months he completed three service schools while in the Jacksonville Training Command, and never failed a test while going through. He came out of this command a Naval Instructor, qualified to instruct Aviation Electricity. He transferred to Cherry Point, North Carolina where he served a year in the Overhaul and Repair Squadron. There, while servicing our Marine Corps Jets, he completed his American School Course with an 84 per cent average. He had graduated four years of work in a little over a year! On inquiry his education officer told him there was no way he could get a diploma since he never attended formal school!!

“He heard about the United States Armed Forces Institute (USAFI) ‘General Education Development’ Tests, took and passed them with a 75 per cent, average (top 25% of the whole U. S.) and obtained a Florida equivalency diploma. (This is not, however, recognized in the state of New Jersey, for college entrance, which he was after.) So he started taking tests on specific subjects through USAFI for receiving credit from his home state, New Jersey. He also found that they offered a wide variety of Correspondence Courses; this appealed to his growing thirst for knowledge. He enrolled in one course, then another; it became such an intense desire to

study, that upon his discharge he was enrolled in 16 courses at the same time, and was completing them at the rate of about 12-15 a month.

“He was transferred into the Education Office of the base, and while there, he perfected methods to obtain diplomas from states like New Jersey, which are normally almost impossible otherwise, except by taking batteries of tests.

“In 1955, he was granted a high school equivalency certificate from the State of Pennsylvania and later from the State of New Jersey. Each certificate being academically ‘higher in value for college entrance.’

“In nine months he completed a complete Radio-T-V course, graduating in the top 10 per cent of his class with a 94.2 per cent average throughout.

“While in service he completed approximately 100 courses ranging from college Electricity and Physics to College English and Literature. He has studied every phase of science, proficiently enough to be an instructor, if he so wished.

“He completed numerous Naval Correspondence Center Courses, ranging from Boatsman’s Mate I to Aviation Electricity.

“Through the Marine Corps Extension Schools of Quantico, Virginia, he has studied courses from the Private level all the way upto the course he is currently studying, ‘Officer’s Extension Course.’ (Lieutenant level.)

“All of this was done on off-duty hours late evenings and weekends. It just goes to show what one can do towards receiving an education if he really wants to. If he’s willing to ‘give it a try.’

“What is Sarosh doing now? He’s happily married to the former Martha Jane Meyers of Jacksonville, Florida, and they have two lovely daughters.

“Just last week he received his Bachelor of Science Degree in Business Administration from Cramwell Institute of Adams, Massachusetts.

“He is currently employed as Credit Manager by the Millville Ready-Transit Mix Concrete Co., Inc., a division of the Vineland Transit Mix Concrete Co., Inc., of Vineland, New Jersey.”

P. S. — I have an Ailment and am taking a series of Tonations under the guidance of Graduate Researcher C. R. So far, I have taken Tonations of Orange Systemic and Magenta on 4 and after 3 weeks of Tonations feel much better.

G. W. — That is good; just stick faithfully to your Tonations.

F. W. — Three weeks ago, I had an Accident at the shop. I hurt my side, which became badly swollen and a Testicle was badly bruised and hurt so terribly that the shop Doctor could not even touch it. I went home and took a Tonation of Indigo and later Turquoise. That took the Pain away. My Ratio was 81-17. Next, I took Magenta; that brought the Ratio to 73-19. Then, I took Orange, but, did not feel so well; after that, took Tonations of Turquoise and later, switched to Lemon. My Ratio is now 76-17. I feel well

and never missed a day in work, but, the Testicle is enlarged to about 5 times the normal size. The shop Doctor says it is fluid which causes the enlargement and if it does not shrink, it will have to be drained, either by needle or surgery. Of course, I do not like this idea of surgery and was wondering if you could give me some advice on what Color to use to shrink it.

G. W. — I think Orange would be the best Color; it would aid the Circulation. I recommend you contact the Institute and ask for advice. Does anyone else want to comment on this?

E. R. — Well, folks, since we have no Chairman or Graduate Researcher with us tonight, this will give us a chance to think for ourselves and everybody can give his ideas and experiences. I would recommend Orange in this case.

J. J. — I should recommend Green.

(Other Members suggested Lemon, but, most of them agreed on Orange.

E. R. — Lemon would be good too, since this Disorder is Chronic now. It is a marvelous Cleanser, but, Orange would aid the Circulation. We all overlooked something; I wonder if anybody knows what it is.

Member — Elimination.

E. R. — Yes; how is your Front and Back Elimination?

F. W. — My Elimination is normal, about twice a day Back and 6 or 7 Front. There is no discomfort or Pain with the Frontelim; I feel well, but, am just worried about the enlargement of the Testicle.

C. O. — A month ago, I dropped a heavy object on my Toe. There was much Swelling and it was very painful. I took Orange and it hurt even more, but, I stuck to it. The next day, I tonated with Orange again; it still was quite painful. After taking Orange the third day, it was all right. The Toenail is coming off now, but, it looks good.

E. B. — I hurt my Toe very badly on the sidewalk. I soaked it with Epsom Salt in warm water and tonated with Green, but, it was still painful. The next day, I took another Tonation of Green and after that, the Toe felt better.

A. N. — About 3 weeks ago, my 3 year old boy was playing in the sandbox with other children. They were throwing sand at each other and my boy got it in his Eyes. Of course he had rubbed them and they looked all red and swollen. I washed out the sand as well as I could and tonated with Turquoise, but, it pained so badly, we had to tie him to his bed to give the Tonation. After 20 minutes he fell asleep. Later, we tonated with Orange, Magenta and Lemon. His Ratio was 120-30. He is well now, but, his Eyes are still Bloodshot. I was wondering whether I should keep him on Turquoise.

F. W. — I suggest Green. I had an experience with my boy. He was hit in the Eye by a branch of a Christmas tree. His Eye was burning badly and I took him to the Doctor to find out whether anything was lodged in the

Eye. The Doctor said there was nothing in it, but, it was a deep scratch. I tonated him with Green, which really did him good and his Eye was all right in a short time. In another instance, a neighbor's child fell on cinders and scratched the Knee very badly; some little cinder particles were lodged in the Sore and they could not get them out. They tonated with Green, that took particles out and the Knee healed in a short time. I am sure in the case of your boy, Green will help. There are scratches from rubbing in the sand. Green is a Muscle and Tissue Builder.

E. R. — When I was in school, I had Ear trouble. In those days, they put bags with roasted Salt on the Ear; when it cooled, it was replaced with another bag of hot Salt. This was continued until finally the Abscess would break. I still remember; it was a terrible Smell. Now, we go to Orange, which would do the same thing, but, would be more pleasant and easier.

C. K. — I am under the guidance of the Institute and have taken Tonations for some time. I feel so much better now. A short time ago, my boy had a Cold and a badly swollen and red Eye. I tonated him with Green and Turquoise and after 3 Tonations the Eye was clear. At about the same time, my husband also had a Cold and badly swollen Eyes. He did not want to take the Tonations and it took him about a month to be rid of the Swelling.

P. S. — I am supposed to take 2 Tonations a day, but, have a hard time doing this at the prescribed time.

E. R. — You should try your best to take the Tonations on time. You can do it, you know. Dinshah says:— “Know what you want to do, set your goal and go to it.” If you make up your mind to take those Tonations, there is nothing that can stop you. This Science of the Visible Spectrum, is no hit-and-miss affair. It is a Science of Automatic Precision. By taking Tonations regularly, you establish a Rhythm; you build up slowly; when you miss, you slide back. Through the Visible Spectrum Color Projector, you have a Science in your home that is priceless. Do not you think that it is a wonderful thing, that you can normalate your Ailments in the privacy of your room and not have to trouble with Doctors, et cetera?

G. W. — In the shop, I have been in discussion about living a Vegetarian. They wanted to know what advantage there is in being Vegetarian and using the Visible Spectrum Projector. I pointed out all the advantages of feeling well by being Vegetarian and not having to spend money on Bromo-Seltzers and Alka-Seltzers and Pills for Elimination and Drugs, Shots and Doctor Bills. There surely is an advantage in eating the Rational Food Of Man and keeping the Body clean and well.

A. N. — I saved about \$2,000.00 in two years on my wife alone, by not having the Operations the Doctors advised. She had Appendicitis and Gall Bladder trouble. I corrected both the Disorders with the Visible Spectrum Projector. I had advice from Graduate Researcher C. R. For the Appendicitis, I gave Tonations every 2 hours, since it was an emergency.

E. R. — There is a tremendous amount of money spent for Medica-

tion. Recently, I read an article in a magazine, about what an older couple had to live on in a year. The total amount was \$1200.00. It was itemized and for Medication and Doctor Bills, they allowed \$120.00. Just imagine 10 per cent. of the total amount for medical help!

G. N. — What Color should one use for Gall Bladder attack?

A. N. — I used Yellow and Red.

G. W. — The condition of each individual is different and not everybody can take the same Color for a certain condition. There are many factors to be considered.

I. G. — Just recently, a neighbor's baby had the Measles. What Color should I use in case my baby has it?

E. R. — If she becomes ill and you suspect the Measles, tonate with Orange and after she is broken out with the Disorder, use the Turquoise.

A. N. — Some time ago, two daughters brought home slips about getting the Salk Vaccine Shots in the school. I went down to the school and had quite an argument there. They told me I was making a big mistake in not allowing my daughters to have the Shots. This Salk Vaccine was really making history! I told them I did not want that kind of history on my children. So, they did not get the Shots.

G. W. — You did the right thing in not allowing them to give the Shots to your children.

(A general discussion then followed about Shots, Pills and Medicines and how the Medical Doctors make guinea pigs out of the trusting public. It was agreed by all that we really have something for which to be thankful in the Visible Spectrum Color Projector.)

F. W. never consulted the Institute about his case. It is however evident that the Shop Doctor was right. It is of Hydrocele, a case for Constructive Surgery, as there is fluid collected in the Sac of the Testicle, which may not be absorbed, but, can be easily tapped with a Trocar and Cannula and may not fill again if care be taken after the Tapping to inject the Sac with Iodine and Cocain. The main trouble with many of our Members is that becoming impatient they change Colors quickly, without giving consideration to the thought that Nature takes time to bring about equilibration of any disturbance. She can not be prodded. E. R. gave good understanding of our Science and G. W. conducted the Meeting very well. A. N. should not consider the idea of tonating every 2 hours as favorable. Two Tonations in a day will be found effective in any alleged emergency. It would be very advisable for all of our Experimenters to have our Three Volume Set and study the books for enlightenment on our Science; it costs only \$16.00, but,

it will be found to be an investment of a lifetime. About the Salk Vaccine read our Visible Spectrum Researcher of June 1955, page 108, under "Polio-myelitis Vanquished!!!!?" It is made from the Kidneys of Rhesus Monkeys, is nothing more than Monkeyshine and is worthy of the patronage of Human Monkeys only.

\* \* \*

### First Merrill Wisconsin Studio

The Chairman read the Notice of our Third Annual Convention and By-Law No. 43. L. A. K. was appointed as the Delegate and F. K. as the Alternate Delegate.

F. K. — My Heart does not stay in Rhythm with the Breathing. My boy breaks out with Pimples. Will Green or Lemon be good to use?

(Cocoanut Oil used in the Ears was discussed.)

A. K. — I like to know what Color can I use for a Soft Corn between the Toes?

(None answered.)

E. M. — What shall I do for Planters Warts?

(The Chairman could not answer.)

H. U. — I have Headaches; what shall I do?

W. B. — Headaches indicate there is something wrong with the system.

(Newspaper article on S. D. G. was read and the Members had some discussion on it.)

F. K. did not send any Chart for the past 2 years, for self or A. K. or their son. Soft Corns are the result of pressure on the Foot; they indicate improper shoes and will need a Chiropodist to correct them. Planters Warts are growths on the Sole of the Foot and their cause must be removed by Chiropody. Color will have no effect on such abominations produced by wrong human habits. H. U. never sent any Chart. I am unable to comprehend why these inquiring Members do not send their Charts, so they may receive the service to which they are entitled.

\* \* \*

### First Milwaukee Wisconsin Studio

The Chairman read the newspaper articles about S. D. G. and some discussion followed with applause.

K. B. — Do we have any Case Reports?

A. F. — I had a start of a Cold. I tonated with Turquoise and got rid of it. I have a dog and I tonated him before; he always got better. He likes lying under the Light. Last time, he had Ear canker; I used Green and Turquoise and he was all right. He is a Dalmatian.

K. B. — Did you take his Kardoscil and Spiroszil?

A. F. — No.

A. S. — I was not going to report about my dog, but, since someone else brought up the subject, I shall. She is a Cocker Spaniel and had intestinal Disorder. It was so bad, I took her to a Veterinarian for a Shot for Dysentery. I wanted to give away the dog, but, could not because of the sickness. I could not have her killed, so, I gave her a big meal. My daughter came home; I asked her if she wanted to keep the dog and I would give her a Tonation. I gave her Lemon for three days and then Green; she was sick for one month, but, was fine afterwards.

K. B. — This brings me to the subject about which I wanted to talk; Chapter 79, "Intricate Motion Mechanism," from the Third Volume of our Text Books Set. There are hundreds of Muscles in our Body. If you can wiggle your Toe like your Finger, your Muscles are under control. Differential Diagnosis is not necessary. Pricking with a needle to find out the reflex, is not necessary for illness. If you have one meal, you should have one Elimination. If you have three meals, you should have three Eliminations. I am just trying to prove to you, that you do not have to make Differential Diagnosis with different names of Disorders. I had a 72 year old woman constipated for 42 years. She said: "I will do anything you tell me to do; what have I to lose?" After 6 days, she had a normal movement. If the Aura is depleted, nothing will help. Suppose you eat poisoned Mushrooms. Years ago, in Spring, they gave Sulphur and Molasses. If no filth is put in, nothing has to come out. Think these matters through. Did you ever put Gasoline in the Exhaust Pipe? If everyone would only understand the functioning of the Body, that is intricate mechanism.

(Showed Intestines by diagram on blackboard and explained why not to take an Enema.)

O. L. — That is known as High Colonic.

K. B. — You can take care of it yourself. Do not use anything after you have your urge. Do not pour Gasoline in the Exhaust Pipe.

A. B. — Would you be able to explain anything about the Appendix?

K. B. — Suppose you have children; they play with animals and play in dirt. They might develop Worms in some cases. Some fluid from the Appendix goes into the Intestines, kills off the Worms and saves the child.

A. B. — Older people usually do not have Appendicitis; do they?

K. B. — No; mostly children. Enemas are not necessary. I have dealt with enough Sufferers; after the Appendix is removed, they have more trouble than they had before the Operation.

N. T. — I read that you can even take care of Tapeworms with the Light.

K. B. — What magazine would print about anyone living on the Rational Food Of Man?

A. S. — I have a book written by a man in England, Hornbook, Guys Hospital, which says: "Proper food to eat" and then tells of people who never have Colitis.

K. B. — Those are the Hunzas.

A. S. — No; I shall bring the book next time, if you like.

K. B. — There is another tribe called the Todas; they do not eat Meat. It is not etiquette to slaughter. I spoke about a woman who used correct posture and she is still I think alive and is over 80 years old.

A. S. — With Polio coming up so much among children, would Yellow be the Color to use?

K. B. — No; start them with Green and Blue. If they have high Fever, use Blue; if they have been in the Hospital for months, use Yellow. The material point is to keep the Nerves in proper condition. Usually, in hot weather they drink Cold Drinks and Coca-Cola. If you start before Paralysis, use Green 2 or 3 Tonations; then use Yellow. If the Pulse goes high, use Indigo.

A. S. — My son is 29 years old. He has a Swelling on his Knee. The Doctor wanted to open it, saying he has Housemaid's Knee. I gave him Green Systemic and Magenta on Areas 4 and 18.

K. B. — Use Orange to increase the Circulation. You are a Member; why do you not write to the Institute? There is something else behind it. I am not permitted to give anyone information if not a Member. If anyone would be listening, we might have our Meetings closed. We have no information telling us what ailments he may be had. In order to increase the Circulation, use Orange and watch his Temperature.

A. S. — I would not let him have the Doctor open it, because, what will happen if it fills up again?

K. B. — Now, you know what to do if you have too much Elimination. One woman had 12 Tonations after having 24 Eliminations in a short time. I saw many cases of Rheumatism disappear after using Yellow on Areas 6, 7, 8, 9, 10.

O. L. — And follow the Rational Food Of Man.

K. B. — By all means. I have no patience for anybody who does not follow that system. I have a letter from a woman, which says: "I am in an institute for 2 years; every year, they permit me to go home for 7 days. Will you advise me to take the Light for the 7 days and be cured?" I wrote back to her: "The only one who can help you is God." I never wrote to her anything about the Light. If she be wise, she may come to me and talk over it.

A. S. — When a person has a Slipped Disc in the Back, can it be repaired? She is in the Hospital. I wanted to recommend you to her when she comes out.

K. B. — Surely there is help. What the Sufferer needs is the will to become well and she will be well. I shall now read to you the announcement

of the coming Convention, to be held in Milwaukee. Who will be the Delegates? (Nobody responded.) If you have anyone in your family to belong, they can join as Student Researcher for only \$3.00 per year. On my vacation, I could not buy even my breakfast for \$3.00!

A. S. — You must have had Steaks for \$3.00!

K. B. — All those who have \$3.00 for their wife, husband, son or daughter, let them join for the next Meeting.

F. K. — I think it would be worth while, if we could have a Meeting where the Member could bring someone of their family or friend, so they may become interested and Dinshah could give a lecture on the "Principles Of Light And Color"; we could perhaps get more Members through it.

K. B. — Let us now go back to the Yellow Light. The other day, a man had what they call a "Rectal Operation" for Piles; he is 49 years of age. Now, he has no Erection and claims he has a cold feeling in his Legs. I had told him not to have the Operation and not to smoke. He said: "You are a terrible man!" One day, he feels a little better; they had used Radium on him. I saw such Sufferers. The last one I saw, they said he had Lung Cancer; I think he had Silica in the Lungs. They gave him X-Ray treatments and he became baked brown on his Chest. His wife came with him and wanted him to have Color Tonations, but, I refused. In 3 days, he was dead.

I. B. — I have a Case Report. My little boy had a Temperature and was restless and had Cough. I gave him Blue and then I became impatient and called E. B. She told me to use Lemon and Orange on Back and for Fever Blue. I had a Cold and I used Turquoise and I am all right.

K. B. — If he had Fever and you used Blue, after 3 days that was just the time he was coming back to normal. With Fever, you do not give Lemon. You still get results, even if you use the inappropriate Color.

A. B. — I came down with a terrible Headache and could not use the Light. The second day, I was talking to a woman where I work and she told me about a Physio-Therapist. I thought I might have twisted my Neck. Then, for 2 days, I took Turquoise and the last 15 minutes; I took out the Green and used only the Blue; tonight, I am here and feel fine.

A. S. — Is that advisable — to change Color? Does the Color go through the Hair?

K. B. — No; we do not recommend changing Colors; the Hair is a living thing.

(It was an enjoyable evening.)

When people assert that our Light works only by "Faith," ask them to what Church did the Dalmatian of A. F. go? The same question for the Cocker Spaniel of A. S. For health, follow the principle of the Gasoline Engine — one admission of Gas and Ignition, one Exhaust. It will be advisable to teach the Members the principle of the Visible Physical Vehicle and the Invisible Physical Vehicle making the Aura. We are strictly opposed to all Rectal Enemas and Colonic Irrigations. They may remove the impacted waste matter, but, will not reach the Cause that collected it. Our Yellow will reach the Cause and remedy the Disorder and the main consideration is that by following the Rational Food Of Man, there will be very little need even of the Yellow, if one chews properly and slowly. The Appendix is a valuable Organ, although our Opponents call it a "useless remnant." It has a great, natural purpose. When by improper food the intestines become clogged and Constipation sets in, to preserve health, Nature, by the process of Fermentation and Decay, generates Worms to eat and render spongy the impacted mass. When that happens a hard Backelim takes place to relieve the Sufferer and then, the Appendix which has Erectile Tissue, throws its peculiar Secretion into the track which destroys the Worms. No Enema can pass beyond the Ileo-Caecal Valve where the Appendix is situated, but our Colors reach the Cause and effectively remove the Disorder, whether Round Worms, Tape Worms or otherwise. K. B. was right; we serve solely our Members and the strange part is that none of the stated questioners sent any Charts to the Institute for Personal Research Information. Our service is free to the Members, so, why such negligence, laziness or disinclination? Choosing the Delegates is under our By-Law 43 in the jurisdiction of the Studio Commissioners, but, perhaps as all the three Officers are always present in our Conventions in Milwaukee, none was especially appointed. F. K. wrote to the Institute about his views on admitting the family members or friends of our Affiliates, but, our past bitter experiences do not justify such move at present. It will introduce too many complications to guard and I am too busy to go after single Meetings. Our Opponents use X-Rays and Radium for reasons well known to you and also because they do not realize the terrific dangers and after-effects of those Short Wave Oscillatory Frequencies.

\* \* \*

### First New York New York Studio

In the absence of the Reporter, the Report was taken by V. D. The Chairman read newspaper notices about S. D. G. and comments and congratulations followed on his wonderful achievement.

C. H. — I had low Kardoscil and Spiroscil, with persistent Pain. I passed 2 Kidney Stones the size of pebbles. Tonated all Winter on advice of the Institute; the results were excellent. Tonated with Yellow on Areas 6, 7, 8, 9, 10, Magenta on 4. Then, Orange Systemic and Magenta on Area 18; also, Lemon Systemic.

E. S. — Child of 11 years had 101 to 103 degrees Fever for 10 days. Used Blue and Lemon Back and Front with Yellow on 6, 7, 8, 9, 10. Finally, broke out with Spots. After second Tonation of Turquoise, the Spots disappeared; the Back Elimination was good.

T. S. — I have persistent Gas Attacks and Rice and Yellow Split Peas or Lentils agitate the condition more. I had Nausea and took Yellow on Areas 6, 7, 8, 9, 10, but, felt worse. I can not get my Kardoscil and Spiroscil up.

N. H. — I suggest you continue with eating Legumes, until your system becomes accustomed to the proper foods.

N. H. then gave an interesting talk on how he first became interested in the Rational Food Of Man. Dating back to the 1900s when he was a very sick man with Tuberculosis, he praised the Visible Spectrum of Light and Color and its healing powers. His remarks were most aptly put and he expressed the belief that those who practice Destructive Surgery will in time answer to the Almighty God. He then spoke of his retirement from active Surgery. He now boasts of 76 years of age and thanks Dinshah and his Visible Spectrum for his perfect health. He also stated that the Visible Spectrum saved the life of his wife.

F. C. — I feel that no attention is given by many to Kardoscil and Spiroscil, also Frontelim and Backelim in the reports given in the various Studios for our monthly magazine.

R. D. — Before discussing a case, we here always ask about them, but, in most cases, the Members very often forget the actual readings they put on their Charts sent directly to the Institute.

F. C. — I also feel that details of the Meetings are being omitted in our magazine and I like to know why?

R. D. — Dinshah is working alone and under the circumstances, the magazine is as complete as can be expected.

The case of T. S. about the Rice and Peas shows consideration to involve faulty, insufficient chewing. Rice has Starch and it must be chewed properly so as to mix with the Saliva and convert it into sugary chemistry. If this be ignored, the Stomach has no teeth and the gummy material is bound to produce the alleged "Gas Attacks." T. S. sent two Charts two years ago and in one she reported her Frontelim as 1 a day and Backelim as 8! Furthermore, when we replied, she reversed the Irradiations! Our service is free, but, when given, it should be strictly followed. All T. S. complained in those 2 Charts was her own opinion that it was Disorder of the Gall Bladder.

Let the Studio be her guide! The complaint of F. C. is totally groundless. He is one of our old time, worthy Graduate Researchers and we request him to forget those old times. We print the Reports as they are received from the Studio Reporters who are not Short Hand Court Reporters, but, are willing, volunteer workers to whom we are greatly obliged. Take for instance, this report. In the report the Acting Reporter mailed us two closely typed sheets of the history of F. C., printed in the former magazine in the years 1939 and 1940, by the then controlling Corporation, which was dissolved in 1948. F. C. expects us to print that herein! We solely edit reports as received and the facts stay as they are received. The Members should be glad to have even what is printed, as our income does not justify the existence of even this baby V. S. R.! Let each Member go out among friends and each month get a new Member and soon we shall have a larger magazine, as F. C. desires. Let him send us an affirmed Affidavit of his experience and we shall print it in That Is A Good Answer. O. K., F. C.?

\* \* \*

### First St. Louis Missouri Studio

In the absence of the Reporter, C. L. and A. B. submitted the Report.

W. B. read the newspaper clippings about S. D. G. and spoke about his remarkable knowledge and the degrees he got. It was received with much enthusiasm and congratulations. He then read from an editorial: "Color is important in your life," part of which read that: "When the walls are painted green, the color seems to pacify and demanding no emotional response, they relax muscular and nervous tension. When industrial workers have the proper colors in their surroundings, their moods are brightened, accidents are reduced and fatigue being diminished, results in increased production.

A. W. — My sister-in-law gets a Spasm between 1 and 4 A. M. and she can get no help for this.

W. B. — I advise to stick earnestly to our Rational Food System and use the Yellow Light alternating with Green faithfully. Then, next day use Orange; it should correct the condition. Occasionally, Lemon also would be good. I emphasize on Foods and Drink. The best drink is our style of Lemonade. Wash the Lemons well and prepare as directed in Dinshah Cook Book. I recall about one of our previous Meetings; a report pertaining to Stones found in the Body. One of his children had an X-Ray examination and a Kidney Stone showed lodged. From the Meeting, he learnt about the Olive Oil and Lemon Juice which was taken 3 times a day. The Stone passed unnoticed and the severe Pains which were crucial, never returned.

A. W. — I have had my Color Projector for 8 years. I always had large Tonsils, but, by using the Yellow for some time, that condition disappeared.

J. B. — I had a severe Pain in the Arm and Shoulder Muscles; I used Lemon and Turquoise; I found relief, but did not find it permanently.

W. B. — I had this and used Orange with great satisfaction. Let us eat the right Food and Drink for the best of our Body to become well and keep well.

Thank you for the Report, C. L. and A. B.; however, I request that names be given in full, because, many have similar initials. That is needed for correct identification. Lemon is a fruit of the finest excellence. Here is the Chemical Analysis of that fruit:—

Chemical	Formula	Per Cent.
Potash .....	K2 O .....	47.84
Carbonic Acid .....	C O2 .....	16.33
Citric Acid .....	H8 C6 O7 .....	10.59
Lime .....	Ca O .....	8.89
Phosphoric Acid .....	P2 O5 .....	6.74
Soda .....	Na2 O .....	3.32
Magnesia .....	Mg O .....	3.02
Ferric Phosphate .....	Fe P O4 .....	1.32
Chlorine .....	Cl .....	0.81
Silica .....	Si O2 .....	0.70
Loss .....		0.44
Total .....		100.00

This is how those Chemical Compounds break up and react in the Body:— The Potassium energizes the Heart and builds the Auric Vehicle; the Oxygen builds the Vitality; the Carbon acts as a Motor Stimulant and removes the Imbackelim; the Hydrogen activates the Sensory Nervous System; the Calcium strengthens the Lungs; the Phosphorus knits the Bones; the Sodium encourages Tissue Nutrition; the Magnesium acts as Blood Alkalizer; the Iron enriches the Hemoglobin; the Cholrine cleanses the Blood Plasma; its Silicon assists the Thyroid Gland for Deeper Respiration. What a marvel of the Almighty Creation, when in a single Fruit was placed such beneficent Chemicals acting as a Cholagogue or Bile Driver, inducing Health in every Organ, supplied by the Purified Blood!

## OUR THIRD ANNUAL CONVENTION

Milwaukee, Wisconsin.

Concise Report Of The Six Sessions Of September 1, 2, 3, 1956.

Our Third Annual Convention was held in the "A" Hall, of The Republican Hotel, corner of North Third and West Kilbourn Avenue, Milwaukee 3, Wisconsin, as duly announced in our prior issues. The First Session opened at 2 P. M., on Saturday, September 1, 1956, President Dinshah P. Ghadiali in the Chair.

Dinshah — My friends, there are many new Members present. I offer my greetings to them, as I was greeted at the Convention of the Naturopaths and Medical Doctors in Chicago, Illinois, before coming here. For information of these new Members, I shall begin with a short history of my life and how our Science of the Visible Spectrum Of Light and Color came into existence.

He then gave a summary of the various important events and how he entered into the practice of Medicine. Said he: "In India, there was no Law to regulate Medicine at that time. All one had to do was to hang a shingle with the words Dr. Killbutch, and you become a Doctor. Here, you must be licensed for it; but, what is the difference? There you slaughter **without** a License and here you perform the action **with** a License. The result on the victim is exactly the same!" (Laughter.) To prove the knowledge of our worthy opponents, just ask the following questions to any of those most learned professionals and find for yourself the Truth:—

- (a) Why does Starch become converted into Sugar in the Mouth?
- (b) What is the purpose of Hydro-Chloric Acid in the Stomach?
- (c) Why is it that people eat Honey, but, do not take Carbolic Acid (C6 H5 OH), if the Chemical Composition of both is the same?
- (d) If the Universe is composed of only 98 so-called Elements, what manufactures the trillions of Compounds and how?
- (e) Why do the Pupils of the Eyes become narrow in Light?
- (f) Why are there different Colors in a beam of White Light?
- (g) How does a Surgeon guard in his Operation from Anastomoses of the Nerves?
- (h) Why are there two Chains of the Great Sympathetic Nervous System?
- (i) How does a mass of Nervous Material called the Brain, make Thoughts, different for different individuals?
- (j) Why has the Portal Vein, between the Spleen and the Liver, no Valves like the Valves in other Veins?
- (k) The Sun is many million miles nearer the Earth in our Winter than in our Summer; why is there less Heat in the Winter?
- (l) Why is the Spleen placed on the Left of the Body and the Liver on the Right?

- (m) How does the Pill know where to go?
- (n) What is the purpose of the Appendix?
- (o) What function has the Spleen?
- (p) Does the Heart motion the Lungs or the Lungs motion the Heart and what motions either?
- (q) Why do we need two Nostrils to breathe?
- (r) Why is the Membrane of the Nostril composed of Erectile Tissue?
- (s) What makes Hunger?
- (t) What makes Thirst?
- (u) Why are the Human Blood Corpuscles round and those of Lower Animals are ovoid in shape?
- (v) Why have we two Ears?
- (w) What is there in Man that makes him "the Image of God"?
- (x) Why do the two Nostrils blow air with different pressures at different times?
- (y) Why does one generally sneeze by pulling off a Hair from a Nostril?
- (z) Through what organic structure does Light affect the Body?
- (aa) Why is it that the Hepatic Vein from the Liver, has no Valve like the Valves in other Veins?
- (bb) What is the difference between a Living Human Being and a Dead Human Being?
- (cc) Astronomers admit the influence of the Gravitational Power of the Sun and the Moon in the pulling of millions of tons of Ocean Water; on what basis is the same influence on the few pounds of Blood and Fluids in the Human Body denied?

Dinshah then explained that he was emphatically against Vaccination, because the Corpuscles of Human Blood are round, while all other Animal Blood has ovoid structure. He then described how he entered the United States for lecturing on the X-Rays in 1896 and got his degree as Medical Doctor in 1899, by writing a thesis on "Necrosis Of The Bone." At this point, a lady Member S. C. from California entered and Dinshah said: "This lady wants me to go to Hollywood and lecture there. There are beautiful painted dolls there!"

S. C. — You make me feel embarrassed. (Laughter.)

Dinshah — Oh do not feel embarrassed! In 1925, January 24, in watching the Total Eclipse of the Sun, I saw certain unusual Spectral Color Lines which showed the existence of two new Elements, which I named Irenium and Kashmirium in honor of my beloved wife and daughter. I sent description of that discovery to about 1,500 newspapers in America, but, none printed it; perhaps, they thought a man born in Bombay, India could have no brain for such an event! Three months later, a scientist in the Allegheny Observatory, in Pittsburgh, Pennsylvania, announced that he

saw certain Color Lines in the Solar Spectrum that no human eye had seen before! Those were the very Lines I saw months before! Our Science is based on such work. Many doubted whether I ever was a medical man. F. K., please come here and look at this photogram.

F. K. — It is a photo of the First Annual Convention of the All Cults Medical Association, held in the Hotel Pennsylvania, on August 19, 1921. Dinshah is the President there. The hall is filled with Doctors. Here is another photo of the American Association Of Progressive Medicine, Sixth Annual Convention, in 1918. He was its Vice-President.

Dinshah then described his life in 1911 when he returned to America and in 1917 became a Citizen. Then, during the First World War, he was commissioned as Surgeon Captain, later as Detective Captain and subsequently when he organized the Air Service of the City of New York, was promoted as Major and finally became the Governor of the Police Aviation School and then, after several spectacular flights with Police Mail, retired with the rank of Colonel. It was then, that in 1920, April 26, he presented his Science of Healing by Attuned Color Waves of the Visible Spectrum of Light, which created unprecedented opposition from practitioners of the orthodox Healing Systems. Then, said he: "The sequel is well known to you. After being jailed 11 times and punished otherwise for serving the sick, I am sorry to say that when the Bill Of Rights was passed, the forefathers did well in establishing Freedom Of Speech, Freedom Of Press and Freedom Of Religion, but, there is no Freedom Of Healing."

After some questions from the Members and answers from the President, the First Session was over at 5 P. M.

The Second Session was opened at 8 P. M. the same day. Dinshah read from the local newspaper an article stating that Prime Minister Jawaharlal Nehru had abolished all Life Insurance Companies in Hindustan and taken over their control by the Government; Nehru emphasized that it was his aim and Dinshah told the Members that was nothing but Socialism. Said he:— "I am sorry about India, turning into a Socialist Country. Now, note what is happening in Egypt. I went through the Suez Canal 17 times since my first trip in 1893. That waterway was built through the investment of British and French capital and the owners are a private Corporation; thus, in seizing the Suez Canal, Gamal Nasser committed a terrific error, by violating the original treaty. Breaking the Law of Contract, it is nothing but a Socialist act. This will lead into another war before long."

N. F. — Did you read about the woman that married six husbands in Egypt?

Dinshah — That happens right along in Hollywood! Only it is one after another. In Egypt, which is a Mohammedan country, the reverse is actually permissible. A man under their religious tenets, may marry 4 wives at one time, the only thing is that if one is given a mink coat, the others must also be given similar garments. Then, if his purse and spine may per-

mit, he may have 12 concubines outside and 1,200 mistresses further on!!! Of course, we do not agree with such views. Oh! Here comes a telegram from K. V. M. our Member, from Downey, California. It says:— "Congratulations to all on our third Annual Convention, for the success of mankind's greatest hope (our Science). Sorry J. and myself could not be with you. Best wishes." Here is a letter from Arcadia, California about my successor; here is another from M. B. as usual. She wrote it on September 1, 1956, but, the postmark shows August 30, 1956! She acts in the past tense! She wants me to make the entire Organization my Successor. M. B., will you become my Successor?

M. B. — No.

Dinshah — You have one man here, whom I am proud to introduce; he is one of the Trustees of the Institute. He examined the various records and will report to you. F. K., please come to the front. (He came.) F. K., can you keep up the Organization for the next 4 months?

F. K. — No, I can not.

Dinshah — Is there any Mortgage on the Institute property? Any insurance?

F. K. — No Mortgage. Insurance is paid upto 1959.

Dinshah — K. B., will you be my Successor?

K. B. — No; I do not want to go to jail! (Laughter.)

Dinshah — F. K., are we in the red or black?

F. K. — We are \$..... in the red.

Dinshah — And M. B. wants me to turn over all to the Organization as my Successor!

K. B. — She never studied our By-Laws or she would not have written such a letter.

Dinshah — A Studio reported that she sent 200 copies of her letter for distribution.

M. B. — I shall pay \$100.00 to help the Organization.

S. C. — I shall pay too.

Dinshah — That is no way to assess all the Members. Who wants to go there and WORK? The only way open is for each Member to go and get one more Member. Then, in time we shall come out of the red.

A. B. — I think it would be nice if we each get a new Member.

Dinshah — The person who will be my Successor will have to work for the Cause, without salary, the same as I did all these years. Even now, I live on my \$61.40 a month Old Age Insurance. My Successor will have to follow the straight line to the ultimate goal.

R. S. — When will the Fraud Order be lifted?

Dinshah — I am working on that too.

(After some further discussion, the Second Session ended after 10 P. M.)

The Third Session opened at 2 P. M., on Sunday, September 2, 1956.

Dinshah — I welcome Delegate A. G. from Detroit, Michigan. (He then told him about the letter of M. B.)

A. G. — I disagree with her.

Dinshah — I offered to let her speak from the platform.

M. B. — No. You might hypnotize me. (Laughter.)

Dinshah — I give you the privilege of recommending three Members to run the Organization.

M. B. — We do not know how you can train anyone in such a short time. I bought the machine 11 years ago. My son had trouble and wanted to use it. Two years ago, I became sick and I live where there is no help. You can not train anyone in two, three or four years.

Dinshah — O. L., will you take it over?

O. L. — No, thank you.

H. B. — I think you are like Abraham Lincoln, you are a genius and I do not think anyone can take your place.

K. B. — I think there is a misunderstanding. Right now, there is no need for a Successor, because, Dinshah is still here. He will think of some way to take care of his work.

G. W. — I agree with K. B.

M. R. — I make a Motion that we have Dinshah take care of the work while he is still here.

Dinshah — It is all in our By-Law 30; just study it.

M. B. — May I say something?

Dinshah — Yes.

M. B. — You will appoint a Successor and after you are gone, they will have the whole thing to say.

K. B. — Where would we be if it were not for Dinshah?

A. G. — I move that we drop this subject of Successor entirely and go on with the "Itis," so the Members may learn something.

Members — I second it.

(On Vote, the Motion was carried unanimously with loud applause.)

M. B. — I like to get it clear. I would like to ask the Members. I admire you, I feel you lack leadership. I feel the Moon has reflection. I feel you need someone else.

Dinshah — Sit down, M. B. You are forbidden hereafter from writing on irrelevant matters to the Studios. If you are dissatisfied with me as a leader, go into a different organization or the medical society.

He then explained the 4 Signals of all Inflammations as being Rubor, Calor, Tumor, Dolor — Redness, Heat, Swelling, Pain and spoke about the Area Chart. Other subjects of High Heels, Feather Beds and the like. He also spoke on the value of sleeping with head to the North. He recommended a study of our Axioms. Then he spoke again about the wrong done by Vaccination.

F. S. — Would you say something about Diabetes and Sugar, that you said in Chicago?

Dinshah — In Diabetes the Sugar that goes out in the Frontelim is Dextrose; there is another called Levulose which does not leave the Body. Dextrose turns Light to the Right, Levulose turns it to the Polarization Plane Left. Thus, if as the Medical Doctors do, all Sugar is cut off, the Diabetic goes eventually into a Coma and dies of Sugar Starvation. We use no outside Insulin, but, make the Pancreas produce it by our Color Projector.

(He demonstrated Polarized Light by calling A. B. to the desk.)

M. R. — Why is it that some of the Light makes one nervous and upset?

Dinshah — Wrong Colors or using at the wrong time. That is why I spend each year weeks to make for you the Respiratory Rhythm Guide. It costs also plenty, but, you get it free.

After further discussion, the Third Session ended after 5 P. M.

The Fourth Session opened at 8 P. M. on Sunday, September 2, 1956.

Dinshah — I have pleasure in introducing to you a woman from California, E. B., my first Champion, who fought for our Science with the school authorities and her worthy father R. S. The subject for this evening is "Juvenile Delinquency." Who is responsible for the crimes of the teenagers, you read daily in the newspapers? The parents. A child learns by imitation and example. A child say is living on a farm. The child sees the milking of the cow. It also notices that some times the cow has no milk and is slaughtered. Its Steaks are fed to the child. Similarly, a boy has a lamb as a playmate in the home. The child becomes fond of it. Then, some day, the lamb chops are fed to the boy. What impression would such incidents carry in the child's mind? The same may be said about parents who smoke.

He then spoke about Childhood Disorders.

H. K. — Will you tell about Blood Transfusion?

Dinshah — I am emphatically against it. Reason? Well, transfusing the Blood from another individual is in no way different from having Sexual Indulgence with the said person. Do not be shocked; think it over calmly. The same may be stated of the vicious practice of Artificial Insemination. It was declared "Adultery," by Superior Court Judge Gibson E. Gorman, of Chicago, Illinois, even if the husband should consent to it.

The Fourth Session ended after 10 P. M.

The Fifth Session was opened at 2 P. M.

Dinshah — Are there any Case Reports? I have only one here, which is about High Blood Pressure. The Doctor wanted to operate on the Sympathetic Nervous System, but, the Sufferer tonated with our Science and says: "Thanks again — and may God bless Colonel Dinshah!"

A. B. — I had the same trouble and more trouble. I had the Dentist test the Teeth and two showed they were not alive. I used two Yellow and had them tested; they were alive. My wife is growing a Wisdom Tooth. She

had terrific Pain; I used Indigo. The Pain was gone by the next night. I used it at the proper time.

H. B. — What Color was used to get the Blood Pressure down?

Dinshah explained about the Blood Circulation, Pressure and the like. Here is a magazine that speaks about finishing female's Menstruation in 2 days instead of more, by eating a certain drug! The Kotex, Modess and other manufacturers will never permit its publication. Here I may say to women, do not use anything that needs insertion in your Area 11. It is liable to produce Inflammation by the constant abrasion.

(A picture of 30 Color Projectors being smashed by Law Officers in Milwaukee was exhibited. The Trinity of Construction, Destruction and Protection was explained.)

L. K. — You mentioned before about giving Birth without Pain; how is that possible?

Dinshah — By eating the Rational Food, taking proper exercise and following instructions. Here when a woman has to go in full dress, she goes mostly undressed. A woman has two legs just like a man — why should she not wear trousers to protect from the cold? In Chicago, a woman is not permitted by Law to wear short shorts. That IS Socialism bordering on Communism — interfering with private individuals. Look at that shoe! Just a piece of leather and two straps and E. M. paid \$8.95 for the pair!

F. K. — Would there be any effect on the future generation, if the mother wears high heel shoes?

Dinshah — Yes, surely, because, tilting like that is liable to change the axis of the Womb. Read my Gems In The Bible about such matters. Now, Congress passed a Law that a person can be declared "insane" by a medical certificate and hauled away to an asylum in Alaska, without a Court Trial. We ARE heading here into Socialism.

F. K. — I make a Motion that the Proprietors and Manager of this Hotel be extended a vote of thanks for the very fine manner in which our Members are treated during our Studio Meetings and Convention.

Being seconded, the Resolution was passed by unanimous vote.

R. S. — Have we time for a question? What about Hiccough?

Dinshah — Wrong food or imperfect chewing. Drink a tumbler of water and irradiate with the Orange.

H. B. — What does it cost to replace a broken Slide?

Dinshah — \$3.00 each, but you MUST send the broken pieces and the entire Slide-Carrier for matching.

F. K. — Why do we sometimes see two Rainbows?

Dinshah — Rainbow is the result of Refraction and Reflection of Light passing through rain drops. Two may result from the Light passing through two different strata.

(Question about Fluoridation of drinking water came up and the President expressed his opposition by showing its effect on the Teeth of children.)

A. B. — My wife wants to know how much weight would be gained in Pregnancy?

Dinshah — There is no given rule; how much does she weigh?

A. B. — 109 pounds. She said she would get along well with you.

Dinshah — 109 pounds is just about my weight. In Pregnancy, she might weigh about 130 pounds more or less.

The Fifth Session ended after 5 P. M.

The Sixth and Final Session began at 8 P. M., on Monday, September 3, 1956. The attendance had thinned, because of Labor Day Holiday.

Dinshah — The subject for this evening is "Marriage And Divorce" with Demonstration of the Double Bed Drama. Marriage is a union of two persons of the opposite sex for maintaining the existence of the Human Race. Today, that is not the true meaning of Marriage. Statistics indicate that in America, out of 5 Marriages, there are 3 Divorces. We brag about being the richest and the most powerful nation in the World. What is Divorce? Separation from the ties of Marriage.

(He then spoke about his personal experience through his first wife and described how it took him 9 years to get a Divorce from her, on the ground of Desertion.)

Dinshah — In the 48 States, there is no similarity of the Marriage and Divorce Laws, regarding age and reason. There is no uniformity. After I got my Divorce, I married in 1923 my second wife, when I was 49 and she was 18, in Philadelphia, Pa. and I am not sorry for it, as she blessed the family with 7 sons and 1 daughter, all of whom are still alive in Malaga, N. J. I must say that the educational system of America is faulty in this respect. Boys and girls mostly attend the same schools, but, although they grow together, they are NOT trained to the great potentialities of sex and the true purposes that result in the union called Marriage. They are left to gather the information from doubtful sources and the results are in most cases saddening. You may not think so, but, a very potential cause of Divorce in America is the stupid idea of sleeping in the same bed. I shall demonstrate to you. I need an actress; who will act as my wife? (Laughter.) Well, if none will volunteer, I shall have to play both parts of husband and wife! (Demonstration began.) Here is the husband going to bed with a beautiful, pink-cheeked, rosy-lipped woman — his wife. He weighs 180 pounds and she is only 110, so, as the eyes of the 110 close, she rolls over the 180 and he kicks! Then, 180 snores like a trumpet and 110 resents. Night being over, 180 having to go to his work, opens his eyes and finds himself near a strange looking, unattractive female and stroking his chin picks up the razor to — not to cut her throat, but, to smooth his own feelings. No wonder there is so much divorcing. Furthermore, the Double Bed is conducive to too much sexuality, because of the constant closeness, which eventually is bound to produce emotional derangement. Women in America are fighting all time for Sex Equality; I say to them: "No woman can be the

equal of man, because, she is the SUPERIOR SEX. A man can not spread his legs and produce a baby. I advocated all along not only sleeping in separate beds, but, in separate rooms also, so as to insure personal privacy of each, getting together solely for caressing or conjugal junction.

H. B. — Why is it that people usually get along during courtship, but, after marriage do not get along?

Dinshah — That is human nature. What we do not have, we covet to get, but, once gotten, its high value fades away. Before marriage, the parties should have talks about one another's likes and dislikes, to gauge properly the chances in a conjugal union. That is not done here. One side may want a Color Projector, while the other side may ask for a Surgeon — you judge the result of such disunion in marriage.

M. B. — I have a little to say. I loved my husband and later I hated him more. After sexual experience is over, they must have lots in common to get along.

Dinshah — If two people can not get along in courtship, they should not marry.

F. K. — Some time ago, I spoke to a woman; she said: "85 per cent. do not trust one another."

Dinshah — Jealousy or mistrust. Some men think she should look only at him. She would think he winked at the boss's secretary in the office. No person, either male or female can duly fulfill two jobs, earning money by office or factory work and also do the housekeeping.

(After much similar discussion, the Sixth Session of our Third Annual Convention ended after 10 P. M.)

Dinshah — This Convention is ended by the Grace of the Grand Master of the Universe; may you all be blessed and happy!!!

## DINSHAH IMPARTIAL

(The Universe Through The Eyes Of Dinshah)

### WHO GOT THE BENEFIT?

A woman of 80, who has around \$29,473.88, living in Port Norris, New Jersey, was always afraid of someone robbing her of the wealth was declared "incompetent" to take care of it, according to the opinion of the County Physician, because, he said she has "Senile Psychosis." His opinion was endorsed by a Bridgeton, New Jersey Doctor who said she is "mentally incompetent," so her brother petitioned the Court to have himself appointed as her "guardian" and the Court agreed when he put up a bond for \$25,000.00. Now, the woman who feared somebody would rob her has \$600.00 less; her Lawyer received \$500.00 for "presenting the case," the County Physician received \$75.00 for "examining and testifying and the Bridgeton Doctor got \$25.00 for "examining" her! This is the Freedom of America!!! Where is the Due Process of Law?

**OPEN DECLARATION FROM THE EDITOR  
DINSHAH P. GHADIALI**

**NO WARRANTY, NO GUARANTY, NO LIABILITY**

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
