THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

"COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

TREATMENT BY "SILENT SOUND"

The same Medical Doctor in the November 1956 issue of "today's health," wrote a long article on the treatment of kidney and gall bladder stones, relieving pain, soreness and tenderness in certain kinds of bursitis, peri-arthritis, fibrositis, tenosynovitis, myofacitis and myositis, rheumatoid arthritis and osteoarthritis, successfully by means of "Silent Sound," "Supersonic Waves" or "Ultrasound," which is Sound Waves that the Human Ears can not catch. Sound upto 32,768 Oscillations per Second can be heard, but, after that range the Human Ears can not utilize it as Sound and the said Medical Doctor recommends for "Silent Sound" treatment 500,000 to 1,000,000 Oscillations per Second.

So, if that Frequency can produce the stated results, what about the Oscillatory Frequency of our **Visible Spectrum Of Color**, which has what I described and utilized decades ago as:—

562,949,953,421,312
Oscillations Per Second???

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is graft. Send us nothing.

You may send your Book for review or opinion; you may send your Writings or Experimental Findings and Reports for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted articles will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are responsible; for the opinions in articles bearing no identification, the Editor shoulders the sole responsibility.

THAT IS A GOOD ANSWER

By:-INDIVIDUAL EXPERIMENTERS

**HEADACHE, BACKACHE, DIZZINESS, WEAKNESS, PAIN,
SWELLING, ARTHRITIS, HEART ATTACK, LUNG INFECTION**

REPORT BY A. B. S.

In the past 7 years, I have been to different Doctors and I would always change thinking I could find a better one, because, even then I knew the Doctors had done me no good. I was always pothered with Headaches, practically every day. I had Backaches, Dizziness, Weakness, etc. Two years ago, I got Arthritis in the Shoulder. I would wake up at night screaming and I went to my Physician. I got some medicine and I had to go to his office once a week for an Injection in the Arm. Then, my Legs started Swelling and I continued the Shots. Then, I had some Heart Attacks and the Blood clotted in my Legs and I got an Eye Infection. I continued the Injections of some kind of Serum for at least a year and I knew I was worse. I went to the Hospital and they took X-Rays and found I had an Infection in the Lungs, so, I made up my mind that the Doctors were through experimenting on me. I walked out of the Hospital and got a Color Projector. After 2 weeks I felt stronger. I have not had one Pain from Arthritis, I can see better; I had only 5 simple Headaches and all when I had the Color Projector 4½ months. I do not faint anymore. I am not completely corrected, but, I know I will be now. I do all my housework and take a long walk every day (Signed and Affirmed before A. D., Notary Public.)

* * *

BURNS, PAINS, BLEEDING, HEADACHE REPORT BY P. B.

The Color Projector has proved its marvelous healing powers to us, several years ago, when my wife, while taking the wash out of the boiler, fainted and pulled the boiler with the hot water down over her Left Leg, severely burning it from about six inches above the Knee down to the Toes and about two-thirds around the Leg. How severe the Pains were, can easily be imagined. Fortunately, I got home that evening just a short time after all this happened, so, I prepared our Color Projector right away and gave my wife a Tonation of Blue, which relieved completely of all Pains and the Pains never returned. The next day and every day there after, for eight weeks, I gave her two Tonations a day of Turquoise, alternating with Magenta on Areas 4 and 18, with liberal applications of Coconut Oil, all over the burnt areas. Two months later, she was entirely normal and went back to work. The Color Projector had completed its work. About two years later, while doing some hard work in the Shoe Factory, to which I had not been accustomed, entailing a constant maintenance of a lifting pressure at Chest height, I developed what appeared to be a Rupture like protrusion near the Rectum, the shape of a good sized grape; it was more discomfort than Pain. After about two days, from the friction of walking, it burst open in the evening, while sitting on the toilet and naturally, pro-

fuse Bleeding resulted. So, our ever-ready and dependable standby — our Color Projector — was prepared and I took a Tonation of Indigo and believe it or not, it stopped the Bleeding long before the hour was over and for a few days there after, I took Tonations of Turquoise, with Magenta on Areas 4 and 18 and in no time, the whole affair was forgotten — thanks to the Color Projector. On another occasion, about four years later, it was on a Saturday, I had a Headache and later in the evening I took a bath and without regard for the possible consequences, washed my hair and my Headache became so severe, that for the first time in my life, I was afraid of losing my sanity. I was shaking and trembling. I rushed to bed and our Color Projector was rigged up and I tonated with Turquoise; to my intense satisfaction, my Headache vanished in the first half hour. This experience alone taught me the value of my Color Projector. The above instances are some of the more serious, where we had very good success. Minor matters such as Colds and Coughs, too numerous to mention in detail, have been normalatated again and again. Our Color Projector is one of our most prized possessions and under no circumstances would we care to be without it. The Color Projector is as necessary in the home as the kitchen stove. (Signed and Affirmed before C. M. P. N., Notary Public.)

INSANITY, WEAK EYES REPORT BY H. B.

During the month of September 1939, I had a Nervous Breakdown and my sisters M. J. and D. D. took me to a Psychiatrist for an examination. This Doctor asked me many questions, which I, as I was told later, answered very incoherently. The Doctor, after examining me told my sister M. J. that I should be placed in an Insane Asylum; so, my sister M. J. offered to take care of me and she was instructed by the Psychiatrist not to oppose me in any action, even if I should try to crawl up the walls. My recovery was very slow and I was not able to do any work. My sister M. tried to take my mind from my present worry that forced me to break up housekeeping. My Eyes were very weak at that time and I was ready to obtain new Glasses, but, also postponed that. On or about October 14, 1939, I sought aid and relief by the Color Projector, ----- originated by Dinshah. C. N., a Graduate Researcher, ----- instructed me in the proper use of the Equipment. After I used it for about two months, my mental and physical condition changed completely. My Eyes had lost their wandering looks and became very clear and the use of new Glasses was not necessary. I discarded my Glasses and since never used any Glasses. My husband was so delighted with my change, that he exclaimed (having been away for about two months) "You have such a clear mind and your physical conditions are indeed splendid." I can work without any fatigue and feel like a new person. Ever since that time, I never suffered from any Nervous Breakdown and I state that I regained my mental and physical well being by the exclusive use of a Color Projector. (Signed and Affirmed before O. H. S., Notary Public.)

* * *

SORE THROAT, QUINSY, KIDNEY DISORDER REPORT BY A. P. J.

Since my childhood, I suffered from a Sore Throat. Later in life, it grew worse and I had a very severe attack every 2 years, which our Medical Doctor diagnosed as Quinsy. I was forced at times to stay in bed as long as 3 weeks and the Throat was lanced in each case, as often as three times. In 1939, my wife obtained a Color Projector and I used this Equipment when I again had an attack of Quinsy. I was determined to see what this Projector would do for me and I was more than surprised when I felt relief after a few Tonations After six days of its use, I went back to work again. Since that time, I very seldom have a Sore Throat and if so, one or two Tonations with the Color Projector and I feel normal again. Now, four years have passed since my last attack of Quinsy. I also suffered from a Kidney Disorder and I doctored for it for many years. I was often confined to bed, as long as four weeks each time and my Doctor prescribed Medicine and Pills. The attacks usually recurred once a year. Since I have a Color Equipment in our home, these attacks rarely recur and if so, one or two Tonations with the Color Projector make me fine. Since using this Equipment, I did not lose any working time. (Signed and Affirmed before J. P. U., Notary Public.)

OUR STUDIO ACTIVITIES

EXPERIMENTER FINDINGS AND QUERIES MEETINGS OF THURSDAY, DECEMBER 6, 1956

First Cleveland Ohio Studio

Al. M. read from Volume 3, Chapter 115 of our Text Books Set, about the Technique for taking an Irradiation with the Color Projector. Much discussion followed and the Members promised to correct their ways of taking the Tonations.

Al. M. — I am having wonderful results on my amputated finger, by tonating with Turquoise, some Scarlet and Green, also Magenta. The Doctor is amazed at the quick healing.

J. D. — I am very pleased with my Color Projector. I had a stiff Neck; tonated with Turquoise; the stiffness disappeared before the Tonation was completed.

A. K. — I had Inflammation of a Leg; used Turquoise Systemic and Magenta till the Redness was down; then, tonated with Lemon Systemic; I went back to work in 10 days.

Names of the Studio Commission for 1957 were sent to the Institute.

EDITORIAL

REMARKS

The names recommended were approved by the Council and Appointment Cards were mailed to the Commissioners.

* * *

First Detroit Michigan Studio

A. G. — Good evening, friends! This is the last month of this year and we have to select our Officers for 1957.

On vote, the same Officers were selected as Commissioners.

A. G. — I have with me a little magazine, with comments on the dangers of Chemical Food Additives. In this article, it is pointed out what harm come to people eating Bread with poisonous preservatives, also from food sprayed with insecticides. It is shown that certain poisons often go into Meat and Cow's Milk. Under the heading "Cancer is traced to Food Additives," the New York Times of August 21, 1956 said:— "A symposium of the International Union against Cancer ----- meeting in Rome, acknowledged that food additives created a 'serious public health problem.' They unanimously recognized the 'urgent necessity of international collaboration for the protection of mankind against such hazards as cancer-producing food additives.' The participants in the symposium also acknowledged that food additives were only one part of a vast problem of environmental Cancer, which includes occupational and lung Cancers. It also was stated that 'no food additives should be used unless specifically permitted by legislation based on lists of substances that have been proved innocuous after stringent laboratory tests.'" Condemned as Cancer producers were certain food preservatives; certain mineral oils and paraffins used to coat milk containers; food sterilization by radiation; estrogens and hormone pellets inserted in animals to put on weight; certain detergents used in cleaning food containers and especially food dyes. In fact, they stated that no food dye at present met "agreed criteria of safety." Since all these chemical insecticides and food additives are the boasted discoveries of modern science, it certainly does indicate that because of selfishness in man, modern science does harm as well as good. Now, I like to call your attention to a comment of Dinshah to the case of C. R., who wanted to find out whether it was safe to use Indigo on Varicose Veins during pregnancy; also, what other Colors would be beneficial in this case. Dinshah replied:— "Indigo on Varicose Veins is NOT the exact remedy. They are the result of faulty circulation and should be attended accordingly through consideration of the Ratio. During pregnancy, unless for some cogent reason, the less Irradiation, the better the advice. Just keep the Eliminations correct, stay rigidly on the Rational Food and usually there will be no trouble during Delivery. Indigo being an Astringent, an Agent that contracts, is liable in a woman with a weak Womb to produce premature Contraction and precipitate a miscarriage. Its use on those Areas is not advocated during such period." This is a very important matter to know. As Dinshah points out, Varicose Veins are the result of faulty circulation and should be attended accordingly through consideration of the Ratio. In other

words, if the Ratio be low, use a Color to increase it, which should be Scarlet on Areas 4 and 18; if high, use Magenta or Purple. I have been trying to impress on you at every Meeting, the importance of the study of our Test Books, so that every one of you may know the Colors and how to use them intelligently. Healing with the Visible Spectrum Color Projector is a Science and it has to be used in a scientific manner; then, you will get results. It is no guesswork or hit-or-miss affair.

Member — On the G. M. Television Show, the Visible Spectrum Color Projector was called a "Fraud" and it was stated that Color did not do anything.

A. G. — The man who made that statement should try this experiment: take different color bottles and put in Hydrogen and Chlorine. Nothing will happen in any bottle, except in the Blue. When he mixes the Hydrogen and Chlorine into the Blue bottle, he had better back up 20 feet or else he would be blown to kingdom come! Let Dinshah comment on this. We, who experimented with the Visible Spectrum Color Projector, know the value of Color and felt the effect of Color. Some time ago, LIFE magazine had an article on the effect of Color on growing plants. Any Dentist will tell you that Color combination has quite an effect on sufferers. Tonight, we shall take up the study of the Green Color Wave. I shall read from our Text Books Set, Volume 3, Chapters 87 and 88, entitled "Secrets Of The Pituitary Gland" and "Governor Green." (After reading both, A. G. elucidated further on the workings of the Pituitary Gland.) When in doubt on what Color to take, you can always rely on the Green as a very effective guide. It is the headwave of the Human Body. All Nature revels in Green. During the Winter, because of the peculiar inclination of the Earth in her orbit, the plants are deficient in Chlorophyl by want of Sunlight; that is the time when we need more of Green or Lemon Tonations. Before you start any Tonation, always take the Ratio to find what Color to use. That is where many Members make a mistake; they just "guess" on the Colors. This is an exact Science and we have to use the Visible Spectrum Color Projector in a scientific way. If you take a certain Color today, that does not mean that you need the same Color tomorrow, because, the chemistry of your Body changes. By taking the Ratio, you can tell what you need, whether an activation or a depression in Color. The normal Kardoscil in an adult woman should be 80 to 90 and in an adult man 70 to 80. If it be below, you need the Infra-Green; if it be above, you need the Ultra-Green. I gave you demonstration here with the Radiometer, by placing the Projector near it. When we turned on the Red, the Radiometer whirled at an immense speed, but, with the Violet or any Ultra- Green Color, it slowed down materially. By this experiment alone, you can realize how important it is to study and experiment yourself, to become familiar with the Attributes of each Color. In case of Constipation, start with the Yellow and go to the Orange and Red. That will increase the flow of Bile, which will help. Do not be in a hurry to change Colors; sit down first and reason.

J. B. — I want to know what we could do if Fluoride be added to our drinking water?

A. G. — I guess we shall have to drink it! After all, we do have something within us to take care of it; we have our own chemist within us.

W. K. — There is a product that will remove the Fluoride from the water.

A. G. — Do we have any Case Reports?

I. B. — I have a Navel Rupture; took Tonations with Green, Lemon and Magenta and have had very good results. My Ratio was 78-12.

A. G. — What is your Ratio now? (It was taken and found 79-15.) I suggest you send a Chart to the Institute; I like to hear Dinshah's comment on this case.

Member — I suggest that Orange be used.

A. G. — Even though the Ratio indicates Orange, in the case of a break, we have first to improve the chemistry of the Blood which has to do the healing and Lemon and Green would be the proper Colors. If there be a breaking down of Tissue, we have to set up a healing process. Orange would not be as effective as Lemon. It may increase the Spiroscil, but, will not build the Tissue. I had a case of broken down Tissue some time ago. It was a Bed Sore. I used much of Green and Scarlet on 4 and 18, later, using Lemon and Yellow. I kept the Sore wet, to prevent it from healing too fast. This Sufferer had used Turquoise for 2 months without results. In this case, the Tissue had to be built and Green was the Color; also Lemon. After starting with those Colors, there was a great improvement in a short time.

J. B. — My little one had Stomach Disorder; Fever and Stomach Ache and some Rash with a white ring on her Tongue. I gave her 4 Tonations of Turquoise and then went to the Lemon. She is better now and plays again. Her brother and sister had the same condition; also some people in Wisconsin where we were visiting, had it.

A. G. — Well, friends, this is the end of the year. I wish everyone of you a Merry Christmas and a Happy New Year — stick to your Rational Food!

Appointment Cards were mailed by the Council to the Commissioners. American Capsule News, published by Morris A. Bealle, at 1737 H Street, Washington, 6, D. C., has a very complete story on the Food Additives. All I can say in this restricted space is, not to purchase any eatable without studying the label and not to eat anything chemically processed. If all would mind such suggestion, the operation of the Law of De-

mand and Supply will soon bring around a favorable result. Newspaper writers and Periodical publishers may print anything, the final regulator is the Consumer. The big trouble with our Members is that they refuse to study and expect the Institute to perform "magic." Even after studying, most will NOT follow the Rational Food and many following it while sick, return to their wrong, harmful habits after they are well. I have to state openly that most husbands will not allow their wives to sleep in separate beds and the same is true of the wives. So, what shall the Institute do to give them relief? If this great Country would stop the eating of Beef, the imbibing of Booze and the smoking of Tobacco, there would soon be little use of having Cancer Drives, Heart Drives, Mental Drives, Tuberculosis Drives, Polio Drives and the like. What can I do singly? The great Persian poet Shekh Saadi wrote about 700 years ago that:—

“Gar nabinad
Ruze roshan
Shabparreh chashm,
Chashmei Aftabra
Cheh gunah?”
“If does not see
The bright day
The eye of the night-owl,
Of the eye of the Sun
What is the fault?”

For some time past, our opponents are taking advantage of the new methods of publicity, by reviling us on the Radio and Television. Whenever I used to visit years ago, the beautiful city of Detroit, Michigan, I used to broadcast our message of Healing, over the Royal Oak Radio Station, which was also used by Father Coughlin. After a few months, the Station refunded to me the balance of my contract, stating they were liable to lose their license if they permitted me on the air! I incorporated the Dinshah Educational Broadcasting System in New Jersey, but, after a year as no more than about \$1,500.00 were subscribed, I refunded the money to the Members and here I am. Give me the means and I have the goods! Time will tell! The color bottle experiment about which A. G. spoke, must be performed with a specific technique, otherwise, the result would be unspeakably disastrous. Take a clear glass bottle filled with the Hydrogen gas and another clear glass bottle filled with Chlorine gas. Place them on a table in a room which has two electric bulbs, one of a red color and another of a blue color, with their individual switches **outside** the room. Extinguish all lights in the room and light the Red bulb only, like a photographer's dark room. Then, enter the room, be sure it has no other illumination except the Red bulb and in a third bottle of double size, introduce both the gasses together. Then leave the room, close the door and turning off the Red bulb, light the Blue bulb and promptly the two gases wil combine with a loud explosion, forming Hydrochloric Acid (H Cl). Added Fluoride may be changed

into something else by adding some other "product," but, the question is how to get that impurity OUT so as to get natural WATER. Better buy bottles of spring water and drink that — oh! It is all a racket, anyhow! I. B. is one of our worthy old time Members, yet she NEVER sent a single Chart in all these years, so I have no knowledge of her actual condition and regretfully decline to pass an opinion without a complete Chart. I am here at your service day and night, if you avail yourself of it, by following the requirements.

* * *

First Merrill Wisconsin Studio

The attendance was poor, because there was sleet. However, a vote was taken and the same Officers were selected. Discussion was made on the subject of "Heart Attacks."

E. K. — I fell and injured a Knee Cap. As yet, I have not had time to use the Color Rays, but, intend to use it. I use also Yellow on Areas 16, 17 and 18.

* * *

First Milwaukee Wisconsin Studio

K. B. — To begin, we shall have to select new Officers. I shall read the letter from the East:— "Studio Commissioners: 1. Under By-Law 34, the Studio Commission for the year 1957 has to be appointed by the Council. 2. Therefore, at the next Meeting, please, select the suitable three Officers and promptly send their names and addresses to us, so the list may be duly published. 3. Herein fail not. 4. Thank you and good wishes for your welfare." I shall now read By-Law 34. (It was read.)

K. B. — I propose R. S.

A. E. — I propose the Officers that are in office now be retained.

K. B. — I propose F. K.; also F. W.

J. O. — I second the motion of A. E.

F. W. — Take my name off the list. I propose the same way as A. E.

K. B. — Now, we need a Vice-Chairman.

A. E. — I propose the three Officers.

J. O. — The Officers have done such good work, why not keep them in office?

K. B. — Did you read the magazine of November 1956? Dinshah was turned down on the Fraud Order. First of all, they have their own definition. I shall read to you what is said about Mitogenetic Rays, described thus in the Medical Dictionary as: "Electro-magnetic vibrations claimed to be given off from roots of growing plants, from yeast cultures and from living beings." It is not only the medical book talking about it, but, even in Leviticus, in the Holy Bible, clear mention is made about certain uncleanness of women and men. (He then proceeded to read the pertinent passages and gave understanding about it from the basis of science. The entire subject revolved around Radiations from Living Organisms.)

A. B. — You said something about the Radiation being lower in Winter than in Summer. I want to say that in Milwaukee certain Insurance Companies will not insure people in Florida.

F. K. — That is rather interesting. Take a Smoker here and send him to Colorado; in about 6 months, it would affect him because of the altitude.

K. B. — That all depends upon the person. If you be raised there, you can live to a ripe old age. If you go to Colorado, you are 3,000 feet above; here, you are 300 feet and in Florida you have sea level. If the pressure changes, who is there that can go up 7,000 feet?

J. S. — I can.

K. B. — When did you?

J. S. — In 1952.

K. B. — If the Body be flexible, it should not affect you.

F. W. — I was up 14,000 feet last Summer.

K. B. — With what did you go?

F. W. — With a car.

K. B. — Radiation and Emanation affect people. How many people, after certain persons go away say: "I have a Headache?" I used to have charge of the Studio in Chicago; a woman once said:—"Now I know why I lost my bet!" Tomato plants from the same batch were planted; the husband's grew and hers failed.

(Much discussion around the Double Bed System, sleeping in separate beds and even separate rooms as taught in our Science ensued with the conclusion that it was not all "superstition," but, sanitary and healthy.)

N. T. — I have been using Yellow on my Head for about 3 years and now I am beginning to feel something in my Ear. I know there is life there now.

K. B. — Use Lemon Systemic and Red Local and live on the Rational Food Of Man.

The way to select Officers should be the same as any other Motion. A Motion should be made for each Commissioner's name, seconded and voted. The majority rules. All your Officers were sent Cards showing their Appointment. Your Reporter sent a well-written, elaborate Report, which we condensed, as our views are known in regard to this matter to our Members, through our literature, guidance and lectures. Height above sea level has effect on the Body, because of change of atmospheric pressure as well as the temperature. In 1892, at the age of 19, I lived for months in Chehel, on the Himalaya Mountains, 9,000 feet above sea level, with no overcoat to wear and for food 2 quarts of raw milk a day. It was there that through

certain incidents described in my "Railroading A Citizen" (now out of print), I lived for 84 hours in 6 below zero without any food, drink or heat. All depends on the build and training and it is upto each individual to do what is seen or thought fit for self. N. T. never sent her Chart, so we have no insight into her condition and requirements. She is welcome to use our service.

* * *

First New York New York Studio

R. D. — Did everyone get the Request For Continuation Of Membership blank?

C. P. — I did not.

R. R. — I did not.

R. D. — I suggested to Dinshah to raise the Dues from \$6.00 to \$7.00 and from \$3.00 to \$4.00. Our Meeting Room costs \$25.00 a Meeting.

C. P. — I always send \$10.00 and say to keep the rest for stamps.

R. D. — I do not want you folks to send more money in; Dinshah will send it back, but, you can suggest raising the Dues, if you be in favor of it.

L. F. — If everyone will fill out the sheet and state what the Projector did for you, that would be a great moral support. Of course, money is also necessary.

(R. D. read the letter about the Studio Commissioners of 1957.)

R. D. — As another year went by, you have to select the Officers for the coming year.

L. F. — I suggest R. D. for Chairman, H. M. for Vice-Chairman and of course our Reporter should be in too.

D. R. — I second the Motion.

R. D. — I think we should give somebody else a chance too.

L. F. — I had it for 5 years, F. C. had it for many years. I am not able to attend the Meetings as often as I should like to. May I suggest to give our Officers a vote of confidence? (Applause.)

R. D. — I thank you for myself and on behalf of the other Officers. Did all of you get your magazines? (Some Members said they did not. He then read the article about the Fraud Order. From another source, he read an article about Color and its place in Medicine; that writer suggested painting rooms in colors.) We have a new Member here Dr. H. H.; would you like to ask some questions?

H. H. — Please tell me the fundamentals of the Color Projector.

R. D. — In order to take a Tonation, the room should be dark, to keep other light out. The room should be warm enough, so the Body does not become chilled when taking the Tonation. When you take a Systemic

Back Tonation, do not lie on your Stomach. If I remember correctly, it is preferable to lie on the right side when taking a Systemic Back Tonation. If you take a Local Tonation, cover the rest of your Body.

L. F. — Very seldom has anyone living in an apartment, a room with 80 degrees or more of warmth; in such case, hang a sheet over the Projector and tuck yourself under it.

E. S. — You did not tell him how far away he should have the Light.

H. H. — I suffer from Sinus Disorder; my Eyes water and I have Pain in my Ears.

R. D. — You own an Equipment; fill out a Chart and send it to the Institute. I suggest you use Lemon Systemic, Magenta on 4 and 18, until you hear from the Institute. Of course, you have to change your living habits.

H. H. — I am a vegetarian for years; I do not drink and do not smoke.

R. D. — If you take your Tonations faithfully, eat the Rational Food Of Man, you will notice a change soon.

H. H. — What can you do for Pelvic Disorder?

R. D. — Do you have our Text Books?

H. H. — Yes. I was looking for that type of healing for years. I heard about it in California. I wrote to Malaga, but, I got my letter back. Then, I just went to Malaga. There, I had the pleasure of meeting Colonel Dinshah. He is a wonderful man. I wish he will be with us for many years.

E. S. — I read an article about a 107 year old woman; she is a vegetarian.

L. F. — H. H., I do not want you to think we laugh at you; you certainly had your trouble to get hold of Colonel Dinshah. We could not get in touch with him for years. There are many among us who are not strict with the food. You stay under the guidance of the Institute; I am sure you will get results.

R. D. — L. F. was our Chairman for many years. She really was Dinshah's right hand. Unfortunately, she is not able to come often. When she is with us, we are happy to give her the floor.

L. F. — Thanks to the Light! All my troubles disappeared. I was in Europe; when I came back, I was worn out; I had a severe Pain in my Back; I could hardly move. After 3 Yellow Tonations, the Pain was completely gone. I feel just wonderful. To me, the Projector is worth more than a million dollars.

R. D. — Why did you take Yellow if you had Pain? I take Green.

L. F. — As I had that terrific Pain, it just felt as if I had an iron ball in my Back. I figured Yellow is a Muscular Stimulant and a Nerve Energizer.

H. H. — What would you do for a 8 year old child who wets her bed?

L. F. — The first thing the child has to be dressed warm. No bare Knees and Cold Feet. That goes for us women too. The child should sleep on flannel sheets.

H. H. — Where does the Projector come in?

L. F. — Use Yellow or Orange.

R. D. — I never had a case of Bed Wetting. I do know a nervous condition has much to do with it.

P. Z. — I went to Germany, to see my sister who suffers from Dropsy. I tonated her in August. She is doing well; no more water has to be taken from her; she is up and getting along very well. I have 3 Projectors in Germany. They all have excellent results. I saw a man in my home town; he has our machine. To my surprise, I found he is the brother of C. N. of St. Louis, Missouri.

H. M. — I also was in Germany this Summer. My brother has Heart Disorder. He is using the Equipment and has very good results. He improved with the Rational Food Of Man, but, did not normalate until he got the Projector.

H. H. — As far as food is concerned, one has to be careful. They plan to irradiate all canned food; watch what the label says.

A. M. — What can we do to fight Fluoridation?

R. D. — If we all sign a petition. People have to express their opinion. This is still the greatest Country on the Earth where you can do that.

D. R. — Read the American Capsule News; it says everything is sprayed.

H. H. — There are places where you can get organically grown, un-sprayed food.

R. D. — The Good Lord created a wonderful machine in us or we should be dead long ago.

L. F. — The Good Lord also gave us Colonel Dinshah, who gave us the Family Health Protector, so we can help ourselves.

You certainly had a lively Meeting. Your selection of the same Officers was also very sensible. They were all sent their Appointments. H. H. deserves credit for his enthusiasm, but, he never sent a Chart to the Institute. We are ready always to serve. In taking any Tonation on the Back, one may be on the right side or the left, the right having some preference, because of the Area 6 being approachable. The only prohibition is against lying on the Belly, because, such posture would reverse the meridian of the

Body. Vegetarian does NOT mean eater of vegetables. It means one who eats NOURISHING food; our Cook Book has it all in it. L. F. is one of our old time worthy Members, who did wonderful work for us and she has an equally splendid worker in your Reporter M. W. Our cordial thanks to them both for what they accomplished and are STILL accomplishing. I have invitations from Germany, Italy and England and I shall gladly go there on a visit, when I have some competent help to maintain my Principal Office activity here as at present. It is **not** a soft job; it is a life dedication; but, it has its glorious spiritual compensation attached to it.

* * *

First St. Louis Missouri Studio

In the absence of the Reporter, the proceedings were noted by C. L. and typed by C. N.

C. N. — I want to report the case of E. K., who sprained her Ankle, while stepping out of a street car. She heard about the Light from C. L. before the accident. After several Tonations of Orange and Magenta, she was able to walk as usual and returned to work, well satisfied with the results attained.

E. N. — I report the case of K. She spent almost \$1,500.00 with Doctors and still had Dizzy Spells. She would not leave the house alone; had Constipation and her outlook on life was desolated and her general condition most intolerable. After 3 weeks of Tonations of Yellow, Orange, Green and Magenta, her condition improved so much, that she is taking care of her household duties, attends Meetings, goes around the city in the usual way, her personality changed to a very friendly one and she is now almost a normal woman.

(Newspaper clipping about S. D. G. one of the sons of Dinshah, who trained him, going through higher education through self efforts was read. C. N. suggested all could be benefited by having a blackboard.)

C. L. — I want to know what can be done for Hives?

C. H. — I had that experience.

K. S. — First give Green for a Cleanser.

M. N. — Yellow for Backelim, also Lemon Systemic to cleanse the Body of debris.

C. H. — Orange Systemic.

(C. N. gave an elucidative talk on the Hives and its remedies, stating it is a Systemic Disorder and strict adherence to Rational Food Of Man is needed, along with proper Eliminations.)

C. L. — I want information on Cuts and Bleeding.

Members — Indigo on the Cuts, Purple Local on Area 18.

A. I. — What about pulling Teeth and their Bleeding?

Members — Indigo Local, Purple on 4 and 18.

(Discussion went on for Elimination of Blood Clots. All agreed on Lemon Systemic to dissolve the Clots and Purple on 18 to eliminate a possible stoppage of Blood Circulation. The same Commissioners were suggested for 1957. The attendance was not the usual number, because of very inclement weather — cold, sleet, damp.)

The Appointment Cards were sent to your selected Commissioners. Wish you Happy New Year with better attendance.

DINSHAH IMPARTIAL

(The Universe Through The Eyes Of Dinshah)

A VOICE FROM THE PAST

My third Class for tuition in the powers and effects of the Visible Spectrum of Light and Color on Living Organisms was opened in Atlantic City, New Jersey, on July 13, 1921, with 40 Students enrolled. It had all along a dear memory attached to it, because, it was there that my beloved wife Irene Grace took her personal training in the Science and graduated. However, as the Fire of 1945 destroyed all the public and private records, I had to erase from my mind the events of 1921 as of other involved years, when lo! This week, a Graduate S. G. from Philadelphia, Pennsylvania, mailed me an envelope, on opening which I found three torn pieces of a newspaper clipping, browned with age and so brittle that in handling it began to crumble into more pieces, which I placed on a sheet and covered them with Scotch Cellophane Tape. Think of my surprise when I found it was an editorial article in the Sunday Gazette of Atlantic City, dated July 3, 1921:—

“Colonel Dinshah P. Ghadiali, M.D., Inventor, Scientist and Metaphysician, Lecturing on Spectro-Chrome Therapy to Large and Appreciative Audiences.

“Twenty-five years ago there came to this country from Bombay, India, a young man with new ideas of things scientific which somewhat startled both the professional and the lay world. He has been startling people ever since and now threatens to revolutionize the accepted theories of some of the greatest scientists — yes, even the theories of Sir Isaac Newton which have long since been accepted generally as facts.

“Dr. Dinshah, as he is more familiarly known, is the inventor of the Spectro-Chrome Therapy, a new scientific method by which the diseases of mankind are treated with the aid of properly attuned color waves. In plain understandable words, Dr. Dinshah’s theory is that everything has a

certain specific color value. Take, for instance, the drugs our physician prescribes for us. Thus when we take a certain drug it has a color action on the part affected by the disease. But the fault of the drug system lies in the fact that this drug works deleteriously on other parts of the body which is unnecessary and injurious. By the Dinshah method of applying attuned color waves this danger is eliminated and more efficacious results are obtained in curing the disease. In his interesting and convincing lectures, Dr. Dinshah gives us a spectroscope and then by actual demonstrations proves his theories beyond the peradventure of a doubt.

"Dr. Dinshah soon after his arrival in this country, was given the sobriquet, 'The Parsee Edison.' He is a Zoroastrian scientist inventor and psychologist. He has been for thirty years a notable orator on the lecture platform, talking intelligently and most interestingly on so many different subjects of note that his versatility has long since been well exemplified.

"Last year over four hundred people in New York City and Philadelphia, including many prominent doctors of medicine, used Dr. Dinshah's new method of attuned color waves with wonderful results. Dr. Dinshah was the first public exponent of the X-Ray in New York in 1896. The following extract from an article which appeared recently in the Camden (N. J.) Daily Courier is interesting to note: 'During the war Colonel Ghadiali presented to the U. S. Government one of his electrical inventions known as the Dinshah Engine Tester, for the purpose of testing an automobile or air plane or any other gas engine to find out its troubles, if any, right at sight without any calculation or dismantling. Besides that, he has invented a number of other electrical inventions, one of which is the shutterless, flickerless motion picture machine and a large number of scientific inventions too numerous to mention. The Colonel happens to be the only man born in India (Bombay) who has received such a rank from the New York Police Department, he having served under Commissioner Rodman Wanamaker and organized the New York Police Reserve Air Service which under his command two years ago brought the first Police Air Mail to Philadelphia from New York. Although we have spoken of him as Colonel Ghadiali he is heralded the world over as plain 'Dinshah,' his first name which means 'The King of Duty.' His public career and scientific achievements have certainly justified his name. But he takes the greatest pride in his American citizenship.'

"Dr. Dinshah, in addition to his large headquarters in New York City, also conducts a school and laboratory at 1602 Summer street, Philadelphia, Pa., and just recently opened his Atlantic City lecture room on the Boardwalk where local physicians are cordially invited to come and ask questions and then see the Dinshah method by actual demonstration. This invitation is also extended to the lay world who will not only become well informed on subjects of vital interest but will also enjoy and appreciate Dr. Dinshah's eloquent oratorical ability, geniality and that strong personality that convinces all with whom he comes in contact that 'here is a man who

is sincere and who knows what he is talking about.' One just can not help feeling that if 'Dinshah' says so it MUST be so. But after all what more could one ask for than sincerity and actual scientific PROOF? Dr. Dinshah's address is 2521 Boardwalk."

I am cordially thankful to S. G. for sending me this valuable document. The "Engine Tester" mentioned in the article, was one of my inventions, perfected in 1912. The French Government sent an offer to buy its patent rights for \$250,000.00, but, I sent word that I intended to become an American Citizen and thus gifted it to the nation when it entered the First World War. It was sent to the famous Wright Brothers at Dayton, Ohio for tests and report and they finally sent me a certificate of six pages, stating at the end that "all claims of the inventor were found to be true." It was **that** invention which made the Liberty Airplane Motor the success it became.

I leave it to the readers — my worthy Members — who are Experimenters and Researchers, to think whatever they may about me and my character, because, in 1948, in the United States Federal District Court in the same city of Camden, New Jersey, I was given the sobriquet of "Quack and Faker" and the Honorable Judge styled me "a dangerous man," for claiming that "just putting on color can cure disease." Sentence:— \$20,000.00 Fine, Three Years Imprisonment (suspended because of age), Five Years Probation, Dissolution of the Corporation, banning promotion of my Science directly or indirectly and destruction of all printed books and literature pertaining to the Science, which they did by burning \$125,000.00 of my publications. May God bless America! The Land Of The Free And The Home Of The Brave!!! I am still here to serve — America.

* * *

MEDICAL EDITOR CONTRIBUTES TO OUR CAUSE

Having spoken in Chicago, Illinois, in the last year's joint Annual Convention of the American Naturopathic Association, Inc. and The American Association For Medico-Physical Research, on "The Sugar Cure For Diabetes," Dr. S. Edgar Bond, B. L., M. D., Editor of the Journal of the latter organization, in its Convention Highlights extended the following gracious recognition:—

"Then the tireless worker and the energy which comes from the Colonel, Dr. Dinshah P. Ghadalia, was proven again in his lectures on the application of light colors and their different vibrations as applied to disease conditions which were highlights of the convention. Some 15 doctors took his three volume course Spectrum Therapy from which we hope good."

This year also, on August 1, 2 and 3 there will be another Convention there and I shall feel happy to attend it and speak on any subject of their choice. It is evident, that we are not against **Medical Doctors**, but, are fighting against the **Monopoly** on healing upheld by their associations.

* * *

BANEFUL CENSORSHIP

One after another the Legislatures and officers in power in different States, are passing laws banning certain books, motion pictures and the like as objectionable, immoral or indecent, preventing the public or a certain class of people from enjoying the benefit of those books or motion pictures. This is absolutely a violation of the First Amendment to our Constitution of the United States Of America and should not be permitted. Free Speech and Free Press are the foundation of the present civilization and we differ from Socialism and Communism in that main respect, because, where Free Speech and Free Press are barred, tyranny and autocracy are liable to prevail and human happiness would be an event of the past. Such views have repeatedly been expressed by Courts of competent jurisdiction and establishing censorship over certain books, writings, motion pictures and the like will bring about nothing but retrogression and chaos. The true judge of right and wrong should be the public, because, decency and morality can never be born from legislation — the one power that is the producer of any true reform is — EDUCATION. Now, they want to penalize parents for the delinquency of their children! That is another step in the retrograde direction. It is all the fault of our crude system of education. Morality, principles, of correct and clean living, honorable citizenship, abomination of filth in every form should be implanted in the minds of the youngsters by their educators from an early age and the sacredness of sex and its legitimate purpose in the sphere of creation should be inculcated before reaching the age when misconduct might tempt the youth. In two cities in New England, certain comic books declared by the authorities as "objectionable," were ordered burnt. I declare emphatically that the real protection of the public — old or young — lies in the direction of correct, clean EDUCATION and NOT in unenforced or unenforcible Legislation.

* * *

THE SOURCE OF POWER AND AUTHORITY

I am repeatedly asked what is the source of the power and authority wielded by those who are the opponents of progress in healing systems other than their own old time methods. The answer is NUMBER. In this country, there are over 200,000 Medical Doctors who are General Practitioners; around 17,000 are so-called Internal Medicine Specialists; Operative Surgeons over 15,000; Obstetric Surgeons about 7,000; Psychiatrists more than 7,100; other unclassified ones around 65,000; then, there are Hospital Interns. I do not have to expatiate or offer explicit comments. Judge for yourself; what are we? A grain of sand in the desert! Get after this problem by increasing our Membership and improving thus our resources and the Natural Law of Supply and Demand will do the rest.

* * *

HEALERS WANT TO BE KILLERS!!!

A petition signed by 116 licensed Physicians, Medical Doctors, of the State Of New Jersey, was sent to the Legislature of the State, asking for a Law, to permit them to use Euthanasia (Mercy Killing) for incurable Sufferers — of course, with the consent of the person involved. Well, what next? I am unable to comprehend the meaning or value of such a petition or such a law. The Medical Doctors, under the monopolistic power of their associations, are able to do what they please in administering potent pills, potions or poisons to anyone under their professional care and they also have the power of certifying to the Sufferer's death and assigning the cause of it. The cause may be marked as Heart Attack, Capillary Thrombosis and the like and the Body may be disposed to suit the circumstances beyond question of a doubt. Why do they need additional legislation? And here is the brunt. Most of those who come into our fold, are such so-called worn-out "incurables." Our records prove that fact. If the Legislature therefore wants to enact one more Law to clutter further the overlegislated citizens, it should be just as easy to place such cases who are declared "incurable and willing to die," into a clinic under the care of my Visible Spectrum Research Institute and keep track of the results produced by our Science, which the Medicoes openly declare to be quackery and fake. It will serve two useful purposes; it will serve the sick one way or another and prove openly to the public our glaring "quackery and fake." How about putting this open offer into execution? We are sure it will execute our opponents anyhow! Euthanasia means Mercy Killing and we are certain such move will kill the opposition of our opponents in the most merciful manner.

* * *

SUGGESTIONS AND ENDORSEMENTS

Endorsement by N. S. H., G 26

This is to certify that I learned the use of Visible Spectrum Therapy from the Originator Col. Dinshah P. Ghadiali, while practising my profession of Dentistry in Chicago, Illinois, in the year 1922. I have used it since then on myself and members of my family in all types of so-called diseases. I have also used it in my Dental Profession on all types of Mouth conditions like Gingivitis, Pyorrhoea, Toothache, Dry Socket, Post-Extraction Hemorrhages, Pain, Tic Douloureux. I consider it one of the most scientific, beneficial and safe therapeutic modalities ever invented by man. It will heal, prevent disease when other methods fail and it will prolong life. If it is ever adopted by present or future societies, it will save millions of lives from early graves and billions of dollars from taxpayers' money, spent now on dangerous Drugs, Serums, Vaccines, dangerous X-Ray and Radium treatments and unnecessary Operations. I will not be without it, if I can help it.

* * *

Endorsement By A. A. F., S 39

My Dear Colonel Dinshah: You don't know how proud I am to be an owner of the Color Projector. I have tried almost every healing science, but, I have yet to find one that can compare with the Color Projector. It is unbelievable what it can do. Nothing would make me give up ours, if I could not purchase another one. I have more pep now at the age of 52, than I had when I was 16 years. I know you will be rewarded for all the good you have done.

* * *

BLESSINGS TO FRAUNHOFER, BUNSEN AND KIRCHHOFF!

I thank God every day, in everything I do, for the grace He has bestowed upon me finding the Visible Spectrum. I owe everything I am, own and will have to it! With it, I will always be well, always be able to work. I can look into the future unafraid. But, without it? Believe me, I could not live! I have tried time and again to convince myself and everyone who knows me, that by just living a regulated life to be well, but, I failed. I have given up trying long ago and I do not want ever to be without my Color Projector, no matter where I should be. I can not say anything much now, but, when I go to Germany, I plan to introduce it to many people. Thank you, Colonel Dinshah and God bless you for all the good you have brought to mankind! — A. C.

* * *

MORE PROPERTY TRANSFER BY ORIGINATOR

In accordance with our By-Laws, unanimously passed, the Originator Dinshah P. Ghadiali, transferred to the Visible Spectrum Research Institute, his traveling Station Wagon, which now bears New Jersey License Number Z/L 7890. It is duly insured.

* * *

OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a Membership Meeting, at 8 P. M., in each of our following Studios, for reporting the results and findings of Personal Experiences in the use of the Visible Spectrum of Light and Color:—

First Cleveland Ohio Studio—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Jacob Dussing, Vice-Chairman, 1253 Melbourne Road, East Cleveland 12, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

First Detroit Michigan Studio—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Albert Greenham, Chairman, 30906 Robert Drive, Livonia, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elfriede Kolmetz, Reporter, 6735 Meadow Avenue, Van Dyke, Michigan.

First Merrill Wisconsin Studio—New Badger Hotel, 310 West Main Street, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1814 West Main Street, Merrill, Wisconsin.

First Milwaukee Wisconsin Studio—The Republican Hotel, "A" Hall, corner North Third and West Kilbourn, Milwaukee 3, Wisconsin. Kurt W. Bader, Chairman, 314 E. Burleigh Street, Milwaukee 12, Wisconsin. Fredrick Kneppreth, Vice-Chairman, 10120 W. Harrison Street, West Allis 14, Wisconsin. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

First New York New York Studio—Hotel Diplomat, Blue Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Die-drichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgefield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

First St. Louis Missouri Studio—Albrechts Hall, 3549 Arsenal Street, St. Louis 18, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Marie J. Parison, Reporter, 7525 Comfort Avenue, Maplewood 17, Missouri.

OPEN DECLARATION FROM THE EDITOR
DINSHAH P. GHADIALI

NO WARRANTY, NO GUARANTY, NO LIABILITY

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.

VISIBLE SPECTRUM RESEARCH INSTITUTE
