THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

"COLOR THERAPY"

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

TREATMENT BY "SILENT SOUND"

The same Medical Doctor in the November 1956 issue of "today's health," wrote a long article on the treatment of kidney and gall bladder stones, relieving pain, soreness and tenderness in certain kinds of bursitis, periarthrititis, fibrositis, tenosynovitis, myofacitis and myositis, rheumatoid arthritis and osteoarthritis, successfully by means of "Silent Sound," "Supersonic Waves" or "Ultrasound," which is Sound Waves that the Human Ears can not catch. Sound upto 32,768 Oscillations per Second can be heard, but, after that range the Human Ears can not utilize it as Sound and the said Medical Doctor recommends for "Silent Sound" treatment 500,000 to 1,000,000 Oscillations per Second.

So, if that Frequency can produce the stated results, what about the Oscillatory Frequency of our Visible Spectrum Of Color, which has what I described and utilized decades ago as:—

562,949,953,421,312
Oscillations Per Second???

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

NOTICE TO ALL

We accept no gifts or gratuities, as to a Servant Of Mankind it is **graft**. Send us nothing.

You may send your Book for review or opinion; you may send your **Writings** or **Experimental Findings** and **Reports** for publication, provided they are not plagiarized or false and bear your hand signature in ink, with full name and address.

Anonymous communications will receive no attention. Submitted **articles** will not be returned.

All correspondence should be addressed to:— Visible Spectrum Research Institute, Malaga, New Jersey and not to any officer or individual.

For the views expressed in signed articles, the writers are **responsi-ble**; for the opinions in articles bearing no identification, the **Editor** **shoulders** the sole responsibility.

THAT IS A GOOD ANSWER

By: -INDIVIDUAL EXPERIMENTERS

NERVOUS BREAKDOWN, SHOULDER INJURY, BLADDER DISORDER REPORT BY J. T.

I wish to state that six years ago, I had a Nervous Breakdown. Went to several Doctors, but, could receive no help. I also had a condition in Shoulder from school day injury and a serious Bladder Disorder. A friend suggested Visible Spectrum. I went to a Graduate and received help. He suggested my buying an Equipment, which I did. I would not be without it now. I have been on the Rational Food Of Man since and feel much better. Visible Spectrum is the only healing agent in our home and I feel the finest investment I have ever made. (Signed and Affirmed Before E. F. W., Notary Public.)

* * *

MIGRAINE HEADACHES, HOT FLASHES, RHEUMATIC PAINS, BOWEL DISORDER, COLD, COUGH REPORT BY A. C. W.

I have used Visible Spectrum since October 1943. It has proven most successful for all kinds of ailments. Migraine Headaches and Hot Flashes due to Menopause, are eliminated considerably. After a few Tonations, Headaches and Hot Flashes appeared much weaker and far apart. Rheumatic Pains are completely eliminated. I am able to stretch my Left Arm in all directions again, which I was unable to do for the last five years. The functioning of the Bowels is completely restored to normal. Common Colds are cured within a day. No more Cough for 3 weeks after a Cold; in fact, no more Coughs at all. My deepest gratitude goes to the Originator — Colonel Dinshah; long may he live! (Signed and Affirmed Before J. G., Notary Public.)

* * *

LUNG DISORDER, LUNG SPOT, PUS, EXHAUSTION, BURN REPORT BY G. F.

I, G. F., age 33, went to my Medical Doctor for about three years and steady for about two years. He diagnosed my case as Lung Trouble. He had X-Rays taken. Not satisfied, I went to another Medical Doctor, who said that I have a Spot on my Lungs, that was eating away the Lungs and that there was Pus formation. I coughed day and night, which sapped my strength and I was many times unable to stand up or even sit down; I was completely exhausted. Thru my brother-in-law I heard about Visible Spectrum and I decided to obtain an Equipment. I availed myself of the Free Advice from the ----- Institute for about two years. Within these two years of using exclusively the Visible Spectrum, I gained in weight, my Lungs felt normal and I did not cough anymore; I just was feeling better and better. I finally went to another Medical Doctor who took another X-Ray fotogram of both of my Lungs. He showed it to me and said: "Your

Lungs are perfect." I am now working steady for the last twenty months and just feel fine. I contribute my recovery of this Lung condition exclusively to the proper use of my Color Projector Equipment. I would never part with my Equipment for any consideration and I consider it a great blessing to mankind. I also want to mention the terrible Burn which Mrs. P. B. suffered by pulling a wash boiler full of hot water over her Legs. I was there and helped to carry her up from the cellar. I saw with my own eyes this marvelous recovery within a few weeks of this terrible Burn, that covered her entire Leg from Hip to Foot. It healed without the use of any Doctor attending or any medicine, just using Visible Spectrum exclusively and there is no Scar or disfiguration of the Skin, etc. (Signed and Affirmed Before C. M. P. N., Notary Public.)

* * *

EMACIATED BODY, TUBERCULOSIS, THYROID ENLARGEMENT REPORT BY N. F.

Before I used the Visible Spectrum, I was too weak to work. Slowly after its use, my emaciated Body took on new strength and vigor, until today I am able to compete in physical activities with people many years my junior. For years the Doctors had told me I had Tuberculosis. My Throat was so weak, that I was unable to hold a conversation with anyone, for any great length of time. Today, it seldom pothers me. Gradually, people who once had shunned me like a leper, began to seek my company, until now, I am forced to forego many social activities for lack of time. Visible Spectrum lifted my heart out of the dregs of despair into a realm of poise and self-confidence. That and more has been my heritage through Visible Spectrum. In two month's time I saw an Enlargement of my Thyroid Gland magically disappear before my very eyes. At first, one side shrank more than the other, because, it was closer to the "Light," so I had to turn my Body after that in order that both sides became normal at the same time. May the Visible Spectrum live through eternity, to help others, as I know it has and will help me! (Signed and Affirmed Before E. E. D., Notary Public.)

OUR STUDIO ACTIVITIES

EXPERIMENTER FINDINGS AND QUERIES MEETINGS OF THURSDAY, MAY 2, 1957

First Cleveland Ohio Studio

The Chairman having returned from vacation in Texas, was greeted cordially by the Members, although the attendance was small.

F. B. — I am following the advice of the Institute as outlined.

J. D. — I had a Cold and for two days tonated with Green Systemic; soon felt better.

A. M. — I had an Infection in my Finger that was hurt six months ago. I toned with Yellow Local and the Pus drained from the Finger and soon healed.

(From Volume 1 of our Text Books Set, Chapters 20, 21, 22, 23 on "One Page A Minute," "Diving Into Depths," "Birth Of Light" and "Point, Line, Triangle" respectively were read and discussed.)

Members — We all agree in knowing Dinshah to be a very brilliant man.

I thank you cordially for your appreciative expression; what I produced with my humble capacity, I presented to you and it is upto you now to increase your Studio attendance and put the knowledge into practical service of the sick.

* * *

First Detroit Michigan Studio

A. G. — Good evening, friends! We have new Member with us tonight — P. N. Welcome to our group, P. N. I am sure you will enjoy being with us. We try to make these Meetings as interesting as we can. Dinshah is with the New York Studio tonight. In fact, he is speaking to the Members in New York at this moment. I hope he will be with us some time this year; he said he would come. I shall start reading from the "Family Health Protector." Every Member should have this book; it costs only 25 cents a copy; you can get 4 copies for \$1.00. It is a good way to introduce our Science to new Members. There is a wealth of knowledge in this little book. (He then read from Article 44, beginning with "Man's Anatomy And Physiology Prove Him Herbivorous.") We like to stress the Rational Food Of Man, because, it is the food we eat that builds the chemistry of our bodies and keeps it in a balanced state. In the economic mess in which we are living at present, where most food is poisoned, adulterated or contaminated, life is made very complicated; but, we have to make the best of it and just look around for something suitable. From what I read to you, you can see that man was not made to be a meateater. If you compare his anatomy and physiology with that of animals, you find that man is made like a herbivorous animal and is not carnivorous. People ask "what do you eat when you do not eat meat?" Well, what do you eat if you **do** eat meat? You eat the vegetarian animals; why not eat the carnivorous like dogs and cats? It is our duty when we speak of our system, to speak about it in its true character. We point out the Laws underlying it. If man follows these Laws, he can attain and maintain a healthy body. Now, we may **tell** you these things, but, what you **do** is your business. If you violate the Laws, you have to take the consequences, for, whatsoever a man soweth that shall he

also reap. If you sow oats, you get oats; if you sow wheat, you reap wheat. There is a Law for all things — eating, sleeping et cetera. Man is familiar with most of these Laws, but, he disobeys them and thus reaps the inharmonics. If we all live according to the Laws that our Creator gave us, there would not be any delinquency, there would not be any criminals, there would not be any war, but, so far, we are far from this goal. Look at all vegetarian animals! They are beautiful, they have soulful eyes. Look at a deer, a horse, a cow! Then, look at the eyes of a carnivorous tiger, lion, et cetera! They are ferocious and repulsive in features, their eyes show cunning and treachery. An experiment was made by giving a cow roast beef mixed in her food; that cow stopped giving milk for 48 hours. Meat eating will also upset our system, but, we just do not pay any attention to it. The vegetarian animals are also the ones that have strength and energy, while the carnivorous ones are lazy. From the standpoint of economy alone, we should stick to the vegetarian diet. If you study the chart in this little book, you will find that beef contains 60 per cent. water, while legumes have only 14.5 per cent.; so, you get more of food value in the inexpensive legumes, while you get little of food value in the expensive meat and then, it is second hand food at that, for, the animal has to get its food from the vegetation of the land in the first place. There are five things essential to supply the needs of the body:

Proteins, which you get from legumes or nuts.

Carbohydrates, which you get from rice and grains.

Hydrocarbons, which you get from fats.

Mineral Salts, which you get from leafy vegetables;

finally, Liquid Solvents.

Two thirds of your intake should be solids and one third liquid. If you buy Coal, you would not want coal that gives you 84 per cent. ashes and only 16 per cent. fuel, but, when it comes to shoveling stuff in your body, you are not particular as to how much waste there is in it. Just imagine what really happens to your body, when you put the wrong stuff into it. What happens to those sensitive organs that have to sustain you, like the Liver, Spleen, Kidney, Pancreas and the like? Never drink while eating; drink after your meal. Yellow Split Peas make for one of the most valuable foods. You never become constipated when you stick to it; it has activating effect on the peristaltic motion of the Bowels. As most of you know, 80 per cent. of our ailments are caused by Constipation. Yellow is our remedy in Constipation. It will assist the Intestines to bring about movement, but, you will have to cooperate and stay on the one Color for at least a month. It takes time for the Body to utilize Color. The condition will disappear gradually. I like to bring to your attention Magenta, Purple and Scarlet. These play an important part in the Circulation of the Blood which passes through the Vessels inside. There are two points to consider — the type of Blood and the Blood Pressure. The Capillary System covers every part of your Body. If the Blood be too thick, it can not go through

those hair-like vessels and the Arteries will have to carry the heavy load, which will affect the Blood Pressure. Those three Colors mentioned will do the job of regulating the Blood Pressure. If the pressure be low, the Scarlet will increase it; if it be not needed, it will do no harm, because, the Body will not take it. Purple reduces the pressure, but, if normal, it will neither reduce nor increase it. Such is the wonderful quality of our System; you can never do any harm with it. If you take the wrong Color, you only waste the electricity. The Laws Of Selectivity will take only what is needed. You can notice that in Nature. The same Sun shines on all, yet the Cucumber is green, the Tomato is red and so on. Each selects the needed Elements. The Aura surrounds our Body and it is through the Aura that Color is utilized in our Body. Magenta on Area 4 and Area 18 will build and stimulate the Aura. For this reason alone, it is important to take the Magenta. High or Low Blood Pressure is not a Disorder; there is some condition in the Body that causes that Disorder; so, when choosing a Color for Tonation, all the functions of the Body have to be considered. If Frontelim is too frequent, Purple will remedy it; if scanty, Scarlet will activate it. Purple is also valuable in Epilepsy. I told you about the case of a young man with Epilepsy. The cause was masturbation; Epilepsy is generally a Sex Disorder.

E. K. — What about Epilepsy in children?

A. G. — In children, it may be hereditary. In Prostate Disorder, the Medical Doctors get very little results. Scarlet or Purple is valuable in this condition. You do not tonate with Color during Menstruation Period, because, the Body is in a cleansing process and Tonations at that time will not have any effect on the ailment you may have. The only time you tonate during that period is in case of severe Pain or if the Flow be heavy; then, you may use Purple; if very scanty, Scarlet will increase the Flow. Now, we shall have Case Reports.

W. R. — I hurt my Back moving the car; was pushed against the house. I tonated with Turquoise, but, did not get much result; Ratio was 63-16.

A. G. — If your Back be bruised and dark, it shows too much Indigo and Orange would be the remedy; but, in your case, there was no Bruise and Indigo would help.

I. G. — My little girl had Fever, Running Nose and Cough; Ratio 3-1. Tonated with Turquoise, Magenta and Yellow. After tonating with Yellow, she broke out with Measles; she is fine now. I had a miscarriage. When Bleeding first started, I tonated with Indigo, but, it did not stop it. I called A. G.; he advised Scarlet. After 5 days, the Flow stopped. I am feeling fine, but, am still tonating with Green and an occasional Scarlet. In this case, I could see that the Body does not take the Color that is not needed, because, I had used Indigo in heavy Bleeding and it stopped it in 15 minutes, but, in my case Indigo had no effect, because, it was not needed.

A. G. — Fever is the result of some condition in the Body. As a rule, you use Turquoise, but, if the Elimination is poor, you have to use Yellow. In this case, Yellow brought out the Measles. Measles and all similar Childhood Disorders are a blessing. They give the child a chance to cleanse the Body from the dross that the child may have gotten from the mother, because, before birth, the child is completely dependent on the mother and her living habits will affect the child.

Z. B. — I have not been well for some time. I had an Eye Operation and a Cataract removed from one Eye. That Eye Disorder had come on all of a sudden. I have advice from Dinshah; the Eye Operation comes under Constructive Surgery. First, I tonated with Yellow and Turquoise, but, did not get much results. I read in Dinshah's Book "One Thousand Years Ahead" about using Indigo. I tried it and the second Tonation brought about a Menstruation Period that I did not have for years. I wrote to Dinshah and he advised 2 Tonations Green one day and 2 Tonations Indigo the next. Ratio 87-16.

A. G. — Your breathing is low. Do not strain yourself, but, try to breathe a few times more in a minute; that will give you some more Oxygen.

A. St. P. — I have Diabetes and am under the guidance of C. R. I am tonating with Yellow, Purple and Magenta and am coming along pretty well. An acquaintance who has Rheumatism very bad, asked me if Color could do anything for him and how long it would take to get results. He has been doctoring for quite a while. They even took off his Kneecap to relieve the Pain, but, it did not do any good. He has terrific Pain all the time and is continually taking Dope to relieve it, but, he says he can not go on like this much longer.

A. G. — In a case like this, nobody can make any promises. His Kneecap is removed, his Body is full of Dope; of course, nothing is hopeless and I am sure he would benefit greatly by our method, but, it would take time to remedy this condition.

R. K. — I have had my Equipment just a short time; Ratio 88-15. Frontelim 3 or 4 times daily, color normal; Backelim once a day. I have taken Purple on Area 4; that brings the Ratio to 72-18 and it stays that way for 2 or 3 hours; then, it changes again to about 88-15. I feel fine while the Ratio is 72-18; I have had a Leg amputated about 5 inches below the Knee.

E. R. — It sounds like there is an obstruction.

A. G. — I wonder if there be an Infection, it will raise the Kardoscil. Take Turquoise Systemic for a few days and then contact me. I like to see what reaction takes place.

C. W. — I wonder if Green Systemic would help in this case. It is strange that the Kardoscil goes up, while the Spiroscil goes down.

A. G. — Since Turquoise is mostly Green, it should be beneficial.

J. B. — Everybody in my family is fine, but, I have a question. I have an awful lot of wax in my Ears and sometimes, the Ears become blocked. I sprayed them with water with a little Boric Acid added, but, it does not seem to do much good.

A. G. — Put Cocoa Nut Oil into your Ears; that will soften the wax. Our Reporter E. K. has planned a trip to Europe late this Summer, to visit her mother in Germany. She asks for a volunteer to do the reporting during her absence.

(I. G. volunteered and was accepted by the Studio Commission as Reporter pro tem during the absence of E. K. in the months of August, September and October 1957.)

EDITORIAL

REMARKS

Yes, I shall be visiting your Studio right after our Fourth Annual Convention. For that reason, the date of your Meeting was changed from Thursday, August 1, 1957 to Thursday, August 8, 1957. In the New York Studio visit, 110 Members attended; let me see what you will accomplish! The food habits of the Occident are the main cause of the prevailing Disorders; Smoking and Dope habits increase the troubles. The "Family Health Protector" describes all very plainly. One point I must clear about eating and drinking. Do not drink anything without emptying the mouth of what you may be chewing at the time. If you act that way the liquid will help your digestion; the reason is that the Salivary Fluid has to mix with the solids for due digestion. We do not have to worry about the High or Low Blood Pressure; our Science took care of all that in the Kardoscil and Spiroscil Ratio. In our Science, we utilize the co:operative powers of Nature to take into our Body what is needed and to reject the otherwise. The Aura is nothing but the Emanations of the Chemical Elements in Activation in the Body. Epilepsy is an unbalanced condition of the Green and Magenta Waves. It is a chronic functional Disorder, characterized by Fits or Attacks in which there is loss of Consciousness, with a succession of Spasms. The Fit may last 5 to 25 minutes and the Attacks vary in frequency. Z. B. does not follow Rational Food Of Man. She should get our Cook Book and follow it. R. K. continues with wrong food habits. J. B. should send his own Chart. I thank I. G. for her volunteer services. She will be welcome to send the Reports.

* * *

First Merrill Wisconsin Studio

Upto the time of going to the press, no Report was received.

* * *

First Milwaukee Wisconsin Studio

K. B. — Did you all become straightened out about Daylight Saving Time? (Some Members did, but, some did not, so, K. B. gave the instruction which all understood.) Tonight, I want to talk about how to use your Equipment. Someone called me their motor did not run. (He then showed a Thermocept the glass of which was all covered with a film. He also showed a Bulb which was of 500 Watts, used in an Equipment built for 1,000 Watts.) That small size is not correct for that Equipment. Since we have some new Members here tonight, I wanted them to see what happens when the Equipment is not kept clean. This is from a Member who has been with us for some time. Do we have any Case Reports this evening?

L. S. — I have a case report of my 12 year old boy. It started out with a Cough and Fever of 102 degrees. I put Turquoise on him and in the afternoon his temperature went higher. The next day, I put Magenta and Turquoise on him and the Fever went down and the Cough cleared completely.

K. B. — You did not start out with Green?

L. S. — No, because, the temperature was so high.

K. B. — Most of the time, when you start out with Green, you will get results.

J. M. — I had an experience in January. I was ready to give up. I called H. S. and she told me the Colors to use. My family wanted me to go to a Doctor. I kept under the Light and went to a Chiropractor and he told me to go to a Doctor, saying: "Do not be scared; I want you to have a Cancer Test." I did not tell him I had Yellow Jaundice. I used Green and Lemon. I was so sick I did not think I might wake up the next morning. H. S. told me to keep on with the Lemon and here I am! There was a sediment in the Urine. Thanks to H. S.; I was so sick.

K. B. — Anything like that, does not come on overnight. Use this Light and stay on the Rational Food Of Man.

J. M. — After the Cancer Test came back, I was not at home; the Doctor told my husband it was Malignant Cancer. My family is worried, but, I feel fine; only, where he clipped me, that was sore for a long time.

N. F. — In January, I got Pains in my Chest and coughed up Phlegm. I used Lemon Systemic Front and Purple on Areas 4 and 18. Then, I used Green Systemic Front and Magenta on Area 4.

K. B. — When you do not get an answer on time, stay on the same Colors. Have we any more Case Reports?

A. B. — When a baby is teething, what Color is good for that?

K. B. — With Baby Teeth, they some times have Fever; then, use Turquoise.

H. S. — Our baby in California is fourteen months old; we used Yellow and is fine.

mix other healing methods with ours; they will never act in harmony; take one or another. J. M. did not send any Chart to the Institute. The Ball under the Arm method is clearly explained on Page 1180, of the Third Volume of our Text Books Set. I am seriously weighing in my mind the necessity of every Member having a Set of those Three Volume Text Books for reference as a Student of our Science. If the public would stop buying processed, sprayed, colored artificial products, under the Law regulating demand and supply, all such junk would disappear from the food stores. It is the fool public that maintains the profits in poisons.

* * *

First New York New York Studio

The Chapel Room of the Hotel Diplomat was filled with 110 Members.

R. D. — I am very happy to see so many members present. It took the magic name of Colonel Dinshah. I like to turn the Meeting right over to him. (As Dinshah entered he was greeted with applause.)

Dinshah — Worthy friends, I am here to serve you. I shall speak on no subject; it has to be brought up by you.

C. M. — I wrote to you.

Dinshah — I have your letter. I like to ask you: "What do you eat in the morning?"

C. M. — I have milk with sugar and whole wheat bread; for dinner I have rice and peas, vegetables, salad and fruit.

Dinshah — How much sugar do you use? Do you drink lemonade?

C. M. — I get so terribly thirsty from it.

Dinshah — Here is a case of a Diabetic. The opponents of our Science do not know what harm they are doing when they stop the Sufferer from Sugar in such cases.

C. M. — How much Sugar shall I take?

Dinshah — I shall have to make some proper explanation, so you may comprehend the startling difference between other healing systems and our Science. The public has been scared into believing that when Sugar passes in the Urine, it is Diabetes Mellitus. The only Medical Doctor who gave the correct definition of that Disorder, was the famous Doctor Sir William Osler. Said he: "To be called a case as of Diabetes Mellitus, the form of Sugar passed in the Urine must be Grape Sugar and it must be eliminated for weeks, months and years." In 1911, Dr. Frederick G. Banting, of Toronto, Canada, introduced as the "cure" of such condition, Insulin, a product of the Pancreatic Gland and the claim was made that one Shot of the drug made a total cure. He got for that "discovery" the \$40,000.00 Nobel Prize, but, soon it was announced that to maintain the "cure," another Shot should be given in 6 months. Today, as I am talking to you, the unhappy Sufferer is ordered to take 2 or 3 Shots daily and stop ingestion of all Starches and Sugars. Statistics of the United Bureau Of Census show

that since 1912 when the deaths due to the Disorder were 15.0 in 100,000 of the population, in 1934 went upto 22.1 and so on. Passing Sugar in the Urine is NOT Diabetes Mellitus. Under mental strain, worry, fatigue, emotional disappointment, digestive and assimilative disturbances, Sugar may be passed in the Urine of even a normal, healthy person. The Sugar passing out does not mean there is MORE Sugar in the Body, but, that what goes out is not assimilated. At such time, stopping the eating all Starches and Sugars would mean a genuine Carbo-Hydrate starvation. The entire miscomprehension in this phenomenon, is in the ignorance of the Healers about the Laws pertaining to Polarized Light and the behavior of certain crystals under such Light. All Starches and Sugars eaten by a person, are taken into the Liver — Area 7 — and stored therein in the form of a certain Chemical known as Glycogen. This product breaks into other Sugars, which are Hexoses with 6 Atoms of Carbon; when the call for Energy comes, among others Glycogen evolves Dextrose or Grape Sugar and Levulose or Fruit Sugar. The Chemical Formula of both these Sugars is $H_{12}C_6O_6$, with this remarkable difference that the Dextrose turns the beam of Polarized Light toward the Right, while the Levulose twists it to the Left. The very words "Dexter" and "Laevus" in the Latin language mean "Right" and "Left" respectively. It is the Dextrose that escapes in the Urine in Diabetes Mellitus, while the Levulose is consumed by the Tissues of the Body. Thus, when ALL Starches and Sugars are banned to the Diabetic, the Lungs which function through the Carbon and the Hydrogen, become defective in oxidation, Coma occurs and the deluded Sufferer eventually dies of Carbo-Hydrate starvation. I have, in this matter, one great satisfaction, since in 1920 I promulgated the principles involved in my original Science, that some learned professionals began to use some Sugar for their Diabetic Sufferers. Last year, in the Annual Convention of the American Association for Medico-Physical Research, in Chicago, Illinois, I had for my address: "Sugar Cure For Diabetes," which created a stir among the learned audience. So, C. M., you have to follow what suits best in your views. Also, when you send a Chart, give full history of the case and answer each question clearly. I am all alone and can not take the files out for reference for each case. I have thousands to serve. In many cases, in fact in most cases, I find the Members do not follow the Rational Food Of Man and even the instructions given. One woman, in Bridgeton, New Jersey complained she was getting no results from the Orange Systemic Front she was using. Being only 15 miles away from the Institute, I requested her to see me personally. She came and I asked her to demonstrate how she was irradiating the Orange Systemic Front. Judge of my astonishment when she told me that she irradiated fully dressed! Most of the cases we get as new Experimenter Researchers buying the Color Projector, after having lost several vital Organs or who failed to receive relief from other Systems. I had recently a man's case with 1 Back Elimination in 15 days! A woman's case moving once in 7 days and another reported

having 7 Backelims in a week, but, only 1 Frontelim in 7 days! I request you to be careful in filling the Chart, because, it is upon your own description that I have to depend on giving the proper guidance. Many cases complain they do not get the beneficial, expected results, although they follow strictly the Rational Food Of Man. Here is a recent instance of the "strict following"; I refrain from giving the woman's name or even identification, for obvious reasons.

"Dear Dinshah:

I am enclosing the report on the food I eat, as you asked. I get up at 6 A. M. and drink two cups of Warm Water. At 9 A. M., I take a tablespoon of imported Olive Oil, $\frac{1}{2}$ Grape Fruit, stewed fruit without Sugar, or a small bowl of 100 p. c. All Bran, with 3 ounces of Milk. Same thing every A. M. At 1 P. M., Lettuce, 2 Tablespoons of Cottage Cheese and fresh fruit or home canned fruit. At 3:30 P. M., an Apple or Orange. At 5:30 P. M., for dinner, Soup that I can eat and Vegetables and home canned fruit or Rice Pudding. At 10:30 P. M., I take a Tablespoon of Olive Oil and small dish of 100 p. c. All Bran and 2 cups of Warm Water. I drink Water with all meals. I have one good Bowel Movement every morning and I am very happy about it. From the time I was teen age, to about 50 years, I had a Fallen Stomach and just lived on diets. I only weighed 116 pounds, until I found a Doctor that took me off the diets and told me to eat anything and everything with his homemade Medicine and no diet. He built me upto 170 pounds and for the first time in my life I felt good; but, my Bowels never moved more than twice a week and then only when I took Laxatives. Two years ago, I was in the Hospital, with a bad attack of Gall Bladder Pains. After examination and tests, I had no Surgery and was again put on a strict diet. Olive Oil was against my Doctor's orders, but, I know it was good for me, which is why I take it. I have not been to a Doctor since I received the Light and when I get the Gall Pains, I take 15 minutes of the Orange Light and I feel fine. May be to me it will never be a cure-all, but, it sure helps me in all my Pains and Aches and if you want to discharge me, I will not feel bad about it. I will still try to help myself as best I can, because, I have already received lots of help from the Light and I would not part with it for anything."

Dinshah — This Sufferer is 5 feet 4 inches in height. Since a year, the Institute gives the new Projector Purchaser, a copy of the Dinshah Cook Book even free with the other literature, but, I may give a whole book store, yet, if the person will not study and duly follow the instructions, I can not go personally to each home and give the proper knowledge. To give such personal touch, I am now building two more rooms where my worthy daughter-in-law lives with her husband and their two little girls, so any Members needing the knowledge and attention may be housed there and learn our ways. I shall charge for the accommodation, including the lodging, boarding and laundry as well as the needed Tonations, a nominal \$5.00 per day. What is your opinion?

E. T. — I think you are making a mistake. In our time, such generous action is misunderstood. You should charge more.

Dinshah — My dear friend, our motto is: Happiness In Every Home, by service for health to the sick. The source of my power is your blessing. Here is a friend J. C. who came all the way from Philadelphia, Pennsylvania, with his wife to attend the Meeting. To be able to bring her here, he came to the Institute yesterday and had her affiliate as a Student Researcher and there she is to speak for herself; J. C.

J. C. — I was sick for 11½ years; I am under Dinshah's care now one month; I feel like a new person.

Dinshah — I am NOT against the Medical Doctors; but, they have no right to create a Healing Monopoly. L. F. asked at your last Meeting, if one could bring a Non-Member to the Meeting. Positively not. We are a Non-Stock, Non-Profit Organization and as such are not chartered or registered in this State. Under the Laws governing such status, we have to get permission from the Supreme Court Of New York to do business here. That is why I do not receive any money even here. What is your opinion about the Sufferers coming to Malaga, New Jersey?

L. F. — It is a wonderful experience not only for the sick, but, also for the healthy, to learn how to live; but, \$5.00 a day are not enough.

Dinshah — We shall keep it that way. People may help the Institute by buying our Books and Equipment. Money to me means nothing. I am happy to serve you. We are all children of the Almighty, as God is a Circle, Whose Center is everywhere, but, Whose Circumference is nowhere to be found. The word "God" is from the Anglo-Saxon "Goden," which means "Good." God is All Good.

M. W. — In our last Meeting, we had discussion about the Human Aura; can it be seen?

Dinshah — It can be seen by some people. It is like an oval Halo around everybody, but, it is not always of the same Color. The Aura of a loving person, is Magenta colored. The Aura changes with the Emotions. I shall be pleased to give a complete Course on our Science with the Experiments and Demonstrations, right in our Institute, if I can have about 20 enrollments. It may be in July. The fee will be the usual \$150.00 for the entire Course. Out of that, \$50.00 will be refunded to the Student, for Hotel and other expenses. We have no living accommodation or feeding facilities, but, we shall hire the hotel rooms and make other arrangements for their comfort. The whole Course takes 60 hours and the training will be 6 hours a day for 10 days.

M. W. — There is a drive on for taking X-Ray photograms of the Chest. I was asked how to determine if there be Tuberculosis, without taking such step.

Dinshah — In our Science, the character of the Circulation will show if there be Disorder. A Ratio of 1-4 or 1-5 is normal for an adult.

Systemic Orange will take care of the Lungs. Go near the ocean and you will note the Tidal Waves lifting billions of tons of water twice a day; the same powers affect the fluids in our Body. That is another matter about which our opponents have no knowledge, but, it is that which took me over 14 years to exemplify experimentally and which is now utilized each year in the preparation of the Respiratory Rhythm Guide formerly called the Favorscope. We have several leaflets which we issue in single lots free on request. The names of some of them are: Horrors Of Tobacco Smoking; The Therapeutic Value Of Light And Color; Life-Sketch In Short Of Colonel Dinshah P. Ghadiali; Inroads Of Socialism And Communism; Generous Press. In closing, I may say I am happy to be with you. May the blessings of the Creator of the Universe be on you and yours!

R. D. — Thank you, Colonel Dinshah, for being with us tonight. We hope to have that pleasure again in the near future.

M. W. — It was such a wonderful experience to have you with us again. Unfortunately, the time was too short; there were so many questions we wanted to ask you. Thank you and God bless you!

There is no reason why you may not have 110 Members at each Meeting. Let each Member shoulder own responsibility and spread the Truth to others and attend Meetings to encourage the others to attend. Follow our Science and its teachings and rules and you will bless the day you entered the fold. I was glad to be with you and when I have some Member in the work to watch my office in my absence, I shall deem it my duty to visit your Studio and other Studios in rotation. I thank you for your loving reception. It was a holiday in my busy life!

* * *

First St. Louis Missouri Studio

C. N. — There is no correspondence from the Institute. Tonight, as there are no special Case Reports or information about the use of the Color Projector, we shall deal with general subjects. The reason a dam is built, is to control the flow of a body of water; gates are built to increase or diminish the flow as it is necessary. The Law of Nature is just as exacting; when we break any Law knowingly or unknowingly, we pay the price. The Law may be broken with no immediate results, we may break the Law through a chain of events, over a period of time, then, when we begin to realize something is amiss and begin to do something about it, we may find that the Healing Process may be slow or fast. I do not approve of interfering, by forcing anyone to eat, when the person has a severe Stroke or for some reason is in a Coma, can not eat, naturally having no desire for

food or lost control of the functioning of the Lower Organs; then, I am of the opinion, that working against Nature, we are just prolonging their misery.

C. S. — I know of a lady who left an estate of \$300,000.00; she lived in a Coma for 3 years.

Member — What is the cause of Hardening of the Arteries?

C. N. — Wrong food, causing the wrong chemistry. A friend of mine told me that he gave up Smoking, at the Doctor's advice. He was tubercular and a father of 2 children. I wish to caution you about the Total Eclipse of the Moon, on May 13, 1957. Mind the instructions about what to do and what not to do; also, do not forget to add One Hour to the Respiratory Rhythm Guide because of the Daylight Saving Time.

Member — Is it permissible to loan or give the Visible Spectrum Researcher to a friend who seems interested?

C. N. — There is nothing wrong in that; better still, loan or give to her the Family Health Protector.

R. B. — What is the meaning of L and R marked in the Respiratory Rhythm Guide?

(C. N. explained and defined what the Inferior and Superior Flux Potency meant and how L and R referred to the breathing of the Left and Right Nostrils at certain times, being calculated according to the rising and setting of the Sun. He also explained about the Forward and Backward Operation of the Breathing Process.)

Member — In taking a position for Tonation, I think it referred to lying on the Left or Right side.

(C. N. gave further explanation.)

Member — I have been reading about Light, its action, Elements and the like in the Encyclopaedia Britannica. The pioneers were experimenting more than 150 years ago.

C. N. — Dr. Edwin D. Babbitt had a certain measure of success in the last century, but, it was by attuning the Glasses which Dinshah brought forth that made Color in the field of therapeutics successful. There is a great difference in an incandescent electric light bulb and the fluorescent tubes which are filled with certain gases. As the electrical sparks set off and the gas particles bombard each other, the latter causes them to irradiate. That type of lighting is not good for our work.

Member — Did you hear that sitting close to Fluorescent Lights, some times causes Eczema and Dandruff?

C. N. — No.

Member — What causes Eyes to water?

C. N. — Let the Members answer.

(The Members gave as the reason: "Tear Glands were working overtime"; "Eye Strain"; "What is the age of the Sufferer?")

Member — 70 years.

(Answers came: "Something decidedly wrong with the chemistry"; "Plenty of Vitamin C needed.")

C. N. — Vitamins have no part in our Science. Eating habits should be corrected.

Member — That man eats according to the Rational Food Of Man.

C. N. — Use Turquoise Local; wash Eyes with cold water; also Green Systemic, then, Lemon Local.

Member — My wife is very nervous; what shall I use for it?

(Discussion was had on the cause. She was 56 years old. She was grieving over the sudden death of a niece who was killed in an Accident; also she is worrying over a brother who is very ill and is on the verge of dying.)

C. N. — Do you think the Visible Spectrum would be helpful?

Member — They had been trying to convert the man for years, suggesting to quit Smoking, change his habits, but, to no avail.

F. B. — Can my Wood case Projector be traded in for the new model? It is so bulky and as we moved into smaller quarters, the room is so small, they can hardly turn in it.

C. N. — There is no trade in. The only way is to buy a new one or a second hand one.

(Discussion arose as to why could not a trade in be for Color Projectors, when there is for furniture and automobiles.)

V. S. — The reason because furniture is traded in as it becomes old; in case of automobiles they are beyond repair or too costly to keep them up, but, with the Light Projector, regardless of what model one has, there is practically no expense, except the replacement of the Bulb; all operates with perfect efficiency.

C. N. — There is no resale value; the only thing to do it to get a new one, junk the other with the exception of the Slide-Carrier, which is the only thing of value; keep that.

K. S. — I came in late. I slid down a stairway and my Leg was black and blue. Orange and Turquoise was used.

Member — What can be used for Poison Ivy?

C. N. — Green or Lemon Systemic, Turquoise and Magenta.

We must abide by the Laws of Nature to receive benefit. Sickness of any kind indicates by its very existence transgression or violation of some Law of Nature. There is no escape. In every Studio Meeting, whenever any Member speaks, for the record there must be the identification of the Member; just say your first and last names and then speak what you

want. Then, when the Reporter sends the Report, knowing who asked what question, I can refer to that Member's file and reply intelligently. You are all Members, but, about whom shall I refer? Let the **Reporters of ALL STUDIOS** enforce this rule of debate and in the Report mark clearly the name of the questioner. Visible Spectrum Researcher is a magazine for the public and being copyrighted each issue in the Library Of Congress, in Washington, D. C. is a reference book open to all. The Respiratory Rhythm Guide is issued solely to Registered Graduate and Experimenter Researchers in good standing for the current year, so, please, do NOT give it or loan it without being sure that the person has the current Membership Card. Fluorescent Lights are Lights with Chemical Radiations. I never work under that type of Light for reasons explained by me frequently. Emotional Disorders may be tonated after taking the Ratio and checking the Eliminations. Tonate with Systemic Blue. There is no market for War Model Wood Equipments. We have no outlet for any used Color Projectors, but, if one trades it in or sells it to another Member, we accept the transfer by assignment.

DINSHAH IMPARTIAL

(The Universe Through The Eyes Of Dinshah)

A TRUTHFUL, HONORABLE CONFESSION

It is well known to our Members that I have been called names by our opponents and every means is taken to deride my original Science of what is recognized by my Members as the Science of Therapeutical Precision, during the past 37 years of its public presentation. I have to claim nothing; the results are the witnesses. The material presented monthly in this little booklet in answer to "That's A Good Question," will speak for itself. Now, in the February 1957 issue of "today's health," the same learned professional gentleman, in answer to an inquiry from somebody about "Periodic Headache," gives an explanation that fell on me like a Bolt of Lightning with a Ton of bricks. Says he: "Despite the exact physiologic apparatus and tests that have been developed to study body functions, there is still much to be learned about the intricate relationships between the various cells, tissues, glands and organs of the human machine. If these secrets could be solved, science would still be only scratching the surface, for an even more obscure factor is how our conscious and unconscious thinking affects the physical relationships. The crowning difficulty is the fact that no two people think exactly alike in every situation." Well done, learned sir! You spoke the clear Truth. However, you might as well realize that while YOUR group is not conversant with the functions described by you, my Members, who studied my Science personally or even my Text Books are conversant and fully familiar with what formulates your puzzles. Can anyone in YOUR group accurately tell the function and purpose

of the Appendix, the Spleen, the Thyroid, the Liver, the Gall Bladder, the Pineal Gland, the Pituitary and why is it that every person is built of the same Chemical Elements, every person functions in life different — and please, let me know what is the difference between a Live man and a Dead man and whether it is the Heart that moves the Lungs or is it the Lungs that move the Heart and what motions either. If you so desire, I am ready to debate this on any public platform suitable to your convenience. May the Master of the Universe give you the honor of becoming my conqueror!

* * *

PERSONAL ADVISORY SERVICE

Among our Members, there are many who are not sick or unhealthy to benefit by asking for Personal Research Information for experimenting with the Color Projector, but, at times are beset with Problems which affect their Business or Family Life. To them this information may be of value. Since January 11, 1949, I have been the registered owner of the Personal Advisory Service and any Member of our Institute having any Business Problem or Family Problem will be given such service totally FREE, by writing to the Institute the character of the Problem and requesting its Solution, which will be tendered through the Visible Spectrum Researcher, **without** giving the name, address or any identification of the questioner. Please, understand that there will be no private correspondence about such matters. I have no facility for that.

* * *

COMPLIMENT FOR THE TEXT BOOKS SET

A Member C. B. sent this:—

“Your 3 volumes are beautiful. I see now why you sent me the invitation to the Home Study Course. They are really books to study slowly for the Experimenters . . . I enjoy the volumes anyway and I read them, only I find that I can read them over and over and every time I do, I wonder to myself if I really read them before — they are so condensed, so full of so much. You write like a genius! It is a pleasure to read what you write. I heard you speak, but, you write even better than you lecture! I am glad you wrote them for us.

SUGGESTIONS AND ENDORSEMENTS OF 1956

Endorsement By L. P., E1

I have been using Visible Spectrum Color Projector for the past 16 years and have always found it very beneficial to my family and myself in the time of need. I would not part with it for a million dollars.

* * *

Suggestion By R. B., E59

Set up your own Hospital, with qualified personnel, where authentic cases may be recorded in addition to lay person's endorsements.

* * *

Endorsement By N. C., E 554

I had Migraine Headaches and probably spent \$3,500.00 doctoring; saw Specialists and paid \$50.00 for a consultation just to have them tell me there was no known remedy for Migraine. Had these Headaches as long as I can remember, even as a small child. Do not recall exactly the date, but about six or seven years ago, a friend of mine who had one of your Machines, came to see me on business one day, when I had a dandy, saw how I was suffering, walking the floor and asked me if I wanted to try Color; I told him I would try anything, as I had taken about every drug on the market, even Morphine, with absolutely no effect. My friend put Yellow on my Head and Neck and then alternated with Yellow on the Head and Lemon on the Spine. My Headache left me with the FIRST treatment and I have not had a Migraine Headache since; have a dull Headache once in a while, but, this is due to my missing treatments and the dull Headache does not keep me from my regular work, besides Piano teaching. My daughter was greatly helped with her Hay Fever, using Lemon on the Bronchial Tubes over the Chest. My wife had trouble with her Eyes after a siege of the Flu. Eye Specialists in neighboring city, treated her Eyes; no result. Could not read headlines in newspaper; three treatments of Turquoise and she was reading fine print again. Could name a dozen more things the Color Machine has done for us.

* * *

Endorsement By M. J., E39

My married daughter ----- who has 2 Color Projectors of her own was cured from Tuberculosis. In October 1950, she had X-Rays taken of her Lungs; found out she had a Cavity in her Lung. We went to see ----- and he told her to use Orange Systemic Back and Front and Magenta on Areas 4 and 18. She had to report to the Health Department every 3 months, for more X-Rays. The last X-Ray was taken in October 1951 and the Cavity was healed without any Scar Tissue. The nurses just could not believe that her Lung was healed and no evidence of Scar Tissue or Calcium Deposits in the Cavity!

OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a **Membership Meeting**, at 8 P. M., in each of our following Studios, for reporting the results and findings of Personal Experiences in the use of the Visible Spectrum of Light and Color:—

First Cleveland Ohio Studio—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Jacob Dussing, Vice-Chairman, 1253 Melbourne Road, East Cleveland 12, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

First Detroit Michigan Studio—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Albert Greenham, Chairman, 30906 Robert Drive, Livonia, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elfriede Kolmetz, Reporter, 6735 Meadow Avenue, Van Dyke, Michigan.

First Merrill Wisconsin Studio—New Badger Hotel, 310 West Main Street, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1814 West Main Street, Merrill, Wisconsin.

First Milwaukee Wisconsin Studio—The Republican Hotel, "A" Hall, corner North Third and West Kilbourn, Milwaukee 3, Wisconsin. Frederick Knepprath, Chairman, 10120 W. Harrison Street, West Allis 14, Wisconsin. Otto H. Lutz, 3823 North Fifth Street, Milwaukee 12, Wisconsin, Vice Chairman. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

First New York New York Studio—Hotel Diplomat, Blue Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Die-drichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgefield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

First St. Louis Missouri Studio—Albrechts Hall, 3549 Arsenal Street, St. Louis 18, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Viola C. Steiner, Reporter, 9632 Tesson Ferry Road, Affton 23, Missouri.

**OPEN DECLARATION FROM THE EDITOR
DINSHAH P. GHADIALI**

NO WARRANTY, NO GUARANTY, NO LIABILITY

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over \$250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." \$125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
