INTERNET ARCHIVE

in a direct Road from the Beginning to the End; and as he is in no Danger of mistaking his Way, there is the less Occasion for affording him supernumary Lights in an Introduction like this.

BUT, fince we have undertaken to write a Preface, it may not be amils to observe therein, that very few Books contain So great a Variety in fo narrow a Compass. The Author appears to be a Man of great Reading, and deep Reflection, for most of the Books he cites, are equally scarce and curious; but then he does not, like many of the German Authors, content himself with barely embroidering his Margins, which may be sometimes done by transcribing those of other Writers, but generally gives you the Passages that make for his Purpose, and very often Characters of the Authors them felves, and this alone renders his Work of great Utility, to fuch as defire to be acquainted with the Merit of Books feldom to be met with, and which, on that very Account, are (welled to a high Price. ANOTHER remarkable thing in this Treatife is, the Choice the Author has made

Digitized by INTERNET ARCHIVE

THE GETTY RESEARCH INSTITUTE

made of his Quotations, which are as Entertaining, as they are Instructive ; nor is it easy to conceive without reading his Book, how it is possible for a Man to enliven so dry a Subject, as his seems to be in the Manner he has done. The Extracts he has given from Bacon the Monk, plainly shew, the prodigious Knowlege of that extraordinary Per(on, who, when all Europe was involved in the thickest Mist of Ignorance, seems to have possessed alone such a Treasure of Science, as would have rendered bim a very considerable Man, even in the most enlightened Ages, and may possibly engage some able Writer to give us such an Abridgement of his Works, as the ingenious and learned Doctor Shaw has done, of those of Chancellor Bacon, and the famous Boyle, which if judicioully performed, and illustrated as they are, with proper Notes, would do equal Service to the Republic of Letters, and Honour to our Country.

THE Stories he inserts of Eugenius Philalethes, Signor Gualdi, and the celebrated Flamel, are not only extreamly diverting, but may contribute also to the procuring

THE GETTY RESEARCH INSTITUTE

ing us some well-written History of the Pretenders to the Philosopher's Stone; which, as it would be a very curious and entertaining Piece, fo if written from good Authorities, and handled in a proper Manner, it might be of confiderable Use, since the Number of Operators in that Way, has of late Tears mightily encreased, especially in this Country, where there are many who have given them selves up to that delusive Study, though they endeavour to conceal them elves, and their Labours, with the utmost Secrecy, in order to avoid that Redicule, which generally attends the Professors of the Occult Sciences. In Germany, however, this kind of Learning is still in Vogue and Credit, and it is scarce possible for any one to obtain a confiderable Reputation as a Man of Letters, who has not a touch at least of Chemistry.

WITH Respect to the capital View of our Author, in recommending that Doctrine which he deduces from the Inscription in the Front of his Book, it is certainly managed with great Skill and Ingenuity, so that if the Reader should at last reject its

INTERNET ARCHIVE

its Probability, he must be obliged, notwithstanding, to confess, that the Writer has not employed his Pains to little or no Purpose, but has introduced so many curious Enquiries, and thrown out fo many valuable hints, that his Book must be allowed a Performance of great Merit, whatever becomes of Hermippus and his Secret. Of this, the Author him (elf (eems to be very well aware, and therefore, while he pushes his Arguments with the greatest Vigour, and appears evidently to have his Design much at Heart; he notwithstanding, takes all along such Precautions, as are neceffary to defend him from the Imputation of being a whimfical, conceited, or pedantic Writer, as almost any other Man would have been thought, who had undertaken such a Task. Upon the whole, there is in this Differtation, such a Mixture of serious Irony, as cannot but afford a very agreeable Entertainment to those who are proper Judges of Subjects of this Kind, and who are inclined to see how far the Strength of human Understanding can support philosophical

Digitized by

losophical Truths against common Notions, and vulgar Prejudices.

Having thus taken the same Liberty with our Author, which he has done with other learned Men, the whole is submitted to the Judgment of the candid Reader, who will, doubtles, retain some Tenderness for the Pains that have been taken for his Amusement, and not pass a harsh Censure on a Piece which we may boldly say, has nothing in it dogmatical, tedious, or offensive.

#### OR, THE

## Art of Preferving YOUTH.

T was the laudable Cuftom of the Antients, to perpetuate the Memory of all fingular Events, and efpecially fuch as in any Degree might be ufeful to Posterity by Infcriptions.

Thefe had a peculiar Stile, in which three Things were principally regarded; Succinctnefs, Elegancy and Clearnefs. It would have been inconvenient, and indeed prepofterous, to have drawn fuch Pieces into a great Length, confidering the Places in which they were Erected ; that is to fay, Markets, Temples, or public Roads; or, the Matter whereon they were infcribed, which was Marble, or fome other kind of hard or curious Stone. But, if Brevity was neceffary, Beauty was likewife convenient. Where there is nothing ftriking, the

the Memory foon lofes a Thought. To retain what we are told, we must receive at once both Pleafure and Instruction. This neatness of Stile, was peculiarly cultivated by the Antients. It came originally from the East, where all Science was taught in Parables and Proverbs. In Greece, they refined upon this, and laid down the Rudiments of Knowlege in Aphorifms. Amongst the Romans, this manner of teaching was much efteemed, and nothing more admired, even in the politeft Ages, than Sentences. If they were afterwards abufed, and improperly applied, this ought not to difcredit them, fince without Queftion they ever did, and always will, appear with the utmost Propriety in that kind of Writing of which I am fpeaking. Laftly, as to Perfpicuity, the Antients were exceedingly careful, and the Difficulties that now arife about the true meaning of fuch Monuments of their Learning as have reached our Times, are rather owing to the Miffortune of lofing fuch Accounts of their Cuftoms and Manners, as might have made them eafy and - familiar to us, than to any want of Clearneis in the Stile of their Infcriptions.

MEN of different Professions have employed themselves with different Views, in the Study of those large and curious Collections, which learned and industrious Persons have made of such remains

of

of antient Wifdom, as having escaped Oblivion, are now fafely reposited in the Cabinets of the Curious. Amongst these, we are chiefly obliged to the celebrated *Thomas Reiness*, who undertook to make a Supplement to the laborious Work of *Gruter*, and has therein preferved an infinite Number of valuable Inscriptions; and amongst the rest, this, which hath given Occasion to my Treatife.

## ÆSCULAPIO ET SANITATI L. CLODIUS. HERMIPPUS QUI VIXIT ANNOS CXV. DIES V. PUELLARUM ANHELITU QUOD ETIAM POST MORTEM EJUS NON PARUM MIRANTUR PHYSICI JAM POSTERI SIC VITAM DUCITE.

THE learned *Delechamp* has given us a different Account of this Infeription; according to him it should be read thus.

> L. Clodius Hirpanus, Vixit annos CLV. dies V. Puerorum balitu refocillatus Et educatus <sup>a</sup>. A 2

THE

\* In Notis ad. L. vii: c. 48. Plinii Natural. Hift.

## [4]

THE famous Cujas, gives it us in the following Manner.

> L. Clodius Hirpanus, Vixit annos CXV. dies V. Alitus puerorum anhelitu<sup>b</sup>.

THESE various Readings, though it cannot be denied that they affect the Senfe ftrongly, do not however, much concern the Subject. The first tells us, that L. Clodius Hermippus lived one hundred and fifteen Years, and five Days, by the Breath of young Women, which is worthy the Confideration of Phyficians and of Pofterity. According to the Commentator upon Pliny, the Name of this Long-liver was not Hermippus, but Hirpanus, and the Date of his Life one hundred and fifty-five Years and five Days, with this additional Circumstance; that he did not live by the Breath of young Women, but of young Men. The Lawyer again reduces the Life to the fame Standard, and contends only, that his Name was Hirpanus, and that he received this extraordinary Nourishment from the Breath of Youths.

IF therefore we take this Infeription as it stands by the Confent of all these Writers, it informs us of a Fact equally Curious and Important, viz. That

b Ad Juftiniani Novel, 5.

INTERNET ARCHIVE

That a certain Perfon, no Matter whether his Name was Hermippus, or Hirpanus, reached a very advanced Age, by the Ufe of the Breath of young Women, or of young Men. Now, whether this were a real Fact which actually happened, or whether it be the Invention of fome malicious Wit amongst the Antients, in order to exercise the Talents of Posterity, I concern not myfelf: It appears to me, in the Light of a Phyfical Problem. which may be expressed in very few Words, viz. Whether the Breath of young Women may probably contribute to the maintaining long Life, and keeping off old Age? This is what I propole to examine; this is to be the Subject of my Difcourfe, in which, if what I deliver be Entertaining and Ufeful, the Reader need not trouble himfelf much about the Truth or Falfehood of the Infcription.

BUT it will be neceffary, before we come to the ftrict Examination of this Proposition, to remove fome previous Difficulties out of the Way. In the first place, therefore let us enquire, whether the Term of Life be a fixed or moveable Thing. Some of the most learned amongst the Jews, have thought it absolutely determined by the Decree of God, and have alleged various Scriptures for the Proof of this. <sup>c</sup> The most Antient

· Manaf. ben Israel de term. vitæ.

Digitized by INTERNET ARCHIVE

Antient Philosophers, both in Chaldea and Egypt, thought the Life of Man depended upon the Stars, and by pretending to predict its duration, plainly fhewed, that they thought it abfolutely under the Influence of the Heavenly Bodies d. The Stoicks, if they meant the Power of the Stars, by what they stiled Fate, were also of this Opinion; but whatever they meant by Fate, most evident it is, that they thought the Life of Man, as well as every other Thing, depended thereupon e; and that confequently it was unalterable by any means, within the Compass of human Power. Now, if there be any Truth in these Opinions, if there be the leaft Foundation for any one of them, the Cafe is clear, that all further Enquiries are Vain; for to what end should we fearch out the most probable Means of extending Life, when we are certain, that this is a Thing beyond our Capacity? or at leaft, incertain whether it be or not?

IN order to open the Way to further Speculations upon this curious and important Subject, I will begin with the Solution of this Difficulty, and take upon me to prove, that contrary to the Notions of these Divines and Philosophers, there is no fuch Thing, as a fettled Term of Life by the Law of Nature; or which is the fame thing in other Words, by the express Will of Divine Providence.

Digitized by INTERNET ARCHIVE

<sup>&</sup>lt;sup>d</sup> Diod : Sicul : Hift : lib : 1 Diogen. Laert. <sup>e</sup> Plut. de placit. Philosoph. Diogen : Laert: Senec.

vidence. In the first place, I lay it down as an abfolute Certainty, that Contingency, is effential to that mode of Rule purfued by the Divine Power, in the management of fublunary Things. Caufes indeed neceffarily draw after them their Effects; but then I deny, that there is any Chain of neceffary Caufes, and becaufe it would require much Time and Space to eftablish this Doctrine generally, I will keep clofe to my Subject, and content myfelf with proving it, as to this particular Point. It is a thing agreed on all Hands, that the Law of Moles, propounded chiefly Temporal Bleffings, and amongst these, long Life; now this is absolutely incompatible with the Doctrine of a fix'd Term, and therefore if there be any Paffages in the Scripture which look this way, we must interpret them in fome other Senfe, for the part muft accord with the whole, and it is idle to allege a few detach'd Paffages against the Scheme of the whole Book. Again we are told, that God commended Solomon for praying to him for Wildom, rather than long Life, or for Riches, which plainly flews, that he might as well have afked for either, as for it; but if this Inference displeases, take the express Decision of God thereupon; who, in the fame Place, fays, that if Solomon, walked in the ways of David his Father, he would lengthen his Days f. Add to thefe

f 1. Kings. iii. 11, 14. Digitized by

thefe Arguments, that it was the conftant Practice of the beft Men, and fuch as most intimately knew the Will of God, to pray in Terms irreconcileable to fuch an absolute Decree. Thus Hezekiab defired that his Life might be spared <sup>g</sup>. Elias <sup>h</sup> and Jonab, that their's might be shortned <sup>i</sup>.

BUT, to put the matter out of Doubt, one need only confider, the Choice given to David, by the Prophet Nathank, of War, Peftilence, or Famine, in confequence of which, he chofe Peftilence; now, if there had been a fixed Time of Life, how could this Choice, have poffibly taken Place? All the Perfons who died of the Peftilence, muft, according to the Doctrine I am refuting, have died if there had been no Peftilence, becaufe the decreed Term of their Lives was expired. On the whole, therefore it is apparent, that a fixt Term of Life, is inconfiftent with the reafon of Things, which is what we call the Law of Nature, wherein, if I may be allowed the Expression, there is a fettled Contingency. It is contrary to the Principles of Religion, as deducible from the natural Light of our Understandings, and it is directly contrary to Revelation, fo that I take it for granted, that the most pious Man in the World, that will ferioufly confider these Arguments, must remain fatisfied.

<sup>g</sup> Ifaiah, xxxviii. 3. <sup>h</sup> 1. Kings, xix, 4. <sup>i</sup> Jonah iv, 3. <sup>k</sup> 11. Samuel xxiv, 13.

Digitized by INTERNET ARCHIVE

The other Argument I allege, is this; That fince the Authority of the Antients is out of the Cafe, if there be any modern Stoicks, who are ftill of this Opinion, they must fhew us the Grounds of it, and this, not from fuch Chimerical Notions as are laid down by the pretended Sages in judiciary Aftrology, but from the fettled and unqueftioned Principles of true Philosophy. When they do this, or at leaft, when they attempt to do it, it will be Time enough to examine how far this new Syftem of theirs is rational. In the mean Time, I will conclude this Point with that fettled and most reasonable Maxim of the Civil Law, That about Things which are not, and about Things which cannot be made appear, there is the fame Reafon; that is, there can be no reafoning about them, they must be confidered in the fame Light, fince nothing can be more idle, than to difpute about the Confequences of a Thing, before the Thing is made manifest, or we have any real ground for a Dispute.

W E have now done fomewhat towards eftablifhing the Foundation of our Doctrine; but there is ftill another vulgar Notion in our Way, which must be removed; or to speak more properly, explained. By this, I mean the prevailing Opinion that the Life of Man is limited to a certain Term, and because we fee People grow Old at a certain Age, by which I mean, grow

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

Infirm

Infirm and Decriped; for Oldnefs has not fo much Reference to Time, as to Condition; and I account him Old, who has loft his Strength, rather than one who is advanced in Years. But, becaufe I fay the Maladies that attend old Age, come on in most People at a certain Period, they are held to be neceffary; and if there were any Truth in this, we fhould be ftop'd again, here would be a new Barrier through which we fhould be able to find no Paffage, and when we talk'd of retarding old Age, People would expect we should make them Young again. It is requifite, therefore, that this Matter be explained, and fet right, and that the Reader be fatisfied how far the incommodities of Old Age are of Neceffity, and how far the Product of natural Caufes, which may be affected by the Skill and Art of Man.

THE human Body is a Machine, actuated by an immortal Spirit, and which is more to my Purpofe, fabricated by an Almighty Hand. It cannot be fuppofed, that this Dwelling fhould be fo flightly, or fo injudicioully contrived, as that it should wear out in a very short Space of Time. This does not feem very agreeable, either to the Nature of Man, confidered as a rational Creature, or with that infinite Skill and Wifdom which is evident in the Composition of the human Frame. When therefore the Divines fay, that Sin introduced Death, they feem to fpeak Philosophically; and

B 2

INTERNET ARCHIVE

and if I may be allowed to explain their meaning. I should be inclined to fay, that Difeases and Death are not incident to the human Body by the Will of God, or which is the fame Thing, by the Law of Nature, but were Superinduced by the Follies and Vices of Men, which carry in them naturally the Seeds of Death; and therefore, if it be an Evil, we ought not to accufe Providence, but our felves. Yet I will readily acknowlege, that taking Things as they now fland, and have ftood for many Ages paft, there is no Hope left of Immortality in this Body, or even of prolonging our Lives to three or five hundred Years ; but still I affirm, that there are no fettled Periods in Nature, no inevitable Laws which conjoin Weakness and Infirmity with a certain Number of Years; but that it is very poffible, nay, and very practicable too, for a Man to extend the length of his Life, much beyond the common Date, and that without feeling the incommodities of Age, for otherwife, this would be rather avoiding Death, than preferving Life.

To prove this, I fhall first make use of Reafon, and next of Experience : I shall make it evident by Arguments, that it may be so, and by Instances, that it has been so; and then if any Sceptic has a Mind to doubt the Truth of my Doctrine, I shall leave him in his own Road, where his Ignorance will infallibly bring upon him

Digitized by INTERNET ARCHIVE

him the just Punishment of his Obstinacy, an hastier Extinction of Life than he need otherwise have suffered.

ALL wife Men have agreed, that Nature, by which I mean the Wifdom of God, manifested in the Order of all Things, acts uniformly in every Refpect, and affigns proper Periods to all Things. Solomon fays, There is a Time to be born, and a Time to die "; a fhort Maxim, which may admit of a long Commentary. The Life of Man does not certainly confift in Eating and Drinking, in Waking or Sleeping, or in the indulging by turns the Gratification of his many Appetites; for if this was fo, the ufual Term of Life would certainly be long enough, and there have been actually Inftances of People who have been fo fatiated with the round of thefe trivial Actions, as to be weary of Life, before Death was at Hand, and in Confequence of this wearinefs, have haftned it. But as the Divine Old Man juftly obferves, Art is long, and Life is short "; that is, there feems to be no just Proportion between the Powers of the, Mind, and the Force of the Body. We hurry on from Infancy to Childhood; from Childhood to the Age of Man; from thence, to what is ftiled middle

<sup>m</sup> Ecclef. iii. 2. <sup>n</sup> Vita brevis, ars longa, occafio celeris, experimentum periculofum, judiciem difficile, Hippocrat. Aphorifm. I.

Digitized by INTERNET ARCHIVE

middle Aged, and then we decline a-pace into Feeblenefs, Mifery and Dotage. Can any Man think that this is the true order of Nature ? Has Nature given fo many Years to Pikes, to Eagles, and to Stags, nay, and to Serpents, at the fame Time that fhe denies it to Man? Be it far from us to believe this; let us rather flifle our Pride and Conceitednefs, and believe that the fhortnefs of Life, flows from the Weaknefs and Wickednefs of Man.

BUT it will be faid, that Death is not only the End of Difeafes, but that Old Age is as much a Difcafe as any other, and certainly brings it on. That the human Frame is fo Conflituted as not only to encrease and arrive at Perfection, but to decay alfo, and wear out. That the Flame of Life grows after a certain Time weaker and weaker; that the Solids lofe their Tone by Degrees, and that the Veffels grow cartelaginous, and become at last Boney; fo that Death, by Old Age, is a natural Thing °. Be it fo, I am not contending that Men may Live for ever, or that they may Live as I faid before, three or five hundred Years; but this I fay, that Old Age is the only Difeafe to which we are fubject by Nature; and that from this, it is very poffible Men may be much longer defended than they usually are by the help of Art. This

THE GETTY RESEARCH INSTITUTE

AGAINST the common Opinion, the most authentic Records of Hiftory enable me to allege, that though vulgar Experience be opposite to my Notions, yet that fhortness of human Life, which is now become common, was not fo always, nor is yet fo in all Places. I shall not dwell long on what is faid of the great Age of the Antidiluvian Patriarchs, I shall content myself only with a few Observations that are neceffary to my Purpofe, the Truth of which cannot be drawn into Difpute. In the first Place, let it be noted, that though Men lived to be then very Old, yet the Species was new. The human Body had been but lately taken out of the Earth by its Creator, and retained therefore a great deal of its primitive Strength. We fay commonly in our Days, that a Man who lives Faft, takes Pains to deftroy his Conftitution; and on the Principles of Moses, we cannot but allow, that the Fabric of Adam's Body must have been much ftronger, and better compacted than ours; and this it was, that preferved him fo long, after he had loft that Tree of Life, or Rule of Living which was fuited to his primitive State. My fecond Observation is, that these Patriarchs lived in another World; I mean a World otherwife conftituted than ours, and after another Manner; and therefore, what we are told of their Age, is not more incredible, than a Multitude of Facts which Experience and Evidence oblige us to believe

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

true.

true P. I thirdly observe, that, if with stronger Constitutions, and in a better disposed World, Men lived to various Ages, but most of them nine or ten Times as long as we; there seems to be no repugnancy in admitting, that by great care of our Constitutions, and our helping by Art the noxious Qualities of the several Elements as they are now disposed, Men may maintain as great a Distinction in the Periods of their Lives or Deaths.

IT is very remarkable, that not only the Sacred Writers, but all the antient Chaldean, Egyptian, and Chinese Authors, speak of the great Ages of fuch as lived in early Times, and this with fuch Confidence, that Xenophon, Pliny, and other judicious Perfons, receive their Teftimony without Scruple. But to come down to later Times; Attila, King of the Huns, who reigned in the fifth Century, lived to 124, and then died of Excess the first Night of his fecond Nuptials, with one of the most beautiful Princesses of that Age 9. Piastus, King of Poland, who, from the Rank of a Peafant, was raifed to that of a Prince, in the Year 824, lived to be 120, and governed his Subjects with fuch Ability to the very laft, that his Name is still in the highest Veneration amongst his Coun-

#### [ 18 ]

trymen". Marcus Valerius Corvinus, a Roman Conful, was celebrated as a true Patriot, and a most excellent Perfon in private Life, by the elder Cato, and yet Corvinus was then upwards of an hundred<sup>s</sup>. Hippocrates, the beft of Phyficians, lived to an hundred and four t: but Asclepiades, a Persian Phyfician, reached 150<sup>u</sup>. Galen lived in undifturbed Health to 104 w. Thefe Men do Honour to their Profession. Sophocles, the Tragick Poet, lived to 130 x. Democritus, the Philosopher, lived to 104 y; and Eupbranor taught his Scholars at upwards of 100<sup>2</sup>: and yet, what are thefe to Epimenides of Crete? who, according to Theopompus, an unblemished Historian, lived to upwards of 157<sup>a</sup>. I mention thefe, because if there be any Truth or Security in Hiftory, we may rely as firmly on the Facts recorded of them, as on any Facts whatever; and confequently, we have the ftrongeft Affurance, that even an hundred, or an hundred and twenty is not the utmost limit of human Life.

BUT what is ftill more to our Purpole, it is not this, or that Country, in which fuch aged Perfons are to be found ; we meet with them in many, I was going to fay, in most Climates. We have it on good Authority, that in Bengal, there lived a certain Peafant, who reached the Age of 335; and having received Alms of many Infidel Princes, had his Penfion continued to him by the Portugueze b in Cambaja. Pliny gives us an Account, that in the City of Parma, there were two of 130 Years of Age, three of 120, at a certain Taxation, or rather Visitation, and in many Cities of Italy, People much older, particularly at Ariminium, one Marcus Apponius, who was 150°. Vincent Coquelin, a Clergyman, died at Paris in 1664, at 112<sup>d</sup>. Lawrence Hutland, lived in the Orkneys to 170°. James Sands, an Englishman, towards the latter End of the last Century, died at 140, and his Wife at 120 f. In Sweden, it is a common Thing to meet with People of above an hundred, and Rudbekius affirms, from Bills of Mortality, figned by his Brother, who was a Bifhop, that in the small Extent of twelve Parishes, there died in the Space of thirty-feven Years, 232 Men, between 100 and 140 Years of Age g; which is the more Credible. Credible, fince in the Diet, affembled by the late Queen of Sweden, in 1713, the boldeft and beft Speaker among the Deputies, from the Order of Peafants, was confiderably above an hundred h. Thefe Accounts, however, are far fhort of what might be produced from Africa, and North America. But I confine myself to fuch Accounts, as are truly Authentic, and I affemble thefe Inftances, not to fhew my own Learning, or to gratify my Reader's Curiofity, but with a view to fatisfy him, that as the Fact is certain, Men may far transcend what are effeemed the common Bounds of Life, fo this bleffing of Longevity is not confined to one Climate or Region, and therefore we need not difpair of finding out the Art of prolonging Life, and keeping off the Decays of old Age in any Country.

IT may be perhaps, notwithftanding all I have faid, fuggefted, that in fuch a Cafe as this, which concerned Mankind in general fo much, and in which every Man would naturally think himfelf fo much interefted, if the Thing were at all poffible, this Art muft have been long ago found out, efpecially, fince in all Ages there have been a Race of Men, viz. Phyficians, whofe bufinefs it particularly was, to ftudy fuch Difcoveries. To this I anfwer, that fuch Prejudices as thefe, are the greateft

Memoir, Hiftor. 1713. Tom. ii. p. 336.

Digitized by INTERNET ARCHIVE

greateft Bars to Science, that many uleful Arts are but of very late Invention; and that if this was difcovered heretofore, it might be concealed from Posterity for very many Reasons. But besides, the Fact is quite the contrary; this Art was avowedly ftudioufly fought by the Antiens, and fome of them are faid to have difcovered it. Asclepiades the Perfian, whom I have mentioned already, was wont to declare, he accounted a Phyfician ignorant of his Profession, who could not defend himself from Difeafes; and this Notion he fupported by his own Example, having lived in the full enjoyment of Health 150 Years, and was then unfortunately killed by a fall down Stairs i. Mithridates, King of Pontus, pretended alfo to this Secret, and fo did many others. But the best Answer that can be given to all Scruples of this kind, may be found in the following Paffage from BACON, a famous English Monk, who lived in the 13th Century, who thus difcourfes on the Subject.

" THAT it is poffible to prolong Life, fays be, may thus be made Evident. By Nature Man is immortal, that is to fay, was fo formed originally, as that he might have efcaped Dying; and, even after he had finn'd, he could live a thoufand Years; in procefs of time, by little and little, the Length of his Life was abbreviated. "Therefore

i Sab. bel. lib. x. c. 8. p. 69.

Digitized by INTERNET ARCHIVE

#### [ 22 ]

" Therefore it must needs be, that this Abbre-" viation is accidental, and may confequently be " either wholly repair'd or at leaft in part. But if " we would but make Enquiry into the accidental " Caufe of this Corruption, we fhould find, it nei-" ther from Heaven, nor from ought but want of " a Regimen of Health. For in as much, as the " Fathers are Corrupt, they beget Children of a " corrupt Complexion and Composition; and " their Children, from the fame Caufe, are cor-" rupt themfelves, and fo Corruption is derived " from Father to Son, till abbreviation of Life " prevails by Succeffion. Yet for all this, it does " not follow, that it fhall always be cut fhorter " and fhorter, becaufe a Term is fet in human "Kind, that Men should at the most of their "Years, arrive at fourfcore; but more is their " Regimen, which confifts in these Things, Meat " and Drink, Sleep and Waking, Motion and " Reft, Evacuation and Retention, Air, and the " Paffions of the Mind. For if a Man would " observe this Regimen from his Nativity, he " might live as long as his Nature affumed from " his Parents would permit, and might be led to " the utmost Term of Nature, lapfed from original " Righteousnefs; which Term nevertheless he " could not pass; because this Regimen does not " avail in the leaft against the old Corruption of " our Parents. But it being in a manner impof-" fible.

Digitized by INTERNET ARCHIVE

" fible, that a Man fhould be fo governed in the " Mediocrity of thefe Things, as this Regimen of " Health requires, it must of necessity be, that " Abbreviation of Life come from this Caufe, " and not only from the Corruption of our « Parents.

" Now the Art of Physic determines this " Regimen fufficiently. But neither Rich nor " Poor, neither Wife Men nor Fools, nor Phy-" ficians themfelves, how fkillful foever, are able " to perfect this Regimen, either in themfelves, " or others, as is clear to every Man. But Na-" ture is not deficient in Necessaries, nor is Art " compleat; yea, it is able to refift and break " through all accidental Paffions, fo as they may " be deftroyed, either altogether, or in part. And " in the Beginning, when Men's Age began to " decline, the Remedy had been eafy; but now, " after more than five thousand Years, it is diffi-" cult to appoint a Remedy.

" NEVERTHELESS, wife Men being moved " with the aforefaid Confiderations, have endea-" voured to think of fome Ways, not only a-" gainft the Defect of every Man's proper Regi-" men, but against the Corruption of our Parents. " Not that a Man can be preferved to the Life of " Adam, or Artephius, becaufe of prevailing Cor-" ruption : But, that Life may be prolonged a " Century of Years, or more, beyond the common

Age Original from THE GETTY RESEARCH INSTITUTE

66

Age of Men now living, in that the Infirmities
of old Age might be retarded; and if they
could not altogether be hindred, they might be
mitigated, that Life might ufefully be prolonged, yet always on this Side, the utmoft
Term of Nature. For the utmoft Term of
Nature is, that which was placed in the firft
Man after Sin, and there is another Term from
the Corruption of every ones own Parents.

" IT is no Man's Lot to pass beyond both these " Terms, but one may very poffibly overcome " the Term of his proper Corruption. Nor yet " do I believe that any Man, how wife foever, " can attain the first Term, though there be the " fame poffibility and aptitude of human Nature, " to that Term which was in the first Man. Nor " is it a Wonder, fince this Aptitude extends it-" felf to Immortality, as it was before Sin, and " will be after the Refurrection. But if you fay, " that neither Aristotle, nor Plato, nor Hippocrates, " nor Galen, arrived at fuch Prolongation : I an-" fwer you, nor at many mean Truths, which " were after known to other Students ; and there-" fore they might be ignorant of thefe great " Things, although they made their Attempt. " But they bufied themfelves too much in other " Things, and they were quickly brought to old " Age, while they fpent their Lives in worfe and " common Things, before they perceived the " ways

INTERNET ARCHIVE

ways to the greateft of Secrets. For we know
that Ariftotle faith in his Predicaments, that the
Quadrature of the Circle is poffible, but not
then known. And he confeffes, that all Men
were ignorant of it even to his Time. But
we know, that in thefe, our Days, this Truth
is known; and therefore, well might Ariftotle
be ignorant of far deeper Secrets of Nature.
Now alfo, wife Men are ignorant of many
Things, which in Time to come, every common Student fhall know. Therefore, this Objection is every way Vain <sup>k</sup>."

SUCH were the Sentiments of this very great and very knowing Man, in Times of the deepeft Ignorance and darkeft Obfcurity; and fo throughly was he fixed in these Notions, and had attained fo many Lights from the Study of the Arabian Writers, or rather of the Greek Phylicians Labours, digested into the Language of that Nation, that he afterwards wrote an express Treatife on this Subject 1, of which I shall have frequent Occafion to fpeak, and therein fuggefted many admirable Precautions for the Prefervation of Life, and avoiding the Infirmities of old Age. It is then certain, at leaft, that we are not purfuing a Shadow, or engaged in a clofe Search after an empty Chimera; there may be fuch a Thing as the Art we D would

<sup>k</sup> Roger. Bacon. De vigore Artis & Naturæ. Prolongatione Vitæ &c. 1 De

Digitized by INTERNET ARCHIVE

would reach, and it is not impoffible, that the Methods fuggefted to us by the *Roman* Infcription, may be the great Secret. In order to difcern the Truth of this, or to fpeak more correctly, in order to difcover how much of Truth there is in it, we ought first of all to examine carefully the Nature of human Breath, what Force it has, and what mighty Feats may be expected from it, fince the Infcription tells us, the long-lived *Hermippus* owed his Vivacity to the Nourifhment he received from the Breath of Girls, or if we take in the various Readings of the Infcription to the Breath of young People of both Sexes.

In order to come to a thorough Knowlege of this Matter, we must confider first what the Breath is, and we fhall foon learn, that as Man lives by Breath, fo that Breath is nothing more than Air drawn in, and after paffing through the Lungs, thrown off again, that we may draw in fresh. I do not tye my felf here to Physical Terms, or affect a technical Manner of fpeaking; the Subject on which I write, is of general Concern, and I would therefore express my felf in a Language that may be generally underflood. This Air, when received into our Bodies, according to fome Phyficians, nourifhes the Lamp of Life; but according to all, caufes the circulation of the Blood, and other Juices upon which Health and . Life depend. On the other Side, the Air that we refpire, and which we commonly call the

Breath

" lated in the Hiftory of Plants, concerning the " furprizing Effects of Effluvia. The Shade of " the Walnut gives the Head-ach, and makes the " Body Coftive. The Effluvia of the Poppy " procure Sleep. The Vapour of the Yew is " reputed Mortal to those who Sleep under it; and " the Smell of Bean Bloffoms, if long continued, " diforders the Senfes. The ftrong Action of the " Sun upon Plants, certainly raifes Atmospheres " of great Efficacy, by means of the Spirits it " diffuses; and the Motions of the Winds carry " them to a great Diftance. The dark Shades of " thick Woods, where Vapours are contracted, " occafion various Difeafes, and often Death to " those who refide among them, as appears by " melancholly Examples in America, which a-" bounds with poifonous Trees. For this Spirit " of Plants, is a Thing peculiar to each Species, " abfolutely inimitable, not producible by Art. It " has, therefore, Virtues peculiar to itfelf, but " fuch as are ftrangely agreeable to the human " Spirits " ".

IF the Smell of Vegitables have fuch high Effects, much ftronger furely may be expected from Animal Odours; and as to the Effects of human Breath, we know from Experience that they are very extraordinary. It is generally thought, that in

<sup>m</sup> Boerhaave Elementa Chemiæ,

in the Cafe of Epidemic Difeafes, the infection is propagated by the Breath ", and it is faid to have been the Practice of wicked Nurfes in the Time of the Plague, to catch the dying Breath of their departing Patients in Lawn Handkerchiefs, for the very worft of Practices; and if human Breath when fetid and corrupt, is fo potent, why should we conceive it void of Efficacy, when Perfons are in the freeft State of Health? Every body knows how grateful and refreshing we difcern the Breath of Cows to be, which is thence fuppofed, exceedingly wholefome; and as the Fragrancy of young Peoples Breath, who are brought up under a proper Regimen, falls little fhort of this, one may very reafonably fuppofe, that it partakes of the fame Virtues.

Now to apply thefe Principles to the Matter at prefent under our Examination. It is, I think, allowed by fuch as are beft acquainted with the Secrets of Nature, that there is a very brifk and lively Motion in the Blood of young People; to which, according to the Laws of Animal Oeconomy, Health, Vigour, and Growth, are attributed. On the other Hand, a Decay of this lively Motion, and in confequence thereof, a fluggifh Circulation, which by Degrees ceafes altogether in the fineft and finalleft Veffels, is held to

\* Hodges de Peste, Prosper Alpin. Histor. Natural Ægypt.

Digitized by INTERNET ARCHIVE

to be the principal Caufe of the stiffness in the Mufcles, which creates that wearinefs and want of Force, that is the great Incommodity of old Age. There feems therefore, to be nothing forced or abfurd, in conceiving that the Warm, Active, and Balfamic Particles thrown off by the Lungs of young People into the Air, which they Refpire, may give it fuch a Quality, as when fucked in again by a Perfon in Years, shall communicate an extraordinary Force to the circulating Humours in his Body, and fo quicken and enliven them, as to beftow a kind of reflective Youthfulnefs, which may for many Years keep off and delay those Infirmities, to which People of the fame Age are generally Subject. The more we confider this Doctrine, the greater Care we take in comparing Caufes and Effects of the like Nature, and the clofer we attend to fuch Experiments as feem fitteft for the clearing up of this Matter, the more we shall be fatisfied of the Truth of this Conjecture, and the more credible this Invention of Hermippus will appear.

I am very fenfible, that there are many vain, ill grounded, and fantaftic Notions that prevail among idle People, in relation to the Breath; fome have fancied that Socerers have a Power of fafcinating therewith, fuch as they breath upon, and therefore, in many of the Books which treat of Witchcraft, this is ufually thrown in as a Circum-

ftance;

Digitized by INTERNET ARCHIVE

stance; neither is it a new, but an ° old Piece of Superfition, which has subfifted in the World many hundred Years before the late Affair in France, where Mifs Cadiere attributes her Poffeffion, to the Breath of the Prieft P. We are likewife told of Nations in the Indies, who cure all Difeafes by breathing on fuch as are affected with them; but this ought to be no more regarded than what we meet with in Pliny, of another Indian Nation, who lived towards the Sources of the Ganges, who have no Mouths, and who are nourifhed by fweet Savours 9. These are either abfolute Fictions, or allegorical Accounts, which at this diftance of Time, and perhaps, when Pliny himfelf wrote them, were not underftood. He gathered most of his Facts from the Greek Writers, and they frequently difguifed, as they fometimes falfified their Narrations. But thefe Fictions, which every body can difcern, ought not to prejudice Matters of Fact, of the Truth of which, any Enquirer may be fatisfied.

THERE are in Spain, a Race of People, or as fome Writers fay, an Order of Knighthood, ftiled Salutadores, who pretend to cure Wounds by breathing on the Patient, and repeating certain Prayers,

<sup>·</sup> Pfellus de dæmon.

P See the feveral Factums in that famous Caufe, in which this Bufinefs of Fafcinating by the Breath is largely treated. 4 Plin. Hiftor. Natural. lib. vii. c. 2. Cæl. Rhod. Antiq. Lect. lib. xiv. c. 21. The Name given to this Nation by thefe Authors, is the Aftomes.

Prayers, which they affirm were taught by St. Elmor. The Church of Rome has condemned this Fanatical Practice, and fo do I; but there is another fomewhat related to this, which, whether Nature, or Chance first introduced into the World, is uncertain but which is not like ever to wear out; and that is, breathing on People in a Swoon, in order to bring them to themfelves, which is found to be very effectual, as from natural Caufes might well be expected. Let us then in all Cafes of this Nature, diffinguish between Reason, and report vulgar Opinion, and the Senfe of capable Judges, the Practices of Mountebanks and Deceivers, and Deductions from Phyfical Principles, by Men of Learning and found Senfe. I do not however, deny, that popular Remedies have found Admittance into Phyfic, and ought there to be retained; for, in Phyfic as well as in Chemiftry, the Effects of Medicines are confidered as Experiments, upon which wife Men Reafon, and affign the Ufes, though there might be another Sort of People who first found them out; it is one Thing to prefcribe rationally, and another to be lucky in Cures. Hoffman and Boerbaave, are the most different People in the World from Paracellus and Van Helmont, who yet, were very extraordinary Men in their Way.

I

I do not imagine that *Hermippus*, by reafoning, found out this Remedy againft old Age; I am inclined rather to think, it found out him, that is to fay, by vigorous Effects, he was led to the Caufe, and by feeling himfelf, revived by this Medicine, taught the Knowlege and Efficacy of it. If one was difpofed to purfue the Method of the Antients, and to drefs up this Story in the Garb which *Plato* would have given it, one might relate it thus.

WHEN the blooming Thy/be, whom the Graces adorn, and the Mufes inftruct, converfes with the good old Hermippus, her Youth invigorates his Age, and the brifk Flame that warms her Heart, communicates its heat to his, fo often as the lovely Virgin breaths, the kindly Vapours fly off full of the lively Spirits that fwim in her Purple Veins; thefe old Hermippus greedily drinks in, and as Spirits quickly attract Spirits, fo they are prefently mingled with the Blood of the old Man. Thus the Vapour, which but a Moment before was expelled by the brifk beating of the Heart of Thyfe, is communicated by the Æther to Hermippus, and paffing through his Heart, ferves to invigorate his Blood, fo that almost without a Metaphor, we may fay, the Spirits of Thy/be give Life to Hermippus. For, what is there more easy to apprehend, than that the active Spirits of this brifk and blooming Maid, fhould, when received from the Air, thaw the frozen Juices of her aged Friend, E

THE GETTY RESEARCH INSTITUTE

## [ 34 ]

Friend, and thereby give them a new Force, and a freer Paffage; and thus *Hermippus* poffeffing at once the Strength his Nature retains, and borrowing fresh Spirits from the lovely *Thysbe*, what Wonder that he, who enjoys two Sorts of Life, should live twice as long as another Man ?

SUCH had been its Appearance, if we had derived this Fact from a *Grecian* Sage, and then perhaps, it had been honoured with numerous Commentaries, and laboured Explications. But the *Romans* were a graver People, they contented themfelves with delivering Truth in the Language of Truth, and thought, that like all great Beauties, fhe looked beft in a plain Drefs.

HISTORY informs us, that very many who fpend their Time in the Inftruction, and of confequence in the Company of Youth, have lived to great Ages; thus Gorgias, the Mafter of Ifocrates, and many other eminent Perfons, lived to be 108; the year before his Death fomebody demanded in his School, how he had been able to fupport fo long the tedious Burthen of old Age; the Sophift replied, that he regretted nothing he had done, and felt nothing of which he could reafonably complain; my Youth, faid he, cannot accufe me, nor can I accufe my old Age<sup>s</sup>. His Scholar Ifocrates,

Plin. Hiftor. Natural. lib. vii. c. 48. Valer. Max. lib. viii.

crates, in the 94th Year of his Age, published a Book, and furvived that Publication four Years, in all which Time he betray'd not the least Failure, either in Memory or in Judgment; but as he had long lived, fo he died with the Reputation of being the most Eloquent Man in Greece t. Xenophilus, an eminent Pythagorean Philosopher, taught a numerous Train of Students, till he arrived at the Age of 105, and even then enjoyed a very perfect Health, and yet he left this World before his Abilities left him ". Nicholas Leonicenus read the Phyfic Lectures at Ferrara, in the laft Age, upwards of 70 Years, and Languis tells us, that when he heard him, he was fomewhat above 96, and to a Perfon who afked him, by what Rule he had acquired this green old Age, he answered, by delivering up my Youth chaft to my Man's Eftate w. Platerus tells us, that his Grandfather who exercifed the Office of a Præceptor to fome young Noblemen, married a Woman of thirty, when he was in the 100 Year of his Age. His Son by this Marriage, did not ftay like his Father, but took him a Wife when he was twenty; the old Man was in full Health and Spirits at the Wedding, and lived fix Years afterwards x. Thefe are inftan-

an ancient Greek Poet, though he was ten Years younger than myfelf, was admired and celebrated for his having wrote a Tragedy, why fhould I be efteemed lefs Happy, or lefs myfelf, who have compofed and Publifhed a Comedy? When I am confident, the fame Poet, though he was ten years Younger than I am, yet had not a better Share of Health, or a livelier Imagination <sup>y</sup>. I make ufe of the Authors own Words, becaufe *Cornaro* muft of all others, have beft known himfelf, and the very Spirit he fhews in reciting thefe Things, is a moft evident Proof of the ftrength, vigour, and youthfulnefs of his Conftitution. I will, however, mention another more modern Inftance.

Francis Secardi Hongo, ufually diffinguished by the Name of Huppazoli, was Conful for the state of Venice, in the Island of Scio, where he died, in the beginning of 1702, when he was very near 115. This Man was a Native of Cafal, in the Montferrat. He married in Scio, when he was young, and being much addicted to the Fair-Sex, he had in all five Wives, and fisteen or twenty Concubines, all of them young, beautiful Women, by whom he had forty nine Sons and Daughters, whom he educated with the utmost Tenderness, and was constantly with them, as much as his Business would permit. He was never

y See Cornaro's Benefits of a fober Life, p. 33.

never Sick, his Sight, Hearing, Memory, and Activity, were amazing; he walked every Day about eight Miles, his Hair, which was long, and graceful, became White by that Time he was Fourfcore, but turned Black at an Hundred, as did his Eyebrows and Beard at 112. At 110, he loft all his Teeth, but the Year before he died, he cut two large ones with great Pain. His Food was generally a few Spoonfuls of Broth, after which he eat fome little Thing roafted; his Breakfast and Supper, Bread and Fruit, his conftant drink, diffilled Water, without any addition of Wine, or other ftrong Liquor, to the very laft. He was a Man of strict Honour, of great Abilities, of a free, pleafant, and fprightly Temper, as we are told by many Travellers who were all ftruck with the good Senfe, and good Humour of this polite old Man<sup>z</sup>. The Reader will eafily difcern, that the Point upon which I chiefly infift, is his having continually young Company about him, efpecially young Women; for though neither himfelf, nor for ought I know any body elfe, ever remarked that this might contribute to the lengthening his Life, yet fo the Fact might be, though unnoticed. It is indeed more for my Purpofe to collect Accounts like thefe, where there is clear evidence of the Fact, I would establish before the Principle,

y Voyages de Tournefort, &c.

Digitized by INTERNET ARCHIVE

Principle, to which, I refer, it was ever thought of, than to quote Inftances of a frefher Date, fince the Thing might have been in my Head. Thefe are Inftances that cannot be warp'd, I have cautioufly cited my Authors, and fometimes the Words of the People themfelves, fo that I need not afk, where I can force Belief.

I will suppose then of our Hermippus, that he was a Tutor or Director of a College of Virgins, for fince the Infcription tells us, not what he was, we may be allowed all the Freedom of a rational Conjecture. This College of Virgins, I conceive to be founded purely for the Sake of Education, and thereby affording a quick and conftant Succeffion of little Maids, from the Age of between five and fix, to thirteen and fourteen. I imagine it might be requifite for the Health, as well as proper Inftruction of these young Ladies, that they rose pretty early in the Morning, and this in all Seafons of . the Year. In the Spring and Summer they might be allowed to walk and enjoy the refreshing Pleafure of rural Profpects, but always in the Company of their Director, who fhould be obliged to entertain them during the Walk, with feafonable and lively Stories. If this feeming extraordinary Mode of Education difgust Perfons of a nice and prudifh Tafte, give me leave to observe, that the Greeks used it of old, and that it is still practifed by all the Eastern Nations. Milesian, or Arabian Tales,

Digitized by INTERNET ARCHIVE

## [ 40 ]

Tales, in which a Vivacity of Imagination appears, with here and there a Ray of found Judgment, fuit beft with tender Minds, and efpecially with feminine Understandings. Women are remarkably governed by Example, or to make Ufe of a modern Phrase, by the Fashion. Why, therefore, fhould they not be inftructed by Example ? There is lefs Difference than moft People imagine between real and feigned Stories. They differ but as Morning and Evening Shadows, the one is the faint Picture of what has paffed, the other as lively a Reprefentation of what may poffibly come. In all other Refpects they are alike the Story of Alexander and Roxana, is now as much a Dream as any in the Persian Tales. One Advantage that Ideal relations have over Stories grounded upon Facts, is, that we may contrive them fo as to avoid improper Circumstances, which cannot frequently be done with refpect to the latter, but at the Expence of Truth. With fuch Difcourfes, after their early Devotions were over, the fair Pupils might be entertained in Winter Mornings, and the Day be thus opened with a free, chearful, and kindly Spirit, alike agreeable to his lovely Wards, and grateful to the good old Man.

AFTER this Morning Exercife, I suppose that Hermippus, and his Female Pupils, retire in order to bathe, to drefs, and to adorn themselves, all which

Digitized by INTERNET ARCHIVE

which I look upon as no lefs neceffary for the old Man, than fit and convenient for the young Wo-Every body knows, that the Antients men. were remarkably fond of Baths, and of Unctions, efpecially for old Men; and the Arabian Phyficians prefcribe them once in a Week or ten Days, and order fome hot and well fpiced Meat to be eaten after using them; but to be fure washing, cleanfing, and keeping the Body neat, as they tend to make old Men pleafant and agreeable to fuch as converfe with them, fo they contribute not a little to their own Eafe, and to the preferving that Suppleness in the Limbs, which is frequently attacked by old Age. On the other Hand, elegance in Drefs, and great Nicenefs about their Bodies, is of very great Confequence to the Prefervation of fuch a Temper in thefe young Maids, as is fit to make them useful in that Way of which we are fpeaking. About Noon, after all this Exercife is quite over, I fuppofe Hermippus meets his Maidens with as much Chearfulnefs, as his Conftitution will admit, while they receive him with that fprightlinefs that is natural to theirs. A fhort Conversation should precede a light, well-chosen and wholefome Entertainment, of which all feeding freely, but not to fulnefs, feafon the neceffary Bulinefs of recruiting the Body with fuch ingenious and diverting Stories, as may amufe and recreate the Mind. After the Repair, Mufic, F Vocal

Digitized by INTERNET ARCHIVE

Vocal and Inftrumental, and then a Walk, or if the Weather will not permit it, fome breathing Exercife within Doors, to fuch a Degree as may excite Colour, but without forcing a Sweat.

THE Evening should among fuch Company, be chiefly dedicated to Diversion, the Ladies, and efpecially the youngeft, fhould be indulged in all the little innocent Pastimes that contribute either to the Exercife of their Limbs, or the Improvements of their Wits, and thefe ought to take their Turns, according to the Rule prefcribed by their Director. For Inftance, after Blindman's-Buff, Hoop and Hide, or hunting the Hare, there should fucceed Questions and Commands, Pictures and Motto's, Riddles, or fomething of the like Sort; and laft of all, two or three of the Eldeft might gently lead them by a few grave Stories into a fit Disposition for their Evening Devotions; after which, they might retire to their Dormitory, each having her proper Cell, but all open at the Top, as alfo the Director's Apartment, at the upper End. In a College like this, with fuch Company, and under fuch Regulations, where all the Pupils are Chafte as Diana's Nymphs, fresh as the Spring, fweet as the Summer, and harmlefs as the Winter, ever full of Life and Spirits, free from Difeases, Cares or Distractions of Mind, easy in their Tempers, affable in their Manners, fond of obliging, grateful when obliged; I can fcarce imagine

Digitized by INTERNET ARCHIVE

imagine that any Man could fpend his Time more agreeably than Hermippus, live freer from a Senfe of Sorrow, or more remote from the Shadow of Death. By this Regimen, he might be provided with an almost continual Refreshment of their Odoriferous Breaths, and never lofe their Company, but at Seafons proper for them and for him. His Blood would not only receive constant Supplies of Spirits from the artificial Atmosphere, conftituted by this Contrivance, but his Genius alfo would be kept brifk and lively, by a perpetual Intercourfe with Perfons in the most active Period of Life. Secluded in fuch a Retreat, from all the hurry, all the Diforder, all the Accidents that attend a Life of Business, he would easily escape Disquiet and Fatigue, removed from all the Views of Profit, Pomp and Pleafure ; he would never feel the cruel Difturbance of any reftlefs Paffion, the defire of getting would never torment him, he would never be perplexed with the Fears of losing, if his Heart was at any Time touched with Pain, it must be at the parting with a Scholar, and even this would admit of fome Relief, from the Pleafure afforded him by receiving a new Difciple. At leaft, thefe are the Comforts I have figured to myfelf, and fuch of my Readers as are bleffed with more vigorous Fancies, may conceive him in Poffeffion of still higher and more exquisite Bleffings.

Iam

Digitized by INTERNET ARCHIVE

## [ 44 ]

I am fenfible it may be objected, that the whole of this Supposition is absolutely Arbitrary, that amongst the Romans, there never was any fuch College a as this under the Direction of any Man, nor for ought appears, in any other Nation. But then it is to be confidered, that I have fo stated it. If Hermippus was really nourifhed by the Breath of Women, as I have already fhewn, it is very reafonable to believe he might, then we must conceive to ourfelves fome Occupation, fome Way of Life in which he might eafily, and conftantly receive this comfortable Medicine; and if the Account I have given be fo far probable in itfelf, and free from Abfurdity, as to convey clearly to the Reader's Mind fuch an Idea as I would willingly have it, it is not at all material, whether there ever was fuch a College, for that comes not at all within my Affertion, it is fufficient for my Purpofe, if fuch a College there might have been. Another Reader may, perhaps, devife fome eafier, clearer, and more probable Method of Interpreting this Infeription. if he does, I shall not dispute with, or envy him the Fertility of his Invention. My Account of the Matter ferves to help the Notion I have formed of the Poffibility of the Thing, and therefore

as

<sup>a</sup> Except it may be the Puellæ Faustinianæ, of whom we find fome mention made in the antient Inferiptions.

Digitized by INTERNET ARCHIVE

as a Mathematician draws his Figures in order to explain the Propositions he lays down, fo I have exhibited this Example, to illustrate the Doctrine. that I would recommend.

ONE may likewife fuggeft, that most of the Examples hitherto alledged of the long Life of fuch as have taught young People, do not reach the Point I have advanced, in as much as they all confeffedly belong to young Men. Yet, if this Objection affects what I have delivered, the Credit of the Infcription remains still untouch'd, fince fome understand it of Boys, though I incline to interpret it of Girls, for Reafons that will hereafter occur. But, whoever makes this Objection, must admit, at the Time of making it, that there is an extraordinary Efficacy in the Breath of young Men, which duly confidered, will be found a very great conceffion in my Favour; fince, if there be any fuch Efficacy in the Breath of young Men, no Reafon can be affigned why my Supposition should be held lefs reafonable. All Things, therefore, that make in general in Favour of human Breath, or in Favour of the Breath of young People, tend to ftrengthen and fupport what I have laid down. As to those particular Circumstances which render female Breath preferable, it lies upon me to affign them, and this I shall do in its proper Place; in the mean Time give me leave to remark one Thing more in Favour of my fictitious Hiftory of

Digitized by INTERNET ARCHIVE

of the College of Virgins, viz. That the greateft Men have thought it allowable to introduce fuch Defcriptions wherever they have judged them requifite, or agreeable to the Subject of which they were treating. The learned Sir *Thomas More*, laid down a Syftem of Politics in his *Utopia*<sup>b</sup>. *Barclay* has written an ingenious Hiftory in his *Argenis*, and the great Chancellor *Bacon* has exhibited the moft beautiful of all Fictions in his Hiftory of the *New Atlantis*<sup>c</sup>, which Hiftory, if I miftake not, gave Birth to the Royal Society in *England*.

BUT I must not conceal two other Objections of far greater Weight, that have been made to this Doctrine of mine, by the ingenious Mr. Nunning.

<sup>b</sup> There are fome Difputes about the first Edition of this Book; The famous Mr. Maittaire fancies, there was one in the Year 1516; but he is mistaken, the first Edition of it bore the following Title. De Optimo Republicæ statu, de que nova infula Utopia Thomæ Mori libri duo, quibus prefiguntur Epistolæ Defiderii Erasmi, Gul. Budæi, Petri Ægidii, ac in fine adjuncta Hieron. Bussidii Epistola. Basileæ. Joan. Froben. 1518. in 4°. and has been printed very often fince. It was translated into English by Ralph Robinson, in 1557, which Translation Bissop Burnet missok for the Author's own; however, he ventured to make another Translation in 1683, and a very good one it is. It was translated into Italian in 1548, but the Author of that Version is not known. There have been three Translations in French, of which that by Sorbire is esteemed the best.

<sup>c</sup> The Author is right enough in his Obfervation, Abraham Cowley borrowed his Notion of a Philosophic College from Lord Bacon's Atlantis, and from Mr. Cowley's Notion of fuch a College, the Royal Society had its beginning.

Digitized by INTERNET ARCHIVE

Nunning d. If, fays that learned Perfon, your Syftem be founded in Truth, if there be really any fuch Vigour and Efficacy in the Breath of Women, or even of young Women, how comes it to pais, that those Men have not attained to any extraordinary Age, who are known to have had the greateft Advantages poffible in this Way? Upon this, he puts two Queftions, Why, fays he, did not Solomon, whofe Wives and Concubines were fo numerous, and who undoubtedly were young, beautiful, and kept entirely from other Men; Why did not this Solomon, continues he, live beyond the ordinary Age of Man; whereas, the Scripture tells us, that he did not reach that which is common in our Times? This is the first Objection, and it must be owned, that Mr. Nunning has put it very modeftly, for Solomon had belide this, many-other Advantages. He was undoubtedly, a great Philosopher, an excellent Naturalist, and underftood perfectly the Art of conducting Life, to which we may add, that fome have believed him an exquisite Anatomist, Physician and Chymift; fo that if he died before Seventy, who was poffeffed of fuch extensive Power, fuch immenfe Riches, and fuch Wifdom as never centred

In

<sup>d</sup> This Gentleman is Cannon of Vreden, and is now publifhing in Germany, in Quarto, a Work, Entituled Monumenta Monasteriensia, which is to contain, the Elogies of all the great Men who have been Natives of the Bishoprick of Munster.

Digitized by INTERNET ARCHIVE

in another Man, what Reafon is there to fuppofe that fuch as are infinitely below him in all Refpects, fhould acquire the Knowledge of that which was indubitably hid from him? This is the Cafe ftated fairly, freely, and fully, for we mean not to cheat or deceive our Readers, but to inform and fatisfy them; our endeavour is not to give an Air of veracity to our own Opinion, but to rectify our own Notions by the Standard of Truth.

MR. Nunning's fecond Objection, is fetched from the Seraglio's of the Turkish Monarchs. Why, fays he, do not the great Lords of the Ottoman Empire, who have fuch Numbers of young and fine Women, always in their Power, live to a great Age? or rather, why fince they have this Balfam of Life continually in their Poffeffion, are they fhorter lived than other Men? and that too, in a Country where there are more long lived People than in many others? This excellent Perfon might have fortified also this Objection, by extending it to the Shabs of Perfia, the Han's of Tartary, the great Moguls, and all the other Eastern Princes, who in this respect, enjoy to the full the fame advantages with the Turkish Sultans. I am not afraid of giving the utmost Weight to thefe Suggestions, because if I can fairly and clearly refute them, my Doctrine must appear, if not abfolutely certain, much more probable, at leaft, and

Digitized by INTERNET ARCHIVE

and much more agreeable to Truth, than if thefe Objections had never been mentioned. I do indeed admit, that both are very plaufible, both feem directly diffructive of my Syftem ; but if notwithftanding all this, I am as I think, I am in a capacity of fhewing that they do not at all affect what I have advanced, but that on the contrary when duly confidered, they fortify it extreamly, then I hope the Reader will attend with the greater Satisfaction, to fome additional Arguments that I shall offer in support of this Notion. It is the great Beauty of Truth, that the more we examine it, the more different Lights in which we place it, the more Pains we take in turning and twifting it, the more we perceive its Excellency, and the better the Mind is fatisfied about it; whereas Falfhood, however fair it may appear when drefs'd out to advantage, or fet in a falfe light, yet it never can ftand the Teft of a ftrict and unbiafed Enquiry.

THE Hiftory of Solomon is very largely recorded in the Sacred Writings, and the Circumftances therein laid down, enable us to give fuch an Account of the Manner of that Prince's Life, that we need be under no Sort of Surprize at the earlinefs of his Death. He was, it is true, the wifeft Man that ever lived, of which he has left us very noble Teftimonies in his Writings. He was a great Politician, excellently fkilled in the Arts, and a perfect Mafter of the polite Literature of those Times; but with all this, we fee that he

G

INTERNET ARCHIVE

was

THE GETTY RESEARCH INSTITUTE

was a very voluptuous Man. Science and Pleafure engroffed him by turns, he would have pushed his Refearches beyond the Bounds of human Nature; and when he found himfelf checked, then he began to complain of the burthen of Knowlege, and the tirefomenefs of fuch Enquiries. To deliver himfelf from thefe Anxieties, to calm his Cares, to drown his Doubts, and bury his Apprehenfions in Oblivion, he had recourfe to fenfual Delights, having conftantly in his Seraglio a Multitude of fine Women, amounting, as the Author of the Book of Kings tells us, to feven hundred Wives, who were Princeffes, and three hundred Concubines e. With thefe, he led an effeminate, lafcivious, and profligate Life. Thefe Women were of all Nations, Egyptians, Moabites, Ammonites, Edomites, Zidonians, and Hittites, and each endeavoured to recommend herfelf to his Favour, by all the fludied Arts of Luxury f. Amongst fuch a Heterogenous Mass of Females, all corrupt in their Morals, all different in their Cuftoms, all filled with Jealoufy and Emulation of each other: What reafon was there to hope either for Quiet, or for Health?

In the Defcription we have given of the Life of *Hermippus*, we have used our utmost Endeavour, to shew the means by which this Sovereign Medicine we are difcoursing of, operates, and how

F I Kings, xi. 3. Digitized by INTERNET ARCHIVE f Ibid v. 1.

THE GETTY RESEARCH INSTITUTE

it

it is to be employed. We fuppofe our old Man to be of a gentle uniform, and pleafant Disposition, always eafy, always content, and furrounded by Numbers of blooming Virgins, too young to have either their Bodies, or their Thoughts tainted; and we suppose these Perfons spending their Time together, in chafte and innocent Amufements. But the Life of Solomon was the very reverse of this, his Thoughts were in a perpetual Hurry, his Mind in conftant Adgitation; one Day deeply plunged in Philosophical and Metaphysical Contemplations: the next funk in fceptical Doubts, and gloomy Reflections; the third giving a loofe to his Pleafures, and abandoning himfelf without Reftraint, not only to the Lewdness of his own Defires, but to the wilder Extravagancies of a Multitude of vicious Women. All this we learn, not only from Histories of indubitable Authority, but from his own Writings, there we fee the Struggles of his Heart; there we fee his reftlefs love of Pleafure; his intemperate Thirst after Knowlege, and in confequence thereof his Agonies and Difquiet. Is there any likenefs between thefe two Characters? Can one imagine, that the Conversation of Women in fuch a Diverfity of Circumstances, flould have the fame Effect on Solomon and Hermippus? Or can it enter into the Head of any Man, bleffed with a found Understanding, that this, or any other Medicine, could defend Solomon from old

G 2

INTERNET ARCHIVE

Original from THE GETTY RESEARCH INSTITUTE

Age,

Age, confidering the Courfe he held? Was there ever a Man that fludied the Prolongation of Life, with more affiduity than Solomon laboured to fhorten it? Did he not harrafs his Spirits with intricate and perplexed Enquiries? Did he not vex himfelf with perpetual Queftions about prefent and future Felicity, which rendered it impoffible for him to enjoy it? Did he not, by indulging his Paffions, fcatter the Seeds of Deftruction? and did he not, by his Luxury and Intemperance, cherifh and cultivate them, till they at laft, as they always do, difturbed the Frame of his Mind, as well as ruined his Conftitution? What wonder then that Solomon was no Long-liver?

WHAT I have faid, will, I dare fay, fatisfy the worthy Gentleman who proposed this Doubt, and every Reader who feriously confiders it. The Objection takes Solomon for a Person in that very Situation wherein I would place Hermippus; but I have shewn this to be altogether groundless. The Objection takes it for granted, that I look upon the Breath of young Women to be a universal Medicine; whereas, I affert only, that the Breath of young Virgins in a particular Way, may defend a Person against old Age, who, by Temperance and Moderation defends himself against Diseases. But, besides what I have mentioned, I have yet fomething more to fay as to Solomon, which I might have offered before, and which would have ex-

Digitized by INTERNET ARCHIVE

THE GETTY RESEARCH INSTITUTE

cufed

cufed me from examining his Cafe at all, if I had inclined to have fheltered myfelf under any fuch Subterfuge.

ALL the Accounts we have of Solomon, fuppofe" him to be under a particular Difpenfation, and that he had recourfe immediately to God himfelf, at leaft twice in his Life, fo that this Man was not in the fame Situation with others, and therefore, not fit to be confidered as an Example. I might pufh this further still, by observing, that God was pleafed to promise him length of Days, if he imitated the Righteoufness of his Father David; fo that he had a much better Medicine in his Power, than human Wifdom could fupply him with, and yet he knew not how to use it. The Scriptures fay, That when Solomon was old, his Wives turned away his Heart after other Gods g. Oldnefs is here used in the Sense in which I understand it. that is, with refpect to the Condition, and not to the Years of Life, for in that Senfe, Solomon was not Old when he died, fince he exceeded not Sixtyfeven. The plain meaning, therefore, of this Text must be, that when his Vices had broken his Conftitution, and weakened his Faculties, then thefe Women to whom he gave himfelf up, drew him to Idolatry, and thefe Nurfes of his fecond Childhood, industriously taught him to fall. Drawn

g Ibid. v. 4.

Digitized by INTERNET ARCHIVE

Drawn by their Delufions, he facrificed both Titles to long Life, viz. That which Temperance gave him by the Law of Nature, and that which by an extraordinary Revelation he received from God himfelf. For this, no doubt included that, fince we cannot fuppofe that God promifed long Life to Solomon without an implied Condition, that he attended to the natural Means for attaining it, the Laws and Promifes of God muft be always rational, becaufe they are made and propounded to reafonable Creatures.

AFTER examining this Objection fo fully, it will caufe me much lefs Trouble to clear up the other. For what can there be more contrary to, or irreconcileable with the Doctrine I have laid down, than the Lives led by Eastern Monarchs; all Writers agree, that to give Strength and Firmnefs to the Body, there is nothing fo neceffary as Chaftity in green Years. The Germans, as Tacitus tells us, were won't to preferve themfelves from Women, till they were thirty at leaft, and this he affigns as the Principal Caufe of their Robuftnefs, Courage and long Life h. Long before his Time, the Spartans had formed the fame Notions led thereto by reafon and experience i, but with regard to the Afiatic Princes, they never know what Purity of Manners, and Chaftity of Mind

<sup>h</sup> De Morib. German.

<sup>i</sup> Plutarch. in Lacon.

Digitized by INTERNET ARCHIVE

Mind mean, they are corrupted in their Mother's Nurferies, and the diffolute Temper of the Father, prevents the Virtuous Education of the Son. While they are yet Striplings, they are permitted the ufe of Women, in order to enervate their Minds, and when they grow up, an effeminate Luxury, becomes the prime Bufinefs of their Lives. Amongft fuch Men as thefe, fhall we look for Health or long Life? Is this agreeable to the Rules of Wifdom or Science, I mean to the natural Dictates of good Senfe, or to the Maxims of Phyfic ? If not, where lies the Strength of the Objection?

Bur besides all this, what if there be still a shorter, plainer, or more deciffive Answer, which is, that we can never properly judge in this Cafe, becaufe Experience teaches us that thefe Princes feldom or never die a natural Death. In the Field they are exposed to the common Chances of War, and if we look into the Turkish, Persian, or Indian Stories, we shall find at least a third part of their Monarchs have fallen in Battle. Again, confider them in their civil Capacity, and from the very Nature of an Arbitrary defpotic Government, you must be fensible that they are continually liable to popular Infurrections, in which many of their Princes have likewife fallen. But if you purfue them further, and follow them into the Receffes of their private Life, as you will perceive them

Digitized by INTERNET ARCHIVE

them to be no way happier, fo you will find them much lefs fafe than any of their Subjects. The Intrigues and Jealoufies of their many Wives, must always expose fuch Princes to a multitude of Dangers, especially in Countries where Poiss are very common, and where the most dexterous Use of them is common too.

BUT what if the Sacred Hiftory, which furnished the first and strongest Objection, contains another Hiftory, which is the fulleft, cleareft and most fatisfactory Proof that can be offered in Favour of the Opinion I espouse? The Cafe I mean is, that of King David in his old Age, which I fhall State fully and fairly. It is faid, that King David grew Old and ftricken in Years, his natural Heat decaying to fuch a degree, that no Addition of Cloaths could give him Heat; in this Diffrefs, the Phyficians advised him, to the very Remedy which I recommend. Let there be fought, faid they, for my Lord the King, a young Virgin, and let her ftand before the King, and let her Cherifh him, and let her lie in his Bofom, that my Lord the King may get heat. Accordingly Abishag the Shunamite, was brought to the King, and of her we read, that she was a Damfel very fair, that fhe cherished the King, and ministred to him; but the King knew ber notk. This is the Story, as

<sup>\*</sup> I. Kings, i. 1. See also the Commentaries of Munster, Grotius, &c. among the larger Critics, who all interpret these Passages of Scripture in this way.

as it lies in the Book, and from hence I think it plainly appears, that the Phyfician's of those Times, who were well acquainted with the Efficacy of this Remedy, and understood how Age might be benefited by Youth.

THE famous Monk Roger Bacon, whom I have cited before, in his Treatife of the Cure of old Age, has a large Chapter upon this Subject; though, as he wrote to a Pope, and in an Age no ways favourable to him or his Difcoveries, he thought proper to conceal what he admits to be the most Efficacious Medicine, it was in his Power to prefcribe, under fuch dark and obfcure Terms, that few I believe have reached his true Meaning. It may perhaps, be fufpected that I have deceived myfelf, and that having this Notion in my Head, I have found in Bacon's1 Works, Things that were never there; for which Reafon, as well as becaufe I can offer nothing more curious, or more pertinent of my own, I will cite as much of his Book, as relates to this Subject, and leave it to my Reader to decide how far I do, or do not, do him Justice by my Comment.

" I have read many Volumes of the Wife, I find few Things in Phyfic which reftore the natural Heat, weakned by Diffolution of the innate Moifture, or increase of a foreign One. H But

<sup>1</sup> R. Bacon. De Prolongatione Vitæ. c. xii. Digitized by

" But certain, wife Men have tacitly made men-" tion of fome Medicines, which is likened to " that which goes out of the Mine of the noble " Animal, they affirm, that in it there is a Force " and Virtue, which reftores and encreafes the " natural Heat. As to its Disposition, they fay, " its like Youth itfelf, and contains an equal and " temperate Complexion; and the Signs of a " temperate Complexion in Men, are, when their " Colour is made up of White and Red, when " the Hair is yellow inclining to Rednefs and " Curling. According to Pliny, when the Flefh " is moderate, both in Quality and Quantity; " when a Man's Dreams are delightful; his Coun-" tenance chearful and pleafant, and when in his " Appetite of Eating and Drinking he is mode-" rate. This Medicine indeed, is like to fuch a " Complexion; for its of a moderate heat, its " Fume is temperate and fweet, and grateful to " the Smell; when it departs from this Tem-" perature, it departs to far from its Virtue and " Goodnefs. This Medicine doth therefore tem-" perately heat, becaufe it is temperately hot; it " therefore heals, becaufe it is whole. When it " is Sick, it makes a Man Sick. When it is " Diftempered, it breeds Diftempers, and chan-" geth the Body to its own Difpolition, becaufe " of the fimilitude it hath with the Body.

" FOR

" For the Infirmity of a brute Animal, rarely " paffeth into Man, but into another Animal of " the fame Kind. But the Infirmity of a Man, " paffeth into Man, and fo doth Health, becaufe " of likenefs. Know moft Gracious Prince ! that " in this, there is a great Secret. For Galen faith, " that whatever is diffolved from any Thing, it " must of necessity be affimilated to that Thing, " as is manifest in Diseases passing from one to " another; fuch as Weaknefs of the Eyes, and " Peftilential Difeafes. This Thing hath an ad-" mirable Property, for it doth not only render " human Bodies fafe from Corruption, but it " defends also the Bodies of Plants from Putre-" faction. This Thing is feldom found, and " although fometimes it be found, yet it cannot " commodioully be had of all Men. And inftead " of it, the Wife do ufe that Medicine which is " in the Bowels of the Earth, complete and pre-" pared, and that which fwims in the Sea, and " that which is the fquare Stone of the noble Ani-" mal; fo that every Part may be free from the " Infection of another. But if that Stone cannot " be acquired, let other Elements feperated, di-" vided, and purified be made ufe of.

" Now when this Thing is like to Youth that " is of temperate Complexion, it hath good Ope-" rations; if its Temperature be better, it pro-46 duceth better Effects; fometimes it is even in ss the

H 2

" the highest Degree of its Perfection, and then " it operates beft, and then there is that Property " whereof we have fpoken of before. This differs " from other Medicines and Nutriments, which " Heat and Moiften after a certain temperate " Manner, and are good for old Men. For other " Medicines principally Heat and Moiften the " Body; and Secondairly, they ftrengthen the " native Heat ; but this doth principally ftrength-" en the native Heat, and after that, refreshes the " Body by moiftning and heating it. For it re-" duces this heat in old Men, who have it but " weakly and deficient, to a certain ftronger and " more vehement Power. If a Plaister be made " hereof, and applied to the Stomach, it will help " very much, for it will refresh the Stomach " itfelf, and excite an Appetite; it will very highly " recreate an old Man, and change him to a kind " of Youth, and will make Complexions by what " means foever depraved or corrupted better.

" MANY wife Men have fpoken but little of this Thing, they have indeed laid down another Thing like it, as Galen in his fifth Book of fimple Medicines, and Johannes Damascenus, in his Aphorisms. But it is to be observed, that Venus doth weaken and demolish the Power and Virtue of this Thing; and it is very likely that the Son of the Prince, in his second Canon of Simple Medicines, spoke of the Thing, "where

INTERNET ARCHIVE

" where he faith, that there is a certain Medicine " concealed by wife Men, leaft the incontinent " should offend their Creator. There is fuch a " Heat in this Thing, as in young Men of a " found Complexion, and if I durft declare the " Properties of this Heat, this most hidden Se-" cret fhould prefently be revealed. For this " Heat doth help the Palfical, it reftores and " preferves the wafted Strength of the Native " Heat, caufeth it to flourish in all the Members, " and gently revives the Aged." Thefe are precifely the Words of Fryar Bacon; the Thing now to be confidered is, whether we have rightly interpreted them, or whether they are capable of any juster, and more natural Sense, which after a few Reflections on the Motives which have determined us, shall be left to the Reader's Judgment.

SOME have entertained an Opinion, that this myfterious Preparation was no other than the Quinteffence of human Blood; but whoever confiders the Defcription of it in all its Parts, will eafily difcern, that it can be no fuch Thing, fince the Odour or Scent of it is recommended on Account of its grateful Sweetnefs; befides, Quinteffences are taken inwardly, whereas, he directs the Medicine to be applied as a Plaifter to the Stomach, and indeed the other Marks agree with fuch a Quinteffence as ill as this. Others have believed, that

Digitized by INTERNET ARCHIVE

that our Author intended here to defcribe a kind of precious Stone, but fuch muft be abfolutely unacquainted with his manner of Writing; for he is no affecter of Mifteries, in order to strike his Reader with Amazement, or to raife his own Reputation, both of these Things he justly contemned. His Obfcurity proceeds from this, that at the Time he wrote, he was in Prifon for writing against the Philosophy that was then current, and he addrefs'd this Book to Pope Nicholas IV. his Profecutor, in order to obtain his Pardon; but being doubtful how far it would operate, he was very cautious in Writing, that he might not afford room for a fecond Accufation, of laying Things fecret in their Nature open to vulgar Capacities. Now, if he was here defcribing a precious Stone, why fhould he talk fo darkly? This certainly did not require fo much Pains to be taken to hide it, and fo far would fuch a dark Account have been from ferving his Purpole, that it would have been visibly contrary to his Defign, by leaving Room for extraordinary Conjectures, where, without the leaft Danger he might have fpoken out. Whereas, if our Interpretation be admitted, there was the utmost Reason for all this Caution; his Apology is perfectly reafonable, and all the Doubtings and Heffitations that are thrown in, appear fo many modeft Excufes, very artfully and very properly placed.

Original from THE GETTY RESEARCH INSTITUTE

LET

LET us confider this Defcription of Bacon's, and compare it with the Picture drawn by the Hand of a Greater, and still more knowing Man, and we shall be apt to think that we hear Solomon defcribing the lovely Shunamite. Look upon Bacon's Words again, and imagine the thin Veil to be removed; you will then fee the perfect Figure of this Damfel that was very Fair ; you will difcern the Rofe of Sharon, and the Lilly of Damafcus; her Hair like Purple, in curling Locks; her two young Roes that are Twins, feeding among Lillies; her Head filled with the Dew, and her Locks with the Drops of the Night; her Countenance fair as the Moon, clear as the Sun; her Fruit fweet to the Tafte, as fhe fets under the Shadow with great Delight; her Spikenard and chief Spices, while the South Wind blows upon her Garden, that the Spices thereof may blow; her Well of living Waters, and Streams of Lebanon; and here the faireft among Women is wounded by the Watchmen, and then her Beloved departs.

THIS Commentary fufficiently explains the Text, but to put it beyond Doubt, and to apply all this effectually to my Subject, I fhall touch gently on two or three remarkable Paffages. In the first Place, our Author fays, that this Medicine is liken'd to that which goes out of the Mine of the noble Animal, and what can this Mine be, but Woman, in whom, as in a Mine, the noble Ani-

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

mal

## [64]

mal is formed. Then again, our Author fays, the Infirmity of a brute Animal rarely paffes into Man, but into another Animal of the fame Kind : but the Infirmity of a Man, paffes into Man, and fo does Health becaufe of Likenefs. Here he lays open a great Secret in Philosophy, viz. That there is a Sympathy in Health, as well as Contagion in Difeafe, and that as a Morbid Breath infects, fo a wholefome one may exhilerate. Taken in this Senfe, nothing can be eafier, plainer, or more rational, nor is there any other Senfe, the Words litterally taken, can bear. The laft Paffage I shall remark is, when he observes, that Venus weakens and diminishes the Power and Virtue of this Remedy. How exactly does this agree with the pertinent Reflection of the Author of the Book of Kings, when repeating the Ules David made of Abifbag; he fays, with a particular Emphasis, but the King knew her not? A young Virgin taken in this Manner, recalls Heat and Life into an old Man; but if forgetting that this is a temporary and artificial Vigour, he uses it as if it were a natural One; he may indeed give Life to another, but it will be at the Expence of his own. When these Exploits are related to us as Marks of old Men's Vigour, we fhould fet them down as Marks of their Folly too; for as Solomon fays, that there is a Time to be born, and a Time to die; fo

Digitized by INTERNET ARCHIVE

fo Nature and true Philosophy teaches, that there is a Time to beget, and a Time to abstain from begetting.

I will take the Liberty also of drawing fome Advantage even from the fecond Objection, fince, with refpect to Eastern Princes, though it be true that most of them die early, yet is it no less true, that where they do not die violent Deaths, they frequently live to a great Age; as for Inftance, Shab Abbas, and Aurengzebe. Now if we confider the immense Fatigues of these Monarchs, the many Battles they fought; the tedious Marches they made; the variety of Dangers they run through, and the vaft Expence of Spirits that a Life of fuch continued Action, fuch intenfe Thought muft occasion; it will not be easy to find in a Country, where the Art of Physic is far from being fo perfect, as it is even in Europe : I fay it will be hard to find in fuch Places, any Medicine capable of producing fo extraordinary Effect, if we exclude this of which I am fpeaking. For though I am very doubtful, and therefore lay no Strefs on the Wholefomenefs of the Breath of Women; yet, in the Seraglios of fuch Princes. there are always fo many Virgins, and thefe of fuch near access to the Perfon of the Prince, that I cannot but apprehend his Vigour and Health, to be greatly fupported by thefe odoriferous Streams

Digitized by

Original from THE GETTY RESEARCH INSTITUTE

of

of falutary Air. I cannot help adding what feems to be still a stronger Argument in Favour of my Supposition, and that is, that the Arab Princes fcattered through the Dominions of the Grand Signior, who are lefs exposed to foreign Wars, or domeftic Intrigues, than other oriental Princes, actually live beyond the ordinary Age of Man, and die at last as every Man ought to die, because their Blood can run no longer. At leaft, I have a right to make use of a Circumstance fo probable as this is, in support of my Opinion, when it is thought reafonable to take a Fact, which has only a fuper-. ficial refemblance to the Cafe I have flated, as a fufficient ground for an Objection against the Polition I am endeavouring to make good; Probability is certainly nearer a-kin to Evidence, than a bare Similitude of Circumstances, which vanishes upon a strict Examination.

A FTER thefe Excursions, let us return to a more ftrict Examination of our Subject: I have already shewn how the Breath of Virgins may operate upon old Men, when mix'd with the common Air, and so respired by them. But let us confider a little, whether these numerous and fubtile Effluvia may not operate some other Way than this. All Physicians agree, fince the Doctrine of the Circulation of the Blood has been established, as well as made known to the World, by the Skill Skill and Learning of that incomparable Englifbman Doctor Harvey m; that a great Part of our Aliments, after entering the Blood, are thrown out from thence in fo imperceptible a Manner, that this kind of Evacuation, is very properly filed infenfible Perspiration, This was first carefully examined by Sanctorius, who found that it was far more confiderable alone, than all the other animal Secretions taken together n. If this be fo, and that it is fo, no Man in his Senfes now doubts, then it follows, that there must be prodigious Ouantities of the Matter of this infenfible Perfpiration, mixed in the Air, furrounding the perfpiring Bodies, and confequently this Air, muft be impregnated ftrongly with the Qualities inherent to that Matter.

IF we push this Enquiry still further, and labour to make ourselves acquainted with the Nature of the Particles that are thus thrown off, a

I 2

<sup>m</sup> Our Author alludes here to the remarkable Felicity of Doctor Harvey, who first found out, and then fully demonfirated the Doctrine of the Circulation of the Blood, which was at first as most new Inventions are, opposed with great Heat and Spleen; but came at last to be as generally received and admired, as it deferves. Doctor Harvey died in 1657, thirty Years after he first published his Discovery; in his Exercitatio Anatomica de motu cordis. Printed at Francfort, in 1627.

<sup>n</sup> See his famous Treatife de Medicina Statica, which the English Reader may confult in his own Language, Translated by the judicious and indefatigable Dr. Quincy,

Original from THE GETTY RESEARCH INSTITUTE

little

little Attention will make that Matter plain. For fince infenfible Perfpiration is owing to the Circulation of the Blood, it neceffarily follows, that the Particles thrown off by the Blood, must participate of the Nature of that Fluid from which they are thrown off. Now we know the Blood of young People to be foft, oily, and balfamic, as well as we can know any Thing, because this appears to us from its Effects, which are a brifk and lively Disposition; perfect Health, and quick Growth, to all which, a Blood thus conftituted, is abfolutely neceffary. Upon thefe Principles, it is plain, that the Matter perfpired by young People in fuch Circumstances, as I have supposed the Pupils of Hermippus to be, must have all the Qualities of their Blood, and be a foft, fmooth, flippery, balfamic Steam, continually flowing from their Bodies, and as they are conftantly drawing in the Circumambient Air, and continually throwing off this Matter, they must, in the compass of a few Hours, abfolutely change the whole Mafs of Air, in a Room where they are taught by their Preceptor, who in that Cafe, will receive into himfelf a large Proportion of this perspirable Matter, in the fame Manner that it is thrown off by them.

THERE are many People, I know, who will be apt to treat this Part of my Discourse as Whimfical

Digitized by INTERNET ARCHIVE

THE GETTY RESEARCH INSTITUTE

fical and Chimerical, and for this very Reafon, I have not infifted upon it fo largely as I might have done, or in fuch ftrong and direct Terms. I might have entered nicely into the Computations that have been made of the Quantity of Matter thrown off in this Way, and from thence I might have deduced many Curious, and to competent Judges, convincing Proofs; but I affect not this critical kind of Writing, which might poffibly deprive me of a great Number of Readers, and fecure the Affent only of those who are least likely to carry this Doctrine into Practice. But let me have leave to observe, that what I have laid down, is an indifputable Fact, and not among the Number of those about which much has been written, and nothing fettled. Sanctorius who first treated this Matter judicioufly, and practically, had the Honour to perfect his Difcovery, and to carry the Matter as far as it could go, and this in the beft Method, I mean that of Experiments; for he had a Chair fixed on a Ballance, and in fuch a Manner accommodated with Springs, as to difcover the flighteft Alteration in his Weight. By the Ufe of this Chair, and by conftant Observation of what he Eat, Drank, Perspired, and Evacuated every other Way; he came at the certain Knowlege of what he has delivered, and therefore we may with the utmost Confidence, believe, that at least, one half of what we eat or drink, after paffing through the

\*\* as, the Matter flowing from the other Perfon,
\*\* was abfolutely unlike to mine in all refpects, and
\*\* fo jagged and bearded, that it feemed to wound
\*\* and pierce me like fo many Arrows. Hence I
\*\* different, that the true Caufe of our fudden In\*\* elinations and Averfions, confifts in the Figures
\*\* of the Matter perfpiring from us, and from
\*\* others, and in the Union or Contrariety of thefe
\*\* infenfible Vapours.

"WE went out of the City, and at fome "Miles diftance, we faw fome Gentlemen di-"verting themfelves in Courfing a Hare; as the poor Creature paffed almost close by us, I had just Time to catch a Glance of her with my Glass. She appeared to me like a Ball of Fire, moving with prodigious Rapidity, and leaving a mighty Smoke behind her. This was the Matter perspired by the Animal, and I faw that the Dogs followed exactly the Track of that Smoke, and were never at all at a Loss, except when the Wind diffipated the Cloud that iffued from the flying Hare."

In this fhort Account, our Author very ingenioufly rallies fuch as expect to have occular Demonstration of Things, that do not admit of any fuch Evidence. His Microscope is nothing more than an Invention to cenfure their Folly, and to expose the Madness of having that verified to the Senses, which can only be apprehended by K Reason ;

Digitized by

Reafon ; yet this kind of Weaknefs ftill prevails in the World, and I dare fay, there is many a Reader who would laugh at the Story of the Hare, as an abfolute Fiction, and afterwards blufh to fee the fame Thing gravely laid down by fo judicious, fo intelligent a Perfon, as the great Boerbaave 9. There feems to be nothing more unintelligible or abfurd, than to affert that there are Things which are continually lofing part of their Weight, and yet never grow difcernibly lighter; and yet this we fee in the Cafe of the Antimonial Cup, which when five hundred Times made Use of, and after bestowing an Emetic Quality on five hundred Glaffes of Wine, remains just as heavy as it was at first: We may fay the fame Thing of the Odoriferous Effluvia of Ambergreafe, and the lefs agreeable Steam of Affafætida. None of these Things can be brought under the Cognizance of all our Senfes, it is fufficient to convince

our

<sup>9</sup> See his Chymiftry, vol. i. p. 151. wherein his Words are thus translated. The most fubtile Part of the Juices of Animals is a fine Spirit, which is continually exhaling, wherein the proper Character of the Animal feems to refide, and whereby it is diffinguished from all others. This we may infer from Hounds, which through a long Tract of Ground, and a Multitude of crofs Treads, will diftinguish a particular Animal out of a whole Flock ; the Effluvia of whole Footsteps it had lately fcented, or will find out their Mafter through an hundred crofs Ways, in the Middle of a confufed Concourfe of People. By this we may infer, how thin and fubtile, yet how different from all other Kinds of Bodies these Effluvia must be. They feem of an oily Origin, or to refide in a fubtile Vehicle of an oily Kind, as may appear both from the Analogy Digitize ofy Things and other Properties. Original from

INTERNET ARCHIVE

our Reafon if they fall under any one of them. For Inftance, if I plainly difcern the Smell of a Rofe at a certain Diftance; my Reafon will tell me, that I am within the Atmosphere of that Flower, because it is impossible that I should difcern its Odour by the Smell, if its Effluvia did not strike the proper Organ of that Sense in me. Hence, with a little Reflection, I can easily form a Notion of this Flower, perspiring an infinite Number of Odoriferous Particles, which for a certain Distance, so much overcome all the other different Sorts of Matter floating in the Air, as to become fo many Objects of my Sense of strelling <sup>r</sup>.

BUT now, if we take this the other Way, and confider a Body continually perfpiring fuch a Matter as is infenfible to us, that is, Particles fo fubtile as to efcape the Cognizance of all our Organs of Senfation, we muft be extreamly dull of Apprehenfion, if we do not conceive, that this perfpiring Body muft have its Atmosphere, as well as the Rose, or any other fragrant Flower. It is, therefore, I think, a Point set past all Dispute, that if a Number of Virgins are in the Company of an old Man, he must derive from them into himself a great Quantity of that fubtile Matter, the Qualities of which have been before described,

K 2

and

<sup>1</sup> See a Multitude of these Instances collected, and properly applied in Mr. Boyle's curious Treatife upon Gems.

Digitized by INTERNET ARCHIVE

and efpecially if we confider, that as these Effluvia escape through the Pores, the Pores must confequently be continually open, and if so, they must imbibe from without, as well as give Passage to what comes from within.

I doubt this will appear a new Paradox to many of my Readers, and methinks I fee fome of them ready to throw my Treatife out of their Hands, and crying with an Air of Self-fufficiency and Difdain; this poor Man is mad himfelf, and would fain make us fo. But Patience a little, give me leave but to propole a few familiar Queftions, and I will defy you to difbelieve what I had laid down. Is there any Thing more common, than to find a Stranguary enfue upon the Application of a Blifter, and yet how can this happen, if the Particles of the Cantharides did not enter through the Pores, and thereby create a diversion of that Salt watry Fluid, which is ufually fecreted by the Kidneys, and compofes what we call Urine. On the other Hand, it is a thing certain, that Opium ufed in a Plaifter, will procure Sleep, which it could not poffibly do, if in like manner it did not find a Paffage through the Pores into the Blood: I might likewife take Notice of an Effect that frequently, if not conftantly, refults from the Application of a Cataplafin of Camomile to the Stomach, the bitter tafte of which Herb, in the Space of two Hours, is difcerned on the Palate. I will mention one Inftance

more.

more, which is at once fo ftrong, and fo common, as to put the matter quite out of Difpute; I mean the ordinary Method of raifing Salivations by Unction; for whoever confiders this attentively, muft be fenfible, that the Body may be very ftrongly affected by Things that enter only through the Pores<sup>3</sup>.

I cannot help taking Notice of a very fingular Paffage in a French Hiltorian, whofe Character is perfectly well established, and which Passage in my Apprehension, may contribute not a little to render all that I have afferted equally Credible and Clear. This Author tells ust, that in the Year 1346, there broke out of the Earth in Cathay, which is that part of Great Tartary, bordering upon China, a certain Vapour, fo prodigioufly flinking, as to deftroy all living Creatures. This, like a fubterraneous Fire, after it once escaped, rolled over two hundred Leagues of Country, devouring even the very Trees and Stones, and affected the Air in a wonderful Manner. From Cathay, it paffed through Afia and Greece, from thence it croffed over into Africa, and after ravaging that Country, it entered Europe in 1348, making fuch Havock

<sup>s</sup> The Montpelier way of Salivating is ftill a ftronger Proof of this, fince it argues, that this Method of raifing it, is fafer, more equal and better adapted to the Ends it is to answer, than that of taking Things by the Mouth. <sup>t</sup> Abregé Chronologique de l'Histoire, de France par le Sieur

t Abregé Chronologique de l'Histoire, de France par le Sieur de Mezeray, Tom. iii, p. 32.

Digitized by NTERNET ARCHIVE

Havock in France, that not fo much as a City, Village, or fingle Houfe efcaped, and from thence it paffed into other Countries, fo as to reach even the utmoft Extremities of the North; the Venom, fays my Author, was fo Contagious, as to infect even by the Sight. It was remarked, that it continued exactly five Months in every Country through which it paffed. In those Places where it was most favourable, it left only a third of the Inhabitants, in most about a fifteenth, in some not above a twentieth Part. Can one concieve that an Exhalation should pass quite round the Globe, and produce fuch terrible Effects wherever it came, and shall we believe that Exhalations that are continually furrounding us, fhall have no Effect at all? Or ought we to apprehend, that if fuch dreadful Feats can be wrought by flinking and noxious Exhalations, there is nothing nutritive or Salutary to be performed by those of an opposite kind ? I must confess, that I fee no ground for fuch a belief.

THERE is undoubtedly, as the Learned Bacon lays it down, a healthy Sympathy, as well as a morbid Infection "; and as in Spight of all the Care and Caution we can take, we find it extreamly hard to

<sup>u</sup> See p. 64. in the Quotation from Bacon. If this Argument be not allowed, it will be hard to affign any Rational Caufe, why one Place fhould be more Healthy than another ; and to understand this Doctrine perfectly. the Reader ought to confult Mr. Boyle's Treatife of the Wholefomeness and Unwholefomness of the Air.

Digitized by INTERNET ARCHIVE

to guard against, and to ward off the latter; fo by a Parity of Reafon, it fhould feem, that of all the Methods contributing to Health, the former ought to prove the most efficacious: That is to fay, we think there is no way hitherto laid down for preferving the Vigour of the Body, and thereby fecuring fuch a Supply of animal Spirits, as may support the Dominion of the Soul, in its full extent and activity, fo feafible as this; which is fuggested to be the Source of the Longevity, and Healthfulness of Hermippus. For if insensible Perfpiration be made through the Pores, fo that there is a continual Steam transpiring from every Body, then it follows, that where an old Man is conftantly attended by many young Women, his Body must be furrounded with an infinite Quantity of the perfpirable Matter flowing from them; and if on the other Hand, he not only perfpires through the Pores, but also receives by them as has been already demonstrated, the finest and most Spirituous Particles of other Bodies into his own, then it is very evident, that fuch an old Man must be, as I observed before, in such a Situation, as will enable him to draw the greatest possible Benefit from this most comfortable Medicine.

THE more strictly we confider the Structure of the human Body, and the certain Caufes of Health and Sickness, the more Reason we shall find to be fatisfied with, and to acquiesce in the System we have

Digitized by INTERNET ARCHIVE

have laid down. Reafon and Experience have convinced us, that the Body is a Pneumatico-hydraulic Machine, compoled of Fluids and Solids, and that a good Conftitution, or healthy Difpofition ariles from the proper Motion of the one, and a due Circulation of the other. It is alfo, no lefs certain, that this Motion, and this Circulation depend reciprocally on each other. For as the Circulation is obstructed, leffened, and in some measure ftopped from the want of a proper Motion of the Solids, occafioned by their Lofs of the true Tone and Texture which they ought to have; fo this very Lofs on the other Hand, arifes from their not receiving a timely and fuitable Supply of Nutrition from the circulating Juices w. Hence that drynefs, ftiffnefs, and rigidity of the Fibres, which properly caufes the Difeafe, we call old Age, to prevent which, in a natural, rational, and phyfical Way, the only proper Method is, to provide a conftant, equal, and effectual Supply of fmooth Balfamic and Lubricating Particles from the circulating Fluids. If this could once be done, it is, I think, very apparent, that old Age could no more attack the human Body, than any other Difeafe, against which, proper Precautions may be taken. But, as it is not to be expected that human Wildom should be able to perfect fuch a Method,

" Boerhaav. Inftit. Medic. § 1053, 1054.

Digitized by INTERNET ARCHIVE

thod, all that we can reafonably hope for, is, to arrive at fome Proficiency therein; fo that though we are not able to prevent old Age, we may have it at least in our Power to retard it. It is in a Manner incredible, that by Art, a Man should be able to reach two or three Hundred ; but that he should live and enjoy Life to upwards of an Hundred; the wifeft of the Antients believed, and the Methods they prefcribed and practifed for this Purpofe, are all founded upon my Principals, as appears from their use of Frictions, Baths, and Ointments, all of which had been idle and improper, if they had not conceived it possible to charge the Fluids, by means of them, with fuch Particles as were fit to repair the Loffes of the Solids x.

HERMIPPUS undoubtedly made use of a far more rational, as well as efficacious Medicine. For we have proved by all the Methods, that the Nature of our Argument will allow the Particles refpired and perfpired by young Perfons in full Health, to be the fmootheft, fofteft, and most Nutritive that can be conceived. On the other Hand, the Method he took in applying theie, not only by receiving them in the Air every Time L

\* Inftead of citing Phyficians, I thall refer the Reader to Plutarch's learned Treatife on Health and long Life, where, in a narrow Compais, he will fee the Senfe of the beft Writers in Antiquity on this Subject.

he

he drew Breath, but drawing them also in through all the Pores of his Body, by that Sort of animal Action, which is in in a manner Spontaneous, muft have encreafed their Effects, and taking this altogether, one cannot help confidering him as a Perfon in a conftant warm Bath, of the most spirituous and unctuous Humours, which were continually pervading him, at the fame Time, that by the Vapours of the young Peoples Breaths, he drank not fo much Air as Life. But if we will add one Circumstance further, and that not at all forced and improbable, viz. That he caufed fome of thefe young People to lie with him, as David did Abifbag; we shall then carry the Medicine to its higheft Pitch, and shall easily apprehend, that during that Time of free and copious Perspiration, he must have received fuch a large fupply of Nutritive Spirits, as effectually refreshed his Nature, and reftored in a great measure that waste which is occasioned by performing the ordinary Functions of Life y.

WE may add the last Degree of Force to this Manner of Reasoning, if we may be permitted to argue from Contraries. What is more common than

<sup>y</sup> The Opinions of many learned Phyficians might have been cited in fupport of this Doctrine, if we had not been afraid of tiring the Reader too much; but if he is extreamly Inquifitive, he may confult the following Writers. than to fee a Woman advanced in Years, grow not only brifk and lively, but ftrong and healthy, by marrying a young Hufband. She drinks his Breath, exhales his Spirits, extracts his Moifture, and thereby invigorates herfelf, while the poor Man fuffers from the impure Contagion of her Breath and Vapours, and from the Malignity of this ill-chosen Union, finks very quickly into apparent Weaknefs, and falls at last into what the common People call a Galloping Confumption. Strange! that the Death of a young Man should refult from his Marriage with an old Woman, and that the taking of a young Wife fhould repair the Wafte, and prolong the Life of an old Man z. Yet, fo it is, and upon this Subject I will venture to fet down a remarkable Inftance from the Writings of an unexceptionable Witnefs, one, whofe repute for Veracity is as well established, as his Fame, for Learning in general, and for his particular Skill in Phyfic.

THE Perfon I mean is, *Peter Lotichius*, and the Example he gives us, this. A Man, upwards of eighty Years old, married, after the Lofs of his first Wife, a second, who was but twenty-five; when they had been married about a Year, he L 2 fell

<sup>2</sup> The Author has very judicioufly omitted any Inftance of this Kind, probably for two Reafons; firft, becaufe every Man's Memory may fupply him with Examples; and fecondly, to avoid faying too much on a Subject offenfive to the Fair Sex.

INTERNET ARCHIVE

fell into a very extraordinary and dangerous Diftemper; he grew at laft fo weak and low, that his Cafe was judged to be defperate. By Degrees, however, he grew better, and as his Strength encreafed, his grey Hair and white Beard fell off gradually, and his Skin likewife began to peel; foon after, a light, ftrong Hair began to peep through the Skin of his Head, which in time fell down to his Shoulders, in ftrong natural Curls. His Beard came in the fame Manner, and his Face acquired a beautiful and florid Complexion; in a Word, he became again a found, lufty, and if the Expression may be allowed, a young Man, which his Wife was forced to atteft, fince fhe had by him afterwards feveral fine Boys<sup>a</sup>. This is an Inftance much to my Purpofe, fince it proves the prodigious Efficacy of human Breath, and the Matter perfpired by a juveniel Body. Yet, give me leave to obferve, that this extraordinary Effort of Nature might poffibly contribute to fhorten the old Man's Life, who without the Enjoyment of this young Women, might have preferved his Conftitution many Years, and have lived in the perfect Fruition of those Pleasures peculiar to the Mind, and for the Enjoyment of which it feems moft ational, that Life should be prolonged.

THERE is fomething of the fame Kind observe-" able in the well known Hiftory of the famous English long liver, Thomas Parre, and thefe particulars are very curioufly diftinguished by the great Anatomist Barthelin, who fet down his Account of him, not as a curiofity to pleafe Children, but as a fingular and memorable Fact, worthy of the Attention and Confideration of Men. This Parre, was born at Winnington, in the County of Salop, in 1483, and paffed his Youth in very hard Labour, and which is as remarkable, in Sobriety and Chaftity. At fourfcore, he married his first Wife Jane, by whom he had two Children, neither of which were long lived, or shewed any extraordinary Signs of Strength; the first died at the Age of a Month, and the fecond lived but a few Years. At an 102 he became enamoured of Katherine Milton, whom he got with Child and did Pennance in the Church for it. Some Months before he died, the Earl of Arundel brought him up to London, and prefented him to King Charles I. but through the change of Air, and in Living, he died foon after; though it was believed he might have furvived many Years, if he had remained in his own Country, and led the fame Life he was wont to do b. This Man was over-grown with Hair,

<sup>b</sup> Bartholin. Hift. Anatom. cent. v. hift. 28. p. 47, 48. Some accounts make Parre much older, and place his Death in 1651; I have confulted his Monument in Westminster-Abby, and

Hair, and during the latter Part of his Life, flept very much. In the fame Country lived the famous Countefs of Defmond, whofe Age was unknown to herfelf, but extreamly well supported by the Authority of others; fince from Deeds, Settlements, and other indifputable Teftimonies, it appear'd clearly, that fhe was upwards of an hundred and forty, according to the Computation of the great Lord Bacon, who knew her perfonally, and remarks this Particularity about her, that fhe thrice changed her Teeth c. We have it on the Credit of Alexander Benedictus, that there was a Lady of his Acquaintance, who at the Age of Fourfcore, had a complete new Sett of Teeth, and though her Hair had all fallen off before, yet at the fame Time fhe cut her Teeth it grew again, of like Colour and Strength as at firft d. Bartholin, the famous Anatomift, whom I cited before, furnishes us not only with another Example, and informs us, it was procured by Art, but gives us alfo the Receipt by which it was done, and which he affures us was no other than an Extract of black Hellebore, difolv-

ed

and there I find he died on the 15th of November, 1635, Aged upwards of 152; when his Body was opened, his Bowels appeared very Sound, only the Lungs were fomewhat injured, which was thought to be owing to the Groffnefs of the Town Air, and that he might have lived much longer, if on his first Complaint he had been let Blood.

<sup>c</sup> Verulam. Hift. vitæ et Mortis. Sir Walter Raleigh's Hiftory of the World. lib. I. cap. v. §. 5. <sup>d</sup> Donat. Hift. Med. mirab. lib. VI. c. 2. p. 300.

ed in an infusion of Wine and Roses. If I mistake not, the illustrious *Boyle* hath something to the fame Purpose about the Quintissence of Balm<sup>f</sup>.

IF we confider thefe extraordinary Relations attentively, and reflect on the Weight of Evidence, with which fome of them, and efpecially those of Parre, and the Counters of Defmond are supported, we must be fatisfied, that the human Body is a Machine capable of very extraordinary Changes. For we ought to confider, that if we are once brought to believe, that a Woman thrice changed her Teeth, it is as clear a Proof of the poffibility of the Fact, as if we had twenty other Examples. Now, if there be a Poffibility of renovating human Nature, why on the one fide fhould we not Study it? Or why on the other, should this kind of Study be treated as a vain and fanciful Thing? If the Office of a Phyfician be Honourable ; if there be fomething Noble and God-like in curing Difeafes, in ftopping the progress of Pain and Mifery, and warding off the dart of Death for a few Years; there is certainly fomething much more excellent in the Art of renewing the human Body; fecuring Health and Vigour, thro' a long courfe of Years; keeping not only Death, but his younger Brethren Age and Decripedness, at a distance. Let us remember

e Hift. Anatomic. cent. v. hift. 28. p. 51. f See his Treatife on Specific Remedies. As to the Medicine its felf it was contrived by Paracelfus.

NTERNET ARCHIVE

member upon this occasion, what I have already cited from the learned Monk Bacon; what fayshe, if Aristotle, Plato, Hippocrates and Galen, were Ignorant of this Secret; Is that a Proof that we shall not attain it? Were they not Ignorant of many other Secrets that are now commonly known; why then fhould we imagine the barrier of Science fixed here, rather than any where elfe? Why fhould we not find out the means of prolonging Life, as well as a Method for fquaring the Circle? Is not the former, of as great Confequence to us as Men? Or is the latter, a more useful Proof of the ftrength of human Understanding? Let us proceed then; let us collect and compare (fince the nature of the thing forbids other Experiments) fuch Examples as we meet with in authentic Hiftories; and let us in this, as in other Cafes, endeavour to convert Hiftory into Science, by obferving nicely the particulars in every Relation, and endeavour thereby to trace out the manner of Natures working; for if this can be once done, we shall be foon able to follow her Steps. If Nature at any time vouchfafes this favour to Men, it follows, that their Bodies have no incapacity of receiving it; that is to fay, if every Man's Body was not fo conftituted, as to exceed by far the ordinary limits of Life, it could not poffibly happen that any Man's Life fhould be fo extended.

FATHER

Digitized by

FATHER Maffeus, who wrote a celebrated Hiftory of the Indies, which has been always efteem'd a perfect Model in point of Veracity, as well as the elegance of its Composition, gives us the following Account, after having related the Death of the Sultan of Cambaya, and the conquest of his Kingdom by the Portugueze. " They pre-" fented, fays he, at this time to the General, a " Man born amongst the ancient Gangards; who " are now called Bengalar, who was 335 Y ars of " Age. There were various Circumstances which took from this Account all Sufpicion of Falf-" hood. In the first Place, his Age was confirmed " by a kind of universal Tradition, all the P.ople " averring that the oldeft Men in their Intancy " fpoke of this Man's Age with Aftonifhment; s and this old Man had then living in his own " Houfe, a Son of ninety Years old. In the next " Place his Ignorance was fo Great, and he was " fo abfolutely void of Learning, that this re-" moved all ground of Doubt, for by the ftrength " of his Memory he was a kind of living Chroni-" cle, relating diffinctly, and exactly, whatever " had happened within the Compais of his Life, " together with all the Circumstances relating to " it. He had often loft and renewed his Teeth, " his Hair, both on his Head, and Beard, grew " infenfibly Grey, and then as infenfibly turned 66 Black again. The first Age of his Life he ss paffed M

# [ 90 ]

paffed in Idolatry; but for the two laft Centuries of his Life, had been a Mohammedan. The
Sultan had allowed him a Penfion for his Subfiftance, the continuance of which he begged
from the General; the fame Motive remaining,
which had firft induced the King of Cambaya
to grant him a Subfiftance, that is to fay,
his great Age, and the extraordinary Circumftances that had attended his Life, thefe prevailed on the General to grant his Requeft <sup>g</sup>."

BUT, as it may be very eafily conceived, that fo ftrange a Story as this must have created many Enquiries, and have either funk in the World, or in confequence of those Enquiries, received abundance of concurrent Teftimonies. I shall therefore beg leave to add fome very remarkable Particulars in relation to this celebrated Long-liver, from the Portugueze Hiftorian, Ferdinand Lopez de Castegneda, who was Hiftoriographer Royal. He tells us, that in the Year 1536, there was a Man prefented to the Vice-Roy of the Indies, Nunio de Cugna, who was near 340 Years old. He remembered, that he had feen the City in which he dwelt, and which was then one of the most Populous in the Indies, a very inconfiderable Place. He had changed his Hair, and recovered his Teeth four Times, and when

\* Hiftoriarum Indicarum lib. xi, c. 4.

Digitized by INTERNET ARCHIVE

when the Vice-Roy faw him, his Head and Beard were black, but the Hair weak and thin. He afferted, that in the Courfe of his Life he had feven hundred Wives, fome of which died, and the reft he had put away. The King of Portugal caufed a strict Enquire to be made into this matter, and an annual Account of the State of the old Man's Health. brought him by the returns of the Fleet from India. This long lived Perfon, was a Native of the Kingdom of Bengala, and died at the Age of 370h. This Hiftory is in itfelf very curious, founded upon good Authority, and therefore transcribed from the Authors I have mentioned, by many curious and inquifitive Perfons, who were also proper Judges of Cafes of this Nature, and who have none of them intimated any doubt or fufpicion as to the matters of Facti. I therefore fubmit it to the Reader's confideration, whether it be not a matter worthy of Reflection; that there is a certain Strength in the human Body, which affifted by fome lucky Circumstances, enables it to renovate its felf fometimes Once, as in the cafe mentioned by Lotichius, fometimes oftner; as in that of the Countefs of Defmond, who bred all her Teeth thrice; and this Native of Bengala, who changed his Hair and Teeth four times ; and there is ano-M 2 ther

## [ 92 ]

ther Circumstance of which I cannot but take notice, as it favours my Doctrine very much ; that this Man who lived to an Age much greater than. any, which we have as good Authority, had, fo many Wives, to the Efficacy of whole Breaths, and the infenfible Effluvia of their wholefome Bodies, I should not fcruple to attribute in a great Meafure, his extraordinary Longivity. Thefe I fay, are Points which deferve to be confider'd, fince if fuch a Power there be in the human Conflitution, we ought not to defpair of finding out Methods, which may contribute to its manifefting its felf more frequently; which would be certainly a far greater benefit to Mankind, than the bare Study of the proper Remedies for ufual and common Diftempers. Let me add, that perhaps if fuch a Method could be found, it must also defend from almost all Discafes, by procuring fuch a Vigour, as should not permit the Entrance of them.

I have hitherto declined speaking of long-lived Animals, upon which, however, the great Lord Bacon has insisted much. Appollonius, if we may believe the Writer of his Life, discovered in Mount Caucasus, an extraordinary Secret in Natural History. There are Apes there, it seems, which feed upon a kind of Pepper, and these Apes are eaten by old Lyons, to renew their Strength

Digitized by INTERNET ARCHIVE

Strength and make them young k. I must confess, I fufpect this to be rather an Allegory, than a Fable, and I should incline to interpret it thus; that lofty and ambitious Spirits over-act the Bodies, in which they inhabit, and induce a premature old Age; if this Effect be not prevented by frequently unbending their Spirits in the Company of humorous and diverting People, who are well enough marked out by Apes well feafoned. Thus Agefilaus the famous King of Sparta, when he was extreamly old, amufed himfelf by playing with young Children. The great Scipio diverted himfelf in the Company of Terence, and Augustus had always about him the most sprightly Wits of Rome. Cardinal Richlieu had funk under the Fatigues of his Ministry, if from Time to Time he had not been relieved by the humorouus Buffoonry of Boifrobert. Lewis XIV. was as delicate in his Amufements, as great in his Councils, and fhewed as true Judgment in approving a Play of Moliere's, as a Project of Louvois. We are not therefore to understand the Antients litterally, when they deliver to us those Stories which appear to us incredible. But to return to long-lived Animals.

It is certain, that Eagles arrive at a great Age, and that they preferve almost as long as they live, that prodigious Strength which diftinguishes them from

\* Philoftrat. in Vit. Appolon. Tyan. lib. iv. c. i.

INTERNET ARCHIVE

from other Birds. We know too, that the Eagle renews his Plumage annually, and it is not eafy to conceive how this fhould be done without a total Change of its Juices. The Stagg is another long-lived Animal, though I cannot believe many of the Stories that are told about it. I mention it only that I may observe, that annually it cafts its Horns, which is another Proof of the renewal of animal Juices. But this is ftill more confpicuous in the Viper, which in the Spring cafts its Coat, and comes abroad Youthful as the Year. If the Eagle, the Stagg, and the Viper were not common to every Climate, I make no doubt that the Facts related of them would be treated as Fables; but as they happen every Day, and under our Eyes, we are obliged to own them for Truths. Yet, what use have we made of these Truths? Who can affign the Caufes why thefe Animals live longer than others; or, how it comes to pafs, that Nature grants them this Privilege of Rejuvenescency? Yet such an Enquiry might repay our Industry abundantly 1. It is faid, that we learned Phyfic from Animals, that Dogs taught us the Ufe of Emetics, and that Birds put us in the Head of Glifters. If they were our Tutors in the lower Parts of Phyfic, why fhould we difdain

<sup>1</sup> Aldrovand. Ornitholog. Gesner de Avibus lib. iii. Aristot. de Apimalibus.

dain their Inftruction in this fublimer Part of that Science?

IT is not only the Inhabitants of the Land and Air that attain to fuch vaft Ages, fuch as dwell in the Waters feem to have yet a larger Share of Life, of which I will give one well attefted Inftance out of many. In the Year 1497, in a Fifhpond in Suabia, near Huilprin in Germany, they took a Carp of a prodigious Size, which had in his Ear, a Ring of Copper, with these Words in Latin. I am the first Fish that was put into this Pond, by the Hands of Frederick II. Governor of the World, the 5th of October, 1230. This Carp appeared to have lived 259 Years, and probably might have lived much longer, had he not been taken out. I cannot apprehend, that much use will ever be made of Examples of this Sort, becaufe Fishes live in another Medium, and feem to have their Lives regulated by Laws different from those of other Animals m. We may fay of them, that if they do not, like the Eagle, renew their Vigour, yet they feem never to grow old, or to express myself more clearly, Age with them feems exempt from Infirmities. The broken Claw of a Lobster grows again, which if feriously confidered, is very wonderful, and it is generally believed.

" Johnston, Histor, Natur.

Digitized by INTERNET ARCHIVE

believed, that most Fishes grow as long as they live, which if true, is not easily accounted for.

WHAT I would infer from all these Hints, is no more than this, that Nature has furnished us with numerous Examples of what we feek long Life with the Prefervation of Youth. We fee this daily in Birds, and in Beafts, in Fifh and in Reptiles, and yet we fet down fatisfied, that fpeedy old Age, and premature Death, belong to us by the Law of Nature. Where is the Juffice, where is the Confiftency of this; especially, if we confider, that the Flesh of many long-lived Animals has a Quality wonderfully reftorative? We know that mighty Things have been done by feeding upon Vipers, and not much lefs by living upon Shell-Fish; the Bone of a Stag's Heart is held to be a very high Cordial, the Reafon of which is fomething Singular, and therefore I will take Notice of it n. This Bone is the ftrongeft Proof of the Stag's Longevity, for it is nothing elfe but the Root of the Aorta, grown bony through a long Series of Years. We are therefore in the wrong to take it for granted, that Nature has paffed fuch a Sentence upon us, when the Record of Experience proves directly the contrary, and when we

fo

<sup>n</sup> This Bone of a Stag's Heart enters into all the Receipts of Bacon the Monk, as well as into all those that are mentioned by the Arabian Physicians; and as they transcribe Greek Authors, it is easy to see, that this Medicine was of great Antiquity.

Digitized by INTERNET ARCHIVE

fo plainly fee that the Seeds of long Life are in long-lived Creatures. But we pass this Sentence and execute it upon ourfelves. We fit down not patient, but dejected, under what we efteem a common Calamity, and defire rather to make the most of a short Life, than to fatigue ourfelves with the Study of the means by which it may be prolonged.

I had almost forgot an Objection which has been flarted from a fuppofed Law of Nature, with respect to Animals, viz. That those have their appointed Times, and that most of them are but of very fhort Periods; the great Lord Bacon hath taken much Pains to make this out, though with a better View than the supporting fuch an Objection, but after all, I very much doubt the Matter of Fact, viz. That there are any fuch immutable Laws, that Animals cannot transgress. For instance, it is faid, that the Age of a Horfe, I mean his extream Age, is twenty or twenty-four; Hiftory furnishes us with Inftances that contradicts this. I will mention but one, Mezeray tells us, that a certain Duke of Gascogny paid his Homage to the King of Burgundy on a Horfe that was an hundred Years old, and which was still vigorous and full of Mettle °. But admitting the Matter of Fact, where lies the Force of the Objection ? Some Animals N reach

e Histoire Abregé, de France, Tom. i. p. 401.

Digitized by INTERNET ARCHIVE

reach ten, and others it is confeffed, live much beyond a hundred; what has this to do with the Life of Man? why should it prove, that we are ftinted to Fourfcore, more than that we have it in our Power to live as long as Stags and Eagles. It may be faid, that there is a certain Gradation in thefe Periods, and that as each Animal has its affigned Term, fo likewife has Man. But we proved the contrary of this, by all the Methods of Argumentation yet invented; we fhewed it from Scripture, from Reafon, from Experience; and if all this is not fufficient to baffle a Notion founded only on Fancy, why, let those who are fond of it, enjoy it. I do not think that Life ought to be forced upon People, my Creed goes no further than this, That if we feek we may find, if we knock it will be open'd; and this I am led to fay, becaufe I find it fo in other Purfuits, where Men follow Nature, and not their own Notions. What mighty Difcoveries has the Newtonian Philosophy afforded, which had been for ever hid from Men. if they had continued to follow the Visions of Defcartes? How much more certain the Aftronomy of our Times, than that of our Anceftors? Yet fome fay, that all these Discoveries are only loft Truths revived. Be it fo, and let us return to the Search of that Truth which was known to Hermippus, and which has been fo long loft to us.

A Contraction of the second

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

IF.

IF, therefore, after all that has been faid, there remain yet any Doubts upon the Mind of the Reader, we shall endeavour by all means to remove thefe, as well for the Sake of his Satisfaction, as that, after fo much Pains already taken, we may not fail in our Attempt, and have this Differtation confidered only as a litterary Amufement; whereas, we intend it as a ferious and ufeful Discourse. The Antients, who seem to have fludied this Matter with the greatest Affiduity, and whole Opinions generally fpeaking, on mature Examination, appear not altogether unreafonable to the Moderns; obferve with Refpect to the Caufes of old Age, that they are chiefly three. First, the Circumambient Air, which drys up the natural Moifture in Man, at the fame Time, that the innate Heat of the Body confumes it, as the neceffary Substance on which the Flame of Life must feed. The fecond is the Toil and Motion of the Body, which likewife waftes that aerial Humidity which is fo neceffary to Health and Life; the laft is the Paffions of the Mind, which according to the Sentiments of the learned Avicenna, have greater Influence than both the other Caufes taken together, which will feem extreamly reafonable, if we confider how close a Connection there is between the Paffions of the Mind, and the Motion of the animal Spirits, which particularly appears in Madnefs, when we compare the Circumstances N 2 attending

INTERNET ARCHIVE

### [ 100 ]

attending it, as a Difease of the Mind, with those by which it also appears to be a bodily Diftemper.

SUCH as are acquainted with that mysterious kind of Philosophy, which was in the highest Credit with the learned Vulgar of the laft Age, and which is now as unreafonably difcredited amongft the fame People, and regarded only by fuch as enquire after Truths, and not received Opinions; this Philosophy I fay, teaches us, that there is a great Correspondence between the Body of the Earth, and the Body of Man, whence the Patrons of this Doctrine were wont to call the latter the little World, and the former the great one. Now, though there is fomething very fanciful in their way of treating this Matter, yet the Notion in its felf is very juft, and whoever examines it carefully, will find, that the general Laws of the Univerfe, are alfo the particular Laws of all the different kind of Bodies in it; and hence it comes to pafs, that as Man fuffers and is deftroyed for want of Moifture, fo this is like to be the cafe of the World too, or at least would be the Cafe, if it did not receive foreign Supplies; which the judicious Sir Ifaac Newton fuppofes it does from the Tails of Comets, the Watery Vapours of which, he imagines communicate with our Atmosphere for that purpose P.

THIS

P Philosoph. Natural. Princip. Mathem. lib. iii.

THIS we must allow to be a rational, and probable Account of what for many Ages puzzled the Understanding of all Mankind; and if fo wonderful a Method as this is, be neceffary to fupply the Earth with Moifture, why should we think it ftrange, that a new, and in fome Meafure unaccuftomed way, fhould be the fitteft for repairing that Humidity, which is fo neceffary to the well being of the human Body. The Universe is under the fpecial Care and Direction of its infinitely wife Creator, who at certain Seafons therefore has provided it with fuch requifite Supplies; but the Bodies of Men are in this respect left to their own Care, and if the Materials be within our own Reach, and our Faculties are ftrong enough to difcover them, we have no more a right to complain that the Secret of preferving long Life is not discovered to us, than that the Art of baking Bread, of melting Ores, and refining Metals, or indeed any other Art was not revealed to our Anceftors in the earlieft Ages of the World, but left to be the Reward of their Industry and Segacity. The Furniture of Man's Mind, and the Structure of his Body, are both of them fuch, that if he has any Reafon to complain, it must be of himfelf; and his Reflections upon Providence are not only impious, but ridiculous. He has it abfolutely in his Power to be easy, and happy if he pleafes, Health will always attend on Temperance

Digitized by INTERNET ARCHIVE

perance fteadily purfued, as Galen afferts in his Works, and manifefted in himfelf by living to upwards of a hundred, without being attacked either by acute or chronic Difeafes. Riches are not indeed within every Man's Reach, but there is fomething always at hand infinitely more valuable than Wealth, I mean Content. If to thefe Bleffings we would add length of Days, why that according to this Hypothefis is in our Power, and depends on our finding out a proper Supply of the aerial Humidity before-mentioned.

WE have now the Clue in our Hand, and nothing can hinder us from extricating our felves from this Labyrinth of Doubts, about the proper Method of obtaining this Supply, but our own Negligence and want of Attention. We ought to remember that Heat and Moifture are from the very beginning the Principles of human Life. Let us reflect then, and fee if we cannot difcover whence these Principles arise. There is, I think, very little Difficulty in this Cafe, that of Heat is derived from the Male, that of Moifture from the Female. It is equally unneceffary and unbecoming me to introduce a Treatife of Generation in a Work like this; it is fufficient that I put my Readers in mind, that the enlargement of the Fœtus in the Womb, requires a very extraordinary Degree of Moifture in all Respects, and that this is entirely derived to it from its Mother.

Digitized by INTERNET ARCHIVE

### [ 103 ]

ther. The Growth of an Infant is furprizingly quick, and this is owing to the Strength of the Vital Flame, the conftant Supply of a proper Humidity, and the not being exposed to those Accidents which have been before-mentioned, I mean the Action of the Circumambient Air, bodily Motion, and the Paffions of the Mind, from all which, Children while in the Womb, are in a great Measure free. This I think is so extreamly clear, and plain, that it is fimply impossible for a Man to be in any Perplexity about it, and therefore I shall proceed to the next Stage of Life, and enquire into the Method which is therein pursued by Nature.

In the State of Infancy, there is likewife an extraordinary Provision neceffary of this humid Mater, not only fufficient for performing the ordinary Functions of animal Life, but also to facilitate the growth of the Child, and this too proceeds from the Mother. Nature has furnished her with Breafts, and with Milk, which is the most fuitable Nutriment, that under fuch Circumstances, the human Body can receive; and in extream old Age, when the Body is a fecond Time reduced to the Feebleness of Infancy, Milk, and especially Womens Milk, is found to be of very great Use, and in confumptive Cafes also, is allowed to be a most admirable Reftorative. Hence I think it plainly appears, that the radical Moisture, fo neceffary

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

to

to fupply the Flame of Life, and to keep it not only alive, but vigorous and clear, is to be fought in Woman. I forefee one great Objection that may be made to this, viz. That I infift not on the Breath or Effluvia of Women, but of Virgins. Yet weigh the Cafes thoroughly, and you will find all that I have advanced, very confiftent. The Nourishment of a Child in the Womb, and an Infant at the Breaft, is a Nourishment no way fit for Perfons in Years, and therefore I approve what Bacon delivers from the Arabian Phylicians, viz. That Milk is an improper Diet for old Men. This hinders not its being ufeful when People are quite worn out, for that may furnish Strength to a dying Flame, that would not advantage a Lamp in its ordinary Situation. Perfons in the laft Stage of Life, are frequently emaciated, and in this Cafe, Milk may help; but still there is a wide difference between the natural and gradual Decay of the human Body, and what the Phylicians call a Confumption, there must be confequently a Difference in their Cure. Thus from certain and almost felfevident Principles, I have established the Reafonablenefs of this Proposition, that the Breath and infenfible Perfpiration of Virgins in a young and healthy State, must be very falutary for old Men, and may very probably be a means of protecting them from those Infirmities, which usually attend an advanced Age. Now, in respect to this, it matters

Digitized by INTERNET ARCHIVE

matters not at all, whether the Infeription I fet out with be founded in Truth or not, neither is it requifite to believe that I have hit exactly on the Method ufed by *Hermippus*. The fingle Point in Queftion is, whether I have fhewn that Senfe in which I take this Infeription, to be agreeable to the Dictates of Reafon, and the Laws of Nature; and as to this, every Reader must decide for himfelf. Before he does this, there is another Sort of Evidence that he ought to hear, and which for the Sake of Truth I shall readily produce.

THERE are two Sorts of People whofe Intereft it is particularly to decry this Doctrine on a Supposition that it is destructive of their own, to which they are prodigioully, and perhaps unreafonably addicted : I mean the Aftrologers and Hermetic Philosophers. I shall examine what both may object, rather for the Entertainment and Satisfaction, than for the Conviction of the wifer Part of the World, who are already well enough apprized of the Credit due to these Virtuofi; and when I have done this, I shall draw to a speedy Conclusion, from an Affurance that nothing more can be neceffary to eftablish the Probability of this Method for preferving Health and Life, and for defending our Bodies from the Infirmities of old Age as long as their Conftitutions will permit.

THE modern Patrons of Aftrology, for fuch it feems there are, will probably pretend, that this O Notion

Digitized by INTERNET ARCHIVE

# [ 106 ]

Notion of Hermippus was a mere Fancy, and that if he really reached to an Age fo advanced, it was not through the Affiftance derived from the Breath of Virgins, but from the happy Polition of the heavenly Bodies at the Time of his Birth. It is, however, lucky for me, that they can never make good this Objection, becaufe I prefume their Art will not furnish them with the means of Conftructing any Scheme of his Nativity. I know they may plead the Authority of Thomas Aquinas 9, and other great Men who have given into thefe Opinions. I know too, that they may produce fome extraordinary Inftances of the Verification of Aftrological Predictions; particularly those of Bafil, who was fo famous at Florence, and of La Broffe, at Paris, who were particularly happy in gueffing at future Events, and in having their Predictions recorded by Hiftorians of Credit.

THE former of these foretold to Cosmo de Medici, then a private Citizen at Florence, that he would attain some very high Dignity, in as much as the Ascendant of his Nativity was adorned with the same propitious Aspects, as those of the Emperors Augustus, and Charles V. had been; and he was accordingly raised to the Dukedom of Tuscany, in

<sup>9</sup> One ftrong Paffage among many in his Writings, runs thus. Qui Sciret virtutes Cælorum & Stellarum dum res aliqua nafeitur poffet judicare de natua rei, licet hoc neceffitatem non imponat, & pofcet impediri per Accidens. D. Tho, Secundo de Generatione.

Digitized by INTERNET ARCHIVE

in the Month of Fanuary 1434 ". The fame Greek Aftrologer, did, with equal Capacity, foretell the Death of Prince Alexander de Medici, and this with fuch Confidence, as to paint out the Perfon by whole Hand he should die, and whom he affirmed to be that Prince's intimate and familiar Friend; of a flender habit of Body, a fmall Face, and fwarthy Complexion, and who, with a referved Silence, was almost infociable to all Perfons in the Court; by which Defcription he did almost point out with the Finger Laurence de Medici, who murdered Prince Alexander in his Bed-chamber, contrary to all the Laws of Confanguinity and Hofpitality, in the Year 1537 5. But the great Misfortune is, that in those Days it was shrewdly fuspected, that these pretended Sages had better, and more certain Methods of penetrating into Confpiracies, than are afforded by Aftrological Means, and I must confess myself inclined to fufpect from the very manner in which this Prediction was delivered, that Bafil was employed to caution Prince Alexander against his Coufin Lawrence, and that for want of Penetration, he fell into that Snare which he might otherwife have avoided.

THE Inftance of La Broffe, is more to the Purpofe, becaufe better fupported; indeed, I think O 2 it

<sup>r</sup> Dinoth. Memorab. lib. vi. p. 390. **P**. 320. Digitized by INTERNET ARCHIVE <sup>s</sup> Jovii. Elog.

## [ 108 ]

that it is the beft attefted Story of its kind. The Baron de Biron, afterwards the famous Marfhal of that Name, being under fome Difficulty about a Duel, went to La Broffe, and carried him a Scheme of his Nativity, but told him it was that of a Friend of his; the Aftrologer having confidered the Scheme, affured him, that the Perfon whofe Nativity it was, would infallibly be a great Man ; nay, that he might even come to be a King, but for the Caput Algol pointing to the Figure of the Dragon's Head in the Scheme. M. de Biron, who did not understand the Term, infisted on a clearer Account; why then, replied La Broffe, through a Defire of being a King, this Man will do fomething that will coft him his Head. Provoked at which Anfwer, the Baron beat him unmercifully; but he lived to fulfill his Prediction, having his Head cut off, as all the World knows, for a Confpiracy against Henry IV. t.

HOWMUCH foever thefe Sort of Notions have been difcountenanced by the prevailing of Experimental Philofophy, and true Science; yet, where a Prince gives Ear to his own Praifes, there will never be wanting fuch as will adopt Aftrological Schemes, as well as other Things to flatter his Vanity. Nothing is eafier than to give fuch a turn to a Piece of this Nature; Men of fprightly Parts know

t Invent. Gen. de France, par M. de Serres. p. 1051.

Digitized by INTERNET ARCHIVE

# [ 109 ]

know how to drefs up the Face of Heaven upon fuch an Occafion, and to difpofe properly of all the Signs and Planets, fo as to raife mighty Expectations in the World, as well as the higheft Pleafure in the Mind of the Prince they flatter.

SUCH were the favourable Influences of the Celeftial Orbs, at the Birth of the late Lewis XIV. King of France. The Genethliac System may be feen in one of the Medals that compose the Hiftory of that Reign. The Gentlemen of the Royal Academy of Infcriptions, have obferved the precife Polition of the Planets, at the Moment of the Birth of that Prince; round about this curious Medal, one fees the twelve Signs of the Zodiac, forming the twelve Houfes, of this Syftem the feven Planets appear in the fame Degrees they occupied at that Time, the Sun which gives Perfection to the other Planets, is in the mid Heaven; Mars, the Lord of the Afcendant, in reception with Fupiter, the Protector of Life, and this is what they call the greater Fortune; Saturn, the Enemy of Nature, is in his Dignities, which makes him lefs malevolent; the Moon is in conjunction with Venus and Mercury, in his little Houfe of Predilection, to ten Degrees of the Sun out of Combustion, and enlightened by his Rays, gives a Superiority of Genius in the most difficult and most important Enterprizes, which his being in Quartile with Mars, is not capable to abate. The Nativity of Lewis XIV.

# [ 110 ]

XIV. was figured in the Middle of the Medal, by a rifing Sun, the King is placed in the Chariot of that glorious Planet of which Ovid has given us the Defcription. This Chariot is drawn by four Horfes, guided by Villory, the Infcription is in thefe Words. Ortus Solis Gallici, The Rifing of the Gallic Sun; and the Exergue contains thefe other Latin Words. Septembris quinto minutis 38 ante Meridiem, 1638. The 5th of September, 38 Minutes before Noon, 1638.

I must confess, that this is a pretty Contrivance, and ingenioufly put together; yet I dare fay, that none of the learned Gentlemen concerned in framing this Medal, ventured to predict any of the Clouds that obscured their Sun. No, they were too great Courtiers for that. But if this famous Medal give any Reputation to Aftrology, I shall venture to lay down a few Observations which will free my Doctrine from all Inconveniencies. I obferve then, that as the happieft Nativities admit of natural Caufes to Co-operate in bringing about what they portend, fo it is not at all improbable, that if by fome happy Accident we could gain a Sight of the Horoscope of Hermippus, it would fhew us, that Mercury well polited at the Time of his Birth, and beheld by Luna with a favourable Afpect, caufed his difcovery of this mighty Secret, and enabled him to make fuch a Ufe. of the Breath of Virgins, that no Man ever thought

Digitized by INTERNET ARCHIVE

thought off before. If the Aftrologers are content to grant me this, I am willing to compromife the Matter, and which, I think is as much as they can expect, to allow this Doctrine to be derived from the Stars. But, if they are fo tenacious of their own Notions, as not to accept of fo fair an Offer, I shall recurr to my first Principles, and deny abfolutely the Certainty of their Art, and demand as good Reafons for the Credit of Aftrology, as I have produced in favour of my own System, before I enter the Lifts with them. Affirmation is nothing in this Age, wherein Men expect Proofs for every Thing. Let them flew us then, that they can predict an Earthquake, Whirlwind, or fo much as an Irruption of Mount Etna; nay, let them but mark the Rainy, and fair Days for a whole Year in any Climate in Europe, and I will be content, that their Affertions weigh down my Evidence, and that the long Life of Hermippus shall be ascribed to a happy Conjunction of humid Stars, in the Sign Virgo, which was the Interpretation once offered me by a learned Aftrologer of this Infcription, and which, together with my own Sentiments, I freely fubmit to the Judgment of the Impartial Reader.

SUCH as feek after Truth, difguife nothing, and are fo far from being afraid of feeing their Opinion canvaffed, and even refuted, that on the contrary, nothing pleafes them better, becaufe they are ftill

gainers

#### [ 112 ]

gainers by the Difpute ; fince, when Truth is once discovered, they have as much right to it, as he who found it. In the prefent Cafe, if this Treatife of mine should ftir up any wifer Man to look for a better Solution of the Problem I have stated, and he should luckily fall on the genuine Method of Hermippus, he could not rejoice at it more than I, nor would he find any one more willing to own, or to applaud his Ingenuity. Let us read, let us meditate, let us difpute, but all for the fake of Truth, which is the great Property of Mankind, conftitutes all our Happiness, and which it is therefore our common Intereft to purfue. The Point I have now in view, is to difcover the means of prolonging Life, without feeling the Infirmities of Age; to the Difcovery of which, if the Publication of this Treatife any way contribute, not my end only, but the end of Mankind is anfwered, and a most noble Point of Science will be illuftrated, from what many might at first efteem an idle Difpute.

I fhall not treat the Hermetic Philofophers altogether fo brifkly as I have done the Aftrologers; becaufe, without doubt, there have been amongft them, many very excellent Perfons. I cannot take upon me to fay, when they began to lay claim to the Univerfal Medicine, by which they pretend to preferve Life for many Centuries, at leaft, of which they fay *Artephius* was an Inftance, who lived by the

Use of it, to the Age of 300, or as some fay, near 1000. This is certain, that the Society of the Roficrucians openly claimed it as one of the Privileges of their illustrious Body. Peter Mormius, who for ought I know, was one of the laft of them that appeared in Public, reduced their high Pretenfions, which at first were very extensive, to the Poffeffion of three Secrets. Of thefe, the first was the Perpetual Motion ; the fecond, the Art of transmuting Metals; and the third, the Universal Medicine. In the Book published by this Mormius, there are abundance of curious Things, though he does not fufficiently explain himfelf, especially upon the last Subject ". It is, however, well enough known, that these Illuminati afferted, that they had a Power of prolonging their Lives for many Ages, nor is it very clear from their Writings, whether, what they are pleafed to call the Philofopher's Stone, be not at once the great Secret of Transmutation, and of the Universal Medicine.

THE clearest Account of this Matter that I have ever met with, is in the Answer of a French P Adept,

<sup>u</sup> This Mormius went into Holland in the Year 1630, were he demanded an Audience of the States-General, in order to tender them certain Propositions from the Fraternity of Roficrufians, which they refused to hear; this did not, however, hinder Mormius from publishing a Treatife under the following Title, which is now become a fearce and valuable Book. Arcana totius naturæ Secretissima, nec hactenus unquam detecta, à Collegio Rofiano in Lucem produntur, Operâ Petri Mormii, in 24 Lugduni Batavorum, 1630.

THE GETTY RESEARCH INSTITUTE

Adept, to Doctor Edmund Dickenson, Physician to King Charles II. and a profeft Admirer of the Hermetic Philosophy. The Doctor's Letter is very plain and clear. He wrote to this Friend of his, in order to be thoroughly informed as to those Contrarieties, which he thought he had difcerned in the Difcourfes of fome of the Hermetic Sages: His Friend gives him a very plaufible Anfwer to all his Objections, and to enforce the Belief of what he lays down, he puts the Doctor in mind of his having made Projection, that is, his having transmuted base Metals into Gold, more than once, before the Doctor in the King's Laboratory in Whitehall; as to the Universal Medicine, and its Capacity of extending the Life of Man for many Ages, he politively afferts, that it is the Hands of the illuminated Bretbren, and gives many Reafons why they fhould be fo extreamly careful in concealing it. He goes fo far as to infinuate, that it was in his own Poffeffion w. I muft own, I am aftonished at such Sort of Affertions, and more fo,

" The Title of Dr. Dickinfon's Book, referr'd to by our Author, is, De quinta effentia Philosophorum. It was printed at Oxford, in 1686, and a fecond Time in 1705. There is a third Edition of it printed in Germany, in 1721. The Author was one of those very great Men, whose Merits are better known abroad than at home; he is mentioned by the learned Olaus Borrichius, and many other foreign Writers, with much Respect, and just Testimonies of Esteem for his extensive Knowlege.

Digitized by INTERNET ARCHIVE

fo, at fome Relations well attefted, that feem to favour the Truth of it.

THERE happened in the Year 1687, an odd Accident at Venice, that made very much ftir then, and which I think deferves to be fecured from Oblivion. The great Freedom and eafe with which all Perfons, who make a good Appearance, live in that City, is known fufficiently to all who are acquainted with it; they will not therefore be furprized, that a Stranger, who went by the Name of Signor Gualdi, and who made a confiderable Figure there, was admitted into the best Company, though no body knew who, or what he was. He remained at Venice fome Months, and three Things were remarked in his Conduct. The first was, that he had a fmall Collection of fine Pictures. which he readily fhewed to any Body that defired it; the next, that he was perfectly verfed in all Arts and Sciences, and fpoke on all Subjects with fuch Readinefs and Sagacity, as aftonished all who heard him; and it was in the third Place obferved, that he never wrote or received any Letters; never defired any Credit, or made use of Bills of Exchange, but paid for every Thing in ready Money, and lived decently, though not in Splendor. This Gentleman met one Day at the Coffee-Houfe with a Venetian Nobleman, who was an extraordinary good judge of Pictures : He had heard of Signor Gualdi's Collection, and in a very polite Manner P 2

Original from

# [ 116 ]

Manner defired to fee them, to which the other very readily confented. After the Venetian had viewed Signor Gualdi's Collection, and expressed his Satisfaction, by telling him, that he had never feen a finer, confidering the Number of Pieces of which it confifted; he caft his Eye by chance over the Chamber Door, where hung a Picture of this Stranger. The Venetian look'd upon it, and then upon him. This Picture was drawn for you, Sir, fays he to Signor Gualdi, to which the other made no Anfwer, but by a low bow. You look, continued the Venetian, like a Man of Fifty, and yet I know this Picture to be of the Hand of Titian, who has been dead one hundred and thirty Years, how is this poffible? It is not eafy, faid Signor Gualdi, gravely, to know all Things that are poffible ; but there is certainly no Crime in my being like a Picture drawn by Titian. The Venetian eafily perceived by his manner of fpeaking, that he had given the Stranger Offence, and therefore took his leave. He could not forbear speaking of this in the Evening to fome of his Friends, who refolved to fatisfy themfelves by looking upon the Picture the next Day. In order to have an Opportunity of doing fo, they went to the Coffee-Houfe about the Time that Signor Gualdi was wont to come thither, and not meeting with him; one of them who had often converfed with him, went to his Lodgings to enquire after him, where he heard,

# F 117 ]

heard, that he fet out an Hour before for Vienna. This Affair made a great Noife, and found a Place in all the News-Papers of that Time x.

THIS Story agrees very well with what is faid by Doctor Dickenson's Correspondent, who observes, that the Adepts are obliged to conceal themfelves for the fake of Safety, and that having a Power not only of prolonging their Lives, but also of renovating themfelves, they take Care to use it with the utmost Discretion, and instead of making a Difplay of this wonderful Prerogative, they manage it with the utmost Secrecy, which he lays down as the true Caufe of the World's being in fo much Doubt about the Matter. Hence it comes to pafs, that though an Adept is poffeffed of greater Wealth than is contained in the Mines of Peru, yet he always lives in fo moderate a Manner, as to avoid all Sufpicion, and fo as never to be difcovered, unlefs by fome unforefeen Accident, like that which happened to a famous English Artift, who difguifed himfelf under the Name of Eugenius Philalethes, and whofe true Name is faid to be Thomas Vaughan, the clearest and most candid Writer of all the Hermetic Philosophers y. He tells

us

\* Memoires Hiftoriques, 1687, Tom i. p. 365. y The most famous of his Pieces is intitled, Introitus Apertus ad Occlufum Regis Palatium. This was written originally in English, has been translated into almost all the European Languages, and is unqueftionably the best and clearest Book upon the Subject that is extant in any Tongue.

us of himfelf, that going to a Goldsmith, in order to fell twelve hundred Marks of fine Silver. the Man told him at first Sight, that it never came out of the Mines, but was the Product of Art, as not being of the Standard of any Nation whatever; which furprized Philalethes fo much, that he withdrew immediately, and left the Goldfmith in Possession of his Treasure. This famous Man, who certainly was an Adept, if ever there was one, led a wandering kind of Life, and fell often into great Dangers, merely from his poffeffing this great Secret. He was born, as we learn from his Writings, about the Year 1612, and what is the strangest part of his History, he is believed by those of his Fraternity, to be yet living, and a Perfon of great Credit at Nurenberg, affirms, that he converfed with him but a few Years ago: Nay, it is further afferted by all the Lovers of Hermetic Philosophy, that this very Philalethes, is the Prefident of the Illuminated in Europe, and that he conftantly fits as fuch in all their Annual Meetings. It is on the one hand true, that there is fomething wild and incredible in these Relations, and yet it is as certain on the other, that feveral who atteft them, are Perfons of irreproachable Character, and even with Refpect to this Philalethes, he was, according to the Report of the great Boyle, and others who knew him, a Man of remarkable Piety. and of unstained Morals. In the English Plantations,

Digitized by INTERNET ARCHIVE

tions, he became acquainted with one Starkey, a Chymift, before whom he made Projection, but finding that Starkey was a vicious and extravagant Man, he broke off his Acquaintance with him, without communicating any part of his Secrets z.

BUT it may be faid by fuch as look upon this whole Affair, as an idle and rediculous Thing, and who confider all these Relations, however attested, or supported, as mere Dreams, or Visions. I fay it may be alleged by thefe angry Critics, that it is a direct Proof of the Falshood of their Pretentions to long Life; that we have diffinct Accounts of the Time when their most celebrated Patriarchs, fuch as Roger Bacon, Raymond Lully, and Bafil Valentine died, and were buried. If therefore, thefe Men could not preferve their own Lives, or even protract them beyond the ordinary Extent, what probability is there, will thefe People fay, that any of the Fraternity fhould prolong their Lives in the Manner they relate? In Anfwer to this, the Adepts always infinuate, that if thefe great Men died, it was by their own Choice, and that many of their Fraternity still decline that length

<sup>2</sup> This George Starkey, was originally an Apothecary, had a Head turned to Chemistry, but managed his Affairs fo ill, that he was obliged to Transport himself to the Plantations, where he became acquainted with Philalethes, of which Acquaintance he boasts much in his Writings. In 1658 he published a Book of Chemistry at London, which was translated into French in 1706, and into High Dutch in 1712.

Digitized by INTERNET ARCHIVE

length of Life their Art would enable them to Enjoy. This I must confess, is an unfatisfactory Anfwer, efpecially to fuch as make the Objection, but then, fay the Adepts, it is the only Anfwer that becomes us to give; we do not aim at the Conviction of these Sort of People, we are not defirous of making a Noife in the World, we do not even regard the poffeffion of Riches, and long Life as bleffings in themfelves; further than that, they enable us to do good, and the fole Reafon of our ever mentioning fuch Secrets, being in our poffeffion, is in Order to lead to our Society fuch worthy Perfons as deferve to be affociated. Now, however Weak, however Sophiftical, this Reafoning may appear to the generality of Mankind, yet upon the Principles of the Hermetic Philofophy, it must be allowed to be extreamly Plausible, and in all fuch Cafes, we must admit Men to argue from their own Principles, and not from those we lay down.

As I do not profess myself either an Adept, or fo much as a student in this Sort of Philosophy, I shall take the Liberty, as the matter of Fact nearly concerns the Subject of which I am treating, to shape out another Answer to this Objection, and it is this, that perhaps we are not always so fecure as to the Deaths of these Virtuosi, as we imagine. The continuance of their Lives is a Thing, that though they boast of in one Sense,

Digitized by INTERNET ARCHIVE yet

yet in another they fludioufly affect to conceal. Of this, I shall give an extraordinary Instance, which will be fo much the more entertaining to the Reader, as for any thing I know; it has not yet been taken Notice of by any Writer upon this Subject, not even by the professed Historian of this Fraternity, notwithstanding he has made larger Collections concerning them, and their Philofophy, than any Man that ever fet Pen to Paper. This Inftance will be also found the more extraordinary, fince I take it from one who never pretended to be an Adept, and who, therefore, ought to be confidered as an unprejudiced Witnefs. But before I enter upon this Story, I must defire my Readers to obferve, that I lay down barely Facts as I find them, and do not pretend to intereft myfelf in the leaft, as to the credit they may meet with.

A MONGST the Hermetic Philosophers, who are allowed to have attained the higheft Secrets of Science, Nicholas Flamel of Paris, has been always reckoned one of the most confiderable, and his right to this Reputation, the least to be contested. The History of this Flamel, who flourished in the XIV. Century is very curious: He was a Person of a good Family, though much reduced in point of Fortune; had quick Parts; a lively Wit, and with the advantage of no more than an ordinary Education; was fent to Paris to get a jiving

as

as he could. Flamel wrote an extraordinary good Hand, had fome notion of Poetry, and Painted very prettily; yet all thefe Accomplishments raifed him no higher than a hackney Clerk, in which Condition he work'd very hard, and had much ado to pick up a Subfiftance. In 1357, chance threw in his way a Book of Hermetic Philosophy, written by one Abraham a Jew, or rather Engraven on Leaves made of the Bark of Trees, and illustrated with very curious Pictures, in which the whole Secret was laid down in the clearest Manner poffible, to fuch as were acquainted with Hermetic Philosophy. This Treasure cost Flamel no more than two Florins, for the Perfon who fold him the Book, knew nothing of what it contained, and Flamel himfelf though he made it his whole Study for twenty Years, and though he took the precaution of Copying the Pictures, and hanging them up in his Houfe, and asking the Learned their Opinion about them, was able to make very little of them<sup>a</sup>.

TIRED at length with fo vain, and fo laborious a Study, he in 1378, took a Refolution

to

<sup>a</sup> The best Part of this Account of Nicholas Flamel, is taken from his Article in a very curious Book, which, as it deferves to be more known than it is, encourages me to set down the Title thereof at large, which runs thus. Tréfor des Recherches & Antiquitez, Gauloises réduites en ordre alphabetique & enriches de beaucoup d'origines épitaphes & autres choses rares & curieus, comme aussi de beaucoup de mots de la langue Thyoise, ou Theuthfranque. Paris. 1655. in 4to.

Digitized by INTERNET ARCHIVE

to Travel into Spain, in hopes of meeting there with fome learned Jew, who might give him the Key to the Grand Secret; that this Journey might not appear to be undertaken on quite fo Chimerical a Motive, he made a Vow to go in Pilgrimage to St. James of Campostella, a Practice frequent in those Times. After much Search to little purpofe, he met at last with a Few Physician at Leon, who had been lately converted to the Criftian Religion, and who was well verfed in this kind of Science; this Man, at the Perfualion of Flamel, confented to go with him to Paris; but when they were got as far as Orleans, the Phyfician who was far in Years, and little accustomed to the fatigue of Travel, fell fick of a Fever, which carried him off in a few Days<sup>b</sup>. Flamel having rendered the laft kind Offices to his dying Friend, returned very difconfolate to Paris, where he studied three Years more, according to the Inftructions he had received from the Phyfician, with fuch Success, that on the 17th of January, 1382, he made Projection on a large Quan-

tity

<sup>b</sup> As the Hiftory of Flamel was collected long after his Death, it is very poffible that there might be fome Miftakes committed in Relation to the Circumftances attending his Adventures ; but there is one Thing which I think proves the Reality of the Story beyond Difpute, which is, that this very Book of Abraham the Jew, with the Annotations of Flamel, who wrote from the Inftructions he received from this Phyfician, was actually in the Hands of Cardinal Richlieu, as Borel was told by the Count de Cabrines, who faw and examined it.

INTERNET ARCHIVE

# [ 124 ]

tity of Mercury, which he changed into fine Silver, and on the 25th of April following, he tranfmuted a vaft Quantity of Mercury into Gold. He afterwards repeated frequently the Experiment, - and acquired thereby immenfe Wealth. He and his Wife Perrenella, in the midft of all these Riches, lived still in their old fober way, and eat and drank as ufual, out of Earthen Veffels. They maintained however a vaft Number of Poor, founded fourteen Hofpitals, built three Chapels, and repaired and endowed feven Churches. In fhort, the Acts of Charity they did, were fo aftonishing, that Charles the VI. who was then upon the Throne, refolved to enquire how they came by their Wealth, and fent for that purpose M. de Cramois, Master of Requests, and a Magistrate of the highest Reputation for Probity, and Honour, to examine into their Circumstances; to whom Flamel gave fo fatisfactory an Anfwer, that no further Enquiry was made about them; but the honeft old People were left in Poffeffion of the only Privilege they defired, which was no greater, than that of doing all the good that lay in their Power c.

THE

<sup>c</sup> This too, is a Fact out of Difpute, and as a Proof that Flamel drew his Riches from his Acquaintance with the Hermetic Philofophy, the Hierogliphic Pictures upon his Tomb, are ufually, and I think very juftly cited, as well as the Treatifes he wrote upon this Subject, particularly the following Work of his, La grand Ecclairciffment de la Pierre Philofophale, pour la tranfmutation de tous Métaux, par Nicholas Flamel, in Svo. Paris, 1628.

Digitized by INTERNET ARCHIVE

THE Circumstances of this Story, the immense Wealth of Flamel, and his Wife, their many Foundations, their vaft Endowments, and the prodigious Eftate they left behind them, are all Facts, fo well attefted, that no Difpute can be raifed about them; or if there were, the last Will of Nicholas Flamel, which, with forty Authentic Acts, of as many charitable Foundations, that are laid up in the Archives of the Parish Church of St. James, in the Butchery at Paris, are Proofs capable of convincing the greateft Infidel. This Flamel, wrote feveral Treatifes on the Art of Chymiftry; but they are extreamly Obscure, because they are all delivered in an Allegorical Way, and confequently one may hit upon various Interpretations, without coming at the true one; which it is faid, he gave to a Nephew of his, and that the Secret remained long in the Family, nay it is owing to Indifcretion, if it does not fo ftill<sup>d</sup>. I muft not however, conceal an Attempt that has been made to overturn the whole of this Hiftory, not by denying the Facts, for that would have been rediculous, fince there are hundreds of Poor that

yet

<sup>d</sup> Flamel left his Secret to the Family of Du Perrier, the laft of which was a Phyfician of that Name, amongfl whofe Papers it was found; I mean only part of the Powder, by one Du Bois; who having acted very imprudently in making Pro jection before feveral Perfons, and pretending to much greater Knowlege than he really had, brought upon himfelf an unfortunate End, being hang'd by order of Cardinal Richelieu.

INTERNET ARCHIVE

# [ 126 ]

yet fubfift on *Flamel's*, and his Wives Foundations, and are confequently fo many living Witneffes of the Veracity of that Part of the Relation.

BUT the Thing attempted is, to give another Account of Flamel's acquiring his Wealth, and in order to this, they tell you, that he was a Notary Public, at the Time the Jews were expelled France, that they deposited with him in Trust, a great Part of their Wealth, and that he kept it for his own Ufe e. Such as treat all that is faid of the Philo. fophers Stone, and of Hermetic Philosophy, as a Fable, have run away with this Explication, as if it had been a clear and fatisfactory Account of the Matter, without confidering that it is in Truth attended with greater Difficulties, than the Tale of the Transmutation. For what probability is there, that Perfons of fo much Worth and Piety as Flamel and his Wife are allowed to have been, fhould be guilty of fuch a flagrant Act of Injuffice, as to betray the Truft repofed in them, and this purely to do Acts of Charity? If, indeed, they had lived in luxurious Plenty, and had rioted in all the Pleafures which their immenfe Wealth might

<sup>e</sup> This Story, as far as I am able to learn, was first ushered into the World by Gabriel Naudé, a warm and angry Writer, and one far from being exact; from him it is copied by George Hornius, in his Preface to the Works of Geber, and by many other Writers. But as to the Notoriety of the Fact, with refpect to the Banishment of the Jews, as all the French Historians agree in it, and in the Dates relating to it, one may fafely conclude, that it is fully answered.

Digitized by INTERNET ARCHIVE

might have enabled them to have indulged, the Story might have deferved fome Credit; but to imagine that two fober People, leading a Life of the utmost frugality, and expending all their Revenues for Pious and Charitable Purpofes, fhould contrive to get the Money fo fpent, by bafe and fraudulent Means, is utterly incredible. Befides, if this had been the Cafe, it is impoffible to account for two Circumstances; the first is, that the King of France should be fatisfied with the Account that Flamel thought fit to give to Cramoifi; the other, that this Story fhould never break out during the Life of Flamel, nor within an Age after his Death: But as I know there are People, who, to avoid being fufpected of Credulity, will fwallow any Thing opposite to what they think, it would be a fhame to believe; I fhall deftroy this Critical Hiftory of Flamel's Riches, by an Argument, even that these People dare not difcredit. In fhort, the Jews have been twice expelled France, first in 1180, long before Flamel was born, and again in 1406, feveral Years after all his Endowments were made, and but feven Years before the Death of him and his Wife Perrenella f.

BUT

<sup>f</sup> If the Reader has a Mind to be better acquainted with the Adventures of this Adept, he may confult the Hiftory of Hermetic Philosophy, published lately by the Abbé Lenglet du Frefnoy.

Digitized by INTERNET ARCHIVE

THE GETTY RESEARCH INSTITUTE

BUT methinks I hear fome Captious Reader cry out, what did Flamel and Perrenella die? to what end then all this tedious Story? what is there in Flamel's Life, that Corresponds with that of Hermippus? or what has Alchymy to do with the Breath of Virgins, or the Prolongation of human Life? Peace a little; I promifed you fome Account of Flamel, that has not been hitherto regarded, that has efcaped the Notice of all who have written the Hiftory of Hermetic Philofophers, from the noble Olaus Borrichius, down to Abbè du Frensoy, and this I am going to give you. But, permit me, to observe, first, that my Account is taken from the Travels of the Sieur Paul Lucas, who by order of Lewis XIV. paffed through Greece, Afia Minor, Macedonia, and Africa, in fearch of Antiquities, who dedicated this Book of his, to that Prince, and who must be therefore prefumed to relate what was true, or what he took to be true; for no body, who knew the Character of Lewis XIV. can imagine, that he would fuffer a Fellow to Usher his Falshoods into the World, under the Sanction of his Name ; much lefs, that after being guilty of fuch a Piece of Infolence, he fhould encourage, protect, and employ fuch a Man, as in fact he did, to the very end of his Reign; and this, in confequence of the Reputation he acquired from the Publication of the

Digitized by INTERNET ARCHIVE

#### [ 129 ]

the Voyages, the Authority of which I am going to use 3.

IT may not be amifs, to put my Reader in mind, that I have ftrictly kept my Word. The Sieur Lucas was no Hermetic Philosopher, no Chymift, no deep Student in the Sciences; and if we guess from his Writings, no Man of Art, or Addrefs; but a bold, rough, free-fpoken Traveller, who had feen much, and was willing to tell the World all he had feen. If from hence, any fhould be led into an Opinion that he was a Credulous Man, and might be eafily imposed on, I have nothing to fay to that; I do not intend to turn Advocate for the Solidity of a Traveller's Understanding, any more than for the Truth of Hermetic Philosophy. I only lay down Things as they are, or at leaft as they appear to be, and leave all the reft to the Readers Decifion. All I infift upon, as to the Sieur Lucas's Relation, is this, that he could not be deceived as to the Matter of Fact; he could not dream the Story he has told us; he could not fee it in a Vision, and as to the reft, I do not concern myfelf about it; he might poffibly be cheated by the Mohammedan Monks, for I can readily conceive, that Monks of R

<sup>g</sup> See the Preface to the Book from which this Story is taken, which is entitled Voyage de Sieur Paul Lucas fait par Ordre Du Roi dans La Grece, &c. Amsterdam, 1714. in 12mo. two Volumes.

Digitized by INTERNET ARCHIVE

of all Religions, are the fame; and yet, if as great Abfurdities, and much greater Difficulties attend the Story in this Light, than in any other; I prefume it may juftify a Hint, that it is not impoffible it might be, otherwife than fuch fevere Critics may incline to believe. But it is now time to come to the Story, and therefore I fhall put an end to my Reflections.

HE informs us, that being at Brouffa, in Natolia, and going to take the Air towards a little Village called Bournous Bacby, at a fmall Diftance from thence, in Company with a Perfon of Diftinction; he met with the following Adventure, which I shall relate to you exactly in his own Words. We went together to a little Mofque, fays he, where, one of their most eminent Dervises was interred. It is always a Dervife that has the Cuftody of fuch Places, which are, generally fpeaking, pleafantly fituated, adorned with Gardens and Fountains, and on that Account, fet a-part for public Walks, and Places for Recreation. We were quickly introduced into a little Cloifter, where we found four Dervifes, who received us with all imaginable Civility, and defired us to partake of what they were eating; we were told, what we foon found to be very true, that they were all Perfons of the greateft Worth and Learning. One of them, who faid he was of the Country of the Usbecks, (a Tribe of Tartars) appeared to me more learned than

Digitized by INTERNET ARCHIVE

than the reft, and I believe verily he fpoke all the Languages in the World. As he did not know me to be a Frenchman, after we had conversed fometime in the Turkish Languages, he asked me, if I could speak Latin, Spanish, or Italian. I told him, that if he pleafed, he might talk to me in Italian ; but as he foon difcovered by my Accent, that it was not my Mother Tongue, he afked me frankly, what Country I came from. As foon as he knew that I was a Native of France, he fpoke to me in as good French as if he had been brought up at Paris. How long Sir, faid I, did you ftay in France? He answered me, that he had never been there, but that he had a great Inclination to undertake the Journey.

I did all that lay in my Power to ftrengthen that Refolution, and perfuade him to it, in order to which, I told him, that there was no Kingdom in the World more polifhed; that Strangers efpecially were extreamly well received there, and that without Queftion, he would receive the greateft Satisfaction from this Journey. No, no, returned he, I am not in fuch a hurry to make it, I fhould be a Fool to flatter myfelf with any fuch Hopes; I am one of the Sages, and I know that it is enough to hinder me from enjoying Quiet there, fo that I am not like to think any more of the Matter. I took a great deal of Pains to convince him, that he was deceived, that fome bad People

INTERNET ARCHIVE

# [132]

People had given him ill Impreffions of my Country; that France on the contrary, was the very Nurfery of the Learned, and that the King, whole Subject I had the Honour to be, was the greatest Patron of the Sciences. I went further still, I told him, that though I had not the Honour to be of any learned Profession myself, yet his Majesty was pleafed to defray the Expences of the Travels in which he faw me engaged, and this with no other View than to procure Notices of those Things, the Knowlege of which, remained yet neceffary for perfecting the Sciences; fuch as of Herbs that might be useful in Physic, antient Monuments, that might contribute to the Illustration of remarkable Events, and confequently ferve to render Hiftory more compleat; the View of the Countries themfelves, in order to the rectifying Geographical Charts; in fine, I run through all the Proofs I could think of, in order to convince him of the Inclination that prevailed in France, in Favour of the Sciences, and of Learning, all which he attributed to the Climate, and feemed to approve what I faid, out of pure Civility. At last, however, he feemed to be ravished with the fine Things I told him, and went fo far as to affure me, that fome Time or other he would certainly go thither. Our Conversation being ended, the Dervifes carried us to their Houfe, which was at the Bottom of the Mountain, very near Bournous

THE GETTY RESEARCH INST

Bachy,

TE

Bacby, where having drank Coffee, I took my leave of them, but with a Promife, however, that I would come and fee them again.

[ = 2 2 ]

On the 10th, the Dervife whom I took for an Ufbeck, came to pay me a Vifit. I received him in the beft Manner poffible, and as he appeared to me a very Learned, as well as curious Man, I fhewed him all the Manufcripts I had bought, and he affured me, they were very valuable, and written by great Authors: I must fay, in Favour of this Dervife, that he was a Perfon every way extraordinary, even to his outward Appearance. He shewed me abundance of curious Things in Phyfic, and promifed me more; but at the fame Time he could not help faying, that it was neceffary, that I should make fome extraordinary Preparations on my Side, in order to put myfelf into a Condition of profiting by the Lights he was able to give me. To judge according to his Appearance, he should have been a Man about thirty, but by his Difcourfe, he feemed to have lived at leaft a Century, and of this, I was the more perfuaded from the Accounts he gave me of fome long Voyages he had made.

HE told me, that he was one of feven Friends, who all wander'd up and down the World, with the fame View of perfecting themfelves in their Studies, and that at parting, they always appointed another Meeting at the End of twenty Years,

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

in

in a certain City which was mentioned, and that the first who came, waited for the reft. I perceived, without his telling me, that Brouffa was the City appointed for their prefent Meeting. There were four of them there already, and they appeared to converfe with each other, with a Freedom that fpoke rather an old Acquaintance, than an accidental Meeting. In a long Conversation, with a Man of great Parts, it is natural to run . over abundance of curious Topics. Religion and natural Philosophy took up our Thoughts by Turns, and at laft, we fell upon Chemiftry, Alchymy, and the Cabala; I told him, that all thefe, and efpecially the Notion of the Philosophers Stone, were now regarded by moft Men of Senfe, as mere Fictions and Chimeras. That, returned he, ought not to furprize you, for in the first Place we ought to fuffer nothing to aftonish us in this Life; the true Sage hears all Things without being fcandalized at them; but though he may have fo much Complaifance, as not to fhock an ignorant Perfon when he talks of thefe Things, yet is he obliged, do you think, to fink his Understanding to a Level with vulgar Minds, becaufe they are not able to raife their Thoughts to an Equality with his? When I fpeak of a Sage, faid he, I mean that kind of Man to whom alone the Title of Philosopher properly belongs. He has no fort of tie to the World, he fees all Things die and revive

Digitized by INTERNET ARCHIVE

# [ 135 ]

revive without Concern; he has more Riches in his Power, than the greateft of Kings, but he tramples them under his Feet, and this generous Contempt, fets him even in the midft of Indigence, above the Power of Events.

HERE I stop'd him. With all these fine Maxims faid I, the Sage dies, as well as other People. What imports it therefore to me, to have been either a Fool, or a Philosopher, if Wifdom hath no prerogative over Folly, and one is no more a Shield against Death than the other? Alas! faid he, I perceive you are abfolutely unacquainted with fublime Science, and have never known true Philosophy. Learn from me my Friend, fuch a one as I have defcribed dies indeed, for Death is a Debt which Nature exacts, and from which therefore no Man can be exempt; but then he dies not before the Time fix'd by his great Creator. But then you must observe, that this Period approaches near a thousand Years, and to the Extent of that Time a Sage may live. He arrives at this, through the knowlege he has of the true Medicine. By this means, he is able to ward off whatever may impeach, or hinder the Animal Functions, or deftroy the Temperature of his Nature. By that, he is enabled to acquire the Knowlege of whatever God has left within the Cognizance of Man. The first Man knew them by his Reafon; but it was this fame Reafon that blotted

Digitized by INTERNET ARCHIVE

blotted them again from his Mind; for having attained to this kind of natural Knowlege, he began to mingle therewith his own Notions and Ideas. By this Confusion, which was the Effects of a foolifh Curiofity, he rendered imperfect even the Work of his Creator, and this Error it is, that the Sage labours to redrefs. The reft of Animals act only by their Inftinct, by which they preferve themfelves, as at their first Institution, and live as long now, as when the World first began. Man is yet a great deal more perfect; but, has he ftill preferved that Prerogative we mentioned, or has he not loft long ago the glorious Privilege of. living a thoufand Years, which with fo much Care he fhould have fludied to preferve? This then it is, that the true Sages have retrieved, and that you may no more be led into miftakes; let me affure you, that this is what they call the Philofophers Stone, which is not a Chimerical Science, as fome half read People fancy, but a thing Solid and Sound. On the other Hand, it is certainly known, but to a few, and indeed it is impossible it should be made known to most part of Mankind, whom Avarice or Debauch deftroy, or whom an impetuous defire of Life kills.

SURPRIZED at all I heard, and would you then perfuade me, faid I, that all who have poffeffed the Philosophers Stone, have likewise lived a thousand Years? Without doubt, returned he

gravely,

TE

Digitized by INTERNET ARCHIVE

gravely, for whenever God has been pleafed to favour any Mortal with that Bleffing, it depends entirely on himfelf to reach the Age of a thoufand Years, as in his State of Innocence the first Man might have done. I told him, that there had been in our Country, fome of those happy Mortals that were faid to have poffeffed this Life-giving Stone, and yet had never extended their Days to fuch a Length as to go with a decripidness, that must attend such an exceffive an Age, into another State. But, continued he, don't you know that the Appellation of a Philosopher, is much prostituted; let me tell you once again, there is none properly fuch, but those who live to the Age I have mentioned. At laft, I took the Liberty to mention the illustrious Flamel, who, I faid, had poffeffed the Philosopher's Stone, but was dead to all Intents and Purpofes for all that. At the mention of his Name, he fmiled at my Simplicity. As I had by this Time begun to yeild fome degree of Credit to his Difcourfe, I was furprized he fhould make a Doubt of what I advanced, upon this Head; the Dervife observed this, and could not help faying with an Air of Mirth, and do you really think the Thing fo? do you actually believe Flamel is dead? No, no, my Friend, continued he, don't deceive yourfelf, Flamel is living ftill, neither he nor his Wife are yet at all acquainted with the dead. It is not above three Years ago fince I left both the one and

the

the other in the *Indies*, and he is, faid he, one of my beft Friends; upon which, he was going to tell me, how their Acquaintance grew, but ftopping himfelf fhort of a fudden, that, faid he, is little to the purpofe, I will rather give you his true Hiftory, with refpect to which, in your Country, I dare fay, you are not very well acquainted.

W E Sages, continued he, though rare in the World, yet are we equally of all Sects and Profeffions, neither is there any great inequality amongft us on that Account. A little before the Time of Flamel, there was a Jew of our Fraternity; but as through his whole Life he had a most ardent Affection for his Family, he could not help defiring to fee them after he once came to the Knowlege of their being fettled in France. We forefaw the Danger of the Thing, and did all that in us lay, to divert him from this Journey, in which we often fucceeded. At laft, however, the Paffion of feeing his Family grew fo ftrong upon him, that go he would; but at the Time of his Departure, he made us a folemn Promife to return to us as foon as it was poffible. In a Word, he arrived at Paris, which was, as it is now, the Capital of the Kingdom, and found there, his Father's Defcendants were in the higheft Efteem among the Jews. Amongst others, there was a Rabbi, who had a Genius for the true Philofophy, and

Digitized by INTERNET ARCHIVE

and who had been long in Search of the great Secret. Our Friend did not hefitate at making himfelf known to his Relation, on the contrary, he entered into a ftrict Friendship with him, and gave him abundance of Lights. But as the first Matter is a long Time preparing, he contented himfelf with putting into Writing, the whole Series of the Process, and to convince his Nephew that he had not amufed him with Falfhoods, he made Projection in his Prefence on thirty Ocques (an Ocque is three Pounds) of bafe Metal, and turned it into pure Gold. The Rabbi full of Admiration, did all he could to perfuade our Brother to remain with him, but in vain ; becaufe he, on the other Hand, was refolved not to break his Word with us. The Jew when he found this, changed his Affection into mortal Hatred, and his Avarice ftifling all Principles of Nature and Religion, he refolved to extinguish one of the Lights of the Universe. Diffembling, however, his black Defigns, he befought the Sage in the tendereft Manner, to remain with him only for a few Days. During this Space, he plotted and executed his execrable Purpofe, murthered our Brother, and made himfelf Mafter of his Medicine. Such horrible Actions never remain long unpunished. Some other black Things he had done, came to light, for which the Jew was thrown into Prifon, convicted, and burnt alive.

# [ 140 ]

THE Fews fell soon after under a Persecution at Paris, as without Doubt you have heard. Flamel, more reafonable than the reft of his Countrymen, entered into a strict Friendship with some of them; and as his great Honefty, and unblemished Probity were well known, a Few Merchant entrusted him with all his Books and Papers, among which were those of the Jew which had been burnt, and the Book that our Brother had left with him. The Merchant taken up no doubt with his own Affairs, and with the Care of his Trade. had never confidered this valuable Piece with any Attention; but Flamel, whole Curiofity led him to examine it more closely, perceiving feveral Pictures of Furnaces and Alembicks, and other Veffels, he began immediately to apprehend, that in this Book was contained the grand Secret. He got the first Leaf of the Book, which was in Hebrew, translated, and with the little he met with therein, was confirmed in his Opinion ; but knowing that the Affair required Prudence and Circumfpection, he took, in order to avoid all Difcovery, the following Steps. He went into Spain, and as Jews were every where fettled throughout that Country, in every Place that he came to, he applied himfelf to the most learned, engaging each of them to translate a Page of his Book ; having thus obtained an entire Version, he set out again for Paris. He brought back with him a faithful Friend

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

of

of his, to labour with him in the Work, and with whom he intended to three the Secret; but a raging Fever carried him off, and deprived Flomel of his Affociate<sup>h</sup>. When therefore he came Home, he and his Wife entered together upon the Work, and arriving in process of Time at the Secret, acquired immense Riches, which they employed in building public Edifices, and doing good to a Multitude of People.

FAME is frequently a very dangerous Evil; but a true Sage knows how to extricate himfelf from all kinds of Peril. *Flamel* faw plainly, that the prevailing Notion of his having the Philofophers Stone might be fatal, both to his Liberty and Life; he therefore bent all his Thoughts to the contriving fome Method for extricating himfelf out of this Danger, and having at laft ftruck out one, he took Care to execute it immediately, and found means to fecure their Flight, by fpreading

<sup>h</sup> The Reader will eafily perceive, that there are fome Variations in this Hiftory from that which we have before given of Flamel; but this only fhews, that we have not done any Thing to countenance this Tale, or to give it that Air of Probability, which in Truth it wants, and after all the Difference between thefe Accounts, is very far from being fo great, as to deftroy the Credit of either of them. For it is very probable, that Lucas's Memory might betray him, and that he might refresh it on his return into France, from the common Story of Flamel, with which his agrees. The principal Reafon of my citing it, was, his Conclusion, which I particularly recommend to the Reader's Confideration; fince, if Flamel's Story be known in those Parts of the World, with fuch a Degree of exactness, it is little less wonderful than the reft of the Story in all its Circumftances.

а

a Report of his Wives Death, and his own. By his Advice, fhe fained herfelf fick of a Diftemper, which had its ufual Courfe, fo that by the Time fhe was faid to Die, fhe had reached the Frontiers of Swifferland, where he had directed her to wait for him. They buried in her ftead a Wooden Image, drefs'd up, and that nothing might be wanting to the Ceremonial, it was interred in one of the Churches that they had founded. Some time after, he had recourfe to the like Stratagem for his own Security, and having buried another Wooden Statue, he by that time the Funeral was over, joined his Wife. You will eafily perceive, that there was no great Difficulty in all this, fince in every Country if a Man has Money, Phylicians and Priefts are always at his Service, ready to fay, or do whatever he directs them. To give the Thing still the better Grace, and to prevent the least Suspicion of the Cheat, Flamel made his last Will and Teftament in Form, wherein he particularly defired that his Corps might be interr'd near that of his dear Wife, and that a Pyramid fhould be erected to their Memories. Since that Time, both of them have led a Philosophic Life, fometimes in one Country, fometimes in another. This, depend upon it, is the true Hiftory of Flamel and his Wife, and not that which you have heard at Paris, where there are very few who have ever had the leaft Glympfe of true Wifdom.

THIS

THIS Story appeared to me what I think it must appear to every one, equally fingular and ftrange, and the more fo, as it was told me by a *Mohammedan*, who I have all the reafon in the World to believe never fat one Foot in *France*. As to the reft, I report this Matter purely as an Hiftorian, and I have even paffed by abundance of Circumstances more remarkable than any I have related; the Truth of which however, he affirmed. I shall content myself therefore, with faying, that we are apt to entertain too mean Notions of the Learning of the *Mohammedans*, for certainly this Man was a Perfon in all respects of extensive Knowlege, and a superior Genius<sup>1</sup>.

WE have now done with the Hiftory of Flamel, and if the Reader has a mind to know how I bring it to have any Connection with my Subject, I fhall inform him, in very few Words. According to my Sentiments, which are in part founded upon the Writings of Flamel himfelf, the firft Matter of the Univerfal Medicine, the Philofophers Stone, or the grand Secret of the Hermetic Philofophers, is taken from the Air; and from fome of their Writings I have gathered, that they were not altogether unacquainted with the Secret of Hermippus; fo that if this Infeription had falled into their Hands, I make no queftion but they would have pronounced

<sup>1</sup> Voyage du Lucas, Tom. i. p. 79 – 90. Digitized by INTERNET ARCHIVE

# [ 144 ]

pronounced him an Adept, and have fupported this Decifion of their's, by giving us an Account in their Manner, of his Method of performing it<sup>k</sup>. This Account fo far as I have been able to Collect it, the Reader shall receive in the clearest Terms, for I pretend not to adopt their Manner of Writing, or to hide in ambiguous Allegories, fo ufeful a Truth.

IN fome Books, written by thefe Sort of Philofophers, I have met with various Experiments for applying the Salubrious Particles of the human Breath to Medicinal Purpofes; and amongft thefe, the following feems to be that which best deferves Notice, as it fhews a wonderful Ingenuity, and is I believe, the fingle Attempt that was ever made to extract the Tinctures of living Animals, in order to make them enter like other Tinctures, into all the Ufes of Phyfic. " Let there be, fays " my Author, a fmall clofe Room prepared, and " let there be fet up in it, five little Beds, each " for a fingle Perfon. In thefe Beds, let there " lie five Virgins under the Age of thirteen, and " of wholesome Constitutions. Then in the Spring

<sup>k</sup> This Difcovery will be pretty evident to any Reader who confults the fourth, ninth, and twelfth Pages of a Treatife at the End of Mangetus's Bibliotheca Chemica, which Piece is entitled, Mutus Liber, in quo Tamen tota Philofophia Hermetica, figuris hieroglyphicis depingitur ter optimo maximo, Deo mifericordi confectatus, folifque filiis artis dedicatus, Authore cuius nomen eft Altus.

was

was by a Contrivance of this Kind, that the famous Cornelius Drebell made that Liquor, which fupplied the Place of Air in the Machine he contrived for carrying on a Kind of fubmarine Navigation. This Medicine, which is, as I have faid, extracted from the Air, is whiter than Snow, colder than Ice, and fo volatile, that if the Quantity of a Nutmeg be exposed to the Air, it is afcrib'd thereby in the Space of a few Seconds. This Secret, which is used for the fame Purposes as the former, is filed Aura Puellarum<sup>m</sup>. We may gather from all this, that if the Hermetic Philosophers have in reality any fuch Secret as they boaft off, for the prefervation of human Life, it is built upon the fame Principles with those which I have already laid down, and confequently no true Adept can confiftently with his own Notion of Things, oppofe my Doctrine, efpecially when he confiders, with what Reftrictions it is offered, fince I do not propofe, as the Sages do, the prolonging Man's Life to the Term of a thousand Years, neither do I promife the Renovation of Life, as fome meaner

<sup>m</sup> Whoever confults the Liber Mutus, will plainly perceive, that the firft Matter is taken from the Air; but by a Method very different from that which I here fuggeft, though poffibly they may both contribute to the fame End, fince it is eafy to conceive, that the firft Matter of the Philosophers may refide in feveral Places; nay, fome of them have affirmed, that it is to be found every where; the famous Jacob Boehmen affertad, that it was to be met with in the Dirt of the Streets.

Digitized by INTERNET ARCHIVE

meaner Artifts have done; all I contend for is, the poffibility of making fuch Ufe of youthful Spirits, as for a Time to keep of the Inconveniencies of Age, which though far inferior to what others affert they are able to perform, would ftill be of the utmost Benefit to Mankind, if with Facility it could be carried into Practice.

I know very well it may, and I doubt not but it will be objected, if Hermippus was fo wife a Man, why inftead of drawing old Age to fuch a Length, did he not preferve the Vigour of his Youth? this furely would have been by far a nobler Difcovery, and to which the young Ladies would with the greateft Readinefs have contributed. But I must put fuch People as these in mind, that as in this Treatife I have inferted nothing which may not be fome way or other ferviceable, either to the Instruction or Entertainment of Mankind, fo I shall not think myfelf at all obliged to take Notice of any ludicrous Reflections. The Prefervation of Life, the defending the human Body from decay, and of rendering it a fit Tenement for the Soul to inhabit, in that Seafon in which fhe is most capable of exerting her nobleft Faculties, are grave and ferious Subjects ; with which no trivial Matters ought to mingle. Befides, to fpeak my Opinion freely, though I think the Method of Hermippus extreamly proper for repairing the Waftes of Nature, and preventing the Incom-

modities

modities which ufually attend on Years; yet I am far from believing, that this Method would contribute at all to the Extention of Youth, but rather the contrary; and for this I think, I am able to offer fome very probable Reafons.

IN the first Place, it will be necessary to obferve, that I do not here mean by Youth, a ftate of Infancy or Childhood, but rather that robuft State between twenty-five and forty; for the Converfation of very young People with each other, I conceive to be as wholefome for their Bodies, as it is pleafant and agreeable to their Minds. But when the human Body is arrived at its full Strength, and is in that State of Health in which Temperance and Equanimity will maintain it, a Surcharge of animal Spirits may not only prove useless, but dangerous. It is an old, and a very true Observation, that the most florid State of Health, is that, in which a Man is in the greateft Peril, in cafe he receives any Infection, and the Reafon is obvious, viz. becaufe the animal Spirits act then with the utmost Vigour, and confequently must do the more Mischief, if by any means they are tainted. From the fame Method of Reafoning, we may conclude, that fuch a Manner of Living as that which we have fuppofed Hermippus led, might be attended with inconveniencies to a Man of a robuft Conftitution, and perhaps, incline him to Frenzies, or at leaft to Fevers. A pure Air,

Digitized by INTERNET ARCHIVE

THE GETTY RESEARCH INSTITUTE

light

light Diet, moderate Exercife, and a perfect Dominion over his Paffions, with a few flight Remedies taken on proper Occafions, and according as Nature directs, may maintain a Man in the full Poffeffion of Health and Spirits to fixty, and then it is Time enough for him to think of avoiding the Inconveniencies which ufually attend old Age. I might alfo obferve, that the Conversation of many young Women, might, in the Summer of Life, draw along with it other Inconveniencies; but these are Subjects on which I do not chuse to infift, becaufe it is not eafy to treat them with that Delicacy, which a Philosophic Difcourse like this, requires; and becaufe the flighteft Hint is fufficient to fuggeft more to a Man of good Senfe, than is at all neceffary to be delivered upon this Subject. I take it therefore for granted, that I have affigned the proper Bounds to my Remedy, and that I may fafely define it, the Cordial of advanced Years, which can never be fafely administered, till from a just Application of Reafon, there has been produced an abfolute retreat of Appetite<sup>n</sup>.

BUT if any one fhould be mad enough to purfue this Objection further, and cry out, of what Significancy then is your Remedy? why in fuch a Situation would you extend Life at all, or of what ufe is Years when deprived of Enjoyments? If I fay

<sup>n</sup> Cicer. de Senectute. Digifized by INTERNET ARCHIVE

### [ 150 ]

fay there are any fo wild as to talk in this Manner, my Anfwer is, that they miftake my meaning. I am clearly of Opinion, that the Pleafures of the Mind are far fuperior to all fenfual Delights, and that the Cultivating youthful Understandings, which is the Bufinefs in which I have fuppofed my old Man employed, is a pleafant and noble undertaking, every way worthy of the Souls fupreameft Faculties, and carrying along with it, its own Reward, viz. a fecond Youth, more pleafing, more delightful, than the first. For as on the one hand, I cannot allow that fuch a Perfon fhould gratify, or fo much as feel his Paffions, fo on the other, I would not have him plunged into deep and perplexing Studies, but rather amufed and diverted by purfuits of another Nature. At particular Seafons, indeed, he might difcourfe with his Friends on grave and ferious Topics ; but I would not have fuch Conversations return too frequently, for fear of their leading him by Degrees into Melancholly, which is nothing elfe but fixing the Thoughts too intently on a fingle Object. In order to require and maintain a green old Age, there is nothing fo requifite as Chearfulnefs of Mind, which can never be fecured if we meditate much on abstrufe Subjects. I do not fay, that these are always to be neglected; but what I fay is, that this is not the Seafon of Life in which they ought to be purfued. They require fuch Vigour, fuch Atten-

Digitized by INTERNET ARCHIVE Original from THE GETTY RESEARCH INSTITUTE

tion,

### [ 151 ]

tion, and fuch a degree of Penetration, as would induce fo great a wafte of Spirits as would defeat the intention of that Remedy, which I would recommend, and therefore I lay it down as a fupplemental Rule, that thefe are to be avoided.

THERE is, as far as my Forefight will carry me, but one Objection more, that can be raifed against my System; and this must come from the Quarter of the Politicians, who conceive nothing to be right or worthy of Encouragement, which does not fquare with their Notions, which are, however, generally fpeaking, not very agreeable to those of other Men. It would not therefore furprize me, if these Gentlemen should take it into their Heads, to treat this as a Whimfical and triffling Performance, becaufe I know that according to their Syftem, old Men are fo many Incumbrances, of which, the State ought to be difcharg'd. It is upon this Principle I prefume, that fome Indian Nations make great Feafts in their Families, when their Chief becomes decripid, and when these Rejoicings are over, fairly put him out of the Way °. Our Free-thinkers in Politics therefore,

<sup>o</sup> I remember to have read in a late French Writer, that this is practifed by fome of the barbarous Nations, who live in the Neighbourhood of Hudfon's Bay; and he fays further, that he was prefent at one of thefe Feafts, at the Clofe of which, the Son cut the Throat of his Father. I do not recollect, that he beflows any Reflections upon this Paffage; but from the Account he has given us of the Country, I think

Digitized by INTERNET ARCHIVE

fore, must necessarily have a bad Opinion (at least while they are young) of fuch a Proposition as this, which intends no more than prolonging the Lives of those, who, in the Account of our Machiavelifts, ought to be in their Graves already. What Benefit, fay they, can refult to Society from maintaining People paft their Labours, and who, according to this very Scheme, are declared unfit for Propagation? The Public is only benefited by active and industrious Perfons, why then should fo much Care be taken to preferve People fit only for a fedentary Life ? If the ordinary Laws of Nature can be difpenfed with, let it be in Favour of the Public Weal, why fhould the extravagant Defire of Life be gratified, rather than any other extravagant Defire whatever? Reflections like thefe, it is evident, must induce these over-wife Perfons to treat my Book with Contempt, whatever Opinion they may have of the Arguments contained in it; and therefore it is neceffary for me to fhew, that thefe Maxims, how plaufible, how refined foever they may appear, are very far from

it no difficult Matter to diffinguish the Cause of so inhuman (I should be in the wrong to call it so brutal) a Custom, which I take to be this, that they find it very difficult in that part of the World to acquire Subsistance, and therefore think themfelves under a kind of Necefsity of maintaining only such as are useful. This, I persuade myself, was the Original of so horrid a Practice, which cannot, however, be founded on real Necefsity, because these People who murder their Parents, preferve their Children, though equally helples.

Digitized by INTERNET ARCHIVE

#### [ 153]

from being either just or reasonable, and which is ftill of greater Weight in the present Case, are far from being calculated for the Benefit of Mankind in general P.

IT is, I think, a Fact fo well eftablished, that I need be at no great Pains to prove it, that most of the Mischiefs and Miseries brought upon private Families, and even upon whole Nations, flow from the Warmth of Mens Passions, and from their indulging their irregular Inclinations at the Expence of others, nay and of Society itfelf. I cannot, therefore, help thinking, that it might be a means of leffening these Evils, if U we

P It may be, perhaps, thought I exaggerate a little in fuppoling, that there are People capable of reafoning in fuch a Manner; but, whoever confiders the Principles of the Spartan Government, and the System of Morals, recommended by Lycurgus, will be of another Opinion. Neither are we to imagine, that only fevere Politicians are inclined to fuch a Doctrine; there have been in all Ages fome polite Writers, and refined Wits, who have been inclined to treat old Age, not as a Misfortune only, but as a Crime. For Instance, Cornelius Gallus, one of the Favourites of Augustus, and himfelf the Patron of Virgil, and of Horace, paints old Age thus.

> Stat dubius tremulus; senex, semperq; malorum Credulus et Stultus quæ facit ipse timet. Laudat præteritos, presentes despicit annos: Hoc tantùm in rectum quod facit ipse putat.

Trembling and Doubtful, fill the Old we find, And much to Credit all ill News inclin'd; Foolifhly fearful of what e're they do, And when it's done, they're apprehenfive too. Pafs'd times their Praife, the prefent claim their Spight, And only what they do themfelves is Right.

Digitized by INTERNET ARCHIVE

we could encreafe the Number of those who are free from fuch irregular and depraved Appetites, and are confequently most capable of conducting with Judgment and Integrity, either public or private Affairs. It is remarkable, that in all well-governed States, a certain maturity of Age is required before Men are entrusted, not only with the Management of public Concerns, but of their own. Upon what Reafon then is this founded ? Is it not becaufe they are thought to want in the first Place, the Lights of Experience, and in the next, to be too much hurried by their Paffions? If this be right, and if it be not right, the wifeft Men in all Ages have been in the wrong: If this I fay be right, why fhould we fancy Men pafs'd their Labours; for being in poffeffion of those Qualities which are certainly the first Ingredients in the conftituting true Wifdom? There will be always People enough in the World full of that Heat, Vigour, and Strength, which is requilite for carrying on the active and laborious Parts of Bufinefs; but we fee plainly, that private Families are brought to Ruin, and by Degrees, great States decay for want of that Moderation, Experience, and Forefight, of which, Men far in Years, and whole Spirits are not oppreffed with the Infirmities of Age, are ufually poffeffed. If, therefore, we regard the Eafe and Happiness of Mankind, rather than Hurry and Noife, and efteem fuch a Govern-

ment

Digitized by INTERNET ARCHIVE

#### [ 155 ]

ment as preferves its Subjects in the conftant Enjoyment of these Bleffings, better than that which employs them at the Expence of their own Ease and Happines, in diffurbing those of their Neighbours, then there can be no Weight in this part of the Objection. As to what respects Generation, it is a very flight and idle Surmise; for if in Popish Countries *Monasteries* are found no great Inconvenience, where those that fill them make Vows of Celebacy in the Flower of their Age, certainly for Men who are turned of Seventy to forbear getting Children, can never be an Inconvenience to any State.

THIS is undoubtedly a fufficient Anfwer as to the general Reafoning of those I would refute; but with Refpect to the Doctrine I have endeavoured to eftablish, a still clearer and more explicit Anfwer might be given. For without enquiring whether their Principles be wrong or right, I may eafily observe, that nothing I have laid down tends to burthen Society with a Race of Dotards. What I propole, is quite the contrary. If, on the one Hand, I plead for the Extention of human Life, I recommend on the other, fuch a Method as muft preferve the Faculties in the higheft Order. Nor is it to be at all apprehended, that the Number of Men who shall prolong their Lives by this Method, in cafe it fhould be ever carried into Practice, will be exceffive, or burthenfome to Society, the

Digitized by INTERNET ARCHIVE U 2

THE GETTY RESEARCH INSTITUTE

very Nature of it provides against any fuch Inconvenience, by requiring fuch Moderation and Self-denial, as will not frequently be found. It is, therefore, an unjust and unfair Imputation upon my Principles, that they tend to burthen the World with ufeless People, fince the utmost to which they can be ftrained is, that I am for preferving as long as poffible, the Lives of fuch as may be uleful. As to the Subliftance again of fuch People, it is eafy to difcern, that this can be but a very trifling Expence, when compared even with what they are able to acquire towards the Increafe of the common Stock. So, that confidered in this, which is the very worft Light in which the Thing can be put, a true Politician, and one who has a proper Regard for the Intereft, and at the fame Time, a just refpect for the Rights of Mankind, will be far from thinking that I have offered any Thing which can be prejudicial to a well-ordered Society, but have rather provided a very good Method for fecuring a conftant Supply of fuch Counfellors, as may preferve it in the beft Order poffible.

ON this Occafion, I beg leave to cite a Paffage which *Tully* hath put into the Mouth of the elder *Cato*<sup>9</sup>, that deferves as much Attention from its Solidity, and good Senfe, as it does Praife for the Beauty

Digitized by Cicer. de Senectute. c. ii.

#### [ 157 ]

Beauty and Accuracy of Stile, in which it is delivered. Cato is there answering the very Objection, which I have been treating. " If, fays be, " Petulence or Luft be Vices more frequent among " young Men than Old, yet all young Men are " not infected with them, but fuch only as want " proper Talents, fo it is with that fort of Diftem-" per which you call Dotage, it is indeed the " Difeafe of old Men; but, however, all old Men " are not infected with it. Appius was for fome " Years quite dark, and yet he managed a Family " of four Sons grown up, and five Daughters, " with abundance of Relations and Clients, who depended upon him. He kept his Mind always " in order, and though his Vigour decayed, yet " his Senfes never failed him. He preferved to " the last Moment his Character, and his Au-" thority every body looked up towards him as " became their Station; his Slaves feared, his " Children revered, and all who were about him, " Loved him. In a Word, he kept up the old " Difcipline, and did Honour to the Roman Name, " by preferving the Manners of his Family un-" tainted. So that it is plain, old Age may " maintain a graceful Superiority, if it be jealous of " its Prerogative ; if on all Occasions it maintains " its right, if it never fneaks and gives way, but " keeps up a Manly Spirit to the laft. For as " I approve fome Qualities of Age in a young Man,

Digitized by INTERNET ARCHIVE

## [ 158 ]

" Man, fo a Youthful Spirit is very commendable " in Men of Years, for while they preferve this, " though the Body may feel the effects of Age, " yet the Mind stands out of its reach. At this " very Inftant I am employed in writing the Se-" venth Book of my Antiquities, and am actually " making large Collections from fuch old Records, " as may ferve my purpofe. I likewife, Review, " and fometimes touch a fresh, the Orations I have " formerly made in the capital Caufes, wherein I " have been concerned : I ftill keep up my Stock of " knowlege in the Augurial, Pontifical, and Civil " Law, and have time enough to read a great " deal of Greek befides. I conftantly use the Py-" thagorean Method for the Exercise of my Me-" mory, and every Evening run over in my Mind, " whatever I have faid, heard or done that Day, " Thefe are the Exercifes of the Understanding, " and in thefe, as in a Chariot, the Soul takes the " Air, while I am capable of thefe, I don't " give myfelf much concern about bodily Decays, " I am always at the Command of my Friends, " attend the Service of the Houfe frequently, and " diftinguish myself in Debates, wherein a Man " compasses more by the strength of his Facul-" ties, than he can do elfewhere, by Force of " Arms. But should it ever prove my Misfor-" tune to be confined to my Bed, and be thereby " rendered incapable of going through these Em-" ployments,

" ployments, yet the very thoughts of what I " would do, if I were able, would confole me. " But thanks be to Heaven, I have no reafon to " apprehend any fuch Thing, I have been a better " Hufband of my Time than fo, for let a Man " be but conftantly exercifed in Labours like thefe, " and he will not fo foon find the Breaches of Age. " Years will fteal upon him infenfibly, he will " grow old by Degrees and without feeling it; " nay, when he comes to break at laft, the Houfe " will crumble gently, and fall down fo flowly, " as not to give him any great Pain". This is a very fine Picture, and contains a more finished Apology for that ftate of Life which I am endeavouring to extend, than my Abilities would fuffer me to draw, but the very producing it, ferves my purpose better than if I had wrote it. If I follow the Sentiments of Cicero, and the Example of Cato the Elder, who shall question either my Senfe, or my Conduct ?

It ought to be further confidered, that for perfecting many of the Sciences, a longer Life is requifite than Men ufually enjoy; or to fpeak with greater Propriety, the free Exercife of their Faculties to a more advanced Age. If we examine all the Improvements that have been made in true Science, we fhall find, that they have proceeded from Men, who have exercifed their Thoughts in fuch kind of Studies for a long Courfe of Years. The laft Books

Books of Aristotle, are efteemed the most perfect, fo are those of Seneca, which he wrote in an advanced Age; and we may fay the fame Thing. with requeft to modern Philosophers; fuch as Gaffendi, Bacon, and Newton. A ferene old Age is therefore of the higheft Confequence in this Refpect, fince it would contribute to furnish the World with new and ufeful Lights, and prevent the Expectations they conceive from the early Productions of great Men, from being frustrated as they frequently are, by their premature Deaths. I must likewife observe, that mechanical Inventions acquire much Time to Perfect them, and that very profitable Difcoveries, and very ufeful Manufactures have been loft, by the Deaths of those who first Cultivated them, of which many Instances might be given. We may likewife remark, that fettling any new Plantation ; reforming a Society; or in fhort, reducing any People who have been long under an ill form of Government, or in a great measure without any, requires length of Days. Lewis XIV. changed entirely the Face of Things in France during his Reign, which was principally owing to the length of it, as it gave him an opportunity of feeing most of his Schemes brought to bear ; whereas, the unexpected Death of the Great Czar Peter, caufed many of his Projects to be buried in Oblivion, and mult have overturned the whole of his Glorious defign for reforming

TE

forming his Subjects, and raifing the Credit of his Crown, with the reft of the *European* Powers ; if, which was fcarce to be expected, his Succeffors had not generally fpeaking, perfifted in the purfuit of his Plan. We may therefore eafily difcern, that fuch an extention of Life as this Treatife propofes, would be fo far from contributing to burthen the World with an ufelefs race of old Men, that it would really furnifh it with fuch People, as are moft wanted for the Improvement of Knowlege, the perfecting mechanical Difcoveries, and contributing in other Refpects, to the Welfare of Mankind.

UPON the whole, therefore, I think I may very justly conclude, that by examining this antient Infeription, I have not only exercifed my Thoughts in a Manner that may contribute to the Amufement of the Learned ; but that I have hinted many Things which may be of public Utility. In this Refpect, indeed, I think, I have made the proper Ufe of the Infcription; for certainly, it is much better to inform ourfelves as to Things than Words, and the World would be much more indebted to the Labours of learned Men, if they would pay that Regard to this Maxim which it deferves. What Ufe would it be of to Mankind, fuppofing it possible for me to fix the Reign of the Roman Emperor, under which Hermippus flourished? or what

Thanks

Thanks would my Readers owe me, if I had endeavoured to difcufs whether he lived to hundred and fifty-five, or a hundred and fifteen only. Have I not chosen the better Part, in examining what may still be of fome Use, viz. By what Method he arrived at fo great an Age, and how far it is practicable for us to follow his Method. I think, I may go still farther, and affirm, that I have made it at leaft extreamly probable, that the Anbelitus Puellarum, is in fome Meafure the Breath of Life; in order to which, I hope I have effectually deftroyed fome Prejudices that affected the Minds even of People of good Senfe, as to the fettled Term of human Life, and the Impoffibility of prolonging it by Art. I have likewife, in the Courfe of this Differtation, collected the Sentiments of feveral great Men, who think, or leaft feem to me, to think in the fame Way that I do, and have thereby given an Opportunity to the curious and inquifitive Reader, of fearching more strictly into their Opinions, in order to do them Juffice, in cafe, after mature Confideration, he thinks that I have failed in fo doing.

IF this fhould contribute little to the Elucidation of the prefent Point, yet it might prove the Means of bringing many Things of Confequence to light. We have made it evident, by our Citations from old Books, that many of the Difcoveries for which the Moderns are famous, were actually

Digitized by INTERNET ARCHIVE

ally known to the Learned in former Times; whence we may probably conjecture, that fome other Things were known to them, with which we are not acquainted, and the rather, becaufe there is fcarce any Country where antient Monuments are to be found, but we may difcern in them Marks of Skill and Capacity, that transcend the Power of modern Workmen, and though thefe may not be agreeable to the prefent Tafte which feems to be a handfome Expression for the reigning Humour of Mankind, that changes too often to deferve the Name of a Rule, yet they ftill manifest great quickness of Invention, and the posfeffion of many Arts, that are now loft. It is fome Credit to Antiquity, that the oldeft building in the World, which is the Temple of Thefeus at Atbens, is by far the fineft; and in literature again, Homer and Hippocrates, plainly prove, that in point of Genius, or of Industry, the first Ages are yet unrival'd. There are feveral Roads which lead to true Wifdom, we may fometimes reach it by going backwards, as well as forwards, and profit as much be detecting the Prejudices of the Moderns, as by refuting the Errors of Antiquity. It is a just Observation of the great Lord Verulam, that much Learning frees us from those Mistakes into which we are plunged, by having only a little. When first the Moderns began to examine the Writings of Herodotus, and Pliny, they found

nothing

nothing but Abfurdities and Improbabilies; but now, that we are better acquainted with Experimental Philosophy, we begin to have a better opinion of these Authors, and are obliged to confess, that in fome Cafes, fagacity may fupply Experience. I am, however, ready to admit, that in fome Branches of Science, we have out done the Antients very much; but what of that, we are ftill far fhort of Perfection. Our very Difcoveries prove it; for example, we difcern the Effects of Gravity, we fee the whole Mechanism of the Univerfe, depend upon it; but the Caufe has been hitherto inexplicable. We are well acquainted with the many properties of the Needle, which were Secrets to former Times, but the caufe of its Variation remains a Secret to us. We have, indeed, made fome bold Gueffes at both, and it is not impoffible, that Pofterity may be able to demonstrate our Conjectures; as it is on the other Hand, likewife poffible, that they may prove them to be only idle Conjectures. If we would avoid being deceived, we must decline Bigottry of all Sorts, we must not carry our Veneration for the Antients too far, and at the fame Time, we ought not to be afraid of using a just Freedom with the Moderns; fince it is not our Business to admire others, but to instruct ourfelves.

WITH the fame View of coming at Truth, by fetting the Subject of which I treat in different

Lights,

Lights, I have flated the Opinions of others fairly, and have reafoned upon them as freely as I defire to fee my own System treated. I have given the Reader the Sentiments of Aftrologers, and of Hermetic Philosophers on this Inscription, and have left it to him to decide, whether they are more in the right than I, or whether we may not be all miftaken, and this Infcription have at laft fome other Secret, and yet more probable Senfe than any of us have reached. To encourage, an exact Difcuffion of this, I have often inculcated the Ufefulnefs of fuch an Enquiry, and I think, have fully proved without the Poffibility of a Reply, that as it is very practicable to extend the Thread of Life, beyond that length to which it ufually reaches, fo this will be a real Benefit, and not an idle, or trifling Difcovery. Thefe are the principal Points that I have laboured, and to avoid that heavinefs and drynefs which is commonly complained of, in Difcourfes of this kind : I have frequently made Excursions for the Entertainment of myfelf and my Readers, and have inferted abundance of curious Paffages from fcarce and valuable Books, that I hope will make full amends for the trouble of perufing this Treatife, even to fuch as may remain unconvinced of the Truth, or practicability of my Syftem. At leaft, I can fay this for my Book and for myfelf, that nothing has been omitted within the Reach of my Power, which might

Digitized by INTERNET ARCHIVE

might render it at once both profitable and pleafant; and therefore, I hope, that if any one fhall take the Trouble of Criticifing it, he will at leaft treat it with that Candour and good Manners which I have ufed through the whole, and not with that furly and pedantic Peevifhnefs which is too often visible in the Works of Minor Critics, who value themfelves much more on exposing the Faults of other Men, than on manifesting any valuable Qualities in themfelves, and are better pleafed to destroy an Edifice erected by another, than to acquire a just Reputation, by raising a better Structure of their own.

THERE is one Thing more I must remark, and it is this, that my Syftem is entirely on the right Side: I have not undertaken to demonstrate as many have done, a Paradox in the Teeth of common Senfe, and the common Intereft of the human Species, of which the famous Encomium on Folly, and the Panegyric on Drunkennefs, are glaring Inftances; but what I have laid down in this Difcourfe is, with a View to public Utility, and from a defire of doing Good; if therefore, upon throughly fifting this Difpute, the Matter fhould come at laft to be in Equilibrio, I hope the turn of the Scales will be allowed me; for furely, if Senfe be preferable to Dotage, Eafe to Pain, or Life to Death, I have a fair Title to this Favour. I would not be underftood, to intereft by

### [ 167 ]

this Means, the Inclinations or Prejudices of my Readers, on my Side, for that might prove Detrimental to Truth; but I introduce this remark, to fecure me against the Effects of a Petulant Humour, which reigns but too much in the World, of difliking whatever has the appearance of Novelty, and fuppoling, that there is fomething equally Juft and Wife, in maintaining old Opinions against New, and in running down any System upon its first Appearance. Against this unequitable Preposseffion, in favour of Antique Notions, I fet up this Claim to the good Will of Men, founded on the Benefits refulting from my Syftem, to the human Species, either confidered as Individuals or in Society. It was upon the fame Principle, that the late Dr. Harvey, eftablished his Doctrine of the Circulation of the Blood, which he justly observed, would Exempt the Art of Phylic from many Reproaches, and enable us to give a clearer and more rational Account of the Animal Oeconomy. On this Bafis too, ftands the Philosophy of Sir Ifaac Newton, which is perhaps the nobleft Effort of the human Understanding. I do not mean by this, to compare my Invention with theirs, or myfelf to either of those great Men. All I aim at is, to fhew, that the greatest Men have had need of Indulgence, when they propounded new Systems; whence I infer, that fuch a defire cannot be thought either

Digitized by INTERNET ARCHIVE

# [ 168 ]

either unjust or unreasonable, in the least, as I readily own myself to be.

HERE, then, let me reft this Affair, and after taking fo much Pains to render this Work not altogether unworthy the View of the Public, or the Eye of equal and impartial Judges, I refign it freely to their Confideration, and depend upon their Candour and Humanity for the kind Acceptance of my Labours.

## FINIS.
