

**Moore's**  
**ALMANAC**

FOR

**THE YEAR**

**1828,**

WITH A

*MOST USEFUL*

**COMPANION**

ANNEXED.

---

*NOTTINGHAM:*

PRINTED AND SOLD BY SUTTON AND SON,

BRIDLESMITH GATE,

WHERE

PRINTING AND BOOKBINDING

ARE EXECUTED WITH

CHEAPNESS, ELEGANCE,

AND DESPATCH.

THE  
**NOTTINGHAM**  
**REVIEW,**

A NEWSPAPER

UPON TRULY INDEPENDENT PRINCIPLES,  
WHICH

**HAS A GREATER CIRCULATION,**

THAN ANY OTHER

IN THIS NEIGHBORHOOD,

*And is therefore peculiarly adapted as an*

**ADVERTISING MEDIUM,**

Is regularly Published

EVERY FRIDAY MORNING,

At Eleven o'Clock,

*At the Review-Office, No. 1, Bridlesmith-gate, Nottingham,*

PRICE SEVENPENCE,

OR EIGHT SHILLINGS PER QUARTER,

AND SENT POST-FREE TO ALL PARTS OF THE KINGDOM.

---

**CLUB ARTICLES,**

CARDS OF ADDRESS,

**AND ALL OTHER KINDS OF PRINTING,**

Executed in the most speedy manner,

**AND ON REASONABLE TERMS:**

---

**LONDON PAPER HANGINGS**

Of the newest Patterns, at very low Prices.

---

**GENUINE PATENT MEDICINES,**

In a great variety, constantly kept on Sale,

**WARRANTED GENUINE.**

**VOX STELLARUM;**  
OR, A LOYAL  
**ALMANACK**

FOR THE YEAR OF HUMAN REDEMPTION

**1828,**

Being **BISSEXTILE** or **LEAP YEAR**; and the  
NINTH of the Reign of His present **MAJESTY** :

IN WHICH ARE CONTAINED

ALL THINGS FITTING FOR SUCH A WORK ; AS,

*A Table of TERMS and their RETURNS ;*

The Full, Changes, and Quarters of the **MOON** ;  
The Rising, Southing, and Setting of the **SEVEN STARS**,  
and other Fixed Stars of Note ; The **MOON'S** Age ; and

Setting of the **MOON** ; Mutual **ASPECTS** ;  
Monthly Observations : and many other Things, useful and profitable.

UNTO WHICH ARE ADDED,

*Astrological Observations on the Four Quarters of the Year ;*  
A Remarkable **CHRONOLOGY** ;—The **ECLIPSES** ;

And other **MATTERS** both Profitable and Curious ;  
Observations on the **WEATHER** and Weather Glasses, **RAIN**, &c.  
And an **HIEROGLYPHIC** adapted to the **TIMES**.

---

By **FRANCIS MOORE**, Physician.

---

**London :**

**PRINTED FOR THE COMPANY OF STATIONERS,**

By **J. L. Cox**, Great Queen Street, Lincoln's-Inn Fields ;

And Sold by **GEORGE GREENHILL**, at their Hall in Ludgate Street.

[Price Two Shillings and Three-pence stitched.]

WAKE, slumb'ring Muse! awake, and tune thy lay,  
Proclaim the Changes of this fleeting Year,  
Aid me, URANIA fair! while I survey

Thy courts above, and soar from sphere to sphere,  
To see the varied charms—search Nature's Laws,  
And teach mankind t'adore the great designing CAUSE.

**RAIN** fallen in January 1826, at **FULL Moon**, 2 d. 5 h. 56 m. morn. *Epping*, was .17 of an Inch; and at *Gosport* for the same period .89 of an Inch. Rain, or Snow, more or less in quantity, may be expected on or about the 3d, 5th, 12th, 20th, and 25th of this Month.

**LAST Quar.** 10 d. 7 h. 15 m. morn.

**COURTEOUS READER,**  
**OBSERVATIONS** relative to the Weather of our fickle climate, must at all times be considered interesting, and

**NEW Moon**, 17 d. 0 h. 24 m. morn.

subsequently useful to the Agriculturists and others; I have for these reasons, as usual, inserted at the top of this column, the depth of Rain for

**FIRST Qu.** 23 d. 8h. 45 m. aftern.

each Month, as found by instruments well adapted for the purpose of measuring the precipitations of the Atmosphere. On the present occasion it will be seen that these Observations relate to the year 1826, as they were taken at *Epping, Essex*, latitude 51°

4 FEBRUARY XXIX Days.

THEN from the chambers of the vaulted Skies,  
 I would descend, and search the ambient Air,  
 To know when Rains shall fall, and Tempests rise,  
 And when the weather shall be calm and fair ;  
 When clouds and mists obscure the solar ray,  
 When western breezes rise, and drive the clouds away.

HAIL! lovely Spring, array'd in rich attire,  
 Thou bring'st the feather'd emigrants back again  
 That sought for milder climes, whilst Winter dire  
 Spread tempests wide, and froze Britannia's plain;  
 The Nightingale arrives, and chants its lay,  
 The frisking Swallow comes, and builds her nest of clay.

WHEN SOL is set, and Night her shades has spread,  
 And minds untaught by wisdom muse on fate,  
 Th' Pulsator Termes in the gloom is heard,  
 And ticking like a watch he woos his mate,  
 Which superstitious people fondly thought  
 A sprite foreboding death, and thus their children taught.

THE Harvest now is ripe ;—it would be well  
 To know th' approaching changes in the Air ;  
 When the Chickweed and meek-ey'd Pimpernel  
 Their flowers expand, the weather will be fair ;  
 But when they close them, rain is near at hand ;  
 The Trefoils close for wet,—for dry their leaves expand.

Monthly Observations.

Rain fallen in August 1826, at  
**LAST Quar. 2 d. 3 h. 38 m. aftern.**

Epping, was 1'638 Inch; and at Gos-  
port 1'52 Inch.

Rain, about the 3d, 6th, 10th, 15th,  
23d, and 28th of this month. This,  
in general, is likely to prove a fine  
month for the harvest: attend to the  
motions of the Barometer between

**NEW Moon, 10 d. 4 h. 42 m. aftern.**

the 3d and 7th, and mark the tendency  
of the Mercury.

present. Indeed the Pope is a subtle,  
sturdy old fellow; if he sinks, he will  
not go down far; if he staggers, he  
will not fall.

**FIRST Quar. 18d. 2h. 46m. aftern.**

A thing most wonderful, I tell you what,  
As many lives the Pope has as a cat;  
Had half the prophecies of him been right,  
For years ago he'd been demolish'd quite.  
But yet he stands in spite of such predictions,  
Which proves it all but hackney cant and  
fictions;

**FULL Moon, 25d. 5h. 28m. morn.**

'Tis true his honour's lain upon the floor,  
Nor do we hear his hideous bulls now roar.

During the reign of that Man, who so  
frequently

18 SEPTEMBER XXX Days.

IN places moist, when nights are mild and warm,  
 What numerous Dancing Lights attract the eye,  
 Call'd "Will-with-whisps" by some, and cause alarm  
 To those, who will not into Nature pry—  
 "Evil attends this light; of it beware!"  
 'Tis but phosphoric gas, that fires when mix'd with air.

THERE see the Labourer, who has toiled all day  
 To gain by honesty his daily bread,  
 In the grey shades of Evening plods his way  
 To yonder Cot, to rest his weary head ;  
 Saluted by a kind indulgent Wife,  
 Who all his wants attends, and soothes the toils of life.

The Dominion of the MOON in Man's Body,  
Passing under the Twelve Zodiacal Constellations.

♈ <i>Aries</i> Head and Face	♎ <i>Libra</i> Reins and Loins
♉ <i>Taurus</i> Neck and Throat	♏ <i>Scorpio</i> Secret Members
♊ <i>Gemini</i> Arms and Should.	♐ <i>Sagittarius</i> Hips & Thighs
♋ <i>Cancer</i> Breast and Stom.	♑ <i>Capricorn</i> Knees & Hams
♌ <i>Leo</i> Heart and Back	♒ <i>Aquarius</i> Legs & Ancles
♍ <i>Virgo</i> Bowels and Belly	♓ <i>Pisces</i> Feet and Toes.

The Names and Characters of the PLANETS,  
With *Dragon's Head* and *Dragon's Tail*.

♄ Saturn	} ☉, or, the SUN	} ♀ Venus	
♃ Jupiter			♿ Mercury
♂ Mars			♁ the Moon.
♁ Dragon's Head. — ♃ Dragon's Tail.			

New discovered PLANETS since 1780.

♅ Uranus ♃ Ceres ♀ Pallas ♃ Juno ♃ Vesta.

The Characters of the ASPECTS.

♌ Conjunction	} ♂ Opposition	} Δ Trine
✱ Sextile		

Upon the TWELVE SIGNS.

- ♈ THE Head and Face the RAM doth always rule:  
 ♉ The Neck and Throat are govern'd by the BULL.  
 ♊ O'er the Arms and Shoulders still the TWINS preside:  
 ♋ Breast, Stomach, Ribs, the crooked CRAB doth guide.  
 ♌ The noble LION rules the Back and Heart:  
 ♍ The bashful VIRGIN claims the Belly Part.  
 ♎ The Reins and Loins the equal BALANCE weigh:  
 ♏ The SCORPION o'er the Secret Parts doth sway.  
 ♐ The curious ARCHER doth the Thighs affect:  
 ♑ So doth the GOAT our bended Knees protect.  
 ♒ The Legs unto AQUARIUS' Lot do fall:  
 ♓ The FISH our active Feet their Portion call.

## COMMON NOTES for the Year 1828.

Lunar Cycle, or Golden Numb. 5	Lent <i>begins</i>	Feb. 20
Epact - - - - - 14	EASTER DAY - - -	April 6
Dominical Letters - - - F. E.	Rogation Sunday - - -	May 11
Cycle of the Sun - - - - 17	Ascension Day - - -	May 15
EPIPHANY - - - - - Jan. 6	WHIT SUNDAY - - -	May 25
Sundays after Epiphany (three.)	TRINITY SUNDAY - - -	June 1
Number of Direction - - - 16	Sundays aft. Trinity (twenty-five)	
SEPTUAGESIMA Sunday - Feb. 3	ADVENT Sunday - - -	Nov. 30

TABLE OF TERMS AND RETURNS  
For the Year 1828.Hilary Term *begins* January 23; *ends* February 12.

RETURNS, or ESSOIGN days.

	Ex.	Re.	Ap.	W. D.
In eight days of St. Hilary - - - Jan. 20	21	22	23	Wednesd
In fifteen Days of St. Hilary . - - — 27	28	29	30	Wednesd
On the Mor. of the Purif. of the Bl. V. M. Feb. 3	4	5	6	Wednesd
In eight Days of the Purif. of the Bl. V. M.	9	10	11	Tuesday.

Easter Term *begins* April 23; *ends* May 19.

In fifteen Days of Easter - - - April 20	21	22	23	Wednesd.
From Easter Day in three Weeks - - — 27	28	29	30	Wednesd.
From Easter Day in one Month - May 4	5	6	7	Wednesd.
From Easter Day in five Weeks - - — 11	12	13	14	Wednesd.
On the Mor. of the Ascen. of our Lord — 16	17	18	19	Monday.

Trinity Term *begins* June 6; *ends* June 25.

On the Morrow of the Holy Trinity June 2	3	4	6	Friday.
In eight Days of the Holy Trinity — 8	9	10	11	Wednesd.
In fifteen Days of the Holy Trinity — 15	16	17	18	Wednesd.
From the Day of H. Trin. in 3 Weeks — 22	23	24	25	Wednesd.

Michaelmas Term *begins* Nov. 6; *ends* Nov. 28.

On the Morrow of All Souls - - - Nov. 3	4	5	6	Thursday.
On the Morrow of St. Martin - - - — 12	13	14	15	Saturday.
In eight Days of St. Martin - - - — 18	19	20	21	Friday.
In fifteen Days of St. Martin - - - — 25	26	27	28	Friday.

N. B. — No Sittings in Westminster Hall on the Second of February, Ascension Day, and Midsummer Day.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

*Note*, The *first* and *last* Days of every Term are the first and last Days of Appearance.

\* \* " An Act for further facilitating the despatch of business in the Court of King's Bench," was passed in the 2d session Geo. IV. cap. 16.

## KINGS and QUEENS, from the CONQUEST.

KINGS' Names.	Began their Reign.	Reigned Y. M. D.	Since their Reign.	Buried at
W. Conq.	1066 Oct. 14	20 10 26	741 Sept. 9	Caen, Norm.
W. Rufus	1087 Sept. 9	12 10 24	728 Aug. 2	Winchester
Henry 1	1100 Aug. 2	35 3 29	693 Dec. 1	Reading
Stephen	1135 Dec. 1	18 10 24	674 Oct. 25	Feversham

NOTE. — That the Moon's Age being observed in the first Column, you find the Time of HIGH WATER at all the Places above mentioned, in the respective Column of Numbers immediately below them. Thus, when the Moon is *One*, or *Sixteen*, Days old, it is HIGH WATER at Candado, Dunkirk, Leith, &c. at 26 Minutes past 12 o'Clock. And so of the rest. — As to the MOON'S AGE, you find it in the Sixth Column on every left-hand Page of the CALENDAR.

A TABLE of the EQUATION of TIME, for regulating Clocks and Watches, for 1828. — *Note*, fa. Clock too fast; *that is*, your Clock, to be set right, must be so much faster than the Sun Dial. — slo. Clock too slow; *that is*, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table: — *For Example*, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Min. 35 Seconds faster than a Sun Dial; *therefore* I set it so much *faster* accordingly. And so of the rest. Twelve o'Clock is the best time to set a Clock or a Watch by a Dial.

*Note*. — A Sun Dial shows Solar or Apparent Time; but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

A TABLE of the Rising, Southing, and Setting of the PLEIADES, or SEVEN STARS, for every 5th Day in the Year; of excellent Use to find the Hour of the Night.

**Chronology**

OF REMARKABLE OCCURRENCES.

*Years of  
Christ.*

*Years since.*

1066	WILLIAM (the Norman) conquered England	-	-	762
1116	First Parliament of Lords and Commons	-	-	712
1185	Ireland conquered by the English	-	-	643
1304	Edward I. reduced Scotland	-	-	524
1369	Wickliffe first began the Reformation	-	-	459
1492	Columbus discovered America	-	-	336
1584	Virginia discovered by Sir Walter Raleigh	-	-	244
1603	A great Plague in London; died 56,570	-	-	225
1605	The Popish Gunpowder Plot, November 5	-	-	223
1610	Jupiter's Satellites first discovered	-	-	218
1611	New Translation of the Bible	-	-	217
1614	New River brought to London by Sir Hugh Myddleton	-	-	214
1616	Shakspeare the Poet died	-	-	212
1625	A great Plague in London; died 34,517	-	-	203
1632	A great fire on London Bridge, Feb. 11	-	-	196
1649	King Charles I. beheaded, Jan. 30	-	-	179
1653	Oliver Cromwell made Protector, Dec. 12	-	-	175
1655	George Fox, the first of the Quakers	-	-	173
1658	Oliver Cromwell died, Sept. 3	-	-	170
1660	King Charles II. restored, May 29	-	-	168
1662	The Royal Society instituted	-	-	166
1666	The lamentable Burning of London, Sept. 2	-	-	162
1669	The Royal Exchange (built 1667) first opened, Sept. 28	-	-	159
1670	The Prince of Orange arrived at Whitehall	-	-	158
1672	Halfpence and Farthings first coined, Aug. 16	-	-	156
1677	Prince of Orange married to the Princess Mary	-	-	151
1678	The Popish Plot discovered	-	-	150
1679	The Habeas-Corpus Act passed	-	-	149
1688	The seven Bishops sent to the Tower, June 8	-	-	140
1688	Prince of Orange landed at Torbay, Nov. 4	-	-	140
1688	King James II. abdicated, Dec. 12	-	-	140
1689	King William and Queen Mary crowned, April 11	-	-	139
1693	Bank of Eng. established.—Hackney Coaches first licensed	-	-	135
1704	Gibraltar taken by Sir George Rooke	-	-	124
1707	England and Scotland united, May 1	-	-	121
1727	The great Sir Isaac Newton died, March 20	-	-	101
1727	An Earthquake in several parts of England	-	-	101
1731	The use of the Latin language and of the ancient court-hand in writing, abolished as to legal proceedings, 4 Geo. II.	-	-	97
1745	A Rebellion in Scotland	-	-	83
1746	The Scotch Rebels defeated at Culloden, April 16	-	-	82
1750	Westminster Bridge finished, cost £389,500	-	-	78
1752	The Style and Calendar altered, September 2	-	-	76
1755	Lisbon destroyed by an earthquake	-	-	73
1765	Otaheite discovered.—General Warrants declared illegal	-	-	63
1770	Blackfriar's Bridge finished, cost £152,840	-	-	58
1775	War declared against North America, Aug. 23	-	-	53
1776	The Americans declare themselves Independent	-	-	52
1778	War against France.—1779, D° Spain.—1780, D° Holland.	-	-	

- 1783 A general Peace.—Fiery Meteor passed over Eng. Aug. 18. 45
- 1784 Establishment of Mail Coaches - - - - - 44
- 1792 France a Republic.—King of Sweden shot by Ankerstrom 36
- 1793 King and Queen of France guillotined - - - - - 35
- 1797 Ireland invaded by the French - - - - - 31
- 1799 Buonaparte appointed First Consul of French Republic - 29
- 1801 Ireland united to England.—A general Peace - - - - - 27
- 1801-2-4, The Planets *Ceres*, *Pallas*, and *Juno*, discovered
- 1803 War with France renewed - - - - - 25
- 1804 Buonaparte made Emperor - - - - - 24
- 1805 Battle of Trafalgar, and glorious death of Nelson - - - 23
- 1807 Copenhagen taken by the English; Treaty of Tilsit; the Portuguese Government emigrated to the Brazils 21
- 1812 The Prince Regent assumed his full powers.— War between France and Russia; Battle of Borodino; Moscow burnt.
- 1813 America decl. War against G. Britain; Alliance of England, &c. against France; Revolution in Holland; Pr. of Orange recalled.
- 1814 Severe Frost; Allied Armies invaded France; Capitulation of Paris; Buonaparte abdicated, and conveyed to Elba; Defn. Treaty signed at Paris; Emp. of Russia, King of Prussia, &c. visited London; Peace proclaimed; Centenary Jubilee, &c.
- 1815 Conspiracy in France; Return of Buonaparte; Murat defeated, dethroned and shot; BATTLE OF WATERLOO; Surrender of Paris to the Allies; Return of Louis 18; Buonaparte exiled to St. Helena; where, on May 5, 1821, he died.
- 1816 Vauxhall Bridge opened.
- June 18. The Strand or Waterloo Bridge opened.
- 1819 March 25. Southwark Bridge opened.
- 1820 Jan. 23. *Died.*] The Duke of Kent, aged 52; and
- Jan. 29 *Died.*] George III. aged 82; both buried at Windsor.
- Feb. 23. A conspiracy to assassinate His Majesty's Ministers discovered; and in May, Thistlewood and others executed.
- March: General Election.—New Parliament met, 21 April.
- Aug. 1. The REGENT'S CANAL opened.
- 1821 The one and two pound Notes withdrawn from circulation, and Gold Sovereigns of 20s. and Half Sov. of 10s. value issued.
- June. The Turks and Greeks at war.
- July 19. His Majesty KING GEORGE IV. crowned; visits Ireland; Hanover; and in 1822, Scotland.
- *Died.*] Sir William Herschel, Astronomer.
- 1823 Counter Revolution in Portugal.
- 1824 Sept. King of France (Louis 18) died, and Charles X. succeeds.
- 1825 South American Independence established.
- Independence of Hayti acknowledged by France.
- June. First stone of the new London Bridge laid.
- 1826 Portugal: Don Pedro IV. issues a New Constitutional Charter.
- June: General Election for Second Parliament of George IV.
- Destructive fire in Huntingdon and Cambridgeshire.
- 1827 Jan 5. Duke of York died, aged 63; buried at Windsor.
- June 5. Queen of Wirtemberg visited England, after an absence of 30 years.
- August 8. *Died.*] The Rt. Hon. George Canning, 1st Lord of Treasury, &c.— 16. Interred in Westminster Abbey.

*An Account of the ECLIPSES of the Sun and Moon, and other Appearances in the Heavens, in the Year 1828; calculated from the most correct and approved Data. Founded on the Universal Law of Gravitation.*

FROM the great improvements that have, of late, been made in our Astronomical Instruments, many irregularities in the motions of the Primary and Secondary Planets have been ascertained, which heretofore were considered doubtful, or at least only deducible from the theory of Gravity. For these reasons the Lunar computations, more especially, are now attended with considerable trouble and difficulty, owing to the great number of equations which enter into the necessary calculations for finding the Moon's true place in the heavens.

Accordingly, from very carefully conducted computations, I find there will only be *two* ECLIPSES this year, and those both of the superior light The SUN; but, at the same time, it is clear from the principles of Astronomy, that they will also be *invisible* to the Inhabitants of *Great Britain*.

The *first* of these *phenomena* happens on *Monday* the 14th of *April*, in the morning, and although the Sun will be above our horizon during the whole time of this Eclipse, and moreover the Moon has northern latitude sufficiently great so as to produce a partial Eclipse, on the Sun's lower limb, even as far as the parallel of  $58^{\circ}$  north; yet, such is our position with respect to the time of conjunction, and inclination of the Earth's axis, relative to the plane of illumination, that no part of the Penumbra will pass over or near the *British Isles*. As respects the more general appearance of this Eclipse, I find that the Penumbral shade will first touch the surface of our globe, in the *Southern Atlantic*, about 6 degrees north of the Island of *St. Helena*, in latitude  $10^{\circ} 15'$  south, and longitude  $5^{\circ} 41'$  west, at half-past six o'clock in the morning, apparent time, whilst the Sun is in the horizon of that part of the world. The Obscuration now rapidly extending itself over the illuminated disc of the Earth, will, at 7 h. 31 m. produce a central Eclipse in latitude  $7^{\circ} 16'$  south, longitude  $21^{\circ} 25'$  west; and at 8 h. 33 m. the whole of the Penumbra will be upon the surface of Earth.

when the Sun will rise at the time the Moon's dark body is just leaving his upper limb, in latitude  $3^{\circ} 18'$  north, longitude  $38^{\circ} 42'$  west; these last two circumstances will also take place over the waters of the *Great Atlantic*. Let us now turn to the central appearance, and we shall find that after crossing the equator, about  $5^{\circ}$  west of the meridian of Greenwich, it enters the *Gulf of Guinea*, and arriving on the Coast of *Africa*, passes almost directly over the City of *Benin*; the capital of a kingdom of the same name.

The central line now extends over some of the unknown parts of the *African* continent, and entering *Nubia*, it quickly arrives on the western shore of the *Red Sea*, where, in latitude  $17^{\circ} 38' 26''$  north, longitude  $37^{\circ} 44' 18''$  east, the Moon will have attained her greatest altitude on the central track; at which time her semi-diameter will exceed that of the Sun  $1'' 3$ , when a total obscuration, for a short time, may there be expected; this will be at 9 h. 19 m. 18 s., at about 8 degrees and a half from their zenith. The central track is now across the *Red Sea*, thence passing into *Arabia*, extends over that country to the *Arabian Sea*, and after leaving these waters it enters *Hindoostan*, and crossing over that country about 3 degrees north of the tropic, it very soon enters the Empire of *China*; where at 11 h. 8 m. it finally leaves the earth, with the setting Sun, in latitude  $24^{\circ} 2' 24''$  north, longitude  $107^{\circ} 15' 9''$  east.

But the Sun will continue to be partially eclipsed till 9 m. after our twelve at noon, when the last portion of the Penumbra will become a tangent to the Earth, in the *Bay of Bengal*, near the Coast of *Aracan*, in latitude  $21^{\circ} 3'$  north, longitude  $91^{\circ} 26'$  east.

It is clear from the above delineation of its central progress, that this will be a large Eclipse in *Upper Guinea*, *Egypt*, *Abyssinia*, the *Gulf of Persia*, *Bombay*, and *Calcutta*. This Phenomenon may be expected to extend (even in the early part of its progress,) as far northward as *Morocco*, *Algiers*, *Tunis*, *Sardinia*, *Italy*, and even to the southern parts of *Hungary*. It will also be visible to a great portion of the *Mediterranean Sea*, to *Turkey*, *Persia*, the *Black* and *Caspian Seas*, to *West Tartary*, *Great Tibet*, the whole of *Hindoostan*, *Ceylon*, and the Islands adjacent to the *Malabar* coast.

The whole duration of this Eclipse will be 5 h. 39 m., and that of its central appearance 3 h. 37 m.: giving an  
M.DCCC.XXVIII.

apparent relative velocity to the central shade, over the surface of the Earth, equal to about 41 miles per minute!

THE Second and last of these solar Eclipses is an Annular one; it begins on *Wednesday* night, the 8th of *October*, and ends early the following morning: the Sun being under our horizon all the time, of course it must be *invisible* to us; but to some parts of the opposite hemisphere of the globe, this will prove a very interesting Eclipse, and did it fall amongst beings, who could at all appreciate the value of such a phenomenon, when seen in the line of its concentric appearance, their observations might ultimately be found useful to the science of Astronomy.

In this Eclipse the Penumbra first touches the surface of our Globe in the *Northern Pacific*, a few degrees east of the *Philippian Isles*, where the Sun will rise with a small indentation on his upper limb, at 21 m. after 9 o'clock in the evening, apparent time, according to the meridian of *Greenwich*. The partial shade now spreading itself over the *Philippines*, and the northern parts of *Borneo*, when the central annulus will first enter the illuminated hemisphere, at 26 m. after ten o'clock, in latitude  $10^{\circ} 17' 28''$  north, longitude  $114^{\circ} 40' 35''$  east; which happens near some small islands to the west of the *Philippines*; hence the central point very quickly passes over the Island of *Mindanao*, and after crossing the equator, in the 145th degree of eastern longitude, passes a little to the north of *New Guinea* and *Santa Cruz*; when at 20 m. 34 s. after our midnight, the Sun will be centrally eclipsed when on the meridian of latitude  $13^{\circ} 3'$  south, longitude  $174^{\circ} 6' 24''$  east; this will also happen in the great *Pacific Ocean*, a little to the N.W. of the *Friendly Isles*. Continuing its easterly course over several small islands to the south of the *Society Isles*, it will, at 13 m. after two o'clock in the morning of the 9th, leave the Earth with a setting Sun in latitude  $23^{\circ} 19'$  south, longitude  $120^{\circ} 40'$  west, which of course happens in the southern Pacific and only a few minutes, in arc, north of the *Tropic* and *Capricorn*. This Eclipse will not be finally over till 18 m. after three o'clock that morning; so that the Sun will appear more or less obscured during 5 hours and 57 minutes, and central 3 hours and 47 minutes.

This will prove a large Eclipse to most of the small Islands north of *Australia*, and also the *New Hebrides*  
1828.

the *Friendly and Society Isles*: it will also be visible to all the Northern parts of *Australia*, as far as *Port Jackson*, and *Botany Bay*; where the Sun will suffer a small obscuration on his lower or northern limb, at about the time of our midnight. It will also be visible to *New Zealand*, and to a great number of small islands in the *Pacific*, which lie a few degrees on each side of the central track.

*Other interesting Celestial Appearances.*

To the curious who may be desirous of viewing the heavenly bodies to advantage, I would advise them to make use of Dollond's achromatic Telescope, on a brass stand; with this instrument, the Phases of *Venus*, the Lunar Occultations, the Mountains, Valleys, and Seas on the surface of the *Moon*, the Ring of *Saturn*, and the Belts of *Jupiter*, with other phenomena relative to these distant bodies, may be observed with pleasure and satisfaction.

For this purpose, I shall here apprise the reader when such Phenomena occur as are likely to prove interesting during the present year.

First, **MERCURY** may be seen in the evenings about *March 1st*, *June 27th*, and *October 23rd*. Again, on *April 14th*, *August 12th*, and *December 1st*, this Planet will have reached its greatest western elongation, about which times it may be seen a little before Sun-rising.

The interesting and brilliant Planet **VENUS** will be a striking object in the evenings during *February*, *March*, *April*, *May*, and *June*; when in the last two months and the early part of *July*, she will have arrived in that part of her orbit, when many opportunities will occur for seeing her advantageously with a telescope: the same in the morning twilight of *August* and *September*; after this time she will be too far from the earth for general observation. On the 3rd of *March*, this Planet will make a near appulse to the star *Zeta* in  $\kappa$ ; and on *October 7th* at the time of her greatest western elongation, she will pass only  $1^{\circ} 27'$  north of the noted fixed Star *Regulus* in the constellation  $\Omega$ ; the Star and Planet will be seen rising together that morning about two o'clock. **MARS** will be nearest the earth about the beginning of *July*, hence during that, and the preceding month, he will be in a proper situation for optical examination: but as he has great southern declination, his altitude, even on the meridian, will be but a few degrees.

The stupendous Planet JUPITER will be in opposition to the Sun, and in conjunction with the Moon, on *April* the 29th at about eleven o'clock at night, when the Planet will be hid by the Moon under more southern latitudes. The first and third Satellites will also suffer that night visible eclipses by the shadow of their primary, and, at the same time, the fourth will transmit the disc of the Planet. The Moon makes several near appulses to this Star in the present year; but none of these Conjunctions are likely to prove Occultations with us in this part of the globe. Those who have good telescopes will receive much gratification on viewing the surface and attendant Moons of this mighty and distant World. As the Planet will be nearest the earth at opposition, the months of *April* and *May* will be the most proper times for observing this Planet with a telescope.

SATURN will be in  $\gamma$  to the Sun on the 8th of *January*; hence during the winter months he will be in a situation proper for observation. At the above-mentioned time this Planet will appear near the Star  $\delta$  in *Gemini*, and on the 16th will pass within about 2' south of the said Star.

URANUS, or Herschel, called also the Georgian Planet, will be in opposition to the Sun on the 23d of July, having just entered the sign  $\text{♊}$ , at which time its AR will be 20 h. 11 m. and declination s.  $20^{\circ} 41'$ .

I shall now introduce the following LUNAR Occultations, which I have been at the trouble of computing, for the purpose of those who feel an interest in observing and contemplating the motions and appearances of the Celestial Bodies.

#### LUNAR OCCULTATIONS.

The first of these Occultations is on *Thursday*, *January* 31st, at night, and is of the fixed Star 1 *Alpha* in the constellation *Cancer*. As the Moon will be at full at the time, and the Star only of the 4th magnitude, it will require the aid of a telescope to observe the phenomenon with pleasure and accuracy. The annexed circle represents the Moon's illuminated disc, where *v* is the highest point of the lunar periphery; *I* the place

of the Star's immersion or beginning of the Occultation, which happens at 11 h. 1 m. 14 s. and *E*. the place of emersion, or where the Star reappears, which will be at 12 h. 22 m. 16 s. after being hid by the Moon 1 h. 21 m. 2 s. The Moon will pass the meridian of Greenwich at the time of the Occultation.

The Second of these appearances will be an Occultation of the 2 *Delta*, in the Constellation *Taurus*; it will happen on the night of the 21st of *November*, or rather on the morning of the 22d, as the immersion will be at 44 m. 46 s. after midnight, and the emersion at 55 m. 51 s. after the above period. The Star is of the 4th magnitude, and will be hid by the Moon's northern limb 11 m. 5 s.

The Third and last of these Phenomena is an Obscuration of the Star *Pi* in *Leo*. This Occultation happens on *Thursday*, the 25th of *December*, at night, when the immersion takes place at *I*, on the illuminated part of the Moon, and the emersion at *E* on the darker part of the Moon, agreeable to the annexed Type for Greenwich.

The time of the Immersion, or beginning of the Occultation, will be at 10 h. 15 m. 4 s.; and the Emersion, or end, will happen at 11 h. 3 m. 42 s. apparent time.

## METEOROLOGICAL OBSERVATIONS, &c.

*Relating to the Year 1826; with some Remarks on the BAROMETER, THERMOMETER, &c.*

COURTEOUS READER,

THE Science of Meteorology has of late been much attended to, many scientific gentlemen having prosecuted this branch of Philosophy with great success. Their investigations of the nature and properties of our Atmosphere are likely to lead to important results, and in the  
M.DCCC.XXVIII.

end will doubtless afford a clue to a more intimate knowledge of the various changes that daily and hourly take place in the vapour regions of the vast Aerial Ocean that surrounds our Globe.

JANUARY (1826), with very few exceptions, was frosty, and at times the cold was very severe; for on the 14th, at *Epping*, the horizontal self-registering Thermometer was at  $14^{\circ}$ ; and on the morning of the 16th, the Index stood at  $13\frac{1}{2}^{\circ}$ : this was the coldest day of the whole year at this place. At *Gosport* the *minimum* temperature was on the 14th, when the Thermometer stood at  $17^{\circ}$ ; and at *Bushey Heath, Middlesex*, the coldest day was on the 16th, Thermometer  $19^{\circ}$ . On the 18th a remission of cold took place; and as there was but little snow on the ground, and scarcely any rain at the time, a more favourable thaw could not have been desired. The Barometer was often very high. At *East Retford, Nottinghamshire*, its *maximum* was on the 14th,  $30\cdot48$ ; at *Epping* and *Gosport* on the 17th,  $30\cdot14$  and  $30\cdot51$  inches respectively.—FEBRUARY was mild for the season, but in general windy and wet.—MARCH was wet at the beginning, but mild. On the 7th, 8th, 9th, and 10th, the weather was very fine and warm: on the last-mentioned day the *maximum* temperature at *Epping* was  $66^{\circ}$ , and at *East Retford*  $60^{\circ}$ ; but at *Gosport* it was only  $59^{\circ}$ , which was on the 9th. The latter part of the month was mostly dry, windy, and very cold.—APRIL was in general favourable for agricultural operations; the fore part of the month was dry, and at times warm and pleasant; but towards the latter end a considerable change of temperature took place; there were some frosty mornings, with snow and sleet at intervals; the atmosphere was often stormy, and the wind cold and piercing. An abundance of bloom on the fruit trees.—MAY: The greater part of this month was dry and windy; but the last week was wet, attended with a rising temperature: there fell, at *Epping*, more than two inches of rain in that time. On the 19th a shower, with thunder and lightning, at *East Retford*; at *Epping* the day was fine, with ☾— clouds which produced wind the next day.—JUNE was very dry and hot; the *maximum* temperature at *Epping* was on the 27th and 28th, when the Thermometer in the shade reached to  $90^{\circ}$ ! At *East Retford* and *Gosport* the *max.* was  $86^{\circ}$ . On the former day there were heavy storms of

thunder and lightning, accompanied with hail, and a tremendous hurricane, which did considerable damage in many parts of England.—**JULY**: The first and last week of this month were generally dry and hot; but during the middle part there were frequent light rains in many parts of the country. In the north the drought was more destructive to vegetation than in the south. The harvest was remarkably forward, and there was almost an universal failure of the bean and pea crops throughout England.—**AUGUST**: Although there was some rain at times during this month, yet such was the aridity of the Earth, that it produced little or no effect, so that the drought, from its long continuance, was more severely felt at this time in many situations, than on the two preceding months. On the 25th, in the evening, there was thunder, with remarkably vivid lightning.—**SEPTEMBER**: There was a considerable change in the weather during this month, which was alternately wet and dry. The rain was accompanied with frequent gales; but in general it was so warm as to be very beneficial to vegetation. Grapes remarkably fine and abundant throughout the country.—**OCTOBER**: During the greater portion of this month we had frequent and heavy showers; and although the nights were sometimes frosty, yet we had several warm days, with the Thermometer at 66 and 68 degrees. On the 22d and 23d there were thunder-storms in several places.—**NOVEMBER**: The weather was extremely changeable during this period; sometimes it was remarkably bright with sharp frosts, and at other times there were heavy rains. Snow fell on the 6th, 19th, and 26th in some parts of England, and on the last-mentioned day it was 2 or 3 inches deep in Nottinghamshire. At *Epping*, on the 21st, the Thermometer was  $9\frac{1}{2}$  degrees below the freezing point. The *minimum* pressure of the year was on the 13th, and which at *Gosport* was 28.6, and at *Epping* 28.53 inches.—**DECEMBER** was comparatively mild for the season, as the *minimum* temperature was seldom below the point of freezing. At times the atmosphere was very humid, with considerable falls of rain, the vapour point having nearly coincided with the temperature during greater part of the month.

 I would advise those who are in the habit of consulting the Barometer, especially during a fickle state of

the Atmosphere in hay-time and harvest, to pay some attention to the following brief Remarks; viz. If the mercury rise between 9 o'clock in the morning and 3 in the afternoon, it indicates fine weather; if it *fall* from 3 to 9, rain may be expected.

---

*Judicium Astrologicum, pro Anno 1828.*

*VOX CÆLORUM, VOX DEI: The Voice of the Heavens is the Voice of God. — He speaketh in all the Changes of the Seasons, and of the Times.*

---

COURTEOUS READER,

*LET* there be lights in the firmaments of the heaven, to divide the day from the night; and let them be for signs, and for seasons, and for days and years, — imports no more than, that by their motions and different phases they become Heavenly Regulators, as it were, or remarkable measurers of time; and their being appointed for Signs, must be understood as a distinct office from the rest, and so the prophet Jeremiah seems to understand them, when he calls the Stars the Signs of Heaven. *Luther*, in his comment upon *Moses's* words, *Let them be for signs*, affirms that the Moon, with the Sun and Stars, were placed in the firmament of heaven for signs of future events, as experience teaches us in Eclipses, great Conjunctions, Comets, &c. Also *Philo*, that learned Jew, who was well acquainted with the Apostles St. Peter and St. Mark, in his exposition of these words of *Moses*, *Let them be for signs*, asserts, that they may be considered signs of future events. They (the Lights in the firmament), he observes, were created, not only that they might fill the world with their light, but also, that they might be for Signs of future things. For by their Rising, Setting, Occultations, and other circumstances connected with their motions, they teach men to form conjectures of the events of future contingencies: as, of Plenty and Dearth; of clear weather and Storms; of Calms and Winds; of great Rains and of Drought; of the Changes of the Times, &c. &c. Yea, by these it is said, some have foretold when there will be a shaking or trembling of the Earth, with infinite other things that have been known to

1828.

come to pass, insomuch that it may be truly said, the Stars were appointed for Signs and Seasons.

Unveil to man the strange mysterious cause  
Of those effects deriv'd from Nature's Laws;  
Show that the Stars which trim the heavenly spheres,  
Are set for SIGNS, for SEASONS, and for YEARS;  
Which day by day to man do utter speech,  
And night to night this sacred knowledge teach,  
That there's a time for all things here below;  
A time to reap, to gather in, and sow;  
A time for birth to creatures God has given,  
A time to view the great expanse of Heav'n.

It is now my intention to conclude this article with an **HIEROGLYPHICAL** Figure, pertaining to the present Times.

AN **ASTROLOGICAL** Judgment on the Four Quarters of the Year 1828, from the Influx and Influences of the PLANETARY ORBS, with respect to the Affairs of the World. And First,

Of the WINTER QUARTER, called *The Brumal Ingress.*

**T**HIS frigid division of the Year is always considered to commence in this Northern part of the Globe, at such time as the Solar Orb becomes a *maximum* in Southern declination, and which at the present time falls on *Satur-*  
M. DCCC. XXVIII.

day, the 22d day of December, 1827, at 1 h. 31 m. 2 s. in the afternoon; when  $17^{\circ} 44'$  of  $\gamma$  cut the Oriental, and  $20^{\circ} 40'$  of  $\nu$  the Austral angles of the figure; also  $\beta$  is in the 3d house,  $\delta$  and  $\zeta$  in the 6th,  $\eta$  in the 7th, the  $\odot$  in the 8th,  $\varphi$  in the 9th,  $\mu$  in the 10th, and Luna in the 11th; and we have moreover  $\beta$  opposed to  $\varphi$  from the *Imum Cæli*, with a  $\delta$  of  $\delta$  and  $\zeta$  a little below the Occidental angle, besides other configurations of minor import.

This on the whole may be considered rather a favourable ingress and seems to have some acceptable signification in regard to Mundane Affairs; it may be considered to imply, that some nations which have been lately embroiled in wars and desolations, are now in a hopeful way of seeing more quiet and peaceable times. It will be well for those countries and cities, under *Sagittarius* and *Pisces*, if they are so fortunate as to make use of this favourable juncture to compose all former discords and divisions, which have of late been so fatal amongst them; but if disregarded, it appears highly probable, that a moderating power, which at this time interposes its good offices, will become their potent adversary. Mercury in Trine, and Venus approaching to a Sextile with the ascendant of England, naturally shows the justness and integrity of some proposals offered on the part of the English nation to the common disturbers of the peace of Christendom; as also that they are vigorously bent to defend the injured, and protect the harmless; and that if wholesome advice and honest negotiations will not effect it, they are powerful and ready enough to force those daring disturbers to reason.

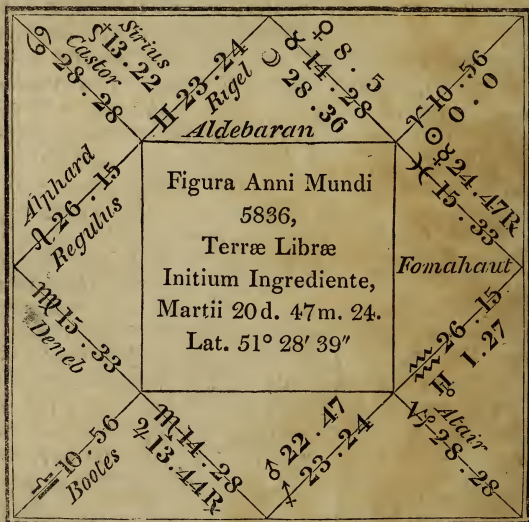

The Death of some old Statesman, officer or person eminent in dispensing the laws, seems to prepare the way for the rising of others. There are some aspects within the compass of this quarter that seem to threaten us with something from abroad, which is in no case agreeable to the English laws, their liberties or religion; however, it seems only to be a storm, it will blow over, and the Sun then will cherish us as before.

#### *Of the VERNAL, or SPRING Quarter.*

IT is now well known that the days and nights are produced by the rotation of the Earth upon its axis, and the seasons from the parallelism of the said axis, whilst performing its orbicular motion around the centre of the Solar System. Hence, when the earth enters the first degree of *Libra*, the circle of illumination passes through

the poles, dividing the northern and southern hemisphere into two equal parts; the Sun's rays fall then perpendicular upon the equatorial regions, and the **SPRING QUARTER**, in these parts of the globe, is said to begin; which, this year, will be on *Thursday*, the 20th of *March*, at 47 m. 24 s. after 2 o'clock in the afternoon, at which time the situations of the Planets, and some of the most noted of the Fixed Stars, will be as represented in the following Scheme.

## SCHEMA CÆLI.

HERE we have *Sol* lord of the Ascendant, and *Venus* lady of the *Medium Cœli*; *Jupiter* is also in Opposition to the latter Planet from the northern angle of the figure; these, with other considerations of the sidereal positions, and of the Two Great Lights of Heaven, appear to point out, rather than otherwise, a time of peace and tranquillity to those countries signified thereby; but though this be the case as regards the above-mentioned Configurations of the Planets, yet there are other rays of a different signification; for instance, we have *Mars* and *Jupiter* in reception both by house and triplicity whilst transiting the Ascendants of *Spain* and *France*; which looks as if some military actions were likely to take place in those countries, and  
M.DCCC.XXVIII.

as the latter Planet is retrograde, it is to be hoped that Priestly imposition and intolerance will, ere long, receive a salutary check from the hands of those who have severely suffered under the blasting influence of the sable tyrants, or rather cubs of the scarlet whore. We may also justly fear some new commotions, disturbances, and dubious councils in many places of *Europe*, with differences amongst great men, some subject to the frowns of their superiors, others to the murmurings and grumblings of their equals and inferiors.

Few or no diseases of a malignant nature are likely to happen this quarter, save colds, and other disorders of the breast and lungs, and those but of trifling consequence, producing little or no injury to the constitution. The Spring will probably be forward, and a fruitful time may be expected to follow.

*Of the ESTIVAL, or SUMMER Quarter.*

FROM careful calculations of the Solar Motion, it appears that this quarter begins on *Saturday*, the 21st day of *June*, at 8 m. 23 s. after 12 o'clock at noon; and at which time, the Cardinal Signs occupy the four angles of the figure; viz. *Libra* the eastern, *Cancer* the southern, *Aries* the western, and lastly *Capricorn* the northern. Sol, Saturn, and Mercury, are in the house of Luna near the Medium Cœli, and Venus that of Sol near the cusp of the 11th. Mars is in the fourth house near the angle of the fifth, forming at the same time a sextile with Jupiter, a quartile with the Moon, and an opposition to the Sun. From these and some other important influences to be observed at this ingress, we may gather that many good and great persons will be made sensible of serious misfortunes and calamities, grievous losses and crosses; some by taxation and heavy impositions, others by plunder and devastations. About this time *Mars* will also be twice opposed to two different Planets: these malevolent oppositions are considered dangerous also in raising of mutinies or insurrections, where very trifling cause is given: it is to be hoped the Clergy will refrain from meddling with such matters or things which concern them not; let them be cautious how they act in any such kind of designs. Near the end of the quarter, we have the sextile of *Mars* to *Jupiter*, with the Lady of the Ascendant free from affliction. These positions may in some measure

help to soften and alleviate the evil that is signified by other malevolent positions; they also seem to announce a strong inclination in some countries in *Europe* for peace and concord .even under the present system of misrule.

Jove and Mavors croud the spangled sky,  
 Hermes and Chronos raise the winds and showers,  
 Many a storm and tempest from on high,  
 Help'd on by Mars and Saturn's blustering powers,  
 The electric Charge rends the clouds asunder,  
 With storms of Rain, Lightning, and claps of Thunder.

### Of the AUTUMNAL Quarter.

THIS Quarter is known to begin in northern latitudes at the moment of the Sun's entrance into the first degree of *Libra*; which this year happens on *Tuesday, September 23d*, at 20 m. 29 s. after 2 o'clock in the morning; when  $21^{\circ} 28'$  of *Leo* ascend, and  $7^{\circ} 22'$  of *Taurus* culminate: the *Sun* occupies the second house, *Mercury* the third, *Jupiter* the fourth, *Mars* the fifth, *Uranus* the sixth, *Luna* the eighth, and *Saturn* and *Venus* the twelfth. The Aspects are \* ♃ ♀, □ ♃ ♂, □ ♀ ♃, \* ♂ ♃, \* ♂ ♃, \* ♃ ☉ & Δ ♃ ☉.

From the above, we may consider the present rather a passive Ingress, as there does not appear to be any very important Configurations of the Planets at this time, nor indeed during the whole quarter, with the exception of an 8 ♃ ♂, on the 21st of *October*; which aspect has always been considered by Astrologers as having a mischievous and malignant tendency, and the force of their malific rays are thought to be more immediately directed to those countries and cities that have the signs they transit for their ascendants; in this case, *Italy, Sicily, France, Russia, Denmark*, and the city of *Rome*, seem most under the influence of this opposition.

If any judgment may be formed from the Mundane position of our Satellite at this Ingress, I am of opinion that this will prove a very sickly quarter, and those who make too free with pill and potion, may bless their stars should they be so fortunate as to recover and live to see the light of another year.

FINIS.

# Genuine Patent Medicines,

Sold, by the Proprietors' Appointment, by

*Sutton & Son, Nottingham,*

And the most respectable Dealers in Patent Medicines.

---

## Dr. JAMES'S

### FEVER POWDER AND ANALEPTIC PILLS.

THE Fever Powder is allowed to be the most valuable Discovery ever made in the Science of Medicine, and is administered with equal success in Fever, Measles, St. Anthony's Fire, Pleurisy, Sore Throat, Rheumatism, &c. When given freely upon the first attack of Fever, it gives decided relief in a few hours, and generally effects a cure.—In Colds or Catarrhs, partaking more or less of inflammation, it is found invariably to shorten their duration, and to prevent their terminating in Pulmonary Affections; in Packets, at 2s. 9d. and 24s.

The Analeptic Pills, from their influence in exciting the natural secretions, are an excellent Alterative Remedy in Chronic Diseases, Rheumatism, Habitual Febrile and Gouty Affections, Indigestion, Biliary and other Complaints of the Stomach and Bowels. They are mild in their operation—do not require the least restraint or confinement to the Patient—and as a general Family Medicine, they have no superior. In Boxes, at 4s. 6d. and 24s.

\* \* R. G. G. JAMES, thinks it necessary to inform the public that Messrs. Newbery, the late Agents of his Grandfather, his Father, and himself, are new vending articles of *their own composition*, under the name of Dr. James; and that he has appointed in their stead, as Sole Agents, Messrs. Butler, Chemists, London, Edinburgh, and Dublin.

*Observe the Signature of R. G. G. JAMES, on the Stamp and Label.*

### CHING'S PATENT WORM LOZENGES.

THE more usual symptoms of Worms are Fits, Pains in the Stomach, Side and Head, Loss of Appetite, and Pale, Languid, and Emaciated Appearance in the Patient. The extraordinary efficacy of these Lozenges in all such complaints, as well as in obstructions in the bowels, and every disorder where opening or cleansing physic is required, is so universally known, and has been publicly acknowledged by so many persons of distinction and rank in society, that it is unnecessary here to enlarge on their peculiar virtues. In Boxes, at 1s. 1½d. and 2s. 9d.

### DIXON'S ANTIBILIOUS PILLS.

AS a mild and effectual remedy for all those disorders which originate in a morbid action of the liver and biliary organs, namely, Indigestion, Loss of Appetite Head-ache, Heartburn, Flatulencies, Spasms, Costiveness, Affections of the Liver, &c. &c. These Pills, (*which do not contain Mercury in any shape*) have met with more general approval than any other medicine whatever. They unite every recommendation of mild operation with successful effect; and require no restraint or confinement whatever during their use. In tropical climates, where the consequences of redundant and vitiated bile are so prevalent and alarming, they are an invaluable and efficient protection. They are likewise peculiarly calculated to correct disorders arising from excesses of the table, to restore the tone of the stomach, and to remove most complaints occasioned by irregularity of the bowels. In Boxes, at 2s. 9d., 4s. 6d., 11s., and 22s.

## PERRY'S ESSENCE, FOR THE TOOTH AND EAR-ACHE.

THIS Medicine has received the sanction and support of the most distinguished personages in the kingdom, together with the united testimony of the first Physicians in Europe, and numerous favourable comments in highly respectable Medical Journals, where it has been declared to be the "best thing ever discovered for the Tooth-ache and Ear-ache." It instantaneously relieves the most excruciating pain, preserves the teeth sound and firm, prevents further decay, effectually cures the Scurvy in the Gums, fastens loose Teeth, and renders them firm and serviceable to the latest period, and effectually prevents the Tooth-ache. In Bottles at 1s. 1½d. and 2s. 9d.

### Butler's Vegetable Tooth Powder.

THIS Dentrifice has so long been an appendage of every toilet of rank and fashion, that it is almost unnecessary to offer any further recommendation of it. Being composed of vegetables, without the mixture of any mineral or pernicious ingredient whatever, it is free from the usual objection against the use of other Dentrifices. Its detersive power is just sufficient to annihilate those destructive particles which adhere to the gums, and the interstices of the teeth; healing injuries in the former, and promoting a new Enamel (where it has been injured or corroded) on the latter. It likewise imparts a firmness and healthy redness to the Gums; and if used regularly will preserve the Teeth in a sound state even to old age. In Boxes at 2s. 9d.

### Acidulated Cayenne Lozenges.

THESE Lozenges are particularly recommended for habitual sore Throats, Relaxation of the Uvula, Enlargement of the Tonsils, and that description of Hoarseness which arises from relaxation of the membranes of the Throat, and the parts contiguous.

The Cayenne Lozenge has been found of great utility to such Persons as are frequently in the habit of speaking in Public; they may therefore advantageously be used in the Senate, at the Bar, and in the Pulpit, and the highest testimony in the *Musical World* has been advanced in their favour, especially in those cases, where, from the constant use of the voice, or the influence of a humid atmosphere, the membranes have become relaxed, and diminished in their tone. In Boxes at 2s. and 4s. 6d.

## MORRIS'S

### ROYAL BRUNSWICK CORN PLAISTER.

THIS Plaister prepared from a Recipe belonging to her *late Majesty*, is an excellent Remedy for eradicating Corns, and giving relief to those who have hard fleshy substances at the bottom of their feet, without the least pain or inconvenience, and will prove a very useful family Plaister for fresh Wounds and Scalds, likewise for Bunions. In Boxes at 1s. 1½d. and 2s. 9d.

### MARSHALL'S UNIVERSAL CERATE.

THIS Cerate will be found most efficacious in every kind of Wound, Sore, Scald, Burn, Bruises, Eruption, Ulcers of every denomination, especially in Sore and Ulcerated Legs, which have been healed in so rapid a manner, that a new method of cure has been established by this useful Preparation; Sore Breasts, Inflammation of the Eyes, &c. Scorbutic and Cancerous Humours, Erysipelas or St. Anthony's Fire, Ring Worm, Sore Throats, Gangrene or Mortification, Chops, Chilblains, &c. &c. In Boxes at 1s. 1½d. and 2s. 9d.

## HICKMAN'S PILLS.

FOR GRAVEL, STONE, LUMBAGO, &c.

THESE Pills are allowed to be the most successful preparation for effectually removing, and preventing the future recurrence of, all those Disorders which arise from an imperfect action of the Urinary Organs, as Gravel and Stone, Lumbago, Pains in the Back and Loins, and Suppression of Urine. Composed of the most innocent ingredients, they relieve the suffering patient from the excruciating tortures of those diseases without any violence or injury to the constitution, and requires no confinement or restraint of diet during its use. It is one of the oldest Public Medicines extant, and its peculiar virtues and efficacy have uniformly maintained the highest reputation. In Boxes at 2s. 9d., and 11s.

## FOTHERGILL'S FEMALE PILLS.

THESE Pills have been in public estimation for a very considerable time, and are particularly recommended in general debility of the Constitution, also as a safe and excellent remedy in those periodical irregularities which Females of delicate and languid circulation, more especially the younger part, are liable to; they tend to strengthen the organs of the Stomach, correct bad Digestion, remove Nervous Giddiness, Head-ache, &c. &c. and as a Family Medicine will be found generally useful. In Boxes at 1s. 1½d. and 2s. 9d.

## THE BALSAMIC LOZENGES.

PREPARED from the most healing Balsams and approved Expecto- rants, form an elegant and efficacious remedy; possessing the singular property of healing and strengthening the lungs, and rendering them capable of resisting the fatal effects of Colds, which, if neglected, often produce Consumption.—They almost instantly quiet the most distressing Coughs, and by gentle stimulating and moistening the Throat, prevent any attack of hoarseness. Their use tends greatly to strengthen and render the voice clear and flexible, and to protect its organs from the effects of exertion. They are, therefore, particularly recommended to gentlemen who are in the habit of public speaking and vocal performers, who will derive from them much assistance. In Boxes at 1s. 1½d. and 2s. 9d.

## FOTHERGILL'S NERVOUS DROPS.

TO those who are afflicted with Nervous disorders and their various distressing affections, as Oppression of Spirits, Head-aches, Loss of Appetite, Indigestion, Spasms, Tremors, Fainting Fits, and Debility or Relaxation of the System, it is confidently recommended to have recourse to the above Medicine, by which they are assured of obtaining immediate relief, and by a due perseverance in it agreeably to the directions given, the complete re-establishment of their health. In Bottles at 4s. 6d., 11s., & 22s.

## BUTLER'S PECTORAL ELIXIR.

EXPERIENCE during a very long period has incontestably proved the superior efficacy of this Medicine in all cases of Cold, Coughs, and Asthmatic Affections. By promoting gentle expectoration it very shortly relieves the patient of a slight or recent Cold, and a few doses are generally sufficient to remove those which neglect has rendered more confirmed and obstinate, and which are accompanied with Cough, Spitting of Blood, and other serious symptoms. Its peculiar balsamic powers tend to heal soreness and allay the irritation of the lungs, in cases of Cough; and in Asthmatic Affections, it assists and gives freedom to the breath. In Bottles at 1s. 1½d. and 2s. 9d.

## FREEMAN'S ANTISCORBUTIC DROPS.

FOR SCURVY, SCROFULA, &c.

THESE dreadful disorders in their most inveterate stages, whether occasioned by acrimonious matter retained in the habit, or introduced by certain indiscretions, intemperance, or injudicious use of Mercury, come particularly under the influence of this Medicine, the reputation of which was firmly established in the successful and extensive practice of the late Dr. Freeman, for a period of more than forty years. For all Diseases originating in obstructed perspiration or impurity of the blood, these Drops will be found a sovereign remedy, at the same time the safest medicine that can be resorted to; they are also an excellent purifier of the blood, and are taken with great benefit in the Spring and Autumn. In Bottles at 2s. 9d., 4s. 6d., 11s., and 22s.

## BUTLER'S CAJEPUT OPODELDOC.

CAJEPUT Oil, which is the basis of this Opodeldoc, has been long highly esteemed on the Continent as a remedy for Chronic Rheumatism, Spasmodic Affections, Chilblains, Palsy, Stiffness and Enlargement of the Joints, Sprains, Bruises, and Deafness; and the experience of late years in England, proves that it merits the high character given of it by the most eminent in the profession, in those obstinate complaints. Being combined in the form of Opodeldoc, it is rendered more penetrating, and consequently much more efficacious as an external application. Rubbed upon the skin, by means of flannel or the warm hand, it allays morbid irritation of nerves, invigorates the absorbents, and accelerates the circulation. In Bottles at 1s. 1½d. and 2s. 9d.

## Fluid Extract of Sarsaparilla.

IN this Preparation are concentrated all the Medicinal Properties of the Sarsaparilla Root, even to a perfect saturation of the menstruum with which it is prepared. To such persons, therefore, who, from various causes would experience great inconvenience, or with whom it would be utterly impossible to prepare the Decoction, the Fluid Extract, which possesses the advantages of portability and of keeping in any climate, will be found a most desirable mode of employing this much esteemed Medicine.

The diseases in which it has proved most beneficial are those of the Skin, such as Scorbatic Affections, Eruptive Diseases, Secondary Symptoms, &c. arising from a diseased state of the system at large. It is taken in Water, rendering it of the same strength as the Decoction. In Bottles at 4s. 6d., 7s. 6d., and 20s.

## ANTACID LOZENGES OF QUININE,

*For relieving Heartburn, Flatulence, Indigestion, Gouty Affections, and giving tone to the Stomach.*

OF all the recent discoveries in Vegetable Chemistry, none has been received by the Faculty with more satisfaction than that produced by the French Chemists from Peruvian Bark.

The sulphate of Quinine is found to possess all the tonic and febrifuge properties of the Peruvian Bark, in a concentrated state, deprived of the extractive and resinous matter. It is thus evident, that in debilitated Stomachs, arising from whatever cause, no Medicine can be more desirable. In the formula from which these Lozenges are prepared, the Sulphate of Quinine forms the principle ingredient; but, that the effects may be more adapted to the object for which they are intended, it is combined in such proportions with mild Absorbents, Antacids, and agreeable Aromatics, so as to render them applicable to every Stomach labouring under loss of tone. In Boxes at 2s. and 4s. 6d.

Messrs. Sutton and Son,  
BOOKSELLERS, BRIDLESMITH-GATE, NOTTINGHAM

Have just received a large supply of

**Dr. LAMERT'S**

**Celebrated Cordial**

**BALM OF ZURA;**

**OR, PHOENIX OF LIFE,**

AND GRAND

**RE-ANIMATOR OF NATURE.**

*FROM AN ANCIENT IMPERIAL RECIPE.*

UNDER HIS

**Majesty's**

ROYAL

**Authority**

Patronised by the Nobility, Army, Navy, and Persons of all Ranks  
throughout Europe.

---

*A most convenient, safe, and infallible remedy for nervous disorders, inward  
wastings, lowness of spirits, loss of appetite, palpitation of the heart, oppression  
of the breast, trembling or shaking of the hands or limbs, mental or bodily  
decay, seminal weakness, dimness of sight, impaired memory, consumption,  
indigestion, sick head-ache, frightful dreams, pains or wind in the stomach,  
and all constitutional complaints.*

THE BALM OF ZURA is not recommended indiscriminately for every disease incident to the human frame; but for that class of diseases which is termed *Nervous*, it is an absolute specific; there is rarely a deviation from health in which it will not afford relief. It is to be considered that Nervous Diseases constitute one-third, or perhaps a greater proportion of the disorders to which we are liable; it has, therefore, been indisputably proved that the Balm of Zura invariably operates on the Nerves, producing the most desirable and sanative effects, and is of the greatest service to every one of those cases for which it is recommended; it may be given to the tender infant, the pregnant female, and palsied old age, with safety and efficacy, hitherto unparalleled in the annals of medical discovery, being a medicine which will keep in all climates.

PREPARED AND SOLD, WHOLESALE AND RETAIL,

BY THE

***SOLE PROPRIETOR, DR. LAMERT,***

AT HIS

**OLD MEDICAL ESTABLISHMENT,**

*No. 10, Church Street, Spitalfields, London,*

Ten Doors from the Church, and opposite the Chapel, which has been established for the last Sixty Years,

In Bottles at 4s. 6d. 11s. and £1.; a 11s. Bottle contains three at 4s. 6d. and that at £1 six times as much, whereby is a saving of seven shillings, duty included.

Country Agents may be supplied on the shortest Notice, by Sutton and Son, Printers, Nottingham, who are appointed Wholesale Agents for this District.

DR. LAMERT has the satisfaction of submitting to the inhabitants of this Town and its vicinity, the following extraordinary cures performed by his invaluable medicine the CORDIAL BALM OF ZURA:—

CASE I.

*May 17, 1825.*

DEAR SIR—When you were last at Tavistock, I received your advice and Medicine; the complaint I then laboured under you will recollect was as follows:—A dry cough, sore mouth, a bad breast, accompanied with violent pains, and my body very much swollen; nor was my health only affected, my mind was also very much weakened, my head confused and subject to frequent swimings. Previous to seeing you, Sir, I had received the advice of all the medical gentlemen in this town, and most physicians at Plymouth, who rendered me no relief; my

friends were anxious for my recovery. In this hopeless state I was induced from the many cures I heard you had performed, to apply to you. By the earnest solicitations of my friends, I was with difficulty raised from my bed to see you. You described to me my complaints exactly as I felt them, and stated that by following your directions and continuing to use your celebrated Balm of Zura, you would restore me to my former health; I considered that an impossibility, for, from the dreadful agony I laboured under at the time above stated, I prayed that death would soon put an end to my sufferings. I was also, by most people, thought to be entirely out of the power of medicine to effect a cure.—Consider my astonishment, then, after continuing your Balm of Zura only three weeks, I found my pains daily abating, my appetite returning, and my cough leaving me. In a month, extraordinary as it may appear, I was perfectly restored to health and strength, for which I return you my most grateful thanks, and hope you will accept the inclosed £5. as a small tribute for the cure you have performed on me, and the great veneration I have of your skill and treatment.

I am, Sir, with esteem and regard, your obedient servant,

ANN HAMLYN.

Witnesses—JOHN HAMLYN.  
HUGH HAMLYN.  
J. NORTHWAY, Tavistock.

*Escott, near Coryton, Devon.*

N.B.—Further particulars respecting the above cure may be known by addressing letters, (post paid,) to ANN HAMLYN.

### CASE II.

DEAR SIR—Having been a long time afflicted by the following complaints, viz violent pain in the back, weakness of the chest, and nervous debility of the whole system, which prevented me following my usual employment. Prior to my addressing you, I had the advice of the faculty at Plymouth and Tavistock; but instead of any beneficial results, I daily grew worse; having been induced from the number of cures you daily performed in this and the surrounding neighbourhood, to make application to you in the year 1823, when I received your advice to continue with your celebrated Balm of Zura. I did so, and found myself in the course of three weeks enabled to work as well as ever I did in my life, to the astonishment of my friends and those who knew me, for which I return you my most grateful thanks, and send you this letter for publication, that the afflicted may reap the benefit of your celebrated Cordial Balm of Zura, which I consider superior to any Nervous Medicine offered to the public.

I am, Sir, with thanks and gratitude.

Your obedient humble servant,

THOMAS DODGE.

*Milton Abbott, near Tavistock—May 17, 1825.*

## CASE III.

Dr. Lamert,

Liverpool. Sept. 10, 1823.

SIR—In justice to yourself and the public, I have taken the liberty of troubling you with the following interesting and wonderful cure. A servant in my employ has been long afflicted with eruptions all over his body; so much so, that he was incapable, at different times, to attend to my business. Medical men after medical men being consulted upon his cure, all agreed that a change of climate would be the only chance of effecting a cure; not wishing to leave any thing undone so that the poor fellow might return to his employment, and thereby might support a wife and five children, I was at the expense of sending him to the south of France, to a brother of mine who is residing there; after being away six months he returned in as bad a state, nay even worse than he was before he went. Meeting with a friend of mine, and speaking of this unfortunate case, he recommended me to try your Balm of Zura; he took three bottles, and to my great astonishment, he was completely cured, and is now able to provide for his family, who had been deprived of his services for support.

I remain your obliged servant,

JOHN DODGSON,

Late of St. John's College, Cambridge.

Truman-street. Liverpool.

June 26, 1824.

Any enquiry relating to this case, will be answered immediately of course, for the good of mankind. I have no objection to your making this public.

## CASE IV.

Way-house, near Gloucester, July 20, 1824.

Dr. Lamert,

SIR—It is with infinite pleasure and gratitude, that I have to acquaint you of the success of your truly invaluable *Cordial Balm of Zura*, in a case of extreme and confirmed debility. I had but little faith, I must candidly confess, in any thing, having tried for the space of three years almost every remedy that I have seen advertised, but without the least effect; but nothing can exceed the rapture that overwhelmed me, on experiencing such an instantaneous effect as followed the very first dose of your inestimable Medicine; and long before I had finished two of the 11s. bottles. I felt so completely renovated, as to excite the wonder and astonishment of all my friends. I absolutely appeared to them as one who rose from the grave by miraculous interposition. Never, my dear Sir, can I hope to make any returns to you for the health (through the blessing of providence) conferred upon me, but as a *living reporter* of your transcendent skill in the application of the *CORDIAL BALM OF ZURA*, to cases of such distressing and confirmed debility as mine. If this can be of any service, you are at liberty to make use of my name and address, for the benefit of others, and, "tho' last not least," accept, respect d Sir, the humble tribute of a heart deeply imbued with gratitude, and abounding with every good wish for you here and hereafter.

From your's truly,

J. B. COX, Clerk.

☞ Be sure to ask for "DR. LAMERT'S BALM OF ZURA."

# JOHN LIGNUM & SON'S **ANTISCORBUTIC DROPS,** Lotion, and Ointment,

As well as all other respectable PUBLIC MEDICINES, may be had genuine at the old-established and popular Medicire Warehouse of

**SUTTON & SON, Printers, Booksellers, & Stationers,  
NOTTINGHAM.**

Whose Medicines are, on account of quick sale and frequent supplies, always as good and fresh as possible.

Among the various diseases to which the human body is subject, few, if any, have more engaged the attention of Medical Practitioners, than Scrofulous or Scorbutic affections; the former being not only hereditary in their nature, but insidious and burthensome in their effects, and the latter so general in their attacks, that scarcely any person is altogether free from them in one shape or other.

To remedy diseases at once so distressing and so tedious has long been a desideratum with the Faculty; and accordingly the whole Materia Medica has been ransacked, but in vain, and the sufferer has been left to drag on a miserable existence, when a timely, persevering use of Mr. LIGNUM'S ANTISCORBUTIC DROPS would have restored the patient to health and strength.

These admirable Drops increase the appetite, purify the blood, promote the circulation of the fluids, give strength and tone to the nerves, and enliven and invigorate both body and mind.—Upwards of Thirty Years' experience has fully convinced, not only the Public in general, but also some of the most enlightened and liberal of the Faculty, that no Medicine has yet been discovered which can be at all compared to these Drops, for totally eradicating those complaints for which they are recommended.

## SCORBUTIC AND SCROFULOUS COMPLAINTS.

Gentlemen,

Hull, August 26, 1826.

A respectable Innkeeper of this place, who has been afflicted with a Scorbutic complaint for about three years, (which he thinks was brought on by keeping on his wet stockings,) after being under the care of the most respectable Medical Men for some time,

applied at the shop of Messrs. M. TURNER & Co. for a 4s. 6d. bottle of Mr. Lignum's Antiscorbutic Drops, and after taking three bottles was perfectly cured. Any person wishing it, may be referred to the Gentleman himself for further information, on application to

M. TURNER & CO. 65, Market Place, Hull.

To Messrs. Lignum and Son, Surgeons, Manchester.

To Messrs. Lignum and Son,

Gentlemen,—My son has been afflicted with a Scorbutic complaint for upwards of eleven years, and during that period has been more or less under the care of the most respectable Professional Men, and by some of them deemed incurable. He had at one time not less than sixteen wounds on his leg. Hearing of your medicine, I bought a 2s. 9d. bottle of the Drops at Messrs. M. TURNER & Co.'s in this Town, in Novr. 1825, and after taking twelve of these small bottles it is with great pleasure I inform you they have made a perfect cure of him.—I remain, Gentlemen, yours, respectfully,

EDW. PRESTON.

Hull, August 11, 1826.—Cent per Cent-Street.

Witness, John Rayner.

Lichfield, September 20, 1827.

Gentlemen,—Impelled by a sense of gratitude for the remarkable cure I have received by the use of your invaluable Antiscorbutic Drops, I forward you the particulars of my case, that others who may be similarly afflicted may know where to apply for relief. For Twenty Years I had a most inveterate Scorbutic Eruption upon my arms, legs, and back of my neck, attended with the most intolerable itching and smarting.—I tried various remedies, and had the advice of Medical Men in this City, but all to no purpose; the disease increased to such a degree as to destroy my rest at night, my appetite and general health failed, and I despaired of recovery. Being recommended to give your Antiscorbutic Drops a trial, I purchased a small bottle from Mr. Edwards, Druggist, of this City, and, after taking Five Small Bottles, to my great astonishment, as well as that of my family, the complaint was entirely eradicated; and I am now able to follow my business, which before I was incapable of attending to.

It will give me pleasure to answer any enquiries; either personally, or if by letter, post paid.—I remain, your obt. servant,

JOHN SMITH,

Saddler and Harness Maker, Market-Street, Lichfield.

Attested by Mr. Edwards, Druggist, Lichfield.

To Messrs. John Lignum and Son, Surgeons, Manchester

*Facts speak for themselves.*

New Barn, Edenfield, near Bury, 26th May, 1826.

Gentlemen,—I should be ungrateful, were I not to come forward and thank you for the almost miraculous cure your Antiscorbutic Drops have performed upon me. I had been afflicted for the last seventeen years with a dry scurvy, that completely covered my whole body with scales, attended with great heat and extreme pain. The scales multiplied to such a degree, that at certain times I was obliged to use grease or oil before I could move my joints; and the bed on which I lay was completely covered with the scurf off my body. Having tried all Antiscorbutic medicines and ointments, as well as warm and cold baths at all the places of note in the neighbourhood, without affording the least relief, I had given up all hopes of being cured, till seeing a letter in the *Bolton Express* of a similar case to my own being cured by you, I was induced to try your valuable medicine, which I am happy to say gave me the greatest relief, and before I had taken three of your 4s. 6d. bottles, I experienced a complete cure, and am now as free from blotch or scale as ever I was in my life, and enjoy perfect health. As the publication of the letter in the *Bolton Express* was the means of my applying to you, I trust you will allow this case of mine to go before the public, in hopes that it may reach the hands of the afflicted, and render them the same comfort I now experience. You, therefore, are at liberty to make what use you please of this letter; and I shall feel proud in answering any enquiries, either personally or otherwise. I am, gentlemen, with the greatest regard, your obedient servant,

THOMAS HUTCHINSON.

Attested by H. Crompton, druggist, Bury, of whom (if required) further particulars may be had.—N. B. All letters to be post paid.

To Messrs. John Lignum and Son, Surgeons, Manchester.

---

King's Heath, near Birmingham, May 29, 1826.

Gentlemen,---Having for the last twelve years been afflicted with a very severe scorbutic eruption, which, by the use of your truly excellent Antiscorbutic Drops, has been entirely eradicated, I think it my duty to make known the particulars of my case, for the benefit of those who may be similarly afflicted. The first symptom of the disease appeared upon my right hand; it gradually spread along the arm, attended with a great number of pimples, which, bursting, discharged a very acrid humour: in fact, so

violent was the disease, that I was utterly unable to follow my usual employment. After taking the advice of some eminent Medical Men in Birmingham, and using the remedies they recommended, from which I found no relief, I was recommended to give your Antiscorbutic Drops a trial. I accordingly purchased a 4s. 6d. bottle from Mr. Butterworth, Bookseller, Birmingham, from which I found great relief, and after taking a few more bottles I had the satisfaction of finding the disease gradually give way, and, as I have above stated, it was at length completely eradicated.— I remain, Gentlemen, your obt. servant,

ANNE THOMPSON.

Attested by J. Butterworth, Bookseller, Birmingham.

I shall be happy to answer any enquiries, either personally, or if by letter, post paid.

To Messrs. John Lignum and Son, Surgeons, Manchester

---

\* \* These Drops are sold in moulded square bottles at 2s 9d 4s 6d and 11s. duty included.—N. B. One 11s bottle is equal in quantity to three 4s 6d or six 2s 9d ones.—The following inscription on the bottles is blown in the glass, viz. "JOHN LIGNUM & SON, only PROPRIETORS of the ROYAL ANTISCORBUTIC DROPS," and may be had wholesale and retail, at Mr. Lignum's DISPENSARY, 63, Bridge-Street, Manchester, and of all Medicine Venders.

---

Where also may be had, J. LIGNUM and SON'S much-improved  
VEGETABLE LOTION,

In square pint bottles, 2s 9d each, duty included.

J. LIGNUM and SON respectfully inform their friends and the public in general that they have lately made a very considerable improvement in the composition of their Lotion. By a combination of the active properties of part of its ingredients, with the mild and soothing effects of the Vegetable, they have succeeded in forming a Lotion far superior to any thing yet offered to the public. It will be found, when used whilst taking the Drops, a most efficacious remedy for that insufferable itching which so frequently attends Scorbutic Affections; it is unequalled in its power of removing Pimples on the face, or any part of the body, and, from its fragrant smell, many Ladies have been induced to use it as a companion at the Toilet.

When the eruption is of a dry scaly nature, attended with itching, the SCURVY OINTMENT and ANTISCORBUTIC DROPS will be more proper than the Drops and Lotion; J. LIGNUM and SON have therefore, for the accommodation of the numerous individuals who are taking their Drops, forwarded a supply of the Scurvy Ointment to their Agents in different parts of the United Kingdom. It is sold in Pots, with proper directions, at 1s 9d each, duty included.

N. B. To prevent Counterfeits, observe these words, "JOHN LIGNUM & SON, MANCHESTER," engraved on a stamp on the cork of each bottle and pc<sup>t</sup>, to imitate wh'ch is Felony.

---

FOR THE CURE OF  
DEBILITY, ASTHMA, & CONSUMPTION.

**Messrs. Sutton & Son,**  
*Review-Office, Bridlesmith-gate, Nottingham,*

Have just received a large Supply of

***Dr. LAMERT'S***

CELEBRATED CORDIAL

**BALM of LIFE;**

OR,

*Nature's Infallible Restorative,*

A most convenient, safe, and infallible remedy for asthmatic disorders, loss of appetite, palpitation of the heart, oppression of the breast, obstinate coughs, shortness of breath, impaired memory, consumption, indigestion, sick headache, frightful dreams, pains or wind in the stomach, paralytic affections, and to renovate broken and decayed constitutions.

## ASTHMA AND CONSUMPTION.

IT is well known that Asthma and Consumption are the prevailing diseases of our northern climate. They are peculiarly distressing and fatal among the laboring class, because it possesses scanty means either of arresting their violence in the early stages, or of mitigating the agonies of body and of mind, which unavoidably accompany their progress and their termination. Yet singular as it may appear, amidst all the excellent charities which have been established by the public benevolence, no scheme has yet been adopted, by which the effect of a treatment, adapted in every respect to the nature of the complaints, might have a fair and persevering trial.

It is not too much to affirm, that the devastation of Asthma and Consumption, though not so rapid and striking, is more extensive, and accompanied with greater pain and misery than that of a pestilence. Would it be believed, or can it be reflected on without the deepest concern, that in London and its environs alone, ten thousand lives are the annual victims of these destroyers? If the multitudes of those who were suffering and dying of these dreadful maladies during the last winter, were presented at one view before us, amidst all the accumulation of wretchedness, which bodily pain, aggravated by poverty and destitution produces, the heart would grow sick, and we should eagerly desire to part with our substance, that we might procure relief from the agony of our own feelings. But, because the destroyer works unseen in the hovels of the indigent,—because his victims, instead of being blazoned in the public journals, are confined to bills of mortality, the evil passes on with little observation,—its magnitude and pressure remain almost unknown,—no adequate exertion is made to resist its progress, or mitigate its effects,—and the physician is not furnished with the opportunity of trying on an extensive field, what medical research may do to alleviate suffering, and to save life.

This deficiency in medicinal science for the cure of Asthma and Consumption, is now happily filled up through the discovery of Dr. LAMERT, Sen. of his celebrated BALM OF LIFE, a complete Restorative of Nature, which has stood the test of upwards of 58 Years trial; and to those who have used it to the various disorders to which it is applicable, particularly Asthma and Consumption, have rarely found it fail of its intended effect. Dr. L. therefore confidently offers it as an efficacious remedy to those afflicted with the above lamentable disorders, convinced that one trial only will establish its decided efficacy.

It is well known, that in pulmonary complaints, the most effectual remedy is a timely removal to warm climates; but this remedy, very difficult even to the rich, is utterly unattainable by the laboring poor. The only substitute is the **CORDIAL BALM OF LIFE**, which generally arrests the progress both of Consumption and Asthma in their incipient state, and greatly alleviate the symptoms of the latter, even when it appears in its most advanced stages.

The above valuable Medicine is made by the sole Proprietor, DR. LAMERT, 10, Church-street, Spadfields, London. Country Agents may be supplied on the shortest notice, by Sutton and Son, Printers, Nottingham, who are appointed sole wholesale Agents for this district.

☞ Be sure to ask for "DR. LAMERT'S BALM OF LIFE."

In Bottles at 4s. 6d. and 10s. 6d. each — The Bottle at 20s. 6d. contains three of those at 4s. 6d. or two 10s. 6d. Bottles in one for 20s. Also, a Family Bottle containing four at 10s. 6d. for 33s. by purchasing which, 9s. are saved, duty included.

The following Case will shew the efficacy of the **CORDIAL BALM OF LIFE** :

*To Dr. Lamert,*

SIR — It has been my intention, for a length of time, to address you on a subject closely connected with your celebrity; but I must confess that a feeling of delicacy has hitherto withheld me, for we are all unwilling to expose our own errors. My cure, however, has been so singularly complete, that it would be an act of gross injustice to your character and skill, were I longer to withhold a case, as remarkable, perhaps, as any on record. Born in a polished circle of society, I was early sent to a most respectable public seminary, where, for some years, all went on with prosperity and happiness. Unfortunately, however, a habit was set abroad amongst us, the pleasing allurements of which I was, with many others, unable to resist. Possessed of an unusual warmth of temperament, I was, for some time, insatiable—but why should I trouble you with particulars?—years rolled away, and left me an altered man! infirmities gathered around me, and, at the age of 20 years, I was actually dying of decay—a gradual but certain decay. I wondered at the cause of all this premature debility, nor did the truth ever flash across my mind, until an accidental perusal of a Bristol newspaper, where I saw an address of yours, which made me fully sensible of my miserable situation. Do not imagine Sir, that I had no advice—I had the best; but, I confess it, I gave no hints, and my medical adviser never saw the true nature of my malady. Shame held my tongue, and inexperience clouded their acuties. The horrors of my situation increased with every renewed day—with the cause of misery, self-entailed, gnawing at my heart in waking moments: in seeking rest, I only sought a change of torments—the long hours of darkness were awful; those of sleep filled me with racking horrors in describable—I longed for day—with day I was wearied—and I beheld the approach of night with abhorrence. Under these circumstances of unqualified affliction, I journeyed upwards of seventy miles to have a consultation with you, as soon as you made your wished for visit to the north. I need not say how soon you were aware of my appalling situation, or the anxiety you manifested in accomplishing my relief—a circumstance which will ever have a grateful claim on my memory or of the confidence with which you spoke of my recovery. You directed me to that invaluable restorative, the Cordial Balm of Life, and by perseverance in following the directions, and with the blessing of Providence, a wonderful cure has been completely effected, and am now, in every sense of *become a new man*!—I transmit this account for your honor and for the benefit of others, who may unfortunately be placed in a situation of similar wretchedness; you may omit my residence, but if asked for, you are at liberty to give it.

Remaining, Sir, with every sentiment of regard,

Your's truly,

May 22, 1827.

FREDERIC STEPHENSON BARCLAY

*To Dr. Lamert, Church-street, Spitalfields, London,*

## Extract from a Letter.

SIR—The success which has attended the sale of your medicine, induces us to request you to send us another supply immediately, for the demand is unprecedentedly great. We have had satisfactory reports made to us, of the benefit derived from both your Balm of Zura and Balm of Life, and can refer to individuals who have been benefitted thereby. You may send to the amount of £150. net, which shall be remitted on receipt thereof.

We are your obedient Servants.

SUTTON AND SON.

May 9, 1827.

## 200 GUINEAS REWARD!

WHEREAS, the supreme efficacy of, and unparalleled number of Cures performed by, the celebrated BALM of ZURA and the BALM of LIFE. in this and the adjoining Counties, superadded to the sale of ONE THOUSAND PACKAGES per MONTH, have presented a powerful temptation to fraudulent persons, who palm upon the public notice some spurious imitations Dr. Lamert, therefore, offers a Reward of TWO HUNDRED GUINEAS, to be paid on the apprehension of any person or persons Counterfeiting either of these CORDIAL BALMS; and also a further Reward of FIFTY GUINEAS, will be paid for such information as will lead to the discovery thereof.

As Dr. LAMERT's Practice is now become so great and extensive, and his constant engagements require a considerable portion of his time and attendance, he expects, when consulted, the usual compliment of a pound note; such letters should, for safety, be directed, "Money letter," Dr. LAMERT, 10, Church-street, Spitalfields, London, paid double postage.

# C. SUTTON

## IS AGENT FOR THE

# ALBION

# FIRE AND LIFE OFFICE.

Which Insures Property and Lives,

ON VERY MODERATE TERMS,

ON A PRINCIPLE PECULIAR TO ITSELF!

It is one of the advantages of the Albion Company as regards the Public, that it holds out no professions of sharing profits with those it insures. Persons who suffer loss, are indemnified to the amount insured, and are not liable to calls, to make good the losses of others; a responsibility from which it could not be free, if their insurances were accompanied with any prospect of benefit to arise from profits. Persons insuring on the plan of receiving returns, have been actually subjected to the effects of the responsibility. The Company's Rates and Conditions are of the most reasonable description. A liberal commission is allowed to Solicitors and others, effecting Life Insurance; and every facility is afforded by which the interest and convenience of the public may be promoted.
