SHERWOOD, GILBERT, AND PIPER,
PATERNOSTER ROW.

Compton & Ritchie, Printers, Middle Street, Cloth Fair, London.
The following Tables are calculated according to the present obliquity of the ecliptic, 23° 28', and are adapted for persons who may desire to calculate a nativity upon the modern and improved rules of Astrology, as set forth in the latest elementary work on Genethliacal Science, the Grammar of Astrology.

The Table of Houses for the latitude of London, 51° 32' N., contains the Right Ascension of every degree of the zodiac in hours, minutes, and seconds. The Table of Houses for the latitude of Liverpool, 53° 23' N., contains the Right Ascension of every degree of the zodiac in degrees and minutes of a degree; therefore, by referring from one to the other of these Tables, the student will at once perceive what is the Right Ascension in degrees and minutes of any amount of time within the 24 hours, and vice versa. The former of these Tables will answer for any part of Great Britain which is south of the
latitude of 52 degrees and a half; and the latter Table will answer equally well for any place between Liverpool and the borders of Scotland. The importance of this Table, which has cost the Author great labour, as it required the taking out 12,600 logarithms, will be instantly perceived, when it is considered that the longitude of the ascendant at Liverpool is sometimes three degrees different from the longitude of the ascendant at London. The errors that arose from erecting figures of the heavens for the northern parts of the kingdom by means of the Table of Houses for London, must have been very great. Even in horary questions it is very important to have the longitude of the ascending degree correct; and in nativities an error of three degrees would throw out a secondary direction of the Moon to any aspect of the ascendant not less than three months; and so create error and confusion in the judgment of events. As, for example, if the primary directions were such as to denote danger of drowning, and the Moon came to an opposition of the ascendant in the secondary direction, it might be judged that the greatest danger would be during the week when the Moon came exactly to the opposite degree
and minute of those which were ascending at birth; but if the ascendant were wrong, even by one degree, this time could not be ascertained to within a month. To persons who can erect a figure by trigonometry, it is of less importance; but this is seldom done for horary questions.

The Table of Right Ascensions contains only twelve pages instead of twenty-four, as usual, but the extra expense of twelve additional pages is avoided by this means; and it only requires to pay strict attention to the direction at the head of each page, and either add or subtract 180°, as may be required; thus, if the Right Ascension of 10 degrees of Scorpio with 3 degrees of South latitude be required, learn by the table what is the Right Ascension of the opposite point of the zodiac, viz. 10 degrees of Taurus with 3 degrees of opposite latitude, and then add 180 degrees, and you have the Right Ascension required.

Thus, Right Ascension of 10° 8 with 3° North latitude .................................. 36° 35'
To which add half the circle.............. 180 0

And you have the Right Asc. of 10° M
with 3° South latitude ................. 216 35
Again, if you require the Right Asc. of 5 deg. of Aries with 2° South latitude, find that of the opposite point, viz. 5 deg. of ≈ with 2° North latitude; which is 185° 22' by the Table; and by taking away the half circle, 180°, you have 5° 22' for the Right Ascension you require.

The latitudes in these Tables are carried only to 7 degrees, which is the utmost any planet reaches, except Venus. When those rare occasions happen in which Venus is found with latitude exceeding 7 degrees, it will be very easy to see what difference of Right Asc. or Declination one degree of latitude creates opposite the longitude of Venus, and then compute the difference of her Right Asc. &c. As, for example, if Venus be in 20 degrees of Virgo, with 8 degrees and a half of North latitude, and I require her Right Asc., the difference of Right Asc. between 6 degrees and 7 degrees of North latitude, opposite 20 degrees of Virgo, is just 24 minutes of a degree; therefore to the Right Asc. under the 7th degree, which is 173° 37', I add 24 min., and it gives 174° 1' for the Right Asc. of Venus, with 8 degrees of North lat. opposite 20 μ; and for the
half degree I add 12 min. more, and it gives $174^\circ 13'$, the Right Asc. of Venus in $20^\circ \frac{m}{2}$ and $8^\circ 30'$ North latitude; and by adding $180^\circ$ to this, we have $354^\circ 13'$ for the Right Asc. of Venus if she had been in $20^\circ \times$ with $8^\circ 30'$ of South latitude.

On some rare occasions the Moon's declination will exceed $28^\circ$, the limits of our Table of Ascensional Difference; but the difference between $27^\circ$ and $28^\circ$ being found, and the proportion allowed for the next degree, it will give the Asc. Diff. of the Moon sufficiently near. For example, the Moon's declination at noon on the 17th February, 1806, was $28^\circ 12'$; required her Asc. Diff. in latitude $55^\circ$? The difference between $27^\circ$ and $28^\circ$ of declination is $2^\circ 43'$ of Asc. Diff. in that high latitude; then say, if one degree gives $2^\circ 43' = 163$ minutes, what will 12 minutes give? Answer, 33 minutes; which, added, to $49^\circ 24'$, the Asc. Diff. for $28^\circ$ declination, gives the Asc. Diff. required, viz. $49^\circ 57'$.

The great interest evinced in the examination of Astrology in the present age, as shewn by the ready sale of a large edition of the "Grammar of Astrology," has induced the Author to put forth these Tables; by
which means still farther facility is offered to those persons whose sense of the value of experience will induce them to place more reliance on one fact than on a hundred crude arguments, or a thousand idle assertions. Feeling that the question of the truth or falsehood of Astrology has never been discussed in the present day by such arguments as science would acknowledge, the Author has no hesitation in declaring, that ignorance of its principles and practice is the chief foundation of the prejudice which exists against the science; and he trusts that these Tables will assist to overcome much of that ignorance, and thereby overthrow one obstacle in the path of truth.

July 17, 1831.

**Notes:**
- The table lists declination values for various degrees of south latitude.
- The columns represent degrees in increments of 0, 1, 2, 3, 4, 5, 6, and 7.
- The rows correspond to different latitudes ranging from 0 to 30 degrees south.

Sir J. Clark (Physician to the Queen) on Consumption and Scrofula.

TREATISE on PULMONARY CONSUMPTION, comprehending
an Inquiry into the Nature, Causes, Prevention, and Treatment of TUBERCULOUS
and SCROFULOUS DISEASES IN GENERAL. By Sir JAMES CLARK, Physician
to the Queen. Price 12s. cloth lettered.

"As a text-book and guide to the inexperienced practitioner, we know none equal to it in general
soundness and practical utility— to the general as well as to the professional reader, the work will
prove of the deepest interest, and its perusal of unequivocal advantage."—British and Foreign
Medical Review, January, 1836.

Dr. Paris on Diet and Regimen.

A TREATISE on DIET; with a view to establish, on practical
grounds, a System of Rules for the Prevention and Cure of the Diseases incident
to a disordered state of the Digestive Functions. By J. A. PARIS, M.D. F.R.S.
Fellow of the Royal College of Physicians, &c. A new and improved Edition, being
the Fifth, nearly re-written, price 12s. bound and lettered.

"Dr. Paris's book should be in the library of every family.—It forms an excellent manual for the
investigation of all derangements of the digestive functions, and for the guidance of dyspeptic
patients in the regulation of diet."—Edinburgh Medical Journal.

Dr. Hall on Female Complaints.

ON THE CONSTITUTIONAL DISEASES of FEMALES. In
Two Parts. Part First—Of the Symptoms, Causes, and Prevention of Local Inflammation,
Consumption, Spinal Affections, and other Disorders incidental to Young Females. Part Second—Comprehending the several Affections incidental to the middle
and later Periods of Life, and of their Constitutional Origin. By MARSHALL HALL,

Dr. Prichard on Man.

RESEARCHES into the PHYSICAL HISTORY of MAN-
KIND. Illustrated with an entire new set of Plates; completely rewritten,
and, by the addition of much new and interesting matter, every department of
this important subject has been brought down to the present time. By J. C.

"Dr. Prichard deserves much praise for establishing a point which had eluded the researches of
his predecessors, and which may eventually prove a valuable contribution towards the history of the
human race."—Quarterly Review.

OR 
British Traveller's 
POCKET COUNTY DIRECTORY:  
CONTAINING 
An Accurate and Comprehensive 
TOPOGRAPHICAL AND STATISTICAL DESCRIPTION 
OF ALL THE 
COUNTRIES 
IN 
England, Wales, and Scotland.

A perfect acquaintance with the Local History and internal Advantages of our Native Country is certainly one of the most useful, ornamental, and desirable branches of human knowledge; and it will readily be admitted that there is not a nation in the world more generally interesting to the scientific observer than that of Great Britain.

COOKE'S TOPOGRAPHICAL LIBRARY forms a complete PICTRE of the BRITISH EMPIRE, and contains a particular Account of the

of all the Counties in England, Wales, and Scotland; the whole interspersed with a variety of Information, entertaining to the general Reader—highly beneficial to the Agriculturist, Trader, and Manufacturer—and particularly interesting to the Traveller, Speculatist, Antiquarian, and, in short, to every Man of the World.

The Work is highly illustrated with a complete Series of County MAPS, accurately COLOURED, and Embellished with upwards of Three Hundred Picturesque Views of TOWNS, CASTLES, CHURCHES, CATHEDRALS, NATURAL CURiosITIES, NOBLEMEN'S and GENTLEMEN'S SEATS, DRUIDICAL REMAINS, &c. &c.

The division of the Work into separate Counties affords great accommodation to the Public, in selecting such portions as may be wished; thus the Western Circuit of England comprehends CORNWALL, DEVON, DORSET, SOMERSET, WILTS, and HANTS, and forms Four interesting Volumes. The other Five Circuits of the Judges may be selected and bound up in the like manner.

To each County are prefixed a List of the MARKETS and FAIRS, an INDEX, shewing the Distance of every Town from London, and of Towns from each other; also a Copious TRAVELLING COUNTY GUIDE, describing all the Roads, Inns, Distances of Stages, Noblemen's and Gentleman's Seats, &c. forming

A COMPLETE COUNTY ITINERARY.

The Plan of this Work has received particular approbation, from its being divided into Easy Journeys; by which means, Persons, either Riding or on Foot, have the opportunity of viewing many beauties which otherwise might be missed; and to frequenters of the various Watering Places it will be found a most agreeable GUIDE and COMPANION.

* The price of each Part, containing a separate History of each County, varies according to the size of the County, from Two to Four Shillings. Any of the Parts may be had separately.
The Lakes of England.

TABLETS of an ITINERANT in WESTMORELAND: forming a complete Guide to the SCENERY of the NORTHERN LAKES; with an Itinerary of the several Roads, Towns, Villages, and Objects worthy of notice to the Traveller. Illustrated with a Coloured Map and 41 Views, etched on Steel by TOPHAM, from Original Drawings. By GEORGE TATTERSALL. Post 8vo. 12s. bd. and lettered.

"This is one of the best Guides to the Lakes that we have met with. The descriptive part of the beauties of the lakes, the mountain scenery, the roads, distances, inns, spots worth seeing, &c., is of the very best kind. The best season for laking is now at hand, we can safely recommend this work to the attention of tourists. They will find it a most useful guide and companion by the way, and on their return it will afford ample matter for entertaining reminiscences."—Liverpool Mercury.

Books of Trades, and Works Useful for the Dispatch of Business.

*N* The following Work Books comprehend a valuable Series of Practical and distinct Treatises, expressly adapted to the daily Business of the Operative, Artist, and Mechanic.

**Nicholson's Code of Mechanical Science,**

Being a complete Encyclopaedia of Practical Knowledge; containing nearly One Thousand Pages of Print, and illustrated by One Hundred Copper-plate Engravings, comprising One Thousand Subjects of Mechanical Science.

Operative Mechanic and British Machinist: comprehending a complete and systematic Development both of the Theory and Practice of the Productive Arts, in their present state of unripped perfection; and exhibiting the actual Construction and practical Uses of all the Machinery and Implements now used in Great Britain, with the real Processes adopted in perfecting the National Manufactures of every description. By John Nicholson, Esq., Civil Engineer. In One large Volume, Octavo, Third Edition, 1l. 11s. 6d. half-bound; or in Thirty Weekly Numbers, 1s. each.

This work displays, in a cheap and succinct form, and in a correct and comprehensive manner, the actual state of Scientific Improvement as at present applied to the productive Industry of this Empire; not as the same knowledge now exists in Books, but as actually found in Workshops and Manufactories of the highest Character, as regards Carpentry, Joinery, Masonry, and every branch of the Building Art. It conveys very desirable information relative to Engines and Constructions; particularly—MILL WORK, HYDRAULICS, PRINTING MACHINERY, CLOCKS and WATCHES, and to all Branches of the METALLIC, WOOLLEN, COTTON, LINEN, SILK, PAPER, PORCELAIN, and other important Manufactures.

To this new Edition of the OPERATIVE MECHANIC, the Proprietors have made very considerable Additions, by way of Supplement, exhibiting a COMPLETE VIEW of the PUBLIC WORKS of this COUNTRY, by the Baron Dupin. This invaluable Department presents a Series of PLANS, ELEVATIONS, SECTIONS, and DETAILS, exquisitely engraved, including the most striking Examples of British Science, Skill, Power, Ingenuity, and Perseverance, as exhibited in our BRIDGES, whether of STONE or IRON (including SUSPENSION BRIDGES), CANALS, LOCKS, PORTS, PIERS, DOCKS, LIGHTHOUSES, RAILWAYS, LOCOMOTIVE ENGINES, &c. &c. It is therefore equally valuable to the Intelligent Workman, the Scientific Master Manufacturer, and the ingenious Projector.

Illustrated by numerous Plates of Steam Engines employed for manufacturing purposes; the propelling of Carriages on Railways, on the common Road, and Steam Ships; also Steam Sugar and Salt Manufactories, Warming Apparatus, &c. &c.; with Plates of the most improved Boilers. 8vo. price 10s. bds.

"An Essay, and an Historical Notice of the Rise and progressive Improvement of this mighty vapour power, has been just published, which may be considered the most complete account of it that has yet proceeded from the press, inasmuch as it not only traces back its origin, but examines and describes all the various discoveries that have been made up to the present moment, with the view of further developing its almost infinite capabilities. The author of this work is Mr. Alderson, Civil Engineer; and for it he received the Prize last year from the Mechanics' Institute. It is not difficult to conceive that he merited such a distinction, for he takes a very clear view of his subject, and explains himself with scientific lucidity and intelligibility, although with unaffected simplicity. The question regarding the expediency of establishing Rail-Roads and Steam-Carriages to run on the common highway he discusses with much impartiality. At the present moment, such a work, and its dimensions are very moderate, should be generally consulted."—Morn. Herald, July 12, 1834.

LEYBOURNE'S TRADER'S SURE GUIDE; containing Tables, exhibiting at one view the Amount or Value of any Number or Quantity of Goods, from One to Ten Thousand, at the various Prices, from One Farthing to One Pound. New Edition, by T. HUGHES, printed with large Figures, 2s. 6d.

The whole carefully corrected by THOMAS BOWYER, Accountant. Price 5s. bound and lettered.
Astrology.

Dedicated to Sir John Herschel, Bart.

This work will enable any person to calculate his own Nativity, and decide for himself, by the modern and improved rules of Astrology, how far that science is true or false. The Author calls upon Men of Science to make the experiment; believing that the character, disposition, fitness for any particular employment, and general destiny, may be foreknown by the simple rules laid down in this work. It contains the Nativity of Lord Byron's Daughter; and it is a curious fact that this Lady's marriage, which took place in June 1835, was foretold in the Grammar of Astrology that the event would happen at the period it really did. With the calculations given at length.

Tables to be used in Calculating Nativities; comprising Tables of Declination, Right Ascension, Ascensional Difference, and Polar Elevation; also Tables of Houses for London and Liverpool. Computed by Zadkiel, for the Grammar of Astrology. Price 2s. 6d.

Lilly's Introduction to Astrology; being the whole of that celebrated Author's Rules for the Practice of Horary Astrology; wherein the superstitions of the 17th century have been expunged, and the whole art rendered plain and familiar; particularly fitted for the use of learners, and accordant with the improved science of the present day. The easy Rules given in this Work will enable searchers after truth to decide on the reality of Astrology, in a few weeks, by practising Horary Questions. Edited by Zadkiel, Author of the Grammar of Astrology, Astronomical Almanac, &c. 8vo. price 10s. 6d. boards.

N.B. The former editions of William Lilly's Astrology are long since out of print, and only to be met with at very high prices. This is printed from the edition of 1647, and contains all the Schemes, Fac-similes of the Hieroglyphics of the Plague and Fire of London, and a Portrait of the Author.

Future Events.

pedia. Containing nearly 600 pages, price 7s. 6d. cloth.

Moubray on Poultry, Pigs, and Cows.

A PRACTICAL TREATISE on BREEDING, REARING, and
FATTENING all KINDS of DOMESTIC POULTRY, PIGEONS, and RABBITS:
also on Breeding, Feeding, and Managing Swine, Pigeons, Cows, and Bees. By
BONINGTON MOUBRAY, Esq. Seventh Edition, enlarged by a Treatise on Brew-
ing, on making BRITISH WINES, CIDER, BUTTER, and CHEESE, and Country Concerns
generally; adapted to the Use and Domestic Comforts of Private Families,
Illustrated with new and original Drawings from Life, coloured from Nature, of
the various breeds of Fowls and Animals. 7s. 6d. cloth boards.

"This is unquestionably the most practical work on the subject in our language, and the informa-
tion is conveyed in plain and intelligible terms. The convenience of a small poultry-yard; two or
three pigs, with a breeding sow, and a cow for cream, milk, butter, and cheese, in an English
country-house, appears indispensable; and to point out how these may be obtained, at a reasonable
expense, seems to have been Mr. Moubray's object. He is evidently a good practical farmer, tho-
roughly conversant with rural economy in all its branches; his book is written in a light, lively,
Kitchener style; and, like the works of that celebrated gastronome, conveys, at least, as much
amusement as information. Were any testimony wanted as to its practical utility, it would be
found in the declaration of an eminent rural economist, Sir John Sinclair, who pronounces it 'the
best work hitherto printed' on the subject of which it treats. It is particularly calculated for the
Colonies, Canada, and United States, the West Indies, New South Wales, and Van Dieman's Land."
—Farmer's Journal.

English and Foreign Funds.

A COMPENDIUM of the ENGLISH and FOREIGN FUNDS,
and the principal Joint-Stock Companies; forming an epitome of the various objects
of investment negotiable in London, with some account of the internal debts and
revenues of the Foreign States, and Tables for calculating the value of the
different Stocks, &c. Second Edition, with additions. By C. Penn. 12mo. 5s. cl.
FEMALE SERVANT'S GUIDE and ADVISER; or, the SERVICE INSTRUCTOR. Illustrated with Plates, exhibiting the Method of Setting out Dinner Tables. Price 3s.

This work has an emphatical claim to the sanction of Masters and Mistresses, as, by its direction and instructions, Servants are enabled to perform the various occupations of service in an efficient and satisfactory manner, and are informed of the methods of occasioning LARGE SAVINGS in the Management and Use of their Employers' Household Property and Provisions: in fact, it embraces the interest and welfare of the great family of Mankind—MASTERS and SERVANTS.

"By the present of a copy of the work to each of their servants, employers may safely calculate on the saving of many pounds a year in their expenditure"—Taunton Courier.

FAMILY DYER and SCOURER; being a Complete Treatise on the Arts of Dyeing and Cleaning every Article of Dress. By WILLIAM TUCKER late Dyer and Scourer in the Metropolis. Fourth Edition, considerably improved, 4s. 6d. bds.

"The Family Dyer and Scourer contains much valuable information relative to dyeing and cleaning every article of dress, whether made of Wool, Cotton, Silk, Flax, or Hair; also, Red and Window Furniture, Carpets, Hearth-Rugs, Counterpanes, Bonnets, Feathers, &c. In all of which a very considerable saving will be observed, if the rules laid down be adopted; as it is frequently the case that clothes and furniture are thrown aside in a dirty state as useless, which, by being dyed and cleaned, may be worn or used much longer."—Taunton Courier.

FAMILY CYCLOPÆDIA; a Code of USEFUL and NECESSARY KNOWLEDGE in DOMESTIC ECONOMY, AGRICULTURE, CHEMISTRY, and the ARTS; including the most approved Modes of Treatment of DISEASES, ACCIDENTS, and CASUALTIES. By JAMES JENNINGS, Esq. In one large volume, 8vo. price 1l. 1s. in boards.

This very useful work contains upwards of fourteen hundred closely-printed pages, comprising as much matter as is frequently contained in six ordinary-sized octavo volumes. The following are the opinions of the Reviewers on its merits:

"As a book of daily reference the FAMILY CYCLOPÆDIA is really invaluable; it forms a portable Library of Useful Knowledge, of easy reference, and contains a great variety of information not to be found in other works of similar pretensions, and of greater magnitude."

"It contains a large mass of information on subjects connected with the Domestic Economy of Life. In matters of Science and the Arts, the selections are all from sources of the best authority, and treated in a clear and familiar manner. As a book of daily reference in the common concerns of life, its great practical utility will no doubt ensure it a ready introduction, and a favourable reception in every intelligent family."

"The able manner in which this work is executed affords satisfactory evidence that the editor is thoroughly acquainted with the subject. It is a valuable multium in parvo."

ART of BREWING on SCIENTIFIC PRINCIPLES. Adapted to the Use of Brewers and Private Families; with the value and importance of the Saccharometer. The whole system of Ale, Table Beer, and Porter Brewing, and the Names and Proportions of the various Ingredients used by Porter Brewers (but prohibited by the Excise) made public. To which are added, Directions for Family Brewing; making Cider, Perry, Home-made Wines, &c. &c. Price 3s. 6d.

"A great body of practical information compressed into a small volume."—Monthly Critical Gaz.

Fourteenth Edition, revised and corrected by J. FIELD, Jun. of the Stock-Exchange. Price 6s. cloth.

Printed uniform with the Million of Facts.

A RTS of LIFE and CIVILIZATION; with Accounts of all the USEFUL PRODUCTS of NATURE and INDUSTRY, and Practical Details of Processes in Manufactures, Chemistry, Pharmacy, Building, Mechanics, and other Social Sciences, alphabetically arranged, according to the best Authorities and latest Discoveries. In 1400 columns of Nonpareil type, forming a very thick volume in duodecimo. By SIR RICHARD PHILLIPS. Price 11s. cloth.

It is a work of Processes, and of Practical Details relative to whatever men do in Society; and it applies, in a satisfactory manner, to every pursuit of Profit, Industry, and Production, from the Workshop to the Laboratory, from the Kitchen to the Boudoir, and from the Farm to the Ornamental Garden. On all these subjects it is a perfect Library of Indispensable and Constant Reference.

"I have often regretted that we have not such a Dictionary of the Chemical, Mechanical, and Useful Arts, practised in civilised Society, as would enable a willing Savage, or a barbarous People, at once to profit by all our discoveries."—FRANKLIN.
Letters to a Mother.

EUPHÉDIA, (the felicity of having healthy children,) being LETTERS to a MOTHER, on the WATCHFUL CARE of her INFANT, in reference to the NURSE, COLD, DAMP, the OPEN AIR, and CLOTHING; of INFANTILE DISEASES in general, and the Remedies; containing cogent reasons for the mother being the nurse of her own children. By a PHYSICIAN. Price 3s. 6d. bound and gilt.

This may be considered as the book of physical Education, and embraces a subject of the highest importance to every mother. Although the volume appears to have been written en des bouts de temps, there is, nevertheless, much method in it; and, what is of some importance in a work of this kind, a degree of freedom, which should not have been written, 'con amore,' with a perfect knowledge of the subject by the author. The duties of a mother and wet-nurse are succinctly and briefly laid down; and the chapters on the early detection of infantile disease are calculated to afford much valuable information on points of vital importance to the young. A philosophic and Christian spirit breathes through the work; and there are none who are, or who are likely to become mothers, but will be interested in its contents; we therefore cordially recommend it to all 'sorts and conditions' of women."—Educational Magazine, April 1836.

"It is a little volume exempt from quackery, and admirably calculated to impress upon a mother not merely the duties to her infant, but to teach her a great variety of lessons, which every affectionate bosom will delight to study and cherish."—Monthly Review, April 1836.

Death Blow to Fraud and Adulteration.

New Edition. By an ENEMY OF FRAUD AND VILLANY. Price 5s. bound in cloth.

"The use and excellence of this admirable volume should be known to every person who values health and life."—Monthly Gazette of Health.

"We have not lately met with a volume which contains more useful information and amusing matter than the present one."—Monthly Review.

"Four heavy and expensive Editions of Sir John Sinclair's "Code of Health" have stamped its merit and utility: it is the most comprehensive and useful work on Health and Longevity yet published, and has been the storehouse from which all subsequent writers have extracted much valuable information.

"The art of preserving health, and giving longevity to man, forms a link in that chain of useful pursuits to which you have devoted all your time." He adds, "My obligations for the communication of your interesting thoughts upon this subject, are augmented by the advantage and information I have derived by perusing them."—The Baron D'Edeleclantz.

"Many subjects are considered in a new point of view; many new and remarkable facts are introduced: on the whole (he states) the author has communicated the most important results regarding the effects of external substances on health."—Dr. Spengler's Preface to his Translation of this work into German.

"The subject is of the greatest importance. The work I have read with great satisfaction, and the observations which it contains are very important."—Dr. Matthew Baillie.
