TO

JOHN CAMDEN HOTTEN,

AS

A MARK OF RESPECT,

I DEDICATE THIS BOOK.

HARGRAVE JENNINGS.

* * * It is somewhat unusual, I believe, for an author to dedicate a book to his publisher; but the unflagging industry of Mr. HOTTEN, in his double capacity of author and bookseller, has always surprised me, and as some testimony to this activity, and to the fact that he has found—or made—time to write or edit some seven-and-twenty different works, I have, without asking his permission, much pleasure in penning the above.
THIS book, which now leaves our hands, concentrates in a small compass the results of very considerable labour, and the diligent study of very many books in languages living and dead. It purports to be a history (for the first time treated seriously in English) of the famous Order of the "Rose-Cross," or of the "Rosicrucians." No student of the occult philosophy need, however, fear that we shall not most carefully keep guard—standing sentry (so to speak) over those other and more recondite systems which are connected with our subject.

An accomplished author of our own period has remarked that, "He who deals in the secrets of magic, or in the secrets of the human mind, is too often looked upon with jealous eyes by the world, which is no great conjuror."
How is it that, after centuries of doubt or denial,—how happens it, in face of the reason that can make nothing of it, the common sense that rejects, and the science which can demonstrate it as impossible,—the supernatural still has hold in the human—not to say in the modern—mind? How happens it that the most terrible fear is the fear of the invisible?—this, too, when we are on all hands assured that the visible alone is that which we have to dread! The ordinary reason exhorts us to dismiss our fears. That thing "magic," that superstition "miracle," is now banished wholly from the beliefs of this clear-seeing, educated age. "Miracle," we are told, never had a place in the world,—only in men's delusions. It is nothing more than a fancy. It never was any thing more than a superstition arising from ignorance.

What is fear? It is a shrinking from possible harm, either to the body, or to that thing which we denominate the mind that is in us. The body shrinks with instinctive nervous alarm, like the sensitive leaf, when its easy, comfortable exercise or sensations are disturbed.

Our book, inasmuch as it deals—or professes to deal—seriously with strange things and with deep mysteries, needs the means of interpretation in the full attention of the reader: otherwise, little will be made, or can come, of it. It is, in brief, a history of the alchemical philosophers, written with a serious explanatory purpose, and for the first time impartially stated since the
days of James the First and Charles the First. This is really what the book pretends to be—and nothing more. It should be mentioned that the peculiar views and deductions to be found herein were hinted at for the first time by the same Author in the year 1853, when a work entitled *Curious Things of the Outside World* was produced.

Let it be understood, however, that the Author distinctly excepts against being in any manner identified with *all* the opinions, religious or otherwise, which are to be found in this book. Some of them are, indeed, most extraordinary; but, in order to do full justice to the speculations of the Hermetic Brethren, he has put forward their ideas with as much of their original force as he was able; and, in some parts of his book, he believes he has urged them with such apparent warmth, that they will very likely seem to have been his own most urgent convictions. As far as he can succeed in being so considered, the Author wishes to be regarded simply as the Historian of the Rosicrucians, or as an Essayist on their strange, mysterious beliefs.

Whether he will succeed in engaging the attention of modern readers to a consideration of this time-honoured philosophy remains to be seen; but this he is assured of, that the admiration of all students and reflective minds will be excited by the unrivalled powers of thinking of the Rosicrucians. The application, proper or otherwise, of these powers is a matter altogether beside the present inquiry.
PREFACE.

The Author has chiefly chosen for exposition the Latin writings of the great English Rosicrucian, Robert Flood, or Fludd (Robertus de Fluctibus), who lived in the times of James the First and Charles the First.

Our final remarks shall be those of a very famous Brother of the "R.C.," writing under the date of 1653:

"I will now cloze up," saith he, "with the doxology of a most excellent, renowned Philocryphus:

'Soli Deo Laus et Potentia!
Amen in Mercurio, qui pedibus licet carens decurrit aqua, et metallicè universaliter operatur.'"

CHAPTER THE FIRST.

CRITICS OF THE ROSICRUCIANS CRITICISED.

That modern science, spite of its assumptions and of its intolerant dogmatism, is much at fault—nay, to a great extent, a very vain thing—is a conclusion that often presents itself to the mind of thinking persons. Thus thoughtful people, who choose to separate themselves from the crowd, and who do not altogether give in with such edifying submission to the indoctrination of the scientific classes,—notwithstanding that these latter have the support generally of that which, by a wide term, is called the “press” in this country,—quietly decline reliance on modern science. They see that there are numerous shortcomings of teachers in medicine, which fails frequently, though always with its answer,—in theology, which chooses rather that men should sleep, though not the right sleep, than consider waking,—nay, in all the branches of human knowledge; the fashion in regard
to which is to disparage the ancient schools of thought by exposing what are called their errors by the light of modern assumed infallible discovery. It never once occurs to these eager, conceited professors that they themselves may possibly have learned wrongly,—that the old knowledge they decry is underrated because they do not understand it,—and that, entirely because the light of the modern world is so brilliant in them, so dark to them, as eclipsed in this artificial light, is the older and better and truer sunshine nearer to the ancients: because time itself was newer to the old peoples of the world, and because the circumstances of the first making of time were more understood in the then first divine disclosure,—granting that time ever had a beginning, as man's reason insists it must.

Shelley, the poet, who, if he had not been so great as a poet, would have been perhaps equally eminent as a metaphysician,—that is, when age and experience had ripened and corrected his original brilliant crudities of thought,—used to declare that most men—at least, most thinking men—spend the latter half of their life in unlearning the mistakes of the preceding half. This he declares to have been the fact in his own experience—which was, even for this test, a very brief one; for Shelley was only twenty-nine when his lamentable death occurred. The early departure of three brilliant poetic spirits of our fathers' period, at the same time that it is very melancholy, is worthy of deep remark. Shelley was, as we have said, twenty-nine; Byron was only thirty-six; John Keats—in some respects the most poetically intense and abstract of the three—was only twenty-four. And in these short several lifetimes, measuring so few years, these distinguished persons had achieved that which resulted in the enrolment of their names in a nation's catalogue in a grand branch of human
attainment. They live in lasting records, they grow in honour, and their names do not fade, as is the case with those reputations which have been unduly magnified, but which give way to time. Perhaps the lot of some contemporaneous accepted important, not to say great, reputations will be diminution. Time is not only an avenger, but a very judicious corrector.

We are so convinced of the irresistible dominancy, all the world over, of opinions, and of the *dicta* relative to this or that merit, or this or that truth, propounded by people with names and of influence in our good, readily believing England, and of the power of supposed authority in matters of taste and literary acceptance, that we desire to warn querists against the statements about the fraternity—for it is not a body—of the Rosicrucians appearing in all the published accounts, whether of this country or abroad. We have examined all these supposed notices and explanations of who the Rosicrucians were in biographical works, in encyclopaedias and histories, and we find them all prejudiced and misrepresenting, really telling no truth, and only displaying a great amount of mischievous ignorance. They are, besides, in the main copied from each other—which is notably the case with the early encyclopaedias. Old Fuller, who has some notices of Robert Flood, a noted English member of the order of Rosicrucians, fully admits his ignorance of whom the brotherhood comprised, and of their constitution or purpose. All generally received accounts, therefore, are wrong, principally for three reasons: first, through ignorance; secondly, through prejudice; thirdly, as instigated by distrust, dislike, and envy,—for in criticism it is a dogma that the subject must be always under the critic, never that, by a chance, the subject may be above the critic—that is, above the critic's grasp and compre-
hension. But suppose the criticised choose to except to the ability of the critic to judge of him?

From this obstinacy and conceit arise such underrating and false comment as is implied in the following, which is extracted from the *Encyclopædia Britannica*,—which account is copied again into several other encyclopædias, and repeated into smaller works with pertinacious, with even malicious, fidelity:

"In fine, the Rosicrucians, and all their fanatical descendants, agree in proposing the most crude and incomprehensible notions and ideas in the most obscure, quaint, and unusual expressions."—*Encyclopædia Britannica*: article, "Rosicrucians."

During the age of James the First, Charles the First, even during the Protectorate, and again in the time of Charles the Second, the singular doctrines of the Rosicrucians attracted a large amount of attention, and excited much keen controversy. Sundry replies or "apologies" appeared on the part of the Rosicrucians. Among them was a most able work published in Latin by Dr. Robert Flood, at Leyden, in 1616. It is a small, closely printed, very learned octavo, entitled, *Apologia Compendiaria Fraternitatis de Rosa Cruci*, &c., and abounds in knowledge. It is an exceedingly rare work; but there is a copy in the British Museum. All this long period was marked by considerable speculation regarding these Rosicrucians. Pope's "Rape of the Lock" is founded upon some of their fanciful cabalistic ideas. The *Spectator* contains notices of the mystic society; and, to prove the public curiosity concerning the Rosicrucians, and a strange incident, the particulars of which we are going to supply from the best sources now for the first time, we may state that there is included, in one number of Addison's elegant series of papers called the *Spectator*, a
resumption of a notice, and some after-comment, upon the supposed discovery of the burial-place in England of one of these mighty men, the Rosicrucians. The story is to the following purport, as nearly as it can be gathered. We have written much more fully of it from other sources; for the Spectator’s account is very full of errors, and was evidently gained afar off, and merely from hearsay, as it were. It is, besides, poor and ineffective, gathered from no authority, and produced with no dramatic force; for the life and the beliefs of the Rosicrucians were very dramatic, at the same time that the latter were very true, although generally disbelieved.
CHAPTER THE SECOND.

SINGULAR ADVENTURE IN STAFFORDSHIRE.

R. PLOT, who was a very well-known and reliable man, and a painstaking antiquary and writer of natural history, in his History of Staffordshire, published by him in the time of Charles the Second, relates the following strange story:

That a countryman was employed, at the close of a certain dull summer’s day, in digging a trench in a field in a valley, round which the country rose into sombre, silent woods, vocal only with the quaint cries of the infrequent magpies. It was some little time after the sun had sunk, and the countryman was just about giving over his labour for the day. Dr. Plot says that, in one or two of the last languid strokes of his pick, the rustic came upon something stony and hard, which struck a spark, clearly visible in the increasing gloom. At this surprise, he resumed his labour, and, curiously enough, found a large, flat stone in the centre of the field. This field was far away from any of the farms or “cotes,” as they were called, with which the now almost twilight country was sparingly dotted. In a short time, he cleared the stone free of the grass and weeds which had grown over it; and it proved to be a large, oblong slab,
with an immense iron ring fixed at one end in a socket. For half an hour the countryman essayed to stir this stone in vain. At last he bethought himself of some yards of rope which he had lying near amongst his tools; and these he converted, being an ingenious, inquisitive, inventive man, into a tackle—by means of which, and by passing the sling round a bent tree in a line with the axis of the stone, he contrived, in the last of the light, and with much expenditure of toil, to raise it. And then, greatly to his surprise, he saw a large, deep, hollow place, buried in darkness, which, when his eyes grew accustomed a little to it, he discovered was the top-story to a stone staircase, seemingly of extraordinary depth, for he saw nothing below. The country-fellow had not the slightest idea of where this could lead to; but being a man, though a rustic and a clown, of courage, and most probably urged by his idea that the staircase led to some secret repository where treasure lay buried, he descended the first few steps cautiously, and tried to peer in vain down into the darkness. This seemed impenetrable; but there was some object at a vast, cold distance below. Looking up to the fresh air, and seeing the star Venus—the evening star—shining suddenly like a planet, in encouraging, unexpected brilliancy, although the sky had still some sunset-light in it, the puzzled man left the upper ground, and descended silently a fair, though a somewhat broken, staircase. Here, at an angle, as near as he could judge, of a hundred feet underground, he came upon a square landing-place, with a niche in the wall; and then he saw a further long staircase, descending at right angles to the first staircase, and still going down into deep, cold darkness. The man cast a glance upward, as if questioning the small segment of light from the upper world which shot down whether he should continue his search, or desist and
return. All was stillest of the still about him; but he saw no reason particularly to fear. So, imagining that he would in some way soon penetrate the mystery, and feeling in the darkness by his hands upon the wall, and by his toes first on each step, he resolutely descended; and he deliberately counted two hundred and twenty steps. He felt no difficulty in his breathing, except a certain sort of aromatic smell of distant incense, that he thought Egyptian, coming up now and then from below, as if from another, though a subterranean, world. "Possibly," thought he,—for he had heard of them,—"the world of the mining gnomes; and I am breaking in upon their secrets, which is forbidden for man." The rustic, though courageous, was superstitious.

But, notwithstanding some fits of fear, the countryman went on, and at a much lower angle he met a wall in his face; but, making a turn to the right, with singular credit to his nerves, the explorer went down again. And now he saw at a vast distance below, at the foot of a deeper staircase of stone, a steady though a pale light. This was shining up as if from a star, or coming from the centre of the earth. Cheered by this light, though absolutely astounded,—nay, frightened,—at thus discovering light, whether natural or artificial, in the deep bowels of the earth, the man again descended, meeting a thin, humid trail of light, as it looked, mounting up the centre line of the shining though mouldering old stairs, which apparently had not been pressed by a human foot for very many ages. He thought now, although it was probably only the wind in some hidden recess, or creeping down some gallery, that he heard a murmur overhead, as if of the uncertain rumble of horses and of heavy wagons, or lumbering wains. Next moment, all subsided into total stillness; but the distant light seemed to flicker, as if in answer to the strange sound. Half a dozen times he
paused, and turned as if he would remount—almost flee for his life upward, as he thought; for this might be the secret haunt of robbers, or the dreadful abode of evil spirits. What if, in a few moments, he should come upon some scene to affright, or alight in the midst of desperate ruffians, or be caught by murderers! He listened eagerly. He now almost bitterly repented his descent. Still the light streamed at a distance, but still there was no sound to interpret the meaning of the light, or to display the character of this mysterious place, in which the countryman found himself entangled hopelessly.

The discoverer by this time stood still with fear. But at last, summoning courage, and recommending himself devoutly to God, he determined to complete his discovery. Above, he had been working in no strange place; the field he well knew, the woods were very familiar to him, and his own hamlet and his family were only a few miles distant. He now hastily, and more in fear than through courage, noisily with his feet descended the remainder of the stairs; and the light grew brighter and brighter as he approached, until at last, at another turn, he came upon a square chamber, built up of large hewn stones. He stopped, silent and awe-struck. Here was a flagged pavement and a somewhat lofty roof, gathering up into a centre; in the groins of which was a rose, carved exquisitely in some dark stone, or in marble. But what was this poor man's fright when, making another sudden turn, from between the jambs, and from under the large archivolt of a Gothic stone portal, light streamed out over him with inexpressible brilliancy, shining over everything, and lighting up the place with brilliant radiance, like an intense golden sunset! He started back. Then his limbs shook and bent under him as he gazed with terror at the figure of a man, whose face was hidden, as he sat in a
studious attitude in a stone chair, reading in a great book, with his elbow resting on a table like a rectangular altar, in the light of a large, ancient iron lamp, suspended by a thick chain to the middle of the roof. A cry of alarm, which he could not suppress, escaped from the scared discoverer, who involuntarily advanced one pace, beside himself with terror. He was now within the illuminated chamber. As his foot fell on the stone, the figure started bolt upright from his seated position, as if in awful astonishment. He erected his hooded head, and showed himself as if in anger about to question the intruder. Doubtful if what he saw were a reality, or whether he was not in some terrific dream, the countryman advanced, without being aware of it, another audacious step. The hooded man now thrust out a long arm, as if in warning; and in a moment the discoverer perceived that his hand was armed with an iron bâton, and that he pointed it as if tremendously to forbid further approach. Now, however, the poor man, not being in a condition either to reason or to restrain himself, with a cry, and in a passion of fear, took a third fatal step; and as his foot descended on the groaning stone, which seemed to give way for a moment under him, the dreadful man, or image, raised his arm high like a machine, and with his truncheon struck a prodigious blow upon the lamp, shattering it into a thousand pieces, and leaving the place in utter darkness.

This was the end of this terrifying adventure. There was total silence now, far and near. Only a long, low roll of thunder, or a noise similar to thunder, seemed to begin from a distance, and then to move with snatchest, as if making turns; and it then rumbled sullenly to sleep, as if through unknown, inaccessible passages. What these were—if any passages—nobody ever found out. It was only suspected
that this hidden place referred in some way to the Rosicrucians, and that the mysterious people of that famous order had there concealed some of their scientific secrets. The place in Staffordshire became afterwards famed as the sepulchre of one of the brotherhood, whom, for want of a more distinct recognition or name, the people chose to call "Rosicrucian," in general reference to his order; and from the circumstance of the lamp, and its sudden extinguishment by the figure that started up, it was supposed that some Rosicrucian had determined to inform posterity that he had penetrated to the secret of the making of the ever-burning lamps of the ancients,—though, at the moment that he displayed his knowledge, he took effectual means that no one should reap any advantage from it.

The Spectator, in No. 379, for Thursday, May 15th, 1712, under the signature of "X," which is understood to be that of Budgell, has the following account of that which is chosen there to be designated "Rosicrucius's Sepulchre:"

"Rosicrucius, say his disciples, made use of this method to show the world that he had reinvented the ever-burning lamps of the ancients, though he was resolved no one should reap any advantage from the discovery."

We have chosen the above story as the introduction to our curious history.

Christian Rosencreutz died in 1484. To account for Rosicrucianism not having been heard of until 1604, it has been asserted that this supposed first founder of Rosicrucianism bound his disciples not to reveal any of his doctrines until a period of one hundred and twenty years after his death.

The ancient Romans are said to have preserved lights in their sepulchres many ages by the oiliness of gold (here steps in the art of the Rosicrucians), resolved by hermetic
methods into a liquid substance; and it is reported that at
the dissolution of monasteries, in the time of Henry the
Eighth, there was a lamp found that had then burnt in a
tomb from about three hundred years after Christ—nearly
twelve hundred years. Two of these subterranean lamps
are to be seen in the Museum of Rarities at Leyden, in
Holland. One of these lamps, in the papacy of Paul the
Third, was found in the tomb of Tullia, Cicero's daughter,
which had been shut up fifteen hundred and fifty years
(Second edition of N. Bailey's Φιλολόγος, 1731).

CHAPTER THE THIRD.

INSUFFICIENCY OF WORLDLY OBJECTS.

T is a constant and very plausible charge offered by the general world against the possession of the power of gold-making as claimed by the alchemists, who were a practical branch of the Rosicrucians, that if such supposed power were in their hands, they would infallibly use it, and that quickly enough; for the acquisition of riches and power, say they, is the desire of all men. But this idea proceeds upon an ignorance of the character and inclinations of real philosophers, and results from an inveterate prejudice relative to them. Before we judge of these, let us acquire a knowledge of the natural inclinations of very deeply learned men. Philosophers, when they have attained to much knowledge, hold that the ordering of men, the following of them about by subservient people, and the continual glitter about them of the fine things of this world, are, after all, but of mean and melancholy account, because life is so brief, and this accidental preeminence is very transitory. Splendour, show, and bowing little delight the raised and abstract mind. That circuit formed by the owning of money and riches is circumscribed by the possessor's own ken. What is outside of this sight may just as well be enjoyed by another person as by the owner, since all is the thinking; only granting that a man has sufficient for
his daily wants, letting the "morrow, indeed, take thought for itself." One dinner a day, one bed for one night, in the alternations of sun and darkness, one of every thing that is agreeable to (or is desirable for) man, is sufficient for any one man. A man's troubles are increased by the multiplication even of his enjoyments, because he is then beset with anxiety as to their repetition or maintenance. Reduction, and not multiplication, is his policy, because thinking of it is all that can affect him about any thing in this world.

By the time that the deep, philosophical chemist has penetrated to the control and conversion of the ultimate elements, so as to have in his view the secret operations of Nature, and to have caught Nature, as it were, preparing her presentments behind the scenes, he is no more to be amused with vain book-physics. After his spying into the subtle processes of Nature, he cannot be contented with the ordinary toys of men; for are not worldly possessions, honour, rank, money, even wives and numerous or any children, but toys in a certain sense? Where sink they when the great unknown sets in which awaits every man? He who can work as Nature works—causing the sunshine, so to speak, to light fire up independently in itself, and to breed and propagate precious things upon the atmosphere in which it burns—causing the growing supernatural soul to work amidst the seeds of gold, and to purge the material, devilish mass until the excrement is expelled, and it springs in health into condensating, solid splendour, a produce again to be sown, to fructify into fresh harvests—the alchemist, or prince of chemists, who can do this, laughs at the hoards of kings. By the time that the artist is thus so much more than the usual man, is he the less desirous of the gratifying things to the ordinary man. Grandeur fades to him before such high
QUESTIONS AS TO UTILITIES.

intellectual grandeur. He is nearer to the angels, and the world has sunk below. His is the sky, and the bright shapes of the clouds of the sky; which he is going to convert, perhaps, into prisms, showering solid jewels. He can well leave to common man his acres of mud, and the turbid pools spotted over them like the shining, showy discs of a snake. Man, under these enlightened philosophical circumstances, will only value the unseen kingdoms—glimpses of the immortal glories of which he has obtained in his magic reveries. What can the longest ordinary man's life give to such a gifted thinker? Man's senses and their gratification, as long as the inlets and avenues of perception remain—world's music, so long as the strings cling tight, for the air of imagination to play upon them—appetites with downward eyes to find them—man's mortality, with an exit into the shadows while the sun is up: the longest life can but give him repetition to satiety of these things,—repetitions until he seems almost to tire of the common sun.

To some minds, this world does not present such extraordinary attractions. The very possession of the heights of knowledge induces rather stay up there, amidst the stars, than descent. Every man almost has felt the exaltation of a great height, when he has achieved the top of a high hill, and looks out and over for miles and miles. How very little the world looks under him! He is obliged to descend, because he has his home under there. But he quits the upper regions with reluctance, although it is somewhat frightening to stay so high up. You become giddy by looking up at the stars, which then seem to be so much nearer as to be attainable.

Limited as it is, life itself—very brief, very empty, very much disposed to repeat dull things, gathering up from about you in folds like a dream, or flowing on like a sleep—
inducing river to the sea, carrying faces seen and snatched away, and obliterating voices which change into echoes—life, at its very best, ought to be the stoicism of the spectator, who feels that he has come here somehow, though for what purpose he knows not; and he is rather amused as at a comedy in life, than engaged as in a business. Even perpetual youth, and life prolonged, with pleasures infinite,—even the fancied ever-during life,—would, to the deeply thinking who had risen, as it were, over life, and to that strangely gifted being who had in himself the power of self-perpetuation (like the Wandering Jew), seem vain. Man can be conceived as tiring of the sun—tiring of consciousness even. What an expression is that, "forgotten by Death!" The only being through whom the scythe of the great destroyer passes scathless! That life, as a phantom, which is the only conceivable terrible doom of the "Wanderer" (if such a magical being ever existed); whom as a locomotive symbol, to be perpetuated through the ages, the earth, at the command of the Saviour, refused to hide, and of whom a legend—soon hushed in again—now and then rises to the popular whisper!

We only adduce these remarks to show that, in the face of the spectator of the great ultimate, mysterious man, children are no necessity, but an anxiety, estates are a burden, "business" is the oft-told tale to the wearying ear. He who can be the spectator of the ages, has no particulars in ordinary life. He has nothing which can interest him. He can have no precise and consolidated likings, or affections, or admirations, or even aversions, because the world is as a toy-shop to him—its small mechanism is an artificial show, of which (given the knowledge of the wheels) he can predicate as to the movements safely.

To return for a moment to the idea of the "Wandering
THE WANDERING JEW.

Jew," which some have supposed to be derived from the claim of the Rosicrucians to the possession of a secret means of renewing youth, and to the escape of the notion of it from out their writings. Even supposing that this strange tale was true, nothing can be imagined more melancholy than the state of this lone traveller, moving with his awful secret through the world, and seeing generations, like leaves, perishing from about him. He counts the years like the traveller of a long day, to whom the evening will never come, though he sees his temporary companions, at the different hours of the day, depart appropriately to their several homes by the wayside. To him the childhood of his companions seems to turn to old age in an hour. He remembers the far-off ancestors of his contemporaries. Fashions fleet, but your unsuspected youth is accommodated to all. Yours is, indeed, the persecution of the day-life, which will not let you fall to sleep. Your friends of any period disappear. The assurance of the vanity of all things is the stone as into which your heart is turned. Gray hairs (and the old face) have nothing with you, though you see them appearing upon all others. Familiar objects disappear from about you, and you and the sun seem the only things that survive as old friends. Indeed, it may be doubtful whether, to this supposed man of the ages, the generations would not seem to be produced out of the ground by the sun, like flowers or plants; so as mere matter of mould would all flesh appear, with a phenomenon going with it in the article of the figure's uprightness as man; it having so strangely set its face against the stars, unlike the creatures doomed to move horizontally.

We make these observations to show that, notwithstanding the opinions of the world to the contrary, there may have been men who have possessed these gifts,—that is, the
power of making gold and of perpetuating their lives,—and yet that the exercise of these powers was forborne; and also that their secrets of production have most carefully been kept, lest less wise men should (to speak in figure) have "rushed in where they feared to tread," and have abused where the philosophers even would not use— despising wealth, which they could not enjoy, and declining a perpetuated life, which would only add to their weariness,—life being only a repetition of the same suns, already found too long. For it is a mistake to suppose that this life is so equally enjoyable by all. There is a sublime sorrow of the ages, as of the lone ocean.

The philosophers knew that possession blunted desire, and that rich men may be poor men. A remarkable answer was made by a man who, to all appearance, possessed superabundantly the advantages of life—wealth, honour, wife, children, "troops of friends," even health, by day; but in his night he lived another life, for in it was presented another picture, and that unfailingly uncomfortable, even to this good man—exchanging joy for horror. "My friend," replied he to an inquirer, "never congratulate a man upon his happiness until you become aware how he sleeps. Dreams are as that baleful country into which I pass every night of my life; and what can be said to a man who dreams constantly that he is with the devil?"

There was no answering this, for every person leads two lives, altogether independent of each other,—the days and the nights both full of life, though the night, with the dreams, may be of an opposite order. The world's circumstances may afford you solace and gratification—even happiness—in the day; but you may be very miserable, notwithstanding, if it happen that you have persecution in your dreams. Here the world's advantages are of no use to
DREAMS.

you, for you are delivered over helpless, night after night, in your sleep—and you must have sleep—to the dominion of other powers, whom all your guards cannot keep out, for their inlet is quite of another kind than the ordinary life's access. We advise you, then, to beware of this dark door; the other will perhaps take care of itself, letting in no ugly things upon you: but the former may.

Colossal Head. (British Museum.)
CHAPTER THE FOURTH.

THE HERMETIC PHILOSOPHERS.

There was among the sages a writer, Artheophius, whose productions are very famous among the Hermetic Philosophers,—insomuch that the noble Olaus Borrichius, an excellent writer and a most candid critic, recommends these books to the attentive perusal of those who would acquire knowledge of this sublime philosophy. He is said to have invented a cabalistic magnet which possessed the extraordinary property of secretly attracting the aura, or mysterious spirit of human efflorescence, out of young men; and these benign and healthful springs of life he gathered up, and applied by his art to himself,—by inspiration, transudation, or otherwise,—so that he concentrated in his own body, waning in age, the accumulated rejuvenescence of many young people: the individual owners of which new, fresh life suffered in proportion to the extent in which he preyed vitally upon them, and some of them were exhausted by this enchanter, and died. This was because their fresh young vitality had been unconsciously drawn out of them in his baneful, devouring society, which was unsuspected because it was delightful. Now, this seems absurd; but it is not so absurd as we suppose.

Sacred history affords some authority to this kind of
opinion. We all are acquainted with the history of King David, to whom, when he grew old and stricken in years, Abishag, the Shunamite, was brought—a damsel described as "very fair;" and we are told that she "lay in his bosom," and that thereby he "gat heat,"—which means vital heat,—but that the king "knew her not." This latter clause in 1 Kings i. 4, all the larger critics, including those who speak in the commentaries of Munster, Grotius, Vossius, and others, interpret in the same way. The seraglios of the Mohammedans have more of this less lustful, than is commonly supposed. The ancient physicians appear to have been thoroughly acquainted with the advantages of the companionship, without indulgence, of the young to the old in the renewal of their vital powers.

The elixir of life was also prepared by other and less criminal means than those singular ones hinted above. It was produced out of the secret chemical laboratories of Nature by some adepts. The famous chemist, Robert Boyle, mentions a preparation in his works, of which Dr. Le Fevre gave him an account in the presence of a famous physician and of another learned man. An intimate friend of the physician, as Boyle relates, had given, out of curiosity, a small quantity of this medicated wine to an old female domestic; and this, being agreeable to the taste, had been partaken of for ten or twelve days by the woman, who was near seventy years of age, but whom the doctor did not inform what the liquor was, nor what he was expecting that it might effect. A great change did occur with this old woman; for she acquired much greater activity, a sort of bloom came to her countenance, her face was becoming much more agreeable; and beyond this, as a still more decided step backward to her youthful period, certain purgationes came upon her again with sufficiently severe in-
indications to frighten her very much: so that the doctor, greatly surprised at his success, was compelled to forego his further experiments, and to suppress all mention of this miraculous new cordial, for fear of alarming people with novelties,—in regard to which they are very tenacious, having prejudices.

But, with respect to centenarians, some persons have been mentioned as having survived for hundreds of years, moving as occasion demanded from country to country; when the time arrived that in the natural course of things they should die, or be expected to die, merely changing their names, and reappearing in another place as new persons,—they having long survived all who knew them, and thus being safe from the risk of discovery. The Rosicrucians always most jealously guarded these secrets, speaking in enigmas and parables for the most part; and they adopted as their motto the advice of one of their number, one of the Gnostics of the early Christian period: "Learn to know all, but keep thyself unknown." Further, it is not generally known that the true Rosicrucians bound themselves to obligations of poverty and chastity in the world, with certain dispensations and remissions that fully answered their purpose; for they were not necessarily solitary people: on the contrary, they were frequently gregarious, and mixed freely with all classes.

Their notions of poverty, or comparative poverty, were different from those that usually prevail. They felt that neither monarchs, nor the wealth of monarchs, could aggran-
dise those who already esteemed themselves the superiors of all children of men; and therefore, though declining riches, they were voluntary in the renunciation of them. They held to chastity, because, entertaining some peculiar notions about the real position in creation of the female sex, the
Enlightened or Illuminated Brothers held the monastic or celibate state to be greatly that more consonant with the intentions of Providence, since in every thing possible to man's frail nature they sought to trample on the pollutions of this his state in flesh. They trusted the great lines of Nature, not in the whole, but in part, as they believed Nature was in certain senses a betrayer, and that she was not wholly the benevolent power to endow, as accorded with the prevailing notion. We wish not to discuss more amply than this the extremely refined and abstruse protesting views of these fantastic religionists, who ignored Nature. We have drawn to ourselves a certain frontier of reticence, up to which we may freely comment; and the limit is quite extended enough for the present popular purpose,—though we absolutely refuse to overpass it with too distinct explanation, or to enlarge further on the strange persuasions of the Rosicrucians.

There is related, upon excellent authority, to have happened an extraordinary incident at Venice, that made a very great stir among the talkers in that ancient place, and which we will here supply at length, as due to so mysterious and amusing an episode. Every one who has visited Venice in these days, and still more those of the old-fashioned time who have put their experience of it on record, are aware that freedom and ease among persons who make a good appearance prevail there to an extent that, in this reserved and diffident country, is difficult to realise. This doubt of respectability until conviction disarms has a certain constrained and unamiable effect on our English manners, though it occasionally secures us from imposition, at the expense perhaps of our accessibility. A stranger who arrived in Venice one summer, towards the end of the seventeenth century, and who took up his
residence in one of the best sections of the town, by the considerable figure which he made, and through his own manners, which were polished, composed, and elegant, was admitted into the best company,—this though he came with no introductions, nor did any body exactly know who or what he was. His figure was exceedingly well proportioned, his face oval and long, his forehead ample and pale, and the intellectual faculties were surprisingly brought out, and in distinguished prominence. His hair was long, dark, and flowing; his smile inexpressibly fascinating, yet sad; and the deep light of his eyes seemed laden, to the attention sometimes of those noting him, with the sentiments and the experience of the historic periods. But his conversation, when he chose to converse, and his attainments and knowledge, were marvellous; though he seemed always striving to keep himself back, and to avoid saying too much, yet not with an ostentatious reticence. He went by the name of Signor Gualdi, and was looked upon as a plain private gentleman, of moderate independent estate. He was an interesting character, in short.

This gentleman remained at Venice for some months; and was known by the name of the "Sober Signior" among the common people, on account of the regularity of his life, the composed simplicity of his manners, and the quietness of his costume; for he always wore dark clothes, and these of a plain, unpretending style. Three things were remarked of him during his stay at Venice. The first was, that he had a small collection of fine pictures, which he readily showed to every body that desired it; the next, that he was perfectly versed in all arts and sciences, and spoke always with such minute particularity as astonished—nay, silenced—all who heard him, because he seemed to have been present at the things which he related, making
the most unexpected corrections in small facts sometimes. And it was, in the third place, observed that he never wrote or received any letter, never desired any credit, but always paid for every thing in ready money, and made no use of bankers, bills of exchange, or letters of credit. However, he always seemed to have enough, and he lived respectfully, though with no attempt at splendour or show.

Signor Gualdi met, shortly after his arrival at Venice, one day, at the coffee-house which he was in the habit of frequenting, a Venetian nobleman of sociable manners, who was very fond of art; and this pair used to engage in sundry discussions; and they had many conversations concerning the various objects and pursuits which were interesting to both of them. Acquaintance ripened into friendly esteem; and the nobleman invited Signor Gualdi to his private house, whereat—for he was a widower—Signor Gualdi first met the nobleman’s daughter, a very beautiful young maiden of eighteen, of much intelligence, and of great accomplishments. The nobleman’s daughter was just introduced at her father’s house from a convent, or pension, where she had been educated by the nuns. This young lady, in short, from constantly being in his society, and listening to his narratives, gradually fell in love with the mysterious stranger, much for the reasons of Desdemona; though Signor Gualdi was no swarthy Moor, but only a well-educated gentleman—a thinker rather than a doer. At times, indeed, his countenance seemed to grow splendid in expression; and he boasted certainly wondrous discourse; and a strange and weird fascination would grow up about him, as it were, when he became more than usually pleased and animated. Altogether, when you were set thinking about him, he seemed a puzzling person, and of rare gifts; though when mixing with the crowd you would scarcely distinguish
him from the crowd; nor would you observe him, unless there was something akin to him in you excited by his talk.

And now for a few remarks on the imputed character of these Rosicrucians. And in regard to them, however their existence is disbelieved, the matters of fact we meet with, sprinkled—but very sparingly—in the history of these hermetic people, are so astonishing, and at the same time are preferred with such confidence, that if we disbelieve,—which it is impossible to avoid, and that from the preposterous nature of their pretensions,—we cannot escape the conviction that, if there is not foundation for it, their impudence is most audacious. They speak of all mankind as infinitely beneath them; their pride is beyond idea, although they are most humble in exterior. They glory in poverty, and declare that it is the state ordered for them: and this though they boast universal riches. They decline all human affections, or submit to them as advisable escapes only—appearances of loving obligations, which are assumed for convenient acceptance, or for passing in a world which is composed of them, or of their supposal. They mingle most gracefully in the society of women, with hearts wholly incapable of softness in this direction; and they criticise them in their own minds as altogether another order of beings from men. They are most simple and deferential in their exterior; and yet the self-value which fills their hearts ceases its self-glorying expansion only with the boundless skies. Up to a certain point, they are the sincerest people in the world; but rock is soft to their impenetrability afterwards. In comparison with the hermetic adepts, monarchs are poor, and their greatest accumulations are contemptible. By the side of the sages, the most learned are mere dolts and blockheads. They make no movement towards fame, because they abnegate and disdain it. If
they become famous, it is in spite of themselves: they seek no honours, because there can be no gratification in honours to such people. Their greatest wish is to steal unnoticed through the world, and to amuse themselves with the world because they are in it, and because they find it about them. Thus, towards mankind they are negative; towards every thing else, positive; self-contained, self-illuminated, self-every thing; but always prepared to do good, wherever possible or safe.

To this immeasurable exaltation, what standard of measure, or what appreciation, can you apply? Ordinary estimates fail in the idea of it. Either the state of these occult philosophers is the height of sublimity, or it is the height of absurdity. Not being competent to understand them or their claims, the world insists that these are futile. The result entirely depends upon there being fact or fancy in the ideas of the hermetic philosophers. The puzzling part of the investigation is, that the treatises of these profound writers abound in the most acute discourse upon difficult subjects, and contain splendid passages upon all subjects,—upon the nature of metals, upon medical science, upon the unsupposed properties of simples, upon theological and ontological speculations, and upon science and objects of thought, generally,—upon all these matters they enlarge to the reader splendidly.

The Mythical "Tor" of Babel.
CHAPTER THE FIFTH.

AN HISTORICAL ADVENTURE.

BUT to return to Signor Gualdi, from whom we have notwithstanding made no impertinent digression, since he was eventually suspected to be one of the strange people of whom we are treating. This was from mysterious circumstances which occurred afterwards in relation to him, and which are in print.

The Venetian nobleman was now on a footing of sufficient intimacy with Signor Gualdi to say to him one evening, at his own house, that he understood that he had a fine collection of pictures, and that, if agreeable, he would pay him a visit one day for the purpose of viewing them. The nobleman’s daughter, who was present, and who was pensively looking down upon the table thinking deeply of something that the Signior had just said, raised her eyes eagerly at this expression of wish by her father, and, as accorded with her feelings, she appeared, though she spoke not, to be desirous to make one of the party to see the pictures. It was natural that she should secretly rejoice at this opportunity of becoming more intimately acquainted with the domestic life of one whom she had grown to regard with feelings of powerful interest. She felt that the mere fact of being his guest, and under the roof which was his, would seem
to bring her nearer to him; and, as common with lovers, it seemed that their being thus together would, in feeling at least, appear to identify both. Signor Gualdi was very polite, and readily invited the nobleman to his house, and also extended the invitation to the young lady, should she feel disposed to accompany her father, since he divined from the expression of her face that she was wishful to that effect. The day for the visit was then named, and the Signior took his departure with the expressions of friendship on all sides which usually ended their meetings.

It followed from this arrangement, that on the day appointed the father and daughter went to Signor Gualdi's house. They were received by the Signior with warm kindness, and were shown over his rooms with every mark of friendliness and distinction. The nobleman viewed Signor Gualdi's pictures with great attention; and when he had completed his tour, he expressed his satisfaction by telling the Signior that he had never seen a finer collection, considering the number of pieces. They were now in Signor Gualdi's own chamber,—the last of his set of rooms,—and they were just on the point of turning to go out, and Gualdi was removing the tapestry from before the door to widen the egress, when the nobleman, who had paused to allow him thus to clear the way, by chance cast his eyes upwards over the door, where there hung a picture evidently of the stranger himself. The Venetian looked upon it with doubt, and after a while his face fell; but it soon cleared, as if with relief. The gaze of the daughter was also now riveted upon the picture, which was very like Gualdi; but she regarded it with a blush. The Venetian looked from the picture to Gualdi, and back again from Gualdi to the picture. It was some time before he spoke.

"That picture was intended for you, sir," said he at
last, hesitating, to Signor Gualdi. A slight cold change passed over the eyes of the stranger; but he only made reply by a low bow. "You look a moderately young man,—to be candid with you, sir, I should say about forty-five, or thereabouts; and yet I know, by certain means of which I will not now further speak, that this picture is by the hand of Titian, who has been dead nearly a couple of hundred years. How is this possible?" he added, with a polite, grave smile. "It is not easy," said Signor Gualdi quietly, "to know all things that are possible, for very frequently mistakes are made concerning such; but there is certainly nothing strange in my being like a picture painted by Titian." The nobleman easily perceived by his manner, and by a momentary cloud upon his brow, that the stranger felt offence. The daughter clung to her father's arm, secretly afraid that this little unexpected demur might pass into coolness, and end with a consummation of estrangement, which she feared excessively; she dreaded the rupture of their intimacy with the stranger; and, contradictory as it may seem, she wanted to withdraw, even without the point she dreaded being cleared up into renewed pleasant confidence. However, this little temporary misunderstanding was soon put an end to by Signor Gualdi himself, who in a moment or two resumed his ordinary manner; and he saw the father and daughter down-stairs, and forth to the entrance of his house, with his usual composed politeness,—though the nobleman could not help some feeling of restraint, and his daughter experienced a considerable amount of mortification; and she could not look at Signor Gualdi,—or rather, when she did, she looked too much.

This little occurrence remained in the mind of the nobleman. His daughter felt lonely and dissatisfied afterwards, eager for the restoration of the same friendly feeling
with Signor Gualdi, and revolving in her mind numberless schemes to achieve it. The Venetian betook himself in the evening to the usual coffee-house; and he could not forbear speaking of the incident among the group of people collected there. Their curiosity was roused, and one or two resolved to satisfy themselves by looking at the picture attentively the next morning. But to obtain an opportunity to see the picture on this next morning, it was necessary to see the Signor Gualdi somewhere, and to have his invitation to his lodgings for the purpose. The only likely place to meet with him was at the coffee-house; and thither the gentlemen went at the usual time, hoping, as it was the Signor's habit to present himself, that he would do so. But he did not come,—nor had he been heard of from the time of the visit of the nobleman the day before to the Signor's house,—which absence, for the first time almost that he had been in Venice, surprised everybody. But as they did not meet with him at the coffee-house,—as they thought was sure,—one of the persons who had the oftenest conversed with the Signor, and therefore was the freer in his acquaintance, undertook to go to his lodgings and inquire after him, which he did; but he was answered by the owner of the house, who came to the street-door to respond to the questioner, that the Signor had gone, having quittd Venice that morning early, and that he had locked up his pictures with certain orders, and had taken the key of his rooms with him.

This affair made a great noise at the time in Venice; and an account of it found its way into most of the newspapers of the year in which it occurred. In these newspapers, and elsewhere, an outline of the foregoing particulars may be seen. The account of the Signor Gualdi will also be met with in Les Mémoires historiques for the year 1687,
tome i. p. 365. The chief particulars of our own narrative are extracted from an old book in our collection treating of well-attested relations of the sages, and of life protracted by their art for several centuries: "Hermippus Redivivus; or, the Sage's Triumph over Old Age and the Grave. London. Second Edition, much enlarged. Printed for J. Nourse, at the 'Lamb,' against Catherine Street in the Strand, in the year 1749."

And thus much for the history of Signor Gualdi, who was suspected to be a Rosicrucian.

We shall have further interesting notices of these unaccountable people as we proceed.

The Egyptian Eve trampling the Dragon.
The following passages occur in a letter published by some anonymous members of the R.C., and are adduced in a translation from the Latin by one of the most famous men of the order, who addressed from the University of Oxford about the period of Oliver Cromwell; to which university the great English Rosicrucian, Robertus de Fluctibus (Robert Flood), also belonged, in the time of James the First and Charles the First. We have made repeated visits to the church where Robert Flood lies buried.

"Every man naturally desires superiority. Men wish for treasures, and to seem great in the eyes of the world. God, indeed, created all things to the end that man might give Him thanks. But there is no individual thinks of his proper duties; he secretly desires to spend his days idly, and would enjoy riches without any previous labour or danger. When we" (professors of abstruse sciences) "speak, men either revile or contemn, they either envy or laugh. When we discourse of gold, they assume that we would assuredly produce it if we could, because they judge us by themselves; and when we debate of it, and enlarge upon it, they imagine we shall finish by teaching them how to make gold by art, or furnish them with it already made."
And wherefore or why should we teach them the way to these mighty possessions? Shall it be to the end that men may live pompously in the eyes of the world; swagger and make wars; be violent when they are contradicted; turn usurers, gluttons, and drunkards; abandon themselves to lust? Now, all these things deface and defile man, and the holy temple of man's body, and are plainly against the ordinances of God. For this dream of the world, as also the body or vehicle through which it is made manifest, the Lord intended to be pure. And it was not purposed, in the divine arrangement, that men should grow again down to the earth. It is for other purposes that the stars, in their attraction, have raised man on his feet, instead of abandoning him to the 'all-fours' that were the imperfect tentatives of nature until life, through the supernatural impulse, rose above its original condemned level—base and relegate.

"We of the secret knowledge do wrap ourselves in mystery, to avoid the objurgation and importunity of those who conceive that we cannot be philosophers unless we put our knowledge to some worldly use. There is scarcely one who thinks about us who does not believe that our society has no existence; because, as he truly declares, he never met any of us. And he concludes that there is no such brotherhood because, in his vanity, we seek not him to be our fellow. We do not come, as he assuredly expects, to that conspicuous stage upon which, like himself, as he desires the gaze of the vulgar, every fool may enter: winning wonder, if the man's appetite be that empty way; and, when he has obtained it, crying out, 'Lo, this is also vanity!'

Dr. Edmund Dickenson, physician to King Charles the Second, a professed seeker of the hermetic knowledge, produced a book entitled, De Quinta Essentia Philosophorum; which was printed at Oxford in 1686, and a second time in
1705. There was a third edition of it printed in Germany in 1721. In correspondence with a French adept, the latter explains the reasons why the Brothers of the Rosy Cross concealed themselves. As to the universal medicine, *Elixir Vitae*, or potable form of the preternatural *menstruum*, he positively asserts that it is in the hands of the "Illuminated," but that, by the time they discover it, they have ceased to desire its uses, being far above them; and as to life for centuries, being wishful for other things, they decline availing themselves of it. He adds, that the adepts are obliged to conceal themselves for the sake of safety, because they would be abandoned in the consolations of the intercourse of this world (if they were not, indeed, exposed to worse risks), supposing that their gifts were proven to the conviction of the bystanders as more than human; when they would become simply abhorrent. Thus, there are excellent reasons for their conduct; they proceed with the utmost caution, and instead of making a display of their powers, as vain-glory is the least distinguishing characteristic of these great men, they studiously evade the idea that they have any extraordinary or separate knowledge. They live simply as mere spectators in the world, and they desire to make no disciples, converts, nor confidants. They submit to the obligations of life, and to relationships—enjoying the fellowship of none, admiring none, following none, but themselves. They obey all codes, are excellent citizens, and only preserve silence in regard to their own private beliefs, giving the world the benefit of their acquirements up to a certain point; seeking only sympathy at some angles of their multiform character, but shutting out curiosity where they do not wish its imperative eyes.

This is the reason that the Rosicrucians passed through the world mostly unnoticed, and that people generally disbelieve that there were such persons; or believe that, if there
were, their pretensions are an imposition. It is easy to discredit things which we do not understand—in fact, nature compels us to reject all propositions which do not consist with our reason. The true artist is supposed to avoid all suspicion, even on the part of those nearest to him. And granting the possibility of the renewal of life, and supposing also that it was the desire of the hermetic philosopher, it would not be difficult for him so to order his arrangements as that he should seem to die in one place (to keep up the character of the natural manner of his life), by withdrawing himself, to reappear in another as a new person at the time that seemed most convenient to him for the purpose. For every thing is easy to those with money; nor will the world inquire with too resolute a curiosity, if you have coolness and address, and if you have the art of accounting for things. The man of this order also is solus, and without wife or children to embarrass him in the private disposition of his affairs, or to follow him too closely into his by-corners. Thus it will be seen that philosophers may live in the world, and have all these gifts, and yet be never heard of—or, if heard of, only as they themselves wish or suggest.

As an instance of the unexpected risks which a member of this order may run if he turns his attention to the practical side of his studies, spite of all his precautions, we may cite the accident which happened to a famous Englishman, who disguised himself under the name of Eugenius Philalethes, but whose real name is said to be Thomas Vaughan. He tells us of himself, that going to a goldsmith to sell twelve hundred marks' worth of gold, the man told him, at first sight, that it never came out of the mines, but was the production of art, as it was not of the standard of any known kingdom: which proved so sudden a dilemma to the offerer of the gold, that he withdrew immediately, leaving it behind.
Thomas Vaughan.

him. It naturally follows from this, that it is not only necessary to have gold, but that the gold shall be marketable, as otherwise it is utterly useless for the purposes of conversion into money in this world. Thomas Vaughan, who was a scholar of Oxford, and was vehemently attacked in his lifetime, and who certainly was a Rosicrucian adept if there ever was one, led a wandering life, and fell often into great dangers from the mere suspicion that he possessed extraordinary secrets. He was born, as we learn from his writings, about the year 1612, which makes him a contemporary of the great English Rosicrucian, Robert Flood; and what is the strangest part of his history, as we find remarked by a writer in 1749, is, that he is "believed by those of his fraternity"—so the author adds—"to be living even now; and a person of great credit at Nuremberg, in Germany, affirms that he conversed with him but a year or two ago. Nay, it is further asserted," continues the author, "that this very individual is the president of the Illuminated in Europe, and that he sits as such in all their annual meetings." Thomas Vaughan, according to the report of the philosopher Robert Boyle, and of others who knew him, was a man of remarkable piety, and of unstained morals. He has written and edited several invaluable works upon the secrets of the philosophers, some of which are in our possession; among others: Introitus apertus ad occlusion Regis Palatium; Lumen de Lumine; Magia Adamica; Anima Magica Abscondita, and other learned books; advancing very peculiar theories concerning the seen and the unseen. These books were disbelieved at the time, and remain discredited, principally because they treat of eccentric and seemingly impossible things. It is, however, certain that we go but a very little way out of the usual track before we encounter puzzling matters, which may well set us in-
vestigating our knowledge, and looking with some sus-
picion upon its grounds, spite of all the pompous claims
of modern philosophers, who are continually, on account
of their conceitedness, making sad mistakes.

“Progress and enlightenment are prerogatives to which
no generation in particular can lay a special claim,” says a
modern writer, speaking of railways and their invention.
“Intelligence like that of the Stephensons is born again
and again, at lengthened intervals; and it is only these
giants in wisdom who know how to carry on to perfection
the knowledge which centuries have been piling up before
them. But the age in which such men are cast is often un-
equal to appreciate the genius which seeks to elevate its
aspiration. Thus it was in 1820 that Mr. William Brougham
proposed to consign George Stephenson to Bedlam, for being
the greatest benefactor of his time. But now that we have
adopted somewhat fully his rejected ideas of steam-locomotion
and high rates of speed, which were with so much difficulty
forced upon us, we complacently call ourselves ‘enlightened;’
and doubtless we are tolerably safe in doing so, considering
that the Stephensons, and similar scientific visionaries, no
longer live to contradict us.” We might add, that the
Rosicrucians hold their critics in light esteem.

If such is the disbelief of science of every-day use, what
chance of credit has the abstruser knowledge, and those
assertions of power which contradict our most ordinary ideas
of possibility? Common sense will answer, none at all.
And yet all human conclusions and resolutions upon points
which have been considered beyond the possibility of con-
tradiction have been sometimes at fault. The most politic
course is not too vigorously to take our stand upon any
thing, but simply to say that our knowledge is limited,
that absolute truth is alone in the knowledge of God, and
that no more truth is vouchsafed to man than he knows how to use: most of his uses, even of his little quantum of truth, being perverted. He must await other states for greater light, and to become a higher creature—should that be his happy destiny. As to certainty in this world, there is none—nor can there be any. Whether there is any thing outside of man is uncertain. Hume has pointed out that there is no sequence between one and two. Other philosophers have ingeniously detected that our senses are all one, or all none. Man is the picture painted upon external matter, and external matter is the individuality that surveys the picture. In the world of physics, colours are tones in other senses, and tones are colours; sevenfold in either case, as the planetary influences are septenary—which, in the ideas of the Rosicrucians, produce both.
CHAPTER THE SEVENTH.

MYTHIC HISTORY OF THE FLEUR-DE-LIS.

The maypole is a *phallos*. The ribbons depending from the *discus*, or ring, through which the maypole pierces, should be of the seven prismatic colours—those of the rainbow (or *Règne-beau*). According to the *Gnostics and their Remains, Ancient and Modern*, a work by the Rev. C. W. King, M.A., published in 1864, Horapollo has preserved a talisman, or Gnostic gem, in yellow jasper, which presents the engraved figure of a “Cynocephalus, crowned, with *béton* erect, adoring the first appearance of the new moon.”

The phallic worship prevailed, at one time, all over India. It constitutes, as Mr. Sellon asserts, to this day one of the chief, if not the leading, dogmas of the Hindoo religion. Though it has degenerated into gross and sensual superstition, it was originally intended as the worship of the creative principle in Nature. Innumerable curious particulars lie scattered up and down, in all countries of the world, relating to this worship, mad as it seems—bad as, in its grossness, it is. It is only in modern times that sensuality, and not sublimity, has been actively associated with this worship, however. There was a time when the rites connected with it were grand and solemn enough. The general diffusion of these notions regarding the *Phalli* and the *Ioni*, and
of the sacred mystic suggestions implied in both, as well as the inflections in design of these unlikely, repulsive figures for serious worship, prove that there was something very extraordinary, and quite beyond belief, in the origin of them. The religion of the Phallos (and of its twin emblem) is to be traced all over the East. It appears to be the earliest worship practised by man. It prevailed not only amongst the Hindoos, Assyrians, Babylonians, Mexicans, Etruscans, Greeks, and Romans, in ancient times, but it still forms an integral part of the worship of India, Thibet, China, Siam, Japan, and Africa. We cannot, therefore, afford to ignore this, when we discover it to be a religion so widely spread, and reappearing so unexpectedly, not only in the countries with which we are contemporaneously acquainted, but also in those old countries of which we in reality know very little, or nothing at all; for all history reads doubtfully.

In the Temple-Herren of Nicolai, there is an account of a Gnostic gem, or talisman, which represents a “Cynocephalus,” with a lunar disc on his head, standing in the act of adoration, with sceptrum displayed, before a column engraved with letters, and supporting a triangle. This latter architectural figure is, in fact, an obelisk. The triangle symbolises one of the Pillars of Hermes (Hercules). The Cynocephalus was sacred to him. The Pillars of Hermes have been Judaised into Solomon’s “Jachin and Boaz.” So says Herz, in regard to “Masonic Insignia.” We will explain something, later in our book, of these interesting sexual images, set up for adoration so strangely.

We now propose to deduce a very original and a very elaborate genealogy, or descent, of the famous arms of France, the Fleurs-de-Lis, “Lucifera,” Lisses, Luces, “Lucies,” Bees, Scarabs, Scarabeos, or Imperial “Bees” of Charlemagne, and of Napoleon the First and Napoleon the
Third, from a very extraordinary and (we will, in the fullest assurance, add) the most unexpected point of view. The real beginning of these inexpressibly sublime arms (or this "badge"), although in itself, and apart from its purpose, it is the most refined, but mysteriously grand, in the world, contradictory as it may seem, is also the most ignoble. It has been the crux of the antiquaries and of the heralds for centuries! We would rather be excused the mentioning of the peculiar item which has thus been held up to the highest honour (heraldically) throughout the world. It will be sufficient to say that mystically, in its theological, Gnostic allusion, it is the grandest device that armory ever saw; and those who are qualified to apprehend our hidden meaning will read correctly and perceive our end by the time that they have terminated this strange section of our history of Rosicrucianism—for to it it refers particularly.

Scarabei, Lucifera ("Light-bringers"), Luce, Fleur-de-Lis, Lily, Lucia, Lucy, Lux, Lu(+)/x.

The Luce is the old-fashioned name for the "pike" or jack—a fish famous for the profuse generation of a certain insect, as some fishermen know full well. This once (incredible as it may seem) formed an object of worship, for the sake of the inexpressibly sublime things which it symbolised. Although so mean in itself, and although so far off, this implied the beginning of all sublunary things.

The bees of Charlemagne, the bees of the Empire in France, are "scarabs," or figures of the same affinity as the Bourbon "lilies." They deduce from a common ancestor. Now, the colour heraldic on which they are always blazoned is azure, or blue—which is the colour of the sea, which is salt. In an anagram it may be expressed as "C." Following on this allusion, we may say that "Ventre-saint-gris!" is a very ancient French barbarous expletive, or oath.
Literally (which, in the occult sense, is always obscurely), it is the “Sacred blue (or gray) womb,”—which is absurd. Now, the reference and the meaning of this we will confidently commit to the penetration of those among our readers who can surmise it; and also the apparently circuitous deductions, which are yet to come, to be made by us.

Blue is the colour of the “Virgin Maria.” Maria, Mary, mare, mar, mara, means the “bitterness,” or the “saltiness,” of the sea. Blue is expressive of the Hellenic, Isidian, Ionian, Yonian (Yoni-Indian) Watery, Female, and Moon-like Principle in the universal theogony. It runs through all the mythologies.

The “Lady-Bird,” or “Lady-Cow” (there is no resemblance between a bird and a cow, it may be remarked en passant, except in this strangely occult, almost ridiculous, affinity), and the rustic rhyme among the children concerning it, may be here remembered:

“Lady-Bird, Lady-Bird, fly away home!
Your House is on fire—your children at home!”

Such may be heard in all parts of England when a lady-bird is seen by the children. Myths are inextricably embodied—like specks and straws and flies in amber—amidst the sayings and rhymes of the common people in all countries; and they are there preserved for very many generations, re-appearing to recognition after the lapse sometimes of centuries. Now, how do we explain and re-render the above rude couplet? The “Lady-Bird” is the “Virgin Maria,” Isis, the “Mother and Producer of Nature;” the “House” is the “Ecliptic”—it is figuratively “on fire,” or “of fire,” in the path of the sun; and the “children at home” are the “months” produced in the house of the sun, or the solar year, or the “signs of the zodiac”—which were originally “ten,” and not “twelve,” each sign answering to one of the
letters of the primeval alphabet, which were in number "ten."
Thus, re-read, the lines run:

"Lady-Bird, Lady-Bird" (Columba, or Dove), "fly away home!
Your House is of Fire—your Children are Ten!"

The name of the flying insect called in England "Lady-
Bird" is Bête-à-Dieu in French, which means "God-creature," or "God's creature." The Napoleonic green is the mythic,
magic green of Venus. The Emerald is the Smaragdus, or
Smaragd. The name of the insect Barnabee, Barnbee,
"Burning Fire-Fly," whose house is of fire, whose children
are ten, is Red Chafer, Rother-Kaefer, Sonnen-Kaefer, Unser-
Frauen Kohlein, in German; it is "Sun-Chafer," "Our Lady's
Little Cow," Isis, or Io, or C—ow, in English. The children
Tenne (Tin, or Tien, is fire in some languages) are the earliest
"Ten Signs" in the Zodiacal Heavens—each "Sign" with its
Ten Decans, or Decumens, or "Leaders of Hosts." They
are also astronomically called "Stalls," or "Stables." We
may here refer to Porphyry, Horapollo, and Chifflet's Gnostic
Gems. The Speckled Beetle was flung into hot water to
avert storms (Pliny, Nat. Hist. lib. xxxvii. ch. x.). The
antiquary Pignorius has a beetle "crowned with the sun
and encircled with the serpent." Amongst the Gnostic
illustrations published by Abraham Gorlæus is that of a
talisman of the more abstruse Gnostics—an onyx carved
with a "beetle which threatens to gnaw at a thunderbolt."
See Notes and Queries: "Bee Mythology."

The "Lilies" are said not to have appeared in the French
arms until the time of Philip Augustus. See Montfauçon's
Monumens de la Monarchie française, Paris, 1729. Also
Jean-Jacques Chifflet, Anastasis de Childeric, 1655. See
also Notes and Queries, 1856, London, 2d Series, for some
learned papers on the "Fleur-de-lis." In the early armorial
bearsings of the Frankish kings, the "lilies" are represented as "insects," seméed (seeded), or spotted, on the blue field. These are, in their origin, the\textit{scarabæi} of the Orientals; they were dignified by the Egyptians as the emblems of the "Enlightened." If the reader examines carefully the sculpture in the British Museum representing the Mithraic Sacrifice of the Bull, with its mystic accompaniments (No. 14, Grand Central Saloon), he will perceive the \textit{scarabæus}, or crab, playing a peculiar part in the particulars of the grand rite so strangely typified, and also so remotely. The motto placed under the "lilies," which are the arms of France, runs as follows: "Lilia non laborant, neque nent." This is also (as all know) the legend, or motto, accompanying the royal order of knighthood denominated that of the "Saint-Esprit," in France. We are immediately now recalled to those exceedingly obscure, but very significant, words of our Saviour, which have always seemed very erroneously interpreted, on account of their obvious contradictions: "Consider the lilies of the field, how they grow; they toil not, neither do they spin."* Now, in regard to this part of the text, what does the judicious speculator think of the following Rosicrucian gloss, or explanation? \textit{Lilia non laborant} (like bees); \textit{neque nent}, "neither do they spin" (like spiders). Now of the "lisses," as we shall elect to call them. They \textit{toil not} like "bees" (\textit{scarabæi}); neither do they \textit{spin} like "spiders" (\textit{arachnidae}).

\textit{To be wise is to be enlightened.} \textit{Lux} is the Logos by whom all things were made; and the \textit{Logos} is \textit{Rasit}—

* The full quotation is the following: "Consider the lilies of the field, how they grow; they toil not, neither do they spin: and yet I say unto you, That even Solomon" (here steps in some of the lore of the Masonic order) "in all his glory was not arrayed" (or \textit{exalted}, or \textit{dignified}, as it is more correctly rendered out of the original) "like one of these" (St. Matt. vi. 28).
THE ROSICRUCIANS.

R.s.t: ρ.σ.τ = 600; and Lux makes Lucis; then LX, Σε = 666. Again, L = 50, v = 6, ω' s = 300, i = 10, ω' s = 300 = 666.

The Fleur-de-lis is the Lotus (water-rose), the flower sacred to the Lux, or the Sul, or the Sun. The "Auriflamme" (the flame of fire, or fire of gold) was the earliest standard of France. It was afterwards called Oriflamme. It was the sacred flag of France, and its colour was red—the heraldic, or "Rosicrucian," red, signifying gold. The three "Lotuses," or "Lisses," were the coat of arms—emblems of the Trimurti, the three persons of the triple generative power, or of the Sun, or "Lux." יִנְשֵׁ, slē, "Shilo," is probably יִנְשֵׁ, stil = 360, or χ = 600, λ = 50 = 10, γ = 6 = 666. This is Silo, or Selo. "I have no doubt it was the invocation in the Psalms called 'Selah,' יִנְשֵׁ(ם)." Thus asserts the learned and judicious Godfrey Higgins.

"The Holie Church of Rome herself doth compare the incomprehensible generation of the Sonne of God from His Father, together with His birth out of the pure and undefiled Virgine Marie, unto the Bees,—which were in verie deedde a great blasphemie, if the bees were not of so great valour and virtue" (value and dignity).—"Beehive of the Romish Church:" Hone's Ancient Mysteries Described, p. 283.

In the second edition of Nineveh and its Palaces, by Bonomi (London, Ingram, 1853), p. 138, the head-dress of the divinity Ilus is an egg-shaped cap, terminating at the top in a fleur-de-lis; at p. 149, the Dagon of Scripture has the same; at p. 201, fig. 98, the same ornament appears; at p. 202, fig. 99, a bearded figure has the "usual fleur-de-lis." In the same page, the tiaras of two bearded figures are surmounted with fleurs-de-lis. At p. 332, fig. 211, the Assyrian helmet is surmounted with a fleur-de-lis; at p. 334, fig. 217, the head-dress of the figure in the Assyrian
standard has a *fleur-de-lis*; at p. 340, fig. 245, the bronze resembles a *fleur-de-lis*; at p. 350, fig. 254, an Egyptian example of the god Nilus, as on the thrones of Pharaoh-Necho, exhibits the *fleur-de-lis*.

*Vert*, or green, and *azure*, or blue, are the colours on which respectively the golden “bees,” or the silver “lisses,” are emblazoned. The Egyptian *Scarabæi* are frequently cut in stone, generally in *green-coloured* basalt, or *verd-antique*. Some have hieroglyphics on them, which are more rare; others are quite plain. In the tombs of Thebes, Belzoni found *scarabæi with human heads*. There is hardly any symbolical figure which recurs so often in Egyptian sculpture or painting as the *scarabæus*, or beetle, and perhaps scarcely any one which it is so difficult to explain. He is often represented with a ball between his fore-legs, which some take for a symbol of the world, or the sun. He may be an emblem of fertility. The “crab” on the Denderah Zodiac is by some supposed to be a “beetle” (*Egyptian Antiquities*). It is for some of the preceding reasons that one of the mystic names of Lucifer, or the Devil, is the “Lord of Flies,” for which strange appellation all antiquaries, and other learned decipherers, have found it impossible to account.

Of the figure of the Fleur-de-Luce, Fleur-de-Lis, or Flower-de-Luce (*Lus, Luz, Loose*), the following may be remarked. On its sublime, abstract side, it is the symbol of the mighty self-producing, self-begetting Generative Power deified in many myths. We may make a question, in the lower sense, in this regard, of the word “loose,” namely, wanton, and the word “lech,” or “leche,” and “lecher,” &c. Consider also, in the solemn and terrible sense, the name Crom-Lech, or “crown,” or “arched hand,” or “gate,” of death. The Druidical stones were generally called *crom-
lechs when placed in groups of two,* with a coping or capstone over, similarly to the form of the Greek letter \( \pi \) (\( \Pi \), \( \pi \)), which was imitated from that temple of stones which we call a cromlech.

Cromlechs were the altars of the Druids, and were so called from a Hebrew word signifying "to bow." There is a Druidic temple at Toulouse, in France, exhibiting many of these curious Druidical stones. There is a large, flat stone, ten feet long, six feet wide, one foot thick, at St. David's, Pembrokeshire. It is called in Cymric "Léch Lagar, the speaking stone." We may speculate upon the word "Lich, Lych, Lech" in this connection, and the terms "Lich-gate," or "Léch-gate," as also the name of "Lichfield." There is a porch or gateway, mostly at the entrance of old-fashioned churchyards, which is called the "Lyke-Porch," or "Litch-Porch." Lüg, or Lük, is a word in the Danish signifying the same as Lyk in the Dutch, and Leiche in the German. Thus comes the word "Lich-gate." Lich in the Anglo-Saxon means a "dead body." See Notes and Queries, vol. ii. p. 4. The "Lych-gates" were as a sort of triumphal arches (Propylaea) placed before the church, as the outwork called the "Propylæum" was advanced before the Egyptian and the Grecian temples. They are found, in the form of separate arches, before the gates even of Chinese cities, and they are there generally called "triumphal arches."

Propylaea is a name of Hecate, Dis, Chronos, or the \( \Pi \), to which sinister deity the Propylæum (as also, properly, the Lych-gate) is dedicated. Hence its ominous import, Pro, or "before," the "Læum." Every Egyptian temple has its Propylon. The Pyramid also in Nubia has one. We refer to the ground-
plans of the Temples of Denderah, Upper Egypt; the Temple of Luxor, Thebes; the Temple of Edfou, Upper Egypt; the Temple of Carnac (or Karnak), Thebes.

Colonel (afterwards General) Vallancey, in the fourth volume, p. 80, of his General Works, cited in the Celtic Druids, p. 223 (a valuable book by Godfrey Higgins), says: "In Cornwall they call it" (i.e. the rocking-stone) "the Logan-Stone. Borlase, in his History of Cornish Antiquities, declares that he does not understand the meaning of this term Logan, as applied to the Druidical stones. Had Dr. Borlase been acquainted with the Irish MSS.," significantly adds Colonel Vallancey, "he would have found that the Druidical oracular stone called Loghan, which yet retains its name in Cornwall, is the Irish Logh-oun, or stone into which the Druids pretended that the Logh, or divine essence, descended when they consulted it as an oracle."

Sanchoniathon, the Phœnician, says that Ouranus contrived, in Bœtulia, "stones that moved as having life." Stukeley's Abury, p. 97, may be here referred to for further proofs of the mystic origin of these stones, and also the Celtic Druids of Godfrey Higgins, in contradiction to those who would infer that these "poised stones" simply mark burial-places.

The Basilidians were called by the orthodox Docete, or Illusionists. The Deity of the Gnostics was called "Abraxas" in Latin, and "Abrasax" in Greek. Their last state, or condition for rescued sensitive entities, as they termed souls, was the "Pleroma," or "Fulness of Light." This agrees precisely with the doctrines of the Buddhists, or Bhuddists. The regulating, presiding genins was the Pantheus. The Pythagorean record quoted by Porphyry (Vit. Pythag.) states that the "numerals of Pythagorases were hieroglyphical symbols by means whereof he explained ideas concerning the nature of
THE ROSICRUCIANS.

things.” That these symbols were ten in number, the ten original signs of the zodiac, and the ten letters of the primeval alphabet, appears from Aristotle (Met. vii. 7). “Some philosophers hold,” he says, “that ideas and numbers are of the same nature, and amount to ten in all.” See The Gnostics and their Remains, p. 229.

But to return to the arms of France, which are the “Fleurs-de-Lis,” and to the small representative creature (sublime enough, as the farthest-off symbol which they are imagined in their greatness to indicate). A Bible presented to Charles the Second, A.D. 1669, has a miniature of this monarch and his court. His throne is terminated with three flowers of the form of “fleurs-de-lis sans pied.” On his head is a crown “fermée à fleurons d’or, relevez et recourbez d’une manière singulière.” Another miniature in the Book of Prayers shows him on a throne surmounted by a sort of “fleur-de-lis sans pied.” His crown is of “fleurs comme de lis,” and the robe is fastened with a rose, “d’où sortent trois pistils en forme de fleurs-de-lis.” His sceptre terminates in a fleur-de-lis.—Notes and Queries.

Sylvanus Morgan, an old-fashioned herald abounding in suggestive disclosures, has the following: “Sir William Wise having lent to the king, Henry VIII., his signet to seal a letter, who having powdered” (seméed, or spotted) “eremites” (they were emmets—ants) “engray’d in the scale, the king paused and lookit thereat, considering.” We may here query whether the field of the coat of arms of Sir William Wise was not “ermine;” for several of the families of Wise bear this fur, and it is not unlikely that he did so also.

“Why, how now, Wise!” quoth the king. “What!—hast thou lice here?” “An, if it like your majestie,” quoth Sir William, “a louse is a rich coat; for by giving the louse I part arms with the French king, in that he giveth the
THE ENGLISH “BROAD ARROW.”

flour-de-lis.” Whereat the king heartily laugh’d, to hear how prettily so byting a taunt (namely, proceeding from a prince) was so suddenly turned to so pleasaunte a conceit.”—Stanihurst’s History of Ireland, in Holinshed’s Chron. Nares thinks that Shakspeare, who is known to have been a reader of Holinshed, took his conceit of the “white lowses which do become an old coat well,” in the Merry Wives of Windsor, from this anecdote. See Heraldic Anomalies, vol. 1st, p. 204; also, Lower’s Curiosities of Heraldry, p. 82 (1845). It may here be mentioned, that the mark signifying the royal property (as it is used in France), similarly to the token, or symbol, or “brand,” denoting the royal domain, the property, or the sign upon royal chattels (the “broad arrow”), as used in England, is the “Lis,” or the “Fleur-de-Lis.” The mark by which criminals are “branded” in France is called the “Lis—Fleur-de-Lis.”

The English “broad arrow,” the mark or sign of the royal property, is variously depicted, similarly to the following marks:

![Fig. 1.](image1)
![Fig. 2.](image2)
![Fig. 3.](image3)
![Fig. 4.](image4)
![Fig. 5.](image5)

These are the Three Nails of the Passion. In figs. 1 and 2 they are unmistakably so, with the points downwards. Figs. 3 and 4 have the significant horizontal mark which, in the first centuries of Christianity, stood for the Second (with feminine meanings) Person of the Trinity; but the points of the spikes (spicae, or thorns) are gathered upwards in the centre. In fig. 5 there are still the three nails; but a suggestive similarity to be remarked in this figure is a disposition resembling the crux-ansata—an incessant
symbol, always reappearing in Egyptian sculptures and hieroglyphics. There is also a likeness to the mysterious letter "Tau." The whole first chapter of Genesis is said to be contained in this latter emblem.

Three bent spikes, or nails, are unmistakably the same symbol that Belus often holds in his extended hand on the Babylonian cylinders, afterwards discovered by the Jewish cabalists in the points of the letter "Shin," and by the mediæval mystics in the "Three Nails of the Cross."—The Gnostics and their Remains, Ancient and Mediæval, p. 208.

This figure, which is clearly a nail, has also characteristics, which will be remarked in its upper portion, which suggest a likeness to the obelisk, pin, spike, upright, or phallus.

The Hebrew letter "Shin," or "Sin," counts for 300 in the Hebraic numeration. Each spica, or spike, may be taken to signify 100, or ten tens. We have strong hints here of the origin of the decimal system, which reigns through the universal laws of computation as a substratum, basis, or principle. This powerful symbol, also, is full of secret important meanings. It will be remarked as the symbol or figure assigned in the formal zodiacs of all countries, whether original zodiacs, or whether produced in figure-imitations by tradition. The marks or symbols of the zodiacal signs, "Virgo-Scorpio," are closely similar to each
other, with certain differences, which we recommend to the judicious consideration of close and experienced observers.

**Fig. 8.**

The Templar Banner: the famous "Beauséant."

**Fig. 9.**

or rather the New Moon, as thus:

Fig. 8 is the symbol, or hook, of Saturn, the colour of whom, in the heraldic configuration, is *sab.*, *sable*, or black, divided, *party per pale*, with the opening light of the first crescent moon of the post-diluvian world. Fig. 9 is the same grandly mystic banner, denominated Beauséant ("Beau-Séant"), revealing a whole occult theosophy to the initiate, which the leaders of the Templars undoubtedly were. The difference between these two figures, fig. 8 and fig. 9, is, that the "fly" of the ensign marked fig. 9 is bifurcated (or cloven) in the "lighted" part.

We subjoin the representation of the wondrous banner of the "Poor Soldiers of the Temple," as depicted abundantly on the spandrels of the arches of the Temple Church, London.
Von Hammer's *Mystery of Baphomet Revealed* contains much suggestive matter relative to these mysterious Templars. The Parisian "Templiers" assert that there is a connection between the recent Niskhi letter and the "Cufic" characters, and that the origin of the secrets of the order of the Temple is contemporary with the prevalence of the latter alphabet. We here refer to the work entitled, *Mysterium Baphometis Revelatum; seu, Fratres Militiae Templi, qua Gnostici et quidem Ophiani, apostasia, idololatria, et quidem impuritatis convicti per ipsa eorum monumenta*, published in the *Mines de l'Orient*, vol. vi. This treatise is illustrated with numerous admirably executed copperplates of magical statuettes, architectural ornaments, mystical inscriptions, vases, and coins. Amidst these there is a bearded, yet female, figure, "Mete" (*magna*, or *maxima*), whom Von Hammer, following Theodosius and others, makes the same as the "Sophia" of the Ophites. Some particulars referring to these subjects are contained in *The Gnostics and their Remains, Ancient and Medieval*; although there is an evident total ignorance on the part of the author, throughout his book, as to the purpose and meaning of the whole of these remote and mysterious subjects: to which he is, however, constantly referring, without the merit of even feeling his way correctly. It is well known that the preservation of Gnostic symbols by Freemasons was, and remains so to this day, exceedingly sedulous.

We will terminate this part of our long dissertation, which commenced with the explanation of the descent, or the genealogy, or the generation, of the famous "fleurs-de-lis" of France,—the noblest and sublimest symbol, in its occult or mysterious meaning, which the "monarch sun" ever saw displayed to it, inexpressibly mean as the "Lis" seems: we will finish, we say, thus far, by commenting in a very original and unexpected, but strictly corroborative, manner
THE "DOZEN WHITE LUCES." 55

upon some words of Shakspeare which have hitherto been passed wholly without remark or explanation.

We may premise by recalling that the luce is a pike (pic), or Jack: Jac, Iacc (B and I are complementary in this mythic sense), Bacc, Bacche, Bacchus. Shakspeare’s well-known lampoon, or satirical ballad, upon the name of “Lucy” may be cited as illustrative proof on this side of the subject:

“Lucy is lowsie, as some volke miscalle it.”

The zodiacal sign for February is the “fishes.” Now, the observances of St. Valentine’s Day, which point to courtship and to sexual love, or to loving invitation, bear direct reference to the “fishes,” in a certain sense. The arms of the Lucys—as they are at present to be seen, and where we lately saw them, beautifully restored upon the great entrance-gates of Charlecote Hall, or Place, near Stratford-super-Avon—are “three luces or pikes, hauriant, argent.”

“The dozen white luces” are observed upon with family pride by Shallow (Lucy), in the Merry Wives of Windsor:

“Shallow. It is an old coat.

“Evans. The dozen white louses do become an old coat well.” The significant part of the passage follows to this effect, though deeply hidden in the sly art of our knowing, but reticent, Shakspeare: “It agrees well passant” (we would here read passim, “every where,” which makes clear sense). “It is a familiar beast to Man, and signifies—love” (the generative act).—Merry Wives of Windsor, act i. sc. 1.

We commend the above history of the “Fleur-de-Lis” to the thoughtful attention of our readers.
CHAPTER THE EIGHTH.

SACRED FIRE.

The appearance of God to mortals seems always to have been in brightness and great glory, whether He was angry and in displeasure, or benign and kind. These appearances are often mentioned in Scripture. When God appeared on Mount Sinai, it is said, "The Lord descended upon it in Fire" (Exodus xix. 18). And when Moses repeats the history of this to the children of Israel, he says, "The Lord spake unto you out of the midst of the Fire" (Deuteronomy iv. 12). So it was when the Angel of the Lord appeared to Moses in a flame of fire out of the midst of the bush: "The bush burned with Fire, and the bush was not consumed" (Exodus iii. 3). The appearances of the Angel of God's presence, or that Divine Person who represented God, were always in brightness; or, in other words, the Shechinah was always surrounded with glory. This seems to have given occasion to those of old to imagine fire to be what God dwelt in.

"Ipse" (Darius) "solem Mithren, sacrumque et aeternum invocans Ignem, ut illis dignam vetere gloria majoremque monumentis fortitudinem inspirarent."—Q. Curtius, l. iv. c. 13.

Whether it was that any fire proceeded from God, and burnt up the oblation in the first sacrifices, as some ingenious
men have conjectured, we know not. It is certain that in after ages this was the case. We are sure that a fire from the Lord consumed upon the altar the burnt offering of Aaron (Leviticus ix. 24); and so it did the sacrifice of Gideon, "both the flesh and the unleavened cakes" (Judges vi. 21). When David "built an altar unto the Lord, and offered burnt offerings and peace-offerings, and called upon the Lord, He answered him from heaven by Fire, upon the altar of burnt offerings" (1 Chronicles xxi. 26). The same thing happened at the dedication of Solomon's temple: "The Fire came down from heaven, and consumed the burnt offering and the sacrifices, and the glory of the Lord filled the house" (2 Chronicles vii. 1). And much about a hundred years afterwards, when Elijah made that extraordinary sacrifice in proof that Baal was no god, "The Fire of the Lord fell and consumed the burnt sacrifice, and the wood, and the stones, and the dust, and licked up the water that was in the trench" (1 Kings xviii. 38). And if we go back long before the times of Moses, as early as Abraham's days, we meet with an instance of the same sort: "It came to pass that when the sun went down, and it was dark, behold a smoking furnace and a burning lamp, that passed between these pieces" (Genesis xv. 17).

The first appearances of God, then, being in glory—or, which is the same thing, in light or fire—and He showing His acceptance of sacrifices in so many instances by consuming them with fire, hence it was that the Eastern people, and particularly the Persians, fell into the worship of fire itself, or rather they conceived fire to be the symbol of God's presence, and they worshiped God in, or by, fire. From the Assyrians, or Chaldaean, or Persians, this worship was propagated southward among the Egyptians, and westward among the Greeks; and by them it was brought into
Italy. The Greeks were wont to meet together to worship
in their Prytaneia, and there they consulted for the public
good; and there was a constant fire kept upon the altar,
which was dignified by the name of Vesta by some. The
fire itself was properly Vesta; and so Ovid:

"Nec te aliud Vestam, quam vivam intelligere flammam."

The Prytaneia were the atria of the temples, wherein a
fire was kept that was never suffered to go out. On the
change in architectural forms from the pyramidal (or the
horizontal) to the obelisk (or the upright, or vertical),
the flames were transferred from the altars, or cubes, to the
summits of the typical uprights, or towers; or to the tops
of the candles, such as we see them used now in Catholic
worship, and which are called "tapers," from their tapering
or pyramidal form, and which are supposed always to indicate
the divine presence or influence. This, through the
symbolism that there is in the living light, which is the
last exalted show of fluent or of inflamed brilliant matter,
passing off into the unknown and unseen world of celestial
light (or occult fire), to which all the forms of things tend,
and in which even idea itself passes from recognition as
meaning, and evolves—spiring up, as all flame does, to
escape and to wing away.

Vesta, or the fire, was worshiped in circular temples, which
were the images, or the miniatures, of the "temple" of
the world, with its dome, or cope, of stars. It was in the
atria of the temples, and in the presence of and before the
above-mentioned lights, that the forms of ceremonial worship
were always observed. It is certain that Vesta was wor-
shiped at Troy; and Æneas brought her into Italy:

"manibus vittas, Vestamque potentem,
Æternumque adyitis effert penetralibus Ignem."

Æneid, ii. 296.
VESTAL FIRES. 59

Numa settled an order of Virgin Priestesses, whose business and care it was constantly to maintain the holy fire. And long before Numa's days, we find it not only customary, but honourable, among the Albans to appoint the best-born virgins to be priestesses of Vesta, and to keep up the constant, unextinguished fire.

When Virgil speaks (Aenid, iv. 200) of Iarbas, in Africa, as building a hundred temples and a hundred altars, he says:

"vigilemque sacraverat Ignem,
Exsibias Divum aternas,"

that he had "consecrated a fire that never went out." And he calls these temples and these lights, or this fire, the "perpetual watches," or "watch-lights," or proof of the presence, of the gods. By which expressions he means, that places and things were constantly protected and solemnised where such lights burned, and that the celestials, or angel-defenders, "camped," as it were, and were sure to be met with thickly, where these flames upon the altars, and these torches or lights about the temples, were studiously and incessantly maintained.

Thus the custom seems to have been general from the earliest antiquity to maintain a constant fire, as conceiving the Gods present there. And this was not only the opinion of the inhabitants in Judæa, but it extended all over Persia, Greece, Italy, Egypt, and most other nations of the world.

Porphyry imagined that the reason why the most ancient mortals kept up a constant, ever-burning fire in honour of the immortal Gods was because Fire was most like the Gods. He says that the ancients kept an unextinguished fire in their temples to the Gods because it was most like them. Fire was not like the Gods, but it was what they appeared in to mortals. And so the true God always ap-
peared in brightness and glory; yet no one would say that brightness was most like the true God, but was most like the Shechinah, in which God appeared. And hence the custom arose of keeping up an unextinguished fire in the ancient temples.

Vesta is properly an Oriental word, derived from the Hebrew לְשָׁם, אֲשֶׁר—"Fire." Thence the word Astarte, in the Phœnician dialect. The signification of the term is the same as the πῦρ ἀβατων, the ignis aeternus, the perpetual fire itself. They that worshiped either Vesta or Vulcan, or the master-power of nature which is known under those names, were properly Fire-worshipers.

God, then, being wont to appear in Fire, and being conceived to dwell in Fire, the notion spread universally, and was universally admitted. First, then, it was not at all out of the way to think of engaging in friendship with God by the same means as they contracted friendship with one another. And since they to whom God appeared saw Him appear in Fire, and they acquainted others with such His appearances, He was conceived to dwell in Fire. By degrees, therefore, the world came to be over-curious in the fire that was constantly to be kept up, and in things to be sacrificed; and they proceeded from one step to another, till at length they filled up the measure of their aberrations, which were in reality instigated by their zeal, and by their intense desire to mitigate the displeasure of their divinities—for religion was much more intense as a feeling in early days—by passing into dreadful ceremonies in regard to this fire, which they reverenced as the last possible physical form of divinity, not only in its grandeur and power, but also in its purity. It arose from this view that human sacrifices came to be offered to the deities in many parts of the world, particularly in Phœnicia, and in the colonies
THE "MORNING STAR." 61

derived from thence into Africa and other places. In the
intensity of their minds, children were sacrificed by their
parents, as being the best and dearest oblations that could be
made, and the strongest arguments that nothing ought to be
withheld from God. This was expiation for that sad result,
the consequence of the original curse, issuing from the fatal
curiosity concerning the bitter fruit of that forbidden "Tree,"

"whose mortal taste
Brought death into the world, and all our woe,
With loss of Eden,"

according to Milton. That sense of shame in all its forms
lesser and larger, and with all the references inseparably
allied to propagation in all its multitudinous cunning (so
to speak), wherever the condemned material tissues reach,
puzzled the thoughtful ancients. This they considered the
convicted "Adversary," or Lucifer, "Lord of Light"—that
is, material light—"Eldest Son of the Morning." Morning,
indeed! dawning with its beams from behind that forbidden
Tree of the Knowledge of Good and Evil. What is this
shame, urged the philosophers, this reddening, however
good and beautiful, and especially the ornament of the
young and of children, who are newest from the real,
glowing countenance of Deity, with the bloom of the first
angelic world scarcely yet fading from off their cherub faces,
gradually darkening and hardening in the degradation and
iniquity of being here as presences in the world, although the
most glorious amidst the forms of flesh? What is this shame,
which is the characteristic singly of human creatures? All
other creatures are sinless in this respect, and know not
the feeling of that—correctly looked at—strange thing
which men call "shame," something which it is not right
that the sun even should see, and therefore stirring the
blood, and reddening the face, and confusing the speech, and causing man to hang down his head, and to hide himself, as if guilty of something: even as our guilty first parents, having lost the unconsciousness of their child-like, innocent first state—that of sinless virginity—hid themselves in the umbrage of Paradise, all at once convicted to the certainty that they must hide, because they were exposed in the face of that original intention regarding them having been broken.

"Suffer the little children to come unto Me, and forbid them not, for of such is the kingdom of heaven."

That is, the innocent children should come up for salvation, who, though suffering under the mortal liability incurred by all flesh in that first sin (and incident in the first fall, which has empoisoned all nature), are yet free by the nature of that ungrown possibility, and from their immature state. They know not the shame of the condition adult, and therefore they bear not the badge of men.

To recur for a moment to the theory of human sacrifices which once largely prevailed. Interwoven inseparably with the forms of architecture from the earliest times, proofs of which we see constantly in classical buildings particularly, and in the Italian modifications displayed in the cities of Europe, was the habit of exposing as talismans the members (and particularly the heads) of human sacrifices. This is observable in the innumerable masks (or heads full-faced) placed on the keystones of arches or portals. They are either deified mortals or demi-gods. Sometimes, but very rarely (because it is a sinister _palladium_), the head of Medusa is seen. Exposure of the heads of criminals on town-gates, over bridges, or over arches, follows the same idea, as ranging in the list of protecting, protesting, or appealing _Palladia_, which are supposed to possess the same
objugating or propitiating power as the wild, winged creatures—children of the air—affixed in penitential, magic brand or exposure on the doors of barns, or on the outside of rustic buildings. All this is ceremonial sacrifice, addressed to the harmful gods, and meant occultly for the eyes of the observant, but invisible, wandering angels, who move through the world—threading unseen the ways of men, and unwitted of by them, and most abundant and most active there where the mother of all of them is in the ascendant with her influences; or when Night is abroad, throned in her cope of stars—letters, from their first judiciary arrangement in the heavens, spelling out continually new astrological combinations. For Astrology was the mother, as she was the precursor, of Astronomy, and was once a power; into whatever mean roads the exercise of the art of her servants has strayed now, in unworthy and indignant divination, and in the base proffer of supposed Gypsy arts.

The pyramidal or triangular form which Fire assumes in its ascent to heaven is in the monolithic typology used to signify the great generative power. We have only to look at Stonehenge, Ellora, the Babel-towers of Central America, the gigantic ruins scattered all over Tartary and India, to see how gloriously they symbolised the majesty of the Supreme. To these uprights, obelisks, or lithoi, of the old world, including the Bethel, or Jacob's Pillar, or Pillow, raised in the Plain of "Luz," we will add, as the commemorative or reminding shape of the fire, the Pyramids of Egypt, the Millenarius, Gnomon, Mete-Stone, or Mark, called "London Stone," all Crosses raised at the junction of four roads, all Market-Crosses, the Round Towers of Ireland, and, in all the changeful aspects of their genealogy, all spires and towers, in their grand hieroglyphic proclamation, all over the world.
(♈) Aries, (♉) Taurus, (♊) Gemini, (♋) Cancer, (♌) Leo, (♍) Virgo, are the six first "Signs," and they collectively (in their annual succession) form the "Macrocosmos" of the Cabalists. Then succeeds the "turning-point," "balances," or "nave" (navel), of the astronomical wheel, represented by the sign "Libra" (♎), which, be it remembered, was added by the imaginative (and therefore, practically, inventive) Greeks. The foregoing, up to "Libra," represent the "ascending signs," or six of the spokes, so to speak, of the annual zodiacal wheel, circling to the zenith or vertex. The last six "Signs" of the zodiac are called "descending signs," and they are the sinister, autumnal, or changing, in reverse, monthly spaces, each of thirty degrees, and again comprising six radii of this celestial wheel, or this "Ezekiel's Wheel." The turning-point is "Virgo-Scorpio," which, until separated in the mythical interruption from without at the "junction-point," between ascent and descent, were the same "single sign." The latter half (or left wing of this grand zodiacal "army," or "host of heaven," drawn up in battle array, and headed—as, by a figure, we shall choose to say—by the "Archangel Michael," or the Sun, at the centre, or in the "champion," or "conquering, point") is called by the Cabalists—and therefore by the Rosicrucians—the abstract "Microcosmos,"—in which "Microcosm," or "Little World," in opposition to the "Macrocosm," or "Great World," is to be found "Man," as produced in it from the operations from above, and to be saved in the "Great Sacrifice" (Crucifixion-Act), the phenomena of the being (Man), taking place "in the mythic return of the world." All this is incomprehensible, except in the strange mysticism of the Gnostics and the Cabalists; and the whole theory requires a key of explanation to render it intelligible: which key is only darkly referred to as possible, but refused absolutely, by these extraordinary men, as not
permissible to be disclosed. As they, however, were very fond of diagrams and mystic figures, of which they left many in those rarities (mostly ill-executed, but each wonderfully suggestive) called “Gnostic gems,” we will supply a seeming elucidation of this their astrological assumption of “what was earliest,” for which see the succeeding figure.

( heavens) Libra (the Balances) leads again off as the “hinge-point,” introducing the six winter signs, which are: ( heavens) Libra again, (zodiac) Scorpio, (zodiac) Sagittarius, (zodiac) Capricornus, (zodiac) Aquarius, and (zodiac) Pisces.

Fig. 12. (A.) “Ezekiel's Wheel.”

Turning-point—Libra. (The sign “Libra” was added by the Greeks.)

The first six signs, or ascending signs, are represented by the celestial perpendicular, or descending ray, as thus:

The last six signs, or descending signs, are represented by the terrestrial ground-line, or horizontal, or “equatorial” (symbol, or sigma), as thus:

The union of these (at the intersection of these rays) at
the junction-point, or middle point, forms the "Cross," as thus:

Fig. 15. (B.) "Cross."

\[
\begin{array}{c}
\text{(C.)}
\end{array}
\]

Fig. 16. Fig. 17. Fig. 18. Fig. 19.

In figure C, the union of fig. 16 and fig. 17 forms the cross. Fig. 18 is the mundane circle. Fig. 19 is the astronomical cross upon the mundane circle. The union of fig. 18, fig. 17, and fig. 16, in this respective order, gives the crux-ansata, so continual in all the Egyptian sculptures, which mark or sign is also the symbol of the Planet Venus, as below.

Fig. 20. The Crux-Ansata.

Fig. 21. Mark of the Planet Venus.

Their origin is thus traced clearly to the same original meanings, which reappear under all sorts of disguises, and are varied in innumerable ingenious ways, in all the mythologies—incessantly disclosing, and inviting, and as continually evading, discovery. This abstruse mark particularly abounds in the Egyptian temples, where every object and every figure presents it. Its real meaning is, however, intended to be buried in profound darkness.
CHAPTER THE NINTH.

FIRES-THEOSOPHY OF THE PERSIANS.

The Fire-Philosophers, or Philosophi per ignem, were a fanatical sect of philosophers, who appeared towards the close of the sixteenth century. They made a figure in almost all the countries of Europe. They declared that the intimate essences of natural things were only to be known by the trying efforts of fire, directed in a chemical process. The Theosophists also insisted that human reason was a dangerous and deceitful guide; that no real progress could be made in knowledge or in religion by it; and that to all vital—that is, supernatural—purpose it was a vain thing. They taught that divine and supernatural illumination was the only means of arriving at truth. Their name of Paracelsists was derived from Paracelsus, the eminent physician and chemist, who was the chief ornament of this extraordinary sect. In England, Robert Flood, or Fludd, was their great advocate and exponent. Rivier, who wrote in France; Severinus, an author of Denmark; Kunrath, an eminent physician of Dresden; and Daniel Hoffmann, professor of divinity in the University of Helmstadt,—have also treated largely on Paracelsus and on his system.

Philippus Aureolus Theophrastus Paracelsus was born
in 1493, at Einsiedeln, a small town of the canton of Schwitz, distant some leagues from Zurich. Having passed a troubled, migratory, and changeful life, this great chemist, and very original thinker, died on the 24th of September 1541, in the Hospital of St. Stephen, in the forty-eighth year of his age. His works may be enumerated as follow. 1. The German editions: Basil, 1575, in 8vo; Ib. 1, 1589-90, in 10 vols. 4to; and Strasbourg, 1603-18, in 4 vols. folio. 2. The Latin editions: Opera omnia Medico-chymico-chirurgica, Francfort, 1603, in 10 vols. 4to; and Geneva, 1658, in 3 vols. folio. 3. The French editions: La Grand Chirurgerie de Paracelse, Lyons, 1593 and 1603, in 4to; and Montbéliard, 1608, in 8vo. See Adelung, Histoire de la Folie Humaine, tom. vii.; Biographie Universelle, article "Paracelse;" and Sprengel, Histoire Pragmatique de la Médecine, tom. iii.

"Akin to the school of the ancient Fire-Believers, and of the magnetists of a later period," says the learned Dr. Ennemoser, in his History of Magic (most ably rendered into English by William Howitt), "of the same cast as these speculators and searchers into the mysteries of nature, drawing from the same well, are the Theosophists of the sixteenth and seventeenth centuries. These practised chemistry, by which they asserted that they could explore the profoundest secrets of nature. As they strove, above all earthly knowledge, after the divine, and sought the divine light and fire, through which all men can acquire the true wisdom, they were called the Fire-Philosophers (philosophi per ignem). The most distinguished of these are Theophrastus Paracelsus, Adam von Boden, Oswald Croll; and, later, Valentine Weigel, Robert Flood, or Fludd, Jacob Böhmen, Peter Poiret, &c." Under this head we may also refer to the Medico-surgical Essays of Hemmann, published at Berlin in 1778; and Pfaff's Astrology.
As a great general principle, the Theosophists called the soul a fire, taken from the eternal ocean of light.

In regard to the supernatural—using the word in its widest sense—it may be said that "all the difficulty in admitting the strange things told us lies in the non-admission of an internal causal world as absolutely real: it is said, in intellectually admitting, because the influence of the arts proves that men's feelings always have admitted, and do still admit, this reality."

The Platonic philosophy of vision is, that it is the view of objects really existing in interior light, which assume form, not according to arbitrary laws, but according to the state of mind. This interior light, if we understand Plato, unites with exterior light in the eye, and is thus drawn into a sensual or imaginative activity; but when the outward light is separated, it reposes in its own serene atmosphere. It is, then, in this state of interior repose, that the usual class of religious, or what are called inspired, visions occur. It is the same light of eternity so frequently alluded to in books that treat of mysterious subjects; the light revealed to Pimander, Zoroaster, and all the sages of the East, as the emanation of the spiritual sun. Böhmen writes of it in his Divine Vision or Contemplation, and Molinos in his Spiritual Guide,—whose work is the ground of Quietism: Quietism being the foundation of the religion of the people called Friends or Quakers, as also of the other mystic or meditative sects. We enlarge from a very learned, candid, and instructive book upon the Occult Sciences.

Regard Fire, then, with other eyes than with those soulless, incurious ones, with which thou hast looked upon it as the most ordinary thing. Thou hast forgotten what it is—or rather thou hast never known. Chemists are silent about it; or, may we not say that it is too loud for them?
Therefore shall they speak fearfully of it in whispers. Philosophers talk of it as anatomists discourse of the constituents (or the parts) of the human body—as a piece of mechanism, wondrous though it be. Such the wheels of the clock, say they in their ingenious expounding of the "whys" and the "wherefores" (and the mechanics and the mathematics) of this mysterious thing, with a supernatural soul in it, called world. Such is the chain, such are the balances, such the larger and the smaller mechanical forces; such the "Time-blood," as it were, that is sent circulating through it; such is the striking, with an infinity of bells. It is made for man, this world, and it is greatly like him—that is, mean, they would add. And they do think it, if they dare add theirnings. But is this all? Is this the sum of that casketed lamp of the human body?—thine own body, thou unthinking world's machine—thou Man! Or, in the fabric of this clay lamp (lacquered in thy man's Imperial splendors), burneth there not a Light? Describe that, ye Doctors of Physics! Unwind the starry limbs of that phenomenon, ye heavy-browed, doctorial wielders of the scalpel!—useful, however, as ye be, in that "upholstery warehouse" of nature to which bodies and their make be referred by the materialists as the godless origin of every thing. Touch at its heart, ye dissectors of fibres and of valves; of sinews and of leaves (hands, perchance); of the vein-work, of the muscles, as bark-integument; of the trunk! Split and pare, as with steel tools and wedge, this portent,—this "Tree" (human though it be),—round which ye cluster to examine,—about which ye gather, with your "persuasions," to wind into the innermost secret of. Cyclops—one-eyed and savage—break into meaning this portent, Man, on your science-wheels!

Note the goings of the Fire, as he creepeth, serpentineth, riseth, slinketh, broadeneth. Note him reddening, glowing,
whitening. Tremble at his face, dilating; at the meaning that is growing into it, to you. See that spark from the blacksmith's anvil!—struck, as an insect, out of a sky containing a whole cloud of such. Rare locusts, of which Pharaoh and the Cities of the Plain read of old the secret! One, two, three sparks;—dozens come:—faster and faster the fiery squadrons follow, until, in a short while, a whole possible army of that hungry thing for battle, for food for it—Fire—glances up; but is soon warned in again!—lest acres should glow in the growing advance. Think that this thing is bound as in matter-chains. Think that He is outside of all things, and deep in the inside of all things; and that thou and thy world are only the thing between: and that outside and inside are both identical, couldst thou understand the supernatural truths! Reverence Fire (for its meaning), and tremble at it; though in the Earth it be chained, and the foot of the Archangel Michael—like upon the Dragon—be upon it! Avert the face from it, as the Magi turned, dreading, and (as the Symbol) before it bowed askance. So much for this great thing—Fire!

Observe the multiform shapes of fire; the flame-wreaths, the spires, the stars, the spots, the cascades, and the mighty falls of it; where the roar, when it grows high in Imperial masterdom, is as that of Niagara. Think what it can do, what it is. Watch the trail of sparks, struck, as in that spouting arch, from the metal shoes of the trampling horse. It is as a letter of the great alphabet. The familiar London streets, even, can give thee the Persian's God: though in thy pleasures, and in thy commerce-operations, thou so oft forgettest thine own God. Whence liberated are those sparks?—as stars, afar off, of a whole sky of flame;—sparks, deep down in possibility, though close to us;—great in their meaning, though small in their show;—as distant
single ships of whole fiery fleets;—animate children of, in thy human conception, a dreadful, but, in reality, a great world, of which thou knowest nothing. They fall, foodless, on the rejecting, barren, and (on the outside) the coldest stone. But in each stone, flinty and chilling as the outside is, is a heart of fire, to strike at which is to bid gush forth the waters, as it were, of very Fire, like waters of the rock! Truly, out of sparks can be displayed a whole acreage of fireworks. Forests can be conceived of flame—palaces of the fire; grandest things—soul-things—last things—all things!

Wonder no longer, then, if, rejected so long as an idolatry, the ancient Persians, and their masters the Magi,—concluding that they saw "All" in this supernaturally magnificent element,—fell down and worshiped it; making of it the visible representation of the very truest; but yet, in man's speculation, and in his philosophies,—nay, in his commonest reason,—impossible God: God being every where, and in us, and, indeed, us, in the God-lighted man; and impossible to be contemplated or known outside,—being All!

Lights and flames, and the torches, as it were, of fire (all fire in this world, the last background on which all things are painted), may be considered as "lancets" of another world—the last world: circles, enclosed by the thick walls (which, however, by the fire are kept from closing) of this world. As fire waves and brandishes, will the walls of this world wave, and, as it were, undulate from about it. In smoke and disruption, or combustion of matter, we witness a phenomenon of the burning as of the edges of the matter-rings of this world, in which world is fire, like a spot: that dense and hard thing, matter, holding it in. Oxygen, which is the finest of air, and is the means of the quickest burning out, or the supernatural (in this world) exhilaration of animal
THE NATURE OF FIRE.

life, or extenuation of the Solid; and, above all, the heightening of the capacity of the Human, as being the quintessence of matter: this oxygen is the thing which feeds fire the most overwhelmingly. Nor would the specks and spots and stars of fire stop in this dense world-medium,—in this tissue or sea of things,—could it farther and farther fasten upon and devour the solids: eating, as it were, through them. But, as this thick world is a thing the thickest, it presses out, thrusts, or gravitates upon, and stifles, in its too great weight; and conquers not only that liveliest, subtlest, thinnest element of the solids, the finest air, by whatever chemical name—oxygen, azote, azone, or what not—it may be called; which, in fact, is merely the nomenclature of its composition, the naming of the ingredients which make the thing (but not the thing). The denseness of the world not only conquers this, we repeat; but, so to figure it, matter stamps upon, effaces, and treads out fire: which, else, would burn on, back, as in the beginning of things, or into itself,—consuming, as in its great revenge of any thing being created other than it, all the mighty worlds which, in Creation, were permitted out of it. This is the teaching of the ancient Fire-Philosophers (re-established and restored, to the days of comprehension of them, in the conclusions of the Rosicrucians, or Illuminati, of later times), who claimed to have discovered the Eternal Fire, or to have found out "God" in the "Immortal Light."

There are all grades or gradations of the density of matter; but it all coheres by the one law of gravitation. Now, this gravitation is mistaken for a force of itself, when it is nothing but the sympathy, or the taking away of the supposed thing between two other things. It is sympathy (or appetite) seeking its food, or as the closing together of two like things. It is not because one mass of matter is
more ponderable or attractive than another (out of our senses, and in reality), but that they are the same, with different amounts of affection, and that like seeks like, not recognising or knowing that between. Now, this thing which is, as it were, slipped between, and which we strike into show of itself, or into fire—surprised and driven out of its ambush—is Fire. It is as the letter by which matter spells itself out—so to speak.

Now, matter is only to be finally forced asunder by heat; flame being the bright, subtle something which comes last, and is the expansion, fruit, crown, or glory of heat: it is the vivid and visible soul, essence, and spirit of heat—the last evolvement before rending, and before the forcible closing again of all the centre-speeding weights, or desires, of matter. Flame is as the expanding-out (or even exploding) flower to this growing thing, heat: it is as the bubble of it—the fruit (to which before we have likened it), or seed, in the outside Hand upon it. Given the supernatural Flora, heat is as the gorgeous plant, and flame the glorying flower; and as growth is greater out of the greater matrix, or matter of growing, so the thicker the material of fire (as we may roughly figure it, though we hope we shall be understood), so the stronger shall the fire be, and of necessity the fiercer will it be perceived to be—result being according to power.

Thus we get more of fire—that is, heat—out of the hard things: there being more of the thing Fire in them.

Trituration, mechanical division, multiplication, cutting up, precipitating, or compounding, are states into which the forces outside can place matter, without searching into and securing its bond, and gathering up (into hand off it) its chains, and mastering it. These changes can be wrought in matter, and, as it were, it can be taken in pieces; and
all this dissolution of it may be effected without our getting as at the fire-blood of our subject.

But Fire disjoins, as it were, all the hinges of the house—laps out the coherence of it—sets ablaze the dense thing, matter—makes the dark metals run like waters of light—conjures the black devils out of the minerals, and, to our astonishment, shows them much libelled, blinding, angel-white! By Fire we can lay our hand upon the solids, part them, powder them, melt them, fine them, drive them out to more and more delicate and impalpable texture—firing their invisible molecules, or imponderables, into cloud, into mist, into gas: out of touch, into hearing; out of hearing, into seeing; out of seeing, into smelling; out of smelling, into nothing—into real Nothing—not even into the last blue sky. These are the potent operations of Fire—the crucible into which we can cast all the worlds, and find them, in their last evolution, not even smoke. These are physical and scientific facts which there can be no sayings—which were seen and found out long ago, ages ago, in the reveries first, and then in the practice, of the great Magnetists, and those who were called the Fire-Philosophers, of whom we have spoken before.

What is that mysterious and inscrutable operation, the striking fire from flint? Familiar as it is, who remarks it? Where, in that hardest, closest pressing together of matter—where the granulation compresses, shining even in its hardness, into the solidest laminae of cold, darkest blue, and streaky, core-like, agate-resembling white—lie the seeds of fire, spiritual flame-seeds to the so stony fruit? In what folds of the flint, in the block of it—in what invisible recess—speckled and spotted in what tissue—crouch the fire-sparks?—to issue, in showers, on the stroke of iron—on the so sudden clattering (as of the crowbars of man) on its stony doors:
Stone caving the thing Fire, unseen, as its sepulchre; Stroke warning the magical thing forth. Whence comes that trail of fire from the cold bosom of the hard, secret, unexploding flint?—children as from what hard, rocky breast; yet hiding its so sacred, sudden fire-birth! Who—and what science-philosopher—can explain this wondrous darting forth of the hidden something, which he shall try in vain to arrest, but which, like a spirit, escapes him? If we ask what fire is, of the men of science, they are at fault. They will tell us that it is a phenomenon, that their vocabularies can give no further account of it. They will explain to us that all that can be said of it is, that it is a last affection of matter, to the results of which (in the world of man) they can only testify, but of whose coming and of whose going—of the place from which it comes, and the whereabout to which it goeth—they are entirely ignorant,—and would give a world to know!

The foregoing—however feebly expressed—are the views of the famous Rosicrucians* respecting the nature of this supposed familiar, but yet puzzling, thing—Fire.

We will proceed to some of their further mystic reveries. They are very singular.

But the consideration of these is exceedingly abstract and difficult. The whole subject is abstruse in the highest degree.

* In regard to the singular name of the Rosicrucians, it may be here stated that the Chemists, according to their arcana, derive the Dew from the Latin Ros, and in the figure of a cross (+) they trace the three letters which compose the word Luz, Light. Mosheim is positive as to the accuracy of his information.
CHAPTER THE TENTH.

IDEAS OF THE ROSICRUCIANS AS TO THE CHARACTER OF FIRE.

Stern Park surrenders out of the world, when it disappears to us, in the universal ocean of Invisible Fire. That is its disappearance. It quits us in the supposed light, but to it really darkness—as fire-born, the last level of all—to reappear in the true light, which is to us darkness. This is hard to understand. But, as the real is the direct contrary of the apparent, so that which shows as light to us is darkness in the supernatural; and that which is light to the supernatural is darkness to us: matter being darkness, and soul light. For we know that light is material; and, being material, it must be dark. For the Spirit of God is not material, and therefore, not being material, it cannot be light to us, and therefore darkness to God. Just as (until discovered otherwise) the world it is that is at rest, and the sun and the heavenly bodies in daily motion—instead of the very reverse being the fact. This is the belief of the oldest Theosophists, the founders of magical knowledge in the East, and the discoverers of the Gods; also the doctrine of the Fire-Philosophers, and of the Rosicrucians, or Illuminati, who taught that all knowable things (both of the soul and of the body) were evolved out of Fire, and finally resolvable into it; and that Fire was
the last and only-to-be-known God: as that all things were capable of being searched down into it, and all things were capable of being thought up into it. Fire, they found—when, as it were, they took this world, solid, to pieces (and also, as metaphysicians, distributed and divided the mind of man, seeking for that invisible God-thing, coherence of ideas)—fire, these thinkers found, in their supernatural light of mind, to be the latent, nameless matter started out of the tissues—certainly out of the body, presumably out of the mind—with groan, disturbance, hard motion, and flash (when forced to sight of it), instantly disappearing, and relapsing, and hiding its Godhood in the closing-violently-again solid matter—as into the forcefully resuming mind. Matter, the agent whose remonstrance at disturbance out of its Rest was, in the winds, murmur, noises, cries, as it were, of air; in the waters, rolling and roaring; in the piled floors of the sky, and their furniture, clouds, circumvolence, contest, and war, and thunders (defiant to nature, but groans to God), and intolerable lightning-rendings; matter tearing as a garment, to close supernaturally together again, as the Solid, fettered and chained—devil-bound—in the Hand upon it, "To Be!" In this sense, all noise (as the rousing or conjuration of matter by the outside forces) is the agony of its penance. All motion is pain, all activity punishment; and fire is the secret, lowest—that is, foundation-spread—thing, the ultimate of all things, which is disclosed when the clouds of things roll, for an instant, off it,—as the blue sky shows, in its fragments, like turquoises, when the canopy of clouds is wind-torn, speck-like, from off it. Fire is that floor over which the coats or layers, or the spun kingdoms of matter, or of the subsidences of the past periods of time (which is built up of objects), are laid; tissues woven over a gulf of it: in one of which last, We Are. To which Fire
we only become sensible when we start it by blows or force, in the rending up of atoms, and in the blasting out of them that which holds them, which then, as Secret Spirit, springs compelled to sight, and as instantly flies, except to the immortal eyes, which receive it (in the supernatural) on the other side.

The Fire-Philosophers maintained that we transcend every thing into Fire, and that we lose it there in the flash; the escape of fire being as the door through which every thing disappears to the other side. In their very peculiar speculations, and in this stupendous and supernatural view of the universe, where we think that fire is the exception, and is, as it were, spotted over the world (in reality, to go out when it goes out), they held that the direct contrary was the truth, and that we, and all things, were spotted upon fire; and that we conquer patches only of fire when we put it out, or win torches (as it were) out of the great flame, when we enkindle fire,—which is our master in the truth, making itself, in our beliefs (in our human needs), the slave. Thus fire, when it is put out, only goes into the under world, and the matter-flags close over it like a grave-stone.

When we witness Fire, we are as if peeping only through a door into another world. Into this, all the (consumed into microscopical smallness) things of this world, the compressed and concentrate matter-heaps of defunct tides of Being and of Time, are in combustion rushing: kingdoms of the floors of the things passed through—up to this moment held in suspense in the invisible inner worlds. All roars through the hollow. All that is mastered in the operations of this Fire, and that is rushing through the hollow made by it in the partition-world of the Knowable—across, and out on the other side, into the Unknowable—seeks, in the Fire, its last and most perfect evolution into Absolute Nothing,—as a
bound prisoner urges to his feet, in his chains, and shrieks for freedom when he is smitten. In Fire, we witness a grand phenomenon of the subsidiary (or further, and under, and inner, and multiplied) birth and death, and the supernatural transit of microscopic worlds, passing from the human sense-worlds to other levels and into newer fields. Then it is that the Last Spirit, of which they are composed, is playing before us; and playing, into last extinction, out of its rings of this-side matter: all which matter, in its various stages of thickening, is as the flux of the Supernatural Fire, or inside God.

It will appear no wonder now, if the above abstractions be caught by the Thinker, how it was that the early people (and the founders of Fire-Worship) considered that they saw God, standing face to face with Him—that is, with all that, in their innermost possibility of thought, they could find as God—in Fire. Which Fire is not our vulgar, gross fire; neither is it the purest material fire, which has something of the base, bright lights of the world still about it—brightest though they be in the matter which makes them the Lightest to the material sight; but it is an occult, mysterious, or inner—not even magnetic, but a supernatural—Fire: a real, sensible, and the only possible Mind, or God, as containing all things, and as the soul of all things; into whose inexpressibly intense, and all-devouring and divine, though fiery, gulf, all the worlds in succession, like ripe fruit to the ground, and all things, fall,—back into whose arms of Immortal Light: on the other side, as again receiving them, all things, thrown off as the smoke off light, again fall!

At the shortest, then, the theory of the Magi may be summed up thus. When, as we think, fire is spotted over all the world, as we have said, it is we who make the mis-
take, necessitated in our man's nature; and we are that which is spotted over it;—just as, while we think we move, we are moved; and we conclude the senses are in us, while we are in the senses: every thing—out of this world—being the very opposite of that which we take it. The views of these mighty thinkers amounted to the suppression of human reason, and the institution of magic, or Godhead, as all. It will be seen at once that this knowledge was possible but for the very few. It is only fit for men when they seek to pass out of the world, and to approach—the nearer according to their natures—God.

The hollow world in which that essence of things, called Fire, plays, in its escape, in violent agitation,—to us, combustion,—is deep down inside of us: that is, deep-sunk inside of the time-stages; of which rings of being (subsidences of spirit) we are, in the flesh,—that is, in the human show of things,—in the outer. It is exceedingly difficult, through language, to make this idea intelligible; but it is the real mystic dogma of the ancient Guebres, or the Fire-Believers, the successors of the Buddhists, or, more properly, Bhuddists.

What is explosion? It is the lancing into the layers of worlds, whereinto we force, through turning the edges out and driving through; in surprisal of the reluctant, lazy, and secret nature, exposing the hidden, magically microscopical stores of things, passed inwards out of the accumulated rings of worlds, out of the (within) supernaturally buried wealth, rolled in, of the past, in the procession of Being. What is smoke but the disrupted vapour-world to the started soul-fire? The truth is, say the Fire-Philosophers, in the rousing of fire we suddenly come upon Nature, and start her violently out of her ambush of things, evoking her secretest and immortal face to us. Therefore is this
knowledge not to be known generally of man; and it is to be assumed at the safest in the disbelief of it: that disbelief being as the magic casket in which it is locked. The keys are only for the Gods, or for godlike spirits.

This is the true view of the religion of the leaders of the ancient Fire-Believers, and of the modern Illuminati.

We shall proceed to demonstrate, in the chapters following, other strange things, hitherto wholly unsuspected in the philosophical short-sight of the modern metaphysicians.

We imagine that it will be said that it is impossible that any religionists could have seriously entertained such extraordinary doctrines; but, incredible as it may seem,—because it requires much preparation to understand them,—it is certainly true, that it is only in this manner the ideas of the divinity of fire, which we know once prevailed largely, can be made intelligible,—we mean, to the philosopher, who knows how properly to value the ancient thinkers, who were as giants in the earth. We shall shortly show that the monuments raised to this strange faith still remain, and that, surviving from the heathen times, the forms still mingle and lurk largely amidst the Christian European institutions—the traces of the idolatry, if not the idolatry itself.

Obelisks, spires, minarets, tall towers, upright stones (Menhirs), monumental crosses, and architectural perpendiculars of every description, and, generally speaking, all erections conspicuous for height and slimness, were representatives of the sworded, or of the pyramidal, Fire. They bespoke, wherever found, and in whatever age, the idea of the First Principle, or the male generative emblem.

Having given, as we hope, some new views of the doctrine of Universal Fire, and shown that there has been error in imagining that the Persians and the ancient Fire-Worshippers were idolaters simply of fire, inasmuch as, in bowing
down before it, they only regarded Fire as a symbol, or visible sign, or thing placed as standing for the Deity,—having, in our preceding chapters, disposed the mind of the reader to consider as a matter of solemnity, and of much greater general significance, this strange fact of Fire-Worship, and endeavoured to show it as a portentous, first, all-embracing as all-genuine principle,—we will proceed to exemplify the wide-spread roots of the Fire-Faith. In fact, we seem to recognise it every where.

Instead of—in their superstitions—making of fire their God, they obtained Him—that is, all that we can realise of Him; by which we mean, all that the human reason can find of the Last Principle—out of it. Already, in their thoughts, had the Magi exhausted all possible theologies; already had they, in their great wisdom, searched through physics—their power to this end (as not being distracted by world's objects) being much greater than that of the modern faith-teachers and doctors; already, in their reveries, in their observations (deep within their deep souls) upon the nature of themselves, and of the microcosm of a world in which they found themselves, had the Magi transcended. They had arrived at a new world in their speculations and deductions upon facts, upon all the things behind which (to men) make these facts. Already, in their determined climbing into the heights of thought, had these Titans of mind achieved, past the cosmical, through the shadowy borders of Real and Unreal, into Magic. For, is Magic wholly false?

Passing through these mind-worlds, and coming out, as we may figure it, at the other side, penetrating into the secrets of things, they evaporated all Powers, and resolved them finally into the Last Fire. Beyond this, they found nothing; as into this they resolved all things. And then, on the Throne of the Visible, they placed this—in the world,
Invisible — Fire: the sense-thing to be worshiped in the senses, as the last thing of them, and the king of them,—that is, that which we know as the phenomenon, Burning Fire,—the Spiritual Fire being impalpable, as having the visible only for its shadow; the Ghostly Fire not being even to be thought upon; thought being its medium of apprehension when it itself had slipped; the waves of apprehension of it only flowing back when it—being intuition—had vanished. We only know that a thought is in us when the thought is off the object and in us: another thought being, at that simultaneous instant, in the object, to be taken up by us only when the first has gone out of us, and so on; but not before to be taken up by us;—that thought being all of us, and a deceptive and unreal thing to pass at all to us through the reason, and there being no resemblance between it and its original; the true thing being “Inspiration,” or “God in us,” excluding all matter or reason, which is only built up of matter. It is most difficult to frame language in regard to these things. Reason can only unmake God; He is only possible in His own development, or in His seizing of us, and “in possession.” Thus Paracelsus and his disciples declare that Human Reason become our master, that is, in its perfection,—but not used as our servant,—transforms, as it were, into the Devil, and exercises his office in leading us away from the throne of Spiritual Light—other, and, in the world, seeming better; in his false and deluding World-Light, or Matter-Light, really showing himself God. This view of the Human Reason, intellectually trusted, transforming into the Angel of Darkness, and effacing God out of the world, is borne out by a thousand texts of Scripture. It is equally in the beliefs and in the traditions of all nations and of all time, as we shall by and by show. Real Light is God’s shadow, or the soul of
MITHRA AND AHRIMANES.

matter; the one is the very brighter, as the other is the very blacker. Thus, the worshipers of the Sun, or Light, or Fire, whether in the Old or the New Worlds, worshiped not Sun, or Light, or Fire,—otherwise they would have worshiped the Devil, he being all conceivable Light; but rather they adored the Unknown Great God, in the last image that was possible to man of any thing—the Fire. And they chose that as His shadow, as the very opposite of that which He really was: honouring the Master through His Servant; bowing before the manifestation, Eldest of Time, for the Timeless; paying homage to the spirit of the Devil-World, or rather to Beginning and End, on which was the foot of the All, that the All, or the Last, might be worshiped; propitiating the Evil Principle in its finite shows, because (as by that alone a world could be made, whose making is alone Comparison) it was permitted as a means of God, and therefore the operation of God Downwards, as part of Him, though Upwards dissipating as before Him,—before Him in whose presence Evil, or Comparison, or Difference, or Time, or Space, or any thing, should be Impossible: real God being not to be thought upon.

But it was not only in the quickening Spirit of Divinity that these things could be seen. Otherwise than in faith, we can hope that they shall now—in our weak attempts to explain them—be gathered as not contradictory, and merely intellectual, and seen as vital and absolute. They need the elevation of the mind in the sense of "inspiration," and not the quickening and the sharpening of the Intellect, as seeking wings—devil-pinions—wherewith to sail into the region only of its own laws, where, of course, it will not find God. Then step in the mathematics, then the senses, then the reason,—then the very perfection of matter-work, or this world's work, sets in,—engines of which the Satanic Powers
shall realise the work. The Evil Spirit conjures, as even by holy command, the translucent sky. The Archangelic, clear, child-like rendering-up in intuitive belief,—intense in its own sun,—is FAITH. Lucifer fills the scope of belief with imitative, dazzling clouds, and built splendours. With these temptations it is sought to dissuade, sought to rival, sought to put out Saints' sight—sought even to surpass in seeming a farther and truer, because a more solid and a more sensible, glory. The apostate, real-born Lucifer is so named as the intensest Spirit of Light, because he is of the things that perish, and of the things that to Mind—because they are all of Matter—have the most of glory! Thus is one of the names of the Devil, the very eldest-born and brightest Star of Light, that of the very morning and beginning of all things—the clearest, brightest, purest, as being soul-like, of Nature; but only of Nature. Real Law, or Nature, is the Devil; real Reason is the Devil.

Now we shall find, with a little patience, that this transcendental, beyond-limit-or-knowledge ancient belief of the Fire-God is to be laid hand upon—as, in a manner, we shall say—in all the stories and theologies of the ancient world—in all the countries (and they, indeed, are all) where belief has grown,—yea, as a thing with the trees and plants, as out of the very ground,—in all the continents—and in both worlds. And out of this great fact of its universal dissipation, as a matter of history the most innate and coexistent, shall we not assume this fire-doctrine as being of truth?—as a thing really, fundamentally, and vitally true? As in the East, so in the West; as in the old time, so in the new; as in the preadamite and post-diluvian worlds, so in the modern and latter-day world; surviving through the ages, buried in the foundations of empires, locked in the rocks, hoarded in legends, main-
tained in monuments, preserved in beliefs, suggested in traditions, borne amidst the roads of the multitude in emblems, gathered up—as the recurring, unremarked, supernaturally coruscant, and yet secret, evading, encrusted, and dishonoured jewel—in rites, spoken (to those capable of the comprehension) in the field of hieroglyphics, dimly glowing up to a fitful suspicion of it in the sacred rites of all peoples, figured forth in the religions, symbolised in a hundred ways; attested, prenoted, bodied forth in occult body, as far as body can;—in fine, in multitudinous fashions and forms forcibly soliciting the sharpness of sight directed to its discovery, and spelt over a floor as underplacing all things, we recognise, we espy, we descry, and we may, lastly, ADMIT the mysterious sacredness of Fire. For why should we not admit it?

Of course, it will not for a moment be supposed that we mean any thing like—or in its nature similar to—ordinary fire. We hope that no one will be so absurd as to suppose that this in any manner could be the mysterious and sacred element for which we are contesting. Where we are seeking to transcend, this would be simply sinking back into vulgar reason. While we are seeking to convict and dethrone this world's reason as the real devil, this would be distinctly deifying common sense. Of common sense, except for common-sense objects, we make no account. We have rather in awed contemplation the divine, ineffable, transcendental SPIRIT—the Immortal Fervour—into which the whole World evolves. We have the mystery of the Holy Spirit in view, called by its many names.

It is because theologies will contest concerning divers names of the same thing, that we therefore seek, in transcending, but to identify. It is because men will dispute about forms, that we seek philosophically to show that all forms are impossible,—that, when we take the human reason into
account, all forms of belief are alike. Reason has been the great enemy of religion. Let us see if this world's reason cannot be mastered.

We are now about—in a new light—to treat of facts, and of various historical monuments. They all bear reference to this universal story of the mystic Fire.

We claim to be the first to point out how strikingly—and yet how, at the same time, without any suspicion of it—these emblems and remains, in so many curious and unintelligible forms, of the magic religion are found in the Christian churches.

Rose Window, or Catherine-Wheel Window.
(From Laon Cathedral, France.)
CHAPTER THE ELEVENTH.

MONUMENTS RAISED TO FIRE-WORSHIP IN ALL COUNTRIES.

We think that we shall be able fully, in our succeeding chapters, to place beyond contradiction an extraordinary discovery. It is, that the whole round of disputed emblems which so puzzle antiquaries, and which are found in all countries, point to the belief in Fire as the First Principle. We seek to show that the Fire-Worship was the very earliest, from the immemorial times,—that it was the foundation religion,—that the attestation to it is preserved in monuments scattered all over the globe,—that the rites and usages of all creeds, down even to our own day, and in every-day use about us, bear reference to it,—that problems and puzzles in religion, which cannot be otherwise explained, stand clear and evident when regarded in this new light,—that in all the Christian varieties of belief—as truly as in Buddhism, in Mohammedanism, in Heathenism of all kinds, whether eastern, or western, or northern, or southern—this "Mystery of Fire" stands ever general, recurring, and conspicuous,—and that in being so, beyond all measure, old, and so, beyond all modern or any idea of it, general,—as universal, in fact, as man himself, and the thoughts of man,—and as being that
beyond which, in science and in natural philosophy, we cannot further go,—it must carry truth with it, however difficult to comprehend, and however unsuspected: that is, as really being the manifestation and Spirit of God, and—to the confounding and annihilation of Atheism—Revelation.

Affirmatively we shall now, therefore, offer to the attention of the reader the universal scattering of the Fire-Monuments, taking up at the outset certain positions about them.

Narrowly considered, it will be found that all religions transcend up into this spiritual Fire-Floor, on which, to speak metaphysically, the phases of Time were laid. Material Fire, which is the brighter as the matter which constitutes it is the blacker, is the shadow (so to express, or to speak, necessarily with "words," which have no meaning in the spirit) of the "Spirit-Light," which invests itself in it as the mask in which alone it can be possible. Thus, material light being the very opposite of God, the Egyptians—who were undoubtedly acquainted with the Fire-Revelation—could not represent God as light. They therefore expressed their Idea of Deity by Darkness. Their chief adoration was paid to Darkness. They bodied the Eternal forth under Darkness.

In the early times before the Deluge,—of which "phenomenon," as there remains a brighter or fainter tradition of it among all the peoples of the globe, it must be true,—Man walked with the Knowledge of Spirit in him. He has derogated, through time, from this primeval, God-informed Type. Knowledge of Good and Evil, or the power of perceiving difference, became his faculty, with his power of propagation, only in his fallen state,—that is, his Gods only came to him in his fallen state. As one of two things must of necessity be under the other, and as "one" and "two" are double in succession,—one being, as a matter of course, before
THE TWO PILLARS OF SETH.

the other,—and "positive," or "particled," existence being in itself denial of "abstract," or "imparticled," existence,—existence needing something other than itself to find itself,—logicians must see at once in this that Comparison is constituted; from out of which difference is built Light and Shadow, or a world, whether the moral world or the real world.

The immemorial landmark, in the architectural form, is the upright. We find the earliest record of this in the setting up of monumental stones. Seth is said to have engraved the wisdom of the Antediluvians upon two pillars,—one of brick, the other of stone,—which he erected in the "Siriadic land"—a Terra Incognita to modern antiquaries. This raising of the "reminding-stone" prevails in all places, and was the act of all time. It is the only independent thing which stands distinct out of the clouds of the past. It would seem universally to refer to the single Supernatural Tradition—all that is heired out of Time. A mysterious Cabalistic volume of high repute, and of the greatest antiquity, is the "Book of Light," whose doctrine divides. The first dogma is that of "Light-Enlightened," or "Self-Existant," which signifies God, or the Light Spiritual, which is darkness in the world, or Manifestation, or Creation. This Light-Enlightened is Inspiration, or blackness to men (God), opposed to knowledge, or brightness to men (the Devil). The second Light is the Enlightening Light, or the Material Light, which is the producer, foundation, and God of this World,—proceeding, nevertheless, from God; for He is All. It is in reverence to this second Light, and to the Mysterious Identity of both (the third power, Three in One),—but only in the necessity of "being,"—all dark-being constituting all bright-being in the Spirit, and Both, and their identity, being One,—that these monumental columns
THE ROSICRUCIANS.

are raised—being really the mark and the signal (warning on, in Time) of supernatural, or magic, knowledge.

Stones were set up by the Patriarchs: the Bible records them. In India, the first objects of worship were monoliths. In the two peninsulas of India, in Ceylon, in Persia, in the Holy Land, in Phoenicia, in Sarmathia, in Scythia, everywhere where worship was attempted (and in what place where man exists is it not?), everywhere where worship was practised (and where, out of fears, did not, first, come the Gods, and then their propitiation?)—in all the countries, we repeat, as the earliest of man's work, we recognise this sublime, mysteriously speaking, ever-recurring monolith, marking up the tradition of the supernaturally real, and only real, Fire-dogma. Buried so far down in time, the suspicion assents that there must somehow be truth in the foundation; not fanciful, legendary, philosophical creed-truth, unexplainable (and only to be admitted without question) truth; but truth, however mysterious and awing, yet cogent, and not to be of philosophy (that is, illumination) denied.

The death and descent of Balder into the Hell of the Scandinavians may be supposed to be the purgatory of the Human Unit (or the God-illuminate), from the Light (through the God-dark phases of being), back into its native Light. Balder was the Scandinavian Sun-God, and the same as the Egyptian Osiris, the Greek Hercules, Bacchus, and Phœbus, or Apollo, the Indian Crishna, the Persian Mithras, the Aten of the empires of Insular Asia; or, even of the Sidonians, the Athyr or Ashtaroth. The presences of all these divinities—indeed, of all Gods—were of the semblance of Fire; and we recognise, as it were, the mark of the foot of them, or of the Impersonated Fire, in the countless uprights, left, as memorials, in the great ebb of the ages (as waves) to nations in the later divisions of
CHINESE PAGODAS.

that great roll of periods called Time: yet so totally un-guessing of the preternatural mystery—seeming the key of all belief, and the reading of all wonders—which they speak.

It is to be noted that all the above religions—all the Creeds of Fire—were exceedingly similar in their nature; that they were all fortified by rites, and fenced around with ceremonies; and that, associated as they were with mysteries and initiations, the disciple was led through the knowledge of them in stages, as his powers augmented and his eyes saw, until, towards the last grades (as he himself grew capable and illuminate), the door was closed upon all after-pressing and unrecognised inquirers, and the Admitted One was himself lost sight of.

There was a great wave to the westward of all knowledge, all cultivation of the arts, all tradition, all intellect, all civilisation, all religious belief. The world was peopled westward. There seems some secret, divine impress upon the world's destinies—and, indeed, ingrained in cosmical matter—in these matters. All faiths seem to have diverged out, the narrower or the wider, as rays from the great central sun of this tradition of the Fire-Original. It would seem that Noah, who is suspected to be the Fo, Foh, or Fohi, of the Chinese, carried it into the farthest Cathay of the middle ages. What is the Chinese Tien; or Earliest Fire? The pagodas of the Chinese (which name, pagoda, was borrowed from the Indian; from which country of India, indeed, probably came into China its worship, and its Bhuddist doctrine of the exhaustion back into the divine light, or unparticled nothingness, of all the stages of Being or of Evil),—the Chinese pagodas, we repeat, are nothing but innumerable gilt and belled fanciful repetitions of the primeval monolith. The fire, or light, is still worshiped in the Chinese temples; it has not been perceived that, in the very
form of the Chinese Pagodas, the fundamental article of the Chinese religion—transmigration, through stages of being, out into nothingness of this world—has been architecturally emblazoned in the diminishing stories, carried upwards, and fining away into the series of unaccountable discs struck through a vertical rod, until all culminates, and—as it were, to speak heraldically of it—the last achievement is blazoned in the gilded ball, which means the final, or Bhuddist, glorifying absorption. Buildings have always telegraphed the insignia of the mythologies; and, in China, the fantastic speaks the sublime. We recognise the same embodied Mythos in all architectural spiring or artistic diminution, whether tapering to the globe or exaltation of the Egyptian Uræus, or the disc, or the Sidonian crescent, or the lunar horns, or the acroterium of the Greek temple, or the pediment of the classic pronaos itself (crowning, how grandly and suggestively, at solemn dawn, or in the “spirit-lustres” of the dimming and, still more than dawn, solemn twilight, the top of some mountain, an ancient of the days). Here, besetting us at every turn, meet we the same mythic emblem: again, in the crescent of the Mohammedan fanes, surmounting even the Latin, and therefore the once Christian, St. Sophia. Last, and not least, the countless “churches” rise, in the Latter-Day Dispensation, sublimely to the universal signal, in the glorifying, or top, or crowning Cross: last of the Revelations!

In the fire-towers of the Sikhs, in the dome-covered and many-storied spires of the Hindoos, in the vertically turreted and longitudinally massed temples of the Bhudds, of all the classes and of all the sects, in the religious buildings of the Cingalese, in the upright flame-fanes of the Parsees, in the original of the campaniles of the Italians, in the tower of St. Mark at Venice, in the flame-shaped or pyramidal (pyr is
the Greek for fire) architecture of the Egyptians (which is the parent of all that is called architecture), we see the recurring symbol. All the minarets that, in the eastern sunshine, glisten through the Land of the Moslem; indeed, his two-horned crescent, equally with the moon, or disc, or two-pointed globe of the Sidonian Ashtaroth (after whose forbidden worship Solomon, the wisest of mankind, in his defection from the God of his fathers, evilly thirsted); also, the mystic discus, or "round," of the Egyptians, so continually repeated, and set, as it were, as the forehead-mark upon all the temples of the land of soothsayers and sorcerers,—this Egypt so profound in its philosophies, in its wisdom, in its magic-seeing, and in its religion, raising out of the black Abyss a God to shadow it,—all the minarets of the Mohammedan, we say, together with all the other symbols of moon, of disc, of wings, or of horns (equally with the shadowy and preternatural beings in all mythologies and in all theologies, to which these adjuncts or insignia are referred, and which are symbolised by them),—all these monuments, or bodied meanings, testify to the Deification of Fire.

What may mean that "Tower of Babel" and its impious raising, when it sought, even past and over the clouds, to imply a daring sign? What portent was that betrayal of a knowledge not for man,—that surmise forbidden save in infinite humility, and in the whispered impartment of the further and seemingly more impossible, and still more greatly mystical, meanings? In utter abnegation of self alone shall the mystery of fire be conceived. Of what was this Tower of Belus, or the Fire, to be the monument? When it soared, as a pharos, on the rock of the traditionary ages, to defy time in its commitment to "form" of the unpronounceable secret,—stage on stage and story on story, though it climbed the clouds, and on its top should shine
the ever-burning Fire,—first idol in the world, “dark save with neglected stars,”—what was the Tower of Babel but a gigantic monolith? Perhaps to record and to perpetuate this ground-fire of all; to be worshiped, an idol, in its visible form, when it should be alone taken as the invisible thought: fire to be waited for (spirit-possession), not waited on (idolatry). Therefore was the speech confounded, that the thing should not be; therefore, under the myth of climbing into heaven by the means of it, was the first colossal monolithic temple (in which the early dwellers upon the earth sought to enshrine the Fire) laid prostrate in the thunder of the Great God! And the languages were confounded from that day,—speech was made babble—thence its name,—that the secret should remain a secret. It was to be only darkly hinted, and to be fitfully disclosed, like a false-showing light, in the theosophic glimmer, amidst the world’s knowledge-lights. It was to reappear, like a spirit, to the “initiate,” in the glimpse of reverie, in the snatches of sight in the profoundest wisdom, through the studies of the ages.

We find, in the religious administration of the ancient world, the most abundant proofs of the secret fire-tradition. Schweiginger shows, in his Introduction into Mythology (pp. 132, 228), that the Phœnician Cabiri and the Greek Dioscuri, the Curetes, Corybantes, Telchini, were originally of the same nature, and are only different in trifling particulars. All these symbols represent electric and magnetic phenomena, and that under the ancient name of twin-fires, hermaphro-dite fire. The Dioscuri is a phrase equivalent to the Sons of Heaven: if, as Herodotus asserts, “Zeus originally represented the whole circle of heaven.”

According to the ancient opinion of Heraclitus, the contest of opposing forces is the origin of new bodies, and the reconcilement of these contending principles is called com-
bustion. This is, according to Montfaucon, sketched in the minutest detail in the engravings of the ancient Phœnician Cabiri.

From India into Egypt was imported this spiritual fire-belief. We recognise, again, its never-failing structure-signal. Rightly regarded, the great Pyramids are nothing but the world-enduring architectural attestation, following (in the pyramidal) the well-known leading law of Egypt's tem­plar piling——mound-like, spiry——of the universal Flame-Faith. Place a light upon the summit, star-like upon the sky, and a prodigious altar the mighty Pyramid then becomes. In this tribute to the world-filling faith, burneth expressed devo­tion to (radiateth acknowledgment of) the immemorial magic religion. There is little doubt that as token and emblem of fire-worship, as indicative of the adoration of the real, accepted deity, these Pyramids were raised. The idea that they were burial-places of the Egyptian monarchs is unten­able when submitted to the weighing of meanings, and when it comes side by side with this better fire-explanation. Cannot we accept these Pyramids as the vast altars on whose top should burn the flame——flame commemorative, as it were, to all the world? Cannot we see in these piles, liter­ally and really transcendental in origin, the Egyptian repro­duction, and a hieroglyphical signalling on, of special truth, eldest of time? Do we not recognise in the Pyramid the repetition of the first monolith?——all the uprights constitut­ing the grand attesting pillar to the supernatural tradition of a Fire-Born World?

The ever-recurring globe with wings, so frequent in the sculptures of the Egyptians, witnesses to the Electric Prin­ciple. It embodies the transmigration of the Indians, re­produced by Pythagoras. Pythagoras resided for a long period in Egypt, and acquired from the priests the philo-
sophic "transition"-knowledge, which was afterwards doctrine. The globe, disc, or circle of the Phoenician Astarte, the crescent of Minerva, the horns of the Egyptian Ammon, the deifying of the ox,—all have the same meaning. We trace, among the Hebrews, the token of the identical mystery in the horns of Moses, distinct in the sublime statue by Michael Angelo in the Vatican; as also in the horns of the Levitical altar: indeed, the use of the "double hieroglyph" in continual ways. The volutes of the Ionic column, the twin-stars of Castor and Pollux, nay, generally, the employment of the double emblem all the world over, in ancient or in modern times, whether displayed as points, or radii, or wings on the helmets of those barbarian chiefs who made war upon Rome, Attila or Genseric, or broadly shown upon the head-piece of the Frankish Clovis; whether emblemed in the rude and, as it were, savagely mystic horns of the Asiatic Idols, or reproduced in the horns of the Runic Hammerer (or Destroyer), or those of the Gothic Mars, or of the modern Devil;—all this double-spreading from a common point (or this figure of Horns) speaks the same story.

The Colossus of Rhodes was a monolith, in the human form, dedicated to the Sun, or to fire. The Pharos of Alexandria was a fire-monument. Heliopolis, or the City of the Sun, in Lower Egypt (as the name signifies), contained a temple, wherein, combined with all the dark superstitions of the Egyptians, the flame-secret was preserved. In most jealous secrecy was the tradition guarded, and the symbol alone was presented to the world. Of the Pyramids, as prodigious Fire-Monuments, we have before spoken. Magnificent as the principal Pyramid still is, it is stated by an ancient historian that it originally formed, at the base, "a square of eight hundred feet, and that it was eight hundred feet high." Another informs us that "three hundred and
sixty-six thousand men were employed twenty years in its erection." Its height is now supposed to be six hundred feet. Have historians and antiquaries carefully weighed the fact (even in the name of the Pyramids), that Pyr, or Pur, in the Greek, means "fire? We would argue that that object, in the Great Pyramid, which has been mistaken for a tomb (and which is, moreover, rather fashioned like an altar, smooth and plain, without any carved work), is, in reality, the vase, urn, or depository, of the sacred, ever-burning fire: of the existence of which ever-living, inextinguishable fire, to be found at some period of the world's history, there is abundant tradition. This view is fortified by the statements of Diodorus, who writes that "Cheops, or Chemis, who founded the principal Pyramid, and Cephren, or Cepheus, who built the next to it, were neither buried here, but that they were deposited elsewhere."

Cheops, Cephrenus, and Mycerinus, the mighty builders of these super-gigantic monuments, of which it is said that they look as if intended to resist the waste of the ages, and, as in a front of supernatural and sublime submission, to await, in the undulation of Time (as in the waves of centuries), the expected revolution of nature, and the new and recommencing series of existence, surely had in view something grander, something still more universally portentous, than sepulture—or even death!

Is it at all reasonable to conclude, at a period when knowledge was at the highest, and when the human powers were, in comparison with ours at the present time, prodigious, that all these indomitable, scarcely believable, physical efforts—that such achievements as those of the Egyptians—were devoted to a mistake?—that the Myriads of the Nile were fools labouring in the dark, and that all the magic of their great men was forgery? and that we, in despising
that which we call their superstition and wasted power, are alone the wise?  No! there is much more in these old religions than, probably, in the audacity of modern denial, in the confidence of these superficial-science times, and in the derision of these days without faith, is in the least degree supposed. We do not understand the old time.

It is evident from their hieroglyphics that the Egyptians were acquainted with the wonders of magnetism. By means of it (and by the secret powers which lie in the hyper-sensual, "heaped floors" of it), out of the every-day senses, the Egyptians struck together, as it were, a bridge, across which they paraded into the supernatural; the magic portals receiving them as on the other and armed side of a drawbridge, shaking in its thunders in its raising (or in its lowering), as out of flesh. Athwart this, in trances, swept the adepts, leaving their mortality behind them: all, and their earth-surroundings, to be resumed at their reissue upon the plains of life, when down in their humanity again.

In the cities of the ancient world, the Palladium, or Protestant Talisman (invariably set up in the chief square or place), was—there is but little doubt—the reiteration of the very earliest monolith. All the obelisks,—each often a single stone, of prodigious weight,—all the singular, solitary, wonderful pillars and monuments of Egypt, as of other lands, are, as it were, only tombstones of the Fire! All testify to the great, so darkly hinted secret. In Troy was the image of Pallas, the myth of knowledge, of the world, of manifestation, of the fire-soul. In Athens was Pallas-Athene, or Minerva. In the Greek cities, the form of the deity changed variously to Bacchus, to Hercules, to Phæbus-Apollo; to the tri-formed Minerva, Dian, and Hecate; to the dusky Ceres, or the darker Cybele. In the wilds of Sarmathia, in the wastes of Northern Asia, the luminous
SINGULAR IDEAS REGARDING FIRE.

rays descended from heaven, and, animating the Lama, or "Light-Born," spoke the same story. The flames of the Greeks, the towers of the Phoenicians, the emblems of the Pelasgi; the story of Prometheus, and the myth of his stealing the fire from Heaven, wherewith to animate the man (or ensoul the visible world); the forges of the Cyclopes, and the monuments of Sicily; the mysteries of the Etrurians; the rites of the Carthaginians; the torches borne, in all priestly demonstrative processions, at all times, in all countries; the vestal fires of the Romans; the very word flamen, as indicative of the office of the officiating sacerdote; the hidden fires of the ancient Persians, and of the grimmer (at least in name) Guebres; the whole mystic meaning of flames on altars, of the ever-burning tomb-lights of the earlier peoples, whether in the classic or in the barbarian lands;—everything of this kind was intended to signify the deified Fire. Fires are lighted in the funeral ceremonies of the Hindoos and of the Mohammedans, even to this day, though the body be committed whole to earth. Wherefore fire, then? Cremation and urn-burial, or the burning of the dead—practised in all ages—imply a profounder meaning than is generally supposed. They point to the transmigration of Pythagoras, or to the purgatorial reproductions of the Indians, among whom we the earliest find the dogma. The real signification of fire-burial is the commitment of human mortality into the last-of-all matter, overleaping the intermediate states; or the delivering over of the man-unit into the Flame-Soul, past all intervening spheres or stages of the purgatorial: the absolute doctrine of the Bhudds, taught, even at this day, among the initiate all over the East. Thus we see how classic practice and heathen teaching may be made to reconcile,—how even the Gentile and Hebrew, the mythological and the (so-called) Christian, doctrine har-
monise in the general faith—founded in magic. That magic is indeed possible is the moral of our book.

We have seen that Hercules was the myth of the Electric Principle. His pillars (Calpe and Abyla) are the Dual upon which may be supposed to rest a world. They stood in the days when giants might really be imagined,—indeed, they almost look as impressive of it now,—the twin prodigious monoliths, similar in purpose to the artificial pyramids. They must have struck the astonished and awed discoverers' gaze, navigating that silent Mediterranean (when men seemed as almost to find themselves alone in the world), as the veritable, colossal, natural pillars on which should burn the double Lights of the forbidden Baal: witness of the ever-perpetuated, ever-perpetuating legend of the fire-making! So to the Phoenician sailors, who, we are told, first descried, and then stemmed royally through, these peaked and jagged and majestic Straits—doorway to the mighty floor of the new blue ocean, still of the more Tyrian crystal depth—rolling, in walls of waves, under the enticing blaze of the cloud-empurpled, all-imperial, western sun, whose court was fire indeed,—God's, not Baal's!—so to these men of Sidon, emblemed with the fire-white horns of the globed Astarte, or Ashtaroth, showed the monster rocks: pillar-portals—fire-topped, as the last world-beacon—to close in (as gate) that classic sea, and to warn, as of the terrors of the unknown, new, and second world of farthest waters, which stretched to the limits of possibility. Forsaking, indeed, daringly, were these Iberi their altars, to tempt perils, when they left behind them that month of their Mediterranean: that sea upon whose embayed and devious margin were nations the most diverse, yet the mightiest of the earth. The very name of the Iberia which they discovered, and to which they themselves gave title, hints the
MAGIC Hieroglyphics.

Cabiri, who carried, doubtless, in their explorations, as equally with their commerce and their arts, their religious usages and their faith, as pyramically intensifying, until it flashed truth upon the worlds in the grand Fire-Dogma! —that faith to which sprung monuments from all the seaborders at which glittered the beak—itself an imitation flame—of every many-caed, single ship of their adventurous, ocean-dotting fleets,—the precursors of the exploring ships of the Vikings.

We claim the caldron of the witches as, in the original, the vase or urn of the fiery transmigration, in which all the things of the world change. We accept the sign of the double-extended fingers (pointed in a fork), or of horns, which throughout Italy, the Greek Islands, Greece, and Turkey, is esteemed as the counter-charm to the Evil Eye, as the occult Magian telegraphic. The horns, or radii, of the Merry-Andrew, Jester, or Motley, and the horns of Satan,—indeed, the figure of horns generally,—even have a strange affinity in the consecrate and religious. The horse-shoe, so universally employed as a defensive charm, and used as a sign to warn off and to consecrate, when—as it so frequently is—displayed at the entrance of stables, outhouses, and farm-buildings in country places, speaks the acknowledgment of the Devil, or Sinister Principle. The rearing aloft, and "throwing out," as it were, of protesting, and—in a certain fashion—badge-like, magic signs, in the bodies of bats, and wild nocturnal creatures, fixed upon barn-doors, we hold to be the perpetuation of the old heathen sacrifice to the harmful gods, or a sort of devil-propitiation. Again, in this horse-shoe we meet the horse, as indicative of, and connected with, spirit-power: of which strange association we shall by and by have more to say. The horse-shoe is the mystic symbol of the Wizard's Foot, or the
sigma, or sign, of the abstract "Four-footed," the strangely secret, constantly presented, but as constantly evading, magic meaning conveyed in which (a tremendous cabalistic sign) we encounter everywhere. May the original, in the East, of the horse-shoe arch of the Saracens, which is a foundation-form of our Gothic architecture,—may the horse-shoe form of all arches and cupolas (which figure is to be met everywhere in Asia),—may these strange, rhomboidal curves carry reference to the ancient mysterious blending of the ideas of the horse and the supernatural and religious? It is an awing thought; but Spirits and supernatural embodiments—unperceived by our limited, vulgar senses—may make their daily walk amidst us, in the ways of the world. It may indeed be that they are sometimes suddenly happened upon, and, as it were, surprised. The world—although so silent—may be noisy with ghostly feet. The Unseen Ministers may every day pass in and out among our ways, and we all the time think that we have the world to ourselves. It is, as it were, to this inside, unsuspected world that these recognizable, deprecatory signs of horse-shoes and of charms are addressed; that the harming presences, unprovoked, may pass harmless; that the jealous watch of the Unseen over us may be assuaged in the acknowledgment; that the unseen presences amidst us, if met with an unconsciousness for which man cannot be accountable, may not be offended with carelessness for which he may be punishable.

Egyptian Scarabæus and Stellar Disc.
CHAPTER THE TWELFTH.

DRUIDICAL STONES AND THEIR WORSHIP.

The monolith, talisman, mysterious pillar, or stone memorial, raised in attestation of the fire-tradition, and occupying the principal square or place, Forum, or middlemost or navel-point of the city in ancient times, is the original of our British market-crosses. The *cromlech*, or *bilihan*, or *trilithon*; the single, double, or grouped stones found in remote places,—in Cornwall, in Wales, in various counties of England, in by-spots in Scotland, in the Scottish Isles, in the Isle of Man, and in Ireland,—all these stones of memorial—older than history—speak the secret faith of the ancient peoples. Stonehenge, with its inner and outer circles of stones, enclosing the central mythic object, or altar; all the Druidic or Celtic remains; stones on the tops of mountains, altar-tables in the valley; the centre measuring, or obelisk, stones, in market-places or centre-spaces in great towns, from which the highways radiated, spaced—in mileage—to distance; that time-honoured relic, "London Stone," still extant in Cannon Street, London; the Scottish "sacred stone," with its famous oracular gifts, vulgarly called Jacob's Pillow, transported to England by the dominant Edward...
the First, and preserved in the seat of the Coronation-Chair in Westminster Abbey; even the placing of upright stones as tombstones, which is generally accepted as a mere means of personal record,—for, be it remembered, the ancients placed tablets against their walls by way of funeral register;—all follow the same rule. We consider all these as variations of the upright commemorative pillar.

The province of Brittany, in France, is thickly studded with stone pillars, and the history and manners of its people teem with interesting, and very curious, traces of the worship of them. In these parts, and elsewhere, they are distinguished by the name of Menhirs and Penlvans. The superstitious veneration of the Irish people for such stones is well known. M. de Fréminville says in his *Antiquités du Finisterre*, p. 106: “The Celts worshiped a divinity which united the attributes of Cybele and Venus.” This worship prevailed also in Spain,—as, doubtless, throughout Europe,—inasmuch as we find the Eleventh and Twelfth Councils of Toledo warning those who offered worship to stones that they were sacrificing to devils.

We are taught that the Druidical institution of Britain was Pythagorean, or patriarchal, or Brahminical. The presumed universal knowledge which this order possessed, and the singular customs which they practised, have afforded sufficient analogies and affinities to maintain the occult and remote origin of Druidism. A Welsh antiquary insists that the Druidical system of the Metempsychosis was conveyed to the Brahmins of India by a former emigration from Wales. But the reverse may have occurred, if we trust the elaborate researches which would demonstrate that the Druids were a scion of the Oriental family. The reader is referred to Toland's *History of the Druids*, in his *Miscellaneous Works*, vol. ii. p. 163; also to a book published in London in 1829,
with the title, *The Celtic Druids; or, an Attempt to show that the Druids were the Priests of Oriental Colonies, who emigrated from India,*—by Godfrey Higgins. A recent writer confidently intimated that the knowledge of Druidism must be searched for in the Talmudical writings; but another, in return, asserts that the Druids were older than the Jews.

Whence and when the British Druids transplanted themselves to this lone world amid the ocean, no historian can write. We can judge of the Druids simply by the sublime monuments which are left of them, surviving, in their majestic loneliness, through the ages of civilisation. Unhewn masses or heaps of stones tell alone their story; such are their cairns, and cromlechs, and corneddes, and that wild architecture, whose stones hang on one another, still frowning on the plains of Salisbury.

Among the most remarkable ancient remains in Wales (both North and South) are the Druidical stones: poised in the most extraordinary manner,—a real engineering problem,—the slightest touch will sometimes suffice to set in motion the Logan, or rocking, stones, whether these balanced masses are found in Wales or elsewhere. We think that there is very considerable ground for concluding that all these mounted stones were oracular, or, so to express it, speaking; and that, when sought for divine responses, they were caused first to tremble, then to heave, and finally, like the tables of the modern (so-called) Spiritualists, to tip intelligibly. To no other reason than this could we satisfactorily refer the name under which they are known in Wales: namely, "bowing-stones." For the idea that they were denominated "bowing-stones" because to the people they formed objects of adoration is a supposition infinitely less tenable. The reader will perceive that we admit the phenomenon, when the mysterious rapport is effected, of the spontaneous
sensitiveness and ultimate motion of solid objects. No one who has witnessed the strange, unexplained power which tables, after proper preparation, acquire of supplying intelligent signals,—impossible as it may seem to those who have not witnessed and tested these phenomena,—but will see that there is great likelihood of these magic stones having been reared and haunted by the people for this special sensitive capacity. This idea would greatly increase the majesty and the wonder of them; in other respects, except for some extraordinary and superstitious use, these mysterious, solitary stones appear objectless.

The famous “Round Table” of King Arthur—in regard to which that mystic hero is understood to have instituted an order of knighthood—may have been a magical consulting-disc, round which he and his peers sat for oracular directions. As it is of large dimensions, it presents a similarity not only to some of the prophesying-stones, but also, in a greater degree, to the movable enchanted drums of the Lapps and Finns, and to the divining-tables of the Shamans of Siberia. There lies an unsuspected purpose, doubtless of a mysterious (very probably of a superstitious and supernatural) character, in this exceedingly ancient memorial of the mythic British and heroic time at Winchester.

When spires or steeples were placed on churches, and succeeded the pyramidal tower, or square or round tower, these pointed erections were only the perpetuations of the original monolith. The universal signal was reproduced through the phases of architecture. The supposition that the object of the steeple was to point out the church to the surrounding country explains but half its meaning. At one period of our history, the signal-lights abounded all over the country as numerously as church-spires do in the present days. Exalted on eminences, dotting hills, spiring on
cliffs, perched on promontories,—from sea inland, and from the interior of the country to broad river-side and to the sea-shore,—rising from woods, a universal telegraph, and a picturesque landmark,—the tower, in its meaning, spoke the identical, unconscious tradition with the blazing Baal, Bael, or Beltane Fires: those universal votive torches, which are lost sight of in the mists of antiquity, and which were so continual in the Pagan countries, so reiterated through the early ages, and which still remained so frequent in the feudal and monastic periods,—these were all connected closely with religion. The stone tower was only, as it were, a "stationary flame." The origin of beacons may be traced to the highest antiquity. According to the original Hebrew (which language, as the Samaritan, is considered by competent judges as the very oldest), the word "beacon" may be rendered a mark, monolith, pillar, or upright. At one time the ancient Bale, Bel, or religious fires of Ireland were general all over the country. They have been clearly traced to a devotional origin, and are strictly of the same character as the magic, or Magian, fires of the East. During the political discontents of 1831 and 1832, the custom of lighting these signal-fires was very generally revived amidst the party-distractions in Ireland. In the ancient language of this country, the month of May is yet called, "nic Beal tienne," or the month of Beal (Bael or Baal's) fire. The Beltane festival in the Highlands has been ascribed to a similar origin. Druidical altars are still to be traced on many of the hills in Ireland, where Baal (Bael or Beal's) fires were lighted. Through the countries, in the present day, which formed the ancient Scandinavia, and in Germany, particularly in the North, on the first of May, as in celebration of some universal feast or festival, fires are even now lighted on the tops of the hills. How closely this practice accords with the superstitious
usages of the Bohemians, or "Fire-kings," of Prague, is discoverable at a glance. All these western flames are representative of the early fire, which was as equally the object of worship of the Gubhs, Guebres, or Gauris, of Persia, as it is the admitted natural principle of the Parsees. Parsees, Bohemians, the Gypsies or Zingari, and the Guebres, all unite in a common legendary fire-worship.

Besides the ancient market-crosses and wayside Gothic uprights, of which so many picturesque specimens are yet to be found in England, Wales, and Scotland, we may enumerate the splendid funeral-crosses raised by the brave and pious King Edward to the memory of his wife. Holinshed writes: "In the nineteenth yeare of King Edward, quene Elianor, King Edward's wife, died, upon saint Andrew's even, at Hirdebie, or Herdelie (as some haue), neere to Lin-colne. In euerie towne and place where the cors rested by the waie, the King caused a crosse of cunning workmanship to be erected in remembrance of hir. Two of the like crosses were set up at London,—one at Westcheape" (the last but one), "and the other at Charing," which is now Charing Cross, and where the last cross was placed.

The final obsequies were solemnised in the Abbey-Church at Westminster, on the Sunday before the day of St. Thomas the Apostle, by the Bishop of Lincoln; and the King gave twelve manors and hamlets to the Monks, to defray the charges of yearly obits, and of gifts to the poor, in lasting commemoration of his beloved consort.

Some writers have stated the number of crosses raised as above at thirteen. These were, Lincoln, Newark, Grantham, Leicester, Stamford, Geddington, Northampton, Stoney-Stratford, Woburn, Dunstable, St. Alban's, Waltham, Westcheape (Cheapside), not far from where a fountain for a long time took the place of another erection, and where the statue of
Sir Robert Peel now stands. The last place where the body rested, whence the memorial-cross sprung, and which the famous equestrian statue of King Charles the First now occupies, is the present noisy highway of Charing Cross; and, as then, it opens to the royal old Abbey of Westminster. What a changed street is this capital opening at Charing Cross, Whitehall, and Parliament Street, from the days—it almost then seeming a river-bordered country road—when the cross spired at one end, and the old Abbey closed the view southwards.

In regard to the royal and sumptuous obsequies of Queen Eleanor, Fabian, who compiled his Chronicles towards the latter part of the reign of Henry VII., speaking of her burial-place, has the following remark: “She hath he II waxe tapers brennynge upon her tombe both days and nyght. Which so hath contynned syne the day of her buryinge to this present daye.”

The beacon-warning, the Fiery Cross of Scotland, the universal use of fires on the tops of mountains, on the seashore, and on the highest turrets of castles, to give the signal of alarm, and to telegraph some information of importance, originated in the first religious flames. Elder to these summoning or notifying lights was the mysterious worship to which fire rose as the answer. From religion the beacon passed into military use. On certain set occasions, and on special Saints’ Days, and at other times of observance, as the traveller in Ireland well knows, the multitude of fires on the tops of the hills, and in any conspicuous situation, would gladden the eyes of the most devout Parsee. The special subject of illumination, however we may have become accustomed to regard it as the most ordinary expression of triumph, and of mere joyous celebration, has its origin in a much more abstruse and sacred source. In Scotland, parti-
cularly, the reverential ideas associated with these mythic fires are strong. Perhaps in no country have the impressions of superstition deeper hold than in enlightened, thoughtful, educated, and (in so many respects) prosaic Scotland; and in regard to these occult and ancient fires, the tradition of them, and the ideas concerning their origin, are preserved as a matter of more than cold speculation. Country legendary accounts and local usages,—obtained from we know not whence,—all referring to the same myth, all pointing to the same Protean superstition, are traceable, to the present, in all the English counties. Cairns in Scotland; heaps of stones in by-spots in England, especially—solitary or in group—to be found on the tops of hills; the Druidical mounds; the raising of crosses on the Continent, in Germany, amongst the windings of the Alps, in Russia (by the roadside, or at the entrance of villages), in Spain, in Poland, in lonely and secluded spots; probably even the first use of the “sign-post” at the junction of roads;—all these point, in strange, widely radiant suggestion, to the fire-religion.

Whence obtained is that word “sign,” as designating the guide, or direction, post, placed at the intersection of cross-roads? Nay, whence gained we that peculiar idea of the sacredness, or of the “forbidden,” attaching to the spot where four roads meet? It is *sacer*, as sacred, in the Latin; “extra-church,” or “heathen,” supposedly “unhallowed,” in the modern acceptation. The appellative *ob*, in the word “obelisk,” means occult, secret, or magic. *Ob* is the Biblical name for sorcery. It is also found as a word signifying converse with forbidden spirits, among the Negroes on the coast of Africa, from whence—and indicating the practices marked out by it—it was transplanted to the West Indies, where it still exists.

It is well known that a character resembling the Runic
alphabet was once widely diffused throughout Europe. "A character, for example, not unlike the hammer of Thor is to be found in various Spanish inscriptions, and lurks in many magical books. Sir William Jones," proceeds our author,—we quote from the Times of the 2d of February 1859, in reviewing a work upon Italy by the late Lord Broughton,—"has drawn a parallel between the deities of Meru and Olympus; and an enthusiast might perhaps maintain that the vases of Alba Longa were a relic of the times when one religion prevailed in Latium and Hindustan. It is most singular that the Hindoo cross is precisely the hammer of Thor." All our speculations tend to the same conclusion. One day, it is a discovery of cinerary vases; the next, it is etymological research; yet again, it is ethnological investigation; and, the day after, it is the publication of unsuspected tales from the Norse: but all go to heap up the proofs of our consanguinity with the peoples of history,—and of an original general belief, we might add.

What meaneth the altar, with its mysterious lights? What mean the candles of the Catholic worship, burning even by day, borne in the sunshine, blazing at noon? What meaneth this visible fire, as an element at Mass, or at service at all? Wherefore is this thing, Light, employed as a primal witness and attestation in all worship? To what end, and expressive of what mysterious meaning,—surviving through the changes of the faiths and the renewal of the Churches, and as yet undreamt,—burn the solemn lamps in multitude, in their richly worked, their highly wrought, cases of solid gold or of glowing silver, bright-glancing in the mists of incense, and in the swell or fall of sacredly melting or of holily entrancing music? Before spiry shrine and elaborate drop-work tabernacle; in twilight hollow, diapered as into a "glory of stone," and in sculptured niche; in the
serried and starry ranks of the columned wax, or in rows of bossy cressets,—intertwine and congregate the perfumed flames, as implying the tradition eldest of time! What meaneth, in the Papal architectural piles, wherein the Ghostly Fire is enshrined, symbolic real fire, thus before the High Altar? What speak those constellations of lights? what those "silvery stars of Annunciation"? What signifieth fire upon the altar? What gather we at all from altars and from sacrifice,—the delivering, as through the gate of fire, of the first and the best of this world,—whether of the fruits, whether of the flocks, whether of the primal and perfectest of victims, or the rich spoil of the "world-states"? What mean the human sacrifices of the Heathen; the passing of the children through the fire to Moloch; the devotion of the consummate, the most physically perfect, and most beautiful, to the glowing Nemesis, in that keenest, strangest, yet divinest, fire-appetite; the offered plunder, the surrendered lives, of the predatory races? What signifies the sacrifice of Iphigenia, the burning of living people among the Gauls, the Indian fiery immolations? What is intended even by the patriarchal sacrifices? What is the meaning of the burnt offerings, so frequent in the Bible? In short, what read we, and what seem we conclusively to gather, we repeat, in this mystic thing, and hitherto almost meaningless, if not contradictory and silencing, institution of sacrifice by fire? What gather we, otherwise than in the explanation of the thing signified by it? We speak of sacrifice as practised in all ages, enjoined in all holy books, elevated into veneration, as a necessity of the highest and most sacred kind. We find it in all countries,—east, west, north, and south;—in the Old equally as in the New World. From whence should this strange and unexplainable rite come, and what should it mean? as, indeed, what should
mean the display of bright fire at all in the mysteries,—Egyptian, Cabiric, Scandinavian, Eleusinian, Etrurian, Indian, Persian, Primal American, Tartarian, Phcenician, or Celtic,—from the earliest of time until this very modern, instant, English day of candles on altars, and of the other kindred religious High-Church lightings?—respecting which there rankleth such scandal, and intensifieth such purposeless babble, such daily dispute! What should all this inveterate ritualistic (as it is absurdly called) controversy, and this ill-understood bandying, be about? Is it that, even at this day, men do not understand any thing about the symbols of their religion, and that the things for which they struggle are mere words? really that the principles of their wonderful and supernatural faith are perfectly unknown, and that they reason with the inconclusiveness, but with nothing of the simplicity, of children—nothing of the divine light of children?

But, we would boldly ask, what should all this wealth of fire-subjects mean, of which men guess so little, and know less? What should this whole principle of fire and of sacrifice be? What should it signify, but the rendering over and the surrender up, in all abnegation, of the state of man, of the best and most valued "entities" of this world, past and through the fire, which is the boundary and border and wall between this world and the next?—that last element of all, on which is all,—Fire,—having most of the light of matter in it, as it hath most of the blackness of matter in it, to make it the fiercer; and both being copy, or shadow, of the Immortal and Ineffable Spirit-Light, of which, strange as it may sound, the sun is the very darkness! because that, and the whole Creation,—as being Degree, or even, in its wonders, as Greater or Less,—beautiful and godlike as it is to man, is as the shadow of God, and hath nothing of Him; but is instituted as the place of purifica-
tion, "being," or punishment: the opposite of God, the enemy of God, and, in its results, apart from the Spirit of God,—which rescues supernaturally from it,—the denier of God! This world and its shows—nay, Life—stands mystically as the Devil, Serpent, Dragon, or "Adversary," typified through all time; the world terrestrial being the ashes of the fire celestial.

The torches borne at funerals are not alone for light: they have their mystic meaning. They mingle largely, as do candles on altars, in all solemn celebrations. The employment of light in all religious rites, and in celebration in the general sense, has an overpoweringly great meaning. Festival, also, claims flame as its secret signal and its password to the propitious Invisible. Lights and flambeaux and torches carried in the hand were ever the joyous accompaniment of weddings. The torch of Hymen is a proverbial expression. The ever-burning lamps of the ancients; the steady, silent tomb-lights (burning on for ages), from time to time discovered among the mouldering monuments of the past in the hypogea, or sepulchral caves, and buildings broken in upon by men in later day; the bonfires of the moderns; the fires on the tops of hills; the mass of lamps disposed about sanctuaries, whether encircling the most sacred point of the mosque of the Prophet, the graded and cumulative Grand Altar in St. Peter's, or the saint-thrones in the churches of the Eternal City, or elsewhere, wherever magnificence riseth into expansion, and intensifieth and overpowers in the sublimity which shall be felt; the multitudinous grouped lamps in the Sacred Stable—the Place of the Holy Nativity, meanest and yet highest—at Bethlehem; the steady, constant lights ever burning in mystic, blazing attestation in Jerusalem, before the tomb of the Redeemer; the chapelle ardente in the funeral observances of the ubi-
SNake, Serpent, And Dragon.

quitous Catholic Church; the congregated tapers about the bed of the dead—the flames in mysterious grandeur (and in royal awe), placed as in waiting, so brilliant and striking, and yet so terrible, a court, and surrounding the stately catafalque; the very word falcated, as bladed, sworded, or scimitared (as with the guard of waved or sickle-like flames); the lowly, single candle at the bedside of the poverty-attenuated dead—thus by the single votive light only allied (yet in unutterably mystic and godlike bond) as with the greatest of the earth; the watch-lights every where, and in whatever country; the crosses (spiry memorials, or monoliths) which rose as from out the earth, in imitation of the watching candle, at whatever point rested at night, in her solemn journey to her last home, the body of Queen Eleanor, as told in the English annals (which flame-memorials, so raised by the pious King Edward in the spiry, flame-imitating stone, are all, we believe, obliterate, or put out of things, but the well-known, magnificent, restored cross at Waltham);—all these, to the keen, philosophic eye, stand as the best proofs of the diffusion of this strange Fire-Dogma: mythed as equally, also, in that "dark-veiled Cotytto;"—

"She to whom the flame
Of midnight torches burns."

"She," this blackest of concealment in the mysteries, Isia, Io, Ashtaroth, or Astarte, or Cybele, or Proserpine; "he," this Baal, Bel, "Baalim," Foh, Brahm, or Bhudd; "it,"—for the Myth is no personality, but sexless,—Snake, Serpent, Dragon, or Earliest at all of Locomotion, under whatever "Letter of the Alphabet;"—all these symbols, shapes, or names, stand confessed in that first, absolutely primal, deified element, Fire, which the world, in all religions, has worshiped, is worshiping, and will worship to the end of
time, unconsciously; we even in the Christian religion, and in our modern day, still doing it—unwitting the meaning of the mysterious symbols which pass daily before our eyes: all which point, as we before have said, to Spirit-Light as the Soul of the World,—otherwise, to the inexpressible mystery of the Holy Ghost.

Little is it suspected what is the myth conveyed in the Fackelstanz and Fackelzug of Berlin, of which so much was heard, as a curious observance, at the time of the marriage of the Princess Royal of England with the Prince Frederic William of Prussia. This is the Teutonic perpetuation of the “Bacchic gloryings,” of the Saturnian rout and flame-brandishing, of the earliest and last rite.

The ring of light, glory, nimbus, aureole, or circle of rays, about the heads of sacred persons; the hand (magnetic and mesmeric) upon sceptres; the open hand borne in the standards of the Romans; the dragon-crest of Maximin, of Honorius, and of the Barbarian Leaders; the Dragon of China and of Japan; the Dragon of Wales; the mythic Dragon trampled by St. George; the “crowned serpent” of the Royal House of Milan; the caims, as we have already affirmed, and the Runic Monuments; the Round Towers of Ireland (regarding which there hath been so much, and so diverse and vain, speculation); the memorial piles, and the slender (on sea-shore and upland) towers left by the Vikings, or Sea-Kings, in their adventurous and predatory voyages; the legends of the Norsemen or the Normans; the vestiges so recently, in the discovery of the forward-of-the-old-time ages, exposed to the light of criticism, in the time-out-of-mind antique and quaint cities of the extinct peoples and of the forgotten religions in Central America; the sun- or fire-worship of the Peruvians, and their vestal- or virgin-guardians of the fire; the priestly fire-rites of the Mexicans,
quenched by Cortez in the native blood, and the context of their strange, apparently incoherently wild, belief; the inscriptions of amulets, on rings and on talismans; the singular, dark, and, in many respects, uncouth *arcana* of the Bohemians, Zingari, Gitanos, or Gypsies; the teaching of the Talmud; the hints of the Cabala; also that little-supposed thing, even, meant in the British golden collar of "S.S.," which is worn as a relic of the oldest day (in perpetuation of a *mythos* long ago buried—spark-like—and forgotten in the dust of ages) by some of our officials, courtly and otherwise, and which belongs to no known order of knighthood, but only to the very highest order of knighthood, the Magian, or to Magic;—all these point, as in the diverging radii of the greatest of historical light-suns, to the central, intolerable ring of brilliancy, or the phenomenon—the original God's revelation, eldest of all creeds, survivor, almost, of Time—of the Sacred Spirit, or Ghostly Flame,—the baptism of Fire of the Apostles!

In this apparently strange—nay, to some minds, alarming—classification, and throwing under one head, of symbols diametrically opposed, as holy and unholy, benign and sinister, care must be taken to notice that the types of the "Snake" or the "Dragon" stand for the occult "World-Fire," by which we mean the "light of the human reason," or "manifestation" in the general sense, as opposed to the spiritual light, or unbodied light; into which, as the reverse,—although the same,—the former transcends. Thus, *shadow* is the only possible means of demonstrating light. It is not reflected upon that we must have means whereby to be lifted. After all, we deal only with *glyphs*, to express inexpressible things. Horns mean spirit-manifestation; Radius signifies the glorying absorption (into the incomprehensible) of that manifestation. Both signify the same:
from any given point, the One Spirit working downwards, and also transcending upwards. From any given point, in height, that the intellect is able to achieve, the same Spirit downwards intensifies into Manifestation; upwards, dissipates into God! In other words, before any knowledge of God can be formed at all, it must have a shape. God is an abstraction; Man is an entity.
CHAPTER THE THIRTEENTH.

INQUIRY AS TO THE POSSIBILITY OF MIRACLE.

The definition of a miracle has been exposed to numerous erroneous views. Inquirers know not what a miracle is. It is wrong to assume that nature and human nature are alike invariably, and that you can interpret the one by the other. There may be in reality great divergence between the two, though both start from the common point—individuality. A miracle is not a violation of the laws of nature (because nature is not every thing), but a something independent of all laws,—that is, as we know laws. The mistake that is so commonly made is the interpreting—or rather the perceiving, or the becoming aware of—that thing we denominate a miracle through the operation of the human senses, which in reality have nothing whatever to do with a miracle, because they cannot know it. If nature, as we understand it, or law, as we understand it, be universal, then, as nothing can be possible to us which contradicts either the one or the other (both being the same),—nature being law, and law being nature,—miracle must be impossible, and there never was, nor could there ever be, such a thing as a miracle. But a
miracle works outwardly from us at once, and not by a human path—moves away from the world (that is, man's world) as a thing impossible to it, though it may be true none the less, since our nature is not all nature, nor perhaps any nature, but even a philosophical delusion. In the conception of a miracle, however, the thing apprehended revolves to us, and can come to us in no other way, and we seize the idea of it through a machinery,—our own judgment,—which is a clear sight compounded of our senses,—a synthesis of senses that, in the very act of presenting an impossible idea, destroys it as humanly possible. Miracle can be of no date or time, whether earlier, whether later, if God has not withdrawn from nature; and if He has withdrawn from nature, then nature must have before this fallen to pieces of itself; for God is intelligence—not life only; and matter is not intelligent, though it may be living. It is not seen that during that space—which is a space taken out of time, though independent of it—in which miracle is possible to us, we cease to be men, because time, or rather sensation, is man's measure; and that when we are men again, and back in ourselves, the miracle is gone, because the conviction of the possibility of a thing and its non-possibility has expelled it. The persuasion of a miracle is intuition, or the operation of God's Spirit active in us, that drives out nature for the time, which is the opposite of the miracle.

No miracle can be justified to men's minds, because no amount of evidence can sustain it; no number of attestations can affirm that which we cannot in our nature believe. In reality, we believe nothing of which our senses do not convince us,—even these not always. In other matters, we only believe because we think that we believe; and since the conviction of a miracle has nothing of God except
the certain sort of motive of possessed, excluding exaltation, which, with the miracle, fills us, and to which exaltation we can give no name, and which we can only feel as a certain something in us, a certain power and a certain light, conquering and outshining another light, become fainter,—it will follow that the conviction of the possibility of a miracle is the same sort of unquestioning assurance that we have of a dream in the dream itself; and that, when the miracle is apprehended in the mind, it just as much ceases to be a miracle when we are in our senses, as a dream ceases to be that which it was, a reality, and becomes that which it is, nonentity, when we awake. But to the questions, what is a dream?—nay, what is waking?—who shall answer? or who can declare whether in that broad outside, where our minds and their powers evaporate or cease, where nature melts away into nothing that we can know as nature, or know as any thing else, in regard to dreams and realities, the one may not be the other? The dream may be man's life to him,—as another life other than his own life,—and the reality may be the dream (in its various forms), which he rejects as false and confusion simply because it is as an unknown language, of which, out of his dream, he can never have the alphabet, but of which, in the dream, he has the alphabet.

"A pretence that every strong and peculiar expression is merely an Eastern hyperbole is a mighty easy way of getting rid of the trouble of deep thought and right apprehension, and has helped to keep the world in ignorance."—Morsels of Criticism, London, 1800.

It is very striking that, in all ages, people have clothed the ideas of their dreams in the same imagery. It may therefore be asked whether that language, which now occupies so low a place in the estimation of men, be
not the actual waking language of the higher regions, while we, awake as we fancy ourselves, may be sunk in a "sleep of many thousand years, or, at least, in the echo of their dreams, and only intelligibly catch a few dim words of that language of God, as sleepers do scattered expressions from the loud conversation of those around them." So says Schubert, in his *Symbolism of Dreams*. There is every form of the dream-state, from the faintest to the most intense, in which the gravitation of the outside world overwhelms the man-senses, and absorbs the inner unit. *In fact, the lightest and faintest form of dream is the very thoughts that we think.*

A very profound English writer, Thomas de Quincey, has the following: "In the English rite of Confirmation, by personal choice, and by sacramental oath, each man says, in effect: 'Lo! I rebaptise myself; and that which once was sworn on my behalf, now I swear for myself.' Even so in dreams, perhaps, under some secret conflict of the midnight sleeper, lighted up to consciousness at the time, but darkened to the memory as soon as all is finished, each several child of our mysterious race may complete for himself the aboriginal fall."

As to what is possible or impossible, no man, out of his presumption and of his self-conceit, has any right to speak, nor can he speak; for the nature of his terms with all things outside of him is unknown to him. We know that miracle (if once generally believed in) would terminate the present order of things, which are perfectly right and consistent in their own way. Things that contradict nature are not evoked by reason, but by man in his miracle-worked imagining, in all time; and such exceptions are independent of reason, which elaborates to a centre downwards, but exhales to apparent impossibility (but to real truth) upwards,—that is, truth out of this world.
Upwards has nothing of man; for it knows him not. He
ceases there; but he is made as downwards, and finds his
man's nature there, lowest of all—his mere bodily nature
there perhaps, even to be found originally among the four-
footed; for by the raising of him by God alone has Man got
upon his feet, and set his face upward to regard the stars,—
those stars which originally, according to the great "Hermes
Trismegistus" (Thrice-Master), in the astrological sense,
raised him from the primeval level; for we refer heaven
always to a place over our heads, since there only we can
be free of the confinements of matter; for above us or below
us is equally the altitude.

May not the sacrificial, sacramental rites—may not those
minute acts of priestly offering, as they succeed each other,
and deepen in intensity and in meaning—may not those aids
of music to enlarge and change and conjure the sense of
hearing, and to react on sight (it being notorious that
objects change their character as we look at them when
operated upon by beautiful music)—may not those dream-
producing, somnolent, enchanting vapours of incense, which
seem to loosen from around each of us the walls of the
visible, and to charm open the body, and to let out
(or to let in) new and unsuspected senses, alight with a new
light not of this world, the light of a new spiritual world,
in which we can yet see things, and see them as things
to be recognised,—may not all this be true, and involve
impossibilities as only seeming so, but true enough, in-
asmuch as miracle possibly is true enough?

May not all these effects, and may not the place and
the persons in the body, and may not the suggestions,
labouring to that end, of unseen, unsuspected, holy minis-
tries, such as thronging angels, casting off from about us our
swathes and bands of thick mortality in the new, overmaster-
ing influence,—may not all this be as the bridge across which we pass out from this world gladly into the next, until we meet, as on the other side, Jesus, the Ruler in very deed, but now felt as the Offered, the Crucified, the complete and accepted “Living Great Sacrifice”? May we not in this “Eucharist” partake, not once, but again and again, of that—even of that solid—which was our atonement, and of that blood which was poured out as the libation to the “Great Earth,” profaned by “Sin,” partaking of that reddest (but that most transcendently lucent) sacrament, which is to be the new light of a new world? Is not the very name of the inter-communicating High-Priest that of the factor of this mystic, glorious, spirit-trodden, invisible “bridge”? Whence do we derive the word Pontifex, or Pontifex Maximus (the Great, or the Highest, Bridge-Maker, or Builder), elicited in direct translation from the two Latin words pons and facio in the earliest pre-Christian theologies, and become “Pontiff” in the Roman and the Christian sense—“Pontiff” from “Pontifex”?

It is surely this meaning—that of fabricator or maker of the bridge between things sensible and things spiritual, between body and spirit, between this world and the next world, between the spiritualising “thither” and the substantiating “hither,” trans being the transit. The whole word, if not the whole meaning, may be accepted in this Roman-Catholic sense of “transubstantiation,” or the making of miracle.
CHAPTER THE FOURTEENTH.

CAN EVIDENCE BE DEPENDED UPON?—EXAMINATION OF HUME'S REASONING.

"Our evidence for the truth of the Christian religion is less than the evidence for the truth of our senses; because, even in the first authors of our religion, it was no greater. It is evident it must diminish in passing from them to their disciples; nor can any one rest such confidence in their testimony as in the immediate object of his senses."

This is wrong. The testimony of some men is more valid than is the evidence of the senses of some others.

"It is a general maxim, that no objects have any discoverable connection together. All the inferences which we can draw from one to another are founded merely on our experience of their constant and regular conjunction. It is evident that we ought not to make an exception to this maxim in favour of human testimony, whose connection with any event seems in itself as little necessary as any other."

It may be put to any person who carefully considers Hume's previous position as to the fixedness of the proofs of the senses, whether this last citation does not upset it.

"The memory is tenacious to a certain degree. Men
commonly have an inclination to truth and a principle of probity. They are sensible to shame when detected in a falsehood. These are qualities in human nature."

This is a mistake; for they are not qualities in human nature. They are the qualities of grown men, because they are reflective of the state of the man when he is living in community,—not as man.

"Contrariety of evidence, in certain cases, may be derived from several different causes: from the opposition of contrary testimony—from the character or number of the witnesses—from the manner of their delivering their testimony—or from the union of all these circumstances. We entertain a suspicion concerning any matter of fact when the witnesses contradict each other—when they are but few, or of a doubtful character—when they have an interest in what they affirm—when they deliver their testimony with hesitation, or, on the contrary, with too violent asseverations. There are many other particulars of the same kind, which may diminish or destroy the force of any argument derived from human testimony."

Now, we contest these conclusions; and we will endeavour to meet them with a direct answer. The recognition of likelihood—not to say of truth—is intuitive, and does not depend on testimony. In fact, sometimes our belief goes in another direction than the testimony, though it be even to matters of fact.

Hume resumes with his cool, logical statements: "The reason why we place any credit in witnesses and historians is not derived from any connection which we perceive à priori between testimony and reality, but because we are accustomed to find a conformity between them."

Just so! we would add to this,—"because we are accustomed to find a conformity between them."

We are now arrived at the grand dictum of cool-headed, self-possessed Hume, who thought that by dint of his logical
clearness, and by his definitions, he had exposed the im-
possibility of that unaccountable thing which men call a
miracle, and upon the possibility or the non-possibility of
which religion will be ultimately found to wholly depend,
because religion is entirely opposed to laws of "must be"
and "must not be."

"A miracle is a violation of the laws of nature," he
declares.

Not so, we will rejoin. It is only a violation of the
laws of our nature. We have no right to set our nature up
as the measure of all nature. This is merely the mind's
assumption; and it is important to expose its real emptiness,
because all Hume's philosophy turns upon this, which he
imagines to be a rigid axiom, to which all argument must
recur.

"A firm and unalterable experience has established the
laws of nature. The proof against a miracle, from the very
nature of the fact, is as entire as any argument from ex-
perience can possibly be imagined." So says Hume.

But experience has nothing to do with a miracle, because
it is a sense not comprised in the senses, but an unexperi-
enced sensation or perception, exposing the senses as dreams,
and overriding their supposed certainty and totality by a new
dream, or apparent certainty, contradicting the preceding.
If this were not possible, then the senses, or the instantane-
ous judgment which comes out of their sum—or the thing
"conviction," as we call it—would be the measure of every
thing past, present, and to come,—which we know it is not.

Hume, or any philosopher, is wrong in dogmatising at
all, because he only speaks from his own experience; and
individual experience will in no wise assist towards the
discovery of real truth. In philosophy, no one has a right
to lay down any basis, and to assume it as true. The
THE ROSICRUCIANS.

philosopher must always argue negatively, not affirmatively. The moment he adopts the latter course, he is lost. Hume presupposes all his Treatise on Miracles in this single assumption that nature itself has laws, and not laws only to our faculties. The mighty difference between these two great facts will be at once felt by a thinker; but we will not permit Hume to assume any thing where he has no right, and so to turn the flank of his adversary by artfully putting forward and carrying an assumption. Nature is only nature in man's mind, but not true otherwise, any more than the universe exists out of the mind—or out of the man, who has in thinking to make it. Take away, therefore, the man in whom the idea of it is, and the universe disappears. We will question Hume, the disbelieving philosopher, as to his right to open his lips, because it is very doubtful if language, which is the power of expression, any more than that which we call consistent thought, is inseparably consistent to man, who is all inconsistency in his beginning, middle, and end—in his coming here and in his going hence out of this strange world, to which he does not seem really to belong, and in which he seems to have been somehow obtruded, as something not of it—strange as this seems.

As to the philosophy of Hume, granting the ground, you have, of course, all the basis for the constructions raised upon that ground. But suppose we, who argue in opposition to Hume, dispute his ground?

Hume, in his Treatise on Miracles, only begs the question; and there is therefore no wonder that, having first secured his position by consent or negligence of the opponent, he may deal from it the shot of what artillery he pleases; and his opponent, having once allowed the first ground,—or the capacity to argue,—has unwittingly let in all the ruinous
results which follow; these philosophically are indisputable. We would urge that Hume has no capacity to argue in this way, inasmuch as he has taken the "human mind" as the capacity of arguing. Either reason or miracle must be first removed, because you can admit either; for they are opposites, and cannot camp in the same mind: one is idea, the other is no idea—in this world; and as we are in this world, we can only judge as in this world. In another world, Hume the philosopher may himself be an impossibility, and therefore be a miracle, through his own philosophy, and the application of it.

Hume is the man of ideas, and is therefore very correct as a philosopher, if philosophy were possible; but we deny that it is possible in regard to any speculation out of this world. Ideas—that is, philosophical ideas—may be described as the steps of the ladder by which we philosophically descend from God. Emotions are also the steps by which alone we can ascend to Him. Human reason is a possibility, from the line drawn by which either ascent or descent may be made. The things Necessity, or Fate, and Free Will, passing into the mind of man (both may be identical in their nature, though opposite in their operation), dictate from the invisible, but persuade from the visible.

Hume asserts that "a uniform experience amounts to a proof." It does not do so, any more than "ninety-nine" are a "hundred."

He also says that "there is not to be found in all history any miracle attested by a sufficient number of men to be believed." Now, we will rejoin to this, that a public miracle is a public impossibility; for the moment it has become public, it has ceased to be a miracle. "In the case of any particular assumed miracle," he further says, "there are not a sufficient number of men of such unquestioned good
sense, education, and learning as to secure us against all delusion in themselves—of such undoubted integrity as to place them beyond all suspicion of any design to deceive others.” Now, to this our answer is, that our own senses deceive us; and why, then, should not the asseverations of others?

Hume adduces a number of circumstances which, he insists, “are requisite to give us a full assurance in the testimony of men;” but nothing can give us this assurance in other men’s testimony that he supposes. We judge of circumstances ourselves, upon our own ideas of the testimony of men—not upon the testimony itself; for we sometimes believe that which the witnesses, with the fullest reliance upon themselves, deny. We judge upon our own silent convictions,—that is, upon all abstract points. It is for this reason that assurances even by angels, in Scripture, have not been believed by the persons to whom the message was directly sent. Of course, if the miracle was displayed through the ordinary channels of human comprehension, it was no miracle; for comprehension never has miracle in it.

“The maxim by which we commonly conduct ourselves in our reasonings is, that the objects of which we have no experience resemble those of which we have,” says Hume.

Now, this remark is most true; but we cannot help this persuasion. We conclude inevitably that things unknown should resemble things known, because, whatever may be outside of our nature, we have no means of knowing it, or of discovering any thing else that is other than ourselves. We can know nothing, except through our own machinery of sense. As God made outside and inside, God alone works, though we think that we—that is, Nature—work. God (who is Himself miracle) can effect im-
HUME'S INCREDULITY CONTESTED.

possibilities, and make two one by annihilating the distinction between them.

Hume says that, "where there is an opposition of arguments, we ought to give the preference to such as are founded on the greatest number of past observations."

So we ought, if the world were real; but, as it is not, we ought not. Things unreal cannot make things real.

Hume declares that, "if the spirit of religion join itself to the love of wonder, there is an end of common sense. Human testimony, in these circumstances, loses all pretensions to authority. A religionist may be an enthusiast, and imagine he sees what has no reality. He may know his narrative to be false, and yet persevere in it with the best intentions in the world, for the sake of promoting so holy a cause. Even where this delusion has not taken place, vanity, excited by so strong a temptation, operates on him more powerfully than on the rest of mankind in any other circumstances, and self-interest with equal force. His auditors may not have, and commonly have not, sufficient judgment to canvass his evidence. What judgment they have, they renounce by principle in these sublime and mysterious subjects. If they were ever so willing to employ it, passion and a heated imagination disturb the regularity of its operations. Their credulity increases his impudence, and his impudence overpowers their credulity."

Now, the reverse of all this is more nearly the fact. Ordinary minds have more incredulity than credulity. It is quite a mistake to imagine that credulity is the quality of an ignorant mind; it is rather incredulity that is.

"Eloquence, when at its highest pitch," says Hume, "leaves little room for reason or reflection."

Now, on the contrary, true eloquence is the embodiment or synthesis of reason and reflection.
"Eloquence," resumes Hume, "addresses itself entirely to the fancy or the affections, captivates the willing hearers, and subdues their understanding. Happily, this pitch it seldom attains; but what a Tully or a Demosthenes could scarcely effect over a Roman or Athenian audience, every capuchin, every itinerant or stationary teacher, can perform over the generality of mankind, and in a higher degree, by touching such gross and vulgar passions."

All the above is simply superficial assumption.

Hume then speaks of "forged miracles and prophecies;" but there is no proof of any forged miracle or prophecy. He says that "there is a strong propensity in mankind to the extraordinary and the marvellous. There is no kind of report which rises so easily and spreads so quickly, especially in country places and provincial towns, as those concerning marriages, inasmuch that two young persons of equal condition never see each other twice, but the whole neighbourhood immediately join them together."

This is all nonsense. There is always a reason for these suppositions.

Hume then goes on to adduce this same love of inspiring curiosity and delight in wonders as the cause of the belief in miracles.

"Do not," he asks, "the same passions, and others still stronger, incline the generality of mankind to believe and report, with the greatest vehemence and assurance, all religious miracles?"

Now, this is only very poor; and, besides, it is all assumption of truths where they are not.

Hume speaks of supernatural and miraculous relations as having been received from "ignorant and barbarous ancestors." But what is ignorance and barbarism?—and what is civilisation? He says that they have been "transmitted
with that inviolable sanction and authority which always attend received opinions." But supernatural and miraculous relations have never been received opinions. They have always been contested, and have made their way against the common sense of mankind, because the common sense of mankind is common sense, and nothing more; and, in reality, common sense goes but a very little way, even in the common transactions of life; for feeling guides us in most matters.

"All belief in the extraordinary," Hume declares, "proceeds from the usual propensity of mankind towards the marvellous, which only receives a check at intervals from sense and learning." But what are sense and learning both but mere conceits?

"'It is strange,' a judicious reader is apt to say," remarks Hume, "upon the perusal of these wonderful histories, 'that such prodigious events never happen in our days.'" But such events do occur, we would rejoin; though they are never believed, and are always treated as fable, when occurring in their own time.

"It is experience only," says Hume, "which gives authority to human testimony." Now, it is not experience only which induces belief, but recognition. It is not ideas, but light. We do not go to the thing in ideas, but the thing comes into us, as it were: for instance, a man never finds that he is awake by experience, but by influx of the thing "waking"—whatever the act of waking is, or means.

"When two kinds of experience are contrary, we have nothing to do but to subtract the one from the other, and embrace an opinion either on one side or the other, with that assurance which arises from the remainder."

This which follows may be a conclusion in regard to the above. If beliefs were sums, we should, and could, subtract
the difference between two amounts of evidence, and accept
the product; but we cannot help our beliefs, because they
are intuitions, and not statements.

Hume, towards the close of his strictly hard and logical
_Treatise on Miracles_, brings forward an argument, which to
all appearance is very rigid and conclusive, out of this his
realistic philosophy—if that were true:

"Suppose that all the historians who treat of England
should agree that on the 1st of January 1600 Queen Eliza­
beth died,—that both before and after her death she was
seen by her physicians and the whole court, as is usual
with persons of her rank,—that her successor was acknow­
ledged and proclaimed by the parliament,—and that, after
being interred a month, she again appeared, resumed the
throne, and governed England for three years. I must
confess that I should be surprised at the concurrence of so
many odd circumstances, but should not have the least
inclination to believe so miraculous an event. _I should not
doubt of her pretended death, and of those other public circum­
cstances that followed it._"

Now, in their own sequence, as they occur to us as real
facts in the world, so unreal are true, positive circumstances,
that we only believe them by the same means that we
believe dreams—that is, by intuition. There is no fact, so
to say. Startling as it may appear, I appeal to the conscious­
ness of those who have witnessed death whether the death
itself did not seem unreal, and whether it did not remain
without belief as a fact until the negative—that is, "The dead
man is not here"—affirmed it, not through present persuas­
sions, but through unreal incidents, post-dating reappearance.

As to the belief in miracles, Hume asserts that the
Christian religion cannot be believed by any reasonable
person without a miracle. "Mere reason," he assures us,
“is insufficient to convince us of its veracity; and whoever is moved by faith to assent to it, is conscious of a continued miracle in his own person, which subverts all the principles of his understanding.”

The theosophic foundation of the Bhuddistic Maya, or Universal Illusion, has been finely alluded to by Sir William Jones, who was deeply imbued with the Oriental mysticism and transcendental religious views.

“The inextricable difficulties,” says he, “attending the vulgar notion of material substances, concerning which we know this only, that we know nothing, induced many of the wisest among the ancients, and some of the most enlightened among the moderns, to believe that the whole creation was rather an energy than a work, by which the Infinite Being, who is present at all times and in all places, exhibits to the minds of His creatures a set of perceptions, like a wonderful picture or piece of music, always varied, yet always uniform; so that all bodies and their qualities exist, indeed, to every wise and useful purpose, but exist only as far as they are perceived—a theory no less pious than sublime, and as different from any principle of atheism as the brightest sunshine differs from the blackest midnight.”

Mont St.-Michel, Normandy.
CHAPTER THE FIFTEENTH.

FOOTSTEPS OF THE ROSICRUCIANS AMIDST ARCHITECTURAL OBJECTS.

THOMAS VAUGHAN, of Oxford, a famous Rosicrucian, whom we have before mentioned, and who in the year 1650 published a book upon some of the mysteries of the Rosicrucians, has the following passage. His work is entitled Anthroposophia Theomagica; it has a supplemental treatise, called Anima Magica Abscondita; we quote from pages 26 and 27 of the united volume.

"In regard of the Ashes of Vegetables," says Vaughan, "although their weaker exterior Elements expire by violence of the fire, yet their Earth cannot be destroyed, but is Vitriified. The Fusion and Transparency of this substance is occasioned by the Radicall moisture or Seminal water of the Compound. This water resists the fury of the Fire, and cannot possibly be vanquished. 'In hac Aqui' (saith the learned Severine), 'Rosa latet in Hieme.' These two principles are never separated; for Nature proceeds not so far in her Dissolutions. When Death hath done her worst, there is an Union between these two, and out of them shall God raise us at the last day, and restore us to a spiritual constitution. I
do not conceive there shall be a Resurrection of every Species, but rather their Terrestrial parts, together with the element of Water (for there shall be 'no more sea.' Revelation), shall be united in one mixture with the Earth, and fixed to a pure Diaphanous substance. This is St. John's Crystall gold, a fundamental of the New Jerusalem—so called, not in respect of Colour, but constitution. Their Spirits, I suppose, shall be reduced to their first Limbus, a sphere of pure, ethereall fire, like rich Eternal Tapestry spread under the Throne of God."

Coleridge has the following, which bespeaks (and precedes), be it remarked, Professor Huxley's late supposed original speculations. The assertion is that the matrix or formative substance is, at the base, in all productions, "from mineral to man," the same.

"The germinal powers of the plant transmute the fixed air and the elementary base of water into grass or leaves; and on these the organic principle in the ox or the elephant exercises an alchemy still more stupendous. As the unseen agency weaves its magic eddies, the foliage becomes indifferently the bone and its marrow, the pulpy brain or the solid ivory; and so on through all the departments of nature."—Coleridge's *Aids to Reflection*, 6th ed. vol. i. p. 328. See also Herder's *Ideen*, book v. cap. iii.

We think that we have here shown the origin of all Professor Huxley's speculations on this head appearing in his "Lectures," and embodied in articles by him and others in scientific journals and elsewhere.

In a lecture delivered at the Royal Institution, Mr. W. S. Savory made the following remarks: "There is close relationship between the animal and the vegetable kingdoms. The organic kingdom is connected with both by the process of crystallisation, which closely resembles some of the processes
of vegetation and of the growth of the lower orders of animal creation."

The "Philosopher's Stone," in one of its many senses, may be taken to mean the magic mirror, or translucent "spirit-seeing crystal," in which things impossible to ordinary ideas are disclosed. "Know," says Synesius, "that the Quintessence" (five-essence) "and hidden thing of our 'stone' is nothing less than our celestial and glorious soul, drawn by our magistery out of its mine, which engenders itself and brings itself forth." The term for "Chrysal," or "Crystal," in Greek, is the following; which may be divided into twin- or half-words in the way subjoined:

XΡΥΣΤ | | ΑΛΑΟΣ.

Crystal is a hard, transparent, colourless "stone," composed of simple plates, giving fire with steel, not fermenting with acid menstrua, calcining in a strong fire, of a regular angular figure, supposed by some to be "formed of dew coagulated with nitre."

Amber is a solidified resinous gum, and is commonly full of electricity. It was supposed, in the hands of those gifted correspondingly, to abound with the means of magic. In this respect it resembles the thyrsus or pine-cone, which was always carried in processions—Bacchanalian or otherwise—in connection with the mysteries. We can consider the name of the palace, or fortress, or "royal" house in Grenada, in Spain, in this respect following. The word "Alhambra," or "Al-Hambra," means the "Red." In Arabia this means the place of eminence, the "place of places," or the "Red," in the same acceptation that the sea between Arabia and Egypt is called the "Red Sea." All spirits generally (in connection with those things supposed to be evil or indifferent especially) are "laid" in the "Red Sea,"
when disposed of by exorcism, or in forceful conjuration. We think that this "Hambra," "ambra," or "ambre," is connected with the substance amber, which is sometimes very red, and which amber has always been associated with magical influences, magical formularies, and with spirits. We have seen an ancient crucifix, carved in amber, which was almost of the redness of coral. Amber has always been a substance (or gem, or gum) closely mingling with superstitions, from the most ancient times. For further connected ideas of the word "amber" and the substance "amber" in relation to magic and sorcery, and for the recurrence of the word "amber" and its varieties in matters referring to the mysteries and the mythology generally of ancient times, the reader will please to refer to other parts of this volume.

While excavations were in progress at a mound in Orkney, described by Mr. John Stuart, Secretary of the Society of Antiquaries of Scotland, on July 18th, 1861, numerous lines of "runes" of various sizes were found on the walls and on the roof of a large vaulted chamber in the earth. When the discoveries were completed, the series of runes exceeded 700 in number; figures of "dragons and a cross" were also cut on some of the slabs. There are many mounds of various forms and sizes in this part of Orkney, and there is a celebrated circle of Druidical Stones on the narrow peninsula which divides the two lochs of Stennis.

Pliny says that the word "boa," for a snake, comes from "bovine," because "young snakes are fed with cow's milk." Here we have the unexpected and unexplained connection of the ideas of "snake" and "cow." The whole subject is replete with mystery, as well as the interchange of the references to the "Cross" and the "Dragon" found in the
insignia of all faiths, and lurking amongst all religious buildings.

On a Phænician coin, found at Citium or Cyprus, and engraved in Higgins's Celtic Druids, p. 117, may be seen a cross and an animal resembling a hippocampus, both of which, or objects closely similar, appear on ancient sculptured stones in Scotland. The same two things, a cross and a strange-looking animal, half mammal, half fish or reptile, but called by Mr. Hodgson, of Newcastle-upon-Tyne, a Basilisk, appear together on a Mithraic sculptured slab of the Roman period, found in the north of England. What is more remarkable still, the "star" and "crescent," or "sun" and "moon," also appear, the whole being enclosed in what has been called the "Fire-Triangle," or "Triangle with its Face Upwards."

The Builder, London Architectural Journal, of June 5th, 1863, has some valuable observations on geometrical and other symbols.

In regard to the word "Alhambra," we may associate another word appropriated to Druidical Stones in England—Men-Amber. A famous Logan-Stone, commonly called "Men-Amber," is in the parish of Sethney, near Pendennis, Cornwall. It is 11 feet long, 4 feet deep, and 6 feet wide. From this the following derivatives may be safely made:

Men-Amber, Mon-Amber, Mon-Ambra, Mon-Amrha, Mon-Amra (M’Om-Ra, Om-Ra), "Red Stone," or Magic, or Angelic, or Sacred Stone. This red colour is male—it signifies the Salvator.

The following is the recognitory mark or talisman of the Ophidie: ☿. The Scarabæus, Bee, Ass, Typhon, Basilisk, Saint-Basil, the town of Basle (Basil, or Bâle), in Switzerland (of this place it may be remarked, that the appropriate cognisance is a "basilisk," or a "snake"), the mythic horse,
or *hippocampus*, of Neptune, the lion, winged (or natural), the Pegasus, or winged horse, the Python, the Hydra, the Bull (Osiris), the Cow (or Io), are mythological ideas which have each a family connection. All the above signify an identical myth. This we shall presently show conclusively, and connect them all with the worship of fire.

Our readers have no doubt often wondered to see on the table-monuments in Christian cathedrals a creature resembling a dog, or generally like some four-footed animal, trampled by the feet of the recumbent effigy. It is generally a male which is represented as performing this significant effortment, trampling or piercing with the point of his sword, or the butt of the crosier (in his left hand, be it remembered). This crosier is the ancient *pedum*, or *litus*. At Brent-Pelham, in Hertfordshire, there is a tomb, bearing the name of a knight, Pierce Shonke, *built in the wall*. He is said to have died A.D. 1086. Under the feet of the figure there is a *cross-flourie*, and under the cross a serpent (Weever, p. 549). There is an inscription which, translated, means:

"Nothing of Cadmus nor Saint George, those names of great renown, survives them but their names;
But Shonke one serpent kills, t'other defies,
And in this wall, as in a fortress, lies."

See Weever's *Ancient Funeral Monuments*. He calls the place "*Burnt Pelham*," and he says: "In the wall of this Church lieth a most ancient Monument: A Stone wherein is figured a man, and about him an Eagle, a Lion, and a Bull, having all wings, and a fourth of the shape of an Angell, as if they should represent the four Evangelists: under the feet of the man is a crosse Flourie."

"The being represented cross-legged is not always a proof of the deceased having had the merit either of having been a *crusader*, or having made a pilgrimage to the Holy
Sepulchre. I have seen at Milton, in Yorkshire, two figures of the Sherbornes thus represented, who, I verily believe, could never have had more than a wish to enter the Holy Land.” Pennant writes thus of the Temple, London.

Weever points out, in relation to the monument of Sir Pierce or Piers Shonke described above: “Under the Cross is a Serpent. Sir Piers Shonke is thought to have been sometime the Lord of an ancient decayed House, well moated, not farre from this place, called ‘O Piers Shonkea.’ He flourished Ann. a conquestu, vicesimo primo.”—Weever, p. 549.

“The personation of a dog—their invariable accompaniment, as it is also found amongst the sculptures of Persepolis, and in other places in the East—would in itself be sufficient to fix the heathen appropriation of these crosses” (the ancient Irish crosses), “as that animal can have no possible relation to Christianity; whereas, by the Tuath-de-danaans, it was accounted sacred, and its maintenance enjoined by the ordinances of the state, as it is still in the Zend books, which remain after Zoroaster.”—O’Brien’s Round Towers of Ireland, 1834, p. 359.
“I apprehend the word ‘Sin’ came to mean Lion when the Lion was the emblem of the Sun at his summer solstice, when he was in his glory, and the Bull and the ‘Man’ were the signs of the Sun at the Equinoxes, and the Eagle at the winter solstice.”—Anacalypsis, vol. ii. p. 292.

Figure 23 (see opposite page) is an Egyptian bas-relief, of which the explanation is the following: A is the Egyptian Eve trampling the Dragon (the goddess Neith, or Minerva); B, a Crocodile; C, Gorgon’s head; D, Hawk (wisdom); E, feathers (soul).

“The first and strongest conviction which will flash on the mind of every ripe antiquary, whilst surveying the long series of Mexican and Toltecan monuments preserved in these various works, is the similarity which the ancient monuments of New Spain bear to the monumental records of Ancient Egypt. Whilst surveying them, the glance falls with familiar recognition on similar graduated pyramids, on similar marks of the same primeval Ophite worship, on vestiges of the same Triune and Solar Deity, on planispheres and temples, on idols and sculptures, some of rude and some of finished workmanship, often presenting the most striking affinities with the Egyptian.”—Stephens’ and Catherwood’s Incidents of Travel in Central America.
CHAPTER THE SIXTEENTH.

THE ROUND TOWERS OF IRELAND.

"It is astonishing how much of the Egyptian and the Indian symbolism of very early ages passed into the usages of Christian times. Thus: the high cap and the hooked staff of the god became the bishop's mitre and crosier; the term nun is purely Egyptian, and bore its present meaning; the erect oval, symbol of the Female Principle of Nature, became the Vesica Piscis, and a frame for Divine Things; the Crux-Ansata, testifying the union of the Male and Female Principle in the most obvious..."
manner, and denoting fecundity and abundance as borne in the god’s hand, is transformed, by a simple inversion, into the Orb surmounted by the Cross, and the ensign of royalty.” Refer to The Gnostics and their Remains, p. 72.

The famous “Stone of Cabar,” Kaaba, Cabir, or Kebir, at Mecca, which is so devoutly kissed by the faithful, is a talisman. It is called the “Tabernacle” (Taberna, or Shrine) of the Star Venus. “It is said that the figure of Venus is seen to this day engraved upon it, with a crescent.” The very Caaba itself was at first an idolatrous temple, where the Arabians worshiped “Al-Uza”—that is, Venus. See Bobovius, Dr. Hyde Parker, and others, for particulars regarding the Arabian and Syrian Venus. She is the “Urania-corniculatae sacrum” (Selden, De Venere Syriaca). The “Ihrám is a sacred habit, which consists only of two woollen wrappers; one closed about the middle of devotees, to cover,” &c., “and the other thrown over their shoulders.” Refer to observations about Noah, later in our book; Sale’s Discourse, p. 121; Pococke’s India in Greece, vol. ii. part i. p. 218. The Temple of Venus at Cyprus was the Temple of Venus-Urania. “No woman entered this temple” (Sale’s Koran, chap. vii. p. 119; note, p. 149). Accordingly, Anna Commena and Glycas (in Renald. De Mah.) say that “the Mahometans do worship Venus.” Several of the Arabian idols were no more than large, rude stones (Sale’s Discourse, p. 20; Koran, chap. v. p. 82). The stone at Mecca is black. The crypts, the subterranean churches and chambers, the choirs, and the labyrinths, were all intended to enshrine (as it were) and to conceal the central object of worship, or this sacred
“stone.” The pillar of Sueno, near Forres, in Scotland, is an obelisk. These obelisks were all astrological _gnomons_, or "pins," to the imitative stellar mazes, or to the "fateful charts" in the "letter-written" skies. The astronomical "stalls," or "stables," were the many "sections" into which the "hosts" of the starry sky were distributed by the Chaldeans. The _Decumens_ (or tenths), into which the ecliptic was divided, had also another name, which was _Ashre_, from the Hebrew particle _as_, or _ash_, which means "fiery," or "fire." The Romans displayed reverence for the ideas connected with these sacred stones. Cambyses, in Egypt, left the obelisks or single magic stones. The _Linghams_ in India were left untouched by the Mohammedan conquerors. The modern Romans have a _phallus_ or _lingha_ in front of almost all their churches. There is an obelisk, altered to suit Christian ideas (and surmounted in most instances in modern times by a cross), in front of every church in Rome. There are few churchyards in England without a _phallus_ or obelisk. On the top is usually now fixed a dial. In former times, when the obeliscar form was adopted for ornaments of all sorts, it was one of the various kinds of Christian acceptable cross which was placed on the summit. We have the single stone of memorial surviving yet in the Fire-Towers (Round Towers of Ireland). This _phallus_, upright, or "pin of stone," is found in every Gilgal or Druidical Circle. It is the boundary-stone or _terminus_, the parish mark-stone; it stands on every motehill; lastly (and chiefly), this stone survives in the stone in the coronation chair at Westminster (of which more hereafter), and also in the famous "London Stone," or the _palladium_, in Cannon Street, City of London: which stone is said to be "London's fate"—which we hope it is not to be in the unprosperous sense.

The letter "S," among the Gnostics, with its grimmer or
harsher brother (or sister) "Z," was called the "reprobate," or "malignant," letter. Of this portentous sigma (or sign) "S" (the angular and not serpentine "S" is the grinding or bass "S"—the letter "Z"), Dionysius the Halicarnassian says as follows: that "the letter 'S' makes a noise more brutal than human. Therefore the ancients used it very sparingly" ("Περί σωμάτων," see, also, sect. 14 of Origin and Progress of Language, vol. ii. p. 233).

Notwithstanding the contentions of opposing antiquaries, and the usually received ideas that the "Irish Round Towers" were of Christian, and not heathen, origin, the following book, turning up very unexpectedly, seems to settle the question in favour of O'Brien, and of those who urge the incredibly ancient devotion of the Round Towers to a heathen myth—fire-worship, in fact.

"John O'Daly, 9 Anglesea Street, Dublin. Catalogue of Rare and Curious Books, No. 10, October 1855, Item 105: De Antiquitate Turrum Belanorum Pagana Kerriensis, et de Architectura non Campanilis Ecclesiasticae, T. D. Corcagiensi, Hiberno. Small 4to, old calf, with numerous woodcut engravings of Round Towers interspersed through the text. 10t. Lovanii, 1610." The bookseller adds: "I never saw another copy of this curious old book." This book—which there is no doubt is genuine—would seem finally to settle the question as to the character of these Irish Round Towers, which are not Christian belfries, as Dr. George Petrie, and others sharing his erroneous beliefs, persistently assure us, but heathen Lithoi, or obelisks, in the sense of all those referred to in other parts of this work. They were raised in the early religions, as the objects of a universal worship. All antiquaries know of what object the phallus stands as the symbolical representation. It needs not to be more particular here.
THE ROSICRUCIANS.

The "Fleur-de-Lis" is a sacred symbol, descending from the Chaldeans, adopted by the Egyptians, who converted it into the deified "scarab," the emblem of the "Moon-god;" and it is perpetuated in that mystically magnificent badge of France, the female "Lily," or "Lis." All the proofs of this lie concealed in our Genealogy of the Fleur-de-Lis (p. 40, et seq.; also post), and the "Flowers-de-Luce," or the "Fleurs-de-Lis," passim. It means "generation," or the vaunt realised of the Turkish Soldan, "Donec totum implet orbem." The "Prince of Wales's Feathers" we believe to be, and to mean, the same thing as this sublime "Fleur-de-Lis." It resembles the object closely, with certain effectual, ingenious disguises. The origin of the Prince of Wales's plume is supposed to be the adoption of the king's crest (by Edward the Black Prince, at the battle of Cressy), on the discovery of the slain body of the blind King of Bohemia. Bohemia again!—the land of the "Fire-worshiping Kings," whose palace, the Radschin, still exists on the heights near Prague. We believe the crest and the motto of the Prince of Wales to have been in use, for our Princes of Wales, at a much earlier period, and that history, in this respect, is perpetuating an error—perhaps an originally intended mistake. We think the following, which appears now for the first time, will prove this fact. Edward the Second, afterwards King of England, was the first Prince of Wales. There is reason to suppose that our valiant Edward the First, a monarch of extraordinary acquirements, was initiated into the knowledge of the abstruse Orientals. An old historian has the following: "On their giving" (i.e. the assembled Welsh) "a joyful and surprised assent to the King's demand, whether they would accept a king born really among them, and therefore a true Welshman, he presented to them his new-born son, exclaiming in broken Welsh, 'Eich dyn!"
—that is, 'This is your man!'—which has been corrupted into the present motto to the Prince of Wales's crest, 'Ich dien,' or 'I serve.'" The meaning of "I serve," in this view, is, that "I" suffice, or "the Lis," or "the act," suffices (p. 46, and figures post), for all the phenomena of the world.

Brixworth Church, Northamptonshire.
CHAPTER THE SEVENTEENTH.

PRISMATIC INVESTITURE OF THE MICROGSM.

The chemical dark rays are more bent than the luminous. The chemical rays increase in power as you ascend the spectrum, from the red ray to the violet. The chemical rays typified by the Egyptians under the name of their divinity, Taut or Thoth, are most powerful in the morning; the luminous rays are most active at noon (Isis, or abstractedly "manifestation"); the heating rays (Osiris) are most operative in the afternoon. The chemical rays are the most powerful in spring (germination, "producing," or "making"), the most luminous in the summer (ripening, or "knowing"), the most heating in the autumn (perpetuating). The chemical rays have more power in the Temperate Zone; the luminous and heating, in the Tropical. There are more chemical rays given off from the centre of the sun than from the parts near its circumference.

Each prismatic atom, when a ray of light strikes upon it, opens out on a vertical axis, as a radius or fan of seven different "widths" of the seven colours, from the least refrangible red up to the most refrangible violet. (Refer to diagram on next page.)
"The Egyptian Priests chanted the seven vowels as a hymn addressed to Serapis" (Eusebe-Salverte, Dionysius of Halicarnassus).

"The vowels were retained to a comparatively late period in the mystic allegories relative to the Solar System." "The seven vowels are consecrated to the seven principal planets" (Belot, Chiro-mancie, 16th cent.).

The cause of the splendour and variety of colours lies deep in the affinities of nature. There is a singular and mysterious alliance between colour and sound. There are seven pure tones in the diatonic scale, because the harmonic octave is on the margin, or border, or rhythmic point, of the First and Seventh, like the chemical dark rays on the margin of the solar spectrum. (See explanatory chart of the Prismatic Colours, above.)

Red is the deep bass vibration of ether. To produce the sensation of red to the eye, the luminous line must vibrate 477 millions of millions of times in a second. Blue, or rather purple, is the high treble vibration, like the upper C in
music. There must be a vibration of 699 millions of millions in a second to produce it; while the cord that produces the high C must vibrate 516 times per second.

Heat, in its effect upon nature, produces colours and sounds. The world's temperature declines one degree at the height of 100 feet from the earth. There is a difference of one degree in the temperature, corresponding to each 1000 feet, at the elevation of 30,000 feet. Colouration is effected, at the surface of the earth, in the same amount in one minute that takes half an hour over three miles high, in the full rays of the sun. The dissemination of light in the atmosphere is wholly due to the aqueous vapour in it. The spectrum is gained from the sun. In the air opposite to it, there is no spectrum. These conclusions result from balloon-observations made in April 1863, and the philosophical deductions are a victory for "aqueous vapour."

It has been demonstrated that flames are both sensitive and sounding; they have, therefore, special affinities.

"The author of the Nature and Origin of Evil is of opinion that there is some inconceivable benefit in Pain, abstractly considered; that Pain, however inflicted, or wherever felt, communicates some good to the General System of Being; and that every Animal is some way or other the better for the pain of every other animal. This opinion he carries so far as to suppose that there passes some principle of union through all animal life, as attraction is communicated to all corporeal nature; and that the evils suffered on this globe may by some inconceivable means contribute to the felicity of the inhabitants of the remotest planet."—Contemporary Review of the Nature and Origin of Evil.

"Without subordination, no created System can exist: all subordination implying Imperfection; all Imperfection, Evil; and all Evil, some kind of Inconveniency or Suffering."—
"NATURE AND ORIGIN OF EVIL."

"Whether Subordination implies Imperfection may be disputed. The means respecting themselves may be as perfect as the end. The Weed as a Weed is no less perfect than the Oak as an Oak. Imperfection may imply primitive Evil, or the Absence of some Good; but this Privation produces no Suffering, but by the Help of Knowledge." "Here the point of view is erroneously taken for granted. The end of the oak, in another comprehension, may be the weed, as well as the end of the weed the oak. The contraries may be converse, *out of our appreciation.*"—Review of the above work in *Miscellaneous and Fugitive Pieces.* London: T. Davies, 1774.

"There is no evil but must inhere in a conscious being, or be referred to it; that is, Evil must be felt before it is Evil."—Review of *A Free Enquiry into the Nature and Origin of Evil,* p. 5 of the same *Miscellaneous and Fugitive Pieces.* London: T. Davies, Russell Street, Covent Garden; Bookseller to the Royal Academy. 1774. Query, whether the Review of this Book, though attributed to Dr. Johnson, be not by Soame Jenyns, the author of the book itself?

"Thoughts, or ideas, or notions,—call them what you will,—differ from each other, not in *kind,* but in *force.* The basis of all things cannot be, as the popular philosophy alleges, mind. It is infinitely improbable that the *cause of mind*—that is, of *existence*—is similar to mind."—Shelley's *Essays.* The foregoing is contained in that on Life. He means Reason, in this objection to MIND. Shelley further remarks: "The words I, and you, and they, are grammatical devices, invented simply for arrangement, and totally devoid of the intense and exclusive sense usually attached to them."

In the *Memoirs of the Life and Writings of Mr. William*
THE ROSICRUCIANS.

Whiston, part ii. (1749), there occur the following observations:

"N.B.—I desire the reader to take notice that the very learned Gerard John Vossius, in his three accurate dissertations, *De Tribus Symbolis*, or "Of the Three Creeds,"—that called *The Apostles' Creed*, that called *The Athanasian Creed*, and that called the *Nicene or Constantinopolitan Creed*, with the *Filioque*,—has proved them to be all falsely so called: that the first was only the Creed of the *Roman Church* about a.d. 400; that the second was a forgery about 400 years after Athanasius had been dead, or about a.d. 767, and this in the West and in the Latin Church only, and did not obtain in the *Greek Church* till about 400 years afterwards, or about a.d. 1200; and that the third had the term *Filioque* first inserted into it about the time when the *Athanasian Creed* was produced, and not sooner, or about a.d. 767."
CHAPTER THE EIGHTEENTH.

CABALISTIC INTERPRETATIONS BY THE Gnostics.

O indicate God’s existence, the ancient sages of Asia, and many Greeks, adopted the emblem of pure fire, or ether.

"Ærem amplexcatur immensus æther, qui constat exaltissimis ignibus" (Cicero, De Natura Deorum, lib. ii. c. 36).
"Cælum ipsum stellascque colligens, omniscque siderum com- pago, æther vocatur, non ut quidem putant quod ignitus sit et insensus, sed quod cursibus rapidis semper rotatur" (Apuleius, De Mundo). Pythagoras and Empedocles entertained similar theories (Brucker, 1, c. i. p. 113). Parmenides also represented God as a universal fire which surrounded the heavens with its circle of light and fire (Cicero, De Natura Deorum, lib. iii. c. 2). Hippasus, Heraclitus, and Hippocrates imagined God as a reasoning and immortal fire which permeates all things (Cudworth, Systema Intellectualis, p. 104; and Gesnerus, De Animiis Hippocratis). Plato and Aristotle departed but little from this in their teachings; and Democritus called God “the reason or soul in a sphere of fire” (Stobæus, Eclogæ Physicae, lib. vii. c. 10). Cleonethes considered the sun as the highest god (Busching, Gründriss einer Geschichte der Philosophie, 1 Th. p. 344). We find,
therefore, in the earliest ages, an A\(\ddot{e}\)ther (spiritual fire) theory, by which many modern theorists endeavour to explain the phenomena of magnetism. This is the "A\(\ddot{e}\)theraeum" of Robert Flood, the Rosicrucian.

Fire, indeed, would appear to have been the chosen element of God. In the form of a flaming "bush" He appeared to Moses on Mount Sinai. His presence was denoted by torrents of flame, and in the form of fire He preceded the band of Israelites by night through the dreary wilderness; which is perhaps the origin of the present custom of the Arabians, "who always carry fire in front of their caravans" (Reade's *Veil of Isis*). All the early fathers held God the Creator to consist of a "subtile fire." When the Holy Spirit descended upon the Apostles on the Day of Pentecost, it was in the form of a tongue of fire, accompanied by a rushing wind. See *Anacalypsis*, vol. i. p. 627 (Parkhurst, *in voce*, וּלְבָא).

The personality of Jehovah is, in Scripture, represented by the Material Trinity of Nature; which also, like the divine antitype, is of one substance. The primal, scriptural type of the Father is Fire; of the Word, Light; and of the Holy Ghost, Spirit, or Air in motion. This material Trinity, as a type, is similar to the material trinity of Plato; as a type, it is used to conceal the "Secret Trinity." See *Anacalypsis*, vol. i. p. 627. Holy fires, which were never suffered to die, were maintained in all the temples: of these were the fires in the Temple of the Gaditanean Hercules at Tyre, in the Temple of Vesta at Rome, among the Brachmans of India, among the Jews, and principally among the Persians. Now to prove that all "appearances" are "born of Fire," so to speak, according to the ideas of the Rosicrucians.

Light is not radiated from any intensely heated gas or fluid. If nitre is melted, it will not be visible; but throw
IDEAS OF THE BHUDDISTS.

into it any solid body, and as soon as that becomes heated it will radiate light: hence the phenomenon, "Nasmyth's willow-leaves," in the sun, must be solid, not gaseous; and through their medium the whole of our light from the sun is doubtless derived. See the records of the British Association for the Advancement of Science (Cambridge Meeting), October 1862. These physical facts were known to the ancient Persians.

The ancient ideas upon these subjects have not come down to us at all definitely. The destruction of ancient manuscripts was effected upon a large scale. Diocletian has the credit of having burned the books of the Egyptians on the chemistry of gold and silver (alchemy). Caesar is said to have burned as many as 700,000 rolls at Alexandria; and Leo Isaurus 300,000 at Constantinople in the eighth century, about the time that the Arabians burned the famous Alexandrian Library. Thus our knowledge of the real philosophy of the ancient world is exceedingly limited; almost all the old records, or germinating means of knowledge, being rooted out.

In regard to "Boudhisme, ou système mystique," as he denominates it, a learned author describes it as—"Métaphysique visionnaire, qui, prenant à tâche de contrarier l'ordre naturel, voulut que le monde palpable et matériel fût une illusion fantastique ; que l'existence de l'homme fût un rêve dont la mort était le vrai réveil; que son corps fût une prison impure dont il devait se hâter de sortir, ou une enveloppe grossière que, pour la rendre perméable à la lumière interne, il devait atténuer, diaphaniser par le jeûne, les macérations, les contemplations, et par une foule de pratiques anachorétiques si étranges que le vulgaire étonné ne put s'expliquer le caractère de leurs auteurs qu'en les considérant comme des êtres surnaturels, avec cette difficulté

"Mind cannot create, it can only perceive." This hazardous statement, in its utmost extent, is used simply as an argument against there being the *philosophical* possibility of religion as derivable from *reason* only—which will be found to be the mere operation of the forces of the "world." No religion is philosophically capable of being defended on the grounds of *reason*; though one religion may seem (but, in the inner light, it will seem only) to be more reasonable (or probable) than another. Divine light, or faith, or intuition,—in other words, the enlightenment of the Holy Spirit (to be recognised under its many names),—is that means alone which can carry truth, through the exposure of the futility of all *knowable* (that is, of all intellectual) truth. Such are the abstract notions of the Gnostics, or "Illuminati," concerning religion.

"The curtains of Yesterday drop down, the curtains of To-morrow roll up; but Yesterday and To-morrow both are" (*Sartor Resartus,* edit. 1838, "Natural-Supernaturalism," p. 271). To the divine knowledge, the future must be as much present as the present itself.

The explorations of the Rosicrucians may be said to be "as keys to masked doors in the ramparts of nature, which no mortal can pass through without rousing dread sentries never seen upon this side" (*A Strange Story,* Lord Lytton, vol. i. p. 265). "Omnia ex Uno, Omnia in Uno, Omnia ad Unum, Omnia per Medium, et Omnia in Omnibus" (*Hermetic axiom*).

In the speculations of the Gnostics, the astronomical points Cancer and Capricorn are called the "Gates of the Sun." Cancer, moreover, is termed the "Gate of Man;" Capricorn is the "Gate of the Gods." These are Platonic
views, as Macrobius declares. With the influences of the planets, Saturn brings reason and intelligence; Jupiter, power of action; Mars governs the irascible principle, the Sun produces sensation and speculation, Venus inspires the appetites, Mercury bestows the power of declaring and expressing, and the Moon confers the faculty of generating and augmenting the body. The Egyptian "winged disc" is a symbol of "Tat," "Taut," or "Thoth" (Plutarch, De Iside et Osiride). The lions' heads, so frequently observable in the sculptures decorating fountains, bespeak the astral influences under Leo, which produce the rains in the ardent month of July; and in this view they are regarded as the discharges of the "sacred fountains." Lions' heads, with fountains, are observable in architecture all the world over. All architecture is primarily derivable from two mathematical lines (| and --), which, united (and intersecting), form the "cross." The first "mark" is the origin of the "upright" tower, pyramid, or imitation ascending "flame of fire," which aspires against the force of gravity; also of the steeple, or phalius, all over the world. The second, or horizontal, "mark" is the symbol of the tabernacle, chest, or ark, or fluent or base-line, which is the expression of all Egyptian, Grecian, and Jewish templar architecture. The union of the two lines gives the Christian, universal cross-form, in the blending of the "two dispensations"—Old and New, or "Law" and "Gospel." Now, both of these lines, in the Rosicrucian sense, have special magic "powers," or gifts, according to their several places, and according to the supernatural extra forces brought specially to bear on them through the operations of those who know how (and when) to direct the occult power.

Those powers bestowed upon the original deserving "Man," and not extinguished in the existing "Man," are
his still—if he retain any glimpse of his original spark of light.

Justinus Kerner, in his *Scherin von Prevorst*, most ingeni-ously anatomises the inner man, and makes him consist of “seele,” “nerven-geist,” and “geist.” The “nervengeist,” or nervous energy, being of a grosser nature, continues united with the “seele” on its separation from the body, rendering it visible *in the form of an apparition*, and enabling it to affect material objects, make noises, move articles, and such-like things perceptible to the living sense—in short, to “spucken.” According to its nature, this composite being takes a longer or shorter time to be dissolved; the “geist” alone being immortal (*The Gnostics and their Remains*, note to p. 46).

An *Ancient Homily on Trinity Sunday* has the following: “At the deth of a manne, three bells should be ronge as his knyll in worship of the Trinitie. And for a woman, who was the Second Person of the Trinitie, two bells should be ronge.” Here we have the source of the emblematic difficulty among the master-masons, who constructed the earlier cathedrals, as to the addition and as to the precise value of the second (or feminine) tower at the western end (or Galilee) of a church.

Valentinus is called the “profoundest doctor of the Gnosis.” According to him, the “Eons” (angels, or effusions) number fifteen pairs, which represent the thirty degrees of each sign of the zodiac. The name of the great Gnostic deity, Abraxas, is derived as follows: “Ab,” or “Af” (“Let it be”); “Rax,” or “Rak” (“Adore”); “Sas,” or “Sax,” for “Sadshi” (“Name”). “The entire Gnostic system was not derived either from the Kabala, or from the Grecian philosophy, but from the East, as Mosheim long ago maintained:” so declares the author of *The Gnostics and their*
Remains; but it is a mistake, both in his authority (Mosheim), and also in himself. We shall successfully show this before we have done.

As soon as Jesus was born, according to the Gnostic speculative view of Christianity, Christos, uniting himself with Sophia (Holy Wisdom), descended through the seven planetary regions, assuming in each an analogous form to the region, and concealing his true nature from its genii, whilst he attracted into himself the sparks of Divine Light they severally retained in their angelic essence. Thus Christos, having passed through the seven Angelic Regions before the "THRONE," entered into the man Jesus, at the moment of his baptism in the Jordan. From that time forth, being supernaturally gifted, Jesus began to work miracles. Before that, he had been completely ignorant of his mission. When on the cross, Christos and Sophia left his body, and returned to their own sphere. Upon his death, the two took the man "Jesus," and abandoned his material body to the earth; for the Gnostics held that the true Jesus did not (and could not) physically suffer on the cross and die, but that Simon of Cyrene, who bore his cross, did in reality suffer in his room: "And they compel one Simon a Cyrenian, who passed by, coming out of the country, the father of Alexander and Rufus, to bear his cross" (St. Mark xv. 21). The Gnostics contended that a portion of the real history of the Crucifixion was never written.

Asserting that a miraculous substitution of persons took place in the great final act of the "Crucifixion," the Gnostics maintained that the "Son of God" could not suffer physically upon the cross, the apparent sufferer being human only.

At the point of the miraculous transference of persons,
Christos and Sophia (the Divine) left his body, and returned to their own heaven. Upon his death on earth, the two withdrew the "Being" Jesus (spiritually), and gave him another body, made up of ether (Rosicrucian Ätheræum). Henceforward he consisted of the two first Rosicrucian principles only, soul and spirit; which was the cause that the disciples did not recognise him after the resurrection. During his sojourn upon earth of eighteen months after he had risen, he received from Sophia (Soph, Suph), or Holy Wisdom, that perfect knowledge or illumination, that true "Gnosis," which he communicated to the small number of the Apostles who were capable of receiving the same.

The Gnostic authorities are St. Irenæus in the first place, Tertullian, Clemens Alexandrinus, Origen, St. Epiphanius. The Gnostics are divided into sects, bearing the names of Valentinians, Carpocratians, Basilideans, and Manichæans. Γνωσις, Gnosis, Gnossos : thence "Gnostics."

As the Son of God remained unknown to the world, so must the disciple of Basilides also remain unknown to the rest of mankind. As they know all this, and yet must live amongst strangers, therefore must they conduct themselves towards the rest of the world as invisible and unknown. Hence their motto, "Learn to know all, but keep thyself unknown" (Irenæus).

The speech of an angel or of a spirit with man is heard as sonorously as the speech of one man with another, yet it is not heard by others who stand near, but by the man himself alone. The reason is, that the speech of an angel or of a spirit flows first into the man's thought, and, by an internal way, into his organ of hearing, and thus actuates it from within; whereas the speech of man flows first into the air, and, by an external way, into his organ of hearing, which it actuates from without. Hence it is evident that
the speech of an angel and of a spirit with man is heard in
man, and, since it equally affects the organs of hearing, that
it is equally sonorous (Swedenborg; also Occult Sciences,
p. 93; London, 1855).

The Greek Bacchanals were well acquainted with the
mythos of Eve, since they constantly invoked her, or a
person under her name, in their ceremonies.

Black is the Saturnian colour—also that of the Egyptian
Isis. Under the strange head of the embodiment of Deity
under darkness, the following remarkable facts may be
considered: the Virgin and Child are depicted black at the
Cathedral at Moulins, at the famous Chapel of the Virgin at
Loretto, in the Church of the Annunciation at Rome, at the
Church of St. Lazaro and the Church of St. Stephen at
Genoa, at that of St. Francisco at Pisa, at the Church of
Brixen in the Tyrol, at a church in (and at the Cathedral of)
Augsburg, where the black figures are as large as life, at
the Borghese Chapel in Rome, at the Church of Santa Maria
Maggiore in the Pantheon, and in a small chapel at St.
Peter’s, on the right-hand side, on entering, near the door.
The reader can make references in his memory to these
places, if he be a traveller.

The writer who goes by the name of Dionysius Areopa-
gita teaches that the highest spiritual truth is revealed only
to those who have transcended every ascent of every holy
height, and have left behind all divine lights and sounds
and heavenly discoursings, and have passed into that Dark-
ness where He really is (as saith the Scripture) who is All,
above all things (De Mystica Theologia, cap. i. sec. 3;
Hours with the Mystics, vol. i. note to book i. chap. 2, by
R. A. Vaughan, B.A.).

The words graven upon the zone and the feet of the Ephe-
sian Diana, which Hesychius has preserved, are the following:
"These Ephesian words," says Plutarch (Sympos.), "the Magi used to recite over those possessed with devils."

"Damnameneus" is seen on a Gnostic amulet in the De la Turba Collection (The Gnostics, p. 94).

The Argha had the form of a crescent. The Argo, arc, or arche, is the navis biprora. It is clear that, as neither the full moon nor the half-moon was ever the object of worship, it is the crescent horns of the moon which imply the significance. These mean the woman-deity in every religion.

The snake associated with the mysteries among the Hindoos is the cobra-di-capella. It is said that the snake on the heads of all the Idols in Egypt was a Cobra. The name of the monarch or Chief Priest in Thibet is the Lama, or the Grand Lama. Prester-John is the great Priest, or Prestre (Prêtre), Ian, Ion, Jehan, or John (the Sun). Lamia is the "snake" among the Ophidians; Lama is the hand: lamb, hand, is a divine name in the Scythian tongue. It also means the number 10, and the Roman numeral X, which is a cross. Now, the double pyramid, or hand, (a)$^\Delta$, of the Egyptians comprises the mystic mark signifying the two original principles water and fire, as thus—(b) $^\boxtimes$ —the union of which, as intersecting triangles, forms the famous Hexalpha, or "Solomon's Seal," or "Wizard's Foot," which, according to the Eastern allegory, is placed (as that of St. Michael) upon the Rebellious Spirits in their "abyss" or "prison."

Pyr is the Greek name of fire (thence Pyramid), and mythologically of the sun, who was the same as Hercules.
And the great analyser of mythology assures us that *Pur* was the ancient name of Latian *Jupiter*, the father of Hercules; that he was the deity of fire; that his name was particularly retained amongst the people of Præneste, who had been addicted to the *rites of fire*. Fire, in short, in these mythologies, as also in all the Christian churches, meets us at every turn. But we must not mix up heathen ideas and Christian ideas in these matters.
CHAPTER THE NINETEENTH.

MYSTIC CHRISTIAN FIGURES AND TALISMANs.

Our engraving borrows from the West Front of Laon Cathedral, France, a Catherine-Wheel (or "Rose") Window. The twelve pillars, or radii, are the signs of the Zodiac, and are issuing out of the glorified centre, or opening "rose,"—the sun, or "beginning of all things."

"King Arthur's Round Table" displays the "crucified" Rose in its centre.

In the "tables," alternating with tying-knots, of the Order of the Garter,—which "Most Noble Order" was originally dedicated, be it remembered, to the Blessed Lady, or to the Virgin Mary,—the microcosmical, miniature "King Arthur's Round Table" becomes the individual female discus, or organ, waxing and waning, negative or in flower, positive or natural, alternately red and white, as the Rose of the World: Rosamond, Rosa mundi. And here we will adduce, as our
ORIGIN OF THE ORDER OF THE "GARTER," 169

justification for this new reading of the origin of the Order of the Garter, the very motto of the princely order itself:

"Honi soit qui mal y pense!"
or,

"'Yoni' soit qui mal y pense!"

What this "Yoni" is, and the changes meant and apotheosised through it, the discreet reader will see on a little reflection.

All the world knows the chivalric origin of this Most Noble Order of the Garter. It arose in a princely act,—rightly considered princely, when the real, delicate, inexpressibly high-bred motive and its circumstances are understood, which motive is systematically and properly concealed. Our great King Edward the Third picked up, with the famous words of the motto of the Order of the Garter, the "garter"—or, as we interpret it, by adding a new construction with hidden meanings, the "Garder" (or special cestus, shall we call it?)—of the beautiful and celebrated Countess of Salisbury, with whom, it is supposed, King Edward was in love.

The following is from Elias Ashmole: "The Order of the Garter by its motto seems to challenge inquiry and defy reproach. Every body must know the story that refers the origin of the name to a piece of gallantry: either the Queen or the Countess of Salisbury having been supposed to have dropped one of those very useful pieces of female attire at a dance; upon which old Camden says, with a great deal of propriety, and a most just compliment to the ladies, 'Hec vulgus perhibet, nec viliis sane hac videatur origo, cum nobilitas sub amore jacet.' The ensign of the order, in jewelry or enamel, was worn originally on the left arm. Being in the form of a bracelet to the arm, it might possibly divert the attention of the men from the reputed original; it
might be dropped and resumed without confusion; and the only objection I can see to the use of such an ornament is the hazard of mistake from the double meaning of the term *periscelis*, which signifies not only a *garter*, but *breeches*, which our English ladies never wear: 'Quæ Graeci *περισκέλη* vocant, nostri Braccas' (braces or breeches) 'dicunt,' says an ancient Father of the Church.' The Garter, to judge thus from Camden, was not a garter at all, but an occasional very important item of feminine attire; and King Edward's knightly feeling, and the religious devotion of the object, will be perceived.

There is great obscurity as to the character of Abraxas, the divinity of the Gnostics. The Eons, or Degrees of Advance in the Zodiacal Circle, are thirty in number to each of the Twelve Signs, and consequently there are 360 to the entire Astronomical Circle, or 365, counting for each day of the solar year. The inscription upon the Gnostic gems, CEOY, is probably intended for ΘΕΟΥ; "for the Arabs yet substitute the *s* for the *th* in their pronunciation" (*Gnostics*, p. 233; Matter, *Histoire Critique du Gnosticisme*). In this "*s*" and the "*th*" standing for it, lie all the mysteries of Masonry.

+, Christos, was designed for the guide of all that proceeds from God. Sophia-Achamoth is the guide, according to the Gnostics, for all proceeding out of "matter." St. Irenæus, whose period is the end of the second century, draws all these startling inferences from the Book of Enoch, and names "Sophia" as signifying the Divine Wisdom. The Ophite scheme seems evidently the Bhuddistic Bythos, answering to the first Buddha. Sige, Sophia, Christos, Achamoth, Ildabaoth, answer to the successive five others (*Gnostics*, p. 27; Bellermann's *Drei Programmen über die Abraxas-gemmen*, Berlin, 1820; Basilides ;j Tertullian, *De
Gnostic Gems.

Praecript.: “Serpentem magnificent in tantum, ut illum etiam Christo praerant.” See Tertullian, Epiphanius, and Theodoret; St. John iii. 14, also). We now refer the reader to some figures towards the end of our volume, which will be found according to their numbers.

Figure 289: The Abraxas-god, invested with all the attributes of Phœbus. Green jasper; a unique type. The Egyptians call the moon the mother of the world, and say it is of both sexes (Plutarch; Spartan, Life of Caracalla). The moon, in a mystic sense, is called by the Egyptians male and female. The above is a gem in the Bosanquet Collection. In the exerque is the address, GABAO—“Glory unto Thee!” On the reverse, in a cartouche formed by a coiled asp, precisely as the Hindoos write the ineffable name “Aum,” are the titles IAΩ. ABPAGΛΞ (The Gnostics, p. 86).

Figure 311 represents Venus standing under a canopy supported on twisted columns, arranging her hair before a mirror held up by a Cupid; two others hover above her head, bearing up a wreath. In the field, ΦΑΣΙΣ ΑΡΙΩΡΙΦ—“The Manifestation of Ariorph.” Venus here stands for the personification of the Gnostic Sophia, or Achamoth, and as such is the undoubted source of our conventional representation of Truth (Montfaucon, pl. cxi.). Reverse, figure 312, which represents Harpocrates seated upon the lotus, springing from a double lamp, formed of two phalli united at the base. Above his head is his title “Abraxas,” and over that is the name “Iao.” In the field are the seven planets. The sacred animals—the scarab, ibis, asp, goat, crocodile, vulture, emblems of so many deities (viz. Phre, Thoth, Isis, Merides, Bebys, Neith)—the principal in the Egyptian mythology, arranged by threes, form a frame to the design. Neatly engraved on a large, bright loadstone (The Gnostics, p. 211).
THE ROSICRUCIANS.

ORIGIN OF THE TRICOLOR.

"Theory of sacramental mysticism," adapted from the speculations of the Sophists or Gnostics.

Baptism by water.

_Nexus._

Bread ("Host") {and} Wine (cup denied to the Laity).

Body. Spirit: symbolical "Blood."

_Sacraments: "Baptism and the Supper of the Lord."

From the above cabalistic estimate of the virtues of colours, it happens that the colour blue (sky-blue) is chosen as the colour for the investiture of infants at baptism, and as the colour for children's coffins. Blue or white (not white as meaning the "S.S." in the sacred sense, but white as the synthesis of material elements, or of light, or of "sinlessness in irresponsibility") are children's colours at other times. There were two great ordeals—by water, and by fire. The one is the occult trial-baptism by water, in the sinister or left-handed sense, applied to those suspected of witchcraft. The other (more perfect and more perfecting) baptism is by symbolical fire. Both rites were in use among the Egyptians. (Refer to mystic heraldic _formulae_ elsewhere in our book.) The three ordeals (or sacraments) of the Ancient Mysteries were by "Water, Air, and Fire." Thus, also, the Egyptian
Initiation: "Cave, Cloud, Fire." So, too, the Masonic Initiations. With these meanings, royal coffins and investitures are always red (Mars), as meaning "royalty active;" or imperial purple (Jupiter, or perhaps Mercurius—Thoth, Taut, Tat), as "royalty passive," or implying the "lord of regions.

According to the cabalistic view, "Jacob's Ladder," which was disclosed to him in a vision, is a metaphorical representation of the powers of alchemy, operating through visible nature. The "Ladder" was a "Rainbow," or prismatic staircase, set up between earth and heaven. Jacob's Dream implied a history of the whole hermetic creation. There are only two original colours, red and blue, representing "spirit" and "matter;" for orange is red mixing with the yellow light of the sun, yellow is the radiance of the sun itself, green is blue and yellow, indigo is blue tinctured with red, and violet is produced by the mingling of red and blue. The sun is alchemic gold, and the moon is alchemic silver. In the operation of these two potent spirits, or mystic rulers of the world, it is supposed astrologically that all mundane things were produced.

The following three pages explain the mystic analogy between colours, language, music, and the seven angelic adverse intelligences, supposed by the Gnostics to be operative in the "dissonance of creation." These represent the descending half of the "Machataloth," as the cabalistic Jews called the Zodiac united. The whole is made up from astruse sigmas, or the application of Rosicrucianism on its hieroglyphic and representative side.
HERALDIC AND FIGURATIVE CHART, ACCORDING TO THE OLDEST HERALDIC SYSTEMS. (No. 1.)

Region Elementary.

Y. 1.—Violet (Red and Blue)—Most Refrangible Ray. Matter qualified by Light. 3.—Cherubim.

Sanguine. Sardonyx. Dragon’s Tail.

W. 2.—Indigo (Opaque Blue). Matter “coagulate” (as the sea).

Purpure. Amethyst (?). Mercury (♂).

U. 3.—Blue (Azure). Pure elemental matter (as the “sky”).

Sapphire. Jupiter (♀).

O. 4.—Green (Yellow and Blue). Living forms in matter (disclosed in light).

Fixed and stationary natural forms, and their spirits.

I. 5.—Yellow. Red inflamed, or Light.

Fire in its flower, or glory.

F. 6.—Orange (Red and Yellow). Fire inflaming, or “flowering” (in stage of flowering).

Dragon’s Head. Elementum Ignis.

A. 7.—Red—Least Refrangible Ray. First affection, or results.

Linea viridis; seu “Benedicta Viriditas.” the celebrated “Seal of Solomon” (or “Sword of Solomon”), or “Gladius of Saint Michael the Archangel.” (With the celebrated “Seal of Solomon,” he—Solomon—mastered the Genil.) It is the most potent Cabalistic, or Talismanic, sign.

“Jacob’s Ladder,” whereon he saw “Angels” ascending and descending: “And he dreamed, and behold a ladder set up on the earth, and the top of it reached to heaven; and behold the Angels of God ascending and descending on it” (Genesis xxviii. 12).

Also the Chromatic Scale of seven Musical Notes.

Also Triad of the Diatonic Scale.

Musical Harmony.

“Music of the Spheres.”

(Jacob’s metaphorical “Ladder.”)
HERALDIC AND FIGURATIVE CHART, ACCORDING TO THE OLDEST HERALDIC SYSTEMS. (No. 3.)

Rationale of the "Tricolor," or the three united, national, successive Colours of France.

1.—Red. Fire. Gaulois. Represented by vertical lines, as indicative of the aspiring rays of this noblest and most active element. Salique, or Salic, from the Salii, or Priests of Mars.

In Heraldry, there are only two chief colours: Red (Gules), or the "Princedom" of this world; and Blue (Azure), or the "Queendom" of this world.*

2.—White. Illumination. Light: synthesis of colours. It is magic, or sacred, because it stands for the "Third Person" of the "Triune." It is the colour of the Bourbons. It also supplies the field, or ground-colour, to the emblazonment of the Order of the "Saint-Esprit," or of the H. G. It also refers mystically to "Revelation," and to Saint John.

Also, in regard to the heraldic metals, Sol is the sun, the procreative or producing power (Gold); and Luna, the moon, Astarte ("receptive, or female power"), is the metal argent (or silver).*

3.—Blue. It stands for the "great deep," or for "matter in the abstract." It is represented heraldically by horizontal lines, which stand for fluid-levels, whether of the sea or of the air. This colour is assigned to the "Blessed Lady," or "Notre Dame de Paris." In heathen representations of the Ruling Feminine Principle, it stands for the "Virgin of the Sea."

The colour azure, or blue, mystically signifies the "deep," or the world usurped, or won, out of chaos (Chronos, Saturn, or Time); and it is represented by the Planet Jupiter (Zeus), as "Lord of the Worlds."

* These are the two chief metals of the Alchemists, and the two chief mystic symbols of the Rosicrucians. Red is blazoned by the old priestly heralds, or augurs, by the name of the Planet Mars. Vert (or Verd), and Argent, or silver (Hermes, or Thoth, or Taut, or Luna, or Astarte, indifferently), are represented by the Planet Venus and by the Moon.
CHAPTER THE TWENTIETH.

THE "ROSY CROSS" IN INDIAN, EGYPTIAN, GREEK, ROMAN, AND MEDIEVAL MONUMENTS.

THOUGH fire is an element in which every thing inheres, and of which it is the life, still, according to the abstruse and unexplained ideas of the Rosicrucians, it is itself another element, in a second non-terrestrial element, or inner, non-physical, ethereal fire, in which the first coarse fire, so to speak, flickers, waves, brandishes, and spreads, floating (like a liquid) now here, now there. The first is the natural, material, gross fire, with which we are familiar, contained in a celestial, unparticled, and surrounding medium (or celestial fire), which is its matrix, and of which, in this human body, we can know nothing.

In 1867, in Paris, a suggestive philosophical book was published, under the title of Hébreu Primitif; Formation des Lettres ou Chiffres, Signes du Zodiacque et Racines Hébraïques, avec leurs Dérivés dans les Langues de l'Orient et de l'Europe, par Ad. Lethierry-Barrois.

Ptah is the emblem of the Eternal Spirit from which every thing is created. The Egyptians represented it as a pure
eternal fire which burns for ever, whose radiance is raised far above the planets and stars. In early ages, the Egyptians worshiped this highest being under the name of Athor. He was the lord of the universe. The Greeks transformed Athor into Venus, who was looked upon by them in the same light as Athor (Apuleius, Cicero, Ovid; Ptolemaeus, in tetrabibla; Proclus; Ennemoser, vol. i. p. 268, trans. by Howitt). Among the Egyptians, Athor also signified the night (Hesiod, Orpheus). "According to the Egyptians," says Jablonski, "matter has always been connected with the mind. The Egyptian priests also maintained that the gods appeared to man, and that spirits communicated with the human race." "The souls of men are, according to the oldest Egyptian doctrine, formed of ether, and at death return again to it."

The alchemists were a physical branch of the Rosicrucians. The more celebrated authors (and authorities) upon the art and mystery of alchemy are Hermes (whose seven chapters and "smaragdine table," as it is called, contain the whole alchemical system); Geber, the "Turba," "Rosary," Theatrum Chemicum, Bibliothèque Hermétique, Chymical Cabinet; Artephius, Arnoldus de Villa Nova, Raimondus Lullius, Trevisan, Nicholas Flamel, Zachareus, Basilius Valentinus, Cosmopolita, and Philalethes (Thomas Vaughan). Refer also to The Hermetical Triumph, or the Victorious Philosopher's Stone: London, 1723; Lucas's Travels, p. 79; Count Bernard of Treviso. Two leading works, however, on the hermetic subject are La Chiave del Cabinetto, Col. 1681, 12mo, by Joseph Francis Borri, an Italian; and Le Compte de Gabalis, ou Entretiens sur les Sciences Secrètes; imprimée à Paris, par Claude Barbin, 1671, 12mo, pp. 150. This book is the work of the Abbé de Villars, or is supposed to be so. J. V. Andrea, a writer upon hermetic subjects, was Almoner to the Duke
of Württemberg, and wrote early in the seventeenth century. The Emperor Rudolphus the Second greatly encouraged learned men who had made acquaintance with alchemical lore. At the supposed revival of Rosicrucianism in Paris, in March 1623, the Brethren were said to number thirty-six; of whom there were six in Paris, six in Italy, six in Spain, twelve in Germany, four in Sweden, and two in Switzerland. In 1616, the famous English Rosicrucian, Robertus de Fluctibus (Robert Fludd), published his defence of the society, under the title, Apologia Compendiaria, Fraternitatem de Rosea-Cruce, Suspicionis et Infamiae maculis aspersam, abluentes, published in 1616 at Frankfort. Since this time, there has been no authentic account of the Rosicrucians. We are now the first translators of Robert Fludd.

"Amongst an innumerable multitude of images and symbolical figures, with which the walls"—i.e. those of the caverns of initiation at Salsette—"are covered, the Linga or Phallus was everywhere conspicuous, often alone, sometimes united with the petal and calyx of the lotus, the point within the circle, and the intersection of two equilateral triangles" (Dr. Oliver, History of Initiation. See also Maurice on the Indian Initiations).

The Linga, or pillar, or stone of memorial, in its material form, is the perpetuation of the idea of the male generative principle, as the physical means, in conjunction with the Yoni (Ioni), or discus, of the production of all visible things. In this connection, the addition to the name of Simon Peter (Petra, or Pietra, Cephas, Jonas, Bar-Jonas, Ionas) will be recalled as suggestive. There is a sacred stone in every Temple in India. The Stone, or Pillar, or "Pillow," of Jacob was sacred among the Jews. It was anointed with oil. There was a sacred stone among the Greeks at Delphi, which was also anointed with oil in the mystic ceremonies.
The stone of Caaba, or black stone at Mecca, is stated to have been there long before the time of Mohammed. It was preserved by him when he destroyed the dove and images. The obelisks at Rome were, and are, Lingas (or Linghas). In the Temple of Jerusalem, and in the Cathedral of Chartres, they are in vaults. They are the idea of the abstract *membrum*, or "affluence," or *means*. To the initiated mind they imply glory, not grossness.

Figs. 25, 26 (p. 146), are the *Crux Ansata* of the Egyptians. This emblem is also found in India. According to Ruffinus and Sozomen, it imports the "time that is to come." It is a magical symbol. Fig. 27 is the imperial mound, and cross-sigma surmounting it.

Figs. 28, 29, are symbols of Venus (Aphrodite), the deity of the Syrians and Phoenicians. They are phallic emblems.

Fig. 30 is the Phallus proper. It is the *sigma* of Zeus, Mithras, "Baalim," Bacchus.

Figures numbered 31, "Osiris:" these various figures signify also Jupiter-Ammon. The rectangular marks denote the Scandinavian Tuisco, Thoth (Mercurius, or Hermes).

Fig. 35 is the Indian form of the same idea.

The figure marked 36 is to be found on the breast of one of the mummies in the museum of the London University.

**Fig. 35.**

Upon a monument discovered in Thebes, Anubis is represented as St. Michael and St. George are in Christian
saintings, armed in a cuirass, and having in his hand a
ance, with which he pierces a monster that has the head
and tail of a serpent (A. Lenoir, "Du Dragon du Metz,"

Figure 37 is the "Labarum." The celebrated sign
which is said to have appeared in the sky at noonday to the
Emperor Constantine was in this form.

Figure 38 is the monogram of the Saviour. To show the
parallel in symbolical forms, we will add some further
authorities from the Temple of Solomon at Jerusalem.

Figure 39, No. 1, is an evidently Corinthian foliation. It
is from a pillar in the vaults of the Temple of Solomon at
Jerusalem. (Probably a Lotus-Acanthus.) No. 2 is evidently
the "Crux-Ansata," combining the indications of the
"Lotus" and "Lily." Here is a union of the classic,
Judaic, and Gothic forms, all presenting the same idea
at once. Buddha was the sun in "Taurus;" Cristna (Crishna,
Krishna) was the sun in "Aries."

In regard to the origin of speech, of writing, and of
letters, it may be remarked that the Egyptians referred the
employment of a written symbol (to record and communi-
cate the spoken word) to a Thoth; the Jews, to Seth or his
children (Josephus, Ant. 1, 2, 3); the Greeks, to Hermes.
But "Thout" in Coptic (Pezron, Lexicon Linguæ Copticae,
s. voc. Gen. xix. 26 in the Coptic version), also נני in
Hebrew, and Εψώς (Hermes) in Greek, are all names for
a pillar or post. This is the Homeric use of τρωκ and
τρως (Il. ᾶ, 486; Od. ᾶ, 278; Kenrick's Essay on
Primeval History, p. 119). Αψα is the ship, navis (from
thence come "nave" and "navel"), in which the germ of
animated nature was saved. Thebes, or Theba, means the
"ark." Carnac, or Karnak, in Egypt, is reckoned to be older
than the days of Moses—at least dating from 1600 A.C.
HERALDIC GENEALOGY OF THE "FLEUR-DE-LIS," OR "FLOWER-DE-LUCE."

APOTHESIS OF THE SYMBOL.

Fig. 40.

The opinion of M. Dupuis was (see his learned memoir concerning the origin of the constellations), that "Libra" was formerly the sign of the vernal equinox, and "Aries" of the nocturnal, autumnal equinox; that is, that, since the origin of the actual astronomical system, the procession (precession?) of the equinoxes had carried forward by seven signs the primitive order of the zodiac. Now, estimating the procession (precession?) at about 70\frac{1}{2} years to a degree,—that is, 2115 years to each sign,—and observing that "Aries" was in its fifteenth degree 1447 before Christ, it follows that the first degree of "Libra" could not have coincided with the vernal equinox more lately than 15,194 years before Christ, to which, if you add 1790 years since Christ, it appears that 16,984 years have elapsed since the origin of the "Zodiac" (Volney, _Ruins of Empires_, 1st English edition, 1792, p. 360).

All white things express the celestial and luminous gods; all circular ones, the world, the moon, the sun, the destinies; all semicircular ones, as arches and crescents, are descriptive of the moon, and of lunar deities and meanings.

"The Egyptians," says Porphyry, "employ every year a

**ARCHITECTURAL FINIALS.**

21. Finial: meaning the "Fleur-de-Lis." 22. Finial.
talisman in remembrance of the world. At the summer solstice, they mark their houses, flocks, and trees with fire, supposing that on that day the whole world had been set on fire. It was also at the same period that they celebrated the Pyrrhic or 'Fire-Dance.'” (And this illustrates the origin of the purifications by fire and water.)

There are seven planets in the solar system. These seven planets are signified in the seven-branched candlestick of the Jewish ritual. The number is a sacred number. These seven “prophets,” or angels, have each twelve apostles, places, stella, “stalls,” or regions, or dominions (stalls as “stables”), for the exercise of their powers. These are the twelve divisions of the great Circle, or the twelve signs of the Zodiac. All this is Cabalistic, Magical, Sabaistical, and Astrological. The name Ashtaroth or Astarte has been derived from Ashre, aster, ast, star, or “starred,” in the same way as the word Sephi-roth comes from the Hebrew root, “roth.”

On the black sacred stone ("Kebla," or "Cabar") at Mecca, “there appears the figure of a human head cut,” “which some take to be the head of a Venus” (Enthumius Zyabenus, Mod. Un. Hist. i. 213; Sale’s Discourse, p. 16; Bibliotheca Biblia, i. 613, 614).

Man’s ideas, outwards from himself, must always become more dreamlike as they recede from him, more real as they approach him.
CHAPTER THE TWENTY-FIRST.

MYTH OF THE SCORPION, OR THE SNAKE, IN ITS MANY DISGUISES.

ONE of the Targums says that שֵׁנֶחֶר, a serpent, tempted Adam, or the first man, and not שֵׁנֶחֶר, Eve, his wife. Here we have the object of adoration of the Ophites—the female generative power—the Destroying, Regenerating Power among the Ophites, and, indeed, the Gnostics generally. The Serpent was called the Megalistor, or Great Builder of the Universe (Maia, or Bhuddist Illusion). Here again we recognise, under another name (Ophites), the Cyclopes, or the builders of the circular Temples at Stonehenge and every where else. Mr. Payne Knight has repeated an observation of Stukeley, that "the original name of the temple at Abury was the 'Snake's Head.'" And he adds, "It is remarkable that the remains of a similar circle of stones (circular temple) in Boeotia had the same name in the time of Pausanias" (Pausanias, Boot. cap. xix. s. 2).

The famous oracular stone, shut in the seat of St. Edward's chair (the Coronation Chair) in Westminster Abbey, was at one time a stone to which adoration was paid. It was possessed of imagined miraculous gifts. This stone is
asserted to be the same which the Patriarch rested his head upon in the *Plain of "Luza,"
and is said to have been carried first to Brigantia, a city of Galicia, in Spain. From thence it was brought into Ireland by Simon Brech, the first King of the Scots, about 700 years before Christ; and from there, about 370 years after, into Scotland, by King Fergaze (Fergus). In the year of Christ 850 it was placed at the Abbey of Scone (in the county of Perth) by King Kenneth; this being the place where the Scottish Kings were generally crowned in those days. In the year 1297 this Scottish wooden throne or chair, together with their crown and sceptre, was brought into England by the English King Edward the First, and placed in Westminster Abbey.

"Si quid habent veri vel chronica, cana fidesve,
Clauditur hoc Cathedra nobilius ecce lapis,
Ad caput eximius Jacob quondam Patriarcha
Quem posuit, cernens numina mirapoli.
Quem tuit ex Scotia, spoliatis quasi victor honoris,
Edwardus Primus, Mars velut armipotens;
Scotorum Domitor, noster Validissimus Hector,
Anglorum Decus & gloria militia."

*Antiquities of Westminster Abbey, 1711.*

It is still supposed, in accordance with the ancient prophecies, that the stone in the Coronation Chair has miraculous gifts, and that the sovereignty of England depends upon it; as also that the preëminence of London is connected with the preservation of London Stone.

Both the ancient relic, London Stone, and the Coronation Stone in Westminster Abbey, seem of the same character. They appear to have been either worn down in the lapse of the ages, or to have been mutilated at some unknown, remote period—possibly thrown down and broken as objects of superstitious reverence, if not of direct and positive idolatry,
thus very probably exciting indignation, which, as it found opportunity and scope for its exercise, was successful in their demolition. In both these stones we certainly have only fragments.

The supposed magical stone, enclosed in the wooden block at the base of the Coronation Chair, has been reputed, from time immemorial, to murmur its approval or disapproval of the royal occupant, when placed in the chair for investiture with the sacred pallium or with the state robes, on the occasion of the King's or the Queen's coronation.

In this respect the stone is very similar in its ascribed supernatural gifts, and in this special oracular speaking-power, to all sacred or magical stones, and particularly to the famous statue of Mennon in Egypt, which is said to give forth a long, melodious tone with the first ray of sunrise, like that produced by the wind through the "Eolian harp. It is not quite clear whether this sound is expected to issue from the stone in the royal chair at Westminster when approval is intended, and the meaning of the stone is benign, or whether sounds are heard only when displeasure is to be expressed. This strange asserted power of the sacred stone at Westminster to become vocal directly allies it with other oracular stones all over the world. The prevalence everywhere, and in all time, of the existence of stones having this miraculous gift of expression is a striking and curious proof of the continual, invincible yearning of man for some supernatural help and direction from powers exterior and invisible to him. He earnestly desires the possibility of communication with that intelligent, unseen world which he cannot avoid thinking is near about him, surveying his doings. Man tries to overcome the assurance that this invisible, recognizable, responsive world, to betake himself to at his times of trouble, is, so far as his senses insist, so
hopelessly out of reach. He languishes to think it attainable.

The oracular stone at Westminster seems only a fragment of some pillar or *lithos*; but no one will attempt to dispute that it is an object of prodigious antiquity, and that its history is very remarkable and interesting. Its place of deposit, too, the shrine of Edward the Confessor, is worthy of it; and both inspire deep reverence.
E beg to premise that the following persuasions are not our belief, but that they are educed from old traditions.

It is a very old idea, derived from the highest antiquity, that the colour "white"—which, considered in the mystic and occult sense, is feminine in its origin—is fateful in its effects sometimes; and that, as a particular instance of its unfortunate character, it is an unlucky colour for the royal house of England—at all events, for the king or queen of England personally—singular as the notion would appear to be. We are not aware whether this unfortunate effect of the ominous colour white is supposed to extend to the nation generally. It is limited, we believe, to the prince or sovereign of England, and to his immediate belongings. The name John, which comes from Iona, a remote feminine root, has also been reckoned unfortunate for the king's name both in England and in France. The reason of this does not appear to be any where stated. The origin of the prophecy, also, as to the dangerous character of the
colour white to England is unknown; but it is imagined to be at least as old as the time of Merlin. Thomas de Quincey, who takes notice of the prophecy of the “White King,” says of King Charles the First, that the foreboding of the misfortunes of this “White King” were supposed to have been fulfilled in his instance, because he was by accident clothed in white at his coronation; it being remembered afterwards that white was the ancient colour for a victim. This, in itself, was sufficiently formidable as an omen. De Quincey’s particular expressions are, “That when King Charles the First came to be crowned, it was found that, by some oversight, all the store in London was insufficient to furnish the purple velvet necessary for the robes of the king and for the furniture of the throne. It was too late to send to Genoa for a supply; and through this accidental deficiency it happened that the king was attired in white velvet at the solemnity of his coronation, and not in red or purple robes, as consisted with the proper usage.”

As an earlier instance of this singular superstition, the story of that ill-fated royal White Ship occurs to memory, as the vessel was called wherein Prince William, the son of King Henry the First, the heir-apparent, with his natural sister, the Countess of Perche, and a large company of the young nobility, embarked on their return to England from Normandy. It might be supposed that the misfortunes of King Charles the First, which were accepted, at that time of monarchical dismay, as the reading (and the exhaustion) of this evil-boding prophecy, were enough; but there are some reasons for imagining that the effects are not—even in our day—altogether expended. The fatalities of the colour “white” to English royalty certainly found their consummation, or seemed so to do, in the execution of King Charles the First, who was brought out to suffer before his
own palace of "Whitehall"—where, again, we find "white" introduced in connection with royalty and tragical events. Whitehall is the Royal "White" Palace of England. The "White Rose" was the unfortunate rose (and the conquered one) of the contending two Roses in this country. This is again a singular fact, little as it has been remarked. We will pursue this strange inquiry just a little further, and see if the lights of Rosicrucianism will not afford us a measure of help; for it is one of the doctrines of the body of Rosicrucians that the signatures, as they call them, of objects have a denoting and a preternatural effect, through hidden spiritual reasons, of which we have no idea in this mortal state,—in other words, that magic and charming, through talismans, is possible; common sense being not all sense.

The colour white is esteemed both of good and of bad augury, according to the circumstances and the periods of its presentation. However (to speak a few strange words), in relation to the use of the name "Albert Edward," in a possible future time, which every loyal subject will hope to be remote enough, we would advise (supposing so humble a voice as ours should reach, or could attain, to the quarters where such a change might be effected) a variation of our future king's name, and an avoidance of this supposedly unfortunate prefix "Albert" in favour of "Edward" only. This name of Edward is an historical, triumphant, and auspicious name; for all our Edwards, except the weak King Edward the Second, have been powerful or noteworthy men. Now, very few people have had occasion to remark, or have recalled the fact as significant and ominous in the way we mean, that the word "Albert" itself means "White." The root of "Albert" is, in most languages, to be found in "white:" albus, white; alp, white; Albania, the "white" country. We here recall the "snowy camel," to which
Byron makes reference as worn in Albania. "Albion" (of the "white" cliffs), Alb, Al, El, Æl, all mean "white." Examples might be multiplied. αλφος, αλπε, albus, "white," are derived from the Celtic alp; and from thence came the word "Alps," which are mountains always white, as being covered with snow. "Albus, 'white,' certainly comes from the Celtic alp, or alb," says the historian Pezron; "for in that language, as well as in many others, the b and the p frequently interchange; from whence the ancient Latins, and the Sabines themselves, said Alpus for white. I consider it therefore as certain," continues Pezron, "that from Alpus the word Alps came, because the mountains are always white, as being covered with snow; the words 'Alp,' or 'Alb,' and their compounds, meaning white every where. I conclude, also, that from the Pen of the Celtæ, Umbrians, and Sabines, which signifies a 'head,' 'top,' or 'high place,' they made Penninus Mons, the Apennines, vast mountains in Italy. Thus these celebrated words proceed certainly from the Gaulish tongue, and are older by several ages than the city of Rome." The following are all Teutonic or German words: alb, alf (Qy. Alfred ?), and alp,—which all signify "white," as their original root. Thus much for white.

White is also a colour not auspicious to the Prussian royal family, although, again, in a contradictory way, the ensigns of Prussia (Borussia, or "of the Borussi") are, as armorists well know, the original "white and black" of the Egyptians, which were adopted by the Teutons and the Templars. These white and black tinctures are heraldically argent and sable: Luna, or pearl, for "tears;" Saturn, or diamond, for "sadness, penance, and ashes." In these strange senses, the Rosicrucians accepted colours as in themselves talismanic, powerfully operative through their planetary "efficients," or "signatures," as the astrologers call them.
These ideas, more or less pronounced, have prevailed in all ages and in all countries, and they lurk largely in suspicion through our own land. We are all aware, in England, of the objection to the colour "green" in certain cases. It is the spirit-colour, a magic colour, the colour of the "fairies," as the cabalistic, tutelary, miniature spirits are called, who are supposed to be very jealous of its use. In Ireland, green is universally regarded with distrust; but with veneration, in the spiritual sense. It is the national colour; for the Patroness of Ireland is the female deity, the Mother of Nature, known in the classic mythology as Venus,—equally Venus the graceful and Venus the terrible, as the Goddess of Life and of Death. The various *verts*, or greens, are the "colour-rulers" in the emblazonry of the Emerald Isle. The presiding deity of the Land of Ierna, or of Ireland, is the mythic "Woman," born out of the fecundity of nature, or out of the "Great Deep." This is the genius (with certain sinister, terrible aspects, marked out grandly in the old forms) who is "impaled" or "crucified"—in its real, hidden meaning—upon the stock, or "Tree of Life," indicated by the Irish Harp. Her hair, in the moment of agony, streams Daphne-like, as "when about to be transformed into the tree," behind her in the wind, and twines, in the mortal, mythical stress, into the *seven* strings of the magic Irish Harp, whose music is the music of the spheres, or of the Rosicrucian, assumed penitential, visible world. These seven strings stand for the seven vowels, by means of which came speech to man, when the "new being," man (this is cabalistic again, and therefore difficult of comprehension), "opened his mouth and spake." The seven strings of the Irish Harp, it will be remembered, are blazoned "Luna," or the "Moon"—the feminine moon—according to the practice of the old heralds, in regard to all royal or ruling achievements, which
THE ROSICRUCIANS.

are blazoned by the names of the planets. The seven strings of the Irish harp mean also the seven pure tones in music; these, again, stand for the seven prismatic colours; which, again, describe the seven vowels; and these, again, represent their seven rulers, or the seven planets, which have their seven spirits, or "Celestial Flames," which are the seven Angels or Spirits of God, who keep the way round about "the Throne of the Ancient of Days."

There is in most countries an objection to Friday, although it is the Mohammedan sacred day or Sabbath. Friday is the day of the "Green." Emeralds, or smaragdas, are proper to be worn on Friday, and bring good fortune, as exercising occult influences on this particular day.* This is the day on which all green gems, and the colour green, should be universally used. Friday is the "woman's day" of the sevenfold weekly period; and therefore, as some ill-natured people might say, it is the unlucky day. Certain it is,

* The breastplate of the Jewish High-Priest had its oracular gems, which were the Urim and Thummim. The reputed enchanter, Apollonius Tyaneus, is said, for the purposes of his magic, to have worn special rings, with their appropriate gems, for each day of the sevenfold week, to command the particular spirits belonging to the different days. The Hermetic Brethren had certain rules that they observed in relation to this view of the power of precious stones to bring good or bad fortune through the planetary affinities of certain days, because they imagined that the various gems, equally as gold and silver, were produced through the chemic operation of the planets, working secretly in the telluric body. They thought that gold and silver, and all the gems, had but one foundation in nature, and were simply augmented, purified, and perfected through the operation of the hermetic or magnetic light—invisible and unattainable under ordinary circumstances, and unknown, except to the alchemists. All yellow gems, and gold, are appropriate to be worn on Sunday, to draw down the propitious influences, or to avert the antagonistic effects, of the spirits on this day, through its ruler and name-giver, the Sun. On Monday, pearls and white stones (but not diamonds) are to be worn, because
GEMS, AND THE DAYS OF THE WEEK.

195

however, that although it presents the exact contradiction of being especially the woman's day, few or no marriages would be celebrated on this day, as popularly bearing the mark of ill-luck, which supposition few would like openly to defy, or, according to the familiar expression, "fly in the face of." May is also forbidden for marriages, although it is the "woman's month," or month in which "May-day" occurs, and in which "May-poles" used to be set up everywhere. (See figures of May-poles later in our book.)

But to return to the ill-omened colour to England, white, and to the important (in this sense, formidable) shape in which we find it to appear in the name borne by our Prince of Wales—"Albert Edward;" inheriting his name "Albert" from perhaps the best and most lovable prince whom this country has ever known as casting in his destinies, by marriage, with it, but whose end—in the prime of life, and in the fulness of his power—was surely this is the day of the Moon, or of the second power in nature. Tuesday, which is the day of Mars, claims rubies, and all stones of a fiery lustre. Wednesday is the day for turquoises, sapphires, and all precious stones which seem to reflect the blue of the vault of heaven, and that imply the lucent azure of the supposed spiritual atmosphere, wherein, or under which, the Rosicrucian sylphs dwell—those elementary children who, according to the cabalistic theogony, are always striving for intercourse with the race of Adam, seeking a share of his particular privilege of immortality, which has been denied to them. Thursday demands amethysts and deep-coloured stones of sanguine tint, because Thursday is the day of Thor—the Runic impersonated Male Divine Sacrifice. Friday, which is the day of Venus, has its appropriate emeralds, and reigns over all the varieties of the imperial, and yet strangely the sinister, colour green. Saturday, which is Saturn's day, the oldest of the gods, claims for its distinctive talisman the most splendid of all gems, or the queen of precious stones, the lustre-darting diamond, which is produced from the black of Sab, Seb, or Saturn, the origin of all visible things, or the "Great Deep," or "Great Mother," in one sense.
unfortunate enough, when the eyes of hope of all Europe, in various respects, were fixed upon him! Let us, then, suggest that the name "Albert" be passed over in the person of the Heir to the Throne; and let us hope that by and by (in distant days we trust it may be) he will be known as king by the name—the propitious name—of Edward only, "Edward the Seventh,"—a period whose oncome, because of the disappearance which it will imply, we most earnestly and religiously deplore. But the time must come; and we may be forgiven the thought sometimes faintly obtruding. For it is of England and of her destinies we speak,—fanciful and strange as our unexpected allusions, and remote, legendary speculations, may appear; far off the beaten tracks of this hard, common-sense, mechanical, every-day world, in which the lot of thinkers, if of unusual bent, really seems hardly cast, and even cruelly cast. But men are men, and thoughts are thoughts: whether the thoughts of the "Conquest," or of those of the reign of Victoria, all are alike in their reality at the time that they arise in the mind.

The "White Lady of Berlin," and her mysterious appearances from time to time, are well known to the writers of modern romantic biographical story. Whom she is supposed to represent seems to be unknown to all. Those who have recorded her fitful revelations of herself venture no surmise; but she is considered in some way the evil genius of the Hohenzollern family, much in the same manner as the unaccounted-for figure might have been regarded who revealed himself to Brutus on the Plains of Philippi, and who announced the crowning misfortunes of the next day. The Irish have a name for this supernatural appearance in the "banshee," or the speaker, or exponent, of fate. The "White Lady of Berlin" is supposed to be seen by some per-
son in the palace before any preëminent disaster supervenes, occurring to a member of the royal house. The glimpses of this White Lady are only momentary and delusive,—so vague, indeed, as to be readily contradicted or explained away (perhaps willingly) even by the supposed seers themselves. It is also a fact not a little curious, when we come to consider it by the side-glance, as it were, that the colour white (the English unfortunate colour), besides being that of the "White Rose" and of "Whitehall," is that white of the unlucky Stuarts, whose history through centuries, both in Scotland and in England, was but one long catalogue of mishaps and disasters. Prince Charles Edward and his famous "white cockade," and the evil fortunes of all his followers and of the Jacobite cause in general in 1715 and 1745, emblemed in the virgin, holy colour white, supply a touching—nay, tragical—page in public and in private history. Lastly, we may adduce as a supposed exemplification of the terrible general effects of this evil-boding name albus, and colour white, in France, the history of all the Bourbons, whose colour is white in particular, from the first of that name who displayed his snowy banner, and who fell by the dagger of an assassin, to the last Bourbon in modern history, whose fate we will not attempt to forecast, nor in any manner to seem to bespeak. Merlin, whose prophecy of the dangers, at some time, of "white" to the kingdom of England was supposed to refer to the invasion of this country by the pale Saxons, whose device or token was the "white horse," until further associations of white and misfortune in England came to dispel the idea, may even still have his original prophetic forecast unfulfilled. The colour white, or some strange, at present unimagined, associations of "white," may yet lie, like a dream, perdu in the future (of the chances of which no man can speak), to justify
Merlin at once, and to astonish and bewilder, by the long-delayed evolvement of the centuries in which at last the realisation and the misfortune become simultaneously apparent: for which, and for the possibilities of which, we will terminate in the adjuration of the Romans, those masters in the art of augury and of divination, "Absit omen!" But thus much we have chosen to explain about the colour white, in justification of the ideas of the Rosicrucians as to the supernatural power of colours, and as to the magical qualities of those occult influences which they determined, in their philosophical vocabularies, strangely and mysteriously to call the "signatures of things."
CHAPTER THE TWENTY-THIRD.

THE BELIEFS OF THE ROSICRUCIANS—MEANING OF LIGHTS AND OF COMMEMORATIVE FLAMBEAUX IN ALL WORSHIP.

From the name of the Temple, now Stonehenge, comes the name of Amblesbury, which stands a few miles from it. This is called the "Ambres of the Abiri." It is two words, and means the "Ambres of the Dii Potentes," or of the םיריבא, or "Cabiri,"—for they are the same.

The star of the Légion d’Honneur bears the inscription—"Napoléon, Empereur des Français." This order was instituted by the Emperor Napoleon the First, after the discovery and dissolution of the Secret Society, or Brotherhood, of which General Pichegru, Georges Cadoudal, the famous Moreau, and other noted revolutionary men, were members. This order possessed, it is stated, a talisman, or mystic head, which served as a recognizable mark, and was supposed to be a sort of bond to the brotherhood. After their death, their secret insignia were discovered; and it has been stated that the Emperor Napoleon, whose attention was instantaneously arrested by great and unusual ideas or supernatural suggestions, in suppressing this mystic symbol or head, adopted it in another form, and substituted his own head.
in profile, as the *palladium*, or talisman, for his new order of the "Legion of Honour."

The saffron robe of Hymen is of the colour of the Flame of Fire. The Bride, in ancient days, was covered with a veil called the "*Flammeum;*" unless made under this, no vow was considered sacred. The ancients swore, not by the altar, but by the flame of fire *which was upon the altar*. Yellow, or flame-colour, was the colour of the Ghebers, or Guebres, or Fire-Worshipers. *The Persian lilies are yellow*; and here will be remarked a connection between this fact of the yellow of the Persian lilies and the mystic symbols in various parts of our book. Mystic rites, and the symbolical lights, which mean the Divinity of Fire, abound at Candlemas-day (February 2d), or the Feast of the Purification; in the torches borne at weddings, and in the typical flame-brandishing at marriage over almost all the world; in the illuminations at feasts; in the lights on, and set about, the Christian altar; at the festival of the Holy Nativity; in the ceremonies at preliminary espousals; in the Bale, or Baal, fires on the summits of the mountains; in the watch-lights, or votive sanctuary-lights, in the hermitage in the lowest valley; in the *chapelle ardente*, in the Romish funereal observances, with its abundance of silent, touching lights around the splendid *catasfalque*, or twinkling, pale and ineffectual, singly at the side of the death-bed in the cottage of the peasant. Starry lights and innumerable torches at the stately funeral, or at any pompous celebration, mean the same. In short, light all over the world, when applied to religious rites, and to ceremonial, whether in the ancient or in the modern times, bespeaks the same origin, and struggles to express the same meaning, which is Parsecism, Perseism, or the worship of the deified *Fire*, disguised in many theological or theosophic forms. It will, we trust, never be
supposed that we mean, in this, real fire, but only the inexpressible something of which real fire, or rather its flower or glory (bright light), is the farthest off—because, in being visible at all, it is the grossest and most inadequate image.

All this strange, dreamy, ethereal view of a vital, accessible something, entirely separate from the suggestions of mere sensation, is Gnosticism, or Bhuddism, in its own profoundest depth. It follows on similarly to the "intoxication," or suffusion with the very certainty of the presence of God, which, in the poetic sense, was said to fill the mind of even the supposed arch-atheist Spinoza.

The Rosicrucians, through the revelations concerning them of their celebrated English representative, Robertus de Fluctibus, or Robert Fludd, declare, in accordance with the Mosaic account of creation,—which, they maintain, is in no instance to be taken literally, but metaphorically,—that two original principles, in the beginning, proceeded from the Divine Father. These are Light and Darkness,—or form or idea, and matter or plasticity. Matter, downwards, becomes fivefold, as it works in its forms, according to the various operations of the first informing light; it extends four-square, according to the points of the celestial compass, with the divine creative effluence in the centre. The worlds spiritual and temporal, being rendered subject to the operation of the original Type, or Idea, became, in their imitation of this Invisible Ideal, first intelligible, and then endowed with reciprocal meaning outwards from themselves. This produced the being (or thought) to whom, or to which, creation was disclosed. This is properly the "Son," or Second Ineffable Person of the Divine Trinity. Thus that which we understand as a "human mind" became a possibility. This second great, only intelligible world, the Rosicrucians call "Macrocospus." They distribute it as
into three regions or spheres; which, as they lie near to, or dilate the farthest from, the earliest-opening divine "Brightness," they denominate the Empyreum, the Ætheræum, and the Elementary Region, each filled and determinate with less and less of the First Celestial Fire. These regions contain innumerable invisible nations, or angels, of a nature appropriate to each. Through these immortal regions, Light, diffusing in the emanations of the cabalistic Sephiroth, becomes the blackness, sediment, or ashes, which is the second fiery, real world. This power, or vigour, uniting with the Ethereal Spirit, constitutes strictly the "Soul of the World." It becomes the only means of the earthly intelligence, or man, knowing it. It is the Angel-Conqueror, Guide, Saviour born of "Woman," or "Great Deep," the Gnostic Sophia, the "Word made flesh" of St. John. The Empyreum is properly the flower, or glory (effluent in its abundance), of the divine Latent Fire. It is penetrated with miracle and holy magic. The Rosicrucian system teaches that there are three ascending hierarchies of beneficent Angels (the purer portion of the First Fire, or Light), divided into nine orders. These threefold angelic hierarchies are the Teraphim, the Seraphim, and the Cherubim. This religion, which is the religion of the Parsees, teaches that, on the Dark Side, there are also three counterbalancing resultant divisions of operative intelligences, divided again into nine spheres, or inimical regions, populated with splendidly endowed adverse angels, who possess still the relics of their lost, or eclipsed, or changed, light. The elementary world, or lowest world, in which man and his belongings, and the lower creatures, are produced, is the flux, subsidence, residuum, ashes, or deposit, of the Ethereal Fire. Man is the microcosm, or "indescribably small copy," of the whole great world. Dilatation and compression, expansion
and contraction, magnetic sympathy, gravitation to, or flight from, is the bond which holds all imaginable things together. The connection is intimate between the higher and the lower, because all is a perpetual aspiration, or continuous descent: one long, immortal chain, whose sequence is never-ending, reaches by impact with that immediately above, and by contact with that immediately below, from the very lowest to the very highest. "So true is it that God loves to retire into His clouded Throne; and, thickening the Darkness that encompasses His most awful Majesty, He inhabits an Inaccessible Light, and lets none into His Truths but the poor in spirit." The Rosicrucians contended that these so "poor in spirit" meant themselves, and implied their abasement before God.

The Rosicrucians held that, all things visible and invisible having been produced by the contention of light with darkness, the earth has denseness in its innumerable heavy concomitants downwards, and they contain less and less of the original divine light as they thicken and solidify the grosser and heavier in matter. They taught, nevertheless, that every object, however stifled or delayed in its operation, and darkened and thickened in the solid blackness at the base, yet contains a certain possible deposit, or jewel, of light,—which light, although by natural process it may take ages to evolve, as light will tend at last by its own native, irresistible force upward (when it has opportunity), can be liberated; that dead matter will yield this spirit in a space more or less expeditious by the art of the alchemist. There are worlds within worlds,—we, human organisms, only living in a deceiving, or Bhuddistic, "dream-like phase" of the grand panorama. Unseen and unsuspected (because in it lies magic), there is an inner magnetism, or divine aura, or ethereal spirit, or possible eager fire, shut and
confined, as in a prison, in the body, or in all sensible solid objects, which have more or less of spiritually sensitive life as they can more successfully free themselves from this ponderable, material obstruction. Thus all minerals, in this spark of light, have the rudimentary possibility of plants and growing organisms; thus all plants have rudimentary sensitivities, which might (in the ages) enable them to perfect and transmute into locomotive new creatures, lesser or higher in their grade, or nobler or meaner in their functions; thus all plants and all vegetation might pass off (by side-roads) into more distinguished highways, as it were, of independent, completer advance, allowing their original spark of light to expand and thrill with higher and more vivid force, and to urge forward with more abounding, informed purpose—all wrought by planetary influence, directed by the unseen spirits (or workers) of the Great Original Architect, building His microcosmos of a world from the plans and powers evoked in the macrocosm, or heaven of first forms, which, in their multitude and magnificence, are as changeable shadows cast off from the Central Immortal First Light, whose rays dart from the centre to the extremest point of the universal circumference. It is with terrestrial fire that the alchemist breaks or sunders the material darkness or atomic thickness, all visible nature yielding to his furnaces, whose scattering heat (without its sparks) breaks all doors of this world's kind. It is with immaterial fire (or ghostly fire) that the Rosicrucian loosens contraction and error, and conquers the false knowledge and the deceiving senses which bind the human soul as in its prison. On this side of his powers, on this dark side (to the world) of his character, the alchemist (rather now become the Rosicrucian) works in invisible light, and is a magician. He lays the bridge (as the Pontifex, or Bridge-Maker) between the world possible and the
world impossible; and across this bridge he leads the votary out of his dream of life into his dream of temporary death, or into extinction of the senses and of the powers of the senses; which world's blindness is the only true and veritable life, the envelope of flesh falling metaphorically off the now liberated glorious entity—taken up, in charms, by the invisible fire into rhapsody, which is as the gate of heaven.

Now a few words as to the theory of alchemy. The alchemists boasted of the power, after their elimination and dispersion of the ultimate elements of bodies by fire (represented by the absent difference of their weights before and after their dissolution), to recover them back out of that exterior, unknown world surrounding this world: which world men reason against as if it had no existence, when it has real existence. It is this other world (just off this real world) into which the Rosicrucians say they can enter, and bring back, as proofs that they have been there, the old things (thought escaped), metamorphosed into new things. This act is transmutation. This product is magic gold, or "fairy gold," condensed as real gold. This growing gold, or self-generating and multiplying gold, is obtained by invisible transmutation (and in other light) in another world out of this world; immaterial to us creatures of limited faculties, but material enough, farther on, on the heavenly side, or on the side opposite to our human side. In other words, the Rosicrucians claimed not to be bound by the limits of the present world, but to be able to pass into this next world (inaccessible only in appearance), and to be able to work in it, and to come back safe out of it, bringing their trophies with them, which were gold, obtained out of this master-circle, or outside elementary circle, different from ordinary life, though enclosing it; and the elixir vitae, or the means of the renewal or the perpetuation of human life.
through this universal, immortal medicine, or *magisterium*, which, being a portion of the light outside, or magic, or breath of the spirits, fleeing from man, and only to be won in the audacity of alchemic exploration, was independent of those mastered natural elements, or nutritions, necessary to ordinary common life. The necessary food which is taken for the sustenance of the body was, as the Rosicrucians contended, the real cause of the destruction of the body, by the slowest of all processes, but yet an effectual one. They asserted that man dies daily in his own native bodily corruptions. These singular philosophers ventured the assertion that God did not, in the beginning, intend that man's life should be terminated by diseases, nor that he should be made subject to accidental, violent means of end. In the abstract sense, and apart from our knowledge of man as man, the Rosicrucians contended that diseases are not necessarily incidental to the body, and that death may be said to have become an imported accident into the scheme of things: our ideas being erroneous.

Man was to have lived as the angels, of an impregnable, impassible vitality, taking his respiration, not by short snatches, as it were, but as out of the great cup of the centuries. *He* was to be the spectator of nature—not nature *his* spectator. The real objects of the adepts were, in truth, to remain no longer slaves to those things supposed to be *necessities*, but, by the assistance of Heaven, to remove back to Heaven's original intention; to rise superior to the consequences of the original Curse, and to tread under foot, in vindicating the purpose of God, that mortal (however seductive), sexual, distinctive degradation, entailing dissolution, heired from Adam, or from the First Transgressor. That poverty and celibacy (under certain limitations) must be the obligations of the true Brothers of the "R.C." will at
THE ART OF THE GOLD-MAKERS.

once be seen from the above reasons, however wild and mistaken—barely even comprehensible.

The original curse was entailed upon mankind by eating of

"the fruit
Of that forbidden 'Tree,' whose mortal taste
Brought death into the world, and all our woe."

What that "Tree" was, and what are its votive, idolatrous (in the bad sense) symbols in the old world and in the new, we think we have abundantly shown—at least, in the occult, shadowy idea. Why, supposing that the alchemists ever possessed the power of universal gold-making, they fail of producing any, or of offering one of their rich gifts to the world, is at once answered in these two conclusive, obvious facts: Firstly, that if this power of gold-making, or of transmutation, were a recognised possibility, like any other art allowed or authorised, it would inevitably become penal, in order to preserve the existing value of gold, the richest metal; and the professor of the art would be at once put out of sight. Secondly, if supposed to be true, and no fable, like any ordinary art or science, the man who had arrived at such a stupendous secret would be sacrificed in the insatiate haste of the people to compel him to produce gold, in order to satisfy them—that gold, moreover, which will destroy, but can never satisfy. "Ye cannot serve God and Mammon." These things the alchemists too well know, and therefore they (if any exist now) hide, as they have always hidden, and deny, as they have always denied; being desirous of serving God alone, whose inaccessible great glory, as we see, has been imitated in the golden lights of the inexpressibly grand (in the worldly and mortal sense), apostate constructions of the magnificent Mammon, Lord of the Treasures of this World, for which men offer themselves
willing victims even to Him, King of the Visible, whose semblance is that of the most brilliant yellow element—Fire.

The alchemists maintain that the metals are produced in the secret operations of the planets, that grow them daily in the bowels of the earth; that the sun and moon, red and white, fire and water, light and darkness, male and female, night and day, are active in the generation of the precious metals, of which gold is due wholly to the invisible operation of the sun and moon, and silver is referable to the whitening or bleaching lucidity of the moon; that gold is produced quicker or slower according to the faster or slower operations of nature; that it vivifies and vegetates, bears bright seed and multiplies, germinating as fructifying in the matrix, or the laboratories of the earth; that gold is produced with infinite pains, as it were, by these chemic operations of nature, very slowly under certain circumstances, but very rapidly under other more favourable, more powerful conditions; that it is possible for the adept to act as the midwife of nature, and to assist in her deliverance, and in the birth of gold, in these occult senses; that the work of nature being thus expedited by this alchemical art, the hitherto thwarted intention of Providence is effected in the predetermined liberation of the divine gold, "Lux," or light, which is again united to its radix, or producing-point, in heaven. A spark of the original light is supposed by the Rosicrucians to remain deep down in the interior of every atom.

The Rosicrucian Cabala teaches that the three great worlds above—Empyræum, Ætheræum, and the Elementary Region—have their copies in the three points of the body of man: that his head answers to the first; his breast, or heart, to the second; and his ventral region to the third. In the head rests the intellect, or the magnetism of the assenting judgment, which is a phenomenon; in his heart is
the conscience, or the emotional faculty, or the Saviour; and in the umbilical centre reside the animal faculties, or all the sensitives. Nutrition is destruction in the occult sense, and dissolution is rescue in the occult sense; because the entity, or visible man, is constructed in the elements, and is as equally ashes, or condemned matter, as they are; and because the fire that feeds the body (which is its natural respiration or maintenance) is in itself that which (however slowly) destroys it. Man lives upon the lees of nature, or (in the Buddhistic view) upon the "gross purgations of the celestial fire," which is urging itself clear through the operation of the divine rescuing spirit in it. It follows that metaphysically all the wonderful shows of life are phantasmata only, and their splendours false and a show only. But as these shows are the medium and the instruments of life, without which intelligence (in the human sense) would be impossible, this celestial "Second Fire" has been deified in the acknowledgments of the first inhabitants of the world, who raised pillars and stones in its honour as the first idol. Thus man bears in his own body the picture of the "Triune." Reason is the head, feeling is the breast, and the mechanical means of both feeling and reasoning, or the means of his being Man, is the epigastric centre, from which the two first spring as emanations, and with which the two first form ultimately but "one." The invisible magnetic, geometrical bases, or latitudes, of these three vital points, whose consent, or coincidence, or identity, forms the "microcosm," which is a copy of the same form in heaven, answer magically to their stellar originals. This is astrological "ruling" by pyramidal culmination, and by trilinear descent or efflux, to an intersecting point in the latitudes of the heavens and in the man's body, at which upper and lower, or heaven and earth, interchange; and Man is therefore said to be made "in the
image” of the Archetype, who has “descended” to man, who has “ascended” to Him. This is the “hinge-point” of the natural and the supernatural, upon which the two wings of the worlds real and unreal revolve. The starry heavens, through whose astrological cross-work complications (as in a map) all these infinite effects are produced, and on whose (for, taking gravitation away, they are the same) floor of lights, or cope or dome of signs or letters, all the “past, present, and future” has been written by the finger of God (although to man they are ever rearranging), can be read by the competent as Fate. Natural and supernatural, though one is only the reversed side of the other, as “darkness is only the reversed side of light, and light is only the reversed side of darkness,” are mistaken by man for opposites, although they are the same: man living in this state in darkness, although his world is light; and heaven in this state being darkness, although this state is light.

Music (although it is unheard by man) is necessarily produced in the ceaseless operations of material nature, because nature itself is but the painful (and musical) expression between two dissonant points. The Bhuddist contends that all forms are but the penance of nature. Music is life, and life is music. Both are pain, although made delightful. Phenomena are not real.

Thus colours are negative as music addressed to the ear, the musical notes negative as colours addressed to the eye, and so on of the other senses, although they are all the same in the imagination, without the sensorium—as dreams show. And life and the world, in this view, are all imagination: man being made in idea, and only in his own belief. This, again, is only pure Parseeism; and the whole will be rightly regarded as the most extraordinary dream of philosophy—as depth of depths beyond idea.
Schubert, in his *Symbolism of Dreams*, has the following passages, which we have before adduced and made use of for illustration: "It may be asked whether that language, which now occupies so low a place in the estimation of men, be not the actual waking language of the higher regions, while we," adds the philosopher, coming out with something very strange, "awake as we fancy ourselves, may be sunk in a sleep of many thousand years, or, at least, in the echo of their dreams, and only intelligibly catch a few dim words of that language of God, as sleepers do scattered expressions from the loud conversation of those around them."

The following is a fair view of the Rosicrucian theory concerning music.

The whole world is taken as a musical instrument; that is, a chromatic, sensible instrument. The common axis or pole of the world celestial is intersected—where this superior diapason, or heavenly concord or chord, is divided—by the spiritual sun, or centre of sentience. Every man has a little spark (sun) in his own bosom. Time is only protracted consciousness, because there is no world out of the mind conceiving it. Earthly music is the faintest tradition of the angelic state; it remains in the mind of man as the dream of the lost paradise. Music is yet master of the man's emotions, and therefore of the man.

Heavenly music is produced from impact upon the paths of the planets, which stand as chords or strings, by the cross-travel of the sun from note to note, as from planet to planet; and earthly music is microscopically an imitation of the same, and a "relic of heaven;" the faculty of recognition arising from the same supernatural musical efflux which produced the planetary bodies, in motived projection from the sun in the centre, in their evolved, proportional, harmonious
order. The Rosicrucians taught that the "harmony of the spheres" is a true thing, and not simply a poetic dream: all nature, like a piece of music, being produced by melodious combinations of the cross-movement of the holy light playing over the lines of the planets: light flaming as the spiritual ecliptic, or the gladius of the Archangel Michael, to the extremities of the solar system. Thus are music, colours, and language allied.

Of the Chaldean astrology it may figuratively be said that, although their knowledge, in its shape of the "Portentous Stone,"—in this instance, their grave-stone,—shut up the devils in the depths of the "Abyss," and made the sages their masters (Solomon being the Priest or King, and his seal the "Talisman" that secures the "Deep"); Man, on account of his having fallen into the shadow and the corruptions of Existence, needs that mighty exterior HAND (before which all tremble) to rescue him back into his native original Light or Rest. All the foregoing is pure Bhuddism.

Thinkers who have weighed well the character of those supposed infractions of natural laws which have admitted, as it were philosophically, the existence of other independent, absent, thinking spirits, communicating intelligibly in this world of ours, insist "that it is impossible to suppose that the partitions between this world and the other world are so thin that you can hear the movers in the other."

Nevertheless, thoughtful people are equally able to convict modern philosophical realists of absurdity, when the former adduce the following insurmountable objection against them: "When we tell you of a supernatural thing," say the supernaturalists to the realists, "you directly have recourse to a natural thing in which to find it." This is contrary to common sense; and therefore the realistic arguer has no right to dispose in this manner of that which
is supernatural; for his objections are futile and vain, and his arguments contradict themselves. Spirit and matter, when sought to be explained, are totally opposed; and hence arises the reason why there can never be any belief of impossible things, and only the conviction that such things have been in the mind, notwithstanding the insurmountable contradiction of the senses.

Gnostic Gem: "The Good Shepherd."
CHAPTER THE TWENTY-FOURTH.

THE GREAT PYRAMID.

In a very elaborate and interesting book, published in the year 1867, the title of which, at length, is the following: "Life and Work at the Great Pyramid. By C. Piazzi Smyth, Professor of Practical Astronomy in the University of Edinburgh, and Astronomer Royal for Scotland. Edmonston and Douglas, Edinburgh and London. 1867:"

the conclusions (though a mistake) which we now supply from the author are offered as definitions, after infinite care, of this important name or word, "PYRAMID." "Pyramid" is derived in this book from two Greek terms—πυρός, "wheat;" μετρον, "measure;" or from Coptic roots, signifying pyr, "division;" met, "ten." However, we offer to deduce this term "Pyramid" from quite another source. The present writer originally sought to do this in the year 1860, in a dissertation on the origin and purpose of the "Pyramids of Egypt." It is well known that the letters P and F are radically the same letter (as is evidenced by their peculiar pronunciation in certain countries), and that they are interchangeable. In Professor Smyth's book, Πυρός is wrongly translated "wheat." It signifies "product," or
"growth," or "elimination;" in other words, and in the symbolical sense, it means "sun-begotten," or "fire-begotten." The Coptic derivation (re-read by a new light) is the true one. Thus we obtain another reason upon which we rely as the real interpretation of the name of the pyramid, or obelisk, or great original altar or upright, raised to the divinity working secondarily in nature. Πυρ is Fire (or Division produced by fire); Μετρον is Ten (or measures or spaces numbered as ten). The whole word means, and the entire object bearing this name means, the original Ten Measures or Parts of the Fiery Ecliptic or Solar Wheel, or the Ten Original Signs of the Zodiac. Therefore the Pyramids are commemorative altars raised to the divinity Fire.

The Ophites are said to have maintained that the serpent of Genesis was the Λογος, and the "Saviour." The Logos was Divine Wisdom, and was the Bhudda, or Buddha, of India. The Brazen Serpent was called Λογος, or the "Word," by the Chaldee Paraphrase (Barnes, lib. iv. ch. xxv.). It is very certain that, in ancient times, the serpent was an object of adoration in almost all nations. The serpent-worshipers seem to have placed at the head, or nearly at the head, of all things (Maia), and most intimately connected with the serpent, a certain principle which they called "Sophia." This is clearly a translation of the word "Bhudda" into Greek. It also reminds us that the old Bhuddas are always under the care of the Cobra-Capella. This is evidenced in all the Memnonian or Egyptian heads; and in the asp (or fleur-de-lis), more or less veiled or altered, displayed as the chief symbol upon the universal Sphynxes. The serpent, in one view, was the emblem of the evil principle, or destroyer. But, as we have seen before, the "destroyer" was the "creator." Hence he had the name, among his numerous appellations, of ΟΦΙΣ; in Hebrew, יְהוָה, Ob; and as he was
the "logos," or "linga," he was also ΩΨ, and in Hebrew אֱלֹה. Query, hence Συφαρ, a seraph or serpent?—see Jones's *Lexicon (in voce)*, and Σοφος, wise. The Συφ and Σοφ are both the same root. The famous "Brass Serpent," called Nehustan, set up by Moses in the Wilderness, is termed in the Targum a "Saviour." It was probably a "serpentine crucifix," as it is called a cross by Justin Martyr. All the foregoing is allegorical, and hides deep Gnostic myths, which explain serpent-worship, united with the adoration paid to a perpendicular.

The three most celebrated emblems carried in the Greek mysteries were the Phallus, Π; the Egg, Ο; and the Serpent, Φ; or otherwise the Phallus, the Ioni or Umbilicus, and the Serpent. The first, in each case, is the emblem of the sun, or of fire, as the male, or active, generative power. The second denotes the passive nature, or feminine principle, or the element of water. The third symbol indicates the destroyer, the reformer, or the renewer (the uniter of the two), and thus the preserver or perpetuator—eternally renewing itself. The universality of the serpentine worship (or phallic adoration) is attested by emblematic sculpture and architecture all over the world. This does not admit of denial. Its character and purpose are, however, wholly misunderstood. Not only is the worship of the serpent found every where, but it every where occupies an important station; and the farther back we go, the more universally it is found, and the more important it appears to have been considered. The Destroyer or Serpent of Genesis is correctly the Renovator or Preserver. In Genesis there is a "Tree of Knowledge" and a "Tree of Life." Here we have the origin of the *Ophites*, or Oriental emblematical serpent-worshipers, to account for whom, and for whose apparently absurd object of adoration, our antiquaries have been so much perplexed. They worshiped the
Saviour-Regenerator under the strangest (but the sublime) aspect in the world; but not the devil, or malific principle, in our perverse, mistaken ideas, and with the vulgar; downward, literal meanings which we apply. The mythic and mimetic art of the Gnostics is nowhere more admirably or more successfully displayed than in their hieroglyphs and pictured formulae. Even in the blazonry and in the collars and badges of chivalry (which seems so remote from them), we find these Ophite hints. The heathen temples and the modern ritualistic churches alike abound in unconscious Gnostic emblems. State ceremony harbours them; they mix with the insignia of all the orders of knighthood; and they show in all the heraldic and masonic marks, figures, and patterns, both of ancient and of modern times. The religion of the Rosicrucians is also concealed, and unconsciously carried forward, perpetuated, and ignorantly fostered, by the very persons and classes who form, contrive, and wear decorations with special mysterious marks, all the world over. Every person, in unconsciously repeating certain figures, which form an unknown language, heired from the ancient times, carries into futurity, and into all parts of the world, the same carefully guarded traditions, for the knowing to recognise, to whose origin the sun, in his first revolution, may be figuratively said to be the only witness. Thus the great inexpressible "Talisman" is said to be borne to the "initiate" through the ages.

Proposals were published some years ago for a book entitled, "The Enigma of Alchemy and of OEdipus resolved; designed to elucidate the fables, symbols, and other mythological disguises, in which the Hermetic Art has been enveloped and signalised in various ages, in ecclesiastical ceremonies, masonic formulae, astronomical signs and constellations,—even in the emblazonments of chivalry, heraldic
badges, and other emblems; which, without explanation, have been handed down, and which are shown to have originated in the same universal mystic school, through each particular tracing their allusion to the means and mechanism." This intended work was left in MS. by its anonymous author, now deceased, but was never published. The unknown author of it produced also in the year 1850, in 1 vol. 8vo, a book displaying extraordinary knowledge of the science of alchemy, which bore the name, "A Suggestive Enquiry into the Hermetic Mystery; with a Dissertation on the more celebrated of the Alchemical Philosophers." This book was published in London; but it is now extinct, having been bought up—for suppression, as we believe—by the author's friends after his decease, who probably did not wish him to be supposed to be mixed up in such out-of-the-way inquiries.

The Vedas describe the Persian religion (Fire-Worship) as having come from Upper Egypt. "The mysteries celebrated within the recesses of the 'hypogea'" (caverns or labyrinths) "were precisely of that character which is called Freemasonic, or Cabiric. The signification of this latter epithet is, as to written letters, a desideratum. Selden has missed it; so have Origen and Sophocles. Strabo, too, and Montfaucon, have been equally astray. Hyde was the only one who had any idea of its composition when he declared that 'It was a Persian word, somewhat altered from Gabri, or Guebri, and signifying Fire-Worshippers.'" (See O'Brien's Round Towers of Ireland, 1834, p. 354.) Pococke, in his India in Greece, is very sagacious and true in his arguments; but he tells only half the story of the myths in his supposed successful divestment of them of all unexplainable character, and of exterior supernatural origin. He supposes that all the mystery must necessarily disappear when he has traced,
and carefully pointed out, the identity and transference of these myths from India into Egypt and into Greece, and their gradual spread westward. But he is wholly mistaken; and most other modern explainers are equally mistaken. Pococke contemplates all from the ethnic and realistic point of view. He is very learned in an accumulation of particulars, but his learning is "of the earth, earthy;" by which we mean that, like the majority of modern practical philosophers, he argues from below to above, and not, in the higher way, from above to below, or (contrary to the inductive, or Aristotelian, or Baconian method) from generals to particulars, or from the light of inspiration into the sagacities of darkness, as we may call unassisted world's knowledge.

The Feast of Lanterns, or Dragon-Feast, occurs in China at their New Year, which assimilates with that of the Jews, and occurs in October at the high tides. They salute the festival with drums and music, and with explosions of crackers. During the Feast, nothing is permitted to be thrown into water (for fear of profaning it). Here we have the rites of Aphrodite or Venus, or the Watery Deity, observed even in China, which worship, in Protean forms, being also the worship of the Dragon or Snake, prevails, in its innumerable contradictory and effective disguises, over the whole world. How like are the noises and the explosions of crackers, &c. to the tumult of the festivals of Dionysus or Dionysius, to the riot or rout of the Corybantes amongst the Greeks, to the outcry and wild music of the priests of the Salii, and, in modern times, to the noises made at initiation by the Freemasons, whose myths are claimed to be those (or imitative of those) of the whole world, whose Mysteries are said to come from that First Time, deep-buried in the blind, unconscious succession of the centuries! In the Royal-Arch order of the Masons, at an
initiation, the "companions" fire pistols, clash swords, overturn chairs, and roll cannon-balls about. The long-descended forms trace from the oldest tradition; the origin, indeed, of most things is only doubt or conjecture, hinted in symbols.

The Egyptian Deities may always be recognised by the following distinctive marks:

Phthas, Ptah, by the close-fitting Robe, Four Steps, Baboon, Cynocephalus.

Ammon, Amn, by a Ram’s Head, Double Plume, Vase, Canopus.

The Sun-God (Phra or Ra) has a Hawk’s Head, Disc, Serpent, Uraeus.

Thoth, or Thoyt, is Ibis-headed (means a scribe or priest).

Sochos, or Suches, has a Hawk. Hermes Trismegistus (Tat) displays a Winged Disc.

The Egyptians, however, never committed their greater knowledge to marks or figures, or to writing of any kind.

Figure 313: the Gnostics have a peculiar talisman of Fate (Homer’s Αἴων). This is one of the rarest types to be met with in ancient art. In Stosch’s vast collection, Winckelmann was unable to find a single indubitable example. It is of brown agate, with transverse shades, and is an Etruscan intaglio or Gnostic gem. The Gnostics, p. 238, makes a reference to this figure.

Later in our book (figs. 191, 300, 301) we give a figure of the “Chnuphis Serpent” raising himself aloft. Over, and corresponding to the rays of his crown, are the seven vowels, the elements of his name. The usual triple “S.S.S.” and bar, and the name “XNOYBIG,” are the reverse of this Gnostic gem. It is a beautiful intaglio on a pale plasma of the finest quality, extremely convex, as it has been found on examination.

In the Ophiic planetary group (Origen in Celsum, vi. 25)
Michael is figured as a lion, Suriel as a bull, Raphael as a serpent, Gabriel as an eagle, Thantabaoth as a bear, Eratsaoth as a dog, Ouriel as an ass. Emanations are supposed to pass through the seven planetary regions, signified by these Chaldæan names, on their way to this world.

Gnostic Amulet: "Bai"—a Prize.
CHAPTER THE TWENTY-FIFTH.

HISTORY OF THE TOWER OR STEEPLE.

We have asserted, in an earlier part of our book, that the pyramidal or triangular form which fire assumes in its ascent to heaven was, in the monolithic typology, used to signify the Great Generative Power. The coarse sensuality which seems inseparable from modern ideas about the worship of the pillar or upright had no place really in the solemn ancient mind, in which ideas of religion largely and constantly mingled. We must not judge the ancients by too rigid an adherence to our own prepossessions—foolish as they sometimes are.

The adoration paid to this image of the phallus, which has persisted as an object of worship through all the ages, in all countries, was only the acknowledgment, in the ancient mind, of wonder at the seemingly accidental and unlikely, but certainly most complete and effectual, means by which the continuation of the human race is secured. The cabalistic arguers contended that "Man" was a phenomenon; that he did not, otherwise than in his presentment, seem intended; that there appeared nothing even in the stupendous chain of organisms that seemed specially to hint his approach;
that between the highest of the animals and the being "Man" there was a great gulf, and seemingly an impassable gulf; that some "after-reason," to speak according to the means of the comprehension of man, induced his introduction into the Great Design; that, in short, "Man" originally was not intended. There is a deep mystery underlying all these ideas, which we find differently accounted for in the various theologies.

We are here only speaking some of the abstruse speculations of the old philosophers, whose idea of creation, and of the nature of man and his destiny, differed most materially—if not wholly—from the acceptable ideas which they chose to inculcate, and which they wished to impress upon ordinary minds. Thus their deeper speculations were never committed to writing, because they did not admit of interpretation in this way; and if so handed down or promulgated, they would have been sure to have been rejected and disbelieved, on account of the impossibility of their being believed. In indicating some of the strange notions propounded by the Sophists, and, if possible, still more remarkably by the early Christian Fathers, we desire to disclaim any participation with them. Our personal belief of these theories must not be necessarily supposed from our seeming to advocate them. There is no doubt that they were very acute and profound persons who undertook the examination and reconcilement of the philosophical systems at the introduction of Christianity.

The succeeding array of phallic figures will be found interesting, as tracing out to its progenitor or prototype that symbol which we call the "upright." This architectural descent we shall call the "Genealogy of the Tower or Steeple."

The Architectural Genealogy of the "Tower" or
"Steeple" (so to speak) is full of suggestion, and is closely connected with the story of the phallus.

The insignia on the heads of the cobras in the friezes of the Egyptian Court in the Crystal Palace are coloured on the Right, White; on the Left, Red. These imply masculine and feminine ideas.

The accompanying figure is the Winged Human-headed Lion. It comes from the Nineveh Gallery. It may be recognised as the Winged Bull, and also as the Winged "Lion of St. Mark."

The "Lion," "Bull," "Eagle," "Man," are the symbols of the Evangelists; the "Man," or "Angel," standing for St. Matthew, the "Lion" for St. Mark, the "Bull" for St. Luke, and the "Eagle" for St. John. In these strange aspects the Evangelists figure in many ancient churches,
and on most fonts. These representative forms are also said to have been the "Four Cherubim" of the Ark of the Hebrews. Hermetically they signify the "four elements," or the four corners or angle-points of the "Lesser" or "Manifested World," or the "Microcosm" of the Cabalists.

Fig. 45 represents an Obelisk at Nineveh, now in the British Museum. Jacob's Pillar, the Sacred Stone in West-
minster Abbey, "Bethel," &c., "Gilgal," have a mythic alliance with the obelisk.

Regarding the Pyramids the following may be advanced: Murphy, the delineator of the Alhambra, considered the Pointed Arch to be a system founded on the principle of the Pyramid. The pointed or vertical Saracenic or Gothic arch presents the form of the upper portion of the human \( \phi \alpha \ll o \alpha \). The Saracenic arch denotes the union of the Linga and Yoni.

In fig. 56 we have the sun rising from between the horns of Eblis (here taken for the Pyramids). This is a poetical superstition of the Arabians, who therefore turn to the North to pray; in contradiction to the practice of
the Persians, who adore the rising sun. The Arabians avert in prayer from this malicious sign of the "horns," because the sun is seen rising from between them; and

when disclosing from between these mythic pillars, the sun becomes a portent.

Fig. 57 is an Egyptian seal, copied by Layard (*Nineveh and Babylon*, p. 156). Subject: the Egyptian god Harpocrates, seated on the mythic lotus, in adoration of the Yoni, or מָלֵאכָה, or havah.

The Druidical Circles, and single stones standing in solitary places, are all connected with the mystic speculations of the Rosicrucians.

The eminences, St. Michael's Mount and Mont St.-Michel, were dedicated by the Phœnicians to the Sun-God (Hercules),
as the "Hydra" or "Dragon-slayer." These mounts in the Channel are secondary "Hercules' Pillars," similar to Calpe and Abyla.

The Architectural Genealogy of the "Tower" or "Steeple" displays other phases of the alterations of the "upright." All towers are descendants of the biblical votive stones, and in multiplying have changed in aspect according to the ideas of the people of the country in which they were raised. This Architectural Genealogy of the "Tower" or "Steeple" gives many varieties.
DRUIDICAL STONES.

The groups on p. 234 supply new changes in the Tower or Upright, and furnish evidence how it passed into the

Christian times, and became the steeple. When thus changed and reproduced, according to the architectural ideas of the builders of the different countries where the same
memorial pillar was raised, it assumed in time the peculiarities of the Gothic or pointed style. The steeples of the

churches, the figures of which we give on p. 234, indicate the gradual growth and expansion of the romantic or pointed

architecture, which is generally called Gothic; and they prove how the upright, or original phallic form, was adopted and gradually mingled in Christian architecture,—in reality at last becoming its dominant feature.
Fig. 96 represents one of the Western Towers of St. Paul's Cathedral, London, which is one of the double *lithoi* (or obelisks), placed always in front of every temple, Christian as well as heathen. It is surmounted by the "fir-cone" (*thyrsus*) of Bacchus, and the sculptured urns below it are represented as flaming with the mystic fire.
The Architectural Genealogy of the "Tower" or "Steeple" in fig. 97, p. 236, exemplifies a parallel of growth between all the uprights, and exhibits their changes of form, and proves their reproduction through the centuries, both in the East,

and more particularly in the western countries of Europe.

In the lower portion of this fig. 97 we have a further outline-
configuration of various towers and steeples, displaying the new character given, and the gradual variations of the "Tower" in the first instance, and afterwards of the "Steeple," both being reproductions of the first idea of the lithos, upright, or phallus: the "Idol" imitative of the "Flame of Fire."
The two pillars in fig. 102 are monuments in Penrith Churchyard. These are the familiar double "Runic" uprights, pillars, or spires.

All the minarets and towers in the East display in the peculiar curves of their summits the influence of the same phallic idea, as an attentive examination will prove.

There seems to be little or no reason to doubt that the much-disputed origin of the pointed Gothic arch, or lancet-shaped arch, and the Saracenic or Moorish horseshoe arch, is the union and blending of the two generative figures,—
namely, the "discus" or round, and the upright and vertical, or "phallic," shape, as indicated in the diagrams on pp. 238, 239. These forms, in their infinite variety, are the parents of all architecture.

The Zodiac itself is, in certain senses, a Genesis, or "History of Creation." The "Twelve Signs" may be interpreted as the "Twelve Acts" of the Divine Drama. Some of the Mosques in the East are surmounted with twelve
minarets, and the number twelve occurs frequently in connection with the theology of the Moslems.

Fig. 97.

**Fig. 115A** is a scale enrichment, introduced into architecture, to symbolise the Female Deity, or "Virgin born of the Waters."
CROSSES AND MINARETS.

The spectator looks to the faces of the figure marked 116.

Fig. 117 is a Masonic, Mosaic, or Tesselated Pavement. (Query, whether this pavement of black and white squares is the origin of the ancient Chess-Table, or Chess-Board?) The game of Chess, with the board upon which it is played, is probably "Masonic" in its invention.

Fig. 103.
Group of Minarets or Towers, selected from Examples in Oriental Towns.

In old representations of the cathedral church of Notre Dame at Paris, the symbols of the masculine divinity—such
as the sun and some others—are placed over the right hand, or masculine western tower, flanking the Galilee, or Great Western Porch; thus unmistakably hinting its meaning. Over the corresponding left hand, or female tower, are placed the crescent horns of the moon, and some other indications, announcing its dedication to the female deified principle.

In all Christian churches—particularly in Protestant churches, where they figure most conspicuously—the two tables of stone of the Mosaic Dispensation are placed over the altar, side by side, as a united stone, the tops of which
are rounded. The ten commandments are inscribed in two groups of five each, in columnar form. The five to the right (looking from the altar) mean the "Law;" the five to the left mean the "Prophets." The right stone is mascu-

* Fig. 118, on p. 241, represents the separated original "Lithoi," when united. They then form the "Double Tables" (or "Table") of Stone. In the "Latter," or "Christian (+) Dispensation," the "Ten Commandments are over the Altar," composed of the "Law" (Five Commandments to the Right), and the "Gospel" (Five Commandments to the Left).
disjoined pillars of stone (or towers) in the front of every cathedral, and of every temple in the heathen times.

The pomegranate is a badge of the Plantagenets; in its form it resembles the crescent moon; it is a symbol of the female influence in nature. There is here an unexpected concurrence with the crescent moon and star of the Orientals; for above the pomegranate—which is figured sometimes as the crescent moon in the heraldic insignia of the Plantagenets—the six-pointed star appears in the hollow of the crescent, with its points in the curvilinear or serpentine form. The crescent moon of Egypt and that of Persia is the thin sickle of the new moon reclining on her back, and seemingly with the star *issuant* from between her horns; which is evidently an Egyptian hint coming from the old
MOSAIC "TABLES OF STONE."

hieroglyphic times. This mysterious crescent and star is the badge of the sect of Ali among the Mohammedans, and it plays a most important part in angurial or religious heraldry. The standards of Egypt, Persia, and Arabia are gules, or Mars, or the fiery colour. It is the ardent, or masculine, or red colour of Ali. The colours of Turkey, on the other hand, are strictly those of Mohammed, and unconsciously honour the female element in displaying the green, or the vert, or the woman's colour, or Friday colour,—that of the Mohammedan Sabbath. This green is the vert, or "Venus,"

![Double Lithoi: The "Tables" of Stone.]

(Left Pillar.)

"The Law" (Man).

Ω. The union of J and of — is consequently +, or the "Cross."

of Mecca (see page 147). The Turkish standard divides party-per-pale the masculine red of the sect of Ali with the green of the Hadgi; allotting to the former the place of honour, or the dexter side of the emblazonment.

The Christian altar is divided, as a hieroglyphic, into two halves or sides, before which the representative priest extends his hands, standing before it with his right hand (meaning the "Law") to the right, and his left hand (meaning the "Prophets") to the left; the first of which signifies
the masculine (Jewish), and the second the feminine (Christian—because the Saviour was "born of a woman"), mystic celestial power.

Some monograms or hieroglyphic expressions, meaning the "Salvator Mundi," show the Roman letter "I" (Jesus) in front, in large size; the letter "H" (which is feminine, and Greek in its origin, meaning here "Man, as born of Woman") much smaller; and behind, interlacing and combining the first two letters, is the single curved or cursive "S," which stands for "S.S.," the Holy Spirit, or the Third Person of the Trinity. The whole, in another way, is "Jesus Hominum Salvator." Nearly all the sacred monograms, with the intention of making the letter denoting the "Man" prominent, present the letter "I" large; in the heraldic language surtout, or "over all." The monogram of the Saviour is sometimes seen in the "Ark," or "vesica piscis," which is a pointed oval figure, familiar in Gothic architecture, and shaped like a boat or a shuttle, counter-changing the letters and the closing arcs, white and black,—the black occupying the left or female side, according to the ideas of the Templars. The standards of these soldiers-monks were white and black, either oblong or forked.

There are two columns of that heavy, severe order, however grand and impressive, which distinguishes the early Norman period of architecture in England, in regard to which, though abounding in far-off hermetic suggestions, we have seen no notice in antiquarian quarters. These two columns comprise a part of the colonnade in the White Tower, or central tower, of the Tower of London. The capital of the first column is square, but it is rounded at the angles by a cut to the hypotrichelium, or base-ring, of the capital. The tops of these cuts are formed by volutes similar to the horns of the Corinthian and Ionic capitals. The male volute is to the
right, and is a spiral volve, from which issues a dependent budding flower, dropping seed. The volve to the left, which is a series of rings enclosing a point, is female. A twisted perpendicular, like a horn, projects from the base on this left side. The capital of the other column presents a not unusual Norman form of two truncated tables or faces, rounded below and divided in the middle. These we interpret as meaning the "woman" and the "man," side by side, and left and right. These glyphs in the two capitals of the columns signify "Jachin" and "Boaz," and stand for the "First Man" and the "First Woman." The mysterious letter "Tau," which is the same as the Runic Hammer of Thor, and which in truth is a "Cross," occupies the centre-point, or, heraldically, the "honour-point," of the first column to the right. The master-masons were celebrated in their art of concealing myths, or hinting them cautiously in the most difficult and far-off resemblances. The curious reader is referred to our illustration, figs. 119, 120.

The character of the "Head" which the Templars were charged with having worshiped in their secret "encampments," or "mystic lodges," has been the subject of much dispute. Some say it was the head of Proserpine, or of Isis, or of the "Mother of Nature," presented under certain strange aspects. Others assert that the figure was male, and that of Dis or Charon, according to the classic nomenclature. The object was reputed to be a talisman, and it is called by some the head of Medusa, or the snake-haired visage, dropping blood which turned to snakes, and transforming the beholder to stone. It was this head, or one of a similar description, which was supposed to serve as the talisman or recognitive mark of the secret fraternity or society, headed by Pichegru and others, which was suppressed by Napoleon, and the members of which were tried and condemned as aiming at
revolutionary objects. Why Napoleon adopted this mysterious supposed magical head, as he is said to have done, on the suppression and destruction of this revolutionary body,—to which we refer elsewhere,—and why he chose to place his own head in the centre-place before occupied by this imagined awe-inspiring countenance, and adopted the whole as the star of his newly founded "Legion of Honour," it is very difficult to say. In the East there is a tradition of this insupportable magic countenance, which the Orientals assign to a "Veiled Prophet," similar to the personage in *Lalla Rookh*.
CHAPTER THE TWENTY-SIXTH.

PRESENCE OF THE ROSICRUCIANS IN HEATHEN AND CHRISTIAN ARCHITECTURE.

QUESTION may here arise whether two corresponding pillars, or columns, in the White Tower, London, do not very ingeniously conceal, masonically, the mythic formula of the Mosaic Genesis, "Male and Female created He them," &c. Refer to the following page, figs. 119, 120.

1. Tor, or "Hammer of Thor," T(au).
2. Corinthian Volute, or "Ram's Horns."

The crescent moon and star is a Plantagenet badge. It is also the Badge of the Sultan of Turkey. Also, with a

Egypt, Persia: Sect of Ali.

difference, it displays the insignia of Egypt. The flag of Egypt is the ensign of the sect of Ali (the second Mohammedan head of religion), which is "Mars, a Crescent, Luna; within
the horns of which is displayed an estoile of the second,—abandoning the vert, or green, of the "Hadgi," or of Mecca,

![Diagrams](image)

\[ \text{Fig. 131.} \]

Devices from the Tombs in the Catacombs at Rome.

The Hospital of St. Cross, near Winchester, abounds
in the earliest Norman mouldings. The architecture of St. Cross presents numerous hermetic suggestions.

The identity of Heathen and of Christian Symbols is displayed in all our old churches in degrees more or less conclusive.

The "Ten fingers" of the two hands (made up of each "Table" of Five) are called, in old parlance, the "ten com-

mandments." "I will write the ten commandments in thy face," was spoken in fury, in the old-fashioned days, of an intended assault. The hands explain the meaning of this
proverbial expression, interpreted astrologically. Palmistry is called Chiromancy, because Apollo, mythologically, was taught "letters" by Chiron, the "Centaur."

The devices on most Roman Bronze Lamps present Gnostic ideas.

The Temple Church, London, will be found to abound with Rosicrucian hieroglyphs and anagrammatical hints in all parts, if reference be made to it by an attentive inquirer.

The above music consists of a magical incantation to the air, or musical charms, supposedly from two of the most celebrated ancient religious structures. The Cabalists imagined that the arrangements of the stars in the sky, and particularly the accidental circumvolvent varying speed of the planets of the solar system, produced music—as men know music. The Sophists maintained that architecture, in another sense, was harmonious communication, addressed to a capable apprehension—when the architecture was true to itself, and therefore of divine origin. Hence the music above. These passages were supposed to be magic charms, or invocations, addressed by day and night to the intelligent beings who filled the air invisibly. They were played from the fronts of the Parthenon, Athens, and the Pantheon, Rome, according to the ideas of the superstitious Greeks.
These designs supply a variety of Early Christian Symbols or Hieroglyphs, drawn from Roman originals in all parts of the world.

---

Fig. 154. Stone Crosses at Sandbach, in Cheshire.

In fig. 153 we have a representation of Bersted Church,
as seen (magnified) from a rising hill, over a hop-garden, at about the distance of half a mile. Bersted is a little village, about three miles from Maidstone, Kent, on the Ashford road. In the chancel of Bersted Church, Robert Fludd, or Flood ("Robertus de Fluctibus"), the Head of the Rosicrucians in England, lies buried. He died in 1637.

Fig. 155 displays the standard Maypole, or authentic Maypole, with all its curious additions; and we add their explanation. In the upper portion we have the Apex of the Phallus, the Quatre-feuilles, and the Discus or Round. The
lower portion is the Linga, Lingham, or Phallus, "wreathed;" also the "Pole" of the ship "Argo" ("Arco"); otherwise the

"Tree of Knowledge." The ribbons of the Maypole should be of the seven prismatic colours.

Fig. 156 shows the union of the Phallus and Yoni, and exhibits unmistakably the destination and purpose of the familiar Maypole.
Each finger in fig. 162 is devoted to a separate planet. Refer to the engraving of the hand.

Fig. 167, "Hook of Saturn," "Crook of Bishops." "By hook or crook," meaning "by fair means or foul," is a proverbial expression continually heard.

There are two works which will assist in throwing light upon that mystic system of the ancients, probably originating in the dreaming East, that refers the production of music to architectural forms or geometric diagrams; as columns and entablatures, or upright lines and cross-lines, and mathematical arcs and diagonals, in their modifications and properties, of course are. These books, which will help to explain the passages of music given at p. 249, figs. 141, 142, are Hay’s *Natural Principles and Analogy of the Harmony of Form*, and a very original and learned musical production, entitled *The Analogy of the Laws of Musical Temperament to the Natural Dissonance of Creation*, by M. Vernon, published in London in 1867. Through a strange theory, the music at p. 249 of our book is taken as the expression of the geometrical fronts of the two great temples, the Parthenon at Athens and the Pantheon at Rome, which are supposed to have been built with perfect art. We have “translated” these phantom Æolian melodies played in the winds (so to express it), and fixed them in modern musical notation.

"Æ" Delphicum.
CHAPTER THE TWENTY-SEVENTH.

THE ROSICRUCIANS AMIDST ANCIENT MYSTERIES AND IN THE ORDERS OF KNIGHTHOOD.

The "Collar of Esses" is supposed always to be a part of the Order of the Garter. The coupled "S.S." mean the "Sanctus Spiritus," or "Holy Spirit," or the "Third Person." The "Fleurs-de-Lis," or "Lisses," or the "Lilies of the Field," invariably appear in close connection with St. John, or the "Sanctus Spiritus,"

![Collar of Esses](image)

Fig. 168. Collar of Esses.

and also with the Blessed Virgin Mary, in all Christian *symbola* or *insignia*. The Prince of Wales's triple plume appears to have the same mythic Egyptian and Babylonian origin, and to be substantially the same symbol as the "Fleur-de-Lis." When arranged in threes, the "Fleurs-de-Lis" represent the triple powers of nature,—the "producer,"
the "means of production," and "that produced." The "Fleur-de-Lis" is presented in a deep disguise in the "Three Feathers," which is the crest of the Prince of Wales; in this form the Fleur-de-Lis is intended to elude ordinary recognition. The reader will observe the hint of these significant "Lisses" in the triple scrolls or "Esses", coiled around the bar in the reverse of the Gnostic gem, the "Chnuphis Serpent," elsewhere given. This amulet is a fine opalescent chalcedony, very convex on both sides. It is the figure of the "Chnuphis Serpent" rearing himself aloft in act to dart, crowned with the seven vowels, the cabalistic gift to Man, signifying "speech." The reverse presents the triple "S.S.S." coiled around the "Phallus."

In fig. 170 we have the Prince of Wales's Feathers, from the Tomb of Edward the Black Prince, in Canterbury Cathedral. This badge presents the idea of the "Fleur-de-Lis, "Ich Dien!"—"I serve!"

Fig. 171 represents the Egyptian Triple Plumes, which are the same badge as the "Fleur-de-Lis" and the Prince of Wales's Feathers, meaning the "Trinity."
Fig. 172—also (ante) referred to as fig. 191—is a Gnostic Gem. It represents the "Chnuphis Serpent," spoken of at page 220.

A famous inscription (Delphic E) was placed above the portal of the Temple at Delphi. This inscription was a single letter, namely, the letter E, the name of which in Greek was Ε, which is the second person of the present of the indicative of the verb εὑρίσκω, and signifies "Thou art;" being, as Plutarch has interpreted it, the salutation of the god by those who entered the Temple. See Plutarch de Ε

apud Delph. Lord Monboddo's Origin and Progress of Language (1774), vol. ii. p. 85, refers to this letter E.

The Delphic "E" means the number "Five," or the half of the Cabalistic Zodiac, or the Five Ascending Signs. This "Delphic E" is also the Seleucidan Anchor. It was
adopted by the Gnostics to indicate the "Saviour," and it is frequent in the talismans and amulets of the early Christians. It is one of the principal gems of the Gnostics, and is a cameo in flat relief.

One of the charges against the Knights Templars was as follows: "That they bound, or touched, the head of an idol with cords, wherewith they bound themselves about their shirts or next their skins" ("Processus contra Templarios," Dugd. Monast. Ang. vol. vi. part ii. pp. 844-46, &c.). There is something strange about these cords, cordons, ropes, belts, bands, baldrics (also in the term "belted earls"). These are always male accessories; except the "zones," sashes, or girdles, worn as the mark of virgins, which cinctures may yet draw their symbolic meaning from this same "umbilicus" in question. The reader will notice also the connection of these ideas and the practice in the Roman race of the "Lupercal," at the February Roman religious solemnities (February of the "Fishea"). At these it was the custom of the runners to flog bystanders, particularly women, with thongs or cords; which were probably intended to be the racers' own girdles. Julius Cæsar, Mark Antony, and Calphurnia form a group illustrative of this meaning. Thus Shakspeare:

"Our elders say,
The barren, touchèd in this holy chase,
Shake off the sterile curse."

Julius Cæsar, act. i. sc. 2.

Is this the origin of the custom of the people pelting or flogging each other at the Italian Carnivals? It seems highly probable. The Carnivals occur at the same time as these Roman Lupercales.

Many early Norman mouldings exhibit various examples of the cable. Thongs, ties, and network are seen to bind
all the significant figures in the early English and Irish churches. Is there any connection between these bonds, or ties, or lacings, with the "cable-tow" of the initiates among the Masons? Perhaps the "tow" in this "cable-tow" means the "Tau," or stood for it originally. Reference may here be made to the snake which forms the girdle of the Gnostic "Good Shepherd" in the illustration later in our book (fig. 252).

The cable-mouldings in Gothic architecture are intended to carry an important meaning. They are found in the pointed or Christian architecture in continual close connection with the tripricated zigzag, the Vandykes, or "aquaria," as we designate them, because all these architectural forms, which are hieroglyphs, mean the feminine or "Second Principle," and express the sign of Aquarius, with its watery or lunar hints, its twin-fishes, and its Jonah-like anagrams of the "Redeemer." Hence the boat-like, elongated, peculiar form called the *vesica piscis*, which is the oblong frame continually set over doors and windows and elsewhere in Gothic churches, to contain effigies of the Saviour, or Virgin Mary, or groups from the New Testament in connection with these Two Sacred Persons. A doorway in Barfreston Church, Kent, supplies an excellent example of the employment of this oblong figure; which is also Babylonian, and means the female member as its starting-point.

In a previous part of our book we give various figures of the prows or cutwater-heads of gondolas, in which we clearly show the origin of their peculiar form, which represents the *securis*, or "sacrificial axe," that originally expressed the "hook of Saturn." The "Bu-Centaur" indicates the fabulous being, the bicorporate "ox" or "horse" and "Man," as will be found by a separation of the syllables "Bu-Centaure." It is the name of the state galley of the Doge of Venice, used on the occasion of his figurative marriage with
the Adriatic, or espousal of the "Virgin of the Sea," who was Cybele of the "sacrificial hook." The hatchet of Dis, the glaive, the halberd, the reaping-hook of Ceres, the crescent moon, the "Delphic E," are all the same mystic figure. The prow of the gondola exhibits unmistakably the *securis* and *fasces* conjointly, or the axe of the sacrifice and the rods for the scourging of the victim first, if human, and afterwards for his burning,—the rods being the firewood. Lictors have their name probably from "Lloc." From this peculiar cut-water arose the Dragon-beak, the "Prow," or "Frow," the figure-head and fiddle-head. They have all a feminine origin.

Fig. 174 represents "S. Johan" (St. John), from an early woodcut of the Twelve Apostles. His *right* hand is raised in the act of the holy sign, whilst his *left* clasps the chalice of the "S.S.," or Sacrament of Wine; in the cup is a sala-

![Fig. 174](image_url)

mander, signifying the "H. G." This is St. John the Apostle, the author of the "Apocalypse;" or the "Sanctus Spiritus," who baptises in the mystic Eucharist with the "Holy Ghost and with Fire."

The following are the names of the angels of the planets, according to the Gnostics. At the beginning of all things is Jehovah (Sabaoth), Victory; at the end, the "Old Ser-
pant” (Ophis). Between these are the Seraphim (Intelligences) and Cherubim (Benevolences), and their representatives. Origen calls the Sun, Adonai; the Moon, Iao; Jupiter, Eloi; Mars, Sabao; Orai, Venus; Astaphai, Mercury; Ildabaoth, Saturn.

The name Tarasque is given for the Dragon of a Northern Nation. (Qy. the “Hill of Tara,” &c. ?) Under the Roman Emperors, and under the Emperors of Byzantium, every cohort or centurion bore a dragon as its ensign (Modestus, De Vocabul. Rei Milit.; Flav. Veget. De Re Militari, lib. ii. c. xiii.; Georget, Insig. Europ. loc. cit.). Matthew of Westminster, speaking of the early battles of this country of England, says: “The King’s Place was between the Dragon and the Standard”—“Regius locus fuit inter draconem et standardum” (Lower’s Curiosities of Heraldry, p. 96). This is the undoubted origin of the ensign’s “pair of colours” in a battalion; viz. the first colour, or “King’s Colour,” whose place is to the right, is properly the standard; and the second colour, or the “regimental colour,” to which is assigned the left-hand, or female, or sinister place, is the “Dragon.” The Dragon was supposed to conduct to victory, because its figure was a most potent charm. The standards and guidons of the cavalry follow the same magic rule.

The planets are supposed by the astrologers and alchemists to exercise dominion more particularly in the order following, and to produce effects upon their own appropriate undermentioned metals, on planetarily corresponding days. These are Sol, for gold, on Sunday; Luna, for silver, on Monday; Mars, for iron, on Tuesday; Mercury, for quicksilver, on Wednesday; Jupiter, for tin, on Thursday; Venus, for copper, on Friday; and Saturn, for lead, on Saturday (Lucas’s Travels, p. 79; Count Bernard of Treviso). The
emblematical sculptures, in which the whole enigma of the art of transmutation is supposed to be contained, are those over the fourth arch of the Cemetery of the Innocents, at Paris, as you go through the great gate of St.-Denis, on the right-hand side. They were placed there by Nicholas Flamel.

The old traditions, from time immemorial, aver that it is neither proper for sailors nor for servants of the sea to wear beards. That they have never done so is true, except at those times when profound mythic meanings were not understood or were neglected. This smoothness of a sailor's face arises from the fact that the sea has always been mythologically feminine, and that sailors and men of the sea are under the protection of the "Queen of the Deep," or the "Virgin of the Sea." Hence the figure of Britannia, with her sceptre of the sea or trident, and not that of Neptune.

The Virgin Mary, the "Star of the Sea" and Patroness of Sailors, rules and governs the ocean, and her colours are the ultramarine of the "Deep," and sea-green, when viewed in this phase of her divine character. In all representations, ancient or modern, sailors have beardless faces, unless they belong to the reprobate and barbarian classes,—such as pirates and outlaws, and men who have supposedly thrown off devotional observance, and fallen into the rough recusancy of mere nature.

Fig. 175 is a very curious design from Sylvanus Morgan, an old herald. Above is the spade, signifying here the phallus; and below is the distaff, or instrument of woman's work, meaning the answering member, or Yoni; these are united by the snake. We here perceive the meaning of the rhymed chorus sung by Wat Tyler's mob: "When Adam delved" (with his spade), "and Eve span" (contributing her part of the work), "where was then the Gentleman?"—or what, under these ignoble conditions, makes difference of
degree? It is supposed that Shakspeare plays upon this truth when he makes his clown in Hamlet observe, "They" (i.e. Adam and Eve) "were the first who ever bore arms." By a reference to the foot of the figure, we shall see what these arms were, and discover male and female resemblances in the shape of the man's "escutcheon" and the woman's diamond-shaped "lozenge." As thus: a is the shield of arms, or "spade," or "spada," or "male implement," on man's own side, or dexter side; b is the "lozenge," or distaff, or "article representative of woman's work," on her proper side, or the left or sinister side.

A chalice is, in general, the sign of the Priestly Order. The chalice on the tombstone of a knight, or over the door of a castle, is a sign of the Knights Templars, of whom St. John the Evangelist was the Patron Saint. The "cup" was forbidden to the laity, and was only received by the Priests, in consequence of the decree of Pope Innocent III., A.D. 1215. It means the "S.S.," or Holy Spirit, to which we have frequently adverted.

We have carefully inspected that which has been desig-
nated the *crux antiquariorum*, or the Puzzle of Antiquaries, namely, the famous Font, which is of unknown and bewildering antiquity, in the nave of Winchester Cathedral. Milner (a feeble narrator and unreliable historian), in his *History of Winchester*, has the following superficial notice of this relic: "The most distinguished ornaments on the top are doves *breathing* (they are not *breathing,* they are *drinking*) "into phials surmounted with crosses *fichée.* And on the sides" (the north side, he should say, which is faced wrongly, and ought properly to front the east) "the doves are again depicted with a *salamander,* emblematic of fire; in allusion to that passage of St. Matthew,—‘He shall baptise you with the *Holy Ghost and with fire.*’"

All the secrets of masonry are concealed in the Hebrew or Chaldee language. In the First Chapter of the Gospel according to St. John is contained the mythical outline of the Cabala, in its highest part.

"Les anciens astrologues, dit le plus savant des Juifs" (Maimonides), "ayant consacré à chaque planète une couleur, un animal, un bois, un métal, un fruit, une plante, ils formaient de toutes ces choses une figure ou représentation de l'astre, observant pour cet effet de choisir un instant approprié, un jour heureux, tel que la conjonction, ou tout autre aspect favorable. Par leurs cérémonies (magiques) ils croyaient pouvoir faire passer dans ces figures ou idoles les influences des êtres supérieurs (leurs modèles). C'étaient ces idoles qu'adorait les *Kaldeens-sabéens*. Les prêtres égyptiens, indiens, perses,—on les croyait lier les dieux à leurs idoles, les faire descendre du ciel à leur gré. Ils menacent le soleil et la lune de révéler les secrets des mystères."—Eusebius Iamblicus, *De Mysteriis Egyptianorum*.

The mystic emblems of the religions of India, China, Greece, and Rome are closely similar, and are set forth in
THE "PRINCE OF THE POWERS OF THE AIR." 265

the ornaments on the friezes of the temples of all those countries, explaining their general principles. "Your popular societies are an emanation from the lodges of the Freemasons, in like manner as these proceeded from the funeral pile of the Templars" (Castle of the Tuileries, year viii.). Thus the "egg-and-tongue moulding" ("egg and adder's tongue," for the egg and the serpent were two of the emblems of the Egyptian and Greek mysteries), the griffin, the lion of St. Mark, the honeysuckle-and-lotus ornament, the convolutions and volutes, the horns as floriations springing from the lighted candelabra, the lotus and tori of Egypt, and the Greek ornaments and Roman templar ornaments, are all related.

The names of the "Three Kings," or "Shepherds," who descried the Star of Annunciation in the East, are Caspar, Melchior, and Balthasar. Caspar, or Gaspar, is the "White One;" Melchior is the "King of Light;" Balthasar, the "Lord of Treasures." Balthasar, or Balthazar, is the Septuagint spelling of Belshazzar.

Linga is the old name of an Island near Iona, called the "Dutchman's Cap." (Qy. the Phrygian cap?—also the first "cocked hat," and its recondite meaning?) Gallus, or the Cock, is sacred to Mars, whose colour is red. In this connection, and as bespeaking Hermes or Mercurius, the "messenger of the dawn," may have arisen the use of the "cock," as the emblem supposedly of the first descrier of the daily light from the tops of the steeples. It probably signifies the phallic myth. The grasshopper, dragon, arrow, and fox, as weathercocks, have undoubtedly a remote reference to the same idea of symbolising the "Prince of the Powers of the Air."

The form of the Pointed Arch reached the Orientals—as we see in their Temples—in the shape of the Phrygian and Median Bonnet (Lascelles, 1820). In these
strange curves we have mingling the *scarab*, scorpion, Σ, or (—).

Cocks crow at day-dawn. Weathercocks turn to the wind, and invite the meteoric or elementary influences, the "Powers of the Air." The question as to the mystic side of all this is curious. The fields of the air were supposed by the Rosicrucians to be filled with spirits.

"Tous les Lamas portent la mitre, ou bonnet conique, qui était l'emblème du soleil. Le Dalai-Lama, ou immense prêtre de La, est ce que nos vieilles relations appelaient le prêtre Jean, par l'abus du mot persan Djahân, qui veut dire le monde. Ainsi le prêtre Monde, le dieu Monde, se tient parfaitement."—Volney, *Ruines*, p. 251. (Qy. Prester-John? Qy. also this verbal connection with "Saint John," as if Prêtre John?) In the old Norman-French *Maistre* is frequently met for *Maitre*. This Prestre, or Prester (Anglicised), or Prêtre John, is probably no other than the Priest or High-Priest "John," otherwise Saint John, or the "Saint-Esprit." The recognition of the + in the Great Llama, Al-Ama, Ama, Anima (Soul, Spirit), Alma, El-Om, &c., meaning "white," is very curious. The antiquary Bryant is positively of opinion, from the very names of Columbkill and Iona, that this island Iona was ancienly sacred to the Arkite divinities. The great asylum of the Northern Druids was the island of Hu or Iona, Vs Colan, or Columba (*Mythology and Rites of the British Druids*, by Edward Davies, 1809, p. 479).

The glories around sacred persons and objects, which have straight-darting and curvilinear or wavy or serpentine rays alternately, are continual in theological or heraldic illustration; which waved and straight rays alternately imply a deep mystery. They are constant symbols in the sacred *nimbi*, and are found upon sacramental cups; they are set
as the symbolical radii around reliquaries, and they appear as the mystic fiery circle of the Pyx. The straight spires and the brandished waved flames, or cherubic (or rather seraphic) gladii, or crooked swords guarding Paradise, imply two of the chief Christian mysteries. In the curved spires of flame, alternating with the aureole or ring of glory, there is possibly a remote hint of 7, or the "Reconciler of the Worlds Visible and Invisible," or "S.S."

To account for the universal deification of "horns" in architecture all over the world, as its symbolic keynote, as it were, which sigma has been transmitted into modern emblematic science, and incorporated unconsciously into the ornaments and elevated into the high places even in Christian buildings, an old Talmudist—Simeon Ben-Iochay by name—hazards the startling conjecture that this adoration arose originally in the supernatural light of knowledge of the old day, for the following reasons: the strange explanation which this mysterious writer gives is, that the bovine animals would have themselves become men in their future generations, but for that divine arrest which interfered athwart as it were, and wasted the ruminative magnetic force; which otherwise miraculously would have effected the transformation, by urging the powers of the brain from the radix of the rudimentary templar region into the enormous branching, tree-like, then improvised appendages, where this possibility or extension of the nervous lines became spoiled and attenuate, solidified and degraded. Growth and development are assumed as taken from expansion and radiation off a nervous sensitive centre, by election or affinity governed by an invisible Power operating from without. It is to descend very deep into cabalistic and Talmudical mysteries to gain comprehension of an idea concerning the origin of this absurd worship of animal horns.
The cabalist Simeon Ben-Iochay declares that it was in gratitude for this changed intention, and because the creature man became "Man," and not the bovine creatures,—a catastrophe which might have happened, except for this diversion of the brain-power into horns" (mere fable or dream as all this sounds!),—that the Egyptians set up the very "horns"

to worship as the real thing—the depository or "ark"—into which the supernatural "rescue" was committed. Thus the horns of the animal—as the idol standing for the means,
equally as another representative figure (the *phallus*), expressive of the mighty means to which man's multiplication was intrusted—were exalted for adoration, and placed as

![Fig. 183. Egyptian Torus, Lotus Enrichment, and various Lunar Symbols.](image)

the trophies heroically "won even out of the reluctance of nature," and adored, not for themselves, but for that of which they spoke.

Shakespeare has several covert allusions to the dignity of the myth of the "Horns." There is much more, probably, in these spoils of the chase—the branching horns or the antlers

![Fig. 184. Temple of Apollinopolis Magna, in Upper Egypt.](image)

![Fig. 185. Norman Capital, Door-shaft: Honeysuckle-and-Lotus Ornament, early example.](image)

—than is usually supposed. They indicate greater things than when they are only seen placed aloft as sylvan trophies. The crest of his late Royal Highness Prince Albert displays the Runic horns, or the horns of the Northern mythic hero.
They were always a mark of princely and of conquering eminence, and they are frequently observable in the crests and blazon of the soldier-chiefs, the Princes of Germany. They come from the original Taut, Tat, Thoth, Teut,—whence "Teuton" and "Teutonic." These names derive from the mystic Mercurius Trismegistus,—"Thrice-Master, Thrice-
Mistress,"—for this personage is double-sexed: "Phoebé above, Diana on earth, Hecate below."

Fig. 194. Ionic Capital, Erectheum at Athens. Fig. 195. Composite features.

Fig. 198. India and Greece (similar capitals).
Fig. 199. Greek—Corinthian: Choragic Monument, Athens.

Fig. 200. Norman Capital: Foliated Ornament, resembling the Honeysuckle and Lotus.

Fig. 177, ante (from the arches of the Temple Church, London), is a symbol of the "Blessed Virgin;" it is also the "Delphic E," or "Seleucidan Anchor."
The "horns" of the Talmud account for the mythological Minotaur, the Bucintaur, Pan and Priapus, the

"Sagittary" or Centaur, the sign "Sagittarius," and perhaps all bicorporate human and animal forms.

In the group of figures on the previous page, showing the various classical forms of the volutes, or flourished horns, in the Corinthian, Ionic, and Composite capitals, a close affinity will be remarked with examples of capitals with horns or volutes from the temple of Ellora, in India, and other Indian and Persian temples: placed under, for comparison, in the illustration.

Various mouldings, both Gothic and Classic, present shapes drawn from the astronomical sign "Aquarius." These signs, or ciphers, are significant of the "Sea" and of the "Moon." Glyphs resembling "fishes" mean Iona, or Jonah. They are also symbols of the "Saviour," when they occur amidst the relics left by the early Christians, and in forms of the first Christian centuries.

Orb or "Mound."
CHAPTER THE TWENTY-EIGHTH.

ROSICRUCIANISM IN STRANGE SYMBOLS.

In the following part of our book we supply, in a series of figures, the succession of changes to which the most ancient head-covering,—in itself a significant hieroglyph,—the Phrygian cap, the classic Mithraic cap, the sacrificial cap, or bonnet conique, all deducing from a common symbolical ancestor, became subject. The Mithraic or Phrygian cap is the origin of the priestly mitre in all faiths. It was worn by the priest in sacrifice. When worn by a male, it had its crest, comb, or point, set jutting forward; when worn by a female, it bore the same prominent part of the cap in reverse, or on the nape of the neck, as in the instance of the Amazon's helmet, displayed in all old sculptures, or that of Pallas-Athene, as exhibited in the figures of Minerva. The peak, pic, or point, of caps or hats (the term "cocked hat" is a case in point) all refer to the same idea. This point had a sanctifying meaning afterwards attributed to it, when it was called the christa, crista, or crest, which signifies a triumphal top, or tuft. The "Grenadier Cap," and the loose black Hussar Cap, derive remotely from the same sacred, Mithraic, or emblematical bonnet, or
high pyramidal cap. It, in this instance, changes to black, because it is devoted to the illustration of the “fire-workers” (grenadiers), who, among modern military, succeed the Vulcanists, Cyclopes, classic “smiths,” or servants of Vulcan, or Mulciber, the artful worker among the metals in the fire, or amidst the forces of nature. This idea will be found by a reference to the high cap among the Persians, or Fire-Worshipers; and to the black cap among the Bohemians and in the East. All travellers in Eastern lands will remember that the tops of the minarets reminded them of the high-pointed black caps of the Persians.

The Phrygian Cap is a most recondite antiquarian form; the symbol comes from the highest antiquity. It is displayed on the head of the figure sacrificing in the celebrated sculpture, called the “Mithraic Sacrifice” (or the Mythical Sacrifice), in the British Museum. This loose cap, with the point protruded, gives the original form from which all helmets or defensive headpieces, whether Greek or Barbarian, deduce. As a Phrygian Cap, or Symbolising Cap, it is always sanguine in its colour. It then stands as the “Cap of Liberty,” a revolutionary form; also, in another way, it is even a civic or incorporated badge. It is always masculine in its meaning. It marks the “needle” of the obelisk, the crown or tip of the phallus, whether “human” or representative. It has its origin in the rite of circumcision—unaccountable as are both the symbol and the rite.

The real meaning of the bonnet rouge, or cap of liberty, has been involved from time immemorial in deep obscurity, notwithstanding that it has always been regarded as a most important hieroglyph or figure. It signifies the supernatural simultaneous “sacrifice” and “triumph.” It has descended from the time of Abraham, and it is supposed to emblem the strange mythic rite of the “circumcisio preputii.” The
loose Phrygian bonnet, *bonnet conique*, or "cap of liberty," may be accepted as figuring, or standing for, that detached integument or husk, separated from a certain point or knob, which has various names in different languages, and which supplies the central idea of this sacrificial rite—the spoil or refuse of which (absurd and unpleasant as it may seem) is borne aloft at once as a "trophy" and as the "cap of liberty." It is now a magic sign, and becomes a talisman of supposedly inexpressible power—from what particular dark reason it would be difficult to say. The whole is a sign of "initiation," and of baptism of a peculiar kind. The Phrygian cap, ever after this first inauguration, has stood as the sign of the "Enlightened." The heroic figures in most Gnostic Gems, which we give in our illustrations, have caps of this kind. The sacrificer in the sculptured group of the "Mithraic Sacrifice," among the marbles in the British Museum, has a Phrygian cap on his head, whilst in the act of striking the Bull with the poniard—meaning the office of the immolating priest. The *bonnet conique* is the mitre of the Doge of Venice.

Besides the *bonnet rouge*, the Pope's mitre—nay, all mitres or conical head-coverings—have their name from the terms "Mithradic," or "Mithraic." The origin of this whole class of names is Mittra, or Mithra. The cap of the grenadier, the shape of which is alike all over Europe, is related to the Tartar lambskin caps, which are dyed black; and it is black also from its association with Vulcan and the "Fire-Worshipers" (Smiths). The Scotch Glengarry cap will prove on examination to be only a "cocked" Phrygian. All the black conical caps, and the meaning of this strange symbol, came from the East. The loose black fur caps derive from the Tartars.

The "Cap of Liberty" (*Bonnet Rouge*), the Crista or
Crest (Male), and the Female (Amazon) helmet, all mean the same idea; in the instance of the female crest the knob is, however, depressed,—as shown in the figures below.

The forms of Grenadier caps, and of those worn by Pioneers also, are those of the head-covers of the Fire-workers or Fire-raisers (Vulcanists) of an army.

All the black fur caps—militarily called busbies—are Bohemian, Ishmaelitish, heathen, irregular; their origin lies in the magic East.

Few would suspect the uniform of the Hussars to have had a religious origin; both the flaps which depend from their bushy fur caps, and the loose jacket or dolman which hangs from their left shoulder, are mythic. “The long
triangular flaps, which hang down like a jelly-bag, consist in a *double* slip of cloth, which, when necessary, folds round the soldier's face on each side, and forms a comfortable night-cap. *In our service, one single slip is left to fly.*—Sir Walter Scott to T. Crofton Croker, 7th July 1827. (Qy. whether the above-named *double* fly of the Hussar Cap be not the dependent ears or horns of the original Motley?) The Hussars wear the original fur cap of Tubal-Cain, or the Smiths, or "Artful Workers in Nature." The name Hussar is borrowed from the Oriental exclamation to (or invocation of) "Al-huza," or "Al-husa," or Venus, or Aphrodite,—the original
patroness of these Ishmaelitish irregular light troops. The *dolman* or pelisse, properly worn on the left shoulder of the Hussar, has its signification and origin in the following act related in Scripture, which refers to a certain Rosicrucian myth: "Shem and Japheth took a garment" (a cover or extra piece of clothing), "and laid it upon both their shoulders" (on the left shoulder of each), "and went backward, and covered their father Noah." It is astonishing how successfully this mythic act, with its original strange Rosicrucian meaning, should have been hidden away in this apparently little-corresponding, trivial fact, of the wearing of the Hussar loose cloak or pelisse (*pallium* or *pall*) on the left or sinister shoulder; which is the shoulder nearest to the woman: because the Talmudists say that Man was made from the left hand.

Regarding the Templar *insignia*, we may make the following remarks. The famous flag, or "Beauséant," was their distinguishing symbol. Beauséant—that is to say, in the Gallic tongue, *Bien-séant*, because they are fair and
honourable to the friends of Christ, but black and terrible to His enemies: "Vexillum bipartitum, ex Albo et Nigro, quod nominant `Beau-seant,' id est, Gallicâ linguâ, `Bien-seant,' eo quod Christi amices candidi sunt et benigni, inimices vero terribiles atque nigri" (Jac. de Vitr. Hist. Hierosol. apud Gesta Dei, cap. lxv.).

The Cardinal de Vitry is totally uninformed as to the meaning and purpose indicated in this mysterious banner. Its black and white was originally derived from the Egyptian sacred "black and white," and it conveys the same significant meanings.

Now, in the heraldic sense,—as we shall soon see,—there is no colour white. Argent is the silver of the moon's light, the light of the "woman," or it is light generally, in opposition to darkness, which is the absence of all colour. White is the synthesis and identity of all the colours—in other words, it is light. Thus white is blazoned, in the correct heraldic sense, as also in reference to its humid, feminine origin (for, as the old heralds say, "light was begotten of darkness," and its "type, product, and representative, woman, also"), as the melancholy or silver light of the moon, "Argent;" also, in the higher heraldic grade, "Pearl," as signifying tears; lastly, "Luna," whose figure or mark is the crescent ☽, or ☽; which is either the new moon (or the moon of hope), or the moon of the Moslem (or "horned moon resting on her back"). Black (or sable, sab., sabbat, Sat., Saturn) is the absence of light, and is blazoned "sable," diamond (carbon, or the densest of matter), "without form and void," but cradle of possibilities, "end" being taken as synonymous with "beginning." It is sab., or Saturn, whose mark is ☽, and who is both masculine and feminine—sex being indifferent to this "Divine Abstraction, whose face is masked in Darkness."
Lykos—"wolf," lyke—"light;" whence comes Lux (Volney, 1st English edition, 1792, p. 378). "Je" and "V" are of Tartar origin. It is probable that St. John's College at Cambridge is the Domus Templi of the Round Church of the Templars there. The present St. John's is only of modern foundation. There is annexed to, or connected with, this church an almshouse called "Bede's House," the name of which has puzzled all the antiquaries. There is little doubt that this was the original Domus Templi, the house of Buddha, corrupted into Bede, and meaning "wisdom."

"A Discourse concerning the Tartars, proving (in all probability) that they are the Israelites, or Ten Tribes; which, being taken captive by Salmaneser, were transplanted into Media. By Giles Fletcher, Doctor of Both Laws, and sometime Ambassador from Elizabeth, Queen of England, to the Emperor of Russia." This was found in Sir Francis Nethersole's study after his death (Memoirs of the Life of William Whiston, 1749).

Mr. Cavendish, an eminent chemist, "had reason to be persuaded that the very water itself consisted solely of in-flammable air united to dephlogisticated air." This last conclusion has since been strengthened very much by some subsequent experiments of Dr. Priestley's (see p. 299 of Morsels of Criticism, tending to illustrate some few Passages in the Holy Scriptures upon Philosophical Principles. 2d edition, 2 vols. 8vo. London: J. Davis, Chancery Lane, 1800).

The jewel of the Rossi-crucians (Rosicrucians) is formed of a transparent red stone, with a red cross on one side, and a red rose on the other—thus, it is a crucified rose. The Rossi—or Rosy—crucians' ideas concerning this emblematical red cross and red rose probably came from the fable of Adonis—who was the sun whom we have seen so often crucified—being changed into a red rose by Venus (see Drum-
mond's *Origines*, vol. iii. p. 121). *Rus* (which is *Ras* in Chaldee) in Irish signifies "tree," "knowledge," "science," "magic," "power." This is the Hebrew *R—as*. Hence the Persian *Rustan* (*Val. Col. Hib.* vol. iv. pt. i. p. 84). "The ancient Sardica, in lat. 40° 50', is now called 'Sophia;' the ancient Aquineum, Buda, or Buddha. These were, I believe, old names restored" (*vide* D'Anville's *Atlas*). The society bearing the name of the Rossicrucians (or Rosicrucians) is closely allied with the Templars. Their emblem is a monogram or jewel; or, as malicious and bigoted adversaries would say, their "object of adoration" is a "red rose on a cross." Thus:

![Fig. 226.](image)

When it can be done, it is surrounded with a glory, and placed on a Calvary. This is the Nauritz, Natsir, or Rose of Isuren, of Tamul, or Sharon, or the Water-Rose, the Lily Padma, Pema, Lotus "crucified" for the salvation of man—crucified in the heavens at the Vernal Equinox. It is celebrated at that time by the Persians in what they call their Nou-Rose—i.e. Neros, or Naurutz (*Malcolm's History of Persia*, vol. ii. p. 406). The Tudor Rose, or *Rose-en-Soleil* (the Rose of the Order of the Garter), is the Rosicrucian "Red Rose," crucified, with its rays of glory, or golden sun-beams, or mythical thorns, *issuant* from its white, immaculate "centre-point," or "lily-point"—all which have
THE ROSICRUCIANS.

Further occult meanings lying hidden in theurgic mysticism. All these are spoken in the famous "Round Table" of the Prince (and Origin) of Christian knighthood, King Arthur. His table is now hanging on the wall, dusty and neglected, over the "King's Seat or Bench" in the Court-House on the Castle Hill of our ancient Winchester. But upon this abstruse subject of the "Round Table" we have spoken more fully in another place. See Elias Ashmole.

Pope John XIV., about the year 970, issued a Bull for the baptising of bells—"To cleanse the air of devils;" with which it was imagined to be full in the time of storms or of public commotion. To this end, the kettledrums of the Lacedemonians were also supposed to be used on all extraordinarily harmful occasions. Pagodas are uprights and obelisks, with the same meaning as other steeples, and their angles are set about with bells, which are agitated in the wind, and are supposed to exercise the same power of driving off evil spirits. Vesper-bells secure spiritual serenity. The bells of the churches are tolled in thunderstorms still, in some parishes in England, supposedly to disperse the clouds, and to open their rifts for the returning sunshine.

Edward the First of England was in every way an extraordinary man. There are certain reasons for supposing that he was really initiated in Eastern occult ideas. It is to be remembered that he made the Crusade to Palestine. He invited to England Guido dalla Colonna, the author of the Troy-Book, Tale of Troy; and he also invited Raymond Lully into his kingdom. Raymond Lully is affirmed to have supplied to Edward six millions of money, to enable him to carry on war against the Turks. The origin of the rose-nobles is from the Rosicrucians.

No. 1. Catherine-wheel window—12 columns. Query, the 12 signs, with the Rose, Disc, or Lotus, in the centre?
From a Saracenic fountain near the Council-House, Jerusalem. This fountain seems to be built of fragments; the proof of which is that this inscribed stone (No. 2) is placed over half the discus. The whole structure, though Oriental or Saracen, abounds with Gothic or pointed features. Such are the frets, the spandrel-work, the hood-moulding, &c.

No. 3. Query, “Aquarii”? The Aquarii always indicate the Lunar element, or the female. The Baptisteries dedicated to St. John, or to the S.S., are eight-sided. The

Baptisteria in Italy follow the same emblematical rule. The sections into which the Order of the Knights of Malta were divided were eight, answering to the eight points of the cross, which was their emblem. The Order was composed of eight nations, whereof the English, which was one, disappeared at the Reformation.

The colours of the monastic knightly orders were the following: The Teutonic Knights wore white, with the eight-pointed black cross; the Knights of Malta wore black, with the eight-pointed white cross. The foregoing obtained
their Black and White from the Egyptians. The Knights Templars, or Red-Cross Knights, wore white, with the eight-pointed Bhuddist red cross displayed on their mantles. The Guardian of the Temple Chapel was called "Custos Capella" (Capella, a "kid," "star," "she-goat," also "chapel").

Attila, surnamed the "Scourge of God," is represented as having worn a "Teraphim," or head, on his breast—a snaky-haired head, which purported to be that of Nimrod, whom he claimed as his great progenitor. This same Medusa-like head was an object of adoration to the heretical followers of Marcion, and was the Palladium set up by Antiochus Epiphanes, at Antioch, though it has been called the visage of Charon. This Charon may be "Dis"—or the "Severe," or "Dark," Deity.

The human head is a magnet, with a natural electric circle, moving in the path of the sun. The sign of this ring is serpentine, and is ♂; each man being considered—as far as his head is concerned—as magnetic. The positive pole of the magnet is the os frontis, sinciput, os sublime. The negative pole is the occiput.

Tonsure of the head is considered as a sacred observance. Hair (in se) is barbarous, and is the mark and investiture of
ENCAMPMENTS AND CHAPTER-HOUSES. 285

the beasts. The Cabalists abstained from wine and marriage. Tonsure means "the sun's disc" in the East. "Les Arabes, dit Hérodote, lib. iii., se rasent la tête en rond et autour des tempes, ainsi que se rasait, disent-ils, Bacchus" (Volney, Ruines, p. 265). "La touffe qui conservent les musulmans est encore prise du soleil, qui, chez les Égyptiens, était peint, au solstice d'hiver, n'ayant plus qu'un cheveu sur la tête." "Les étoiles de la déesse de Syrie
et de la Diane d'Éphèse, d'où dérivent celles des prêtres, portent les douze animaux du zodiaque."

Fig. 230, Chapter-Houses of York Cathedral and of Salisbury Cathedral. Most of the Chapter-Houses of the Cathedrals are eight-sided. In this they imitate the eight-sided or "Bhuddist" cross of the Templars. This is the crown, cap, capital, chapter, tabernacle, mythic domus templi, or domus Dei. They are miniature, mystical Round Churches, or "Tors." The Chapter-Houses oblong in shape are imitative of the "Ark" of the Mosaical Covenant. All the

Basilicas are of this figure. The symbol is a parallelogram, or an oblong, when the shape adopted is that of the temples. It then is the navis, "nave," or ship—which is the "Argo."

"Les Chinois l'adorent dans Fôt. La langue chinoise n'ayant ni le B ni le D, ce peuple a prononcé Fôt ce que les Indiens et les Perses prononcent Bôt, Bot, Bod, Bodd, ou Boudd—par où bref Fôt, au Pegou, est devenu Fota et Fta." Query, Ptah (Vulcan) of the Egyptians, and the Teutonic F's in "Friga" (the Runic Venus), "Friga"—
"Friday"? $B-F, P-F$, are interchangeable letters (see Arabic and Sanscrit vocabularies).

The Æolic Digamma is the crux of philologists. The ancients pronounced every word which began with a vowel with an aspirate, which had the sound of our $u$, and was often expressed by $\beta$ or $\upsilon$, and also $\gamma$. For this, the figure of a double $\Pi$, or $\digamma$, was invented, whence the name Digamma; which was called Æolic, because the Æolians, of all the tribes, retained the greatest traces of the original language. Thus, the Æolians wrote or pronounced $\pi'ivos$, $\pi'ela$, $velia$. The Latin language was derived from the Æolic dialect, and naturally adopted the Digamma, which it generally expressed by $\upsilon$. These significant, mysterious sounds and characters—$\upsilon, W, B$, and $\digamma$—are reputed to be the key of the Lunar, or Feminine, Apotheosis. The symbol (or that meant in the symbol) is the key-note, as it were, of all Grecian architecture and art; which is all beauty, refinement, and elegance, with power at the highest.
CHAPTER THE TWENTY-NINTH.

CONNECTION BETWEEN THE TEMPLARS AND Gnosticism.

The branch sect of the Gnostics, called Basilideans, who were properly Ophites, arose in the second century, deriving their name from Basilides, the chief of the Egyptian Gnostics. They taught that in the beginning there were Seven Beings, or Æons, of a most excellent nature; in whom we recognise the cabalistic Seven Spirits before the Throne. Two of these first Æons, called Dyamis and Sophia—that is, "Power" and "Wisdom"—engendered the angels of the highest order. The name of Abraxas, the Deity of the Gnostics, is made up of the numerical letters representing the total 365—the aggregate of days of the solar year. The "manifestation" of Abraxas rests in his Son, Nus (knowledge), or Christ, the chief of the Æons, who descended to earth and assumed the form of "Man;" was baptised, and crucified in appearance (Mosheim's Eccles. Hist. vol. i. pp. 181-184). The Manicheans, who deny the reality of the Crucifixion of the Son of God, and whose tenets concerning the Saviour Jesus are peculiar, derive their name from Manes, or Mani; and their doctrine was first disseminated in Persia about the year 270. They speak mysteriously of the Anima Mundi, or "Hyle;" they call
this principle a deity, and agree with the Rosicrucians in asserting that it is a power presenting itself at once in reverse to the world and to the heavens, in as far as that, while it is dark to the one, it is light to the other; and contrariwise. The Gnostic hierarchy consisted of an arch-priest or patriarch, twelve masters, and seventy-two leaders or bishops. The Gnostics called Matter, or Body, "evil," and "darkness," and seemed uncertain whether, in its operations, it were active or passive. It was believed by these sectaries that there were successive emanations of intelligent beings,—these were the Æons (αἰωνίς),—producing the various phases in creation. In this way, there arose in time a mighty being—the Demiurge—who set to work on the inert matter then existing, and out of it formed the world. The reconciliation, or restoration, is to the Bhuddistic pleroma, or fulness of light. It is absorption into "annihilation," or into victory, oblivious of the vexations of "life." Here, in this fulness of light,—or independence of all worlds, or of life, according to Man's ideas,—the Supreme God has His habitation: but it is not "nothingness," according to our ideas of nothing; it is so only because it has not any thing in it comprehensible. The Alexandrian Gnostics inclined to the opinion that Matter was inert, or passive; the Syrian Gnostics, on the contrary, held that it was active. Valentinus came from Alexandria to Rome about A.D. 140. St. Augustine fell under the Gnostic influence, and retained their beliefs from his twentieth to his twenty-ninth year—viz. from 374 to 383 A.D. Their books have for titles: the Mysteries, the Chapters or Heads, the Gospel, and the Treasure. Refer to Beausobre, Walch, Fuesslin, and Hahn.

The Gnostics held that Christ's teaching was not fully understood even by His disciples; and therefore He promised to send, in due time, a still greater Apostle, the Para-
plete, who should effectually separate truth from falsehood. This Paraclete appeared in Mani.

The West Front of Lichfield Cathedral displays accurately the mythic idea of the union of the Male and Female Principles in the parallel double towers, which are uniform.

The claims for the reading of the Egyptian hieroglyphics are distinct and unhesitating, as put forward by the Egyptologists; who, if industry could have succeeded, certainly would have realised their desire. But it is extremely doubtful whether, after all, they are not widely astray. The late Sir George Cornewall Lewis, in his History of Ancient Astronomy, has disposed conclusively of the assumed correctness of most of these interpretations. The Egyptologists,—the principal of whom are Champollion, Rawlinson, Dean Milman, Sir George Lewis (perhaps the best critic), Professor Wilson, Sir Gardner Wilkinson, Dr. Cureton, Dr. Hincks, M. Oppert, Mr. Fox Talbot,—with a large amount of ingenious and very plausible research and conjecture, have not truly touched these enigmas. They yet remain, baffling the curiosity of the moderns; and they are likely to preserve their real mysteries unread as long as the stones of the Pyramids, and the remembrance of the Sphinx,—if not her visible figure,—themselves endure. We believe that there is no adequate mystical comprehension among modern decipherers to read the hopeless secrets—purposely evading discovery—which lie locked in the hieroglyphics: the most successful readings are probably guesses only, founded on readily accepted likeness and likeness.

The Temple Church, London, presents many mythic figures, which have a Rosicrucian expression. In the spandrels of the arches of the long church, besides the "Bean-séant," which is repeated in many places, there are the armorial figures following: "Argent, on a cross gules, the
SYMBOLS IN THE TEMPLE CHURCH.

Agnus Dei, or Paschal Lamb, or;” “Gules, the Agnus Dei, displaying over the right shoulder the standard of the Temple; or, a banner, triple cloven, bearing a cross gules;” “Azure, a cross prolonged, potent, issuant out of the crescent moon argent, horns upwards; on either side of the cross, a star or.” This latter figure signifies the Virgin Mary, and displays the cross as rising like the pole, or mast of a ship (argha), out of the midst of the crescent moon, or navis biprora, curved at both ends: “azure, semée of estoiles or.” The staff of the Grand Master of the Templars displayed a curved cross of four splays, or blades, red upon white. The eight-pointed red Buddhist cross was also one of the Templar ensigns. The Temple arches abound with brandished estoiles, or stars, with wavy or crooked flames. The altar at the east end of the Temple Church has a cross flourie, with lower limb prolonged, or, on a field of estoiles, wavy; to the right is the Decalogue, surmounted by the initials, A. Ω. (Alpha and Omega); on the left are the monograms of the Saviour, I C X C; beneath, is the Lord’s Prayer. The whole altar displays feminine colours and emblems, the Temple Church being dedicated to the Virgin Maria. The winged horse, or Pegasus, argent, in a field gules, is a badge of the Templars. The tombs of the Templars, disposed around the circular church in London, are of that early Norman shape called dos d’âne: their tops are triangular; the ridge-moulding passes through the temples and out of the mouth of a mask at the upper end, and issues out of the horned skull, apparently, of some purposely trodden creature. The head at the top is shown in the “honour-point” of the cover of the tomb. There is an amount of unsuspected meaning in every curve of these Templar tombs; but it would at present too much occupy us to more fully explain.
The crook part of a Bishop's staff shows the undulating curve of the S.S., issuing out of the foliations: meaning the Blessed Virgin Mary. This is particularly observable in the statue of William of Wykeham, the founder, at St. Mary's College, Winchester; who, holding the spiritual crook in the left hand, gives the usual benediction of the two extended fingers with his right. The crook is the Shepherd Crook of the "Second Person," and of the "Holy Spirit."

We now give a series of Gnostic Talismans, from originals. The reader is requested to refer to our numerous figures and symbols from the Temple Church, London, and to the insignia of the Templars, as displayed in all countries, for hints as to their connection with the mysterious beliefs constituting that which is called Gnosticism.

Concerning the Pillars of Seth (see fig. 237), Josephus asserts that No. 1 was existent in his time. It is a Cabalistic tradition that No. 2 was destroyed in the Deluge. Notice also their resemblance to the Phallus or Phallos, Lingam or Lingham. Lithoi—Ll-th-oi.
Figs. 239, 240, represent, under different aspects, the armed Abraxas, the chief deity of the Gnostics. In fig. 239 he is displayed with characteristics of Apollo, or the Sun rising in the East, in the *quadriga*, or four-horsed chariot. Fig. 240: "Abraxas brandishing his whip, as if chasing away the evil genii. On his shield, the titles ΙΨ . ΙΑΩ. Neat work. Green jasper" (The Gnostics, p. 201).
The "Uræon," or winged solar disc, or egg, from which issue, on reversed sides, the two emblematical asps, has certain characteristics which ally it with the "Scarabæus."

Both Uræon and Scarabæus are symbols continual on the fronts of the Egyptian temples, and they are principally placed over the portals: they are talismans or charms.

Fig. 248: "Osiris," or the "Old Man," a terminal figure. At the foot, the celestial globe and masonic pentagon, or "Solomon's Seal." The field is occupied by symbols and letters, seemingly Hebrew. The whole design is mediæval, hardly a production of even the lowest times of the
Empire. This is one of the pieces most evidently bespeaking a "Rosicrucian" origin. Deeply cut in a coarse-grained green jasper (Gnostics, p. 213).

Fig. 244.
Cancer grasping with One Claw at the Lunar Crescent: Gnostic Gem.

Fig. 245. Uræon.
Fig. 246. Uræon.
Fig. 247. Uræus.

Fig. 249: Anubis walking; in each hand, a long Egyptian sceptre terminating in a ball; in the field, the sun and moon (adjuncts marking the astrological character of this talisman, which therefore must be ascribed to the class of Abraxoids). The whole enclosed in a sunken circle. Rev. MIXAHA, between four stars. The Cabalists make Michael the Angel of the Sun. Plasma of bad quality (The Gnostics, p. 200).
Fig. 250: This object is the "Chnephis Serpent," to which frequent reference has been made in our book. The "Serpent" is raising itself in act to give the mythic dart.

On its head is the crown of seven points or vowels. The second amulet presents the name of the Gnostic "Unknown Angel," with the four stars in the angles. This

\[ A I N I O \tau W \]

is Michael, or the "Saviour," the "Chief of the \AEons," seventy-two in number, and composed of six times twelve; there being three "double decades," for the night and for
the day, in each lunar period or sign of the zodiac; each of which consists of thirty degrees. In another aspect, this symbol stands for the Gnostic Chief Deity Abraxas, the letters of whose name make up the number of days of the solar circle.

The following group of figures gives some of the significant hieroglyphs from the Egyptian sculptures. (a) Plume, "Spiritual Power." (b) Jackal, "Priesthood." (c) Tan, Fleur-de-Lis, Crux-Ansata. (d) Placenta, "Religious Solemnities." (e) Horns, "Power." (f) Anser, "Prudence." (g) "Nonage." (h) Asp, "Sovereignty." (i) Hawk, "Sagacity." The Lotus-headed Sceptre means "Religious Authority." A Snake-headed Rod or Staff signifies "Military Dominion." A Snaky Rod or Sceptre is the "Lituus," or "Augur's Divining-rod," when it is curved at the lower as well as at the upper end.

We give in another place the Procession of the "Logos," or "Word," according to the Gnostics.

Fig. 252: "The Good Shepherd bearing upon his shoulders the Lost Lamb, as he seems to the uninitiated eye; but
on close inspection he becomes the double-headed Anubis; having one head human, the other a jackal’s, whilst his girdle assumes the form of a serpent, rearing aloft its crested head. In his hand is a long hooked staff. It was perhaps the signet of some chief teacher or apostle among the Gnostics, and its impression one of the tokens serving for mutual recognition mentioned by Epiphanius. Neatly engraved in a beautiful red sard, fashioned to an octagon form; a shape never met in the class of antique gems, though so much affected in Mediaeval art, on account of its supposed mystic virtues” (The Gnostics, p. 201).

Fig. 252.

One of the Gnostic Gems, reputed the most efficacious of amulets, is of red jasper, and presents the Gorgon’s Head (“Gorgoneion”), with the legend below, “ἈΡΗΓΩ ΡΩΡΟ-ΜΑΝΔΑΡΠ”—“I protect Rhoromandares.”

In India, the “Great ABad” is Bhudda, Baudhha, Buddha, or Baddha. There is a connection suggested here with the “Abaddon” of the Greeks. In the same way, a relation may be traced with “Budha’s Spiritual Teacher;” who was the mythic Pythagoras, the originator of the system of transmigration, afterwards transplanted to Egypt, and thence to Greece. Thus in Sanscrit it is “Bud’ha-Gooros,” in
Greek it is "Putha-Goras," in English it is "Pytha-goras; the whole, "Buddha's Spiritual Teacher."

The *crista*, or crest, or symbolic knob of the Phrygian cap or Median bonnet is found also, in a feminine form, in the same mythic head-cover or helmet, for it unites both sexes in its generative idea, being an "idol." In the feminine case—as obviously in all the statues of Minerva or Pallas-Athene, and in the representations of the Amazons, or woman-champions, or warriors—every where the cap or helmet has the elongated, rhomboidal, or globed, or salient part in reverse, or dependent on the nape of the neck. This is seen in the illustration of the figure of the armed "Pallas-Athene," among our array of these Phallic caps. The whole is deeply mythic in its origin. The ideas became Greek; and when treated femininely in Greece, the round or display—which in the masculine helmet was naturally pointed forward, saliently or exalted (the real "*chista,*" or "*crest*")—became reversed or collapsed, when worn as a trophy on a woman's head. On a narrow review of evidence which evades, there is no doubt that these classic helmets with their "crests," this *pileus*, Phrygian cap, Cap of Liberty, or the Grenadiers' or Hussars' fur caps, or cocked hats, have a phallic origin.

The Cardinal's "Red Hat" follows the same idea in a different way; it is a chapel, chapter, chapiter, or *chapeau*, a *discus* or table; crimson, as the mystic feminine "rose," the "Queen" of Flowers, is crimson. The word "Cardinal" comes both from *Cardo* (Hinge, Hinge-Point, "Virgo" of the Zodiac), and also from *Caro*, It. *Carne*, flesh,—the "Word made flesh."

It is probable that these mythological hints and secret expressions, as to the magic working of nature, were insinuated by the imaginative and ingenious Greeks into dress and personal appointments. In the temples, and in templar
furniture, mythological theosophic hints abound: every curve and every figure, every colour and every point, being significant among the Grecian contrivers, and among those from whom they borrowed—the Egyptians. We may assume that this classic Grecian form of the head-cover or helmet of the Athenian goddess Pallas-Athene, or Minerva, not only originated the well-known Grecian mode of arranging women’s hair at the back, but that this style is also the far-off, classic progenitor of its clumsy, inelegant imitation, the modern chignon, which is only an abused copy of the antique. In our deduction (as shown in a previous group of illustrations) of the modern military fur caps—particularly the Grenadier caps of all modern armies, as well as those of other branches of the military service—from that common great original, into which they can be securely traced, the mythic Phrygian cap when red, the Vulcan’s pileus when black, we prove the transmission of an inextinguishable important hint in religion.

The following are some of the most significant talismans of the Gnostics:

In fig. 255 we have the representation of the Gnostic Female Power in Nature,—Venus, or Aphrodite, disclosing
in the beauty, grace, and splendour of the material creation. On the other, or terrible, side of her character, the endowments of Venus, or of the impersonated idea of beauty, change into the alarming; these are the attributes of the malific feminine elementary genius, born of "darkness" or "matter," whose tremendous countenance, veiled as in the instance of Isis, or masked as in that of the universal mythologic Queen of Beauty, inspires or destroys according to the angle of contemplation at which she is mythically revealed.

Fig. 256 (A) is the crested "Snake," curved as the symbol of the "Dragon's Tail," traversing from left to right the fields of creation, in which the stars are scattered as "estoiles," or waved serpentining flames,—the mystic
"brood" of the "Great Dragon." The reverse of this amulet (B) presents the "crescent" and "decrescent" moons, placed back to back, with a trace or line, implying that the "Microcosmos," or "Man," is made as between the "Moons." This figure suggests a likeness to the sign of the "Twins," and to that of the February "Fishea."

Fig. 257 is the mythological "Medusa's Head," terrible in her beauty, which transforms the beholder to stone. This direful head is twined around with snakes for hair, and the radii which dart from it are lightning. It is, nevertheless, esteemed one of the most powerful talismans in the Gnostic preservative group, though it expresses nothing (in a strange, contradictory way) but dismay and destruction.

Fig. 258 is referred to in a previous part of our book as fig. 313.
CHAPTER THE THIRTIETH.

ROSICRUCIAN ORIGIN OF THE ORDER OF THE CARTER.

The natural horns of the Bull or the Cow—both which animals were deified by the Egyptians, and also by the Indians, who particularly elected the Cow as the object of religious honour—were the models from which originally all the volutes and volutes, presenting the figure of curved horns, or the significant suggestion of the thin horns of the crescent or growing moon, were obtained. The representative horns figured largely afterwards in all architecture, and were copied as an important symbol expressive of the second operative power of nature. The Egyptian volutes to the pillars, the Egyptian horns every where apparent, the innumerable spiral radii distinct in all directions, or modified, or interpenetrating the ornamentation of buildings in the East; the Ionic volutes, the Corinthian volutes, which became preëminently pictorial and floral in their treatment in this beautiful order, particularly in the Greek examples (which are, however, very few), the more masculine volves and volutes, or horns, of the Roman solid, majestic columns, the capitals to the ruder and more grotesque of the Indian temples, the fantastic scrolls and crooks abound-
ing on the tops of the spiring columns in the Gothic or, more properly to call it, the Romantic architecture called "pointed,"—all have a common ancestor in the horns of the bull, calf, or cow. All these horns are everywhere devoted in their signification to the Moon. It is in connection with this secondary god or goddess, who is always recognisable through the peculiar appendage of horns,—it is in proximity to this god or goddess, who takes the second place in the general Pantheon, the Sun taking the first,—it is here, in all the illustrations which the mythic theology borrows from architecture, or the science of expressing religious ideas through hieroglyphical forms,—that the incoherent horns reiterate, always presenting themselves to recognition, in some form or other, at terminal or at salient points. Thus they become a most important figure, if not the most important figure, in the templar architecture every where,—of India, of Egypt, of Greece, of Rome, even of the Christian periods.

The figure called Nehustan—the mysterious upright set up by Moses in the Wilderness—was a talisman in the form of a serpent coiled around the mystic "Tau." This is a palla-dium offered for worship, as we have said in several places.

In a previous part of our book, we have brought forward certain reasons for supposing that the origin of the Most Noble Order of the Garter was very different from that usually assigned. The occurrence which gave rise to the formation of the Order, and which explains the adoption of the motto, does not admit of being told, except in far-off, round-about terms; propriety otherwise would be infringed. We may say no more than that it was a feminine accident, of not quite the character commonly accepted, and not quite so simple as letting fall a garter. But this accident, which brought about the foundation of the exalted Order,—however
clear it becomes when understood, and however sublime, as the Rosicrucians asserted it was, when it is apprehended in its physiological and also in its deeply mythic sense,—could not, of necessity, be placed before the world, because ordinary persons could not have appreciated it, nor would they have felt any other idea than repulsion and disbelief at the statement. The commonplace, coarse mind instantly associates indecency with any explanation, however conclusive, which cannot for obvious reasons be spoken "on the house-tops."

We are now ourselves, against our desire, compelled to speak circuitously about the real, successfully concealed, very strange origin, in our modern ideas, of this famous "Order of the Garter."

The subject is however of great consequence, because there is either meaning of the highest force in this, which may be called the "brotherhood of princes," as the Order undoubtedly is in a high sense; or there is no particular meaning, and certainly nothing challenging startled attention. There is either truth in the abstract, occult matters which the Order supposedly is formed to whisper and to maintain, or there is only empty, meaningless affectation. There is grandeur and reality in its formalities, or the whole institution is no more than a parade of things that have no solidity, and an assumption of oaths and obligations that regard nothing of consequence,—nothing of real, vital seriousness. We seek thus to ennable the "Order" in idea, by giving it conclusively the sanction of religion, and rendering to it the respect due to the mighty mystery which may be suspected to lie in it; which it was supposed to emphasise, whatever it be held now. We are inclined to view with surprise—although in no grudging, prejudiced spirit—the obtrusion of the "Crescent and Star," the symbol of the Grand Signior, Soldan, or Sultan of Turkey, the Representative of Mohammed, the "Denier of Christ," according to
his supposed religious obligations. We are disposed to contemplate the addition of the Moslem banner—the direct contradiction and neutraliser of the ensigns of the Christian knights—suspended in the Chapel of the Order, the Chapel of St. George at Windsor, as a perplexing intrusion, according to assumed correct Christian ideas. We fear that the admission of this heathen knight may possibly imply heraldically the infraction of the original constitutions of the Order, which created it as exclusively Christian. The "Garter" is specially devoted to the Virgin Mary and to the honour of the Saviour of Mankind. The knights-companions are accepted, supposedly, as the special initiated guard of the Christian mysteries, and they are viewed as a sworn body of "brothers," by day and night, from their first association, bound to maintain and uphold the faith that had Bethlehem for its beginning and Calvary for its end. The bond and mark of this brotherhood is the Red Cross of Crucifixion.

Even the badge and star and symbol of this most Christian Order, if ever there were a Christian Order,—which presents this red or sanguine cross of the Redeemer, imaged in the cognisance of His champion, or captain, or chief soldier, St. George or St. Michael, the Trampler of the Dragon, and Custos of the Keys of the Bottomless Pit, where the devils are confined,—protests against the mingling of this Mussulman banner with the Red Cross, which opposed it in the hands of the Crusaders, and in those of all Christian knights. Now, all the Christian "Garter" badges only seem to appeal and to protest quietly and under allowance, with "bated breath," as it were, deficient in firmness and life, leaving results to chance, and abandoning expostulation to be regarded or disregarded according to circumstances.

These are matters, however, which properly appertain to
the office, and lie in the hands of the dignitaries of the Order of the Garter. These officials are its Prelate and "Garter" himself (the personified "Order"), who are supposed, because of the duties with which they are charged, to be the guardians of the meanings and the myths of an Order of Knighthood whose heraldic display, in one form or other, covers the land, and must be interpreted either as talisman or toy. In these days without faith, wherein science (as it is called in the too arbitrary and overriding sense) has extinguished the lights of enthusiasm, leaving even our altars dark, passive, and cold, and has eliminated all possible wonder from the earth, as miracle from religion, and magic from the sensible or insensible fields of creation,—in these questioning, doubting, dense, incredulous days, it is no inconsistency that the gorgeous emblazonments of the Garter should provoke no more curiosity or admiration than peculiar ornaments do, signifying any thing or nothing.

But to return to the import of the title of the Order of the Garter. This is a point very engrossing to heralds, antiquaries, and all persons who are interested in the history, traditions, and archaeology of our country. The origin of the Order would be trivial, ridiculous, and unbelievable, if it be only thought due to the picking up of a lady's garter. It is impossible that the great name and fame of this "Garter" could have arisen alone from this circumstance. The Garter, on the contrary, is traceable from the times of King Arthur, to whose fame throughout Europe there was no limit in his own period. This we shall soon show conclusively from the accounts of the Garter by Elias Ashmole, who was "Garter King of Arms," and who was one of its most painstaking and enlightened historians; besides himself being a faithful and conscientious expositor and adherent of the hermetic science. The "Round Table" of
King Arthur—the "mirror of chivalry"—supplies the model of all the miniature tables, or tablets, which bear the contrasted roses—red and white, as they were originally (and implying the female discus and its accidents)—with the noble "vaunt," or motto, round them—"Evil to him," or the same to him, "who thinks ill" of these natural (and yet these magical) feminine circumstances, the character of which our readers will by this time not fail to recognise. The glory of woman and the punishment of woman after the Fall, as indicated in Genesis, go hand in hand. It was in honour of Woman, and to raise into dignity the expression of the condemned "means" (until sanctified and reconciled by the intervention of the "S.S.," or of the Holy Spirit, or of the Third Person of the Trinity), which is her mark and betrayal, but which produced the world in producing Man, and which saved it in the person of the Redeemer, "born of Woman." It is to glorify typically and mystically this "fleshly vehicle," that the Order of the "Garter"—or "Garder"—that keeps it was instituted. The Knights of the Garter stand sentinel, in fact, over "Woman’s Shame," at the same time that they proclaim her "Glory," in the pardoned sense. These strange ideas are strictly those of the old Rosicrucians, or Brethren of the "Red Cross," and we only reproduce them. The early writers saw no indecency in speaking openly of these things, which are usually hidden away.

The blackness or darkness of "Matter," or of the "Mother of Nature," is figured in another respect in the belongings of this famous feminine Order, instituted for the glory of woman. Curious armorists, skilled in the knowledge of the deep symbolism with which the old heralds suffused their illustrations or emblazonments, will remember that black is a feature in the Order of the Garter; and that, among figures
and glyphs and hints the most profound, the "Black Book," containing the original constitutions of the Order,—from which "Black Book" comes the important "Black Rod,"—was lost before the time of Henry the Fifth. See pp. 168-170, ante, for previous remarks about the "Garter."

Elias Ashmole mentions the Order in the following terms: "We may ascend a step higher; and if we may give credit to Harding, it is recorded that King Arthur paid St. George, whose red cross is the badge of the Garter, the most particular honours; for he advanced his effigy in one of his banners, which was about two hundred years after his martyrdom, and very early for a country so remote from Cappadocia to have him in reverence and esteem."

In regard to the story of the Countess of Salisbury and her garter, we shall insert the judgment of Dr. Heylin, who took great pains to ascertain its foundation. "This I take to be a vain and idle romance," he says, "derogatory both to the founder and the Order, first published by Polydore Virgil, a stranger to the affairs of England, and by him taken upon no better ground than \textit{fama vulgi}, the tradition of the common people—too trifling a foundation upon which to raise so great a building."

The material whereof the Garter was composed at first is an \textit{arcanum}, nor is it described by any writer before Polydore Virgil, and he only speaks of it in general terms. The Garter was originally without a motto. As to the appointments of the Order, we may gain the most authentic idea of them from the effigies of some of the first knights. Sir William Fitz-warin was buried on the north side of the chancel of the church of Wantage, in Berkshire, in the thirty-fifth year of the reign of King Edward the Third. Sir Richard Pembroke, who was a Knight of the Garter, of the time of Edward the Third, lies on the south side of the
cathedral of Hereford. The monument of Sir Simon Burley, beheaded A.D. 1388, was raised in the north wall, near the choir of St. Paul's, London. It is remarkable that Du Chesne, a noted French historian, is the source from which we derive the acknowledgment that it was by the special invocation of St. George that King Edward the Third gained the Battle of Cressy; which "lying deeply in his remembrance, he founded," continues Du Chesne, "a chapel within the Castle of Windsor, and dedicated it in gratitude to the Saint, who is the Patron of England." The first example of a Garter that occurs is on the before-mentioned monument of Sir Francis Burley; where, on the front, towards the head, are his own arms, impaling his first wife's, set within a garter. This wants the impress, or motto. Another shield of arms, having the same impalement placed below the feet, is surrounded with a collar of "S.S.," of the same form with that about his neck. It was appointed by King Henry the Eighth, and embodied in the Statutes of the Order, that the collar should be composed of pieces of gold, in fashion of Garters; the ground enamelled blue, and the letters of the motto gold. In the midst of each garter two roses were to be placed, the innermost enamelled red, and the outermost white; contrarily, in the next garter, the innermost Rose enamelled white, and the outermost red, and so alternately; but of later times, these roses are wholly red. The number of these Garters is so many as to be the ordained number of the sovereign and knights-companions. At the institution they were twenty-six, being fastened together with as many knots of gold. And this mode hitherto has continued invariable; nor ought the collar to be adorned or enriched with precious stones (as the "George" may be), such being prohibited by the laws of the Order. At what time the collar of "S.S." came into England is not fully
determined; but it would seem that it came at least three hundred years since. The collar of "S.S." means the Magian, or First Order, or brotherhood. In the Christian arrangements, it stands for the "Holy Spirit," or "Third Person of the Trinity." In the Gnostic talismans, it is displayed as the bar, curved with the triple "S." Refer to the "Cnephis Abraxoids" occurring in our book, for we connect the collar of "S.S." with the theology of the Gnostics.

That the Order of the Garter is feminine, and that its origin is an apotheosis of the "Rose," and of a certain singular physiological fact connected with woman's life, is proven in many ways—such as the double garters, red and white; the twenty-six knights, representing the double thirteen lunations in the year, or their twenty-six mythic "dark and light" changes of "night and day." "But how is all this magic and sacred in the estimate of the Rosicrucians?" an inquirer will very naturally ask. The answer to all this is very ample and satisfactory; but particulars must be left to the sagacity of the querist himself, because propriety does not admit of explanation. Suffice it to say, that it is one of the most curious subjects which has occupied the attention of antiquaries. That archaeological puzzle, the "Round Table of King Arthur," is a perfect display of this whole subject of the origin of the "Garter;" it springs directly from it, being the same object as that enclosed by the mythic garter, "garder," or "girther."

King Edward the Third chose the Octave of the "Purification of the Blessed Virgin" for the inauguration of his Order. Andrew du Chesne declares that this new Order was announced on "New Year's Day, A.D. 1344." There were jousts holden in honour of it on the "Monday after
the Feast of St. Hilary following—January 19th.” There are variations in the histories as to the real period of the institution of the Garter; most historians specifying the year 1349. Ashmole states that a great supper was ordered to inaugurate the solemnity of the institution, and that a Festival was to be annually held at Whitsuntide (which means the “S.S.”); that King Edward erected a particular building in the Castle, and therein placed a table (“Round Table”) of 200 feet diameter, giving to the building itself the name of the “Round Table.” He appropriated 100l. per week—an enormous sum in those days—for the maintenance of this table. In imitation of this, the French King, Philip de Valois, instituted a “Round Table” at his court. Some say that he had an intention of instituting an order of knighthood upon the same “feminine subject,” but that he was anticipated by King Edward; which shows that it was something more than an accident and a mere garter which inspired the idea of this Rose forming the mystery. The knights were denominated “Equites Aureae Periscelidis.” King Edward the Third had such veneration for the Blessed Virgin Mary, that he ordained that the habit of his Knights of the Garter should be worn on the days of her Five Solemnities. Elias Ashmole states that the original of the Statutes of Institution had wholly perished long before his time. There was a transcript existing in the reign of Henry the Fifth, in an old book called Registrum Ordinis Chartaceum. Though the Order was instituted so long ago as in the year 1344, it was not till the reign of Charles the Second that the Knights were empowered to wear the star they use at present embroidered on their coats. The rays are the “glory” round the “Red Cross.”

Sir John Froissart, the only writer of the age that treats of this institution, assigns no such origin as the picking up
of the Countess of Salisbury's garter; nor does he adduce the words of the motto of the Garter as having been spoken by King Edward the Third when encountering the laughter of his court, and assuring them that he would make the proudest eventually wear it as the most illustrious badge. There can be only one conclusion as to the character of the investment which was picked up; and which article of dress makes it clear that the Countess of Salisbury—or the lady, whoever she may be, who has succeeded in becoming so celebrated in the after ages of chivalry—should have rather been at home, and at rest, than inattentive to saltatory risks in engaging in a dance at a crowded court. There was no mention of this supposed picking up of a garter for 200 years, nor was there anything referring to such an origin occurring in any of our historians other than Sir John Froissart, until Polydore Virgil took occasion to say something of it in his notices of the origin of the Order. In the original Statutes of the Order (which is a most important point in the inquiry), there is not the least conjecture expressed, nor does the compiler of that tract entitled *Institutio clarissimi Ordinis Militaris a prænobili Subligaculo nuncupata*, prefaced to the *Black Book of the Garter*, let fall any passage on which to ground the conclusions about the Garter. Polydore does not mention whose garter it was; this he cautiously declines to do. He says that it was either the Queen's, or that of the King's mistress,—meaning Joan, Countess of Salisbury, with whom it was supposed the King was in love, and whom he relieved when she was bravely holding out for him against the Scots, in her Castle of Wark-apon-Tweed; but she was certainly no mistress of the King's, in the injurious and unworthy sense. It is to be particularly noticed that the Latin words *subliuar, subligaculum*, mean, not a "garter," but "breeches, drawers, or trousers." It was therefore not a
garter for the leg, but a cincture for the body, which was thus picked up publicly, and elevated for honour, as such an unexpected illustrious object; one around which the most noble knights were to take enthusiastic oaths of devoted homage. Now, unless there had been some most extraordinary meaning under all this (lying under the apparent, but only apparent, indecency), such an idolising could never have occurred, and the whole occurrence ages ago would have been laughed into oblivion, carrying the sublime honours of the "Garter" with it. Instead of this, the Garter is the highest token of greatness the Sovereign of England can bestow, and it is contended for and accepted with eager pride by Princes. "Subligaculum, breeches, drawers, trousers." "Subligatus, cinctured, bound, &c., wearing drawers." The origin of the "Garter" is proven in this word not to be a garter at all.

It is most generally supposed that it was on January 19th, 1344, that King Edward instituted his famous Order of the Garter. This period, it will be perceived, was almost within an octave of the Purification of the Blessed Virgin Mary; under whose patronage, and under the guardianship of St. George on earth (St. Michael in Heaven; both these Saints being the same, with earthly and spiritual attributes resplendent respectively), King Edward placed his profoundly religious Order. The whole was a revival of the "Round Table" of King Arthur, or the apotheosised female discus in certain mythical aspects. To confirm us in our assertion of the feminine origin of the Order of the Garter—which many in their ignorance have questioned—we may state that one of the old chroniclers, though somewhat guardedly, as befitted those of whom he spoke, declares that the lady who let fall her garter, or "garder," was the Queen, who had suddenly left the courtly assembly in some confusion,
and was hastening to her own apartments, followed by the King, who, when the spectators avoided lifting the article, being aware to whom it belonged, raised it himself, and called aloud, not the words of the motto of the Garter, which the historian says that the Queen herself spoke, but an intimation that he would, spite of their laughter, "make the proudest of the refusers wear the rejected cincture as the grandest badge that knighthood ever bore." Rightly viewed, this little evaded incident—which we desire to restore to its proper place in the knowledge of Englishmen—is the most conclusive proof of King Edward's nobleness and greatness of heart, and of his chivalrous, gallant delicacy; an instance admirable to all future generations, and worthy of the most enduring applause. The reader finally is referred to our observations in a previous part of our book for evidence in our justification. In the foregoing we give the Rosicrucian view of the origin of the "Garter." It is the centre-point round which have converged the noblest ideas and the most illustrious individuals in the world. It is still the proudest and most solemn badge, and the chiefest English knightly dignity. Strangely enough, too, this whole history of the "Garter" teaches, as its moral, the greatness of the proper independence of shame, and the holiness of its unconsciousness.
CHAPTER THE THIRTY-FIRST.

ROSICRUCIAN SUPPOSED MEANS OF MAGIC THROUGH SIGNS, SIGILS, AND FIGURES.

THE Dragon's Head and Dragon's Tail are the points called Nodes, in which the ecliptic is intersected by the orbits of the planets, particularly by that of the moon. These points are of course shifting. The Dragon's Head is the point where the moon or other planet commences its northward latitude; it is considered masculine and benevolent in its influence. The Dragon's Tail is the point where the planet's southward progress begins; it is feminine and malevolent. The Dragon mystically is the "self-willed spirit," which is externally derived into nature by the "fall into generation" (Hermes Trismegistus).

The same fine, catholic nature—which in its preternatural exaltation appears so very precious in the eyes of the philosopher—is in the common world defiled; abiding everywhere in putrefactions and the vilest forms of seemingly sleeping, but in reality most active, forms of life.

According to Ennemoser, "Magiusiah, Madschusie," signified the office and knowledge of the priest, who was called "Mag, Magius, Magiusi," and afterwards "Magi" and
"Magician." Brucker maintains (Historia Philosophiae Critica, i. 160) that the positive meaning of the word is "Fire-Worshiper," "Worship of the Light," to which opinion he had been led by the Mohammedan dictionaries. In the modern Persian the word is "Mag," and "Magbed" signifies high-priest. The high-priest of the Parsees at Surat, even at the present day, is called "Mobed."

The mythic figure placed in the front of the Irish Harp—the meaning of which we have explained in a previous part of our book, and which is now represented as a woman with the lower parts twined as foliage, or as scrolls, into the body of the harp—is properly a Siren. This "Siren" is the same as Venus Aphrodite, Astarte, the Sea-Deity, or Woman-Deity, the Dag, Dagan, Dagon, or idol of the Syrians, Tyrians, or Phoenicians: hence her colour is green in the Iona, Ierne, or Irish acceptation. The woman or virgin of the Irish Harp, who is impaled on the stock or "Tree of Life"—the Siren whose fatal singing means her mythic Bhuddistic or Buddhistic "penance of existence"—the Medusa whose insupportable beauty congeals in its terror the beholder to stone, according to the mythologists—this magic being is translated from the sign of Virgo in the heavens, and sent mythically to travel the verdant line of beauty, or the cabalistic bene dicta linea viriditatis. The whole of the meaning is, notwithstanding, "sacrifice." The Woman of the Harp of the Seven Strings, or the seven vocables, vowels, or aspirations, or intelligent breathings, or musical notes, or music-producing planets (in their progress), is purely an astrological sigma—although a grand one—adopted into heraldry. In the old books of heraldry, the curious inquirer will find (as will all those who doubt) this "Woman" or "Virgin" of the "Irish Harp"—to whom, in the modern heraldic exemplification, celestial
wings are given, and who is made beautiful as an angel (which in reality she is, the other form being only her disguise)—represented as a dragon with extended forked pinions, and piscine or semi-fish-like or basilisk extremity. There is a wonderful refluent, or interfluent, unaccountable connection, in the old mythology, between the "Woman," the "Dragon" or the "Snake," and the "Sea:" so that sometimes, in the obscure hints supplied in the picturesque ancient fables, it is really difficult to distinguish one from the other. The associations of an interchangeable character between dark and light, and "Dragon" and "Hero," ascribing to each some mystic characteristic of the other, cannot be all fabling accident. There are hints of deep mysteries, transcendent in their greatness and beauty, lying under these things in some concealed, real way. To bring these to the surface, to discover their origin, and, to the justifiable and guarded extent, to assign them properly, has been our aim. There must have been some governing, excellent armorial reason, special and authorised, for the changing of this first figure of a dragon into a woman, or a siren, or virgin, on the Irish Harp; and this fact assists the supposition of an identity, at some time, of these two figures, all drawn from the double sign "Virgo-Scorpio" in the Zodiac. There is a strange confirmation of the account of Creation in the Book of Genesis, in the discovery of the "Woman and Snake" in the most ancient Babylonian or Chaldaean Zodiac. The Indian zodiacs and the Egyptian zodiacs repeat the same myth, slightly varied in certain particulars. The different versions of the story of the Temptation and Fall, in the main respects, are the same legend, only altered to suit ideas in every varying country. Traversing all the long-descended paths of the mythologies, this singular, but in reality sublime, myth preserves its
place, and recurs up to the last in its identity. The first chapter of Genesis seems to us to be clearly found here in the signs of the Zodiac; which we know are derived from the earliest astronomical days, and which extraordinary hieroglyphical zodiacal figures descended originally from the summit of the famous Tower of Bel, or Belus,—the first observatory where the movements and the story of the stars were at the outset noted, and handed as from the earliest expositors of the secrets of the heavens. This "Procession of Twelve" (in the origin it was the "Procession of Ten"), under the name of the Zodiac, tells, in its "signs," the history of the making of the world, according to the Chaldeans and Egyptians, and also, in the hidden way, according to the account in the Bible.

As the little and the large have sometimes a closer connection than is ordinarily supposed, we will pass on now to some more familiar and commonplace examples.

It may be worth while to dwell with greater minuteness on the little-understood origin of those light auxiliary troops, as they were organised originally, the modern Hussars. This irregular, lightly equipped European cavalry plays an important part as a skirmishing or foraging force. We are all accustomed to see the elegantly appointed light cavalry called Hussars, and doubtless many persons have frequently wondered as to the origin of that dolman, pelisse, or loose jacket, which is worn, contrary to all apparent use, dangling—an incumbrance rather than a cover or defence—on the trooper's left shoulder. This pelisse, richly embroidered in the Eastern fashion, is always the genuine distinctive mark or badge, with the Wallachian, or Hungarian, or Oriental busby of the Hussar. The precise time when this originally loosely disciplined and heathen soldiery came
into Europe is not fixed. They now form a dazzling and formidable branch of light-cavalry service everywhere. All armies of modern time possess regiments of Hussars. They came originally from Tartary and the East, and they brought with them their invariable mark,—the rough fur cap, or Ishmaelitish or "Esau-like" black head-cover. They adventured into the West with the now thickly ornamented and embroidered "trophy," called the pelisse or skin-coat ("pel," from pellis, "skin;" thence "pall"). This pelisse is an imitation or reminder, and is the very remote symbol, or garment, or "cover of shame," as it is called, with which, for very singular cabalistic reasons (which, however, do not admit of explanation), the two dutiful sons of Noah covered and "atoned" for that disgrace of their father, when, after he had "planted a vineyard, and had drunken of the wine, he lay extended in his tent," and was seen by his son Ham; whom Noah denounced. The Hussars (under other names) were originally Eastern, Saracenic, or Moslem cavalry. The horse-tails and jingles, or numberless little bells, which ought to distinguish the caparisons of Hussars to the modern day, and which are part of the special insignia of their origin, are all Oriental in their character, like the bells of the wandering Zingari, "Morris," or Moresque, or Gypsy, or Bohemian fantastical dancers. Deep-lying in the magical ideas of the Eastern peoples was the sacredness, and the efficacy against evil spirits, of their small bells, like those of the Chinese pagodas. All bells, in every instance, even from the giant bell of the Dom-Kirche or Duomo, or the cathedrals of Kasan or Casan, Moscow, or Muscovia generally, down to the "knell," or the "sacring" or warning bell of the Romish Mass (which latter "signal" has a signification overpowering in its profundity), are held to disturb and to scare and drive
off evil spirits. These were supposed, according to the old superstitious ideas, to congregate thickly, with their opportunities either in the din of battle to impair invisibly the exertions of the combatants, or in the church to spoil the Eucharist, by tempting the celebrating priest, or hampering or hindering the ceremonial and its triumphant climax.

The Eastern name of Venus is *Al-Huza* or *Husa*, which stands for the Egyptian "Divine Woman," or Isis. *Al Huza* means the hyacinth, acacia, or lily, sacred to the "Woman," or to the productive powers of nature. The word "Hussar" comes, through circuitous paths of translation, from its origin *Al-Husa*. These Hussars are the alert, agile, armed children, or soldiers, of Cybele. It is well known that the knights of old—particularly the Crusaders when they returned to the West—adopted the Oriental fashion of covering their appointments and horse-furniture with bells, the jingle raised by which, and at the same time the spreading or flying out, in onset, of the *lambrequin* or slit scarf attached to the helmet, with the shouted war-cry, or *cri de guerre*, struck terror into the opposed horse and rider. Naturalists suppose that even the spangled tail of the peacock, with its emerald eyes, answers a similar purpose, when spread out, of frightening animals who intend an attack. The knights, therefore, may have borrowed the hint of thus startling their foes, and of confusing them with the sudden display of colours and disturbing points,—as if sprung from a spontaneous, instant, alarming centre,—from the peacock when startled by an enemy. The bird has also his terrifying outcry, similar to the knight's *mot de guerre*, or individual "motto."

The Hebrew Priests were directed to fringe their garments round about with "bells and pomegranates," in
the words of the text. The use and intention of these "bells and pomegranates" have been subjected to much discussion, particularly a passage which we now cite:

"A golden bell and a pomegranate, a golden bell and a pomegranate, upon the hem of the robe round about. And it shall be upon Aaron to minister: and his sound shall be heard when he goeth in unto the holy place before the Lord, and when he cometh out, that he die not" (Exodus xxviii. 34, 35).

The reason supposed in the Targum for the directions given to the priest in these two verses of the chapter containing the law is, that the priest's approach should be cautious to the innermost "Holy of Holies," or sanctuary of the Tabernacle. The sound of the small bells upon his robe was intended to announce his approach before his actual appearance, in order to recall the attention of the "Angel of the Lord" to the fact of the coming of a mortal, so that He who was supposed to be descended, and possibly "brooding" (to make use of the words of Genesis), in the secret shrine or penetralia, might be allowed time (according to the ideas of men) to gather up and concentrate His presence—which "no man can be permitted to behold and live"—and to withdraw. For the Divinity to be seen by the profane eye is annihilation to the latter; therefore the gods and all spirits have, in every account of their appearance, been seen in some worldly form, which might be acceptable to, and supportable by, a human face. There is, theoretically, such contrariety, and such fatal difference to man, in the actual disclosure of a spirit, that it is wholly impossible except by his death; therefore spirits and divine appearances have always been invested in some natural guise, by the medium of which the communication, whatever it might be, might
be made without alarm. This alarm would, by the disturbance in the mind, and the possible fatal effect, otherwise have rendered the disclosure impossible. The denial of the interior parts of a sanctuary, or adytum, to the priests of the temple, or even to the chief hierarch sometimes, is supposed to have arisen on this account. Mythological story is full of the danger of breaking in unpreparedly upon spiritual presences, or of venturing into their haunts rashly. The real object and purpose of the veil to the Hebrew Temple, and of the curtains and enclosures ordered in the Jewish ceremonial arrangements, are certainly of this class. Thus, in the idea that God did really pass down at chosen times from Heaven, even in a possible visible shape, to His Altar (though not, perhaps, in the shape expected by man in his ignorant notions), the sacred place was carefully shut in, and all access to it set round with rigid caution. There is fine and subtle meaning in that old expression in Genesis, “to brood,” as if to be fixed or rapt, and thus to be self-contained and oblivious, even inattentive. The ancients—the Greeks especially—constructed their temples originally without roofs, in order that there might be no obstacle interposed by them to the descent of the God to the temple which was especially raised in his honour. He was imagined, at favourable opportunities, to descend—either visibly or invisibly—into his appropriate temple; and it was not to seem to exclude, but rather in every way to invite straight from the supernal regions, that the ancients left open the direct downward way to the penetralia. From this sacred point, when the God was supposed to be present, every eye, even that of the High-Priest, was shut out. The covered temple, or the ceiled temple,—of which the chapter-house, or particular temple, with a “crown,” or “cap,” or “cover,” presents the
small example,—is the *domus templi*, or *domus Dei*, where the "Manifested God" is supposed to be enclosed, or wherein the "Man is made Flesh,"—the microcosmos or spirit within his cinctures, or walls, or castle of comprehension, or of senses.

Mystic Cross or "Anchor."
CHAPTER THE LAST.

ASTRO-THEOSOPHICAL SYSTEM OF THE ROSICRUCIANS—THE
ALCHEMIC MAGISTERIUM.

The letters of all languages are significant marks or symbols, which have the “Twelve,” or rather the original “Ten, Signs” of the “Zodiac” for their beginning. Of these letters there is a certain group which has, in the characters of all languages, a hieroglyphical reference to the originally single, and afterwards double, sign, “Virgo-Scorpio,” which is supposed to give the key to the secret or cabalistic “Story of Creation.” These letters are S and Z, L and M; or rather a group, which is marked by Λ, Π, Μ, Λ, Σ, Ζ—L, M, V, W. The significant aspirates, or “vowel-sounds,” follow the same rule. The “Snake-like Glyph,” or disguise, in which the “Recusant Principle” is supposed to have invested himself, has coiled (so to say), and projects significant curves and inflections, through all this group of letters and sounds; which is perceivable, by a close examination and quick ear, in all languages, living and dead. The sigma presents itself to the eye (that recognises) in the Hebrew, the Sanscrit, the Persian, the Arabic, the Coptic, the Old Gothic, the Georgian or Iberian, the Ancient Armenian, the Ethiopic or Gheez,
the Slavonic, the Greek, the Latin, the Samaritan, the Irish, the Etruscan,—of all which alphabets, and the symbols serving for their "numerals," we had prepared a comparative table, to prove the identity of the sign "Virgo-Scorpio" and its ciphers; but we forbore in deference to our limits, which did not advisedly admit of the addition.

A comparative display of all marks or symbols which give occult expression to the "female side of nature," and its astronomical and astrological signs, affords the same result of identity. The marks of the "signs" \( m_l \) and \( m_r \), and their ciphers, are interchangeable, and reflect from one to the other. It must be remembered that the sign "Libra"—our modern September—the "hinge-point" or "balance-centre" of the two wings of the celestial Zodiac—was an addition by the Greeks. Here, according to the Sabæan astrological tradition, the origin of "Good and Evil," of the malific and the benevolent "cabalistic investments of nature," the beginning of this "two-sexed," intelligent sublunary world, were to be found—all contained in the mysteries of this double sign.

The cabalistic theory, and the Chaldaean reading, is, that the problems of the production of the sensible world are not to be read naturally, but *supernaturally*. It was held that man's natural law is contained in God's magical law. It followed from this that present nature is secondary nature: that man is living in the "ruins" of the angelic world, and that man himself is a "ruin." Man fell into the degradation of "nature" as the result of the seduction by the woman (to sexual sin), which produced the "generations" according to Man's ideas. The strange theories as to the history of the first world prevalent among the Cabalists imply that the appearance of "woman" upon the scene was an "obtrusion," in the sense of a thing unintended. Thus her
advent upon the scheme of creation—to use one of their mysterious expressions—was at a late and evil period of the world, which had sunk from the “supernatural” into the “natural.” As woman had no part in the earliest world, and as her origin was altogether of another nature from that of man, the traces of her introduction, and the hints as to her true character, are to be found mysteriously in the original sign, “Virgo-Scorpio,” double-sided (yet identical) at first, but afterwards divided. These divided “personalities” were set thereafter in mythologic opposition. The reader is referred to the Zodiac on p. 65, fig. 12, where will be found the diagram illustrative of this idea, which was originated amidst the magic of the Syro-Chaldæans; it yet remains the key to all the mythologies.

The sign “Virgo-Scorpio” stands in the present order of things, or in this non-angelic or mortal world, as a divided sign, because in the “World of Man”—as “born of Woman”—enmity has been placed between the “Snake” and the “Woman.” Thenceforth, from the “Fall,” and as a consequence of it, they are in opposition. The sign of the “Balances” is placed between, as the rescuing heavenly shield, miraculously interposed, separating, as the tremendous “Ægis,” the two originally conjoint signs, and simultaneously presented “both ways” (to speak in figure), defending “each from either”—“until the time shall be complete!”—which means the Apocalyptic “New Heaven and New Earth.”

Marks, movements, or influence from the side of “Scorpio,” or from the sinister side, are malign, and mean danger; because they represent the “Old Serpent,” or, in other terms, the “Great Deep,” or “Matter.” Of such character are the letters “S” and “Z,” and all their compounds; because this originally “single” sound, or letter

ASTRO-THEOSOPHIC CHART. (No. 2.)

EASTERN OR GREEK RITE.

PROCESSION OF THE "LOGOS," OR "WORD," ACCORDING TO THE GNOSTICS.

"MYSTERIUM."

"Concludimus itaque, cum Trismegisto, mundum esse Dei imaginem, homino vero mundo, et quod per consequens propter suam cum mundo similitudinem, homo haud improprie mundus minor seu microcosmus dicendus, et in omnibus more mundi majoris seu macrocosmi sit consideramus."

"Tertius Parvus μικρόκοσμος. Ipse in tres distinguetur caelos (quae hic præsertim de interno est)."

Robertus de Fluctibus (Robert Flood, or Fludd), Rosicrucian.
"S-Z, Z-S," came into the world representing its sinful side. Man is pardoned through the "Promise to the Woman," and "Woman" is saved because through her the "Saviour of the World," or the "Rescuer of the World," or the "Deified Man," came into the world. Woman has the intermediate office of reconciling and consoling. In the abstract sense, as "virgo intacta" (or holy means), woman is free and unconscious of that deadly "Original Sin," which, as the disobedience to the Divine Command (to refrain from that "Fruit" with "Eve," or with the "Natural Woman"), lost "Man" his place in the scheme of the "Immortal World." All this is part of the cabalistic view of the Mysteries of Creation. The Cabalists say that the "Lost Man" Adam should not have yielded to those irresistible fascinations of Eve, but should have contented himself—to speak in parable—with "his enjoined, other impersonated delights," whom he outraged in this preference, winning "Death." This is of course obscure, because it is a part of the secret, unwritten Cabala, never spoken in direct words.

In the views of the refining Gnostics, woman is the accidental, unknowing "obtrusion" upon the universal design. The ideal woman (as "ideal virgin") is spiritually free from the curse and corruption of things material. From these ideas came the powers superstitiously imagined to be possible in the virgin state, and to virgin woman.

All the marks and forms connected with these proscribed letters "S" and "Z" have, on their material and worldly side, the character of charms, sigils, and talismans, in the evil sense, or dark sense. They were supposed to be means of magic by the old soothsayers. The celebrated Lord Monboddo produced a very elaborate treatise—quite contrary to recognised ideas—to show that speech was not
natural to Man, but that language was a result of the Primeval Fall, and that the punishment of Babel signified the acquisition of the tongues, and not the "confusion of language."

A general display of the "Esses" (S.S.) and the "Zeds" (Z.Z.), and their combinations and sounds in all languages, would result in a persuasion of their serpentine origin. The forms of these snake-like glyphs and their cursive lines in all the alphabets will, on examination, present the same suspicious undulation. These letters have an intimate refluent connection with all the signs which mean the "Sea," the "Great Deep," "Matter in the abstract," or the "Personified Receptive Feminine Principle," which eventually is to be the Conqueror of the "Dragon" or "Enemy." We thus desire to show the unity of the myths and the forms made use of for the expression of religious ideas in the glory of "Woman."

We wish the reader to take notice that the above singular notions are in no way shared by us, further than as occurring in our account of some of the strange reveries of the "Illuminati" or "Gnostics;" due, therefore, in our comments.

"I will put enmity between thee and the woman, and between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel" (Genesis iii. 15).

A careful and critical inspection of all the alphabets or letter-forms, whether cursive or fluent, or rigid and rectangular,—as in the Greek, and still more obviously in the Latin,—will show that certain ideas are expressed pictorially in them. Two principal ideas seem to be furtively suggested. These are the upright or phallus, and the cross-line or "snake," whether the horizontal be undulated or direct. In the Greek letters these ideas make the form. The first
letters, according to the Cabalists, were the original "Ten Signs of the Zodiac," which contained mythologically the history of the "making of the world." These "Ten Signs" afterwards multiplied and produced other broods of letters, some of which were the cuneiform and early tree-like alphabets. There seems to be an "event" symbolised, or pictured, in the alphabets. This mystic idea, which is hidden in the hieroglyphics called letters, is supposed by the more profound of the Talmudists to be the introduction of "Man" into the world, through the very fact of his "Fall," or as arising through the "Temptation," the chief efficient in which is the "Snake." Thus every letter is an anagram of "Man, Woman, and Snake," in various phases of the story. Each letter has embodied in it the "Legend of the Temptation," and conceals it safely in a "sign."

"Ut omnia uno tenore currunt, redeamus ad mysticam serpantis significationem. Si igitur sub serpantis imagine Phallicum Signum intelligimus, quam plana sunt et concinna cuncta pictura lineamenta. Neque enim pro Phallo poneretur Serpens nisi res significata cum typo accurate congrueret" (Jasher, editio secunda, p. 48).

The late Dr. Donaldson has a dissertation upon the word שדנ, which is translated "heel" in Genesis iii. 15. He adduces Jeremiah xiii. 22, and Nahum iii. 5, and, comparing the words made use of in the original, shows that the "heel" is a euphemism, as are the "feet" in Isaiah vii. 20. His exhaustive argument demonstrates that the part intended to be signified by the word is pudenda mutiae. The whole proves the extreme importance—in the mythical and magical sense—of this unexpected figure, and throws quite a new philosophical light on it. These views fortify completely our Rosicrucian explanation of the origin of
CONQUEROR OF THE DRAGON.

the Order of the Garter, and other kindred subjects, fully discussed in our book. This significant connection of the two figures—the phallus and the discus—explains the text in Genesis i. 27, "Male and Female created He them,"—i.e. gladius, "sword;" sheath. In this latter word, the part which characterises the female is used for the woman herself. Qv., in this connection, Kebah ("case," or "container," or "deep"), the Caaba at Mecca, and Keb or Cab, standing for Cabala, Kabbala, Gebala, Kebla, or "Ark," or "Mystery"—the grand central point of all religions?

A modern learned writer, Thomas Inman, M.D., gives the following as an interpretation of the passage, "Thou shalt bruise his head, and he shall bruise thy heel." "Gloriam fascini congressio tollit et caput ejus humile facit, sed infliget injuriam moritura mentula, quum impregnationem efficit et uteri per novas menses tumorem profert." This may explain the reason why the cube of the Phrygian Cap, in the ancient sculptures of the "armed female," is worn in reverse, or at the back of the head, as shown in figs. 207 and 208, p. 276.

The celebrated philosopher, Petrus Gassendus, assailed the system of Robertus de Fluctibus, or Robert Flood, and criticised it at great length, in his work entitled Examen in quod Principia Philosophiae Roberti Fluddi, Medici, reteguntur, published at Paris in 1630. But he never really seized the spirit of Flood's system, and he wasted his force. He did not comprehend the Rosicrucian views with the largeness of insight of a man of great critical powers, which Gassendus otherwise undoubtedly possessed. Gassendus, however, was a prejudiced theologian, and was ill-calculated for a disquisition upon a philosophy so remote and subtle. Before an insight of greater depth, of more readiness, and less ob-
stinctly, the difficulties presented by Flood melt away, even converting into new proofs. His exhaustive logical positions—indeed, the necessity of his theorems—are soon recognised by an investigator, when he shakes off trammels and clears himself of prepossession. But a rapid and complete philosophical grasp, extraordinary in its decision, is indispensable. Flood’s system is profound, shadowy, difficult, and deep-lying. Short of consummate judgment and clear mind in those to whom they are submitted, Flood’s ideas, in their very strangeness and apparent contradiction, startle and bewilder, because they contradict all the accepted philosophies, or at least their conclusions, and stand alone. The ordinary recognised knowledge, heired from the current accumulation, opposes him. Flood’s deeper teaching, by its very nature, and through the character of those from whom it sprung, is secret, or at all events evading, where the knowledge is not wholly suppressed.

As an instance of the impossibility of accepting Flood’s ideas, if these were such, Gassendus charges him with a stupendous puzzle—that of passing the entire interpretation of Scripture over, not to the Mystics only, but to Alchemy. Gassendus asserts, as the opinion of Flood, that the key of the Bible mysteries is to be found in the processes of alchemy and of the hermetic science; that the mystical sense of Scripture is not otherwise explainable than by the “Philosopher’s Stone;” and that the attainment of the “Great Art,” or of the secrets which lie locked, is “Heaven,” in the Rosicrucian profundities. Old and New Testament, and their historical accounts, are alike hermetic in this respect. The “Grand Magisterium”—the “Great Work,” as the alchemists call it—is mythed by Moses in Genesis, in the Deliverance from Egypt, in the Passage of the Red Sea, in the Jewish Ceremonial Law, in the Lives of
the Patriarchs and Prophets,—such as Abraham, David, Solomon, Jacob, Job. In this manner the true Cabalists are supposed to be Alchemists in common with the Magi, the Sages, Philosophers, and Priests, when these possessed the "true and only knowledge." The "Just Man made Perfect" is the Alchemist, who, having found the "Philosopher's Stone," becomes glorified and immortal by the use of it. To be said to "die," is when the material elements can no longer maintain themselves. To "rise," is when the immaterial life or spark is liberated out of its perishable investment. To be "glorified," is when the powers, or independence, are attained which properly appertain to the supernaturally perfect "Light," into which, like Enoch or Elijah, the Rosicrucian is transfigured, and in which he knows "all," can be "all," and do "all." It is this "draught of immortality" which enables him to assume what form he will, by passing through Nature as its master, and renewing his body by means of his art.

The adept stands in the place of Nature, and does that with the obstruction of matter—separating by dissolution the pure from the impure—which it takes unassisted Nature ages, perhaps, to effect. The alchemist is supposed to be superior to Nature to that extent, that he can pass through it (that is, through its appearances), and work on it, and in it, on the other side. It is here—in this true Anima Mundi, or "Soul of the World"—that the alchemist, or Rosicrucian, regathers the light dispersed out of its old broken forms. Gold is the flux of the sunbeams or of light, suffused invisibly and magically into the body of the world. Light is sublimated gold, rescued magically, by invisible stellar attraction, out of the material depths. Gold is thus the deposit of light, which of itself generates. Light, in the celestial world, is subtle, vaporous, magically exalted gold, or "spirit of
flame." Gold draws inferior natures in the metals, and, intensifying and multiplying, converts into itself. It is a part of the first-formed "Glory" or "Splendour," of which all objects and all souls are points or parts.

Gassendus asserts that when the Rosicrucians teach that the "Divinity" is the "Light" or the "Realisation of Creation," displayed from the beginning (∀) to the end (∅) of the whole visible or comprehensible frame, they mean that the Divine Being is not possible or existent, according to human idea, unless "He," or the "Original Light," is manifested or expressed in some special "comprehensible" other light or form. The "Second" reflects the glory of the "First Light," and is that in which the "First" displays. This second light, or Animà Mundi, is "Manifestation," or the "Son as proceeding from the Father." This synthesis is the light, breath, life, aura, or Sacred Spirit. It is the solar or golden alchemical soul, which is the sustainment and perfection of every thing. All lies between hermetic rarefaction and condensation,—mortal and spiritual both.

"Is not the Devil the 'Deep Darkness,' or 'Matter'? the 'terra damnata et maledicta,' which is left at the bottom of the process of the Supreme Distiller, who condenses and evokes the 'Light' from out of it? Is not 'Lucifer' the 'Lord of the False Splendours of the Visible World'? Can the Prince and Ruler of this Relegate or Lower World soar with his imitations? Can the 'Adversary' pass into the 'Region of Light'? Can he rise anew to combat in that Heaven where he has already encountered the 'Mighty Ones' who have driven him down; and can he there spread again, like a cloud, his concentrate darkness?" The Cabalists and Talmudists aver that Scripture, history, fable, and Nature, are alike obscure and unintelligible without their interpretation. They aver that the Bible is the story
of heavenly things put forward in a way that can be alone comprehensible by man, and that without their Cabala, and the parables in which they have chosen to invest its revelation, not religion only, but even familiar Nature, is unintelligible.

It has been a common opinion, and it so remains, that there is no such thing as the Philosopher's Stone, and that the whole history and accounts of it are a dream and a fable. A multitude of ancient and modern philosophers have thought otherwise. As to the possibility of metals transmuting from one into the other, and of the conversion of the whole into gold, Libavius brings forward many instances in his treatise *De Natura Metallorum*. He produces accounts to this effect out of Geberus, Hermes, Arnoldus, Thomas Aquinas (*Ad Fratrem*, c. i.), Bernardus Comes, Joannes Rungius, Baptista Porta, Rubeus, Dornesius Vogelius, Penotus Quercetanus, and others. Franciscus Picus, in his book *De Auro*, sec. 3, c. 2; gives eighteen instances in which he saw gold produced by alchemical transmutation. To those who allege the seeming impossibility, he rejoins, that difficult things always seem at first impossible, and that even easy things appear impracticable to the unskilled and unknowing.

The principles and grounds for concluding that there may be such an art possible as alchemy we shall sum up as follows. Firstly, it is assumed that every metal consists of mercury as a common versatile and flexible base, from which all metals spring, and into which they may be ultimately reduced by art. Secondly, the *species* of metals, and their specific and essential forms, are not subject to transmutation, but only the individuals; in other words, what is general is abstract and invisible, what is particular is *concrete* and visible, and therefore can be acted upon. Thirdly,
all metals differ, not in their common nature and matter, but in their degree of perfection or purity towards that invisible "light" within every thing, or celestial "glory" or base for objects, which has "matter" as its mask. Fourthly, Art surmounteth and transcendeth Nature; for Art, directed upon Nature, may in a short while perfect that which Nature by itself is a thousand years in accomplishing. Fifthly, God hath created every metal of its own kind, and hath fixed in them a principle of growth, especially in the perfect metal gold, which is the master of the material, and which in itself has magnetic seed, or magic light, an unseen and heavenly power, unknown in this world, but which can by art be evoked, be made to inspire and multiply and take in all matter.

It is said of the alchemical philosophers, that no sooner did they attain this precious "Stone" or "Power," than the very knowledge of it, in its magic surprise, delighted them more than aught that the world could give. They made greater use of it in its supernatural effects upon the human body than in turning it upon the base matter, to make "gold" of this latter. And in answer to those who would ask what was the reason that those supposed greatest of all philosophers did not render themselves and their friends rich by a process so speedy and thorough, it was rejoined, that they wanted not, that they were satisfied in the possession of the ability, that they lived in the mind, that they rested in theory and declined practice, that they were so overcome and astonished at the immensity of the power accorded by God's grace to man, that they disdained to become gold-makers to the greedy, or suppliers to the possibly idle needy, and that they were afraid to be made the prey and sacrifice of avaricious, cruel tyrants; which would be but too surely their fate if they were, through vain-glory,
or temptation, or avoidable force, to make known their wondrous gifts.

Therefore these conclusive reasons, and others similar, impelled the Society to hide from the world, not only their stupendous art, but also themselves. They thus remained (and remain) the unknown, "invisible," "illuminated" Rosicrucians, or Brethren of the Rosy Cross; regarding whose presence and intentions no one knows any thing, or ever did know any thing, truly and in reality, although their power has been felt in the ages, and still remains unsuspectedly conspicuous: all which we think we have in some measure proved.
