In Occult Science

the Celestial Planetarium and Phrenological Chart, with calculations and written explanations, given herein, conveys more true scientific information concerning the relationship existing between a human being and universal law than has ever been done before by all other methods combined.

An examination of the cranium not necessary; date of birth, place of birth and nationality only required.

This method shows the positions and powers of the planets in our solar system at the time of birth, when the universal magnetic stamp is placed by infinite law upon each human organism; explains the significance of the same and the phrenological developments resulting from their various combinations, and average strength at the time.

The cause and nature of all diseases and how to cure them is one of the greatest benefits to be derived from this science.

BUSINESS.

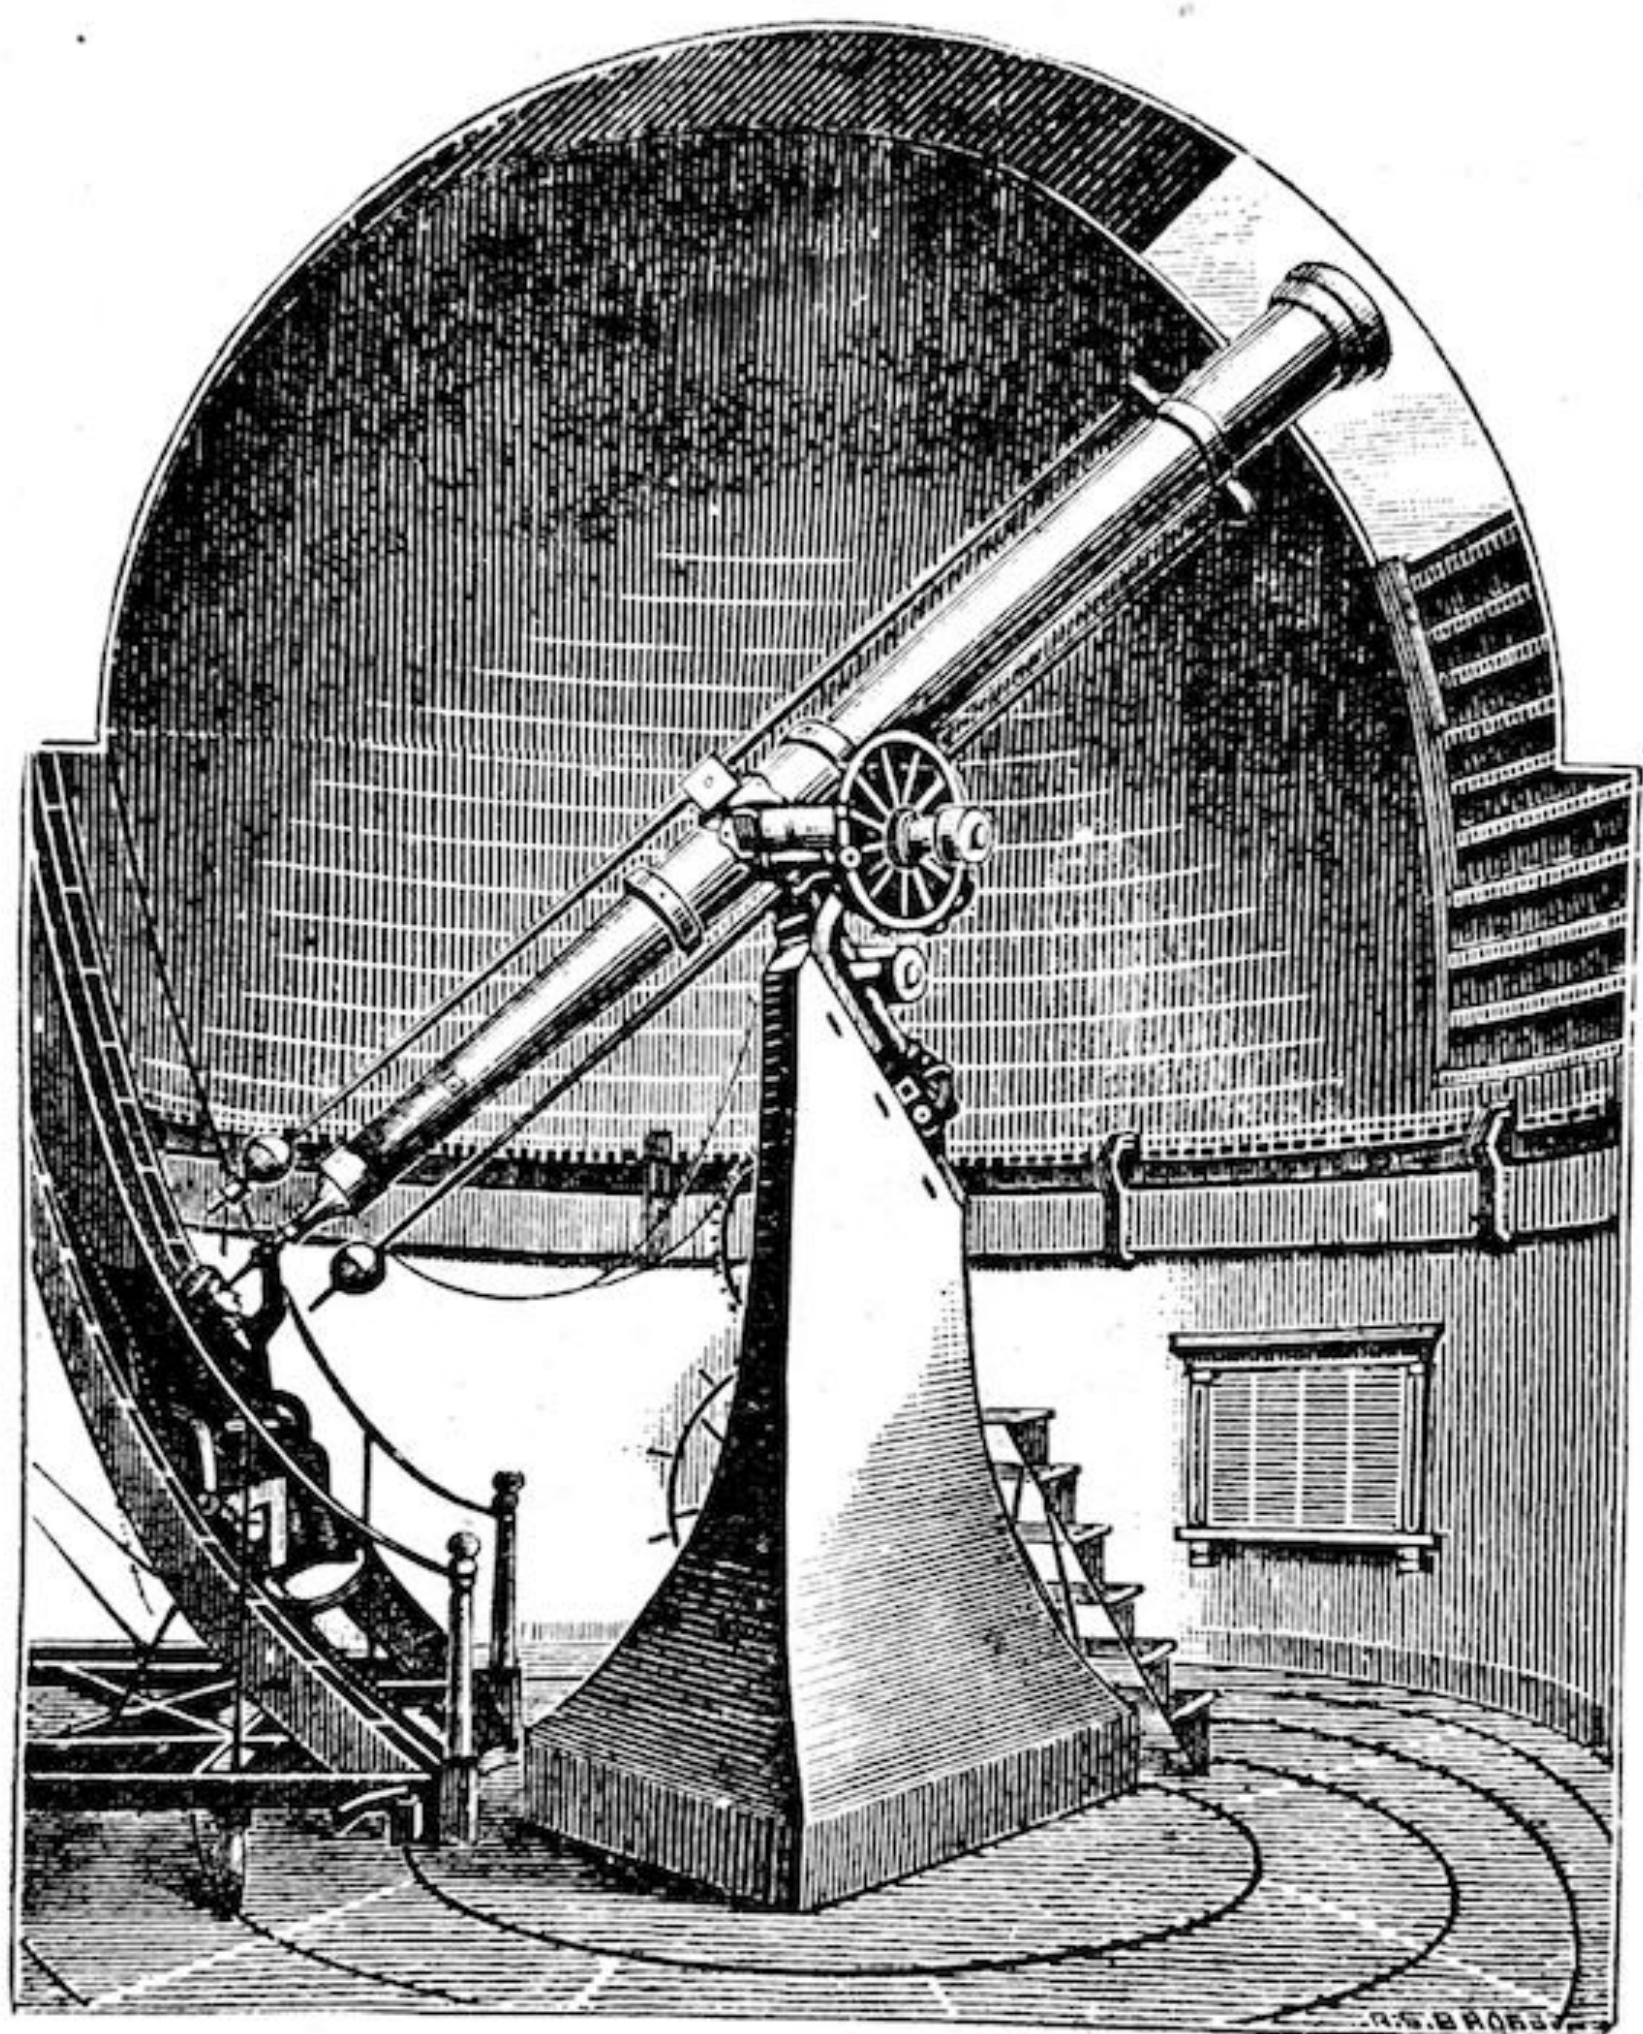

Every child, as well as every adult person on the globe, should know what they are best adapted for in this great field of labor. They should know whether they are capable of making a success in the line they are already started in, and if not yet old enough to begin their business career they should be directed to lines best suited to their natures, for all have their true sphere in which they may enjoy life at its best and make for them the greatest possible success.

All this information simplified, condensed and brought within the reach of all. "Knowledge is power."
"Get wisdom."

Introduction...

In placing this little pamphlet freely before the world I feel that the time is ripe for a great many people to become interested in the universal law of life, which has been well known by many in past time and is known to a few at the present time.

After many years of hard study, experiment and practice, I have concluded to give to humanity the benefit of my experience in as brief and clear a manner as possible, and as all people born into the world at different times are governed differently, causing all of that diversity which we see in human nature, it is only possible to do so by demonstrating the existence and potency of the powers and forces that govern us, to each individual.

Some people seem to be born healthy and rich, some healthy and poor, some sickly and rich, while others are sickly and poor.

NOW STOP AND THINK.

Is there a cause for being rich ?

Is there a cause for being poor ?

Is there a cause for being healthy ?

Is there a cause for being sick ?

THERE CERTAINLY IS.

The underlying cause of all is the universal fixed and eternal law that governs all planetary as well as all human bodies. This law was well understood in ancient times. The Atlantians, the Egyptians, the Persians and other people were versed in its wonderful operations upon the lives of human beings, and many predictions were made through their knowledge of mathematics in connection with their understanding of astrological science and their application in determining the destinies of their people.

The pyramids' faint echo is the only evidence now extant, of the wonderful knowledge possessed by those wonderful people. They stand as a land-mark in the history of nations, and they show the present generation the possibilities and probabilities of its achievements in astronomical, astrological, mathematical and spiritual science.

The present Order of the Magi, established at No. 1910 Washington Boulevard, Chicago, is but the re-appearance upon the earth of some of those ancient Egyptian and Persian souls uniting in the great and grand work of *building up anew* the institutions of learning which for ages were the pride of all civilized nations and to which all writers, historians and scientists point with a feeling of awe and wonderment, of admiration and respect; for they feel that somewhere, at some time, great wisdom was possessed by an ancient people.

In passing through this ancient secret order, the

Order of the Magi, I gained much knowledge concerning the universal fixed and eternal law that governs and controls all planetary and all human organizations and bodies.

Through this little pamphlet you, reader, may be made aware of this law of life, and learn of its action upon your individual existence; showing you conclusively the causes of all your mental and physical states; the reason of your success or failure as the case may be. Through this medium I hope to inform many parents how to direct the lives of their children, by showing them their fitness for the duties of life.

The following are some of the points considered in calculating the life of a child: The general characteristics, including a celestial planetarium, showing the positions of the planets at time of birth; a phrenological chart, giving more clearly and correctly than can be done by any other method, the development of vital energy, soul force, physical strength, mental powers, and executive ability, in short, a thorough phrenological exposition of all the functions of the head, as well as all the physical characteristics of the body; showing the tendency toward disease and the nature of the same. Locating the point of attack is the only way to avoid all the ills that flesh is heir to.

People of mature years often wonder why they do not succeed better, why they are sick, and why this and that experience. The law of being alone explains it.

Many have been made aware of their condition and shown how to change and improve the same, for knowledge is power, and to know the law of your being is to know what you can do and how to go about it. So both old and young may be made to know and understand how to live, enjoy good health, and feel that the trials of life are at last overcome.

I have found in my practice that to cure disease is one of the simplest and easiest things in the world to do. The trouble has been the people—doctors, as well as others—have not been able to reach the cause of disease. They treat the symptoms and change the symptoms, but have a hard time to bring the patient into a state of health. This is all from ignorance of the law of being. I do not treat symptoms; I remove the cause, and symptoms disappear.

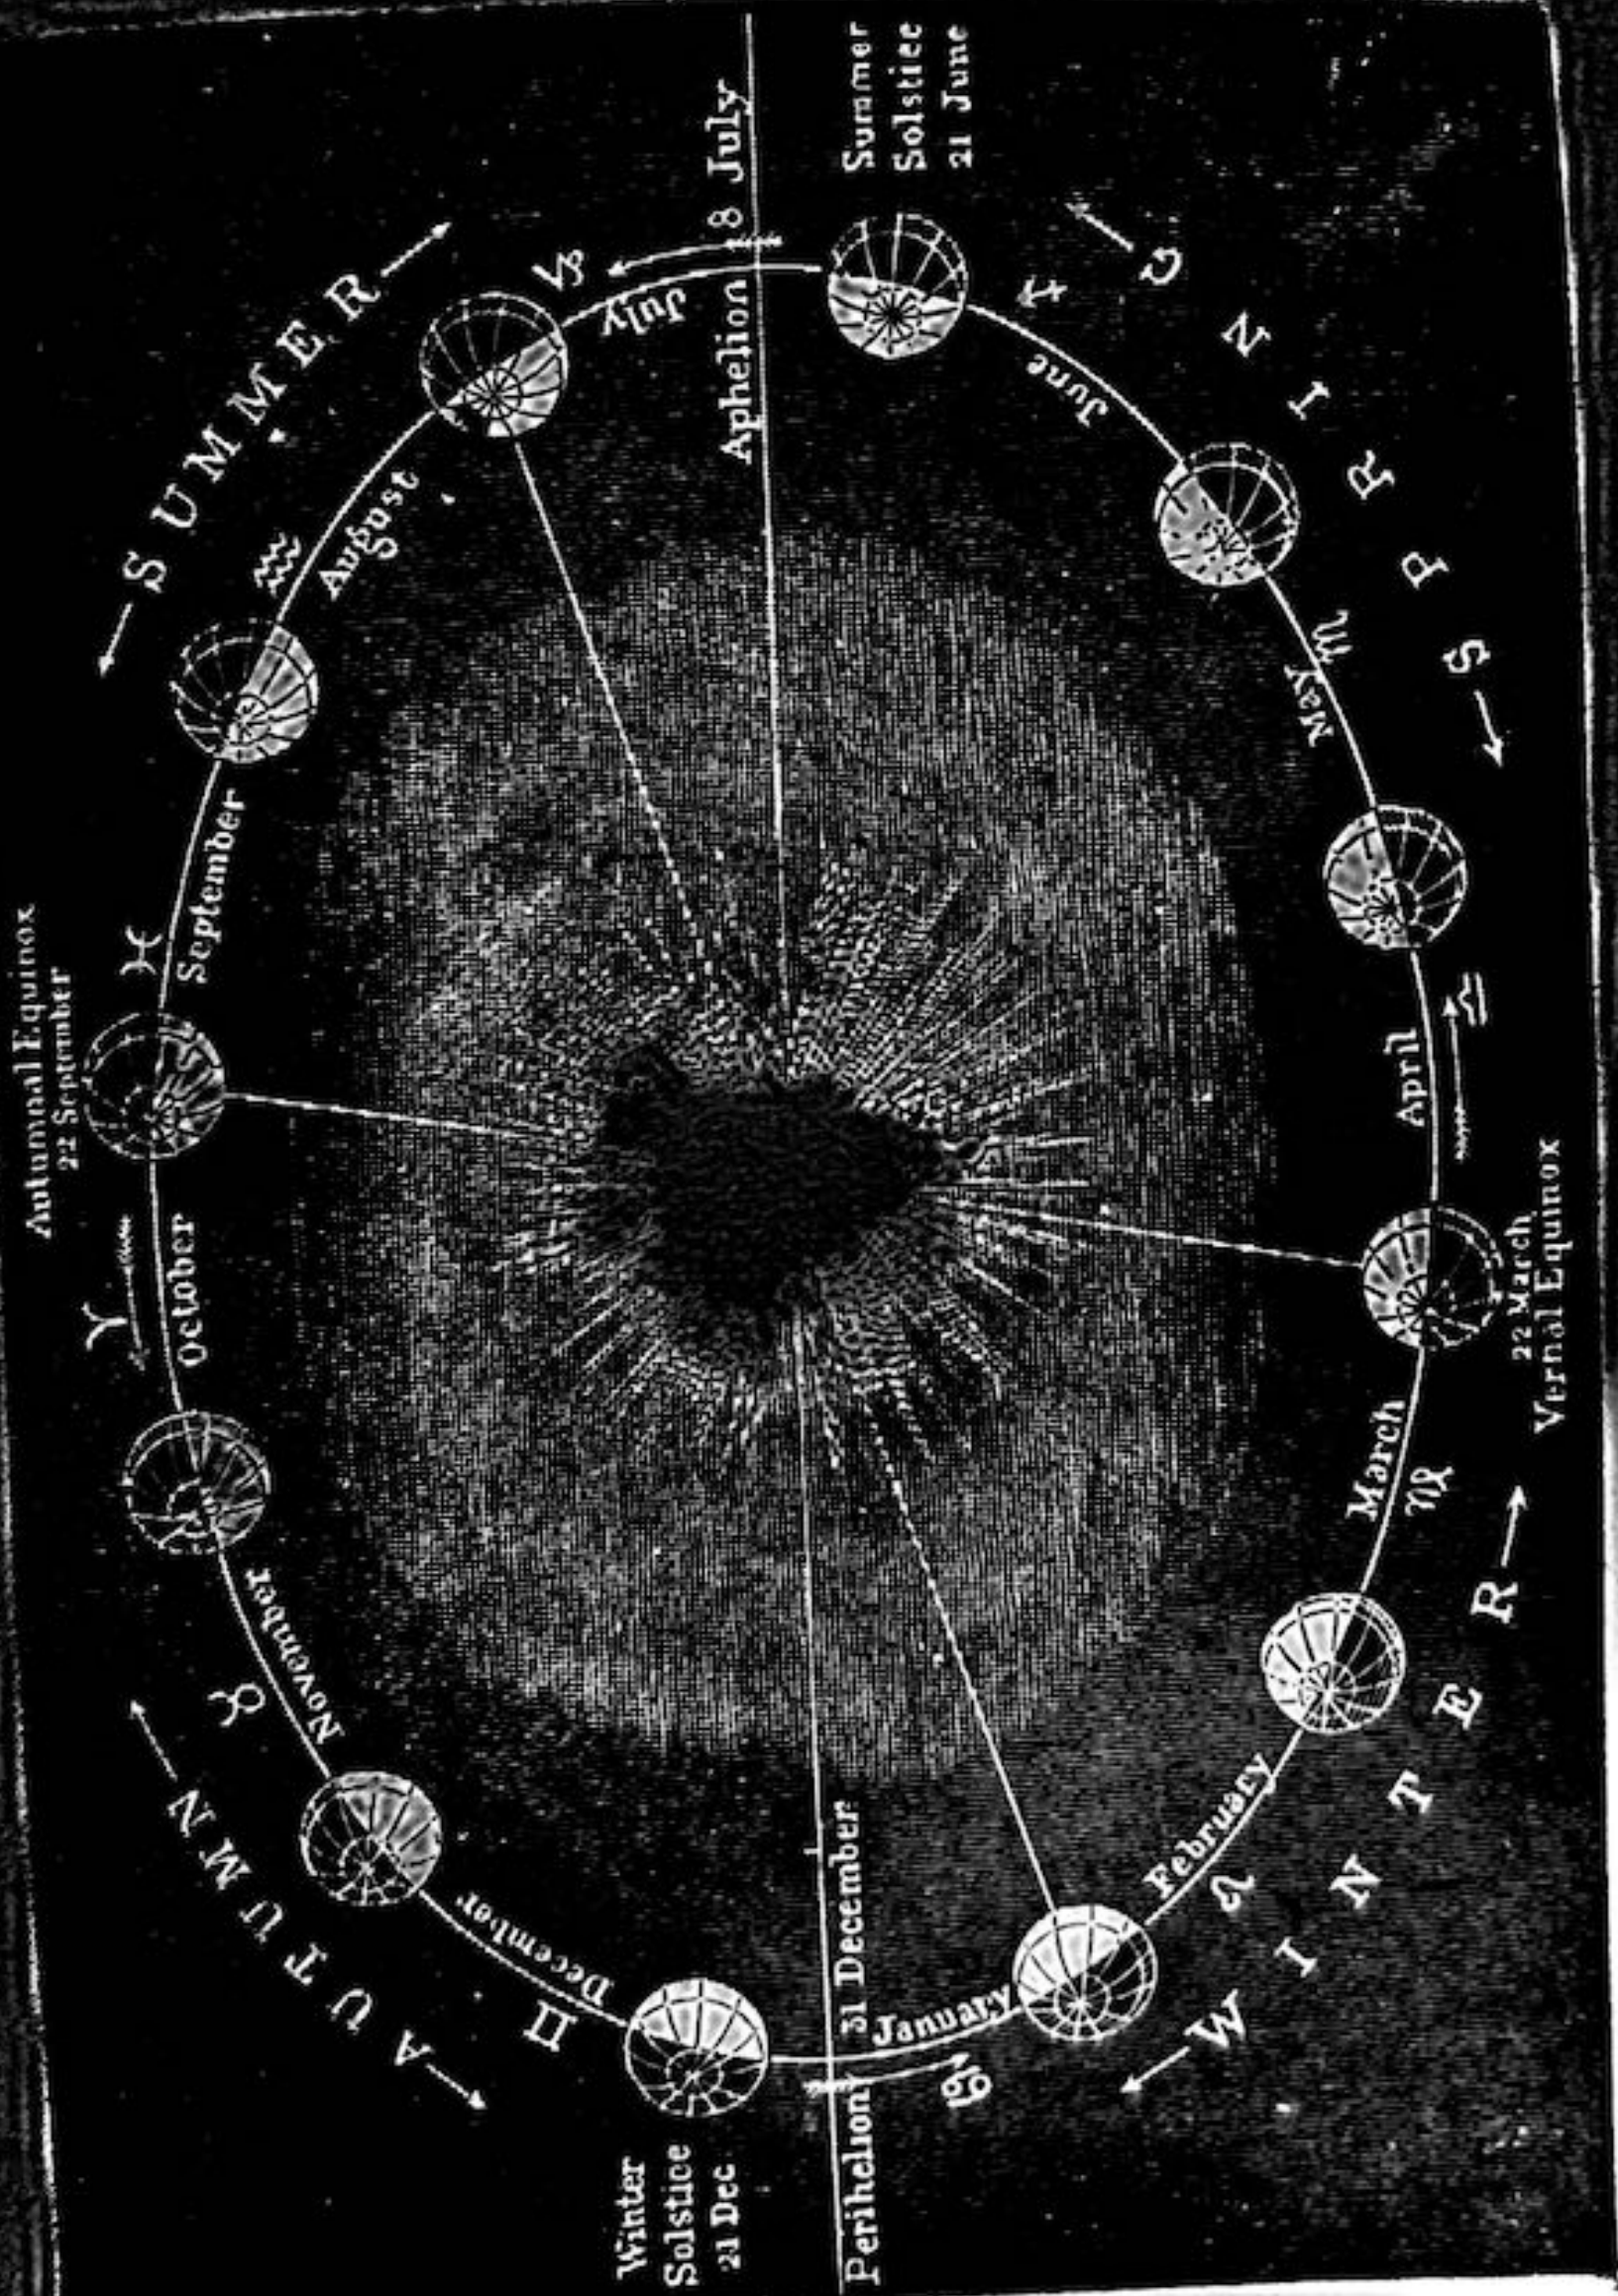

I am now prepared to write the law for those who seek to know the truth.

Yours for health,

The Significance of the Stars.

Showing the Characteristics Produced and Governed by the
Different Planets in our Solar System.

MERCURY

quickens and intensifies the action of all other bodies with which it comes into position with; is intellectual in effect upon human beings, furnishes the vital force that is necessary in business life, and fits people when well aspected, for literary work, orators, and executive official duties.

VENUS

governs the affections and harmonizes the physical organism. Her action is always for good, but people are often ruined through the trusting and yielding nature which she imparts to many, by her associations in certain positions with other planets.

MARS

is an intellectual planet, but a producer of quarrels and disturbances of various kinds. If you have a temper you cannot control, you should learn to ward off the vibrations that come from Mars. Strikes, duels and wars are the result of his action upon the lives of men.

JUPITER

is harmonious in his action upon both the mental and physical states and governs all monetary and business affairs in human life. Broad and comprehensive intel-

lectual growth results from Jupiter's vibrant force. People are successful or otherwise according to Jupiter's position in aspect with other bodies.

SATURN

is the cause of sickness, disappointments, inharmony and failure; but gives strong mental and spiritual powers when well aspected. Inward suffering and all physical weaknesses are the result of his vibrations. He interferes with business success. You should learn to rise above the powers acting from that source.

URANUS

is the labor planet and is not harmonious in speculation or general business. Is good and evil in effect, according to position and aspects. The psychic powers are found through the vibrations of Uranus. Clairvoyant sight is the result of a favorable position and aspect.

NEPTUNE

is a financial planet and controls commerce and travel to a great extent. Governments make treaties and adjust differences with foreign powers, or the reverse, according to position, power and aspect of Neptune and the other planets.

The combined action upon each life of all the planets will be written in part two.

Every one should have these forces under perfect control.

PART TWO.

In this part the combined action of all the planets is given, showing general characteristics, mental and physical conditions, the cause and nature of diseases,—in short a general life reading. Price, \$2.00.

PART THREE.

Devoted to healing by mental, magnetic and dietary methods. The only methods by which physical regeneration or absolute restoration to health is possible. General instructions or guide to health is given in this part. Many will be able to overcome their physical sufferings by having these calculations and written instructions, according to the nature of the case.

Price, \$2.00.

PART FOUR.

Business matters are here made plain; the hidden cause of success and failure thoroughly revealed, showing all people—old and young—where they belong and how they may succeed. Price, \$2.00.

INVESTMENTS.

Dates most favorable for action in business enterprises by the person for whom these calculations are made, during the current year, price \$5.00. You should do business when you are in the best condition to succeed.

SPECIAL AND PRIVATE.

Private instruction and advice given in matters of marriage and divorce. Parties contemplating marriage sometimes wish to know if the union will be agreeable, etc. As this is capable of mathematical demonstration the information is given for \$2.00. Date of birth of each interested party is required. The same rule applies to divorce as well.

The above rule applies also to parties entering into co partnership in business matters. It is well to know who you are engaging in business with, whether adapted to you or not. Success depends largely upon it. The information is given for only \$5.00. People have been known to save thousands by having this information before it was too late. Those in business may protect themselves against future loss with such knowledge.

Calculations made on cities and other corporations, showing the average strength of the directors and promoters operating the same, and the future possibilities indicated by such co-operation in enterprises of that nature. If you contemplate investing in the stock of a corporation, first ascertain what the future indications are of the company as a whole and of the enterprise in general. Send for terms.

HEALING THE SICK.

People at a distance who are suffering from any cause can be treated by Occult Science as well as those who are able to call in person.

To remove physical disturbances and cure any disease which afflicts the human race is a very simple proceeding. The simplicity of the method being the only barrier in the way of success. My method of treatment is absolute in effect if properly adhered to. I make a specialty of treating those who are willing to use the natural curative agents intended by the great Infinite Spirit to heal the nations.

...HEALTH...

may be attained by all if they desire it and are willing to obey the *law*. The means employed are mental, magnetic and dietary. Time required depends upon nature of the case. Terms by mail, \$2.00 per week.

MEDICINE.

In extreme cases it is sometimes advisable to use medicine to assist in restoring health. The medicines I recommend are Astro-Magnetic Remedies, scientifically compounded according to planetary magnetic forces, and best suited to mental, magnetic and dietary methods of healing. I furnish the same when needed. Fifty doses for \$1.00.
