## A Brief Biographical Sketch of V. G. Rocine

I, the physician co-worker of V. G. Rocine, have undertaken to give a brief biographical sketch of this unusual man to the public.

If you, through me and Rocine's books, can live longer, be happier, succeed better, make the most of yourself, accomplish more, understand others better, enlarge your bank account, live a better life, and have more on the soul's credit page when you die,—I will feel well rewarded.

We are in a school of experience, one depending upon the other. We are differently gifted. Each has his own God-given talent and success sphere. Each has his own weakness and ailment. It is our highest and noblest duty to help each other. The money that we make should be used for noble purposes. We can take nothing along beyond the grave, except our good deeds. *"Naked we come into this world, and naked we depart."*

### Who Is V. G. Rocine?

He is an European philosopher who came to America a long, long time ago, then fully grown and well trained. He had, then, already been in the army of the King. He applied for and received a permit from the King to emigrate to America. His ancestors served the French Government for generations and were of a long pedigree of nobles.

The father of V. G. Rocine, after losing his estate, through a sudden depression in stocks, bonds and financial securities, became so humiliated that, in his desperate condition, he did not even want to use his French family name, Rocine, but retired into private life, and he and his younger

F.A.S. 2/17/32

brother took the name Lundquist, in memory of the lost estate, and later on told his oldest son, the present V. G. Rocine, to repurchase the estate so soon as money permitted, also to resume and use the old French family and ancestral name, Rocine. Consequently, when V. G. Rocine commenced to write and copyright books, he began to use his French family, ancestral and legal name, Rocine, even through legal force and action in a court of the United States.

V. G. Rocine has been serving the public much longer than half a century, in America, and has been a very busy man. He has delivered about 18,000 lectures and class lessons in Europe, United States and Canada. He was a Chicago lecturer, teacher and writer for about thirty years, also the co-editor of two different magazines published in Chicago. In his earlier academic years, he was intensely interested in Greek and Latin etymology which he taught in Chicago for two years, also wrote a course in Greek and Latin etymology, as a foundation in the English language, which course is now for sale, price \$15.00.

Rocine has written, published and copyrighted for himself, or through others, 78 books. He has written books and correspondence courses for other people as well as for himself. Some of his books have been translated into other languages.

About 111,000 people have passed through his hands to higher positions, prosperity, health and unfoldment, according to the talent, genius and effort of each. For about thirty years he made verbal success examinations, making from ten up to one hundred brief examinations a day. When he settled in Chicago he commenced to make typewritten success examinations, personal advice courses, individual type dietaries, developmental systems, etc. His present method of making typewritten examinations and type dietaries is a slow painstaking work, but it brings *unfailing results*. I regard him as an honest, reliable painstaking man and the most able food chemist that I have met.

V. G. Rocine experimented on living people with seventy-two different diets and lastly formulated a diet system never heard of before. He is not only "up-to-date" but also several hundred years ahead of his time. Indeed, if Rocine's philosophy and diet system were introduced and applied in our present doctoring, vocational, social, industrial, political and religious systems, the whole human fabric would be more complete, and all people made more happy.

Aged in years, Rocine is youthful in mind and appearance, often called the "Diet Marvel of the Age." He is a living, walking demonstration of what a correct diet will do. His faithful followers also know that his diet system is based on sound principles.

Whenever you hear, or read about "Types," or about "eating according to your Type," or about "the Sixteen Chemical elements, their voice, language, Bromognosis, etiology, excess, deficiency, functions, properties, use, or their mysteria specialia, or potentia in actu, or operative activity in the body"—you can always trace it to this untiring man, Rocine. "Types," "type chemistry," "type immunity," "type diathesis," "type psychology," "type genius," "type diets," "diet etiology," "diet diseases," "health diets," "disease diets," "criminal diets," "deficiency food symptomata," "excess food symptoms," "sodium hunger," "health tests," "lime type," "calcic hardening," "water heart," "fatty heart," "Bromognosis of the sixteen chemical elements in the body," "deficiency disease," "Exesthesic," "Isogenic," "carbonosis," "Pallinomic," and hundreds, perhaps thousands of other similar, unique, novel, modern, recent terms, principles, ideas, data, subjects, etc., coined, originated, formulated by Rocine were never heard of nor mentioned in any book, magazine, lecture, daily, college or university in the world before he made his type discoveries after he landed on American soil about March, 1867. Neither did anyone ever hear about a "calcium man," "sulphur type," "oxytype," "carbon chemistry," "calcium chemistry," "Sillevitic man," "carbohydrate chemistry," "vegetative chem-

istry," "hydrosic chemistry," "hydric obesity," "liposic obesity," "vegetative heart," etc., without end before Rocine appeared on the scene.

The Type Questionnaire that he used and uses in the studies of types is as unique as he is original. This Type Questionnaire is a marvel, containing about 4,000 searching questions, requiring one whole week to answer, many of which questions learned professors and gray-haired doctors cannot even answer without Rocine's instruction and presence. With the aid of this unusual Questionnaire, he is still studying types of people, type chemistry, type diets, health diets, type tendencies, type analysis, type genius, and other studies along the same line.

V. G. Rocine, although an ex-doctor, does not practice medicine. He has developed his own profession. He studied medicine in two colleges. To enter this medical school, he had to pass an examination before the Superintendent of Education, Peter A. Downey. Sixteen credits were required. As a result of this examination Rocine had to his credit twenty-two credits, or six above those required. This in the face of the fact that he passed the examination in a language foreign to him, proving that he had had a classical education where he came from. Let any university bred man in America go to a foreign country and pass an examination in a language with which he is not familiar and it will not be easy for him to pass.

This is a copy of the certificate signed by the Superintendent of Education:

"STATE OF ILLINOIS

"Department of Education

"Entrance Certificate to Medical and Dental  
Colleges in the City of Chicago

"THIS IS TO CERTIFY, That MR. VICTOR G. ROCINE of  
26 E. Van Buren St., Chicago, has passed successfully an  
examination before me in high school subjects. The aggre-

gate of his educational requirements is equal to the education of the average student who has completed the course of study prescribed for an accredited high school where the requirements for entering college are sixteen credits. Four such credits indicate a successful years' work in high school.

"Given this 29th day of May, A. D., 1909.

"(Signed) PETER A. DOWNEY,  
"Deputy Examiner for Superintendent of  
Public Instruction, State of Illinois"

Here is an affidavit from Emily H. Rocine, Chicago co-editor of V. G. Rocine:

"Chicago, Dec. 26, 1930.

"TO WHOM IT MAY CONCERN:

"V. G. Rocine graduated from the Chicago Institute of Phrenology and from the Haddock & Holt Institute, receiving the title Ph. D. V. G. Rocine discovered the Twenty Chemical Types of People, and had his own notes of some of these Types as early as 1904 to my knowledge, and I think had been making observations of them fifteen or more years earlier than this, as he had many times told me. He commenced to write descriptions of these types and to have the same multigraphed by a Miss Herington who worked for us at that time. Eleven of the Chemical Types were written and multigraphed at this time, covering 425 pages of closely written multigraphed pages. This was during the year 1915. From these notes and with the aid of two secretaries, W. J. Phinn and Elise Grewatz, during 1920 and later, the descriptions of the Chemical Types were classified and at the same time V. G. Rocine wrote and classified the remaining nine Chemical Types.

"No one else had ever written anything on the subject of these Chemical Types of People prior to the time that V. G. Rocine had his Chemical Types of People published.

"V. G. Rocine taught Latin and Greek etymology in our school, i. e., The Rocine School of Human Nature

Studies, and he had a thorough knowledge of Latin and Greek etymology, and from the Latin and Greek etymology he originated names for his Chemical Types, such as Iso-genic, Exesthesic, etc.

"V. G. Rocine in 1908 passed an examination before the Superintendent of Education, Chicago, and received 22 credits. He took a course in Medicine in two Chicago Medical Colleges.

"V. G. Rocine has written, mostly in Chicago, beginning in 1905:

"37 printed books

"16 mail order courses of study

"5 maps (diet, brain and face)

"21 pamphlets on the subject of diet pertaining to types of people from a chemical standpoint and food analysis.

"V. G. Rocine edited a magazine of his own in Chicago for a time, beginning in 1903, and he was co-editor of another, with the writer, for 8 years, and at that time V. G. Rocine wrote a series of articles under the name of "Brainus" as well as under his own name.

"V. G. Rocine has always paid his bills promptly.

"(Signed) EMILY H. ROCINE.

"Signed in the presence of A. W. DOGGETT, Notary Public, Dec. 26, 1930.

"(SEAL)."

Following is an affidavit from an aged man who knew V. G. Rocine in Europe, and who has been intimately associated with Rocine during the entire period that Rocine has been before the American public:

"Los Angeles, Calif., Jan. 14, 1931.

"Mr. F. C. Lynn, Pres. Oakland Bionomy Club,

"206 23rd St., Oakland, Calif.

"DEAR SIR:

"Understanding you wish to know quite fully about the history and facts regarding Dr. V. G. Rocine, I hereby aver: That I have not only known Mr. Rocine from child-

hood, but have been intimately associated with him from time to time.

"In Sweden, about 1865, when I was but a boy, I saw him and his library of Swedish text books, which I subsequently learned consisted of etymology, grammar, zoology, chemistry, physiology, physics, ethnology, anatomy, optics, dictionaries, etc., which he was diligently studying. At this time I was with him about 6 months.

"About 8 years later I saw him in Utah and being with him quite frequently during my stay there for over two years, I saw the skeleton, maps and charts together with the notes, drawings and observations he had taken on the first eleven chemical types of people, the remaining nine he completed at a later date. I was with him when he made his first observation on the "Goat type," which he now designates as the "Silevitic" type of people. I helped him to name some of the types, suggesting naming them from Greek and Latin sources, as he was familiar with Greek and Latin etymology even before leaving the old country. The many different traits, tendencies and inclinations of people and the almost numberless occupations, trades, professions and business pursuits must have been the basis and incentive to induce Mr. Rocine to undertake the study of types in order to differentiate between any two, and to name in any one the predominating characteristic, by type. The idea was new and original with Mr. Rocine, and since having no books or literature in his possession touching upon the subject of chemical types, the discovery is exclusively his own, and for which he deserves all the credit.

"I was interested in the studies of mathematics, astronomy, psychology and science in general and took great delight in the association with Mr. Rocine and his library of science and research. I marveled at his unusual knowledge and profound insight of human nature and at his ability to explain derivatives of technical and scientific

words, phrases and terms without referring to either Greek or Latin dictionaries. He seemed to know intuitively.

"Seven years later or in 1885, we met in Denver, Colo., and being still unfamiliar with the American language he wrote and lectured in Swedish.

"Desiring to become more proficient in mental philosophy, he went to San Francisco two or three years later to attend the institute of Haddock & Holt and was awarded a diploma with the title D. Ph. which he showed me upon his return to Denver.

"Then he went to Chicago to take a course and graduated in Phrenology under Prof. L. A. Vaught, whom I also knew personally, having secured from him a phrenological delineation of myself.

"In 1893 Dr. Rocine, being now conversant with the American language, he wrote and lectured in English, his first article appearing in the magazine "Human Nature" and "Human Faculty," published in Chicago. He wrote and published several books including one very large volume not printed, but multigraphed, which he sometimes called his bible. At one time, about 1910, he needed money for publication of a book he had just finished writing and knowing his sincerity of purpose and unquestioned honesty, I unhesitatingly loaned him \$1000.00 on his word, every cent of which he paid back with interest a little later. During my visit at the home of Dr. Rocine from January, 1922, to July, 1923, I saw and handled both old and new manuscript written by him in both Swedish and English, in quantity equal nearly a ton and which he values at \$20,000.00.

"He was continually writing and with my help in multigraphing, a large number of magazines (books) was prepared. I also assisted in the work of preparing his large quantitative food chemistry map, for later publication.

"In conclusion I would say that I have had many dealings with Dr. Rocine from time to time for a period of

over sixty years and always found him reliable, honest, faithful, and fair-minded and in every way trustworthy and competent.

“(Signed) A. W. CUREO.”

“State of California  
“County of Los Angeles } ss.

“On this 14th day of January, A. D. 1931, before me, F. F. Miller, a Notary Public in and for said county and state, residing therein, duly commissioned and sworn, personally appeared A. W. CUREO, known to me to be the person whose name is subscribed to the within instrument, and acknowledged to me that he executed the same.

“IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal the day and year in this certificate first above written.

“(Signed) F. F. MILLER,  
“Notary Public in and for said  
County and State.

“(SEAL).”

Following is an affidavit from a gentleman who has known Rocine since 1908:

“San Diego, Calif., January 17, 1931.

“TO WHOM IT MAY CONCERN:

“I first met Dr. V. G. Rocine in the early part of 1908. He was lecturing then in Chicago. I attended some of his lectures.

“Since then I have met him many times, and he has always been a valued friend and advisor.

“I have read as many of his writings as I have been able to acquire; a large proportion of his publications; and am thoroughly familiar with his literary style, which, like

his manner of speech, is inimitable. I would recognize either of them anywhere, under any guise.

"(Signed) L. S. MONSON."

"State of California }  
"County of San Diego } ss.

"I, MARY STARR, a Notary Public in and for the said County in the State aforesaid, do hereby certify, that L. S. MONSON, personally known to me to be the same person whose name is subscribed to the foregoing instrument, appeared before me this day in person, and acknowledged that he signed, sealed and delivered the said instrument as his free and voluntary act, for the uses and purposes therein set forth, including the release and waiver of the right of homestead.

"Given under my hand and Notarial Seal, this 17th day of January, A. D. 1931.

"(Signed) MARY STARR, Notary Public.

"My commission expires Jan. 15, 1932.

"(SEAL)."

Mrs. O. K. Monson testifies under oath in regard to Rocine's work, service, character and integrity:

"San Diego, California, January 17, 1930."

"V. G. Rocine,

"1438 Madison St.,

"Oakland, California.

"DEAR SIR:

"With pleasure we make answer to your letter telling of attempts to discredit authorship of the many books you have written. As one who has known you for twenty-three years, attending your lectures, reading your books, and watching your development of the science to what it now is—to us attempts to discredit you appear ridiculous.

"We have known for some ten or twelve years that

others were using parts of your writings as their own. My brother bought a set of books by a widely advertised author. It was evident as I read them that she knew something of your science. But her superficial books had little of value beyond what she had plagiarized from your publications. I learned that she had not even attended one of your lectures.

"Since that time I have learned of many others who have travelled, lectured, and given personal instructions, incorporating some of your discoveries, always taking full credit to themselves except when closely questioned—then they hastily said they had studied under Dr. V. G. Rocine. However, in each case investigated, it was found the individual was a plagiarist.

"On several occasions during the past few years the magazine sections of widely read Sunday papers have had a page or more devoted to types of people and the foods they need as well as their special tendencies and gifts. But only once, to my knowledge, was credit given you as the author of their information.

"We, who know you and your life-time devotion to these lines of study, and the many wonderful discoveries you have made, have deeply regretted these thefts from your many volumes.

"We now have five of your courses of study, besides Mind Training, Heads Faces Types Races, Chemical Diagnosis (five vols.), Foods and Chemicals, A Thousand Facts About the Brain, and your later four books. We have always wanted to possess a copy of each of your many books.

"Our son, who attended your School in Chicago, has both volumes of your Chemical Types of People. He has climbed high in the business world, benefiting much by the knowledge of men resulting from the study of your science.

"How any one could question your authorship is

beyond us. Many of your coined words have not yet been adopted by others, and your diction is distinctly characteristic.

"Those who are educated along these lines are impressed by the depth and thoroughness of your knowledge of the subjects you treat.

"There are doubtless thousands of people who, having heard you lecture, would immediately recognize the unique style in your books.

"Trusting this may be of service I am having it acknowledged.

"Very truly,

"ADA A. MONSON

"(Mrs O. K. Monson)."

"State of California }  
"County of San Diego } ss.

"I, MARY STARR, a Notary Public in and for the said County in the State aforesaid, do hereby certify, that ADA A. MONSON, personally known to me to be the same person whose name is subscribed to the foregoing instrument, appeared before me this day in person, and acknowledged that she signed, sealed, and delivered the said instrument as her free and voluntary act, for the uses and purposes therein set forth, including the release and waiver of the right of homestead.

"Given under my hand and Notarial Seal, this 17th day of January, A. D. 1931.

"(Signed) MARY STARR,

"Notary Public.

"My commission expires Jan. 15, 1932.

"(SEAL)."

The following is the affidavit of Mr. O. K. Monson:

"Mrs. Monson, my wife, and myself, have had his

(Rocine's) examinations ourselves, and for each one of our seven children, have attended his lectures in his school of Human Science in Chicago and elsewhere, have bought and studied his books written from time to time. By living up to directions in his dietary, we believe our lives have been saved, which also is the case with many, many friends whom we have directed to him for help. His is a wonderful science, and—being advertised, as it is from students from his school in Chicago, it will soon reach multitudes, and—adopted by M. D.'s prove a universal blessing. The attempt made to discredit Dr. Rocine and his science is a disgrace to the time in which we live.

“(Signed) O. K. MONSON.”

“State of California }  
“County of San Diego } ss.

“I, MARY STARR, a Notary Public in and for the said County in the State aforesaid, do hereby certify, that O. K. MONSON, personally known to me to be the same person whose name is subscribed to the foregoing instrument, appeared before me this day in person, and acknowledged that he signed, sealed, and delivered the said instrument as his free and voluntary act, for the uses and purposes therein set forth, including the release and waiver of the right of homestead.

“Given under my hand and Notarial Seal, this 17th day of January, A. D. 1931.

“(Signed) MARY STARR,

“Notary Public.

“My commission expires Jan. 15, 1932.

“(SEAL).”

---

NOTE: Please refer to facsimiles of original affidavits in back of this volume.

V. G. Rocine has written, or writes to order, for licensed physicians, myself included, any of the courses enumerated in his catalogue. He has written one book for Mr. Hauser, one book called "Revelations of the Face" for Mr. Conroy, a Chicago business man; one book for a Japanese nobleman; one affinity book which he sold to his daughter, Vera Rocine, who is now in the publishing business herself, after graduating in science, literature and classics, and who re-arranged this book, copyrighted it, and named it "The Gentle Art of Loving Wisely." V. G. Rocine has written tons and tons of development courses, diet systems, success examinations, regimes, essays, articles for dailies and magazines. His writings are so fascinating, modern and popular that a great many people who never wrote a word before became authors at once after reading Rocine's work on Type Chemistry and Food Chemistry, the same as Ralph I. Shaddock suddenly became an author and writer after he got hold of five of Rocine's manuscripts. V. G. Rocine has made success examinations, hired people and written courses for firms, institutions, schools, factories, private individuals, backward boys and girls, feeble-minded people, and has rescued many from the asylum of the insane with his unusual regimes. He has planned university courses of study for hundreds of students. He has helped to re-organize failing businesses by hiring efficient sales forces and proficient office executives. He has guided thousands of boys, girls, men and women into their success vocation.

V. G. Rocine says that work is man's salvation; that it is work, a correct diet, good habits and Food Blend that keeps him (Rocine) efficient. Like Mr. Edison, Rocine works from twelve to sixteen hours a day, notwithstanding his advanced age.

He has written, published and copyrighted, this year, his "Absolutely Reliable Employment Guide," also a new edition of his "Type Questionnaire," which he uses in the

study of types. He has written and copyrighted also this year one book, "Bionomy and Kitchen Chemistry," which will be used in the chemistry department of his coming college as a text book. He is now copyrighting two booklets, one on Flu and the other on Pneumonia. He has planned the outlines of six other text books which are to be used in his coming college. The sooner those text books are ready, the sooner there will be a college of BIONOMY, the sooner we will have teachers of this great philosophy, and the sooner the world will have competent BIONOMISTS, instead of ambulating speechifiers. He is also, now, preparing a book, "Self-Analysis for Type-Classification."

In the fall of 1914, with the aid of his stenographer, Miss Willis, of La Grange, Illinois, V. G. Rocine commenced to write from previous notes that large book, or set of books, now known as "Chemical Diagnosis." This manuscript was completed in 1917. In 1918 this manuscript was turned over to a prominent chemist, Dr. Crawford, for a critical examination and approval from a chemical viewpoint. This manuscript was printed, copyrighted and placed on sale in 1925, in a set of five volumes, and called unbeknown to the author, "Chemical Diagnosis, Bio-Chemistry, by V. G. Rocine."

As V. G. Rocine is intensely interested in Types, Type Chemistry, Diet Experimentation, Bromognosis or The Voice or Language of the Sixteen Chemical Elements, when lacking or in excess, and as these studies and discoveries were exclusively his own, he was sorely vexed when he learned that his researches were labelled "Bio-Chemistry."

What is bio-Chemistry, anyway? It is nothing else than biological chemistry, or the study of living beings, animals and plants. It deals mainly with living organisms from a biological, zoological and botanical viewpoint. It is in reality, botany, biology and zoology considered in their relation to chemistry.

The discovery of Types of People; the study of Type

Chemistry; the results, records, observations and data gathered from long pains-taking diet experimentations with 72 different chemically unbalanced, or chemically balanced diets, scientifically tested on healthy young people; and all such experiments, effects, data, discoveries, researches, laws and principles unfolded, classified, described, edited and copyrighted—surely is not bio-chemistry, neither did V. G. Rocine ever call his researches bio-chemistry, nor has his profession anything in common with bio-chemistry. His Type discoveries, Type Chemistry, his many different tested diets, his Type descriptions, his Type and Diet researches, his Bromognosis or Voice description of the sixteen chemical elements, when deficient, or in excess, in the body, and his philosophy which enables him to measure mind, analyse character, understand dispositions, guide genius, gauge souls, study brains, know crafts and professions, teach Types, and direct people into their success spheres—is not bio-chemistry, nor psychology, nor astrology, nor palmistry, nor doctoring, nor fortune-telling, nor psychometry, nor spiritualism. It is a new system, science, art or philosophy of man, brain, mind, soul, genius and occupations, based mainly on—

1. The Sixteen Chemical Elements of which man is composed.
2. Type Chemistry and Type discoveries.
3. Diet Experimentations (Bromognosis).
4. Applied Quantitative Food Chemistry.
5. Experimental Etholysis.

All of the foregoing studies, researches and discoveries, V. G. Rocine includes under the term BIONOMY (from Greek, bios, life; nomos, law), as V. G. Rocine has explained to me.

V. G. Rocine is a food chemist, student of science, doctor of mental philosophy, research worker, ex-doctor,

but he is in a profession of his own, never heard of before. He is neither of the foregoing. He is a BIONOMIST, and nothing else. He has many titles and many diplomas. But he uses none of them, for he has developed a new profession, never heard of before. Men like Edison, Dr. A. T. Still, Dr. Hahnemann and others who developed some new system do not depend upon titles. Moreover, who should give Edison a title, or Dr. A. T. Still, or some other discoverer or inventor? Those who must learn and copy, practice and apply what the discoverer, inventor or originator teaches or writes—those are the ones who require a title to show that they have been properly trained, that they are proficient in that special craft or profession.

No public man or woman of wealth, no human benefactor ever yet offered one single dollar in favor of Rocine's work and researches. Unaided he has been a missionary and research worker all his life, earned and spent his own money for researches, cuts, drawings, stenography, printing, research travel, multigraphing, etc. Every available dollar earned he donates to books. He has earned and donated about \$210,000.00 to books, printing and researches, and many are they who have tried to appropriate and commercialize his pen products and even brand him as a bold pretender.

## A Challenge

In consequence, I, the physician co-worker of V. G. Rocine, hereby challenge any man or woman, bio-chemist, scientist, historian to produce any book, daily, magazine, history, science, essay, or written lecture, or anything that treats of the Twenty Chemical Types of People, or the Bromognostic effects of the deficiency or the excess of the Sixteen Chemical Elements, or about the application of Quantitative Food Chemistry according to the laws of Type Chemistry, or about the laws of Type Dispositions, or Type Genius, or Type Tendencies, previous to 1867.

There are many who claim that they have studied under V. G. Rocine, which may or may not be true that they have. Those who have studied and graduated under V. G. Rocine have his diploma as proof. Those who have not a diploma from V. G. Rocine are not qualified to practice his profession, nor are they authorized to do so.

To become proficient bionomists, students require, outside of mail course studies at home, at least 3 years of personal instruction in advanced studies under V. G. Rocine. V. G. Rocine has had hundreds of so-called students (nibblers), but none ever studied long enough to graduate and receive a diploma. Hence, none is authorized to practice, nor apply Rocine's new discoveries.

V. G. Rocine makes no claims\* to anything else than his type discoveries, type descriptions, type chemistry, Bromognosis, type dispositions, type genius, the study of

vocational qualifications, type diseases, type etiology, and the application of quantitative food chemistry to types and type chemistry.

He has studied the books written by Dr. Gall, Dr. Spurzheim, the Fowlers, Geo. Combe and every available book on phrenology, and uses phrenology, physiognomy and other branches having a bearing on man, whether past or present, and has graduated from two schools of mental philosophy; he has studied everything available on quantitative food chemistry and gives full credit to 72 of those noble chemical workers who have labored so faithfully in laboratories in the interest of food chemistry and human health. He also gives full credit to Dr. Gall, the discoverer of the functions of the brain, and to all phrenologists.

Perhaps no one deserves greater credit than Emily H. Rocine, who was Rocine's co-editor and business manager for many, many years. Rocine wishes to have it known that Emily H. Rocine deserves great credit for faithful service to humanity in general and to this philosophy in particular.

## Entrance Certificate to Medical and Dental Colleges in the City of Chicago

This is to Certify, That Mr Victor G. Rocine  
of 26 E. Van Buren St. Chicago has passed successfully an examination before me in high school subjects. The aggregate of his educational requirements is equal to the education of the average student who has completed the course of study prescribed for an accredited high school where the requirements for entering college are sixteen credits. Four such credits indicate a successful year's work in high school.

Given this 29th day of May A. D. 1909.

Peter A. Droney  
 Deputy Examiner for Superintendent of Public Instruction, State of Illinois.

THE HENRY O. SHEPARD CO., PRINTERS, CHICAGO.

Mrs. Monson, my wife

and myself, have known Dr. Rocine for more than 23 years, have had his examinations, sunshades, and for each one of our dear children, have attended his lectures in his school of Human Nature in Chicago, and elsewhere, have taught and studied his books written from time to time. By living up to directions in his dictum, we believe our lives have been saved, which shows the case with many, many friends,

whom we have directed to him for help. His is a wonderful science, and being advertised, as it is from students from his school in Chicago, it will save much multitudes, and adopted by all to prove a universal blessing. The attempt made to discredit Dr. Rocine and his science is a disgrace to the time in which we live.

O. K. Monson.

To Whom it may concern,

I first met Dr. V. G. Rocine in the early part of 1908. He was lecturing then in Chicago. I attended some of his lectures.

Since then I have met him many times, and he has always been a valued friend and advisor.

I have read as many of his writings as I have been able to acquire, a large proportion of his publications, and am thoroughly familiar with his literary style, which, like his manner of speech, is inimitable. I would recognize either of them anywhere, under any guise.

L. S. Monson

CHICAGO  
 Dec 26, 1930.

TO WHOM IT MAY CONCERN:

V. G. Rocine graduated from the Chicago Institute of Phrenology and from the Haddock & Holt Institute, receiving the title, Ph.D.

V. G. Rocine discovered the Twenty Chemical Types of People, and had his own notes of some of these Types as early as 1904 to my knowledge, and I think had been making observations of them fifteen or more years earlier than this, as he had many times told me.

He commenced to write descriptions of these Types and to have the same multigraphed by a Miss Herrington who worked for us at that time. Eleven of the Chemical Types were written and multigraphed at this time, covering 425 pages of closely written multigraphed pages. This was during the year 1915.

From these notes and with the aid of two secretaries, W. J. Phinn and Elise Grewatz during 1920 and later, the descriptions of the Chemical Types were classified and at the same time V. G. Rocine wrote and classified the remaining nine Chemical Types.

No one else had ever written anything on the subject of these Chemical Types of People prior to the time that V. G. Rocine had his Chemical Types of People published.

V. G. Rocine taught Latin and Greek etymology in our School, i.e., The Rocine School of Human Nature Studies, and he had a thorough knowledge of Latin and Greek etymology, and from the Latin and Greek etymology, he originated names for his Chemical Types, such as Isogenic, Erethesis, etc.

V. G. Rocine in 1908 passed an examination before the Supt of Education, Chicago, and received 22 credits. He took a course in Medicine in two Chicago Medical Colleges.

V. G. Rocine has written, mostly in Chicago, beginning in 1905, 37 printed books  
 16 mail order courses of study  
 5 maps (diet, brain and face)  
 21 pamphlets on the subject of diet pertaining to types of people from a chemical standpoint and food analysis.

V. G. Rocine edited a magazine of his own in Chicago, for a time beginning in 1903, and he was co-editor of another, with the writer, for 8 years, and at that time V. G. Rocine wrote a series of articles under the name of "Brainus" as well as under his own name.

OUR LATEST:  
 New Chemical Food Map \$3.00  
 How to Build a New Stomach \$1.00  
 How to Build a New Heart \$1.00  
 Diet for Beauty \$1.00  
 All Four for \$5.00

V. G. Rocine has always paid his bills promptly.

Emily N. Rocine

San Diego, California, January 17-32

V. E. Roemer,  
1438 Madison St.,  
Oakland, California

Dear Sir:

With pleasure we make answer to your letter telling of attempts to discredit authorship of the many books you have written. As one who has known you for twenty three years, attending your lectures, reading your books, and watching your development of the science to what it now is, — your attempts to discredit you appear ridiculous.

We have known for some ten or twelve years that others were using parts of your writings as their own. My brother bought a set of books by a widely advertised author. It was evident as I read them that she knew something of your science. But her superficial books had little of value beyond what she had plagiarized from your publications. I learned that she had not even attended one of your lectures.

Since that time I have learned of many others who have travelled, lectured, and given personal instructions, incorporating some of your discoveries, always taking full credit to themselves except where closely questioned — Then they hastily said they had studied under Dr. V. E. Roemer. However, in each case investigated, it has found the individual was a plagiarist.

On several occasions during the past few years the Magazine sections of widely read Sunday Papers have had a page or more devoted to types of people and the foods they need as well as their special tendencies and gifts. But only once to my knowledge was credit given you as the author of their information.

We, who know you and your lifetime devotion to these lines of study, and the many wonderful discoveries you have made, have deeply regretted these thefts from your many volumes.

We now have five of your courses of

study, *Decide Mind Training, Heads Faces Types Races, Chemical Diagnosis (for sale) Foods and Chemicals, A Thousand Facts about the Brain*, and your later four books. We have always wanted to possess a copy each of your many books.

Our son who attended your School in Chicago has both volumes of your *Chemical Types of People*. He has climbed high in the business world benefiting much by the knowledge of men resulting from the study of your science.

How any one could question your authorship is beyond us. Many of your covered books have not yet been adopted by others, and your diction is distinctly characteristic.

Those who are educated along these lines are impressed by the depth and thoroughness of your knowledge of the subjects you treat.

There are doubtless thousands of people who, having heard your lecture, would immediately recognize the unique style in your books.

Trusting this may be of service I am having it acknowledged.  
Very Truly, Adah M. Morrison  
(Mrs. C. H. Morrison)

San Angeles Calif. Jan. 14<sup>th</sup> 1931.

Mr. F. E. Roemer, Pres. Oakland Botany Club  
226-234 St. Oakland Calif.

Dear Sir:

Understanding you wish to know quite fully about the history and facts regarding Dr. V. E. Roemer, I hereby aver: That I have not only known Mr. Roemer from childhood but have been intimately associated with him from time to time.

In Sweden, about 1888 when I was but a boy, I saw him and his library of text books, which I subsequently learned consisted of ethnology, grammar, zoology, chemistry, physiology, physics, ethnology, anatomy, optics, dictionaries &c. which he was diligently studying. At this time I was with him about 6 or 7 years.

About 8 years later I saw him in Utah and being with him quite frequently during my stay, for over two years, I saw the skeleton, make and charts together with the notes, drawings and observations he had taken on the first above chemical types of people, the remaining were completed at a later date. I saw with him when he made his first observation on the boat type which he now designates as the *adulterate* type of people. I helped him to name some of the types, suggesting naming them from Greek and Latin sources, as he was familiar with Greek and Latin etymology, even before leaving the old country.

The many different traits, tendencies and inclinations of people and the almost numberless occupations, trades, professions and business pursuits must have been the basis and motive to induce Mr. Roemer to undertake the study of types in order to differentiate between any two, and to name in any one, the predominating characteristic, by type. The idea was new and original with Mr. Roemer and since having no books or literature in his possession touching upon the subject of chemical types, the discovery is exclusively his own, and for which he deserves all the credit.

I was interested in the studies of mathematics, astronomy, physiology and science in general and took great delight in the association with Mr. Roemer and his library of science and research.

I marvelled at his unusual knowledge and profound insight of human nature and at his ability to explain derivatives of technical and scientific words, phrases and terms without referring to either Greek or Latin dictionaries. He seemed to know intuitively.

Seven years later or in 1885 we met in Denver Colo. and being still unfamiliar with the American language he wrote and lectured in Swedish.

Desiring to become more proficient in mental philosophy, he went to San Francisco two or three years later to attend the Institute of Haddock & Noit and was awarded a diploma with the title D. Ph. which he showed me upon his return to Denver with Mr. Roemer and since having no books or literature in his possession touching upon the subject of chemical types, the discovery is exclusively his own, and for which he deserves all the credit.

I was interested in the studies of mathematics, astronomy, physiology and science in general and took great delight in the association with Mr. Roemer and his library of science and research.

I marvelled at his unusual knowledge and profound insight of human nature and at his ability to explain derivatives of technical and scientific words, phrases and terms without referring to either Greek or Latin dictionaries. He seemed to know intuitively.

Seven years later or in 1885 we met in Denver Colo. and being still unfamiliar with the American language he wrote and lectured in Swedish.

Desiring to become more proficient in mental philosophy, he went to San Francisco two or three years later to attend the Institute of Haddock & Noit and was awarded a diploma with the title D. Ph. which he showed me upon his return to Denver.

Then he went to Chicago to take a course and graduated in *Psychology* under Prof. R. A. Wrought whom I also knew personally, having secured from him a philosophical delineation of myself.

In 1893 Dr. Roemer, being now conversant with the American language he wrote and lectured in English, his first article appearing in the magazine *Human Nature* and *Human Faculty* published in Chicago. He wrote and published several books including one very large volume not printed, but multigraphed, which he sometimes called *His Bible*. At one time, about 1910, he needed money for publication of a book he had just finished writing and knowing his sincerity of purpose and unquestioned honesty I unhesitatingly loaned him \$1000.00 on his word, every cent of which he paid back with interest, a little later. During my visit at the home of Dr. Roemer from Jan. 1922 to July 1923, I saw and handled both old and new manuscripts written by him in both Swedish and English, in quantity equal to nearly a ton and which he valued at \$25,000.00.

He was continually writing and with my help in multigraphing a large number of magazines were prepared. I also assisted in the work of preparing his large quantitative food chemistry map for later publication.

In conclusion I would say that I have had many dealings with Dr. Roemer from time to time for a period of over sixty years and always found him reliable, honest, faithful and fair-minded and in every trustworthy and competent.

A. W. Gordon
