MAGI COSMOLOGY

By Prof. Wm. Estep

The influence of mathematics on life is easily discernable by anyone with a studious mind. For centuries Mystic Orders of the Far East have been the custodians of secrets regarding nature, which the rest of the world knew little about. Their members founded the arts and sciences of civilization, known today as: Astronomy, Geometry, Astrology, Medicine and Chemistry, as well as primitive Botany. Most of the aforementioned arts were born in India, Arabia and Egypt. Their founders were Magis who understood Mental and Natural processes, as well as the deepest spiritual mysteries. These physical sciences are but crude reflections of a profound and perfect Cosmic Science, whose mysteries are soon to be universally known.

This science reveals astounding truth regarding the laws of Mentation and the universal principles of life; so one possessing the true keys may understand perfectly the most inner processes of life and wrest from nature her most profound secrets. Cosmogony and Cosmology become simplified so the ordinary mind can demonstrate the demonstrations heretofore called miracles by those uninitiated mortals, who cannot understand that life is composed of vibratory friction, whose processes are governed by Divine All-seeing Mind.

Biblical events give a hint of this science by the prevalence of certain numbers in connection with Cosmic events. These are known, however, only by those who have illumined consciousness. Some Numerical Mysteries are as follows:-

The Seven Days of Creation.

The Seven Thrones In Heaven.

The Seven Heavens of the Hebrews.

The Seven Golden Candlesticks of Revelations.

The Seven Churches of Asia in Revelations.

The Seven Messengers or Angels.

Then in other religions you find the three applies to God, in practically every bible of the world, as follows:

Christianity.	Father	Son	Holy Ghost ..
Hinduism	Brahma	Shiva	Vishnu
Egypt	Osiris	Isis	Horos

Thus numbers have always been a mystic influence in religion, science and the laws of deduction. This truth has always existed long before creeds were born, therefore it may be said to indicate a hidden science whose creed is Universal Nature. Even the seven days of the week are related to seven planets whose influences were known only to the ancient order of Magi, whose members welcomed Jesus to earth in the form of the Mystic Wise Men of "the East".

SCIENTIFIC SYMBOLISM OF NUMBERS

No.-1.

This is the first principle: Infinite Spirit or God, the source of light, life and creation. All calculation begins with the unit 1; likewise all life came from the First Principle God, meaning Creation, origination and the power of Generation. From this number all principles of mathematics were born—and from this principle all life was born—it is self existant and stands alone, therefore it denotes independence from all other numbers as it is complete in itself. In this sense it represents the one universal mind, as well as the principle of regeneration in man which causes him to return to the first cause. This is also the Number of Saturn, the planet of mind power and of death. In Astrology it is Aries the Ram, named for the Ram or Lamb of God of the anicent mysteries. Number 1 is both the number of birth and of destiny, as well as the number of originality. This number also represents identity, which some express when they say "I look after number one", therefore it is the number of individuality; one body, one consciousness and one soul, which came from one God.

Symbolism of Number 2.

Symbol of the pair—positive and negative; male and female; good and evil, darkness and light, the number of a creative nature. This number in ancient Astrology stood for Jupiter, the planet of contending powers or opposition; in the formation of human beings it is the number of the sun and moon—shown by two eyes, two hands two feet, two lungs—while in the Zodiac it is the number of the sign "Taurus the bull", which means creation on the physical plane. It also symbolizes two natures in man—high and low, which constantly struggle for supremacy. This number calls to mind

the fact that there are two pathways in life; one leading to darkness, the other to light, and each must choose his path. This also is the number of brain lobes which strive one against the other, in dual control of opposite sides of the body. It is the number of achievement and creation, of harmonious vibration of an opposing nature. It also symbolizes the two phases of life, Mortality and Immortality. It is the number of choice, change, decision, romance, art, beauty and learning intellectually.

Symbolism of Number 3.

This is the number pertaining to consciousness; the conscious, sub-conscious, and super-conscious mind. It is also the number of Divinity in all religions.

In Christianity, Father, Son and Holy Ghost.

The three heavens seen by St. Paul.

The three illumined beings of the transfiguration, Christ, Moses, and Elias. Also of the three chosen disciples who were present at the transfiguration.

In Hinduism it symbolizes Brahma, Shiva and Vishnu, the threefold Godhead. Brahma-Permanence; Shiva-destruction; Vishnu-production.

In ancient Egypt the three dieties: Osiris, Isis, and Horos. It is also the number of Mars, in ancient Astrology, meaning Physical life, or the gods come to earth; while in modern Astrology it is the sign of Gemini, third sign of the Zodiac (the twins), or the sustainer of life, through laws of creation. This number is related to 6 and 9, through the laws of mathematics or multiplication, the 6 being intuition and 9 the number of man. This then indicates that man is one third divine, one third physical, one third mental, therefore it is the number of the whole being or three thirds which when added give 3 again or the number of

completeness; perfection being Divinity and God.

Symbolism of Number 4.

This is the number of the elements of life,—earth, air, fire and water, in Astrology the sign of Cancer the Crab, the number of combination and alchemy. It is the double of two therefore showing creative power on two planes—Visible and Invisible. This number indicates the Sun, creator of life in ancient Astrology, because the Sun combines the elements forming all types and degrees of life. It is creative and constructive, because it is the number of the sides of a square, which is a proper foundation for a building. It is also the number of physical growth, intelligence and development. Also it is the number of geographical equation, north, south, east and west. The means of measurements, direction and judgments, meaning accuracy. Its symbolism refers to all planes of being—earth, body; air, mind; fire, spirit; water, soul; which fact makes it possible for man to become a master through control of elements. It also indicates the four Gospels, pillars of Christianity, Matthew, Mark, Luke and John. And the four heavens of Astrology: Oriental, Occidental, Mid-heaven, and Lower heaven. Also it indicates the four trinities of earth, air, fire and water of the houses of Astrology, each containing three signs of the Zodiac, called a triplicity. Four, therefore, is the number of Visible, invisible, and creation.

Symbolism of Number 5.

This number indicates our five senses, called the physical senses. Also it is the number of human formation and beauty, indicated by five fingers, five toes, five brain ventricles, which give form to the head through the laws of vibration and cosmic equation. In

ancient Astrology it is the number of Venus, goddess of beauty, art and the sciences. It especially refers to culture and self-improvement, dispensing gifts, designing of forms and foundations. This number in ancient Egypt was known as the Pyramidal number, since all courses of masonry in the Great Pyramid are arranged in five courses or layers of each type of stone. In modern Astrology it is the number of the sign of Leo the Lion, denoting strength and power. Also a sign of the Sun. This number indicates a changing consciousness, which develops from the low planes of being to the highest. It signifies cognition. This number in a cabalistic way indicates adaptability, congeniality, and the progressive urge in the mind of man, giving him the power to overcome all types of difficulty. It is the number of difficulty in personal affairs, and all difficulties have solution through spiritual force.

Symbolism of Number 6.

This number is related to the sixth sense, intuition, which informs one of the correct course to pursue in life. It is the number of guidance and accomplishments, "Six days shalt thou labor, and on the seventh rest". This indicates the influence of accomplishment accompanying number six. In ancient astrology it corresponds to the planet Mercury, God of impulse and intelligence, which is opposed to the physical force of Mars. While in the Zodiac it is the sign of Virgo the Virgin, which gives the quality of purity to mind force. This number also symbolizes righteousness opposing evil, which brings about the battle of Armageddon, preceding the Millennium. Also in the Sacred Triangles of the mysteries always interlaced, there are six principles of which three are of man and three of God, as follows:-

Symbolizing man's unity with the godhead, or Messiahship, emblem of spiritual mastery. In personal and national affairs it is symbol of opposing forces.

Symbolism of Number 7.

Seven is known as the number of the mysteries of life, perfection and inspiration because of its appearance in all of the world's religious systems, as follows:

CHRISTIANITY

- The seven heavens of the Hebrews.
- The seven Thrones.
- The book of seven seals.
- The seven churches of Asia.
- The seven Golden Candlesticks.

HINDU

- The seven cycles of time called Yugas.
- The seven ages of Brahma.
- The seven incarnations of the human soul.
- The seven forms of life of Vishnu.

EGYPTIAN

The seven glorious ones or planets.
The seven gods in Thoth or heaven.
The seven transmigrations of the soul.

PERSIAN FAITH

The seven Amschaspands or bibles.
The seven stages of progress.

CHALDEAN

The seven angels of the invisible world.
The seven Sephirath, adopted by the Hebrews.

ASTROLOGY

The seven days of the week.
The seven planets ruling all forms of life.

In ancient Astrology it is the Moon number. Thus we see that seven concerns the deep abstract mysteries of the Unseen World. It has a mystical influence over nature, and in every occult practice it produces mysteries related to the mystery of the Soul, while on the material plane it symbolizes wealth and the complete enjoyment of life, therefore it contains deep mysteries for the speculation of those enterprising students of nature, known as Neophytes of the mysteries of life. The seventh day of our present week is Saturday, named for the Saturn, planet of rest for the mind, and every day it becomes more and more a day of rest and recreation. This number figured in ancient ceremonial magic and was always used in controlling the mystic invisible forces. The seventh son of a seventh son was always believed to be a prophet by Egyptians, because seven times seven completes a grand cycle of perfection in

the univers. In Astrology the 7th sign is Libra, the sign of the mystic and prophet, the writer, teacher and one inspired. In personal affairs it is the number of wealth, inspiration and spiritual guidance.

Symbolism of Number 8.

This is the number of infinity. Since beyond the seven planes of mind there is but infinite spirit. It is a double of four, the number of uncertainty and ill fortune, meaning that if one follows life downward they would find it contains all forces of destruction and changeable elements. While if you follow it upward you find infinite wisdom. This is the number of Mysticism and mis-understanding, since no one can completely know the infinite, it is the limit of man's domain of knowledge. the eight layers of bark on a tree usually indicate great age. While in astrology it is the sign Scorpio, the Scorpion. In ancient magic this was the taboo number. They believed it had the power to destroy or to create—when one desired to place a curse on an enemy they secretly marked 8 and an "X" on their doorway or gatepost. Therefore it has always been the number of the unseen, unlimited incomprehensible, uncertainty, yet containing infinite power capable of reforming the world. The mystery of eight is the complete mystery of life, there is nothing beyond infinity; therefore, it is beyond mortal mind. In personal affairs it means work and health conditions.

Symbolism of Number 9.—The physical number.

This number includes all numbers upon which all calculations can be built. It is the Sumum Bonum of numerical equation, representing physical completeness, because it is the number of the birth of man, requiring nine months for physical formation. It is directly related to physical birth, or the beginning

of growth, on the physical plane. There is nothing beyond it except the "o", meaning eternity, because it is without beginning or end. But it has not material numerical value, therefore the nine equals the physical universe and all things physical are counted by the single numbers from one to nine. For instance, 11 is two ones; 12 is 1 and 2; twenty is 2 and 0, the 0 is not added in figures only as a cipher, the 2 only carries a real numerical value. For that reason the 0 is never used in "Cabalistic science of equation". In astrology the ninth sign is Saggittarius the Archer, denoting cleverness and accuracy. This number is also related to nine bones at the end of the spine and nine months for birth, which denotes the physical development of man. Also his changing form throughout the ages. When the number 9 is multiplied by any number it reproduces itself just like the human race. The number 666 from Revelation produces 18 whose total is 9 and refers to worship of a physical man.

Correlation of Numbers and Ruling Planets

From ancient astrology and magiism.

Days of month 1st, 10th, 19th and 28th.

No. 1-Saturn, denoting mind power and rest from physical labor.

This planet casts an influence over man, which causes him to contemplate immortality, God, creation and all those things related to the first cause or God. While it draws man's attention away from matter it has an influence over all mental processes. It is related to all mental progress, and affects all who were born on the 1st day of the month, or the 10th, 19th, or 28th, since the total of all these numbers is 10; when the 0 is cancelled it becomes 1, the number of Saturn. All number 1 people are mental types, executives, and managers who despise being ruled by others. When in executive positions they are wonderful people, but in a sub-

ordinate position they are miserable and very disagreeable. They make wonderful mental healers and metaphysicians, mathematicians and calculators. They have the inventive power of a genius if they use it in a way to get the most out of life. They love companionship but insist on being the advisor of their companions. They are creative mentally and can use their powers for either good or evil, therefore they need spiritual development very much as a guide in life. The days of harmony are 1st, 10th, 19th and 28th of every month for these people.

No. 2 Jupiter.—People born on the 2nd, 11th, 20th and 29th of any month.

This ruling planet affecting all born in any month on the above dates, vibrates the principle of contention or the influence which demands that one receive their own. This influence effects the organs of regeneration; number 2 being the symbol of the pairs—male and female; positive and negative. Therefore, this is a number of romance and art and desire for the companionship of the opposite sex. This planet reflects the rays of the moon more than the sun, therefore people who are born on the 2nd, 11th, 20th and 29th of any month are often negative and lovers of pleasure. They must guard against improper thinking otherwise they will constantly have to struggle between right and wrong, good and bad, like and dislike. Mind concentration is the remedy to stabilize the changing mental conditions of Jupiter No. 2 people. They always need a spiritual teacher and cannot learn from books as their mental powers are unstable. They are often abused by the one they love, because they display their motions entirely too much. Yet they make good parents. They should be teachers, salesmen or artists, but when undeveloped many are mechanically inclined. Restlessness and changeableness affect these people very much.

Through a study of mental science they can correct this condition.

No. 3-Mars-People born on the 3rd, 12th, 21st and 30th of any month.

This planet is related to physical power as it is the number of consciousness or the conscious, sub-conscious, and super-conscious mind, which rules matter through intelligence and impulse. People who are born on the 3rd, 12th, 21st and 30th of any month are related to this influence, therefore they are dictatorial, full of pride often arrogant and the type who insist upon being ruler. They obey orders from superiors and carry them out to a letter, but can give orders as well. This planetary influence produces many nurses, doctors, healers and anatomical experts, who govern physical conditions very well. These people lack kindness and should therefore practice it, since if they do not they are liable to go through life a very lonely person. They are equal to almost any mental task. They love to dress well and are very neat and clean. Usually they excel in outdoor sports and physical prowess of all kinds. They are good in marching or any type of physical formation. Many are athletes. They are good in thought transmission and many types of mental and physical phenomena. They are careful and scientific minded, and excel in educational fields of endeavor.

No. 4-Sun-People born on the 4th, 13th, 22nd, and 31st of any month.

The Sun is the physical creative force and is the warming force of life or animating force in every branch of nature; illuminator of the physical world, symbolizing God. Those who are born on the 4th, 13th, 22nd, and 31st of any month partake of this power. They

excel in creative work, are good public people teachers and dramatists, as well as musicians, but the sun opposes spiritual inspiration, therefore these people sometimes lack that comforting power for this reason they are usually unfortunate in human relationship, in home life and in friendship. The number 4 is a square therefore it does not harmonize with a circle. This symbol denotes why sun number 4 people are constantly being disappointed with domestic life and suffer unfortunate circumstances in life. Yet they attain fame, wealth and great power, but often misuse their money and success in a way which impoverishes them. They need the companionship of an intuitive person to assist them, yet this is the one thing they seem to fail to find. They are very positive, aggressive and dominant minded, hard to convince or change, but dynamic in that work which they love. They can become great writers and inventors. In personal affairs they are unfortunate. Many are orphans; and they are often left alone in business enterprises.

No. 5-Venus-People born on the 5th, 14th, and 23rd of any month.

The Planet of poise, beauty and art, governing the vibration of No. 5. People born on these dates above-show they are high strung, tempermental and make friends easily. Wonderful artists, and beauty culturists are of the No. 5 type. They are dramatic by nature and love to make good impressions on others. Their greatest obstacle is false pride and modesty. These people, like the Physical Senses, are changeable and need concentration power very much. They are very easy to become discouraged; and given to quick temper, they lack will power and are often swayed by others. They love to appear wealthy. In home life they are neat and usually have nice homes. They are, however, lacking

in the seriousness of mind; often they are fickle and think that looks are the greatest thing in life. They are usually very attractive personally. When properly trained, they excell in occult work, making wonderful platform people. They are sensitive and very prone to take offense easily; yet they are clever and quick to perceive advantages, having selling and financial ability in public enterprises.

No. 6—Mercury, born on 6th, 15th, and 24th of any month.

This is an impulsive divine influence denoting intuition, inspiration, and Spiritual power. Great adepts, writers and divine healers are of the No. 6 people. These people make friends easily and love to contact with people. They love to do for others and make them happy. They are inclined to be generous; with a great love for art, philosophy and history. They are very romantic and ideal in nature.

They are good in speculation; can foresee values and improvement in commodities. They love the mysterious and are often students of the Occult, Religion, etc. They sacrifice their own ideals for others; are often persecuted, and seldom appreciated. Their presence is a comfort to others, because they offer good advice. Many Saints and Holy Men are of the No. 6 type. While they are intuitive, they lack a positive nature which they should have. They excel as teachers, writers, speakers and artists. In lesser development they are designers, salesmen and mechanics. The No. 6 denotes the 6th sense. Therefore, these people should trust their intuition. They are always clashing with physical force and conditions. For this reason they are unfortunate.

No. 7—Moon—Days of month of birth, 7th, 16th, and 25th of any month.

The moon gives forth motherhood, Psychic and Spiritual powers. This being the reason why it corresponds to the Mystic 7 which appears in all of the world's religions. No. 7 people never follow the Creeds of their parents. They love originality and seek the Occult as a means of developing their own powers. They often have a religion of their own. Usually that being the "Golden Rule". They make good writers, poets, musicians, teachers, lecturers and designers, and inventors, and are very versatile in talents.

They perceive the needs of others and through inspiration often help others. They dislike restraint, but have great sympathy for others almost to a fault. They are natural born seers, and are very inspirational. In matters Spiritual they demand perfection and will not accept half explanations.

They make wonderful mind readers, Kabalists and Prophets, being of a receptive planetary influence and mystic Numerical Vibration, they are usually universally minded. They love deep study and see beyond matter and illusion. They are fortunate people usually, become wealthy or are in a comfortable position in life. In personal affairs, No. 7 indicates wealth.

NOTICE TO READER

There are but seven ruling planets, so you have studied their numerical co-relation. Beyond the 7th planet, the moon, there are but watery signs which influence the soul of man. While they are not ruling powers, they correspond to the numbers of 8 and 9 which go beyond 7 numerically. They are Neptune and Uranus, which equal 8 and 9, respectively, whose influence reaches man only through the Infinite Spirit. No. 8-Neptune.

This influence applies to all born on the 8th, 17th, and 26th of any month. The No. 8 people, from a planetary standpoint, are adepts, mystics and great metaphysicians. 8, being a double of 4, indicates a Creator on the visible and invisible planes of life.

Many No. 8 people work all their lives for a cause, yet they are opposed by enemies, whom they hurt by competition in intelligence, education and religious views. They are adept also in spiritual matters, demanding utmost truth in everything. They are critical and see the vital point in all problems. They live in the sky, so to speak, and need some one to assist them in earthly problems, as they can make money but cannot save it. They are born business executives and originators.

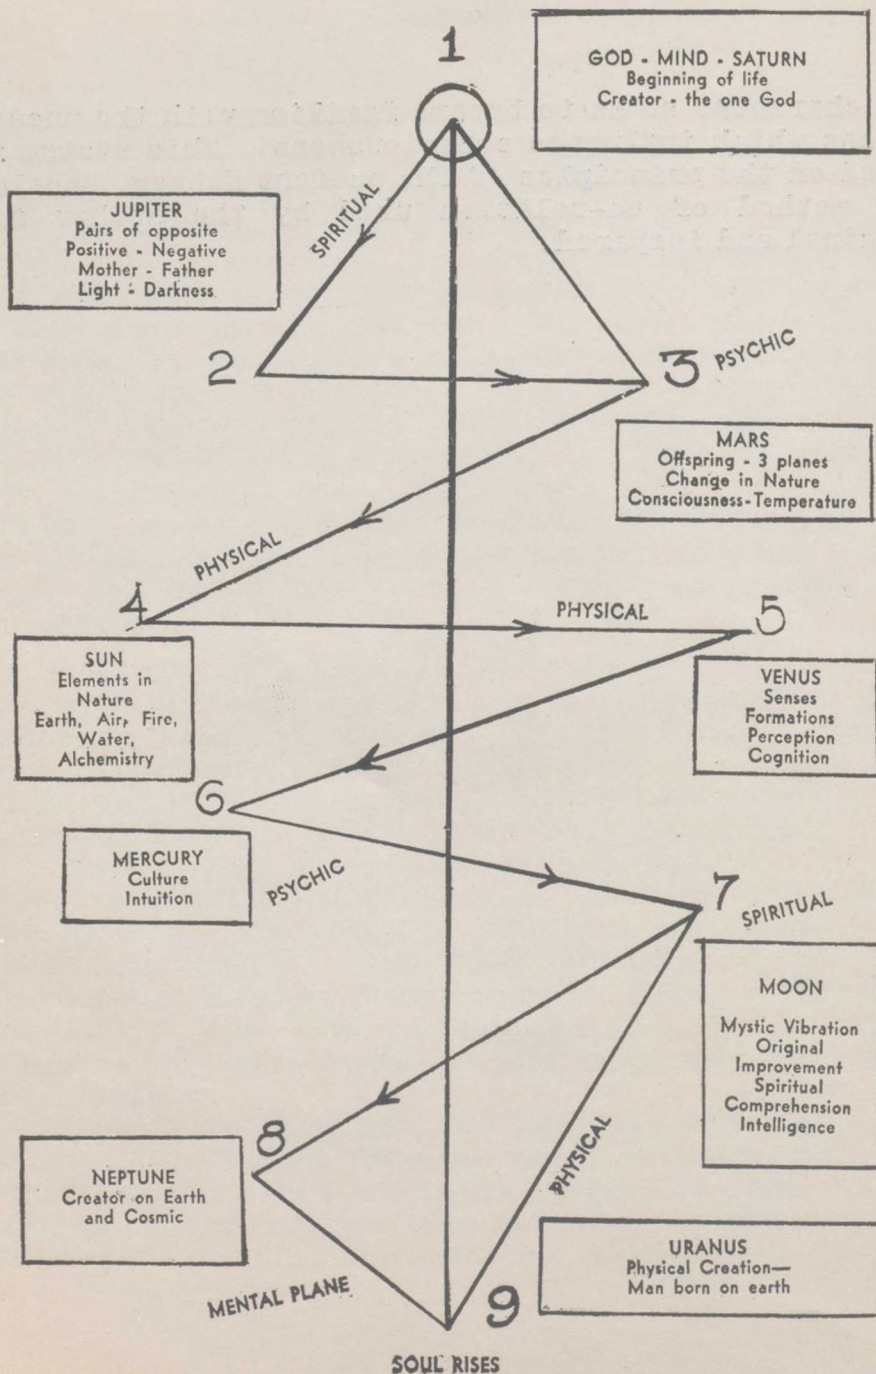

No. 9-Uranus, 9th, 18th, and 27th of any month.

This Planetary influence is the last of the influences on Numerical Values. It gives forth Psychic Soul Vibrations, governing reproduction. Under this influence we find Sculptors, agriculturists and landscape artists, doctors and physical culturists.

They originate physical systems and love to display their talents to the world. Great charity workers are among No. 9 people, yet they are not always prosperous themselves. Also they are often founders of systems for physical improvements. They love physical perfection, home life, and are domestic minded. Their business always spreads out and develops under their own guidance.

This ends Numerical co-relationship of ruling planetary influence based on Kabalistic Equation, not on Astrology. When a student desires to read character, he should refer to this planetary co-relation for correct scientific information about one's talents

and character so as to become familiar with the unseen forces which influence consciousness. This system is based on the principles of the ancient Hebrew, Kabala, the method of co-relation used by the author are original and inspired.

The chart opposite shows the origin of life in the Infinite Spirit; its decent into matter; its development into being; the taking of a planetary body. Birth of Physical body No. 9. Then the soul rises after death of body and returns to God, making the complete evolution of man. This is the grand Kabalaistic mystery of Septoth and Ensoph explained Scientifically.

MAGI COSMOLOGY

Chart of the Birth of Sciences and Arts

The circle, symbol of Infinity, used in measurements of spheres has no beginning and no end.

The square, symbol of elements earth, air, fire and water, used to form a cube and in all measurements. Symbol of chemistry, alchemistry and combinations.

The triangle, symbol of the pyramids and divine Trinities, used in geometry and in building arts and in measurements.

A straight line, symbol of life, used in all arts and sciences.

The above chart shows the Kabalistic symbols which form a basis of all the arts and sciences. These symbols, with the single numbers 1 to 9, comprise the basic principles of all arts and sciences. When Kabalistically understood they solve all problems relating to life. For instance: a line, meaning life, drawn two parallel to each other forms a square, symbol of elements and Creation; therefore, male and female are symbolically two parallel lines.

This shows the Kabalistic relationship of Positive and negative. While the other lines  horizontal, symbolize the rise of the soul through positive and negative spiritual power toward God and immortality. Thus the square solves the problem of Creation, cohesion and spiritual progression; while the triangle is related to God--Father, Son and Holy Ghost--also man, meaning--mind, body, soul--proving his sonship. The circle O in numbers has no value in itself, while, when added to a number, it increases its value; such as: 0 added to 6 forms sixty; 0 taken away from the six it is nothing. The 0 is a symbol of infinity which gives man his divine quality which, if taken from man, his existence or the existence of infinity would be valueless. It is round without either beginning or end, denoting eternity; while the straight line has both beginning and end, denoting physical life, matter and the temporal world.

KABALISTIC CHART
of
PLANES OF LIFE AND VIBRATION

MENTAL 1 - 8	PHYSICAL 4 - 5 - 9
PSYCHIC 3 - 6	SPIRITUAL 7 - 2

The above chart showing the numbers co-related to the planes of life will reveal what type a person is mentally; for instance: No. 1 or people born on the 1st or 10th of any month are mental types--No. 8 people also. This shows what type of calling they usually prefer, also it defines the plane of activity of the types.

MAGI COSMOLOGY

Chart of Mind Problems

Common to the types indicated by the number to be used in analysis of character suitable for audience work to prove that all secrets of the mind are known by the trained Kabbalist Magi. Reading of Psychometry is necessary as well as number for success.

Number 1. People born on the 1st, 10th, 19th or 28th of any month.

They are creative, mental type, inventive and original, usually executives in a business. Their problem would be to find a new means of earning money; also, health is a factor. They need concentration power and Super Mind Science training.

Number 2. People born on the 2nd, 11th, 20th or 29th of any month.

They are too emotional and their mind is divided between two ideas. They are usually nervous and tempermental. Their problem deals with two things: success and human relationship. They succeed better through their own plans.

Number 3. People born on the 3rd, 12th, 21st or 30th of any month.

These people are Psychic types, but also business types. They are hard to instruct because of a roving mind. They love companionship. The problem is usually a business problem in the way of adjustment. They must have a settled mind for greater success.

Number 4. People born on the 4th, 13th, 22nd or 31st of any month.

These people are usually unfortunate. Relatives and friends pass on leaving them many cares. They are physical types with a dislike for the physical labors; therefore, they are discontented almost always. Their problem is usually to get money coming to them from a distance or an inheritance. They need self-confidence.

Number 5. People born on the 5th, 14th or 23rd of any month.

These people are material minded; hard to convince; critical and demand perfection in others. They desire home life very much but usually have difficulty maintaining a home. They have too much pride. The problem on their mind is one regarding happiness and

finding the correct vocation. They need mind control.

Number 6. People born on the 6th, 15th and 24th of any month.

These people are psychic, imaginative, nervous and worry entirely too much. They are always imposed upon by others because they are usually negative. Their problem is on a home change condition and on finances. They need to learn to live their own life and overcome fear.

Number 7. People born on the 7th, 16th or 25th of any month.

They are original in ideas, inventive and creative; natural mystics, very sensitive and have great perception. Their problem concerns gain or wealth. They need a manager for their material affairs. They are spiritual types.

Number 8. People born on the 8th, 17th or 26th of any month.

These people are mental types who do mental labor, usually being leaders, founders and originators, designers, salesmen and executives. Their problem is one of desiring contentment and better business conditions. They use their unusual talents to succeed in life. They fear poverty and disease and can overcome them quickly. People turn against them after they have assisted them.

Number 9. People born on the 9th, 18th or 27th of any month.

Physical types with ambitions to be artists. These people are hard to teach; very changeable and quick to be discouraged. They are believers in physical force usually. Their problem is one of human relationship. They desire usually either partnership or marriage, or some one to put over their ideas. They

are creative mentally.

NOTE

When a platform worker desires to use this chart, a good way is to have people in the audience add up their day of birth; like: 22 equals 4; 12 equals 3; etc., then concentrate on their problem. They then tell the lecturer their number of birth date added up; like: 1-3-6-etc. The lecturer then reads their number as in this chart, reading their character in their face also. This is so accurate that an audience is thrilled with results. After the test reading, give the scientific reason why the Kabalistic equation cannot fail, from the chart of life, spirit's descent into matter and its return to God. Use miniature copy of chart on platform.

MAGI COSMOLOGY

Kabalistic Chart of years and events revealing
cause of events in past and future
 $1914 = 1 + 5 = 6.$

This is a No. 6 year of emotions, hatred, and constant change. Throughout the world people will lose their reasoning power and wars and revolutions will be common. This year, however, will contribute to art, music and psychic development, a tendency toward occult science, liberalism and mental development.

$1920 = 1 + 2 = 3.$

This is a No. 3 year and indicates good business conditions because 3 is a number of balanced con-

sciousness and offspring or the product of labor; therefore, prosperity will be common in a No. 3 year, while spiritual values will go wanting. Many become wealthy, but at the expense of spirituality. This is a year of new ideas, inventions and commercial agreement. Many treaties pertaining to trade are signed in a No. 3 year.

$$1932 = 1 + 5 = 6.$$

This is a No. 6 year. Physical forces are rampant and revolutions common. Physical poverty and strife are unusual. Nations lack leadership and spiritual forces seem absent from all governmental affairs. Dishonesty, on a large scale, manifests; but an improvement in trade comes the last part of a No. 6 year. However, intelligence and stability will not rule during these years, yet strides in physical science mark these years as historical; while projects will be launched on a large scale to better the morale of a people without proper leadership. This is a bad world condition.

$$1933 = 1 + 6 = 7.$$

This year shows intuitive leadership for the world, more harmony and through mysterious forces, finance will improve; while great exposures of corruption in high places will manifest. New industrial enterprises will be started all over the world. Governments will fight the unemployment; in many places they will succeed; while religions will go down in many countries unless they are of a true spiritual nature.

The forecast of the year is in accordance with its number from 1 to 9. The year being the sum total of the equation of the number in events and conditions. The following table will show how a student can forecast the years applying the numerical principles to government, business, science, religion, invention, and

social questions. At the end of 9, a physical cycle repeats itself. Therefore, in all No. 1 years or No. 6 years, similar conditions exist; because if you multiply 9, it reproduces itself like: $3 \times 9 = 27$, which, added, is 9; $5 \times 9 = 45$, which, added, is 9. Therefore, 9 is the end of a physical cycle and the numbers from one to nine produce the same conditions each time they appear; such as: $2 \times 2 = 4$, no matter where you see it or how you see it. Likewise every nine years there is a complete evolution in every individual life on the physical plane of existence. No matter if calendars are correct or not, when you begin at one and count 9 years from the 1 to the 9, there is a complete evolution of physical life, according to Kabbalistic equation, for God numbers "even the hair of the head" so the Bible tells us. The following is a table of years and their meaning by numbers which is the total of the year in common addition.

A No. 1 year—

In these years, like 1900 whose Kabbalistic value is 1, great inventions are made for man's convenience; business is progressive and creative; great enterprises are born; new systems of learning founded and great evolutionary progress manifests in business, government, social life and religion. This number, being the number of God, the world is peaceable and people progress spiritually.

By applying this principle to all events you can predict just what will happen in number 1 years. Yet in these years there are often earthquakes and great physical catastrophes because the ruling influence is centered in the God head and physical forces oppose divinity. Saturn is the ruling planetary power, which is an influence of physical chaos.

No. 2 years, like 1901, which added is 2 or 1919

which, when added, is 20, its Kabalistic value being 2. These years are times of combinations and trusts in the business world; agreement between governments; creation of new States; new inventions and new plans of life made by people in general. They are prosperous years, but full of contention. As the ruling force is centered in positive and negative—male and female—therefore, there will be progress in social life, chemistry, art, and science, as well as in industry. However people will be very emotional and easy to anger. In the underworld many sex crimes are committed in this year. Clashing of the elements produce floods and storms which destroy large areas in these years. Apply this principle to all events and you will be able to foretell many things about No. 2 years. Jupiter rules.

No. 3 years, like 1929 = 21 which equals 3, are years of change and business spreads out. All commercial activity is for the better and all enterprises manifest success; for the Trinity of man--mind, body and soul--works with the Divine Trinity. Through this harmony, conditions are good in general. The minds of people are on industrial problems. This accounts for progress in that field. While individuals of the mental type are very successful. Health problems will arise in life and generally passions will be well controlled, and in these years there is seldom war. This is the year of Mars. Physical forces are ruling.

No. 4. Years whose total is 4; like: 1930--is a time of great change because this is a number pertaining to the changing elements of life. It is also the number of the Sun whose rays bring physical upheaval in the elements. Many unfortunate conditions happen all over the world during this year. Spiritual projects fail and the physical world seems to overpower the spiritual forces. This is a good year for inventions

and a bad year for culture of any type or kind.

No. 5. Years, like 1931, whose total is 5, are years of art and science. These years are representative of Venus, god of beauty. However, great industrial disputes, strikes and strife happen during No. 5 years. Revolutions in tropical countries usually arise. Many nations do foolish things in regard to trade as there is no balance in the financial world. This number indicates solving of difficulties which beset man. Therefore, the industrial disturbance and revolutions will be of short duration. The number indicates also development through hardship. Therefore, adjustment of many troubles in individual like takes place during No. 5 years.

No. 6 Years like 1932 which totals 6.

These are years of strife all over the entire world. Wars usually happen and nations disagree. Plotting of nation against nation takes place. There is no leadership for the common people; they are left to care for themselves. Great dishonest projects make a success and exposures seldom come during these years of unstability. There has been recent proof of these statements during 1914, a No. 6 year, we had a world war and in 1932, a No. 6 year, a world panic and war between Japan and China. Also, secret agreements between France and Japan are reported. The next No. 6 year is 1941, when it is prophesied that a world war will be in progress, unless the common people take over their governments through wise use of voting privileges and refuse to support destruction of this entire civilization. Mercury is the ruling planet.

No. 7. Years like 1933 or 1942 or any years whose total is 7. Number of the Moon.

They are years of spiritual growth and influence

people to seek peace and learning. Nations try to reconstruct damages done during a No. 6 year. Business is much improved; great inventions are made; great leaders arise; a period of growth and completion happens in all lines.

No. 8 Years like 1934, and 1943 whose total is 8 are years of the influence of Neptune, a watery soul sign next to the last period in a physical cycle.

This year will see little of real progress except the finish of many projects launched in the preceding year. People mentally will be abstract and dreamy, having great expectations which are not fulfilled during the No. 8 year. However, there are no real obstacles to progress in business and art, while great spiritual events will take place. This year generally is a year of uncertainty in governments and great corporations because of unsettled stock markets.

No. 9. Years such as 1935 or 1953 whose total is 9 are years of completion, the end of the physical cycle; the birth of many new ideas; great strides forward in science; a year of physical prosperity. Religions suffer while the people seek physical pleasure. Mortality is high, and a lack of spiritual force in governments causes duplicity in high places. This year is a year of influence of Uranus, a weak planetary, watery sign, which, however, is creative, denoting time of birth.

The numbers of Revelation 666 total 18, which, added, is 9, the number of man. This number in the next cycle ends materialism and worship of a physical god according to prophecy.

NOTE

When using this Science to forecast, apply the principle of the number governing the year to, first,

one's success in life; second: home life; third: spiritual progress; fourth: to conditions prevalent in the world in general. Build your forecast step by step such as: 1. Success in all lines. 2. Home conditions. 3. Spiritual progress.

Chart of human progress according
to the nine types and numbers.

First, the best days for a person in each month are the ones equivalent to their number of birth, such as No. 1 people are most successful on the first and tenth of each month, etc., etc., as follows:

Success days each month

- No. 1 People--1st, 10th 19th and 28th.
- No. 2 People--2nd, 11th, 20th and 29th.
- No. 3 People--3rd, 12th, 21st and 30th.
- No. 4 People--4th, 13th, 22nd and 31st.
- No. 5 People--5th, 14th and 23rd.
- No. 6 People--6th, 15th and 24th.
- No. 7 People--7th, 16th and 25th.
- No. 8 People--8th, 17th and 26th.
- No. 9 People--9th, 18th and 27th.

In forecasting, include these good days as outlined in the chart for the most fortunate days and numbers of each type.

Forecasting yearly for the 9 types

In order to find the forces which oppose one, you subtract their number from the number of the year; such as: a No. 2 person subtracted from 1933--or No. 7--leaves 5, which is the number of vibrations and planets which will oppose them. A No. 1 person subtracted from a No. 7 year leaves a six, therefore, to get their year forecast you turn to their number in the years and read same, fitting it to their type.

EXAMPLE NO. 1

A person born on the first, tenth, 19th, 28th or a number 1 person--subtracted from 1933--a No. 7 year--leaves six. This will be a year of strife for a No. 1 person. Their affairs will be unsettled; law suits and quarrels will be common, unless they understand self-control and the laws of the mind as taught in Super Mind Science. They may lose heavily financially. They will also argue with superiors, employers, partners, etc. Even domestic difficulties arise.

EXAMPLE NO. 2

A No. 3 person born on the third, twelfth, 21st or 30th of any month, subtracted from 1933, a No. 7 year, leaves No. 4.

Therefore, 1933 will be a year of constant change for a No. 3 person. Physical obstacles will be encountered, such as ill health, both of themselves and others unless they are skilled in the science of mind and life, like Super Mind Science, because they are influenced during this year with many changing conditions. The spiritual understanding will be tested severely; their mind will be unsettled. In their personal affairs their year is a No. 4 year. While universally this year is a No. 7 year and good times generally are predicted; but No. 3 people are not benefitted very much by these conditions unless they are masters of self.

EXAMPLE NO. 3

A No. 1 person born on the first, tenth, 19th or 28th of any month, subtracted from 1934--a No. 8 year--leaves seven, giving one and seven as ruling numbers. Their affairs will prosper and they will be benefitted by a No. 1 year in all their affairs; gain great inspiration and lay solid plans for the future.

Chart of number of birth and years

No. 1 People--1933 subtract 1 from 7 = 6.

No. 2 People--1933 subtract 2 from 7 = 5.

No. 3 People--1933 subtract 3 from 7 = 4.

No. 1 People--1934 subtract 1 from 8 = 7.

No. 2 People--1934 subtract 2 from 8 = 6.

Apply this same rule to all of the years and types, using the information found in numbers of the years as the forecast, fitting it to the persons affairs. This gives unusually accurate predictions. If the number of the person is larger than the number of the year, as a No. 9 person being forecast for a No. 7 year, you take the smaller from the larger, reading their affairs as a No. 2 year--a year of creative forces. This may be said to be adding up and subtracting forces of life, mind and God, and finding the results through equation. This is a hitherto unknown science, therefore, you must experiment with the rules outlined before you can demonstrate it perfectly.

MONTHLY FORECAST

To forecast each month for the 9 types, you find the numbers in each month which harmonize with the persons number; such as: a No. 1 person will succeed better in a No. 1 month--1st or 10th day--better than any other. However, their success is influenced by universal conditions and these numbers must be read in light of the year forecast which should precede the month by month forecast. Also, No. 1 and 10th, 19th and 28th days of each month will be harmonious for a No. 1 person, because these numbers added together make 10, which equals a No. 1.

The following table shows months and days harmonious to the different types, but must be interpreted in light of the year, using the year as the general prin-

ciple. When one's number corresponds to the month, day and year, these are climax days in one's life according to the meaning of the numbers--very fortunate.

Chart of fortunate days and months:

No. 1 persons, Fortunate days: 1st, 10th and 28th--Months 1, 10.

No. 2 persons, Fortunate days: 2nd, 11th, 20th, 29th--Months 2, 11.

No. 3 persons, Fortunate days: 3rd, 12th, 21st, 30th--Months 3, 12.

No. 4 persons, Fortunate days: 4th, 13th, 22nd, 31st--Months 4.

No. 5 persons, Fortunate days: 5th, 14th 23rd --Months 5.

No. 6 persons, Fortunate days: 6th, 15th, 24th--Months 6.

No. 7 persons, Fortunate days: 7th, 16th, 25th,--Months 7.

No. 8 person, Fortunate days: 8th, 17th, 26th--Months 8.

No. 9 persons, Fortunate days: 9th, 18th 27th--Months 9.

To find one's forecasting number add the number of the person, then add the number of the month and year. Example:

No. 1 person; 1 month, 1933; A No. 7 year--total 9, which is the forecasting number for the month of January for a No. 1 person, 1933. Now, February will be a No. 2 month, so the forecasting number will be No. 1 person, No. 2 month, No. 7 year, which, added, gives 10, which equals No. 1, which is the forecasting number for February, 1933. Apply this rule to all the months of the year. The following table of the meaning of

forecasting numbers represents principles to be applied to all conditions in the month forecasted except the fortunate days of the month corresponding to the number of the person.

Table of Forecasting

No. 1 forecasting number indicates good conditions in business, home and all walks of life. This is a strong, creative, vibratory force for creative good.

No. 2 forecasting number indicates a month of much action in financial affairs. It is a month of accomplishment and results. If a person is positive, many of their dreams are realized in this month. This is a good month, also, for plans.

No. 3 forecasting number.

The number of consciousness; good business conditions; many debts are paid; good results come from past plans.

No. 4 forecasting number.

Affairs unsettled; beware of changes; discontent; and malicious enemies in business and socially. A month of schemes and dishonesty. Don't make hasty moves. Be conservative all this month.

No. 5 forecasting number.

A month of difficulties but they can be solved. Good for art, music and education. Business unsettled; world conditions changing and lack of stability.

No. 6 forecasting number.

A time of great intuition and spiritual power but a lack of physical force to carry out plans. People are lazy mentally; business is not good. However, there is not a complete collapse. This is the end of the working cycle.

No. 7 forecasting number.

This is a month of success, inspiration and opportunity, preparation for great strides in all affairs should be made. Favorable mystic influence gives the world needed inspiration.

No. 8 forecasting number.

Unfortunate influence govern human affairs. However, this month favors justice and art and education.

No. 9 forecasting number.

Nine is the number of man, the physical world, etc., the end of a cycle. Therefore, it is a month of birth, new ideas, and results in physical affairs; a month when investments pay dividends. Read all affairs accordingly.

FORECAST EXAMPLE

Person No. 2 add to No. 7 year add No. 1 month--10 which gives a No. 1 forecasting number for this month. You now predict as follows:

The month of January, 1933 will be a fortunate month for all persons born on the 2nd, 11th, 20th or 29th of any month because it is of a strong vibratory power in their favor. They will plan new deals and extension of business. Also they will contact new friends, have financial assistance and decided advantages will come during this month provided they use good judgment. World conditions are favorable to success, since No. 7, the number of power and wealth is ruling the year favorable to No. 2 people who represent the creative power in nature. Their unfortunate days are 4th, 13th, 22nd and 31st; therefore, be conservative and careful on these days because they total No. 4, the number of the changing elements.

Forecast of February for No. 2 people, 1933

NOTE:

Add No. 2 of person to No. 2 month and 7 year=11 which equals No. 2, the forecasting number for February. This is a No. 2 forecasting number for a No. 2 person. A climax for good in all their affairs. Forecast as follows:

During February, 1933, No. 2 people born on the 2nd, 11th, 20th or 29th of any month will be successful.

Their past plans will bring forth results favorable to them; friends will assist them in large projects; and, if they use good judgment, finance will be good. Their fortunate days are the 2nd, 11th, 20th and 29th. They will have opposition on the 4th, 13th and 22nd, 17th, 8th and 26th. These days they should be conservative and not make agreements. Other days are very favorable. You will need to study mental science so as to take proper advantage of your opportunity to lay plans for your future during this month. A No. 7 year is favorable to your type, therefore, this month, the second of the year, is one of your golden opportunity times of your life. But remember success is always the result of hard work and not something which comes unless you do your part. Don't wait, but create. This month is a good vibration for you, but you are the one to take advantage of it and use it. Follow this same rule to read or forecast for any of the nine types, but remember that the tenth month is a No. 1 and the eleventh, a No. 2; and the twelfth, a No. 3. When the physical cycles revert to a No. 1, No. 2 and No. 3 forecasting number, which you use remembering it is the last part of the year and not the first, this system is far more accurate than astrology, provided it is used correctly. As the number of the year changes you can go on forecasting forever. This is not fortune telling. It is the working of the laws of the Cosmos in nature, for all nature works in cycles; this being the reason that the year is divided into seasons, four in number, and nine months is required for physical birth and twenty-one years, or No. 3, is the number of God and responsibility. This system extends to the end of God's domain and is according to His laws. Much of it was revealed to the author while his spiritual consciousness was absent from the body. As the Magi of the East say, Om, Sat, Tat. God is all—and many blessings to the reader.
