DAILY ASTROLOGICAL GUIDE

The following Daily Guide, Forecast and Analysis are written according to my opinion of celestial aspects and indications. Thus my opinion may not at all times conform to known ancient and modern text book rules of Astrology. You will also note that I have added some new features to this work which may prove interesting, instructive and helpful to you.

Central Standard Time is used in this work. If you live in Eastern States, add one hour to time given. If living in Mountain States subtract one hour. If in Pacific States, subtract two hours.

Because of numerous requests, I have continued to give you the day by day guide for 1937. I have endeavored to give you my best in this work. You, however, are the judge and must consider every statement in this work as being my personal opinion based upon my study, patient research and careful observation of celestial indications and a study of Natural Laws which govern the Universe and Life. There is nothing supernatural, mysterious or difficult to understand in this work. There is no occasion for any superstition in the natural events of every day life.

The information given in this work requires your careful attention and analysis. It is up to you to make the most of what I have given. If the indications show, a given day, hour or period is good, it is up to you to wisely direct your thought, attention and effort in making the most of the good aspects, regardless of your position or station in life. You must consider that the "Stars" indicate, but do not compel any event or activity to take place. You, and you alone are responsible for your thoughts and actions. It is true that all of us have inherent tendencies to which we give way, but even this is under the direction of our will and consciousness. This work can only serve you as a guide to your possibilities and prospects. It can only point out to you the indications which are in operation. Your reaction to these indications depends upon yourself. Only you can direct your thought and action.

It is well within your rational ability and power to make the most of the good aspects and indications. There is a time and season for everything under the Sun. This work endeavors to point out your more favorable and unfavorable days and periods, so that you may wisely prepare yourself accordingly. You should do all you can to advance yourself and affairs under good aspects. When aspects are unfavorable; it is advisable to proceed cautiously, patiently and thoughtfully in all affairs. By so doing you will wisely avoid all possible mishaps and difficulties which arise as the result of carelessness, haste, impulsive decisions and actions. Use your will and determination to curb sensitiveness, temper, moodiness, etc., and all will be well. All of our unpleasant experiences and accidents come upon us in an instant, during which we are not thoroly aware of all that is going on around and about us. Study the daily guide carefully, also the other features, so you will be able to derive the greatest benefit from this work and create the conditions for yourself which brings greater success and happiness.

Your birthtime shows that you come under the indications of the Airy sign, Gemini, third sign of the Zodiac; ruled by Mercury. The following analysis is my personal opinion of your sign, judged accordingly.

Moon in AQUARIUS

PERSONALITY, CHARACTER, TEMPERAMENT. You are affectionate, courteous and diplomatic in disposition; also inclined to be changeable and impulsive at times, particularly in a mental sense; which often causes you to be misunderstood by others. Your moodiness is due to your sensitiveness and acquiring mentality and your reactions to your thoughts. You are inclined to live and reflect your every thought. There are times when you are generous and others when you are not. Furthermore, you are inclined to be talkative altho this is no reflection on your character as your mind is active and naturally requires expression in speech.

Your personality is attractive and magnetic, but you may enhance its value by the cultivation of tact, especially on occasions when you are more or less inclined to be moody and sensitive. You should also cultivate and keep your naturally charming and pleasing manners. You are fond of being looked up to as an authority in some capacity, so you may as well live up to your desire in reality. Under normal circumstances you will be well liked by all you meet and by proper effort you will draw and influence others to mutual advantage by your powers of speech and writing. To do so enhances your prospects of attainment in life.

MENTALITY, SUBCONSCIOUS MENTATION, INTUITION, INSPIRATION. You have an interesting and active mind. Indications show wit, originality of thought, humor, changeability, vivid imagination and forcefulness of thought in speech when you so desire. You possess quick perception. If properly developed, you have good subconscious mentation, intuition and foresight. It is unfortunate if you permit moods to influence your better judgment as this deprives you of the proper perspective and difficulties may follow. You will do well to develop your latent qualities of determination, persistency and patience. You are stubborn to a degree, but not always as persistent as you should be. It is advisable to cultivate the latter and use it to your personal advantage in your efforts to attain success. Avoid starting things and not finishing them.

Your imagination often causes you to desire to live a picturesque and romantic form of existence which is impractical, herein may lie one of your greatest difficulties. You are an idealist and when your ideals are shattered you are disillusioned. Life seems to hold nothing for you for the time being and you are depressed. Give your imagination the proper training and its practical value will enhance your prospects of success in your efforts. Use its energy for constructive visualization and planning. You may find it to your personal advantage to use its energy in matters connected with your practical, every day affairs.

If you have given yourself, or will give yourself the proper mental training you will find that your subconscious mind will furnish you with much useful material; also with inspirational ideas and foresight. You are capable of thinking up original ideas, but these must be acted upon before you can realize any practical value from them. People of your sign who are successful in writings apply their thoughts constructively.

HEALTH AND DIET. Indications show a somewhat sensitive and nervous temperament which unless controlled, reacts quickly to conditions, circumstances and environment. It rules the chest, lungs, hands and arms. These parts are most apt to be affected if you do not exercise good care of your health. It is advisable not to overwork body or mind as this appears to tax the nerves and makes you irritable. Use care in your diet and eat wholesome and nerve strengthening foods. Avoid exposure to colds, take immediate care of them after contracted. Plenty of fresh air and sunshine are essential to you. Furthermore, sleep in well ventilated rooms, never confine yourself to stuffy quarters, although some people would be able to withstand it, one of your temperament could not do so. Avoid mental depression and worry, when you are depressed be sure to use good judgment in diet, as you are quite mental and inclined to react to such stimulus. In case of illness consult good medical authority, for life is too precious to be tampered with.

ROMANCE, LOVE AND PLEASURES. You are sensitive, affectionate, tender and refined in your love nature, but your affection and mild passion are contingent upon your mental moods. You are capable of being warm and sweet, or cool and indifferent. If your mind is very active, you show indifference and may be misunderstood by one who loves you. When you desire, you can be exceedingly expressive and emotional. More than one affair of the heart is indicated. Indications show you care for many people from a mental rather than physical point of view, this often causes others to think you flirtatious and flighty, when in reality, you are interested only in mental companionship. You are quite jealous of the object of your affection and your love can be cooled by continual misunderstandings in mental life. You have unusual ideals relative to your love life and romance in which imagination plays an important part. You require a mental, physical and ideal balance in your love life.

Indications show that you are fond of pleasures, attending theaters, plays and take an active interest in sports, motoring, entertainments and reading. Unless these are indulged in to excess, they are beneficial. You also find pleasure and wholesome relaxation in mild exercises.

MARRIAGE AND ALLIANCES. Indications point to more than one outstanding love affair or marriage in life. Thus it is that you should exercise good judgment in the selection of your life's mate. It is difficult in this analysis to state whom you should or should not marry, however, the types indicated by the following signs appeal to you: Aries, Leo, Libra, Aquarius and your own sign. These types of the mental and balanced physical and magnetic qualities appear to blend in with your nature. You have something in common with types indicated by Virgo, Sagittarius, Taurus and Cancer, but contacts with them are not always harmonious. Your sensitive love nature requires one of an affectionate and refined disposition, so by selecting the proper type of mate, life takes a brighter aspect and your love acts as a stimulus for greater accomplishments. The true purpose of marriage is that of love, harmony and inspiration to go forward and upward, one with another. A comparison of birth charts prove interesting for it reveals facts necessary for a happy marriage.

CHILDREN. Indications give promise of very few in the course of life, however, this cannot be given as being exact in this general analysis. You possess an intense love for children and altho your parental love is very devoted, you are at times, critical. Children born under your sign are prone to be somewhat nervously inclined and mentally active. Proper training and education give children a background for future success so see that your loved ones receive their just rights.

DOMESTIC AFFAIRS AND HOME LIFE. It appears you have a somewhat critical nature regarding your home life. You wish to have everything just so and you are inclined to be irritable if they are not as you desire. You are quite sensitive in your reaction to home surroundings and a moderate amount of consideration for others on your part in this respect will tend to make your home life happier. Since your active mind must feel expression, why not make it constructive and harmonious to the mutual happiness of all. It is true you do not always enjoy the mental companionship in domestic life as you desire but this should not cause you to divert your mental energy into useless argument. The changeability of your mind makes it evident that you become bored with the sameness of things and you do not like to live in one place too long at a time. This state of affairs naturally arises from your active and inquiring mind. Thus it is that a vacation or a few days away from home surroundings appear to do a great amount of good and cause you to be more or less content until the next period of restlessness asserts itself. People of a fixed nature are unaffected by these things and therefore cannot understand why one of your temperament desires to seek relief from familiar surroundings. Confinement has no appeal to you.

VOCATION, BUSINESS, PROFESSION AND PARTNERSHIPS. You enjoy the type of work which gives you the greatest mental expression, your mind being of a versatile and adaptable nature fits you for many kinds of work. You possess ability for writing, journalism, legal and clerical work, music, art, teaching, lecturing, traveling, salesmanship, inventing, mechanic, electrical and construction engineering, aviation, secretarial or other such work which affords expression to mind and body. When working, you apply yourself efficiently and industriously until you become bored, it is advisable to overcome this tendency. Often you desire to follow more than one line, or have a hobby apart from your regular routine activity. You have the natural ability of rising in your work, business or profession. Often men of this sign prefer to follow railroading or other such lines which afford opportunity for travel, etc. Both men and women are usually good promoters, have acting and musical ability, dancing, etc. However, much depends upon positions of planets at time of your birth as well as training during childhood and youth.

When in business for self, people of your sign are capable of managing stores, print shops, private schools or tutoring, transportation lines, electrical or machine shops and messenger service. In partnerships, you are inclined to be independent, desiring the upper hand, which is likely to cause dissension. However, if you are thoughtful and considerate you can prosper in such ventures. Your apparent understanding of human nature enables you to meet the public with fair success.

FINANCES, INVESTMENTS AND SPECULATION. Your financial circumstances, like your moods, vary but the general indications are rather good. Your earning capacity is good but you are inclined to be somewhat of a spender and more often than not spend your money for things which lend a temporary rather than a permanent benefit. You are fond of dress and finery but of course, this proves to be to your personal advantage, however, it is advisable to be reasonably moderate in expenditures. Regarding investments, you will do well to invest in real properties under normal circumstances, or in large corporation or government bonds. You have a somewhat speculative nature and are inclined to taking chances in dubious propositions at times. You have no desire to invest in slow maturing ventures for you like a quick turnover but my advice is to carefully study your chances in all speculative deals. Financially, some degree of success may come from dealing with automobiles and other such things which have to do with transportation, aviation and communications, etc. Your general financial prospects during your lifetime are favorable. Be conservative and insure independence.

TRAVELS. Your restless nature gives you the desire for travel and no doubt you will appease this longing considerably during your lifetime.

FRIENDSHIPS AND SOCIAL LIFE. Indications show that you will have many interesting acquaintances in your life and a few real and loyal friends. Your choice leans toward the intellectual and mental types of associates and friends for you receive the most enjoyment from them. It is evident that you will always command more or less, the respect and admiration of those friends. A love of social life and desire to mingle with people is apparent, your social standing appears favorable.

HANDICAPS AND OBSTACLES. Your greatest handicap in life may or may not be the fact that you are somewhat moody at times and show an inclination toward selfishness and desire to have your own way. Independence of nature is to be commended but its activity should be constructive. Avoid worry, peevishness and irritability over little things for such detract from your otherwise attractive personality and hinder your progress for success. Endeavor to cultivate patience and persistency.

PROSPECTS OF SUCCESS IN LIFE. Cultivate the more hopeful qualities of your mind; you have them as well as the ability to apply your mental energy. Your success lies in the direction of your application of the positive and favorable qualities and controlling the negative. Take advantage of your natural creative ability. Study such subjects as will enhance your prospects for future success and endeavor to build a state of self-reliance within your nature. Learn the art of planning ahead. Make the past efforts stepping stones to a greater and more successful future. Exert every effort to develop your intuition and natural foresight for you will find this enhances your prospects of attainment in life. It is up to you to apply your God-given faculties and apply your self toward making the most out of your life and its possibilities. Love, friends, harmony and happiness indicated. I trust you have found this analysis helpful and that it will enlighten you in such manner so that you will be able to find more contentment and happiness.

JUDGEMENT OF THE TWELVE HOUSES AND ANNUAL PROGRESSION

The following pertains to the judgment of the 12 solar houses. In one year the earth completes one cycle around the Sun and passes thru the 12 signs of the Zodiac. The Moon requires slightly over 27 days and 7 hours to complete one cycle of the twelve signs. Thus we find the influence of the Moon is constantly changing from day to day. Study the preceding page carefully and learn which signs of the Zodiac correspond to the 12 houses of your solar chart. Also as each sign consists of 30 degrees the simple method explained in the following will help you considerably.

I. FIRST HOUSE

Your birthday, each year, is always symbolical of the end of one cycle and the beginning of another, according to the Sun. The first house of your solar chart consists of 30 degrees and the Sun occupies this house for the period of 30 days following your birthday. This house is known as the house of Personality. It represents YOU. It indicates your personality, character, temperament and deals with all personal affairs and activities. When the Sun, Moon or planets occupy this house or they are in signs favorable to this house, all matters which pertain to your personality and personal affairs come to the fore. This usually means increased ambition, renewed personal interest in all affairs, desire for personal recognition. It indicates a good period in which to embark on new and important ventures, enter into business or partnerships, etc. It also indicates a favorable period in matters of romance, love, marriage, and being a house that is favorable to the houses of mentality, travel and friendships, thus thoughts pertaining to these things will come into consciousness. With some a spirit of adventure and daring is born. The important ages signified by this house are 13, 25, 37, 49, 61. In youth the years signify physical, mental and personal development. Any favorable indications from the Sun and planets indicate a period of much mental and physical activity in all matters that pertain to personal income from work, business, profession and even investments and speculative ventures and gambling. As this house receives unfavorable indications from the 5th, 8th and 11th houses it is advisable to refrain from costly social activities, impetuous romantic attachments, etc. Important ages signified by this house are 14, 26, 38, 50 and 62, particularly in matters of study for practical work or business and in all matters which pertain to personal income, gains from investments, etc. This house also favors investments for expansion in affairs of work, business, etc.

It receives favorable indications from planets occupying houses 1, 5, 7, and 11. It receives good indications from houses 2, 4, 8 and 10. Unfavorable to houses 6, 9 and 12. However, any indication directed to this house is stimulating to the mind and consciousness. This leads to quest of more knowledge, desire for study and self-improvement, social activities, new friends, etc. Sometimes the mind appears to be so busy that it is difficult to keep up with its rapid trend of ideas. At times a state of undefinable restlessness ensues which may or may not lead to interest in many things, subjects, etc. There is an intense desire for changes, travels, new friends, acquaintances, taking up hobbies, new studies, etc. Indications of this house favor dealing with or taking up mental work or studies, printing, writings, journalism, deal with people connected with transportation, aviation, communications, telephone, telegraph, etc. The favorable indications of other houses may indicate rise thru influence of associates, friends and such people as realize your merits. This house plays an important part in the lives of every really successful man and woman. One may work hard thruout life and still not have much, but when one couples industry with wisdom, success is then truly attained. It is, therefore, by wise work that man succeeds. XII. TWELFTH HOUSE

The Sun occupies this house during the twelfth month after birthday. According to astrology this is the house of secrecy, secret enemies, self-undoing, personal disillusionment, state of health, confinement, restrain and obstacles and handicaps in life. This causes many to think that this house is unfavorable. It is the house of secret meditation, mental and personal adjustment, preparation for new conditions, etc. It signifies the end of a cycle. Thus it marks a period of adjustment and changing conditions. To some, especially the wise and industrious this period brings gains, benefits, profits from past work, business, etc. Others may find it a period in which their records do not merit such benefits. These people, unfortunately, are the victims of their own psychology, attitude and outlook on life. Each one is rewarded according to his or her merits and thru capabilities. However, this period favors secret matters, carrying out secret plans, original ideas which require secrecy, etc. Also the thoughtful will find benefits coming from or thru the efforts of friends, associates, employers and others. ANALYSIS OF PERIODICITY

The Law of Periodicity or repetition of cycles has been known through ages. In opinion the Law of Periodicity not only consists of a return of a cycle, but consists of a progressive return. This fact is found in all Nature, evolution of life and in the expansion of the universe, as may be determined mathematically. The following is devoted to various cycles which have an important bearing in astrological study and work.

The rotation of the earth leads us to the first cycle which consists of one day.

It takes 23 hours, 56 minutes and 4 seconds to complete one cycle. All of the twelve signs of the Zodiac appear to rise and set in the course of one day. Hence the actual moment of birth, also the place or longitude and latitude is essential in calculating a horoscope. Thus we find that every day, each of the twelve signs play an important part.

The second cycle is that of the Moon. It completes one cycle around the earth and 12 signs in about 27 days, 7 hours and 43 minutes. Its synodical cycle or from New Moon to New Moon is approximately 29 days, 12 hours and 44 minutes. Each succeeding lunation is almost one sign removed from the preceding. We find that in the course of one month the Moon passes over its own place and that of the Sun and planets at birth. My daily forecast is written accordingly. Thus we note that every day the Moon presents different aspects to natal and transit planets.

The third cycle is that of Mercury. It completes one cycle around the Sun in about 88 days. Its synodical period is about 116 days. It is never more than 28 degrees removed from the Sun and its period of transit over its own place at birth varies from year to year. Sometimes it is ahead of the Sun and other times following the Sun.

The fourth cycle is that of Venus, which moves around the Sun in 225 days. Its synodical period being about 584 days. Its transit over its place at time of birth varies from year to year. Like Mercury Venus may be ahead of the Sun one year and behind the Sun the next year.

The fifth cycle is that of the Earth. This determines the relative position of the Sun from day to day. The earth completes one cycle around the Sun in slightly over 365 days. In geocentric astrology we consider the earth as being the center of all indications directed to it. All things appear to revolve around the earth. Thus once each year we say the Sun returns to its own place. This is signified by a birthday each year. The solar return is very important and signifies the beginning of another important cycle or year in life.

The sixth cycle is that of Mars. Its cycle around the Sun is about 687 days. Its synodical period is variable and takes place about every 2 years, 1 month and 20 days. Thus Mars travels over its own position at birth about once every two years. It may be shorter or longer.

The Seventh and important cycle is that of Jupiter, which completes one cycle around the Sun in about 11 years and 10 months. Its average synodical period is about 399 days. Each succeeding opposition being about one sign advanced from the preceding. Thus we find Jupiter will travel thru one sign a year. It transits over its own place at birth once every 12 years. Its transit over its own position is usually quite favorable particularly during the 23rd and 24th, 35th and 36th, 47th and 48th, 59 and 60th years of age. The oppositions are noticeable during 6th, 18th, 30th, 41st and 42nd, 54th and 66th years of age. Minor uncertain aspects are noticeable in combination with other planets at 20 to 22, 27 to 29, 44 to 47 and 57 to 59 years of age. During the opposition and uncertain years use care in financial matters, business, work, domestic, health and legal affairs. Jupiter tends to expansion, but in critical periods one is apt to overstep and the result is loss.

The eighth cycle is that of Saturn, which completes one revolution around the Sun and earth in less than 30 years. Its synodical period is about 378 days, showing its annual opposition to the Sun finds it less than one half sign removed from its former position. It takes Saturn a little more than two years to transit thru one sign and it returns over its own position once in less than 30 years. Its minor and major unfavorable periods come at the ages of 7-8, 14-15, 21-22, 37-38, 44-45, 50-51, 61, 73-74. The transit of Saturn over its own place at the age of 29 to 30 is not always unfavorable, but often responsibilities come into life which leads to consistent growth and recognition, promotion, gains and profits in face of obstacles, hindrances, etc. Minor good aspects of Saturn to its own place are noticed at the ages of 6-7, 10-11, 19-20, 24, 35, 40, 48-49, 60, 64-65, 69-70. Saturn's aspects to natal planets remains in activating or for more than one month at a time.

The ninth cycle is that of Uranus. It completes one revolution of the Sun and 12 signs in about 84 years. Its synodical period is about 370 days and it travels thru one sign in about 7 years. It transits over its own position during the 84th year. Critical ages are 11, 21 to 23, 33, in some cases from 41 to 45, 54-55, 63 to 65, 73-74. It applies to good aspects to its own place during the ages of 14, 30-31, 57-58, 70-71, 77. It remains within orb of aspects for about a year. Uranian periods are usually very active and with other indications being favorable at the time show periods of rapid advancement, recognition, sudden gains, new ideas that lead to success, etc. Its unfavorable indications tend to changes, estrangement, separation from others, etc. During such ages one is apt to be sensitive, temperamental and easily upset and there is a tendency to impulsive decisions, unwise moves, changes, etc. Also take good care of health, be conservative in financial matters, etc.

The tenth cycle is that of Neptune. It completes one cycle in about 165 years. Its synodical period being about 367 days, showing that it advances only two degrees a year. It remains in one sign about 14 years. Thus in some instances when it transits over the position of any planet in your birth chart, its favorable or unfavorable indications may last for two years or more. Its square aspect takes place during 40 to 43 years of age. It signifies such changes in the human system and mind that take a long time. It also appears to have a bearing upon the body, mind and emotional nature. However, in this work I cannot touch upon the influence of this and other planets, for this you must refer to my course or some other course in Astrology. Know Thyself, study astrology.

The MOON, SIGNS, PLANTING, FISHING, ETC.

By Rev. Matthew N. Mattson

The following will give you an idea of the general indications of the Moon in the twelve signs of the Zodiac. The sign position of the Moon is to be found in the Daily Astrological Forecast.

ARIES is known as the first sign of the Zodiac. It is ruled by Mars. It is a cardinal sign. It is known as a fiery sign, being hot, dry and barren. It rules the head and face. When the Moon is in this sign it is not a good time to plant the majority of seeds, the possible exception being such herbs and plants as are ruled by Mars, which are, beets, onions, tobacco. When the Moon occupies this sign, it is a good time to plow, till, harrow and cultivate the soil; also destroy weeds, etc. Many astrologers find that it is not advisable to have operations on the head and face when the Moon is in this sign. This sign favors baking, cooking and such matters as deal with fire, steel, iron, etc. It is good for hunting, fair for fishing.

TAURUS is the second sign and is ruled by Venus, the planet of love. It rules the neck and throat. Its element is earth. It is known as a fixed sign. This is a productive sign and when the Moon is in this sign it is a favorable time to plant such vegetables as potatoes, carrots, beets and such other produce that develop underground. During early Spring months, when the Moon is in this sign, it is increasing in light and also favors the planting of such vegetables as develop above the ground, also, wheat, rye and other grains. It is a fairly productive sign for setting eggs. It is not a very good sign for fishing, but fairly good for hunting. The Moon in this sign also favors buying personal effects, household necessities, groceries, etc. Attend sales, deal with merchants, creditors, etc.

GEMINI is the third sign and is ruled by Mercury. Its element is air. It is known as, dry, cold and barren. When the Moon occupies this sign it is not very good for planting, but good for tilling the soil, cultivation, destruction of weeds, etc. Gemini presides over the chest and lungs. It is also known as a mental sign and favors discussions, interviews, reading, study, dealing with writers, newspaper people, printers, grocers and such people as deal in small commodities, books, telephone, transportation, education, lectures, etc. Fairly good for hunting during the fall months, but not very good for fishing.

CANCER is the fourth sign and is ruled by the Moon. It presides over the stomach. Its element is water and is known as the most fruitful sign of the Zodiac. Thus it is favorable for planting of all vegetables and grains. It is also a good sign for setting eggs, breeding animals, transplanting trees and plants, etc. When the Moon is in this sign it favors changes, moves and improvements in home affairs, also dealing with relatives, parents, etc. It is a favorable sign for fishing, only slightly good for hunting. It is also a good sign for baking bread, cakes, etc.

LEO is the fifth sign and is ruled by the Sun. Its element is fire and it is known as hot, dry, barren and unproductive. It does not favor planting of any kind. It is, however, good for tilling the soil, plowing, destroying weeds, removing or deadening trees, etc. While the Moon occupies this sign it favors sports, recreation, personal pleasures, a tendency for gambling or speculation is often noted. This sign rules the heart and back. Thoughts of love, romance and courtship are presided over by this sign. This is not a very good sign for fishing, but favors hunting.

VIRGO is the sixth sign and is ruled by Mercury. Its element is earth. It presides over the intestines. It is known as a barren and unproductive sign, therefore, it is not favorable for planting, but favors clearing lands and preparing the soil for planting. Virgo is the natural sign of industry and people born with the Moon in this sign at time of birth are very industrious. It is also known as the natural sign of health and presides over nurses, healers, medical men, dieticians, etc. When the Moon occupies this sign, it is a good time to deal with such people, also with tailors, merchants, grocers, manufacturers, employers and many such people as signified by the sign Gemini. Poor for fishing, only slightly good for hunting.

LIBRA is the seventh sign and it is opposed to Aries. It is ruled by Venus. Its element is air. It presides over kidneys and small of back. This is the sign of natural beauty. It is fruitful and favors planting of grain, corn, hay and such things as grow above the ground. It is very good for the planting of flowers. However, it is a social and artistic sign in a general sense, thus it favors friendships, social activities, alliances of personal or business nature such as marriage and partnerships, etc. It is also known as the sign of contention and competition, but points to balance, justice and adjustment in affairs. It is only slightly good for fishing and hunting.

SCORPIO is the eighth sign and is ruled by Mars, some astrologers claim Pluto for its ruler, others Neptune. Its element is water. It presides over the reproductive organs. It ranks next to the sign Cancer in fruitfulness and, therefore, favors all sorts of planting, transplanting, breeding, setting of eggs, etc. It is also good for fishing and hunting. Scorpio is opposed to the sign Taurus. It is also known as the sign of credits, accounts, the goods of the departed, etc. It is not an active social sign but favors family matters, dealing with relatives, etc. However, when the Moon occupies this sign and is favorable to your birthsign, it does favor social affairs, etc.

SAGITTARIUS is the ninth sign. It is ruled by Jupiter. Its element is fire. It presides over hips and thighs. It is hot, dry and barren, yet it is the most productive of the fiery signs, being but fairly good for planting hay, onions, cucumbers and the like. It is very good for plowing, tilling, breaking the soil, etc. It favors hunting, sports, etc., but not very good for fishing. This sign is opposed to Gemini and is an intellectual or higher psychic sign. It favors social and business affairs, dealing with learned people, doctors, surgeons, attorneys, educators, judges, bankers, brokers, publishers, ministers, writers, etc. It favors important and practical studies, writing, philosophy, history, religion, psychology, science of all kinds. A good time to begin study in a course of personal improvement, or increase knowledge of work, business or profession, etc. To some this is a sign of inspiration, new ideas, forming future plans, etc.

CAPRICORN is the tenth sign and is ruled by Saturn. Its element is earth. It is somewhat productive; however, it favors root crops more than surface crops. Plant potatoes, beets, turnips, etc. Capricorn is opposed to Cancer and rules the knees. Cancer represents the home, Capricorn represents the business affairs or work of one's life. When the Moon occupies this sign, it is a good time to deal with learned people, elderly people, employers, merchants, creditors, public officials, etc. It also favors construction laying of foundation, preparation for building, plumbing, the marketing of produce and products of the soil. It is fairly good in social matters, buying personal effects, dealing with realtors, land owners, construction contractors, etc. But is not very good for hunting or fishing.

AQUARIUS is the eleventh sign and is ruled by Uranus. Its element is air. It presides over the ankles and nervous system. It is known as a barren and unproductive sign and therefore, does not favor planting, but favors tilling of the soil, etc. It may be considered fair for hunting, but not very good for fishing. This is a humanitarian, friendly and social sign. It is the sign of brotherly understanding. Thus we find that when the Moon is in this sign and the day is favorable, as given in the daily forecast, it is a good day to be with friends, visit, hold interesting discussions, exchange ideas, seek help from friends, aid friends, etc. It is also a sign of science, aviation, philosophy, invention, electricity, etc. It is the most universal sign of the entire twelve. In business or daily affairs it favors dealing with all types of people, especially if the day is favorable to your sign. It also favors writings, correspondence, theaters, sports, personal pleasures, etc.

PISCES is the twelfth sign of the Zodiac and is ruled by Neptune. It is known as a watery, fruitful and productive sign, similar to Cancer. Thus it is favorable to all kinds of planting, setting eggs, breeding animals, etc. It is fair for hunting and favorable for fishing. In personal affairs this sign is often thought of as being unfavorable. However, this is not true in accordance to my observation of many years, in the majority of instances. It is in reality the sign of secret meditation, concentration and plans for future development, expansion and improvement in personal, business or industrial and other affairs of life. However, it is often true, that one's previous actions may cause unpleasant reflections at times, but the actual inception of such event, be it major or minor does not usually take place under the influence of this sign. It is in reality the sign of preparation for a new cycle which is about to begin when the Moon, Sun or planets will enter the sign Aries. Thus if a man follows the actual principles of Nature and applies them to his personal and daily life, he will eventually rise to greater heights of success, happiness and enjoyment of life. You will find my great course entitled Selfology or self knowledge will enable you to get more out of life than ever before. It is written as the result of many years of patient study and observation of nature and human life. However, the Moon in this sign favors personal readjustment, development of new hope, courage, will and determination to make the next cycle greater than ever before, if one will but apply himself or herself for this evolutionary purpose.

ADVICE

From the foregoing you may readily see that when the Moon occupies the signs Cancer, Scorpio and Pisces, it is the most favorable time for planting and should be used whenever possible to do so. Next in the order of fruitfulness you will note in the following order Taurus, Capricorn, Libra, Aries, Sagittarius and finally Aquarius. It is not advisable to sterilize fowls and animals when the Moon is in signs Virgo, Libra or Scorpio as this appears to have an unfavorable influence upon their recovery.

Some people have noted good results in planting when the Moon is increasing in light, that is going from New Moon to Full Moon, especially when it is in the signs Cancer or Taurus for planting such crops as develop above the ground: such as beans, peas, lettuce, tomatoes, cabbage, etc. In the dark of the Moon, that is, from Full Moon to New Moon and when in signs Scorpio, Capricorn or Pisces favors root crops such as potatoes, beets, carrots, turnips, etc.
