MIND

(Mindology, the Newer Psychology)

"Powers of Life are unlimited, except when made otherwise by man's own ignorance, displicense, and passions".

K. H.

We are now bordering on a new realm. Whether we call it MIND, or SOUL, it matters little. Let us not linger on age-old doctrines and futile theories. Let us be always mindful of the fact that Nature is wise, and that even our best knowledge can always stand some sort of improvement.

Regardless of what you have learnt about the mind heretofore, you must realize that you are now entering into the new knowledge regarding the Mind, which is far greater and wonderful than what has ever been uttered. In fact, it is only now that we are —as last— reaching the secrets of the Mind, the Holy of Holies of Conscience, and the magic treasure-vault of Vitality.

The Mind is an association of forces. The character and combination of these will make the whole difference between the genius and the moron, Health or morbidity; Creativeness, or crime; Happiness, or misery, want, limitations, and stupidity; high rate intelligence, or sentimentalism and weaklings' delusions; and noble-mindedness, or instinctive and undignified livelihood.

When we say that we must VITALIZE our Mind, we infer that we must need to energetize and readjust it.

In these troubled times of war consciousness, like at all times when our soul is weary, sick, and depleted of energies after prolonged strains and great passional outbursts and painful disillusionments, the Mind needs revamping, and replenishment, as well as reconditioning. This implies a general overhauling, retiming, and recharging.

People ignore too much about this, and only too often overlook the fact that our individual being is as much in need of careful attention as the most perfect set of machinery. Our being is in fact, the most delicate mechanical contrivance extant, and for that reason alone it deserves a constant and painstaking upkeep, besides all the benefits we derive from it in forms of Health, Power, Happiness, and Plenty.

Mind Readjustment

The same care that we give to a high precision motor should be given to our Mind, if not better. Our Mind needs constant overhauling and readjustment. If we are not overly careful in these things, we are bound to have false landings and tragic consequences. The menace is constant... yet so few people ever pay any regard to their Mind. They don't know what they are losing, and much less the risks they are incurring into.

Political and Religious organizations are too intent on their side-issues, or rest too much on their dogmas, doctrines and traditions. Orthodoxy is linked to eventual interests, and sovereignty and ambition stand as their mainsprings. However, no one seems interested in human nature itself. Everyone exploits man in a way or another, subject him to regimentation or servitude without ever considering man's own inner needs and individual yearnings and designs. For sure, the interests of God and the State are important, but hardly so to the point of converting man into a toy, a serf, or a simple, irresponsible cogwheel. The world needs to

In this process our technique must rely mainly on our own inner mental functions, under the guidance of our Conscience. We are not supposed to seek outside help, but to achieve ourselves what purpose we strive for, or set ourselves to reach. The mood to be adopted is not just a PASSIVE one, or of expectation and faith, but an ACTIVE one, or of dynamic creativeness.

When we indulge in Mystic Communion, we actually contact the better forms of Universal energy (Prana), and we thus sublimize ourselves. The very act also replenishes us. We grow with our own efforts!

RADIOMIND
MAN'S MASTERY OF COSMIC LIFE
Creative Consciousness

Human faculties are inalienable, being the outcome of fundamental qualities of the Mind.

The Mind functions in the atoms as **ATOMIND**, and in the Cosmos as **COSMIND**, because it is the foundation of all things, and also the basis of all developments.

It matters little whether we call this Mind "Natural Forces", "extradimensional might", or "heterodynamics"; it is the fundamental energy of life. Some may even call it *Alma Mater*, or *Anima Mundi*, or even God, Holy Ghost, or Universal Soul. The fact is that Life is made of the stuff of the Mind. To know this is to be a Powerful Healer a Son of the Sun, an Initiate, a real Cosmic Genius.

PSYCHOTECHNIQUE OF SELF-SUPERATION

"Truth is what you live, not what you believe".—K. H.

Thoughts are the channels through which we express our **MIND POWERS**. Our yearnings and hopes are "lines of forces" which we tend over the chasms of the world like bridges, so that we may cross them and reach to what we deem as needs of our own.

But in order to be effective, **the thoughts must be our own**. We gain nothing by simply adhering to others' creeds, or by adopting ideas of others. We must make them our own ere we may benefit through them. The reason why most folks are not as perfect nor as happy as they should be is because of the doctrines which they arbor are not elaborated by and for themselves.

We must feel deeply any notion or creed which we cling to, and be thoroughly imbibed of it so that it may be ours, and not a mere adoption. Thoughts and ideas adopted from others easily make slaves out of us, or we let them haunt us into bigotry and intolerance. But when we conceive our own ideas, and think by our own means and ken, then we are no longer enchained to others' designs, or to traditions and conventional fetters. A notion or idea is really not our

of man if he will only resort to his better self. Furthermore, this is more than a mere doctrinal or theoretical exposé; it is an active plan for self-superation and self-enlightenment.

The marvels of the newer Psychology placed at last within reach of the regenerated, conscientious "Cosmic Man".

The COSMIC MAN is the one that realizes his relationship with the Universe, and who thinks in terms of Cosmic Consciousness.

not wince nor weaken, and you will be on your way to complete success. You will strengthen yourself as long as you remain true to yourself, and you will discover that nothing is really impossible to the person who is true to himself.

Remember, no change can take place even with the aid of the greatest forces if we do not give them time enough to pronounce themselves. We must let the forces work and produce. Forces are like seeds; they must have time to produce their impacts on environment, and to find an adequate vehicle of expression. The forces we use need to be well aligned, well concentrated, well presented, so that they may condensate into material forms. Energy needs time to take the shape of things which it is called upon to represent. This is no exception to the Mind, for all Principles work in the same manner on all the planes of life throughout the Universe.

The above is so true that our thoughts are packs of energy, as Planck would say. When we think, our Mind is energetically functioning in the way and according to the qualities and conditions of our motives and aims.

Bear this well in mind. There is no other secret to life

Intelligence, and PURUSH-PRAKRITI, or Divine Essence and Primeal Potentialities of Life.

If we discipline our Mind and develop it thoroughly, so as to reach such forms of accomplishments as contemplated in this Treatise, and specially in the present Chapter-Lesson, we will no doubt awaken to the realization that Cosmic Consciousness is also within our scope, and that God-Presence is not such a sentimental or morbid religious fancy after all. Of course all these things are factible, but it requires a really well cultivated and well developed Mind to fulfill such aims of ultimate realization.

In order to draw upon the Cosmos, and absorb Universal energies (Prana), we must assume the Mental attitude of complete nakedness, and self-diffusion. We must needs feel deep in ourselves that we are ONE with the Universal Mind and also function as a vehicle of superior Forces. The Mind is in its own right Creative, but it is much more so when it functions Consciously.

In the face of whatever need, think, **VIBRATE** in accordance with the **TATWAS** of the qualities which correspond to the conditions of your aims, designs, and aspirations.

The Mind combines the **TATWAS**, thus becoming the **ATOMIND**, or basic atomic conditions pursued. When the Mind draws on the Infinite, it becomes **COSMIN**, or cosmically generated and qualified. (Consult the **TATWA QUALITIES Table**, elsewhere in this book).

AVATAR OF THE NEW AGE

Important book just out of press which will open our eyes, and cause considerable rectification in thinking trends.

THE COSMIC CALL

An inspirational exposé on Cosmocracy, by the Ill. Maha Chohan (Spiritual Director) K. H., sometimes known as THE TIBETAN.

This is an important treatise on world needs, and it should be consulted by all earnest seekers after Truth and sincere souls.

This is a very important exposé on the grandiose philosophy of Universal Life, or UNIVERSAL LIFE UNLIMITED COOPERATED, as provided and developed by Nature itself.

The scientific propounding of the meaning of Life, as presented, a Spiritual Message of tremendous significance and also of untold consequence for the new thinking trend of the world, as a New Era is ushering in.

For the very first time, man is confronted with the real issues of Life, without being made the play-thing of his own imagination, or a victim of unwarranted dogmas, specious traditions, and questionable orthodoxies.

Perhaps the best title for a truthful presentation of

Life's own mechanism and the immediate consequences of such an unquestionable and vivid Spiritual Dynamics should be "THE HANDWRITING OF GOD ON THE BOOK OF LIFE", or again "THE MAGIC DIMENSION OF UNIVERSAL TRUTH AND THE ETERNAL SPIRIT".

We heartily recommend this book, THE COSMIC CALL.

Our COSMOGRAM SERVICE is now within reach of everyone throughout all the world.

The COSMOGRAM SERVICE is given out to Humanity each month, at the Full-moon, at the occasion of celebration of the Spiritual Fire Festival, hence all the Members of the Spiritual Kingdom, or Great White Brotherhood enter upon Mystic Communion throughout the whole world.

These COSMOGRAMS are of vital importance to the earnest students of Universal Life and Eternal Truth, bent of Spiritual Values and who are eager to have the true Keynotes of Life during each lunar month, and progressively throughout the year, considering the changing conditions of the Cosmos at large. This is definitely a Scientific and Spiritual forecast of Values and Forces that actively prevail during each lunar period, and it is always important to know them, since they mark the conditions of Life on this earth as it proceeds along the far-flung highways of the as yet uncharted Cosmic expanses.

COSMOCRACY

Cosmocracy is the Spiritual Dynamics, or Philosophy of Science and Science of Philosophy, based on the known data held on Universal Principles and Natural biopsychological trends.

Originally developed as a series of essays under the caption of "Cosmosophy" in the year 1917, and finally published in a more concise form under the more exacting caption of COSMOCRACY, our Teaching is aimed to solve all human problems and quandaries.

Cosmocracy may not be a perfect system of thought. However, it is as accurate as the most perfect mathematical logics can be. We do not profess to be God-sent, or to hold a patent on Universal Truth, nor to be Spiritually Mandated. We simply comply with our inner conditions, following the dictates of our Conscience.

All persons interested in a system of thought, or way of appreciating life should call on us, and register for any of our many Courses of study, such as are available in the UNIVERSAL SPIRITUAL UNION, which is the only Corporation legally authorized and morally prepared to spread the Truth of the New Age in its true proportions and significance. All other Kinds of COSMOCRACY, in different forms of presentation under the caption "Cosmocracy" are, consequently, spurious or ill-advised, unless duly authorized by its originator, who has been teaching it since the year 1919.

COSMOCRACY not only reveals the Cosmic structure and Vital Dynamics, but also fosters the regeneration of man, and the formation of a newer Humanity, the Cosmic Man.

MAHA YOGA SABHA

The different YOGA Charts are, indeed, exposés in PICTORIAL WISDOM. They represent the different structural conditions of the being, and the corresponding functional capacities. Thus, they are a departure in the Regal Art of Truth Realizations, as well as in the practice of Divine Healing. They prove indispensable wherever a thorough knowledge of human nature is required, and this is something which no one can overlook, or minimize, if interested in the regeneration of Man and all forms of readjustment within.

YOGA is not precisely an ancient Teaching. It belongs to all the ages; but it is the Science of Life of all true Yoguis. And as we all know, these are not plentiful. Comparatively speaking, there is approximately seven Yoguis to each Guru, and presently there are only three Gurus living. These Gurus are the Mahatmas, or Chohans, Hutulktus, Living Budhas, or Christic Presences, or Maha Jinas.

These YOGA CHARTS make a fine adornment for Studios, Clinics, Libraries, Churches, Viharas, and Institutes, even if we are not capable of understanding their transcendental meaning.

YOGA

This is the most ancient School of Yoga in India, created in the forgotten depths of time, which has always prepared the true Yoguis under the direction and personal attention of Gurus.

The Charts are now available to secular students and the public at large.

These can be had at our address, and they are, namely:
TRANSCENDENTAL YOGA OF KUNDALINI
TRANSCENDENTAL YOGA OF THE CHAKRAS
TRANSCENDENTAL YOGA OF MEDITATION
TRANSCENDENTAL YOGA OF THE HUMAN
KEYBOARD.

All four can be had at the price of \$10.00, including complete information. Send orders, and P. O. Orders, or Checks to:
