SOULCRAFT LYCEUM
A Forum Expounding the Philosophy of Man’s Soul

"A "DIFFERENT" Course of Study Premised on the Theorem that Man First Discovers the Universe; then He Discover God, then He Discovers Himself, then He Discovers Society as Sentient Material for Human Betterment."

This "New Look" in Moral Enlightenment is Achieved by a 2-Year Course for 1,000 Students, Divided into Four Semesters of 96 Lectures Each, and Known As the FRESHMAN, SOPHOMORE, JUNIOR and SENIOR Semesters, the Academic Year Beginning September 7th and Continuing until January 21st for Freshman and Junior Classes, and from January 24th to June 9th for Sophomore and Senior Classes. The Instruction shall comprise two phases, the Public Auditorium Phase and the special Soulcraft Teacher-Course Phase, the former being for the general Visiting Public and the latter for screened teacher candidates.

THE FRESHMAN SEMESTER is devoted to 96 Lectures or Class Discussions on the Background of the Universe as Revealed by Aquarian Science or SpaceShip Intelligences.

THE SOPHOMORE SEMESTER is devoted to 96 Lectures or Class Expositions of the God-Fact as it Has Become Apparent to the Humanized Mind Up Across the Ages and into the Present.

THE JUNIOR SEMESTER is devoted to 96 Lectures or Class Discussions on Man as a Spiritual Entity, Temporarily Residing on this Solar Planet for Experiences in Patterns of Matter.

THE SENIOR SEMESTER is devoted to 96 Lectures or Class Discussions on Practical Expedients for Proselyting Orthodox Institutions to the New Look at Truth.

IT IS PROPOSED to house this national institution in a Group of Special Buildings erected for its Purposes in the city of Noblesville, State of Indiana, all in similar architectural motif. The Central Building will house an Auditorium, together with Administrative Offices, containing under one Roof the quarters for Public Lectures, a specially appointed Chapel for Psychical Materializations and other phenomena, a Museum and Library, a Public Reading-Room and Bookstore. In separate buildings will be provided quarters for Academic Residence throughout the School Year of 250 to 500 Student-Teachers, being Trained to Head Similar Soulcraft Centers across America.

Suppose Youth Went to School to Learn the Fundamentals of the Soul?

WHAT Sort of Civilization Might We Have If an Entire Generation Could Be Enlightened in the Cosmic Verities?

HOW STRANGE is the circumstance that so-called Education today makes not the slightest attempt to enlighten the common person in what he is, how he got into the mortal predicament, whether he’s accomplishing what he expected to accomplish by his advent into physicality, and what his continued history is to be when the current role is finished. Today’s child is turned out “educated” when he knows how to read, write, and “figger”, has a brief go at recent history, a working knowledge of geography, and a passing contact with the findings of current “Science.” Maybe he specializes in some branch of trade or economics that affect to train him to make a living. With such superficial skimming of “knowledge” in his head, he is supposed to go forth, assume his place in society, and solve all quandaries connected with mortal existence in evolving aspects.

His real education comes, of course, in the School of Experience—which, correctly named, is a battlefield, with the victor so termed because of his success in seizing generous spoils.

The interesting question has been propounded: Is it propitious to establish an institution in life today that truly educates the intellect and trains it to proceed up through adulthood equipped with basic knowledge of Man’s place in Cosmos?

Nine out of ten persons capable of grappling with it would say: Try to educate the public—as a public—in a basic knowledge of Man’s place in Cosmos and at once you’re trespassing into fields of Religion. In fields of Religion, one man’s opinion is quite as important as another man’s opinion. Furthermore, you’re due to tread on the corns of the clergy in every instance where their accuracies of concept may be challenged. People under our free form of government have the unalienable right to hold what religious views they please, and adhere to them. Who shall pronounce what is factual and what is not?

Strange to note, no such attitude is advanced concerning the Three Rs, or History, Geography, or Science. Education consists of exploring into these to the limit of intellectual audacities, and determining what is factual and what fallacious. Otherwise, how has Learning itself become of moment?

GO TO the common man and inquire how he feels about being “educated” in the higher enlightenments of Cosmic Fundamentals, however, and granting he is not particularly squeamish about the monopolistic province of “Religion”, he will at once interpret what you are proposing in terms of development of uncommon psychical faculties. Nine out of ten will readily welcome that. They surmise it means equipping them with faculties causing them to surpass their brethren in secular pursuits. That there can be no true cultivation of the psychical faculties until the Cosmic Fundamentals are mastered, he dismisses with a shrug. How has he time to master Cosmic Fundamentals?

This whole question of true and correct educating of the masses so that every life takes on a distinctive and worthwhile meaning, cannot be discussed and dismissed with a paragraph. But there are some features and factors of it that True Education should start with a broad but timely survey of the nature and purpose of the Omnipurpose and in what patterns and to what purposes It functions. After a fairly comprehensive exposition of what today’s academies call Comparative Religions—not only the Christian religion but all earlier religions—Man as the microcosm should be regarded for what he is, and why his tenure in organism takes the periodic forms it does. Right there the broader aspects of psychical phenomena should enter, so that veritably the child understands the most ordinary manifestations of the supernatural, and what the indications of personal survival may be, and what they prove as to earthly significances. Thus every living human being would be acquiring an understandable background for his life and social or economic position—with no more hit-or-miss guesings as to why a given individual should be upon the earth-plane, functioning in a body. As for what happens in the experience called Death and
afterwards, and what the employments of life on the thought planes between worldly visitations are like, the entire design of Mortality and Immortality would be restated in the common person's thinking—and morals and ethics take on effective meanings.

To have a nation thus enlightened could reasonably result in the planet Earth being inhabited by a race of super-beings, to which the fancied "educations" of the present would be as insufferable as they are trivial. Being able to manipulate an automatic pencil, or "hear voices" as one's caprice would be incidental to the vaster and grandeur agenda of lore that gave sense and reason to life in the flesh, shoving so-called Civilization forward 100,000 years at a push. The status quo would not be "upset" so much as re-created. Humankind would suddenly experience a metamorphosis in ideologies making for understanding of all earthly phenomena.

Imagine where such a prostitution as Communism would stand, in the face of such universal knowledge, all based upon Cosmic Fundamentals!

Imagine what a different Earth the Saucer Men would confront in attitudes toward all ideas if the common man and woman knew his and her Esoterics adeptly!

EVERY truly erudite person knows that today there are two structures of Knowledge—the Materialistic or the commonly known and accredited, and the Spiritual or esoteric, meaning reserved for the private increment of the favored few. But less than 1 percent of the populace is even aware of the existence of the last, and sharing it with the hoi polloi is considered a type of willful degradation. So the great rank and file of mankind blunders along as best it may, from generation to generation. Thereat the bigoted erudite have the effrontery to bemoan the universal mess in which mass society finds itself. They of themselves take the position that the Cosmic Knowledge exists for application to themselves alone—meaning for their enhancement as favored individuals. They feel no obligation to pass it out promiscuously to the Man in the Street.

Truly it is a type of snobbery they're displaying. But the unfortunate thing is, such snobbery reacts upon themselves in cosmic retributions, in that even the snobs must live the life in a world that's continually a mess due to the benighted condition of its average citizen. What does it profit a man to have even omniscient wisdom if he must exist and practice it in a human stockyard filled with bellowing cattle?

THERE are so-called Metaphysical "schools" or "colleges" to surfeit, which do anything but aim to elevate the rank-and-file. What they truly perform is commercializing a course in tenets pilfered from Rosicrucianism or Theosophy, whose avowed goal and object is to make the "pupil" psychically adept in ten—or fifty—"easy lessons". These are not schools or colleges. They are correspondence courses in cult mysticisms, profitable or spurious according as they are shaped.

Making money by selling courses is not Education. To essay to lift the great rank-and-file of Man up onto a higher echelon of general wisdom by remodeling his approach to comprehensive Education, is quite a different prospect and proposal.

No where in America, actually, at the present time does an institution maintain that spreads no other enlightenment than the Philosophy of Soul—not Religion as Theology but quasi-scientific Cosmic Fact.

Is this not peculiar?

Nevertheless, something is stirring to that quite practical end.

We shall see what it is, as autumn and winter advances.
